THE NEWSWEEKLY
OF RADIO AND TV

FEBRUARY 16, 1953

RADIO—10.4 HOURS

Television — 2.6 hrs. per day

Daily Newspapers — 1.2 hrs. per day

Magazines — 0.79 hrs. per day

Weekly Newspapers — 0.17 hrs. per day

Iowa’s 806,000 families spend more than TWICE as much
time with RADIO as with all other media COMBINED!

and WHO continues to be Iowa’s BEST ADVERTISING BUY!

Send for the FACTS TODAY

These facts are taken from the 1952 Iowa Radio-Television Audience Survey conducted
by Dr. F. L. Whan of Wichita University, and his staff. The new Survey again proves that
radio is by all odds Iowa’s best advertising value . . . and that WHO continues to be
Iowa’s best advertising buy!
NOW...316,000 WATTS...

POWER!

AMERICA'S MOST POWERFUL TELEVISION STATION

WHAS now achieves another great Television FIRST... 316,000 watts of picture power... 316,000 watts of greater service to viewers and advertisers alike.

This leadership is traditional with WHAS Television... which pioneered use of the 12-bay high gain antenna... and was the nation's first station to provide 50,000 watts of picture power.

First again... because of bold development work with General Electric engineers... WHAS becomes the nation's most powerful television station... serving and selling the largest number of viewers in the Kentuckiana market.

Great years of telecasting
Great expansion programs...
that's WICU-TV
the ERIE DISPATCH station

Hi-Lites of News and Sports starring Bob Lundquist, a daily 15-minute program. Erie folks watch and listen when Bob performs.

Let's Go Dancing, starring Ollie Brown and his Ranch Boys. This popular program has been televised for more than four years over WICU-TV.

The Tune Toppers play music the way you like to hear it. Starring outstanding area talent, this program, now in its third year, boasts terrific success stories.

The Woman's Page of the Air, starring Mary Lois Traphagen 30 minutes a day, Monday thru Friday, presents helpful cooking hints, latest fashions and interviews. A fresh, wholesome approach, this TV show is open for participation—ask about the results obtained by other advertisers!

symbol of WGAL-TV's increased power, gives advertisers larger coverage, bigger audience, greater sales potential in WGAL-TV's rich Pennsylvania market area through network and locally-produced programs.

* rich market includes Harrisburg, York, Lancaster, Reading, Lebanon.

NOW, the Ford Motor Company, long-time sponsor of WGAL-TV's World News, benefits from this great new Channel 8 power increase. Many other national advertisers using WGAL-TV locally produced shows also see their profit view enlarged. Among them:

- BALLANTINE
- ANACIN
- SINCLAIR OIL
- PYREX
- ROPER RANGES
- R.C.A.
- NESTLE
- TYSOL GASOLINE
- INTERNATIONAL HARVESTER
- HAMILTON WATCH

New York Chicago Los Angeles San Francisco
BAB has hit jackpot which will benefit entire radio industry. After hitting hard at department stores for fair shake in competition with newspapers, Bureau has go-ahead from large chain of department stores which has agreed to use half its total budget for radio. Details of proposed $400,000 campaign will be ready for release some time in March. Previously only sporadic radio was bought, with bulk going to black-and-white.

**BROADCAST MUSIC INC.** enjoying another good year, expected again to give discount to its broadcaster licensees. BMI management won plaudits of its board of directors at annual meeting last week at Belleair, Fla., for its steady progress. Next project expected to be in serious music field through its subsidiary, Associated Music Publishers, headed by Charles Wall, who also serves as vice-president-treasurer of BMI.

**PLAN OF NARTB TV Code Review Board to advise President Eisenhower of its work at personal interview has hit snag—but not at White House. NARTB Radio Board, evidently figuring that visit was prerogative of full board, took exception, with result that code group's request for engagement was withdrawn following Belleair, Fla., NARTB board meeting fortnight ago. Now TV Code Board, on ground that it's autonomous, plans to reinstate request. Its members are John Felzer, chairman; J. Leonard Reinsch, vice chairman; E. K. Jett, Walter J. Damm and Mrs. A. Scott Bullitt.

**WHAT WITH CBS' H. Leslie Atlass taking over former WBKB (TV) as part of ABC-United Paramount merger—and new local TV shows being showcased for eventual network origination—there's rosy glow of optimism over future of Chicago television these days. It's agreed that under Mr. Atlass' wing, WBKB (WBBM-TV) will emphasize local public service programming, with accent on showmanship. And, of course, new United Paramount money and blood is expected to hypo ABC Chicago programming on old WENR-TV.

**EXPERIMENT that may pave way for settlement of vexatious baseball-TV minor league problem launched in Atlanta, where Southern Association club will seek to pre-sell blocks of season tickets premised on telecasting of games over WSB-TV. Club, station and Atlanta Journal and Constitution, which own WSB program, working together with Junior Chamber in project to pre-sell 25-30,000 four-ticket books at $5, good for any games, with telecasts as bait. If club breaks even on tickets, concessions will make money and precedent will be established for other ball clubs. Idea gleaned from Baltimore professional football project where sufficient advance sales were made to underwrite acquisition of Dallas franchise.

WITHDRAWAL of portion of principals from WMSC Columbia, S. C., to join WIS owners in WIS-TV Corp., granted Ch. 10 there last week, hailed in some quarters as practical solution to FCC concern over dual AM station tie-ups inherent in "marriage" TV bids. FCC, however, granted Ch. 47 to Macon merger group, but only after WBML and WNEX reduced respective holdings to 45% and brought in third independent party with 10% balance of control.

**RISING INDIGNATION evident among telecasters over free plugs being given consumer magazines, thus building newstand circulation, which publishers use to delay TV competition. It works this way: Magazine runs glowing article on TV programs, or gives it award. Advertiser reciprocates by giving magazine generous mention or perhaps shoves in commercial covering presentation of award. Affiliates' ire rising to point where action banning such free rides may be taken at NARTB convention.

**ALL-INDUSTRY push to persuade Congress to delete no censorship provisions of Sec. 315 of Communications Act (which forbids broadcasters censoring political candidates' speeches on air) due to get under way this week. NARTB board at Florida session approved Government Relations Director Ralph Hardy's outline of basic broadcasters' position—which has an ultimate goal elimination of Sec. 315 entirely. Since this appears impossible in near future, campaign in this Congress will be for authority to delete libel and slander from politicians' broadcasts so broadcaster won't be "in between" on libel laws—forbidden by FCC to eliminate defamation, but liable to damage suits under state laws.

**SEN. CHARLES W. TOBEY (R-N.H.), chairman of Senate Interstate & Foreign Commerce Committee, may proceed slowly on legislation to dehorn broadcasters from dilemma of political libel. Senator feels that, while his group has jurisdiction over Communications Act, matter generally might better be pursued by Senate Judiciary Committee as part of overall political problem. Sen. Tobey agrees that problem is "vexsome" for radio-TV broadcasters but seems lukewarm to taking any specific action.

**MEETING of FCC officials with House Interstate & Foreign Commerce Committee Feb. 19-20, is no probe but get-together aimed at acquainting new members with work of agency, give all members opportunity to ask questions. That's not to say some searching questions won't be asked. Among those understood to be in minds of some of New Jersey Rep. Charles A. Wolverton's committee are: "Strike" applications (B*F, Feb. 9) results of McFarland TV, educational TV, color TV, length of TV hearings.

Any Advertiser CAN and most advertisers SHOULD use SPOT RADIO

REPRESENTED NATIONALLY BY EDWARD PETRY & CO., INC.
IS YOUR ADVERTISING ALL BONE AND MUSCLE?

1. Are you cutting down in low profit areas?

2. Are you concentrating your ad dollars in major markets?

3. Are you backing up your salesmen market by market?

4. Are you exploring ways to redevelop old markets?

5. Are you able to pinpoint your advertising dollars in true proportion to sales potential?

If you're not, there's one way to be sure. Use Spot Radio on any of these great stations.

TEXAS QUALITY NETWORK
All It Took was a Repeater...

... Just issued to frontier troops, to foil an Indian massacre. One column, threatened with annihilation and outnumbered four to one by savage Sioux, took a stand on a sandbar behind a dead-horse barricade. New repeater rifles provided the firepower to repulse the attackers until relief arrived three days later.

KOWH features a repeater action too—the kind that uses your sales-ammunition to the best advantage in the Omaha, Council Bluffs area. Draw a bead on the below Hooper, averaged for the 15 month period from October, 1951, thru January, 1953. 15 consecutive reports have shown KOWH in first place!

- Largest total audience of any Omaha station, 8 A.M. to 6 P.M. Monday thru Saturday! (Hooper, Oct., 1951, thru Jan., 1953)
- Largest share of audience, in any individual time period, of any independent station in all America! (Hooper, Jan., 1953)
GENERAL MILLS, Minneapolis, "considering one or two plants for saturation radio-TV spot campaign similar to package deal evolved last year with number of stations. Campaign will be over longer period of time, Lowry Crites, firm's radio media director, disclosed Friday. He said plan would be announced within week or ten days.

Mr. Crites said company is thinking along lines of advertising many different products in stations from day to day. He told B&T company feels stations will be receptive to General Mills package deal. Last year, 455 announcements were aired over 13-week period, with four-fifths of schedule in Class A time and overall rate based on one-half of each station's one-time rate. Mr. Crites said new package blueprint, when finally evolved, would "not necessarily" follow this formula, but indicated there would be similarity.

General Mills had reasonable assurances from stations in 1952 they would be receptive to similar plan this year. There is "evidence" that "great many" stations would be interested again, an official of Knox Reeves advertising, GM agency, said. Pattern will depend partly on company's decision with respect to network radio.

Once plan is announced, company officials plan to deal directly with stations, touring country sometime early in March.

FOUR NARTB DIRECTORS ELECTED BY DEFAULT

FOUR district directors who will serve on NARTB for two-year terms starting at Los Angeles spring convention were elected without opposition when nominations closed Friday, according to C. E. Arney Jr., NARTB secretary-treasurer.

New directors are:

DISTRICT 7 (Ohio, Ky.)—F. Ernest Lackey, WHOH-AM-FM Hopkinsville, Ky.

DISTRICT 9 (III., Wis.)—Hugel Boce Jr., WTAQ-AM-FM Waukesha, Wis.

DISTRICT 13 (Texas)—Kenyon Brown, KWFT Wichita Falls, Tex. (incumbent).

DISTRICT 17 (Wash., Ore., Alaska)—R. M. Brown, KPOJ-AM-FM Portland, Ore.

Final ballots for all nine odd-numbered directorships as well as at-large vacancies (large, medium, small and FM stations, one each) to be mailed to eligible station representatives Feb. 27.

Wide-open contests indicated in at-large categories, with seven candidates for large stations, 22 for medium, 17 for small and 15 for FM. Full list of nominees, in addition to four uncontested districts, follows:

DISTRICT 5 (Ala., Fla., Ga., P. R.)—John Fulton, WLS-AM Atlanta; James W. Woodford Jr., WRLB-AM-FM Columbus, Ga.

DISTRICT 11 (Minn., N. D. S. D.)—Harry W. Linder, KWLM Willmar, Minn. (incumbent); John P. Meagher, KSYX Mankato, Minn. (former director).

• BUSINESS BRIEFLY

FORD TRUCK DRIVE — Ford Motor Trucks through J. Walter Thompson Co., N. Y., lining up radio and TV spot campaign to promote its 1953 model in about 240 radio and 20 TV markets for about two weeks early in March. Ford usually expands its spot buys district by district.

NEW C-P-P PRODUCT — Colgate-Palmoive-Pee coming out with new product, Lustre Creme Home Permanent, and planning test TV spot campaign to start in late February in from three to six markets. Agency: Lennen & Newell, N. Y.

RADIO FOR LINCOLN — Lincoln Mercury cars placing district by district varied radio spot campaign starting March 15. Length of contract extends three, four and ten weeks in different districts. Agency: Kenyon & Eckhardt.

ICE-MAKER SPOTS — Servel Inc., Evansville, Ind., preparing four-week spot announcement campaign for its new automatic ice-maker refrigerator to start March 10 in 100 radio-TV markets. Agency: Hicks & Greist, N. Y.

SPOTS FOR NASH — Nash cars through Geyer Inc., N. Y., preparing two-day TV and three-day spot radio schedule starting March 5 in more than 100 radio-E TV markets.

SOUTHERN CAMPAIGN — Hood Chemical, through Hilto & Riggs, N. Y., placing quarter-hour transmitted show plus spots in about dozen radio markets, mostly in South, starting April 1 for 13 weeks, to promote bleaches, starches.

KIX ON NBC-TV — General Mills, Minneapolis, will advertise its Kix corn cereal when it begins once-a-week sponsorship of "Ding Dong School" on NBC-TV March 6.

Trace, WBBW Youngstown, Ohio; Charles C. Warren, WCMI Ashland, Ky.

Who is the most popular disc jockey in Atlanta?

That was the question Hank Snow, the Singing Ranger, and the local distributor of RCA recordings wanted to know.

30,000 radio listeners supplied the answer by voting on 27 disc jockeys from 14 stations within a radius of 40 miles of Atlanta.

The winner and champion disc jockey—our own Jon Farmer!

Local and national advertisers alike are using Jon Farmer to boost their sales in Atlanta—the nation's 29th market in total retail sales.

Let us tell you how WAGA and Atlanta's most popular disc jockey can team together to build sales for you.

KWTO Power Boost Set Aside; Other Actions

POWER BOOST from 1 kw to 5 kw at night for KWTO Springfield, Mo., was set aside by FCC Friday and scheduled for further hearing before Examiner J. D. Bond at date to be specified. Action was in accord with mandate of 6th U. S. Court of Appeals for District of Columbia which ruled Commission erred in not heeding interference claims of KFDM Beaumont, Tex. KWTO is assigned 5 kw day, 1 kw night on 560 kc., sectional. FCC made

at deadline

WIND Chicago, KZL Denver and KFDM parties to hearing.

WSMB to Amend TV Bid

WSMB New Orleans, one of several properties involved in last week's Paramount Radio and Film merger, has been placed by FCC (see story page 27), is amending its TV bid from Ch. 20 to Ch. 32. Ch. 32 newly available as result of finalizing of Commission order to substitute Ch. 69 for Ch. 39 at Baton Rouge, La. FCC corrected sub-standard spacing.

Television Actions

FCC Broadcast Bureau late last week took following television actions:

WBRC-TV Birmingham, Ala., granted special temporary authorization for commercial operations except for use of DuMont series 1950 and 2000 transmitter. Transmitter output 5 kw visual, 2.5 kw audio, to June 17.

KOLN-TV Lincoln, Neb., granted STA for commercial operation except for use of RCA TTV-19B transmitter. Transmitter output 5 kw visual, 2.5 kw audio. Transmitter. Transmitter output 5 kw visual, 2.5 kw audio; to Aug. 1.

WBKB-TV New Britain, Conn., granted STA for commercial operation except for use of RCA TTV-19B transmitter. Transmitter output 1 kw visual, 2 kw audio; and to June 26.

WLVA-TV Lynchburg, Va., granted STA for commercial operation except for use of DuMont series 1950 and 2000 transmitter. Transmitter output 1 kw visual, 2 kw audio; to June 28.

WCBS-TV New York, granted change to ERP 100 kw visual, 2 kw audio, antenna height above average terrain; to Aug. 4.

WGLV (TV) Easton, Pa., granted change to ERP 100 kw visual, 2 kw audio, antenna height above average terrain; to Aug. 1.

Three TV Applications

Late Friday, three new TV applications were filed with FCC. They are:

Sheboygan, Wis.—Television of Sheboygan Inc., ubh Ch. 50, ERP 20 kw visual, antenna 340 ft. above average terrain. Construction $175,000, operating $140,000. revenue $136,000. Owner of applicant is Press Publishing Co., owner of WHBL-AM-FM Sheboygan.

Fresno, Calif.—R. M. Schuler, L. E. Chernault, Bert Williamson, and L. H. Todd, ubh Ch. 47, ERP 100 kw visual, antenna 314 ft. Construction $180,000, operating $76,000, revenue $120,000. Owners, Schuler, Chernault and Williamson have interests in KNVO Fresno. Chernault also holds interest in KTVU (TV) Stockton, Calif.

Norfolk, Va.—Beachview Bestway Corp., ubh Ch. 10, ERP 316 kw visual, antenna 363 ft. Construction $652,825, operating $700,000, revenue $659,825. Principals include president and treasurer Dudley Cooper (50%), Norfolk real estate; secretary Irving M. Kipnes (50%), account executive for ad agency Cohen & Miller, Washington, D. C.

WTVI (TV) on DuMont

WTVI (TV) Belleville, Ill., near St. Louis, signed as DuMont TV network affiliate replacing KSD-TV St. Louis in DuMont lineup, announced Friday. R. B. Braddock, station's station manager, confirmed the action, announced Friday. WTVI, owned by Signal Hill Telecasting Corp. and assigned ubh Ch. 54 with 220 kw ERP, is slated to start operations May 15.

COVERAGE REPORTS

WARD DORRELL of John Blair & Co. appointed chairman of Station Representatives Ass'n, committee to study and evaluate findings of Nielsen coverage studies and Standard Audience Measurement Services. Other committee members are: Louis Moore, Robert Meeker Associate; Dr. Fred Peters; Daniel Denichen, Katz Agency; Russ Walker, John E. Pearson Co.

New York Research Panel Becomes Battle Royal

WHAT was scheduled as panel discussion of broadcast audience rating services, with spokesmen for TV, radio and American Research Bureau and Nielsen explaining "why we do what we do," was turned into free-for-all, no-holds-barred battle royal by first speaker, C. E. Hooper, who devoted his allotted 20 minutes to pointing out shortcomings of other services. Meeting held Thursday night in New York by Radio Television Executives Society.

Mr. Hooper's bitterest attack was aimed at Pulse, whose roster-call method he termed "unparalleled in inaccuracy" and "worser than worthless." He quoted Pulse ratings for four programs on WOAI-TV San Antonio, which, he declared, were never telecast. Sydney Roslow, director of Pulse, explained that its rosters are prepared by former Federal Communications, which sometimes are wrong, but he said that if Mr. Hooper could find so few errors in the thousands of station-quarter-hours rated by Pulse each month, Pulse's overall record must be remarkably high.

Explaining their systems to society were: Dr. Roslow, house-to-house interviews; Mr. Hooper, telephone coincidental plus diaries; James Seiler, American Research Bureau, diaries; T. R. Shearer, A. C. Nielsen Co., Audimeters.

CAAB Praises Akerberg

ASSIGNMENT of Herbert V. Akerberg as full-time CBS-TV station relations vice president received plaudits of CBS-TV Affiliates Advisory Board Friday in resolution expressing its pleasure at Mr. Akerberg's appointment and commending "the CBS Television Division for thus making it possible for Mr. Akerberg to devote his full and unique abilities and energies to CBS Television station relations thereby assuring the sound growth of the network and its affiliates" (see story page 72).

CBS Joins ARF

CBS Television has joined Advertising Research Foundation, ARF reported Friday. Other new members: N. W. Ayer & Son, Grey Adv., Industrial Tape Corp., Meldrum & Fewsmit and Philip Morris & Co. CBS Radio has been ARF member for more than one year, one of first to join after media were permitted to become members.

Buy 600 Feature Movies

MORE THAN 600 feature-length motion pictures purchased by WKRC-TV Cincinnati, U. A. Latham, general manager, announced Friday. Purchase price of films not disclosed.

PEOPLE

GEORGE ARKEDIS, Central Network sales manager, CBS-TV, to WBBM-TV Chicago as sales manager.

GEORGE KLAYEK, account executive, CBS-TV, N. Y., new Central Network sales manager effective today (Monday).

EDWIN J. SHERWOOD, TV promotion manager, Admiral Corp., Chicago, joins Kling Studios Inc., same city, as coordinator of TV production and sales. Mr. Sherwood continues in overall charge of all TV-motion picture activities. Mr. Sherwood was associated with many Admiral TV programs and originated commercial policy of firm during political conventions.

CARL TILLMANNs, in charge of radio station sales and services for C. E. Hooper Inc., to Paul H. Raymer Co., N. Y., station representatives, as manager of sales research and promotion, succeeding MARK FINLEY, who has been appointed promotion and public relations manager for Boston Post.

LANN B. SMITH, senior art director of Hirshon-Garfield, N. Y., named vice president. He has been with agency 20 years.

Funeral services for RAYMOND KNIGHT, noted radio and TV promotion writer-director-producer, were to be held Saturday at Walter B. Cooke funeral home, New York. Mr. Knight, said to have created more than 100 programs during his 25-year career, died Thursday in Columbus Hospital, N. Y., at 54.

Drive to Support Sports Events Planned

PROGRAM designed to encourage public support of sports events submitted to radio-TV set manufacturers by Dan D. Halpin, Allen B. DuMont Labs., chairman of Sports Promotion Subcommittee of Radio-Television Mfrs. Assn. Ten-point program advocates:

Boost attendance at televised sports in advertising material; display local team schedules in store windows; sell tickets for events; mention "see-the-game-in-person" on broad casts; sell TV sets to sports celebrities and invite them to make personal appearances; avoid advertising which suggests patrons stay home to see event on TV; offer to cooperate with local sports officials; offer tickets to games in local newspaper contests; cooperate with dealer groups to encourage telecasting of sports events.

Basford Changes

BOARD of directors of G. M. Basford Co. announced three executive changes: Henry C. Sildorff, with agency since 1932 and president since 1947, becomes board chairman; Fred E. Adams, executive vice president who joined firm in 1942, becomes president, and Roger L. Wilmore was named chairman of executive committee. G. M. Basford is one of leading industrial advertising agencies, handling more than 50 accounts.

SAG Near Agreement

EARLY settlement of Screen Actors Guild strike against producers of TV filmed commercials indicated Friday as spokesman for producers acknowledged that basic agreement on "most issues" has been reached. Holding up final agreement, he said, was decision from advertising agencies on their attitude toward proposed. It was felt any settlement may be reached by end of this week.

Represented by CBS Radio Spot Sales

*Laidlaw Pulse and Telepulso reports
THOUGH there appeared to be no urgent need to expand the volume of crime programs on television, DuMont may be excused for entering this new one on the grounds of social service. In *I'm the Law* Rochelle Hudson has been given a job, and George Raft has been rehabilitated. As Lieutenant Kirby, Mr. Raft has turned to upholding the law rather than flouting it.

He is not finding the transformation easy. What little store of theatrical mannerisms he was able to lay aside in his movie career is suited more to villain than to hero. Deprived here of the use of the gangster's smirk and the killer's threat, Miss Hudson will bear up better than Mr. Raft in this series cannot be decided on the basis of the first show. Her role, in a lackluster script, was that of a girl sharpshooter, most of whose appearances on camera were associated with her work. It was not a challenging assignment, but she carried it out competently, flinching only occasionally when the pistol went off.

Neither Mr. Raft nor Miss Hudson is head-ed for new stardom in this one.

*The Audiences Success Story #1*

Looking for increased sponsor sales, high ratings? Big mail response? Better look into this *Thesaurus* success story.

From all parts of the country we've been getting comments like these: "Volume of sales tripled"—WESA (Charleroi, Pa.). "Business increase of 11% traceable to show"—KSUM (Fairmont, Minn.). "Most successful program ever used"—WPAN (Parkersburg, W. Va.).

KRLD (Dallas, Tex.) leads 16 competing stations with a Pulse rating of 25%; WMT (Cedar Rapids, Iowa) reports a Hooper of 27.7; KUJ (Walla Walla, Wash.) a Nielsen of 43.6; KYSM (Mankato, Minn.) a Nielsen of 34.5...

There's lots more to this story: many other *Thesaurus* shows, too, have had similar outstanding sales success. Why not add your name to the growing list? Mail coupon today! *Theaudiences Success Story #1*

Director: John Natale.

WHILE the school bell is the traditional symbol of American education, one of NBC-TV's newest originateis, *Ding Dong School*, defies the traditions of accepted TV children's programming patterns.

With the advent of partial sponsorship, this relatively unheralded program for school children has had network executives thinking in terms of a valuable commercial property. Certainly the program has commanded an appreciable audience since it first went on the air in Chicago last October and went network less than two months ago.

It should be reported at the outset that *Ding Dong* won't ring any bells as a vehicle of entertainment.

But, in its quiet, unassuming way—and devoid of frills, elaborate settings and fancy camera tricks—the program serves a worthwhile educational purpose that is likely to endear it warmly to mothers everywhere.

The format is simple. Dr. Frances Horwich ("Miss Frances") sits in a studio and talks directly to the kiddies at home. On the morning of this review she showed off gifts made and sent in by the children for Valentine's Day, demonstrated a stop-light gadget, displayed scrapbooks of famous nursery characters (Humpty-Dumpty, Jack & Jill, Bo Peep) and otherwise entertained televiewing tots.

"Good morning—did you have breakfast—oh, you're just finishing breakfast," she asks in opening the program. Suzie, a doll, gets a ride in a swing ("Daddy ever swing you?..."

*State of the Nation*
of our federal government under the expert guidance of Eric Sevareid, Washington correspondent for CBS-TV.

Each week Mr. Sevareid takes his party of eager sight-seers to call on a different government department, whose function, structure and mode of operation are presented through a combination of views of the department's activities and interviews with its key personnel, all filmed in advance of the Sunday telecast.

The Treasury Dept. was visited by the program on Feb. 8. The cameras started with a long shot of the Treasury Building in Wash-

-ERIC SEVAREID
Guided tours weekly

ington, then worked into the office of the new Secretary, George M. Humphrey, who called upon each of top assistants to explain the duties and operations of his particular division of Treasury activities. As this department's activities include such farflung functions as those of the Secret Service and Coast Guard, minting our coins and engraving our paper money, controlling narcotics and collecting taxes, the video visitors were led rapidly from section to section without lingering very long at any one. This technique certainly insures the program against becoming boring, but there were several times that this reviewer wished it would slow up and explain things a bit more fully.

High spot of the Treasury tour came near the end, when Secretary Humphrey outlined his objectives for establishing a proper financial climate for the nation. He called first for "sound and stable dollars," for not spending "more than we earn" and for "paying a little on our debts from time to time" and doing other things "to keep our credit good." After this, he said, we can "slowly but surely reduce our tax burden."

Finally, the Secretary declared, the Treasury will strive to preserve for the young the great American opportunity "to advance and improve themselves through their own hard work and endeavors."

Produced by the CBS-TV Department of Public Affairs, State of the Nation is frankly an educational, public service type of telecast which makes every effort to be interesting and informative and none at all to be entertaining. High school and college students should find it an excellent auxiliary to their tests in political science and their parents could also profit from viewing these well-produced video visits to those who manage our nation's affairs.

But for one whose classroom years are far behind, the pace of the Treasury episode of State of the Nation was somewhat breathtaking. A little less information, delivered a little more slowly, would have been more comfortably received and more surely retained.

Mr. Adam Reinemund
Omaha, Neb.

Dere Adam:

It seems like I keep a Tidy House around this here place but its sure a job with all th' comin' and goin' that our people are doin'. Our generul managir is prezident of th' Charleston Symphony, our pgm. dir. is prez of th' Kanawha Players, and our Public Affairs dir. is prez of th' Open Forum. We even got a guy who is prez. of his church choir. Thet just goes to show how bizy our people are in th' woik of this here community. Evrybody expects big things of us I guess because we got 5,000 on 580 and most evrybody knows WCHS can git things done. Th' boss sez we got more W. Va. listenurs then any othur stashun which seems to prove that sich work rilly pays dividends. Well, I gotta go now and Shina-Dish up in th' lunchroom on th' third floor.

Yrs., for Tidy House,
American Broadcasting
And United

Merge

ABC
AMERICAN BROADCASTING COMPANY
The most important news in the television and radio industry in years has been announced. The long-planned union of ABC and United Paramount Theatres has been approved by the Federal Communications Commission, and the two organizations are now one company.

The event is of far more significance than any statistics of the corporate merger. The new company will be impressively stronger and more flexible, and possess a greater potential for growth.

The combination is a "natural" if ever there was one. United Paramount's great history of showmanship and superb experience discovering and developing new talent will now be available to the American Broadcasting Company.

But the really great thing about the news is the tremendous promise the merger holds for the radio and television audience.

New programs will be developed. New stars will be attracted. New techniques will be introduced. New facilities will be developed. Not tomorrow, of course. Not next week, or next month. But ABC intends to be a leader in radio and television, and it intends to grow like an oak, not a mushroom.

The future began yesterday. So keep your eyes and ears on the new ABC.

our respects

to E. D. RIVERS JR.

IN A SHORT six years, E. D. (Dee) Rivers Jr. has enlarged his broadcast interests from a single 10 kw operation to four southern stations. He believes his personal philosophy has been translated successfully into his radio enterprises, filling a long-standing need for the Negro, farm element and the church to have "an unlimited voice in progressive southern radio."

Mr. Rivers goes beyond the three Rs to add three of his own, "Race, Rural and Religion," which have been a part of his convictions since childhood. Long a believer in more opportunity for the Negro and the underprivileged, regardless of color or religion, Mr. Rivers has promised his commercial broadcast operations on his three Rs.

Educated to a social consciousness at an early age,厄Thistle Dickinson Rivers Jr. was born at Mineral Springs, Ark., May 12, 1915. Son of a former Georgia governor, he has lived in the southern part of Georgia nearly all his life.

When a high school student, young Mr. Rivers decided on law as the means for him to carry out some of his ideas for personal and civic betterment, and enrolled in night law school. He was admitted to the bar when 16, a feat in any state, and particularly unusual in Georgia.

In 1937, after he was appointed attorney for the state welfare board, he helped institute Georgia's first social security legislation. For two years, as chairman of the state industrial board on which he served in a judicial capacity, he offered unlimited legal service to Negroes without charge. Spending much of his own time in back woods visits to impoverished families, he would often rescue, with legal advice, persons who literally had sold their pots and pans to pay the rent.

Action in Public Service

Interested in all kinds of public service, he was active in Woodmen of the World, the Masonic Order, Shriners, Baptist Church and Elks. Shortly before taking on his first broadcast assignment, Mr. Rivers served in a liaison capacity on the state building program between state and federal governments. One of the major projects was getting federal aid for a state hospital open to patients of any race.

His radio career began in 1940 as an announcer-engineer at WGOV Valdosta, Ga., the station he now owns. Working during wartime manpower shortages, he handled a 12-hour shift, 7 a.m.-7 p.m., for 16 months.

Later he enlisted in the Navy. As a first class seaman, he was termed a "legal eagle" by his colleagues, who sought his advice on legal and insurance matters. As assistant to the district legal officer, he at one time recovered more than $80,000 in excess rental charges through the Office of Price Administration and federal courts for his buddies.

In 1946 he returned to WGOV, decided he liked the management side and a year later put WEAS Decatur on the air. It started as a 10 kw daytimer, and a 50 kw power increase application now is pending. Since then he has acquired three other broadcast properties—WGOV-AM-FM, WJW Savannah, and KWEN West Memphis, Ark.—all of which have applied for TV channels. Mr. Rivers' father owns WLBS Birmingham, Ala., WOBS Jacksonville, Fla., WMIE Miami, Fla., and has a minority interest in WGGG Cedar Grove, Ga.

