There are many reasons why WOR works—but two of them make WOR unique among radio stations.

First, more people—29,439,000* (one-fifth of the total U.S. population)—can hear your sales message over WOR.

Second, 31 years of selling more products for more advertisers than any other station in the country provides active proof that WOR can sell your product in the world’s most competitive market.

Let us give you the specific reasons why WOR will work for you.

**IT WORKS!**

Our Fifth Anniversary...
a time to say “Thank You” 403 times

We're sentimental at WTVR. That warm glow of gratitude and pride fairly overtakes us on anniversaries. Gratitude to our 403 wonderful regular weekly clients, among them America's most distinguished companies. Gratitude to our loyal viewers, many of whom have been with us since April 22, 1948, the day we began commercial operation. And pride in being “The South's First Television Station.” Today we're still Richmond's only TV station. And soon we shall be serving you even more powerfully! We now have under construction a 1,049 foot antenna in the heart of Richmond. Upon completion WTVR will be operating with Maximum Height and Maximum Power—100,000 watts. As always, you can expect maximum results. We hope you will be with us on our next anniversary!

Los Angeles
San Francisco
IT TOOK wind-up hours of NARTB convention in Los Angeles last week to erupt into those inevitable reports of impending changes in major network affiliations, both radio and television. As usual, reports were impossible to confirm, although there were some admissions of “conversations.” Cities linked in “negotiations” looking toward switches from NBC to CBS included, alphabetically: Buffalo, Kansas City, Milwaukee, Norfolk, Oklahoma City, Richmond, Rochester.

REALIGNMENT of timebuying staff at Cunningham & Walsh underway. Robert Bauer and Fred Cusick, timebuyers, signed. Bob Guthrie and Bill White remain under supervision of Newman F. McEvoy, media director.

NBC’S NEWEST board member, John K. West, vice president in charge of West Coast operations, is moving to New York, effective at once, presumably in consultative capacity to Frank White, NBC president. Mr. West, former public relations vice president of RCA Victor, is expected to return to Los Angeles headquarters after his special mission is completed.

DESPITE SUCCESS of Los Angeles NARTB convention, next two conventions (1954-55) will be held in Chicago. Palmer House expected to be headquarters for next year’s event. Difficulty of accommodating engineering exposition, which really pays convention freight, may result in all future conventions being scheduled for Chicago, or possibly New York.

CLEAR CHANNEL Broadcasting Service, which functions to protect sanctity of Class 1-A channels for rural and remote coverage, has established its position for planned hearings on ratification of NARBA conference treaty of 1949. It opposes Senate ratification at this time because Mexico is not party to treaty, maintaining it isn’t obstructing Senate action. Hearings on treaty ratification are due probably this month before subcommittee of Foreign Relations Committee, with Sen. Tobey (R-N.H.) as chairman.

FOLLOWING resounding address of Gen. David Sarnoff in keynoting NARTB convention in Los Angeles last week, broadcasters quipped he had taken over as “chairman of the board in charge of station relations.” In another quarter, with bureaucratic flavor, comment was: “FCC has now heard the oral argument on compatible color.”

FEDERAL TRADE Commission’s experience with “bait” advertising on radio-TV of reconditioned sewing machines and vacuum cleaners comes first-hand as well as through consumer complaints (see story page 74). Wife of one FTC official recently got “burned” in sewing machine deal stemming from TV ad, while another career employee has obtained information to prove a local firm substituted a 1900 Singer in “repairing” her 1923 model.

PROCTOR & GAMBLE Co., Cincinnati (Crisco), preparing 52-week spot radio campaign of one-minute daytime announcements in number of scattered small markets, through Compton Adv., N. Y.

RECORD of some sort was set Wednesday by “board” of FCC while principal entourage attended NARTB Convention. Handling only non-controversial items, Comrs. E. M. Webster and John C. Doerfer, acting as board, handled agenda of 30 items in only 51 minutes. Both broadcast and non-broadcast items were included.

IF, AS and when compatible color is authorized, write off any notion of converters or adapters. They’re too complicated and expensive. So manufacturers will stress new sets only.

WLOE-AM-FM Leaksville, N. C., considering promotional drive involving use of binaural system of broadcasting. Station expects to install equipment shortly and launch campaign aimed at stimulating listener interest.

CONCURRENT with FCC Chairman Rosel H. Hyde’s call to prospective TV station operators to help the Commission cut workload and TV processing time by limiting hearing evidence to essentials (story page 54), Washington attorneys are watching progress of “paper” comparative hearing for San Juan vbf Ch. 4 now being “heard” by Examiner Benito Giguene. Contest between WKVM and WAPA San Juan is set for further “session” June 1.

IN THIS ISSUE

NARTB CONVENTION

NARTB’s 31st convention reflects changing times and economics as 1,806 delegates hear challenge to attain still greater heights and FCC reassurances of “free” broadcasting. Page 27.

BAB outlines plan to add $50 million to next year’s radio billings by piling up evidence of the huge radio audience and the medium’s selling ability. Page 28.

NBC and CBS affiliates in separate moves act to set up organizations to establish greater independence in relationships with networks. ABC and MBS affiliates seemingly approve joining the first groups in an all-industry affiliates committee. Page 29.

NARTB President Harold Fellows in his annual report cites the association’s enlarged membership, AHP recognition of broadcasting and four major influences bearing on the industry. Page 36.

Brig. Gen. David Sarnoff keynotes industry feeling in telling delegates radio and television are going through revolutions in which each must work out its own destiny. He makes bold predictions on color and pay-television, number of TV stations and new electronics advances. Page 40.

Global TV in the near future is predicted by NARTB Engineering Manager Neal McNaughton. Page 46.

Broadcasters are warned to stick to their rate cards lest they undermine their relationships with advertisers and agencies. Allerton, Morency and Kobak join in admonitions. Page 50.

FCC is not discriminating against TV applicants because of their business affiliations, Chairman Rosel H. Hyde tells delegates. Page 54.

Members review progress in TV programming ethics, uhf engineering. Page 58.

FACTS & FIGURES

Radio revenue (AM and FM) rose 5% for total of $473.1 million in 1952, FCC reports. Income was $62.6 million. Revenues for AM-FM-TV totaled $809.4 million. Page 65.

PROGRAM SERVICES

Broadcasters win victory as ASCAP accepts industry’s position in battle on local radio co-op announcements. Page 71.

GOVERNMENT

FCC and FTC take a sharp look at “bait” advertising on radio and TV with a view to acting on listeners’ complaints. Page 74.

FEATURES

NARTB’s five-city survey on the ingredients that make an AM station profitable, both with and without TV competition, are outlined as reported to delegates in Los Angeles. Page 86.

UPCOMING

May 5-8: Canadian Assn. of Advertisers, Royal York Hotel, Toronto.

May 9: Catholic Broadcasters Assn., Middle Atlantic District Meeting, Hotel Denia, Atlantic City.

May 18-21: Electronic Parts Show, Conrad Hilton Hotel, Chicago.

May 19-21: Pennsylvania Assn. of Broadcasters Annual Convention, Bedford Springs Hotel, Bedford.

(For other Upcomings, see page 11B) May 4, 1953 • Page 5
Any Advertiser CAN and most advertisers SHOULD use

SPOT RADIO

REPRESENTED NATIONALLY BY

EDWARD PETRY & CO., INC.
SPOT RADIO COMES IN MANY SIZES

depending on the emphasis you want on your product, you can buy

★ a one-hour show once a week
★ a 15-minute news show 5 days a week
★ a 5-minute weather report 6 days a week
★ six participations a week in a leading local woman’s show
★ selected minute availabilities in top listening high-rated local live programs
★ a saturation of chainbreaks carefully scheduled to hit top listener audiences

First find your market problem and see what you can afford to spend on advertising and sales, then work in one of the combinations (there are many more!) on any of these great stations.

NOW YOU CAN COVER ALMOST ALL OF ARKANSAS WITH ONE ULTRA-MODERN STATION—
THE NEW 50,000-WATT KTHS! (CBS SOON!)

- the only 50,000-watt Class 1-B clear channel station in the State
- the only Arkansas station with 28 years of continuous broadcasting experience—
- formerly located at Hot Springs with 10,000 watts on 1090 KC.
- now broadcasting from Little Rock, with 50,000 watts on 1090 KC.
- now offers primary daytime coverage of 1,002,758 people, of whom more than 100,000 do not receive primary daytime service from any other station
- secondary coverage (between .5 and .1 contours) adds another 2,369,675 people!
- superb new equipment — superb new programming planned for every segment of Arkansas' population
- same ownership and operation as KWKH, Shreveport, whose KNOW-HOW has made KWKH one of the South's great stations
- EFFECTIVE JUNE 15th, KTHS JOINS THE CBS RADIO NETWORK
- ask your Branham Man! Several truly unusual "charter opportunities", now open, may not be available again for years

**PROGRAM Praised**

NARTB Convention delegates expressed high praise for organizing job done by Convention Committee in arranging week-long program that ended Friday at Los Angeles. Program was arranged under direction of Claire R. McCollough, Steinman Stations, committee chairman. Other committee members were Jack Harris, KPRC Houston; Henry W. Slavick, WMC Memphis; Howard Lane, KEAC Los Angeles; Hugh B. Terry, KLVZ Denver, and Albert Johnson, KÖY Phoenix, Ariz.

Small Market TV

Called Risky Venture

FINANCING TV stations in markets under 100,000 population is risky venture, was conclusion of broadcast engineering conference symposium at NARTB Convention (see story, page 56). Panelists collectively painted black picture pointing out that minimum of $300,000 worth of equipment is necessary for small station, including transmitter, studio equipment and buildings. Operating costs they estimated as from $175,000 to $300,000 yearly, with minimum of 35 to 40 hours weekly costing $18,000. Warning, was given that national advertiser would be reluctant to buy station time for such limited coverage, passing up small market for more heavily populated areas. Local advertisers will be enthused about TV until contract time comes along, it was agreed.

Fellows Praised for Work

FOLLOWING earlier resolutions (see story page 60), NARTB President Harold Fellows was praised for his administration and for staff esprit de corps. Endorsement was given radio and TV codes as self-regulatory measures.

Convention voted thanks to networks and BMI for providing Thursday banquet program. Convention work of Robert K. Richards, administrative vice president, and C. E. Arney Jr., secretary-treasurer, praised. Vote of thanks given Southern California Broadcasters & Telecasters. H. Quentin Cox, KGW Portland, Ore., was chairman of resolutions committee.

Westinghouse Sales Rise

SALES of Westinghouse Electric Corp. in first quarter were $382,226,000 compared with $233,820,000 in corresponding 1952 quarter, President Gwilym A. Price reported last week to board in New York. Net income for year's first quarter was $16,858,000 against $13,485,000 and net earnings per share equaled $1.04 on 15,765,116 common shares outstanding vs. $0.96 on 15,549,697 shares same period last year. If excess profits tax expires June 30, as scheduled, Mr. Price said net income would be increased to $19,171,000, or $1.19 per common share.

**B U S I N E S S B R I E F L Y**

**PINPOINT Sponsor** • Murine Co., Chicago, has signed to participate in Mutual's new "Pinpoint Plan," which permits advertisers to sponsor variety of shows that already are partially sponsored on most of network's stations.

Contract, which covers 13-week period starting May 25 and totaling 29 broadcasts, calls for sponsorship of Titus Moody, Van Deravanter & The News, Gabriel Hunter, Twenty Questions, and Queen For A Day.

**BOXING BOUGHT** • Admiral Corp., Chicago, has signed for one-time only sponsorship of International Golden Gloves bouts from Chicago over DuMont Television Network June 16, starting at 10:30 p.m., EDT.

Agency: Erwin, Wasey & Co. Inc.

**AGENCY NAMED** • Home Style Food Products Co., Waterloo, N. Y. (Greenwood's line of vegetables in glass), names Paris & Peart, N. Y., to handle advertising. Donald C. Porteous is account executive.

**MAZOLA HALF-HOURS** • Corn Products Refining Co., N. Y. (Mazola Salad oil), buying Ziv-transcribed Guy Lombardo half-hour radio programs for use twice weekly, chiefly in daytime, on stations in eight California markets, starting June 1. Agency: C. L. Miller Co., N. Y.

**GF SIX-WEEK SHOT** • General Foods Corp., N. Y., planning six-week spot radio campaign in selected small markets, using announcements on Wednesday, Thursday, Friday of each week for Maxwell House Coffee. Agency: Beazon & Bowles, N. Y.

**SUMMER SHIFT** • American Tobacco Co., through BBDO, N. Y., on June 20 moves Private Secretary, now on CBS-TV, Sun., 7:30-8 p.m. EDT, to NBC-TV as summer replacement for Your Hit Parade (Sat., 10:30-11 p.m.), and puts new film drama series, Your Play Time, into Private Secretary time on CBS-TV.

**MORE TV Station Starts**

REPORTS received late Friday from TV stations beginning operation indicate WKNX-TV Saginaw, Mich., uhf Ch. 57, affiliated with all four networks, will start regular programming tonight (Monday). WLBC-TV Muncie, Ind., which started airing test pattern last Friday night, plans to begin regular programming May 8, including features from all four networks (see early story page 78).

**TV Network Grows**

AT&T Friday connected WCOS-TV Columbia, S. C., with intercity TV network facilities via new video link with Charlotte-Jacksonville section. TV network programs now available "live" to 131 TV stations in 86 U. S. cities according to phone company's count.

EVELL K. JEIT, WWMAR (TV) Baltimore, won free RCA TV set at NARTB Convention Friday to add to his collection. Ray Buttrick, WCOS Bilotiz, Miss., won General Electric TV set and J. R. Livesey, WLBT Mattoon, Ill., won choice of mountain burro or $50, selecting latter. They were door prizes at closing session.
“Speedy” keeps steady company with a charming lady who will purchase a billion dollars’ worth of merchandise this year. His words of wisdom are listened to attentively and his advice is followed emphatically.

“Speedy” TVisits with her in the living room during her moments of leisure, AMuses her in the kitchen while she prepares lunch, and even accompanies her when she drives to the shopping center.

For years, the advertiser wishing to convey his sales message to rich “Miss Toledo Market”, has learned that, entrusted to “Speedy’s” care, his message will definitely find a receptive audience with this “Billion Dollar Baby”.

WSPD
TOLEDO, OHIO

Storer Broadcasting Company
TOM HARKER, NAT. SALES MGR., 118 E. 5TH STREET, NEW YORK

Represented Nationally by KATZ
EDUCATIONAL AID

MINIMUM offer of $10,000 per year for five years toward operating costs of San Antonio educational TV station would now include its ERP 100 kw visual, and free legal services by firm of San Antonio attorneys, and FCC offered services of WOAI-TV staff members.

Transmitters Shipped

THREE 25 kw vhf transmitters, one 10 kw vhf transmitter and one 1 kw uhf transmitter shipped last week, RCA Victor Div., Camden, N. J., said Friday. WLVT (TV) Cincinnati, WLWC (TV) Columbus, both in Ohio, and WAGA-TV Atlanta, Ga., will receive 25 kw amplifiers which will boost their effective radiated powers to 100 kw visual. WBEN-TV Buffalo, N. Y., will get 10 kw vhf transmitter which will increase its ERP to 100 kw visual. Uhf transmitter, output of 1 kw visual, sent to WICA-TV Ashtabula, Ohio, post-thaw grantee.

Mr. President’ Honored

ABC radio's Mr. President series (Wed., 9-9:30 p.m.), said Edward Arnold and depicting incidents in lives of American Presidents, on Friday was presented with Veterans of Foreign Wars' Award of Merit. Award was presented to Raymond Diaz, national program director for ABC radio, by VFW Commander in Chief James W. Cuthran and Vice Admiral Leland P. Lovett, U.S.N. Ret.

commence commercial operation on vhf Ch. 11, effective April 18-May 5.

WKNX-TV Saginaw, Mich.—Granted STA to commence commercial operation on vhf Ch. 17, effective May 1-May 11.

AM Ownership Shifts

WKSR Pulaski, Tenn., is sold to James R. Stephens, concrete manufacturer, for $60,000. Seller is Richland Bstc Co. (Fred Fleming and Third National Bank) in Nashville, executor of estate of W. K. Jones, deceased. Negative control of WTN'T Tallahassee, Fla., is acquired by Emmanuel Joanos (13.4%) through purchase of 36.6% interest of Frank W. Peper. Consideration is $30,006. Frank W. Hazlton retains negative control. Both transmitters are subject to FCC approval.

Two New AM Bids

B. F. J. Timm (WDMG Douglas, Ga.) and stockholder in WMFS Chattanooga, WLBS Birmingham and WGGAA Cedarhurst, Ga.) applies for 1280 kc, 1 kw day in Jacksonville, Fla. Bid for Wilmington, Del., 900 kc, 1 kw daytime, was filed by Rollins Bstc Co. (WJWL Georgetown, Del.).

FOSSIL marks a peak in 1954 sales

FOSSIL watches increased their sales 43% in 1954 over 1953 and 49% over 1952. The company had sales of $13.4 million in 1954, compared with $9.3 million in 1953 and $7.4 million in 1952. Fossil is a subsidiary of the E. H. Fears Co., which also manufactures Art Deco watches. President of Fossil is J. G. K. S. Archbold, and president of Art Deco is P. A. Archbold.

FOSSIL was started in 1953 by J. G. K. S. Archbold, and has since grown to be one of the leading watch manufacturers in the world. The company has a number of different models of watches, including the Fossil Sport and the Fossil Classic.

FOSSIL watches are known for their reliability and durability. The company uses high-quality materials and state-of-the-art technology to produce its watches. FOSSIL watches are sold in stores around the world, including department stores, specialty shops, and online retailers.

FOSSIL watches are also known for their affordability. The company offers a wide range of prices, from basic models to more expensive luxury watches. FOSSIL watches are made in a variety of styles, including analog and digital models, and in different materials, such as stainless steel, leather, and metal.

FOSSIL watches are popular with consumers of all ages, and the company has a loyal customer base. The company continues to innovate and improve its products, and is committed to providing high-quality watches at an affordable price.

Here are the facts about . . .

WJTV
Mississippi's First Television Station

Through-the-day programming?

Yes . . . Three months ago WJTV "hit the air," and already Mississippi's enthusiastic viewers watch programming that begins each day at ten o'clock in the morning and goes straight on through to midnight.

Local live programming?

Yes . . . The live programs that WJTV is producing . . . with multiple-camera operation . . . number more than 30 a week, plus regularly scheduled weekly remotes.

Interconnected network programming?

Yes . . . Eight of the nation's ten most-watched shows, according to Videodex's March ratings, are carried by WJTV.

Wide circle coverage?

Yes . . . The Product Performance Division of Philco Corporation determined in a survey throughout the area that WJTV is being received . . . and clearly received . . . 50 miles away in all directions from the broadcasting site.

Audience approval?

Yes . . . Proof that viewers are enthusiastic about the entertainment WJTV is bringing them is the continuing large increase in number of sets. From fewer than 5000 just prior to the time WJTV began operations, the number of sets in the area has increased to more than 15,565, according to WJTV's monthly independent agency survey of distributors and leading dealers.

Industry-wide acceptance?

Unquestionably . . . Reaching most of the viewers most of the time, and all of the viewers much of the time, WJTV's operation has proved to the industry that it gets results . . . profitable results . . . for foremost national spot, network, regional and local advertisers.

There are the facts . . . and the result they add up to is this: WJTV is giving Mississippi's viewers and America's leading national spot and network advertisers UHF INTERFERENCE-FREE PICTURE PLUS VHF COVERAGE.
The sun shines bright on WMCT, Memphis

205,000
TV homes in Memphis area
According to latest distributors' figures WMCT reaches more than 205,000 homes in the 2 billion dollar mid-South market.

Average Hooper
12 Noon-5 PM
Cost per thousand homes
$1.78

21.4%

In the afternoon, average number of homes reached is 43,870.
*Based on Class "C" minute rate.

Here's proof that if you are selling the Memphis market, your best advertising buy, dollar for dollar, is WMCT.

HAMLET
NBC-TV, Sunday, April 26, 3:30-5:30 p.m. EDT
Sponsored by Hallmark Greeting Cards.
Agency: Foote, Cone & Belding.
Approx. Production Cost: $25,000.
Produced by: Maurice Evans Productions.
TV Adaptation: Mildred Freed Alberg and Tom Hughes Band.
NBC-TV executive producer and director: Albert McCleery.
Production supervisor: George Schaefer.
Cast: Maurice Evans, Ruth Chatterton, Joseph Schildkraut, Sarah Churchill, Barry Jones, Wesley Addy, William Smithers, others.

A RETROSPECTIVE consideration of Maurice Evans' televised Hamlet affirms the original conviction that it was a superb tour de force by Mr. Evans and a generally rewarding adaptation of Shakespeare to the most modern platform. It also emphasizes the pioneering nature of the work which was not so apparent in the immediate spell of the performance.

It is not to profane the memory of an extraordinary event to say that if Mr. Evans and his same cast were to undertake another television presentation of Hamlet, as it is to be fervently hoped they will, they would be able to improve upon this first venture into the most trying of all dramatic media. The intricacies of a live TV production of such magnitude are appalling. It was inevitable their effects would be felt by the production staff and the cast. The stage hand who wandered through the set during one of Hamlet's speeches may be excused under the taxing circumstances.

One must assume that the technical demands of television were responsible for the uneven playing of Ruth Chatterton and Joseph Schildkraut in the pivotal roles of Queen Gertrude and King Claudius. The professional abilities of both have been repeatedly demonstrated in other media, but neither seemed at ease April 26.

Miss Chatterton's and Mr. Schildkraut's lusterless characterizations suffered additionally by comparison with the uniformly competent performances given by other players. Sarah Churchill was a completely satisfactory Ophelia. (Perhaps it is significant that she is experienced in television drama.)

Needless to say, Mr. Evans had his own job under complete control. Only in one scene, and that unfortunately the last of the play, did he forget the merciless curiousity of the television camera. As the captains carried the dead Hamlet from the court, the camera zoomed in for
a close-up and found Hamlet blinking under the lights.

The adaptation by Mildred Freed Alberg and Tom Hughes Sand, though leaning heavily on the editing done in World War II when Mr. Evans played a shortened Hamlet to G.I. audiences, was an ingenious work of its own. Despite the omission of entire scenes from the original play, the television Hamlet gave no appearance of a condensation, except perhaps to the Shakespearean student.

The production and direction of Albert McCleery and George Schaefer were imaginative but unobtrusive. Settings, lighting and camera work gave fluidity to the play without straying too far from classical presentation.

To Hallsmark Greeting Cards, NBC-TV, Mr. Evans and associates the television audience owes a vote of thanks. Despite the flaws inherent in this pioneer production, it is to be hoped that TV has not said a permanent good-bye to the sweet prince or to the many other imperishable characters whom Shakespeare invented and who, it now is proved, can be as lively on a 21-inch screen as they were in the Globe Theatre.

**BOB AND RAY SHOW**

NBC-TV, 7:30-8 p.m. Mondays, EDT.

Director: Grey Lockwood.

Writers: Bob Eliot and Ray Goulding with additional material by O. Leo Leahy.

Background Music: Paul Taubman.

Sponsor: Bob Denmore.

NOT too long ago, radio audiences and subsequently TV fans took a shine to Bob Eliot and Ray Goulding, a team whose stock-in-trade is serving up double doses of comedy in the dead-pas tradition. Last Monday evening, Bob and Ray started a new sustaining quarter-hour show on NBC-TV. If you like your comedy on the quiet, effortless side, the Bob and Ray Show will be around each Monday to help take care of your entertainment needs.

The format of the new series will be as flexible as Messrs. Eliot and Goulding choose to make it, since they write as well as star in the show. On the first program, viewers got a fair cross-section of their style—a demonstration of a new and designedly confusing parlor game for restless souls at a total loss when the TV set goes on the blink; a parody on a television sports caster whose current crusade pitted him against alarmists who alleged that water skiing was fixed (!), and a dramatization of a teen-age problem written to the Eliot-Goulding teen-age clinic by a parent in search of a solution for her offspring’s momentary crisis.

There was time for a commercial too. An authoritative announcer, obviously sold on what he was selling as successful announcers must be, stressed the urgent need for people in his audience to use wrappers to dispose of chewing gum because it’s messy to get out of the rug etc. etc. And so it went.

In the writing and presentation of their material, both performers, who use the underplay technique to its best advantage, show tremendous intuition into the obvious—a comedy trick that accounts in large measure for their appeal. Humor in a show such as this springs from intense, serious treatment of a basically ridiculous situation. If forthcoming programs follow the general pattern of the first telecast, the Bob and Ray Show will continue to have its humorous moments.

This is Mr. A. P. Weed

"The Covington County Bank (of Andalusia, Alabama, of which he is president) is in its second year of sponsoring Fulton Lewis, Jr., on WCTA. During the period of our sponsorship, our deposits have practically doubled. We feel that Mr. Lewis has contributed immensely to our increased business. We also believe that in continuing our sponsorship we will continue to create new users of our service."

This is what he says

This is Fulton Lewis, Jr.

whose 5-times-a-week program is available for sale to local advertisers at local time cost plus pro-rated talent cost. Currently sponsored on 364 Mutual stations by 759 advertisers (including 60 financial institutions), the program offers a tested means of reaching customers and prospects. Check your local Mutual outlet or the Cooperative Program Department, Mutual Broadcasting System, 1440 Broadway, NYC 18 (or Tribune Tower, Chicago 11).
Only ONE can be FIRST and in Houston it's KPRC-TV

first in time . . . first in know-how . . . first in facilities . . . first in the homes of Houstonians! And now, KPRC-TV is first to combine with AM and FM to give Houston a complete, new Radio-Television Center, one of the finest, most modern in the nation.

40,000 square feet of completely air-conditioned floor space

3 LARGE TV STUDIOS
- A garden studio for outside shows
- An audience-participation studio seating 200 people
- 4 radio studios
- Doorways in all television studios, large enough to admit automobiles
- 3 rear screen projectors — one for each studio
- 12 microphones in each studio
- 3 film previewing studios
- Viewing booths over each studio
- Complete audition facilities
- Separate controls for directors and engineers
- Three "memory booths" for announcers and actors
- 4,000 square feet of prop room space

COMING SOON!
New 750-ft. tower
100,000 Watts

KPRC-TV is now telecasting at 65,000 watts of power . . . will complete new 750-foot tower and telecast at maximum 100,000 watts sometime in June.
J. Frank Gilday
on all accounts

J. FRANK GILDAY, vice president and radio-television director of Cecil & Presbrey Inc., New York, is no mail room boy-to-vice president agency executive. In fact, he didn't get into the business until he was 32.

He attained his present position by a circuitous route—as a construction engineer for a New York building company, various sales and buyer jobs with Macy's department store in New York, and as an account executive with an agency a colleague at Macy's had formed.

Mr. Gilday brings to the job of supervising a staff of 25, which handles such accounts as the Whitehall Pharmacal Co., Sylvania Electric Co. and the Electric Auto-Lite Co., a realistic approach that mirrors his background. He has a deep understanding of costs, ingrained from his engineering training, and an insight into "grassroots" sales approach acquired during his four years at Macy's.

A graduate of the U. S. Naval Academy at Annapolis in 1927, Mr. Gilday was an engineer until 1932 when the depression, as he put it, persuaded "me to seek out a field with a future." That future involved Thomas J. Maloney, whom he met while at Macy's. Mr. Maloney, now executive vice president of Cecil & Presbrey, was a classmate of Mr. Gilday's.

In 1936, Mr. Maloney formed an advertising agency, T. J. Maloney Inc., and hired Mr. Gilday as one of his first employees. His first assignment was not to get new business or service an account but to open a retail paint store in New Rochelle, N. Y., because the agency had the Sherwin-Williams account.

It was during World War II that Mr. Gilday had his first brush with radio. He was called back into the Navy shortly after Pearl Harbor and served until late 1945, principally as an officer in charge of recreation for Navy personnel. He worked closely with the Armed Forces Radio Service.

After his release from the service, he became an account executive with the Newell-Emmett agency, with which T. J. Maloney Inc. had joined forces. In early 1950, together with Mr. Maloney, he became associated with Cecil & Presbrey as Auto-Lite account executive. He was named radio-TV director in 1951 and vice president shortly thereafter.

Mr. Gilday is a true blue New Rochelle citizen, where he was born in 1904. He attended New Rochelle High School and still lives in the city with his wife, the former Genevieve Carberry. They have a daughter, Joan, 17, who will be graduated in June from the Ursuline Academy in New Rochelle.
Standard Electronics Corporation delivers another television transmitter ahead of schedule. More power to WAFM-TV Channel 13, Birmingham, Alabama.

Standard Electronics Corporation, a subsidiary of Claude Neon, Inc., 285-289 Emmett Street, Newark 5, N. J.

Put You on The Air QUICKER!

Standard Electronics high power 20 KW Amplifier installed at WOR-TV Channel 9, New York, September, 1952.

MINIMUM STATION PACKAGE
Get on the air quickly, inexpensively with Standard Electronics Minimum Station Package. Depending on your channel allocation, order a 500 watt VHF or 1KW UHF transmitter, a high gain antenna, sync generator, monitoring equipment and a film system.

EXPANDABLE
The minimum station package can be expanded without scrapping a single piece of equipment, when you are permitted to increase power. Simply add S-E Add-A-Unit amplifiers for higher power even up to 50 KW output.

TRANSMITTER
Basic VHF unit is the 500 watt visual and 250 watt aural unit; basic UHF is 1,000 watts visual and 500 watts aural—a complete self-contained transmitter, in either case.

INCREASED POWER
Transmitter power can be increased by simply adding a S-E Add-A-Unit amplifier to provide complete transmitters up to 50KW without scrapping a single piece of equipment.

VERSATILE
S-E Add-A-Unit amplifiers can be added to existing station equipment regardless of make.

S-E TRANSMITTERS COST LESS INSTALLED
Add-A-Unit design saves building alteration expense. Units are easily adapted to any station layout, straightline . . . “U” . . . “L”.

LOWER TUBE COSTS
Aging tubes, incapable of supplying power in the visual section are interchangeable with the aural section where power requirements are considerably less.

SELF-CONTAINED
Compact, completely self-contained . . . no external blowers or transformer vaults needed.

ACCESSIBILITY
All tubes and major components are visible and accessible from the front. Full length glass doors provide easy access and add eye appeal.

Love That Log

EDITOR:

All over town I see [copies] of BROADCASTING TELECASTING's TV [network] log pinned up on bulletin boards. Obviously these are reprints and we'd dearly like to have some in our publicity and TV departments. Can you fix?

Franklin E. Brill, Director
Public Relations Dept.
Cecil & Freshbrey
New York

[EDITOR'S NOTE: Yes.]

Target Dates

EDITOR:

It has been noticed that for some unknown reason, we have been omitted from your list of new grantee commencement target dates. KTVE-TV will go on the air July 20. . . . If we may be re-established in this information column, we will appreciate it very much.

William M. Morrow
Commercial Manager
KTVE-TV Longview, Tex.

[EDITOR'S NOTE: All TV construction permits granted up to press time of the TELECASTING YEARBOOK were listed in the YEARBOOK and removed from the target date listing in the weekly magazine as a means of reducing the length of the weekly listing which was becoming unmanageably long. KTVE-TV was one of many in that category.]

Seminar for Customers

EDITOR:

We're in a community where a TV CP has been granted. We place business in quite a few other similar markets. The TV business we have placed in the past has been quite small and quite simple. We realized we know nothing about this medium except what we had gleaned from watching, reading. We could talk the lingo, but we didn't know anything.

My art director and I have just completed an informal three-day seminar in Salt Lake City. We (and two staff members of the Cline Agency, Boise) met the staffs of both KDYL-TV and KSL-TV through the courtesy of R. T. Harris Agency of Salt Lake.

It's probably an old story to many good TV stations, but it opened our eyes. In addition to learning much that was new, we also profited in other ways. We had made some plans already for the advent of TV in our markets. Now these plans have been radically changed or junked. We saved the costs of our three-day junket more than five times over just from equipment we have planned to buy—equipment we now realize we do not need . . .

We'd like to tell everybody of the wonderful cooperation we got from the people at both Salt Lake City TV stations.

ROBERT MAXWELL ASSOCIATES
RADIO and TV PRODUCERS

May 4, 1953 • Page 23
FREQUENTLY referred to as the agency's trouble-shooter, Clinton Burt Oliver, vice president in charge of Hollywood operations of Foote, Cone & Belding, entered the advertising business back in 1930 when his knowledge of radio was limited to twisting a dial.

Today his manifold responsibilities include supervising production on such network shows as CBS Radio's Hallmark Radio Hall of Fame, sponsored by Hall Bros.; CBS Radio's Bakers Star Theatre, sponsored by American Bakers Assn., and the Columbia Pacific Regional Network's Rocky Jordan, sponsored by General Foods Corp. In addition, he works on developments of new radio-TV shows for the agency's eastern offices, plus presentations in those media for prospective sponsors. And he'll take on any difficult assignment at the drop of a hat.

Quick to pounce upon anything that might undermine and destroy the public's confidence in advertising, Mr. Oliver is most explosive on the subject of pitch deals.

He declares that agencies and their clients who recognize the value of sound advertising practices reap greater and more permanent benefits than those who depend upon unsavory methods to get a "doubtful fast buck."

Jacksonville Background

Mr. Oliver was born in Webb City, Mo., on Aug. 29, 1908. His family moved to Jacksonville, Fla., where he received his early education, graduating from Duval High School in 1926.

With business administration and finance as majors, Mr. Oliver enrolled at Northwestern U., Evanston, Ill., the following spring. He also went to work for A. W. Shaw Co., Chicago publishing firm. A merger of that firm with McGraw-Hill a year later resulted in his transfer to New York as assistant circulation manager, handling direct mail campaigns for various publications.

Wishing to continue his education at Northwestern, he returned to Chicago a year later and became office manager for Balaban & Katz Corp. When the theatre chain moved its headquarters to New York a year later, Mr. Oliver elected to remain in Chicago.

With a background which he felt fitted him for the administrative end of the advertising business, he convinced Lord & Thomas executives that he would be a valuable asset to the firm. He joined the agency as assistant to the treasurer. Mr. Oliver also continued his academic education at NU, graduating in 1933.

The next several years found him doing considerable traveling in his agency activities. Shuffled to Dayton in 1935, to establish and manage a branch office devoted to servicing cooperative accounts, he remained there three years, getting his indoctrination into local spot and regional radio.

His next move was to Los Angeles as business manager and assistant treasurer of the agency's California offices. When Lord & Thomas became Foote, Cone & Belding in Jan., 1943, Mr. Oliver went along with the change as business manager.

That agency was then the most active on the West Coast handling radio and TV, and Mr. Oliver's administrative duties gradually were enlarged to include supervision of all production for the Los Angeles as well as Hollywood offices. He also negotiated all talent, package and other radio-TV deals made in California for the agency's offices. With his multiple radio-TV responsibilities, he shifted headquarters from downtown Los Angeles to the more convenient Hollywood in July, 1943.

