KCBS
"DINNERBELL TIME" on WLS is America's oldest, continuous farm service program, as old as the station itself, 25 years. Each noon our editors tell listeners about farm meetings in the area, interview leaders in all branches of agriculture, report news gathered by our large staff of Prairie Farmer-WLS field editors. Almost every week finds the program originating "remote" from some rural gathering. Anything that affects the business of farming or farm living is "Dinnerbell" copy. That's why "Dinnerbell" is "must" listening in so many homes throughout Midwest America. Thousands of listeners feel as Mrs. Thomas L. Marks did when she wrote:

"To me, Dinnerbell is an important part of my day. I always feel I know you folks."

Mr. and Mrs. Marks live on an acreage five miles out of Anderson, Indiana, where Mr. Marks is service manager for Pierce Governor Company. Both were born and raised on Indiana farms, and are still intensely interested in the many WLS farm service features such as Dinnerbell, Bulletin Board, markets and weather. They are regular listeners to the WLS National Barn Dance, every day hear Dr. Holland's Morning Devotions broadcast. "Happy Hank" is a favorite with the niece and nephew who live with them: 9-year-old Ann and 8-year-old Jimmy Davis. One of the best remembered events of the Marks' lives is when they met Dr. Holland, WLS staff pastor, and the late Henry Burr, at a personal appearance in Anderson. They think so much of their friendly entertainers at WLS that they have every Family Album published—since 1929!

This family is typical of the vast WLS audience concentrated in the four states of Illinois, Indiana, Wisconsin and Michigan. They like to listen to WLS because they feel we're their friends, because we broadcast entertainment they like, information they need and want. Through 25 years of serving these needs, WLS has built up a tremendous audience loyalty and belief. That's why WLS Gets Results.

And 50,000-watt KDKA becomes even more effective in reaching this expanding market!

Can't spare the time to read the small print? Then better clip this page for your files, because the information below is mighty important in any evaluation of today's markets. Adapted from a survey by Pittsburgh Industrial Development Council.
REORGANIZATION of NBC under newly-elected President Joseph H. McConnell may not come as swiftly as some observers believe. It’s doubted whether new president will move fast except for functional realignment already underway. Personnel realignment may not come for several weeks—perhaps months—according to those who have worked closely with new president at RCA.

WISEST wisecrack heard around NBC is ascribed to F. M. (Scoop) Russell, NBC Washington vice president. He lays claim to being only v.p. who has served five administrations (but started with network in 1929 under Aylesworth).

EDGAR L. BILL, radio old-timer, is withdrawing from station with which his name has been synonymous for 18 years—WMWD Peoria, Ill. Arrangements currently being made to sell his 49% interest to present majority stockholders, owners of Peoria Journal Transcript. Executive Vice President Charles Caley will acquire 25%. Mr. Bill, who organized WLS Chicago for Sears-Roebuck Agricultural Foundation in 1924 and acquired WMWD in 1931,

(Continued on page 88)

Two major 50,000 w station transactions—running into several millions—were in negotiation last weekend: KMPC, 50,000 w Los Angeles outlet of G. A. Richards group, will transfer to NBC ownership subject to customary FCC approval, at reported price of $1,250,000.

WHAS Louisville, 50,000 w 1-A clear channel outlet on CBS, will be acquired by syndicate comprising H. Leslie Atlass, CBS Central Division vice president; P. K. Wrigley, chewing gum magnate and part owner of Windy City; and Gene Autry, cowboy impresario and broadcaster, on basis of proposed offer equaling that of Crosley Broadcasting Corp. (Avco) rejected fortnight ago by FCC largely because of Louisville Times-Courier Journal station’s overlap with WLW Cincinnati.

KMPC transaction culminated several years of negotiation by NBC with Richards group to obtain its own station in key Los Angeles market. Niles Trammell, NBC board chairman just elevated from presidency, personally had handled negotiations and is understood to have shaken hands on terms last week. Transfer papers in preparation.

Mr. Richards has indicated willingness to dispose of L. A. station and possibly of his holdings in WGAR Cleveland because of his health. WJR, Detroit clear channel outlet, believed not for sale.

WHAS transaction, if firm offer is made following preliminary conversations, presumably would entail price of $1,900,000 plus $80,000 per year for ten years for lease of studios and facilities in new Louisville Times-Courier Journal building as well as possibly $50,000 in expense incurred for WHAS-TV, now under construction. This would in effect duplicate Avco-Crosley deal, which was rejected because of what FCC felt would be overlap approaching duopoly in WLW and WHAS coverage.

At time FCC rejected Avco bid, it was indicated Louisville newspaper interests would be disposed to sell on basis of responsible offer from entity interested in maintaining high caliber of WHAS operation. Atlass-Wrigley-Autry syndicate initiated negotiations through Smith Davis, head of newspaper-radio investment firm, but Friday it was said no firm offer had been made. Crosley transaction contemplated maintenance of present operation standards of WHAS including top personnel, and it was believed syndicate offer would be on same broad basis.

KMPC would replace 50,000 w clear channel KFI, NBC’s outlet for score of years. It’s presumed KFI would go independent since other networks have owned-and-operated Los Angeles keys.

NBC owns and operates its own TV outlet (KNBH) in Hollywood while KFI-TV has operated more of less independently. It was reported Earle C. Anthony, KFI owner, was in New York last week to talk on possible TV network affiliations. CBS holds 49% interest in KTTV (TV) Hollywood, with control held by Los Angeles Times. ABC has KECA-TV.

Mr. Atlass, one of radio’s best-known figures and former co-owner of WBBM Chicago, has been top CBS executive in Central Division area since network’s formation in 1927. Mr. Wrigley, who with Leslie Atlass owns control of WIND Chicago, long has been interested in radio both as advertiser and broadcaster. Mr. Autry, who controls KOLL Phoenix and holds interest in KOPO Tucson, is star of Wrigley-sponsored CBS program and has been closely identified with Messrs. Wrigley and Atlass for years in various enterprises. Mr. Autry also owns 50% of KOWL Santa Monica, Calif., but has contracted to sell this interest to his partner, Arthur H. Croghan, for $80,000.

One report was that the three partners would acquire 40% of station in equal shares and that 60% would be sold at public stock issue largely to Louisville and Kentucky residents.

KMPC transaction evokes more than cursory interest because of status of Richards stations, now under FCC hearing order on license renewals. Hearings have been set down in conjunction with NBC’s proposal to transfer control of all three stations to

BIG THINGS HAPPEN IN THE WWVA AREA

Power...

FROM THE WORLD'S LARGEST STEAM POWER PLANT

- In October the first unit of this electric power generating giant will go into service at Graham's Station, W. Va., on the Ohio River near Pomeroy, Ohio. The world's largest steam generating plant... will produce enough electrical current every hour to supply more than one million people... will consume 4,800 tons of coal daily in its four ten-story high boilers. Operated as part of the American Gas and Electric Company system.

WWVA Has the Power to Serve and Sell the Industrial Heart of the Nation

WWVA is a powerful station in a powerful market. Its 50,000-watt voice delivers friendly local programs plus top-flight CBS shows into more than two million radio homes... covering eight and one-half million people... in the rich industrial and mining heart of the nation: Eastern Ohio, Western Pennsylvania, Virginia and West Virginia.

Twenty-three years of service to this vast market has built up a loyal WWVA audience... has made WWVA the top medium of the area for alert advertisers. WWVA can stimulate sales for your products, too, at a surprisingly low cost. An Edward Petry Man can show you how and why: For good business, it's good business to buy WWVA.

**New Business**

WM. WRIGLEY of Canada Ltd., Toronto (spearmint gum), starts thrice-weekly 13-week test campaign for transcribed live program Cisco Kid on CFRY Toronto. Agency: J. Walter Thompson Co. Ltd., Toronto.

OCEDAR Corp., Chicago, extending TV spot schedule for new mop to WTMJ-TV Milwaukee, with further expansion planned. Agency: Young & Rubicam, Chicago.

CANADIAN BAKERIES Ltd., Vancouver (bread), starts four spot announcements daily on 17 western Canadian stations. Agency: James Lovick & Co., Vancouver.

INTERSTATE BAKERIES Corp., Kansas City, Mo., is using 431 spots on seven AM stations and 286 animated announcements on five television stations in southern California to promote its new white bread, Log Cabin Bread. This is corporation’s first use of TV. Agency: Dan B. Miner Co., Los Angeles.

PETER FOX BREWING Co., Chicago, sponsors Armchair Detective on WBKB (TV) Chicago, by teletranscription. Show is live on KTLA (TV) Los Angeles. Telecast 8-8:30 p.m. CST, Sat. Show will continue for 52 weeks. Station account man: JAMES F. BROWN.

AS GUEST of honor at a reception given by the Philadelphia Bulletin, Donald Thornburgh (second right), newly-elected president of WCAU Inc., was formally introduced to the city’s business, educational and political officials. The reception, held at the Midday Club, was attended by 400 civic and industrial leaders. On the receiving line are (1 to r): Richard W. Slocum, general manager and secretary of the Bulletin; William S. Polay, chairman of the board of CBS; Robert McLean, president of the Bulletin; Mr. Thornburgh, and William L. McLean Jr., Bulletin vice president and treasurer.

BROADCASTING • Telecasting
You can't cover California's Bonanza Beeline without on-the-spot radio

Catch the Beeline audience and you've really caught something: more buying power than San Francisco and Portland combined ... higher retail sales than the whole State of Connecticut.†

But remember where these prosperous people live — in inland California and western Nevada. And the radio stations they listen to most are their own on-the-spot stations.

Each of the five BEELINE stations is located right in a major Beeline shopping center. Use all five stations for solid Beeline coverage, the kind of coverage you get, for example, from KERN Bakersfield: a 30% greater share of the evening radio audience than the next best Bakersfield station.

†Sales Management's 1949 Copyrighted Survey

William Pitney named to executive staff at Earle Lodge & Co., Chicago. He is former account executive at Leo Burnett Agency and general sales manager of Trims division of United Wallpaper, both Chicago.

Robert W. Garrison, formerly with Ross Roy Inc., Detroit, and Tomi Block, formerly with Federal Adv. Agency, New York, as account executive, join copy staff of Kenyon & Eckhardt. Mr. Garrison will work in Detroit office while Miss Block will be in New York office.

C. Manford Grove, art director of W. B. Geissinger & Co., Los Angeles since agency's inception three years ago, elected to board of directors and made vice president of agency. Prior to joining Geissinger Co., he was art director with BBDO, Los Angeles.

Frank A. Woods joins copy staff of Brooke, Smith, French & Dorrance, Detroit.

Alf Lewis, formerly of CHML Hamilton, and Exclusive Radio Features, Toronto, joins Alkin-McCracken Ltd., Toronto, as radio and TV director. He comes from Atherton & Currier Inc., Toronto, where he was radio director.

Jimmy Fritz, formerly president of Fritz, Carlson & Cash, Los Angeles, joins Ted H. Factor Agency, same city, as vice president.

F. Clifford Estey, joins account executive staff of Caoler, Hempstead & Hanford, Chicago, after working as vice president of W. W. Garrison & Co., same city. He worked previously at Reincke, Meyer & Finn, Geyer Co, and American Zinc Products, division of DuPont.

Mary Morriis, formerly in television department of J. Walter Thompson Co., Hollywood, joins Biow Co., that city, as agency contact on NBC This Is Your Life and Don Lee Red Ryder programs.

Raymond J. Leicht, formerly with advertising staff of Pelham (N. Y.) Sun, and before that with Fuller & Smith & Ross Inc. as copywriter and account contact man, joins copy department of Geyer, Newell & Ganger, New York.

Alfred E. Smith, formerly with Charles R. Stuart Adv., San Francisco, joins Harrington, Whitney & Hurst, same city, as account executive and marketing and research director.

Ken Derby, formerly assistant supervisor of night operations at NBC, joins Fletcher D. Richards Inc., New York, as radio-TV copywriter. Frank H. Cankar, formerly in sales, sales promotion and advertising for International Register Co., Chicago, joins agency as account executive for Foremost Dairies, Jacksonville, Fla., account.

Walter Cash, formerly vice president of Fritz, Carlson & Cash, Los Angeles, joins Foote, Cone & Belding, same city, as account executive.

Robert Carey, public relations director of Botell & Jacobs, Chicago, elected director and treasurer of Public Relations Society of America.

Brian Devlin appointed manager of Montreal office of Erwin, Wasey of Canada Ltd., Toronto.

McCann-Erickson Inc., New York, changes telephone number to Jusdon 6-8400 effective today (Oct. 17).

Broadcasting • Telecasting
Business is always better in Washington, D.C.

Fact: Washington ranks 11th in population among metropolitan areas, but moves up to 9th place in retail sales. Why? Consumers consume more in Washington. And WTOP reaches 25% more of those eager consumers than any other station.

More on 'Series Time'

You have a most interesting article commencing on page 23 Oct. 3 entitled, "It's Series Time." The article goes on page 81 to make reference to a successful stunt originated by MBS-affiliated-WCSC at Charleston in 1947.

From then on the article deals strictly with events as they happened, but I think there are two things that should be pointed out. First, the stunt was performed by WCSC probably in 1940 or 1941, when we were as now, affiliated with CBS. I have the warmest regard for Frank White and would enjoy an association with him, but we have not had an association with Mutual except for some special event like the World Series.

Incidentally, two things stand out in my mind about this Jackson episode. The first is a personal experience when our janitor, after parading said Jackson at a football game, tied him to a fence and the owner failed to show up after the ball game. I then had the most unusual experience of leading a Jackass, in this case neither an employee or myself but an animal, out of the side window of an automobile down the main street of Charleston with my wife driving, she having a mild case of hysterics and I frequently suffering from what seemed like a broken arm, because my much amused spouse, and the reluctant donkey could never agree on a mutual speed.

The other thing that stands out in my mind is that Tom Means, who was then doing some part-time promotion for us, likewise nearly died laughing and some eight or nine years later, sits in a responsible position at CBS, which proves two things: first that a basically funny stunt can be used over and over again. And next, that one of the great pleasures in broadcasting is to supply the beginning opportunity for capable people who go on to greater responsibilities.

John M. Riviera
President WCSC
Charleston, S. C.

Re: NARBA Snarl

EDITOR, BROADCASTING:

In your Oct. 3 editorial NARBA Snarl (Mex.), you write: "The very essence of NARBA, since the first treaty was drawn in 1927, has been that facilities are allocated to serve the nationals of each signatory country, and not those across the borders."

Would you please define the status of Canada's CKLW as a Detroit outlet under this essence of the NARBA?

José María Gonzales
Owner and Manager
XEO Matamoros, Mex.

[Editor's Note: If the shoe fits, whether it's Canada or Mexico, wear it. It's true that CKLW serves the Detroit area. It is also true that five stations in Detroit serve Canada's populous Windsor area.]

Likes 'Buyers Market'

EDITOR, BROADCASTING:

In getting out the "Buyers Market Can Mean Business for Broadcasting" booklet, you have provided people in radio with a very handy means of most useful information, and especially that true of today.

May we compliment you on your generosity and good judgment.

Lambert B. Beenukes
General Manager
WDAS Philadelphia

Cites CKEY's Coverage

EDITOR, BROADCASTING:

... writing ... in the interest of giving credit ... in connection with radio coverage of the Noronic disaster. ... CKEY (Toronto) did an outstanding job, one of the finest I've seen in some 25 years in newspapers and broadcasting.

We in Buffalo know CKEY's coverage was excellent because CKEY staffers were more than generous in responding to WEBR's call for help. CKEY staffers, using our telephone recorder connector, pro-

How Popular Can You Get?

The campus hero has nothing on WCAO these days. Smart advertisers take a gander at the super-colossal CBS programming job this Fall—and rightly figure that WCAO is a better buy than ever in the Baltimore market. Ask your Raymer representative about availabilities on some of these popular WCAO local favorites—"Musical Clock"—"Hold Everything"—"Your Friendly Neighbor"—"Afternoon Carousel"—"The Hal Victor Show"—"Saturday Night Frolic"—and many others. It's a bonus audience—backed up by constant WCAO local promotion and showmanship.

... and every program and announcement on WCAO is duplicated on WCAO-FM (20,000 watts) at no additional cost to the advertiser!

WCAO
"The Voice of Baltimore"

CBS BASIC • 5000 WATTS • 600 KC • REPRESENTED BY RAYMER
MAN'S DIGNITY was tickled in the rib a bit, but a sure-fire promotion scheme to increase polo emergency fund coffers in the Greensboro, N. C., area counted votes and pennies to total of more than $15,000 in WIBG's campaign to select the "Prettiest Man." Capacity for hard work and love for fun-making gave Bob Jones, WIBG morning man and contest supervisor, full away for originality.

While similar male beauty contests had been held before, this

Mr. Jones (l) reads returns to Aileen Gilmore, WIBG official vote tabulator, and Edward Loewenstein, polo fund official.

year the balloting had a price tag of one penny a vote to the Guilford County Chapter polo fund. Deadline for the three-week drive was set at midnight Oct. 1. Eighty candidates were entered. WIBG's offices and studios were swamped with young and old contributing pennies, nickels, dimes, quarters and others even made use of checkbooks. The more money contributed...

On All Accounts

WHEN any of the three advertisers serviced by the Hollywood office of Cecil & Presbrey casually visit the West Coast manager of the office, Riley Jackson, they have reason to be pleased.

Atop Mr. Jackson's desk they find a carton of Philip Morris cigarettes; on his wrist a Speidel watch band, and on a shelf a tube of Ammi-i-dent toothpaste. Nor are these products just on display for such occasions. They are rather an indication of his belief in the products he is advertising. That, Riley feels, is prerequisite to honest advertising. One must believe in what one is attempting to sell, in order to convince others, he contends.

Riley's official duties towards these clients are to supervise their shows: MBS Queen for a Day for Philip Morris (co-sponsor with Alka-Seltzer); CBS Burns and Allen Show for Ammi-i-dent; and CBS-TV Ed Wynm Show for Speidel. The last-mentioned show which debuted Sept. 29 amidst klieg lights and formal dress in CBS Hollywood studios is one of the first major commercial television shows to originate on the West Coast and be kinescoped for Eastern showing.

RILEY

Queen for a Day reins will be removed from the able hands of Riley Jackson this week (Oct. 21) when the cigarette firm transfers its two-year sponsorship to two programs which will emanate from New York—Ladies Be Seated and One Man's Opinion, both on full ABC network.

Riley's entrance to radio came in 1935 when he deserted his business education at Illinois Wesleyan U., Bloomington, Ill., after two years to become an announcer with local station WJBC.

Here, Riley recalls, he had the opportunity to "learn radio the hard way." In addition to announcing, he wrote (and typed) copy, sold time and turned records. Before long he was promoted to program manager.

In 1937 he transferred that title to WIND Chicago. One of his chores at that station was to be disc jockey for an all-night record show or a week Night Watch. Here one of his duties was to play "I Love You Truly" every morning at three for the listening ears of his fiancee, who set her alarm daily for the occasion. This went on until the station objected on the grounds that the song was being plugged.

On another occasion, when Riley playfully answered a request (from...

(Continued on page 20)
WMT has its finger on Dike (IOWA)

Fire Prevention
IN an all-out effort to cooperate with Washington's Fire Dept. during Fire Prevention Week, WWDC Washington worked out the following arrangement: Fire alarm headquarters telephoned the station's newsroom whenever a fire company was called out to answer an alarm; station then gave an immediate spot broadcast, relaying the report to the radio audience. Each announcement was preceded with the sound of a fire siren and ended with a tag-line pointing up Fire Prevention Week.

Caravan for Hero
HEROIC rescue of two children from a rocky "jetty" by life guard Gene Beck resulted in his being paralyzed from his shoulders down for life. WMID Atlantic City, N.J., promptly organized the "Gene Beck Caravan" in order to raise money for a fund for the young man. Entire staff of the station worked on the 17-hour caravan which netted $2,500 in pledges.

News for Deaf
NOT only does KPRS Olathe, Kan., keep a night light on the AP ticker in its front window so that students at the Kansas School for the Deaf may keep up with the news but General Manager Tex Witherspoon also sends all unused wire copy to the school so that large groups of students may be "read" the days news by sign language. Mr. Witherspoon claims the 240 deaf students are the biggest boosters of KPRS in the county.

Wins Award
PRACTICALLY single-handed, Henry Hickman, disc jockey for WBFR Baltimore, won the station Al Jolson Activity bronze plaque for the Polio Emergency Drive in Maryland. Mr. Hickman made daily appeals over his Club 1500 show, airing the alarming facts about polio. Special additional effort was involved in tape-recorded interviews of victims in iron lungs at the opening of the Emergency Drive.

FM Results
GENEROUSITY of the FM audience was proved recently when WLAG-FM LaGrange, Ga., made an appeal during the baseball broadcast. Money was needed for an urgent "blue baby" operation for an 18-months-old LaGrange boy. By the next day, $450 had been pledged.

To the Rescue
WHEN a plane was lost in darkness above an airport near Pittsfield, Mass., WBRK Pittsfield came to the rescue. Police called the station to say that the airport's lights had been put out of commission by a severe rain storm. Immediately the station asked cruising motorists to drive to the airport and use their lights to illuminate the runway. Fifteen minutes later cars were lined up beside the airfield, making it as bright as day, station reports. Over 300 automobiles had to be turned away. The plane was able to get its bearings and land safely.

FUND RAISERS
Radio Helps Polio Fight
FUND raising by promotional know-how to lift sagging emergency polio campaigns in home areas was prevalent among stations in various parts of the country in recent weeks. Among reports to BROADCASTING last week were these:

WMBO Auburn, N.Y., held an auction sale over the air, prizes being an 825-pound prime beef steer and other animals. Conceived by General Manager Frederick L. Reese, the mayor, president of the city bank and other civic leaders, emceed a disc jockey show asking listeners for pledges. Final tabulation showed about $10,000 for the fund.

The four AM stations in Portland, Me., WCMH, WGAN, WPOR and WMTW, joined forces and gave its area's emergency fund a shot in the arm to the tune of more than $4,000 in one evening's effort. The stations took turns in continuous programming from 6:30 p.m. to 2 a.m., each broadcasting a segment. Telephone pledges were taken and special programs aired. As each segment of the Polio Parade neared conclusion the broadcasting station called attention to its "good neighbor" station which next carried the ball in the fund-raising drive.

A total of $12,746.17 was solicited by WHAS Louisville which turned over the station's facilities for 24 hours to recruit funds for a fund campaign that fell short in the area. Campaign began at 5 a.m., sign-on time on Sept. 24 and ended at 5:45 p.m. the following day. Featured were documentaries, personal appeals by polio victims, an all-night live talent program and other shows. On "Polio Dollar Day" listeners were urged to send in dollar pledges, and names of the senders were read over the air.

Entire operation of WNOR Norfolk, Va., for one day was dedicated to raising funds for the Polio Emergency Drive. Ted Harding, station's morning disc jockey, spent the day appealing for money, interrupting all programs for reports on funds raised, and interviewing former polio patients, Navy admirals, civic figures and representatives of the drive. At the end of the day's activities, over $3,000 had been pledged.

‘For The Record'

EDITOR, BROADCASTING:

Woe is me and long are the faces of the TelePIX newsreel staff at WPIX, The New York News station, after reading the story about radio and television coverage of the Noronic disaster on page 65 of the Oct. 3 issue of BROADCASTING...

. . . Your alert publication missed the outstanding television beat scored by TelePIX on this news event.

For the record, here is what happened:

Less than 18 hours after fire broke out on the Noronic, early on the morning of Saturday, Sept. 17, a complete film story of the tragedy was shown on WPIX at 9 p.m. the night TelePIX cameraman Les Mannix flew to Toronto in the Daily News plane Saturday morning. His films arrived back in New York at 7:15 that night and were developed and edited in time to be shown at 9 p.m. The reel was shown again at closing time and repeated twice on Sunday.

Robert L. Coe
Vice President and Manager
WPIX (TV) New York.

Buddy Clark Photo

EDITOR, BROADCASTING:

Thought you might have a use for this photo of a seldom-pictured guy, Buddy Clark. So far as I know, it's his last photograph and was taken just a few days before his death [Oct. 1], in Hollywood, where I was tape-recording interviews with some of my friends, among them Sinatra, Como, Dinah Shore, Dick Haymes, Andrews Sisters, Phil Harris, Minsky Carson, Tony Martin, Andy and Della Russell, Larry Parks and Betty Garrett, etc.

Incidentally, Buddy was to have started his starring role in a new film this month, a picture titled "Disc Jockey," in which he would play a singing disc jockey and just to show you the kind of a swell guy he was—he insisted that I appear in the film with him so he could publicly credit me as the original singing disc jockey. I was to have flown over to Hollywood on the 23rd to begin shooting on my small part.

As a tribute to a great artist and a good friend I devoted the last hour of my show last Monday (Dick Gilbert Show, Mon-Fri., 12-3 p.m.) to a memorial program of Buddy's 15 most popular records plus a first broadcast of the interview he is pictured giving. By

Mr. Gilbert (r) interviewing the late Buddy Clark.

WTXL Carries 'Em Too

EDITOR, BROADCASTING:

Just as we do every week, we've just finished reading the current issue cover-to-cover (Sept. 20).

On page 62, there appears an item under Promotion titled, "How

Many Baseballs." I expect this story came to you as a press release from the station whose call letters appear there. It's quite a story, but it isn't very accurate.

In the first place, that station carries the day games of the Braves and Red Sox on AM as well as FM. Thus FM cannot be given exclusive credit for whatever measure of success they claim for the stunt.

Secondly, the giveaway was extensively promoted day after day on AM as well as FM. So it is not true to claim that a single announcement was aired.

Finally, the station's correct location is Chicopee, not Springfield.

Our only interest in the matter is that WTXL is now the station here for night baseball to the delight of many thousands of fans without FM equipment.

Lawrence A. Reilly,
General Manager
WTXL West Springfield,
Mass.

Three “Boys From Syracuse” exchange congratulations at WHDH Boston as Managing Director Bill McGrath (left) celebrates his 20th anniversary in the radio industry. With him are Actor Bill Lundigan (center), who appeared for the Boston opening of his new movie, “Pinky,” and George Perkins, WHDH program director. All three are alumni of Syracuse U. and began their careers together announcing at WFBL Syracuse.

Milestones

- Henry Gerstenkorn, national advertising manager of Don Lee Network, is celebrating his 10th anniversary with the sales staff.
- Chief Engineer I. A. Martino of WDBR Hartford, Conn., is observing his 26th anniversary with the station this month.
- Carlton Brown, transmitter engineer at WDBR-FM Hartford, is observing his 10th anniversary with the station during October. He joined WDBR in 1959, and has his headquarters at the station's Meriden Mountain transmitter.
- Sponsors and guests, numbering over 200, were feasted by KAYL.

Mr. Swan

Storm Lake, IA, on the occasion of its first anniversary last month.

W. Gordon Swan, program manager for WBZ-WBZA Boston-Springfield, Sept. 30 celebrated his 26th year with the stations. He first became associated with WBZ as an announcer when it was located in Springfield. Later he was named traffic manager and, in 1941 program manager. All programming activities of WBZ-WBZA and FM operations, including WBZ-TV are coordinated under his direction.

- Saturday, Oct. 15, marked the beginning of the fifth year of the Quizdown show over WXYZ Detroit. Program features children from local schools.
- WCAU Philadelphia's Career Forum, a vocational guidance program, began its fifth year on the air Oct. 5.

On All Accounts

(Continued from page 11)

two men later proved inebriated) to play two records together, the present Mrs. Jackson, hearing the conglomeration of "Adios Muchachos" and "I Won't Be Home Tonight," thought he was drunk and threatened to break their engagement.

In 1939 he left the station to join Wade Advertising in Chicago. For that agency he produced the Quiz Kids and National Barn Dance and was associated as agency supervisor on NBC News of the World.

Service in 1942

The war interrupted his agency career and in 1942 he joined the Air Force. Stationed at Chanute Field for the next year, he wrote and directed training films for the Training Command of the Air Force. A year later he was transferred to the Armed Forces Radio Service, working on shortwave newscasts out of New York.

In 1946 he was out of uniform and back with Wade, where he resumed the discipline of the Quiz Kids. The following year Riley left to open and manage West Coast office for Louis G. Cowan Inc. (packager) in Hollywood. A year later he parted with that office and became Cecil & Fresnay representative on Queen For A Day for Philip Morris.

On Sept. 1 of this year he established a Hollywood office for the agency in the Equitable Bldg, at 6235 Hollywood Blvd.

Riley was born in Clinton, Ill., in 1917. There he attended grammar and high school before entering Illinois Wesleyan.

In high school and college he distinguished himself by "blowing his own horn"--as a trombonist in the orchestra. The high school orchestra served as a romantic meeting-ground, for Margaret Reeser, the present Mrs. Jackson, played drums in the same group.

In 1941 the two musicians decided to make it a permanent and took out their wedding license.

Riley does little trombone playing now. In fact he was recently discouraged against ever playing again. For, taking the instrument out of its case, where it had gathered dust for years, to charm their 13-month-old son, Brian, he was rewarded with screams of terror from the unappreciative little fellow.

The Jacksons carry on their three part harmony in a North Hollywood home.

Corn is Bustin Out All Over--

Right on the heels of a 167,244,000 bushel wheat crop comes the tidal wave of a "super" yield of corn. Crbs are full. Barn yards are dotted with temporary storage units. And on many farms this surplus "cash" is even piled on the ground.

WIBW LISTENERS ARE RICH

The 1,202,612 farm folks in WIBW's audience are buying as never before. But what tickles our advertisers (and us, too) is the flood of reports from dealers that these loyal listeners are flocking into their stores and insisting on brand names they've "been hearing about on WIBW."

Moral: For result-full selling the farm families in Kansas and adjoining states, depend on WIBW!

Mr. Sam B. Schneider
Farm Service Director
Radio Station KVOO
Tulsa 3, Oklahoma

Dear Sam:

Congratulations on the fine job you and KVOO are doing selling Dr. LeGear’s new approved FLY SPRAY.

As you probably realize, this product is on the air over a number of stations and is being pushed by other mediums of advertising. All of our salesmen are doing a good job of selling this item. This, naturally, speaks well for the product and for the sales force but, of course, the real test of effective advertising is unsolicited orders.

I just wanted to advise you that we have had more unsolicited orders for Dr. LeGear’s FLY SPRAY from KVOO’s primary area than from any other area that we cover. I want you to know that we all appreciate this very much and trust that you will keep up this “top-notch” selling.

Sincerely yours,

Dr. D. H. LeGear

Dr. L. D. LeGear Medicine Co.

IF IT’S RESPONSE YOU WANT
YOU GET IT ON KVOO!

IS U. S. SPECTRUM HOG?

Congress Will Seek Answer

FIRST serious effort to make Uncle Sam justify the barring of important spectrum space from general use was under way at the weekend.