Initial Station Success

WEAS, his initial station success, was one of the first in the South to attempt "all-out" aid to the Negro. In Mr. Rivers' blueprint for his radio and television future, "hitherto neglected segments of our listeners must be satisfied in a fair, unprejudiced and non-segregated manner."

His program schedules follow his three-R philosophy, and among the firsts claimed by Mr. Rivers are an all-Negro college football game broadcast, an all-Negro baseball game, and a concentrated program aimed at combatting Negro juvenile delinquency. In recognition of a decline in crime among Negroes of the area, he was cited by Negro civic and educational leaders of Atlanta-Decatur in 1948. He is one of the first station owners to employ full-time Negro marketing and public relations specialists.

Married to the former Marie Ble, Mr. Rivers lives with his family in Atlanta. Two daughters are Jan, 18, and Dee, 12. His hobbies, apart from family and station operation, are hunting, fishing and supervision of STARS (Southern Television and Radio Sales Inc.), a representative firm handling regional and national business for more than 100 southern stations.

As for the future, "It's my desire to give, and give generously, but a real public service to those people who need radio the most and who feel they are somewhat neglected," Mr. Rivers says. "I also want to help raise the educational and economic conditions, as well as the general moral uplifting of all people, regardless of race, creed or color."

Broadcasting • Telecasting
Let’s Talk TV “Ratings”

Advertisements about TV shows aimed at women buyers usually talk audience loyalty, ability to sell, knowledge of the viewers—and skip over the part about how many people are looking.

All right, let’s talk “ratings”:

Current ARB survey for WPTZ’s “Let Skinner Do It” shows a high of 11.0. In terms of viewers that means 195,000 people watching at a given time. In terms of money it’s 69¢ for every thousand viewers watching...14 viewers for every penny spent!

Now let’s talk “ability to sell”:

A short while ago one of the nation’s largest manufacturers of a kitchen cleanser ran a test in Philadelphia. He used the best known women’s shows on three radio stations and two television stations, including “Let Skinner Do It.” Each show used one announcement, and one only, asking the viewers to send in a box top for a premium.

“Let Skinner Do It” pulled more returns than all other Philadelphia shows—radio and television put together!

Whether it’s a vacuum cleaner or a cake mix, a tissue or a tangerine, if it’s bought mainly by women, “Let Skinner Do It” can sell it for you in Philadelphia.

For the full story on this great program, give us a call here at WPTZ, or see your nearest NBC Spot Sales representative.

Rust Removing
EDITOR:
... My hands are red from clapping, and my throat raw from shouting "Bravo" to the story, "Removing the Rust from Radio Programming," by Elmo Ellis (B&T Feb. 2). To my mind, this is one of the best stories on programming I've had the pleasure of reading in many a day. My bouquet to that man for daring to be different, and to his superiors for backing him.

From my experience, too many managers make too many program directors flunkies, doing copy, special events, odd shows on the air, and too few managers get behind too few program directors, and allow too few changes, which would "make" so many radio stations big again.

Jack D. Funk
Program Director
WSM/Litchfield, Ill.

Fortune's Fumble
EDITOR:
February Fortune Magazine has an article on government subsidized direct mail advertising. Included among the many glib comments and statements of alleged facts is this .

"Newspapers deliver audiences at only a few cents per thousand; radio at about $1.50.

What do they smoke to be able to conjure up dreams like that?

Robert W. Ferguson
Executive Vice President
WTRF-AM-FM Bellaire, Ohio

Which Came First
EDITOR:
WCHS is a fine radio station and no doubt has been "first" in a number of instances, BUT, the broadcasting of naturalization proceedings in the U. S. Court (B&T, Jan. 26) was first done in West Virginia by WHIS, last June—just ask the Hon. Ben Moore, Justice U. S. Court. To top it off, we sent a recording to each of the successful applicants.

P. T. Flanagan, Manager
WHIS Bluefield, W. Va.

Declaration of Independence
EDITOR:
In the Jan. 26 issue of Broadcasting • Telecasting, my attention was called to the J. Walter Thompson Co. TV set count article. The report says: "... Since most television stations have an effective coverage radius of 60 miles or greater from the transmitter, the television advertiser is able to reach far beyond the transmitting markets." Reference is then made to a market like Bridgeport, pointing out the high ratio of television households despite the absence of transmitters.

This is particularly interesting in the light of the fact that a recent study into the quality of standards of reception of out-of-town television channels in the Bridgeport area points up a fundamental premise. Because of the weak
television signal received in this area from even the major broadcasters, Bridgeport cannot be considered an adjunct of New York, and for television should be defined as a non-contiguous, distinct, and independent market.

Joy Hoffer
Sales Promotional Director
WICC-AM-TV Bridgeport, Conn.

Operator Rules

EDITOR:

Headline; Feb. 2 issue B*T, page 58, "NARTB CONVENTION: "GOLD RUSH"."
The article goes on to herald the Los Angeles confab. For comparison we find a story on page 54 of the same issue of B*T heralding the FCC decision to relax operator license rules and condoning transmitter remote operation. While the NARTB goes on a "Gold Rush" there will be hundreds of licensed operators going to the poor house. We, who are about to perish economically, salute the NARTB, FCC conspiracy in recognition of all the years of service and development in the broadcasting field, individually and collectively.

Willard M. Davis
Pasadena, Calif.

EDITOR:
The super logic displayed by the FCC in the operator decision should revolutionize all concepts of science and technology. Surely such fields as medicine and aviation are sufficiently advanced so that hospital janitors are qualified to write prescriptions and perform surgery, and airline ticket clerks to fly DC 6's.

Lewis C. Sherlock
Denver, Colo.

How much does it cost to keep a bear?

If he draws a big enough crowd, a bear can earn every last berry you feed him. And the trick with a bear—or with any kind of entertainment, in person, in print, or on the air—is always the same: to find a balance between how much an attraction costs and how much it attracts. A way that is gaining new conviction among America's leading advertisers is network radio. For it continues to draw more people at less cost, prospect for prospect, than any other medium. It permits a rounded advertising program, with
frequency that keeps impressions fresh. And it leaves ample funds for merchandising and dealer promotion. In radio, the costs of attractions, for the numbers they attract, are lowest on CBS Radio. It has more of the traffic-building top shows than all other networks combined...and its sponsors invest 24 to 178 per cent more than on the other networks. So draw the crowds on CBS Radio—where entertainment is like a bear that performs on a birdlike appetite.

CBS RADIO NETWORK

multiply by nine . . .

The city of Charlotte is only 1/9th of the Charlotte Market . . . Close-ringed by nine satellite cities, Charlotte is the hub of an integrated industrial area . . . Over 1,000,000 people live within a 60-mile radius of the "Capitol of the Carolinas." That's why — for example — Charlotte, 71st in the nation in city population, is 38th in wholesale sales . . .

For coverage to match the market, you must buy the Jefferson Standard stations, WBT and WBTV.
on all accounts

ARTHUR DURAM, director of radio and television, Fuller & Smith & Ross, New York, is a man whose past is exceeded only by the promise of his future. A gentleman and an actor, Mr. Duram also has been variously a sportscaster, a salesman, a promotion expert and a market research analyst. "And through it all," a colleague observed, "Art has never flubbed a job or lost a friend."

Acknowledgedly one of the most respected men in the field, Mr. Duram began his career in 1933—just out of the U. of Illinois—as a sportscaster for a station, then called WCBS in Springfield, Ill. Two years later he moved to Des Moines and WOC in Springfield, Ill. He came to Chicago in 1935, serving as a station manager, WOC's first general manager.

After three years in Davenport, he returned to his home town, Chicago, to work in radio and television serials as an actor. In the summer of the year of his return, he went East to join a summer theatre and remained on the payroll, forking acting in 1940 to join the sales staff of WHN New York. There he remained until 1942, when he enlisted in the Army Air Force.

He was stationed in the European Theatre and served there with the Air Corps for three and a half years. Discharged as a major in 1946, he returned to New York and the O'Brien & Dorrance organization, where he wrote copy.

One year later, in 1947, he returned to Chicago, this time to WBBM, the CBS outlet, as midwest promotion manager for the network. He came East to New York again several months later to function as market research director and assistant to the network sales manager.

In January 1952, Fuller & Smith & Ross, previously an industrial agency, decided to press vigorously its general advertising and asked Mr. Duram to develop its radio and TV department with himself at the head.

Today, in that capacity, Mr. Duram administers for the agency such shows as Westinghouse's Freedom Rings (CBS-TV), Owens-Corning Fiber Glass Arthur Godfrey Show simulcast (CBS Radio and TV), Tuesdays and Thursdays (10:15-30 a.m. EST), and Alcoa's See It Now (CBS-TV).

Mr. Duram is married to the former Marjorie Barnatt. They have one son, Michael. The Durams live in their own home in Chappaqua, N. Y. Mr. Duram's hobbies are golf and tennis.

Gertrude the goose knows that it pays to put up a good front when posing for a picture. Who knows? Some talent scout may spot this photo and give her the lead in "Mother Goose" or "The Goose That Laid the Golden Egg"—that's why Gertrude is giving out with the old Barrymore! Gladys, left background, is doing a poor job of selling herself. She's backing into this ad—going about her publicity and advertising "derrière backwards."

Some time-buyers and advertisers are like Gladys—backing into the Oklahoma City market by buying on the lightweight peanut-whistle stations. You can't sell your product by turning your back on the prospects!

Don't be a Gladys... don't come into this market "derrière backwards," like Gertrude, put up your best front in Oklahoma City. Buy KOMA, the only 50kw CBS outlet in the state... the merchandising-minded station, serving you from a new quarter-million dollar studio.

AMBITIOUS ABC PLANNING INITIATED UNDER NEW MERGED OWNERSHIP

A revitalized ABC, fired with new strength from its merger with United Paramount, already is firming up its plans that will drastically affect the network field as well as other phases of the broadcast industry. It won't necessarily be a quick transformation, but ABC has definitely stated its intention to be a leader in the field...growing "like an oak."

PLANS for transfusing United Paramount's lusty millions into the run-down body of ABC were set in motion last week immediately upon receipt of the long-awaited signal from FCC (also see stories following).

Goal and purpose of officials of both companies was to raise ABC to the competitive stature, alongside the other networks, which FCC said would be the result when it handed down its multi-sided final decision approving the $25 million merger of ABC and United Paramount Theatres last Monday.

More and bigger affiliates, new talent, new programs—these were immediate objectives of the new company, American Broadcasting-Paramount Theatres Inc., in its efforts not only to make the ABC "home broadcasting" division competitive, but, if possible, to build it into the paramount network organization.

It would take a while. This was the theme of official pronouncements. For competitive reasons, executives said, blueprints could not be made public until details were set. But they promised developments would begin materializing with regularity, starting shortly.

Special Meeting Feb. 26-27

First real details of the battle plan are expected to be disclosed to members of the ABC Stations Advisory Committees at a special meeting called for Feb. 26-27 in New York. Officials of AB-PT and its ABC division, who talked with affiliates via closed circuit on Thursday, will meet with the TV Stations Advisory Committee on Feb. 26 and with Radio Stations Advisory Committee on the following day.

In broad outline, first consideration is two-pronged—lining up of stations and clearing of time, a dual problem which concededly would need the assistance of programs that could compete more solidly with those of other networks.

In one attack on this problem Leonard H. Goldenson, who headed United Paramount Theatres and becomes president of AB-PT, and Robert E. Kintner, who continues as president of ABC in its new status as an AB-PT division, plan a talent-hunt trip to the West Coast within about a month.

The search for new talent and new programs also will have the continuing aid of Robert M. Weisman, a veteran showman and star "discovery" and a UPT vice president, who becomes ABC vice president in charge of programming and talent.

There has been speculation that with the estimated $25-to-$31 million resources available from UPT, ABC in its drive to line up new TV affiliates might offer additional compensation features as special inducements and possibly touch off an "affiliation war" among networks in the style of the CBS-NBC talent raids trend among new TV stations to sign with ABC. They expect it to continue, but, as one official pointed out, progress in that direction will be somewhat beyond ABC's control in one respect—that is, it will depend in part upon the rate at which FCC licenses new stations.

Additionally, in most of the major markets where ABC affiliations are especially desired by the network, there are more applicants than channels, meaning drawn-out hearings and unpredictable delays. ABC now has an 81-station TV network and 355 radio affiliates.

To improve its TV facilities, ABC plans to spend $2.5 million to boost its five owned stations to maximum power. Timetable calls for completion of this project by about 1954.

Goldenson's Goals

AB-PT President Goldenson listed the goals as "more entertaining, interesting and informative programs," but quickly added that "it will, of course, take time." ABC President Kintner, while describing the merger as affording ABC "the potential of more rapid and greater growth in the home broadcasting field," also cautioned that "to achieve our high goals we must proceed slowly in order to build soundly and in a business-like manner" (for texts of these and other statements, see stories following).

In the same tone, ABC said in newspaper and trade advertisements immediately following the merger that "new programs will be developed. New stars will be attracted. New techniques will be introduced. New facilities will be developed. Not tomorrow, of course. Not next week, or next month. But ABC intends to be a leader in radio and television, and it in-

THE TWO chief executives of the new AB-PT have experience in working together. Edward J. Noble (r), chairman of the finance committee of AB-PT, has served as general chairman of the 1953 Greater New York campaign of the National Foundation for Infanter Paralysis, and Leonard Goldenson (l), president of AB-PT, has been chairman of the New York motion picture industry's part of the March of Dimes. Here Mr. Goldenson presents a check for $49,328.67 which his committee raised to help fight polio.
THE NEW LINE-UP
At right is organizational chart showing executives of new AB-PT and ABC Division. Connecting lines between pictures show chains of command.

Hinckley; Earl E. Anderson, and Owen D. Young, honorary chairman of the board of General Electric Co.

At the first AB-PT board meeting, held Wednesday, titles of three AB-PT officers were changed: Mr. O'Brien from secretary-treasurer to financial vice president and secretary; Simon B. Siegal, from comptroller to treasurer, and James L. Brown, from assistant treasurer to controller and assistant treasurer.

Though ABC will be operated as a division, authorities said, it is not contemplated that a comparable UPT division will be established. Rather, the AB-PT organization will handle UPT activities, including theatre ownership and operation and theatre TV development.

Separate Headquarters
Separate headquarters also will be continued for AB-PT and ABC, with the latter slated to complete the move of its executive offices from the RCA Bldg. to its own quarters at 7 W. 66th St., New York, by about April 1. AB-PT's offices are at the Paramount Bldg., 1501 Broadway, New York.

FCC's announcement of approval of the merger was delayed until after the stock market closing on Monday. ABC common stock, which had closed at 11 1/4 that day, jumped quickly Tuesday morning. Trading was suspended to show the change in name. During Tuesday a total of 31,700 shares of the new AB-PT stock were traded, compared to 4,900 of ABC common the day before, and reached a high of 15 1/2 before closing at 14 1/4, its low for the day. On Wednesday, dealings slackened off—7,200 shares were traded—and the stock dropped a quarter of a point to 14 1/4.

Capsule of the Multi-Pronged Paramount Case

Here's what the FCC did last week in its eventful decision regarding the year-and-a-half-old Paramount case:

(1) Approved the merger of ABC with United Paramount Theatres Inc. by a vote of five to two. Comr. Hennock vigorously dissented. Comr. Edward M. Webster recommended that the merger approval be held up pending further study of the qualifications of UPT to hold broadcast licenses.

(2) Approved the sale of WBKB (TV) Chicago from WAT to CBS for $6 million. Again Comrs. Hennock and Webster dissented. Also approved the move of WBKB from Ch. 4 to Ch. 2, and dismissed Zenith Radio Corp. application for Ch. 2. To this Chairman Paul A. Walker and Comrs. Hennock and Webster dissented.

(3) Held that Paramount Pictures Corp. controls Allen B. DuMont Labs. Comrs. Rosel H. Hyde and George E. Sterling switched to this.

(4) Approved the transfers of control of KTLA (TV) Los Angeles from old Paramount Pictures Inc. to new Paramount Pictures Corp., and of WBKB (TV) Chicago from old Paramount Pictures Inc. to new UPT, and of negative control of WSMB-AM-FM New Orleans from old Paramount Pictures Inc. to new UPT. Comrs. Webster strongly opposed these, as did Comr. Hennock. Comrs. Eugene H. Merrill opposed transfer of KTLA.

(5) Renewed the licenses of WBKB, WSMB-AM-FM and WABD (TV) New York.

(6) Issued licenses to cover construction permits to KTLA, WTTG (TV) Washington and WDTV (TV) Pittsburgh.

(2) Approved the sale of WBKB (TV) Chicago from WAT to CBS for $6 million. Again Comrs. Hennock and Webster dissented. Also approved the move of WBKB from Ch. 4 to Ch. 2, and dismissed Zenith Radio Corp. application for Ch. 2. To this Chairman Paul A. Walker and Comrs. Hennock and Webster dissented.

(3) Held that Paramount Pictures Corp. controls Allen B. DuMont Labs. Comrs. Rosel H. Hyde and George E. Sterling switched to this.

(4) Approved the transfers of control of KTLA (TV) Los Angeles from old Paramount Pictures Inc. to new Paramount Pictures Corp., and of WBKB (TV) Chicago from old Paramount Pictures Inc. to new UPT, and of negative control of WSMB-AM-FM New Orleans from old Paramount Pictures Inc. to new UPT. Comrs. Webster strongly opposed these, as did Comr. Hennock. Comrs. Eugene H. Merrill opposed transfer of KTLA.

(5) Renewed the licenses of WBKB, WSMB-AM-FM and WABD (TV) New York.

(6) Issued licenses to cover construction permits to KTLA, WTTG (TV) Washington and WDTV (TV) Pittsburgh.

THE NEW LINE-UP
At right is organizational chart showing executives of new AB-PT and ABC Division. Connecting lines between pictures show chains of command.

Hinckley; Earl E. Anderson, and Owen D. Young, honorary chairman of the board of General Electric Co.

At the first AB-PT board meeting, held Wednesday, titles of three AB-PT officers were changed: Mr. O'Brien from secretary-treasurer to financial vice president and secretary; Simon B. Siegal, from comptroller to treasurer, and James L. Brown, from assistant treasurer to controller and assistant treasurer.

Though ABC will be operated as a division, authorities said, it is not contemplated that a comparable UPT division will be established. Rather, the AB-PT organization will handle UPT activities, including theatre ownership and operation and theatre TV development.

Separate Headquarters
Separate headquarters also will be continued for AB-PT and ABC, with the latter slated to complete the move of its executive offices from the RCA Bldg. to its own quarters at 7 W. 66th St., New York, by about April 1. AB-PT's offices are at the Paramount Bldg., 1501 Broadway, New York.

FCC's announcement of approval of the merger was delayed until after the stock market closing on Monday. ABC common stock, which had closed at 11 1/4 that day, jumped quickly Tuesday morning. Trading was suspended to show the change in name. During Tuesday a total of 31,700 shares of the new AB-PT stock were traded, compared to 4,900 of ABC common the day before, and reached a high of 15 1/2 before closing at 14 1/4, its low for the day. On Wednesday, dealings slackened off—7,200 shares were traded—and the stock dropped a quarter of a point to 14 1/4.

Capsule of the Multi-Pronged Paramount Case

Here's what the FCC did last week in its eventful decision regarding the year-and-a-half-old Paramount case:

(1) Approved the merger of ABC with United Paramount Theatres Inc. by a vote of five to two. Comr. Hennock vigorously dissented. Comr. Edward M. Webster recommended that the merger approval be held up pending further study of the qualifications of UPT to hold broadcast licenses.

(2) Approved the sale of WBKB (TV) Chicago from WAT to CBS for $6 million. Again Comrs. Hennock and Webster dissented. Also approved the move of WBKB from Ch. 4 to Ch. 2, and dismissed Zenith Radio Corp. application for Ch. 2. To this Chairman Paul A. Walker and Comrs. Hennock and Webster dissented.

(3) Held that Paramount Pictures Corp. controls Allen B. DuMont Labs. Comrs. Rosel H. Hyde and George E. Sterling switched to this.

(4) Approved the transfers of control of KTLA (TV) Los Angeles from old Paramount Pictures Inc. to new Paramount Pictures Corp., and of WBKB (TV) Chicago from old Paramount Pictures Inc. to new UPT, and of negative control of WSMB-AM-FM New Orleans from old Paramount Pictures Inc. to new UPT. Comrs. Webster strongly opposed these, as did Comr. Hennock. Comrs. Eugene H. Merrill opposed transfer of KTLA.

(5) Renewed the licenses of WBKB, WSMB-AM-FM and WABD (TV) New York.

(6) Issued licenses to cover construction permits to KTLA, WTTG (TV) Washington and WDTV (TV) Pittsburgh.
TOBEY CRITICAL OF MERGER APPROVAL

"Grievous" and "shocking" thing, says the chairman of Senate Commerce Committee of merger approval. He sees it as "plague on mass communications" but doesn't contemplate any direct action to upset the FCC decision.

SEN. Charles W. Tobey (R-N.H.), chairman of the powerful Senate Interstate & Foreign Commerce Committee, last Thursday blasted FCC's approval of the ABC-United Paramount Theatres Inc. merger as "a very grievous matter" and invalid of the country's anti-trust laws.

In a statement to BROADCASTING • TELECASTING in Chicago, Sen. Tobey said he thought the Justice Dept. should look into the Commission's decision, particularly with respect to its anti-trust implications, and described it as a "plague on mass communications that will haunt the U.S. for years to come."

He asserted that the bringing of mass communications under one roof—that is, theatres, films and television—"is not in the public interest" and declared flatly that the Commission told Examiner Leo Resnick that he couldn't look at the anti-trust aspects of the proposed wedding of ABC and United Paramount Theatres Inc.

Sen. Tobey, who heads up the radio-minded Senate Commerce Committee in the 83d Cong., would like to see the Justice Dept. take action to this extent: He said he still planned full-scale hearings but he had "no idea" as to when they would be scheduled. He intimated that it was rather academic at this time to take any action on the ABC-United Paramount case.

Hearings have been indicated on Sen. Tobey's bill ($538) which would prohibit the Commission from granting station licenses or permits to those applicants who have been convicted of anti-trust violations by special Federal courts in instances where the violations have not occurred within the five years prior to application for license.

$80 Million Profit?

It was his understanding, Sen. Tobey continued, that "one of the parties" in the ABC-United Paramount merger case stood to "profit" by about $80 million on the merger and he felt the Justice Dept. should look into the case. He declined to comment specifically on whether he, as chairman of the Senate Commerce Committee, would seek action from the Justice Dept.

The New Hampshire Republican also refused to comment on the FCC's approval of findings that Paramount Pictures controls Allen B. DuMont Labs. He left no doubt, however, that he looked with favor on Comr. Frieda B. Hennock's stand on the decision [she had concurred in such findings] and her position on educational television.

Referring to FCC's denial of Zenith Radio Corp.'s bid for a commercial TV outlet on Chicago's Ch. 2, Sen. Tobey also indicated—without stating in many words—he went along with FCC Chairman Paul A. Walker and Comrs. E. M. Webster and Hennock on their dissent to the Commission's dismissal action.

Sen. Tobey reiterated his "shock" that the Commission sustained Examiner Resnick's initial decision, particularly in view of the recommendations of the Commission's legal staff. He had initially scored the Resnick proposed decision in a telegram from Europe last December while awaiting an invitation to UNESCO [B&T, Dec. 8, 1952].

"The Commission told Mr. Resnick that he couldn't look at the anti-trust aspects of this case beyond a certain point," he asserted. "This is a grievous thing and that's what he said."

Sen. Tobey made his remarks in advance of a news conference in Chicago last Thursday afternoon. He addressed a dinner of the Traffic Club of Chicago that evening.

Zenith May Go to Court

On Sale of WBKB (TV) to CBS

PROSPECT that the FCC's action in approving the sale of WBKB (TV) Chicago to CBS for $6 million might end up in court was seen late last week when a special Zenith Radio Corp. petition for a stay order pending its formal request for reconsideration. Zenith said it would file a petition for reconsideration not later than Feb. 20, objecting to the Commission's dismissal of its four-year-old application for Ch. 2 in Chicago. Commission had dismissed Zenith's 1948 application on the grounds that WBKB must move to Ch. 2 in line with the new allocations formulated last April and ordered that Zenith had forfeited its rights in the channel by failing to participate in the allocation proceedings and in the WBKB renewal hearings (part of the Paramount case).

Late Thursday, the FCC denied Zenith's Wednesday petition for stay but explained that it would not issue an authorization for WBKB to move to Ch. 2 before considering Zenith's petition for reconsideration if filed not later than Feb. 20.

Zenith, which has been using Ch. 2 for experimental purposes (including most lately Phonevision tests) since 1939, was quick to protest its "loss."

Comdr. E. F. McDonald Jr., Zenith president, stated that "if this FCC decision is permitted to stand, it means that Balaban & Katz has sold for $6 million that which we believe to be our property."

Zenith held a CP for commercial TV on Ch. 2 in 1946 but relinquished it during the first color TV hearing in 1946-47.

WBKB Sale Port of Merger

Since the sale of WBKB to CBS was part of the merger arrangements—in order for ABC to comply with the FCC's duopoly rules prohibiting the same company from owning more than one TV station in the same market—the dissents of Comrs. Frieda B. Hennock and H. Webster have been particularly important in the matter, too. In addition Chairman Paul A. Walker looked into the original Zenith dismissal decision, and he again dissented to the Commission denial of Zenith's petition for stay. Miss Hennock did not participate, and Comr. Webster objected to part of last Thursday's denial.

H. Leslie Atlasc, CBS Central Division vice president.

Background, Growth of ABC to, Including New Merger

PROGENITOR of today's ABC was the Blue Network of NBC which began operating in 1927. In 1941, the FCC issued its now famous Chain Broadcast Rules which, in one provision, forced NBC to divest itself of one of its two networks (the other was then called the Red Network, which became the present NBC network).

In 1943, the Blue Network was bought by Life Insurance Co. of New York, WENR Chicago, WXYZ Detroit, KECA Long Island, and KIMO San Francisco. Report filed with New York Stock Exchange last week showed that for nine months ending Sept. 30, 1952, ABC took an estimated loss of $639,000. ABC's highest income was $13 million before taxes in 1947. As of Dec. 30, 1951, ABC's long term debt stood at $75,900. Of ABC's 1,689,017 outstanding shares, Mr. Noble owns 901,667 shares, or $33.33. Noble has never paid a dividend nor has Mr. Noble ever received a salary as chairman of the board.

As of Sept. 30, 1951, ABC had total assets of $26,808,211, with current assets of $8,006,201. Total liabilities of ABC at that time was $12,571,091, with current liabilities of $4,529,520.
Like ducks take to water

Baltimore merchants take to W-I-T-H just like ducks take to water. W-I-T-H regularly carries the advertising of twice as many of them as any other station in town.

For a real good reason! W-I-T-H delivers more listeners-per-dollar than any other radio or TV station in Baltimore. And that means low-cost results. W-I-T-H can do it for you too! Get all the details from your Forjoe man.
Livestock represents a big industry in Nebraska and the Midwest Empire. Cherry County in Nebraska produces more cattle than any other comparable area in the world. From the range lands to the Omaha Stockyards go some one and three-quarter million head of cattle every year. The Union Stockyards in Omaha, the world's largest cattle market, is the index to a billion-dollar industry—livestock raising in the great Midwest Empire. The men and women responsible for this big industry depend on BIG MIKE, the 50,000 watt KFAB, for service and entertainment all over this area. A BIG MIKE representative—Free & Peters—will be glad to tell you the story, or contact Harry Burke, General Manager.
president and general manager of WBBM, said that CBS had taken over the facilities of WBBK last Monday shortly after the merger was approved.

WBBM-TV officially bowed in last Thursday morning at 9 a.m. CST on the old WBBK Ch. 4.

CBS-TV is planning to build the WBBM-TV staff and promote WBBK personnel who have indicated a desire to remain at their positions.

While the present plan is to remain in the State-Lake Bldg., Mr. Atlass has said that WBBM-TV eventually will move to other quarters in close proximity to Chicago's downtown Loop area. CBS Radio facilities located in the Wrigley Bldg., at 400 N. Michigan Ave.

As part of the sale-merger John Mitchell, present WBBK manager, moves to AB-PT's Chicago TV outlet. Others slated to shift are Sterling Quinlan, WBBK program manager, and William Kusack, chief engineer, though there was no official confirmation from ABC on the positions they would assume.

WENR-TV officially became WBBK (TV) last Thursday morning at the same time WBBM-TV call letters debuted on viewer's screens. It will remain on Ch. 7 under the new AB-PT banner.

WBBM-TV Staff Appointments

CBS was planning to announce key appointments to the WBBM-TV staff to replace Messrs. Mitchell, Quinlan and Kusack. It was understood Thursday that Al Bland, WBBM program manager, Eugene Eubanks, assistant program director, and other executives were involved in contemplated switches.

WENR-TV began telecasting Sept. 17, 1948 and was the second of the five ABC O and O TV stations to be launched by the network. Call letters of WBBK have been associated with the second oldest TV station in the country and it was the pioneer TV outlet in Chicago under Capt. William C. Eddy. WBBK started operating experimentally in 1939, commercially in September 1946 and has been affiliated with CBS.

Approval of the merger also means the termination of a temporary "convenience" contract between CBS-TV and WGN-TV Chicago for certain of the network shows which WBBK, WGN-TV has been carrying a block of CBS-TV morning shows from 10:30 a.m. to noon. The morning block comprises Strike It Rich, Bride & Groom, Love of Life, Search for Tomorrow and Guiding Light. WGN-TV's primary affiliation is with the DuMont TV Network.

WGN-TV is expected to carry the CBS-TV shows for at least another two months. The network also gave WBBM notice of cancellation of its affiliation contract with the Chicago Tribune TV outlet.

Competitive Factor Noted By FCC as in Public Interest

IT IS in the public interest to strengthen ABC via a proposed merger of ABC with United Paramount Theatres Inc.

In this, the Commission followed the reasoning of Examiner Leo Resnick, whose initial decision recommended a grant of the merger [BT, Nov. 17, 1948].

But, the FCC's majority decision brought a grim and angry dissent from Commissioner Frieda B. Henneck. Not opposing the merger, Commissioner Edward M. Webster felt it should be held in abeyance until further examination had been made of the qualifications of UPT to hold broadcast licenses.

In its majority opinion, the Commission referred to the 1941 Chain Broadcast Rules which were drawn to develop competition to the dominant NBC and CBS networks. The "superior economic potential of existing capital" of other networks were also referred to by the Commission majority.

Structure of Rival Networks

The fact that NBC was part of giant RCA, that CBS was in the record and TV set manufacturing business, that DuMont was in the electronics and TV set manufacturing business, that MBS was owned by companies with a diversification of interests (General Tire & Rubber Co. is the largest stockholder), all of this was mentioned by the Commission majority as reasons for sympathetically considering ABC's plight.