Responsibilities included such NBC radio shows as Lucky Strike Hit Parade, Jack Benny Show and Frank Morgan Show, all sponsored by American Tobacco Co.; Bob Hope Show for PepsiCo.; CBS Radio's Tony Martin Show sponsored by Bourjois Inc. There also were several West Coast regional network programs for such accounts as Southern Pacific Co., Safeway Stores, Sunkist Growers, Union Oil Co. and others.

When Foote, Cone & Belding acquired the Hughes Tool Co. and Gulf Brewing Co. accounts, which necessitated a Houston office, Mr. Oliver in 1949 was dispatched to that city to head it as co-manager with Steve Wilhelm.

No desk jockey, Mr. Oliver traveled the length and breadth of Texas for the next few years. Meanwhile, in late 1950, the agency elected him vice president. He was transferred back to Hollywood in July, 1951 to become vice president and general manager of the radio-TV production office.

Believing that only a small percentage of today's TV commercials make full use of the visual medium, he points out: "Too many are just radio commercials with pictures. Instead of using the visual portion of the medium to tell an important part of the sales story, too many advertisers depend upon sound alone."

Mr. Oliver is a founder and past-president of Hollywood Ad Club and vice chairman of the national radio and TV production committee of the American Assn. of Advertising Agencies. He also is the AAAA's chief Hollywood liaison on union negotiations. He holds membership in the Masquers, Delta Sigma Pi, and an honorary membership in Alpha Delta Sigma, national advertising fraternity.

Mr. Oliver is married to the former Marie Robinson of Des Moines. With their daughter, Constance, 10, they live in suburban La Canada, 12½ miles from Hollywood and Vine.
Real MERCHANDISING
THAT BRINGS Real RESULTS

The WMAQ Chain-Lightning plan now embraces 771 chain stores, controlling more than 875 million dollars in annual sales volume, plus leading independent grocers.

OPTIMISM SPARKS NARTB 'GOLD RUSH' CONVENTION

News of NARTB convention and related events is presented, in day-by-day sequence, on consecutive pages beginning here. Late coverage appears in "At Deadline," pages 9 and 11. Picture coverage of B+T's annual golf tournament is on page 92.

May 4, 1953

The question of rates—and the need to stick to published rate cards—came up repeatedly, in corridor conversations as well as formal meetings. It was stressed at a meeting in which a five-cities market report was presented by Richard Allerton, research manager of NARTB.

In television, the question of program ethics and the problem of uhf engineering were highlighted at a meeting Thursday, while four members of the FCC in a virtually unprecedentd panel program answered broadcasters' questions at a session Friday.

Methods by which FM stations can become integral parts of their communities—and make money—were outlined in another panel session.

'Oportunity Ahead'

In the keynote speech, Gen. Sarnoff, board chairman of RCA and NBC, admonished that radio must be operated in ways that recognize that "it is no longer the only broadcast medium," and that television's cost, among other problems, must be solved by the finding of new ways to make its usage available to more and more advertisers.

But in both radio and TV, he stressed, "inspiring opportunities are still ahead of us."

Gen. Sarnoff gave his own forecast of the timetable for color TV, and came out with his view that pay-as-you-see television—or "cash box" TV, as he termed it—would not become a national service.

A prediction that TV in a few years may attract a billion-dollar annual advertising expenditure was another highlight of Gen. Sarnoff's address.

FCC Chairman Hyde, making his first speech in that post, reassured listeners that in his view FCC should not "discriminate" against applicants because of the nature of their business enterprises—whether newspaper, or whatever—and called upon all hands to help FCC with its TV licensing problem by keeping hearing records as short as possible.

He also gave assurances that, when an application is filed for consideration of a compatible color TV system, FCC will act upon it in orderly fashion, "in an objective manner."

The Convention Committee, headed by Clair R. McCollough of the Steinman Stations, was roundly complimented for its work in organizing the week-long program.
PLAN OF BAB TO BOLSTER RADIO'S POSITION UNFOLDED

Military motif was used by BAB in outlining plans for promotion of radio in the year ahead. Major objectives include an even greater selling job on the national advertiser.

PLAN of attack designed to boost radio's advertising position during the year was dramatically presented to NARTB Convention delegates in Los Angeles last Tuesday by Broadcast Advertising Bureau. The plan envisions addition of at least $50 million to next year's radio billings. Using the theme "Operation Sales Weapons," BAB employed army missiles, drill teams, girls and complete military trappings to tell stations what it has done and what it is going to do.

Charles C. Caley, WMBD Peoria, Ill., BAB board chairman, led the attack. Garbed like other panel members in combat gear, Mr. Caley promote their best interests.

Mr. Ryan took shots at profit-and-loss-only station operators, "many of whom have come into the business since 1946." That owner "does great in a seller's market," he said, "but come the buyer's market he will have nothing to offer save the forlorn hope that price cutting will tide him over."

Kevin Sweeney, BAB vice president, said two major sales effectiveness tests will be ready for release next month involving Kroger Co., third largest grocery chain, and Block & Kuhl, mid-west department store chain. A major drug

said "the job ahead for all of us, and particularly for BAB, is to continue to pile up evidence of the huge radio audience and the selling ability of radio." He recalled the BAB membership increase from 545 to 785 stations in the last year.

He summarized BAB's work, including release of 662 individual sales weapons, 44-city series of sales clinics, 860 presentations (now at the rate of 100 a month), first industry-financed advertising campaign in major business papers and newspapers, sell-radio-on-radio announcement campaign on 1,100 stations, 36 direct mail pieces for advertisers and agencies, and first two of a series of BAB-financed sales effectiveness tests. Ninety percent of member stations reported making sales in the past six months by use of BAB material, he said.

Continuing growth in radio billings can be expected, he said, citing expansion in the last two years of heavy TV competition "from $667 million to $723 million," as proof radio "is very much alive and growing because it does a job no other medium can do."

William B. Ryan, president of BAB, offered a series of four resolutions urging broadcasters "to recognize that radio is an advertising medium; to give radio its due—our best efforts in programming and advertising techniques, our greatest selling skill; to unite even more to sell our medium together, not against one another; to do a missionary job to get the 'Goodtime Joes' and 'Summer Soldiers' in radio to join industrywide efforts to

Schmid, MBS. Back row, Ward Ingram, Don Lee Network; Charles Ayres, ABC; William B. McGrath, WHDH Boston; Joseph E. Baudino, Westinghouse Radio Stations; Gene Cogle, KFDA Amarillo, Texas; John F. Meagher, KYSM Mankato, Minn.

Radio Travelers Reunite

EIGHTH annual reunion of the U.S. Radio Mission to the European Theatre of Operations, was held in Los Angeles last Monday in conjunction with the 31st NARTB convention. Winner of the "VIFer of the Year" award was NARTB board chairman Justin Miller, who headed the 1945 mission to Europe as the then-president-designate of NARTB. Clair R. McCollough, Steiman stations executive, as last year's award winner made the presentation of the plaque, which will remain in the hands of the winner for one year. This speech now is celebrated as the "Achtung Address."

Present, in addition to Judge Miller and chairman McCollough, were J. E. Reinisch, Cox stations; John E. Fetzer, WKZO -AM - TV Kalamazoo; Morris Novik, WLIR New York; Martin Campbell, WFAN-AM-TV Dallas; William S. Hedges, NBC vice president; Col. Harry S. Wilder, Phoenix, and Sol Taishoff, Broadcasting • Telecasting.

PIONEERS ELECT PAUL MORENCY

PAUL W. MORENCY, WTIC Hartford, Conn., was elected president of Radio Pioneers at its annual dinner, held Monday just prior to opening of the NARTB Los Angeles convention.

The pioneers paid tribute to the late Dr. Frank Conrad, Westinghouse inventor "who blazed radio trails with experiments that started in 1915 and culminated in the establishment of KDPA Kansas City, Nov. 20, 1920.

Dr. Conrad was selected for the 1953 Radio Hall of Fame Award. Honorary scrolls were presented by William S. Hedges, NBC vice president, to Dr. Conrad's son, Francis, radio director for ABC Western Division, Hollywood, and R. A. Neal, Westinghouse vice president.

Other officers elected by the Pioneers were Arthur B. Church, KMBC Kansas City, first vice president; Raymond F. Guy, NBC, vice president; Victor C. Dixson, WAZL Hazleton, Pa., vice president; John F. Puckett, National Secretary; Charles A. Wall, Associated Music Publishers and BMI, treasurer.

Five citations were awarded to outstanding living leaders in the radio industry. They are: Dr. Vladimir K. Zworykin, RCA Labs.; Dr. E. F. W. Alexanderson, General Electric Co.; John V. L. Hogan, Hogan Labs.; Dr. Orestes H. Caldwell, Caldwell-Clements Inc.; Donald Mansfield, Canadian Broadcasting Co.

Carl Haverlin, BMI president, presided at the annual dinner.

Stanley Kramer, independent Hollywood film producer, in the main address of the evening, humorously referred to television in this way: (1) TV doesn't exist; (2) it has flicker and small screen; (3) "we gotta big screen."

Mr. Kramer said he was not excited about three-dimensional films. He contended outstanding comedians can be "relegated to ordinary comics" in a few weeks of TV appearances.

As to the future of the movies, he thought few but better films will be shown. "No TV films must be films made especially for TV," he said. He conceded television's audience impact is powerful, recalling how films have been successfully promoted via TV.

Broadcasting • Telecasting

LUNCHEON GROUP of Broadcast Advertising Bureau directors met Tuesday prior to BAB sales clinic at NARTB convention. Seated (1 to r.): Edgar Kabek, WTWA Thomson, Ga.; Charles C. Caley, WMBD Peoria, III., BAB board chairman; A. L. Madson, KOYO Provo, Utah; Robert
MOVE FOR MORE INDEPENDENCE UNDERWAY BY RADIO AFFILIATES

N BC and CBS Radio affiliates take steps to set up autonomous groups. ABC and MBS affiliates seem willing to name representatives to All-Industry Affiliates Committee.

A TREND among radio affiliates to assert greater independence in their organizational relationships with their networks gained momentum during the NARTB Convention last week.

In separate moves, stations affiliated with NBC and CBS radio took steps to set up autonomous organizations, while affiliates of both ABC and Mutual were said to have indicated willingness to join them in naming representatives to a reconstituted All-Industry Affiliates Committee.

NBC affiliates also asserted their independence in another way: Those attending a meeting in Los Angeles on Monday went on record condemning NBC's new summer "Tandem" sales plan (B&T, April 27)—a condemnation which did not appear, however, to have deterred NBC's intention of putting the plan into effect.

In a meeting of the All-Industry Affiliates Committee (AIAC), Paul Forenczy of WTIC Hartford, who has headed the group since its formation under the shadow of the first round of network radio rate cuts in 1951, agreed to continue to act until 30 to 60 days, pending the designation of representatives from the various network groups. He has made clear for some time that the weight of other duties makes it necessary for him to give up the AIAC chairmanship.

Although the AIAC meeting was held in an atmosphere that lacked the pressure of rate-cut threats that had marked earlier meetings, the possibility of another advertiser movement to force rates downward was pointed out. And the affiliates appeared unanimous in their belief that the AIAC framework and its activities should be continued.

The brief AIAC session followed separate meetings of NBC and CBS radio affiliates at which steps were taken to form affiliates' organizations which would replace the current NBC Stations Planning and Advisory Committee and the CBS Radio Affiliates Advisory Board, both of which currently operate under the aegis of their respective networks.

CBS Radio Group

The CBS Radio group, which would set up a successor not only to the CAAB but also to the Business Standards Committee which was formed independently when the 1952 round of rate cuts was imminent, approved by-laws which are to be sent shortly to all CBS Radio affiliates for their approval.

Kenneth Brown of KWFT Wichita Falls, Tex., was named chairman of the CBS Standards Committee and in that capacity will lead in the formation of the new CBS group. He succeeds John E. Petzer of WJEF Grand Rapids and WKZO Kalamazoo, who resigned because of the demands made upon his time by his position as chairman of the NARTB Television Code Committee.

Meanwhile, J. R. Lounsberry of WGR Buf- falo has resigned as chairman of the CBS Radio Affiliates Advisory Committee in a move which appeared to be in line with the thinking, disclosed earlier, that that committee should give way to a new one, independent of the network.

Reaction of all CBS Radio affiliates to the proposed by-laws for the new group is expected to be obtained within about 30 days.

The new group would be known as Columbia Radio Affiliates and would be composed of nine districts—same as the present affiliates advisory board—with each district naming one director and the nine thus chosen then selecting three additional members to make a 12-man board.

Under the present plan, the CRA would then designate representatives to serve on the central, radio-wide AIAC.

At the meeting of NBC affiliates, Robert D. Sweezy of WDSU New Orleans was designated temporary chairman of a committee to investigate the possibility of establishing an "informal affiliates group" similar to the independent NBC-TV affiliates organization, headed by Walter Damm of WTMJ-TV Milwaukee, to work with network officials on mutual problems.

The Sweezy committee is slated to make its studies and report back in 30 to 60 days.

The committee is composed of 16 affiliates who signed the letter setting up last week's meeting, plus Dave Gentling of KROC Rochester Minn., and Gene Kelly of KCRA Sacra- menco. Other members, in addition to Mr. Sweezy, are William Fay, WHAM Rochester; Robert B. Hanna Jr., WGY Schenectady; Mr. Damm; P. A. Sugg, WKY Oklahoma City; John H. DeWitt Jr., WSM Nashville; H. Quenton Cox, KGW Portland; Mr. Joseph E. Baudino, KDKA Pittsburgh; Mr. Monroe, Harold Essex, WSJS Winston-Salem; Campbell Arnoux, WTAR Norfolk; Wayne Coy, KOB Albuquerque; G. Richard Shafito, WIS Columbia; George W. Nortin Jr., WAVE Louisville; E. R. Vadeboncoeur, WSYR Syracuse, and Claire McCollough, The Steinman Stations.

In its meeting, the NBC group—approxi-
mately 75 were on hand—adopted a resolution instructing Mr. Sweezy to notify the network that they look "with complete disfavor" on NBC’s new summer “Tandem” plan of selling participations in six evening shows.

The plan, made public a week earlier, offers advertisers up to three participations in up to six half-hour programs at a time cost, per participation, of one-sixth of the network’s regular one-hour rate. The plan already had been criticized severely by Station Representatives.

Neither the SRA criticism nor that of the affiliates in Los Angeles appeared apt to make NBC abandon the plan, however. Officials reported last week that they intended to go ahead, said they had a substantial number of acceptances from other stations, and that, as sales are made, the programs will be offered on that basis and stations can accept or reject them as they wish.

MBS-Affiliates Conference

Meanwhile, in another affiliates meeting during the convention, members of the Mutual Affiliates Advisory Committee conferred with Mutual officials in what was termed a routine meeting concerned largely with program plans.

Among these plans it was pointed out that MBS intends to continue its 8-9 p.m. Monday-Friday mystery series throughout the summer, and, not later than next fall, to expand its Sunday afternoon mystery lineup. The latter currently consists of The Shadow, Nick Carter, and True Detective Mysteries, which will be augmented by additional mystery shows both before and after.

NARTB Committee Approves Recording Standard Changes

CHANGES in the recording standards governing disc and magnetic tape processes and equipment were approved Tuesday by the NARTB Recording & Reproducing Standards Committee at a Los Angeles meeting.

Neal McNaughten, NARTB engineering manager and committee chairman, said the new standards provide additional specifications for tape along with a new recording curve. Some changes were made in disc standards and a new curve was approved.

The committee’s action was based on subcommittee studies made during the past year. Revised standards will be submitted to the NARTB board in June for final approval. They will become effective after board action.

NARTB and its predecessor, NAB, set the first recording standards early in the last decade. They have been generally followed in the U.S. and have been receiving acceptance in other countries. The uniformity in processing and in equipment is credited with providing a stabilizing influence in the recording industry and in the use of recording techniques by broadcasters and related groups.

New tape standards cover the reproducing head, tape wind and signal-to-noise ratio. The new tape reproducing characteristic curve is based on a speed of 15 inches per second.

The new later disc standard is controlled by a curve with pre-emphasis of 75 micro-seconds; middle low characteristic a 318 microsecond curve with crossover at 500 cycles and the low frequency end 10 times the 318 microsecond curve or 1800 microseconds with a crossover at 50 cycles.

FOUR ELECTED TO TV BOARD

Quaal named as new member, along with re-election of Fay, Arnoux and Carter.

FOUR directors were elected to the NARTB Television Board of directors for two-year terms at the TV membership business meeting held Tuesday morning at Los Angeles. They were:

- TV-AM stations: William Fay, WHAM-TV Rochester (re-elected); Campbell Arnoux, WTAR-TV Norfolk, Va. (re-elected); Ward Qual, WLWT (TV) Cincinnati (new member).
- TV-only stations: Kenneth L. Carter, WAAM (TV) Baltimore (re-elected).

Harold Hough, WBAP-TV Fort Worth, in floor discussion suggested elections should not be held on the opening morning of the convention. Clair R. McCollough, WGAL-TV Lancaster, Pa., Convention Committee chairman, said the time was picked at the suggestion of the Election Committee.

Brown’s Report

Thad Brown, NARTB TV vice president, in reporting to the membership, urged that program sources be maintained reasonably available to the TV camera without government interference or concerted group action by any interest. This will require industry salesmanship, persuasion and “legalistics,” he added, noting that attacks on TV are a popular fad. He promised NARTB will “tell and sell the great and good in the social, economic and cultural contributions of commercial television broadcasting to the nation’s welfare.”

Listing achievements of the past year, he cited work of the Television Code Review Board, Television Information Committee and Television Circulation Study Committee.

Mr. Brown predicted ever-increasing goodwill will develop between the industry and FCC as a result of informal conferences and better understanding of common problems.

At the same time he stabbed deeply at two recent Commission developments. First is the concept ‘that the licensee of another broadcast medium potentially injured financially by a proposed television operation has standing to file protest in such a matter” originally from the refusal by the Justice Dept. (in an appeal) to support prior FCC opinion to the contrary. The potential: “A lawyer’s delight.”

Second, “Triggered by the Broadcast Bureau,” he said, “is the concept simply that all other things being equal (on application for CP or, we must assume, for renewal of license), he who also is affiliated with the two powerful media of standard FM broadcast in such a community is behind an eight-ball. Its short form title is ‘diversification.’”

Henry W. Slavick, WMCT (TV) Memphis, retired from board service with the convention. He refused to run for re-election. Named by individual networks as their TV board members were Alexander Stanchuck Jr., ABC-TV; Merle S. Jones, CBS-TV; Chris J. Witting, DuMont TV Network; Frank M. Russell, NBC-TV.

Continuing on the board until this year are Chairman Robert D. Sweezy, WDSU-TV New Orleans, who presided at the Tuesday meeting; Clair R. McCollough, WGAL-TV Lancaster, Pa., vice chairman; Harold Hough, WBAP-TV Fort Worth; Paul G. Doerr, KOBAK, Los Angeles; George B. Storer, Storer Stations.

Like ducks take to water

Baltimore merchants take to W-I-T-H just like ducks take to water. W-I-T-H regularly carries the advertising of twice as many of them as any other station in town.

For a real good reason! W-I-T-H delivers more listeners-per-dollar than any other radio or TV station in Baltimore. And that means low-cost results. W-I-T-H can do it for you too! Get all the details from your Forjoe man.
FM PAYOFF IS EXPLORED

Methods whereby FM operation is paying off is described at the NARTB panel meeting.

A highlight: Hastings Products tells of its new auto FM converter.

TECHNIQUES of establishing FM stations as an integral part of each community and making them pay off in black ink in the face of AM and TV competition were canvassed thoroughly by practicing FM operators during the NARTB Convention in Los Angeles last week.

Tenor of the FM session last Tuesday was keyed to a concession that there had been a slight numerical station recession in FM ranks last year but that enthusiasm of more avid FM operators had not receded the slightest. It was acknowledged by some panel participants that they had charted a successful course toward more profitable FM operation—with or without AM affiliation.

One highlight of the FM panel meeting was the description of a new automobile FM converter unit as developed by Hastings Products Co., under P. Mitchell Hastings. His company hopes to turn out some 100 finished products at about $99 each in five weeks. The initial production run of 1,000 is expected to reduce the cost to $89 each. Device utilizes most of the mainstays (amplifier, speaker, etc.) of AM sets, with a switch for FM reception. Power was described as better than three microvolts, with reception dependent now upon height of transmitter antenna location. There will be some flutter in its present stage of development.

Presiding over a six-man panel was John H. Smith Jr., manager of NARTB's FM department and staff representative. Participants included Miss Frances Knight, owner-general manager, WORX (FM) Madison, Ind.; George J. Volger, General manager, KWPC Muscatine, Iowa; Walter Brown, president, WDXY (FM) Spartanburg, S. C.; Paul Bartlett, president-general manager, KRFM Fresno, Calif.; Ben Strouse, general manager, WWDC-FM Washington, D. C.; Hugh K. Boice, Jr., general manager, WEMP-FM Milwaukee.

Mr. Smith told delegates that, while there had been a "slight retrogression" in FM stations last year, there has been "an increase in enthusiasm on the part of the broadcasting industry." He

FOURSOME at SCBA-TBSC joint reception during NARTB convention are (1 to r): Clair McCollough, WGAL Lancaster, Pa.; William Ryan, Bab president; Thelma Kirchner, manager of KGFJ Hollywood, and SCBA secretary-treasurer; Rosal Hyde, FCC Chairman.

AT Ambassador Hotel reception of Southern California Broadcasters Assn. and Television Broadcasters of Southern California are guests William Weldon (I), president of Blair-TV Inc., and Richard Moore, manager of KTTY (TV) Los Angeles and vice president of TBSC.

said 10 FM outlets had stopped operation last year and quoted these later figures:

As of March 1953, there were: 611 licensed and CP commercial outlets; 98 operating non-commercial; 20 CPs not yet operated; eight receiving power increases; 15 deletions; and nine CPs granted.

Mr. Smith noted that some major manufacturers have stepped up their production and promotion efforts in recent months and traced the history of a spot announcement campaign, increased from 103 to 127 different markets.

He urged an eight-point program designed to make radio—and particularly FM—"correspond with family habits": A good transcription library; arrangements for complete news coverage; separate FM programming (with certain selective AM duplication); a music-news (and some sports) format; public announcements on community interest; listener promotion; listener surveys; a drive for advertisers on a "premium rate" basis.

Success of the NARTB-RTMA set-selling drive in some cities and states and favorable FM developments (the Supreme Court decision for Transit Radio, FCC rule changes on remote control operation, others) were cited by Mr. Smith.

Miss Knight told how WORX (FM) had circulated local newspaper opposition to win listeners and influence advertisers. Initiative in obtaining tape-recorded news coverage and special programs (sports, etc.) was recounted by Miss Knight. An applicant for an AM station, Miss Knight is thinking of giving AM "as a bonus."

Mr. Volger claimed that "nothing sells FM quite as well as sports" and explained that KWPC also tape-recorded city council meetings. He described how his station had induced local advertisers to join together in a more-or-less institutional sponsorship.

Mr. Brown felt "FM will increase rather than decrease" even though some southern stations had lost interest in the medium. WDXY, FM affiliate of WOR, has used "teaser" techniques to stimulate FM set-buying, he said, alluding to his station's baseball package valued at $36,000. Sponsors buy AM programs as part of the FM baseball package "and largely because of sports FM has been a profitable operation," he reported.

Music Format

Mr. Bartlett explained that KRJF had turned from a sports-music-news format to "good music" when three AM stations came into operation. He predicted his station will bill $1,000 a month after a dip from $1,500 to $400 during the AM invasion. He feels KRJF offers a "cultural service to the community," with good music fans not taken away from television.

Mr. Strouse, an NARTB FM director, told how WWDC-FM had switched its attack from largely transit riders (WWDC-FM is a Transit Radio Inc. member) to the home audience. He said the station had lost $100,000 on FM at one time but expects to be in the black by next fall and feels there is a $100,000 potential from this previously "totally disregarded audience." He cited American Research Bureau surveys on WWDC-FM's high listenerhip and reported the station is preparing a new rate card taking into account the home audience.

Mr. Boice, new NARTB District 9 director, traced the history of WEMP-FM's storecasing operations and its development of a receiver and tuner for IGA Super-Markets and five-and-ten cent stores. He reported "tremendous acceptance" in stores and extension of FM operation.
"Everyday people and places—they're news" is the philosophy behind the WGY Traveler's program. Wandering over the highways and byways of WGY-Land, Enoch Squires encounters many interesting people and places. A veteran radio and newspaper man, Enoch is the kind of a fellow who has a knack at ferreting out stories from complete strangers. And with the rich historical and legendary character of the WGY area (from the Hudson River Valley to the Canadian border and from mid-New England to Central New York) he’s having a field day in gathering human interest material for his 15-minute program on Station WGY at 2:45 p.m. every weekday. Some of his material is fact and some of it is legend, but Enoch Squires has become very real to the people of the 17th State.

An intensive promotional campaign for this new program has made "The WGY Traveler" a household word in Eastern Upstate New York and Western New England. See your Henry I. Christal representative for choice spots on this unique program.

Wherever the story is, Enoch Squires will find it. Walking through fields, visiting general stores, or just knocking on strange doors are the WGY Traveler's techniques. And they work because the WGY audience is richly rewarded with the little known facts about the everyday people and places in the WGY community. The WGY Traveler is a home-spun show which has taken the 17th State by storm.

*The WGY area is so named because its retail sales is exceeded by only 16 states.

RADIO-TV'S GROWING ROLE OUTLINED IN FELLOW'S REPORT

NARTB president cites the four major influences on the industry's future: Government, advertising, public and individual conscience.

Reports also point to the sharp increase in membership.

AMERICAN radio and television are strong economically as they broaden their influence and improve their service, NARTB President Harold E. Fellows told the Los Angeles NARTB Convention Wednesday in his annual report to the membership.

Mr. Fellows found growing recognition of broadcasting as a part of the American pattern of living, citing the award of the American Heritage Foundation for the industry's contribution to the Register-Vote Campaign last year.

The association itself, he reported, with a total of 1,760 members compared to 1,435 three years ago. As a going business, he added, the association's net worth has improved 54% in three years.

He listed the four major influences bearing on the future of the broadcasting industry as government, advertising, public and individual conscience. As to government, he said it is now obvious that a change of political administration doesn't necessarily mean a change in government attitude toward broadcasting. He listed such items as proposed laws to fix rates, censorship ideas and other harassing measures. Similar legislative moves occur constantly in the states and provide problems for state associations, he continued.

Mr. Fellows asked rhetorically if broadcasters should be forced "to forego all interest in the freedom enjoyed by our competitive media just because the device we use is electronic rather than mechanical?" He claimed broadcasters "have long since established their right to equal competitive and economic and social stature with all other media upon the basis of the record." He voiced the hope that President Eisenhowers, and his chief officer, Sherman Adams, will name a "radio and TV" task force.

Going into the problems of FCC regulations, Mr. Fellows argued that the Commission has been guilty in the past of rubber-stamping staff activities, which he called failure to perform its duty. He pointed to indications that the Commissioners "are beginning to lead the staff" and called this "a sensible and logical arrangement" that will lead to greater efficiency. He lauded the Commission's action relaxing the operator rule requirements and congratulated William C. Groves, KFBC Cheyenne, Wyo., chairman of the Special Operator Rule Committee, and Bernard Koteen, committee counsel, for their work on the matter.

Mr. Fellows deplored a recent decision indicating the FCC intends to make it difficult, if not impossible, for radio licensees to obtain television facilities. He congratulated Rosel Hyde for his accession to the FCC chairmanship and Comr. John C. Doerfer for his appointment.

But for advertising, he said, every broadcaster would have a civil service classification; every listener and viewer would have to be content with the program selected for him by the government. Advertising is "in the public interest, convenience and necessity," he said, "that portion of our station time which is given over to trading goods and services represents a solid contribution to the welfare of the nation and those we serve as broadcasters. Anything we as broadcasters can do to increase understanding and appreciation of advertising is a contribution to the total welfare of the nation, and thus a contribution to the richness of the individual."

He predicted a downward curve in the cost of television though reminding that while TV is expensive, it is not costly in terms of productivity. "Let's not make the mistake we made in radio," he said. "Let's see to it that the rates bear some reasonable relationship to the cost of doing business, and not suddenly find ourselves in the red and wondering why."

He described the TV and Radio Codes as the industry's "consciences." Failure to meet demands placed on such family media, he warned, "will cast upon us the righteous wrath of the public, whose support is essential to the continuance of free broadcasting."

Mr. Fellows listed a number of things NARTB cannot do as an association. These include rate negotiations, with their legal restrictions; endorsement of a candidate for government office; opposition to educational television; labor negotiations on behalf of its members; training of employees in specialized fields.

As to educational TV, he reminded that to oppose it would be "to oppose our own interests since much of what we do in TV properly classifies as education. NARTB's position, he said, is this: 'Give the educators an opportunity to get into television on a non-commercial, non-profit basis which will allow no loopholes for subsequent conversion to commercial operation.'"

He urged fair play in the process — fairness to the public itself "which in many cases is still waiting for television service six years after the launching of the medium."

Education will gain most through cooperative effort with existing commercial broadcasting facilities, he contended.

In referring to the public's attitude toward radio and TV, Mr. Fellows said: "Good old, funny old American public — that keeps on looking at television and enjoying it; that keeps on listening to radio, and enjoying it; that keeps on buying the products advertised over the broadcast media — just like it doesn't understand the organized critics of the media who frantically turn out reams of copy damning this program and that; berating commercial content; bedevil-ing and belittling station and network ownership and management. Some of the product of this critical glance is constructive indeed."

BAB Members Hear Plans For Membership Campaign

A MEMBERSHIP campaign designed to bring station enrollment in Broadcast Advertising Bureau to the 1,000 level by next April was outlined to BAB state chairmen at a breakfast held Wednesday during the NARTB Los Angeles convention. Present membership is 785 stations.

With 34 state chairmen and board members attending, Gene Cagle, KFDA Amarillo, Tex., discussed the campaign plans. William B. Ryan, BAB president, reviewed BAB's financial status and presented a breakdown of BAB membership by station categories. Jack Hardesty, BAB local promotion director, detailed the campaign strategy. He reviewed a series of presentations for use in selling membership to specific types of stations.

The drive actually got underway April 1. It is organized by states, according to Mr. Hardesty. He listed the campaign steps as follows: Membership activity during NARTB convention; new members brought in by BAB's own member service unit; direct mail; BAB's executive calls; state membership campaigns, and the series of BAB clinics starting May 25.

BAB will hold 44 clinics this spring and summer, ending July 11. Two teams will cover the entire country. BAB is joining with BMI to take the first program sessions. The BMI agenda will be built around programs whereas BAB will concentrate on radio sales.

BMI Dinner Honors Miller

ANNUAL BMI dinner to the NARTB and BMI boards was held Wednesday evening at Dave Chasen's in Hollywood with 120 guests attending. Tribute to Judge Justin Miller, BMI and NARTB board chairman, was paid by Paul W. Morency, WTIC Hartford, a BMI board member. Carl Haverlin, BMI president, presented Judge Miller with a group of rare books on behalf of the BMI board.
It takes a Giant
to catch a Giant

It's always exciting to watch a little guy challenge a big guy—and win. That's why Jack the Giant Killer has topped the list of popular children's stories for centuries. And that's why we think the oil business is the most thrilling business in the world. It's a contest between Men and a modern Colossus.

Not just any men. It takes men of tremendous initiative and daring—giants in their own right—to stalk the reluctant giant, Petroleum, drag him from his lair, civilize him, and put him to work.

Cities Service is well equipped with such men. Geologists who, at great personal hardship, track down the giant in his native haunts. Production men who risk all to bring him out alive. Refinery operations men, who domesticate and train him. Research men, who think of new ways to utilize his strength.

The mammoth muscles of petroleum have taken over some of mankind's hardest, most back-breaking jobs. We think a lot of credit is due the great-hearted Cities Service "Jacks" who've devoted their lives to finding, catching and domesticating this mightiest of modern "Giants."

MISTER PLUS
an axe to grind!

Here and now—on Mutual in '53—we're putting a new edge on an old axiom:

"Network radio, in the right hands, is still the most effective mass-sales tool in advertising...night or day!"

Sharpened by proof from some of the sellingest brands in business, the results make kindling out of the notion that radio's strength is limited to non-TV areas or to the daytime.

Lever Bros. is now moving to Mutual to join General Mills and Reynolds Tobacco in a coast-to-coast, evening line-up of 5 half-hours that provides unmatched mass and economy: some 5,000,000 homes every week, for $7,500 in total cost, at $1.50 per thousand homes!

Other sales-productive adaptations of our evening time and talent are hard at work for clients like Admiral, Johns-Manville, Libby, Wildroot—with Coca-Cola just signed, too!

And even the more conventional uses of network broadcasting seem to pay off better on Mutual these nights: at an all-time low in costs, some programs are delivering a 4-year high in audience!

It's not surprising that all this hewing to the line of more effective evening radio should win tangible advertiser endorsement:

Mutual is now selling 30% more evening time than in 1950—the only nighttime gain in network radio.

Learn how Mister PLUS and his unique axe can clear a new trail to sales for you...

MUTUAL...the PLUS network of 560 affiliates
GEN. SARNOFF DETAILS RADIO-TV 'EVELOUTION'

NARTB convention keynoter sketches the electronic future. His predictions: Color TV is two or three years away; pay-as-you-see video will not become a national service; the next few years will see 1,000 TV stations and a billion dollars expended annually in TV advertising. The RCA Board chairman also envisions the many other new electronic strides ahead.

RADIO and television are going through evolutionary processes which are inevitable for the continued success of both networks and stations, Brig. Gen. David Sarnoff, board chairman of RCA and NBC, declared in a sober but confident keynote address opening the NARTB convention last Wednesday.

Radio "must now be operated and used in ways which take cognizance of the fact that it is no longer the only broadcast medium," he asserted, adding that ingenuity is essential and that affiliates must cooperate in arrangements that permit greater flexibility in network sales.

In television, he said, one of the pressing problems is to devise ways of making the medium commercially available to more and more advertisers—a problem which, he said, certainly can be solved by networks, stations, advertisers, talent and labor unions working in cooperation.

**Looks to Future**

Gen. Sarnoff, who received NARTB's first annual Keynoter Award at the session, explored a wide range of radio and television potentials in his speech. Among the highlights:

- **Color television** is two to three years away from substantial production, but RCA is convinced that the compatible color system is ready now for submission to FCC for approval.
- **Pay-as-you-see television** will not, in Gen. Sarnoff's opinion, become a "national" service.
- A thousand TV stations will be in operation within a few years, and TV advertising expenditures may exceed a billion dollars a year.
- Many new electronics advances are in the pipeline, including a voting system by which the public can register its opinions by pushing "yes" or "no" buttons on its home TV sets; electronic tape recorders for TV in use within two years; new closed-circuit TV techniques for industry, science, and education, and the development of smaller, more versatile and longer-lived devices through the use of the new, tiny transistors.