This official resistance to the thousand-fold increase in demands for private operations has finally come under the Congressional spotlight, giving rise to hope that more space may become available to the broadcast-TV industry.

While such hopes are strictly long-range, the fact that a branch of Government at last has dared to challenge the always sacrosanct governmental use of the spectrum was welcomed in both industry and other governmental quarters.

Conducting the probe is the Senate Interstate Commerce communications subcommittee, of which Sen. Ernest W. McFarland (D-Ariz.) is chairman [CLOSED CIRCUIT, Sept. 26].

Noting the startling growth in the radio communication arts, with the demand always greater than the supply, Sen. McFarland declared, "FCC cannot allocate what it does not have."

Sen. McFarland reported he had sent letters to the Interdepartmental Radio Advisory Committee, which allocates frequencies between private and government users, and other interested sources seeking extensive information for basic use by the subcommittee. Text of the inquiries was not disclosed. Early next session the group expects to delve into the overall spectrum problem on a comprehensive scale.

Complaints Lodged

The inquiry is believed to have stemmed from complaints that many government agencies, including the military, are pre-empting precious spectrum space at the expense of private users—among them, radio and television—while others lack adequate frequencies.

The Senate subcommittee probe also will encompass a study of the extent of government operation of communications systems in competition with privately owned wire and telegraph companies.

"In getting frequency assignments for private users, (FCC) must compete with the demands of the Army, Navy, Air Force and a dozen other government departments," Sen. McFarland pointed out. He observed:

"Some of us thought that the unification of the armed forces would result in a tremendous saving of frequencies by permitting a single communications service to handle the business. There is some doubt that it has turned out that way.

"Each service apparently thinks it must have its own frequencies to be operated by itself for command, tactical and just plain, everyday communications, although in peace-time no circuit is ever used to anywhere near capacity; some in fact are merely reserved without any use.

"On top of that, the defense forces want frequencies for experimental work of a secret or confidential nature and other frequencies are being used for such purely military uses as sonic detection, guided missiles, radar for detection of aircraft, and similar uses."

Sen. McFarland said it was evident domestic and international communications companies should be strengthened and felt the nation must rebuild its communications network for "future defense needs."

He noted that FCC, in handling frequency allocations for private use, is called upon to grant licenses for radio broadcasting, television, radio communications all over the world, marine and coastal communication, aviation, bus and truck use, taxicab use, amateur communications, inducing heating and "scores of other uses."

The military, State Dept. and General Services Administration operate their own extensive communications systems, Sen. McFarland added. State Dept., for example, is assigned radio frequencies for overseas communications and also uses the facilities of the Army and Navy as well as private companies, while the three armed forces also maintain and operate (Continued on page 80)

SPOT RADIO

Cost to Client Down, Study Shows

SPOT RADIO initial costs have gone up 37% since 1943 but at the same time the number of set owners has increased 40%.

Those were the conclusions reached in an exhaustive analysis of spot radio just completed by the research staff of Free & Peters which firm will send this week to advertisers and agencies.

The study was made, says the foreword of the 46-page report, "to determine whether this major advertising medium is now (1949) giving you advertisers as much (or more or less) for your dollar as it did three and six years ago."

The study's conclusion is succinctly stated in the report's title—"Spot Radio Costs Less Today."

For comparative purposes, F&P selected the years 1943, a mid-war year; 1946, the first full post-war year, and 1949, the present year. Most of the data were taken from the 38 stations represented by F&P "partly because we knew most about them" and partly because they are well distributed geographically (the counties covered contain a total of more than two-thirds of the U. S. radio homes), and are well divided as to network affiliation (13 NBC, 10 CBS, 10 ABC).

The study's first finding is that the cost of spot radio has increased since 1943. In that year the average charge per station for the full F&P list of one daytime announcement at the maximum discount minute rate was $11.19. By 1946 it had risen 17.7% to $13.16. In 1949 the announcement cost $15.52, a rise of 37.3% over the 1943 figure.

"While program time rates have increased less," the report explains, "talent, news service, etc., have tended to increase as much or more in some cases. Because of the variables like program changes, talent calibre, etc., we cannot make as hard and fast a campaign comparison as in the one-minute announcement rates."

But other things than station rates have changed since 1943. The country's population has risen from 130,982,300 that year to 175,500,000 in 1946 and 146,496,300 in 1949. More pertinent here, the number of U. S. radio families, which was 32,500,000 in 1943 and 33,888,000 (Continued on page 80)

October 17, 1949 • Page 23
ATTENDING a luncheon last week at the Wardman Park Hotel in Washington, during RCA's color TV demonstrations for FCC and industry observers, were (l-r): Frank M. Folse, RCA president; Mrs. Donald Sarnoff; Dr. Les De Forest, vacuum tube inventor and radio pioneer, and Brig. Gen. Sarnoff, board chairman and chief executive officer of RCA.

CENSUS POLICY

Hauser Says FM Count In '50 Not Feasible

COUNT of FM homes in the 1950 decennial census is not feasible because of scientific problems in collecting the data and the lack of funds required to do an accurate job, according to Philip M. Hauser, acting director, Bureau of the Census.

The bureau's decision to include AM and TV but not FM was based on field tests in which it was found that a substantial share of set owners reported they have FM though such is not the case. This confusion is partly ascribed to the dual call-letter practice.

Writing to the editor of Broadcasting, Director Hauser said the bureau has received a number of letters from the FM industry and from members of Congress in which inclusion of an FM tabulation is requested. He added that he had read a letter from Nathan Frank, WHNC-Henderson, N. C., in the Oct. 8 Broadcasting implying discrimination on the bureau's part for failing to include an FM count in the 1950 census.

Explaning the bureau's problem in attempting to count the number of homes with FM, Mr. Hauser said:

"We have serious doubts concerning our ability to obtain satisfactory information on this subject. In fact, our experience indicates that a separate question on FM radio is neither simple nor readily understood.

"Experience with owners of radio sets indicates that many report that they have an FM radio even though their set is unable to receive FM programs. In fact, some receivers so reported were purchased before FM receivers became available. One of the factors contributing to this error is the practice of using the identification 'This is WXXX and WXXX-FM,' by stations which broadcast simultaneously on FM and AM. Furthermore, many set owners are not acquainted with the technical differences between AM and FM receivers."

Mr. Hauser said the bureau did not feel "a relatively large expenditure of our limited funds would be justified to obtain and publish data, the accuracy of which would be subject to grave doubts."

He explained the Bureau "cannot conscientiously include any items which are essentially experimental in character and the success of which are not definitely assured by previous experience."

He said inclusion of an FM question in later statistical or census programs will be seriously considered in growing experience."

The two radio questions in the 1950 census read: "Is there a radio in this unit?" covering AM, FM and shortwave bands or combinations, and "Is there a television set in this unit?" The first question, Mr. Houser noted, includes AM sets, FM sets and those having AM and FM in combination.

He said there was considerable demand for these questions from business groups and government agencies, as well as the radio and television industries. "Moreover, and this is of considerable importance," he said, "experience indicates that these are relatively simple questions, readily understood by the public; that we shall be able to obtain these data with a high degree of accuracy; and that they will require a relatively small amount of time and expenditure."

Color TV--This Week's Summary

RCA COLOR television was revealed last week in a series of Washington demonstrations, while the FCC, wrapping up the third week of its hearings, officially abandoned hope of completing them before late December.

RCA's official showing for the FCC record, staged with equipment set up within a few hours of delivery and admittedly disappointing, was followed by a series of informal demonstrations which brought reports of marked improvement as the week progressed.

In the Commission's hearing room, the RCA demonstration was also the target of stinging criticism by Dr. Peter C. Goldmark, inventor of the rival CBS system, who said he thought RCA might as well abandon the system now. RCA authorities said he would be answered point by point.

FCC's new time-table for the hearings left no chance that testimony on other phases in the overall television review--including color TV, changes in existing TV standards, and nationwide VHF-UHF allocations--could begin before the first of the month.

This obviously would affect the lifting of the year-old black-and-white licensing freeze unless the Commission yields to industry pleas for a "thaw" before the other far-reaching determinations are made.

Recess in Color Oct. 27

The time-table anticipates a recess in the color hearings starting about Oct. 27, when FCC hopes to complete the taking of direct testimony. Comparative demonstrations of black-and-white and the RCA and CBS color systems are slated for the week of Nov. 14, and the week of Nov. 28 the Commission will go to San Francisco for a demonstration of the third color system, Color Television Inc.'s, to be held not later than Nov. 30.

Cross-examination, deemed certain to be long and detailed, will begin Dec. 5. With a few exceptions, general questioning by the participants is being deferred until that time. Exceptions include Columbia's Dr. Goldmark, who is slated to return to the stand today (Monday) for cross-examination, and Dr. Charles Willard Geer, who described his three-gun color tube and subsequent questioning last week.

Color Television Inc., opening its case late Thursday and expected to continue this week when cross-examination of Dr. Goldmark is completed, reported laboratory work is being started on development of a single direct-view three-color tube which would permit conversion of existing monochrome sets to CTI color for $65 to $75. But at the present stage the company's witness, Charles W. Partridge, said CTI does not favor conversion because the apparatus is "troublesome and costly."

Manufacturers Give Testimony

Much of the week was devoted to manufacturers' testimony on behalf of the CBS system, anticipated by Dr. Goldmark's statement the week before [Broadcasting, Oct. 1]. They respectively foresaw color sets with an effective 10-inch picture retailing at about $220; external electronic adapters for existing sets selling at about $40 and "adapter kits" for perhaps $20, and external color converters as low as $70 at the start and about $55 later.

A surprise witness for CBS was Dr. Dean Brewster Judd, Bureau of Standards color expert, who said he was appearing with the knowledge of Bureau of Standards Director E. U. Condon, head of a special group investigating color prospects for the Senate Interstate and Foreign Commerce Committee.

Dr. Judd said he considered CBS color fidelity comparable to that of Technicolor movies, and compared RCA's two-color system to partial color blindness.

Dr. Allen B. DuMont of DuMont Labs, meanwhile reiterated to newsmen that he still considered color TV years away.

Until the late-October recess, the hearing will proceed on a 3 1/2-day week, Monday through Thursday noon, to give FCC a better chance to keep up with other pressing business.

(Detailed resume of hearings, page 47)
Large Share for Radio in 1950, ANA Predicts

By HERMAN BRANDSCHAIN

ADVERTISING budgets in 1950 will match those of 1949 and radio will be getting a large share of the appropriations, according to conclusions drawn at the 40th annual meeting of the Assn. of National Advertisers in New York.

Radio's position as a big gun in the advertising arsenal was given a vote of confidence by speaker after speaker who addressed the 1,000 advertising, publishing and broadcasting executives who attended the three days of sessions which concluded Wednesday.

In fact, one outstanding trend noted in talks was the omission of predicting the early demise of radio. Speakers made these points among others:

- In 1950 the number of radio homes will increase from 39 million to more than 40 million and to 41 millions in 1951.
- Radio will continue to be the best buy for many advertisers.
- Television has reached the pay-off point for many advertisers.
- Television competes with other media more than it does with radio.
- Faulty planning is the cause of much space and time cancellations.
- Plant expansion has increased phenomenally, nearly doubling in the past decade. Wise management will consider expansion of marketing, including advertising, to keep such plants working and growing.

The word about 1950 advertising plans of ANA members was brought to the meeting by J. F. Kurie, vice president, media research, ANA. His report, based on a confidential survey of members, showed that most of the ANA member classifications expected either to increase advertising budgets in 1950 or hold them to the 1949 level.

His figures:

New ANA officers are (l to r): W. B. Potter, advertising manager of Eastman Kodak Co., elected chairman of ANA board; William N. Connolly, advertising manager of S. C. Johnson & Son, retiring chairman of ANA board; Albert Brown, vice president Best Foods, new vice chairman of ANA board; and Paul B. West, reelected president of ANA. Elections were held Wednesday.

* * *

advertising budgets, few expected such a boost to be more than 15%. On the other hand, those planning to slash their budgets are contemplating only slight cuts, he said. He concluded that advertising appropriations in general would hold to the 1949 level.

The importance of radio in the ANA deliberations was apparent from the opening session Monday, when Sherwood Dodge, vice president, Foote, Cone & Belding, talked on "The Changing Scene in Media." He held that television is not radio's biggest competitor. He said: "Radio remains the only mass medium in which you can make a detailed selling pitch while the housewife is doing her job. For this reason, it looks as if television competes for a share of leisure time most with other media—at least during daytime."

Mr. Dodge called television the "most conspicuous force in our changing patterns of communication" but said that since it cannot now reach more than 6% of U.S. homes it cannot yet do the job a national medium must do.

Main radio event of the meetings, however, was a session Tuesday of the ANA Radio and Television Group at which, on an off-the-record basis, members could let their hair down during a question and answer period. The session was divided into four parts, titled: "Don't Give up AM Radio?"; "Has Television Reached the Pay-Off Point?"; "Broadcast Audience Trends—AM and TV," and "The FCC Giveaway Order and the FCC Review of Color Television."

Although the press was excluded, the main statements of some of the speakers were released.

Connolly Talk

On the "Don't Give up AM Radio" theme, William N. Connolly, advertising manager of S. C. Johnson & Son, which sponsors Fibber McGee & Molly on behalf of its floor wax, was optimistic about the continuing value of radio. He said:

"Radio is still a good buy—the best buy if you've used it successfully over a period of years—and radio for the next few years will continue to be the most massive and economical national advertising medium for most advertisers."

Television, he said, is progressing at different stages in various markets and therefore should be viewed "on a market-to-market basis for several years."

Radio has not stopped growing because of television, he emphasized. Radio set sales are currently running ahead of television sets by a ratio of 4 to 1, he said.

He said there are now 39 million radio homes, 10 million car radios, two million portables and five million sets in public places. In 1950 it is predicted there will be more than 40 million radio homes, almost three million radio and television homes. In 1951 it is predicted 41 million radio homes and six million radio and TV homes.

"Faced with these figures," he said, "it's fantastic to think that radio's potential as a national advertising medium will suffer a measurable reduction, at least for the next two years."

He admitted, however, that television's impact is the greatest of any medium, but said: "With Fibber and Molly doing quite well, I hesitate to trade coverage for impact."

Hugh M. Berville Jr., director of research, NBC, also supported the "Don't Give Up Radio" theme. He said the growth in radio families between 1946 and 1949 exceeded the combined circulation growth of all daily newspapers by almost a million and a half. During those years, 44 million new receivers were sold, he reported.

"A basic advertising fact," he said, "is that radio reaches a larger (Continued on page 59)"
TONIGHT the Cities Service Band of America takes the second of two of the most important steps in its 22-year continuous history as a network account.

The first was the transfer, Sept. 26, of the program from the Friday night spot it has occupied without interruption from the beginning to a better time on Monday night.

The second is its debut on television which begins tonight (Oct. 17) with the first of a four-week series of experimental simulcasts over 16 NBC-TV affiliates.

Cities Service long and successful use of top flight musical programs as its radio voice had its inspiration back in the early years of this century when a young lawyer was scheduled to make the major address at the Fourth of July celebration in a small Colorado town. Proudly he rode a white horse at the head of the parade; proudly he sat on the bandstand, awaiting his turn and looking out at the townsfolk and nearby farm families who packed the benches in the town park. Proudly he thought, "they're all here to hear me."

The voice of the lawyer's introductory remarks suddenly cut sharply into his happy reverie. "As soon as Mr. Aylesworth has finished talking the band will play."

"It was then I learned in a way I shall never forget that while most people can take Fourth of July oratory or leave it alone, everybody loves a band," M. H. Aylesworth told Broadcasting last week. "And it's just as true today as it was 40 years ago," he added.

The truth of that observation was dramatically proved last month, when the band lovers of America, by direct individual action, forced Cities Service Co. to move its radio program from the Friday night period it had occupied without interruption for more than 22 years.

"A boy named Tommie started it," explains a folder prepared by the company to announce that Band of America was moving Sept. 26 from its 8-8:30 p.m. spot on Friday to the 9:30-10 p.m. period on Mondays.

"Tommie plays in a high school band. He loves the Cities Service Band of America. But he hardly hears it because, you see, there always seemed to be something else going on Friday nights... basketball games, high school dances, or a movie date with his girl friend. So he wrote us a letter.

"The whole Smith family... they all signed a letter saying that they liked the Cities Service Band of America best of all radio shows... but Friday night... couldn't it be some other night?... Any other night?

"And finally among the 25,000 letters received from band lovers and band directors, many asked for another night. So we decided to move to a better night of the week... a better hour... and a much better spot for a band music program. The new time is Monday night on all the same popular NBC stations."

This folder-announcement was sent to the complete list of more than 25,000 individuals who have written to the company about the program. Most of the letters were received early this year in response to an offer of a free picture of the Band of America. But there were many who wrote independently of the picture offer, Mr. Aylesworth stated, to express their enjoyment of the program.

"These letters came from members of bands, directors of bands and former band members as well as from people who just plain love band music," he said. "In thanking Cities Service for this program, which they said should be "must" listening for every band member, letter after letter asked if it could not be broadcast on some other night than "date night." So, despite our sentimental attachment for the time the program had been broadcast without missing a week since Feb. 18, 1927, we made the move."

Mr. Aylesworth, who now serves Cities Service as radio consultant, recalled that the company was the first sponsor he signed up after he became president of NBC when the network was organized in November of 1926. "Curiously enough, that first series also featured a band, led by Edwin Franko Goldman," he remarked. "When that series was replaced with music of the concert type, Mr. Goldman's band was sponsored by another company for a couple of years, but since then there has been no regular band program on the air until"

RADIO'S oldest continuous sponsor, with an unparalleled record of more than 22 years on the NBC network without missing a week, Cities Service Co. has found good music, a consistently good vehicle for taking its commercial messages into the home, equally successful in winning friends for the company and customers for its gas and oil products. Tonight, this veteran user of radio makes its first use of a new medium—television—that will permit thousands of TV families to watch as well as listen to the Band of America. The fundamental appeal of this all-star brass band which has so captured the listening audience is being dressed up with drum majorettes and other visual novelties to make it just as good entertainment for the eyes of the nation as the ears. The initial Cities Service contract is for a short trial period, only, but it may well be that Oct. 17, 1949, will mark the beginning of a video run as long and as successful as that which started on radio on Feb. 18, 1927.
our present Band of America program was launched in June of 1948. The Band of America is not just another radio program, Mr. Aylesworth said, not even just another good radio program. It represents a long-range plan to associate Cities Service with other great American institutions, the brass band. "Do you realize that there are some 75,000 high school bands in the country today?" he asked. "They comprise millions of young people who listen to Band of America each week to hear the traditional band pieces—the same ones they arelearning and playing—played by the country's best brass instrumentalists. These youngsters are going to be life-long friends of Cities Service and the life-long users of Cities Service products."

Although the unbroken run of nearly 1,200 weekly Cities Service broadcasts on NBC began early in 1927, only three months after the network had been launched, the company, even before then, was a radio user. From December of 1925 until June of 1926, it had sponsored a half-hour musical program on a four-station hookup originating at WEAF (now WNBC) New York.

SINCE those early days Cities Service has consistently used music as its primary program material. After the Goldman band ended its series in June of 1927, it was succeeded by a concert orchestra, a male quartet, and a female vocalist. Unlike many advertisers who change their program formats annually or more frequently, Cities Service believed in hanging onto a good formula when it found one and this pattern was maintained until the fall of 1946. During that time, the program featured some of the most famous names of radio, who became Cities Service features almost as enduring as the broadcast series itself.

Jessica Dragonette was soloist for seven years and her successor, Lucille Manners, played that stellar role for an even longer period. Graham MacNamee announced the program in its earlier days. Ford Bond, who subsequently took over the announcing spot, is still at it, 19 years later. Rosario Bourden directed the Cities Service orchestra for more than ten years, and Frank Black for more than eight.

In August 1940 the Cities Service concert was redesigned as a 30-minute broadcast, instead of an hour, as it had been up to that time. Four years later it was re-titled Highways in Melody, appropriate for a company selling gasoline and motor oil, and Paul LaValle installed as conductor. Mr. LaValle is now director of the Band of America.

Meanwhile, the program's NBC station line-up has grown from the original 17 stations that carried the first broadcast in 1927 to 32 stations in 1930, to 57 stations in 1940 and 81 stations in this year of 1949. In 1927 Cities Service used $199, 150 worth of NBC time. Ten years later, in 1937, its gross time charges were $575,603. Last year, copies per year.

Spring sports guides and budget books have also been offered and distributed in much the same manner and with much the same success. Such the same, the company feels, serve as a constant reminder of the company, its products, its dealers and its radio program, producing both good will and sales. Commenting on such offers in an article in Broadcasting, March 15, 1940, Elliott McDowell, then advertising manager, stated:

"All these offers are used to direct listeners as much as possible to the 16,000 dealer service stations located in 26 states. It has been found to be an excellent sales stimulant, for most people who desire the book feel somewhat guilty if they drive into a service station without placing an order for gas or some other product."

In line with its consistent policy of company, product and program promotion, Cities Service has used every avenue of publicity to publicize the switchover of Band of America from Friday to Monday. In addition to the 25,000 brochures already mentioned, thousands of envelope stuffers announced the change to recipients of bills and letters from the entire Cities Service organization.

The Cities Service Dealer, company newspaper distributed monthly to the men who operate the 16,000 service stations, devoted large space to change in day and time of the broadcasts. This paper also runs a series of "Know Your Bandsmen" articles, thumbnail biographies of the members of the Band of America.

Window streamers and similar display material also went to the stations to help them inform their customers of the new broadcast schedule. It was also the subject of a page ad in Service, another publicity cooperative with Cities Service in contacting these band directors, estimates that the company will receive more than half a million requests for sample bottles of the oil. This in itself will constitute good program promotion, as each

49 ON CAPITOL HILL

BY JOHN OSBON

1949's MAJOR communications proposals last Thursday appeared virtually doomed to the legislative limbo of adjournment as the 81st Congress plodded wearily along toward the end of the first session.

While Congress failed to evolve any real definitive legislation affecting radio and allied interests, most observers felt radio-minded lawmakers were not particularly deficient in getting action by "raised eyebrow" through incessant pressure and prodding aimed largely at FCC.

Prime mover behind most Capitol Hill communications activity was Chairman Edwin C. Johnson (D-Col) of the Senate Interstate & Foreign Commerce Committee under whose paternalistic eye the Commission has consistently fallen. Others included Sens. Charles Tobey (R-N.H.) and Ernest McFarland (D-Ariz.), who steered his procedural FCC reorganization bill through the Senate only to see it languish in the House Commerce Committee.

Primary issues of concern to Sen. Johnson are the clear channel case, color television, TV allocations, realignment of FCC's procedural methods and liquor advertising on radio and television. In the end, the Commerce Committee had to settle for a "non-controversial" measure ($179) on FCC reorganization as the best hope for passage this session.

Following Sen. Johnson's fiery "prostituting" speech in April, FCC handed down decisions on the May

until the present NARBA conference. Sen. Johnson had warned he had information the Commission was "preparing" to rule in favor of the clears. Subsequently, the Senator and Clear-Channel Broadcasting Service proved at odds on the issue. He also cautioned FCC not to issue Stratosvision licenses at this time—another field commanding his attention.

Sen. Johnson originally introduced legislation ($1629) including cease-and-desist orders, eliminating FCC's discretionary power to modify licenses and construction permits, incorporating a fraud section, etc. His action followed a committee report, based on the 1948 communications study of Sens. Charles Tobey (R-N.H.) and Ernest McFarland (D-Ariz.), which generally endorsed FCC's Blue Book principles on programming and clear channel breakdown. A resolution calling for $15,000 was approved for study of overall communications including FCC licensing practices.

FCC Reorganization

The original Johnson bill gave way, however, to a watered-down reorganization bill introduced last June by Sen. Ernest W. McFarland, which comprised some of the features of the old White Bill and certain portions of the Johnson measure. The bill would realign the FCC staff on a functional basis (a minimum of three divisions); set a deadline on Commission action on applications; cut the number of assistant general counsels; assistant chief engineers and chief accountants; impose a ban on "job jumping"; overhaul appellate and hearing procedures, include a provision for $15,000 salaries for Commissioners, etc.

The Senate Commerce Committee held two hearings last June and industry generally approved the "uncontroversial" measure though testimony evidenced a sharp conflict among Commissioners themselves on FCC organizations matters. FCC felt many of the suggested changes cumbersome and restrictive.

WITNESSES testified from stations, NAB, FM Assn., the networks, and the Federal Communications Bar Assn. Justice Dept. officials also appeared unexpectedly manifesting an interest in the antitrust aspects of the bill, and hinting a probe was underway.

The McFarland bill passed the Senate but stumbled before the House Commerce Committee where it encountered silent opposition not readily discernible on the Senate side. Civil Service objected to the salary provisions singling out FCC; FCC interposed certain opposition still not disclosed; and House Commerce Committee hinted it may wish to delve deeper into the whole communications issue. Hearings are indicated.

In the House other highly controversial and even explosive proposals threatened to wreck havoc (Continued on page 81)

By TYLER NOURSE

BUSINESS continued steady in September with very little fluctuation being evident in most fields. Unemployment decreased slightly from the previous month and the rate of national income remained high. With the advent of cooler weather, retail business made gains in many fields, often catching the merchant with too small a stock to take advantage of the increase in buying.

With the channels of supply well filled in most fields, and buyers becoming more selective in their purchases, inventories vary to forward to a great demand on its services. As the buyer becomes more selective the manufacturer must stimulate the demand in his product to stay on a sound competitive basis. Advertising, on a national scale and with the cooperation of local outlets, is the natural solution to this problem. The premise of making more for less has sparked American production for years—making this the great country it is. As the nation's rate of income and production grows, advertising plays an increasingly important part in the over-all economic situation.

Income Practically Steady

The flow of income to individuals in July, latest reported figures, was at a seasonally adjusted annual rate of $209.7 billion. Although this was a slight drop from the $212.4 billion reported in June, personal income remained within 3% of the peak reached last December. Very little fluctuation has been noted in this important economic factor, with a range of variation since last February limited to less than 2%. During the first seven months of the year personal income remained 2% above the same period last year, reflecting an important element of underlying strength in a period of economic readjustment.

Farm income experienced the widest change with most of the other components of personal income showing small variations. Nonagricultural income as a whole, which accounts for about 90% of total personal income, dropped only slightly below the June level. The July annual rate for this segment was $191.1 billion, $2.5 billion below the high reached in December 1948. The decrease in farm income for the month stemmed mainly from a seasonal reduction in the volume of crops marketed. Net income of farmers was $5.9 billion. The first seven months of 1949 was approximately 13% below the corresponding period last year. Reduced prices of agricultural commodities are credited with being the basic factor behind the decrease.

Civilian employment dropped slightly in September, according to Census Bureau figures, but the decline was smaller than is seasonally expected. Total civilian employment was estimated at 59,411,000 in the week ended Sept. 10 compared to 59,947,000 for the week of Aug. 7. The return to school of many summer workers accounted for a large part of the decline in the labor force. Nonagricultural employment stood at 51,264,000 in September, only slightly below the high August figure.

Employment in agriculture dropped to 8,150,000 in the week ended Sept. 10 from 8,500,000 in the week ended Aug. 13. According to reports, the drop was influenced by the late maturing of the tobacco and cotton crops which usually exert a heavy demand for farm workers.

Unemployment also dropped from August to September, showing an appreciable decline for the second successive month. The number of unemployed went from 3,682,000 in August to 3,351,000 in September, according to Census Bureau figures. Much of this reduction reportedly occurred among persons of high school and college age, but there was some indication of a decline among workers above school age. With the August-September drop, unemployment returned to the level of last May before the summer expansion of the labor force.

The decline in unemployment (Continued on page 60)

NAB MEMBERSHIP Drive Urged at Dist. 5 Meet

"FREE RIDING" stations who share in the benefits of work done by the NAB without adding their strength to its efforts for betterment of the industry came in for criticism at the associations' District 5 meeting in Jacksonville, Fla., Thursday and Friday.

Sounding the call for a more intensified effort to enlist additional stations under the NAB banner was Allen M. Woodall of WDAK, Columbus, Ga., NAB District 5 director.

"I cannot see any consistent effort on the part of the association to sell its service to the station," Mr. Woodall remarked in a surprise address at a luncheon meeting which highlighted the opening day.

"I think we should hire a capable person to make personal solicitation of non-member stations," he continued. "Lack of a aggressive selling campaign is giving too many stations a 'free ride' in the sense that they do not contribute financially to the work of an association seeking benefits which apply to all.

"Take for instance the very city of Jacksonville where we are in session. Of the seven stations in the immediate area, only one, WMRR, belongs to the association as this convention opens. You cannot gain members just by writing letters. You will have to organize an aggressive selling campaign in which personal solicitation will play the key role."

Mr. Woodall also asked delegates to the district meeting to join him in support of a proposal to the Broadcast Advertising Bureau as a part of the association. Citing the advantages of the services provided by BAB, Mr. Woodall declared: "If BAB separates from NAB, I am of the opinion that many of us will continue to take BAB service and let NAB get along as best it can."

Judge Justin Miller, NAB president, supported Mr. Woodall in his plea for a bigger membership.

"We like to hear expressions from local, state and district organizations," Judge Miller said. "I hope Mr. Woodall's spirit will catch on. Your national association's board of directors needs to know just how you feel so that policy may be drafted to reflect the true sentiment of the radio and television industry."

"I am surprised by the shyness and timidity of some broadcasters in telling their story. It reflects a sort of atmosphere in which it is considered bad form to just come out and ask a man to join the association. Your board is not a self-perpetuating hierarchy as has been charged, but a representative organization elected by you. If you fail to tell (Continued on page 60)

**NARBA TREATY**

**ENFORCEMENT** of any treaty adopted by the Third NARBA Conference at Montreal appeared as less of a stumbling block at the weekend as delegates of North American nations wound up a series of work sessions by small groups.

Signs appeared at the weekend that a treaty might be adopted which Mexico would be willing to sign, though that nation is not officially represented at the conference.

The Juridical Committee believes it has solved major objections to the compulsory enforcement plan favored by the North American Regional Broadcast Engineering Conference, which caused prior Mexican rejection and non-observance as well as Cuban objection to procedure proposed by the United States.

Under the committee's new plan, NARBA enforcement would be on a voluntary rather than a compulsory basis. This would meet Cuba's insistence on maintenance of its sovereign rights.

Hope was voiced around Hotel Windsor headquarters that such a change would permit Mexico to participate.

Carlos Maristany, controversial figure in Cuban broadcast circles and director of the Office of Inter-American Radio (OIR), arrived at the conference Wednesday. His conference status and that of OIR are undetermined.

Interest in the working groups centered on the time of operation of daytime stations on IA channels. The Canadian proposal would limit stations to those situated west of dominant stations. Hope was voiced this problem could be worked out.