"The extensive financial resources of the other networks enable them to take greater program risks and to erect and staff more elaborate facilities," the Commission opinion read. "The lack of adequate and diversified resources and the obstacle here involved which has precluded ABC in the past from providing the vigorous competition which might have been expected from the establishment of ABC as an independent competitive force..." The FCC was aware that it may have to invest in its limited funds in physical improvements, ABC has been without the other funds needed for the development of a program service equal to that of its competitors...

Merger would permit AB to strengthen both radio and TV programming, take chances on program development, the Commission said.

Competition between theatres and TV for audience and product was acknowledged by the Commission, but determined not to be crucial.

Although both motion picture exhibition and radio and TV vie for audience, there is a difference in their appeal to the public. Theatres compete for the "outside" audience with other outside activities, the Commission said. Radio and TV, on the other hand, compete for "in house" attention.

There is little if any competition for product, the Commission determined. Theatres are in market for feature pictures, TV for specially made film. TV cannot compete with theatres for features because of (1) rental costs, (2) union restrictions, and (3) question of TV rights to film properties, the FCC majority pointed out.

AB-PT Purchasing Power

When and if the day comes that feature length pictures are released to theatres and TV "there is a theoretical possibility that American Broadcasting-Paramount Theatres would have a purchasing power in connection with the feature films which could be used to its advantage and to the disadvantage of its competitors," the Commission admitted.

However, mitigating against this, the Commission added, was the fact that these films were only one type of TV programming and subject to certain limitations and disadvantages when used on TV. Also that increased use of films made specially for TV

tv

is a major advertising medium...and the major TV station in the market is

KRON-tv

which operates on Channel 4 and puts more eyes on SPOTS

Most Advertisers! Rorabaugh reports that KRON-TV serves the largest number of advertisers in this 3-station market.

Biggest Audience! Pulse shows that KRON-TV offers the greatest percentage of audience, day and night, and all week.

Best Shows! Pulse counts more top-rated shows on KRON-TV than on the other two San Francisco stations combined.

Clearest Coverage! The market's highest antenna sends KRON-TV's signal throughout the Bay Area market, deep into Northern and Central California.

ASK FREE & PETERS for availabilities...in New York, Chicago, Detroit, Atlanta, Fort Worth, Hollywood. KRON-TV offices and studios in the San Francisco Chronicle Bldg., 5th and Mission Streets, San Francisco. An NBC Affiliate, KRON-TV is owned and operated by the San Francisco Chronicle. It has pioneered in San Francisco TV (Channel 4) since November 15, 1949.
may make less desirable feature films made for theatre exhibition. And, finally, the FCC
said, AB-PT promised that there would be no package or combination deals in the procuring
of films for TV or other potential packages.

Fear that AB-PT might attempt to depress TV to the advantage of its theatre holdings
was held to be unfounded by the Commission majorily. There still would be competition
from other TV stations and networks, the Commission pointed out.

FCC majority also found that the merged company will not own or control stories, nor
produce or distribute feature films for theatres.

That there is a possible conflict between theatre TV and home TV was acknowledged by
the Commission. Miss Hennock also saw a more evident possible conflict between theatre TV and
subscription TV — for product.

But, the FCC said, it does not intend to anticipate the future of theatre TV or of
subscription TV.

Miss Hennock's lengthy dissent focused almost entirely on the potential monopoly and
competitive aspects of the merger.

Tone of her opposition was expressed in her opening paragraphs:

... the Commission has built what was at most five eve to a merger into a monster of
trouble for itself and our entire broadcast-
ing system. ... In areas without established
precedent, the Commission has taken an undue
risk in permitting broadcasting by per-
mitting the introduction therein of a new and
potentially deleterious force and by setting in
motion pairs of events that must be produ-
ductive of harmful future consequences upon
our radio and television services ... such
cumulative, interdependent and unstable growth
of that most vigorous and flourishing competi-
tive broadcast system which the American peo-
ple need and desire.

Miss Hennock devoted several sections of her opposition to the theory that the merger
could not be kept in line with Sec. 7 of the Clayton Act. This has to do with the
possible loosening of competition when two firms consolidate.

Not in Public Interest

She also vigorously maintained that the
doctrine was in the public interest and that UPT failed to prove that it is qualified to
hold broadcast licenses.

Cassandra-like, Miss Hennock claimed that
Commission was taken to be an amalgamation of the motion picture and TV in-
dustries. Other companies — most motion picture
and TV — will not live with "competitive
disadvantages" inherent in the ABC-UPT
merger, she said.

Merger approval is unfair to DuMont, Miss
Hennock asserted. It puts that network in the
position of competing with three dominant
networks, instead of two as heretofore, she said.

Taking a broad view of the possible effects
of the merger, Miss Hennock foresaw the
amalgamation of the motion picture and TV in-
dustries. Other companies — both motion picture
and TV — will not live with "competitive
disadvantages" inherent in the ABC-UPT
merger, she said.

Merger approval also conflicts with FCC
policy on diversification of ownership, Miss
Hennock charged. It also may violate the 1948
Supreme Court decision on the motion picture
anti-trust suit which precludes motion picture
producers from owning theatre chains and vice versa,
she said.

Thus, she pointed out, AB-PT owns theatres
and a TV network which is in the production
business. Also Paramount Pictures owns a
station and a network (kinescope recordings of
KTLA programs syndicated to other stations)
which might lead to price reduction and it also
produces motion pictures.

"Today we open a vast Pandora's Box," Miss
Hennock glumly declared, "one forbidding in
aspect and one that will not easily be shut
again. ... It may be possible for the bleak
day of complete elimination of the small or
moderately sized and fully independent operator
from all of the broadcasting, particularly televi-
sion."

Although Comr. Webster voted against
the merger, he did not oppose it on the same
grounds as Miss Hennock. Comr. Webster
did not think the Commission had fully explored
the anti-trust activities of Paramount Pictures
and of UPT. Therefore, he felt the merger
should be held in abeyance until the anti-trust
record had been more fully examined.

Comr. Merrill had this comment on the
subject of the merger, too: He favored: That
Commission might consider it advisable to give
further guidance to the Commission in the
discharge of its functions in this relatively young,
vigorous and rapidly growing TV field."

FCC Finds Paramount Pictures Controls Allen B. DuMont Labs.

In the only reversal of the hearing examiner's
initial decision [B&W, Nov. 17, 1952], the FCC
found that Paramount Pictures Corp. controls
Allen B. DuMont Labs. through its affiliates
Production in the broadcasting, particularly
independent operators.

"It was acknowledged by
Commission that Paramount's
"massive" cooperating power
of control will make it im-
possible to bid on same basis
and required Paramount to set
up a separate company."

FCC decision means that Paramount Pictures
and DuMont between them are limited to not
more than five TV stations. FCC regulations
prohibit the same entity from owning more than
five TV stations.

Undeterred at week's end was whether
DuMont would take the decision to court. Dr.
DuMont refused to discuss the decision. Col.
William A. Roberts, DuMont's Washington
counsel, was on a case in Nevada and was not
expected back in Washington until the weekend.
It was presumed that a statement would be
issued after conferences between Dr. DuMont
and Col. Roberts.

Some observers question whether DuMont
has anything to go to court on since its applica-
tions were granted.

Nub of the Commission's decision on the
control issue was contained in this sentence of
the conclusions:

"The rights which Paramount holds in Du-
Mont constitutes both negative control of
important phases of DuMont's corporate exist-
ence and potential affirmative control over
all phases."

Owns All B Stock, 2.4% A Stock

Paramount Pictures owns all of the 560,000
shares of Class B stock, the Commission pointed
out. It also owns 43,200 shares (2.4%) of the
Class A stock, which, Dr. DuMont's 3%
shares, is the largest Class A group, it said. Due
to its Class B holdings, it names three of the
eight DuMont directors and also the secretary,
treasurer and assistant treasurer, the conclu-
sions continued. FCC said:

The practical consequences of these facts are
in terms of influence, and potential and negative
control is clear. ... The amendments would be
applied to the Certificate of Incorporation, nor can
any other provision affecting the voting or other
rights and privileges of either class of stock be
made without affirmative vote of Paramount's
B stock.

The Commission said that Paramount from
the beginning of its participation in DuMont in
1918 assured itself of a major voice in
DuMont's affairs.

"This record, therefore, shows that as a
matter of basic organization Paramount has
been given a dominating position in DuMont
which sets it apart, in terms of influence, from
all other stockholders," said the Commission.

Webster Dissents Bitterly
In KTLA and WBKB Approvals

SURPRISE finding in the Paramount case was that old Paramount Pictures Inc. violated the FCC regulations by not seeking FCC permission before transferring KTLA (TV) Los Angeles and WBKB (TV) Chicago to new Paramount Pictures Corp. and UPT.

But, said the Commission, it could not believe that this action was willful, and therefore it granted the license applications requested.

This brought one of the most indignant dissenters in the whole case—that of Comr. Edward M. Webster.

Comr. Webster maintained that Paramount Pictures cut-off voluntarily to reorganize the two stations (plus negative control of the other TV stations in New Orleans) before effecting such changeover.

What aroused Comr. Webster even more was that the FCC, after finding that Paramount had violated Commission rules, nevertheless granted the license applications.

Paramount's Clear Record
Since '49 Decree Pointed Up

SINCE the 1949 Consent Decree, which followed the 1949 Supreme Court decision in the long-drawn-out motion picture anti-trust suit, Paramount Pictures has put its house in order. Therefore, it is stated, there have been no anti-trust suits since 1948 and are qualified to be licensees.

That is what the FCC majority found on the anti-trust issues of the Paramount case. The 1949 cut-off date for anti-trust violations was ordered by the Commission during the last August after pleas by ABC and UPT for means of expediting the merger cases. Comrs. Frieda B. Hennock and George S. Sterling did not make this decision.

The Commission majority also found that Paramount Pictures practiced no restrictive measures regarding the use of feature films on TV, but that lack of full-scale use of features on TV resulted from economics of theatre exhibition, which brought returns TV could not hope to meet. The Commission also declared that withholding of features from TV was in part because of union restrictions and the question of TV rights.

Neither Paramount Pictures nor UPT have discriminated against TV in story properties and talent, the Commission held. Again it was a question of economics.

This called forth dissent from Comrs. Hennock and E. M. Webster, and a partial objection from Comr. Eugene H. Merrill.

Comr. Hennock's opposition was most intensive. She claimed that the Commission's August order deleting consideration of Paramount's anti-trust history prior to 1948 "evacuated" the anti-trust issue and reduced the record to a "nullity."

Even with the record excised of pre-1948 monopoly and restraint of competition considerations, Miss Hennock claimed that it was incomplete and inconclusive regarding post-1948 anti-trust suits.

Nor has the record been cleaned up regarding conflicting testimony, she asserted.

Point Miss Hennock made—and in this she was joined by Comr. Webster—was that it behaved the examiner to permit the Broadcaster to deal with the pre-1948 anti-trust violations if it could prove continuing violations.

In this, they were joined by Comr. Merrill.

$600,000 for TV Spot Hinges
On Fla. Legislative Tax Vote

INSERTING a big "if"—if the money is made available—in its move to increase next year's advertising for local TV stations, the Florida Citrus Commission will make a big push on TV grapefruit advertising.

The group authorized its agency, J. Walter Thompson Co., New York, to "start buying immediately" and to use up $75,000 between now and June 30. This money presumably would come from cancellations of current TV and radio grapefruit advertising.

The Citrus Commission is spending approximately $700,000 during the current year for all grapefruit advertising in all media.

In a separate action, the Citrus Commission voted to cancel the Saturday morning TV show Happy's Party in three cities—New York, Detroit, and Washington—effective with the end of the present 13-week period. The show will be continued in Pittsburgh only.

The cutback was sparked by an expected scarcity of advertising funds during the current season. A reduction of approximately $115,000 is expected because of the downward revision of the Dept. of Agriculture's estimate of this season's Florida citrus crop.

Boxing on TV Insured

TO HELP offset any loss to the TV sponsor as a result of a possible cancellation of a scheduled boxing match between Carl (Bobo) Olson and Norman Hayes in Boston Garden, Ellington & Co. New York, agency for Saturday Night Fights, on behalf of Bayuk Cigars Inc., insured the match for $100,000.

The decision to obtain the policy, according to Jesse T. Ellington, agency president, was made because the first two bouts of the new TV boxing series, scheduled on ABC-TV, were cancelled because of injuries to boxing principals.
YEARS of RESULTS . . . .
From RADIO and NEWS!

100 per cent distribution for Polar Bear Coffee in the Fort Smith Trade area is proof of results for the Noon News, now in its 23rd consecutive year on KFPW . . . under the same sponsorship. AFILIATED WITH KOMA, OKLAHOMA CITY
YEAR-LONG contract for Frederic W. Ziv show, Favorite Story, on WNBW (TV) Washington is completed by (seated, l to r): Woodrow Hellmuth, president, U. S. Metals Products Corp. and Capital Supply Co.; Paul Lynn Heller, president of the agency of the same name; standing, Gerald M. Feld, agency account executive; Bill Dothard, Ziv district representative, and Tony Miellke, salesman for the television station in Washington.

STATION, AGENCY EXPERTS ANALYZE RADIO AT SEMINAR IN WASHINGTON

BAB's Sweeney cites department stores as great source of untapped revenue for radio, while officials describe operation of various classes of stations and agency executives define best use of the medium.

LOCAL RADIO's greatest potential revenue lies in the department store field, and the medium's biggest gains in the next two years will be with this kind of advertiser. This assertion by Kevin Sweeney, vice president of Broadcast Advertising Bureau, was made to members of the Washington (D. C.) Advertising Club Wednesday.

He warned that station executives must understand the retailer's problems and check department store copy closely to reap the greatest rewards.

Radio itself is responsible for the lack of department store revenue, and only a management eager to find new techniques can change the present box score, Mr. Sweeney said. He reported that "no more than a dozen" department stores in the country use radio with the same intensity as newspapers.

Stores will come into the sponsor-fold, however, because "we have learned more about how to use radio in the past five years than in the previous 25."

Mr. Sweeney keyed a panel discussion by station managers, representing various classes of operation, and another by agency executives, outlining their usage of radio. Pointing to "bargains" in their own types of operation were John S. Hayes, president, WTOP Inc. (CBS), for network; Robert Rogers, vice president and general manager, WJMS (specialized), and Ben E. Wilbur, sales manager, WOL (independent), all Washington.

Panel chairman was Ben Strouse, general manager of WWDC-AM-FM.

Alvin Miller, vice president of Cohen & Miller agency, introduced Washington agency panelists who discussed their use of radio. They were Harwood Martin, owner of the agency of the same name; Ruth Graze, account executive and timebuyer, Alvin Epstein Adv.; Jeff Abel, Henry Kaufman & Assoc., and M. Belmont Ver Standig, owner of the agency of that name.

Joseph L. Brechner, general manager of WCMY-AM-FM Silver Spring, Md., was in charge of the radio seminar. A similar session, concerning television, is planned by the group in March.

RCA Victor to Sponsor 'Oscar' Awards Simulcast

RCA VICTOR DIV., paying $100,000 for exclusive rights, will simulcast the Academy of Motion Picture Arts & Sciences 25th annual "Oscar" awards presentation on NBC from Hollywood Pantages Theatre March 19, 10:30-11:30 p.m. EST. Only institutional commercial copy will be used.

The AMPAS ceremonies have been heard on ABC radio in past years, but this is the first time the major studios have allowed a telecast of the event.

M-G-M, long a TV holdout, will permit contract talent to appear before the cameras during the ceremonies, the contention being they are participating in a "news event" and not performing as actors. Other major studios who withhold contract players from video also have indicated full cooperation. Sale of broadcast rights for the first time eliminates necessity for movie studios to share costs of the presentation.

Bob Welch, former Paramount Pictures producer and now an NBC-TV producer and idea man, will supervise production of the simulcast.

Toni's 'Biggest' Campaign Dominated by Radio and TV

Chicago firm, with accounts split among four agencies, plans $12 million campaign for 1953, with radio-TV to receive up to $10 million.

WITH its advertising budget split among four Chicago agencies after resignation of the account by Foote, Cone & Belding last December, Toni Div. of Gillette Co. last week was planning the most ambitious advertising campaign in its history.

It was understood radio will derive approximately $3 million and television $6.4 to $6.5 million of the overall budget estimated at far above $12 million. Toni's radio-TV budget was estimated at plus $3.5 million last December. No addition of programs is planned immediately, although one or two changes are anticipated on radio. Spot radio and television also will be used. The firm also plans to introduce new products.

R. N. W. Harris, Toni president, said the firm's 1953 budget will be its heaviest in history, with the biggest share in radio and television. Toni's 1952 budget had been estimated at $10 to $12 million.

Supplementing radio and television will be extensive schedules in newspapers and national magazines.

The budget includes an appreciable share for radio-TV advertising of Toni home permanent (Weiss & Geller is agency); Prom self-neutralizing home wave (Leo Burnett Co.); New Bobbi pin curl permanent (Tatham-Laird); Toni creme rinse (Tatham-Laird), Toni creme shampoo (Price, Robinson & Frank), and White Rain lotion shampoo (Tatham-Laird).

Toni plans to continue Racket Squad and Arthur Godfrey & His Friends on television, as well as the following radio network programs —Arthur Godfrey Time, Breakfast Club, Break the Bank, Crime Letter from Dan Dodge, Fun for All, This Is Nora Drake, and Tennessee Ernie.

CBS-NBC CONTINUE C-P-P SPAT

CBS-NBC battle for Colgate-Palmolive-Peet business continued last week. The sponsor reportedly is getting a two-week extension of deadline for notifying CBS-TV whether it intends to renew its sponsorship of Strike It Rich, which NBC is trying to swing over to its own network (CLOSED CIRCUIT, Feb. 9). Original deadline was last Tuesday.

NBC spokesmen said they were trying "as aggressively as possible within normal means" to get CBS-TV's Colgate account switched to NBC-TV, and that an answer was due early this week.

NBC is trying to sell Colgate on not only moving the half-hour Strike It Rich daytime program from CBS-TV to NBC-TV, but of increasing its sponsorship of the series from the present three-weekly schedule to a full five weekly.

Purported terms of NBC's bid generated fire among CBS-TV executives, who claimed NBC offered to make no charge for sponsorship of the program two days a week. NBC officials denied this version and countered that CBS-TV originated the furor.
...to the time buyers for food and drug advertisers

The only two stations in the fabulously wealthy Washington market that offer your clients regular IN-STORE, point-of-purchase displays to back up their on-the-air advertising are WMAL-Radio and WMAL-Television.

To give our drug and food advertisers effective follow-up at the all-important point of sale, we have launched

**DRUG advertisers** get point-of-sale displays in 75 Peoples Drug Stores—the drug chain that handles over 60% of all drug sales in the Washington Metropolitan Area.

**FOOD advertisers** get point-of-sale displays in 20 Food Town Grocery Stores—a chain that does a $20 million business annually.

TOP CHANGES MADE AT BIOW CO.

TOP LEVEL changes at Biow Co., one of the top 10 advertising agencies in terms of broadcast billings, were announced last week.

Milton H. Biow, who has been president since he founded the agency in 1918, became chairman of the board, and J. Kenneth Bell, executive vice president, was named president.

The changes "will make possible my devoting even more time to our agency's accounts and key sales and advertising problems," Mr. Biow said. "The advancement of Mr. Bell to the presidency will enable him to concentrate more fully on administrative functions, including the selection and development of manpower, all of which he has done so well in the company's interest and development."

"Million steps are part of a long-range expansion program begun some years ago which has aided the Biow organization to grow from approximately $20 million in billings handled by 200 persons to approximately $50 million in billings, and added a staff of salesmen and women. In part this increase has stemmed from the addition of new clients. In greater measure, it results from the increased business of older clients."

Mr. Biow added that he plans to continue the arrangement permitting employees to purchase a total of approximately 25% of the firm's common stock. Mr. Biow holds the remaining common and preferred shares.

Among the leading radio and television advertisers represented by Biow Co. are: Philip Morris & Co., Procter & Gamble Co., Bulova Watch Co., Jacob Ruppert Brewery, Pepsi-Cola Co., and Eversharp Inc.

Mr. Biow joined the agency in 1948, having previously been New York manager for Grant Adv. and Dancer-Fitzgerald-Sample. He was named executive vice president in 1949.

Little Elected C-P-P Chmn.; McConnell Is President

JOSEPH H. McCONNELL, former president of NBC, was elected president of Colgate-Palmolive-Peet Co., effective March 1, and Edward H. Little, president of C-P-P since 1938, becomes chairman of the board, effective immediately [B&T, Jan. 5], it was announced last Thursday following a meeting of the board of directors.

Mr. McConnell also was elected to the company's board of directors and the executive committee.

Mr. Little, as chairman of the board and also as chairman of the executive committee since 1938, will continue to serve as chief executive officer under an amendment to the by-laws of the company, passed last Thursday.

James A. Reilly, executive vice president in charge of soap sales, was elected a director at the meeting.

Charles S. Pearce and S. B. Colgate are honorary chairmen of the board.

Mr. Little has served C-P-P since 1902 when he joined the firm as a salesman.

The pattern of Colgate's foreign operations was largely established by Mr. Little. World wide sales of the company have increased from $100 million when he became president to more than $350 million in 1952.

Mr. McConnell, former executive vice president of RCA, was elected president of NBC in October 1949 and served in that capacity until December 1952 when he resigned to take the Colgate post [B&T, Jan. 5].

How Much Was Pabst's Tab For the Gavelian-Davey Bout?

HOW much did Pabst Brewing Co. pay for rights to the Kid Gavelian-Chuck Davey welterweight fight in the Chicago stadium last Wednesday evening?

There were reports that the sponsor of these regular weekly boxing matches on CBS-TV had guaranteed a sellout at the stadium and was paying $100,000 on the line for the TV rights.

Chicago Stadium says it isn't so—that Pabst "got off the hook" because of avid interest in the fight and a good gate. Stadium spokesmen claim the actual lump sum for TV rights would be closer to $12,000 than $100,000 on the basis of Pabst's yearly TV contract. They say Pabst tells only half the story.

Stadium spokesmen say that Pabst guaranteed a net gate of $200,000. The actual net was $211,415. It was pointed out that the brewing firm has a contract with the International Boxing Club for Wednesday night fights.

Pabst Brewing Co. headquarters in Chicago had no comment on the apparent discrepancies in the news. A spokesman said such business transactions were "confidential" but added that Pabst paid extra for the fight.

The TV viewing audience was estimated at between 35 and 55 million, with some 65 stations carrying the telecast. There was no radio coverage.

Sachs Signs With WBBM

MORRIS B. SACHS INC., Chicago clothing retailer which has pioneered in use of radio, last week signed a long-term contract with WBBM Chicago for 18-quarter-hour programs per week.

Mr. Sachs said his firm had tested spot announcements on a majority of Chicago stations for six months and results proved "AM radio on a large station was the most economical buy we could make. Radio will continue to hold the leading role in our advertising program."

NL&B Names Burton V.P.

APPOINTMENT of Robert R. Burton as vice president at Needham, Louis & Brorby, Chicago, was announced by that agency last Monday. Mr. Burton formerly was vice president in the Chicago office of Young & Rubicam Inc., where he supervised accounts of the Elgin National Watch Co., the Bissell Carpet Sweeper Co. and the Pullman Co.

NEW BUSINESS

Spot

McKesson & Robbins (Tartan suntan lotion), N. Y., through Ellington & Co., also N. Y., working up an advertising plan involving appropriations in excess of last year's. A saturation radio spot campaign will be used in all major cities across the country. Tex and Jinx McCrary and their two sons will be featured in commercials.

V. La Rosa & Sons Inc., N. Y., conducting saturation campaign through approximately 35 spots weekly on WOR, WNBC and WCBS, all New York. Campaign will last through Lenten season. Agency: Kiesewetter Assoc., N. Y.

Coca-Cola Bottling Co., L. A., starts one-minute spot announcement campaign today (Feb. 16), for 26 weeks, on KFI, KECA, KFWB, KMPC, KIHI, KNX, KGFJ, all Los Angeles; KBIG Avalon, KFOX Long Beach and KOWL Santa Monica. Agency is D'Arcy Adv. Co., L. A.

Network

Charles Astell (hair preparation products, reducing and vitamin pills) sponsoring What's Your Bid, Sat. 7:30-8 p.m. EST on 64 ABC-TV stations, effective last Saturday. Program is audience participation series. Television Ad. Assoc., Baltimore, is agency.

Helene Curtis (Spraynet) to sponsor Down You Go, half-hour TV show Friday night on DuMont TV Network, starting early in March. Ruthrauff & Ryan, Chicago, is agency.

Bur-Mill Cameo Hosiery (Burlington Mills) will sponsor Cameo Lady Talk, starring Helen Hall, in new six-times-weekly radio series, 3-3:05 p.m. EST on MBS in 13 states. Agency: Donahue & Coe, N. Y.

Agency Appointment

Campbell Soup Co. (Franco-American spaghetti sauce with meat), names Compton Adv., N. Y., effective May 1.

Bosco Co., N. Y. (Bosco milk amplifier), names Ruthrauff & Ryan, that city, effective April 1. Company expected to expand both network and local TV.
we've been on both sides of the desk

It's mighty helpful to understand the other man's problem when you are trying to sell him something.

The men of H-R Representatives have a decided edge in this business of advertising selling because of their vast experience on both sides of the desk.

Collectively H-R men have been successful buyers of time; account executives in agencies; have owned, managed and sold for radio stations; been advertising manager of well-known national companies and last and most important, spent years and years representing AM and now, TV stations.

Yessir, when you can talk the language of both sides of the desk, it's much easier to prove your point.

Remember, there is no desk-bound brass at H-R Representatives.

So, whether it's one of the owner-partners or a veteran salesman H-R Always Sends A Man To Do A Man's Work.
FACTS & FIGURES

99% of N. Y. TV Viewers Like Movies—Advertest

FULLY 99.6% of all TV homes in the New York area regularly viewed movie videos during January 1953. Advertest Research reports, adding this is a 5% increase over January 1952.

The Advertest report, "The Television Audience of Today," indicated weekday viewing was highest from 7-11 p.m. with 69% and weekends at 11 p.m. with 55%.

Children make up the major part of the TV movie audience before 7 p.m., with adults, the majority women, viewing mainly after that time. Total family viewers on weekdays, by periods: before noon, 4.6%; noon-5 p.m., 17.2%; 5-7 p.m., 36.5%; 7-11 p.m., 48.0%; after 11 p.m., 43.5%.

Preferences before and after noon up to 5 p.m. are comedy and musical movies; from 5-7 p.m., comedy and drama; 7-11 p.m. and afterward, drama and mystery.

Advertest, citing increased movie popularity on TV, said in 1952 that 33% of viewers rated movies as good or excellent, but that January's figure is 46%. The hour-length movie is most popular, followed by the half hour film.

Type and variety of films and hour of their presentations were listed by respondents as their choice for selection of favorite movie shows, with about 40% willing to accept re-pasts of movies on TV if "exceptionally good" or "shown at different times."

The study is available for release from Advertest Research, 90 Bayard St., New Brunswick, N. J.

NBC-TV, CBS-TV Get Equal Number of 'Emmys'

NBC-TV and CBS-TV programs and talent drew equal number of "Emmy" national awards at the fifth annual Academy of Television Arts & Sciences Awards made at the dinner held Feb. 5 in the Hotel Statler, L. A. One award in the national category went to DuMont TV Network and another to Paramount Television.

Lucille Ball was a double winner, sharing one award with her husband, Desi Arnaz, as costars of the CBS-TV situation comedy, I Love Lucy (Philip Morris). Other honor was as the best TV comedienne.

Best dramatic show was the NBC-TV Robert Montgomery Presents (Johnson Wax and American Tobacco Co.). NBC's Your Show of Shows (Lehn & Fink, Benrus, Griffin, Prudential and SBS) was named best variety program. Bishop Fulton J. Sheen, Life Is Worth Living (Admiral) on DuMont, was named the outstanding TV personality.

* According to Jan.-Dec. 1952 A. R. B.
My Line (Jules Montenier) were judged best public affairs and audience-quiz-panel programs, respectively, NBC-TV’s Dragnet (Liggett & Myers) was picked as best entertainment-adventure program. Paramount award was for Time for Beany, syndicated children’s show. Jimmy Durante, of NBC-TV’s All-Star Revue (Pet Milk, Johnson & Johnson), was called best comedian. Thomas Mitchell was selected as best actor and Helen Hayes as best actress.

Local award was given KCAL-TV Los Angeles for Liberase, pianist, as outstanding male artist and best entertainment program. Betty White, feminine personality, received an award as star in KCAL-TV’s Life With Elizabeth (Sears, Roebuck). A tie occurred in the children’s group. KNXT (TV) Los Angeles was given award for Tim McCoy, KNBH (TV) Los Angeles won with Peanut Crisp (Peanuts). English Channel swim coverage by KNBH was called best special event. KTLA (TV) Los Angeles’ City at Night (Santa Fe Railway) was named as best public affairs program.

60 Million Persons Watched TV Inaugural

ABOUT 60 million persons in the U. S. saw Inauguration proceedings Jan. 20 some time during the five hours of telecasting between 11 a.m. and 4 p.m. EST, Hugh M. Bevillé Jr., NBC director of research and planning, reported last week.

Mr. Bevillé said this estimate is based on a special Trendex average-minute coincidental figures report representing 10 major TV markets with "maximum" competition. The figures show there were more TV sets in use (85% at one time or another) than for any other daytime telecast of major importance.

Virginia TV Count Change

COUNT of TV set saturation in Virginia, as recorded in April 1950 by the U. S. Census Bureau and first published in the Jan. 5 Broadcasting * Telecasting, contained transcribing errors in figures for Orange and Page Counties. The Orange County TV figures should have read: 3,290 homes reporting; 80 homes reporting TV sets; 0.2% with TV. Page County: 3,910 homes reporting; 75 homes reporting TV sets; 0.2% with TV.

Godfrey’s ‘Scouts’ Climbs In January ARB Report

TOP VIDEO programs continue to be I Love Lucy with Lucille Ball and Arthur Godfrey’s Talent Scouts and Godfrey & Friends, according to the January report of the American Research Bureau. I Love Lucy. No. 1 for the seventh consecutive week exclusive of the summer hiatus period, also reached more homes than any other video show.

Mr. Godfrey’s Talent Scouts reached more homes than ever before, and showed one of the highest ratings of the past year, ARB records particularly significant because the show is carried in only 23 markets and available to only 64% of the nation’s set total. Lucy, however, reaches 98.7% of the video audience, and Comedy Hour goes to 99.9%.

Godfrey, Amos ‘n’ Andy Top Nielsen Radio Ratings

TOP radio programs for the week of Jan. 4-10, as indicated by the A. C. Nielsen Co. listings, shows Amos ‘n’ Andy as the leading weekly evening show in number of homes reached. Commentator Lowell Thomas’ show led the evening multi-weekly programs.

Heading weekday programs was Arthur Godfrey (Nabisco). Stars Over Hollywood and True Detective Mysteries were top Saturday and Sunday Shows, respectively. Listings follow:

New York State Leads 1952 Video Set Shipments

NEW YORK state led the nation last year in shipments of TV sets to dealers, with 736,956 receivers shipped compared to second-place California, 577,186 receivers, according to Radio-Television Mfrs. Assn.