Gen. Sarnoff's speech was carefully prepared, in the knowledge—as he pointed out—that it was "for the record." But some of its most spectacular news content—the so-called "Doon-Caller"—he declared, "isn't going up without equivalent increases in circulation.

Noting that "stations have been able to adjust their own sales patterns to the opportunities of the market," he warned that "unless networks can work out arrangements with their affiliates permitting similar flexibility in network sales, they will not be able to take full advantage of sales opportunities available to them."

He pointed out that radio network time sales have dropped 22% since 1948, while national spot volume has risen 19% and local sales 35%, but emphasized that "the overall increase in time sales is proof that radio has continuing economic opportunities." He continued:

"Individual Listening"

"Radio is being used widely and intensively—but it is being used differently. Family listening is giving way to individual listening. There are sets in kitchens, dining rooms and bedrooms, in workrooms and playrooms. They are used to meet individual interests in certain types of programs; and they are also used when the mood calls for something different from the television fare available at the particular time."

"Whether it be the printed word, the spoken word, or the sound picture, the value of their service depends not on their ability to undermine each other, but on their ingenuity in making the most of their individual appeals."

"Radio, for example, can maintain large and loyal audiences by providing more programs of broad and selected appeal, so that millions will turn to it for the satisfaction of their special interests."

"National advertisers can use radio networks to fail to see that "radio has been undergoing fundamental changes," he asserted.

"A process of adjustment is necessary, and it is taking place," he continued. "Nevertheless, it has been complicated by the fact that the changes in radio have not been uniform throughout the system. Radio networks have been affected differently from stations, and the effects have also varied widely from station to station."

With rate changes made "in appropriate cases" where TV has cut sharply into radio listening during certain hours, radio now "is an outstanding advertising buy in terms of the cost for what it delivers," comparing favorably with printed media, "whose rates have been going up without equivalent increases in circulation."

Gen. Sarnoff voiced the hope that there will be no "quarrel" over color in the future. The quarrel—chiefly between CBS on the one hand and RCA and other manufacturers on the other—"was yesterday," he asserted.

Departing from his prepared talk to discuss pay-as-you-see TV, Gen. Sarnoff said it was the policy belief of RCA, as well as his own personal view, that such a system will not be established on a national scale.

Pay-as-you-see TV is technically feasible, he said, but its adoption on a national basis would be "the negation" of the fundamental principle of freedom to listen and freedom to see, and would invoke strict regulation by government.

He said it is conceivable that some local communities may eventually have pay-as-you-see television. But, he declared, "I am convinced that television broadcasting, like radio broadcasting, can solve its economic problems without a cash box in the home."

In both radio and television, the convention keynoter declared, "inspiring opportunities are still ahead of us," all linked to service to the public and to the advertiser. To maintain and enlarge their public service, he continued, the broadcast media "must be kept in sound financial condition."

Nothing that networks and their affiliates are dependent upon each other for mutual success, he said that "as we go through this formative period of television development and the changing circumstances of radio, conditions could arise which might strain these relationships."

He said that the profit derived from network operations is "very small indeed" when compared to gross volume, and called for "sympathetic understanding and cooperation between networks and stations."

No Doom- Caller"

He was never one of those doom-callers who predicted that TV would wipe out radio by this time, Gen. Sarnoff reminded. Since those pessimistic forecasts, he pointed out, "not three but four years have passed, and radio broadcasting is still with us and rendering nation-wide service."

"It plays too vital a role in the life of this nation to be cancelled out by another medium."

I have witnessed too many cycles of advance and adaptation to believe that a service so intimately integrated with American life can become extinct."

But it would be "closing our eyes to reality"
Mr. Frank Matthews

and stations to reach massive audiences at low cost, just as they use selected magazines read by large groups with special interests. Networks have a prime obligation to re-educate the advertiser in line with changes in audience and program.

"We have a solid basis for continuance of a vigorous national radio service that can co-exist with television, however, to build on that base solidly, stations and networks must strive to work out a balance of interests that will enable each to maintain economic health in the period ahead."

Gen. Sarnoff said that while the goal in radio must be "to strengthen the economic base of a nationwide system already in existence," the objective in TV "is to complete the building of a nationwide system now in the process of formation."

"Here, too," he said, "we face serious economic challenge."

The TV industry "is only on the threshold of its destiny," he declared, cautioning that it must be operated as "an instrumentality for public service,"

He said advertisers "understandably" are showing concern over TV costs, but he was confident that "these costs must and will be stabilized eventually." Television, he continued, "has become so indispensable to the public and so valuable to the business community that it will of necessity find sensible solutions."

New techniques to make TV available to more advertisers should be immediate objectives, Gen. Sarnoff asserted, calling attention to an "electronic voting system," which, attached to the home TV set, will enable listeners by pushing a button to register an opinion at the TV station.

"The purpose, of course," he explained "is to get from listeners and lookers their reactions to what they see and hear."

"Evenly we may have a national push-button poll, the results of which can be tabulated automatically by electronic computers at a central point. Thus, public opinion throughout the nation could be sampled simultaneously."

"The color of TV" he recalled that the opportunities of black-and-white TV were recognized at the outset by forward-looking broadcasters, who, for example, expressed their hope, "that with the coming of color those who are determined to lead in broadcasting will again, I am sure, act promptly."

Gen. Sarnoff said broadcasting is "now in that transitional stage" that radio and television are in "the periods of transition to a higher level."

"Although the problems of transition are large, the prospects are correspondingly promising. We have in radio a very flexible, inexpensive medium with powers of resilience and adjustment greater than some may realize. We have in television an unparalleled communications system that is an indispensable tool of American salesmanship and a major influence in American life."

"The public wants both radio and television. It will use each of them to the extent that it serves and satisfies the public interest. Our economy needs both mediums, and it is big enough to support both, provided they will conscientiously meet its requirements for effective and economical advertising. . . ."

In facing the future, the experience we have gained in the first quarter-century of broadcasting gives us confidence that American ingenuity and skill can solve problems as they arise. My own confidence in the future rests on the fact that science is our partner, and on the faith that the broadcasters of America—men and women—will build a great industry on the tradition of dedicated service to the American people."

After his speech, Gen. Sarnoff was presented with a NABB Presidents' Harold E. Fellows with the association's first annual Ken Maynard Award, in the form of a plaque and a key, honoring him as a pioneer "whose vision, industry, leadership, and faith are essential components of the free American system of broadcasting... for his good citizenship in the quiet hours and in the hours of strife... for the steadfastness which has marked his achievements in modern times... and because he has shared his great dream of communications with the millions whom we serve."

Gen. Sarnoff's address came at the initial session of the convention. Clair R. McCol- lough of the Steinman Stations, convention chairman, presided over the opening, introducing Lucille Ball and Desi Arnaz, stars of the I Love Lucy television show, who welcomed the group. He then read messages of greeting from President Eisenhower, Vice President Nixon, and California's Gov. Earl Warren, preceding Gen. Sarnoff's speech.

STERLING GIVES CONELRAD REPORT

(For text of CONELRAD report see For The Record, Page 118)

"The IMPORT of the CONELRAD plan to avoid "home hits" of enemy bombers on broadcast signals was explained to broadcasters at the NABT Convention Wednesday by FCC Comr. George E. Sterling. The full plan to "control electronic radiation" goes into effect May 15.

Complimenting broadcasters and industry executives for their cooperation, he said that when broadcasting, "nothing's lost for nothing." The FCC spokesman explained differences between a CONELRAD "test" and "drill." The test is conducted during regular experimental hours late at night, during which the future will come every three or four months, using the special 640 kc and 1240 kc "cluster sequential" type of intermittent transmission.

The drill, he pointed out, involves direct public participation during regular broadcast hours.

"A full CONELRAD drill will have a tremendous impact on the industry and the public," he said. "The cost of such an operation has been estimated to be $3 million an hour. We have not tried to determine the effect on the public during a drill." Comr. Sterling advised that a public drill is not contemplated "for the present." He said industry will be consulted before such a drill is scheduled.

Civil defense programming during an "alert" is being worked out, he related, as well as operation of stations in event of an actual enemy attack.

Steve McCormick, Federal Civil Defense Administration, answered broadcasters' questions on programming during an alert and other problems connected with CD.

INTERNATIONAL TV EXCHANGE NEXT, McNAUGHTEN TELLS BROADCASTERS

Broadcast Engineering Conference hears NARTB engineering manager predict submarine transistor cables linking the continents. He cites upcoming Coronation telecast as an example of how "micro-waves are turning back the time curtain."

AN EXCHANGE of international TV programs, on a global basis, was predicted for the near future by Neal McNaughten, NARTB manager of engineering, Wednesday, at the 7th annual Broadcast Engineering Conference of the NARTB in Burdette Hall of the Los Angeles Philharmonic Bldg.

"With the entire field of microwaves and the possibility of submarine transistor cables before us, who is to say that global television is impossible?", he told the engineering conference.

Pointing out that long distance TV was possible in 1925 on frequencies used then, he stated that since requirements of more intelligence and information required that the system be placed at higher frequencies with far shorter range.

"The answer," Mr. McNaughten added, "lies in a submarine transistor cable using a transistor repeater unit—smaller than a cigarette—to augment microwave relays between the continents of the world.

High Power Tubes

"We have relatively high power tubes in the 6,000 to 8,000 megacycles band; the traveling wave tube holds much promise of higher frequencies; we have multiplexed sound and video signals, and Bell Labs is working in long distance wave guides using frequencies so high I'm also afraid to mention them.

"As an example of how microwaves, augmented in many cases by the coaxial cable, are turning back the time curtain in global TV, it is my understanding that the motion picture of the Coronation will be flown from London to a point in Canada by jet bombers and placed on a microwave system feeding into the U.S., thereby picking up about one hour of time since it would take jets about one hour to fly the additional 400 miles into the U.S.

Six technical papers on various phases of TV were given during the Wednesday morn-

ING OPENING session of the engineering conference when Frank L. Marx, ABC vice-president in charge of engineering, presided. (See summary of engineering papers, B&T, April 27).

Russell J. Tinkham, midwest district manager, Ampex Electric Corp., discussed "Automatic Station Operation," while R. C. Bickel, engineering dept., Andrec Corp., delivered a paper written by Chief Engineer J. S. Brown, titled "Waveguides for UHF Television." L. O. Krause, section engineer, commercial and government equipment dept., General Electric Co., spoke on "Controlling Television Antenna Patterns." There was an explanation on "Methods of Control of the Vertical Pattern of UHF and VHF Antennas" by O. F. Fiet and I. J. Wolf, RCA.

"A 3-D for Television" report was made by Alex Quiroga and Glen Atkins, ABC-TV Hollywood staff engineers. (See ABC 3-D demonstration story, page 30). Dr. Frank G. Back, secretary, Television Zoomar Corp., spoke on "Zoomar Lenses in Television." Royal V. Howard, executive engineer, Committee for Free Asia, presided at the Wednesday afternoon session, when six additional technical papers were given.

WSM-TV Experiment

Aaron Shelton, chief engineer, WSM-TV Nashville, read a paper relating to WSM-TV's experimental booster station, prepared by John H. Dewitt and W. H. Johnson.

The Thursday all-day session included nine technical papers and discussions. Albert J. Brackett, head of studio equipment dept., and James Valentine, manager of TV station installation dept., Federal Telecommunication Labs, Inc., told the engineering conference "How to Set Up a Television Technical Operation With Two Persons." "The Multi-Scanner—A Versatile Scanner for Film, Opaques and Slides" was jointly discussed by George R. Tingley, head of the color and video technique dept., and Jesse H. Haines, senior engineer, color and video technique dept., Allen B. DuMont Labs, Inc.

"The Mechanisms in Transistor Electronics" were explained by Robert M. Ryder, electronic apparatus development engineer, Bell Telephone Labs. A broad description of "Developments in the Application of Transistors" was given

ANDY JAREMA, WKOP Binghamton, N. Y., low net winner of the 19th annual NARTB-B&T Golf Tournament, and Sil Aston, KMBS Monterey, Calif., low gross winner, with their trophies. (Story and pictures on page 92.)

by Allen A. Barco, section head, RCA Labs. An illustrated discussion of "Television Test Equipment" was given by Roy Moftett, NBC-TV staff engineer. There was a review of "The NTSC Color Television System" by W. R. G. Baker, chairman, National Television System Committee and vice president in charge of engineering, RCA broadcasting.

John T. Mullin, chief engineer, electronics div., Bing Crosby Enterprises Inc., discussed the VTR system now under development by his company.

Low Budget TV

With James L. Middlebrooks, engineering director, KING-TV Seattle, as moderator, L. Roy E. Kilpatrick, vice president and technical director, WSAZ-TV Huntington, W. Va.; Joseph Herald, manager, KBTV (TV) Denver, and Orin Towner, director of engineering, WHAS-TV Louisville, participated in a symposium on "Low Budget Television Operations."

The engineering conference agenda was completed Friday with addresses on "Television Film Scanner" by Ernest H. Trowb, project engineer, Philco Corp.; "Development of the Station Camera," by Louis L. Pourciau, head of TV development section, General Precision Laboratory, and "Installation Problems and Operating Results of Diesel Electric Standby Units in Television Transmitters," by R. V. Bradley, sales development div., Caterpillar Tractor Co.

Others Who Spoke

Other talks given were: W. E. Stewart, manager, TV projector design, RCA Victor Div., "Requirements for High Quality TV Film Projectors"; Herbert A. Kliegl, vice president, Kliegl Bros.; "Approved Wiring and Control Methods and Devices for Television Studio Lighting"; Charles Shevlin, sales and development engineering staff, Century Lighting Co., "Progress in Studio Lighting." A joint discussion on "CBS Television City Audio and Video Facilities" was given by R. S. O'Brien, R. B. Monroe and P. E. Fish, senior engineers, CBS, New York. Fred Whitney, test film engineer, Society of Motion Picture and Television Engineers, and Paul Huhndorff, chief engineer, KPRC-TV Houston, jointly discussed "Projector Maintenance and Test Films."
DEPARTMENT STORE STUDIES have been responsible for the revived interest in the use of radio by department stores.

DEPARTMENT STORE STUDIES themselves are prepared from material gathered in tests conducted in various parts of the country.

DEPARTMENT STORE STUDIES
Make
Not Relate
Radio Success Stories

SAYS HOWARD P. ABRAHAMS, manager, sales promotion division and visual merchandising group, National Retail Dry Goods Association.

Department Store Studies have pinpointed an effective way for stores to use radio as a selling tool. I have been associated with these studies from the start and I know their use has awakened store interest in this means of promotion.

SAYS GERVASE N. BUTLER, Associate Editor, Department Store Economist.

"Department Store Studies offer the radio station a double advantage . . . they interpret the store selling message on a wide variety of merchandise in actual copy . . . they provide ready made, sales tested formulas matched to the needs of local store advertisers."

ABC SHOWS TV 3-D AT NARTB MEETING

ABC unveils 3-D video system over its KECA-TV Los Angeles in special showing at NARTB convention. The system requires polarized glasses and a special TV receiver.

ARMED with special PCC authority to conduct experimental tests, ABC last Wednesday unveiled a three-dimensional television system, using its o&o KECA-TV Los Angeles as the originating outlet for live telecasts.

The experimental telecast was demonstrated at a special press showing during the 31st annual NARTB Convention at the Biltmore Hotel. ABC plans to continue similar tests on a limited basis this week, using a TV projection set that employs two picture tubes and a non-depolarizing screen.

Uses Polarized Glasses

The ABC system requires use of polarized light glasses and a specially designed TV receiver. It utilizes two pictures, each representing an eye of the camera. Pictures are transmitted in fleeting sequences, each for 1/160th of a second. While only one picture appears at a time on the screen, both appear to be seen together, giving three-dimensional effect.

The three-dimensional picture was televised with a conventional TV camera, modified with accessories — rotating plastic disc and a second, front-surface mirror — for the demonstration. The disc rotates in exact synchronism with the TV frame rate of 30 complete pictures per second. Half the time, the camera sees a direct picture through the clear portion of the disc, the other half through a combination of the mirrored portion of the disc and the fixed mirror.

Commenting on the experimental telecasts, Frank Marx, ABC vice president in charge of engineering, said the demonstration is merely a means of showing one method of possible 3-D TV transmission. He said it should not be regarded as "final or conclusive" for home televiewing.

When the system would be commercially ready was not indicated at Wednesday's press showing. It was explained that there are many factors involved in its perfection and that its availability is some time off yet.

Phil Caldwell, director of engineering and general services for ABC Western Div., said home receivers will require two picture tubes instead of one.

Home Images Blurred

Home viewers receive blurred or scrambled pictures during the tests, with KECA-TV so notifying them before each experiment is held.

Viewers of the ABC 3-D tests last Wednesday were distributed polarized glasses to receive the special effect during the showing, which included a portion of ABC-TV's "Space Patrol" live and a special 3-D film.

The system was developed experimentally in recent months by Glenn Akins and Alex Quiroga, ABC staff engineers, under direction of Cameron Pierce, KECA-TV chief engineer. The glasses were manufactured by Polaroid Corp. and distributed by Natural Vision Corp.

BROADCASTERS WARNED OF RATE CUTS AT 'PROFITABLE OPERATIONS' SESSION

Allerton, Moroney, Kobak join chorus of indignation directed against radio rate-cutting during NARTB general session on profitable station operation. Their refrain adds up to this: The station which doesn't keep to its rate card is undermining itself. NARTB's five-city market report highlights this.

LIKE an old refrain — but perhaps not as popular — rate-paring practices on an increasing scale are cited by U. S. broadcasters last week during the 31st annual NARTB convention in Los Angeles.

The setting was an NARTB general session on profitable station operation, highlighted by five-cities market report from Richard Allerton, NARTB manager of research.

Once again, as in the past, admonitions went out that broadcasters had best adhere to their established, polarized rate cards lest they undermine their relationships with advertisers and agencies alike.

The warnings were sounded by Paul W. Moroney, vice president-general manager of WTIC Hartford, and other members of the NARTB AM committee, and in session-ending comments by Edgar Kobak, consultant and owner of WTWA Thomson, Ga.

Mr. Allerton reported on NARTB's five-cities survey a "principles of profitable radio station operation" — programming, sales, personnel, public service and financial factors. (See story on report in Press Section, this issue.)

Mr. Allerton's report was followed by questions and answers from the floor of the Biltmore Theatre, which drew a substantial number of broadcasters, many of them from small, independent stations throughout the country.

Panel Members

Participating along with Mr. Moroney and Mr. Allerton on the panel were John Easby, vice president and general manager, KTUL Tulsa; William C. Grove, general manager, KFBC Cheyenne, Wyo.; Lee Little, president, KTUC Tucson; John F. Patt, president, WGR Cleveland; G. Richard Shafto, president, WIS Columbia, S. C., and F. C. Sowell, general manager, WLAC Nashville.

Aside from rate-cutting, other topics explored were public service, programming, sales and rate-handling. Mr. Shafto told a story of his experience and his agencies to know they are paying a proper rate. This uncertainty, he noted, defies the principle of "equal treatment to the competition." Mr. Kobak, who heads the American Research Foundation, described rate-cut solicitations as an "insult to the integrity" of broadcasters. He said that throughout his years in the industry he had never been asked for sub-established rates.

Mr. Allerton told broadcasters that stations indulging in rate cuts "have not been making money, even though their revenue volume may be high."

One small station operator told his fellow colleagues that a large number of "major stations — clear channel outlets" have pared their rates and asked: "What can we say when advertisers come to us and tell us that some of the high power stations have cut theirs?" He claimed that "some of the million dollar boys" were not represented at the session.

Robert B. Hanna Jr., manager of WGY Schenectady, N. Y., said, "There are still many 50 kw stations which sell at the rate card." Victor Sholla, vice president and director, WHAS-AM-TV Louisville, said, "Its getting lonesome on the rate card."

One station operator reported that some stations "have been giving away programs" to prevent them from going to other stations. Mr. Patt said he heard "they're cutting rates even in television until each broadcaster realizes he is hurting himself when he departs from established, published rates," rate-cutting practices will continue.

Question of billing advertisers at the local or national rate on co-op programs was raised by A. J. Moby Jr., president and general manager of KGVO Missoula, Mont. He wanted to know whether a trend had set in within the industry, not with respect to "double-billing," but to actual billing procedure. He noted that some stations charge as much as 25% more than local rate for administrative and other costs.

One small independent station operator reported the administrative burden of furnishing affidavits to agencies on time purchased. Mr. Moroney felt the industry might well undertake a new study on standardization of rate cards.

Public service programming — with or without a profit — got a considerable airing. Mr. Patt said he felt there was an "abuse of responsibility" in recent years. He called for more such programs. Mr. Shafto claimed there is no answer on how to make it

PANEL members participating in NARTB general session on profitable station operation during the convention included (1 to r): F. C. Sowell, WLAC Nashville; John Easby, KTUL Tulsa; G. Richard Shafto, WIS Columbia, S. C.; Richard Allerton, NARTB research manager; Paul W. Moroney, WTIC Hartford, Conn., who presided over informal floor discussions; Lee Little, KTUC Tucson, Ariz.; William C. Grove, KFBC Cheyenne, Wyo.; John F. Patt, WGR Cleveland, and Harold E. Fellows, NARTB president. Session was held at the Biltmore Theatre in Los Angeles last Wednesday afternoon.

profitable directly "in terms of dollars and cents"—only indirectly. Mr. Sowell said showmanship is needed in many instances.

Les Biederman, general manager, WTCM Traverse City, Mich., told his colleagues that any station that isn't a part of its community isn't a "successful station." He noted that, on public service shows, "you can't rub elbows with these people without making a profit."

Ratings 'Murdered'

George Turpin, vice president and general manager, KEYV Provo, Utah, said it is inconsistent to air some public service shows after good music blocks. He reported "some public service programs murder a station rating-wise—especially a good music station."

Question of "out-of-pocket" expenditures for merchandising on sales also was pursued. Role

NARTB Entertained

ALL-STAR Hollywood cast entertained NARTB banquet guests Thursday night at the annual convention dinner held at the Paladium. Danny Thomas was m.c. Other entertainers were Celeste Holm, Dennis Day, Abbot & Costello, Basie Trio, Edgar Bergen, Gene Autry and the Cass County Boys. Bob DeBath featured the show. Robert Armbruster was musical director, presiding over a 46-piece orchestra and a chorus of 40. Russ Morgan's orchestra played dinner music.

ENGINEERS DISCUSS 'LOW BUDGET' VIDEO

DRAWING from personal experience, a three man panel gave its views on "low budget operation" of a TV station at Thursday's session of the seventh annual Broadcast Engineering Conference at the NARTB convention, with James L. Middlebrooks, engineering director, KING-TV Seattle as moderator.

Sub-titling the panel session as "Sound Station Planning and Economical Operation," Mr. Middlebrooks reminded the engineers that "station operation on any level is an expensive business" and at the very start management and department heads must be in agreement. He stated that station coverage should be the first concern of those who have ambitions to own a TV outlet to "carefully review your plans before starting construction. It will save many headaches." He said many manpower savings must be installed to facilitate operations.

LeRoy E. Kilpatrick, vice president and technical director, WSAZ-TV Huntington, W. Va., advised the engineer delegates that "if you are entering the category of a low budget TV operation, it may be more imperative than ever before, that you plan your operation for minimum expenses consistent with maximum efficiency."

He suggested that for low-budget TV station operators, it be so arranged that each man, when necessary, be able to perform two or more functions.

The chief engineer is assuming more responsibility in the overall operation of a TV station, with high efficiency, Mr. Middlebrooks said. He stated that a TV station's personnel must be versatile in a wide field of operation. He further reminded that at a low budget station a deal of responsibility is carried by the technical personnel.

Illustrating his talk with slides showing the operation of his station, Orrin Towner, director of engineering, WHAS-TV Louisville, covered eight points in the problems of budgets, and manpower efficiency. He showed various steps through equipment installation to reduce manpower problems.

CCBS Members Approve

MEMBERS of Clear Channel Broadcasting Service approved recent actions by its headquarters staff at a meeting held Thursday afternoon during the NARTB Los Angeles Convention. About 30 station members attended the meeting. Harold Hough, WBAP Fort Worth, presented Hollis Swayne, new CCBS director, to the group and complimented him for his services since assuming the post a few weeks ago.

NARTB DELIBERATES ASCAP-TV BATTLE

New Music License group reviews developments for station operators. Authority has been given the committee to "secure a satisfactory agreement" with ASCAP.

STATUS of the TV industry fight with ASCAP over equitable fees for per-program and blanket licenses was reviewed for station operators during the NARTB convention in Los Angeles last week.

Developments in litigation, negotiations and key issues were explored last Thursday for the edification of new TV station operators by the All Industry Television Per-Program Committee under Dwain Martin, W O R New York.

The committee passed a resolution to change its name to the All-Industry Local TV Music License Committee—and also elected new members in a move to make the unit more representative of geographical districts of the country.

The committee has been given authority to "take steps to secure a satisfactory license and per-program agreement" with ASCAP. It also pledged cooperation with network representatives who have been conducting informal discussions with the union in recent months. Current interim agreement with ASCAP expires Dec. 31, 1953.

Judge Miller Urges Support

Judge Justin Miller, NARTB board chairman and general counsel, spoke to station broadcasters to support the committee and enlarge itself. Judge Miller presided over the initial meeting of the committee in September 1949 and named the first members to the group.

The industry-ASCAP feud has been a bitter one from the outset, carrying through the courts and involving some 36 stations which sued ASCAP under a consent decree. In view of RCA Board Chairman David Sarnoff's prediction of an estimated $1 billion industry gross [see separate story], it's conceded that ASCAP conceivably might realize a $25 million profit from the TV industry if its demands for per-program and license agreements are met. The demand is on the basis of an approximate 2½% rate of gross, minus deductions.

The 36 stations which brought the original legal action have not been siphoning money into ASCAP coffers, while some network stations—mostly o & o—have been operating under a blanket agreement with the group. Fees for non-paying stations will be retroactive to January 1949 when the dispute is finally settled. (For ASCAP concession on radio position on local co-ops, see PROGRAM SERVICES).

ASCAP radio-TV revenue in 1952 was about $14 million and is expected to climb substantially.

New members named to the committee include: W. D. Rogers Jr., KDBU-TV Lubbock, Tex.; Campbell Arnoux, W T A R-TV Norfolk, Broadcating • Telecasting
One of America's top disc jockeys

WSM'S SMILIN' EDDIE HILL

In their 1953 Disc Jockey popularity and trade aspects surveys, Billboard asked this question:

"Which three disc jockeys, in your opinion, had the best local radio and/or TV jockey shows over the past year?"

When all the ballots were counted, WSM's Smilin' Eddie Hill was in a neck and neck tie for second place in the country and western field.

Not bad, considering the fact that the Eddie Hill Show has been aired by the Central South's Boss Salesmaker for only six months.

For all the facts about WSM's extraordinary ability to sell the Central South Market, just ask Irving Waugh or any Petry Man.

FCC NOT DISCRIMINATING HYDE TELLS CONVENTION

The new chairman discounts the idea that applicants might be placed in a disadvantageous position because of their other businesses. Asking industry cooperation on filings, he also stresses his preference for speeding up Commission actions.

IN HIS first speech as FCC Chairman, Rosel H. Hyde assured a crowded audience of broadcasters and ancillary company representatives last Thursday that he regarded as "untenable" the idea of FCC discriminating against applicants because of the nature of their businesses.

In comparative cases, as well as with uncontroverted applications, he said, justice and fairness require that FCC's decisions be based on the record—not on any "rule of thumb" against newspaper or other type of applicant—and that the criterion in contested cases is the service potential offered by the competing applicants.

Broadcasting is a service which has benefited greatly from the "ideas and ingenuity" of persons who have come into it from a wide range of business pursuits, Chairman Hyde declared.

He called upon applicants to help a "literally swamped" FCC through its TV processing problems by eliminating "inconsequential detail, mimitia and trivia" from hearing cases, and also, as much as possible, by submitting their cases in writing, waiving oral hearings altogether.

Spreading up the Commission's processing functions by such methods as these, he said, is to him preferable to the alternative of rearranging processing lines.

 Warns 'Strike' Applications

He also served new warning—though he acknowledged that he was not addressing the appropriate audience on this subject—that FCC intends to follow through against "strike" applications—those filed for the purpose of delaying or stopping processing.

On the subject of color TV, he made clear that when a request for consideration of a compatible system is filed, then FCC will "take it under advisement," but would not go "any way, and of course in an objective manner."

He noted that FCC had said from the beginning that it is part of its duty to watch, study, and encourage new advancements in the broadcasting art, and said the Commission is interested in current efforts to develop a "better" color system than the non-compatible one which FCC approved.

But he also pointed out that establishing or changing technical standards is "a serious business," and that adequate field-testing will be necessary in order to prove the feasibility of any system proposed.

Chairman Hyde urged broadcasters to make full development of uhf as the only means of achieving a true national service in TV—and, in both radio and TV—to display "responsibility in its operations. Only by being "responsible," he said, can broadcasters quiet the continuous clamor for greater outside regulation of the industry.

Going back to the original Radio Act of 1927, without purpose he said was to insure "free, private, competitive, responsible operations," he emphasized the magnitude to which broadcasting has grown—1952 revenues of approximately $809.4 million in radio and TV, compared to TV of 1931.

There are now a total of 3,731 AM, FM, and TV stations operating or authorized, he pointed out, and whereas one family in three had a radio set in 1927, the radio receiver today is "standard equipment" in all homes.

In television, he saw the shortage of FCC hearing officers (12, whereas hearings as of April 3 are scheduled for 244 channels in 179 cities) as "serious in the development of TV as a national service."

But in addition to calling upon broadcasters and their lawyers to shorten hearings as much as possible by eliminating unnecessary data, he pointed out, FCC itself is making "every possible effort"—including new procedures announced recently—to expedite the processing of applications.

Chairman Hyde was introduced to the convention by his immediate predecessor, Comr. Paul A. Walker, and at the speaker's table with him were three other members of the seven-man commission: Miss Frieda B. Henn, George Sterritt, and Paul R. Kenney.

Comr. Walker recalled that at last year's convention he had announced plans for lifting the freeze on TV licensing, and noted that three 349 grants had been issued.

"We're well on the way to having a national television system," he declared.

Earlier at the same luncheon meeting, NARTB President Harold E. Fellows read messages of good wishes to the convention from American Women in Radio & Television, the Canadian Assn. of Broadcasters' board of directors, United Nations Ambassador Henry Cabot Lodge Jr., and the Academy of Television Art & Sciences.

Frank Lemmedee, one of the four high-school winners of the annual Voice of Democracy contest, presented his winning talk as another feature of the Thursday luncheon meeting.

WAYS TO IMPROVE PROGRAMS

Discussed by Panel at NARTB

WAYS of improving station program services were discussed at a panel meeting Thursday during the NARTB Convention by William D. Pabst, KFRC San Francisco, new District 15 director.

Varying views were expressed on types of announcing techniques. William B. Quarton, WMT Cedar Rapids, Iowa, suggesting executives generally aren't impressed by shouting salesmen, opposed the "boiler" type of announcing as did Carl Garland, KSFO San Francisco. Mr. Quarton noted that some sponsors figure they are getting something special if an announcer shouts.

Jack L. Pink, KONO San Antonio, said the traditional build-up build-down type is in heavy demand for mail and request shows. He favored simple introductions to musical numbers rather than "cute, lengthy dialogue."

Barney Schwartz, KFRL Paso Robles, said announcers on his station are trained to treat commercials as news. Messrs. Quarton, Pink and Schwartz were panel members along with George H. Clinton, WPAR Parkersburg, W. Va., new NARTB District 3 director, and members of the District 7 committee said they operated without SESAC licenses with another indicating intent to do so.
An hour a week on WLS

PROVES RADIO'S POWER FOR ALKA-SELTZER...

In February, 1933, Miles Laboratories decided to see what an hour's sponsorship of the WLS National Barn Dance would do for its relatively new product, Alka-Seltzer.

By the middle of summer, Alka-Seltzer was selling so well in the Chicago area that Detroit and Pittsburgh stations were added and, eventually, this popular WLS program was being broadcast over a total of 133 stations for Alka-Seltzer.

Throughout Miles' fourteen-year sponsorship of the WLS National Barn Dance, sales of Alka-Seltzer increased so rapidly that Miles used radio more and more, until it became one of the largest such advertisers in the field.

Today Alka-Seltzer is using a saturation schedule every night on the WLS National Barn Dance program. WLS is one of the few individual stations on the Miles' otherwise network radio schedule...further proof of the pulling power of WLS, and the importance of the vast WLS listening audience.

If you want to put your product over in a big way... see your John Blair man, or contact us, today.

Alka-Seltzer is only one of many products which have started on the way to fame and fortune with WLS advertising.

40 ASSOCIATIONS FORM FEDERATION

Ben Laird, WDUZ Green Bay, heads Federation of State Broadcasters, group of 40 state associations formed at Thursday NARTB meeting. The federation will further exchange ideas among state groups and work with NARTB on promoting national broadcast legislation.

FEDERATION of State Broadcasters, a permanent organization of 40 state associations with annual dues of $50, was established Thursday at a meeting in Los Angeles' Biltmore Hotel. The organization followed a preliminary meeting of state associations executives Tuesday.

Ben A. Laird, president and general manager, WDUZ Green Bay, Wis., was elected president with S. John Schille, commercial manager, KUTA Salt Lake City, vice president, and Dan E. Jayne, general manager, WELL Battle Creek, Mich., secretary-treasurer.

In addition to officers, two broadcasters were named to the board of directors: Fred L. Bernsten, general manager, WTTM Trenton, N. J., and Parry Sheftall, commercial manager, WZMJ Clarksville, Tenn. These men all were named in a committee, headed by Mr. Jayne, Tuesday to organize the federation. Annual meetings will be held concurrently with the annual NARTB conventions.

"The purpose of the Federation of State Broadcasters is to further an exchange of ideas of broadcasters at the state level," Mr. Laird said in announcing the new organization. "We will also work in conjunction with the NARTB on promotion of national broadcast legislation.

"Our group will serve as the focal point for the collection and dissemination of information and problems common to broadcasters. One of our foremost aims will be to foster the development of state legislation in the interest of broadcasters."

Paying tribute to the effective work accomplished in many areas by the station associations, Harold E. Fellows, NARTB president, opened the Tuesday session and welcomed the state representatives. He cited the record vote which radio and television played such a major role in polling in the last Presidential election as an outstanding example of such effort and said that in all such industry undertakings "the final answer to success is in the action taken at the state level by organized broadcasters."

Mr. Fellows said NARTB believes strongly in a schedule of annual meetings of the state association presidents, probably during the NARTB Convention. He assured the group of the full support of the national organization in sending NARTB staff personnel, on request, to the state groups' annual or semi-annual meetings.