In an effort to halt the U. S.- Cuban stalemate, Canada proposes that Class I channels be protected externally to the nation's line of IA and protected internally to 1B service areas as determined by the conference. Roughly it is suggested that the internal protection extend to 750 miles. Such action would not be retroactive.

Aiming at high-power Mexican border stations, apparently, Canada proposes that not more than 50 radiated kw be permitted to another country unless such increase in power would not constitute interference to a station in another country.

Cuba is expected to submit corrections and modifications in its earlier list of assignments and proposed assignments [Broadcasting, Oct. 10].

The NARBA conference did not work last Monday because of the Canadian Thanksgiving celebration. Bahama's delegation desires to be seated with the right to one vote in joint participation with Jamaica. Bahama succeeded in having its position brought before the Juridical Committee.

**MARSHALL TERRY**

Is Crosby Merchandising V.P.

MARSHALL N. TERRY will become vice president in charge of merchandising for Crosby Broadcasting Corp. shifting his emphasis from the television administrative field to the establishment of a merchandising operation in the TV field, the company said last week.

Mr. Terry, formerly vice president in charge of merchandising, will assume his new position following a brief vacation.

Meanwhile, Crosby said TV activities of WLWT (TV) Cincinnati, WLWD (TV) Dayton and WLWC (TV) Columbus will be coordinated through R. E. Dunville, vice president and general manager.

J. M. Zinselmier continues as director of merchandising of WLW Cincinnati but will add to his duties market studies in connection with future Crosby expansion in broadcasting, the company added.

**RECORDING BILL**

In Congressional Logjam

A RESOLUTION designed to put the Joint Senate and House recording facility on a permanent legislative basis was tied up in the Senate Rules Committee last week, with little hope of passage this session.

The measure (H J Res 332), which eliminates the need for Congress to appropriate funds for the facility, passed the House last August. It was assigned to a Senate Rules subcommittee Sept. 28 but not taken up in the final meeting of this session last week.

**FCC ACTIONS**

PROPOSED decision to grant WLAP Lexington, Ky., to switch to 630 kc announced by FCC last week along with initial decision to deny KTVU(VC) Portland, Ore., additional time to complete construction. New AM station at St. Cloud, Minn., also approved, as were transfers of WKAG, San Juan, P. R., and KSIW Woodward, Okla. James A. Noe, WNOE New Orleans owner, and Rep. Henry D. Lacarde Jr., (D-La.) are principals in new AM applicant at Baton Rouge. Details of these and other FCC actions are in FCC Roundup on page 79.
PRODUCTION of TV sets with tuners for the 88-108 mc FM band is threatened by a Bureau of Internal Revenue ruling which proposes to apply the 10% factory excise tax to many more components of such receivers [CLOSED CIRCUIT TELEVISION].

Serious competitive dislocation is involved, especially in the case of TV-FM sets having continuous-band tuners. These comprise a substantial portion of TV-FM production. But the ruling also would apply to expensive phonograph combination receivers tuning both AM and FM.

The Revenue Bureau issued its ruling in the form of letters to TV set manufacturers. Bureau spokesmen said no manufacturer has yet filed an objection.

NAB, Radio Mfrs. Assn. and FM Assn., however, are planning to investigate the tax ruling. NMA has referred the matter to its Excise Tax Committee, of which S. Insull Jr., Stewart-Warner Corp. vice president, is chairman.

The NAB FM Division has contacted the bureau, fearing the tax will be a serious blow to FM circulation. NMA officials have taken up the matter, according to Ed Sellers, executive director.

To Include TV

Although the luxury tax law, passed over a decade ago, taxes radio receivers and does not mention television sets, the Revenue Bureau proposes to interpret the law as applying to FM radio components in TV receivers.

Thus the portion of the set used to receive the 88-108 FM band would be taxed as a radio unit even though this ability of a TV switch to bring FM stations into the speaker is based on the fact that the FM band happens to be located between the upper and lower TV channel groups.

The bureau's ruling may apply also to built-in antenna equipment featured in many of the new model sets.

While manufacturer spokesmen were unable to give any definite indications of what effect the tax ruling will have, it was indicated the tax payment might be increased as much as 500% or more on some models. Few factory officials have had a chance to study the problem because they have been tied up in the FCC television hearings.

One instance suggested by a manufacturer relates to TV sets using the DuMont tuning circuit, in which FM band tuning is inherent. The tax might jump from around $1 to $1.25 on some models as much as $3 or $10.

This increase would price such sets out of the market, it was predicted, since set prices are going down as competition increases and production techniques are perfected.

Workers rather than pay this greatly in-

CREASED TAX, TV set makers would be tempted to add a 15-cent switch cutting out the 88-108 mc FM portion.

Should this happen, total output of radio and TV receivers with FM tuners would be sharply curtailed. At present roughly 40% of all TV receivers are capable of tuning the FM band. This includes sets of the DuMont type as well as combination sets tuning both AM and FM bands.

Since RMA started last April to compile figures on TV sets capable of tuning the FM band, its member companies have turned out 785,771 TV sets of which 172,271 have FM.

In addition, the National Association of Manufacturers, not an RMA member, claims to have turned out a total of all the TV sets made and about half of them tune the FM band.

FMA and NAB both were active in promoting inclusion of FM tuners in television circuit design, and last spring persuaded RMA to separate its monthly TV production figures into FM and non-FM models.

At the Revenue Bureau it was stated that decision to bring additional portions of TV sets within the radio tax followed more than a year of study. Views of manufacturer groups were sought, it was said, along with FRC's opinion.

If the industry can show that the tax is unjust or works a hardship, the bureau will be willing to reconsider the action, it was stated.

One bureau official put it this way, "We aren't so straight-laced that we would refuse to change a ruling if an industry showed us we were wrong." The 10% excise tax, conceived by Congress as a luxury tax in the 30's, applies to most radio set components. The tax was raised from 5% to 10% in 1939. Since the law does not cover TV sets, the tax is applied to their audio components. Cathode-ray viewing tubes and other essential TV parts are not taxed.

RMA has tried frequently to obtain repeal of the old luxury tax on the ground that radio is a household necessity. The Revenue Bureau deems radio sets a luxury item, though the wartime OPA held radio was not a luxury and established its price controls on that principle.

Obermeyer To B&J

HENRY WEBB, advertising director of Consolidated Edison Co., New York, has resigned to become vice president of Bozell & Jacobs Inc., Omaha, making his headquarters in New York.

CENTRAL YAAA

Experts Air Agency Problems

TWO HUNDRED agency men from seven midwest states heard top-level experts relate down-to-earth facts on current problems at the Central Council meeting of the American Assn. of Advertising Agencies Friday.

The day-long business session at Chicago's Drake Hotel was preceded by a closed management meeting Thursday afternoon at the Racquet Club, conducted by AAAA President Frederic R. Gamble.

Agency and Central Council officers aired their approaches to current pressures and conditions affecting their industry.

Although radio was an indirect concern of the speakers — cropping up only secondarily in general advertising analyses — TV took the spotlight as Louis L. Brockway, executive vice president of Young & Rubicam, New York, explained "How To Use Television Today" (see later story).

Agency men were equally enthusiastic about the way in which advertising increases security values, as outlined by Stanley Harold Morgan, Chicago financial analyst.

Claiming that an "effective advertising record is widely regarded as concrete evidence of a company's progressive management policies," Mr. Morgan pointed out that investors first consider prestige and brand preference, both established by advertising.

The analyst made four major assertions on his theme: (1) leading investment trusts of well-advertised companies; (2) enterprise must win public acceptance if it is to get public funds on a favorable basis; (3) a well-advertised firm is likely to have its earnings capitalized at a higher rate than a comparatively unknown company; (4) better-advertised organizations consistently have their securities more favorably regarded by investors than generally comparable but lesser-advertised companies, and (5) the advertising dollar delivers to the individual enterprise and to the public the economic benefit of the multiplication factor.

Cites Acquisitions

Six acquisitions by heavy advertisers and consolidating agencies firms were cited by the speaker. The companies — International Cellu-Cotton Products, Standard Brands, Sherwin-Williams, Johns Manville, Corn Products and International Harvester — all invest heavily in advertising, including radio and TV.

"Need for additional capital continues to grow more severe, and more money must come from the public," Mr. Morgan asserted. The public is prone to invest in companies about which it has heard and knows — firms which advertise widely, he said.

Although advertising's "primary force is economic," secondarily it "flows into adjacent areas," he claimed. An example of this multiplication factor is the emergence of women as majority stockholders in many leading enterprises. Women (Continued on page 61)

"I wore it on 'Stop The Melody'... but VISHinsky vetoed the idea!"

Business Cycles... 
... and Broadcasting

[Part two of an analysis of the economic factors that can affect radio and television]

By RICHARD P. DOHERTY
NAB DIRECTOR OF EMPLOYEE-EMPLOYER RELATIONS

AN INDUSTRY which is in an intensive period of growth feels the impact of business cycles to the greatest degree. For this reason, it is undoubtedly true that audio broadcasting will, for the first time in its history, experience future cyclical upswings and downswings in the manner felt by most other American industries.

However, this conclusion—though it clearly does not imply that sound broadcasting will undergo business cycle recession declines of the magnesium common to such industries as steel, autos, shoes, construction, etc. In fact, the characteristic cycle pattern varies greatly among different industries. The durable goods lines, e.g., furniture, machinery, construction, etc., experience unexpectedly high fluctuations. Conversely, spreads such as cigarettes, cosmetics, soap, gasoline, meat packing, groceries, etc., have a much narrower range between their prosperity peaks and depressions.

Incidentally, there is a bit of ironic paradox in the FCC policy concerning the availability of license opportunities in broadcasting as related to growth trends and cyclical features of the industry.

During the period of accelerated expansion in the industry, the number of stations privileged to operate by the Commission was relatively restricted. This policy enhanced the profitability of the operating licenses because total radio revenues grew rapidly and the number of units increased very little. As a result, there were virtually no marginal stations in the industry.

BY the time the industry had its period of intensive growth, with an attendant lesser rate of underlying acceleration, the FCC threw the doors wide open to entry into the industry. New stations—AM and FM—came into being at a rate well in excess of the normal rate of growth in available total radio revenue.

Simple household economics indicate that if you increase the number of persons at the table faster than you increase the size of the pie, you decrease the potential portion available to each person.

In 1946, 1947 and 1948 marginal and sub-marginal stations became increasingly common. This situation occurred, not because total radio income declined—it actually increased—but because the number of operators increased (via FCC licenses) at a faster pace than did total broadcast revenues.

In 1948, total radio income approached $500 million thereby reaching a new all-time high. Nevertheless, at least 20% of the industry's licenses (AM and FM) lost money or barely broke even.

This relatively poor financial situation reflects a growth crystallization, within the number of operating units of the industry itself, rather than any reversal of trend in broadcast revenues.

TAKing a backward look we see that radio has had an accelerated growth since the late 1920's or early 1930's. Ordinarily, this would have attracted new operators. However, FCC license restrictions limited entry into the industry and the number of new stations increased relatively little during the late 1930's and early 1940's. In addition, the war both expanded radio income and placed scarcity obstacles upon new station construction. Consequently, when the FCC "let down the bars," to fuller entry, after 1945, new capital and new operators increased appreciably.

Temporarily, at least, the industry is going through a period of capital gestation. Within a couple of years this situation should correct itself either by: (a) an increase in total radio revenues to support the existing number of units in the industry, or (b) the gradual demise of sub-marginal stations with the results that there will be a workable balance between the total number of economically supportable stations and the total volume of broadcast revenue.

Which of these two factors will exercise a dominant role depends on the general business cycle picture. A reasonably near term decline in business activity, national income and total advertising expenditures undoubtedly will reduce the number of stations on the air.

Continuation of good times, preservation of current national income and sustained or increased advertising outlays will permit an "adjustment" of many stations which are presently operating in the red.

However, we must not lose sight of the fact that this intra-industry situation does not alter the basic conclusion that the income of the radio industry is geared to the advertising appropriations of American Business. Furthermore, these advertising dollars tend to vary in volume according to the ebb and flow of general business.

While sound radio may now be a cyclical industry, it is logical that even a good-sized depression in general business will not cause more than a moderately moderate decline in total radio revenue (AM-FM-TV).

This apparent situation appears logical, due to at least two reasons: First, the major sponsors of radio programs are industries which, characteristically, possess a comparatively narrow amplitude or range in their own cyclical variations. These principal sponsors of radio programs are producers and distributors of drugs and toiletries, food and beverages, tobacco and household supplies, and cigarettes and confections, soft drinks and beverages. Add to this list, for local markets, sponsorship by various types of retail stores, department stores and other local service and distribution outlets.

Fortunately for broadcasting, these lines of business suffer less from depression effects upon consumer demand than do the so-called heavy goods or durable goods industries. In other words, the prime suppliers of radio revenue are industries which, in themselves, experience only relatively moderate business cycle declines when times get bad.

The study of business cycle economics indicates that depressions are characterized—though not caused—by a great shrinkage in new investments and by heavy declines in the production and sale of producers' goods and consumer durable goods. When the business outlook grows uncertain and when consumer buying power falls off, the biggest contraction in new purchases takes place in those goods whose replacement can easily be deferred to a later date and in those goods and services which derive considerable benefit from "surplus" income in good times.

Thus during recessions or depressions, very substantial shrinkages take place in the public absorption of new autos and other durable goods. (Continued on page 86)

Page 32 • October 17, 1949
WHO HAS UNCHANGED LISTENING HABITS IN IOWA

TAKE THESE 14* IOWA COUNTIES, FOR INSTANCE

IT TAKES more than power (or proximity) to attract and hold a radio audience. It takes programming.

In the ring of 14 counties selected by Station “B” for a late 1948 telephone coincidental, most have signals stronger than WHO because of geographical location. Regardless of this fact, the 1949 Iowa Radio Audience Survey shows that from 5:00 a.m. to 6:00 p.m. the 14 county average percent “listened to most” is 38.8% for WHO and 4.2% for Station “B”.

Iowa has 38 commercial stations, each of which puts an excellent signal into a certain number of homes. Thus if signal strength were all-important, State-wide audience preference would hardly be possible for any one station.

Actually, the listening habits of the people around Waterloo are very like those in every other section of Iowa. In virtually every area WHO’s programming and Public Service have for many years won and held the largest share of the audience. In 1949, WHO is “listened-to-most” in 57 of Iowa’s 99 counties! Ask us, or Free & Peters, for all the facts. The evidence is overwhelming and conclusive.

*These 14 counties were used in a 1948 coincidental area study.

The 1949 Iowa Radio Audience Survey is the twelfth annual study of radio listening habits in Iowa. It was conducted by Dr. F. L. Whan of Wichita University and his staff, is based on personal interview of 9,116 Iowa families, scientifically selected from cities, towns, villages, and farms. It is universally accepted as the most authoritative radio survey available on Iowa.

Business Cycles
(Continued from page 32)

The advertising dollars radio, the ground percentage share fell consumption remained unchanged and domestic cigarette consumption dropped only 12%; cosmetic perfumes and toilet preparations sales fell 21%, whereas home furnishings and jewelry suffered a sharp setback, 65%.

The second reason why broadcast revenue might not, in the discernable future, experience sharp cyclical declines is because radio is capable of increasing its percentage share of the total advertising budget of American business. In view of the current stable background which now exists for sound radio, the real challenge before broadcasters is to prove their claim upon a larger and larger share of the nation's advertising outlay.

...\*

Radio, newspapers, magazines, billboards, etc., all compete for the advertising dollars expended by thousands of firms on a national and local basis. True, no one of these media will probably change appreciably the total number of these advertising dollars available, although each media individually has within its power to obtain for itself an increased proportion of the spendable advertising dollars.

As of 1948, the advertisers of the nation put approximately 18% of their appropriations into the broadcasting industry. This ratio can, and will, be increased if the medium promotes and merchandises itself, based upon its proven effectiveness in selling goods and services to the American public.

Composer Stone

HARRY STONE, vice president and general manager of WSM Nashville, was revealed as latest composer on BMI rolls at NAB District 6 meeting in Memphis Oct. 7. Bob Burton, vice president and general counsel of BMI, disclosed that Manager Stone was the author of a new song titled "Shoeshine Boy" and predicted it would make the Hit Parade before long.

Statistical evidence proves that radio has steadily improved its competitive position as an advertising medium. Contrasted with the 1945 figure of 13% (radio advertising to total media advertising), the industry received only 7 cents of every $1 of advertising appropriation in 1935, and 11 cents of every $1 in 1940. Through success results, broadcasting has steadily improved its percentage share relative to total advertising expenditures, but broadcasting still has potentially untapped gold mines in the advertising dollars which don’t flow into the broadcaster’s cash register.

Only if radio remains in a given, or static, position with relation to other competitive media and in relation to the national fund of total annual advertising dollars will broadcast revenues fluctuate, up and down, in proportion to future cycles in advertising expenditures.

On the other hand, if radio continues to undergo a trend of enhancing its position, in relation to competitive media, broadcast revenues will rise more than, and fall less than, the recurring cycles in total advertising expenditures and general business.

Incidentally, because radio listenership does not cost the public any thing and, hence, does not suffer during an economic recession, broadcasters have a right to claim a sustained impact for advertisers. Therefore, radio should be more effective than other media in serving the advertiser, whenever a business recession occurs.

A\*

T THIS point it might be well for us to dwell upon a potential development which could affect the cyclical pattern of advertising and radio revenues. There is the possibility of certain media, especially the larger firms with planned advertising budgets—may decide to utilize advertising as a means of stabilizing (to a degree) business cycles.

Many thoughtful business leaders are fully aware of the fact that one of the greatest challenges to our modern economic system is that of preventing maladjustment during boom conditions. This can only come as business attempts to get their position higher and down waves in economic activities.

One of the most potent devices which could be used to achieve this goal and to sustain employment is advertising. During boom times, when business is comparatively easy to get, total advertising could be levellled off. During period of business decline advertising could then be used effectively to stimulate and encourage greater consumer action.

Unquestionably, under spending by both consumers and business units, is a symptom of depression. Nevertheless, this same under spending can—and does—result in cumulative deterioration in the total business picture. This under spending process expands cumulatively under the impact of uncertainty and pessimism. The result is that spendable buying power is hoarded and left off the market.

Effective market demand is determined by three factors: (a) desire; (b) purchasing power; (c) willingness to buy.

Obviously, desire is an ever current and prevailing factor while purchasing power does vary with changes in personal income and cost of living.

Not infrequently, the beginning state of a recession, or depression, shows itself in a drying up of consumer willingness to buy. This can be due to apprehension even though there be little, or no, reduction in actual ability to buy.

A stepped-up level of total advertising would do much to offset the psychology of consumer belt tightening and, thereby, smooth out the flow of goods. Inventory accumulation would be less noticeable and new production and total employment would be supported.

A MAJOR problem facing our economy is that of finding ways of inducing the consumer purchasing unit to maintain a reasonably even rate of spending and investing. By planning advertising budgets and expenditures, in relation to the ups and downs of the economy, it undoubtedly would level off the top peaks of the boom periods and fill in the valleys of recession.

Historically, many producers and distributors and, consequently, advertising media have ultimately suffered from the practice of 'firing' the bulk of advertising ammunition at the peak of consumer buying. As consumers marched, in mass, to the retail stores and figuratively threw their money on the counter. Yet, when this consumer march began to fade, advertising retrenchments were put into effect. Such situations were bound to occur because advertising expenditures were related directly to current, prevailing market demands.

Business cycles have not been caused by—nor have they been influenced by—any inherent radio advertising cause. The radio advertising is the drop-in-the-bucket to capture the maximum amount of spendable dollars on the market during boom years. Conversely, the advertising in recession, whenever buyers grew reluctant, helped to generate unwarranted spirals of depression.

If the advertising budgets were given the same consideration as sales salary budgets; if the volume of money expended for advertising were determined by consideration of that which was needed to do the best job in the largest market rather than by a reference to a percentage of an assumed, expected sales figure, we might promote the economic stability desired by all business firms.

CORRELATION which has, in the past, prevailed in the cyclical swings of general business and advertising is evidently a result of the fact that the majority of firms—there exist exceptions—do not use advertising to better their position in falling markets while, at the same time, maintaining a sustained and adequate level of advertising in times of heavy market demand.

Once business leaders have accepted the thesis that there should not be a direct quantitative, and temporal, relationship between sales and advertising budgets, we shall take a major step toward cyclical stability.

Radio, like other advertising media, has everything to gain and nothing to lose by promoting the concept that there should be a stabilizing device within the business cycle phenomenon. Under such a program of planned advertising the overall and long-range cumulative expenditures of advertising would still adhere to the same underlying rate of growth which currently prevails. Yet.

(Continued on page 36)
Success story: A little does a lot on WLEE! Take the case of the Richmond coal company that buys only three participation announcements per week.

*In less than three weeks, this company got 33 new customers! All these new customers telephoned and said they had heard about this coal company on WLEE!*

Local Richmond merchants get fast, profitable results like this on WLEE all the time. More and more national advertisers are following their lead. You ought to get the whole WLEE story from your Forjoe man.

Business Cycles
(Continued from page 31)
there would be less of the prince and pauper characteristics to this trend.

This theory of business cycle correction possesses increased emphasis when we consider our current national policy concerning consumer credits. Through the mechanism of the Federal Reserve System, we now tend to tighten up on installment and other credits when business rises appreciably above normal, and to relax these credits when consumer resistance increases.

The Future:
The still unanswered questions in the future business cycle patterns of radio are: How much of the advertising dollar will go to sound broadcasting, and how much to television? Will TV attract new advertising dollars and, hence, raise the total level of advertising expenditures? Will TV take sales revenue principally away from other (non-radio) competitive media?

Economics and science have assured radio of a continued upward growth trend. Radio has had a profitable and substantial expansion in the past. The future holds equally attractive horizons for those stations whose operating policy is grounded on sound economic thinking, and fired by a creative “know-how” in catering to public listening — and looking — tastes.

Some Conclusions:
1. For fully a decade, American businessmen have made decisions under an expanding economy. Not since the sharp—but relatively short-lived—recession in the fall of 1937 and spring of 1938 have we experienced adverse times. This long sustained trend has given some executives the idea that the “old-fashioned” cycle, with its up and down movements, has now become an academic phenomenon of the past.
2. As we move farther away from the artificial stimulants of a war economy, we should recognize that our free, competitive economy cannot run on a completely even keel forever. We are bound to get some alternating fluctuations between good and bad times or, at least, between good and less good times. It is hoped that substantial recessions in business will, and can, be avoided. Yet no tangible evidence exists to justify the opinion that depressions are relegated to the archives of history. Nevertheless, there is hope that business executives will adopt policies which will minimize the swings between boom and bust periods. Planned advertising could be one potent force making for some degree of cyclical stability.
3. Historically, total advertising expenditures tend to fluctuate with the cyclical tides of business. Normally, total advertising appropriations correlate closely with the movements in national income, department store sales and other primary business indexes.
4. The audio broadcasting industry has now moved into a period of maturity, and will undoubtedly experience the cyclical variations common to other lines of business. The “depression proofness” which radio had during the 1929-33 depression is no measure of cyclical immunity for audio radio in the future.
5. Television is a new and vigorous field and, for several years to come, will possess such strong and pronounced underlying growth forces that a recession—or even depression—in general business will not have a serious impact upon the year-to-year expansion in TV income. TV has only recently entered its phase of extensive expansion, and will not experience its greatest rate of total growth for another few years.
6. Sound business policy for AM-FM broadcasters should, perforce, recognize the cyclical character of their industry. In good times, adequate reserves should be set up against possible periods of recession; costs should be watched and controlled when business is on the upgrade, to avoid or minimize undue and unwarranted expansion in break-even points. Just because broadcasters have not, hitherto, been accustomed to a cyclical downswing, they should not become panicky if and when downswings occur in the future. On the other hand, audio broadcasting will witness the demise of many marginal stations when general business deteriorates—a condition which has rarely existed in the past history of the industry.
7. Long-range planning is of prime importance to broadcasters. The high prosperity years are the periods when stations should get out of debt, or reduce their indebtedness. Capital expansion planning indicates the wisdom of minimizing new capital indebtedness during boom periods, except for emergencies which arise without regard to the cycle.

Examples may be taken from the telephone, electric power and similar industries. They possess continued growth; yet they plan their plant and facilities expansion, not on a year-to-year basis, but on a 5-year, 10-year or longer program. In other words, it is better to project and control new capital investment and new capital expansion on the basis of established trend patterns, than to follow the easy policy of spending more money whenever income is high and, alternatively, pursuing a stringent belt-tightening policy whenever the pocketbook gets a bit pinched.

Likewise with regard to personnel policy, broadcasters should strive to avoid cumulative expansion in staff, just because revenues are large. This industry requires

Q: When is a hillbilly not a local yokel?
A: When he’s a WBT star.

For WBT local talent is as familiar with and familiar to the big-league as Sardi’s.

ITEM: You’ll see WBT’s Claude Casey in the upcoming movie, “Square Dance Jubilee”—his second featured role.

ITEM: You saw WBT’s Fred Kirby in the newsreels and newspapers … riding his horse in last January’s inaugural parade — by special invitation.
a high type of creative personnel. Employment should be geared to the effective broadcast services of the station, and not merely reflect the amount of available "dough" in the cash register. Undoubtedly, many broadcasters over-expanded their staffs in 1945, 1946 and 1947, largely because they had plenty of income with which to hire more people.

Without a clear concept of staff requirements, based upon service performance, there is a tendency to spend "loose" money on added manpower. When less favorable times arrive, slashes are made. Often these, too, are motivated by the objective of saving "x" percent of the payroll, rather than by careful examination of long-range personnel requirements in relation to programming, operation and sales.

8. Broadcasting—audio and video—has the genuine and logical prospect of offsetting cyclical downswings in business by obtaining a larger share of the total advertising outlay of American business. Adequately merchandised, the radio industry should, within the next few years, expand its "take" of the available advertising dollars to a point where at least 20% of the national advertising outlay goes into broadcasting. This trend, of itself, would afford a rather substantial upward swing from the prevailing level of broadcasting revenues and would tend to offset the potential decline in revenues, should a business recession occur.

Because sound radio has entered its era of extensive expansion, it is more than ever necessary that the industry promote itself so as to acquire a larger share of the nation's advertising expenditure.

9. Better programming, more aggressive selling and industry promotion, rather than rate cutting, would appear to be the proper policy if radio is to out-compete the competitive media which share in the distribution of the nation's advertising dollars.

10. Marginal units are a characteristic of all non-monopolistic industries in their extensive phase of growth—the phase in which radio now finds itself. The fact that there are many marginal radio stations is not per se, any indication that broadcasting has lost its vitality. During periods of business prosperity, the number of radio stations breaking even or losing money will be relatively few, but they will, nevertheless, exist. When the business picture turns downward, the percentage of "loss" stations—and even bankruptcies and reorganizations—will increase. Hitherto, radio has not experienced this phenomenon. Yet it is the typical picture for industries in their extensive period of growth.

However, as in other industries, the capably managed and well-financed stations will successfully ride the waves of good and bad times, and serve as the leaders of the industry. All of which adds up to one apparent conclusion: Broadcasters must become more and more industry conscious. Cooperative thinking and cooperative acting will build a sounder fabric for the entire industry and, hence, reflect themselves in benefits to the individual station.

**PAPP'S SERIES**

**Starts Airing Jan. 1**

FRANK PAPP, NBC producer-director, who returned last week from a three-month survey tour of European relief centers, announced that six 15-minute transcriptions of his interviews abroad would be released, starting the first of the year, to 900 stations in the U. S.

He also reported that four half-hour network programs, One Great Hour of Sharing, under auspices of Church World Service, official Protestant relief organization, would be scheduled by the network before March 12.

**STILLI NAMED**

**Joins WBZ-WBAZ Staff**

APPOINTMENT of John G. Stilli Jr., of Philadelphia, as advertising and sales promotion manager for Westinghouse's WBZ Boston, WBAZ Springfield, Mass., was announced last week by W. C. Swartley, manager. Mr. Stilli assumed his new position effective immediately replacing Lynn Morrow who is leaving the company to take up permanent residence in Florida.

Mr. Stilli first became associated with radio while attending the U. of Illinois. He announced at the college-owned WILL and at nearby WDWS Champaign. Later he served as staff announcer at WHIO Dayton, O., and WLW Cincinnati and in New York where he freelanced with networks and agencies announcing, writing and producing.

He joined Westinghouse in September 1947, as a producer at KYW Philadelphia. In addition, Mr. Stilli has produced television shows at WPTZ (TV) Philadelphia for the past two years.

**W. Earl Bothwell**

W. EARL BOTHWELL, 55, founder of the agency bearing his name, died Oct. 12 in Pittsburgh. Mr. Bothwell organized the agency in Pittsburgh in 1935 and had expanded to branch offices in New York, Chicago and Los Angeles.

These are only items taken at random. The point is, of course, that WBT talent is a smart local buy for national spot advertisers— as WBT’s first-by-far Hoopers prove. (All week long, WBT leads the nearest competition by an average 152.9%!) For a big-time buy at small-time cost, ask us or Radio Sales about our big-league billibilies.

*Oct. 1948-Feb. 1949*
HERMAN BESS

Named WPAT Executive

HERMAN BESS, until last week general manager of WLIB New York, has become vice president of the North Jersey Broadcasting Co., Newark, in charge of sales and programming. The firm operates WPAT and WPAT-FM Paterson, N. J.

Mr. Bess will work with General Manager James V. Cosman in expanding the services of the AM station which expects to transmit a 5 kw signal and operate on a 24-hour basis on or about Nov. 15.

Mr. Bess, who is a graduate of the University of Wisconsin, has been associated with stations in the New York metropolitan area since 1925. He was at one time principal owner of the Wodaam Corp., then operating WQX New York. After a brief period with WAAM Newark, he formed the advertising firm of Bess & Schillin Inc., radio specialists, and later became vice-president in charge of commercial affairs for WNEW New York. In 1946 Mr. Bess became director of sales at WMCA New York, resigning the post to join WLIB.

NBC SHUFFLE

JOSEPH H. MCCONNELL, in his first week of office as NBC president, said last week that no large turnover in personnel was contemplated in the reorganization of the network.

Mr. McConnell told Broadcasting was "to try to use the best advantage the talent we already have at NBC."

"We are not going to have any revolution at NBC," he said.

He clearly implied, however, that although no sizeable turnover could be expected, many executives and employees would be reassigned.

In response to an inquiry as to when the reorganization would get underway, he said that it already had. He pointed out that the network now has one of the three principal operating chiefs—one for each of the radio, television and owned and operated stations divisions—appointed. In Springfield L. (Pat) Weaver Jr., vice-president in charge of television.

Mr. McConnell would not predict the date on which the appointments of the other two operating chiefs would be announced, but it was believed they would be among the first to be assigned in the reshuffle.

