FOREWORD

This edition of **BROADCASTING STATIONS OF THE WORLD** lists all reported radio broadcasting and television stations with the exception of those in the United States of America which broadcast on domestic channels.

Part I (Blue Cover) **AMPLITUDE MODULATION** broadcasting stations: Information is indexed alphabetically by **COUNTRY** and **CITY**. Within a city, stations are listed in ascending order of frequency. Multiple listing of the same station on different frequencies does not necessarily indicate the number of transmitters, since one transmitter may operate on different frequencies at different times. Other information includes call letters and/or station name, power, wavelength, frequency, status of frequency or transmitter and ownership.

Part II (Green Cover) **AMPLITUDE MODULATION** broadcasting stations: Information is indexed according to **FREQUENCY** in ascending order.

Part III (Maroon Cover) **FREQUENCY MODULATION** broadcasting stations: Two sections, one indexed alphabetically by **COUNTRY** and **CITY**, and the other indexed by **FREQUENCY** in ascending order, include the same elements of information as Parts I and II.

Part IV (Brown Cover) **TELEVISION** stations: Two sections, one indexed alphabetically by **COUNTRY** and **CITY**, and the other indexed by **FREQUENCY** in ascending order, include the same elements of information as Parts I, II, and III plus additional data to distinguish audio, video, polarization, and other technical factors which may apply.

The column headings covering all data listed in Part III are defined as follows:

COUNTRY: The name of the country in which the facility is located. Owing to format limitations of the data processing equipment, the popular rather than the full official name is used for some countries. Colonies, protectorates, mandates and overseas territories are generally treated as countries for the purposes of this publication.

CITY: The announced location of the station. It is usually the studio location, since most FM transmitters are placed upon the highest location in the area in order to obtain more widespread coverage. Wherever possible, the transmitter location follows the name of the city. In a few cases the area where the transmitter is located is given on the second line of the entry.

SYMBOLS: Status denoted by symbols may change at any time after publication of this edition. See page following foreword.

CALL LETTERS: Letters and/or numerals used for station identification purposes. Many countries do not assign call letters to broadcast services, hence the numerous omissions.

SLOGAN: The name applied to a station for identification purposes in lieu of or in addition to call letters. The station name has been reduced in some cases due to space limitations, but the essential elements or abbreviations thereof have been preserved.

OWNERSHIP: The entity, individual or corporate, in whose name the station is licensed and operated.