Carl Haverlin, BMI president, attending the meeting, added further tribute to the fine industry accomplishments of the state groups.

Mr. Jayne said the state associations, in tentatively planning to organize on a larger scale, have no desire to bring another national organization into the broadcast field. The state associations, he added, are being urged by his committee to cooperate as closely as possible with the NARTB in all industry-wide undertakings.

TV FILM PANEL STUDIES ECONOMICS

Economics of programming TV film catch attention of broadcasters in convention panel.

Various facets discussed.

ECONOMICS of TV film programming—full-length motion pictures and film packages created specially for television commanded the attention of station operators in a panel session at the NARTB convention last week.

The subject of "film's place in television" was thoroughly canvassed by a group of experts including broadcasters and film distributors last Thursday.

Among topics explored were revenue potential from film programming, group-buying plans for film distribution, equipment maintenance, desirability of re-runs and exclusivity and film editing practices.

Presiding over the panel at the Biltmore Theatre was Paul Adanti, vice-president general manager, WHEN (TV) Syracuse, N. Y.

Participants included Robert W. Sarnoff, vice president of NBC's Film Div; Harold P. See, manager, KRON-TV San Francisco; Lee Ruwisch, vice-president general manager, WTVJ (TV) Miami; John L. Sinn, president, Ziv Television Programs Inc., New York; Peter M. Robeck, national sales manager, Consolidated Television Sales, Hollywood; Ralph W. Nimmons, manager, WFAA-TV Dallas; John H. Mitchell, vice president and general sales manager, Screen Gems Inc., New York; Gerald King, president, United Television Programs Inc., Hollywood; E. H. Ezzes, general sales manager, Motion Pictures for Television Inc., New York.

Re-runs, Exclusivity

Problem of re-runs and exclusivity in multistation TV markets also was aired. Views varied on whether re-runs are desirable, particularly in single-station markets. Jack Harris, KPRC-TV Houston, expressed hope that they would decrease in practice.

Mr. Sarnoff said he could see instances when on-run features would be economically desirable. Advantages of re-running films at different hours beamed to varying audiences also were recounted. Mr. Sarnoff felt economics will largely govern the film picture in the future.

Mr. Ruwisch noted a prediction that 80% of all TV programming eventually would be on film and urged TV stations to fortify themselves with equipment. He said 56% of WTVJ's revenue stemmed from film shows. He suggested adequate equipment maintenance.

Mr. Nimmons felt a combination of film and "live" shows "desirable" and expressed hope that cost of film would anchor at a "reasonable level." WFAA-TV programs 29% live, 37% network and 34% film, he explained.

Mr. See described editing problems and standardized film contracts.

SMALL MARKET TV GETS GOING OVER

SMALL MARKET TV operators can prosper if they realize that television can't be done "half-way" and is not "illuminated radio" or "home movies," television broadcasters were told at the annual NARTB Convention in Los Angeles last week.

TV broadcasters heard case histories from practicing small market operators during a workshop session last Thursday at the Biltmore Hotel. W. D. Rogers Jr., president and general manager, KDUB-TV Lubbock, Tex., presided over a five-man panel.

Robert Lemon, general manager, WTTV (TV) Bloomingtom, Ind., told broadcasters that "TV is about 90% a visual medium." He felt TV stations should realize about four to eight times the income of their radio operation.

James D. Russell, president-general manager, KKTV (TV) Colorado Springs, Colo., noted that mail response on TV programming was "tremendous" alongside that for his AM affiliate, KVOR.

It was L. H. Rogers, general manager, WSAZ-TV Huntington, W. Va., who warned broadcasters not to think of TV as "illuminated radio" or "home movies." He urged operators to go all out in their approach to programming on the local level.

Gaines Kelley, general manager, WFMY-TV Greensboro, N. C., called for a creation of ideas and enthusiasm right down to staff level. His outlet programs about 95 hours per week and expects soon to increase its power.

W. D. Rogers Jr. said 80% of KDUB-TV's local commercials are live and stressed the advantages of spontaneity in local operation.

NARTB DISCUSES PROGRAM ETHICS, UHF ENGINEERING AT VIDEO SESSION

Future of TV considered by delegates at Thursday morning session on TV, with TV Code Review Board Chairman John Petzer reviewing progress in the code's enforcement and Herbert Mayer, WXEL (TV) Cleveland, heading a panel on uhf technical and coverage problems.

INSIGHT into television's future, with attention focused on program ethics and uhf engineering, was given NARTB Convention delegates in Lafayette during the last Thursday morning at a two-plex TV meeting.

John E. Petzer, WKZO-TV Kalamazoo, Mich., chairman of the NARTB TV Code Review Board, reviewed progress of TV code enforcement in the 14 months since the standards went into effect and unfolded some of the problems confronting the industry.

Herbert Mayer, operator of WXEL (TV) Cleveland and the first uhf commercial station, KPTV (TV) Portland, Ore., as well as KTCS (TV) Kansas City, led a panel of broadcaster-manufacturer members. They covered a wide range of uhf problems, mostly of the technical and coverage variety. Robert D. Swezy, WDSU-TV New Orleans, presided as NARTB TV Board chairman.

Core Needed With Uhf

Care in installation of uhf equipment is required, Mr. Mayer said, though the problem is eased because the antenna is small in size. Adequate transmitting power is not available, he added. As to home problems, he advocated tubular or ladder lead-ins and said an outdoor antenna is generally necessary since a person walking across a room may spoil an indoor signal.

Man-made interference is generally not a problem in uhf, Mr. Mayer continued, and most pictures are ghost-free. He noted special rooftop problems in home antennas and said the serviceman often must hunt around for a good spot.

"If there is no hill problem you are better off with uhf, assuming equivalent power," he said. He said dealers in Kansas City were being advised that uhf receivers need "good conversion" if viewers are to be satisfied, with these satisfied viewers in turn developing more conversion business.

"We're sold out in Portland," Mr. Mayer said. He said a 40% discount was being offered for about seven months in Kansas City. He has found advertisers interested in local TV stations because of improved picture and the very fact that the station has local identity.

Coverage Problem

Mr. Tracy said coverage of the area close to the transmitter is a more difficult uhf problem than mere distance. Mr. Barnes advocated use of high antennas and explained that every station installation presents different problems. Mr. Tharpe pointed out that the uhf antenna experiences are proving helpful in vhf installations. Mr. Silver added that shadow and poor signal areas can be fairly well predicted by engineers.

Mr. Tindal said it is difficult to convert receivers before a station goes on the air, but Mr. Mayer said at least 75% of such conversions will be satisfactory. Mr. Brown said people want programs as soon as the station is able to get on the air rather than mere test-pattern pictures over a relatively long period when the station is getting underway.

Rotor antennas may be needed where there is multi-station uhf service, Mr. Tindal said, or in some cases two antennas will do the job. Mr. Mayer suggested stations use adjacent transmitter sites where possible.

Foliage Blocks Signals

When Leonard E. Nasman, WFMY-TV Youngstown, Ohio, asked about ways of obtaining accurate conversion data in communities, Mr. Brown said the utility company did a study in Little Rock and Mr. Tindal said the same thing was done in Springfield. Importance of foliage in blocking a clear signal path in the warm months was stressed.

As chairman of the TV Code Board, Mr. Petzer called for "unification" by telecasters "as a matter of self-interest." He told how code officials have maintained liaison with government agencies, civic organizations and the public in general, handling hundreds of decisions and developing internal criteria. Edward H. Bronson is NARTB's director of code affairs.

Code Responsibility

Mr. Petzer said TV ownership and management must assume full responsibility for code compliance. If the Code Board becomes "busy-bodies and snoops," he said, it might destroy voluntary compliance. Wielding of a big stick, he added, might bring about mass resignations from the code or run into restraint-of-trade litigation.

He urged stations to file written complaints if competitors violate the code, reminding that such complaints are held in strictest confidence. While the board tries to solve all cases quickly, he be reminded "it can get rough and tough with habitual violators. All four TV networks and over 100 stations are subscribers and are making definite efforts to follow the code by keeping programs within its provisions and training personnel to adhere, he said. The board has just completed an industry survey showing that all stations and networks responding to a questionnaire either were generally adhering or in the process of so doing.

Network activities include special monitoring, indoctrination of program and sales staffs, advance clearance of program material and periodical bulletins to all personnel and stations.

Self-Regulation Preferred

Mr. Petzer observed that federal legislators are aware of the self-regulator TV document. He quoted a House subcommittee report that found substantial progress in enforcement. "So long as the public interest is served," the committee reported, self-regulation "is preferable to government-imposed regulation." He said further Congressional investigation may come and urged all stations and networks to display the TV Code seal.

NTSC COLOR PLEA TO FCC BY SUMMER IS CHAIRMAN KAAR'S PROMISE TO NARTB

New system now being field tested, I. J. Kaar reports, with plans for presentation to Commission this summer with a request that it be authorized for public use.

NEW system of color television, now being field tested by the National Television System Committee, will be presented to the FCC this summer with request that it be authorized for public use. That was the promise made Thursday by I. J. Kaar, NTSC vice chairman and vice president in charge of electronics for General Electric as he spoke at the 7th Annual Broadcast Engineering Conference of the NARTB Convention.

Standards 'Workable, Practical'

He said that the NTSC now has what it believes to be a "workable, practical set of standards for color." Before these can be said to be foolproof, he stressed that they must be thoroughly field tested, a process that is now under way.

"If the field tests are successful, and there is every reason to believe that they will be, then the next step is to petition the FCC for authorization," Mr. Kaar said, adding that this will be done in pending programs within its time parameters and developing internal criteria. Edward H. Bronson is NARTB's director of code affairs.

TOP ANTENNA AUTHORITY REPORTS ON CONTOURING TV PATTERNS

LOYD O. KRAUSE
Supervisor Antenna and Relay Engineering, General Electric Co.

High-gain antennas for television have caused a need to insure adequate signal in those-called "null regions" of every broadcaster's market area. Generally, four factors-average antenna height, antenna location relative to population and terrain, antenna gain, and transmitter power-are critical in coverage considerations. Adjusting the antenna vertical plane pattern to provide certain signal levels based on the requirements of these four factors may be defined as pattern contouring.

G-E Installed First High-gain VHF TV Antenna at Louisville, Ky.

The current popularity of high-gain antennas is directly traceable to the success of General Electric's first installation at Louisville, Kentucky, in 1950. As a result, these antennas were produced in quantity to greatly increase availability. Then, too, this initial experiment proved it is economically feasible to achieve increased ERP through higher gain antennas rather than with higher power amplifiers. Today, with broadened application, high-gain antennas are almost universally used for UHF-TV.

Pattern Contouring and Nulls

In general, contouring employs two basic techniques--tilt and null fill-in. The amount used of each depends on the particular application. Nulls are fundamental in antenna arrays. An antenna array is comprised of a prime element having its own pattern, multiplied by the array factor. Nulls will exist where either the array factor becomes zero or where the prime pattern has a null. The array factor resulting from a large vertical aperture produces nulls at high angles, or near the horizontal. These may cause difficulty.

Nulls and Transmitter Power

If antenna gain is increased, pattern nulls move farther away from the station. The same is true when antenna height is increased. Nulls move in proportion to the height. The combination of gain and height increases, which is rapidly becoming common practice today, results in nulls fairly distant from the transmitting site. As this distance becomes greater, unfortunately the effective signal level in the null becomes lower. Transmitter power then becomes an important factor. Higher transmitter power means a greater relative depth of null which may be tolerated, since the total level of signal is increased.

Terrain effects enter into that the ground may slope abruptly on one side and be relatively flat on the other. A combination of electrical and mechanical beam tilting may become necessary. In this way, a bias on extreme side may be covered by an adequate signal.

Beam Tiling

Beam tilting as such usually helps solve a high gain coverage problem in the medium distance range. It may also be desirable for maximum range since the horizon is depressed from the horizontal, depending on antenna height. Without beam tilt, the area at a medium distance from the antenna may have large variations in signal. Tilting a small amount can bring this area up to a high level point on the beam without much variation in average signal.

Simple beam tilting is accomplished by the technique known as progressive phase shift. Uniform phase advancement is put in each unitary array of the antenna far from bottom to top. Note, however, that phase shift on a two element array will produce beam tilt but never null fill-in!

Number of Array Elements Important

The amount of pattern control obtainable depends on the number of elements in the array. A certain minimum number exists for effects of phase and amplitude. For example, to produce null fill-in on a 12-bay antenna, by phase shift, the antenna must be broken down to at least three elements of 4 bays each.

Practical Application Contouring G-E 6-Bay Antenna in Brazil

An actual application in Brazil called for a 6-bay antenna but with the principal city lying very close to the transmitting site in the range from 2° to 25° below the horizontal. (See Fig. 1) Simple beam tilting alone could not handle the situation. The only answer was to contour the pattern. For the type of contouring required, phase deviation was found to be the simpler solution. The contoured pattern which was designed for this installation is shown in Fig. 1.

Distant Null Fill-in with 12-Bay Antennas

For most applications of 12-bay antennas, only a small amount of fill-in of the most distant null is required. Ordinarily, a level of 20 db below the nose power is adequate in this null region. A simple solution is 90° phasing of the top or bottom bay of the antenna.

No Mystery in Pattern Shaping

Contouring is not an item over which the broadcaster need be technically concerned. He should be aware of it, however, in order that each installation be reviewed and proper recommendations made.

Considerable amount of effort has gone into analyzing basic requirements and designing antennas to meet these requirements. Even so, new and special applications continue to arise and may require different patterns from those offered.

By working with a consultant and manufacturer in whom you have complete confidence and applying either standard, standard contoured, or a specially contoured antenna pattern, the best overall coverage is assured for the broadcaster.

EDITOR'S NOTE: Due to space limitations this article has been condensed. It should be remembered that the same general principles and procedures apply also to UHF contouring. For additional information please write: Section 255-4, General Electric Co., Electronics Park, Syracuse, New York.

RESOLUTIONS COVER BASIC RIGHTS

NARTB members act to protect basic rights of broadcasters and telecasters and pledge support to public service causes in series of resolutions offered at convention's conclusion.

NARTB last week took a series of steps to protect basic rights of broadcasters and telecasters as the annual convention was concluded in Los Angeles. The convention business session adopted a series of resolutions covering freedom of information and pledging support to public service causes.

On the business side, the convention voiced appreciation of ASCAP's agreement to allow the 2½% local rate to apply in the case of local commercials on network co-op programs (see story page 71).

The convention adopted a resolution terming freedom of information "a paramount freedom of existence of our relationship by local and state agencies, along with discriminatory rulings by legislative, executive and judicial bodies. State associations were encouraged to band together to meet these threats.

Formation of an NARTB committee to work on the problem was approved and other trade organizations will be invited to cooperate in the move to protect freedom of information.

On the ground the public interest is served when radio and TV are used to maximum efficiency by the Chief Executive of the U. S., President Eisenhower was urged to add to his secretariat an adviser trained in radio and TV.

The principal of uniform time in each time zone was endorsed, with reference made to the confusion caused listeners by the present lack of consistency.

Resolutions were adopted praising FCC Chairman Rosel Hyde for his participation in the convention, along with Comrs. Paul A. Walker, Freda Hare, George E. Sterling and Robert T. Bartley.

Broadcasting Advertising Bureau was commended for its "valuable services" and active support by stations was recommended.

Other resolutions pledge support to the blood donor campaign, Conestad civil defense program, the Palladium ball hall and the Biltmore Hotel. RTMA, U. S. Junior Chamber of Commerce and other groups participating in the Voice of Democracy contest were commended along with Frank Lammiedee, one of the 1952-53 winners, who addressed the Wednesday luncheon.

An unusual resolution voiced the association's appreciation for the time, money and trouble devoted by NARTB and member stations in their service on the industry's behalf. BMI was thanked for its "Freedom House" display.

Members of the resolutions committee were: H. Quenton Cox, KGW Portland, Ore., chairman; Robert R. Thomas, KING VAX Yankton, S. D.; J. Edward Smith, WOR New York; D. Peck, WJSN Milwaukee; Irving Rosenhaus, WATP-TV, Wilkes-Barre, Pa.; KPRC-A (T) Houston. Vincent Wasieloski, NARTB chief attorney, was committee adviser.

DuMONT EXHIBITS SPOT SCANNER

NEW flying-spot scanner for 16mm film and video recorder were exhibited at the NARTB convention in Los Angeles last week by Allen B. DuMont.

Improved picture quality along with operating simplicity and programming flexibility were claimed for the film scanner, which DuMont calls "Multiscanner." Picture quality is ascribed to greater image sharpness and extended tonal range "and the fact that flying-spot scanners are inherently free from the various spurious shading signals found in the iconoscope."

J. H. Haines and G. R. Tingley of the DuMont Labs, Research Division, described the scanner at the NARTB engineering conference (see conference story on page 71). The machine is adapted to opaque and slides as well as film. They described the scanner as "one of the most revolutionary advances within the field of television pickup devices to have occurred in the past five years." They voiced the belief that "we stand at the threshold of a new era in television wherein film will gain increasing importance as a means of bringing entertainment of the highest quality into the American home."

The new DuMont video recorder uses a 7-inch picture tube 'to provide a clear TV picture on which a standard television recording camera is focused.' The 7-inch tube is of high-voltage, high-definition blue phosphor type. It is ameliorated to increase light output and improve tonal graduation in dark areas and eliminate need for an ion trap.

Among features cited by DuMont is the provision of a control panel on the side of the picture tube with either positive or negative video signals to produce either a negative or positive picture. Built-in monitoring oscillograph and comprehensive control panel are described as "causing a product to be different from any other of its kind by five sources by pressing a button. Easy monitoring of the cathode-ray beam current as well as composite video signal is claimed.

ADVERTISERS & AGENCIES

NETWORK SIGNINGS ARE ACTIVE

Prudential, Chrysler and Pepsi-Cola committed to new TV shows, while U. S. Steel, Willys Overland, Cat's Paw Rubber and Pontiac make plans.

THREE major advertisers signed contracts for network shows last week while four others negotiated for programs to be placed in the near future, B+T learned.

The three sponsors committing themselves are Prudential and Chrysler on CBS-TV and Pepsi-Cola on ABC-TV. The quartet of still undecided advertisers are United States Steel, Willys Overland, Cat's Paw Rubber, and Pontiac.

Prudential Life Insurance Co., through Calkin & Holden, Curtlock, McClinton & Smith, has signed with CBS-TV for alternate-week sponsorship of You Are There, sharing the program with the Electric Companies of America. Currently, Prudential underwrites a portion of Your Show of Shows on NBC-TV, but the prospect now of its continuing that outlay is slight.

You Are There will be seen a half-hour later at 5:30-6 p.m. EDT Sunday. That time has been vacated by Alcoa Aluminum which moves its See It Now program to Tuesday, 10:30-11 p.m.

Chrysler has also put its signature to a CBS-TV contract for a dramatic, starting Saturday, 10-10:30 p.m. starting in July. Program, whose format is still undecided, will probably be produced by Worthington Minor, under contract now to NBC. It is expected that NBC, which has no production unit of its own for Mr. Minor will return him for the CBS assignment.

Pepsi-Cola (Blow Co.) has purchased the 8-8:30 p.m. EDT time on ABC-TV in the period following the Ozzie and Harriet show. The exact nature of the show is as yet unresolved but it is expected that it will be a dramatic feature and Star Marlene Dietrich.

Meanwhile, Hotpoint and Listerine, alternate-week sponsors of Ozzie and Harriet, have renewed sponsorship for next season.

The plans, at this stage, of the four uncommitted advertisers are unknown. United States Steel is understood to be considering a television version of Theatre Guild on the Air; Willys Overland reportedly is interested in a program starring Elio Finzi; Pontiac Div. of General Motors is contemplating a nighttime show with Dave Garoway, and Cat's Paw Rubber Co. is looking for a half-hour TV idea.

Pan-American Coffee Bureau, New York, begins another spot radio campaign, similar to last year's, on 150 stations throughout the country. Contract, effective today (Monday) is spread out for 52 weeks, with three weeks actually on the air. Electrical transmissions will be used with FM from 4-7 p.m. from each station. Agency is Cunningham & Walsh, New York.

Citrus Tax Boost Voted

THE FLORIDA Senate's Citrus Committee last Monday approved a two-cent boost in taxes on grapefruit to obtain revenue to underwrite the Florida State Citrus Commission's grapefruit advertising program.

The boost, effective Aug. 1, raises the total tax to six cents. A series of TV films starring Miss America, Neva Jane Langley, was begun earlier this year from a $75,000 appropriation.

Low Cost of Advertising Is Cited by Hilyard

Large sales volume, which reduces product cost, is due to advertising, American Tobacco Co.'s treasurer tells Boston group.

"OUR company's cigarette advertising costs only about one-third of a cent per package of twenty cigarettes," Harry L. Hilyard, treasurer of American Tobacco Co., said in a talk before the Boston Security Analysts Society last Monday.

Better earnings and greater sales were predicted by Mr. Hilyard. "Advertising, as in many if not most industries, has been one of the chief means to create and expand the demand which has made mass production possible," he said. "Advertising is a principal factor in achieving the great volume of cigarette sales, without which the cost of manufacturing cigarettes, and their price to the consumer, would necessarily be much higher than they are today.

"Considerable misinformation exists as to the cost of cigarette advertising. The American Tobacco Company's expenditures, while substantial in total, are small when applied to the individual unit," he continued.

He pointed out that the substantial growth experienced in recent years by the king size brands, Pall Mall and Herbert Tareyton "has come about with very conservative expenditure for advertising.

American Tobacco Co. sponsors The Big Story on NBC radio and TV; CBS-TV news for Pall Mall; Jack Benny and American Way, both on CBS Radio, for Lucky Strikes; Jack Benny and Private Secretary both on CBS-TV, Robert Montgomery Presents and Your Hit Parade, both on NBC-TV, all for Lucky Strike cigarettes.

Spot radio and television campaigns are placed for Pall Mall and Herbert Tareyton throughout the year.

Cincinnati Agencies Merge

TWO Cincinnati agencies merged into a single advertising agency last Friday. The new firm will retain the name of one of the merged agencies, Associated Advertising Agency Inc. Offices are in the First National Bank Bldg.

Announcement of the merger was made by Bruce W. Brown, president of Venable-Brown Co., who becomes chairman of the board of the new agency, and Sam Malcolm Levy, president of the old Associated, who retains that post in the new firm. Other officers are: Templeton Briggs, executive vice president; Bryant Venable, vice president; George L. Service, vice president, and W. Wilson Lang, vice president in charge of radio and television. Personnel of both agencies have been retained, it was said.

Schwartz Opens Agency

MARVIN SCHWARTZ (known professionally as Marvin Gray) has announced the opening of Gray-Schwartz Advertising (agency) at 228 N. La Salle St., Chicago. Agency will handle radio, television and some outdoor and newspaper advertising. Mr. Schwartz previously was Chicago region account man on Dodge for Grant Advertising Inc. and formerly was with WJJD Chicago and WTAQ La Grange, Ill.

CASHIN, CORNELIUS INVOLVED IN BBDO'S MINNEAPOLIS CHANGE

CHANGES in BBDO's Minneapolis office as a result of acquisition by the agency of General Mills' Betty Crocker cake mixes account, were announced last week by Bernard C. Duffy, agency president.

E. A. Cashin, formerly head of BBDO's Minneapolis office, has been transferred to New York as account group head for the new account. John D. Venable, who is directly in charge of the Minneapolis office and continues to supervise BBDO branches in San Francisco and Los Angeles. Because of increased responsibilities in Minneapolis, Mr. Cornelius will relinquish supervision of BBDO's Chicago office to New York.

Bob Chaney, account executive in Minneapolis, becomes assistant manager of that branch.

On the executive level, John M. Bridges, vice president, will head the Minneapolis Plan Board, with Mr. Cornelius, Mr. Chaney, and Philippine Kobbe, vice president and creative head, as board members.

C-P-P RE-ELECTS HEADS

E. H. LITTLE was re-elected Palmolive-Peet Co. board chairman and Joseph H. McConnell re-elected president at a board session after the annual stockholders meeting April 22. Mr. Little and Mr. McConnell, who was president of NBC before assuming the Colgate presidency earlier this year, also were named to the executive committee. A report showed Colgate's net income for the 1953 first quarter totaled $3,275,000, as against $2,250,000 for that period of 1952.

P. Lorillard Co. Realigns Staff; Ganger Resigns

REALIGNMENT of the top executive staff of P. Lorillard Co. (Old Gold cigarettes), New York, was announced last week by the board of directors, with the top shift coming at the resignation of R. M. Ganger as president and director.

Mr. Ganger resigned for reasons of ill health, the company announced, and will "relinquish all business communications." William J. Halley, executive vice president, will replace him. In turn, Frank Hopewell, vice president, was elected by the board to succeed Mr. Halley.

Herbert A. Kent, board chairman and former president, has been designated executive officer. All elections are effective immediately.

NEW BUSINESS

Congooleum-Nairn Inc. signs for 12 segments of Today, NBC-TV's early-morning show featuring Dave Garroway (Mon.-Fri., 7-9 a.m. EST and CST), starting May 1 and continuing through June 3 at rate of three segments per week. Agency: McCann-Erickson, N. Y.

General Mills Inc., Minneapolis, renews The Sta Erwin Show on ABC-TV (Fri., 7:30-8 p.m., EDT) for 52 weeks, effective June 5. Agency: Dancer-Fitzgerald-Sample, N. Y.

AGENCY APPOINTMENTS

Parke Edwards Ltd., N. Y. (imported and domestic silver), names Gibralter Adv., N. Y. Radio will be used.

S. A. Schonbrun & Co., N. Y. (medaglia d'Oro coffee) names Kiesewetter, Baker, Hagedorn & Smith Inc., N. Y. TV will be used.

Lo Heet Stainless Steel Co., L. A., (cooking utensils), and House of Carpets, that city, appoint J. E. Coyle Adv., L. A. Radio-TV will be used.

Any way you clock it,

3135 replies from 50 counties is terrific response at 9:45 AM

But that's typical of what happens on KYW. The "Happy Clarks," a popular program of inspiring gospel songs, offered a little booklet of religious poems and thoughts. The offer was made during the Clarks' regular weekday appearances (9:45-10:00 AM). Replies totaled 3135 pieces of mail from 50 counties, stretching from the top to the bottom of Pennsylvania and covering all of South Jersey and all of Delaware. Yes, any way you clock it, you can count on spot action from KYW. For availabilities, check KYW or Free & Peters.

WHIO-TV coverage
1st in Dayton

Six of the top eight once a week shows in the WHIO-TV Service area are seen on WHIO-TV. (March Pulse). As the first step in our long range program of better service we have just moved to Channel 7. About September 1st this new program will be completed when we increase power to 316,000 watts and use the tallest TV tower in the world (1104 feet). This will increase the primary service area from 41 to 65 miles—adding nearly a million new viewers.

WHIO coverage
1st in Dayton

37.9% of the total radio audience. This compares with 13.5% for Station B; 26.5% for Station C; and 14.1% for Station D. (Hooper average for the past year)

THE DAYTON MARKET

1,665,852 prosperous prospects—485,000 families. Payrolls in Dayton for 1952—$679,959,941. Retail sales for Dayton and Montgomery County—$479,750,000. Average weekly industrial paycheck in Jan.-Dec., 1952, $83.43—highest in Ohio and one of the highest in the country. Dayton has been designated a "Preferred City" by Sales Management every month for several years.

YOU CAN DOMINATE THE DAYTON MARKET WITH EITHER WHIO-TV OR WHIO—WITH BOTH OF THEM TOGETHER, YOU CAN SATURATE IT. ASK NATIONAL REPRESENTATIVE GEORGE P. HOLLINGBERY CO. FOR FULL INFORMATION
RADIO REVENUE HITS $473.1 MILLION; FCC REPORT SHOWS 5% GAIN OVER 1951

AM-FM income totals $62.6 million for 1952, which is above the 1951 figure but still below 1950's peak year. Combined AM-FM-TV revenues amount to $809.4 million.

The radio industry (AM and FM) had total revenues of $473.1 million for 1952, 5% above the previous year, the FCC reported Thursday. Figures are based on preliminary reports submitted to the Commission by networks and stations.

The report noted that seven networks (four nationwide, three regional and including 25 ooo stations) had a 3% drop in their 1952 revenues, which totaled $101 million. The radio gain was by 2,300 other stations, whose $372.1 million revenues were up 7.4% over 1951.

When the estimated revenues for television

Total Sets in Use 22,355,733

Editor's Note: Set estimates appearing here are obtained from stations, which report regularly on a special, sworn effort. Since all 14 stations report weekly, set figures in some markets may remain unchanged in successive weeks. These figures represent estimated sets within coverage area of stations in that market. Where coverage areas of different markets overlap, set counts in those markets may be partially duplicated. Total sets in use of U.S., however, is unduplicated estimate.

KTYL-TV  

Serving Metropolitan Phoenix and Central Arizona  

Larger coverage area ... improved reception ... better production ... outstanding availabilities!  

That's the story of KTYL-TV, "That Good Looking Channel 12," serving metropolitan Phoenix and Central Arizona. The KTYL-TV antenna is located 1,550 feet above average terrain on top of the South Mountains, a mountain range located only eight miles from the heart of downtown Phoenix. From this strategic antenna site, KTYL-TV will provide improved reception in Phoenix, as well as Grade A primary coverage for the first time to the majority of the outlying towns that make up the thickly populated belt of Central Arizona — an estimated 60% of the state's entire population.

Of course he's using Soundcraft Recording Tape...it's micro-polished*

Perfect reproduction — that's the reason why more and more engineers today demand Soundcraft Professional Recording Tape.

**Soundcraft is the only professional tape that is Micro-Polished.** The only tape that is polished, buffed and re-polished by a special process to produce a surface that is mirror-smooth, completely free of even the most minute irregularity. The results of Micro-Polishing are apparent to any sound engineer:

- Lower distortion
- Uniformity of output
- Improved high frequency response
- Better head contact
- Less friction, longer head life

Soundcraft Professional Recording Tape incorporates all the features developed by Soundcraft research engineers during the last two years:

- **Pre-coating** to insure better adhesion, prevent curling and cupping — dry lubrication to eliminate squeals.
- The 7" reel has the 2¾" hub, eliminating torque problems and resulting in better timing. All this, plus a splice-free guarantee on all 1200' and 2500' reels.

Why settle for less than the best? Next time, insist on Soundcraft Professional Recording Tape. It's Micro-Polished!

MARCH NETWORK TIME SALES UP

Gross sales for both radio and TV media show a gain of 9.7% over the same period of 1952.

MARCH was a good business month for national radio and TV networks which had gross time sales of $33,135,431, a gain of 9.7% over the March, 1952, gross of $30,309,519, according to tabulations of Publishers Information Bureau on advertising expenditures for time on both types of broadcast networks. For the first quarter of 1953, network time sales totaled $93,357,102, up 5.8% over gross of $88,275,086 for the same period of 1952.

Radio and TV networks alike had greater time sales this March than last, with radio barely topping the 1952 figure by 0.7%, while TV was a healthy 17.2% ahead of March 1952. For the first quarter, network radio gross time sales were off 3.4% from 1952's first quarter gross; TV network time sales were up 13.2% over last year. PIB's network-by-network breakdown follows:

**Rorabaugh Report Out**

RORABAUGH on Spot Television Advertising for the first quarter of 1953 was released April 25. The report is published by N. C. Rorabaugh Co., New York, and shows where national and regional advertisers used spot TV during January, February and March.

Upstairs and Down

MORE than half of the home radios in the country are located outside the living room, an analysis of Nielsen Coverage Service reveals, showing 42% of radio sets in living rooms, 26% in bedrooms, 20% in kitchens, 5% in dining rooms and the remaining 7% in other parts of the house.
Lang-Worth has been around now for 18 years, which isn't very important in itself, but here is a record its owners like to talk about. During those 18 years Lang-Worth never once bit the hand that fed it. We're talking about the station's hand—and we can recall a few cantankerous codgers who did rate a full-sized nip. But best do we remember the many wonderful fellows who gave Lang-Worth a home when it was only a pup—who supported it and encouraged it—fellows we are privileged to call friend!

---

**NBC Tandem Schedule Lists Six Radio Shows**

New slate includes five 13-week and one 10-week series.

PROGRAM lineup for NBC's new Summer Tandem Plan for radio (B*T, April 27) as announced by George H. Frey, NBC vice president and network sales director, comprises:

**Barrie Craig** — Sun., 10:10-10:15 p.m. EDT, May 31 through Aug. 23; Robert Armbruster & His Orchestra — Mon., 10:15-10:30 p.m., June 1 through Aug. 24; First Nighter — Tues., 8:30-9 p.m., June 2 through Aug. 25; Scarlet Pimpernel — Wed., 9:30-10 p.m., June 24 through Aug. 26; Judy Canova — Thurs., 10:10-10:30 p.m., June 4 through Aug. 27; Bob & Ray — Fri., 9:30-10 p.m., June 5 through Aug. 28.

The above schedule, including five 13-week and one 10-week series, differs slightly from that proposed to NBC's affiliate radio stations by Harry Bannister, station relations vice president, in his announcement of the Summer Tandem Plan.

The plan offers advertisers participation in each of the six programs at the base rate of $8,856 for a full minute of commercial plus opening and closing billboards on one program on the full 197-station network, the figure to cover both talent and time charges.

Six New Affiliates Signed by CBS-TV

AFFILIATION of six new TV stations with CBS-TV raising the total to 111, was announced Tuesday by Herbert V. Akerberg, vice president in charge of station relations. The stations:

WMT-TV Cedar Rapids, owned by American Broadcasting Stations Inc., William B. Quarton, general manager, effective Sept. 27; WCIA-TV Champaign, Ill., owned by Midwest Television Inc., Merrill Lindsay, general manager, Sept. 1; KID-TV Idaho Falls, Id., owned by Idaho Radio Corp., C. N. Layne, general manager, June 14.

KBES-TV Medford, Ore., owned by Southern Oregon Broadcasting Co., Everett Faber, general manager, June 1; WDAY-TV Fargo, N. D., owned by WDAY Inc., Tom Barnes, general manager, May 15, and KIEM-TV Eureka, Calif., owned by Redwood Broadcasting Co., W. B. Smullin, vice president, Sept. 1.

**Coronation Coverage Set**

RADIO and television networks last week were speeding preparations for the coverage of the Coronation of Queen Elizabeth II on June 2 and formulating plans for special programs preceding the event

ABC radio reported it will broadcast from London The Story of the Coronation, a feature series of interviews with persons intimately associated with Queen Elizabeth, starting tomorrow (Tuesday), 8:30-9 p.m. EDT. MBS will choose an American "Queen" in connection with its Queen for a Day program this Friday and will fly her to London on May 30. NBC and CBS already have sent personnel to London to prepare pre-Coronation features and to complete arrangements for coverage of the event (B*T, March 30).

some bright young lad once conceived the idea of putting commercial spot announcements into song. It was a neat twist. He called them jingles. These infectious singing

jingles sold merchandise and pleased listeners, which all adds up to good radio. Later, some not so bright imitators decided to improve the selling power of the jingle. They applied the psychological approach and caused the jingle to

jangle—

They had the misguided notion that if you annoy a listener, he'll get mad, blow his top, and buy all of the product he can lay his hands on—just to get it off the market! But it doesn't work that way.