The theory of the reorganization, he said, serves two purposes—it not only enables the company management to improve the administrative against requirement, but it also gives a job-holder a means of checking himself to determine whether he is accomplishing the job he is expected to do.

If an executive or employee knew precisely what the company expected of him, Mr. McConnell said, he would feel more secure in his job than if he were not sure what RADIO won its highest ratings in World Series history during the 1949 playing of the five-game classic, according to MBS, which had exclusive rights to carry the games.

A survey made for Mutual by Crossley Inc. put the average rating for the Series at 37.9.

The previous all-time high was chalked up in 1947 at 36.7 when the same Series contenders, Brooklyn and the Yankees, fought for the world title.

Significant in the radio record is the fact that it was scored at a time when television viewing was only 5%. Copies of the Crossley surveys, completed by Crossley, the games were carried on video as well as on AM.

The Crossley figures, when finally broken down, may show that 7 out of every 10 radio homes heard at least one game.

Two-day samples were used in the Crossley computations, except from the final day, when the rating was at 54.6. Two-day calculations were used to make the sample larger. Breakdown on them:

Wednesday and Thursday, Oct. 5 and 6—sets in use 47.1; share of audience 65.0; rating 30.6.

Thursday and Friday, Oct. 6 and 7—sets in use 48.0; share of audience 73.7; rating 37.1.

Friday and Saturday, Oct. 7 and 8—sets in use 50.3; share of audience 73.7; rating 37.1.

Saturday and Sunday, Oct. 8 and 9—sets in use 59.3; share of audience 81.8; rating 48.9.

Sunday, Oct. 9—sets in use 66; share of audience 82; rating 54.6.

Five-game average—sets in use 52.1; share of audience 72.8; rating 37.9.

The Crossley ratings have been conducted for the Series for 16 years, during five of which all net-television stations carried Series, during 11 of which MBS carried it exclusively.

Saturation over television coverage of the games was assured by S. H. Fabian, president of Fabian Theatres, whose Fabian Fox Theatre in Brooklyn brought big screen television to his moving picture audiences.

He said that receipts from the performances added up to four or five times that those that could be expected for regular film features during the period. Concession business also boomed, he said. Box office prices were advanced from $5, to $5.50, and from $5.50 to $1.50 on weekends.

He praised the RCA equipment used in the telecasts and promised continued use during the Series audiences as they become available.

Halpern, Fabian's consultant on television, said the series proved a success from the point of view of picture quality and audience enjoyment.

promise is expected between the House top ceiling of $15,000 and the Senate's $12,500.

POWER OF FM

FMA Cites Pulse N. Y. Survey

FM broadcasting is concentrated in the biggest buying bracket—upper and lower middle class groups —according to FM Asn. Based on a Pulse Inc. quarterly survey covering 5,000 New York homes, FMA declared the oft-heard theory that FM is enjoyed only by "long-hairs" has been disproved.

A socio-economic study of homes with FM showed 19.5% of homes of the rich were equipped, 37.7% of upper middle class, 40.8% of lower middle class and 7.5% of poor homes, Pulse Inc. data broke down its contacts as follows: Rich 7%, upper middle class 24%, lower middle class 41% and poor 28%.

New York metropolitan area has more FM-equipped homes than the number of AM homes in any one of 26 of the 48 states, according to FMA. The survey showed that 44.5% of the respondents bought in 1948 compared to 21.1% in the first half of 1949. FMA concluded 1949 FM set sales in New York may exceed the 1948 FM total despite the falling off in total production of radio receivers.

SERIES RATING

Highest in AM History, Crossley Finds

NAB PRIMER

Covers World Radio Field

PRIMER on international broadcasting, titled Who Gets the Air, has been published by NAB, which was written for Orwen E. Rankin, NAB government affairs director, in collaboration with NAB's engineering and public relations officials.

The 64-page volume appears with decorative cover and is heavily illustrated. It is designed to explain the whole international radio picture, with proper documentation. Publication was ordered by the NAB board at its February 1949 meeting.

The first part is titled "Physical Obstacles to Good Listening." It covers NARBA, the International Telecommunications Convention, sharing of high frequencies, good neighbor conferences and gentlemen's agreements. Part 2 is called "People Speaking to People" and covers UN, UNESCO and Voice of America.

Part 3 deals with government relations, including broadcaster relations with the FCC, State Dept., interdepartmental committees and similar bodies. Part 4, "Relations With Other Countries," discusses foreign propaganda in the U. S., how governments speak to people, and the cooperation of broadcasters in the Americas.

FCC PAY BILL

Clears Conference Hurdle

CONFERENCES last week agreed on executive pay legislation which would grant Commissioners of FCC, FTC, SEC and other independent agencies an annual salary of $15,000 [Broadcasting, Oct. 3].

The House version which carries $16,000. Stricken before Senate passage of the bill was a provision empowering the President to approve $18,000 for the chairman of FCC and other independent offices.

Classification legislation, covering top-level government employees in FCC, also was discussed last week by other conferes. A con-
To the PRESS and RADIO:

Subject: WHAT RAILROADS MEAN TO MOTORISTS

Few people have as great a stake in the continuous successful operation of our railroads as those who own and operate the millions of trucks and private automobiles in this country.

This is true because America could not have built, and could not maintain and operate, its motor vehicles were it not for the basic low-cost mass transportation of raw materials and finished products which only the railroads can provide. Moreover, the great American network of public highways could not have been built, and could not be maintained today, without the essential service rendered by the railroads.

But there is another, and equally important, reason in the fact that railroads help our already overcrowded public highways by moving freight on their own special highways of steel. In 1948, the railroads performed more than 640 billion ton-miles of freight service -- or seven times more transportation service than was provided by intercity motor trucks. It doesn't take much imagination to picture what would happen to our public highways and to motorists if any considerable part of the traffic which moves by rail had to be carried by truck.

The more the nation's freight is moved on the special steel highways of the railroads, the less will be the wear and damage to the public highways, and the lower will be the cost of building and keeping them up. And the more freight that is transported by the railroads, the greater will be the convenience, the satisfaction and the safety with which motorists can use the public highways.

Sincerely yours,

William T. Faricy
KANSAS AUDIENCE

Whan, WIBW Survey Area

SUBSTANTIAL radio listening not shown in most research is found in the audience tuned to sets outside the home and to auto-receivers.

This additional listening is shown in the 13th study of the Kansas radio audience, conducted under direction of Dr. F. L. Whan, chairman of the U. of Wichita Committee on Radio. It confirms findings shown in a study of the Iowa audience by Dr. Whan (BROADCASTING, Aug. 29).

The Kansas study was conducted for WIBW Topeka and sent to the trade by Ben Ludy, general manager.

As in the case of the Iowa study, Dr. Whan's Kansas figures show an important amount of additional listening in homes having more than one radio set.

Nearly 9% of the 7,020 families interviewed in the Whan Kansas Survey reported one or more members of the family "regularly" listen to sets not located at home or in the family car. This additional listening occurs as follows: at school 18.8%; office 8.5%; retail store 13%; gasoline station 4.1%; hotel 0.4%; restaurant 0.8%; at work 17.8%; other places of business 6.4%; barn 3.9% (18.5% on farms); other buildings on home place 3.1%; another person's auto 1.5%; in homes of others 17.0%; all others 4.1%.

This type of outside-the-home listening is broken down to 5.5% of farm families, 9.9% of village families and 11.3% of urban families.

Car Radio Use

More than a third of those owning auto-radios use them "almost all of the time" when on long trips; approximately one in five use them "almost all of the time" when driving around town or on short trips. Less than a fifth reported they use their radio "not often" on long trips and only four of them reported "not often" on short trips.

With 40% of all Kansas families owning car radios, says Dr. Whan, "broadcasters may feel confident of a 'plus' audience at any quarter-hour of the radio day." Of all car owners in Kansas, 49.9% have auto radios.

Analyzing number of sets in the home, Dr. Whan found one set in 70.2% of farm homes, 68.3% of village homes and 54.5% of urban homes. Two sets were found in 24.2% of farm homes, 22.3% of village homes and 32% of urban homes. Three sets were found in 4.8% of farm homes, 7.1% of village homes and 9.8% of urban homes. More than three sets were found in 0.8% of farm homes, 2.3% of village homes and 4% of urban homes.

One fourth of all families owning two or more sets use them simultaneously "nearly every day" or "quite often" in the evening, it was found. Simultaneous use of two or more sets in Kansas homes is depicted in the adjoining chart, showing percentages based on replies from 2,444 homes equipped with two or more radios.

More than one set in a home was found by Dr. Whan to increase the number of listeners and the amount of time these listeners hear the radio. This increased amount of listening was found to be 18%.

Simultaneous Use of Two Sets in Homes

(percentage of Kansas homes equipped with two or more radios)

- **During Morning**
  - Nearly every day or Quite often: 76
  - Now and then: 6.3
  - Not often or Almost never: 5.7

- **During Afternoon**
  - Nearly every day or Quite often: 24.8
  - Now and then: 6.3
  - Not often or Almost never: 16.6

- **During Evening**
  - Nearly every day or Quite often: 86.1
  - Now and then: 87.8
  - Not often or Almost never: 58.6

ANTENNA SITE

**FCC Resumes Hearing On WOR Today**

HOPE that Civil Aeronautics Administration will throw a little light on its confused antenna-site policies was expressed at the weekend as the FCC planned Monday morning resumption of its hearing on WOR New York's effort to secure approval of an increase in tower height from 410 to 638 feet (BROADCASTING, Oct. 10).

CAA last week was granted permission to intervene in the case, as were NAB, Television Broadcasters Assn. and Air Transport Assn. of America.

Confusion over CAA's attitude arises from the fact that its New York office approved the WOR application. The CAA Washington office called for reconsideration of this action. In asking to intervene, CAA said it is supposed to encourage development of civilian aeronautics and air navigation aids, and desires a complete record of the facts in the case.

Duke M. Patrick, WOR Washington counsel, contends CAA should go on the record and disclose any specific objections to the grant. CAA thus far has failed to state objections. It was believed CAA would testify this morning (Monday).

In asking to intervene, NAB contended the increased tower height "will not menace airspace in the Newark airport area." NAB argued it should take part if Air Transport Assn. is to present views and conclusions. The NAB petition was signed by Don Petty, general counsel, and Richard W. Jencks.

KFI SUIT

High Court Denies Appeal

KFI Los Angeles last Monday was refused a U. S. Supreme Court hearing on its appeal from a state court decision holding it lacked jurisdiction in the station's damage suit against a state judge and KVOE Santa Ana, Calif.

The highest court in effect held that denial of broadcast rights to KFI in a murder trial is not the basis for action for $150,000 damages based on usurpation of civil rights under the 14th Amendment and civil rights statutes. KVOE had been given exclusive permission to broadcast the verdict by Judge Kenneth E. Morrison, of the Orange county (Calif.) Superior Court.

Hearing had been opposed by counsel for Judge Morrison and KVOE, the judge justifying his refusal of permission on the ground that state law gave Judge Morrison the right to control his courtroom and also ruling the issue was not one of federal jurisdiction.

The defendants' brief had been argued that the question is whether a judge may "decline to give a radio station coming into the picture at the close of the trial as convenient accommodations as one that has been there the entire time."

In the appeal to federal court, Judge Ben Harrison had ruled that broadcast policies, not state law, are the question at hand.

The defendants' case had been that if Judge Morrison was allowed to broadcast, the only way to end the case was for him to give the verdict himself.

The defendants' attorney, however, contended that the court might refuse to hear the case on that ground.

Air Transport Assn. contended 17 of its member carriers use the Newark Airport and said its witnesses will attempt to show the higher antenna would be a menace to air navigation. M. W. Arnold, vice president of the association, will testify. Paul Reib is counsel.

TBA asked to intervene on behalf of its member stations. Counsel for the association is Thad H. Brown Jr.

This table shows you why the new Andrew Multi-V is your best FM antenna buy!

NOW! Minimize your investment in equipment. Get top performance for only half the cost. The new Andrew Multi-V FM antenna is made and guaranteed by the World’s Largest Antenna Equipment Specialists. It’s another Andrew “First.”

FEATURES

- Twice as much power gain per dollar as any other FM transmitting antenna!
- Top performance, yet half the cost of competitive antennas.
- Side mounting construction permits installation on towers too light to support heavier antennas.
- Circular radiation pattern.
- Factory tuned to required frequency — no further adjustments necessary.

It will pay you to use the Andrew Multi-V Antenna on your FM station. Write for Bulletins 86 and 186 for complete details TODAY.

Typical vertical plane field intensity pattern of 4 bay Multi-V FM Antenna.

**Radio's Roaring Forties**

CHANGING of the order at NBC is demonstrative of the newer order in radio.

In elevating Niles Trammell to the NBC chairmanship, the parent RCA has freed that network's best salesman and one of the outstanding inspirational sales executives in America from the rigors of overall network management and operations. Even competitive media will agree that Niles Trammell will do more than sell business for NBC—he'll create new business for the mass radio media.

In selecting Joseph H. McConnell for the NBC presidency, the RCA board plucked from its own executive staff a young man schooled in administration and in finance and law. Since 1941 he has moved steadily forward in RCA and only last July was named third in command as executive vice president of the parent company. It was in pursuance of this duty that he figured prominently in shaping of NBC's reorganization project, ultimately to result in full separation (or unification) of radio and TV operations, and in the establishment of a distinct owned-and-operated stations unit.

Mr. McConnell's judicious handling of this tough assignment doubtless led to the recommendation of Mr. Trammell that he assume the NBC presidency, to team up with the energetic young Charles Denny, who assumes the executive vice presidency of the network 16 months ago. He had left the FCC chairmanship nine months earlier to join NBC.

Mr. McConnell's appointment, at 43, is indicative also of the vigorous pace of modern radio and TV. Three networks now have presidents in their forties. CBS President Stanton is 41. ABC's top executive—the veteran Mark Wood—will do to radio the dean of network presidents. And MBS President Frank K. White, who assumed office last May, has just turned 50.

The NBC realignment is symbolic of something else too—the era of more aggressive selling in radio and among all media. It reflects pointedly those twin maxims of salesmanship: (1) you sell out your best salesmen; (2) the more calls you make the more you're likely to sell.

---

**Cities Service Record**

TODAY RADIO ought to have a parade. There will be the band—the Cities Service Band of America, which after 22 years in one musical format or another, has held forth Friday nights over NBC. On Sept. 26 it moved to Monday largely by juvenile listener demand because there's always something else doing Friday.

The Cities Service program is the oldest continuous network commercial on the air. It began on Feb. 18, 1927, and it hasn't missed a week since. It was the first program sold by the first network president—M. H. "Deac" Aylesworth, who was formed in latter 1926. "Deac" sold it to W. A. Jones, Cities Service president, and it has remained sold. "Deac," since his retirement from NBC's presidency in 1956, has remained as Cities Service radio counsel.

The story of Cities Service and radio is recounted on another page. It is the original network success story. For Cities Service business has increased in ratio to its radio expenditures. It spent $200,000 in radio time in 1927, when its gross income was $158,000,000. In 1948 its time bill was $630,000 and its gross nearly $600,000,000.

Today Cities Service also launches a series of experimental simulcasts, with 16 NBC-TV affiliates to carry the Band of America along with the 82 AM affiliates. It is the same "Deac" Aylesworth, who presided over Cities Service first AM program, who moves behind the scenes on its first simulcast.

We are constrained to judge that Mr. A., who a few months ago predicted an early doomsday for what he chose to call "ear radio," may now feel that "ear radio" and "eye radio" not only can live side-by-side, but can thrive together, simultaneously, as if in radio wedlock.

**FCC's HCL Increase**

**Radio Regulation** is about to come age-economically, that is.

Twenty-one years ago Congress created the Federal Radio Commission as a temporary body to bring order out of the then existing chaos in allocations. It stipulated a salary of $10,000 to each of its five commissioners, the recognized standard stipend for policy-level bureaucrats.

In 1934, the seven-man FCC succeeded the FRC. The $10,000 ceiling remained.

Now, after those 21 battle-scarred years, Senate and House committees have agreed on increases for the FCC members to $15,000 per annum. Whether the FRC and its successors and assigns have yet delivered radio from chaos to open is serious question, but no one can question the necessity of the pay hike.

It was only because of the assurance from Congress and the White House that there would be salary increases that Wayne Coy agreed to stay—prolonging by until the expiration of his current term in mid-1961. Two and possibly three others had resignation in mind unless the Congress acted.

We have said many harsh things about this Commission and its predecessors over the years—and we've certainly meant them. But we have not been unmindful of the handicaps under which Commissioners have labored. For most of them it is hand-to-mouth.

But we feel that reasonably contented Commissioners—like contented cows—will produce better results.

Henceforth we shall look for homogenized decisions with vitamin B added from the more opulent, but still under-paid, Commissioners.

**Radio**

**PROPHETS of radio's impending doom seem to have chocked on their own funereal smoke signals, for the time being. At any rate, the elegists who last winter were prematurely mourning radio's demise seem now to be nothing but**

**The start of the fall round of meetings among media people and advertisers in New York during the past few weeks has been characterized by absence of alarms about what television will do.**

**Maybe the doom-holders are silent now because they are a year older. Maybe it's because radio, instead of dying, seems to be growing—strange behavior for a corpse.**

**Radio set sales are running ahead of television receiver sales 4 to 1, it was pointed out to the Assn. of National Advertisers this past week by William N. Connolly, advertising manager of S. C. Johnson & Son (see story this issue). The number of radio homes is constantly growing. Can a corpse grow?**

---

**Our Respect to**

**Joseph Howard McConnell**

Joseph Howard McConnell, the tough-minded administrator who was picked from the top command of RCA to direct the reorganization of NBC as its president, can not be a Southern Yankee. He is a Southerner with a Southerner's affable manner, but he is canny enough to trade a spavined horse to the shrewdest Yankee. He is a scholar with a Phi Beta Kappa key, but was also a center on the Davidson College football team and later a coach at the U. of Virginia. He is not ill at ease in a locker room conversation, but he is equally unshackled in arguing an intricacy of law in a courtroom.

In RCA, a corporation which is not the least formal of U. S. businesses, Mr. McConnell calls his superior "boss" and, within days after moving to NBC, was on a first-name basis with subordinate executives.

His diversity of interests, however, has not conspicuously hampered his progress. Seventeen years ago, fresh out of law school, he earned $900 in his first year of practice. Today his salary, although not a matter of record, is known to be in excess of $75,000 a year.

Mr. McConnell was born in Chester, S. C., May 13, 1908. His parents were residents of Davidson, N. C., where the elder McConnell was dean of Davidson. They journeyed to Chester only because they wanted Dean McConnell's brother, a Chester physician, to deliver their child.

Once Joseph McConnell arrived, the family returned to Davidson, and it was there he grew up. He attended public schools and entered Davidson College.

At that time Mr. McConnell was bent on a medical career. By the time he graduated, however, he had turned against medicine. His degree was in chemistry.

It was the conviction of Mr. McConnell's father that a young man ought to teach school for a while before making his final decision on a career. Accordingly, young McConnell got a job at boy's preparatory, in Virginia, where he taught chemistry and coached football.

After a year of that, he elected to study law. The U. of Virginia offered him a job as coach of the freshman football team and scout for the varsity. In a feat that could be accomplished only by a man with slight regard for sleep, Mr. McConnell held the coaching and scouting jobs and simultaneously took a full course in law, finishing in par—three years.

Mr. McConnell bore an even heavier burden in those three years than is immediately ap-

Mr. Sloan is also involved in the shifting of duties is Frank Atkinson, formerly sales service manager of cooperative program sales, who has been named as the assistant to the manager of the cooperative program department.

Tom Black, who has been manager of sales development, ABC spot sales, becomes manager of radio sales development, cooperative program department.

**Alabama Meet**

**Fell Urges Cooperation**

Radio and newspapers 'must stand shoulder to shoulder' to enjoy equal protection from any government agency that might try to intimidate or gag them, Charles A. Pott, managing editor of the Birmingham News-Post Herald, told the Oct. 6-7 fall meeting of the Alabama Broadcasters Assn. Sessions were held at Tuscaloosa.

Howard E. Pill, WSPA Montgomery, presided as association president. At the opening day luncheon Easton C. Woolley, NBC stations relations department director, said the challenge of TV competition should stimulate broadcasters to realize radio's full potential.

Taking part in a sales panel conducted by James E. Reese, WWWB Jasper, were Bert Bank, WTBC Tuscaloosa; Malcolm Street, WAPI, Houston; Hugh Smith, WGWC Selma, and Clarence Parsons, WAPI, Birmingham. Lionel Baxter, of WAPI served as moderator of a program panel assisted by John Kirkpatrick, WCOV Montgomery; Mrs. Wilhelmina Doss, WJRD Tuscaloosa; John Garrison, WUIN Huntsville; W. C. Needham, WTRF Steubenville, and George Plumstead, WSGN Birmingham.

Students of the U. of Alabama, on whose campus the meeting was held, presented a skit, "The Miracle of Wireless," at the banquet. Frank M. Headley, of Headley-Reed Co., spoke at the Friday luncheon (Broadcasting, Oct. 10).

Allen M. Hall, WDAY Columbus, Ga., NAB District 8 director, discussed the NAB's activities on behalf of the industry. Dr. Kenneth H. Baker, BMB acting president, presented the second coverage study. Mr. Woodall showed the NAB slide film, "How To Turn People Into Customers."

**FORD BILLINGS,** formerly associated with WEIM Pittsburgh, Mass., appointed commercial manager for WWCQ Waterbury, Conn.

CHARLES J. HOBAIRD AND IRVING F. TETSEFF, named to sales staff of WFTV, Miami. Mr. Hoban had operated his own public relations business for last four years, and was active in selling promotions, merchandising for many years previous to that. Mr. Tetsell formerly was general manager, sales manager for WFFP Atlantic City, N.J. He also did sales work for WTNJ Jamstown, N. Y.

HOWARD SELGER, formerly with NBC and ABC in sales research, joins promotion department of Edward Petry & Co., New York, stand representative.

NORMA F. FESLIN joins commercial staff of WABC New York, Conn.

ROBERT L. GERSON, formerly of technical staff of WSB-TV Atlanta, Ga., joins commercial department of WBS and WSB-TV.

KSDO San Diego, KCMJ Palm Springs and KVFN Ventura, Calif., all name Western Radio Sales as their representative.

FRANK G. MORELAND becomes account executive in Los Angeles office of John Blair & Co., Chicago representative a former manager of W.S. Grant Co., San Francisco, and account executive at KSMA Santa Maria, Calif.

ROBERT SCHLINKERT, assistant sales manager of WWJ-TV Detroit, is the father of a girl judt.

**ABC REALIGNS**

Day, Simmel Get New Posts

REALIGNMENT of executive duties in ABC's spot sales and cooperative program departments was announced last week by Murray Grabhorn, network vice president and manager of owned and operated stations.

Harold B. Dwyer, former cooperative program sales manager, has been appointed to the newly created post of director of radio and television sales development for spot sales, while Ludwig W. Simmel, formerly business manager of the cooperative program department, has been appointed department manager.

Reorganization was planned by the network to coordinate the operations of spot sales and cooperative program departments, and to provide a closer specialization for advertisers and agencies, it was said.

Mr. Simmel, named to the newly created post of director of radio and television sales development for spot sales, while Ludwig W. Simmel, formerly business manager of the cooperative program department, has been appointed department manager.

Reorganization was planned by the network to coordinate the operations of spot sales and cooperative program departments, and to provide a closer specialization for advertisers and agencies, it was said.

Mr. Dwyer, a former executive of the network, has been appointed to the new post of executive vice president of the new network, which will operate under the name of ABC.

**Management**

CLIFFORD C. McCAY, former commercial manager of WVTN Clearwater, Fla., appointed acting manager of station succeeding the late DENZEL FELLEY, recent victim of automobile accident (Broadcasting, Sept. 26).

TOM SLOAN, formerly of British Broadcasting Corp., North American Service, appointed assistant ABC representative for Canada, is now at Toronto ABC office.

Rex PREIS, assistant manager of KSRS San Antonio, Tex., before that commercial manager for station, resigns. He was with station for more than 10 years. Future plans have not been announced.

WILLIAM S. PALEY, CBS board chairman, arrives in Hollywood today (Oct. 17) for two weeks conferences.

HUGH B. TERRY, vice president and general manager of KLZ Denver, has been elected general manager of Colorado Div., American Cancer Society.

WILLIAM H. SPENCER, general manager of WHOT South Bend, Ind., named co-chairman of the local community division for local Community Chest Campaign.
HOPE of completing the color television hearing before late Decem-
ber was officially abandoned last Thursday as FCC reached the
end of the third week of its in-
creasingly complex color investiga-
tion [BROADCASTING, October 5, 10].

With this hope went any remain-
ing likelihood that hearings on other far-reaching phases of the
overall television review—including
the opening of UHF channels,
changes in station standards,
and nation-wide allocations—
could be undertaken before the new
year.

There was also speculation that the
Commission, when it finally
finishes what started out as a
three-week hearing on color, may
elect to decide the color question
before launching into the next and
perhaps equally long-drawn
phases.

Unless FCC follows repeated in-
dustry suggestions and lifts the
current licensing freeze without
waiting for final determination of the
other issues, this could mean the
ban on new black-and-white
grants, in effect for more than a
year, will remain until spring or
perhaps summer.

The Commission's revised color
time-table calls for 3½ days of
hearings per week until about Oct.
27, followed by a recess until the
week of Nov. 1, when the CBS and
RCA color systems and black-and-
white transmissions by Allen B.
DuMont Labs will be shown
comparatively.

San Francisco Trip

FCC then will go to San Fran-
cisco to witness a demonstration of the
color system of Color Televi-
sion Inc. during the week of Nov.
28 (“in no event later than Nov.
30”), after which cross-examina-
tion of the various witnesses will
be started Dec. 5.

For the most part there has been
no cross-examination, which is
expected to take at least as long as
the direct testimony. Dr. Charles
Willard Geer, physics professor at the
U. of Southern California, who
outlined the principles of his elec-
tronic color receiver tube last
Thursday, was cross-examined the
same day. Dr. Peter C. Goldmark,
developer of the CBS color system,
will go on the stand for cross-ex-
amination today (Monday), in
view of his plans for early depar-
ture to attend demonstrations of his
color system in London and on
the continent [CLOSED CIRCUIT,
Sept. 19].

In order to cut down the time
needed for cross-examination in the
period starting Dec. 5, and also
to eliminate “unnecessary trips”
for those of whom no further
questioning is desired, FCC asked
participating counsel to file by
Nov. 18 a “cross-examination
form” for each witness they want
to interrogate.

The date when the interim re-
cess of the hearings will commence
will depend upon the time needed
to complete the direct testimony of
all the participants. FCC said
“it is anticipated” that this may
be completed by Oct. 27. Until
then, the hearings will be in ses-
sion only from Monday through
noon Thursday of each week, giv-
ning the Commission a chance to
spend a day and a half per week
on other pressing business.

Announcement of the new time-
table came at the end of a week in
which the Commission, in se-
quence:
1. Had its first look at RCA's
color system, the second to be dem-
onstrated officially (see story this
page);
2. Heard the inventor of the rival
CBS system, shown the week be-
fore, voice “grave doubts” that

DIAGRAM of RCA's color television projection picture-reproducing system,
using three projection kinescopes, reflective optics and a pair of dichroic
mirrors. The kinescopes direct primary colors, after unscrambling color signal,
onto the viewing screen via a refractive optical system. Each projection
is of a different color—red, blue and green—which combine into a full
color picture.

Although RCA officials made no
attempt to alibi for Monday's dem-
onstration to the Commission, it
was pointed out that the equip-
ment had been developed under
pressure and was in use in the of-
icial showing just 12 hours after
it reached Washington from the
RCA plants in Camden.

It was known that work on the
equipment shown the Commission
had been done in just 77 days, at
a cost estimated at approximately
$500,000. Four days later observers
saw marked improvement in its
performance, though it was still
lacking in fidelity and resolution.
Many engineers argued that this
showed what might come with ad-
ditional development. RCA au-
thorities have suggested a mini-
um six months of field testing.

First Showing

In Monday's showing, first ex-
bition of the RCA system outside
the laboratory, color signals were
transmitted over the standard
Channel 4 (66-72 mc) facilities of
NBC's WNBW Washington, in the
Wardman Park Hotel, and picked
up on RCA color receivers in the
Washington Hotel. Air distance
was about 3½ miles. Develop-
ments included:

- Revelation that RCA is con-
centrating research on a single
full-color kinescope tube slated
for completion in 6 to 12 months.
System now uses three tubes, one
each for red, green and blue.
- Announcement that the sin-
gle, full-color tube would be used
in some of the first color sets pro-
duced if FCC approves RCA's
system.
- Report that RCA is giving
exacting attention to a number of
color TV problems and principles,
including a virtually new 6-me
"compatible" color system which

(Continued on page 44)
RCA's Color
(Continued from page 47)
may be ready in another six months or a year.
Comments on Monday's tests ranged from disappointment to acclaim for the principles of RCA's system, with CBS observers outspoken in their criticism (see story this page). The issues centered on color fidelity and problems of image registration and optical focus, resolution and detail. Most impressive to many observers was the degree of compatibility reflected in monochrome reception of color signals on standard black-and-white sets.

RCA engineers indicated the test was not all that had been hoped for in view of many "baggs" that appeared at the last minute, but they stuck firmly to their affirmation that fundamentally RCA's system is technically superior. They claimed the optical kinks that developed can be ironed out easily when treated separately.

One RCA official reported that at 1:30 a.m. Monday all of the receivers were in perfect register and color, but that by the time of the demonstration at 10 a.m. natural inclinations to adjust sets "just a shade better" had resulted in the opposite effect. He indicated a better showing could have been made if only four more days had been available to arrange the many complex details.

RCA's claim that its system is completely compatible with existing black-and-white television was given a crucial test Monday evening on the NBC television network. Studio color demonstrations on Monday afternoon at WNBW ran right up to network time and black-and-white cameras had not been warmed up. The network program, Kukla, Fran & Ollie, also featured in the tests, was picked up by the color cameras and the resulting WNBW color signal was fed into the coaxial network.

WNBW reported that several outlets in the Midwest reported the detail and clarity of the program, which came out in monochrome, were better than past monochrome transmissions.

Commission Chairman Wayne Cow, who is presiding over the TV hearing, and Comra. Henwood, Jones, Sterling, Walker and Webster headed the FCC group participating. Brig. Gen. David Sarnoff, chairman of the board and chief executive officer of RCA, was present, as were Niles Trammell, newly-elected chairman of the board of NBC, and a host of other RCA-NBC officials.

RCA showed its color TV throughout the week to representatives of other government agencies, Congress, the military, communications attorneys and engineers, Washington and New York advertising executives, NBC affiliates and RCA licensees and distributors, the diplomatic corps and others. Some 15 demonstrations will be concluded Wednesday and Thursday this week when an estimated 3,000 persons will have seen the tests.