Shipments for the nation totaled 6,174,505 sets in 1952 compared to 5,095,653 the year before. During December RTMA estimated that 965,891 TV sets were shipped to dealers compared to 680,141 for the same month of 1951.

TV set shipments to dealers by states for the entire year 1952 follow:

Still riding WFBR's "gravy train" after 11 years!

Little Potts Furniture Store and Hampden Rug Cleaners—two of Baltimore's most astute advertisers—are still riding high after 11 years on Club 1300!

Most of the advertisers on Club 1300 have been on for over 5 years—many for 8, 9 and 10 years—and two have been there since Club 1300 went on the air, 11 years ago! Many success stories have been written by WFBR advertisers, both local and national, who have used Club 1300 alone in the Baltimore market!

And Club 1300 is typical of many WFBR home-grown participating shows. Shows like Morning in Maryland, Melody Scoreboard, Every Woman's Hour, Melody Ballroom, Shoppin' Fun and others—can chalk up successful sales mileage for you.

Want to ride on our gravy train? Ask your John Blair man or write, wire or phone...
Stolkin Interests Sell RKO Control to Hughes

A NEW chapter in the career of Ralph E. Stolkin was written last week as the Chicago millionaire and three associates returned controlling interest in RKO Radio Pictures Inc. to west coast industrialist Howard Hughes.

Decision to return the stock (1,013,420 shares) came after a conference between Mr. Stolkin and Edward Burke Jr., his associate in one time stock holdings in KOIN Portland, Ore., and KJR Seattle, Wash., until their resignations from top posts in RKO last fall [B-T, Oct. 27, 1952].

"We have no interest in owning the stock unless we can have management of RKO," Mr. Stolkin said, noting he and his associates had been minority stockholders since October. Mr. Stolkin had been described as vice president of National Video Corp., Chicago, and identified with Screen Assoc. Inc., Hollywood.

As of last week, the Stolkin group owed Mr. Hughes, RKO board chairman, about $5.25 million, and is expected to pay this week $37,000 interest due from Dec. 15.

Film Sales

Completion of 63 sales of programs during Jan. 14-28 total was announced last week by Peter M. Robeck, general manager of Consolidated Television Sales, New York. He noted a trend for stations to purchase more than one filmed TV program at a time for showing on local level.

Series of eight 60-second film commercials in the form of human interest playlets has been prepared by Sarra Inc., New York and Chicago, for the Society for Savings, Cleveland, Ohio. Commercials were produced through The Griswold-Eshelman Co., bank's advertising agency, with James Pritchard, agency president, and Walter F. Meads, account executive, supervising production in Sarra's Chicago studios.

National Health Aids Inc., Baltimore, Md. (NHA Vitamin Complex, Fastabs), has renewed a half-hour TV film on WGN-TV Chicago, Sunday, for 13 weeks, effective Jan. 20. Agency is Television Advertising Assoc., same city.

Chrysler Dealers of Chicago Feb. 1 start a half-hour film, Sunday, also on WGN-TV, for 52 weeks. Agency is McCann-Erickson.

Availabilities

Demby Production Inc., New York, announces that What's Playing?, TV program of complete scenes (not coming attractions) from new motion pictures, will be made available on a national basis. It has been running for the past 39 weeks over WJZ-TV New York.

Distribution

Station Distributors Inc., New York, has acquired distribution rights to the 52 half-hour film segments of The Ruggles, family comedy series starring Charles Ruggles. The package is owned by Television Productions, Hollywood. To date, the show has been sold in 11 markets: Los Angeles, San Francisco, Denver, Albuquerque, Chicago, Lubbock, Indianapolis, Amarillo, Honolulu, Boston and Kalamazoo.

Screen Gems Inc., New York, has acquired distribution rights to Professor Yes 'n No, quarter-hour open-end film quiz show in which the audience participates for prizes. Contract was negotiated by John H. Mitchell, vice president in charge of sales for Screen Gems, and Allan Trench of Tragborn Productions Inc., Pittsburgh, producer of the series.

Production

Jack Denove Production, Hollywood, is filming 20 quarter-hour, two half-hour and 30 one-minute TV films for The Christophers, society headed by Father James Keller. Quarter-hour programs, distributed under title What One Person Can Do.

Volcano Productions, Hollywood, is completing a half-hour pilot film for NBC in network's proposed TV version of its radio program, The Chase. Using a suspense-adventure format, each succeeding film will utilize a different cast.

Film People

Ho Harvey appointed assistant manager of Consolidated Television Sales East Coast Office in N. Y.

Dwight W. (Bill) Whiting, sales manager of KTTV (TV) Los Angeles, joins Consolidated Television Sales as western sales manager.

Philip Leplinsky, formerly with Fleischer Studios, New York, and Jam Handy, Detroit (TV film production), appointed director of new animation department at Filmack Trailers Inc., Chicago.

Did you know that every week-day afternoon, one of every three families listening to any Milwaukee Radio Station is tuned to WMIL* or one other independent?

So says Hooper.

* Represented by For Joe
YOU MIGHT THROTTLE A LEOPARD WITH YOUR BARE HANDS*

BUT...

YOU NEED THE FETZER STATIONS TO MAKE A KILLING IN WESTERN MICHIGAN!

WKZO-TV in television, WKZO-WJEF in radio—that's the easiest way to choke off competition in Western Michigan.

TELEVISION: WKZO-TV is the Official Basic CBS Television Outlet for Kalamazoo-Grand Rapids. Its bright Channel 3 picture is received by a quarter million Western Michigan and Northern Indiana television homes—a 28-county market with a Net Effective Buying Income of more than $2,000,000,000. And here's the stopper: The October 1952 Videodex Report credits WKZO-TV with 106.1% more afternoon viewers than Station "B"—213.4% more evening viewers!

RADIO: You'll look a long time before you'll find two more obvious radio buys than WKZO, Kalamazoo, and WJEF, Grand Rapids. Both are far ahead of all competition. Together, they deliver 57% more Kalamazoo and Grand Rapids listeners than the second-best two-station combination in the two cities. It's the same story in rural areas. The 1949 BMB Report credits WKZO-WJEF with big increases over 1946 in unduplicated audiences—up 52.9% at night, 46.7% in the daytime—and there's every reason to believe similar increases have occurred since.

It will pay you to get the whole Fetzer story. Ask your Avery-Knodel man for all the facts, or write direct.

* On a hunting expedition in Africa, Carl E. Axeley killed a full-grown leopard by choking it to death.

AVERY-KNODEL, INC., EXCLUSIVE NATIONAL REPRESENTATIVES
ASCAP-Broadcaster Problems May Be Resolved This Year

PRESENT differences between TV broadcasters and ASCAP over proper terms of payment for pre-program licenses to teletcast ASCAP-licensed music may be settled this year.

There are two important reasons why 1953 may be the year of decision for a problem that has been unsolved for nearly five years: First, it is anticipated that before the year is out the Federal District Court in New York will act on the petition filed in July 1951 by 55 TV station operators, who after nearly two years of negotiations with ASCAP failed in agreement, asked the court to set a fair and reasonable fee, under the terms of ASCAP's 1941 consent decree. ASCAP's counter-petition to have the consent decree amended to remove the obligation to issue per-program licenses, which will be heard first, would, if approved by the court, settle the problem by eliminating it.

Second, ASCAP's blanket licenses for TV, accepted by the video networks and a number of individual stations, will expire Dec. 31, 1953. In the negotiations for new licenses it is expected that the TV broadcasters will attempt to work out an overall deal that would remove the need for court action.

Promotion on Local Level For Ziv's Lombardo Show

EXTENSIVE local promotional campaigns are planned by sponsors of the Frederic W. Ziv Co.'s Guy Lombardo radio program as tie-ins with Mr. Lombardo's nationwide band tour which started yesterday (Sunday) and continues through late April.

Ziv said that nearly 150 local sponsors already have signed for the show. Typical of local promotional support, according to Ziv, is the plan of the Lynchburg (Va.) Coca-Cola Bottling Works to use three radio spots daily and large tune-in ads for three straight days, including the day of the program, and to circulate the Tune Club booklets published by Ziv.

The booklets, distributed free to all sponsors, are designed to aid listeners in identifying the mystery melody and thereby win Grunn watch-es. Grunn has made available $2,500 worth of watches to each sponsor.

Columbia Promotes Carlson

COLUMBIA Records Inc. has announced the promotion of Alden O. Carlson, senior sales representative with Transcription Div., to division general manager, post recently vacated by Robert Clarkson [B+T, Feb. 9]. Mr. Carlson joined Columbia's transcription sales staff in 1942.

MISCELLANEOUS

George F. Foley Inc., N.Y., radio-TV program production firm, has moved its offices from 9 E. 45th St., to 625 Madison Ave. Phone number has been changed to Plaza 1-1860.

Frank Cooper Assoc., Hollywood, talent agency and program package, moves to 6277 Selma Ave. Telephone is Hillside 2297.

William B. White Agency, Beverly Hills, talent agency and program package, moves to 332 S. Beverly Dr. Telephone is Crestview 4-6301.

Phil Davis Musical Enterprises, N.Y., assigned by Brooks, Smith, French & Dorrance to create one radio and one TV commercial for Goebel beer.

NEW OFFICERS of Montana Radio Stations Inc. meet after a one-day session in Butte where more than 100 persons, representing 24 of the state's 25 stations, attended. L to r are: Norman Penwell, KBMN Boxeman, re-elected secretary-treasurer; Ed Conney, KOPR Butte, retiring president; Ken Nybo, KBMY Billings, new president, and Ian Elliott, KRFJ Miles City, vice president. At the business session, stations adopted a resolution supporting the Horan Bill, which would exempt stations from libel liability in political broadcasts. Art Mosby of KGVO Missoula led a discussion on copyrights.

BAB and BMI Will Sponsor Field Clinics Jointly

Broadcasters will save time attending 42 rather than 86 local work sessions.

INTEGRATED series of two-day sales and program clinics will be held under the joint auspices of BAB and BMI during the seven-week period starting May 25, it was announced today (Mon.) by Carl Haverlin, BMI president, and William B. Ryan, president of BAB [CLOSED CIRCUIT, Feb. 9].

Designed to save time for broadcasters and their staffs, the 42 joint clinics planned for this year will replace 86 such meetings held in 1952, when each organization conducted 43 clinic sessions. Tie-up is a natural one, and, as the joint statement points out, it is "impossible" to think of programming without thinking of sales and vice versa. "The basis of successful radio management is the thoughtful coordination of both programs and sales," both groups believe.

Commenting on the decision to continue the BMI program clinics, NARTB President Harold E. Fellows said: "We're glad BMI is going to continue them this year. NARTB looked into the possibility of producing such program clinics this year, but we are not geared to do them in the fashion to which broadcasters have become accustomed through the good work of Carl Haverlin and his crew. As a step in the direction of minimizing the number of meetings which broadcasters must attend, I am happy to learn that BMI is integrating its clinics with the BAB sales clinics."

BAB's part of the combined clinics will be planned "to provide those in attendance with not only a well laid-out plan for selling in today's competitive market, but also with an insight into many categories of potential business that heretofore have been neglected," Mr. Ryan said.

BMI, according to Mr. Haverlin, will again this year present "forums in which top program brains may interchange program ideas before the widest possible audience of working broadcasters. We hope to make the program clinics and the bull sessions, in which all who attend may participate, even better than before," he said.

Plan was discussed by the BMI board at its annual meeting at Bellevue, Fla., Feb. 8-9-10. NARTB, which will operate at the management level at its district meetings, formally endorsed the joint BMI-BAB plan.

Three of BMI's 14 directors were excused from the meeting. Absent were Joseph H. Baudino, Westhinghouse; Herb Hollister, KBOL Boulder, Colo., and Herbert V. Akerberg, CBS New York. Attending were Carl Haverlin, president; Sydney M. Kaye, vice president and general counsel; NARTB Board Chairman Justin Miller; NBC Vice President William S. Hedges; Raymond Diaz, ABC; James E. Wallen, MBS; Paul W. Morency, WTTI Hartford; J. Harold Ryan, Storer Broadcasting Co.; John Leonard Reinsch, James M. Cox stations; Leonard Kaper, WCSS Pittsburgh; John Elmer, WCBM Baltimore.

BMI staff members who reported included Charles Wall, BMI vice president in charge of finance; Robert Burton, vice president in charge of publisher relations and secretary; Jean Geiringer, vice president in charge of foreign relations.

Madsen Is Elected

ARCH L. MADSEN, general manager of KVOO Owasso, Utah, was elected president of the Utah Broadcasters Assn. at a meeting Jan. 26 at Salt Lake City's Newhouse Hotel. The picture inadvertently run in a story on the UBA meeting and election [B+T, Feb. 2] was of E. F. Peffer, president of KGDM Stockton, Calif.

SMPTe Shifts TV Sessions

TO avoid calendar conflict with the NARTB convention in Los Angeles April 29-May 2, the Society of Motion Picture and Television Engineers has shifted the TV sessions of its 73d semiannual convention to April 30-May 1. Ordinarily the TV technical papers and demonstrations are presented the first days of the SMPTe convention, scheduled in Los Angeles' Statler Hotel April 27-May 1.
"The Big News in TV is UTP in '53"

Custom-tailored or ready-made—now, with its own production facilities, UTP stands ready to serve all your TV film needs.

In addition to twelve top "packaged" shows for the local buyer, UTP now has its own huge Hollywood studio to "custom-produce" films of any type for the discriminating regional or network buyer.

And the important thing about UTP's complete new production set-up is that it's operated by men who best know the problems of maintaining high-quality film production on a moderate budget, and are equally familiar with the problems of the advertiser.

HEART OF THE CITY (Big Town) — Famous half-hour series that scored smashing successes for Lever Brothers as "Big Town," featuring reporters Steve Wilson and Lorelei.

OLD AMERICAN BARN DANCE — Twenty-six half-hours starring famous National Dance entertainers . . . Pee Wee King, Tennessee Ernie, others. Terrific commercial corn! Produced by Kling United.

COUNTERPOINT (Rebound) — Bing Crosby Enterprises' series of 26 dramatic half-hour suspense shows. A national award winner with tremendous adult appeal.

STUDIO TELESCRIPTION LIBRARY — Featuring Peggy Lee, June Valli, King Cole trio, Mel Torme and 159 other stars in a library of all-time favorites, plus monthly "refresher" tunes. Versatile, flexible, adaptable to any programming need.

PLUS THESE OTHER ATTRACTIVE PACKAGES: Sleepy Joe, delightful half-hours for kids; The Chimps, unique quarter-hours starring "Bonzo".

AFFILIATES GROUP WILL CONTINUE

GOVERNING committee of the All-Industry Radio Affiliates Committee, at a meeting Feb. 7 at Belleair, Fla., agreed to continue the organization until the NARTB convention in Los Angeles next April, at which time a decision will be reached on permanent organization.

Paul W. Morency, WTIC Hartford, chairman, announced after the session that the committee will report to the general membership at a session scheduled for 3:30 p.m., April 28, during the NARTB sessions. A proposal then will be made for the continuation of the organization, created in 1951 to combat deterioration of the rate structure in radio. The organization was formed spontaneously during the Chicago NARTB convention, immediately after announcement by CBS that it would adjust night-time rates downward.

Mr. Morency has agreed to remain head of the organization "until the Los Angeles meeting only," it was announced. Some thought has been given to a revised organization plan whereby independently organized station and advisory planning committees of the networks would constitute the nucleus of the Radio Affiliates Committee.

Attending the Belleair session, in addition to Mr. Morency, were Clair R. McCollough, Steinman Stations, vice chairman; G. Richard Shafto, WIS Columbia, S. C.; Leslie C. Johnson, WHBF Rock Island, Ill.; Robert D. Sweezy, WDSU New Orleans, and Ben W. Strouse, WWDC Washington.

VOD Contest Winners Begin Tours in D. C.

FOUR high school students, winners of the sixth annual Voice of Democracy Contest, last Thursday started a weeklong series of tours, broadcasts, meeting with President Eisenhower, telecasts and a trip to Colonial Williamsburg, Va.

The four winners are Frank Lammedee, San Marino, Calif.; Thomas J. Walsh, Washington, D. C.; Robert Davis, Maui, Hawaii; Adelaide Nacamu, Peekskill, N. Y. [BT, Feb. 9].

Scholarships for $500, radio-TV consoles and certificates will be presented to the young people Wednesday at the annual VOD luncheon at the Mayflower Hotel, Washington.

Public Relations Meet March 1

JOHN H. SMITH, Jr., National Assn. of Radio and Television Broadcasters, is a member of the convention committee which is planning the 8th annual conference of the American Public Relations Assn. in Washington, D. C., March 1-3 at the Mayflower Hotel.

ABA Convenes March 15-16

ANNUAL spring membership meeting of the Arkansas Broadcasters Assn. will take place March 15-16 at the Marion Hotel in Little Rock. Equipment manufacturers and distributors have been invited by the board of directors to attend the meeting, for which registration begins at noon Sunday, March 15.

Whatever factors determine the type, height and location of your TV Antenna Tower, you can depend on Blaw-Knox to give you *more for your money*. Does the job call for a self-supporting structure atop a mid-town building or a skyscraping guyed tower out in the open? Do you prefer a square design or triangular? Blaw-Knox builds them all—and every one is backed by more than four decades of experience in this field. If you are anticipating a TV license, write or phone today for capable engineering assistance with your plans.
FCC GRANTS 17 NEW TV STATIONS PERMITS

Clearing station applicants for TV channels at a fast clip, FCC last week came close to breaking the record number of grants for a single week.

GRANTING applications for 6 vhf and 11 uhf new TV stations last week, FCC came close to beating the record number of 18 grants it made last July (B&T, July 14, 1952). The 17 total was most FCC has made in any one week following the lifting of the TV freeze.

One of the permits was the first to be awarded an applicant comprising a merger of two AM stations in the same city. Uhf Ch. 47 was granted to Macon Television Co., owned by WBMN and WNEX, competing outlets at Macon, Ga. (see story page 55).

Another permit—that for vhf Ch. 10 at Columbia, S. C., to WIS-TV Corp.—granted after a 1955 February application was tendered (B&T, Feb. 9). WIS-TV Corp. is owned 85% by principals in and 15% by a group withdrawing from WMSC Columbia.

New uhf Ch. 29 granted at Dallas, Tex., is KLIF there, owned by Barton R. and Gordon R. McLendon, principals in the former "fifth" radio network, Liberty Broadcasting System.

FCC dropped down its Group A-2 priority list (cities without any TV service) to No. 236 (Midland, Tex., 1950 population: 21,713). The Commission got as far as Oklahoma City, Okla., No. 194 in the Group B list, making two grants there.

Total number of TV stations now authorized in the U. S. and its territories is 355, of which 182 are vhf and 173 uhf. The total includes 2 vhf and 12 uhf permits for noncommercial educational stations.

New grants made last Wednesday and Thursday were:

Wheeling, W. Va. (City priority Group A-2, Number 31)—Polan Industries (permittee for WPTY [TV] Ashland, Ky.), granted construction permit for uhf Channel 51, effective radiated power 24 kw visual and 12.5 kw aural, antenna height above average terrain 170 ft.

Columbia, S. C. (Group A-2, No. 37)—WIS-TV Corp. (WIS), granted vhf Ch. 10, ERP 245 kw visual and 160 kw aural, antenna 177 ft., subject to condition that stockholders who have interest in WMSC Columbia divest themselves of that interest.

Portland, Me. (Group A-2, No. 45)—Portland Telecasting Corp. (WLAM), granted uhf Ch. 53, ERP 23.5 kw visual and 15 kw aural, antenna 338 ft.

Macon, Ga. (Group A-2, No. 54)—Macon Television Co. (WMBL and WNEX), granted uhf Ch. 47, ERP 100 kw visual and 55 kw aural, antenna 506 ft. Comra, Rosel Hyde and E. M. Webster dissented and issued separate statements: Comra, George Sterling and Eugene Merrill issued separate concurrent statements. Eugene, Ore. (Group A-2, No. 154)—W. Gordon Allen (licensee of KGAB [AM], Salem, Ore.), granted uhf Ch. 29, ERP 19.5 kw visual and 11 kw aural, antenna 300 feet.

Parkersburg, W. Va. (Group A-2, No. 169)—West Virginia Enterprises Inc. (Frank, Helen and Ben Baer, 32.5% owners of WTBO Cumberland, Md.), granted uhf Ch. 16, ERP 19 kw visual and 17 kw aural, antenna 666 ft.

Rome, Ga. (Group A-2, No. 170)—Cooey Valley Radio Co. (WROM), granted vhf Ch. 9, ERP 1.9 kw visual and 1.45 kw aural, antenna 720 ft.

Beloit, Wis. (Group A-2, No. 172)—Beloit Broadcasting Co., granted uhf Ch. 21 kw visual and 11 kw aural, antenna 260 ft.

Eureka, Calif. (Group A-2, No. 220)—Redwood Bestg. Co. (KFRM), granted vhf Ch. 3,

ERP 17.5 kw visual and 9.3 kw aural, antenna 110 ft.

Gulfport, Miss. (Group A-2, No. 226)—WGCW Television Corp (WGCM), granted uhf Ch. 56, ERP 21.5 kw visual and 11.5 kw aural, antenna 300 ft.

Minot, N. D. (Group A-2, No. 232)—Radman Television Co. (60% owner of new TV station in Bismings, Mont.), granted vhf Ch. 16, ERP 58 kw visual and 31 kw aural, antenna 390 ft.

Minot, N. D. (Group A-2-32)—North Dakota Bestg. Co. (CKJB), granted vhf Ch. 13, ERP 29.5 kw visual and 15 kw aural, antenna 420 ft.

Midland, Tex. (Group A-2, No. 236)—Perman Basin Television Co. (Video Independent Theatres Inc.), granted vhf Ch. 2, ERP 50 kw visual and 25 kw aural, antenna 1,010 ft.

Dallas, Tex. (Group B-2, No. 125)—Trinity Bestg. Corp. (KLIP), granted uhf Ch. 29, ERP 50 kw visual and 25 kw aural, antenna 490 ft.

St. Louis, Mo. (Group B-4, No. 179)—Missouri Bestg. Corp. (WIL), granted vhf Ch. 42, ERP 79 kw visual and 46 kw aural, antenna 880 ft.

Oklahoma City, Okla. (Group B-4, No. 194)—Oklahoma County Television & Bestg. Co. (KWCO Chickasha, Okla.), granted vhf Ch. 25, ERP 17.5 kw visual and 9.5 kw aural, antenna 500 ft.

Oklahoma City, Okla. (Group B-4, No. 194)—KLPR Televising Inc. (KLPR), granted vhf Ch. 19, ERP 91 kw visual and 49 kw aural, antenna 500 ft.

WCCO-AM-TV Hosts To Washington VIP's

SEVENTH annual Congressional dinner was held Feb. 9 by WCCO-AM-TV Minneapolis at the Hotel Statler, Washington, D. C. Top station executives were hosts.

Guests listed at the Monday dinner was, broadened beyond the Minnesota delegation to include legislators from Iowa, Wisconsin, North Dakota and South Dakota. Thirty-one guests took part.

NFL Suit Resumes Feb. 24

With Defense Presentations

TRIAL of the government's antitrust case against the National Football League is scheduled to resume Feb. 24 in Philadelphia, with the defense to start presentation of evidence that restrictions against radio-TV coverage of games were not unreasonable restraint of trade.

The Dept. of Justice completed its case last Monday, having consumed nine court days (B&T, Feb. 9) in presenting evidence.

Judge Allan K. Grim, of the U. S. District Court (Eastern Pa.), refused to dismiss the suit as requested Tuesday by Bernard I. Nordlinger, chief defense counsel.

The football league contended there is no interstate commerce involved and any restrictions on radio-TV were reasonable.

W. Perry Epes, government counsel, pressed the argument that economic justification is not an excuse for violating Sherman antitrust laws, whether it be professional football, baseball or any other business. Asked by Judge Grim if it made any difference whether TV killed professional football, Mr. Epes said, "Legally the result is irrelevant."

Judge Grim replied, "Then it is a matter of discretion with the Dept. of Justice whether it wants to bring a case or not regardless of the ultimate result." This brought from Mr. Epes the answer that the economic effect has nothing to do with it.

Mr. Nordlinger argued that the government "did not substantiate the fact the that NFL compelled to obstruct or interfere with interstate commerce." He said the NFL's main business is to sell tickets to football games, not radio and TV rights, adding these rights were not a source of substantial profit.

Final government witness last Monday was Gordon McLendon, president of the defunct Liberty Broadcasting System. Mr. McLendon, replying to a question from Judge Grim, said he felt radio has not hurt professional football but has created more interest in the game, as well as other sports. Under defense questioning, Mr. McLendon said he had tried to buy stock in the Dallas team, loaning $12,500 to Giles Miller and Curtis Sanford, two Texas businessmen until he could get legal approval to be a stockholder.

POWER BOOST at WCCO-TV Minneapolis was activated from Washington, D. C., where Sens. E. J. Thye (R-Minn.) and Hubert H. Humphrey (D-Minn.) pressed key during station's annual dinner to Congressmen and Senators in its service area. L to r: Cedric Adams, WCCO newsmen; Sen. Thye; William J. McNally, chairman of board; Sen. Humphrey; Robert B. Ridder, president; F. Van Konyenburg, vice president and general manager.

BROADCASTING • TELECASTING
WHEN, in March of 1951, KLRA added John R. Holmes to its staff as Farm Service Director, it took a long step forward in service to the farm folks of Arkansas. Johnnie became the first and only full-time Farm Reporter operating in Arkansas. Now, to further expand KLRA service, and to cover Arkansas farm news more completely, KLRA is pleased to make this announcement:

JIM MOFFET, a January, 1953, graduate of the University of Arkansas College of Agriculture, has joined our staff as Johnnie’s assistant. John and Jim will cover all important farm meetings, sales, demonstrations, fairs, and will visit important farm improvement programs all over the state. A new concept of Farm Service is being instituted by KLRA in the early morning period.

GOVERNMENT

Fate of Theatre TV Hearings Uncertain

WHAT happens to theatre TV hearings from now on rests with FCC, following last week’s oral argument on questions propounded by the Commission three weeks ago (B+T, Feb. 2). Chairman Paul A. Walker recessed the hearings until further notice after a one-day session last week.

In seeking to clarify the issues and clear up some “inconsistencies in testimony,” the Commission enumerated eight points on which it sought clarification. In the notice of those points, the Commission said that it would decide whether to continue the hearings.

In any event, the hearings cannot be resumed before March 2. The Commission is tied up this week with other business, and next week, Feb. 23 and 24, is scheduled to hear seven oral arguments.

FCC Queries

Three weeks ago, the Commission ordered theatre TV proponents to answer questions which it considered necessary to the proceeding’s continuance. Specifically, more information was asked as to what kind of allocation was being requested, what the nature and cost of programs would be, and why theatre TV could not fit into the already existing common carrier allocations.

Presenting statements for the motion picture industry were Marcus Cohn, attorney for National Exhibitors Theatre TV Committee, and Vincent B. Welch, representing the Motion Picture Assn. of America.

Mr. Cohn told the Commission the motion picture industry had no intention of using the transmission facilities for the distribution of filmed programs into movie houses. Comr. Frieda B. Hennock asked if a new theatre TV industry would anticipate taking programs away from broadcasting facilities to put them into admission houses, or if an exclusive frequency allocation would not also mean “exclusivity” in the showing of many programs and features now being broadcast for home TV. Mr. Cohn replied that programs transmitted over theatre TV facilities would be, for the most part, those which are not available now to home viewers.

Data on Programs

Vice Chairman Rosel H. Hyde asked for more specific information on program types. Mr. Cohn said, as now envisioned the programs would fall into three categories: (1) entertainment, (2) special events, such as news and sports coverage, and (3) educational and instructional programs during “off-hours” to special groups.

He said every theatre with TV exhibition facilities might ultimately expect as much as five hours programming per day.

Mr. Welch said exclusive allocations were necessary because existing common carriers either could not or would not provide adequate facilities for theatre-TV.

An exclusive frequency allocation, he said, would be far superior to shared frequencies, either in common carrier or industrial services bands.
MERGED APPLICANTS GET TV GRANTS

Competing AM operators in Macon, Ga., as well as competitors in Columbia, S. C., circumvented time-consuming FCC hearings by working out joint applications. The result: Both received their grants last week.

TWO cities in which competing AM stations sought TV permits received grants last week following mergers of their principals. The cities were Macon, Ga., and Columbia, S. C.

A Ch. 47 facility was granted to Macon Television Co., comprising stockholders of both WBML-AM-FM and WNEX-AM-FM, competing Macon stations.

Another facility, Ch. 10, was granted to WIS-TV Corp., Columbia, after six stockholders of WMSC Columbia agreed to sell all their interests in WMSC, itself a former applicant for Ch. 10. The six now hold stock interest in WIS-TV Corp., now 85% owned by owners of WIS Columbia [BW, Feb. 9].

The Macon grant inspired dissenting opinions by Comrs. Rosel H. Hyde and E. M. Webster, with Comrs. George E. Sterling and Eugene H. Merrill writing separate concurring comments. Comr. Frieda B. Hennoch did not participate in this case.

Originally WBML and WNEX had tried to settle their competitive TV problem in Macon by forming a new corporation in which each would have five shares, or 50% of stock. Control had been vested in a board of six, three from each station, with Alfred Lowe, WNEX manager, resigning to manage the TV operation. This plan had been designed to keep AM competition alive, with the TV outlet also strictly competitive.

New Corporate Plan

Last Dec. 3 the FCC told the applicant it could not approve this merged operation. A new corporate plan was set up, WBML and WNEX each owning nine shares or 45% control, with 20 shares outstanding. W. A. Fickling, vice president and director, owns two shares or 10% of the new group and has no official relationship with either of the broadcast outlets. Number of directors was increased to seven, three from each for WBML and WNEX, and Mr. Fickling.

This arrangement received majority FCC approval, but set off a series of comments on competitive aspects of the Macon situation.

WMAZ Macon is applicant for Ch. 13 in Warner Robbins, Ga., a community near Macon.

The new Macon Television Co. proposal sets up safeguards to protect competition between WBML and WNEX. These include: Separate AM program and sales operation, including public service responsibilities; no overlapping interests of any nature; no common use of operating staff, salesmen, offices, studio or transmitting facilities, rates, programs or program sources; no advertiser to be required to buy time on one station to obtain time on the other.

The three TV stockholders promise no TV action will be taken which would be conditioned on action by the AM stations; TV rate card will not be related to time purchases on

WOODland! AM

And now the "Single Rate" applies!

Nighttime radio schedules on WOOD are now a smarter investment than ever because:

1 You buy nighttime at same price as daytime, and what a cost-per-thousand picture that will give you! Just check your SRDS and your SAMS report ... you'll see what we mean by a "real sleeper buy" in the rich Grand Rapids market.

2 You get a "bonus", too! The Katz sponsored Pulse Study of 18 TV cities reveals number of radio sets in use at home is about the same at night as in daytime; but — get this — at night there are more people listening to each set. Daytime radio has a peak at 10:00-11:00 AM when 365 people per 1,000 radio homes are listening; at night, the peak is 8:00-9:00 PM with 517 listeners per 1,000 radio homes; the figure never goes below 481 from 6:00-10:00 PM. It's poppa home from work who makes the difference.