Lang-Worth knows that listeners are more easily sold when they are happy than when mad . . . and that Local advertisers want tailored spots just like National advertisers. That's why our NEW 1953 Customized musical spots are selling like crazy to Local sponsors. They are far more than just

jingles

They are especially tailored to feature the LOCAL SPONSOR'S NAME OR PRODUCT right inside the musical spot. They're brand NEW, chum, and copyright-protected. They sell the product and personalize the advertiser—they're super-hypos to local sales. Result—station cash registers with a high-frequency

jingle!

IT'S FOR FREE!

Send today for a recorded demonstration of the newest and hottest sales tool in radio . . . musical spots tailored to your local sponsor or his product—IT'S FREE!

CFBS EXPANDS TELEVISION SALES

Network will syndicate "Amos 'n' Andy" and "Linkletter and the Kids." A half-million dollar dramatic series is in the offing.

AS PART of the overall expansion of CBS Television Film Sales Dept., the network announced Thursday that it would syndicate its "Amos 'n' Andy" series and distribute a new TV quarter-hour film series of 39 children's shows titled "Linkletter and the Kids," featuring Art Linkletter.

In his announcement, Merle S. Jones, CBS-TV vice president in charge of owned stations and general services, said the film sales dept. also is working on a "half-million dollar dramatic series," which is still in the discussion stage.

Mr. Jones also announced that CBS-TV film sales would double its staff, and that two new offices in Dallas and Atlanta would be opened "immediately."

The syndicated "Amos 'n' Andy" series will consist of 52 half-hour programs, 39 of which have been carried on the network plus 13 which have not been previously released. "Linkletter and the Kids," a film series in 39 episodes, will be released for national, local, or regional use as an exclusive nighttime feature.

ABC-Hal Roach Sign TV Film Contract

LONG-TERM contract covering production of network TV programs and subsequent syndication has been signed by ABC and Hal Roach Jr., Robert E. Kintner, ABC president announced Thursday.

First film program slated for production under the agreement will be a comedy series, "White Collar Girl," starring Laraine Day, which will go into production about mid-May in the network's Hollywood studios, according to Robert M. Weitman, network vice president in charge of talent and programming, who also negotiated the contract.

Under the agreement with Mr. Roach, programming will include full range of comedy, drama, mystery and adventure series.

TV Exploitation Names Eight

APPOINTMENTS of Harold Goldman as national sales director of TV Exploitation, New York, TV film production and distribution firm, and of the first seven territorial representatives of the company were announced last week by Oliver A. Unger, general manager. New representatives are: Abe Teitel, Chicago; Sam and Ross Wheeler, Washington; Donald Schwarz, Minneapolis; Al Detel, Detroit; Harold Schwarz, Texas; William Beegle, Pittsburgh, and Bernard Rubin, Cleveland.

Film Sales

Kellogg Co., Battle Creek, Mich., has signed renewal contracts with Superman Inc., Hollywood, for further production of Superman half-hour TV film series. Production starts on the second group of 26 programs June 15th. Kellogg agency is Leo Burnett Co., Chicago.

Nash Dealers of New England will start Little Theatre, a quarter-hour TV series filmed by TeeVee Co., Beverly Hills, on WHY-TV Providence, WHY-TV Holyoke, Mass., and in Boston and Hartford, for 26 weeks from May 4, Agency: Shepherd Adv. Agency, Boston. The series also has been set on KGUL-TV Galveston and WBBN-TV Washington, for 52 weeks from May 6 and April 27, respectively.

Princeton Film Center Inc., Princeton, N. J., announces the completion of three one-minute commercials for duPont paint through BBDD, New York. The commercials feature Norman Brokenshire and will be integrated with the Princeton package, Norman Brokenshire, The Handyman, which duPont has purchased for telecasting on KGUL-TV Galveston, Tex., WMAR-TV Baltimore, Md., WBNS-TV Columbus, Ohio, WNAC-TV Boston and WCAU-TV Philadelphia.

George W. Hayman Adv., Rockville Center, L. I., last week announced completion of a series of 10-minute TV films for Sheldall Awnings, Girard, Ohio. Written and directed by Robert E. Thompson, and titled Pinto Futter, films are scheduled for showing in most major eastern markets, beginning with WPIX (TV) New York.

WHYN-TV Holyoke, Mass., has leased TV Die-Cast Film Library from Screen Gems Inc., for 52 weeks.

Cine-Tele Productions, Hollywood, is completing a 26-minute TV film on safety education for California Highway Patrol. Scenes are

"Pays for Itself and Makes Money for You from the Day It Arrives!"

DOUBLE-BARRELED Sales Aids put the SESAC Transcribed Library on a paying basis the day you get it. The network-calibre shows are described in colorful brochures which you take right to the prospective sponsor, with your own rates and call letters filled in. Then, sample commercial shows on audition discs demonstrate exactly how his show will sound. The sponsor sees... hears... and he's SOLD!

THE SALE of just one 1/2-hour show across-the-board for 13 weeks usually pays for the entire service for more than a year. After the first sale, it's all profit! That's why hundreds of broadcasters so enthusiastically endorse the SESAC Transcribed Library.

THE SERVICE includes over 4,500 varied musical selections, salable scripts, program notes, and a catalog of bridges, moods and themes. Every month, subscribers get sparkling new releases. SESAC is a complete transcription service—the lowest-priced in the field.

Drop us a card for samples, discs and data.

SESAC Transcribed Library
475 Fifth Avenue New York 17, N. Y.
being shot in 16mm throughout the state of California. Harry Lehman is the producer.

Farmers Insurance Co. and Siroil Laboratories Inc., medical salve, both Los Angeles, started weekly quarter-hour Double Play on KHJ-TV Hollywood, for 19 weeks from April 5 and eight weeks from April 26, respectively. The filmed series is distributed by United Television Programs. Agency on both accounts: Factor-Breyer Inc., Hollywood.

**Availableites**

American Medical Assn., through Marshall-Hester Productions, New York, is producing six five-minute film programs of a new series titled *What to Do*, featuring skits on such topics as home treatment of the common cold, headache and abdominal pain. The programs will be released June 15 for loan to local TV stations through local medical societies.

**Distribution**

Kling Studios, Chicago, named sole distributor for TV film puppet series, *King Calico*, winner of Chicago Federated Advertising Award in 1952 for best children's show.

**Production**

*Buck Rogers TV Productions Inc.*, Culver City, scheduled to headquarter at Hal Roach Studios, has been formed by four businessmen after they secured all rights, except for the syndicated cartoon strip, to "Buck Rogers in the 25th Century" from creator John F. Dille. The new firm consists of Bert D'Armand, Hollywood motion picture producer, president and executive producer; Robert S. Howard, Southern Calif. sportsman, first vice-president and associate producer; Louis J. Meunier, Pennsylvania paper mill owner, second vice-president, and Max Gilford, Hollywood motion picture attorney, secretary-treasurer and general counsel. The firm plans immediate production on 26 half-hour films in addition to radio series under negotiation in New York. The same group will also function as *Buck Rogers Theatrical Productions* and *Buck Rogers Merchandising Corp.*

*Barrington Films Inc.*, Culver City, with headquarters at Hal Roach Studios, has been formed to film NBC-TV's *I and Claudie* and *Mr. Morby, Decent Citizen* series. Former series deals humorously with two international hitchhiking bums and is based on the magazine short stories by Dillon Anderson. The latter program, from *Robert Riley Crutcher* short stories, concerns a suburban father and two daughters in a situation comedy format. Richard Johnston, Paramount Pictures executive production manager, serves as production supervisor and general manager of Barrington. Robert Welch is executive producer for NBC-TV.

WTVJ (TV) Miami, Fla., sent *Lee Dickens*, WTVJ (TV) television personality, *Bob Johns*, TV producer, and *Vernon Fisher*, cameraman, to Brazil April 24 where they will film a series of wild-life action episodes. Most of the filming will be done in the jungle and along the Amazon River, and will include Mr. Dickens' adventures with alligators, water-buffaloes and man-eating fish in the area. The filmed programs will be packaged and distributed nationally by WTVJ (TV).

Films for Television Inc., headquartered at Goldwyn Studios, Hollywood, has been formed with *Jack Skirball*, as president-executive producer, to film *World Premieres*, a series of half-hour programs based on stories by famous authors. The pilot film being completed is "Lesson in Biology" by *Pearl Buck*.

**ASCAP CONCEDES INDUSTRY POSITION ON LOCAL CO-OPS**

Years-old contested question settled. Stations had objected to paying 2 1/4% rather than the local rate on network co-op programs carrying local announcements.

IMPORTANT industry victory in the three-decade-long negotiations with ASCAP was won last week when the copyright society announced it was accepting the industry's position in the local radio co-op battle.

The question has been contested by broadcasters and ASCAP for years, with stations objecting to the fact they had to pay 2 1/4% on network co-op programs carrying local announcements rather than the local (2 3/4%) rate.

These rates applied in the case of local blanket licenses. The rate on co-op programs for those holding per program licenses has been 8%.

Harold Fellows, NARTB president, wired
UP NEWS FEATURES

MARK SALES RISE

ADVERTISERS are buying more news feature programs today than they were a year ago, United Press Radio has reported following a survey of nearly 500 client radio stations across the country.

"Sponsorship of scripted programs is definitely up," John J. Madigan, UPK news manager said. "Many stations have all, or nearly all, of the 30 daily and weekly UP features sold across the board.

"Our survey also shows that types of sponsors are expanding. New businesses are coming into radio and old-line sponsors who have restricted their interest to certain kinds of programs are branching out."

The survey also revealed more use of feature scripts for background and integration into locally-written programs, and increased interest in commentaries and documentaries.

Bubbles tell the "captive carbonation" story of Hoffman Mixers in these Sara TV commercials...bouncy, smiling, animated bubbles...sparkling, lively, real Hoffman Beverage bubbles rising in glasses set on a handsome silver tray. So lifelike is the reproduction that the bubbles almost tickle your nose. Skillful audio and strong product identification add up to a sales message with powerful impact. Education TV Meet Opens in Capital

The conference is under joint sponsorship of the Joint Committee on Educational TV and the National Citizens Committee for Educational TV. It is meeting in the Wardman Park Hotel.

A non-technical explanation of TV equipment will occupy the conference's first session. Following that, George W. Stoddard, president, U. of Illinois, and chairman of the new Educational Television and Radio Center, will address a luncheon meeting.

Dr. Arthur S. Adams, president, American Council on Education, will speak at the round-up dinner tonight. Committee reports will feature the meeting.

Congressmen, government leaders, governors and leading industrial figures are expected by conference officials to be on hand for the all-day sessions.

Image-Quality Measurement System Told SMPTE by Schade

UNPRECEDENTED mathematical accuracy in pre-determining the quality of images any given television or photographic system will produce was reported Tuesday (April 28), as the result of progress on a unique measuring system which permits for the first time the scientific grading of picture-producing instruments.

The progress was outlined in a technical paper delivered by Otto H. Schade, RCA Tube Dept. engineer at the Society of Motion Picture and Television Engineers 73rd Semi-Annual Convention at the Los Angeles Statler Hotel.

In an address before the SMPTE 18 months ago, Mr. Schade discussed his system of universal ratings which can be applied to images with scientific objectivity the quality of all image-producing instruments—camera and projection lenses, TV camera and picture tubes, and positive and negative motion picture film. His progress report Tuesday outlined the system's use to translate optical properties of images into electrical terms.

The new application is based on the establish-
ductivity and provide impetus toward a TELEVISION industry.

measurements against mathematical optimums. tion and the characteristics of accurately determine with electronic instruments the characteristics of basic elements of television and photographic systems and to apply the measurements against mathematical optimums.

Theatre-TV's Advantages Cited to SMPTE by Wolfson

THAT theatre-television "can and will bring culture to main street and wider knowledge to the citizens of every town in the land" was the prediction made by Mitchell Wolfson, co-owner of the Wometco theatre chain and WTVJ (TV) Miami, Monday as a speaker at the luncheon opening the six day 73rd Semi-Annual Convention of the Society of Motion Picture and Television Engineers at the Los Angeles Statler Hotel. He asserted that the revenue producing potential of theatre video has not yet begun to be tapped.

Stressing that the American public wants and is willing to pay for better viewing techniques, his talk was devoted primarily to the upheaval in the motion picture industry caused by the rush to embrace 3-D and other new methods of increasing realism.

TV Aid to Better Living, Walter Williams Tells ANA

TELEVISION industry should help boost productivity and provide impetus toward a healthier U.S. economy, according to Under Secretary of Commerce Walter Williams in a talk April 25 before the American Ass'n of Advertising Agencies, The Greenbrier, White Sulphur Springs, W. Va. [B+T, April 27].

Mr. Williams spoke on "Can We Get America to Live One-Third Better?" Noting that about one-half of the nation has access to TV stations, he said: "Construction of new television stations, eventual introduction of color television on a broad scale, will provide a continuous and growing market for this product."

As an example of "private initiative at work to simplify and lower costs of modern electronics devices," Mr. Williams cited the development of germanium, a grayish semi-conductor metal, "reminiscent of the old crystal set," which he said is replacing vacuum tubes in many electronic devices.

Deceptive advertising, particularly of reconditioned vacuum cleaners and sewing machines, brings listeners' protests to FCC which staff attorneys consider sufficient to warrant license renewal hearings. FTC is also considering test cases against practice.

INFORMAL acknowledgement was made by FCC spokesmen last week that the Commission has received complaints against misleading reconditioning advertising which is considered sufficient to warrant license renewal hearings for the stations involved.

The principal cases concern acceptance of questionable "bait" advertising accounts—particularly in the reconditioned vacuum cleaner and sewing machine fields. Trading on the allure of top brand names, "bait" advertisers are doing an annual business estimated at up to $500 million.

Bait advertising, as currently employed on radio and TV, chiefly means phony offers of merchandise at ridiculous prices to gain introduction into the home for salesmen who high-pressure the prospect into buying an over-priced or inferior-quality alternative product through the sales technique called the "switch." Some firms even fire salesmen for permitting prospects to buy more than a limited quota of the advertised item during a week.

Principal objection to bait advertising, aside from its specific deception and harm, is that the practice robs disbeliever in the public mind toward all advertising and the medium through which it is transmitted. In a number of large cities, these questionable accounts represent sizable revenue sources for too many radio and TV stations—as much as $1,000 a week or more for individual advertisers.

Effectiveness Prompts Usage

Because of the effectiveness of radio and TV as advertising media, there has been an increasing use of broadcasting indicated, but in some cities stations already are refusing such accounts in cooperative campaigns with local Better Business Bureaus to curtail the more flagrant practice.

Meanwhile, the Federal Trade Commission last week reported it has in preparation several test cases against bait advertising of reconditioned vacuum cleaners and sewing machines. In several cities, court suits involving such advertising are pending or in preparation. Radio, TV and newspapers are the chief media used.

FTC for some time has been issuing orders against a score of firms for concealing the Japanese origin of sewing machine heads and for falsely representing such machines as American-made. While most states have statutes forbidding deceptive or fraudulent advertising, Massachussets has passed precedent-setting legislation specifically outlawing bait advertising there. Signed by Gov. Christian Herter just a few weeks ago, the new law becomes effective July 15. Massachussets also has a new law banning fake "going out of business" sales. Stiff penalties and posting of bond are provisions of the law.

A strong resolution against bait advertising and selling practices was adopted by the 39th annual conference of the Assn. of Better Business Bureaus at its closing session April 24 in Palm Beach, Fla. The association has been cooperative in stemming the problem in the reconditioned vacuum cleaner and sewing machine fields.

A special ABBB committee told the conference that "television has been seized upon in many sections as the best method of carrying out bait advertising because of the extra advantage of deceiving the customer, usually as to condition and appearance."

"Why has radio and television been the willing way out for baiters when newspapers' censorship and revocation of advertising privileges slowed down baiting?" the committee asked in its report.

In the past, FCC consistently has referred advertising complaints to FTC for review and possible action by the latter agency, rather than the FCC taking action on its own. Several years ago, however, there were strong recommendations at staff level for FCC to institute a test license renewal case against a major New York City station in order to point up the growing problem. Renewal proceedings were never ordered because members of the Commission felt the problem rested on the border line of FCC responsibility and would be difficult to prosecute.

Whether FCC will reconsider this policy and call for a test case of some station, now that FTC and organizations such as Better Business Bureau emphasize the problem, is open to speculation. FCC attorneys explained last week that complaints continue to be referred to FTC. They said they considered that some protests now pending contain allegations of sufficient implication to warrant calling of renewal hearings under present Commission rules relating only generally to advertising and program responsibility of stations.

The Commission, at its regular weekly meeting, from time to time is given a box score accounting of complaints currently being mailed to FCC, or even referred to the Commission by the president.

For the past couple of months checked, 40% of the protests received by the Commission have related to advertising. More than half of the advertising complaints, or nearly 25% of the total complaints, currently protest incidents of bait advertising on radio and TV. Another 40% of the total complaints currently relate to protests of programming, chiefly for poor taste or alleged indecency.

In January, several hundred letters were received chiefly from adults protesting withdrawal of a religious show for youth, while a smaller flurry was received from children complaining about dropping of Tom Corbett, Space Cadet.

TWO TV GRANTS INCLUDE S. F. CP

UHF television facilities in San Francisco and Richmond, Ky., were granted by the FCC last week, and a new construction permit was issued to WAFB-TV Baton Rouge to replace an expired one. The Commission Thursday granted dismissal of an unconsented application and received a dismissal request in a case otherwise destined for hearing.

The uncontested applications approved were:

San Francisco—S. H. Patterson (KSAN San Francisco and KJAM-TV, San Francisco). Effective radiated power 81 kw visual and 46 kw aural; antenna height above average terrain 1,000 ft. (City Priority: A-5, No. 516).

Dismissed was the bid of Southwestern Bstgt. Co. of Mississippi, for uhf Ch. 31 at McComb. Bowing out of contention for vhf Ch. 5 in Lubbock, Texas, is Lindsey TV Co., leaving the way clear for Plains Radio Bstgt. Co. (KFYO).

SENATE GROUP TO MEET WITH FCC

Sen. Tobey calls May 18 meeting for his Commerce committeee and Commission to discuss speed of TV application processing.

CONGRESSIONAL pressure to speed up TV application processing will be turned on May 18 when the Senate Commerce subcommittee meets with the FCC. Meeting was called by Sen. Charles W. Tobey (R-N.H.), chairman of the Senate committee, last week.

In an April 25 letter to FCC Chairman Rosel H. Hyde, Sen. Tobey said that members of the committee "are greatly concerned because so many applications for new TV stations are backed up awaiting hearing." He also said that many areas without television service "apparently will be deprived of this service for years to come unless something is done to speed up the processing of applications."

Sen. Tobey's letter spoke of the committee's desire to be helpful "in this emergency" and set the May 18 date to discuss the FCC's work and workload "and in particular its practices and procedures in considering applications for television station licenses."

A similar tack was taken by Sen. Homer E. Capehart (R-Ind.) who also wrote Mr. Hyde last week urging that the Commission give priority to cities without TV service.

Referring to sponsor legislation if need be, Sen. Capehart said:

I believe the Commission should consider first those applications from communities not now having television facilities. I also believe the present policy which often leads to the granting of licenses to communities already having facilities in operation."

Sen. Capehart referred to similar feelings by...
other members of the Senate Commerce Committee.

Last month, Sen. George A. Smathers (D-Fla.) introduced S Res. 101 urging a Senate Commerce Committee investigation of the FCC's procedures in TV processing [8*T, April 13]. He also sought an answer to the high cost of TV hearings.

Early this year the Commission established revised procedures for TV hearings which are expected to shorten considerably the length of contested cases. First TV hearing under the revised rules was that for uhf Ch. 69 in Fort Wayne, Ind. Case was completed in five days, with a half-day session required to complete engineering testimony [8*T, April 20]. In San Juan, P. R. contest between WAPA and WKVM for Ch. 4 there has been entirely reduced to a written case.

During recent weeks, the FCC has been working to revise its list of priorities in order to give higher standing in TV application processing for those cities which still have no video service. In many cases, grants have been made to such cities, but CP-holders have not yet begun operation.

May 18 appearance before the Senate Commerce Committee will be the second in as many months for the FCC. Last month, the Committee spent two days before the Senate committee discussing educational TV [8*T, April 27, 20].

BILL WOULD RAISE EXAMINER STATURE

Government hearing examiners would have the stature of "administrative judges" in Sen. McCarran's recent bill.

RAISING stature of government hearing examiners to that of "administrative judges" is the purpose of a bill (S 1708) which has been introduced by Sen. Pat McCarran (D-Nev.). It was referred to the Senate Judiciary Committee.

The bill would authorize the President to appoint all examiners, with Senate consent. It also would establish a single $14,000 yearly salary for examiners and approve removal only for cause. The bill provides that all cases be handled on a rotation basis.

Sen. McCarran's action stems from the 4-3 Supreme Court decision last month upholding Civil Service regulations concerning examiners. The Civil Service Commission established different salaries and grades for examiners, ruled that cases were to be assigned on the basis of difficulty, and provided for the removal of examiners if the agency is required to reduce personnel.

The regulations were challenged by the Federal Trial Examiners Conference. A U. S. District Court and Court of Appeals ruled for the examiners' group and against the CSC. Lower courts held that all examiners in a single agency must be paid the same salary, that cases must be handled in rotation and that reduction in force by the agency cannot affect examiners. This is the practice at FCC. Of FCC's 12 hearing examiners, nine are in the $9,600-$10,600 bracket (GS 14), first three are in the $8,360-$9,360 bracket (GS 13).

Sen. McCarran's bill would amend Sec. 11 of the 1946 Administrative Procedures Act. The Nevada Democrat was active in getting the 1946 bill into law. He has maintained that the CSC misinterpreted the act's references to examiners.

BUY A TOWER IN A PACKAGE?

Certainly you can! Ideco's Tower Package includes complete planning and design, foundations, fabrication, erection, final inspection, with complete insurance coverage.

Ideo's engineers are ready to begin solving your tower problems... from foundation to top beacon... the day your Construction Permit is issued. And Idea engineers are on the job until you sign on the air.

You'll find important items like these in your Ideco Tower Package... all of them are features that help your tower go up faster and keep your station on the air day in, day out... year in, year out.

Scientific Triangular Design Prevents Distortion

The triangular cross-section pioneered by Ideco is your guarantee of a "true" tower with fewer structural members. A 3-sided tower offers the least wind resistance... much lower painting and maintenance costs. Rigid triangular design means your Ideco tower has greater resistance against distortion by wind pressure.

No Undue Stress or Strain in Ideco Towers

Ideo towers are shop-fabricated to a minimum predetermined tolerance... this guarantees a true structure from the ground up. Tower diagonal members are shop-fabricated to exact length and predetermined tension, completely eliminating the possibility of variable and inaccurate field adjustments. An Ideco tower must be true.

Complete Rust and Weather Protection by Galvanizing

Rust, the great enemy of towers, is stopped before it can possibly start... every inch of tower and every tower part is hot-dip galvanized in Ideco's modern plant. Welded towers are dipped in sections (as pictured) while bolted towers are treated as members... this gives protection of joints that paint alone can never give.

**From the desk of ALLEN EDWARDS**

**Hazel What about Hiatus in Grand Rapids?**

Maybe you have pegged Grand Rapids as a typical midwestern city. And maybe some of these cities do look like good axel bait for your summer cut-back. But, hold it, Hazel, Grand Rapids is different.

There are more people in and around Grand Rapids in summer than in winter. And they spend more dough. Because Grand Rapids is right smack dab in the middle of “The Vacationland of the Midwest.” (Western Michigan, of course.)

Not only do Michiganders know how lucky they are and stay home summers . . . millions come up from less fortunate states to enjoy the woods and the lakes and the weather. A glance at the opposite page will tell you they come “loaded”.

So play it smart. Keep your schedules on WOOD and WOOD-TV this summer. Tell the client why (Katz has all the dope) and he'll tag you as a real smart doll, Hazel.

**GOVERNMENT**

**WFDF CH. 12**

**GRANT PROPOSED**

WJR Detroit and W. S. Butterfield would be denied Ch. 12 under initial decision.

BETTER antenna site and proposed programming more closely geared to the community to be served won FCC Hearing Examiner Benito Gaguine's approval last week when he issued an initial decision favoring the grant of Flint, Mich., vhf Ch. 12, to WFDF in that city. Decision also recommended denying the applications of WJR Detroit and W. S. Butterfield Theatres Inc. for the same facility in Flint.

Examiner found that WFDF, owned by the Harry M. Bitner interests (WFBM-AM-TV Indianapolis, WOOD-AM-TV Grand Rapids, and WEOA Evansville), chose an antenna site which would throw the strongest signal of the three applicants into Flint. It would also minimize Detroit coverage, he pointed out, whereas the other applicants located transmitters to encompass Detroit in coverage area. Whereas WFDF would therefore program for Flint, and areas to north (Bay City and Saginaw), WJR and Butterfield might be tempted to skimp on Flint programming in favor of Detroit coverage, the examiner deduced. Among other reasons in favor of WFDF, the examiner declared that its antenna site permits major network affiliation, while overlap with Detroit TV stations precludes this for other two applicants.

**KORE, KUGN Eugene Sales, Three Others, Approved**

FIVE shifts in AM station ownership were granted by FCC Thursday—including two involving Eugene, Ore., outlets and principals in the Eugene TV Inc. application for vhf Ch. 13 there.

C. H. Fisher, 30% party in the application, became sole owner of KUGN-AM-FM by purchasing 50% interest from O. E. and P. R. Berke for $56,531. In an April amendment to Eugene TV’s application Mr. Fisher agreed to sell his radio holdings should the application be granted.

Glenn McCormick, a 32.3% principal in Eugene TV, transferred his 70% holding in KORE to five parties, including Lee P. Bishop whose interest increased from 30% to 51%. Consideration was $122,500. Under the amendment filed April 24 Mr. McCormick, owner of KSLM Salem, Ore., withdraws from Eugene TV.

Other ownership changes involved:

KPAL Palm Springs, Calif., CP assigned from Joe Hamman and Melvin Sullivan to Florence Riley for out of pocket expenses of $4,897.

WFMM-AM-FM Macom, Allen Woodall and Howard Pili, each 16.5% parties, acquired negative control through purchase of remaining stock, held by executors of the estate of Ernest Black, deceased, by Middle Georgia Co., the licensee corporation. Consideration $99,000.

WAKT Aiken, S. C., John Mare gave up control and reduced his holding from 56% to 30% by transferring the difference to three new stockholders for $11,353.

**KMBC Refiles for TV**

KMBC has announced it will amend its application for vhf Ch. 9, Kansas City, to increase its visual ERP to 316 kw—the FCC maximum for that facility. Several years ago KMBC withdrew TV applications for Topeka and St. Joseph, Mo., in order to concentrate on its Kansas City application, the station reported. WTV Kansas City is competing for Ch. 9.
Ike Names Group to Study Lengthy Govt. Hearings

ANOTHER approach to cutting down the length, expense and volume of cases before FCC and other government agencies—this time with the blessing of the President—officially was begun last week when President Eisenhower appointed a committee to study the problem.

Meanwhile, the Senate Commerce Committee is scheduled to meet May 18 with FCC on the subject of speeding up TV grants (see separate story page 74).

The President's move, made upon the recommendation of Chief Justice Fred M. Vinson, was an outgrowth of a 1951 Judicial Conference Study of Administrative Procedure which had as its purpose the elimination of "unnecessary delay, expense and volume of record." Chairman of the study was U. S. Court of Appeals Judge E. Barrett Prettyman. President Eisenhower last week named Judge Prettyman chairman of the new conference.

Included in the membership of the new committee are Federal judges, Government trial examiners (including J. D. Bond of the FCC), and lay attorneys.

A subcommittee of the 1951 Judicial Conference, which numbered FCC General Counsel Benedict P. Cottone among its members, found that unduly voluminous records and unreasonable delay constituted a hindrance to the success of the administrative process.

In an itemized list of some of the causes of delay and expense, the subcommittee suggested among other things that (1) investigations and adjudications be completely separated, (2) greater use of pre-hearing conference technique, (3) tighter rein by examiners on the reception of irrelevant and immaterial evidence, (4) more adequate preparation and the elimination of dilatory tactics by counsel, (5) more discrimination in incorporating by reference other case records, (6) limitation and greater use of stipulation in technical and scientific evidence presented by expert witnesses.

Pennsylvania Senate Okays Educ. TV Plans

PENNSYLVANIA STATE Senate initially approved three bills to set up a state educational TV system last week.

The Pennsylvania State Senate Education Committee earlier had endorsed the bills.

One bill would authorize the General State Authority to build TV stations in Philadelphia, Pittsburgh, State College and Erie. Channels for educational TV outlets in these cities have been reserved by FCC.

The second bill would empower the Superintendent of Public Instruction to supervise the educational program on a state-wide basis.

The third bill would give school boards the same authority, but at the local level.

NARBA Delay Seen in Senate

SENATE subcommittee hearing on North American Regional Broadcast Agreement (NARBA), tentatively scheduled for May 4 [B+T, April 26, 13], may have to be postponed to late May or early June. Reason is that Senate Foreign Relations Committee expects to have foreign aid bill before it the first week in May. That information was contained in a letter from Sen. Charles W. Tobey (R-N.H.), chairman of subcommittee, to Clear Channel Broadcasting Service last week.

WOODLAND! TV

Woodland is summer's cool spot for hot profits

Take it from the tax collector. There are more people spending more moola in this area in summer than in the average months for the rest of the year! And these sales tax figures from Michigan's Revenue Department prove it.

JFMAMJJASOND

Based on 1952 receipts from 19 Woodland counties. Receipts of each month reflect sales of month preceding.

The U.S. Department of Commerce gets into the act by estimating three to four million tourists spend more than $200,000,000 in Western Michigan each year. Most of this boom business occurs in summer, of course.

So, "Dig that cra-a-a-zy Woodland market!" Hazel. You'll hit paydirt every time.

SOME OF NEW TV STATIONS SET TARGET PLANS

Some delays in original plans are reported by new stations. Total count of stations operating commercially stands at 168, 60 of them post-thaw, divided 32 vhf, 28 uhf.

NEW postponements in starting dates of television stations have been indicated. None of the first half of the past week expected to go on early May 1 met that target date. Others, set April 26, were delayed several days.

As this week begins, there are 168 stations counted as operating commercially. Of these, 60 are post-thaw stations, divided into 32 vhf and 28 uhf outlets.

Here is a complete list of all TV stations which were due to begin within the last few days, and are due on the air between now and early summer (arranged chronologically).

WNBW-TV (TV) Bellingham, Wash., uhf Ch. 38, represented by William Rembeau Co., plans to begin programming sometime in May. It will be the first WNBW station to go on the air.

WVTY (TV) Duluth, Minn., uhf Ch. 38, represented by Adam Young Television Inc., affiliated with all four networks, did not begin programming as planned originally, and now expects to start between May 15 and May 25. It will be the first Duluth TV station to go on the air.

WGLV (TV) Easton, Pa., uhf Ch. 57, represented by Headley-Reed TV, plans to begin programming May 11. It will be the first Easton TV station to go on the air.

WHIZ-TV Zanesville, Ohio, uhf Ch. 60, represented by John E. Pearson TV Inc., plans to begin programming May 15. It will be the first Zanesville TV station to go on the air.

WZTV (TV) Elmina, N. Y., uhf Ch. 24, represented by Forjoe TV Inc., plans to begin programming May 15. It will be the first Elmina TV station to go on the air.

WZTV (TV) St. Louis (Mo.-Belleville (III.), uhf Ch. 64, represented by Weed Television, affiliated with DuMont, plans to begin programming May 15. Already on the air in St. Louis: KSD-TV, uhf Ch. 5 (a pre-freeze station).

WKAY-TV Fargo, N. D., uhf Ch. 6, represented by Free & Peters Inc., affiliated with NBC-TV, plans to begin programming May 22. It will be the first Fargo TV station to go on the air.

WNJW-TV Raleigh, N. C., uhf Ch. 28, represented by Avery-Knodel Inc., affiliated with CBS-TV, plans to begin programming May 28. It will be the first Raleigh TV station to go on the air.

WKKF-TV Bakersfield, Calif., uhf Ch. 29, represented by Forjoe TV Inc., affiliated with all four networks, plans to begin programming approximately June 1. It will be the first Bakersfield TV station to go on the air.

KCBJ-TVB Pueblo, Colo., uhf Ch. 6, represented by Avery-Knodel Inc., plans to begin programming in July. It will be the first Pueblo TV station to go on the air in Pueblo: KDZA-TV, uhf Ch. 3.

KFSA-TV Fort Smith, Ark., uhf Ch. 22, represented by John E. Pearson TV Inc., plans to begin programming June 1. It will be the first Fort Smith TV station to go on the air.

KMK-TV Fresno, Calif., uhf Ch. 24, represented by Headley-Reed TV, plans to begin programming June 1. It will be the first Fresno TV station to go on the air.

KTFK (TV) Lake Charles, La., uhf Ch. 25, represented by Adam Young Television Inc., plans to begin programming between June 1 and July 1. It will be the first Lake Charles TV station to go on the air.

KTVH (TV) Hutchinson-Wichita, Kan., uhf Ch. 12, represented by H-R Television Inc., plans to begin programming between June 15 and July 1. It will be the first Hutchinson-Wichita TV station to go on the air.

WATR-TV Waterbury, Conn., uhf Ch. 53, represented by the William G. Rambeau Co., plans to begin programming approximately June 15. It will be the first Waterbury TV station to go on the air.

WSNU-TV Buffalo, N. Y., uhf Ch. 17, represented by H-R Television Inc., plans to begin programming between June 1 and June 16. Already on the air in Buffalo: WBEN-TV, uhf Ch. 4 (a pre-freeze station).

WNNK-TV Columbia, S. C., uhf Ch. 67, represented by the Paul H. Raymer Co., affiliated with CBS-TV and DuMont, plans to begin programming sometime in early June. It will be the first Columbia TV station to go on the air.

WBUG-TV Scranton, Pa., uhf Ch. 22, represented by Blair TV Inc., affiliated with CBS-TV, plans to begin programming June 1. WTVU (TV) Scranton, uhf Ch. 78, plans to start June 1. Station is represented by The Bolling Co.

KIDO-TV Boise, Idaho, uhf Ch. 7, represented by Blair TV Inc., affiliated with NBC-TV, plans to begin programming sometime in early June. It will be the first Boise TV station to go on the air.

WMTV (TV) Madison, Wis., uhf Ch. 39, reported.