McConnell Introduced
At the demonstration Thursday afternoon for NBC affiliates, Mr. Trammell introduced Joseph H. McConnell, former RCA vice president who has succeeded him as president of NBC (Broadcasting, Oct. 10). Approximately 225 persons were on hand.

Dr. Elmer W. Engstrom, vice president in charge of research for RCA Labs, described Monday's official demonstration as it proceeded. The battery of color and monochrome receivers included:

- Direct view color receiver using three color tube microscopes and two dichromatic mirrors (This set blanked out just before failure of high voltage circuit); color receiver using two-color reproducing system; projection three-color set using reflective optics and a magnifying lens with small picture; projection three-color set with 15 x 20 inch picture using reflective optics; direct view color converter using three color tube microscopes and two dichromatic mirrors; standard monochrome set to which was fitted a color converter using three color tube microscopes and reflective optics; standard monochrome set to which color converter was added using two-color system; and black and white direct view sets having 10 and 16-inch tubes.

RCA trains its color TV cameras on entertainers during demonstrations before the FCC and industry representatives at WNBW (TV) Washington studios. Lower photo shows Richard Free box, research engineer in RCA Labs, explaining the inside of one of the new cameras. In center foreground appear two dichromatic mirrors which allow green rays to pass through to lens of center image orthicon tube, while reflecting red rays via a silvered mirror to right-hand tube and blue rays to another mirror to tube on left. In rear some of the camera's electronic control elements can be seen.

COLOR set (r) of Color Television Inc., alongside a black and white projection receiver.

Before the test had started, Dr. Engstrom explained that "we are not in a position, of course, to demonstrate things such as flicker, color break-up, lack of smoothness of motion, because in the particular system we are proposing these effects do not show up for any practical conditions of operation, because the conditions are equivalent to that of the black-and-white system."

In one sequence some witnesses commented that as the dancers moved about they appeared to step into a red spotlight.

Miss Swarthout reappeared in a rose gown to sing a duet with Dickson Eastham, understudy to Ezio Pinza, star of the Broadway play, "South Pacific." Commercial possibilities of color television were demonstrated in lighter vein by Sid Stone, comedian "pitch man." Music was provided by 13-piece NBC orchestra under direction of Norman Cloutier.

Following the live telecast, RCA demonstrated 16 mm color movie film strips and Kodachrome slides. At this point Dr. Allen B. DuMont, TV manufacturer and broadcaster who is one of the chief opponents to adoption of color at this time, requested that the contrast and brightness of the monochrome receivers be turned up to their "normal" values. After adjustments...

(WCAU is already represented by Radio Sales
in all other markets.)
DON'T KILL COLOR TV
Dr. De Forest Urges Compatible System

DR. LEE DE FOREST, pioneer radio inventor, last week urged adoption of a compatible color television system and said he had abandoned work on a mechanical system of his own because it lacked compatibility.

He said he thought it would be "disastrous" if the FOC acted in any way to inhibit television's growth.

"The only way that color can come about, without serious harm to the television industry, is by means of a compatible system," he said.

Dr. De Forest reported he had been working for two years on a mechanical color system which varies from that developed by CBS in that no color disc is used. Dr. De Forest's system uses a color filter which is not larger than the face of the receiver television tube.

The filter moves in an orbital pattern, agitated by a small motor that is synchronized with the transmission frequency. Although he said he had quit work on transmission aspects of his system, Dr. De Forest reported he thought the mechanical filter technique might be adopted as a device to convert black-and-white sets to receive RCA color transmissions.

He had intended to discuss this possibility with top RCA laboratory executives this week.

The veteran engineer spoke favorably of current color demonstrations which he observed in Washington last week. He said he had not seen the current demonstrations of CBS color.

RCA's Color
(Continued from page 48)

were made, some observers noted that the comparative values of the color pictures dropped consider-ably.

Dr. DuMont also asked that black-and-white transmission be retained for comparative purposes. After RCA switched to monochrome cameras, Admiral Murphy, CBS vice president and general executive, stated that all the color receivers "showed very great differences in color from very bright pink to greens and oranges." It also was observed that Dr. Engstrom had been shown to the WNBC crew to tell whether they had switched back to the color cameras from monochrome.

At CBS' request, the ambient illumination of the demonstration hall was measured at two locations and found to be 0.12 foot lamberts. Some observers thought this less than normal viewing condition.

Mock-up of a small field camera for color work, now under development and slated to be ready by next spring, was shown along with a new midget image orthicon tube measuring only one by six inches. Dr. Engstrom explained the small tube had been used in non-broadcast black-and-white experimentation. Its image size is about that of a 16 mm film, it was explained. Similarly, the 16 mm movie line of lenses would be used with the tube.

In showing the principles of the single full-color tube being investi-gated, Dr. Engstrom emphasized that such a tube would greatly simplify the converter and receive-problems, including image and focus registrations. "It is for that reason," he said, "we are placing real emphasis on our research and development program so that we hope shortly to be in position to have such a tube."

RCA omitted tests by microwave and coaxial cable, Dr. Engstrom said, because "we did not have the..."
BIRMINGHAM, ALABAMA

ANNOUNCES THE APPOINTMENT OF BLAIR-TV INC. AS NATIONAL REPRESENTATIVES!

Today, it's see Blair-TV for information on WBRC-TV, Birmingham. Blair-TV, because it's an organization of experienced men, devoting all their time and talents to SPOTelevision... making it work for station and advertiser alike. WBRC-TV, because it dominates one of the South's biggest, richest, most TV-conscious markets!

If you advertise, it will pay you now to know television, WBRC-TV and the big Birmingham market. For accurate facts on all three, ask any Blair-TV man today!
WU's Telcoarc Lamp

THE answers to some of television's more stubborn lighting problems may be provided by a new high-power, high-intensity electric light, named Telcoarc described Friday by W. D. Buckingham, assistant to the electronics research engineer of Western Union Telegraph Co., in a paper presented before the Society of Motion Picture Engineers convention in Hollywood.

Light source of the new lamp, which operates in the open air and not in a glass bulb, is a pool of molten zirconium two-tenths of an inch in diameter. Maintained at a temperature near 6500 F, this source is one-eighth as bright as the sun, Mr. Buckingham said. The light, which has a brightness 20 times that of the tungsten filament lamp, totaling 20,000 lumens with a maximum brightness of 150,000 candles per square inch, is an outgrowth of WU's wartime research in military communications, he reported.

Asked about the uses of the Telcoarc in TV, Mr. Buckingham said that it will probably be used chiefly for illumination. However, he added, the new light may well be used for the projection of background lighting and scenes for studio shows. When a 5 kw tungsten filament lamp was used for such projections, so much heat was generated that the slides had to be watercooled, he stated. The same light, 20,000 lumens, can be produced by a 1 kw Telcoarc lamp, he said, and comparatively so little heat is produced that a slide can be left in for an hour without harm.

The Telcoarc will be "ideal" for flood and spot lighting and searchlights, Dr. Buckingham stated. He predicted that it also will have wide medical and scientific use and will be of special importance to color photography. No prices have been set for the Telcoarc lamps as yet, but they will be priced competitively with the tungsten lamps, he said. Manufacturing plans also are under way, but it is expected that WU will license lamp companies to produce them rather than enter this field itself.

CBS-B&B Projector

FOB reportedly the first time in television history, last week during the telecast of This Is Show Business, action films were shown on the screen of a studio television set which appeared along with the announcer demonstrating it to home viewers. Heretofore when a video set was presented, the picture inserted in the tube frame was a "still."

CBS in collaboration with the Benton & Bowies television department, built a special projector geared down to synchronize with the phasing and pick-up rate of the television camera. The projector slowed the film from 60 frames per second to 30 frames so that the material could be inserted in the tube space of a demonstrated Crosley television set, and the image of the set in its entirety was picked up by the TV camera, giving the effect of another video show being telecast by the studio camera. As the announcer turned the switch on the Crosley set, the projector inside the set started simultaneously.

Herb Leder, director of TV for Benton & Bowies and Bill Vali, technical director of TV for the agency, developed the technique along with Fred Reinhart and John De Mott of CBS. This Is Show Business is sponsored by Aveo Corp., Crosley Div.

Projectall Dissolve Unit

TRESSEL TELEVISION Productions, Chicago, which manufactures the Projectall, plans to release, within two weeks, a new attachment which will make automatic dissolves possible.

George Tressel, company president, said the new mechanism adds no bulk to the Projectall as it fits on the back of and in the instrument. It includes a second aperture, lighting system and cooling system, enabling immediate dissolves and use of more title cards, he said.

Sergei Fomenco, firm's design engineer, returned recently to Chicago after a two-week trip to northeastern TV stations which telecast Projectall news, time, temperature, music and advertising. He exhibited a working model of the new attachment and explained its operation. All Projectall-installed TV stations are expected to use the new device, Mr. Tressel said.

Rectangular TV Tube

RECTANGULAR TV tube, designed to be used in a cabinet small in proportion to picture size, is ready for mass production at American Structural Products Co., Toledo. Firm is a subsidiary of the Owens-Illinois Glass Co. The rectangular shape will give tube makers "an ideal glass tube" for 100% reception of the transmitted picture, according to Stanley McGiveran, American Structural president.

KSL-TV Periscope

WHILE covering the Sept. 30, Oct. 1-2 semi-annual conference sessions of the Mormon Church, KSL-TV Salt Lake City employed new methods of teletcasting. A periscope-like instrument caught the front-view image of the speaker on the pulpit and sent it by reflecting mirrors to a camera built in the Tabernacle basement. Also used was a special platform erected in front of, and a little lower than, the south balcony of the Tabernacle. The telecast was the first of general sessions in the history of the Church. Receivers were set up in the Assembly Hall on Temple Square for the benefit of overflow crowds.

TELEVISION AFFILIATE OF THE COLUMBIA BROADCASTING SYSTEM
**TV Sessions Lengthen**  
(Continued from page 47)

on which work is being started, conversion of existing receivers to the CTI system would cost set owners about $65 to $75 but that at the present stage CTI does not generally favor conversion.

A surprise witness for CBS when testimony was resumed after the RCA demonstration was Dr. Dean Brewster Judd, physicist in charge of colorimetry for the National Bureau of Standards, who said he considered the RCA color pictures at Monday's demonstration "poorer in fidelity" than those in the CBS showing.

He criticized primarily the RCA two-color system and said he was testifying "as a possible customer for a color set" but with the permission of Dr. E. U. Condon, Bureau of Standards director who is also heading a color investigating committee for the Senate Interstate and Foreign Commerce Committee.

Rebuttal Planned

RCA authorities said they would offer witnesses to rebut Dr. Judd's testimony and also that in which Columbia's Dr. Goldmark recommended that RCA drop its system now. They also said they would present their own analysis of the CBS demonstration the week before.

Dr. Goldmark was particularly sharp in his criticism. The RCA demonstration, he said, "revealed all the difficulties I have discussed thus far in my testimony concerning the RCA system, only to a much greater and more disturbing extent than I had thought would appear."

When "presumably" black-and-white transmissions were being received on camera colors, he said he saw "marked differences in the colors of the images on the color receivers." Further, he said: "No flesh tones or true whites were visible on any color receiver. Faces were dark red, purple, green or orange."

On a 16-inch three-tube directview color set, Dr. Goldmark said, the background curtain appeared purplish, then it was actually reddish brown; a gray cloth showed purplish, while a singer's face was "purplish with dark purplish reds in the shadows."

Close examination disclosed a "most serious lack of geometrical resolution and crispness on every one of the color receivers," he asserted.

He contended that RCA's dot sequential system cannot effectively convey definition equivalent to current monochrome standards because it "forces the viewer, in order to avoid the disturbing dot structure, to retreat to a distance past 10 times picture height. At this distance, the eye is unable to resolve any detail finer than that contained in a 210-line picture," he testified.

During black-and-white transmissions, he contended, one color receiver showed green and orange pictures, another purple and green, two orange, one green, and another pink and purple.

Asked by Comr. Frieda E. Henneck, he said he didn't think the RCA system should be field tested at all and that, indeed, nothing would improve the system.

The only witness thus far presented for the third color system—Color Television Inc.—asserted that with the development of a direct-view tube existing monochrome sets could be converted to CTI color for $65 to $75.

He was Charles W. Partridge, a member of the CTI executive committee, who claimed Columbia's $70 to $140 conversion estimates are much too high. He said CTI feels it has a well-perfected color system and is now setting up a laboratory for two weeks to demonstrate that.

The CTI system, Mr. Partridge claimed, is simpler than those of RCA or CBS.

He said that the firm does not favor conversion on the basis of present developments because converters are "troublesome and costly." It is undertaking to develop new sets which would receive both monochrome and color, he reported, and "may engage in the manufacture of sets," though it has made no plans toward this end.

The tube meanwhile described by Dr. Geer, who holds a patent on it, "would employ a screen with a color on the front side and the two other colors on "pyramids" on the back. Its "forerunner," he said was developed by the late John L. Baird in England, with DuMont also having worked on one of a similar type.

It can be built relatively inexpensively, he asserted, and can receive color transmitted "sequentially by frame (or field), line or dot, or simultaneously." He said it possesses "inherent simplicity, low cost, adaptability and universality, [and] promises to open color to all who are within range of the color transmitter and who can afford to purchase a television receiver of any sort at all."

**Color 'Here'**

Under questioning, Dr. Geer paid tribute to the color achieved by the CBS system, and said he was confident the RCA system could be improved substantially. He said color television is "the wave of the future and standards should be adopted soon, but that FCC should see the Color Television Inc. system before reaching a decision. His own tube, he reported, is not yet "demonstrable" but could be built in eight months to a year.

The manufacturers who appeared on behalf of the CBS system offered time and cost estimates as forecast in Dr. Goldmark's statement, released the week before.

President Edward F. Mulher of Birtman Electric Co., Chicago, exhibited a sample color disc converter built according to design information which he said CBS started providing on Aug. 25, after a demonstration Aug. 24. He said Birtman immediately started work on 28 pre-production samples to be used by CBS, Air King Products Co., and Tele-Tone Radio Co. for field-testing work.

He estimated a color converter for existing sets would cost consumers about $70 and that this should be reduced to about $55 when laboratory designs have been production-engineered. A color disc assembly to be factory-built into future sets should add about $50 to the retail price of the sets, he predicted.

Mr. Mulher thought production "in reasonably large quantities could start within 90 days" after FCC approval of the CBS system. His estimates were based on "a monthly volume of 7,500 sets."

The operation of the converter, and other technical details, were outlined by Charles H. Sparklin, Birtman vice president in charge of engineering, and John Sehube, production vice president.

The Birtman cost estimates were exclusive of service charges where home installation would be required. So was the estimate of President Milton J. Shapp of Jerold Electronic Corp., Philadelphia, who thought an external electronic adapter to permit present sets to receive either monochrome or color transmission would retail at about $40.

But Mr. Shapp thought an easier and less expensive method of adapting existing sets would be to build an adapter kit, which he said should retail for about $20 and could be installed in 90 minutes.

He said, however, that production of the external adapters can reach 100 units a day after FCC approval of the CBS technique.

**Cities Charges**

Comr. Henneck cited charges of "inefficiency" which she said had been levied against FM converters, and wanted to know how well the converter would perform. Mr. Shapp contended that "for all practical purposes" it would give black-and-white pictures as good as the present system's.

He conceded, however, that he had seen only one adapter in operation and that there was "a certain change" in the picture when the line rate was reduced from the standard 25 to Columbia's 405.

President H. G. Hamilton of Eastern Air Devices Inc., Brooklyn manufacturers of electric motors, exhibited a motor which he thought could be used for the CBS color disc at about $8 each and per-

haps ultimately as low as $5.

C. P. Cuswhay, executive vice president of Webster-Chicago Corp., noted that his firm participated in the development and production of 27 color converters used in receivers built by Zenith Radio Corp. for CBS and Smith, Kline & French Labs for ABC demonstrations at medical meetings.

He said his firm redesigned the CBS diagrams, modified initial units and produced the 27 units within 50 days. Asked whether he could produce converters for 16-inch or larger pictures, he said he would like to make 16-inch square "a little farther along" and that "then there will be no secret on the larger units.

Converters for testing sets would cost $75-80, Mr. Cuswhay estimated, with external scanning adapters $40-50. He said it was proposed to supply stripped-down converter units, minus legs, to other manufacturers for new color sets at about $17.50 to $19.50 each.

$220 Set Foreseen

Mel Kohner, Webster-Chicago's chief project engineer for color television, told for firm received all basic information necessary from CBS and then proceeded to add its own improvements and modifications. He said information on the scanning adapter was received in late August and that one man produced a pilot model in two days.

S. W. Craig, president of TeleTone, said his firm contemplates building complete color-monochrome receivers with built-in mechanical color wheels and converters. He estimated the retail price at about $220 for a set using a 7-inch tube enlarged to give the equivalent of a 10-inch picture. "Quantity production rules," he said, "could bring the price down to $60 within 60 to 90 days after FCC approval of the CBS system."

He also disclosed that his company will begin field testing today a number of black-and-white models which have been internally adapted to receive either standard black-and-white or CBS color in monochrome. These, he said, are provided with connections for easy addition of external color wheel converters.

David H. Cogan, president of Air King Products Co., said his firm's standard 10-inch monochrome set, retailing at $199, would cost $75-80 more when converted to CBS color. A color set with an effective 124-inch image would cost about $100 to $125 more, he predicted.

Cuswhay had been working on production of 10 color receivers for CBS and that they should be ready for field tests by November 15.

The Bureau of Standards' Dr. Judd, an unannounced witness, said he personally judged the color fidelity of the CBS system to be "comparable to what we get in technicolor motion pictures" and that RCA color fidelity, as he saw it, was "much poorer" than Columbia's.

RCA is a two-color system to partial color blindness. Dr. Judd was asked by Comr.

DURING interlude in RCA's showing of its all-electronic color system NBC Board Chairman Niles Trammell chats with Miss Gladys Swarthout, Metropolitan opera star who appeared in the show.
WOR-TV RATES
Class A Time $1,200 Per Hour

BASIC time rates for WOR-TV New York, which premiered last Tuesday, have been announced by R. C. Maddux, vice president in charge of sales.

Rates for general advertising, 7-11 p.m., class A time, are: $1,200 per hour, $720 per half-hour, $480 per quarter hour and $360 for five minutes. Weekly volume dollar discount will be the same as that for WOR-AM.

One minute announcements and one minute participations are $250 and 30-second station breaks $200 each.

Evening time signals and weather reports are $2,000 per week, including 25 five-second breaks weekly. Studio facilities are $200 per hour with one hour the minimum time sold. Film facilities, one-hour minimum, are $75 per hour.

DuMont Moves Sales

EXECUTIVE offices of the Receiver Sales Div., Allen B. DuMont Labs Inc., were moved to the recently-dedicated East Paterson, N. J., plant over the week end and will commence operations from there today (Oct. 17). The move affects DuMont national receiver sales, advertising and order administration departments.

RE-APPRAISAL

Selling Aids, TV Costs Eyed by Loewi

CALL for a re-appraisal by broadcasters and advertising men of "several aspects" of television as a sales medium, was sounded last Friday by Comdr. Mortimer W. Loewi, director of DuMont Television Network, at the Radio Executives Club of Boston.

Topping the list, he said, was "the question of how much an advertiser should spend on the entertainment side of his program" followed by how most effectively the new medium could be utilized.

"To an advertiser who must pay for it, entertainment is only incidental...a device by which he raises an audience before whom to display his wares--like the Barker in front of the side show--the beautiful girl on a magazine cover..."

A DuMont study of more than 100 programs and their costs, when a "competing network was making quite a 'to-do' about a $20,000 television program that it was airing," found DuMont's "lower rated program aired at the same time" delivered an audience at one fifth of a cent a viewer as against the 5½ cents per viewer that the sponsor of the $20,000 program paid," Comdr. Loewi said. How can advertisers and broadcasters sell a sponsor conscientiously the idea that one viewer group is "27 times more attractive than another...?" he asked.

Obligation to Sponsors

Other points scored by Comdr. Loewi were: There's an obligation owed sponsors and clients to see they use all of TV's selling aids--entertainment, display, demonstration and merchandising; radio could "never present an acrobat" because he must be seen to be appreciated; TV will attract "scores of new advertisers whose products an older medium just could not sell."

TV is cheaper than actual home demonstration, he said. For example, he pointed out the automobile pays $5 per personal demonstration as against $0 on TV. "Gentlemen," he concluded, "there's a new Glamor Girl coming 'round Advertising's Mountain. She's Miss Television--and I hope you get to know her well--and soon."

TELLEQUIP RADIO Co., Chicago, announces production of full line of TV sets, ranging from 12½-inch table model for $199.50 to 16-inch deluxe console at $339.95. Receivers feature built-in antenna, "tru-lock" picture control, automatic gain control and simplified channel selector.

DODGE TV SPOTS

Animals Speak and Sing

FILM shorts featuring animals that sing and talk will be used by Dodge Div. of Chrysler Corp. in its sponsorship with dealer group participation of local TV shows and spot announcements. Produced in Hollywood, the movie shorts are under the direction of Dodge Sales Supervisor Ray Ayer and use the technique, already accepted as entertainment in movie theatres, of putting words in the mouths of animals.

Six different films, each running 60 seconds, have been produced. Animals on film bring to life the polar bear, giraffe and flamingo made known to the public through outdoor and newspaper advertising. Human voices are synchronized with mouth action so that the animals seem to talk and sing. Theme is "story of Dodge value and dependability." Thirteen films of 40 seconds running time also are available for theatre use. Ruthrauff & Ryan Inc., Detroit, Dodge Agency, aided in film supervision.

KASPER-GORDON

Plans Christmas Toy TV Show

TINSEL tinkling comes from Kas- per-Gordon Inc., Boston, in its announcement that it is producing a Christmas toy promotion TV series for sponsorship by department stores and toy retailers. Series, made up of 15 quarter-hour programs, is called Adventures in Christmas Tree Grove, same title of its transcribed radio packet that has had wide distribution in past seasons.

Episodes, each leaving room at opening and close for a commercial, will be available on an exclusive basis, leased to one sponsor in a city. They may be used on a three-a-week basis between Nov. 21 and Dec. 23 or on a five-a-week basis for three weeks preceding Christmas, the producers said. Rates, based on population and number of TV sets in each market and station time charges, begin at $60 per 30-minute episode for the smallest markets.

Firm uses the transcription as sound track for its television installations, synchronizing action of marionettes with the dialogue and sound. Marionettes, specially designed, are larger than those ordinarily used to permit an undistorted image proportional to toys displayed. Story and plot are fantasy. Filming is being done in color with black-and-white prints to be available for telecasting. Kasper Gordon Inc. says "when color TV becomes a reality" toys can be seen in their natural color. In cities where there are no television stations, the company plans to lease films as an in-store feature. Also planned is a specially edited 60-minute version for home movie rental.

Page 56 • October 17, 1949
**KTVI (TV) CASE**

**FCC Examiner Proposes Denial**

INITIAL decision was issued by FCC Hearings Examiner James D. Cunningham last week to deny as in default the application of Video Broadcasting Co. for additional time to construct KTVI (TV) Portland, Ore.

Construction permit for the station, the decision said, had been granted by FCC in April 1948 for Channel 3 (60-60 mc) with completion date set for Dec. 29, 1948, specified. On request this was extended last February until June 29, FCC said, at which time further extension was sought.

The latter extension was denied for failure to give sufficient supporting reasons for delay, the proposed ruling declared. Subsequently, the station asked for hearing on the matter and Sept. 29 was designated. FCC said no representative of Video Broadcasting appeared for the hearing and none appeared, following after due inquiry, hence the proposed denial for default.

**WNBQ (TV) STAFF**

**Six Changes Announced**

FOUR men at WNBQ (TV) Chicago were upped to directors and assistant directors last week, it was announced by Program Manager Ted Mills.

William Hobin and Robert Banner, new directors, handle *The Wayne King Show and Garroway-at-Large*, both NBC-TV features. New assistant directors are Russell Mayberry, who worked at WBKB (TV) Chicago, and Lynnwood King Jr., former TV operations assistant. David Brown replaced Mr. King.

Shirley Seidel of the Chicago Goodman Theatre Co. joins the staff as costume designer and makeup artist, succeeding Rite D. Bracy, who resigned to work for a Dallas theatrical production firm.

**TELENEWS ADDS**

**Four Take INS Newsreel**

FOUR additional television stations have signed for Telenews-INS newsreel, with KRLD-TV Dallas and WMAL-TV Washington contracts for the daily service, and WXEL (TV) Cleveland and WBAL-TV Baltimore taking the weekly preview.

The Dallas station’s contract is effective on or about Nov. 1, the Cleveland station’s early in December, when the station begins operating. The daily newscast started Monday, Oct. 10, on WMAL-TV under sponsorship of Valley Forge Brewery. The weekly newscast started Oct. 9 on WBAL-TV.

WTJF (TV) Miami has sold its telecasts of the daily newsreel to the American Broadcasting Co.

**POLITICIANS PONDER TV**

**Explore Video as Addition to Radio Campaigns**

NOW that adjournment of Congress is imminent, the legislators are casting an eye toward public sentiment that will go far in determining their political fortunes in the 1950 Congressional elections. Many of them are focusing the other eye on television’s progress as it affects their constituent areas—and, of course, the perennial use of radio.

Television may turn the corner as a feasible medium on Capitol Hill in 1950 if production costs and a host of other problems can be solved. But already many Senators and Representatives, alert to the possibilities of being seen as well as heard, are thinking and inquiring about video.

One logical source to which they are currently directing their inquiries are the Joint Senate and House recording facilities where nearly 200 of the legislators turn out weekly or bi-weekly records or tele-reports or shipment to stations back home.

Robert Coar, supervisor of the government-operated studios, has been thinking seriously about making TV films for members of Congress as an adjunct to the recording project. Such a venture is not economically feasible now, he feels, but he predicts it may be a reality by next April or May.

Mr. Coar explained that at present only 33% of members of Congress represent areas within the range of television reception. By next spring, depending on opening of UHF channels and with addition of more TV stations, a higher percentage might make it worthwhile. Mr. Coar estimates he can turn out a series of five-minute film strips at a basic cost of $18, excluding production and other factors. Further, the recording project currently enjoys a $15,000 surplus which could serve to buy equipment. Whether many stations which run members’ records in the public interest would carry that policy over to video is another matter for speculation.

Television, showing legislators in action, in chambers or committee sessions, is a new opportunity and a new problem. Some members have blown hot and cold on the idea of telecasting Congressional proceedings. One Congressman—Rep. Thomas J. Lane (D-Mass.)—urged networks early this year to schedule regular telecasts. His proposal also included aural broadcasting ([BROADCASTING, Jan. 31].

In any event, television appears to have a place in the affections of the House. In the current renovation of the Capitol, provisions are being made in the House Chambers to include facilities for telecasts. Placements for three cameras are part of the blueprint, with cables to stretch out to a central box circuit outside the Capitol. Mobile units would be able to pull up and take it from there.

The Senate has named a five-man committee headed by Sen. Dennis Chavez (D-N.M.) which will take up the whole question sometime next January. No provision is being made in current re-modeling of the Senate chamber. The recording facility which has operated by dint of appropriations for the past two years, will be given legislative status in a current resolution (H J Res 332) passed by the House and slated for Senate consideration. In the event Congress decides to authorize the television project, another resolution would be necessary inasmuch as the current one covers only radio broadcasts.

**TRIMOUNT DROPS CBS-TV Fails To Clear Time**

**HILLIAM W. WEINTRAUB Co., New York, for its client, Trimount Clothing Co., New York, is dropping the CBS-TV telecast of The Amazing Polgar effective Oct. 21, because of the inability to clear sufficient time and stations. The client is anxious to extend the 10-minute programs to a half-hour, and wants a network of 37 stations to advertise its Clipper Craft clothes.**

CBS has been able to give only seven stations, live, the balance getting the show via kinescope, and scheduling the program at various time spots on different days. This, according to Noran E. Kersta, Weintraub’s vice president in charge of radio and television, confused the dealers, and did not make for the most effective merchandising job. When the agency has found a network that can clear a sufficient number of stations at the same time, it will purchase a half-hour for the show.

**FIRST nighters at Hollywood presentation of CBS-TV’s Ed Wynn Show beam satisfaction. They are (l to r): Gertrude Neiseen, guest star on the first program; Edwin Spieldel, president of Speidel Corp. (watch bands), sponsor of the show, and Ed Wynn, the show’s star. Program was kinescoped for later showing in the East and Midwest Oct. 6.**

Film Report

E. T. SOMLYO, Beverly Hills, Calif., planning on-the-spot filming of non-royalty and original college productions for one-hour television series. First shooting will start late this month at New Orleans when Tulane U. presents Gilbert and Sullivan operetta. Scheduled next is “Taming of the Shrew,” production of U. of Utah at Salt Lake City. National sponsorship is being sought. United Productions of America, Hollywood, has completed three of its scheduled nine one-minute animated television commercial films for Ford Motor Co.

Sherman Plan Inc., Washington, has produced two-minute open-end spot for TV sign-off. Film presents changing pastoral scenes while narrator recites The Lord’s Prayer. Presently available in black-and-white, spots are being filmed in color looking toward advent of color TV. National sponsorship is being sought on exclusive basis and cost of film is less than 25 cents per day to station.

SUPERIORITY COMPLEX

My husband, advertising manager of the Ding-Bat Company, used to be a nice fellow with just enough of an inferiority complex to make him easy to live with. Since he picked KXOK, sales have gone up so fast my husband thinks he’s the smartest advertising manager in town. Now he has a superiority complex and he’s positively obnoxious.

Dear Unhappy Wife:

Maybe KXOK should have the superiority complex instead of your husband. During March, 1949, KXOK was within share of audience striking distance of first place in St. Louis. Briefly, this means KXOK delivered more Hooper audience per dollar than any other St. Louis network station. No wonder Ding-Bat products are going to town. When your husband checks KXOK’s low-cost product, Hooper point, KXOK’s wide coverage, and KXOK’s low-in-St. Louis rates, he’ll be even cockier!

KXOK, St. Louis

“A John Blair” station

TV CLINIC

Set for Chicago FPRA Meet

JOHN J. BARRY, vice president of the National Shawmut Bank, Boston, will supervise a television clinic Friday afternoon at the annual convention of the National Public Relations Assn. in Chicago. Mr. Barry’s bank is using TV advertising locally. The Wednesday-through-Saturday conference is expected to attract nearly 700 U. S. and Canadian members.

Wednesday and Thursday afternoon radio sessions will be conducted by Frank Warden of the Central National Bank, Des Moines, and Wilfred W. Delamater, assistant vice president, Land Title Bank & Trust Co., Philadelphia.

Musical Rights

On ILO Agenda at Geneva

RIGHF S of performers in broadcasting, television and the mechanical reproduction of sounds will be considered by the Committee on Salaried Employees and Professional Workers of the International Labor Office at meetings in Geneva, Oct. 24-25.