*Literally, an exception — Class B is from 11:00 PM to 7:00 AM.
the AM station; no common TV-AM use of sales staffs or facilities; TV station not to be used to show the AM affiliations. A manager not connected with either of the 45% stockholders or their stations is to be employed.

The majority decision described the problem as novel, to be decided on the specific facts in the case. Finding no need to call a hearing, the majority said the grant would bring early establishment of uhf service to Macon, improving the uhf competitive position in the "as yet unopened field" of TV broadcasting in the area.

Comr. Hyde disapproved that the action compromises the FCC's multiple ownership policy (Sec. 319(a)) as would "an undesirable increase in government regulation of the internal affairs of licensee management." Other channels are available for Macon from an engineering standpoint, aside from the assignment mentioned.

Comr. Webster's dissent was based on "a definite relaxation" in the policies limiting the concentration of interest in two AM stations in the community. He wondered if competition might be restricted and suggested a full study of the question.

The separate concurring opinion of Comr. Sterling said the ruling should not set a precedent, and that it should be decided on its own merits. Comr. Merrill said his approval was not to be construed as a general endorsement of all proposed "marriages." He called attention to the possibility of assigning another channel to Macon.

WIS-TV Corp., is owned principally by Broadcasting Co. of the South, licensee of WIS-AM-FM Columbia, WSFA-AM-FM Spartanburg, S. C., and WIST-AM-FM Charleston, W. S. N. C. The grant is conditioned upon A. R. Heyward II, Paul A. Cooper, Thomas B. Boyle, Joseph L. Nettle, Frank B. Gay, E. Grenville Seibels II and John C. Cosby devoting themselves to holdings in WMSC. The latter group, except Mr. Cosby, together own 14.5% of WIS-TV Corp. G. Richard Shafco, vice president-general manager of Broadcasting Co. of the South, is president of WIS-TV Corp., while Charles A. Batson, director of TV for the WIS licensee, is managing director and vice president of the Ch. 10 grantee.

FCC explores Question of NBC interest in KOA

QUESTION whether NBC might have a hidden interest in KOA Denver, competing with KVRD Denver for TV vhf Ch. 4 there, was explored last week in hearings before FCC Hearing Examiner James D. Cunningham and with NBC Financial Vice President Joseph V. Heffernan as the witness.

When NBC sold KOA to Bob Hope and Denver interests headed by Mayor Quigg Newton in 1952, Mr. Hope gave NBC a note for $1,250,000 as his part of the $2,250,000 purchase price for the 50 kw station on 830 kc.

Essential point of scrutiny was whether NBC has any rights in KOA under the terms of the note. Since NBC already has its five TV stations—the limit permitted to one company by the FCC—that fact that NBC has any interest in KOA might force denial of its TV application as sixth NBC station.

Mr. Heffernan told FCC Counsel Robert J. Rawson that NBC felt the Hope note was adequately secured and that provisions providing for the note's purchase were an effective way of deterring the common protections in normal business practice. He said that if Mr. Hope defaulted, NBC then had the right to force the sale of the station to another party.
we gambled...
Sprague Declines Post

ROBERT C. SPRAGUE, who resigned as president of Sprague Electric Co. Jan. 12 to accept nomination as Under Secretary of the Air Force, announced last week he preferred not to become involved in a possible Senate controversy over his stock interests.

Writing to President Eisenhower Feb. 7, he regretted he could not accept nomination, but added he felt the President should not run the risk of embarrassment of Congressional debate over stockholdings. He had taken steps to eliminate any possibility that he would be called on to answer questions concerning business between the Air Force and his company.

Mr. Sprague is a former board chairman and president of Radio-Television Mfrs., Assn. He voiced reluctance to dispose of his stock in the family corporation to outside interests because the town of North Adams, Mass., is highly dependent on this plant.

STATIONS

TWO NEW TV GRANTEE START IN BLACK

WEEK-TV Peoria and WLVA-TV Lynchburg report business is good, highlighting this week's report on new stations commencing operation.

FIRST reports from two new TV stations which commenced operation this month indicate that they are operating "in the black," one reporting it isn't taking any more business and the other stating it can accept only a few more national accounts.

The stations are WEEK-TV Peoria, Ill., and WLVA-TV Lynchburg, Va.

Fred C. Mueller, general manager of WEEK-TV Peoria, Ill., said the station went on the air with commercial programming Feb. 1, almost within hours after receiving its special temporary authorization to operate on a commercial basis [B-T, Feb. 2].

Full Commercial Schedule

Mr. Mueller said the station was operating with a full commercial schedule.

"In the first place," Mr. Mueller said, in explaining the reasons for the large amount of time sold on the station, "nothing at WEEK-TV is makeshift or temporary. We have everything—studios, transmitter, tower—permanently and correctly installed."

WEEK-TV is the only Peoria station now on the air, operates on uhf Ch. 13 and is affiliated with NBC-TV. Representative is Headley-Reed.

WLVA Lynchburg, operating on vhf Ch. 13, began commercial operation Feb. 8, and will probably be an interconnected station by May 1.

Philip P. Allen, vice president and general manager, said WLVA-TV's coverage is "more than excellent." He reported that there were viewers as far away as North Carolina, and that the station covered Charlottesville, Waynesboro, Danville and Roanoke, all in Virginia.

The Lynchburg station operates from 6 to 11 p.m. daily, is affiliated with CBS and DuMont and is represented by Frommert.

Harold E. Anderson, vice president and general manager of KOLN-TV Lincoln, Neb., said the station probably will begin commercial programming today (Monday) or tomorrow.

He said DuMont engineers are on hand, and that the station has been airing a test pattern on its vhf Ch. 12 with full effective radiated power of more than 26 kw visual since last Wednesday.

By last Wednesday night WFMI-TV Youngstown, Ohio, on uhf Ch. 73, was airing a test pattern with 80% of its power. Power will be gradually increased, according to Peter Frommert, production manager, until the full transmitter output of 1 kw is reached.

Commercial programming will most likely begin this week, Mr. Frommert said.

"We were being received in Akron with only half our power being transmitted," Mr. Frommert happily exclaimed, "and Akron it 45 miles away. With just a dummy load being put on the transmitter, we were getting reports of local reception," he said.

WFMI-TV is the first station to begin programming at the upper end of the uhf band, so its coverage results will be watched with interest [B-T, Feb. 9].

Profiting by some of the errors made elsewhere, WROV-TV Roanoke, Va., on uhf Ch. 27, is not trying to break any speed records for putting a signal over the air.

"We don't plan to break our necks to get just anything on the air, and then have to run around later and clean up a mess," Frank E. Koehler, general manager, said.

Mr. Koehler said that about 80% of the TV stations in the station's area are either converted to uhf or convertible, and that in order to give TV servicemen and dealers ample time to tune in the new sets to uhf Ch. 27, he was planning to keep a test pattern on the air for as long as two weeks.

"In the Black"

"WROV-TV is going to begin operating in the black," Mr. Koehler revealed, "at least for the first 13 weeks. It looks pretty good," he said.

Jack Schuler, operations manager at WHUM-TV Reading, Pa., uhf Ch. 61 grantee, said the station went on the air with a test pattern at 12:12 a.m. Feb. 10, operating the first 12 kw uhf transmitter built by General Electric at its Syracuse, N. Y., plant.

A special uhf antenna developed by GE engineers multiplies the transmitter power to produce an effective radiated power of 260 kw visual.

Mr. Schuler said it was hoped the station would begin commercial programming today (Monday) or tomorrow.

He said GE engineers were working around the clock on the station, ironing out any of its bugs before programming begins. Mr. Schuler said it would be another 48 hours before all quarters sales staff prior to start of test pattern telecasts Feb. 10. The uhf Ch. 61 station will operate with ERP 260 kw.
KCBQ was the first station in the nation to switch to the new ABC-UPT. With its vast resources in capital and talent, the new ABC is now the "Royal Flush" of the entertainment business.

in San Diego it's KCBQ

"A G-E TUBE SUGGESTION SAVED US $1,100!"

Says GEORGE A. WILSON
Director of Engineering
Radio Cincinnati, Inc.

"Two GL-5513's in our TV transmitter have had over 7,000 hours' service. That's three times the life we got from this type a while back—means a total of $1,100 we've saved in replacements! Better maintenance is part of the story, but the big reason is the advice G-E engineers gave us about matching up paired tubes so as to get balanced electrical characteristics.

"13,000 hours from a 6-tube bank of GL-8008 rectifiers—that's another economy figure in our records. Also, General Electric makes sure that when we need tubes, they're delivered fast. We couldn't ask for better all-around service than we get from G-E tube distribution here in Cincinnati!"

* * *

Your 16 years with WKRC, Mr. Wilson, gives you experience that makes your comments all the more important. G.E. is glad to have helped you realize these tube economies.

Station engineers everywhere will find G-E efficient tube service no farther away than their local G-E tube distributor—no harder to reach them than their telephone. Dial now the number of your distributor! The sooner he starts serving you, the sooner you will save money. Tube Department, General Electric Company, Schenectady 5, N.Y.

WKRC HAS A SHOW FOR EVERYBODY

- Variety and educational programs over WKRC supplement CBS network shows, giving Cincinnati viewers a wide choice of television fare. The second station in Ohio to receive a TV license, WKRC lives up to its reputation by also providing complete news and weather coverage.
- AM broadcasting, plus FM transit radio, are other services aired from the 600-foot WKRC tower. All three transmitting operations credit much of their reliability to General Electric tube performance.

You can put your confidence in-

GENERAL ELECTRIC

It's SOLD to WNAC-TV Boston, WWJ-TV Detroit, WNBK Cleveland, WLTV Atlanta, WNBW Washington, D.C., KRON-TV San Francisco, WFIL-TV Philadelphia, WFBM-TV Indianapolis, WDSU-TV New Orleans, KPRC-TV Houston, WKRC-TV Cincinnati, and many, many more.

What is the name of the

MOVIE QUICK QUIZ

WLTV, ATLANTA . . . Telecast at 7:00 p.m. Rating 12.4. This equals the ratings of the other two Atlanta TV stations combined!

WNAC-TV, BOSTON . . . Telecast at 12:30-1:05 p.m. Rating 6.9. This is 4 times higher than the competing station in this market.

KPRC-TV, HOUSTON (half-hour show) Telecast at 10:00-10:30 a.m. (with different sponsors each day). Rating 10.8. This rating accomplished in 6 weeks. Outstanding for this time of day.

WDSU-TV, NEW ORLEANS . . . Telecast at 5:45 p.m. Rating 28.4. Highest rating of any strip show in this market.

WTAR-TV, NORFOLK, VIRGINIA . . . Telecast at 6:45 p.m. Rating is 36.0, which we believe to be the highest rating of any local 5-time-a-week show in America.

AFTER 40 WEEKS ON THE AIR:
"Movie Quick Quiz has gone over very well with the Colonial Store Managers in the five cities where we are using the program.

The client is very well pleased with Movie Quick Quiz. I am confident the advertiser will renew for another year after the present 52 weeks are up."

Pete Liller
LILLER NEAL & BATTLE ADV. AGENCY
Atlanta, Georgia
It's MOVIE QUICK QUIZ, a smash hit from San Francisco to Boston. Has the biggest sale of any syndicated quiz show; has the highest ratings of any syndicated multiple show in America.

MOVIE QUICK QUIZ is a fifteen-minute, five-time-a-week TV program that has terrific impact as a nighttime feature. But—here is a series that is priced low enough to be used with great effectiveness during the daytime hours.

WHY IS MOVIE QUICK QUIZ SO SUCCESSFUL? 1. Because it's backed up by fifteen years of radio—TV quiz know-how. 2. Because it has a sure-fire format that can't miss. 3. Because, and this is the biggest reason, it comes with clever "minute movies" which furnish clues to the questions asked by the M.C. These minute movies are not film clips or simple pantomimed clues. They are original, dramatic, filmed vignettes that are entertaining and intriguing in their own right, in addition to high-lighting clues for the "MQQ" questions. 4. MOVIE QUICK QUIZ is a quality program—everything that we furnish or that is part of the show has been developed and created particularly for this television program at great expense and time-consuming effort.

HERE'S HOW MOVIE QUICK QUIZ WORKS: An emcee phones out and asks a provocative question. Except in this case, there's a minute movie to illustrate the question. And for each succeeding call—there's a brand new minute movie and a brand new question. Sounds sort of simple and obvious, doesn't it? But you've got to see the pilot film to appreciate the know-how and the planning that has gone into MOVIE QUICK QUIZ.

"MQQ" is a most ingenious combination of quiz technique with TV eye appeal. We have a full year's library of 780 original minute movies now on hand, specially produced for "MQQ".

MERCHANDISING HOOK: We've got one that's sure-fire. One "MQQ" sponsor, with 17 stores, tabulated 50,000 people entered his places over a two-week period as a result of MOVIE QUICK QUIZ and over 90% then made purchases!

HERE'S WHAT YOU GET: We furnish all minute movies, questions and answers, special slides, film opening and close, operational instructions, the "works." You provide M.C. and awards. (We can help you on the awards if you ask us.) MOVIE QUICK QUIZ can be sponsored by local retail chain, local store, national advertiser, or used as a spot carrier by station.

LET'S ALL BE HAPPY! Buy MOVIE QUICK QUIZ. The sponsor will get terrific sales, the station will get a BIG rating, the advertising agency will be a hero, we will have another good order!

CREATORS OF TELLO-TEST
America's FIRST and most successful syndicated Radio Quiz Show
kw visual and a 720 ft. antenna, is not set, but national representative will be Weed Television. The station is assigned vhf Ch. 9.

Hugh O. Jones, president and general manager of WGCM-TV Gulfport, Miss., uf Ch. 56 grantee, said he was unable to predict a starting date but that he plans early construction of the station.

John W. Boler, president and general manager of KCJW-TV Minot, N.D., said the vhf Ch. 13 station will probably be on the air by June of this year. DuMont equipment has been ordered, he said. The station will operate with an ERP of 29.5 kw visual and antenna height of 420 ft. Mr. Boler is now in New York to determine network affiliation and to select the national representative.

Edgar Bell, a 4% stockholder of Permian Basin Television Co., vhf Ch. 2 grantee for Midland, Tex., said the Midland station would use RCA equipment. There is no definite word on the starting date, representative or network affiliation, he reported. The station was granted ERP of 50 kw visual with a 1,010 ft. antenna.

Meanwhile, it was announced the following stations will join the CBS-TV network:

KTVV (TV) Sioux City, Iowa, as a primary, supplementary noninterconnected affiliate, to join April 1. The station is assigned vhf Ch. 9.

WCTV (TV) Raleigh, N.C., as a primary, supplementary noninterconnected affiliate, to join CBS-TV March 15. Station will operate on vhf Ch. 28.

WHYN-TV Holyoke, Mass., as a primary, supplementary interconnected affiliate, assigned uhf Ch. 55, to join the network March 15.

KGUL-TV Galveston, Tex., as a basic, interconnected affiliate March 15. It will operate on vhf Ch. 11.

KTNT-TV Tacoma, Wash., assigned vhf Ch. 11, will be a basic, noninterconnected affiliate March 1.

John E. Pearson Television Inc. will handle national television sales for WOUE (TV) Chattanooga, Tenn., vhf Ch. 49; KSFA-TV Fort Smith, Ark., vhf Ch. 22; WHTV Johnson City, Tenn., vhf Ch. 11; KGKL-TV San Angelo, Tex., vhf Ch. 3, and WHIZ-TV Zanesville, Ohio, ufh Ch. 50.

(For complete list of grantees' target dates see THE RECORD, page 95.)

Details Are Presented On New WHAS-TV Output

WHAS-TV Louisville is operating with 316 kw visual power, having sextupled its output last week while shifting from Ch. 9 to Ch. 11.

The high power, described as tops in the TV field by Victor A. Sholis, vice president and director of WHAS-AM-TV, was achieved over a four-day period under direction of Orrin W. Towner, chief engineer.

When the channel shift was made Feb. 7 a hot spot developed in the transmitter. This limited the power increase temporarily to 250 kw. The trouble was solved Feb. 10 and since then the station has been operating with 316 kw.

High power was achieved by use of the 12-bay antenna installed in 1950. Equipment for the Feb. 7 power boost and channel shift arrived at Louisville last Jan. 16.

Mr. Towner cooperated with General Electric Co. in construction of an amplifier that would produce the increased power. He persuaded GE to modify its 20 kw equipment to turn out 28 kw. With the high-gain antenna, the signal output reached 316 kw.

Little opportunity was available for equipment tests, most of which were done on a water-cooled dummy antenna. Air testing involved re-tuning of all circuits to Ch. 11, followed by complete re-tuning to Ch. 9.

The power change means a considerable improvement in service, particularly to viewers some distance from the Louisville tower site, besides addition of the service area, it was stated.

Describing steps taken to adapt transmitting equipment, Mr. Towner said:

"The six-inch coaxial transmission line which we originally installed carries our higher power without replacement and with high efficiency. It was only necessary to replace approximately 30 feet of connecting 3/8-inch line to complete our preparations ..."

"We also installed a double stub tuner at the base of the antenna to take care of minor variations in the termination of our brand-band 12-bay antenna. This tuner required only a quick and minor adjustment ..."
Having trouble getting TV films approved?

Here's how many telecasters are licking the problem

Before any TV film show is "bought," it must be presented at the station...the advertising agency...or in the client's office. And sometimes all three places in one day.

Many telecasters have solved their "multiple showing" problems by furnishing their salesmen with Kodascope Pageant Sound Projectors. TV salesmen like the Pageant because it's easy to carry anywhere. They can set it up fast, thread it in a minute. Even well-worn audition films look and sound better with the Pageant's improved optical system and unique "focusing" sound system.

Best of all—servicing is no problem...for the Pageant is permanently lubricated, eliminating breakdowns from improper oiling. No other portable 16mm. sound projector has so many quality features. Yet, the Pageant lists at only $400.

You'll find you can get more TV film programs approved in more places...faster...when you use the Pageant. Let your Kodak Audio-Visual Dealer demonstrate it for you—or send the coupon for complete details.

Prices include Federal Tax where applicable and are subject to change without notice.

For audio equipment, smart broadcasters place their confidence in the Altec Lansing Corporation. Experience has shown that Altec equipment is always better; its quality unsurpassed; and its dependability beyond expectations. Altec equipment is designed to work together, without extra matching transformers or other expensive adaptations. Whether it is the new 601A Duplex monitor speaker or a complete speech input installation, you'll find Altec audio equipment will do the job better, longer, more economically.

250A Console. This beautiful master console represents a new quality standard for speech input equipment. Like all Altec consoles and mixers, its frequency response, noise level and low distortion more than meet the most stringent broadcast requirements. It is compact and completely self-contained, without external power supplies or junction boxes. All amplifiers and power supplies are precision-engineered miniature plug-in units.

Ask our distributor or write direct for complete information on any item of Altec audio equipment.

NCAA Names TV Committee To Work With Industry

Group will try to iron out wrinkles in the controlled TV plan.

MACHINERY for administering NCAA's controlled football telecast program in 1953 has been set in motion by the association's council with appointment of a TV committee headed by Walter Byers, executive director, who will serve as chairman pro tem.

The new committee, which will replace that dissolved during NCAA's recent convention in Washington, D. C., comprises these representatives: Dist. 1—Eugene Flynn, athletic director, Holy Cross U.; Dist. 2—Robert T. Kane, athletic director, Cornell U.; Dist. 3—Jeff Coleman, business manager, U. of Alabama; Dist. 4—H. O. Crisler, athletic director, U. of Michigan; Dist. 5—Reaves E. Peters, executive secretary, Big Seven Conference; Dist. 6—Howard Grubbs, Southern Conference; Dist. 7—E. W. Romney, commissioner, Mountain States Conference; Dist. 8—C. Harvey Cassill, athletic director, U. of Washington.

Of this group, Messrs. Coleman, Peters, Grubbs and Romney are holdover members. Representing smaller colleges are J. Shober Barr, athletic director, Franklin Marshall College, for eastern districts, and an undesignated member from Colorado School of Mines, western districts. Mr. Byers also was named member at large.

He announced that the TV committee will meet again in Chicago Feb. 23-24 to work out details of the controlled football TV plan and to appoint a television program director. After the plan is approved by referendum vote of the membership, the director will set up liaison with networks and sponsors. Permanent chairman and steering committee also will be chosen.

A two-thirds majority of the membership is needed to formalize the controlled football TV plan, which calls for a one-network contract covering one game per Saturday and one appearance per college. Some relaxation of NCAA policy on regional contests is anticipated [B+T, Jan. 12].

NCAA delegates met Feb. 6-8 to discuss general policy practices, including enforcement procedures for strengthening NCAA [At Deadline, Feb. 9]. The council also named two consultants or advisers for each district:

Dist. 1—Frank Thoms, Williams College; John P. Curley, Boston College; Dist. 2—Ralph Frey, Columbia U.; Ernest D. McCoy, Penn State; Dist. 3—Horace Renner, Tulane U.; C. M. Farrington, George Washington U.; Dist. 4—J. J. Krause, Notre Dame; K.L. (Tug) Wilson, commissioner, Big Ten Conference; Dist. 5—Blair Gullian, Washington U. of St. Louis; Louis Menze, Iowa State College; Dist. 6—J. F. McKale, U. of Arizona; D. X. Bible, U. of Texas; Dist. 7—Fort Collins; Howard Grubbs, Big Seven Conference; Dist. 8—W. O. Hunter, U. of Southern California; Al Masters, Stanford U.

WFBP Single Rates

A SECOND ABC affiliate will join that network's single-raters Sunday when the new rate card No. 20 of WFBP Baltimore becomes effective. A trend for affiliates was forecast when ABC's five owned stations became single-rate outlets and KXOK St. Louis, an affiliate, joined the single-raters [B+T, Feb. 2].

WFBP's one-time rates will be $200 per hour from 9 a.m. to 11 p.m., and $125 per hour for the station's other period on the air, 11 p.m. to 9 a.m.

KNBH Channel 4
Crosley Earnings Hit Peak Despite AM Slack

SALES and earnings of Crosley Broadcasting Corp., in 1952 surpassed those of the preceding year despite a slackening of radio revenues, the annual report of Avco Mfg. Corp., Crosley parent, showed last week.

Crosley owns and operates WLW and WLWT (TV) Cincinnati, WLWC (TV) Columbus, WLOD (TV) Dayton and WINS New York, and has bought WLTV (TV) Atlanta.

Income from television operations reached "new highs" in 1952, according to the report. "Although there has been an industry-wide decline in revenues from sound broadcasting, the company was able to maintain time sales on WLW at a much higher comparative level than those of radio broadcasting as a whole."

Despite NBC's move in October to give "substantial increased discounts to advertisers," Crosley's non-network revenue at WLW increased enough to virtually offset the network losses.

WINS New York, the company reports, maintained a position "comparable to last year."

Crosley TV set sales reached high summer levels, continuing strong the rest of the year. Crosley last November bought the television picture tube and miniature receiving tube facilities of Sarkes Tarzian Inc. at Batavia, Ill.

Avco Net Sales

Avco's consolidated net sales reached $326,858,641 in 1952 compared with $286,598,113 for the previous year. Consolidated net income amounted to $11,028,927—second largest in Avco history—as compared to $10,089,214 during 1951.

WSLM Ready for Operation

TWO months later than originally planned, WSLM Salem, Ind., was ready last week to go on the air with program tests. The station, which had its equipment stolen in December, has recovered it and asked FCC Thursday for permission to start operation. Don H. Martin, owner, had planned to put the 1220 kc daytime on the air before Christmas.

SUCCESS STORY

They Came for Miles . . . FOR MINKS

Gordon Furs has had swank salon in Davenport for past 3 years. Year ago, Gordon's tried limited TV promotion using spot announcements. Schedule showed such promise that, last fall, Gordon's took on bigger TV project. With a local jeweler, co-sponsored live WOC-TV program—"Candlelight Cameos"—9:45 Tuesday nights.

On one program featured mink; by closing time Saturday of same week HAD SOLD 7 MINK WRAPS—ranging from stoles to jackets; average sale, more than $1000. Another week, beaver got the spotlight; SOLD 3 WITHIN 4 DAYS AFTER TELEVISED; average sale more than $1700. All sales traceable to WOC-TV.

Says firm head Jake Gordon: "During 13 weeks, 'Candlelight Cameos' helped us sell more mink wraps than I had anticipated selling in next 3 years. It also greatly expanded our trade area. For example, one Wednesday, lady came from Galesburg, Illinois, 48 miles away, to buy her daughter Ranch Mink Cape Jacket shown on previous night's program. Friday of same week, this lady was back, at her husband's insistence, to buy mink wrap for herself."

Minks or motor cars ... crackers or candy bars—you name it and WOC-TV SELLS it. Just ask your nearest F & F Man about our recent stories; he's got a million of them (well, almost a million)!

B. S. Co-sponsor of "Candlelight Cameos"—Schneff Brothers jewelers—has adopted a "Mary's doesn't sell Gimbel's" policy relative to sales returns from this program. But it is significant that Schneff's with Gordon's have signed a 30-week renewal of this program.

Wheelahan to Leave WSMB

For Own Radio Interests

Harold M. Wheelahan, general manager and vice president of WSMB-AM-FM New Orleans, has resigned effective March 1 to devote full time to his private interests in radio, including his vice presidency and co-ownership of KSYL Alexandria, La.

Mr. Wheelahan will be succeeded on that date by John R. O'Mearle, who has been sales manager of WTFS New Orleans.

The resignation was announced last week by Gaston J. Dureau Jr., president of WSMB Inc. Mr. Wheelahan, a veteran of 24 years at WSMB, until recently was a board member of NARTB. He will continue to serve WSMB in an advisory capacity, Mr. Dureau said.

He said Mr. Wheelahan is credited with introducing radio to many New Orleans homes and was first to present over the air such personalities as Dorothy Lamour, the Boswell Sisters, Margaret Viegas and Jerry Cooper. He will continue to live in New Orleans.

$5,000 to N. C. Educational TV

Larry Walker, general manager, WBT-WBTIV (TV) Charlotte, N. C., has announced $5,000 has been granted by the Jefferson Standard Foundation to North Carolina Gov. William Umstead's Advisory Commission on Educational Radio and TV. The contribution is for research in developing North Carolina's eight channels reserved for educational TV.

The Jefferson Standard Foundation was established by the Jefferson Standard Broadcasting Co. to provide funds for charitable and educational purposes. Mr. Walker, vice president and secretary-treasurer of Jefferson Standard Broadcasting Co., is chairman of the Advisory Commission's subcommittee in Charlotte.
It's the only large-hub reel of tape with no loss in output!

The new thinner Dry Lubricated tape furnished with the "Scotch" Brand 7-inch professional reel is the only tape wound on a large-hub reel with output equal to "Scotch" Brand 111-A, the acknowledged standard of the recording industry.

You need both the new "Scotch" Brand large-hub reel and "Scotch" Brand Dry Lubricated Tape to enjoy trouble-free recording...reduced timing errors, freedom from pitch and level changes, and superior signal-to-noise ratio.

You can't beat this team for flawless recording!

"SCOTCH" Brand 7-inch professional reel
- New larger hub measures 2 3/4" compared to the 1 3/4" of standard reels.
- Single threading slot minimizes distortion of lower tape layers.

"SCOTCH" Brand Dry Lubricated Tape
- Eliminates sticking, squealing, cupping.
- Unaffected by humidity—does a top-notch job even in tropical climates!
- All "Scotch" Brand Magnetic Tape is guaranteed 100% splice-free (up to 2400-foot reels)

See your distributor for a supply of 7" professional reels and new Dry Lubricated Tape!
Lane Named President Of Crosley's WLTV (TV)

WILLIAM T. LANE was elected president of Broadcasting Inc., operator of WLTV (TV) Atlanta, last week by James D. Shouse and Robert E. Dunville, board chairman and executive committee board chairman, respectively.

Mr. Shouse is chairman of the board and Mr. Dunville president of Crosley Broadcasting Corp., operator of WLW and WLWT (TV) Cincinnati, WLWC (TV) Columbus and WLWD Dayton and WINS New York.

Mr. Lane's election came at the same time as the formal acquisition of WLTV (TV) by Crosley Broadcasting. Purchase had already been approved by the FCC. Sales price, including 100% of capital stock, was $1.5 million.

Plans for the Atlanta station were outlined last week by Mr. Lane, former WLTV Atlanta general manager. He said details of a million dollar expansion program would be disclosed within the next three months. Station also plans to increase its 23.8 visual ERP to full 316 kw.

KFEQ Marks 30th Year

SPECIAL anniversary programs will be aired this week at KFEQ St. Joseph, Mo., which is marking its 30th year on the air. The station's original license, issued Feb. 16, 1923, by the Bureau of Navigation of the Dept. of Commerce, was titled "License for Land Radio Station."

Television studios are being constructed for KFEQ-TV, expected to take the air this spring on Ch. 2. Barton Pitts is president of KFEQ. Inc. Other officers: Henry Bradley, vice president; Glenn Griswold, treasurer, and J. Ted Branson, secretary.

We've got 'em

EATING OUT OF OUR HAND

—Kansas farmer families, that is! Study these last minute figures from a statewide survey. *

For market reports, farm news and weather, WIBW ranked FIRST—129% ahead of its nearest competitor.

In statewide share of audience, WIBW stood FIRST—132% ahead of the second station.

Among Kansas stations listened to most, WIBW was FIRST—151% higher than the "place station."

There's no need to sell you on the potential of the rich Kansas farm market . . . no further need to sell you on WIBW's domination of these families. So—why not let us start selling for you!

Red Cross Blueprints Fund Broadcast Plans

REPRESENTATIVES of stations, networks and trade publications attended a 1953 Red Cross fund campaign luncheon at the Waldorf-Astoria, New York, Tuesday, to hear a report by James Sauter, chairman of the radio-TV bureau.

Outlining the national RC quota of $93 million and the Greater New York goal of $7 million, he said the drive will be launched March 1 with an all-star program which radio and TV networks will carry at different hours.

Four quarter-hour recorded programs with Jack Benny, Bob Hope, Phil Harris, Alice Faye and Bing Crosby will be available to radio stations, along with spot announcements. A 13-minute film with John Daly as narrator giving a dramatic report of Red Cross activity will be available to television stations.

Blain to TV Sales Post

EWART M. BLAIN, former CBS-TV sales account executive, has been named director of television sales for WEEU-TV Reading, Pa., Thomas E. Martin, general manager of WEEU-AM-TV, announced last week. Veteran of 20 years in broadcast sales, Mr. Blain was with Free & Peters, station representatives, as account executive in New York for 11 years. WEEU-TV, now under construction, is expected to take the air March 1 on uhf Ch. 33 as an NBC affiliate.

Jacob E. Edelstein Dies

JACOB E. EDELSTEIN, 75, vice president and director of The Outlet Co., licensee of WIAR-AM-FM-TV Providence, died last Wednesday. He had been associated with the company more than 50 years and as its publicity director, was in charge of newspaper advertising and publicity for the stations. Survivors are a brother and two sisters, all of New York.