KFACT in New Studios; No Loss of Air Time

WITH no loss of air time, KFACT Los Angeles completed its recent move to new studios and offices at 3773 Wilshire Blvd. in Prudential Square. Climax of the dedication ceremonies was the soldering of the last 10,000 feet of wire by Mayor Fletcher Bowron and Harry Volk, vice-president of Prudential Insurance Co.

KFACT has been known as "The Music Station" since 1940 when popular music and routine programming put it on a paying basis, enabling it to concentrate completely on classical and semi-classical selections. It began operations in 1932.

Two studios and control rooms feature all new equipment built by engineer Glenn Brunner under supervision of Chief Engineer Ron Oakley. The library contains 36,000 records for the 24-hour musical operation, reports Calvin J. Smith, president and general manager.
represented by The Bolling Co., affiliated with ABC-TV, NBC-TV and DuMont, plans to begin programming June 21. It will be the first Madison TV station to go on the air.

KUHT (TV) Houston, Tex., noncommercial educational permittee on vhf Ch. 8, planned to begin programming today (Monday).

KUSC-TV Los Angeles, noncommercial educational permittee on uhf Ch. 28, is expected to go on the air this month.

• KTVE (TV) Longview, Tex., uhf Ch. 32, will go on the air July 20, William M. Morrow, station’s commercial manager, advised B*TV. National representative is Forjoe & Co.

• KFEO-TV St. Joseph, Mo., vhf Ch. 2, reported that its RCA transmitter is due late this month, and that all the other equipment is in storage in St. Joseph. All the concrete piers for the base of the 750-ft. tower have been completed. Lehigh Steel, it was reported, has the contract for the tower. The station’s target date is July. KFEO-TV, represented by Headley-Reed, will be a CBS-TV affiliate.

• WMAZ-TV Macon-Warner Robins, Ga., started general construction on its transmitter building, tower and studios last week, George P. Rankin, president and chief engineer, reported.

Target date for commercial operation of the Georgia station has been set for Sept. 27, with test patterns on the air in late August. WMAZ-TV, primary CBS-TV affiliate and secondary DuMont affiliate, is represented by The Katz Agency.

WMT-TV Sets Sept. 27

• WMT-TV Cedar Rapids, Iowa, vhf Ch. 2, to be a grantee (B*TV, April 13), has tentatively set Sept. 27 as its opening date. The station’s building and antenna will be on a ten-acre site on the northeast side of Cedar Rapids. The tower, 600 ft. high, will be topped with a 102-ft. antenna. The station will operate with maximum power of 100 kw visual. WMT-TV is a CBS-TV affiliate and is represented by The Katz Agency.

• WLOK-TV Lima, Ohio, uhf Ch. 73, ended its first week of commercial telecasting with its first simulcast with WLOK (AM). The simulcast featured all 53 candidates running for nomination in the Lima primary election to be held this month.

• DuMont signed its first West Coast contract for a 5 kw uhf transmitter with Sheldon Anderson of KAFY-TV Bakersfield and KCOK-TV Fresno-Tulare during the NARTB convention last week.

The contract also covered complete studio equipment, cameras and two film scanners of the DuMont line.

• L. T. Matthews, general manager of the Sparton Broadcasting Co., permittee of a vhf Ch. 13 station in Cadillac, Mich., has pointed out that there has been confusion regarding the relationship of the Sparton Broadcasting Co. to The Sparks-Withington Co., home office of which is in Jackson, Mich.

Mr. Matthews, explaining that the vhf Ch. 13 construction permit specified an effective radiated power of 302 kw visual, said legal counsel for the Sparton Broadcasting Co. is Scharfeld, Jones & Baron, Washington. Counsel to The Sparks-Withington Co., parent company of Sparton Broadcasting, is Henderson, Quail, Schneider & Peirce, Cleveland. Engineer for Sparton Broadcasting is Allen W. Dau-

A New Angle for Anglers

The Rod and Gun Club met the other night and the chief topic under discussion was what kind of fishing prizes to award this year.

"Squint" Miller got the floor and pulled a surprise. He said, "Aren’t we awarding prizes to the wrong people? We really ought to give some kind of prizes to the farmers who let us fish on their property!"

Well, that really caused a lot of comment and finally "Easy" Peterson got up: "I make a motion when prizes are awarded to members, twice that prize go to the farmer on whose land the fish was caught!" The motion was passed—unanimously.

From where I sit it’s a good illustration of how people learn to “think of the other fellow.” Fishermen and farmers, Democrats and Republicans, soda-pop fanciers, and those who prefer a temperate glass of beer—we all have to think of each other. Thoughtfulness and tolerance are “prizes” all Americans should cherish!

Joe Marsh

Radio papers acquired ownership of WHEC, Mr. Olean, nett stations, which quarters of the Ganc- added to the company, Mr. Olean, who is executive vice president, and Mr. John Gutenberg, president, who has announced the acquisition of vhf and applicant Ch. 44. The acquisition of the WHEC station is expected to strengthen the company's position in the competitive market of the Allegheny region.

KRLD-TV Dallas Boosts Power to Maximum 100 kw

TELECASTING with maximum allowable power was begun yesterday (Sunday) by KRLD-TV Dallas-Fort Worth. The vhf Ch. 4 outlet now is operating with 100 kw visual, more than three and a half times the former power and the maximum allowed by FCC in the vhf low-band (channels 2 through 6). Clyde W. Rembert, president and managing director, has announced.

Mr. Flynn, manager of KRLD-TV, said the station would have been on the air sooner with its increased power but that delays in the manufacturing and delivery of new equipment postponed the power boost.

KRLD-TV began operations Dec. 1, 1949, with an effective radiated power of 15.1 kw visual. Later, it was increased to 27.3 kw visual ERP. The outlet is owned by the Dallas Times Herald.

WOR-TV Plans June 1 Move to Empire State Bldg.

WOR-TV New York's target date is June 1 for transfer of its transmitting site from North Bergen, N. J., to New York's Empire State Bldg. The station has FCC permission for the move, where it will join WNBTV (TV), WABC-TV, WCBS-TV, WABD (TV) and WPX (TV). WATV (TV) Newark also will move to this site at a later date.

WOR-TV will increase its radiated power from 88 kw visual, 44 kw aural to 130 kw visual, 65 kw aural, while raising its antenna height from 973 feet to 1,240 feet above the surrounding terrain. Standard Electronics transmitting equipment now is being installed at the Empire State Bldg., a WOR-TV spokesman said.

Three Vice Presidents Named by KSL Radio, TV

THREE new vice presidents for KSL Salt Lake City radio and TV divisions have been announced by Ivar Sharp, executive vice president of Radio Service Corp. of Utah, which owns the audio-video outlets. They are: Eugene M. Halliday, vice president in charge of radio; D. Lennox Murdoch, vice president in charge of television, and Dr. Carl J. Christensen, vice president in charge of engineering and development.

In other appointments announced by RSC, Benjamin H. Hollingworth was named assistant secretary and treasurer, Richard L. Evans was appointed to the board of directors, and Vincent Clayton became chief engineer for both radio and TV.

Mr. Halliday has been associated with RSC since 1934, and for the past 18 months has been manager of KSL radio. He became manager of KID Idaho Falls, Idaho, in which RSC held an interest in 1946. Mr. Halliday returned to Salt Lake City in 1950 as sales manager of KSL-TV, a job he held until taking the management of KSL radio in December, 1951. He will continue in that capacity in addition to his vice presidential duties.

Mr. Murdoch has been with KSL for 22 years, starting as an announcer and going on to work as continuity editor, production manager, sales manager, and director of station relations, FM development, and TV operations. He continues as manager of KSL-TV.

Dr. Christensen is a former dean of the College of Mines and Mineral Industries at the U. of Utah. He began his electronics and communications work in 1927, and was associated with Philo T. Farnsworth at the Crocker Research Laboratory in San Francisco. He later was a research engineer at Bell Telephone Labs. in New York.

Mr. Hollingworth joined KSL radio in 1939 as an accountant. He also has been secretary-treasurer of KSUB Cedar City, Utah. Mr. Evans is known nationally as creator and commentator of The Spoken Word on the CBS Radio Salt Lake Tabernacle Choir broadcast. He is now a director of the David W. Evans Advertising Agency in Salt Lake City.
NCAA Will Pick Network Or Sponsor for '53 Football

Proposals, submitted by networks and advertisers, for telecasting college football games next fall to be considered by NCAA's TV committee May 11.

NATIONAL Collegiate Athletic Assn.'s 1953 television committee will meet in New York May 11 to examine proposals submitted by networks and sponsors for telecasting collegiate football games next fall within the framework of NCAA's 1953 program.

The committee announced last Tuesday a plan that will offer viewers a slight increase in the number of games on network TV next fall over 1952. It has been submitted for approval to member universities and colleges, and ballots results are expected to be announced Wednesday, according to TV director Asa S. Bushnell.

Mr. Bushnell told B*TV last week that the TV committee will consider all network and sponsor recommendations. He said either a network or a sponsor will be chosen, pointing out that it was NBC-TV in 1952 and Westinghouse Corp. in 1951. The selected business organization, he said, will be permitted to work out other arrangements, subject to NCAA approval. Announcement of the network or sponsor will be made later, Mr. Bushnell added.

In deciding upon a network or sponsor to represent NCAA, Mr. Bushnell said, strong consideration will be given the promotional and publicity effort that will be at NCAA's disposal.

The 1953 plan, which was announced in Kansas City by Walter Byers, NCAA director, calls for 13 dates—12 Saturdays plus Thanksgiving. This amounts to one more than last year. Another point of difference is the introduction of a "panorama experiment," whereby "two or three" of the dates will be devoted to telecasting portions of widely separated games all in one afternoon.

Other salient features of the 1953 program, which needs a two-thirds vote of membership for approval, are:

- On the 10 or 11 full-game programs, at least one of the games shall originate in each of the eight NCAA geographical districts and no more than two shall originate from any one district.

- No member shall appear on network television more than once. Preference will be given to colleges which did not participate in network TV in 1952.

- Small college games may be telecast on a local basis and sell-out games may be carried locally on TV with NCAA approval. (Some 40 such games were telecast last year.)

- Games played on dates other than Saturdays afternoon are affected only to the extent that the one network appearance rule shall apply and permission must be obtained for telecasting such games.

Although no dates are fixed, an NCAA spokesman indicated the program will begin Sept. 19 and continue through Dec. 5. NCAA restrictions do not cover post-season competition, such as the bowl games, which may be negotiated on an individual basis.

The 1953 television committee is headed by Robert J. Kane, athletic director of Cornell U. Messrs. Byers and Bushnell, TV program directors, are ex-officio committee members.
WILD Increases Power
To 10 kw Day, 1 kw Night

WILD Birmingham switched its operation to 10 kw day, 1 kw night on 850 kc at noon last Monday. General Manager Don D. Campbell reported last week. The station previously had been on 1490 kc with 250 w.

The changeover was promoted by WILD, a Mutual outlet, with billboards, newspaper ads, trolley-bus cards, trade paper ads, road signs, movie trailers, direct mail and novelty items. First broadcast on the new power and frequency was Game of the Day, which that day carried a Birmingham Barons contest.

New Blair Presentations

NEW TYPE radio program presentation forms, illustrated and in color, were placed in use fortight ago by John Blair & Co., national representative of radio stations, according to Wells H. Barnett, manager of the Blair sales development department.

The new forms, which cover six different program types, are designed for salesmen to provide agencies with quick and accurate data on local programs on Blair-represented stations. An estimated 225 individual programs will be covered in the presentations, Mr. Barnett said.

REPRESENTATIVE SHORTS

WORL Boston appoints Headley-Reed, N. Y., as national representative.

George W. Clark Inc. appointed national sales representative for WTVP (TV) Decatur, Ill.

CHLO St. Thomas, appoints Stephens & Towndrow as representatives for Toronto area.

KXLR Little Rock appoints William G. Rambeau Co., Chicago, as nation representative.

WCVO-TV Montgomery, Ala., appoints O. L. Taylor Co., N. Y., as national representative.

WEAS Decatur, Ga., WWV Savannah, Ga., WGOV-AM-TV Valdosta, Ga., and KWEM West Memphis, Ark., appoint Stars National Inc., N.Y., as national representative.

KCOK-TV Tulare, Calif. appoints Forjee & Co. as national representative.

KTVH Hutchinson, Kan., appoints H-R Representatives as national representative.

WPOR Portland, Me., appoints Richard O'Connell, N.Y., as national representative.

KVI Seattle names H-R Representatives as station representative.

MANUFACTURING

New 3-D Color Movie
To Be Demonstrated Soon

SOON to be demonstrated is a new system of tri-dimensional color motion pictures, developed by R. E. Shensted, Marshalltown, Iowa.

The new system, called Stereocolor, was hailed by Col. B. J. Palmer, Iowa broadcaster and one of Mr. Shensted's financial backers, as one of the answers to help the movies "combat the invasion of TV which is closing hundreds of movie theatres today." Col. Palmer said the tri-dimensional color system also had application to television.

"As startling and as impossible as it seems, we produce 3-D and a full range of colors with one black and white film," Col. Palmer said. He said these economies would permit saving of millions of dollars to producers and theatre managers.

Stereocolor also includes a special feature respecting illumination, it was reported.

Stereocolor requires only one film and the single negative is printed on a positive in regular black and white method of processing. Colors used in Stereocolor always carry 100% of saturation, it was said.

Fact that other 3-D systems require additional projectors and equipment and Stereocolor does not, should add to its savings for theatre owners, the report stated.

Four patents have been issued on Mr. Shensted's research and more are being applied for.

Col. Palmer is the principal owner of WHO-AM-FM Des Moines, WOC-AM-FM-TV Davenport, and owns 25% each of KMA Shenandoah and KMTV (TV) Omaha.

Stromberg-Carlson Election

RE-ELECTION of the following officers and directors was announced after the annual stockholders meeting of Stromberg-Carlson Co., Rochester, N. Y.:

Robert C. Tait, president; Gordon G. Holt, vice president, finance; William Pay, vice president and general manager, broadcasting division; Sidney R. Curtis, vice president in charge of government contracts; Arthur P. Gibson, general manager, telephone division; Clifford J. Hunt, general manager, radio-television division; Anthony G. Salerno, general manager, sound equipment division; Edwin C. Bower, corporate secretary; Wilbur W. Hetzel, treasurer; Daniel G. Schuman, controller; George E. Eyer, assistant secretary and manager, industrial relations; Charles W. Pritchard, assistant treasurer; Theodore L.Bowen, assistant secretary and manager, patent department; and George C. Gordon, assistant secretary.

Plamondon Loses Fight
For Stockholder Proxies

A. D. PLAMONDON Jr., president of RTMA and former president of Indiana Steel Products Co., Valparaiso, Ind., is reported considering court proceedings against the majority faction of the steel firm's board of directors. By winning the greater number of proxies during a stockholders' meeting held last week, the management candidates were re-elected, along with two vice presidents of the steel company. Mr. Plamondon and Fred M. Gillies, vice president of Acme Steel Co., Chicago, were unsuccessful in their efforts to stay on the board.

A radio success story:

BIG, LIVE SHOW ATTRACTS MORNING AUDIENCE

MORNING radio listening in the Cleveland area needed a potent shot in the arm to revive it when Hamilton Shea took over as general manager at WTAM Cleveland last year. A sales check revealed that his station's 7-9 a.m. portion, following a conventional programming pattern, had never been sold out. In a further breakdown, 7-8 a.m. listenership was considered fair; the 8-8:30 a.m. less than fair, and the 8:30-9 a.m. slot consisted of two 15-minute programs which have either been moved off the station or re-scheduled at a later time.

Rating-wise, the above-mentioned data placed WTAM 3d in listenership—a poor standing for a 50 kw clear channel outlet. If the picture were to change, some drastic revisions were in the offing. Mr. Shea was convinced he had the solution in a program idea new to Cleveland and different enough to make friends and influence people.

The solution: a big, live show in a time period that seldom accommodates any kind of programming but disc jockeys. The pay-off: higher ratings and more sponsors.

The first step in winning back an audience, which had noticeably drifted elsewhere, was to completely revamp the morning schedule. From 7-9 a.m., Mr. Shea programmed Morning Bandwagon, a new live show featuring 17 musicians, two vocalists and a singing pianist, Johnny Andrews, as m.c. Henry "Hot Lips" Levine, whose trumpet playing has gained him national popularity, was engaged to lead the WTAM "Clevelandaires." To suit the varied taste of radio listeners, the orchestra was divided and subdivided into groups, each specializing in a particular music style. Unique solos, such as a trombone trio's rendition of a popular ballad, are the rule rather than the exception on Morning Bandwagon. In producing the new show, Mr. Shea avoided the ordinary and concentrated on the unusual. His conviction that imaginative, well-planned radio broadcasting will hold its own in any market has become a reality at WTAM.

The station's 7-9 a.m. story isn't the sad one it was last year before Morning Bandwagon went on the air. The show, boasting a waiting list, is sold out to 38 sponsors. Two months after the program began, ratings showed that no other station headed WTAM in the time period which the show occupied. After seven months, spots, which sold for $39, were raised to $50, a tribute to the show's pull. Morning Bandwagon's effectiveness was further established at the recent annual awards luncheon of AFTRA in Cleveland when it walked off with more "best" awards than any other production in the city.

May 4, 1953 · Page 85
WHY is a profitable AM station profitable?

Answer: It has prestige, adequate capital and management know-how, the latter the prime ingredient.

Know-how is not an occult gift. It can be described and applied by alert and imaginative managers everywhere.

This report is intended to translate that know-how into understandable terms. The advice here can be followed by the management of any station.

A good place to begin is to describe how the management of a station may find out whether it is getting its proper share of local advertising and may set local dollar sales objectives.

This may be done by buying, for the state where the station is located, from the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., the (1) "U. S. Census of Business, 1948—Retail Trade" and (2) "U. S. Census of Business, 1948—Service Trades." These bulletins list retail stores and service trades for the metropolitan area or county, giving the number in each classification and the 1948 sales for each class.

After sales for each category are listed, then to each dollar sales figure the 1949 Treasury Department Study of Advertising Expenditures (see Table 1 next column) is applied, by type of retail and service operation, showing the percentage relationship between sales and advertising expenditures.

The total local advertising figure is projectable to 1952 by use of the McCann-Erickson Annual Studies of Dollar Advertising Volume which appear in Printers' Ink magazine. This study contains a figure showing the growth each year in local advertising. These growths were: In 1949—6.7%, 1950—7.9%, 1951—12.5% and 1952—12.3%.

To the 1948 all-media local advertising dollar expenditures estimated by the station operator should be applied 6.7% to determine the dollar amount to be added to the 1948 figure, then 7.9% to the new 1949 figure, and so on until arrival at the estimate for 1952.

The resulting figure represents overall local advertising expenditures for all local media. In multiple-station markets, radio's share of this has ranged from 5% to 25%, depending upon how well radio has sold itself locally. In 1951 on a national average basis local radio in all markets got 11% of local advertising money, and for 1952, 10.4%.

If a station is the only one in its market selling time to local merchants, it can figure easily what its own share has been and thus set its own dollar sales goal. If there is one other competing station in the market, the station manager must depend upon his own estimate of his competitor's share of local advertising. If there are three or more stations in the market, the manager can get total local time sales for the previous calendar year from FCC.

Thus, the current year's all-media advertising dollar potential for the station's market can be the same as last year's—if business in this market is going to be at about the same level this year as last. In other words, the station operator has formed a basis for all-media dollar potential in his market by estimating an expenditure figure for all media in the most recent year.

The station manager now has a means of determining what his market area should or can do in the way of total radio dollar sales. A 15% to 20% figure for radio is not unreasonable for its share of local all-media advertising expenditures and the operator may set his goal by estimating what he can get as his own station's share of this 15-20%.

Some of the limiting factors: All other media competition and the amount of time the station operator has unsold. The rates radio gets in the market also will help determine its share.

Although estimation of national advertising expenditures for any market is comparatively simple, it must be remembered that there is no assurance that the national advertiser, through network or spot advertising, either will want or need the particular station in his advertising plans. His product may not be distributed in this market or he may have insufficient money to include this market in his advertising.

In estimating the market's national all-media advertising, the total dollar expenditures for national advertising is taken from the McCann-Erickson Annual Study of Advertising Expenditures. In 1952 this figure was $4,120,900,000. This figure is multiplied by Sales Management's Retail Sales Per Cent of U. S. A. for the particular market.

It must be kept in mind the figure obtained by this method is for all-media advertising in the particular market. Taking again the 9.7% figure from the McCann-Erickson study as the amount of total advertising dollars going to radio in 1952, it may be figured that approximately 10% of the all-media figure estimated for this market will go to radio. Of course, this is an average figure for the whole country and there will be variations among markets—particularly since national advertisers do not spread their expenditures to every market.

In radio too, the national advertiser often advertises his products in a particular market through some outside station. Thus, to estimate the share of local stations, the operator must estimate what they lose because of coverage of this market by non-hometown stations.

In the major markets, too, a much greater share of national advertising dollars is spent. For instance, the FCC 1951 financial report says: "More than four out of every radio station in the United States estimate their sales as being 10% or more of the total for the market, and some of these feel their sales are 15%.

A painstaking study of radio operations in both TV and non-TV markets points the way to better management and more profitable AM operations.

YOUR RADIO PROFITS

Richard M. Allerton, manager of the NARTB research department, unveiled at the NARTB convention last Tuesday the results of a painstaking study by Stewart, Dougall & Assoc., New York, into radio management. Objective of the study: To find out what makes profitable AM stations profitable and to set up principles of good management that AM stations everywhere could use. Stewart Dougall & Assoc., a management and market research firm, thoroughly investigated 20 radio stations in five representative markets, two where TV also operated and three without TV. Here, revised for publication, is Mr. Allerton's summary of the findings. Though none of the conclusions is particularly astonishing, the study emphasizes that profit and sound managing—including adherence to recognized ethics and public service standards—go hand in hand. A more detailed report on this study will be distributed shortly.

Richard Allerton

five dollars spent by national and regional advertisers for radio time was spent on stations located in the nation's 168 metropolitan areas. These stations, numbering about 900, received approximately 84% of the payments to stations for network time sales and approximately 85% of the revenues from national spot business."

Thus, the 1,300 stations in approximately 1,000 communities under 50,000 population receive only 16% of payments by national advertisers for network time sales and only 15% of national spot business. This makes the importance of local business to these smaller-market stations.

This method of estimating national advertising potentials would be fairly reliable in the 162 metropolitan markets listed in the J. Walter Thompson Co., publication, "Population and Its Distribution." In markets with city centers of 25,000 to 50,000 the variation in spending by national advertisers would be much more, and below that, in counties at least 50% urbanized, there would be a still greater variation, many of these markets getting little if any of national advertising dollars.

Dollar Revenues Advance

Data from the five-market study shows radio's share of local all-media spending in radio-only markets averaged 15% in 1947, and went to 15.2% by 1951, a slight rise. Since total revenue dollars increased 91% in the five years and local all-media advertising dollar expenditures rose 89%, local radio dollar revenues advanced slightly more percentagewise than did the expenditure.

In markets where radio had TV competition radio's local dollar revenues were 17.4% of all-media local advertising expenditures in 1947 and 9.6% in 1951. Radio's local dollar revenues rose 9.5% and estimated local all-media advertising dollar expenditure increased 98%. Thus these stations, as well as those without TV competition, increased their dollar revenues one-tenth by doing the things set forth later in this article in the principles of profitable radio station operation.

For stations in radio-only markets, radio's share of the total all-media national advertising expenditures was 8.8% in 1947 and 8.8% in 1951, making a 27% increase in dollar revenue when all-media national dollar expenditures increased by 27%. Thus, radio held its own in these markets.

But radio's share of the national advertising dollar declined 7% in the five-year period, dropping from 9.9% to the total in 1947 to 5.5% in 1951. This is indicative that TV's effect on radio from national advertising was far greater than its effect on local advertising.

The study shows national advertising dollars received by the five most profitable in the five markets stations in 1947 and in 1951. The two stations in TV markets derived $674,000 from national network advertising in 1947, and $548,000 in 1951, a drop of 18.7%. From national spot they received $576,000 in 1947, and $615,000 in 1951, an increase of 6.8%. The three stations in non-TV markets received $442,000 from network advertising in 1947, and $436,000 in 1951, a drop of only 1.4%.

But their national spot business went from $437,000 in 1947 to $680,000 in 1951, a rise of 55.6%.

Comparative profits indicate that in radio-only markets profits in dollars (before federal income tax) increased 39% from 1947 to 1951, while revenues increased 58% and expenses increased 64%. Profits in 1947 were 23% of revenue and in 1951, 20%.

In radio-TV market profits (before Federal income taxes) decreased 34% from 1947 to 1951, revenues increased only 0.25% and expenses increased 7%. Profits in 1947 were 17% of revenue and in 1951, 11%.

But it is interesting to note that TV's full impact did not hit radio revenues and profits in TV markets until 1951. In 1950 radio profits in these markets reached their peak for the five-year period, while this peak was reached in radio-only markets in 1951.

FCC final AM and FM financial data for 1951 were used in finding whether the experience of the entire industry might indicate, by size of market and kind of station operation, the minimum revenue below
which practically all stations operated at a loss.

In unlimited regional station operations, making a profit according to FCC, average expenditures in metropolitan area markets with 250,000 to 500,000 population amounted to $247,000 in that year. Expenses of such stations reporting a loss amounted to $189,000.

Average revenues of profitable stations were $316,000, or a profit (before Federal income taxes) of 22% of revenues.

Several important questions are raised here:

1. Does the average expense figure on loss stations cut down on usual expense items which are necessary for profitable operation, or are these expenses more realistic than those of the profitable operations?

2. On the other hand, are expenses of the profitable operations realistic or do they contain high administrative salary items which could be trimmed under economic pressures and still not adversely affect the business-producing efforts?

Minimum Profit

Assuming that somewhere between one expense average and the other is the reasonable answer, the figure of $233,500 would be the minimum profit a station must make in 250,000-500,000 markets to break even.

Thus to make a 10% profit on sales the minimum average revenues in this class must be approximately $260,000.

The thinking just expressed is set up in Tables 2 and 3 (see below), showing estimated average minimum earnings of limited and unlimited radio stations which must be made by regional and local stations before they show profits in the size markets shown.

A comparison of these average figures to the five-market study shows the profitable stations are well exceeding the average figures set up, and the unprofitable stations correlating to a high degree. This adds up to the conclusion that unless a station can step up activities to meet these minimums for its respective size of market, it probably is fighting a lost cause and might as well close up shop.

Going back to the study, it was found that the case histories of the five most profitable stations collectively followed the principles of profitable station operations. These practices are grouped into five headings: Programming, sales, personnel, public service and financial.

Programming

Under programming, station management:
1. Developed and promoted distinctive personalities on live shows, farm and women's programs and disc jockey shows.
2. Improved established shows by adding new talent and features.
3. Strengthened news programming by broadcasting news more frequently, rewriting local and national news, extending local coverage and developing news personalities.
4. Intensified public service programming and participation in community affairs, in several instances adding a public service director.
5. Tended to drop network sustaining programs and to develop local programs, either live or recorded, around key personalities.
6. In counter-programming against TV, placed increased emphasis on local programming of "relaxing" music, news and sports—with low-pressure advertising, particularly for Sunday programs.
7. Used more care in choosing music for local programs, selecting types of music to appeal to varying types of audiences.
8. Appraised programming by comparing stations to find the most promising areas for exploitation on their own stations.

Sales

1. Concentrated on local business and obtained business from advertisers not previously using radio. The profitable stations show year by year growth in number of accounts.
2. Intensified advertising and promotion, emphasizing: Frequent on-the-air program announcements, sales presentations to acquaint advertisers with specific programs, signs and posters, movie trailers for station promotion, direct mail and personalized letters to advertisers, specialized direct mail activity of various types, audience promotion, trade magazine and newspaper advertising and publicity, use of studios and facilities by local firms and advertisers and station anniversary publicity stunts.
3. Strengthened sales by adding experienced personnel acquainted with the local area and business men.
4. Studied local advertisers' problems to help them with the sales approach, type of program, and time of day for best results in radio.
5. Analyzed accounts representing local market potential and directed sales effort to those previously weak in radio.
6. Developed case histories of successful radio advertisers for local selling.
7. Collected market data on the metropolitan and trading area for sale of national advertising.
8. Increased direct contact between program personalities and local advertisers to sharpen up commercials, associate personalities with products advertised, and reduce vulnerability in the case of lost sales personnel.
9. Improved account service, but relieved salesmen where possible from routine service functions.
10. Provided sales incentive by salary plus commission or bonus compensation.
11. Maintained closer control of sales by requiring call reports and by meetings with salesmen.
12. Provided new sales personnel with intensive indoctrination and training.
13. Worked closely with local accounts after they were sold.
15. To meet television competition—analyzed local advertisers to determine why they bought TV, how much they spent, and results obtained from television in relation to expenditure. Many later were persuaded to return to radio, or divide appropriations between radio and TV.
16. To meet competition of newspapers—participated in retail surveys to measure the effectiveness of radio versus newspaper advertising in the local market.
17. Increased merchandising activity in giving more sales service to advertisers. Among specific steps: Sent letters to the retail and wholesale trade informing them of a program to be sponsored by a particular product they sell; made personal contacts at the retail level to find the competitive position and retailers' and consumers' opinions on specific clients' products; used car cards.

than any other 4 x 5 commercial slide projector

The famous GRAY TELOP I

Makes profits grow — projects low-cost, easily produced commercials. Four optical openings for projection of opaque and transparent photos, rolling titles, slides, small objects, etc., with superimposition, lap dissolve, or fade-out effects. America's best-known, most-used television optical projector!

GRAY TELOP II

Another TV profit maker—with two channels accommodating slide holders, light boxes and accessories for special effects. Gives professional results—and one operator does it all!

GRAY 3A TELOJECTOR

New, compact unit for automatic remote control projection of standard 2 x 2 slides . . . in uninterrupted sequence . . . with fading, lapping and superimposition. Solves many problems for both large and small stations. Get all the facts, now!

and window displays to advertise products, station and programs; encouraged retailers to build product displays tied in with window displays promoting the station and program.

Personnel
1. Obtained salesmen with previous experience in radio, advertising or sales with a definite leaning toward sales of intangibles.
2. Rewarded station personnel for suggestions resulting in improved operations.
3. Paid salaries high enough to obtain and hold high-calibre personnel.
4. Used care in selecting and training continuity personnel, recognizing that copy preparation is a key selling function.
5. Brought in younger people with creative ability and gave them time to prove themselves.
6. Familiarized station personnel with problems and practices in other departments.

Public Service
1. Merchandised public service programs to build awareness of the station's interest in the community.
2. Provided staff talent to make public service programs interesting and effective.
3. Gave local groups ideas on raising funds or obtaining constructive action from the public.
4. Adopted selective local service programming to support activities with the widest interest.
5. Encouraged staff members to participate in community affairs as individuals.
6. In one medium market, formed a Radio Council in the community, made up of the program directors of each station, to evaluate requests for support by fund-raising groups.

Financial
1. Revised rates periodically, considering operating costs, advertisers' cost per listener, and demand for time.
2. Redesigned rate structures with the trend of charging more for daytime radio and less for evening time in TV markets.
3. Maintained closer control over expenses, realizing operating costs have increased faster than revenue.
4. Adopted a philosophy that radio cannot make its product more attractive by cutting prices, and that rate cutting is not the answer to radio or television competition.
5. Helped maintain a firm rate structure locally by not participating in deals and special arrangements which mean rate cutting.

The study attempted to find whether station management budgeted both overall and departmental expenditures for each ensuing year's operations. It found this not the case in the smaller and medium markets in the cities investigated. But the study did find some attempt to determine the probable costs and revenues of new programs being considered.

Although not speaking from factual data obtained in the survey, the NARDB Research Dept. report expressed a belief that budget and fiscal control policies are well established in the largest station operations in the big metropolitan areas. Whether or not this is so, the report indicates a belief that any sound business operation—including radio—should have an overall and departmental...

Choose the right Altec console for the job...

AND ORDER IT VIA GRAYBAR

for smaller stations, single studios, recording installations

ALTEC MODEL 230B is carefully engineered to do a top-quality job. This compact unit measures 17” x 9 3/8” x 36 1/2” and features eight low level microphone or turntable inputs and four remote lines of which four microphone or turntable inputs and two remote lines may be mixed simultaneously. The front panel hinges upward to expose all mixing pots, switches and tubes for immediate service. Plug-in power supplies are mounted on the floor of the console. The output channels can be switched to either of two output lines, automatically connecting the control room telephone to the unused line. No program interruption or feedback.

Be sure to get the best in consoles — order your Altec equipment via Graybar. Consult your local Graybar Broadcast Equipment Representative for complete information.

Graybar Electric Company, Inc.
Executive Offices: Graybar Building, 420 Lexington Avenue, New York 17, N. Y.

THE ULTIMATE IN QUALITY CONTROL FOR LARGER STATIONS

ALTEC MODEL 250A delivers peak performance... with an added bonus! Specially designed plug-in preamplifiers, line-amplifiers and power supplies add compactness and flexibility. All are accessible for easy service and instant replacement.

This completely self-contained, AC operated unit has nine mixing controls and 18 input channels. Wide range frequency response (± 1 db 20 – 20,000 cycles)... with minimum distortion and noise level. Excellent balance... high attenuation of longitudinal currents for all frequencies up to 20,000 cycles. Flush-mounted illuminated VU meters are equipped with cut-off switches and three-position attenuators. No cross-talk... no talkback to live mikes.

Graybar

Budget, and suggests the matter as a possible area of further study in radio station operations.

This is not to say the stations studied are completely lax in cost controls. Good management often has weekly and sometimes daily financial data available. In several instances management’s objective was to obtain gross revenues roughly 25-30% above expenses, but the study found in no instance any hurried rush as though they were trying to maintain this margin. Actually, the margin was a goal rather than an accomplishment.

Radio seems to be unable to obtain more than 20% of the local advertising dollar potential, where there is newspaper competition, and sometimes does not even reach this share of potential. Since there seems to be a ceiling to the gross station radio is able to take from a market where there is local daily newspaper and other media competition, it would seem that, in a multi-station market, for example, one and sometimes two stations may make little, if any profit for the owners.

If it is true nearly half of all radio station markets have no local daily newspaper competition, it would seem there is a real opportunity for radio to obtain the lion’s share of the local advertising dollar in these markets.

Spot Returns Improve

TV’s effect has been primarily on network revenues of stations, with local radio revenues increased in proportion to the effort good management has expended in its local selling and programming. Spot returns also have improved, but not to the same extent as local.

A greater proportionate expenditure in the two combination radio-TV markets studied on programming and sales was reported in 1951 as compared with 1947. In the three radio-only markets in 1951, 12.5% of expenses went into selling, compared to 19% in the radio-TV markets—a seemingly greater sales effort in the TV markets.