Herman D. Kenin, international executive officer of the APM and president of Musicians Local 99, Portland, Ore. and Richard P. Doherty, director of Employee-Employer Relations Dept. of the NAB, are among the six-man U. S. delegation to the meetings.

At a news conference in New York Thursday afternoon, on the eve before departing for Europe, Mr. Kenin said he would present the APM point of view of regarding payments on the use of “canned” music into a royalty fund.

He contended that unfair re-use of mechanical music will hurt music. This already has happened in the United States, he said, causing a shortage of skilled string instrumentalists.

WTVJ (TV) Adds

WTVJ (TV), Miami, Fla., has increased its telecasting schedule to 24 hours a week, according to Clyde Lucas, program director. Station plans to add eight network programs, using kinescope recordings, to further boost its weekly operation. Recent additions by WTVJ have included three local sports shows, all sponsored. All U. of Miami football games and a series of high school contests are being telecast.

SCHWERIN CORP.

To Test Lever TV Show

LEVER BROS. has engaged the Schwerrin Research Corp., New York, to test its NBC television show, The Clock, the audience research firm announced last week.

The tests will be conducted before selected studio audiences and will cover not only the liking and disliking factors of the program but also reactions to commercials for Pepsodent, Spys and Lux Toilet Soap, products advertised on the show.

Cable Fame

ANOTHER tale of the coaxial cable cutting by a Cleveland plumbing contractor [Broadcasting, Oct. 10] concerns the making of a big-time show as a result. Scheduled as a local telecast by KSD-TV St. Louis, the annual Veiled Prophet Ball, local social event for 71 years, became an unscheduled network program for Midwest TV stations as a fill-in. The program was carried for varying periods in Chicago, Milwaukee, Detroit, Toledo, Cleveland, Cincinnati, Dayton and Buffalo, says KSD-TV, which was deluged with letters commenting on the event as spectacular with writers unaware of such an historic affair. NBC-TV subsequently telecast a half-hour film show of the Ball and parade Oct. 13 over its full video network out of Chicago with Frank Schen, KSD-TV special events director, as commentator.
**Ad Budget**
(Continued from page 25)

percentage of all American homes than any competitive mass media. Our 94% radio ownership far surpasses the readership figures for daily newspapers or magazines."

Speaking for NBC alone, he said the time spent listening daily to broadcasts by NBC and its affiliates nearly equaled the total hours spent reading all newspapers and magazines combined.

On the radio theme, William C. Gittinger, president in charge of sales, CBS, repeated the message he delivered the week before to the Eastern Annual Conference of American Assn. of Advertising Agencies [BROADCASTING, Oct. 10]. He expressed the belief that radio will grow, but that if television does finally affect its growth, such impairment will be gradual.

On the subject of whether television has reached the pay-off point, slightly varying views were expressed by George L. Moskovics, manager of television development, CBS, and Sylvester L. (Pat) Weaver Jr., vice president in charge of television, NBC. Mr. Weaver said that video has reached the pay-off point for advertisers, while Mr. Moskovics said that it has for some, but not all advertisers.

Mr. Moskovics, however, reported on several TV success stories. Disney Hats upped sales 38% in New York as the result of one campaign, he said. Chesterfield and Tea report viewers of their TV programs use their brands more than others.

**Cites Figures**
As further evidence video is reaching the pay-off point, Mr. Moskovics cited these figures: In June 1948, 234 advertisers in 11 markets on 90 stations, an average of 12 advertisers per station; in May 1949 there were 1,243 advertisers in 34 markets using 89 stations, an average of 14 advertisers per station. CBS itself had four network accounts using two hours and 15 minutes weekly a year ago, but today has 33 advertisers using 19 hours, he said.

Mr. Weaver, backing his thesis that TV advertising pays, contended that an advertiser gets a better buy at comparable cost per television home than per ad read in a magazine. He also declared that television competes with all media except radio, and that radio is complementary. Radio and television together can deliver 95% of all homes in the country to an advertiser's message, he said.

Mr. Webster, vice president and advertising head of General Electric Co., believed that television has reached the pay-off point for many advertisers or advertisers seeking urban customers. For a long time to come, however, he believed that a national advertiser will need to use both radio and TV to get sufficient coverage.

**WWJ CHANGES**

Four Staffers Are Promoted

HARRY BANNISTER, general manager of WWJ-AM-FM-TV Detroit, announced a series of promotions in that operation last week, to be effective immediately.

Willard Walbridge, general sales manager, will add the title and duties of assistant general manager to Mr. Bannister, but will retain supervision of the sales office.

Two WWJ-TV salesmen moved up in the new changes. Norman Hawkins will be assistant sales manager of WWJ, and Robert Schlinkert will be assistant sales manager of WWJ-TV. In another change, Mabel Munroe will be office manager, taking over many of the duties of the late Harold Priestley [BROADCASTING, Oct. 10].

He believed that the station operator was paying a larger portion of the cost of developing television than are advertisers. In the long run, however, he believes that what would be profitable for the advertiser would ultimately bring profit to the station.

In the discussion on "Audience Trends—AM and TV," Thomas H. Brown Jr., vice president of C. E. Hoover Inc., said radio claims to continued leadership in advertising were substantiated by the firm's findings. During top TV evening programming, radio was able to hold 88.6% of the broadcast audience nationally even in August, radio's traditionally low-listenership period, he said.

Although ratings for radio's half-hour evening sponsored programs was off 33 in mid-1949 over the same period of 1948 that was more than offset by the increase in homes able to listen, he said.

In the discussion on the FCC giveaway order, I. W. Digges, ANA counsel, gave the opinion that there is no reason for an advertiser to change present plans on giveaway shows in view of the present status of court actions challenging the legality of the rules. He believes that the first of the FCC's four rules set forth a lottery. That rule required the winner to give a box-top or something of value.

Among other matters considered:
Elections—W. B. Potter, director of advertising, General Foods Corp., Rochester, named chairman of board, succeeding William N. Connolly, advertising director S. C. Johnson & Son; Albert B. Brown, vice president in charge of advertising for Best Foods Inc., New York, named vice chairman. Paul B. West, who has served as president since 1932, elected. New board members:

Cancellations—John E. Wiley, chairman of the board, Fuller & Smith & Ross Inc., reported space and time cancellations started in earnest this year and will be an annual experience from now on. Cancellation is in effect a "no confidence" vote on the advertising manager. His advice to the advertising manager: Build your plans around an "action-getting gimmick."

Budgeting — Top management often budgets advertising by historical rule-of-thumb basis with or without consent of advertising management, after which advertising management has the problem of deciding how to divide up its fiscal pie, said G. Rowland Collins, Dean, Graduate School of Business Administration, New York U. Such procedure is "upside down," he contended, lacking flexibility and attention to individual needs. Alert managers are planning to earmark larger shares of retained earnings for market expansion and product innovation, bearing in mind that plan capacity has doubled in a decade with no corresponding increase in spending for distribution. He recommended setting up a "funded reserve for product development and promotion," a device which he believed would legally aid a company's tax problems as well as its future.

Economic System Campaign—More than $8 million in time and space have been contributed to the American economic system campaign of The Advertising Council, said its coordinator, Robert M. Gray, advertising and sales promotion manager, Esso Standard Oil Co. Foundation of the campaign was set up by a joint ANA-AAA committee. Mr. Gray reported radio gave the campaign more than two billion listener impressions and that one message on Mr. District Attorney program pulled 15,000 requests for the campaign's booklet, The Miracle of America.

Poll—At "open stockholders meeting" of The Advertising Council, results of three-day balloting during ANA meetings revealed that "the high cost of government" was considered by ANA members the most vital non-political problem facing America. Some other problems, listed according to vote: labor-management relations; threat of socialism; strengthening the United Nations; the threat of Communism; moral and spiritual revival; stabilizing our economy; post-war conditions in our schools.

How's Business?  
(Continued from page 29)

noted in the Census Bureau's figures for September was reflected in reports from the Dept. of Labor's Bureau of Employment Security. The bureau reported that unemployment insurance continued to claim, representing the number of claimants who had been unemployed for a full week, declined to 1,806,078 during the week ended Oct. 1. This is the lowest level reached since the second week in February. Although continued claims declined, Robert C. Goodwin, bureau director, said that initial claims, indicating new unemployment, increased. Some of these new initial claims were caused by lay-offs due to coal shortages in local areas and others were attributed to lay-offs in anticipation of the then impending steel strike. With the steel and coal strikes now in full swing, and the lay-offs which have resulted from material shortages in other industries, a sharp upswing in initial claims is anticipated.

With a relatively stable volume of employment and income experienced during August, sales of retail stores showed little fluctuation from July, according to the Dept. of Commerce. Preliminary figures on retail sales indicate a volume of $10,575,000,000 for August compared to $10,242,000,000 in July. August sales were about 3% below last year's figure after allowance for trading day differences. Total sales have indicated unusual stability since the first of the year, fluctuating within an exceptionally narrow range.

Department store sales in August followed this trend—increasing from July but remaining below the same period of a year ago, according to figures of the Federal Reserve Board. With an index base figure of 100 (1938-39 average), the preliminary seasonally adjusted August index stood at 282. July figure was 279 and for August 1948, 309.

Consumer credit outstanding increased from July to August to an estimated total of $16,452,000,000 at the end of the month. The increase was $266 million for the month and reflected a gain in all major types of credit except charge accounts, according to Federal Reserve Board figures. Total amount outstanding at the end of August was approximately ten-tenth larger than a year ago. Installment credit outstanding Aug. 31 is estimated at $5,619,000,000, $282 million above the July 31 figure. Charge accounts declined 2% in August, a movement similar to that occurring in each of the two preceding months.

The agricultural outlook is bright for this year with the Dept. of Agriculture predicting the second largest crop production on record. Aggregate all-crop production is now indicated at 131% of the 1932-33 base. This huge agricultural output is due to fairly large production of most individual crops, the Dept. of Agriculture reports, rather than record-breaking production of a few.

The general economic health of the nation continued strong in August and September, gaining in most cases from the preceding month but continuing to remain slightly below the level of a year ago. With between one and two million people idle as a result of the coal and steel strikes, and the threat of strikes in the steel fabrication and aluminum industries, the overall effect on the nation's economy is not yet set. If the present strikes are settled shortly, their effect will probably not be felt too serious on a national-wide basis. Certain areas are now being hit hard by local conditions but should be able to look toward a resumption of normal conditions with a settlement of current labor problems.

NAB Membership  
(Continued from page 29)

them what you want and need, it is not surprising that your voice is not heard." Judge Miller's address marked the Thursday session which also featured a talk by Dr. Kenneth Baker, NAB director of research and acting president of the Broadcast Measurement Bureau.

Henry P. Johnston, WSGN Birmingham, Ala., district employee-employer relations chairman, presided over the opening program. Speakers included Richard P. Doherty, director of NAB's Employee-Employer Relations Dept., who led a discussion period on costs, profits and labor problems.

Mr. Doherty hammered home the theme that a careful time study of employees and the work they do could in many instances cut operating expenses and improve efficiency.

"Intelligent, legitimate job integration is the key to cutting costs," he stated. "Management has lacked adaisically allowed jobs to balloon themselves beyond reason."

Carl Haverlin, president of Broadcast Music Inc., told delegates that the current success of his organization was based upon three key points: (1) composers and publishers, (2) research and transcription library, and (3) use of BMI music, live and recorded, by stations on an ascending scale. "BMI average performance," he added, "continues up, with the first seven months of 1949 showing approximately 10% increase over a similar period last year. BMI, competition spirited, does some 40% of ASCAP performances now. Our slogan is '50-50 by '59' and we are pushing hard toward that goal."

The district banquet was held Thursday night in the Hotel Roosevelt, convention headquarters.

Speakers on the Friday program (see late story, page 4) included W. Wright Esch, WMPJ Dayton Beach, Fla., Fifth District sales man, who presided, and Maurice B. Mitchell, director of BAB, who spoke and also led discussion sessions on the theme, "Increasing the Radio's Share of the Advertising Dollar."

Sharing as hosts in the two-day three-state district meeting were Mr. Esch, president of the Florida Asso. of Broadcasters; Edwin Mullinax, WLAG La Grange Ga.; Georg Asso. of Broadcasters head. Howard E. Fill, WSFA Montgomery, president of the Alabama Broadcasters Assn., was unable to attend because of illness in the family.
Central AAAA
(Continued from page 81)
en are becoming more important in the securities markets as purchasers in their own right. They are also the greatest buyers of food, clothing and household products. Most advertising is directed to them, and advertising to women has its effect on their interest as investors by heightening their regard and respect for well-advertised commodities.

"A forecast for good business—"for those who make it good"—was made by Clarence Goshorn, chairman of AAAA and president of Benton & Bowles. Speaking on "You—and Economics," Mr. Goshorn talked of the science of today's economy in layman terms. Accepting the premise that "a foreseeable rhythm runs through our economic life," he concluded that "unapplied, the trend of this rhythm now averages downward." He outlined sales declines for the first half of the year, when retail dollar volume fell off about $20 million each shopping day. This works out to about 13 cents per person per day for all shopping days. But let's not laugh this off, because it adds up to more than the $5 billion in decreased purchases if it continues for a year," he said.

Prospects for the rest of the year give him confidence, Mr. Goshorn said. "We are advertising agents have been doing pretty well so far this year. Through July, advertising expenditures have been running well ahead of last year—well above any other year." However, government economists estimate a need for increased advertising of $120,000,000, he reported.

Optimistic reports have been received from his clients. Mr. Goshorn said, with many "Admitting apologetically that business and profits are good. Like the general public, with money in its pockets and in banks and with high-paying jobs, they haven't recognized the recession we have been going through. Some of them have been bullied by the propagandists into thinking the bump will come later, and are gratefully surprised that they haven't hit it yet."

Two facts indicate to him, however, a good and sound business in the future—and "each is worth more to me than a roomful of the lucubrations of the economists."

1. "In midsummer, the National Assn. of Purchasing Agents, consolidating individual members' current purchasing policies, observed that those reporting increases over balanced declines by three to one. Hundreds of purchasing agents, buying on the basis of intimate knowledge of their own businesses, should be a safer forecast than any economist's dreaming for all of them."

2. Two months ago, Mr. Goshorn read 100 letters solicited by a national magazine from "important" manufacturing executives as to opinions on each person's own firm's prospects in the months ahead. "Not every one was optimistic, but the pessimists were few in comparison with those who looked for better business—better business for their own companies."

Concluding, Mr. Goshorn said: "They could be wrong, but I'd rather trust them to be right about their own businesses than I would the pencil-pushing theorists to be right about our economy as a whole."

Featured Speakers
Other speakers included William H. Albers, head of his own Super- Co. president, who told "Why We Feature Nationally Advertised Brands"; Samuel G. Barton, president, Industrial Surveys, who gave his ideas on satisfactory food product advertising; Enno D. Winius, president, Winius-Drescher-Bran- don, "Let's Stop Being Geniuses"; Alex T. Franz, Frederick, Franz and MacCowan, "Are We Overlooking the User as a Prospect?"; Henry Haupt, vice president, BBDO, "How Agencies Can Prove Most Effective When Sales Decline," and Fairfax M. Cone, board chairman, Foote, Cone & Belding, "I Wish We Had Done These Campaigns."

Burr Tillstrom, creator of NBC-TV's Kukla, Fran & Ollie, and his cast exhibited a sample of their adlib routines at the Friday lunchen, presided over by Earle Ludgin, president of the Chicago agency bearing his name and Central Council chairman.
REPLY was filed by FCC last week to the appeal of the Mansfield Journal and associated Lorain Journal, both in Ohio, against the Commission's decision which denied broadcast facilities to the papers on ground their owners sought to suppress competition in Mansfield. The appeal was filed last November in the U. S. Court of Appeals for the District of Columbia [Broadcasting, Nov. 15, 1948].

FCC had held the Mansfield Journal was not qualified to own and operate AM and FM stations in Mansfield because it had sought to suppress competition in the dissemination of news and information in that city from the existing radio station there, WMAN.

The reply to the appeal said the Mansfield Journal has never recognized WMAN and has consistently refused to print its program logs or to carry any other news concerning the station and its activities except of a detrimental nature. Moreover, FCC stated testimony of various merchants of the city of Mansfield, corroborated by other witnesses, shows the applicant had attempted to coerce local merchants to refrain from advertising over the station by threatening and in some cases carrying out the threat to cancel their newspaper advertising.

In its appeal, the Mansfield Journal stated FCC's reason for denial "were illegally imputed and without support." Neither the Sherman Anti-Trust, Clayton nor Communications Acts give FCC jurisdiction over such matters, the appellant declared.

A fortnight ago the Dept. of Justice filed an anti-trust suit against the Lorain Journal in the U. S. District Court for the Northern District of Ohio, Eastern Div. [Broadcasting, Sept. 26, Nov. 3]. The suit charges the paper with seeking to suppress competition of WEOL Elyria-Lorain. The case sets a precedent in this field.

DAD'S ROOT BEER
AM-TV Spot Campaign Set
DAD'S Root Beer Co., Chicago, begins a month-long national AM and TV spot campaign starting Oct. 27, offering the mame-size bottle (one quart) for one cent if purchased with the papa size (half gallon).

Six contestants will bowl for silver dollars and merchandise awards in hour long program. Top Detroit bowlers will be featured on show each week, giving pointers to contestants and viewers. Local bowling alley is scene of action. Show is sponsored by Ford Rice, Detroit Ford dealer.

DENVER AD POLL Higher Return Reported ADVERTISERS are getting as much or more for their advertising dollars spent today than they were 10 years ago. That was the contention of a majority of Denver advertising agency personnel polled in a survey done by the McCord Research Bureau, opinion and marketing research firm.

The bureau pointed out that this contention was held despite increased media and production costs evident during the 1940s. A minority said the advertiser was getting less for his money than he did a decade ago.

McCord Research Bureau officials said that those who felt the advertiser was doing as well or better for his money generally believed that even though costs of advertising have risen, this rise has been more than offset by today's larger circulation and audience and increased buying power. The minority who took a dimmer view of the present day advertising picture looked with disfavor on the large amount of competition many advertisers must face.

Results of the survey were as follows: More for money 42%, about the same 37%, too little money 21%, no opinion 0%, total 100%.

Crisler cites growth

Crisler, executive vice president of Transit Radio Inc., in an address before the Public Relations Div. of the American Transit Assn. in Atlantic City Oct. 5. The number of markets had mushroomed from one to 16 in that time with contracts in effect for 11% of the vehicles placed in operation since 1942, he said.

He reviewed surveys which, he said, show a similar uniform high percentage of riders voting in favor of transit radio. In addition, he pointed out, there are now over 400 advertisers who have used, or are using, Transit Radio in 16 markets.

Such radio accounts, Mr. Crisler continued, have not cut into revenue produced by ear-cards "but have made them easier to sell by dramatizing the value of the bus audience."

Because his company only sells equipment and national advertising, Mr. Crisler said he could give his opinion on whether a transit company should go into the broadcasting business itself by buying or leasing a radio station. His view was to disfavor any such action because the company would meet with extreme public criticism, and because of the "unprofitable status of FM radio," most stations are willing to make favorable propositions in order to get a franchise.

Mr. Crisler outlined the following points for consideration in selecting a station with which the transit company should do business: A respected name in the community, financial integrity, and technical facilities. These, he said, assure proper programming, proper use of commercials and satisfactory public relations.

PRODUCTION

KEN HANSEN, formerly with Young & Rubicam, New York, and Sam Jaffe Agency, Hollywood, joins production staff of CBS Media Relations.

WILLIAM LADD becomes production director of KWSC Pullman, Wash. He formerly was associate director of radio programs for U. of Washington, Seattle.

RICHARD B. RAWLS transferred from manager of television operations for ABC to network's station relations department where he will concentrate on television. He joined ABC in January 1946 after service with U. S. Army Signal Corps. Before war he was manager of studio operations at CBS-TV, New York, and before that manager of CBS radio service operations, New York.

ILENE HEIMAN, former program promotion director at Toni Co., Chicago, joins WKBK (TV) Chicago as promotional director.

GRANT MERRILL, drama professor at U. of Washington, Seattle, writes and narrates Three-Ring Circus show for KING Seattle.

HAL MILLER, producer at WBBM Chicago, resigns to manage retail television store in suburban Cicero, III.

ED TOBY, formerly of WMMW Meriden, Conn., joins WKBK Oyster Bay, N. Y., as announcer-salesman.

CARROLL FOSTOR, public affairs di- rector at KIRO Seattle, Wash., named radio co-chairman in local Community Chest campaign.

RAY HUTCHINS joins announcing staff of CJAV Port Alberni, B. C.

ERNEST LUCAS, former film editor of WCNS-TV Chicago's Chicagoland Newsreel, appointed TV director in program department of station. His first assignment is Chicagoland Mys- tery.

MARY JONES, women's commentator for WFIL Philadelphia, received New Jersey State Fair Award for most outstanding interview program. Award was made on basis of community sur- vey determining which radio personalities offer most personal and public service to area listeners.

ANTHONY KOELKER, manager of station relations at ABC Chicago, and Patricia Peebles have announced their marriage.

JOSEPHINE WETZLER, educational director for WLS Chicago, spoke on work of German Youth Activities group at luncheon given in honor of her return from tour of Europe.

CHARLES DWYER, manager of guest relations at ABC Chicago, is the father of a girl, born Oct. 2.

FOR an on-the-spot story, News- caster Joseph Mainline (with mike), of WJR Detroit, interviews John S. Bugas, Ford vice president, on the new Ford-UAW pension plan. WJR had its microphone on the scene at the completion of negotiations, giv- ing listeners comprehensive cov- erage including final signing of the pen- sion agreement.

‘RADIO THEATER’

Tops Canada's Radio Poll

A U. S. show, Radio Theatre (Lux) headed the September ratings, release Oct. 7 at Toronto by Elliott-Haynes Ltd. The ten lead- ing evening network shows in Can- ada during September were Radio Theatre with rating 29.9, Twenty Questions 15.1, Suspense 13.4, King's Men 13.1, Mystery Theatre 12.3, Treasure Trail (Canadian program) 11.7, Confessions Hour 10.9, Club 15 10.8, Arthur God- frey's Talent Scouts 10.6, and Music Hall 10.3.

Leading five daytime network programs during September were Ma Perkins 15.1, Big Sister 15.1, Pepper Young’s Family 13.9, Happy Gang (Canadian program) 13.9, and Right to Happiness 13.4.

French-language evening network shows were more numerous during September and leading five were Un Homen et Son Pech 32.2, Metropole 34.9, Prix d'Avranches 30, Jules et Josel 34.7, Jeanne de Beauvoir, and Jeanne de France. Series titles were Rue Principale 20, Jeunesse Dorée 10.7, Marcelle Biernacki 32.6 and Désaligilis des Pins Gourmets 17.8, and Maman Jeanne 17.7.

TWELVE-game football schedule of WSSV Schenectady, N. Y., has been purchased by Schenectady Works of General Electric Co.

DEFENSE TIME

ABC Airs New Series Oct. 25

A NEW series of weekly programs titled Time for Defense will be in- augurated by the Dept. of Defense over ABC beginning Oct. 25, De- fense Secretary Louis Johnson has announced.

The programs will feature con- cert and choral groups and vocal- ists from the armed forces and on- the-spot documentaries of defense activities in the U. S. and overseas. Commentaries will be delivered by William Frye, assistant to the De- fense Secretary. It is the depart- ment's initial Army network venture in that vein, Secretary Johnson said, congratulating ABC for “its role in helping the American peo- ple to keep informed concerning their national military establish- ment.”

Mark Woods, ABC president, said the network and its independ- ently-owned affiliated stations were proud to join with the Defense Dept. in offering the first compre- hensive post-war national radio series on the status of American defense. “Through the medium of radio, using all devices that science has developed to eradi- cate space and time, jointly we will perform the task outlined...” Mr. Woods stated.

Lou Holtz Series

CHARLES MICHELSON Inc., New York, has been appointed to handle the distribution of the Lou Holtz five-minute transcribed comedy series, Lou Holtz Laugh Club, partially produced last season and now completed. Stations, which have ordered the series thus far, according to the company, are: KPHO Phoenix; WLDN Danbury, Conn.; KOWL Santa Monica; KEIO Pocatello, Idaho; WIMS Michigan City, Ind.; WHRY Ann Arbor; KLAS Las Vegas; WBRG Cleveland Heights, Ohio; WCHA Chambersburg, Pa.; KPRC Houston; WSSV Petersburg, Va.; KREM Spokane.

WHY TAKE SECONDARY COVERAGE of Virginia's First Market?

Regardless of claims, if you're trying to cover Greater Norfolk from the outside, nature’s terrain made it impossible.

Only Greater Norfolk stations can cover it. And only WSAP can cover it at lowest cost.

Availabilities and costs from Ra-Tel will prove it.

WSAP . . . "selling advertising problems" in Virginia's First market.

B. Walter Huffington, General Manager
Ask Ra-Tel!
As you plan the future... think of the past...

And You Will Find Proof That the Collins 21B/L Is the Best Transmitter for Your 5 kw or 10 kw AM Installation

- The experiences of many broadcasters have vindicated their good judgment in choosing a Collins 5 kw or 10 kw transmitter for their station. Now, with so many installations giving years and years of reliable service in the field, you broadcasters who are planning 5 kw or 10 kw installations can look back over the past and find there the proof of quality claims in the Collins equipment of today.

Your future operations depend on this quality. It is derived from a long background of manufacturing equipment for all types of radio services, all of which demand quality and dependability. You can take advantage of this.

Today, and in the future, your Collins 21B/L will serve you even better than the successful designs of the 5 kw transmitters we have supplied in the past. This claim is evident when you investigate the superior features offered in the 21B/L. Write Department BC-2, Collins Radio Company, Cedar Rapids, Iowa. The latest information on the 21B/L, and definite reasons why it will be your best purchase for your future operations, will be sent promptly.

FOR BROADCAST QUALITY, IT'S...
SARAH PALFREY, TV star on shows for WPIX (TV) and WNBT (TV) here, New York, signs with TELE-scoops, New York, package show producer, to be star of new TV show.

BENTON PASCHELL, for past year manager of Hollywood office of Western Radio Advertising radio representatives, purchases full ownership of office which will now be known as Western Radio Sales (of Hollywood). Firm, located at 1213 N. Highland Ave, will operate separately from San Francisco office where Western Radio Adv. is headquartered. Pascrell office will represent television as well as radio stations.

JEROME H. WARNER, recently with several major studios in Hollywood, appointed editorial staff of Jam Handy Organisation, Detroit.

ALAN ELOD, formerly head of art section of ABC Hollywood promotion department, joins Searle & Parks Inc., Hollywood (radio packager), as head of promotion department.

LARRY WYNN, vice-president of International Trans-Video, New York, producer of live and film television shows, chosen to act as advisor on radio and TV plans for campaign of...

Robert Wagner Jr., running for presidency of Manhattan borough in coming election, will serve with his campaign.

LEONARD SHANE, formerly on ABC Hollywood news and special events staff, opens his own radio and television engineering and production office in Hollywood under name of Leonard Shane Agency.

CHARLES MICHELSON Inc., New York, transcription firm, adds Australasian daytimer, Dr. Mac, to its list of shows offered for sponsorship.

LEO E. COUTT, formerly public relations director of Scholtes Adv. Service, Los Angeles, opens public relations office in that city.

Equipment

Dr. FRANK B. JEWETT, for many years vice-president of American Telephones and Telegraph Co. and former president of National Academy of Sciences, to receive 1950 medal of Industrial Research Institute Inc., New York.

WDXB STRIKE

Chattanooga Dispute Ends

SETTLEMENT fortnight ago of a dispute between engineers, members of the local IBEW unit, and WDXB Chattanooga management, ends a strike which had forced the station off the air Sept. 25 [BROADCASTING, Oct. 3]. An IBEW spokesman said a satisfactory agreement was reached.

Chief controversy in contract negotiations was the difference of opinion on the use of engineers at the transmitting site, and on the operation of the control board in the studio. It was agreed that a technician would be assigned to operate the control board and another engineer at the transmitter site, no one man charged with the responsibility of both jobs at the same time.

Other points of agreement, according to the IBEW, included weekly pay scales of $85 for the chief engineer and $57.50 for other engineers. Local 682 IBEW and WDXB also agreed upon five-day week, two weeks vacation and four weeks sick leave, the union said.

The strike was called by the local union allegedly to protest the firing of two engineers and management's refusal to sign a contract. However, Joe V. Williams, Chattanooga attorney and out of WDXB Broadcasting Co., had charged the union with "feather-bedding" tactics in violation of the Taft-Hartley Law.

An NLRB election held at the station Sept. 16 had directed management to negotiate with the local unit as bargaining agent for the engineers.

TAX ISSUE

KGA Spokane Sale Involved In Mason Criticism

SALE last June of KGA Spokane, Wash.—60 kw commercial station— to Gonzaga U. of that city won FCC approval last August but the decision did not set well with Rep. Noah M. Mason (R-Ill.), ardent Congressional supporter of tax equality, it was learned last week.

Congressman Mason had in mind the KGA sale a fortnight ago when he criticized certain educational and cooperative organizations which he charged used charitable trust to plead exemption of their income from taxation. [BROADCASTING, Oct. 10].

Included in Rep. Mason’s files are details and clippings dealing with the purchase of KGA by the West Coast university from Louis Wasmer, veteran Pacific Northwest broadcaster who was sole owner of the ABC outlet. It currently is being operated as a commercial outlet by the school. Sale was approved initially Aug. 24 by the Commission, with effective date of Sept. 30, and overall consideration was roughly $500,000. License is know as Corp. of Gonzaga U.

The transaction was completed by Mr. Wasmer with Order Francis Corkery, S. J., president of Gonzaga, who promised the station would continue to serve the community and provide an endowment for future expansion, according to Rep. Mason’s files.

Rep. Mason previously had charged that “colleges own radio stations and run them for profit—tax-free profit”—and that co-ops operate stations, many of them “with annual sales amounting to millions of dollars.” He urged Congress to close loopholes in present federal tax statutes.

The Illinois Republican was on a speaking tour last week and could not be reached, but close sources said he had not only the Gonzaga U. purchase in mind but other examples when he delivered his latest speech on the House floor.

Tax equality will be put into legislative form sometime before next spring, along with repeal of excess taxes, judging by sentiment of many members of Congress, Rep. Mason told his colleagues. He is the author of a bill (HR 5064) to impose income taxes on business income of certain exempt corporations, dealing mostly with co-ops.

One example cited by Congressman Mason was Ed Gardner’s Duffys Tavern, which has been tape-recorded in San Juan, Puerto Rico, Mr. Gardner leased studios of WIPR, government-owned outlet, after setting business in compliance with certain government laws there. NRC engineers were imported from New York to record the program for broadcast in the U. S. Mr. Gardner reportedly is also prepared to turn out motion pictures for television use, and intends to remain in San Juan.