WAPO to Affiliate With ABC

WAPO Chattanooga has signed an affiliation contract with ABC, effective April 7, Raymond G. Patterson, president and general manager, said last week. The station announced its network affiliation change upon the merger of ABC and United Paramount Theatres. WAPO presently is affiliated with NBC. WDEF Chattanooga will in turn become the NBC affiliate in that city, also on April 7 (B*W, Jan. 26), ending its present ABC affiliation.

KGUL-TV Names CBS TV Spot

KGUL-TV Galveston, Tex., has appointed CBS Television Spot Sales as its representative, effective immediately, it was announced jointly last week by Paul E. Taf, general manager of the station, and Sam Cook Digges, general sales manager of CBS TV Spot Sales. KGUL, slated to commence operations in late March, is assigned Ch. 11 and will be a basic affiliate of CBS-TV.

Broadcasting • Telecasting
You've always needed it—for low-cost, professional-quality TV commercials—and here it is! Gray Research, maker of Telop, Telop II and other specialized TV equipment, proudly announces the new Gray TELOJECTOR. This compact, portable unit gives you remote control projection of standard 2x2 slides in uninterrupted sequence... with studio effects of fading, lapping and superimposition.

In the TELOJECTOR, projection alternates between two lens systems. Two loaded slide turrets give you a sequence of twelve slides. Additional loaded turrets can be substituted in seconds, providing an unlimited sequence. Overall dimensions: 14½" x 18½" x 16". Weight: 32 pounds.

This new Gray TELOJECTOR solves many problems for large and small stations alike. Production is underway. Get all the facts—now!

Please write for TELOJECTOR Bulletin RD-2

AND DEVELOPMENT CO., INC., HILLIARD STREET, MANCHESTER, CONN.
Division of The GRAY MANUFACTURING COMPANY—Originators of the Gray Telephone Pay Station and the Gray Audograph and PhonAudograph
Three Sponsors Share '53 Radio-TV of A's, Phillies

THREE sponsors will share the 1953 radio-TV baseball schedules of the Philadelphia Phillies and Athletics, according to N. W. Ayer & Son, that city. Telecasts will include both home opening day games, both games of all Sunday doubleheaders, all Saturday afternoon games and the first games of all holiday doubleheaders from Shibe Park. A limited series of night telecasts is being arranged. No night telecasts were carried last year and only the first game of doubleheaders.

WFIL-TV, WFTZ (TV) and WCAU-TV, as in 1952, will rotate the schedule.

The radio schedule will be similar to that in 1952, including all Shibe Park games of both teams and road games not conflicting with home contests. WIBG will carry this program along with a four-state hookup.

Sponsors are Atlantic Refining Co., Chesterfields and Valley Forge beer. Gene Kelly and George Walsh will announce Phillies games while Byrum Saam and Claude Haring will cover the Athletics. Messrs. Kelly and Saam will accompany the clubs on road trips.

Oleson to Head WEAM

GEORGE OLESON, sales executive at WOL-AM-FM Washington, has been appointed general manager of WEAM Arlington, Va., Harold Thoms, WEAM president, said last week. Mr. Oleson, who was with WEAM from September 1949 to June 1952, will assume his new duties by Feb. 23, Mr. Thoms said. He replaces Howard Stanley, WEAM general and sales manager for the past five years, who has resigned.

WWJ Promotes DeGroot

DON DEGROOT, station manager of WWJ-AM-FM Detroit, has been appointed assistant general manager of WWJ-AM-FM-TV, Edwin K. Wheeler, stations general manager, said last week. Mr. DeGroot's appointment came after Willard Walbridge resigned as television station manager to join WJIM Lansing, Mich. [B-T, Feb. 9]. Thomas Warner, a member of the sales staff, has been named radio sales manager, Mr. Wheeler said.

Staff Changes at Lee

LEE STATIONS has effected several personnel changes at KGLO Mason City, Iowa, and WTAD Quincy, Ill., Herbert R. Ohr, executive vice president, reported last week.

Lloyd Loers, sales manager of WTAD for two and one-half years, transfers to KGLO in the same capacity, replacing C. D. Hilton, who has resigned to enter another business. Doug Sherwin has been named assistant program director at KGLO.

Mr. Loers' work at WTAD has been taken over by John R. DeBow, named local sales manager by Walter Rothschild, station manager. John Phillips is handling sales there fulltime, and Ralph Drescher has been added to the sales force.

Akerberg Assigned Fulltime on CBS-TV Stations Relations

INDICATING the widening scope of network station relations activity as more and more TV stations are licensed, Herbert V. Akerberg, who has been station relations vice president for both CBS Radio and CBS-TV, last week was assigned to concentrate fulltime on CBS-TV.

Announcing Thursday that Mr. Akerberg would serve as fulltime CBS-TV vice president for station relations, J. L. Van Volkenburg, network president, said "it will now be possible for Mr. Akerberg to take a more active part in the planning and management group activities of the CBS-TV Division." He said Clarke (Fritz) Snyder would continue as CBS-TV director of station relations.

Mr. Akerberg's "successor" at CBS Radio was not announced immediately. William A. Schadt Jr. is CBS Radio's national director of station relations.

Mr. Akerberg joined CBS in 1929 as an engineer, and later became chief engineer and research and development engineer. He has been station relations vice president since 1936. Before he went to CBS, he built WPAL Columbus, Ohio, in 1923 and operated it until 1926.

New Garroway Contract

DAVE GARROWAY, star of NBC-TV's early-morning Today program (Mon.-Fri., 7-9 a.m. EST and CST), has been signed to a new contract covering his participation on the program during 1953 plus guest appearances on other NBC shows. Contract also includes an option on his services beyond 1953.

NBC-AM-TV Makes Further Staff Realignment

NBC Vice President Herbert announces new shuffling at the staff level in three departments.

REALIGNMENT of NBC's research and planning, advertising and promotion, and development departments on a staff level, reporting directly to network management, was announced Wednesday by John K. Herbert, vice president in charge of networks.

Changes are effective immediately. Mr. Herbert said Hugh M. Beville Jr., director of research and planning, will report to him on all research activities on behalf of NBC's radio and TV networks. Jacob A. Evans, director of advertising and promotion, and Robert W. McFadyen, director of sales development, will report to the administrative sales manager, Walter D. Scott. Stephen A. Flynn, manager of sales service, also will report to Mr. Scott.

This new organizational structure, according to Mr. Herbert, follows the resignation of Rudnick C. Lawrence, director of promotion, planning and development, to whom department heads formerly were responsible.

Commenting on the change, Mr. Herbert said:

"The establishment of the research and planning department as a staff function reporting directly to network management reflects the importance of this activity in the development of our plans and policies for serving our advertisers and their agencies, our affiliated radio and TV stations and our listening and viewing audiences.

"The sales development group under Mr. McFadyen will work directly with the network sales staff and will assist our sales unit in all problems of sales development in both radio and television. By bringing the sales development function and our advertising and promotion department within the structure of the sales department, we feel that we can strengthen and supplement our sales operation and increase the value of our services to our advertisers and their agencies."

As the newly-appointed manager of sales services, Mr. Flynn succeeds Frank Reed, who has resigned.

C. R. Abry Named ABC-TV National Sales Manager

CHARLES R. (CHICK) ABRY has been appointed national sales manager for ABC-TV following resignation of Edwin S. Friendly Jr., who has joined Barry & Enright Productions, radio-TV packaging firm, which will be known as Barry, Enright & Friendly.

Mr. Abry joined ABC-TV in June 1951 as an account executive. Since November 1952, he has served as ABC-TV's eastern sales manager. He previously was a network sales agent.

Joining ABC-TV as a salesman three years ago, Mr. Friendly became eastern sales manager, and was national sales director at the time of his resignation last week. Several weeks ago, he was relieved of all administrative duties—at his own request—to concentrate on sales, at which time Mr. Abry was designated to take over the administrative functions [B-T, Feb. 2].

J. Glen Taylor Elected To MBS Vice Presidency

J. GLEN TAYLOR, a vice president of General Teleradio Inc., radio-TV subsidiary of General Tire & Rubber Co., has been named a vice president of Mutual, whose stock is controlled by General Teleradio, Mutual President and Board Chairman Thomas F. O'Neil announced last week.

Mr. Taylor, who also is on the MBS board, will concentrate on Mutual network interests and other owned-and-operated properties of General Teleradio, which include the Don Lee and Yankee Networks and WOR-AM-FM-TV New York in addition to majority stock of Mutual.

Naming of Mr. Taylor as a Mutual vice president followed the resignation of William H. Fineshriber Jr., executive vice president, to become vice president and general manager of the radio and TV networks of NBC [B-T, Feb. 9].

CBS Dividend Declared

CBS Inc. board of directors Wednesday declared a cash dividend of $0.40 per share on class A and class B stock, payable on March 6 to stockholders of record at the close of business Feb. 26.

More advertisers place their confidence in WOR than in any other station in the country.

And with good reason...

WOR PERSONALITIES HAVE EARNED THE CONFIDENCE OF THE LARGEST STATION AUDIENCE IN AMERICA—26,000,000 PEOPLE IN 14 STATES!

WOR SELLS—EVERYTHING FROM BREAD TO BIRD SEED—IN THE WORLD'S MOST COMPETITIVE MARKET.

That's why more advertisers worry less—with WOR.

Let us show how WOR can translate listener confidence into solid sales success for you.
GE Speedup on Klystron Tubes Expect 20 Per Month

PRODUCTION of new 15 kw Klystron uhf transmitting tubes by General Electric Co. and Varian Assocs. of San Carlos, Calif. (which developed the Klystron to GE specifications), is expected to reach 20 per month before the end of the year, a GE spokesman said last week.

Without giving details, he said present production is considerably below that figure, and that all 15 kw Klystron production scheduled through September, and part of the October to December production quota, already has been committed. GE is leasing tubes to telecasters at a fixed rate per broadcast hour (F.B.H., Feb. 9). WHUM-TV Reading is among stations participating in the lease arrangement.

Zenith Sales at New High

SALES of Zenith Radio Corp., Chicago, in January were the highest for that month in the company’s history, Comdr. E. F. McDonald Jr., president, reported last Tuesday.

Zenith also attained the “highest level of production and sales in its history” during the year ended Dec. 31, 1952, with consolidated sales reaching $137,462,000, Comdr. McDonald reported, predicting production and sales in the first quarter of 1953 “will establish a new record for this particular period of a year.”

DuMont Tube Sales Mark New Record in January

NEW records were established during January production of television picture tubes by the cathode-ray tube division of Allen B. DuMont Labs., F. P. Rice, division manager, announced Wednesday.

DuMont’s TV picture tube output in January was 231% over January 1952; 31% over January 1951, and 57% over January 1950. Mr. Rice added that the last quarter of 1952 was the division’s best, volume-wise, when production was 271% over December 1951.

FCC Gets Union Complaint

“CENSORSHIP” charges have been made by United Electrical, Radio & Machine Workers of America against WOC-TV Davenport, Ia., and WHBF-TV Rock Island, Ill., alleging in a letter to the FCC that the stations cancelled contracts to show a Quaker film on Christmas Day.

The film was titled “A Time for Greatness.” The stations told the union they refused to accept the film because it was controversial and at variance with program policies.

In a public memorandum, the union described the refusals as “gross” censorship of a film that District Council 8 in the Quad Cities had planned to sponsor as a public service. The union added that the suppression was not directed at it but at the specific film. Further evidence will be submitted to the FCC, according to Russ Nixon, UE Washington representative. At the FCC it was stated that WOC-TV and WHBF-TV had been informed of the charges and had been asked to file comments.
ADVERTISING COSTS UP?

**Take typography, for example.** It now takes $184 to buy composition that cost $100 in 1942. But for an advertising value that today is better than ever, there's radio... the medium that's now delivering the biggest audience in history at a cost only slightly more than that of ten years ago!

**Take WBZ, for example.** It now takes only $125 to buy a result-producing participation package that cost $100 in 1942. And the audience has increased much faster than the slight rise in time cost, throughout the vast New England territory dominated by WBZ's 50,000-watt voice!

In six of the most important market-areas in the country, Westinghouse stations offer exceptional values in advertising coverage. Free & Peters will help you pick the times that pay the best return for your business!
WHUM-TV's Helical Antenna Passes Tests

Antenna for Nation's Highest Power UHF Station Passes Exhaustive Operations Exam at Electronics Park

The transmitting antenna for the nation’s most powerful UHF television outlet—WHUM-TV in Reading, Pa.—was put through its paces recently by G-E test men at Electronics Park.

The orange-colored antenna was lying on its side atop a hydraulic lift—the type you see is jacked up on when the oil is being changed. Some 1800 feet away, a microwave “dish” pointed its concave eye at the hoisted antenna and supplied a power beam.

Salvatore Savastano of C and GE Test squinted through a surveyor's transit set at the center of the hydraulic lift. He centered the glass of his instrument on a piece of red tape fixed in the center of the distant microwave “dish”, then made a reading of the degrees and minutes of the angle.

INTER-COM SYSTEM HELPS

Savastano announced his findings into an inter-con system. Inside a warm little room located about 50 feet away, Test Foreman Zeke Armin and Ronnie Fisk, a UHF antenna engineer, were recording the results.

Savastano, assisted by test man Bob Estes, were told to shove the big lift to another horizontal angle. They made reading after reading.

FIGURES FORM GRAPH

Meanwhile, the figures found by the transit began to shape into a graph—smacking up and down on the chart being made in the tiny hut. What the engineers call a “power pattern” was beginning to form. This allows them to measure the power gain of UHF antennas.

A TV station ordering an antenna is interested in specific power gains and “beam tilts” for the steel transmitting finger to be poked into the heavens. The test men at the hydraulic lift-antenna-“dish” setup are learning if the specifications are being met.

C and GE's Leon DeFoé of Test Design came up with the idea of seating the antennas being tested on the hydraulic lift. It enables easy manipulation in swiveling the antennas to various angles.

WHUM-TV's five-bay antenna will come to rest atop a 1,000-foot tower to transmit the nation's most powerful UHF beams.

Springfield TV Station WWLP Wages War on Antenna Towers Plummeting Ice

During and after a recent snow and ice storm, Springfield television Station WWLP—being constructed—was “under attack” by plummeting ice from the antenna tower. Chunks and icicles as long as 6 ft. and as wide as 3 inches fell on the transmitter building's roof.

Several times the sturdy roof was punctured. Serious damage was averted by makeshift roof reinforcements. But before the storm had ended, William L. Putnam, treasurer of Station WWLP, and his staff devised a plan to put a false roof on top of the building.

They intended to put removable two-by-fours on the roof over which they would weld 12 gauge wire mesh—this layer of wiring to break and scatter the ice when it hits, reducing chances of damage to building.

However, instead, with what Station WWLP calls “Yankee ingenuity”, it is developing the first known “antenna tower defroster”. The device consists largely of resistance cable, wrapped around the uprights of the tower. Starting at a point some 40 ft. from the ground, this cable will follow the uprights to the very top of the tower structure.

Automatically operated, the new—and as yet unnamed, unpatented—device will go on and off as soon as the temperature and humidity shall reach a certain level.

Treasurer Putnam says: “As soon as this device is installed WWLP will have racked up for itself another 'first' . Its most important 'first' will be going on the air as Springfield's first TV station—an all General Electric equipped UHF outlet.”

Peoria's WEEK-TV Receives G-E UHF Transmitter

Station WEEK-TV, Peoria, Ill., recently received a UHF Transmitter, the second UHF unit to be shipped by G.E. It operates at lower power (100 watts). A special antenna was delivered by G.E. on January 23rd to boost effective radiated power many times and put WEEK-TV on the air Feb. 1.

The station has ordered a $2,000-watt amplifier from G.E. Installation will boost effective power to about 175,000 watts, with a coverage aim of 40 miles or more.

C.B.Akers, partner in WEEK-TV, explained: although the station is a basic NBC affiliate it will also carry programs of the DuMont and CBS television networks. All programs at the start will be either on film or originate in WEEK-TV's own studio. Akers expects the station to be tied into the network wide TV network by May.
By Frank Healey

AS FAR as we in the tape recording field are concerned, this is the "Electronic Age"—and we will continue to act accordingly, at least until we are commercially displaced by the "Atomic Age."

Electronics provided a fascinating challenge to scientists during and since World War II. Our initial foray into the field began here at Bing Crosby Enterprises Inc. shortly after that war, in the development of tape recording equipment for radio and recorders. This was in conjunction with Ampex Electric Corp. whose tape recorders are now standard equipment for leading radio stations, recording studios and many government agencies, including guided missile developments.

We at Bing Crosby Enterprises, however, felt that more was to be developed from this newest wonder of our day. The next natural step was to achieve magnetic recording of live TV on tape.

Under leadership of our chief engineer, John T. Mullin, practical video tape recording has been accomplished after only three years of research and experiments.

The first VTR (Video Tape Recorder) unit was demonstrated in late 1951 in our Hollywood laboratories at 9030 Sunset Blvd., Hollywood. This unit was sufficiently advanced in degree of picture production during last year to insure the manufacture of recording and playback equipment capable of answering every quality demand of the television and motion-picture industries. It may safely be declared now that such a commercial unit will be available within a year, despite predictions that success would not be achieved for five or ten years.

In addition, no problem is anticipated in handling color when it is introduced to the TV industry. Tests indicate that VTR will be readily adaptable to any of the color systems now being considered.

Electronics Staff

Working under Mr. Mullin's supervision are Wayne R. Johnson, TV project engineer of BCE, his assistant, Edward J. Corey, and a highly skilled staff of electronics experts who include Dean DeMoss, Chester Shaw, Eugene Brown and Robert Phillips.

Without dwelling in detail on the technical phases of the development or describing the highly involved circuit pattern of our recorder, we can reveal, for the first time, the general specifications of our recorder and how it operates.

In physical appearance it is similar to the tape sound recorder with which everyone in the radio-TV industry is familiar. To achieve a sound-picture tape outwardly appears as simple as the recording of sound alone on tape.

This is the way a VTR functions:

A one-inch tape, similar in outward appearance to that now employed on commercial tape recorders, is used. Sound recorders run at 15 inches per second. Our recording speed for video is 100 inches per second. This may seem excessive by contrast, but is not. The secret is that our engineers have demonstrated the ability to record 260 times the "information" that has heretofore been possible to capture under any tape system now in general use. Therefore, a non-bulky roll adequately provides for recording a 15-minute program. In "scanning" the video picture to our tape, we record on 12 tracks—one for sound and 11 others for picture.

Tape in present use is made by Minnesota Mining & Manufacturing Co. It is composed of an acetate base material coated with a special magnetic oxide. A new base will shortly be produced by this company. It will be known as "Mylar," a development of duPont. Although thinner, it will be a stronger tape. In preparation also is a half-inch tape of thinner stock which will assimilate all the electronic pulses now recorded on our one-inch tape.

In a typical operation, the sound and

The old groaner will be able to croon a happy tune if the Video Tape Recorder turns out as well as promised. Here the chairman of the board of Bing Crosby Enterprises Inc. (extreme right) is brought up to date on VTR technical development by (l to r) John T. Mullin, chief engineer; Frank Healey, electronics division executive director and author of this article, and Wayne R. Johnson, TV project engineer.
Why Do 200,000 of them like Wrestling?

Why do they like wrestling? A big part of the answer is in the skill of WCCO-TV sports announcers who (a) know the sport (b) know the viewers needs and tastes and (c) talk just enough—authoritatively, on what is going on in the ring.

It takes skill and experience to do good sports reporting ... like the skill and 15 years experience of Rollie Johnson, Sports Director, in covering Northwest sports. And his staff know their jobs ... from ringside to camera to transmitter to Northwest homes ... the job is done right ... on WCCO-TV.

---

RADIO...830 kc...50 kw and TELEVISION...ch 4...100 kw
For dominant coverage of the Northwest Market
picture to be recorded on magnetic tape are picked up in a studio by the normal video procedure of the TV camera and microphone. Through the camera and sound equipment, an electrical signal is transferred by coaxial cable to the recorder. The machine may be on the stage where the picture is made, in a sound truck, elsewhere in the studio, or at a laboratory some miles distant, or even across-country. The picture transmission over such remote distances suffers no more loss in fidelity than that incurred in present micro-wave movement.

The recording action is truly push-button. The operator has only to press a "start" signal and the "recording" button and the tape travels through recording heads just as it does in a sound-tape recorder.

Quick Playback

The recording is taken instantly, but by inclusion of a built-in playback device or "monitor" the taped picture and sound may be inspected visibly and audibly only one-tenth of a second later on this close-at-hand viewer.

Here is one of the many tremendous advantages of the system. An immediate view of an originating production is made available. There is no delay of processing, such as is necessary in motion picture filming. Thus the program producer or supervisor, in the case of a TV production, may be immediately assured that the recorded program is without flaws. Eliminated are tape re-winding, later inspection on playback and such delays as viewing the "rushes" on the following day.

It is conceivable that a director or producer sitting in his Hollywood office, might supervise production of a play at Rockefeller Center in New York, as efficiently as though he were present on stage there.

He could take and retake scenes, without intermittent delay, to suit the demands of his personal taste and assure himself of immediate satisfaction with program quality. Editing and timing would be merely a matter of a watch, a pair of scissors and some Scotch tape.

The program, now having been taped for later telecast needs only to be passed through the VTR. The playback machine which previously was the recorder, now "ready" back to the audience that which was recorded, recreating identically that which the video camera saw, the microphone heard, without loss in any respect either in quality of sound or picture. This picture and sound may be fed to the TV transmitter or even simultaneously distributed, via coaxial cable or micro-wave, to other areas.

One of the greatest advantages of VTR, as we have developed it, is the cost comparison. Our device will record for $50 the 15-minute 35 mm hot kinescope that now costs some $150 to produce. A regular 30-minute kinescope negative and one positive on 16 mm film now cost some $600 to produce. The Crosby VTR promises a quality picture and virtual permanence for $100, with additional dupes at the same price in any quantity desired without loss of fidelity.

The magnetic tape, of course, is erasable. Thus, not only are substantial savings in material costs achieved, but promise is made that costly delays in laboratory processing are eliminated. It is obvious that the many headaches and hazards of delayed telecasts will be a thing of the past. VTR equipment is also about half the size of kinescope equipment, therefore more portable.

In summary, some of the advantages to be enjoyed through taped television are:

Tape may be de-magnetized and re-used, thus effecting savings in material costs. Fades, dissolves and special effects may be recorded from the TV screen without use of optical printers or special-effects equipment. Since sound recording is coincident with that of picture, the dubbing process is eliminated. VTR tape will cost one-fourth to one-tenth less than motion picture film. The one-tenth of a second viewing after filming of results through the monitor will result in time and material savings since errors may be immediately detected and corrected.

Guesswork as to quality of scenes, whether in lighting, dialogue, action, camera work and other production aspects is eliminated. Thus, any defects are immediately visible to the VTR producer since he views the end result of his production at a split second after it is recorded.

Additionally, inserts in previously recorded programs may be easily made; scripts may be given even greater elasticity both for time and material, and production may proceed without excessive materials used.

Where film production may have proved costly, tape recording of TV shows will be comparatively simple and inexpensive. Actors will have the opportunity to participate in other activities or enjoy prolonged holidays. And their work before the tape recording camera will be accomplished under less strain, since their director will have an immediate view of their work as it will be seen by the audience. He will be able immediately to determine the quality of the scene and make the retakes where necessary without fear of "burning up film."

Finally, with both sound and picture side by side on the tape, editing is quickly and easily effected, with a single operation removing the undesirable material.

These glowing promises of great savings in production costs naturally give rise to one final question. What will the Crosby VTR cost?

A complete unit with recording and playback will sell for approximately $50,000 according to present estimates. It is contemplated that production of these machines will be under license to Ampex Electric Corp. Whether the machines will be sold or leased to TV stations, networks and motion picture studios is yet to be determined. Present progress indicates that the machines will be available by January of next year.

ABOUT THE AUTHOR

MR. HEALEY has been executive director of the electronics division of Bing Crosby Enterprises Inc. since early 1951. He received his electronics indoctrination while serving as a lieutenant-colonel in the Air Force during World War II. After the war he headed his own Hollywood radio-TV production company for four years, gave it up to join the Crosby company. Before the war he was RKO Radio Pictures director of radio-TV and before that was in the publicity and program departments of NBC, New York, for several years.

February 16, 1953 • Page 79
HOW TO SET YOUR

The musical commercial has become a standard advertising technique. Like all other techniques, it must be carefully planned and skillfully created. Here an expert tells how some of the most successful jingles have been prepared.

BEFORE attempting to analyze and detail the makeup of an effective musical commercial, it might be wiser first to define what an effective musical commercial is. It is a musical device that acts as a three-way stimulant to sales; first, by sales impact of performance; second, by sales impression created; and last, by the over-ride, or bonus impression, that accrues to a sponsor every time someone whistles, hums, or sings the tune thereafter.

In short, an effective musical commercial should sing sales, and more sales are usually sung when a musical commercial is conceived—not as an afterthought—but as an integral part of planned advertising strategy for all media, as, for example, Lucky Strike's "Be Happy! Go Lucky!", Falstaff Beer's "Sing Out for Falstaff!", Chesterfield's "Sound Off!", Genesee Brewing's "More People Like Genesee!"

Masts in Musicals

For a musical commercial to be effective, it must command attention; it must establish emotional acceptance; it must get over the sales message; it must have high remembrance value; it must have musical individuality, and it must sing! The first three "musts" are the basic elements of impact. The latter three "musts" are the basic elements of impression.

In order to achieve these "musts," an effective musical commercial should have the following characteristics: The first is a device to command attention, which may utilize either instrumental effects (bagpipes, drums, whistles, bells, etc.); mechanical effects (echo, filter, Sonovox, etc.); vocal effects (whispers, yodels, chorals, etc.); or word devices ("Stop—Whatever you're doing!").

The second characteristic involves the emotional acceptance factors, which are: Class, type, and age group of potential buyer; product characteristics and appeal; program association (sporting event, dramatic show, newscast, etc.), and medium use—radio, television, or both.

The factors involved in the third characteristic that puts the sales message across are: Name of product, basic message, facts, advantages, and bid for action. The high remembrance value, which is the fourth characteristic, may be built on a product's unusual or distinguishing features, as, for example, new discovery ("No Rinse Surf") or exciting action or result ("Zest").

Or, perhaps, high remembrance value may be found in trademark characterization like Goebel Beer's "Brewster, the Goebel Rooster," or product characterization illustrated by "Chiquita Banana," or the title gimmick method, "Hey, Mabel—Black Label!" used by Carling's Black Label Beer.

The Gimmick

Or high remembrance value may be achieved through a musical gimmick, which may be either descriptive of action, typified by Ajax's "Foams the dirt right down the drain—Bu-bu-bu-bu-bum," or descriptive of result as Johnson's Wax's "Makes Your Floor Shine, Shine, Shine—Shine!"

Another illustration of the high remembrance characteristic is the musical trademark for Tide that opens with an ascending musical note, vocally picked up with "Tide's In!" and followed by a descending musical note and the vocal climax, "Tide's Out!"

The fifth characteristic centers around musical individuality. To realize this, it is necessary to establish a musical association in character with the product. It is also necessary to establish a theme that is recognizable even without lyrics. And for quick identification use, it is also necessary to individualize several notes or short phrases.

The final characteristic is that an effective musical commercial sings! And it sings when the lyrics, rhymes, rhythm and tune are good, when it is novel enough to be catchy, interesting enough to wear well, and simple enough for everyone to sing.

In writing musical commercials, a ques-
SALES TALK TO

By Phil Davis

ABOUT THE AUTHOR: Phil Davis Musical Enterprises Inc. is one of the leading producers of musical commercials for radio and TV. Among accounts for which Mr. Davis and company have created jingles are Zest, Falstaff Beer, Hudson Paper Napkins, Goebel Beer, Camay, No-Rinse Surf, Genesee Beer, Crisco, Bab-O, Dodge, Carling’s Black Label Beer and Johnson’s Wax. Mr. Davis is a veteran broadcast musician, was musical director of WLW Cincinnati for 12 years, has led orchestras on many NBC and MBS programs.

The medium itself dictates "shift ease" points, story, lyrics built to emphasize the tempo, sense and character of the product and not the whole. Adjectives, however, tend to weaken a sales message, for they describe only one characteristic of a product and not the whole.

Verbs and verbal derivatives (the "Do" words) are hard-hitting, for they tell the listener to use the product, taste the product, try the product, or what the product will do if he buys the product. To say a product is something like or something ignores one of the primary interests of man—self-interest!

It's for this reason that the second person "You" appeal has more force than the first person "I" or third person "He" appeals that are not aimed at the ego, or the self-interest that motivates the majority of us.

Keeping the listener's self-interest in the forefront provides the key, in the majority of instances, to a musical commercial's basic copy theme. What does the product do? What has the listener to gain by buying and using the product? In illustration, let's take the lyrics of Johnson's Wax musical commercial for Hard Gloss Glo-Coat that tells the listener:

"Glo-Coat! Use Hard Gloss Glo-Coat! Waxes Clean! Waxes Bright! Waxes the Easy Way! Waxes Right! It's a Johnson Wax That'll make Your Floor Shine—Shine! Shine! Shine! A Johnson's Wax That'll make Your Floor Shine—Hard Gloss Glo-Coat!"

Actually, lyrics without music are like a bride without a groom. It's the wedding of the two that makes the union. Earlier in this article, we referred to rhythmic idioms as being as natural to products as to individuals. The rhythm suggested by Johnson’s Wax products has a sparkling, bright, work-easy-and-over-with-in-no-time quality.

The music should fit the product, suggesting not only what the product is, but what the product does. It's the music that creates the initial impact and paves the way for the acceptance of the words.

Not only does the music put across the sales message and bring out the hidden meanings within words, but it also sets the listener pleasantly, establishing his willingness to listen. Needless to say, a musical commercial, like a popular tune, does not catch on with the public unless the words make a joint impact with the music.

Words and Music

It is this joint impact of words and music that often militates against the use of public domain tunes. It is difficult to get clear-cut sponsor identification. For no matter how frequently, for example, a sponsor sings his sales story to "Shortnin' Bread," a large majority of listeners, consciously or unconsciously, will sing the words associated with the original tune, words that may be superficially forgotten, but, emotionally, they are remembered.

Another reason it's difficult to get clear-cut sponsor identification with a public domain tune is conflict of sponsorship. Let's assume, a national manufacturer of shortening decides to use "Shortnin' Bread" as his musical trademark. There's nothing he can do to stop a regional or local shortening manufacturer, baking company, or any other company, for that matter, from using the identical tune.

He can neither protect his investment, nor build equity in a public domain musical trademark that should be, but usually isn't,
as individually his as his brand name; yet his investment may run into many thousands of dollars.

The cost of a musical commercial, be it original or public domain, is an important item. And a musical commercial should not be considered unless a budget is large enough to allow for a smooth, professional recording; for in this day of disc jockey programs and juke boxes, the public is well aware of the difference between professional and non-professional recordings.

Too, national users of musical commercials have established a standard of quality equal to the popular recordings of name bands. When a regional or local musical commercial falls below this standard, it stands out like a sore thumb. By the same token, when it meets this standard, it acquires prestige through association.