Operating figures of radio stations in TV markets clearly demonstrate that radio must adjust to TV competition and this report’s principles of profitable station operation show how competent operators met competition from this new medium.

Although intelligent radio station operation can meet TV competition, the study indicates that in some TV markets radio may have to give way to lower revenues and possibly fewer stations.

An increased revenue per employe of $990 was averaged by the stations between 1947 and 1951, but increased expenses during the same period practically offset the per-employe revenue. Revenue per employe for stations making a profit in 1951 ranged from $3,824 to $13,169. The two most profitable stations, one in a radio-TV market and the other in a radio-only market, produced revenues of roughly $13,000 and $12,000, respectively, per employe.

In four of the five markets the one outstandingly profitable station in each had been long established and was an affiliate of one of the two highest revenue-producing networks. The leading station in the fifth market was a new station which had passed an older station in profits, although each was affiliated with one of the two highest revenue-producing networks.

Sales promotions were described by management as among several factors affecting profitable operation, although an exact breakdown on sales expenses was not available in sufficient instances to draw casual relationships between profitable operation and intensity of promotional sales effort. Management cannot afford to lower advertising standards to get business, and stations which do so are offending the public, losing public confidence and doing radio great harm, outstanding management believes.

All the stations stood firmly against rate cutting, and management felt “radio cannot make its product more acceptable or raise rates and cut expenses and thus raise the market to TV or other station competition,” but that this answer, rather, is in the principles of profitable station operation enumerated in this report.

The most profitable station in each market outspends competitors in the program department and spends a smaller ratio of its total in the general and administrative category.

Advertisers in the markets studied took about 18 months to get a true picture of TV costs versus results and in some instances returned to radio. In both TV and non-TV markets, radio stations have increased their emphasis on building local business. The emphasis station management places on selling national and regional, or on the other hand, local accounts, depends on the station’s power and extent of coverage.

The station operator cannot cut his sound business-getting and business-expenditures, but he must examine closely each item which does not lead programwise or saleswise to greater business.

Station’s Use of Leads

Ordinarily, but not always, a station which leads or is in second position in a multi-station market, uses ratings in selling national and regional advertisers, but for local business, ratings are little used. Although there is a widespread belief ratings are needed in selling national accounts, there are some instances of long-established, profitable stations not using ratings at all.

Radio stations were highly profitable businesses after World War II, perhaps in many cases too profitable for their future good, the report indicates from other studies. Radio stations increased vastly (roughly 150%), advertisers flocked to radio and it was easy to sell time and make money. Magazines and newspapers made money too, but not at the pace radio set until about 1944. Faced with rising costs, magazines and newspapers increased their rates as costs mounted and since then have done proportionately better profitwise than radio.

Now confronted with increasing competition from TV, radio must realize its own strengths, and advertise and sell itself as a strong and resell itself at local, spot and national advertising levels. The drive must not be primarily against television, but for radio against all other media.

To be profitable, stations must put into effect the principles enumerated above and management must give fulltime supervision in promotion.
B'T's Golf Tourney Winners: Aston and Jarema

California and New Yorker come in with low gross and net scores to take silver cups in annual golf tournament opening NARTB convention.

Despite a low smog and light rain which Southern Californians explained away as a fog blown down from San Francisco, 56 radio and television divot diggers competed at Wilshire Country Club, Los Angeles, last Monday in the 19th annual Broadcasting - Telecasting-NARTB golf tournament which kicked off convention activities.

When final scores were tabulated, Sil Aston, KNBY Monterey, Calif., and Andy Jarema, WKOP Binghamton, N. Y., were the low gross and low net winners, respectively.

Mr. Aston, who also won the NARTB tournament in Chicago in 1949, shot a remarkable 76 for low gross honors to win one of the silver trophies donated by Broadcasting - Telecasting. Mr. Jarema won low net in the blind bogey tournament with a gross 89 aided by a 27 handicap for a 62 tally. He was presented a silver cup by B'T.

Second low gross honors were won by Joe Bernard of KOMA Oklahoma City, with a 79 while Ken Brown, KWFT Wichita Falls,
TOTALLING their blind bogey handicaps are (1 to r) Frank Gehiter, WSB Atlanta; Earl Smith, Edward Petty & Co., San Francisco; Dresser Dahlsted, ABC Radio, Hollywood, and Riley Jackson, Cecil & Presbrey, Hollywood.

was one streak behind with an 80.

Bob Ferguson of WTRF-TV Wheeling and Howard Schellenberg, Jr., of Haley, Doty Inc., Washington attorneys, each had net 64's to tie for runnerup honors to Mr. Jarema.

RCA HISTORY

GROSS sales of $2,959,000 in 1920 and $691,940,000 in 1952, and a jump from 500 employees to 64,000 indicate the growth of RCA, whose history is described in a handsome brochure, "33 Years of Pioneering and Progress" now being distributed by RCA. The 96-page volume is thoroughly illustrated with photographs of personalities and equipment, ranging from Marconi and the apparatus he used to receive the first trans-Atlantic wireless signal in 1901 to the latest types of uhf antennas.

'THE GREEN BORDER'

CBS RADIO will explore the problems of the influx of Iron Curtain refugees in a full hour broadcast to be presented on May 8, 9-10 p.m. EDT. Titled 'The Green Border,' the broadcast will utilize hundreds of tape recordings made in Free Europe at key points along the Iron Curtain. Edward R. Murrow, who will serve as narrator, will call on political and business leaders in Free Europe and the U. S. to offer their views.

DIRECT PROMOTION

WTTM Trenton, N. J., has sent out 15,000 letters to homes selected at random from the telephone directory of the Delaware Valley area. The letters, signed by Fred L. Bernstein, general manager of the station, call attention to news, music, special events and public affairs programs of WTTM. Mr. Bernstein plans to continue the direct approach to promotion with smaller batches of letters going out at various intervals throughout 1953.

INTERVIEW BY PROXY

ALASKA's new governor, B. Frank Heintle- man, was interviewed by proxy on May 3 over KXA Seattle by a panel of nine prominent Seattle city citizens. The news director and conductor of the Seattle Speaks program, on which the interview was aired, invited the interviewees to tape-record their questions. The transcript was then sent to Alaska, where Governor Heintle- man taped his replies. It took 33 spliced seg- ments and a full month of preparation to complete the 15-minute program.

CEREBRAL PALSY RALLY

TOP RADIO and TV personalities made per- sonal appearances in Times Square on April 30 as part of the Children's Rally against Cerebral Palsy, marking the opening cere- monies of a month-long drive to raise funds for research. The activity took the form of a challenge by juvenile stars against adult stars. Among the adults were Dennis James, Warren Hull, Jinx Falkenburg, Jane Pickens, Mar- guerite Piazza, John Cameron Swayze, Arlene Francis, Sid Caesar and Gabby Hayes.

AIR FORCE INTERVIEW

U. S. AIR FORCE Ground Operations School in Southern Pines, N. C., April 6-10 was the scene of a symposium for the nation's top ranking fighter pilots of World War II and the present day police action in Korea. The purpose of the top secret event was to pool personal experience and knowledge in an effort to improve tactics and training among present day fighter pilots. On the fifth and final day of the symposium, WEEB Southern Pines was able to obtain permission to conduct a series of interviews with many of the personnel, in- cluding Gen. James Ferguson, Deputy Com- manding General of the 9th Air Force and originator of this meeting.

STATIONS ATTACHED

WORC Worcester enrobes a red piece of string in its promotion piece for Pappy Howard's New England Barn Dance Jamboree program to serve as a reminder that "your Headley-Read man can tell you how to buy Pappy Howard, Worcester's top salesman—where he's strongest—on WORC.

STATION BREAK CONTEST

ONE WEEK at Shamrock Village, Fla., and a console TV set are the first two prizes offered by WTAO-TV Boston to the two people who draw the most suitable station identification design. The contest opened April 18 and will

'Operation Cancer'

"Operation Cancer" was WHAS- TV Louisville's title for what it believes to be the first telecast of a cancer opera- tion. The April 22 broadcast provided viewers with an hour-long look over the surgeon's shoulder as he removed the cancer-infected lung of Patient C."

The telecast was planned to bolster Kentucky's cancer campaign. Dr. Duffy Hancok, president-elect of the Kentucky State Medical Assn., narrated the opera- tion, describing each move by the sur- geons, anaesthesists, and nurses. Earlier

WHAS-TV technician Bill Howard aims his camera for Operation Cancer. Moni- tor was used by the narrating doctor in describing the operation for televiewers.

that day he had received the American Cancer Society's 1952 Gold Medal Award for distinguished service to that state in cancer control.

The patient's suspected cancer had been detected by a free chest X-ray. The diagnosis was confirmed by the opera- tion, and lung removal was indicated. Hospital authorities the next day reported the patient was "doing nicely."
and now coach of the Baltimore Civic Opera, was seen coaching singers in four short scenes from the Massenet opera.

OUT OF THE PAST

TV PRODUCER-director Ivor McLaren found his past catching up with him while directing the WTMJ-TV Milwaukee Schlitz Saturday Night Theatre. The film being shown was "High Fury," which Mr. McLaren had produced in England in 1947. During the program Mr. McLaren told how he produced the movie, and as soon as the interview was completed, he went back to the control room to direct the live commercial on the show.

CIVIC RESPONSIBILITY

THE WASHINGTON school system extended its current program of TV lessons over WNWB (TV) Washington to five days a week with the addition of a new series on civic responsibility. Prepared by the elementary schools in cooperation with WNWB, the program is aimed to improve citizenship by instilling loyalty to American ideals and to develop responsible and intelligent ways of using resources, both human and material. The series of 10 programs will include such topics as "Our Nation's Flag," "You and Your Home," "Enjoying Your Neighborhood" and "Respect for Property."

KIWANIS DAY

KLWN Lawrence, Kan., April 12 gave all of its sustaining time to the Lawrence Kiwanis Club. Members sold time, wrote commercial copy and did all air work from sign-on to sign-off. Several special programs were produced especially for the day, such as group singing, a tape recording of a Kiwanis meeting and a greeting from the mayor. It turned out that the commercials for the Ford dealer sponsored newscast were read by the Studebaker dealer. The Kiwanis Club cleared $420 for their boys and girls work fund.

POPULAR COOKING PROGRAM

FOUR-PAGE brochure issued by KJH-TV Los Angeles points out that the Mama Weiss cooking program on the station placed first in 15 out of 18 surveys of similar TV programs among viewers in the Los Angeles area. The program was said to pull more than 1,050 letters a week, and in response to a single announcement more than 1,500 requests for discount certificates on a household cleaner.

COVERAGE OF ICE HOCKEY

WSAI Cincinnati reports that it has received letters of appreciation from fans and the press for its coverage of the ice hockey games between the Cincinnati Mohawks and their rivals, as they played for the championship of the national amateur hockey league. The Mohawks emerged victorious. Dick Baker, WSAI's sportscaster, though an experienced football broadcast, is here for the broadcast hockey games. The number of fan letters received during the series has confirmed the top-notch quality of his work in this field, reports the station.

WINDOW DISPLAY

WLS Chicago is using a window display in a month-long promotion of its National Barn Dance, with pictures of featured entertainers. The display is located at the Chicago Visitor Center, headquarters for travelers' information in the Chicago Loop. One of radio's oldest hillbilly shows, the program is aired each Saturday from 7:30 p.m. to midnight, with such sponsors as Warp Bros. (Flex-O-Glass), Keystone Steel & Wire Co., Phillips Petroleum Co. and National Stores.

RESPONSE to Safeway Neighbor show on KCRC Enid, Okla., is demonstrated by 80,000 registration slips filled out by customers who may be called by the grocery give-away program. Ella Mae Hyde, KCRC continuity writer, is flooded by the deluge of slips. Program is sponsored by Safeway Stores Inc. and has run a year in a 15-minute, Monday through Saturday spot.

MUSICAL CHAIRS'

KNXT (TV) Hollywood's Musical Chairs, new weekly half-hour program, combines quiz, panel and both live and recorded music programs with disc m.c. Bill Leyden acting as moderator. Permanent panelists Johnny Mercer, Helen O'Connell, Stan Freberg, Bobby Troup and one guest attempt to answer questions submitted by viewers in addition to performing when asked to do so. Program is packaged by Ross-Danzig Productions.

NEW QUIZ PROGRAM

WPTZ (TV) Philadelphia is starting a new home-audience participation program. Pat Landon, host of the new program series, will show portions of famous peoples' faces and give clues as to their identity. He will telephone people in the viewing audience and invite them to guess the identity of the personality. The more he shows of the mystery face, and the more clues he gives the contestant, the less valuable the prize becomes. The program will be seen Monday, Tuesday, Thursday and Friday.

PIN MONEY

NEARLY 8,000 bowlers from five states competed for $26,000, $6,000 in merchandise and 36 trophies in the Fourth Annual WNAX Yankton, S. D. Five-State Bowling Tournament. WNAX reports the regional tournament was the largest in the nation today, and the

NEW smooth action... new stability... new convenience and ease of operation are offered in the new Houston-Fearless Television Camera Pedestal, Model PD-3. Camera is accurately counter-balanced, making it possible to raise and lower quickly, smoothly by simply lifting or pressing on steering wheel, even with pedestal in motion. Three pairs of dual-wheels assure smoother rolling-dolly shots. Two types of steering: for straight tracking or sharp turning. All controls are within easy reach of cameraman for maximum convenience. Dependable Houston-Fearless quality throughout. Makes possible better, more showmanlike productions in any studio. Write for details today.

The HOUSTON FEARLESS Corporation

11807 W. OLYMPIC BLVD • LOS ANGELES 64, CALIF.

"WORLD'S LARGEST MANUFACTURER OF MOTION PICTURE PROCESSING EQUIPMENT"
NAVY and Charlotte radio men get together in presenting Freedom Fleet, a documentary produced by the Supreme Allied Command Atlantic for broadcast over CBS Radio. Bob Riersen, former WBT program director now on active duty with the USN (seated c), discusses a point with WSOC General Manager Earle Gluck, a captain in the Naval Reserve. Looking on are WBT announcers Fletcher Austin (seated) and (standing, l to r) Phil Agresta and Jimmy Patterson.

largest sports promotion ever sponsored by an American radio station. During the four-year history of the tourney, WNAX has paid out more than $100,000 in cash and merchandise awards.

HELP WANTED
WWDC Washington reports that its early morning disc jockey, Jack Rowzie, who runs the Nite Beat show, has been getting S.O.S. calls. A frantic husband called Mr. Rowzie and asked him to broadcast a plea to his wife to let him in the front door, "and it will never happen again." Another call was from a heartbroken wife who complained, "You've made a Nite Beat widow out of me." Her husband sat up all night to listen to Mr. Rowzie's program. Still another plea came from a young girl whose plea was that the disc jockey not play such good music so she could get some sleep.

REPEAT PERFORMANCE
BECAUSE of requests from parents and teachers, the film "Devil On Wheels" has been added to the public service program of the Crosley TV stations, WLWT (TV) Cincinnati, WLWD (TV) Dayton and WLWC (TV) Columbus. The film, dealing with the dangers and damage resulting from reckless driving by youths in "hot rods," was originally shown strictly for the entertainment value. Requests from families with teen-age drivers led to a repeat performance of the film.

THREE VIEWS OF ALCOHOLISM
AN ALCOHOLIC, a physician and an official of the Worcester Committee on Alcoholism gave three different viewpoints on alcoholism, via WTAG Worcester's weekly public affairs forum, What's It to You? The date of the program coincided with the fund drive of the Committee on Alcoholism.

'MOTHER OF THE YEAR'
LEB and Chee, morning husband and wife team, heard every morning over WARN Fl.

recently been being conducted in conjunction with KTLA (TV) Hollywood's Hollywood Opportunity teleshow. Judging will be done by private interview, as well as on the TV program.

ON-THE-SPOT QUIZ SHOW
KMOX St. Louis has begun broadcast of a new quiz show, Choose Your Topic. Ollie Raymond conducts the on-the-spot quiz in various St. Louis grocery stores. Prizes are for correct answers to questions submitted by listeners.

PROBLEMS OF THE AGED
A SERIES of four weekly programs outlining the problems of the aged and infirm in Connecticut were broadcast over WDRC Hartford April 11-May 2. The panel discussions, which have been arranged by the Greater Hartford Community Council, were supervised by Hector J. LeMarie, director of training for the Connecticut Commission on the care and treatment of the chronically ill, aged and infirm.

'KNOT HOLE GANG'
HAPPY FELTON, star of Happy Felton's Knot Hole Gang, WOR-TV New York, preceding telecasts of Brooklyn Dodger home games, last year enrolled some 60,000 people in his Knot Hole Gang. Members receive lapel flip pins, are eligible to receive prizes from drawings on the program and appear on the show.

AVIATION DAY
WFOR Hattiesburg, Miss., reports that it has added a new dimension to local radio coverage. Utilizing the station's mobile broadcasting units, WFOR covered the Local Chamber of Commerce Aviation Day direct from the Municipal Airport. A feature of the broadcast was the mounting of a mobile transmitter in a private plane, and broadcasting from the air, with stress on the ease and pleasure of private flying. The mobile unit on the ground covered interviews with passengers who had been given free plane rides around the city.

40-MILE DIRECT REMOTE
WHUM-TV Reading, Pa., reports that it has run the longest direct remote in TV history. With its transmitting dish at Bowman's Store in Harrisburg and receiving dish 500 feet high on the station's tower 2,100 feet above sea level, the distance covered was 40 miles. A 7,000-megacycle RCA unit was employed. The station reports that quality was adequate.

NBC-TV BROCHURE
A BROCHURE sent to advertisers by NBC-TV co-op sales, highlights "newworthy and salesworthy" features of American Forum of the Air, a co-op TV program featuring Theodore Granik. The brochure cites endorsements of former sponsors, noting that the show often creates news.

PROGRAMS, EXCLUSIVE
WLIB NEW YORK, which emphasizes Negro programming, reported that it had broadcast an "exclusive interview" with Pfc. Courtney L. Stanley, Negro soldier who fought off 15 to 20 Chinese Communists on the Korean front and helped save the life of a wounded colonel. The interview, tape-recorded in Korea in cooperation with the U. S. Army Information Branch, was flown to New York and carried on WLIB.

BROADCASTING  TELECASTING
SPECIAL TO BROADCASTERS:

Your local Zenith distributor will gladly help promote your station and programs through dealers in newspaper ads and displays. Get in touch with him today.

all summer long

MILLIONS OF AMERICANS will listen

Only to FM

insist on FM in your schedule and get complete radio coverage

AGAIN THIS SUMMER, you'll need FM on your schedules to be sure of complete radio coverage. Typical example: In many localities, baseball broadcasts, particularly night games, will be carried only on FM.

What's more, millions of listeners know from experience how FM cuts through static and interference to give realistic reception of radio programs even during summer storms. With the "summer static season" on its way, many will turn to FM programs exclusively.

Make the most of these seasonal listening habits. Include FM in your summer time buying schedules, and be sure of reaching the whole radio audience more effectively.

IN THE 75th MARKET - TEXAS' 5th

EL PASO

The Nation's Largest Trade Territory is the El Paso area. Thousands upon thousands of radio families in this rich territory have at least two things in common: money to spend (over $500,000,000 annual retail purchases); and the habit of listening to KEPO.

During a recent typical week, ABC network commercial time totaled 40 hours. KEPO was ordered for 35½ hours. No other advertising medium in the El Paso Southwest equals KEPO's total coverage. To take advantage of this lucrative market and snare top sales in fields relatively unexploited by other El Paso area advertising media, order KEPO; El Paso's most powerful station. Ask Avery-Kendel for details.

S.M. 5/10/52

The Most Powerful Station is KEPO

Regardless of conditions—
BLAW-KNOX CAN BUILD YOU
A **BETTER** TV TOWER

Years of experience—more than four decades, in fact—
have given Blaw-Knox the edge in designing, fabricat-
ing and erecting antenna towers for any purpose and
any location. Blaw-Knox TV towers are on the job in
widely separated geographical areas... in wide open
fields, atop buildings in crowded cities and even
grounded in salt water. Some have TV antennas
already mounted—others have built-in provisions for
TV when licenses are granted—all are heavily galva-
ized for longer life.

Whether you need a 100 ft. self-supporting structure or
a 1000 ft. guyed tower to meet your requirements—
whether for AM, FM, TV or Microwave—write or call
today for capable engineering assistance with your plans.
Wood, and Madeline Godard, "Miss France" in Miss Universe beauty contest, were married April 18.

Ed Pendleton, promotion manager, WMAZ Macon, Ga., father of girl, Margaret Curry.

Box Jawer, WPTZ (TV) Philadelphia, father of girl, Judy Lynne, April 15.

Cyrus Ostrop, assistant to head of production expense control department, KECA-TV Los Angeles, father of boy, Richard Cyrus, April 11.

Edward E. Benham, chief engineer, KTTV (TV) Hollywood, father of girl, Valerie, April 13, 18.

Johnny Wilcox, announcer at WIP Philadelphia, father of girl, Kim, April 18.

Bob Forster, disc jockey on WSRS Cleveland, father of boy, April 21.

Networks

Richard Lewine, CBS-TV producer, appointed supervisor of network daytime programming for CBS-TV.

Canadian Viewers Favor U. S. TV Stations 4-to-1

Canadian viewers in southern Ontario favor American TV stations four to one, according to the April Elliott-Haynes ratings, which gave WBEN-TV Buffalo 78.5% of the audience, and CBLT (TV) Toronto 20.2% of the audience. The balance of viewers looks at WICU-TV Erie and WHAM-TV Rochester.

Five leading programs seen on CBLT Toronto during April were Junior Hockey finals, rating 39.9, Studio One 31.2, Bell Singer 29.3, The Big Review 29.1, and Regal Theatre 27.7. Of these Studio One was a microwave U. S. import, Regal Theatre a film.

Leading shows from U. S. stations were I Love Lucy 76.1, Film 76, Comedy Hour 75.3, Arthur Godfrey 75.2, and Martin Kane 73.2.

On CBFT (TV) Montreal, sports made up the first four rated programs, 81.8 to 73.3, followed by a quiz show, 72.9 and Studio One, 72.6.

Monthly sets-in-use trends show a drop at Toronto from 82.2 in January to 72.7 in April, while in Montreal sets-in-use has been increasing, from 47.2 in January to 60.7 in April.

During the January-March period, the report shows that in the Montreal area 97% of audience has been tuned to CBFT, 2% to WSKY-TV, 1% to WHEN-TV, both Syracuse.

A revised estimate of TV sets-in-use in Canada in the April report shows 324,200 receivers, with 169,600 in the Toronto-Niagara area, 74,700 north of Lake Erie, 69,100 in the Montreal region, 5,400 in the Kingston-Belleville (Ont.) area, and 5,600 elsewhere.

INTERNATIONAL

CBC BUILDING PLANS REVEALED

PLANS for a new broadcasting center at Toronto to replace the present Canadian Broadcasting Corp. national program and commercial departments were revealed by Dr. J. J. McCann, Canadian Minister of National Revenue, when he accompanied members of the Canadian Parliamentary Radio Committee to Toronto April 20.

Dr. McCann told the committee that the government plans a $7 million broadcasting center on the same site within the next two years, and that two top floors of the Toronto television center have been left vacant for executive offices in the new Toronto broadcasting center.

Members of the Parliamentary Radio Committee were taken on a tour of CBC television and broadcasting buildings. They said CBC's Big Review variety show in rehearsal and then telecast in the evening, also the $2 million TV plant and 500-ft. tower in downtown Toronto.

The day's visit was part of the committee's investigation into CBC activities and finances.

BUP Opens News Wire

A SECOND continental news wire spanning Canada from Montreal to Victoria, B.C., was placed into operation last Monday by British United Press. BUP said this network will speed delivery of news to more than 100 radio stations and 50 newspapers in Canada.
$11.5 Million Capital Outlay Predicted for TV in Canada

Capital outlay of an estimated $11.5 million for seven TV stations in Canada was predicted by A. D. Dunton, chairman of the Canadian Broadcasting Corporation, to the Canadian Parliamentary Radio Committee following the committee's visit to CBCLT Toronto.

At the April 22 Ottawa hearing, Mr. Dunton said $2.1 million already had been spent for each one of the operation stations—CBCLT Toronto and CBFT Montreal. CBOT Ottawa, relay station which officially goes on the air June 2, is to cost $950,000, he said. The Halifax CBC-TV station is to cost $1.1 million, the station at Winnipeg $1.3 million, and the Vancouver station, $1.7 million. It is the hope that these stations will be operating by next January.

A French-language station at Montreal is to be built at a $550,000 cost. This station will use the same tower as CBFT. New TV studios planned at Toronto will cost $350,000, and at Montreal, $125,000. Production facilities at both Toronto and Montreal are to be increased at a cost of $425,000, Mr. Dunton said.

For both sound and sight broadcasting, Mr. Dunton told the members of parliament, CBC expected it would need about $26,750,000 this year. CBC anticipates this much revenue will come from commercial sources, from the 15% excise tax on radio and TV set sales, and from the annual government grant of $6,250,000.

Government loans to CBC for TV development to date total $8 million, of which all but $500,000 has been used, Mr. Dunton reported. Another loan of $4,375,000 for TV was included in estimates now before parliament. A further loan of $2 million might be required next year.

Independents' Outlook Noted

Mr. Dunton dealt at some length with the high cost of TV programming and with difficulties expected for independent TV stations to carry an effective proportion of live Canadian talent. The economic pressure on the independent operator to use films or other U. S. material would be heavy.

But, he said, CBC would feed 105 hours of national CBC programs weekly to independent operators. He said Canadian advertisers also were faced with the problem of whether to use Canadian material for programs or to adopt the cheaper course of getting the Canadian rights on U. S. films and TV productions.

Mr. Dunton hoped the Bell Telephone microwave relay system would be extended next to Windsor (opposite Detroit) from Toronto, and eastward from Montreal to Quebec City.

He gave 1956 as a possible date for the further extension of the system eastward to Halifax, westward to Winnipeg.

He said that with completion of CBC's stations and the seven independent operators who have been granted construction permits, about 70% of the Canadian population will have TV service next year.

Thomson Again Heads CP

ROY THOMSON, newspaper publisher and president of Northern Broadcasting Co., Toronto, operating CKGB Timmins, CFCH North Bay, and CIKL Kirkland Lake, has been re-elected president of Canadian Press. D. B. Rogers, Regina Leader-Post and CKCK Regina, has been re-elected second vice president. Directors with radio affiliations are R. S. Malone, Winnipeg Free Press and CKRC Winnipeg; Arthur R. Ford, London Free Press and CFPL London; Arthur L. Davies, Kingston Whig-Standard and CKWS Kingston, and Monteau La Presse and CKAC Montreal.

BMI Canada Sets Clinics

BMI CANADA LTD., in conjunction with regional Canadian associations of broadcasters, will operate a series of clinics in Canada this year. First will be held May 18 at the Palliser Hotel, Calgary, followed May 21 at the Saskatchewan Hotel, Regina, and May 23 at the Royal Alexander Hotel, Winnipeg.

The clinics will be held jointly with the Western Assn. of Broadcasters and will present feature talks by Carl Haverlin of BMI, New York. On May 22 at the Fort Cumberland Hotel, Amherst, a session under chairmanship of Clyde Moon, BMI Montreal, will be jointly held with the Atlantic Assn. of Broadcasters. A clinic is set June 29 at the Hotel Vancouver, Vancouver, with the British Columbia Assn. of Broadcasters, and another is tentatively set Sept. 21 at Toronto with the Central Canada Assn. of Broadcasters.

Microwave Link Set for May

MICROWAVE LINK between Toronto, Ottawa and Montreal is expected by the Bell Telephone System to be ready for use early in May. Canadian Broadcasting Corp. will begin experimental network TV programming about mid-May for an official inauguration of the system: Showing of films flown to Canada on June 2 of the Coronation of Queen Elizabeth II. Sixteen tower stations have been built by Bell Telephone for the system. CBC buys TV microwave link service on an annual fee basis. The new Toronto-Ottawa-Montreal service will link up with microwave service from Toronto to Buffalo, allowing U. S. TV network shows to be piped directly from Buffalo to Montreal. They currently are being relayed to Toronto.

Dealers Score TV Price War

PRICE WARS in sales of TV receivers brought criticism during the annual meeting of the Ontario Assn. of Radio, Television and Appliance Dealers at Toronto. The association planned to ask the federal government to relax credit curbs and minimum down payments on TV receivers. (Ottawa cabinet sources intimated that the government would not interfere.) Many of the 500 dealers attending the sessions felt that TV set sales were needed medicine for the appliance industry. It was estimated by dealers and manufacturers representatives that only 10% of Ontario homes have TV sets.

BROADCASTING  TELECASTING
WRGB (TV) MAKES OFFER TO EDUCATORS

AN HOUR of time per day, five days per week, was offered last Tuesday to Schenectady area educators by WRGB (TV) Schenectady. The station also announced it would pay $2,500 annually toward the salary of a person to produce educational television programs. The offer was made at a meeting of representatives of area colleges, public and parochial schools and the State Education Dept. The time would double the amount of time used by four educational organizations for the last two years, and would be in addition to the other public service and educational telecasts already carried by the station.

Robert B. Hanna, WRGB (TV) manager, said the time—10:30 to 11:30 a.m. Monday through Friday—would be set aside for 52 weeks with the hope that the educational groups would provide programs uninterrupted for at least 39 weeks each year. An area-wide conference of educators will be held May 22 to discuss the proposal.

Kaltenborn Scholarship

APPLICATIONS for the $500 H. V. Kaltenborn radio scholarship at the U. of Wisconsin are being accepted for the 1953-54 term, Prof. H. L. Ewbank, chairman of the UW radio-television committee, has announced.

The scholarship was established by Mr. Kaltenborn, veteran news commentator, to assist students in radio broadcasting, especially those interested in newscasting and news analysis. Applicants must have reached their junior year. Deadline for filing is June 1.

Panel Discussion Ideas

THE IDEA that broadcasters should use the media they promote is forwarded by Dr. Franklin Dunham, chief of radio-TV in the U.S. Office of Education, who recently conducted two experiments to demonstrate a new kind of discussion program.

Dr. Dunham’s first test was set up at the National Catholic Educator’s Assn., meeting in Atlantic City April 6-10. Four speakers were invited to present a panel discussion on TV. Then, to insure their being familiar with the subject, the four participated in an actual closed-circuit educational show. When they appeared before the convention the next day they talked out their telecast experiences.

Another version of the “experience-pan!” was conducted at the Conference of the Institute for Education by Radio-TV at Ohio State U. April 15-18. The subject was “Broadcasting by Government Agencies.” Each participant furnished his own kinescopes, tapes, recordings and pictures. Rather than talking out the entire discussion, each merely introduced his material and then let the audio-visual equipment do the rest.

Dr. Dunham makes these comments on the experiments: “All the terror of ad-lib presentation . . . is eliminated . . . nothing is read at the audience. . . . We know what we are talking about.”

KXOK ‘Education Day’

KXOK St. Louis last Wednesday participated in the first Business Education Day sponsored by that city’s Chamber of Commerce, playing host to 20 school teachers who visited the KXOK transmitter at Madison, Ill., were guests of the station at a luncheon, watched broadcast operations and heard station executives describe how to run a radio station.

IN HOLLYWOOD

More Stancil-Hoffman 5-5 Synchronous Magnetic Film Recorders are in use—more new 5-5 installations are being made, than of any other synchronous recorder.

Television and Motion Picture producers the world over agree that for quality, price and versatility their choice is the Stancil-Hoffman 5-5.

Los Angeles County Asks FCC To Extend Educ. TV Deadline

A RESOLUTION, introduced by Supervisor John Anson Ford and adopted by Los Angeles County Board of Supervisors Tuesday, urges the FCC to extend the June 2 deadline on educational TV station applications for one year.

Pointing out that while 242 channels have been reserved by the FCC for educational video, only 13 communities have received station building permits with 11 more applications pending. The board believes not enough time has been allowed for communities to become interested in providing the money with which to build and operate such stations.

Los Angeles, with KUSC-TV, financed by Allan Hancock Foundation, USC, is one of the 13 communities. There are six unclaimed educational channels in California.

Adult Education Telecast

ABC-TV, in cooperation with Ford Foundation's Fund for Adult Education and the York (Pa.) Council of Community Education, on May 6 will present a special half-hour telecast titled "Adult Education in American Life," 9-9:30 p.m. EDT. Featuring leading educators and university presidents, program is a part of the conference on "The Place and Importance of Adult Education in American Life," to be held at York June 2. College Telecast will be moderated by C. Scott Fletcher, president of the Fund for Adult Education, and is a special presentation of the ABC public affairs department.

No Trouble at All

COOPERATION keynoted radio efforts at the recent Hays (experiment station) Sorghum Conference at Kansas State College. The problem: How a number of radio farm directors from midwest stations could cover the conference without getting into each other's way.

Bob Hilgendorf, director, KSAC Kansas State College, who acted as host to the visiting radio men, turned for advice to Lewis Dickensheets, chief engineer, WIBW Topeka. The two solved the problem this way:

Chief Dickensheets installed himself and an amplifier in a hallway at the studios. He set up four miles in one office for the broadcasts, all feeding to his amplifier. From there he connected eight bridging transformers and sent the programs to eight tape recorders set up in another office. Via this method, nine seven-minute tapes were made on eight machines in two hours.

Embert Coles, superintendent, Colby Branch Experiment Station, moderated the discussions. Cited with him for work done in producing the broadcasts was Ed Mason of KXXX Colby.

TV Aid on Career Data

USE of closed-circuit theatre television on a national scale to bring information on careers to high school students was reported last week to be under discussion by AB-PF, the National Vocational Guidance Assn. and New York U. The university has pointed out that a closed-circuit theatre telecast on ABC-TV facilities for New York area high school students was "so successful" that the possibilities of conveying career information throughout the country "will be explored in a series of discussions within the next few weeks" [B+T, March 23].

Syracuse U. TV Tests

THE Syracuse U. Radio-Television Center will make a series of about 10 newscasts on WSYR-TV Syracuse, which is cooperating in the program, in tests of TV news presentation techniques. The work will be financed by a research grant from the Twentieth Century Fund, non-profit foundation for scientific research and public education on current economic questions.

The center will process stories released simultaneously to all media by the fund, which made a similar grant to the center last year, according to Kenneth G. Bartlett, Syracuse U. Radio-TV Center director. Heading the project will be Edward C. Jones and Lawrence Myers Jr., both radio-television faculty members, Mr. Bartlett said.

WHBI Not For Sale

AN OFFER to buy WHBI Newark, N. J., made recently by clergymen representing Negro churches in the New York-New Jersey area, prompted station officials to emphasize that WHBI is not for sale. The church leaders had heard rumors that the outlet was up for purchase, and were concerned that a new ownership might change WHBI's policy of religious programming.
First Calif. AP Radio News Awards Winners Announced

WINNERS of the First Annual News Competition of the California AP Radio Assn. have been announced in Los Angeles. Presentation will be made May 16 at the association's annual meeting in Hollywood.