Rep. Mason pointed out that under the Puerto Rican law no excess income or property taxes would be levied against Mr. Gardner, nor would be liable on U. S. income tax.

CBO: GOVERNORS

To Hear Station Briefs

APPLICATIONS for a number of new AM stations are to be heard today and tomorrow (Oct. 17-18) at the meeting of CBC board of governors at Fort Garry Hotel, Winnipeg. Two applications are for 260 w on 1240 kc at Kinston, N.C.; 5 kw station is asked for 930 kc at St. John's, Nfld.; 250 w on 1320 kc is being requested at Thetford Mines, Que., and 250 w on 1340 kc at Victoria, B. C.

Power increases are being requested by: VOAR St. John's, from 100 w on 1230 kc to 1250 kc; in 1 kw on 1230 kc; CSHK Chilliwack, B. C., from 250 w on 1230 kc to 1 kw on 1270 kc; CKRD Red Deer, Alta., increase to 1 kw on 810 kc from 250 w on 1230 kc; CPOR Orillia, Ont., 1 kw on 1570 kc with non-directional antenna from present directional antenna with this power on same frequency; OMB St. John's 1 kw on 590 kc from 250 w on 1,000 kc. There also are a number of applications for share transfers, and, for CFFC-FM Montreal, a review of its separate programming operations from CFFC-AM.

News

BILLY JACOBS, formerly sports announcer for WUSI Lockport, N.Y., named sports announcer with WWCQ Waterbury, Conn.

THOMAS M. PEDEN, member of staff of WIRE Indianapolis, Ind., for past 11 years, appointed farm service director for station.

JACK CANADY, formerly sports announcer for KFI and KBOA both Los Angeles, appointed to newly created post of sports director for KPHO Phoenix, Ariz. He will handle play-by-play for station besides developing and producing other sports programs.

Mr. Canady LOCKWOOD D OTY replaces JOHN MacVANE on NBC's World News Roundup, 8 a.m. EST.

KAL ROSS, staff announcer at WPRA Chester, Pa., appointed station's sports director. He was former sports director at WSIB and WHEN-TV Syracuse, N.Y.

TOM CROSBY takes over football and sports assignments on Broadcasting Corp. of America's Western Network. His programs will be heard on KPRO KPO (FM) Riverside, KERO Indio, KROP Brawley and KYOR Blythe, Calif. He replaces JOHN HACKETT, resigned.

KEN ARMSTRONG, formerly of WPFL Flint, Mich., joins staff of WKEZ Muskegon, as news editor.

KEN EVANS, former news director for WDIC (TV) Washington and former that with WOL Washington for five years, joins news staff of WWDIC-AM-FM Washington.

KEN WOODILL, formerly of WDWS Champaign, WILL Urbana, Ill., and WMIX Mt. Vernon, Ill., joins WLBH-AM Mattoon, Ill., as sports and news announcer.

AL GORDON, head of KFWB Los Angeles news bureau, elected president of Radio News Club, Los Angeles, at recent meeting. Other officers elected were DAVE ANDERSON of NBC news room, vice president; CARROL SUGAR, secretary-treasurer; BETTY PENNY, assistant secretary-treasurer. Named to board of directors were BOB GARRID, CBS newscaster; CLYDE ROBERTS, KFWB; JAMES McNAMARA, KLAC Hollywood news director; CHANCE BORDEN, head of newsroom, CBS Pacific network.

GARDNER C. NORCROSS, farm consultant for WTG-FM Worcester, Mass., given 1949 Massachusetts Distinguished Service Award by National Assn. of County Agricultural Agents.

JAMES BULL, member of news department of KOKX St. Louis, is the father of a boy, James Jr.

R. V. HOWARD

SEeks Honolulu Outlet

ROYAL V. HOWARD, consulting engineer, last week applied for CP to operate a 250 W fulltime station on 850 kc in Honolulu. The island city has five regional outlets, with population of 267,000 in the city proper.

Mr. Howard was NAB engineering director up to last July and prior to that held important war posts. He was with Associated Broadcasters, San Francisco, for a number of years. At present he is an industry member of the U. S. delegation participating in the Montreal NARBA conference. He is 5% owner of KAA Seattle.

The application, filed by Cohn & Marks, states he would move to Honolulu and manage the station.

Note for 'Marketbook'

WREL Lexington, Va., is located in Rockbridge County. Philip B. Hirsch, general manager of the station, points out. Due to an error in BROADCASTING's 1949 MARKETBOOK the station was incorrectly listed as in Rockingham County. The change should be made on page 193, column one of the Aug. 15 MARKETBOOK.

Only $2.98 helps put new “sell” in television advertising

Sponsor of television show had to refile his commercials to meet a new selling problem. New films picked up at the studio 4 p.m., delivered to TV station 800 miles away 9:47 p.m. same evening. Air Express cost for 11-lb. carton, $2.98. (In undramatic fashion Air Express keeps radio, television or any business rolling.)

Remember that $2.98 bought a complete service in Air Express. Rates include door-to-door service and receipt for shipment—plus the savings of the world's fastest shipping service.

Every Scheduled Airline carries Air Express. Frequent service—air speeds up to 5 miles a minute! Direct by air to 1300 cities; fastest air-rail to 22,000 off-airline offices. Use it regularly!

Only Air Express gives you all these advantages

Nationwide pick-up and delivery at no extra cost in principal towns, cities.

One-carrier responsibility all the way; valuation coverage up to $50 without extra charge. And shipments always keep moving.

Most experience. More than 26 million shipments handled by Air Express.

Direct by air to 1300 cities; air-rail to 22,000 off-airline offices. These advantages make Air Express your best air shipping buy. Specify and use it regularly. For fastest shipping action, phone Air Express Division, Railway Express Agency. (Many low commodity rates in effect. Investigate.)

That's the Ticket!  
SIMULATED yellow parking ticket developed by promotion department of WHBC Canton, Ohio, calls attention to Cleveland Browns' pro football play-by-play schedule on that station. Members of station's staff affixed tickets to windshields throughout downtown Canton area. Standard Oil Co. of Ohio service stations in area distributed tickets to customers. Standard Oil sponsors grid broadcasts. "Ticket" reads, in part, "Just the ticket for Parking!—We wish only to arrest your attention! Soho invites you to park leisurely at your radio to enjoy games of the Cleveland Browns . . ."

And the Kitchen Sink  
FOLDER sent to trade by WRVA Richmond, Va., promotes its Calling All Cooks show on Saturday morning. Drawings of program's activities center around picture of woman carrying off kitchen sink. Folder reads, "Buy a participation on 'Calling All Cooks' . . . and you get everything but the kitchen sink, which goes to a lucky housewife." Market data is included.

Newspaper Aid  
SHEET distributed to agencies and trade by WMAR-TV Baltimore contains six box stories which appeared during latter part of summer in Baltimore Sun. Stories were submitted by newspaper and station.  

Promotion

LITTLE KNOWN  
Makes Lively Reading

A PEPPY little book-pamphlet lends a different approach to stations, program and sponsor promotion. It is entitled "Little Known Stories of Muscantine" and authored by W. D. Randall, of KFWC-AM-FM Muscantine, Iowa. All of the stories were taken from Mr. Randall's radio scripts delivered as a Sunday afternoon series from June 5 to Aug. 28. He explains to his readers under the heading "To The Sponsors:"  

'This book is dedicated to the sponsors of the radio series, of whom brief historical sketches will be found in the appendix, in deep gratitude for their cooperation in giving me an opportunity to have more fun than I've had since Uncle Ezra starved himself dieting, until he had the mumps." Mr. Randall goes on to say that his fun with lively sketches of historical interest of the Muscantine area, home of Mark Twain and Dr. Lee DeForest, inventor of the vacuum tube.

On the other hand, Mr. Randall says: "You can either praise Dr. DeForest or take a dim view of his achievement, depending upon whether you like or dislike radio, but the fact remains that his invention made the whole thing possible."

For some interesting information on radio in Iowa, please see page 33 of this issue.
GENERAL ELECTRIC COMPANY pioneered the broad-band gas switching tube for microwave applications. From G-E research laboratories and drawing-boards came the original plans for these r-f "traffic sentinels" whose instant and automatic operation makes possible modern radar for military purposes—for electronic navigation in fog and darkness—for airway scanning, airport traffic control, and cloud and weather study.

Now G.E. offers to equipment designers and users a group of highly developed TR, ATR, and PRE-TR types which reflect intensive effort to achieve still more efficient tube-switching in microwave work.

Key ratings are given below. Complete characteristics and performance data gladly will be supplied at your request, covering any or all of the tubes listed. Announcement of still other types later, may be expected in view of General Electric's continuing program in the field.

For information, prices, and the help of specialist tube engineers who gladly will cooperate in choosing the right tubes for your microwave circuits, wire or write General Electric Company, Electronics Department, Schenectady 5, New York.

GENERAL ELECTRIC

FIRST AND GREATEST NAME IN ELECTRONICS
'TOWN MEETING'
Roundup Tour in Capital

ROUNDUP of America's Town Meeting global tour of 12 world capitals features a broadcast from Washington tomorrow evening (Oct. 18). It climaxes a two-day World Town Hall Seminar Wash-ington Homecoming during which members of the world tour were honored at luncheons and took part in additional round-table talks. Program tomorrow, aired by WMAL Washington to the whole ABC network, will be held in the Departmental Auditorium on the topic "How Can America Contribute to a Free World?—A report to the People."

Participating are Chester S. Williams, World Town Hall Seminar director; Dean Althea K. Hotel, president of the American Assn. of University Women; George H. Wilson, president of the American Farm Bureau Federa-tion, and Brooks Emeny, Foreign Policy Assn. president. George V. Denny Jr., program under-writer, will moderate. All of the speakers are members of the Seminar, representing 28 national organizations with a membership of 81 million.

Seminar members will hear Treasury Secretary John W. Snyder speak at a luncheon tomorrow at the Hotel Washington attended by Cabinet and Congress members, government officials and diplomats. Other events include an informal conference for the Town Hall party and Seminar members with State Secretary Dean Ach-eson and three seminars held in the State Dept. devoted to the Far East, the Near East and Europe. A fourth seminar Wednesday will be headed by Defense Secretary Louis A. Johnson and attended by his aids in the Defense Dept.

HAWAII hails George V. Denny Jr., moderator of Town Meeting of the Air, and Mrs. Denny, who were on the island for seminar debate broadcast Oct. 4 on the subject of Hawaii's immediate fitness to become the 49th state of the Union. At extreme left is George Murphy, manager of Murphy Motor Co., sponsor of Town Meeting in Hawaii, who met the Dennys at the airport with a fleet of Oldsmobile cars and Jack Burnett (extreme right), general manager of KULA, ABC outlet in Honolulu. The island visit was last in the round-the-world tour conducted by Mr. Denny.

Miss Kathryn Herzig
Ralph H. Jones Co.
Cincinnati, Ohio

Dear Katie:

Big audiences' what's all this talk 'round WCHS in the last few days, an' I just found out what they be talkin' about. Here in Charleston we've been one of the first to have a Kraeger Con-
tent unit or two, and we're naturally happy to be doing business with the company. So I'm herin' to tell you about it! (Nineteen Nineteen, the Kraeger Con-
tent unit is just like a KRAEGER CONTENT of a radio station happens to be in spiny to things like these sellers and everyone's happy in an' docs this far for the most part. Very nice indeed! So, Katie, you'll be surprised when you hear what all these personnel has dreamed up for ya! Some new idy pops up around here every day! One thing is certain, you win' like it.)

WBT ANSWERS
Charges Made in Strike

WBT Charlotte, N. C., acted last week to tell advertisers its side of the current dispute with a group of 10 technicians after the group had sent large numbers of post cards to sponsors urging them to stop buying WBT time.

Charles H. Crutchfield, WBT vice president and general manag-er, sent clients a letter explaining that only 10 of nearly 100 em-ployees are involved in the dispute and noting that "a full complement of technical employees, many of them union members, all of our union announcers and union mu-sicians, and the remainder of our staff continue to work as usual, despite some picketing."

Enclosed with the letter is a pamphlet giving WBT’s position in some detail. The station says it is insisting in negotiations with IBEW on the right to decide if an employee's services are satisfactory.

Some of WBT's technicians be-gan picketing last July but were allowed to stay on their jobs, averaging $98.50 per week with three weeks' vacation with pay, unlimited sick leave with pay, and other benefits. Later some of the employees asked the FCC to revoke the television license of WBT, video affiliate. The employees circulated handbills titled "Is Charlotte a second-class city," with adverse comments of WBT’s video serv-ice [Broadcasting, Sept. 19].

Answering the newest post card barrage, WBT says, "In spite of these facts the strike in question, while on our payroll, did all they could to undermine our television operation. If any employer was ever justified in discharging em-ployees, we were."

Ziv Show Purchase
PURCHASE of Meet the Men- jou, a "Mr. and Mrs." radio show, by Burger Phillips Department Store, Birmingham, for sponsorship in that city, was announced last week by Frederic W. Ziv Co., producers of the transcribed series featuring Adolph Menjou, and his wife, Verne Teasdale.

MISSOURI (FM) ELECTS
Toffenetti To Head Board

METROPOLITAN Radio Corp. (WMOR (FM) Chicago) stock-holders have elected Dario L. Tof-fenetti chairman of the board of directors. Ber-nard I. Miller of Bache & Co., brokerage firm, is the company's new president.

Mr. Toffenetti is owner of a restau-rant chain in Chicago and New York.

Other officers, Mr. Toffenetti include four vice presidents: Program Director Jules Pewowar, David Edelson, Promo-tion Director Herbert Kraus and Chief Engineer David Prvan. Continuity Editor Stephen B. Wood is secretary and John Malasky treasurer. Messrs. Pewowar and Edelson were re-elected. Members of the board, elected for two-year terms, are Mr. Toffenetti, Mr. Wood, M. W. Kutchins, Marsh Ray and Arthur Morris. Alexander. Messrs. Kutchins and Wood are incumbents.

Ralph J. Wood Jr., WMOR general manager and former presi-dent, is expected to take an extended leave in the near future.

TWO-WAY RADIO
Prospects Big—Sterling

IN about five years a taxi without a radio will be as unique on busy streets as a surrey betopped with fringe, Comr. George E. Sterling, of the FCC, predicted at the 33rd annual convention of the National Assn. of Taxi-cab Owners in Buf-falo last week.

Mr. Sterling also estimated that 90% of all cars will have two-way radio systems for communication by 1954. He added that "radio means greater safety for the pas-senger and the driver, and is an invaluable aid in reporting acci-dents, fires, crimes and rescue work." Two-way radio eliminates economic waste, inasmuch as 40% of taxi mileage is "dead" (without passengers), he said.

CONTINUOUS-play magnetic tape recorder, eliminating usual continuous tape loop, in production at Amplifier Corp., America, New York.
Technical

Benjamin Wolfe, formerly chief engineer of WANN, Annapolis, Md., and WSDI, Essex, Md., appointed technical director of WAAN (TV) Baltimore. He also was director of engineering for United Broadcasting Co., owner of WSDI and WOOK Washington.

Harry Essman, formerly CBS Hollywood sound technician, joins network's western division engineering staff. Other additions include Ray Erlenborn and Jack Simmons to sound department.

Joseph Schadl joins technical staff of WOAI-TV San Antonio, Tex., as film cameraman; and projectionist following completion of 340-hour course at Television Workshop, New York. He has had more than seven years experience with photography.

John Natale, NBC Chicago field engineer, is the father of a boy, Robert William.

George K. Graham, assistant technical director and director of TV training for student engineers at NBC, joins teaching staff of Hofstra College, Hempstead, N. Y.

Charles L. Brady, chief engineer of EMAC and FM) San Antonio, Tex., and Shirley Minor, publicity and promotion director for stations, have announced their marriage.

Raymond Burtscher, TV projectionist at NBC Chicago, is the father of a girl, Eileen.

Twenty page illustrated bulletin, GEARES, describing newest General Electric telemetering equipment for electric power distribution and industrial applications, released by company. Copies may be had by writing General Electric Co., Schenectady, N. Y.

Seventh Town Meeting of Radio Technicians sponsored by Radio Mfrs. Assn. will be held in U. S. Chamber of Commerce Auditorium, Washington, Nov. 1, 2 and 3. Raymond C. Cosgrove, new RMA president, has invited Wayne Coy, FCC chairman, to appear with him on Nov. 1 program.

Sprague Electric Co., North Adams, Mass., introduces thin multisection ceramic capacitors that are ideal space and cost-savers for bypass and coupling applications. Called Bulglete ceramic capacitors, unit combines all capacitors in one or more radio circuit stages into compact assembly.

Electronics Components Div., Stackpole Carbon Co., St. Marys, Pa., announces production of Stackpole Ceramag II cores, high permeability core for screen areas where there is sudden voltage drop. Cores are made of unique powdered material and give ratios of from 3 to 8 or more, compared to 1.5 for previous cores.

Lobby Probe

House Awaits Budget O. K.

SELECT Committee on Lobbying Activities last week held its first organization meeting and awaited action by the House Administration which must pass on a budget request for $40,000 before the group can launch its proposed probe [Broadcasting, Sept. 2, 10]. Under the chairmanship of Rep. Frank Buchanan (D-Pa.), who presided over the informal session, the seven-man select group mapped plans for the comprehensive lobbying investigation. Rep. Buchanan announced that formation of objectives and policies will be made at a later meeting of the group, which will convene periodically after Congress adjourns. Schedule of hearings will be announced sometime in January after specialists working for group have determined the fields to be studied.

Congressman Buchanan reminded Broadcasting that radio and other avenues of communications were exempt from the Lobbying Act insofar as airing or publishing views on legislation, and he didn't think radio interests would be singled out especially during the study. The probe will cover conformity with the act by lobby registrants and failure of private and public agency personnel to register. The House Administration Committee is expected to approve the $40,000 sum sought by the Select group before adjournment.

WNEW Anti-fire Jingles

NEW YORK'S Fire Commissioner Francis J. Quayle Sunday, Oct. 9, launched the third WNEW New York series of fire prevention jingles, created to educate listeners in fundamentals of fire prevention. Last year's series were used by more than 800 stations across the country, and the National Board of Fire Underwriters distributed the songs this year to an even larger list of stations in time for fire prevention week, Oct. 9-15.

STANDARDS BUREAU

Advises Third Signal Nov. 1

THIRD descriptive broadcast signal will be added Nov. 1 by the Bureau of Standards station, WWV Washington, to improve its reports on propagation conditions in the ionosphere. The information is described of vital significance to the armed service and communications industry.

The bureau has sent out reports at 19 and 49 minutes past each hour, to include standard radio frequencies, time announcements and standard musical pitch. The letter “N” signifies normal conditions, with the letter “W” a warning that daytime ionospheric conditions are present or expected within 12 hours. Starting Nov. 1 the bureau will add a third warning, the letter “G” to be used when satisfactory reception is expected where high-power equipment is used but poor results on services less well equipped. The notices primarily refer to North Atlantic circuits.

NAB HANDBOOK
New Engineering Edition

NAB member stations are receiving the fourth edition of the NAB Engineering Handbook, in preparation for two years under supervision of Neal McNaughton, director of the NAB Engineering Dept. The project was started by Royal V. Howard, Mr. McNaughton's predecessor.

The book has been revised and greatly enlarged, containing 740 pages of basic information and technical material for engineers. It is sent to NAB member stations, with extra copies available to members at $17.50 each. It is not available to non-member stations eligible to belong to NAB.

Six sections are included in the loose-leaf volume, a gold-embossed post binder permitting expansion from 9½ x 13 inches to oversize material is made available. The book weighs just over six pounds.

Completely catalogued, the handbook is divided into six sections—FCC regulations and standards, transmitter, studio, field, general engineering, and charts, graphs and tables, covering AM, FM and TV.

New material on radiation is provided in an article, "Theory and Design of Directional Antenna Systems," by Carl E. Smith, United Broadcasting Co. It is described as the first coordinated and complete work giving a practical approach in design of directional antennas. Dixie B. McKey, consulting engineer, is author of an article on care and maintenance of directional antennas.

Latest developments in studio design and equipment are covered in detail, along with material on room acoustic design and program transmission standards.

**Listener With Faith**

ED GRAUERHOLZ, postmaster at the Ebson, Kan., post office, is a real follower of the baseball broadcasts of Jack Sandler, KOWH Omaha sports director—and apparently has faith in his fellow man as well. The postmaster sent Mr. Sandler a letter and a signed check to cover dinners for the sports director and his wife. Mr. Sandler, who isn’t married, wrote back suggesting Mr. Grauerholz fill the check out and make it payable to the Omaha Children’s Memorial Hospital. The tributes to his broadcasts and his personal honesty are adequate reward for Sportsman Sandler.

**WLAP TO 630 KC**

FCC Again Proposes Grant

IN ITS THIRD decision on the 45-month-old Lexington-Cincinnati WLAP-630 dispute last week to grant the application of WLAP Lexington, which 19 months ago won a final grant that was later set aside. As in the original proposed decision in May 1947 and the final decision of March 1948, vacated last October for further hearings, the new proposed decision anticipates denial for WLAP’s rivals for 630 kc: WCPO Cincinnati and Queen City Broadcasting Inc., also of Cincinnati.

The three applications are for 630 kc with 5 kw day and 1 kw night, directionalized fulltime. WLAP, an ABC outlet, currently operates on 1450 kc with 250 w while WCPO, a Scripps-Howard station affiliated with Mutual, is on 1230 kc with 250 w. Queen City, seeking 630 kc for a new station at Cincinnati, is owned by Leonard Reinsch, managing director of the Cox stations (WSB Atlanta, WHIO Dayton, WIOD Miami), and Frank H. McIntosh, Washington consulting radio engineer, and Mrs. Reinsch and Mrs. McIntosh.

The new proposed decision was issued on a 4-1 vote, Comr. Jones favoring a grant to Queen City, which he felt had not been given “a full opportunity to present its case as part of a reopened record.” He referred to the Commission’s reversal of his ruling, as motions commissioner, granting Queen City’s request for an amendment with respect to a new antenna site.

The majority contended that the evidence taken in the further hearing “reinforces” the original decision that a grant to WLAP “will be more in accord with the equitable distribution requirements of the Communications Act than a grant of either of the others.

The decision conceded that a grant to Cincinnati “would provide for a more efficient utilization of the frequency under our Standards” and that WLAP’s proposed operation “would be limited to 18 hours, and thus would not interfere to any greater degree than contemplated by the Standards.” But the majority felt those factors are outweighed by other considerations, “particularly in view of the greater need for service in the areas proposed to be served by American Broadcasting Corp. (licensee of WLAP).” Several conditions would be imposed on the WLAP grant, under the decision. WLAP would be required to install a phase monitor in the transmitter room to make sure that radiated fields are maintained within the tolerances required; a “directional non-directional survey” would have to be made and accepted by FCC prior to issuance of a license; an approved frequency monitor would be required; and the station intensity would have to be measured at each of the monitoring points every seven days after commencement of operation.

The decision was by Chairman Wayne Coy and Comrs. Paul A. Walker, George E. Stirling, and E. M. Webster. Comrs. Rosel H. Hyde and Frieda B. Hennoch did not participate.

The original hearing was held in February 1946; the further hearing early this year.

**KVI STRIKE**

Off Air Nearly 7 Hrs.

AFTER months of negotiating, Local 77, IBEW, struck three operators against KVI Tacoma Friday, Oct. 7. Station was off air six hours and 55 minutes until a contract was approved granting a 21-cent hourly increase to $2.16, plus working conditions’ changes.

T. S. McColloch of the Industrial Conference Board represented the station. W. W. Willower of the State Mediation Board participated. Vernice Irwin, KVI president, branded the strike illegal and wildcat because the existing contract banning walkouts required arbitration which had not even been reached. Mrs. Irwin told Broad-casting a whole new contract was presented at 2 p.m. and the strike came at 4 p.m. before it was read.

When the strike became effective, KING Seattle General Manager Hugh Feltis arranged with MBS for KING to carry the World Series on the area. Liners were installed by 10 p.m. but the strike ended at 10:55 p.m.

**WHAT TO REMODEL**

Improvements for Fulltime

WILLIAM A. BANKS, president of WHAT Philadelphia, has announced that the station will undergo a once an extensive modernization program with new transmitting equipment, increased studio facilities and other improvements now that the FCC has granted the station a fulltime license. Previously WHAT has shared time with WTEL Philadelphia. WHAT now will be on 1340 kc exclusively.

The station, which also operates on FM, outlets on 105.3 mc, will begin its 24-hour broadcast schedule as soon as arrangements can be made. Mr. Banks and Dolly Banks operate WINX Washington on 630 kc, which is an independent station. WHAT was granted an extension of broadcast time and increased power on Sept. 28 by the FCC.

**KLG Contest**

Points Up Good Farming

TRIBUTE was paid by national and state officials to KLG Denver and the Denver Post, co-sponsors of the annual soil conservation contest, at a banquet Oct. 3 held at the Denver Athletic Club. Featured speakers, Agriculture Secretary Charles F. Brannan and Colorado’s Governor Lee Knous, praised the efforts of KLZ and the Post for stimulating wide interest in soil conservation in the state.

The 15 state winners represented five Colorado soil conservation districts and each district received $500 from KLZ and the Post for their prize winning efforts. The contest, conducted by Lowell Watts, KLZ farm editor, and Ralph Partridge, farm editor of the Post, began last February. KLZ officials present at the banquet included Harry E. Huffman, president of Aladadin Radio & Television Inc., station owner; Hugh B. Terry, vice president and general manager; R. Main Morris, assistant manager; Lee Fendren, national sales manager; John Connors, promotion manager, and Mr. Watts. Leading state soil conservationists were judges. Total of 45 Colorado stations entered the contest—representing 129 farms in the state.

**There’s a New Bold Look in Northeastern Ohio**

IT’S A NEW LOOK because...it sparks with greater results sales from today’s more conservative ad expenditures. IT’S A BOLD LOOK because...those patterns oil old-fashioned and outdated traditions in time-buying.

THINGS HAVE HAPPENED DURING THE PAST TWO YEARS TO PRODUCE THIS NEW BOLD LOOK IN NORTHEASTER OHIO:

1. A station 58 miles from us increased its power and therefore a station 24 miles from us lost more than half its audience in the Canton Market.

2. Another station 58 miles from us lost some of its best features and therefore lost several percentage points in market audience ratings.

3. WHRC increased its power to 5,000 watts...became an affiliate of ABC...and therefore another station 24 miles from us lost practically all of its Canton Market audience.

RESULT: WHBC in Canton is now the station that completes your coverage picture in NORTHEASTERN OHIO because WHRC has gained audience while listening to all other stations has still seven ways.

Situations Wanted (Cont’d)

Technical

Engineer, 1st phone. Graduate AM-FM-TV, leading technical school, excellent references. Will work anywhere. Box 742c, BROADCASTING.

Engineer first phone, graduate leading technical school. AM-FM-TV, will work anywhere. Box 742c, BROADCASTING.

Chief engineer, 2 years college, 5 years experience in AM-FM-TV, development and operation of AM and FM studio and transmitter equipment. Want permanent position with progressive station. Box 780c, BROADCASTING.

Engineer, 21 months experience transmitting and remote. Graduate RCA Institutes. Prefer within 750 mile radius of Los Angeles. Box 833c, BROADCASTING.

Construction engineer will build your 25,000 watt or 200,000 watt station, new or employment basis. Wide experience, references. All letters answered. Box 845c, BROADCASTING.

Engineer, 1st phone. Has had training in announcing and control board. Midwest location preferred. Box 853c, BROADCASTING.

Experienced engineer, announcer, chief engineer or what have you, AM, FM, construction, maintenance, new or existing with top personnel. Box 854c, BROADCASTING.

Engineer, age 23, single with car. Transmitter and studio engineer for 200 and 100 kw, one year experience in 1 kw directional. Enrolled in technical school for advanced courses. Box 865c, BROADCASTING.

Experienced engineer, studio transmitter, and sales people please? Box 890c, BROADCASTING.

Engineer, 50 kw, NY experience, remotes all kinds, traffic, traffic shows, disc and tape recording. Seeking TV future. Available two weeks. Box 897c, BROADCASTING.

Engineer-Licensed. Some experience maintenance, remote, console operation and transmitter. Will work in any location. Box 900c, BROADCASTING.

Engineer, six months experience console, remotes, receiving and transmitter. Would like to get start as combo man. Box 911c, BROADCASTING.

Engineer first phone, grauate leading technical school, AM-FM-TV, will work anywhere. Have car. Box 916c, BROADCASTING.

Engineer-First phone, graduate leading technical school, AM-FM-TV, will work anywhere. Have car. Box 916c, BROADCASTING.

Engineer: Experienced 5 kw directional equipment. Will work anywhere. Box 917c, BROADCASTING.

Looking for location closer to New York. Conscientious, vet with first class some license who knows his radio. FM and TV. Presently employed as engineer. Box 924c, BROADCASTING.

Chief, kilowatt, desires change to progressive station in same capacity. Experience Am, FM, TV. Married. Box 925c, BROADCASTING.

Engineer experienced in AM and FM. First phone, 22, single, M. Blackwell, 1224 Greens, Aug 21.

First class radio-telephone operator, engineer, will work anywhere. J. Ergan, 111 Somerset St., Providence, R.I.

Engineer, first class, 2 years experience AM, FM, amateur, single, sober, with car, desires transmitter operating. Will work anywhere. M. E. Resor, 9225 Ridgmond Hill, 4220 Old Suffolk Blvd., Norfolk, Va.

Young, single man willing to work. Short right combinations possible. Any location. Disc on request. Graduates of E.R. Hilll, Sam Porter, Illinois.

Situations Wanted (Cont’d)

Technique

Plus, plus, plus. Engineer, first class license, 25 years experience, 17 years directing, but no experience as transmitter supervisor. Last 21 months chief of engineering. Plus program writing, control room, recording experience. Box 762c, BROADCASTING.

First class operator with four years experience desires 25 kw or more trans- mitter position with future. Available now. Box 800c, BROADCASTING.

Production-Programming, others

Available immediately for Washington, D. C. area-trained college graduate, 1st class license, excellent voice. Box 795b, BROADCASTING.

Top news caster. Age 30, 3 years experience. Particulars on request. Box 815c, BROADCASTING.

Newman to report, write, broadcast, experienced studio engineer, Journalism degree. Box 816c, BROADCASTING.

Young woman, nine years experience in broadcasting. Has had 11 years, 350 kw, network station. Capable handling office, sales, accounts. Responds, in my sleep. Answer all inquiries. Box 820c, BROADCASTING.

Program director-Taking my time further. I’ve had 11 years, 350 kw, radio production, copy, announcing, programing, voice, radio personnel, advertising agency. Box 905c, BROADCASTING.