Music Costs Money

Though production costs are no small item, a musical commercial should not be considered unless a budget is large enough to allow for a top recording and buy enough time on radio, television, or both, to allow the public to catch on to it.

Assuming that the budget is large enough to provide a top recording and buy enough time, here are the step-by-step mechanisms that go into the making of a musical commercial:

1: Repeat the name of the product and sales message, or slogan, with proper accent and emphasis. As previously mentioned, the rhythm of the spoken words should indicate the natural meter and tempo and provide a clue for the rhyme pattern.

2: Determine the most suitable approach, the type and character of the material using the characteristics detailed in those factors that outline emotional acceptance and high remembrance value.

3: Plot out lyric pattern to incorporate the "musts" as set forth in the third characteristic, which is to put the message across.

4: Explore the possibility of incorporating—as an attention getter—one of the devices enumerated in the first characteristic.

5: Write the music to fit the lyrics, using the fifth characteristic as a guide. Be sure that the melody gives the best possible emphasis to the name, accentuates the right words, and punctuates the message with the spirit and the character of the product.

6: Polish it up and check with the requirements of the sixth characteristic: It must sing!

Tangibles & Intangibles

No doubt, these mechanics are an oversimplification of the many intangibles that go into any creative effort. Background and experience carry some weight. Inspiration may on occasion illuminate. But on the whole, the intangibles come as a result of constant application of pencil to paper, many false starts, and much sifting of ideas to find the one!

Discounting the intangibles, if your musical commercial passes inspection on all six characteristics that the majority of effective musical commercials share in common, you may be certain that the odds are pretty good that your musical commercial will be effective—which sing increased sales!

FOR CLORET.S TV IS KISSING SWEET

WHEN the American Chicle Co. was ready to introduce its Clorets Chlorophyll Gum on a national basis in the fall of 1951, the company had some very specific demands to make of its advertising media.

To a country accustomed to purchasing gum with a single 5-cent coin, American Chicle was attempting to sell a product involving the unprecedented expenditure of two coins, totaling 15 cents. And its new product contained an ingredient relatively unknown at that time—Clorets was the first nationally distributed chlorophyll gum.

Heavy promotion was needed to back up its sprinkling of newspaper and radio advertising. And that promotion had to be directed to the entire family, not just single segments, such as housewives or children. Of first importance, too, was the company's desire not to become involved in a long-term contract that might not bring immediate results.

To meet these requirements, Clorets, through Dancer - Fitzgerald - Sample, bought Rocky King, Detective on nine stations of the DuMont Television Network in September, 1951.

Starring veteran actor Roscoe Karns, the mystery series had been telecast since January, 1950, earning comfortable ratings and good cost-per-thousand results for its previous sponsors. (During the last eight Nielsen national report periods for instance, the program averaged a 22.0 rating.) This equals 10,697,330 viewers. (Source: Videodex April 1952 Audience Composition Report.)

"Our answers were there from the outset," said R. L. Harris, American Chicle's advertising manager. Rocky reached the entire family: we still think the show has one of the best balanced audience compositions of all TV mystery programs. It was and is a moderately priced show, costing us at that time $5,147.50 per week as co-sponsor. As the show continued to prove its selling power, we increased our network to 35 stations, with a weekly tab of $9,921.87."

The commercial is hard-sell, built around the slogan, "Kissing Sweet." Two hearts "palpitating" on the screen dissolve to a young man and woman kissing, as the announcer says:

"Two hearts beat as one when your breath is 'Kissing Sweet.' To make your breath 'Kissing Sweet' in seconds, use new Clorets Candy Mints, or chew delicious Clorets Chewing Gum."

Copy, which is prepared by Dancer-Fitzgerald-Sample's Estelle Mendelsohn, goes on to tell viewers that both Clorets products are "rich in chlorophyll, that magical green purifier. It is active chlorophyll—true water-soluble chlorophyll. Not synthetic. Not an imitation. Delicious minty Clorets make breath 'Kissing Sweet' in seconds."

Rocky brought results for American Chicle almost immediately. After one month of co-sponsorship (with Procter & Gamble Co.'s Ivory Flakes), more Clorets were sold in certain markets than had been sold in five months before Clorets went on TV.

Based on the December Nielsen, these high sales results cost Clorets 99 cents per thousand viewers, or 66 cents per thousand viewers per commercial minute.

"Rocky King has given us more listeners to our commercial per dollar than any other TV show or other advertising medium," Mr. Harris added. "The program enables Clorets to get one and one-half minutes of commercial time with the entire family—something we could not possibly attain any other way."

Proof of the pudding—Clorets recently signed for a similar DuMont co-sponsorship deal (with Bauer & Black's Curads) on the network's weekly Twenty Questions.

KEYSTONE BROADCASTING SYSTEM, Inc.

New York: 580 Fifth Ave.
Chicago: 111 W. Washington
Los Angeles: 1330 Wilshire Blvd.
Breathes there the man, with soul so dead,
Who never to himself hath said,
This is my own, my native land!

THOSE immortal lines by Sir Walter Scott (1771-1832), plucked from “The Lay of the Last Minstrel,” may be read on a George Washington’s Birthday program to be produced by mystical station WOF—and WOF-TV, too.

They may be read without fear of damage suits for copyright violation.

The whole poem may be read, without any danger of court action.

Now, suppose WOF-AM-TV wants to use “The Gift Outright,” one of six New England poems by Robert Frost (1875—). It deals with the spirit that inspired the nation’s founders and opens with this intriguing statement:

“The land was . . .

Wait a minute! There’s danger ahead—real danger, with process servers and lawyers and other complications.

Why is it perfectly safe to use the Scott poem and equally unsafe to quote all or a substantial part of the Frost verse?

The answer is found in a paragraph—one long sentence, replete with commas, semicolons and a liberal garnish of legal gobbledegook.

That paragraph is known as 1(c), a new addition to the U. S. Copyright Act that became effective Jan. 1, 1953 (see separate box on opposite page).

Because of that paragraph the Frost poem, or a substantial part of it, can’t be read on WOF-AM-TV without permission of the copyright proprietor (publisher, author or literary agent, usually).

Shakespeare’s Safe

On the other hand, there’s absolutely nothing to worry about in reading parts of, or the entire works of Milton, Scott, Shakespeare, Keats, Longfellow or any of their contemporaries.

After all, copyrights last only 56 years and these classic writers belonged to another century though their works are ageless.

Since all literary works more than 56 years old lie in the public domain, there’s no copyright problem involved in reading them on the air.

Now, what about paragraph 1(c), the new copyright gimmick?

Obviously “The Gift Outright,” Frost’s poem, is a nondramatic literary work. That’s what the new copyright amendment covers, and it’s important that all radio and television stations know what it means and how it works.

To read “The Gift Outright” on the air, or a substantial part of it, might make a station liable to suit if it is copyrighted, unless proper permission is obtained.

The obvious procedure is to find out if the poem is protected by copyright.

“The Gift Outright” is included in The World’s Best, a collection of literary works compiled by Whit Burnet and published by Dial Press, New York. Dial Press has no control over use of “The Gift Outright,” since it had to get permission to reprint the poem.

The “acknowledgements” department of The World’s Best carries this paragraph:

There’s no question about it. If WOF reads the whole poem on its George Washington’s Birthday program without getting permission of either the author or publisher (it’s hard to tell which in this case), the lawyers are likely to take over.

Quotable Lines

It might be reasonably safe, however, to quote a line or two from “The Gift Outright,” under a legal rule that allows exceptions. This rule is known as the “fair use doctrine.” It was created over a long period by the courts to cover a “use” of a copyrighted work that doesn’t lessen its value or compete with it, and helps to advance culture and education.

The new copyright law:

1—Prevents reading copyrighted nondramatic literary works on radio or TV programs without a license.

2—Makes it illegal to record a copyrighted nondramatic literary work without consent of the copyright proprietor.

Those are the main worries confronting radio-TV executives under the new law. Therefore the above passage from Scott can be used freely. There’s nothing to worry about—and any copyright problem that is worry-free is refreshing to the harassed broadcaster.

Of course, even prior to last Jan. 1 it was illegal to perform a copyrighted dramatic work publicly without the consent of the copyright proprietor.

Moreover, it was illegal to perform publicly for profit a copyrighted musical work, or a lecture, sermon, address, or other work originally written for oral delivery, without due consent.

Even before the law was passed, it was illegal to dramatize a literary work or to broadcast a dramatic version of a literary work. Even the process of casting the dialogue to different actors for reading might be a dramatization.

There’s nothing in the new law that changes the “fair use doctrine,” according to a report that accompanied it. Broadcasters can take advantage of this doctrine by using brief quoted material from speeches, lectures, sermons and reports of events.

Though it has always been illegal to print or reprint nondramatic literary works, newspapers have printed portions of speeches and documents in the process of normal news reporting.

As a practical matter, the nondramatic literary material that broadcasters might want to read on the air fall into three groups:

1. Newspaper and magazine material.

2. Short stories, novels and recipes.

3. Poetry.

In broadcast programs that explain the comics to children, or quote newspaper editorials, there is an appreciated benefit to newspapers. There seems no practical reason why stations should change their methods.

As to short stories and novels, few stations read them on the air in nondramatic form. If they want to do this in either nondramatic or dramatic form, then they must (a) use public domain material or (b) get consent from the copyright owner.

Poets and Publishers

This leaves copyrighted poetry as the field most likely to affect broadcasters. Until recent years many publishers didn’t bother to get in their contracts public reading rights in poetry. These rights frequently remain with the poet. In the last few years, though, most publishers have been using contract forms that carry radio and TV reading rights. Thus the rights may be either in the publisher or author, depending on the particular contract.

The usual procedure is to ask the copyright proprietor, normally the publisher, for permission. If the publisher does not have the rights, the request will be referred to the poet or his literary agent.

Some publishers and poets will grant free reading rights in poetry to a station for a limited period. They will generally require that the poems be broadcast without any change, with credit to both poet and publisher. Others will want to be paid for use of the poems, sometimes just a nominal fee.

If the station wants to record a nondramatic work, in addition to broadcasting it, consent must be obtained. Under industry custom in use of music, broadcasters normally don’t bother to ask for consent when
the recording is intended merely for archive and audition purposes.

When the recording right is licensed, the copyright owner is not limited to the statutory 2-cent maximum applying to musical works, even though this seems illogical.

A report accompanying the new copyright law says clearly that words and music of a song are regarded as indivisible, and the 2-cent fee applies where lyrics are recorded with music of a song.

An argument can be made that the new law does not apply to sustaining programs, but only to commercial programs. The courts decisions on public performance of music for profit make it perfectly clear that all broadcasting by stations that sell time constitutes public performance for profit.

In one of the drafts of the new law, language had been included which prohibited only public performance for pecuniary profit. The word "pecuniary" was thereafter removed. The statement of the conference report which accompanied the new law said that in striking out the word "pecuniary" it was "with the understanding that the word 'profit' as used in the bill refers only to a pecuniary remuneration." There is no pecuniary remuneration for sustaining programs but other language in the same report is not as clear as the quoted sentence.

Who Wants To Fight?

It may be assumed, therefore, that few broadcasters will wish to invite a test of the law on this point, although, clearly, a broadcaster who has inadvertently broadcast a copyrighted nondramatic literary work on a sustaining program would be ill-advised not to raise this point in his defense.

One of the provisions of the new law is that damage for infringement by broadcasting should not exceed $100 where the broadcaster shows that he was not aware that he was infringing, and that such infringement could not have been reasonably foreseen.

This throws on the broadcaster the burden of proving that he had no knowledge that he was infringing, and that reasonable care on his part would not have disclosed that he did not have rights in the work that he used.

The limitation of damages obviously will not serve a broadcaster who has been put on notice by the copyright proprietor. Similarly, it will not justify the action of a broadcaster who embarks on a regular course of using material without making a serious attempt to check the ownership. It is to be hoped, however, that the courts will construe this provision to have some usefulness to the broadcaster and that maximum damages will not exceed $100 in cases where the broadcaster did not proceed with guilty knowledge or in wanton disregard of the rights of others.

This article has not mentioned another field of literary material, namely, jokes, anecdotes and gags. Such material is, of course, frequently included in collections, anthologies and magazines, etc. These are seldom, even purportedly, the original creation of the compiler. It is difficult to say how a broadcaster, unless he were to shut humor off the air entirely, could attempt to ascertain the original authors of jokes, many of which go back to folk lore. Therefore, while broadcasters should be careful not to recite jokes in the precise language in which the broadcaster finds them in a copyrighted printed publication, the broadcaster, it would appear, would have to take his chances and continue to use stories and gags that usually date back to before Joe Miller.

As to recipes, which are used on many homemaker programs, there seems to be no great problem. In the first place, the recipe is seldom read exactly as printed, and most homemaker personalities include their own innovations and additions.

If the same recipe book is to be used over and over on the same program, it might be advisable to get permission from the copyright proprietor, who undoubtedly will be happy to get free publicity for the book.

A PERILOUS PARAGRAPH WORTH REMEMBERING

Here's the amendment to paragraph 1 (c) of the U. S. Copyright Act, effective Jan. 1, 1953, which introduced new hazards to the broadcasting of non-dramatic literary works:

(c) To deliver, authorize the delivery of, read, or present the copyrighted work in public for profit if it be a lecture, sermon, address or similar production, or other nondramatic literary work; to make or procure the making of any transcription or record thereof by or from which, in whole or in part, it may in any manner or by any method be exhibited, delivered, presented, produced, or reproduced; and to play or perform it in public for profit, and to exhibit, reproduce it in any manner or by any method whatsoever. The damages for the infringement by broadcast of any work referred to in this subsection shall not exceed the sum of $100 where the infringing broadcaster shows that he was not aware that he was infringing and that such infringement could not have been reasonably foreseen.
This La Crosse, Wis., grocer cut back his newspaper budget to buy radio time. Was it a wise move? The answer is that volume in his three stores is up 18%.

SHOPPING NEWS PLUS MUSIC EQUAL SALES INCREASES

RADIO’S PAYOFF formula—entertainment plus information which the listener can use profitably—has netted another jackpot for an advertiser in La Crosse, Wis.

A quarter-hour morning music strip, interspersed with grocery marketing data of ever-increasing concern to the budget-minded housewife, is drawing shoppers to three Harold Cram supermarkets.

Mr. Cram, at the suggestion of Verl Bratton, general manager of WKTY La Crosse, began a five-a-week show eight months ago which featured a morning appearance of Mr. Cram chatting to housewives about the day’s best food bargains. He talks each day from one of the three Cram supermarkets, pointing out such homey and practicable information as “The lettuce looks bad this morning, so we’ve cut the price ‘way down,” or, “Strawberries just came in and they look real fine. The price is lower than last week, too.”

Volume Up 18%

Volume in the three stores, after only eight months of radio usage, is up an average of 18%, and one of the trio has increased its sales by 39%. Monthly totals show a continuing gain, Mr. Cram reports.

Mr. Cram, as “star” on the WKTY CRAMarketees, announces specials daily. Last summer, during the canning season, he sold seven carloads of fruit. The score the year before: One and one-half carloads. Radio, he admits, made the difference.

Last Thanksgiving, he chatted to listeners about buying their holiday turkeys, saying he had arranged to buy all of those produced for market by 4-H youngsters within the county. He sold 500, all the county youngsters produced, and could have sold more. The 1951 sale: Fewer than 300.

Boom in Orange Sales

After checking a morning shipment of oranges which had just arrived, Mr. Cram announced a good buy on them. Orange sales soared 500% almost immediately.

With “very few exceptions,” Mr. Cram says, “exceptions which are bound to face any retailer, I can invariably count on a customer-run on items which I talk about during the show.”

Well aware that listeners take him on his word, and buy according to his recommendations, Mr. Cram says, “You can be plenty sure I never knowingly offer a bum steer!”

The supermarket-owner telephones WKTY studios every morning from a store location, and his report is aired directly with use of an electronic beeper device. He spends from two to four minutes reporting notes he has taken on the quality and prices of fresh vegetables, fruits, meats and other foodstuffs which have just been delivered.

Pessimistic about the value of radio as a sales tool until this format was suggested to him, Mr. Cram cut his newspaper budget “considerably” to sign his broadcast agreement. The expenditure, long since, has been “well-justified.”

Immediate Reaction

“From the very first, each of my three stores perked up with listener-customers,” many just stopping in to see what the “talking grocer” looked like and remaining to buy. A merchandising man also, Mr. Cram says, “If WKTY can get people into our stores in such numbers, it’s up to us to turn them from visitors into customers.”

To make shopping more convenient and pleasant, Mr. Cram is remodeling one of the supermarkets to encourage a smoother and faster traffic flow through the aisles and past the check point counters. Similar expansion may be needed for the other stores, as “I’m sure our program is responsible in great measure for creating the need for remodeling.”

Mr. Cram, whose first year of business showed a $50,000 gross sales figure, is now looking forward to that day in the future when his gross exceeds $1 million.
PROGRAMS & PROMOTION

TEEN-AGE PROGRAMMING

SPECIAL Saturday afternoon program beamed at teenagers is being presented by WCMW Canton, Ohio, and the YWCA in that city. Disc jockey Nick Barry broadcasts his Top Tunes from the Y recreation hall from 2 to 5 p.m. before a teenage audience. Prior to the broadcast WCMW staff members preside at a Radio Workshop in one of the Y club rooms when students are given pointers on the broadcasting business.

PLANET PROGRAMMING

DRAMATIC story of interplanetary research, Frontier To Space, has debuted on KROD-TV El Paso, Tex. Station describes the weekly series as the first of its kind in the U.S. Programs will tell the story of planet-to-planet development through interviews, roundtables and in-studio demonstrations. Dr. Russell K. Sherburne and James S. Arnold, both of Physical Science Labs. of New Mexico A & M College, will serve as nucleus personnel on the telecasts bringing in other scientists from time to time.

TV PROMOTES OPENING

TELEVISION was used by United Artists to promote its new movie "Moulin Rouge" which opened in New York on Feb. 10. The company used 125 spot announcements on WJZ-TV New York. Promotion was described as the largest 10-second announcement campaign within one-week period on WJZ-TV. Agency for United is Donahue & Coe, N. Y.

WLWT (TV) 'FORECAST'

NEWEST programming in the farm field at WLWT (TV) Cincinnati is Forecast, show slated for interest to both city and farm residents. Script for the Monday through Saturday show incorporates the latest market reports, news and weather as well as interviews with farmers and suggestions to the women on best household buys of the week.

SAFETY ANNOUNCEMENTS

IN AN effort to cut down the great number of winter highway accidents, WHAY New Britain, Conn., together with schools in the city, is waging a campaign of education by radio. Last fall students entered a winter safety message contest. They were asked to submit one-minute spot announcements of their own creation. Winner in each school recorded his message at the station. A total of 14 announcements were recorded, WHAY reports, and they are being used as part of the station's safety drive.

CORRECTION

In the map (pages 78-79) accompanying the article by John B. Crandall, media director, Sherman & Marquette, entitled "How Big Will TV Be?" in last week's.Broadcasting * Telecasting, three TV market areas were omitted by an engraver's error. The Charlotte and Greensboro areas should have been included in those on the air as of last Dec. 1, and the Lexington, Ky., area should have appeared as a future TV market which will be predominantly uhf.

FEATURES 'STUDIO ONE'

TO PROMOTE the first U. S. TV network show to be piped into Canada, Canadian Westinghouse Co., Hamilton, Ont., distributed 100,000 matchbooks among Toronto and Montreal dealers featuring Studio One and Monday evening times it is heard on CBFT Toronto and CHYF Montreal.

SHOW MOVES TO CAMPUS

WLS Chicago sent its Dinner Bell Time show to the U. of Illinois Feb. 2-3 for broadcasts in "Farm & Home Week." Carl Neuman, WLS assistant farm director, and Dick Albrecht, Illinois field editor of Prairie Farmer, conducted programs direct from the university's radio studios at Urbana. Rising farm costs were discussed by various authorities on the broadcasts.

DISC JOCKEY CONTEST

WISN Milwaukee, Wis., has announced a winner for its "So You Want to Be a Disc Jockey" contest, which is sponsored by the Coca-Cola Bottling Co. of New York. The youngsters toured the studios, met newsmen and witnessed a rehearsal of Dean Martin's "Star in the House." The winner was given a Columbia record album each time and five-time winners get radio-phonograph combination. Ten-time winners receive above-mentioned prizes, $100 defense bond and a week's paid job as a disc jockey on WISN.

STUDENT PRESS PARTY

SOME 200 high school newspaper editors from the metropolitan New York area attended a press party at WOR-TV New York's studios on Feb. 6 as guests of the Coca-Cola Bottling Co. of New York. The youngsters toured the studios, met newsmen and witnessed a rehearsal of "Dean Martin's "/So You Want to Be a Star," a teen-age talent program, which is sponsored by the Coca-Cola Bottling Co., New York.

TREASURE DISCOVERY

PRIVATE participation in a hunt for buried treasure somewhere in Canada was part of a treasure campaign to announce representation in eastern Canada of CHUB Nantaimo, and CJOY Port Alberni, both on Vancouver "Treasure Island," by Stephens & Towndrow, Toronto. Mail mystery campaign to advertising agencies in the Toronto and Montreal area was completed with skull key ring and ended with a contest showing location of "Treasure Island" stations on a map of Vancouver Island.

CHORAL CONTEST

FOR the second straight year, WPTF Raleigh will sponsor a choral contest offering prizes amounting to $150 for winners in mixed voice and women's voice groups. Last year 21 counties entered the contest. This year's event has already drawn 26 entries. Contest gets under way Feb. 21 when the first group will be heard.

CHILDREN'S SERIES

SERIES of programs designed for young tots was launched Feb. 2 by WLS Chicago. Titled "Freddie the Fabulous Field Mouse," the program is part of the station's School Time which has been on the air for 16 years. "Freddie" recites verses and conducts tours of the zoo and other places of interest each Monday, 1:15-1:30 p.m. Series, aimed at children of kindergarten and primary grade age, was planned by Josephine Wetzler, WLS director of education.

LIVING ROOM SHOPPING

MAY Co., I. A. department store chain, has started The Complete Department Store of the Air on KLAV-TV Hollywood to enable the viewer to "shop in the comfort of her own home." Telecast five times weekly for an hour, the program is scheduled on a trial basis. Complete department store sets, including aisles and counters, has been constructed. There are 105 telephone operators available to take orders and answer questions. The promotion idea, a year in the making, was devised by Frances Corey, publicity and advertising director of May Co., Don Fedderson, station vice-president and general manager, and Bernard Weinberg, owner of Milton Weinberg Adv. Co., Los Angeles, agency servicing the account.

ICE CAPADES BENEFIT

ICE CAPADES starts appeared in an hour-long remote telecast benefiting the March of Dimes drive on WJAR-TV Providence Jan. 16. To achieve mobility with two cameras, Norman Gittleson, manager of operations, ordered a ramp constructed which permitted close-up
For commercials with impact...it's

TV Film Spots
A LA KLING

Pacing, integration, movement, photographic excellence, art direction—these are the elements that make for maximum impact and TV selling power. Kling blends these and other ingredients from creative storyboards to finished commercials with dramatic effect.

In both animated and live spots, Kling's consistent leadership stems from long experience, superior facilities, and top creative talent. Only Kling offers all three.

Put this three-way key to the test and you see the result: Award of excellence from the New York Art Director's for the Godchaux Sugar commercial produced by Kling's Hollywood animation division headed by Ray Patin.

For Ideal Dog Food, this three-way key resulted in a Kling-produced commercial that was chosen among the top ten of the best remembered TV spots by the Advertest Research Bureau.

Our modern, fully equipped studios in Chicago and Hollywood are at your service. Let us give you the top quality results you want—commercials that sell. Kling gives you Advertising Knowmanship plus Hollywood Showmanship!

These Kling TV spot syndications are now available:

1. Bank spots—cartoon animation
2. Beer spots—series one (testimonials)
3. Beer spots—series two (beer with food)
4. Bread spots—stop action photography
5. Ice Cream spots

Now on the presses! Our new booklet of inside information about Kling services. Write for your free copy.

DALLAS RELIGIOUS SERIES
PREPARATIONS are under way for national distribution of a religious TV program, The Pastor Calls, which has been produced by the First Methodist Church of Dallas and presented over KRLL-TV Dallas for the past three years. A 13-week filmed series of the program, which will be made by the Radio and Film Commission of the Methodist Church, will be turned over for distribution to the National Council of Churches of Christ in the U.S.A.

BLOCK MIAMI SHOW
HAL BLOCK, gagwriter and comedy star of CBS-TV What’s My Line?, stars in his own late-night show Miami Block Party over WTVJ (TV) Miami starting last Thursday. Program runs from 12 midnight to 12:30 a.m. Monday through Friday and features guest interviews with the many show business personalities currently appearing in Miami and Miami Beach. The show is programmed from the WTVJ main studio, which will be arranged so it can accommodate an audience of about 300 guests. Mr. Block will continue to make his regular weekly appearance on What’s My Line?. He will fly to New York each weekend for the program.

PROMOTION FOR DJ
WAYZ New Haven, Conn., promoted the arrival of a new station disc jockey, Bob E. Lloyd, by mailing postcards to 1,500 regular listeners, and by photographing Mr. Lloyd with a groundhog for publication in weekly newspapers on the date of his first program, Feb. 2 (Groundhog Day). Advance-on-the-air promotion was made by the broadcasting of riddles concerning the new disc jockey’s arrival, causing listeners to telephone the station for the answer to the riddle. Result was that Mr. Lloyd was receiving fan mail before he went on the air.

WKRC-TV SPORTS EXTRA
WKRC-TV Cincinnati is giving viewers of Wednesday night boxing matches over that station something extra. The station follows fights by showing Sports Parade, in which a prize-ring figure discusses the preceding bout. Immediately afterward a Joe Pa-looka full-length movie is shown.

WEWS (TV) AIDS TRIO
WEWS (TV) Cleveland was responsible for a local entertainment trio being signed up for an engagement with a Cleveland night club when the night club owner, visiting station studios, saw the trio performing on the station’s Steps to Stardom, local amateur show.

WKNX-TV Exposition
THEY’RE hankering for television in the Saginaw-Bay City-Midland area of Michigan, according to WKNX Saginaw, which plans to go on the air with WKNX-TV on Ch. 37 in March. The station reports it sponsored a four-day television exposition Jan. 13-16 which drew audiences of more than 15,000.

The exposition, held at the Saginaw Civic Auditorium, featured 11 professional stage acts shown live via closed circuit, with WKNX-TV equipment televising the performances to TV sets displayed in booths on the main floor. Films were televised between live shows.

Continued promotion by WKNX and newspaper ads sent attendance zooming, with the first day’s abbreviated performance (6 to 10 p.m.) drawing 2,000. Succeeding days’ exhibitions lasted from 2 to 10 p.m. Every seat in the auditorium was taken and station personnel were forced to coax the crowd from the stage where WKNX-TV equipment was on view, according to President William J. Edwards and Secretary-Treasurer Howard H. Wolfe, who planned the event.

WKNX reports the exposition’s cost was about $18,000, with an admission charge of 50 cents for adults, and that ticket stubs were good for some $6,000 in TV equipment. Local dealers, numbering about five or six for each of the 15 distributors who rented space at the exposition, sold sets and built up prospect lists.

Names represented included Alliance, Tenna-Rotor, Arvin, Capehart, Croxley, DuMont, Emerson, General Electric, Halli-crafters, Motorola, Olympic, RCA Victor, Silverton, Spartan, Wells-Gardner and Westinghouse.

And down through the years

They started in 1936 and someone surveyed somebody every year. Regardless of the questions, regardless of the list, BROADCASTING THELEC-TASTING has been first in every category. Whether news, accuracy, dependability or advertising effectiveness.
The PRESTO RC-7 has already been acclaimed "the finest tape recorder of its size available." Although portable in size, the RC-7 embodies features and heavy duty construction found only in larger, more expensive, studio-type machines.

Now, with the new RA-1 reel adapter, this precision recording instrument becomes an indispensable piece of equipment for every station and recording studio. With this adapter, the RC-7 accommodates reels up to 10½" diameter, providing continuous long-period recording or playback.

If you are contemplating a portable tape recorder, don't buy any—until you see the PRESTO RC-7 with 10½" reel adapter (RA-1). Without a doubt, it's the best buy in professional tape equipment!

Present PRESTO RC-7 owners may convert their machines with this adapter for just $39.00. Write today for details!

Claire Kerlee, Hollywood free lance writer, to Shore Assoc. Corp., that city, as account executive.

James Witherell, research director, Russel M.
WORKSHOP...

is proud to announce
its new UHF antenna

the ultimate in—

SIMPLICITY
RUGGEDNESS
RELIABILITY

Simplicity—because the radiating and structural portions are coincidental. Cross sectional view at lower left clearly illustrates its clean cut revolutionary design.

Ruggedness & Reliability—come from complete elimination of small, delicate connectors and breakable insulators. Antenna breakdowns are virtually impossible.

High Gain of 11 db over a tuned dipole for the 12 wavelength model. Power gain of 14.

Perfect Circularity—maximum variations of less than 0.5 db from mean value in horizontal pattern.

Vertical Pattern... 4.2°... VSWR less than 1.1 to 1 with best match at video carrier frequency... will handle 50 KW power... and a host of other features.

This is only part of the story on this new development. Specifications indicate its unusually high performance and operating dependability. Write or call for complete information.

Cross-sectional view showing the four vertical tubes that form the radiating system. These tubes are actually slots and are further subdivided into resonant sections. They are fed by a single vertical inner conductor.

**Broadcasting • Teletcasting**
1. For hundreds of years the coast of Baffin Island in Northern Canada has been an Eskimo home and hunting ground. The Baffin Island Eskimos were known throughout the North for their skill as seal hunters and fishermen. They lived on raw seal meat and raw fish. Their existence, while primitive, was a happy one.

2. Eight years ago the Canadian government set up a system of family allowance under which the Baffin Island Eskimos received $6 a month for each child—as did all other Canadians. These allowances, called "kenauyaksait" by the Eskimos, represented more money than most of them had ever seen at one time.

3. To the Eskimos, their new-found wealth meant they didn’t have to hunt seals or catch fish any more. Most of them left their hunting and fishing grounds and moved in close to the trading posts where they received their monthly handouts and could buy the niceties of civilization.

4. The Eskimos' new life was soft and easy—for they had complete security. But because they no longer needed to provide for themselves they lost all vigor and ambition. As a result, the government is now trying to get them to move away from the trading posts and start producing or forfeit their allowances. But this is next to impossible to accomplish. For the Eskimos have grown to depend on their security so much that they have no desire to return to their former life of freedom and independence.

5. The important point of the story is this: enslavement by security isn't something that happens only to Eskimos. In fact, millions of people all over the world see nothing wrong with a welfare society. But welfare plans are like dope. The doses are small and pleasant at first, but they eventually enslave us. For that reason, we Americans must maintain our self-reliance, our productivity and our freedom. For these things, after all, are responsible for America's greatness.