KFMB San Diego won the AP news cooperation award. Three members of the KFMB staff, Ray Wilson, Harold Keen and Paul White, were named for their contributions to the news report and assistance in covering news in the San Diego area.

Other Winners

Other winners and classifications were:

- Best Feature or Human Interest—KHJ Los Angeles, Lee Wood-Frank Hemingway, first. KFI Los Angeles, Hometown Happenings—Kerwin Hoover, second. KPRL Paso Robles, Doggone Department, third.

- Best Editorial or Documentary—KCBS San Francisco, Rollingwood US, first. KFI Los Angeles, KFI Calling, second. KFMB San Diego, Editorial Page—Paul White, third.

Awards in all classes were on the basis of work performed and scripts prepared in 1952. Judges in all classifications, except the News Cooperation Division, were the Radio-TV Editors of the Los Angeles area newspapers. They are Walter Amos, Los Angeles Times; Allen Hieh, North Hollywood Valley Times; Jack Lait, Los Angeles Examiner; Zona Palmer, Hollywood Citizen News; Hal Humphreys, Los Angeles Mirror; Owen Callan, Los Angeles Herald and Express.

NBC Wins Christopher Awards

CHRISTOPHER Awards to radio and television for the first quarter of 1953 were announced Thursday by Father James Keller, director of the Christophers. Winning programs, all on NBC, were the Feb. 15 Victory at Sea and March 30 Voice of Firestone TV shows, and March 28 NBC Symphony Orchestra and Jan. 18 Theatre Guild on the Air radio broadcasts.

WLEC's Jaycee Citation

WLEC Sandusky, Ohio, reports receipt of its 17th public service award in a citation from the U.S. and United Sandusky Junior Chambers of Commerce. The station says it gave an average $10,000 a month in time and effort to local public service announcements, exclusive of network PSAs.
PEABODY AWARDS for distinguished achievement in radio and television in 1952 [BST, April 27] were presented April 24 at a luncheon of the Radio and Television Executives Society in New York. The winners are: (seated, l to r) Dorothy Collins, NBC's Hit Parade; Lawrence Spivak and Martha Routtree, NBC's Meet the Press; Dr. Frances Horwich, NBC's Ding Dong School; Lynn Foule, public relations director, Johns Hopkins U.; DuMont's Johns Hopkins Science Review, and James C. Hanrahan, vice president and general manager, WEWS (TV) Cleveland. Standing: Robert W. Sarnoff, NBC vice president and RTES president; John E. Drewry, dean, Henry W. Grady School of Journalism, U. of Georgia, who announced the awards; Richard Shafto, general manager, WIS Columbia, S. C.; Wally Cox, NBC's Mr. Peepers; Martin Agrotsky, ABC; Edward Weaks, editor, Atlantic Monthly, and chairman, Peabody Advisory Board, who presented the awards; Henry Solomon, producer-writer, NBC's Victory at Sea; Jerry E. Lyons, vice president, Willys-Overland, sponsor of New York Philharmonic Symphony Orchestra on CBS, and T. L. Lassen, vice president, Standard Oil of Calif., sponsor of NBC's Standard Symphony.

NARTB Wins Award For Vote Campaign

AWARD to NARTB for its major role in stimulating registration and voting during the last Presidential campaign was presented Wednesday to President Harold E. Fellows on behalf of the American Heritage Foundation.

Theodore S. Repplier, president of The Advertising Council, made the presentation of an illuminated scroll on behalf of the Foundation. He said broadcasters can be "extremely proud" of their part in bringing about an increase of 15 million votes over 1948. Of the 54 organizations that took part in the Foundation's campaign, he said, NARTB "stood head and shoulders above the rest." He praised NARTB for "a superb organization job," adding it received the first award among the participating groups.

SYRACUSE U. AWARDS MADE

RECIPIENTS of Syracuse U.'s Outstanding Radio-Television Alumni Award for 1953 were Arnold F. Schoen Jr., general manager of WPPO Providence, and Thomas E. Martin, general manager of WEEL-AM-FM-TV Reading, Pa. The award was presented by Kenneth G. Bartlett, dean of the Syracuse U. School of Radio-Television, at the fifth annual Radio Day award luncheon, sponsored by the Syracuse chapter of Alpha Epsilon Rho, national radio-TV honorary fraternity.

Speaking to more than 100 students and faculty members, Mr. Schoen stressed radio's bright future. Speakers at the luncheon said increases in public service programming and strong management are keys to radio's growing strength.

NTRB Honors Program

APRIL 1953 Show of the Month, as selected by the National Television Review Board, was This Is Your Life, which stars Ralph Edwards. The review board, which honors a different program each month, selected the NBC-TV production for "contributing wholesome and outstanding entertainment and advancing the standards of television programming for the entire industry."
**WSUI Tape Show Opens Iowa Cancer Fund Drive**

MONTH-LONG cancer fund drive in Iowa was begun by WSUI KSUI (FM) Iowa City, State U. of Iowa outlets, with a two-hour program, "Conquest for April," produced on tape by students under supervision of the station's assistant program director, James P. Wehr.

The students condensed to four some 16 reels featuring special tapes from some of the country's top entertainers and messages from Iowa Gov. William S. Beardsley, Sen. Bourke B. Hickenlooper (R-Iowa) and American Cancer Society officials. Two hands provided music.

Mother of the show's m.c., Allen Hall, died of cancer a few days before it was aired and Mr. Hall, after attending the funeral, made a personal appeal which lent dramatic impact to the presentation.

Conquest for April was aired on a 20-station Iowa network including KWBG Boone, KBUR Burlington, KCIM Carroll, KROS Clinton, KSTT Davenport, KWDM Des Moines, KVFD Fort Dodge, KOKX Keokuk, KFJB Marshalltown, KOEL Oelwein, KBIZ Ottumwa, KMA Shenandoah, KCOM Sioux City, KICD Spencer, KWWL Waterloo, KGLO Mason City, KDTH Dubuque, KWPC Muscatine, KCHA Charles City and KBOE Oskaloosa.

**Goldenson Appoints Patsy Unit**

SIX EXECUTIVES in the advertising and related fields were appointed to the United Cerebral Palsy national publicity committee Tuesday by Leonard H. Goldenson, president of the organization and of AB-PT Inc. Committee members are: William R. Campbell, J. Walter Thompson Co., chairman; William Boley, Buchanan & Co., vice chairman; Taylor Adams, Young & Rubicam; Sydney H. Eiges, vice president in charge of press, NBC; Ivo Keenay, president, Ivo Kenway Assoc., Greenwich, Conn., and Sherwin Kane, editor, Motion Picture Daily.

**WAF at Chicago Fire**

EYE-WITNESS reports on the disastrous explosion and 5-11 fire at Chicago's Haber Corp. April 16 found WAF, local independent, on the scene with Vince Garrity, special events chief, and Bill Bauer, program director. They phoned reports to Bob Drews, disc jockey, who was on the air with his "Detour With Drews." Mr. Drews relayed urgent messages to the public from police and fire officials. Both departments credited WAF with helping to ease traffic and spectator congestion and thus easing rescue work.

**WNBK (TV) Receives Cancer Citation**

CITATION of merit from the Ohio Cancer Society was awarded to Hamilton Shea, general manager of WNBK (TV) Cleveland, and lapel pins in recognition of help in making the drive successful were given to Mr. Shea and three other members of the NBC Cleveland staff. The awards were presented by Lewis E. Herget, director of the Ohio Cancer Society.

**Schedule for Patients**

WWVA Wheeling, W. Va., is distributing a pocket-size schedule of its programs to patients of the 10 hospitals in the area.

**Baseball Promotion**

WAAM (TV) Baltimore reported promotion of the Baltimore Orioles baseball club before the season home opener with a special half-hour show introducing players, a spot campaign on its children's programs, appearances by players on the station's "Tee Vee Waamboree and Shopping for You" and an intensive spot announcement campaign all day last Tuesday.

**WBC Aids Hospital**

WBC Indianapolis employee pledged $1,752, 110% of its quota, in a fund-raising drive for the Indianapolis Hospital Development Assn., the station reported.

**WMJ's Safety Week Project**

WMJF Cordele, Ga., gave away silver dollars to people of that city who would answer their telephones with "Observe Safety Week," during an extensive campaign waged there April 13-17. The station also: Carried safety messages all day.

**In Public Interest**

**Look! No Fence**

Around KOA's Million Square Miles of Range

**Nielsen Reports**

PROVE 10 to 100% of all radio families in 302 Counties in 12 states listen regularly to KOA.

But this is only part of the story, because "you can't fence KOA in!" These figures do not include KOA's Bonus Coverage!

**Bonus Coverage**

KOA is the best Outdoor Advertising Medium in the West! With appeal that's alive wherever you drive!...In more locations than you could afford to buy.

KOA is a favorite with as many as 9% of the radio families in thousands of counties in over 34 states (plus Canada and Mexico) who respond by mail!

The unfenced KOA range is the home of millions of buyers with billions of dollars in their jeans...millions of buyers who are BEYOND TV HORIZONS.

The most positive way... the most economical way to reach this rich market is through programs, spots and participations on KOA...the radio station which...

Covers the West... Best!

Write for KOA's The Western Market, Nielsen Coverage Issue.

**KOA Denver**

during the day; sponsored Mr. Safety Says and The Voice of Safety quiz programs; interviewed tourists on Mr. Safety Welcomes and Breakfast with Mr. Safety, and presented roundtable discussions on the subject. A four-hour broadcast of a parade commemorating the week climaxmed WMJ's project.

KBTU Draws $158,000
KBTU (TV) Denver drew in $158,000 with its Celebrity Parade for Cerebral Palsy April 18-19. That telethon was broadcast from the stage of the Denver City Auditorium and featured 700 volunteer entertainers. It ran 14 hours and netted 66% more than the $90,000 goal. Station officials believe Denver's contributions to the drive are the highest per capita in the U.S.

WMOK Backs Hospital Drive
WMOK Metropolis, Ill., played a major role to get construction of a new (Massac) county hospital approved. In a drive to get out the vote, the station devoted spot time, held live interviews and panel discussions, conducted telephone interviews, and gave listeners opportunities to ask questions about the project.

Cancer Crusade Marathon
SHEL HORTON, WHUN Huntington, Pa., disc jockey, broadcast 42½-hour one-man marathon program starting early April 17 and ending April 19 for the Cancer Crusade. Mr. Horton, who broadcast the program from a furniture store window, received congratulatory flowers and telegrams from many entertainers and musical stars.

WRBL Covers Storm
WRBL Columbus, Ga., was the nerve center for emergency communication when a tornado ripped through the area April 18, causing an estimated $10 million damage and disrupting telephone lines and power facilities. The station called in off-duty telephone workers, police, firemen, and county workers. After the brunt of the storm had passed WRBL's portable broadcast facilities provided on-the-spot programs from hard-hit areas.

WHAS-TV Aids Blood Drive
WHAS-TV Louisville's schedule April 21 called for an all-out effort to encourage blood donations to Red Cross Blood banks, including telecasting of radio and TV stars giving blood. WHAS-TV cameras picked up portions of the blood donor program, and dramatizations and demonstrations were shown by the station.

Claims Blood Donation Record
CKAK Montreal claimed last week that a Red Cross blood donor clinic held under the station's auspices collected "an all-time North American record" during a 40-hour operation. CKAK reported 2,343 donors contributed 2,551 pints of blood during the period. The station conducted a vigorous promotion campaign the week before the clinic.

KGW Portland, Ore., has begun its 32d year of broadcasting. Staff members reminisced the "old days" in an afternoon broadcast celebrating the event.

WRBL Week in Columbus, Ga., has been proclaimed May 10-16 to commemorate that station's 25th anniversary. Among events scheduled were: A 5-hour broadcast of 1928 programs with the original stars; an anniversary tabloid; open house, and an "Old Timers" banquet feting past staff members.

NBC's Fibber McGee and Molly started its 19th year on that radio network in April. Series, starring Jim and Marian Jordan and featuring original announcer Harlow Wilcox, is currently sponsored by Reynolds Metals. Agency is Buchanan & Co.

GEORGE GREAVES, assistant general manager and program director, KNBC San Francisco, starts his 26th year with NBC this May. Associated first as an engineer, he supervised the building of the network's first Hollywood studios and had charge of the first commercial broadcast made to U. S. from a ship at sea.

KFI Los Angeles began its 32d year of operation in April. A quarter-hour program telecast by KNBH (TV) that city, marked the occasion.

NEWSCASTER Duncan Macleod presented the 5,000th edition of Headline News on KOIN Portland, Ore., on April 17. Described by the station as one of Portland's oldest newscasts, the six-a-week morning program has been sponsored 16 straight years by Weiner's clothing store.

NBC-TV's Hawkins Falls noted its second anniversary April 10.

LUNCHEON marked the third anniversary of Western Savings Fund's Western's Weatherman show on WCAU-TV Philadelphia. The program is telecast 11:10-11:15 p.m., across the board. Among those attending the luncheon at the Hotel Warwick were Donald W. Thornburgh, president-general manager, WCAU Stations; Norman Geare, president, Geare-Marston Agency, which represents the sponsor; Phil Sheridan, who is featured on the program, and P. Blair Lee, president of the savings institution.

It's Happening in NEW HAVEN
ON WNHC
Steady does it where Connecticut Refining is concerned . . . . 988 five-minute programs a year for over six years! And still going strong; That's MORE than faith in WNHC-Radio . . . it's proof of RESULTS.
TWA Sides With RWG In TV Writers Issue

TELEVISION Writers of America has joined the Radio Writers Guild in requesting that the Authors League of America give New York writers in TV the benefits of its minimum basic agreement, pending action by the National Labor Relations Board on the TWA petition for a collective bargaining agency election on a regional basis.

ALA and Screen Writers Guild early last year negotiated a contract with the networks for writers but have contended it is not in effect due to TWA's intervention.

Dick Powell, TWA president, in his letter of cooperation to RWG, said in part that "TWA is most willing to join the RWG in urging the Authors League to request that the networks put the ALA minimum basic agreement, modified to exclude the West Coast, into effect immediately, such agreement to be effective until such time as the eastern writers are afforded the chance to vote for their collective bargaining representative. TWA will supply the networks any assurance they may request that TWA will not hold them guilty of unfair labor practices should they put such an agreement into effect."

NSTP Widens Membership

RESOLUTION broadening membership of National Society of Television Producers, Hollywood, to include video stations, networks, advertising agencies and producers for sponsors was approved at a meeting of the group's executive board April 22. Membership previously was limited to independent live and film producers.

Mike Stokey, Max Gilford and Syd Cassyd were named as a committee to nominate candidates for three NSTP directorships, which expire in May.

ABC-NABET-OEIU Spat

ABC-AM-TV Hollywood fortnight ago was requested to recognize National Assn. of Broadcast Engineers & Technicians as bargaining agent for some 150 office workers who gave NABET a majority in an election held after Local 174 of Office Employees International Union (AFL) started on organizational campaign. AFL Film Council, supporting OEU, has charged NABET with "unwarranted encroachment of jurisdiction" and OEU reportedly is considering filing for an NLRB election.

NLRB Mobile Ruling

THE IBEW Mobile, Ala., local, and WALA Mobile, have been ordered by National Labor Relations Board to cease action allegedly prejudicial to a technician, John A. Thompson. The station is directed to offer Mr. Thompson full employment and IBEW is ordered to stop attempts to cause WALA to discharge any employees.

'Uncooperative' AFTRA Members Face Board Action

BOARD hearing has been scheduled for May 25 by American Federation of Television & Radio Artists to try charges against four members who refused to testify at House un-American activities committee sessions, held in Los Angeles the week of March 23. Witnesses were Libby Burke, Jody Gilbert, Murray Wagner and Shimen Ruskin.

An AFTRA resolution, effective March 20, ordered all members to testify as to Communist party affiliation under threat of expulsion, fine or suspension.

Following the hearing, accused members have right of appeal to local membership, national board or convention.

New SEG TV Film Pact

SCREEN Extras Guild members voted 1,467-11 for a new contract increasing salary minimums for silent bit players from $40 to $55 per day and improving working conditions for extra players in TV films [B*H, March 30]. Negotiated with Alliance of Television Film Producers, Roland Reed Productions and Hal Roach Productions, the contract also is being signed by all other Hollywood TV film producers, according to SEG President Richard H. Gordon.

Editors Vote for IATSE

KJI-TV Hollywood newspaper editors have named IATSE Motion Picture Editors Local 776 as their bargaining agent in an NLRB election by a 4-1 vote, bypassing IBEW, which contested the former group's claim last January in a local hearing and in an appeal to the NLRB in Washington. NLRB ruled the IBEW contract for engineers does not bar a separate unit for editors. The IATSE local also has representation in ABC-TV, CBS-TV and KTTV (TV) Hollywood.

L.A. Publicists Organize

ORGANIZATION, as yet unnamed, of local publicists is being spearheaded by Howard Wormser, publicity director of KTLA (TV) Hollywood, to better formulate working relationship with the press. The first meeting April 20 was attended by Bobbe Valentine, KTTV (TV), Robert Pelgram, KNBH (TV), Bud Coulson, KHI-TV, and Leo Guild, KLAC-TV.

Publicists Vote for NABET

NATIONAL Assn. of Broadcast Engineers & Technicians by an unanimous vote (19) last Monday won representation of ABC and NBC Hollywood publicity units in an election ordered by the National Labor Relations Board.

The Answer to Picturing Spot News

For further information . . . or a demonstration . . . write or wire
You know, viewers know, sponsors know, that nothing on television has greater impact and interest than the picturing of spot news while it is still news.

You know, viewers know, sponsors know, that nothing is more deadly on television than yesterday's news. Yet, many television stations are still beset with the dilemma of picturing spot news quickly after it occurs, irrespective of where the news may break.

In an effort to solve the dilemma, many stations have tried many methods. They are finding that there is only one practical answer. That answer is concentrated use of a spot photograph service that not only covers the news of each area and of the world, but also delivers that coverage quickly over a nation-wide wire network — often minutes after the event occurs.

For the fastest, most comprehensive visual news coverage in the world, more and more TV stations are turning to Associated Press Wirephoto. They are making it possible for their audiences to receive the full impact and interest of spot news while it is still spot news — and they are doing it dramatically and economically.

Perhaps you can do the same.
1953 Telecasting Yearbook Addenda

CHANGES and additions received after the 1953 TELECASTING Yearbook went to press are included in the following list which will also serve to correct some errors made in compiling the vast volume. For convenience, the information is arranged numerically by YEARBOOK section.

TO: Licensees of All Standard, FM and TV Broadcast Stations located within the Continental Limits of the United States.

SPECIFIC: 

1. ELECTROMAGNETIC RADIATIONS (CONELRAD)

A. OBJECTIVE

A) To provide for transmission of a "Radio Alert" to all Standard, FM and TV broadcast stations during periods of imminent air attack when directed by proper military authorities.
B) Upon receiving the "Radio Alert" to recognize the message on the part of all Standard, FM and TV Broadcast Stations and transmit the message as directed.
C) To provide for transmission of an "All Clear" to terminate the "Radio Alert" and authorize all stations to return to their regular programs.

II. "RADIO ALERT" PROCEDURE

A. Alert Initiated By:

1) Commanding Officer of the Air Division (Defense), or higher military authority.

B. Alert Method:

1) The Commanding Officer at the Air Defense Command and at both locations of the Continental United States concerned will initiate the CONELRAD "Radio Alert" message. A list of Basic Key Stations by means of phone, teletype, and radio will be furnished to stations concerned. The CONELRAD "Radio Alert" will then be disseminated by Basic Key Stations in accordance with their instructions.

B. Basic Key Stations and Related Services, add: GUILD FILMS CO., ING on 50% Madison Ave., New York 22; Tel.: Murray Hill 5-6585; Max Kaufman, president. SERVICES: Sales, production, and distribution of TV films and packages. BRANCH OFFICES: 5746 Sunset Blvd., Hollywood, Calif.; Hollywood 9-4146; Will Lane, administrative assistant. 29 E. Jackson Blvd., Chicago, 11, Ill.; Tel.: Wabash 2-4146; Robert C. De Vinny, Midwest sales manager. 1515 Ruidoso Ave., Cleveland 15; Tel.: Superior 1-9929; Robert Rohner, sales representative.

C.基本関係者および関連業務、付: GUILD FILMS CO., ING 50% Madison Ave., New York 22; Tel.: Murray Hill 5-6585; Max Kaufman, president. SERVICES: Sales, production, and distribution of TV films and packages. De Vinny, Midwest sales manager. 1515 Ruidoso Ave., Cleveland 15; Tel.: Superior 1-9929; Robert Rohner, sales representative.

Conelrad Manual BC-3 for Broadcast Stations in the Continental U. S. A.

FOR THE RECORD
for acknowledgment and further dissemination of the "Radio Alert"
message: "Alert Key", "Relay Key" or "Skywave Key" station will immediately proceed as follows:
(a) Discontinue normal program.
(b) Cut the transmitter carrier for approximately 3 seconds.
(c) Return carrier to the air for approximately 2 seconds.
(d) Cut transmitter carrier for approximately 6 seconds.
(e) Return carrier to the air.
(f) Broadcast a 1000 cycle (approx.) steady tone for 13 seconds.
(g) Broadcast the CONELRAD "Radio Alert" message.

CONELRAD RADIO ALERT MESSAGE

"We interrupt our normal program to cooperate in Security and Civil Defense measures as requested by the United States Government. This is a CONELRAD Radio Alert. Normal broadcasting will now be discontinued for an indefinite period.

Civil Defense information will be broadcast in most areas at 640 or 1240 on your regular radio receiver.

I repeat—

This is a CONELRAD Radio Alert. Normal broadcasting will now be discontinued for an indefinite period.

Civil Defense information will be broadcast in most areas at 640 or 1240 on your regular radio receiver.

I repeat—

This is a CONELRAD Radio Alert. Normal broadcasting will now be discontinued for an indefinite period.

Civil Defense information will be broadcast in most areas at 640 or 1240 on your regular radio receiver.

I repeat—

III ALERT MONITORING

A) Standard, FM and TV broadcast stations are required to install radio equipment to receive, at the transmitter control location, the radio alert broadcast from key stations. The receiving equipment must be adequate to recognize the alert message in a satisfactory manner (Sec. 3.11). The receiver may be a regular broadcast type for continuous visual monitoring or may be equipped to monitor during the period of their normal broadcast day.

B) Standard, FM and TV broadcast stations will take action under subpart G of the Rules only when the Radio Alert or Radio All Clear is issued by the means prescribed in Sections 3.930 through 3.940 of the Rules.

An Air Defense Warning Red, Yellow, and All Clear may be disseminated to the public by means of Civil Defense facilities. CONELRAD action for broadcast stations should not be initiated or terminated as a result of the receipt of these warnings to the general public.

IV. RADIO ALL CLEAR PROCEDURE

A) All Clear Initiated By:
1) Commanding officer of the Air Division (Defense) in emergency designee.

B) All Clear Dissemination
1) The Commanding Officer at the ADCC concerned will signal the All Clear by giving notice thereof to Basic Key stations by means of private line or toll terminal telephones.

2) Basic Key, Relay Key and Skywave Key broadcast stations have been provided with instructions for dissemination of the CONELRAD Radio All Clear message. Each Basic Key, Relay Key and Skywave Key broadcast station will upon receipt of the ALL CLEAR:
(a) Immediately arrange to broadcast the CONELRAD Radio All Clear message over the cluster with which the station is associated as soon as possible; if the station is not associated with a cluster this will be disregarded.

CONELRAD RADIO ALL CLEAR MESSAGE

"CONELRAD Radio All Clear Restore normal operation.

I repeat—

CONELRAD Radio All Clear Restore normal operation.

II) Return to operation on its regular-

SECOND LARGEST MARKET

NBC BASIC IN BUFFALO

BUFFALO EVENING NEWS STATION

May 4, 1953 

Page 119
VI. CONELRAD

V. CONELRAD

A) Cluster Operation:

1) Cluster operation will take place in accordance with the station's CONELRAD authorization, on 660 kc or 1260 kc.
2) In the sequential mode of cluster operation, the station will be assigned by the Local Coordinator to one or more units, consisting of two or more stations. During a sequential operation, all units will have power which is properly adjusted throughout the cluster. Each station of the cluster, one at a time, in a non-cyclical sequence, will go on the air for a random period varying from 5 to 40 seconds. As one station goes off, the air and another goes on, there should be no appreciable "lost-air" time on the air. All units will operate on the same program and line, with no appreciable interruptions of program on any station.

B) Frequency Stability:

Transmitters used in CONELRAD operations should maintain a frequency stability within the assigned frequency range. CONELRAD frequency, 660 or 1260 kc, will be used on all transmitters. Frequency error shall be unmeasurably small.

C) Transmitter Construction:

Transmitters used in CONELRAD operations shall meet the electrical and mechanical requirements of the Standards for CONELRAD Transmitters, as specified by regulations of the Federal Communications Commission.

D) CONELRAD TESTS AND DRILLS

A) Alerts:

1) Line tests will be made at regular intervals.

2) Radio tests including broadcast station transmission of the 5-second carrier breaks 1000 cycle tone as in paragraph B 1 a) of the Standards for Good Engineering Practice Concerning Standard Broadcast Stations. When operating in CONELRAD, stations will not be required to meet the other provisions of the Standards for Good Engineering Practice (i.e., audio distortion, extraneous noise level, modulation capability, etc.).

VII. CONELRAD TESTS AND DRILLS

A) Alerts:

1) Line tests will be made at regular intervals.

2) Radio tests including broadcast station transmission of the 5-second carrier breaks 1000 cycle tone as in paragraph B 1 a) of the Standards for Good Engineering Practice Concerning Standard Broadcast Stations. When operating in CONELRAD, stations will not be required to meet the other provisions of the Standards for Good Engineering Practice (i.e., audio distortion, extraneous noise level, modulation capability, etc.).

The proof of a TV commercial is not how the master print looks in the projection room, but how it gets across on home screens. To make sure of reception from every print made of its TV productions, Sarra has its own especially equipped and staffed laboratory for testing TV film. Here Sarra's VIDE-O-PRINTS prints are custom-made. These duplicates faithfully reproduce the sparkle and clarity which twenty years of experience in the motion picture industry put into the original film. Thus the advertiser is assured that every time, on every screen, his commercial will give a fine performance.

FCC Rules Change
On Revocation, Cease and Desist Orders

Here is the text of FCC's change in Part I of its rules and regulations to establish procedure to be followed in instituting proceedings for revocation of station licenses and construction permits and the issuance of cease and desist orders consistent with the McFarland amendments to the Communications Act [B+T, April 20]. The revision is effective immediately.

Part I—Rules Relating to Practice and Procedure
This rule is amended to read:

PROCEDURE WITH RESPECT TO REVOCATION
AND MODIFICATION OF STATION AUTHORIZATION; CEASE AND DESIST ORDERS, AND SUSPENSION OF RADIO OPERATORS LICENSES.

Section 1.402 is amended to read:

Section 1.402. Revocation of Station Licenses and Construction Permits and Imposition of Cease and Desist Orders.

(a) Whenever it appears that a station license or construction permit should be revoked for any of the reasons set forth in 312(a) of the Communications Act of 1934, as amended, or a cease and desist order should be issued for any of the reasons specified in 312(b) of the Act, the Communications Commission in its order directing the licensee, permittee or person to show cause why an appropriate order for a cease and desist order, as the case may be, should not be issued.

(b) Any order to show cause issued in accordance with subsection (a) of this section will contain a statement of the matter with respect to which the Commission is inquiring and will call upon the licensee, permittee or person to appear before the Commission at a time and place stated in said order and in no event less than thirty (30) days after the date of said order, and give evidence upon the matter specified therein.

(c) If the licensee, permittee or person fails to appear before the Commission at the time and place stated in the show cause order, or fails to give evidence, or shows cause or fails to appear before the Commission at the time and place stated in the show cause order, or fails to give evidence, or shows cause, the Commission may, in its discretion, issue an order to show cause or grant a late hearing.

(d) In any case in which the party to which the order to show cause is directed shows cause why the order should not be issued, and the hearing has been granted, the order to show cause shall be modified to an order to show cause or a cease and desist order, as the case may be.

(e) If the order to show cause is not modified to an order to show cause or a cease and desist order, or the hearing is denied, the Commission shall, after giving the person an opportunity to be heard, enter a final order revoking the station license, or construction permit, or both, or impose a cease and desist order.

(f) Any order of revocation or cease and desist order issued pursuant to this section shall include a statement of the facts and the grounds on which it is based and specify the effective date of the order, and shall be served on said licensee, permittee, or person.

See sections 1.853-1.857 of the Rules.

GRANTED FOR NEW T-V STATION?

Are you planning to use your radio-trained people? If so, they will need specialized instruction in television engineering and production.

SOUTHEASTERN has the answer to that problem. Mr. TV Station Owner—professional engineering and production courses designed especially for radio or television people who lack such training.

These courses are highly intensive...classes are small...training is individual. The latest television equipment and a modern, fully-equipped studio permit the students to work on the basis of actual television station operation. Graduates are thoroughly familiar with the equipment of all manufacturers and capable of handling any TV job in their chosen field.

Give your radio-trained personnel the technical know-how they need. Investigate SOUTHEASTERN's professional training courses now.

New classes begin every six weeks.

Write for complete details.

An Adult Convention

THE NATION'S broadcasters held an adult convention in Los Angeles last week. There was the usual quota of vexing problems, but they were handled without emotion.

This was no slip-shod, ad lib convention. The whole event, which ran on-time and in fast tempo, was outstanding.

The main speakers outdid themselves. Gen. David Sarnoff, first recipient of NARTB's honor award, proved the ideal keynote speaker. He had a message, and he delivered it with typical brilliance and with the kind of candor that could only come from an outstanding leader whose vision supplied much of the brick and mortar upon which broadcasting is built.

From Rosel Hyde, FCC's new chairman, the convention heard in measured tones the state of the nation in communications. And from NARTB President Hal Fellows they received an accounting of stewardship that showed that their affairs are in good hands—better than ever before.

The broadcasters came in unexpectedly large numbers. They liked what they heard, because the convention dealt in realities, not in empty, high-sounding phrases.

PREsIDENT Eisenhower's letter to the NARTB convention [Bee, April 27] was something more than a pro forma greeting. He expertly appraised the accomplishments of the nation's broadcasters and expressed confidence in their ability to continue to "meet this extraordinary responsibility." Because he did display knowledge of the responsibility of broadcasters, his letter revealed one glaring omission. There was no mention of the essentiality of a radio as free as all other media—the press, for example. We hope this was mere oversight.

Network-Affiliate Relationship

THE NETWORK-affiliate relationship, a topic of conversation for several years, became a basic issue subject to renegotiation last week in Los Angeles at the NARTB convention.

Gen. David Sarnoff, RCA-NBC board chairman, made it official in his keynote address. And the affiliates began forming their lines by organizing their advisory committees, entirely divorced from network influence.

There was no effort to conceal the concern over the economies of of the network-affiliate relationship. There was the recognition that network service is essential in both radio and television, particularly for the coverage of the spontaneous event. When Gen. Sarnoff brought the issue to the convention floor it removed it from the level of the informal discussion stage.

The economics of network broadcasting emerged as the single big issue. But the trend was evident in other ways. The exhibits underlined it. More and more big names in syndication—both radio and TV, on film, on tape, on transcriptions. More and more high-quality gear for high-quality reproduction. The syndicators talked more flexibility in programming and selling, to fit the advertiser's budget, to give him what he wants without regard to time-zone, option time clearances and wire costs.

These were the auguries of fundamental changes in old concepts. There were in Los Angeles syndicates owned by the networks selling against networks. These are in the pattern field pioneered by Ziv. They are selling transcriptions in radio and films in television. They have the big talent names. They sell the opportunity for tailor-made "networks" to fit the client's distribution and his budget.

There were some who saw in this transition the end of commercial network programming after 6 p.m. in a couple of years. This, they said, would leave to the station all of the evening hours in radio for national spot and local programming, except for the occasional special event.

Broadcasting is a business. It looks toward profitable operation. When the network business, as we know it, ceases to be profitable, the networks, as we know them, will cease to function. The networks contend that in radio that point now is being approached. Out.

So, during the next few months, there will be new negotiations among network and their affiliates. There always will be networks. But in the future they may bear only slight resemblance to the structures that haven't changed in basic format since NBC started the first network in 1926.

Profit and Honor

IF IT proved nothing else, the management study presented last week by Richard M. Allerton, research manager of the NARTB, would be valuable in underscoring the fact that profits and high standards are not irreconcilable in radio.

The most profitable AM stations turned up in the study were found to be doing exactly the things that broadcasters say are desirable when broadcasters are talking in public but which are not invariably done in the privacy of their own offices.

The profitable stations in the study refrained from rate cutting, were particular about the kind of advertising they accepted, spent more proportionately on programming than their competitors did. Obviously the management of those stations has a keen awareness of its dependence upon public respect.

Now, of course, there may be equally profitable stations in other markets which did not come under the NARTB project's scrutiny and which may be indulging in less desirable practices. Admitting that, the point here is that it was definitely proved, in those five markets where the study was carried on, that financial success attended the maintenance of high standards.

Adherence to policies of respectability is part of the know-how that Mr. Allerton described as the prime ingredient of successful radio broadcasting. True know-how embraces a higher regard for the long-term return than for the quick buck. It is as concerned with a property's prospect for the future as with its latest quarterly net. It is this kind of know-how that builds enduring enterprises.

Television has been around long enough for everybody to realize that AM radio, as a business institution, is capable of indefinite survival. As Mr. Allerton suggested, some radio stations may fall under the pressure of increased competition. But those with adequate capital and far-sighted management have every prospect of long and fruitful life. It is in recognition of that future that intelligent management is operating today and planning for tomorrow.

The more widely that principle is understood, the more stability there will be in radio. To the degree that stations lower their standards as a concession to the quick buck, to the same degree the structure of the entire radio system will be undermined.

It is quite possible that the management study released last week will be of great importance in stabilizing radio. The lessons it teaches are sound. They should lead toward better business and better radio.
Consistently high quality programming—planned for variety, interest and easy listening—keeps a steady audience tuned to WREC. The “better half” of both the Metropolitan and Rural listeners are assured by a perfect balance in entertainment . . . night and day. Advertisers get the rich 76-county Memphis Market with a single schedule. And, WREC prestige carries weight that adds up to extra sales results. See the latest Standard Audit and Measurement Reports and Hooper Ratings . . . you'll see why we say WREC is Memphis No. 1 Station. Cost? 10% less per thousand listeners than in 1946.
Here's an area that accounts for an important part of all filling station sales—an area whose summertime potential can be measured by the fact that it is the Midwest's number one vacationland! Sell your filling station items forcefully and economically in this area by using the one single sales voice that covers it effectively. Use WJR, the Great Voice of the Great Lakes. Contact WJR or your Christal representative today.