Young woman, presently employed as 1st class operator. Desire position with opportunity for advancement. Four years experience all phases commercial radio. Box 911c, BROADCASTING.

Radio writer. Energetic young man, who will work. Has three network credits, would like position on writing or production side of radio. Many supervisory experience in advertising agency. Box 925c, BROADCASTING.

Available program director-announcer for small Texas market. Minimum salary $70.00. Box 950c, BROADCASTING.

Bookkeeper, traffic manager, efficient, thoroughly familiar with all opera- tions. Reply Box 951c, BROADCASTING.

Experienced radio man wishes position directing commercial radio station. Background includes all phases of radio operation. Desires permanent position with opportunity for advancement. Box 916c, BROADCASTING.

Young lady fully experienced in traffic, accounts, correspondence, and their work. Box 950c, BROADCASTING.

Experienced, recently, 2nd class operator. Desires position at station. Box 950c, BROADCASTING.

Wanted to Buy

Stations

Prospective radio station purchaser interested in low powered AM station in east or southeast. Box 850c, BROADCASTING.

Would buy at right price, part owner. Young, energetic, desires position making money. Box 856c, BROADCASTING.

Would buy local or regional station if priced right. Details in confidence to Charcot, Box 950c, BROADCASTING.

(Continued on next page)

Television

Managerial

Television research, agency and re- lated. Young, ambitious, seeking position looking for broader horizons, will relocate. Box 885c, BROADCASTING.

Technical

Television engineer—First class phone, age 26, experienced in radio broadcast- ing. Graduate RCA advanced technol- ogy course. Box 895c, BROADCASTING.

Production-Programming, others

4 years in television writing, producing and directing. Background includes stage and films. Desire to make change. Available about November 1st. Would prefer St. Louis or Minneapolis, or a thoroughly qualified and experienced director for first class position. Box 914c, BROADCASTING. College graduate looking for an in- dustrial position. Box 915c, BROADCASTING.

Young man, graduate leading New York television school. Trained all phases of television, can travel anywhere. Minimum salary. Desires position in television or radio with television future. Box 895c, BROADCASTING.

Equipment

FM station equipment for sale. One GE 3 kw transmitter with console, cabinet, rack complete with monitors. Just like new. Save $500. Write Box 820c, BROADCASTING.

2 Presto 6N recorders and 121-9 amplifier. Excellent condition. First reason- able offer accepted. Box 851c, BROADCASTING.

For sale. New V. U. meters. Two Western Electric 8218 type B scale. and one Weston 962 type 20H type B scale. $35.00 each. One Heath-Wat- ford 460 AB voltmeter, used, excellent condition. $100. Box 855c, BROADCASTING.

One 175 ft. Winchinger 101 tower in good condition. WHSC, Hartford, South Carolina.

Guyed, insulated tower of 5 tubeular steel, 120 feet. Is yours free if you remove, if new, from third-floor roof area and provide adequate insurance to New York City, New York. Box 860c, BROADCASTING.

Western Electric 105AA reproducer group complete with amplifiers, 100 watt remote transmitter with crystals for 2026, 2150, 2700. Make offer. WLTQ, Gastonia, N. C.

WANTED TO BUY

Situations Wanted (Cont’d)

Twenty months as program director small northern California independent station. Now desires change in more metropolitan area, central location. Desires news, play-by-play sports, or television director position, in good experience. Excellent. Telegenic, 27, one year experience as program director. Box 866c, 786 N. Findlay Ave., Montebello, Calif.

TRANSPORT RADIO

Is WKJF-FM Representative

TRANSPORT RADIO Inc., Cincinnati, has been appointed national sales representative for WKJF-FM Pittsburgh, which has begun Trans- mit FM operations on six suburban Pittsburgh coach lines. Arrange- ments were handled by Charles E. Dewey Jr., manager of WKJF-FM, and Arnold C. Nygren of Transport Radio.

Pittsburgh installation, 16th market to be represented by TR, was officially welcomed last month by WKJF-FM, with Mayor David L. Lawrence congratulating the station and the business operators. Bus radio installation on the six suburban coach lines is near completion. Transit Radio established national offices early this year, and is currently conducting negoti- ations with other markets. It plans to market about 30 markets available to national advertisers by September 1950.

ABILITY AVAILABLE

SAVE MONEY ... USE OUR GRADUATES!

Expansion program calls for immediate sale, present Federal 3 kw FM station model 15A with modulator 309- A; also complete set spare parts and tubes. Now set up for 106.5 Mhz, but will operate any FM frequency. Perfect condi- tion. Contact Charles L. Jeffers, WOAI, WOAI, San Antonio, Texas.
Architect's view of WHK's million-dollar "Radio Cleveland"

first, second and third floors of the theatre will be used by television performers. The theatre, built in 1912 by the Metropolitan Opera Co., has a capacity of over 1,000 in its main floor and balcony. Acoustics are said to be excellent for both radio and TV.

Broadcast studios, designed by Edward J. Content, New York acoustical engineer, will feature a "room within a room" setup where-in studios will be built on a spring suspension principle without any mechanical connection between studio walls and the building's outside walls. This method of construction is designed to obtain maximum sound and vibration isolation and better acoustics. Marquee will extend the length of the combined buildings' front. A large restaurant will be housed on the street floor and a huge parking lot will be available in the rear of the center.

Plough Earnings

PLOUGH INC., Memphis, Tenn., reports net earnings for the first nine months of 1949, of $449,500, or $1 per share, on sales of $11,588, 296, against $398,760, or 89 cents per share on sales of $10,618,890 in the same period of 1948. Both sales and earnings for the first nine months of 1949 were the largest for any similar period in the past 10 years. Plough Inc, is parent owner of WMPS Memphis, ABC outlet.

FOREIGN POLICY

Labor, MBS To Air Series

SERIES of three broadcasts by members of Congress who have recently visited Europe and the Par East on committee investigations is planned by Labor's League for Political Education, in cooperation with MBS. Broadcasts will be heard Oct. 23, 30 and Nov. 6, 10:30-11 p.m.

The series is designed to show the working of American foreign policy, with comparison of foreign and U. S. social programs. The idea developed from recorded reports sent back by legislators while investigating conditions abroad.

TUCKER ELECTED

By N. J. AP Radio Group

EDWIN TUCKER of WKDN Camden, N. J., was elected president of the New Jersey Associated Press Radio Assoc. at its annual meeting Oct. 7 at New Brunswick.

He succeeds Thomas Tighe of WLK Ashbury Park.

Roland Trenchard of WAAAT Newark was elected vice president of the group, and Sam. G. Blackman, AP chief of bureau for New York and New Jersey, was re-elected secretary.

Attending the meeting were: Mr. Trenchard, WAAAT; Walter L. Reid, WCAP Ashbury Park; Mr. Tighe and Frank L. Wiljes, WLW; Ralph Marlow, WCTC New Brunswick; Mr. Blackman, WDDN Camden, Kenneth Croy and Merrill Morris, WMTR Morristown.

CARL MARK

Elected N. J. Assn. Head

CARL MARK, WTTM Trenton, N. J., was inducted into office Oct. 8 as new president of the New Jersey Broadcasters Assn., succeeding James L. Howe, WCTC New Brunswick. Other officers elected at the weekend meeting were Ranulf Compton, WKDN Camden, vice president, and Thomas B. Tighe, WJLK Ashbury Park, secretary-treasurer. Sessions were held at the Rutgers U. campus, New Brunswick.

Arthur C. Stringer, NAB staff director, took part in a news clinic at which he made a plea for more and better newsmen in the station. Mr. Howe called for showing of hands on stations having one to four full-time men in the newsroom, with the stations responding. He said this was a big improvement over that of last year.

On News Panel

On the news panel were Donald Meaney, WNNJ Newark, and Arnold Sniderman, WKDN Camden.

Two news clinics included: Joe McCulley, WSNJ Bridgeton; Steven Van Gluck, WNNJ Newark; and Edw. W. Tucker, WKDN Camden. Participants in a research clinic were Harry D. Goodwin, WNNJ Newark, Dr. Sydney Roslov, Pulse Inc., and Smyth Smith, Advertest. Taking part in the sales clinic were Gene Milner, WOAP Ashbury Park; Fred Bernstein, WTTM Trenton; Robert Bell, WCTC New Brunswick.

Friday night banquet speaker was Sydney M. Kaye, BMI vice president and general counsel. The banquet, held at the Roger Smith Hotel, was preceded by a cocktail party with New Brunswick stations, WCTC and WDHN (FM), as hosts. Dr. Mason W. Gross, Rutgers U. provost, addressed the Saturday luncheon. Delegates were guests of the university at the Rutgers-Lehigh football game.

The New Jersey Press Assn. offered to aid the radio group in its effort to have the Legislature extend the newspaper privilege law to radio and television newsmen.

New England

$125,000.00

An exclusive market station reaching more than one million people. Business is steadily increasing and the many plus features in this situation are very valuable.

Midwest

$100,000.00

Located in one of the best midwest medium sized markets. A well established profitable station that is an excellent investment. Favorable financing can be arranged.

**SQUARED MAP**

**Innovation May Aid Engineers**

A SQUARED global map of unusual, if not revolutionary, concept has been developed by William K. Hale of Washington, D. C. It is believed the "Hale Gamo A.P. projection," as it is called, may be of value to radio engineers in plotting bearings of stations and in determining distance between locations.

According to available information, Mr. Hale claims the world chart would permit distances and directions between any two points on the earth's surface to be accurately scaled in terms of millimeters, read directly from a metric scale (ruler) laid over the map.

The great-circle track between any two places also may be plotted on the chart.

This chart is considered revolutional, since it permits quick charts on projections agree that it is impossible to obtain all these properties in one any, flat map. Mr. Hale, however, has demonstrated, on at least 25 occasions, that reasonably accurate results can be obtained from his present drawing. He has demonstrated his projection to a number of cartographers in the Coast and Geodetic Survey, Exerts at the Survey reportedly believe that while Mr. Hale is trying an "impossibility," he has produced correct answers in so many instances they are unwilling to call his chart "unsatisfactory."

**Surles To WOR Sales**

LARRY SURLES Jr. former account executive with WATV (TV) (Tulsa, New York, has joined the WOR New York sales department in a similar capacity. R. C. Maddux, manager of WOR national sales, announced last week. Previously Mr. Surles was with John Blair & Co., New York, station representative, and ABC, in sales capacity.

To new co-partnership of same name composed of William S. Conly, radio and television consultant, and C. C. Rinzkin, 25% owner KRLT Electra, Tex., J. C. Wood of WOR-AM and Wood Enterprise Pub. Co., Waxahachie, and Unico C. Rinzkin, 25% interest, and group of five others. Consideration FEL is 50% interest, and group of five others. Consideration FEL is 50% interest, and group of five others. Consideration FEL is 50% interest, and group of five others.

Spot Radio
(Continued from page 80)

in 1946 is 39,281,230 this year, an increase of 21% over the 1945 total.
Tabulating the total radio families for each county credited with 10% or more in 1946 by BMB for the F&P stations and "laboriously" applying the 1943 and 1949 radio families to these same counties (with due allowance for major family revisions at eight stations) showed that these stations reached, in the daytime, a total of 19,637,300 radio families in 1943, a total of 22,411,320 radio families in 1946 and a total of 27,648,980 radio families in 1949.

Looking at this in another light, the report lists the following cost-per-thousand comparisons:

With Rating of 1 | 2 | 5 | 10 |

There also has been a vast increase in the number of stations since 1943, so the F&P researchers set about finding what effect these hundreds of new stations have had on the audience shares of the major stations, particularly network affiliates, in which the national advertisers have been primarily interested.

"It is our finding," the report states, "that while there have been variations, of course, in the percentage shares of audience acceptance between affiliates of the four networks, the combined radio family total of the four now usually holds its own, but during the past six years there has increased in a majority of instances."

Gains or Losses

The following tables show how audience gains or losses for the four network affiliates in eight markets, with raw roll family figures converted into index numbers, 1945 being 100.

C. L. (Chet) THOMAS (fourth from left), general manager of KXOK-AM-FM, St. Louis, receives the gavel from General Advertising Co. and retiring president of St. Louis Advertising Club, at a luncheon during which Mr. Thomas was installed as new club president.

Group of officers includes (l to r): Hubert Echele, president of Warwick Typographers, treasurer; Leslie L. Pritchard, advertising and research director of the St. Louis Post-Dispatch, secretary; Arthur J. Casey, Gardner Advertising Co. radio director, second vice president; Mr. Thomas; Mr. Wilson; Don O. Pyke, sales promotion director of Graham Paper Co., first vice president, and Richard C. Lynch, service director Oakleigh R. French & Assoc., third vice president. Mr. Thomas is 37th president of the organization, which was founded in 1901 by seven St. Louis advertising men.

### U. S. Spectrum Hog?
(Continued from page 80)

Taking two other TV cities, St. Louis and Buffalo, where daytime audiences to the radio network stations have been well above 1943 levels, the report cites the following evening index figures for the radio network outlets:

<table>

As a final point F&P answers the question: "Has spot radio juggled its discount structure to discriminate against the largest buyer?" by noting that of the stations this firm represents, since 1943, 10 require more annual broadcasts to earn maximum frequencies, 13 require the same number and nine require fewer. "That's about as close to a tie as you can come with an odd number of stations," the report comments. "We believe it reflects the national picture of all major stations."

### Gives More for Money

Summing up its findings, the report states: "We've concluded that radio, spot radio in particular, gives the advertiser today more for his money than it did three and six years ago. This has been the primary purpose of the study."

The final pages of the book are devoted to a comparison of spot radio and "another potent medium, network radio."

### Cities Service
(Continued from page 87)

bottle label proclaims the vial's contents as "Band of Americas Instruments."

Tonight the Band of America will make its television debut in the first of a four-week series of experimental simulcasts, for which NBC-TV affiliates will carry the program along with the 82 NBC-AM stations. A number of innovations have been planned, to make the program pleasing to the eye as it is to the ear.

Raised platforms will put each member of the band into clear view. The program features a new soloist or section of the band, or they will come to the front so that the viewers can more readily follow their performance. There will be frequent close-up shots of intricate fingering by soloists for the benefit of bandsmen viewers throughout the video service area. Girl baton twirlers will be featured, along with some of the rare instruments played by the various band members.

"This is first move into television," Mr. Aylesworth stated, "Cities Service will provide the viewing public not merely with good entertainment such as that offered by the Steve Allen and Groucho. Sullivan shows, but a real public service in perpetuating for the eye as well as the ear that basic American institution—the brass band."

If successful, the test is available for the decision to switch the Cities Service radio program from the Friday night spot to NBC's big night of music. Just in September 26, were doubtful about the effect on their regular listeners, that uncertainty no longer exists, according to Tom De Bow, advertising manager of Cities Service.

Since the switch Mr. De Bow says the company has received numerous endorsements of the move from listeners by telephone, telegram and letter. From all indications Mr. De Bow believes the change to Monday night means a new audience, a smaller increase in the Cities Service listener family.

"Cities Service has been in radio," Mr. De Bow says, "for more than 20 years, so that obviously we are convinced that it has paid off for us and we believe that with the new time it will show even greater results. Right now we are looking forward to the effect of the combined telecast and broadcast of 'Around Town Oil,' which begins on an experimental 4-weeks basis starting Monday, October 17th."

Wilson joins Petry CONTINUOUS expansion of its technical sales force, Edward Petry & Co., industrial representative, last week announced that Robert S. Wilson has joined its New York office. Mr. Wilson formerly with MBS Co., vice president and general manager of its Central Div., in charge of co-op program sales and as an account executive in network sales.

Page 80 • October 17, 1949
Capitol Hill

(Continued from page 28)

on the radio industry early this session in a few bills aimed at networks, stations and manufacturers. Among them was a bill (HR 2410), reintroduced from the previous Congress by Rep. Harry R. Sheppard (D-Calif.), to prohibit station ownership or control by manufacturers of electronic equipment.

In its present form the bill is so stringent as to militate against passage in its most present form, some observers feel. Network and station properties up to $150 million would be dumped onto the market for $1 for the bill became law. The House Commerce group took no action.

FM was injected into the Congressional picture early this session when Rep. William Lemke (R-N.D.) carried over from the 80th Congress proposals to allocate a portion of the 90 MHz band to the auto industry, and render FCC decisions appeallable to the courts where they involve alleged technical or scientific errors. No action was taken on the bills (HR 65 and HR 856) dealing with FM which Acting Chairman George Sadowski of the communications subcommittee felt should rest largely on FCC as an allocations matter.

Charges Obstruction to FM

FM had a vociferous supporter, however, in Rep. Francis Walter (D-Pa.), co-author of the Administrative Procedures Act and caustic critic of the Commerce Committee, who charged that FM has been “obstructed, stepped on, blocked or ignored from the start” and suggested the Justice Dept. investigate, and laid the blame largely on FCC which he alleged had violated provisions of the Procedures Act.

Congressman Walter, second ranking member of the House Judiciary Committee, promised an investigation of FCC which he later abandoned when the full Judiciary committee unanimously voted to study monopoly power in the U.S. Group held hearings and plans eventually to call in the radio

ZIV'S PRIVETTE

Named Southeastern Head

FREDERIC W. ZIV Co., producer of transcribed programs, last week announced the appointment of Tom Privette as Southeastern Div. sales manager. Mr. Privette, who had been with the Ziv Co. since 1944, working out of the Atlanta offices, will continue to make his headquarters in that city.

The Ziv Co.'s plans call for an expansion of the Southeastern Div. with additional personnel to be added to those offices between now and the first of the year.

BROADCASTING • Telecasting

PEARSAN FIRM

Promotes Two, Adds Space

THE John E. Pearson Co., New York station representative, has appointed two executives and is enlarging its quarters and new personnel, John E. Pearson, president, announced last week.

Russel Walker Jr., who has been with the firm for the past year and a half, has been named manager of the New York office. Mr. Walker was on the staffs of WGMG and WQXR, both New York, prior to joining the Pearson Co.

Mr. Walker, who has been with the radio representative organization for the past six years, has been named junior account executive and assistant to the president.

The company has acquired larger quarters on the 11th floor of 250 Park Ave., New York, as part of its expansion plans.

In addition, new personnel will be added to its present staff.

industry—probably through NAB—
to testify in the next session.

Sessions will last indefinitely.

A member of the subcommittee, Rep. Walter, has indicated he will still plans to scrutinize FCC's FM policy, clear channel cases, multiple ownership and other aspects which logically might fall within the antitrust category.

Chairman Crosser of the House Interstate Commerce Committee last March named an 11-man subcommittee to study possible in-terfere with decisions also to FCC, FTC and SEC. A host of bills were assigned to the full committee but never progressed.

The Commerce Committee will hold hearings in January for the third time in recent years.

There were the traditional bills —by Rep. Joseph Bryson (D-S.C.), Sen. Carl Thomas Ringer (R-N.D.), Rep. Fred L. Crawford (R-Mich.)—the first two would prohibit radio stations and other media from accepting liquor ads, while Congress- man Crawford's would extend only to distillers subject to Tax Unit jurisdiction, and would specify ra-dio and television solely. The bill (HR 6111) would amend the Federal Alcohol Administration Act.

Johnson's Fight

Sen. Johnson carried the fight to the Alcohol Tax Unit and FCC, urging upon the former the use of "moral suasion" and the latter the "public interest" precept come license renewal time. Both replied they had no jurisdiction under the present laws.

Sen. Tobey, fireball crusader of the anti-monopoly school, plumped for legislation aimed at trusts de-siring to buy radio or television properties; stalked FCC on its television progress; and chastised the Commission for not holding a hearing on the 10-year Arde Buolva license renewal case.

Lobby Probe Desired

Sentiment to go into lobbying also was apparent (see separate story) with a House Select Committee receiving the go-ahead sign to probe activities of public and private agencies. Also scored were former government officials who turn up as "lobbyists" for private firms. Among those named: Form- er FCC Chairman Paul A. Porter and Charles R. Denny.

The House-Federal Communications Activities Committee also figured prominently during the first session when it suddenly barred television and news cameras from future pub- lic hearings and radio engineers were allowed to take notes. Broadcasters—networks, commentators and House Radio Correspondents alike—stormed the committee with protests. The situation is pretty much status quo now—tape-recorder and cameras could be permitted by special authorization from Chairman John Wood—an excep-tion that proves the rule.

The whole question of defamtion and slander flared into prominence on Capitol Hill last April. Rep. John Rankin (D-Miss.), with moral support from Reps. Clare Hoff-man (R-Mich.) and Hale Boggs (D-La.), leveled fire at ABC com- mentator Drew Pearson for remarks pertaining to the late James Forrestal, and urged Congress to make radio commentators liable to suit in the district court nearest the victim's residence. Rep. Rankin introduced legislation (HR 4206) to assist them in recovering damages.

The volatile Mississippian asked that liability be extended to spon-sors and all stations airing the commen-tarities "for the protection of broadcasters themselves." He chided the FCC for being "too slow" to act. No action was taken by the House Commerce Committee.

Atty. Gen. J. Howard McGrath, former U.S. Senator (D-R.I.), also showed displeasure . . . for certain radio stations. Feeling they had levied excessive rates for political advertising, the Federation of Democratic National Committee chairman subsequently authored legislation to prohibit stations from imposing more than standard or "reasonable" charges. His bill (S 2256), referred to the Senate Commerce, provides penalties ranging from suspension of station licenses for 30 days to possible revocation. Individual broadcasters and NAB alike protested the principle of Congressional session and less discrimina-tory to the radio industry. Most authorities feel the bill would curb only exceptions to the rule, and see little chance of passage next session.

Summary of Proposals

Before Congress this year also were proposals to:

1. Make it a criminal offense to use radio facilities to incite contempt for the U.S. Gov- ernment or its officials or to incite disaffection by force or violence (passed).

2. Amend the act to bar tape recordings of news and special events transmitted as part of presentation of sale (of production) import duty, thus aiding foreign language stations (passed).

3. Exclude musical instruments from the excise tax on phonographs, phonograph records and radio receiving sets and another measure to repeal munici-pal taxes on those items (carried over).

4. Authorize Congress to authorize daylight saving time as standard time for any given year (carried over).

5. Transfer Ziv radio rights to title for government-owned broadcast facilities from RFC to State Dept. This affected by Rep. Ike Skelton's proposal to create National Standards and to affect with $4,645,000 in funding (pending).

6. Make it a crime to broadcast Amateur Radio Week to stimulate interest in radio operation (passed).

7. Provide for a Presidential proclamation (passed).

8. Witness children employed as ac-tors or performers in radio and tele-vision, the consideration of providing for a minimum wage (passed).

9. Prohibit any broadcast in the service of the Congress of the United States violating the 17th Amendment (passed).

10. Require that broadcast political statements concerning candidates for elected public office be labeled to cost and sponsorship (carried over).

11. Appropriate supplemental funds to the Broadcasting Bureau for the 1958-1959 decennial census. House passed, to include a sampling measure of television and radio sets (passed).

12. Repeal the Tart/Hartley Act to bring the act into line and to elimi-nate indiscernible use of second-hand equipment by broadcasters including stations, sponsors, etc. (carried over).

13. Increase the salaries of agency heads 10% of the Federal, FTC, SEC and others (passed—see separate story, above).

14. Give FCC specific authority to block broadcast of off-color material from stations, buildings and facilities (passed).

October 17, 1949 • Page 81
BROCKWAY SEES BRIGHT FUTURE FOR VIDEO

TV—"newest and possibly most effective advertising tool devised"—may, in time, supplant radio, Louis Brockway, executive vice president, Young & Rubicam, said Friday afternoon at AAAA Central Council meeting in Chicago (early story 31).

Advising agency men "How To Use TV Today," Mr. Brockway described TV timebuyers' job as "difficult" because of "uneven coverage patterns and complicated rate-discount structures." Answering questions asked most often by clients, he admitted facilities situation is "hearty" but "as surer ground" regarding audience size and possibilities of growth. Public goes for TV in a big way, and audiences will spring up moment station starts operating, he said.

He foresees year from now, TV facilities in all major markets, if station construction is not unduly delayed.

INTER-AMERICAN BOARD OPENS WEEKEND SESSION

BOARD of Inter-American Assn. of Broadcasters met in New York Friday. Principal items on agenda at meeting, scheduled to last through weekend, were selection of time and place of meeting, scheduled for next March. Program in New York was presided over by Carlos Mestre, owner of CMQ Havana and president of association; Emilio Azcarra, of Mexico City; Sr. Sico; Gilmore Nunn, WLAP, Lexington, Ky., for NAB; Forney A. Rankin, NAB; Jose Luis Fernandez of Mexico City; Ramon Rosachea, of Havana; Fernando Eleta, Panama, and Ramon Quinnones, Puerto Rico. Machado de Aasi of Brazil, another board member, unable to attend.

KPLT TRANSFER APPROVED

KPLT Paris, Tex., granted transfer of control for $278,000 from group headed by Houston Harte to Boyd Kelley, manager KTRN Wichita Falls, 45%. William H. Hill, manager KTSH Emporia, Kan., 10%, and Louis O. Seibert, part owner KELP El Paso, Tex., 45%. Consent also granted KPKE and KRPF (FM) Fresno, Calif., acquisition of control by J. E. Rodman, original licensee. Now 45% owner, Mr. Rodman buys total 11% holdings of three other stations for $60,000.

NBC Buys KMPC

(Closed Circuit)

(BROCKWAY SEES BRIGHT FUTURE FOR VIDEO)

(Continued from page 4)

trustees [BROADCASTING, April 25, Aug. 1].

Trusteeship plan was worked out after FCC called hearing based on complaint, filed by Radio News Club of Hollywood charging Mr. Richards ordered KMPC staff members to slant news against members of late President Roosevelt's family and certain minority groups. This hearing was postponed indefinitely but question was revived when FCC called hearings not held in trusteeship proposal and license renewal applications.

Mr. Richards owns 64.8% of KMPC and 71.64% of WGAR, and with wife owns 62.59% of WDL.

DRYS ATTACK WHAS ASK FCC DENY RENEWAL

TEMPERANCE LEAGUE of America asked FCC Friday to renew license of WHAS Louisville on grounds station carries beer advertising and refuses to sell time to League for temperance messages, though 93 of 120 Kentucky counties have voted to ban sale of all alcoholic beverages.

Leaque's complaint was in letter signed by Edward B. Dunford, attorney. One of its national officers is Rev. Sam Morris, who tried unsuccessfully few years ago to have KRLD Dallas denied license on similar grounds.

TEXAS TV APPLICATIONS

NEW TV stations sought for Lubbock and Amarillo, Tex., by Lubbock Television Co., seeking Channel 6 (82-88 mc), and Amarillo Television Co., seeking Channel 5 (76-82 mc), according to bids tendered at FCC Friday. Both include channel 1.95 kw visual, 0.97 kw aural and specify initial cost $115,000. Dr. Glenn Terry (33 1/3%), Dr. Watt W. Winn (25%), Dr. Warren E. Massey (25%) and Dave C. Edwards (16 2/3%), owner Hillcrest Mausoleum, all Dallas, are owners of both firms.

SET MAKERS RESPONSIBLE

RESPONSIBILITY for protecting TV and other sets against interference caused by direct intermediate-frequency pickup from properly operating diathermy and similar devices was placed by FCC Friday upon set manufacturers and set owners. Commission had made this proposal last July, said it received no objections, and made it effective Dec. 1. Responsibility formerly was on diathermy operators.

MISS HAYES NOT TO RETURN

HELEN HAYES Friday notified N. W. Ayer & Son, New York, she will not return to CBS series this season. Coriás Archer, summer replacement for Sunday, 9-9:30 p.m. show, extended after death of Miss Hayes' daughter, will continue in Electric Companies-sponsored spot.

'VOICE' FUNDS APPROVED

LEGISLATION providing $10,475,000 for new Voice of America anti-jamming facilities signed by President Truman Friday.

BMI TOPS ASCAP

FOR first time in its brief nine-year existence BMI has topped ASCAP in total listings as shown by current poll. BMI found ahead in best-selling and jule box rhythm and blues records, most-played jule box country and western records, best-selling retail folk records and most-played jule box records. It also rated high in best-selling popular retail records and those most played by disc jockey, and tied with ASCAP on the honor roll of hits. BMI's position rising rapidly, according to Carl Haverlin, BMI president.

BEST guess on Washington color TV front is that FCC will be disposed to ask for more work on color, possibly authorizing field tests of color equipment before reaching final decision.

VLADIMIR ZWORYKIN, RCA inventive genius who brought forth those twins of TV, i.e., intermediate and kinescope (Ike and Mike)—is directing laboratory development of RCA's "compatible" color TV. It's predicted he will come up with single-tube all-electronic color within six months.

MONTGOMERY WARD plans for renewed big-scale radio activity reaching decision stage with B&B's Maurice Mitchell hopeful of favorable announcement inside month.

REALIGNMENT process at NAB may go even farther. Board's structure committee will meet at end of week to take stock following ax-swinging and streamlining moves. Changes in 17-district setup also to be considered.

NESTLÉ'S CHOCOLATE, through Cecil & Presbrey, New York, looking for spot availabilities in New York, Chicago, Philadelphia and Boston.

SET makers, alarmed over Revenue Bureau's sloping of the tax code on models with FM tuners, are even more worried lest Congress levy on entire TV chassis when tax law is re-examined next year.

DORLAND INC., New York, looking for availabilities for possible spot announcement campaign for Pepto-Magnam.

DAN R. MINER Co., Los Angeles agency (Innterate Bakers), negotiating through Hilly Saunders, vice president in charge of radio and television, and Fred Levings, director of Cisco Kid AM program, for television film rights. Discussions going on with Frederic W. Ziv Co. and Phil Krasne, film man, for production of 26 half-hours.

THAT COLOR TV hearing to be convened in San Francisco Nov. 28-30 for demonstration of Color Television Inc.'s system will be before entire board and all seven member commissioners of FCC and at least half dozen members of its engineering and legal staffs. Other hearing participants, of course, can be on hand, since demonstration is simply regarded as field phase of Washington proceedings.

CBS PLANNING one-time half hour film version of Philip Marlowe series. Result will be weighed against kinescope as to cost and quality. Apex Pictures, producer of Lone Ranger series, under consideration for test.

BEFORE FCC hearings on color TV phase are concluded, hitherto unscheduled appearance of Brig. Gen. David Sarnoff, RCA board chairman, may develop. Gen. Sarnoff, who personally directed RCA's compatible color TV demonstration, and who has figured in every aspect of radio-electronics development since origin of the art, if called upon will expound his views as to where TV is headed and when. He's hardly missed a prediction in the last generation.
In this area, WLW reached four fifths of all the 3,644,800 radio homes between 6 a.m. and midnight.* That's coverage!

Of these homes, WLW in four weeks...
- reaches 65.8% between 6 AM and 6 PM
- reaches 71.5% between 6 PM and Midnight
- reaches 80.7% between 6 AM and Midnight

THAT'S COVERAGE!