A. W. Wheeler, manager of Graybar Electric Co.'s Shreveport branch, appointed manager of New Orleans branch, effective March 1. B. F. Benning, manager of lighting and lamp sales for Graybar in Dallas, succeeds Mr. Wheeler at Shreveport.

George Krygier, liaison engineer at CBS-Columbia Inc., Brooklyn, named administrative engineer.

Lee Ballengee, Chicago manager, General Instrument Corp., to parent plant in Elizabeth, N. J., as assistant sales manager, replaced by Benjamin V. K. French.

**IN PUBLIC SERVICE**

Happy Valentine

YOUNGSTERS from broken homes in the Warren-Youngstown, Ohio, area had a happy Valentine's party with the aid of WHHH Warren and general manager Carl J. Raymond. Mr. Raymond, cooperating with the Optimist Club and the Mary Carr American Legion post, aired a three-day request for unsigned Valentines for the children's party. Six thousand greetings were mailed from surrounding towns and as far away as Ontario, Canada. Mailing benefited 73 children in the Thumbull County Children's Home.

Neighbor Calls WKIC

TWO mentions on WKIC Hazard, Ky., brought help to a local family which had been burned out of their home by a fire. Because most of the furnishings had been destroyed, a neighbor asked WKIC to broadcast an appeal for donation of a washing machine. That same day, six listeners offered a washing machine and a seventh volunteered a radio.

Ear for 'Good' News

WHEN vandals damaged a high school in Tacoma, Wash., during a weekend, causing temporary closing down of the school, KMO that city aired a message that students needn't show up Monday. Result was that of 2,000 students only six appeared at school that day.

**WLEE Blood Drive**

BUOYED with its earlier success in a drive to encourage blood donations upon the first visit of the Red Cross Bloodmobile, WLEE Richmond, Va., saturated its day and night schedule with announcements designed to spur pledges. When the Bloodmobile first came to the city, WLEE sports director Joe Mason reported, the station was credited by local Red Cross directors with raising one-third of all donations received.

**KWOS 'Pledge-a-Pint'**

COLE COUNTY, Mo. passed its quota of blood in the Red Cross Bloodmobile campaign early this month, thanks to KWOS AM-FM Jefferson City. When other appeals failed to bring in the necessary 388 pints, station officials stepped in to conduct an intensive spot campaign for one week before the Bloodmobile arrived, five-minute direct pickups from the truck during its two-day stopover and a four-hour Pledge-A-Pint program on which professionals donated their time.

**WTVJ Blood Drive**

WHEN WTVJ (TV) Miami, Fla., turned its studio into a branch of the Dade County Blood Bank, it collected more than 150 pints of blood. The blood bank moved equipment and beds into the studio. Several donors made their contributions before the TV camera. Project was instituted by Alex Gibson, star of WTVJ's Alex Gibson Show.
The mighty Mississippi is another important factor that keeps the Memphis Market growing, as evidenced by nearly 100,000 automobiles and over two million tons of freight handled annually at the port of Memphis.

Many alert advertisers are moving more goods at less cost by concentrating on the "better half" audience covered by WREC. You get both rural and metropolitan listeners and cover the entire 76-county area with one schedule. Ask a Katz man to show you the latest Standard Audit and Measurement Report, and Hooper ratings that prove this important point!

CAB Sessions March 9-12
Feature Programs, Talks
U. S. speakers to highlight forums during first part of CAB's annual convention.
Closed business sessions will take up last two days.

PROGRAMMING will feature the first two days of the annual convention of the Canadian Assn. of Broadcasters at Montreal's Mount Royal Hotel, March 9-12, with closed business sessions the last two days. U. S. CANADA broadcasting executives will be the main speakers during the first two days at forum sessions, according to the advance agenda.

The first two days also will include advertising agency matters, a business forecast and review of public service programming by Canadian stations.

Social functions will include a fashion show and luncheon for ladies, a cocktail party by Canadian Pacific and Canadian National Telegraph Cos., and the annual dinner March 10. Awards to be presented include the John J. Gillin Jr. Memorial Award, Canadian General Electric Co. award, and quarter-century awards to CAB members.

Business sessions March 11-12 will include a report by General Manager T. J. Allard, Sales Manager Pat Freeman, discussion on surveys and survey companies, revision of the constitution, discussion on editorialized broadcasting, financial reports and annual elections.

New Strategy for VOA
- VOICE of America launched a new broadcast offensive to peoples behind the Iron Curtain last week, following the lead set by Secretary of State John Foster Dulles in a diplomatic letter to the Communist government in Poland.

Attempting to take a positive position, VOA broadcasts offered sympathy and understanding to Communist-dominated peoples, pointing out that the U. S. is interested in "any genuine struggle of men to be free and masters of their own thoughts and souls."

JOAK on 3,000
TV TOOK the air in Japan Feb. 1, just 25 years after radio was introduced by the government-owned Japanese Broadcasting Corp.

Three-day opening events on JOAK were estimated to have been seen in 3,000 television homes in the Tokyo area.

U. S. TV Show Ratings Up
In Canada's Toronto Area
INCREASING interest in American TV programs in shown in the January report of Elliott-Haynes Ltd., Toronto, for viewers in the Toronto-Hamilton-Niagara area.

In January the WBEN-TV Buffalo share increased from 77.1% to 78.5% of the audience, highest since CBLT (TV) Toronto began operating in September. CBLT's audience dropped from 22.9% in December to 21.5% in January. The WBEN-TV increase was due to its power boost and new tower.

Most popular CBLT (TV) Canadian programs were NFL Hockey with rating of 51.6, The Big Revue 31.6, and Canadian Sports Film 23.1. Most popular U.S. programs were TV Playhouse 80.8, Dragnet 75.1, Ford Theatre 75.9, Comedy Hour 75.8, and Circle Theatre 75.5.

Sets-in-use ratio in January was the highest on record, 82.2.

For the first time a survey was made in the Montreal area, which contains about a sixth of Canada sets, and one station, CBFT (TV) Montreal. Average sets-in-use rating was 47.2 for January. Most popular programs, with ratings, were NFL Hockey 68.9, French Quiz 53, and The Big Revue 52.4.

Jennings to Head Programs
In Executive Shifts at CBC
CHARLES JENNINGS, assistant director general of programs of Canadian Broadcasting Corp., Toronto, has been elevated to director of programs, succeeding E. L. Bushnell, who recently became assistant general manager for Canadaagger.

Along with Mr. Jennings a new assistant director has been named, Marcel Ouimet, who was formerly director of CBC's French network. Both will deal with national programs, while Mr. Bushnell will act as co-ordinator of TV for CBC besides other duties.

Rene P. Landry, CBC personnel and administrative services director, has been moved up to regional director for the province of Quebec, and is succeeded in his former post by Marcel Carter, until now executive assistant to the CBC general manager, J. A. Ouimet. Iris Dilworth, supervisor of program production, has been appointed regional director for the province of Ontario. Both Messrs. Landry and Dilworth will be management representatives in the CBC.

Cuban Station Changes
Reported Under NARBA
CUBAN government has notified FCC of the following changes in its broadcast authorizations, under terms of the 1950 North American Regional Broadcasting Agreement (NARBA).

Bayamo, Oriente, new A3 station on 1,250 kc. began operation, to be synchronized with CMK Havana; Class IV, Effective March 14.

Cuello de Asia, Camagüey province, 15,000 kc., 250 w fulltime; assigned call letters, change in location and characteristics, Effective March 14.

CMKI Guantánamo, Oriente, change to 1110 kc., 280 w daytime, 100 w night; Class II, (Changed from 1400 kc.) Effective upon entry into force of the agreement.

MAB Elects, Changes Name
At Annual Convention
FINLAY MacDONALD, CJCH Halifax, was re-elected president of the Maritime Assn. of Broadcasters at a recent annual meeting at BT, Feb. 2. Malcolm Neill, CFNB Fred-town, CANADA erction, and Mr. MacDonald were re-elected MAB representatives on the board of directors of the Canadian Assn. of Broadcasters, and Gerry Redmond, CHNS Halifax, was re-elected secretary, with Fred Lynds, CKCW Moncton, as treasurer.

Name of the association has been changed to Atlantic Assn. of Broadcasters. It includes independent stations in the Newfoundland, New Brunswick, Nova Scotia and Prince Edward Island provinces.

CBC Budget Estimates
Decline Slightly
ESTIMATES for government expenditures on the Canadian Broadcasting Corp. for the fiscal year 1953-54 total $8,431,550, down from $8,517,408 for fiscal 1952-53 ending CANADA March 31. This includes the annual grant of $6,250,000 recommended by the Massey Commission in 1951, and funds for national television programming. It does not take into consideration any sum to replace the annual $2.50 listener license fee which brings CBC about $6 million.

4A's Aids 'Truth' Drive
AMERICAN Assn. of Advertising Agencies (AAAA) announced last week that more than 50 agencies are cooperating in the State Dept.'s "Campaign of Truth" by sending surplus magazines to U. S. Information Centers in 42 foreign countries. AAAA announced that the 199 centers a packet of materials telling the story of American advertising and agency business.
"Sky Hook" Roof Supports Are Boon to Mine Safety

One of the mining engineer's oldest problems is how to provide sure, solid support for roofs. Miners have long had to put their faith in makeshift timber roof props that necessarily were haphazard and undependable. Records of the U.S. Bureau of Mines show that half of all mine accidents have resulted from collapsing roofs.

Now there is a better, more dependable way to support mine roofs—the mine-roof bolt. The roof bolt is ingenious—the nearest thing to the fabled "sky hook" that you're ever likely to see.

When Bethlehem Mine-Roof Bolts are used, the roof actually supports itself. What happens is that the roof bolts, which come in lengths of from 2 to 8 feet, consolidate the strata of rock to form what amounts to a single, deep, tremendously strong beam.

The best proof of how mine-roof bolts improve safety and operating efficiency is the way that mines are going for them.

The Bethlehem Steel plant at Lebanon, Pa., is turning out our two types of roof bolts by the thousands. More and more mines are changing to roof bolts, with the result that efficiency is improving and accidents due to roof falls, once the bane of mining, are growing fewer every day.

Bethlehem makes two types of roof bolts: the square-head bolt with expansion shell (left) and the wedge-type or slotted bolt (right). With either type, when the bolt is installed the upper end expands, gripping the sides of hole.

RECORDS SHOW THAT HALF OF ALL MINE ACCIDENTS HAVE RESULTED FROM COLLAPSING ROOFS.

BETHLEHEM STEEL
**Educational TV Topic On Atlantic City Agenda**

**Educational TV** was to have a large place at the convention of American Assn. of School Administrators in Atlantic City Feb. 14-19. Joint Committee on Educational Television set up consultant service at Ambassador Hotel with JCET committee, staff members and special consultants in attendance, plus TV studio and architectural exhibits at Convention Hall. TV studio was to be used for live educational programs, followed by evaluation discussions three times daily.

Among those scheduled to be present at convention were Belmont Farley, National Education Assn.; Franklin Dunham, U. S. Office of Education; Ralph Steele, JCET executive director; Walter B. Emery, JCET special consultant; E. Arthur Hungerford Jr., JCET engineering consultant; Richard Hull, Iowa State U. (WOI Ames), and I. Keith Tyler, Ohio State U. (WOSU).

**Mass. State TV Group**

MASSACHUSETTS state commission studying educational television and possibility of a state-owned station has asked the state legislature for $100,000, and continuance of the commission for another year.

If approved, this would give the 13-man commission of senators, representatives and private citizens until Feb. 15, 1954, to complete its video survey. The $100,000 would go toward preparation of plans for acceptance of the FCC-assigned Ch. 2 before the June deadline. The possibility of proposing an extension of the FCC-set deadline is expected to be reported on to the legislature by the new special TV commission before May 15.

**RCA Grants Fellowships**

THREE RCA scientists and engineers have been granted fellowship awards by RCA to enroll for graduate work toward the doctor's degree, Dr. C. B. Jolliffe, vice president and technical director, announced last week. The men are Kenneth W. Robinson, Los Angeles, who will study electrical engineering at Princeton U.; Robert M. Hansen, Baton Rouge, Louisiana State U., and Ivan H. Sublette, Haddonfield, N. J., electrical engineering at the U. of Pennsylvania.

**Pupils Like Inaugural TV**

INTENSE school interest in NBC's six-hour TV coverage of the Presidential inauguration Jan. 20 has been reported by network affiliated stations throughout the country.

WFBA-TV Dallas officials said school authorities there reported that 59,600 pupils watched inaugural proceedings on TV. In Fort Worth, according to WBAP-TV, the figure was an estimated 30,000.

WBRC-TV Birmingham reported about 20,000 of Jefferson County's 45,000 pupils watched the event. Total of 157,000 youngsters in Grand Rapids and Kent County saw the inauguration telecast, according to WOOD-TV Grand Rapids estimates.

Other NBC-TV stations which noted strong school interest in the special coverage were WOI-TV Ames, Ia., KNBN (TV) Los Angeles, WOC-TV Davenport, WAVE-TV Louisville and WSPD-TV Toledo.

**Opposition to N. Y. Plan**

OPPOSITION to proposed state-operated educational TV stations in New York was voiced Monday at the opening of the New York State Society of Newspapers Editors winter meeting. Despite recommendation of the State Board of Regents, Garth A. Shoemaker of Elmira, president of the Citizens Expenditure Committee, said the proposal was "a shotgun approach to education," and that the state had no more reason to operate a TV network than a newspaper chain.

Dr. Lewis A. Wilson, state commissioner of education, said the 10 proposed stations would not operate as a network, and would not be used for propaganda or "thought channels." Others taking an affirmative stand were Dr. Cornelius W. Kiewiet, president, U. of Rochester, and Benjamin Wollis, Buffalo's superintendent of schools.

**Educational TV Advisors**

ADVISORY committee of 30 California citizens has been appointed by Gov. Earl Warren to assist in development of the state's proposed eight educational TV stations. Among the appointments were Arthur Westlund, president, California State Radio-TV Broadcasters Assn. Inc., Oakland; Donn B. Tatum, director of TV, ABC Western Div.; Dr. William H. Sener, director of telecommunications, Allan Hancock Foundation, U. of Southern California; Lewis S. Frost, director of public relations, NBC Western Div., and Charles L. Glett, vice-president, CBS Hollywood.

**NW School Buys KBOK**

KBOK Waterloo, Iowa, has been sold to the Northwestern Theological Seminary and Bible Training School, Minneapolis, for a reported sale price of $55,000.roadcasting • Telecasting of Feb. 2 incorrectly reported KBOK's call letters as WBOK.
by helping SRDS users buy

Radio station managers who place SERVICE-ADS next to their listings in STANDARD RATE have good cause to believe that this supplementary information is heartily welcomed by many SRDS users.

In the course of exploring the needs and practices of SRDS users we have, over the years, encountered many comments like the following direct quote from an interview with an agency vice president:

“When I go to client conferences I always take STANDARD RATE with me. It is not unusual for the client to bring up a question about this paper or that radio station and ask, ‘What do you know about it?’ I can always turn to saps; and if there is a good ad—an ad that gives me a clear picture of the facility—I can at least give him a good outline of the publication or radio station from its listing in STANDARD RATE.”

If you would like to see the results of hundreds of interviews with advertisers, account executives, media directors and others who influence radio selection, send $1.00 for a copy of “Spot Radio Promotion Handbook.” It is organized to tell you who influences station selection, what they want to know about individual stations, where they turn for information.

“service ® ads help sell time by serving SRDS users”
**MILESTONES**

- WOR New York will celebrate its 31st anniversary Feb. 22 by special programming which will outline the history of radio on its regularly scheduled shows. Station started as a 250 w outlet stop Bamberger's department store in Newark and is currently a 50 kw operation.

- WTIC Hartford, Conn., last Tuesday observed its 28th anniversary and announced it is inaugurating a 12-hour daily music schedule on its FM outlet, WTIC-FM.

- MARK TOALSON, production manager of WSB-TV Atlanta, has been elected to the 25-year-club of the Atlanta Journal-Constitution, published by Atlanta Newspapers Inc., station licensee. He joined WSB's engineering department in 1927.

- JOHN DEPROSPO, executive officer of the Municipal Bestg. System, which operates WNYC-AM-FM New York, has completed 35 years of service with the City of New York. He was transferred to WNYC in 1937, after serving in a city clerk post.

- WEAV Plattsburg, N. Y., celebrated its 18th anniversary Feb. 3. In 1953 the station was known as WMFF operating on 1340 kc with 100 w. A year later, FCC granted a power boost to 250 w and to 1 kw in 1948. WEAV is affiliated with ABC and now operates on 960 kc. George F. Bissell has been president and general manager since the station went on the air.

- OPEN HOUSE was to be held by WCAL Northfield, Minn., last Wednesday for Dr. Martin Hegland, station promotion director, upon his 30th year of broadcasting sermons on the station. He was director of WCAL, licensed to St. Olaf College, from 1927 to 1946, when he became promotion director. He is widely known for his Sunday services on WCAL in the Norwegian language.

- PROGRAM Director Frederick F. Laffey, WLAW Boston, who resumed duties with the station at the first of the year after completing two terms of service with the Army as a captain in the radio department of the Psychological Div. at Tokyo, Japan, is marking his 15th year of association with WLAW.

- KSFO San Francisco is paying respects to Blenda Newlin, secretary to Alan L. Torbet, station general manager, upon Miss Newlin's completion of 19 years with the station. Miss Newlin, senior staff member, has worked in various capacities with every department of KSFO.

**TWENTY-YEAR service pin goes to J. Grant Corey (l), supervisor of the 50 kw transmitter for WBT Charlotte, N. C., from Charles H. Crutchfield, executive vice president of Jefferson Standard Broadcasting Co. and general manager of WBT-WBTV (TV).**

**WLS CHICAGO honored a 20-year continuous sponsor, the Keystone Steel and Wire Co., Peoria, Ill., at a dinner which brought together this trio (l to r): Glenn Snyder, WLS vice president and general manager; R. E. Sommer, president of Keystone, and James E. Edwards, WLS president. The dinner was followed by a visit to the WLS National Barn Dance, portion of which Keystone has sponsored for two decades. Agency is Fuller & Smith & Ross, Chicago.**

**CEREMONY celebrating five years of television in Cleveland is attended by managers of the city's three video stations (l to r): Franklin Snyder, WKEL (TV) (which went on the air Dec. 17, 1949); James C. Hanahan, WEWS (TV) (Dec. 17, 1947), and J. Hamilton Shea, WNBK (TV), NBC-TV outlet (Nov. 1, 1948).**

**ROOSTER birthday cake marks beginning of the 16th year of broadcasting for Mutual's Man on the Farm. Group about ready to lower the axe includes (l to r) Carroll Marts, general manager, midwest operations, MBS; Chuck Acree, program m. c., and A. A. Dennerlein, director, Ful-O-Pep feed service, Quaker Oats Co., Chicago, sponsor.**

- the NBC station serving greater YOUNGSTOWN, O. 30th population area in U.S. 5,000 WATTS WFMJ Duplicating on 50,000 Watts FM

Stepping up COPPER PRODUCTION

Pictured here is the headframe of Anaconda's Kelley Shaft at Butte, Montana... engineered to increase copper production by tapping the vast deposits of low-grade copper ore in "the richest hill on earth".

This 178-foot headframe straddles the huge new Kelley Shaft at Butte, Montana... focal point of Anaconda's $27,000,000 Greater Butte Project.

Beneath it lie at least 130 million tons of proved low-grade copper ore, not economically practical to mine heretofore. The process used is an adaptation of the mining method called "block-caving". The Greater Butte Project is already producing at a rate of more than 7,500 tons of ore per day, with a steady increase scheduled until a daily output of 15,000 tons is achieved... all in addition, of course, to Anaconda's present production from other areas of Butte hill.

This $27,000,000 project is but one phase of Anaconda's company-wide expansion, improvement and modernization program. Increased zinc capacity... a new open pit copper mine being readied for production at Yerington, Nevada... an immense new sulphide plant now starting to produce additional copper in Chile... an aluminum reduction plant... modernization and expansion of fabricating plants... are other phases of this Anaconda program.

6 Billion Dollars? Yes, Buster, that's a bill you inherit. It's the cost to date of government power—federal-government-in-the-electric-business—the money put out for electric power plants, electric lines and all that goes with them.

Big Baby, Eh? You bet. Government power has grown like a giant. It's 35 times bigger than it was 20 years ago. In money, that's a big chunk of the whole U. S. debt. Just paying interest on it costs Americans over $150 million a year.

Who Gets Nicked? Well, your parents do. And everyone else. In the taxes they pay on food, clothing, smokes, income—even baby powder. That means that everybody's taxes help pay the electric bills of the people served by government power.

Is This Necessary? Not a bit. Most people get electric service from an independent electric light and power company. They pay for what they use, and at low rates—for electricity is a real bargain. And no one else has to pay part of their bills.

Why Can't Somebody...? Do something about it? Everybody can. By objecting to any more unnecessary government power projects, and helping Congress resist those who want a $45 billion tax-supported federal monopoly of electricity.

I'll Yell Bloody Murder! Even better than that, Sonny. Encourage your family to help get the federal government out of all business as much as possible, so you won't grow up to be just another helpless subject of a socialist nation.

America's Electric Light and Power Companies*

From where I sit by Joe Marsh

Pretty "Foxy" Terrier

Talking about dogs the other night—and Sandy Johnson topped everything off with a tall story about his fox terrier, "Boscum."

According to Sandy, "Comes bird season and that dog won't stir if I take down my rifle. Same if it's deer season and I go for my shotgun—he won't move, but he's scratching at the door if I so much as look at my rifle!"

One day, Sandy decided to fool him. He took down both his shotgun and his rifle—and swish, Boscum was on his way! So Sandy put the guns back and took out his fishing rod. He went outside and there was Boscum—digg ing like crazy for worms!

From where I sit, a dog that can outguess humans is as rare as a human that can outguess other humans. For instance, I like a glass of beer with lunch but I wouldn't think of pouring you one without first asking. Everybody has preferences—and it's finding out what they are and respecting them that keeps freedom from "going to the dogs."

Joe Marsh

"public interest" we must consider the effect of the merger not simply upon the owned and operated network and television network and its competitive status.

21. We have observed that the merged network, in volume of broadcast is an integral and necessary part of radio and television broadcasting. It has been recognized that the public interest is served by competition in the markets, both radio and television. Indeed, it was our concern with the necessity of stimulating competition in network broadcasting that led to the establishment of ABC in 1943 as an independent, competitive network. However, while ABC has been aggressive in securing rights and in creating, expanding, and utilizing its full quota of owned and operated television stations in major markets, it is one of the few networks that have been able to compete effectively with NBC and CBS either in radio or television.

22. The dominant positions of NBC and CBS in network broadcasting, both in radio and in television, together with certain reasons for their position, have been discussed in detail in paragraphs 109 to 110 of the findings and there need not be repeated here. ABC has been unable to compete effectively with NBC and CBS, principally because it lacks the financial resources to strengthen its positions. It has been in the minority in revenue-producing activities of the other networks or the networks to which they are associated. Increased financial resources are necessary to make its leadership program structure, build larger audiences, and thereby compete with the other networks. ABC has attempted from time to time to secure additional capital but with only meager success. The merger of ABC with UPT would enable the combined company to attract to a non-diversified and somewhat speculative area of the business, a network of stations that are profitably operating. This would strengthen the potential growth of ABC to a point where it would be able to compete more effectively with NBC and CBS.

23. The financial, organizational and operational details of the proposed merger are set forth in paragraphs 101 to 128 of the findings. They indicate that the merged company will have an ABC Division which will be a self-contained unit having full charge of the day-to-day operation of existing ABC-programs. This Division will be responsible for the management of ABC, particularly with respect to the operation of the ABC television stations. The ABC Division will have the ability to make the successful ABC-UP network to compete successfully and profitably in the market for television and radio. The ABC Division will also have the capacity to expand and strengthen the ABC network to a point where it will be able to compete successfully in the market for television and radio.

24. The financial, organizational and operational details of the proposed merger are set forth in paragraphs 101 to 128 of the findings. They indicate that the merged company will have an ABC Division which will be a self-contained unit having full charge of the day-to-day operation of existing ABC-programs. This Division will be responsible for the management of ABC, particularly with respect to the operation of the ABC television stations. The ABC Division will have the ability to make the successful ABC-UP network to compete successfully and profitably in the market for television and radio. The ABC Division will also have the capacity to expand and strengthen the ABC network to a point where it will be able to compete successfully in the market for television and radio.

25. The financial, organizational and operational details of the proposed merger are set forth in paragraphs 101 to 128 of the findings. They indicate that the merged company will have an ABC Division which will be a self-contained unit having full charge of the day-to-day operation of existing ABC-programs. This Division will be responsible for the management of ABC, particularly with respect to the operation of the ABC television stations. The ABC Division will have the ability to make the successful ABC-UP network to compete successfully and profitably in the market for television and radio. The ABC Division will also have the capacity to expand and strengthen the ABC network to a point where it will be able to compete successfully in the market for television and radio.
audience for programs of its broadcast competitors for ABC-PT theatres...

25. In the present facts, there is no warrant for a finding that such an...theatre, or the other...the proposal of UPT's theatres and the ABC network to have or to maintain such a single source of film...a substantial competitive advantage over competitors, and in the exercise of control, a monopoly, would not have promoted competition...the need to maintain such a single source of film to secure the public interest...in the area of the public service to the public.}

26. There was no finding of any unusual circumstances which would indicate that a single source of film, as in the case of UPT's theatres and the ABC network, would be an essential factor in the public interest. In any event, the effect of such a single source of film would be substantially to lessen competition or tend to monopolize in any line of commerce in any section of the country.

mount Pictures Corporation controls Allen B. Bronson Laboratories, Inc., within the meaning of, and for the purposes of, both Section 310(b) of the Communications Act of 1934, as amended and Section 309(b) of the Commission’s Rules and Regulations, and that Paramount Pictures, Inc., possesses such interest as is r
anged to and did transfer its stock in DuMont to Paramount Pictures Corporation.

Introductory Statement of Com.
Henrock (Dissenting)

Since in my opinion the record in this pro
ceeding clearly manifests the support of the
majority’s conclusions, as well as the findings
thereof, I must dissent in large part to the
Commission’s decision. Only with respect to
the determination that Paramount Pictures
Corp. was controlled by the outgoing board with
the Commission’s decision; in all other respects I do
not dissent. It is not my purpose to weigh
the evidence before us and the necessity of
determining which view we believe
that we find:
I. The proposed merger of the American Broadcas
ting Company and United Para
mount Pictures, Inc., should not be approved
by the public
interest, convenience and necessity, and therefore should not be approved.

II. That Paramount Pictures, Inc., and United Para
mount Theatre, Inc., should be permitted to own suc
cessful commercial stations. Details and Reasons on request. Box 7895, B.T.

Mixed Blessing

THE FCC's decision in the ABC-United Paramount case opens the way for gratifying expansion by the new AB-PT and by CBS, which acquires WBKB (TV) Chicago as a by-product to the merger. What it means for the DuMont Television Network is not as easy to predict.

In reversing its hearing examiner's recommendations, which we thought to be eminently sound, the FCC decided that DuMont is controlled by Paramount Pictures. The immediate effect of this, of course, is to deprive DuMont and Paramount Pictures of owning more than five TV stations between them. The longer-range effect is harder to foresee.

The operating history of DuMont and Paramount Pictures has been that they have gone virtually their own ways as far as television broadcasting was concerned. Paramount owns and operates KTLA (TV) Los Angeles; DuMont, WABD (TV) New York, WTTG (TV) Washington and WDTV (TV) Pittsburgh. It is an indication of the separateness of the operations that KTLA is not even an affiliate of the DuMont network.

Here we have two large companies whose broadcasting histories are quite disassociated but who are not adjudged to be in business together. Plainly they either must get into business as a single operating entity, or split apart so distinctly that even the myopic FCC can be shown the gulf between them. Neither course would be easy.

In approving the ABC-United Paramount merger, the FCC found that it would achieve the stimulation of competition which that agency professes to desire. We cannot help but point out that the FCC's decision with regard to DuMont and Paramount Pictures seems to provide the exact antithesis and indeed carries the threat of hampering the DuMont Television Network at a time when its competition has been unleashed for new advances.

No reasonable person can disagree with the soundness of the Commission's approval of the merger and the transfer of WBKB to CBS. There is room for serious disagreement, however, with its decision regarding DuMont and Paramount.

Good Fellows Regime

PERHAPS NO enterprise has had more crises than broadcasting. There are still plenty of them. But they're hitting in different areas.

Ten days ago, the NARTB (nee NAB) held its regular quarterly board meeting at Bellevue, Fla. Business was handled without a single burning issue, and with no fireworks. Time was when an NAB board session invariably meant controversy, invective and probably reorganization.

The NARTB is in good health, mentally and financially. In the year and one-half that Harold Fellows has served as president, he has succeeded in welding into a smoothly working team a group of experts who theretofore hadn't worked together well. The esprit de corps is at its highest.

We were happy to see the board elevate to vice presidential status such NARTB executives as Bob Richards, Dick Doeherty, Ralph Hardy and Thad Brown Jr. They were given security hitherto unknown in NARTB, through three-year contracts.

The principal function of the broadcasters' trade association has always been in two fields—legislation and regulation. Today relations are better both with Congress and with the FCC. The association has unprecedented acceptance and prestige. It speaks nobly for the Fellows regime.

Cradle to Grave TV

SEVERAL issues have elapsed since we last discussed on educational television and the excesses that have been committed in its name against the taxpayer. Evidently radio and television broadcasters feel that the fight isn't worth the candle; else how can we explain the almost complete silence from broadcasters' ranks?

Fortunately, there is one organization about to speak out. The Illinois Broadcasters Assn. has in preparation a brochure which it intends to submit to the Illinois Legislature, urging assemblymen to make no commitments for state funds for educational television stations until they have heard testimony on cost, plans and possible results. We've seen the first draft and we commend it to all broadcasters and all legislators as "must" reading.

The brochure cites the unrealistic costs used by educators in estimating their installation charges and in operation. It points out that the initial cost isn't important, but that taxpayers' money must be pledged in perpetuity. It recites the failure of schools to provide low-cost programs or utilize the time offered by commercial stations, which have the established audiences. And it points out that educational stations in radio cannot show a single example of outstanding audience acceptance. It cites the 60-mile coverage limitation in TV, and that most of the people footing the TV bill in any given state would get no service.

All these reasons have been cited before. The real hooker, however, comes in a projection of what could happen if several hundred educational stations are authorized. Says Leslie C. Johnson, WHBF-TV Rock Island, chairman of the TV Committee of IBA:

"In the background is the spectre of a giant coast-to-coast educational network of 500 to 600 stations, operated and controlled by educators, either immediately or ultimately of necessity by state and federal Governments. Its purpose: Controlled adult education. What a propaganda weapon! * * * * An educational job from the cradle to the grave. * * * * The hand that controls the purse strings is all-powerful in politics."

We think Mr. Johnson spoke an erudite mouthful.
...for three decades, the great audience and fine facilities of WLW, the nation’s most merchandise-able station, have afforded advertisers sales depth unavailable anywhere else. Now, the WLW-Television stations in Cincinnati, Dayton and Columbus offer advertisers this same leadership.
