60 seconds is all it takes...

After watching two trains try to stop, but collide, George Westinghouse thought there must be a more efficient way to stop moving trains. In a flash of inspiration perhaps taking no more than 60 seconds, he had an idea—Why not use compressed air?—Thus a new safety principle in locomotion was born!

Today, to start and stop your ad campaign when and where you want to—to get your product highballing to greater sales—60 seconds is all it takes on Spot Radio.

It costs less to reach more of your potential customers whoever they are wherever they might be at the precise time and place of your choice. 60 seconds—or less—is all it takes to sell your product with the right, bright buy—Spot Radio.
KVTV's Talent Team Sells Sioux City

homemaker
Jan Voss
Hostess on KVTV's Open House and the Homemaker home makers rely on — with sales results to prove it.

weatherman
Conrad Johnson
Mr. Weather in the 3-state KVTV area. Continually sponsored, 5 days a week, by the same advertiser for over three years.

news editor
Austin Schneider
Consistently first with the News in Sioux City. A news show that lends authority to your sales message.

women's feature editor
Joyce O'Connor
"At Home" with Joyce O'Connor is filled with helpful "how-to's" for homemakers, women's news, fashions, and decorating ideas that make sales and faithful listeners.

sports editor
Les Davis
Dean of sportscasters in the rich Siouxland Market and an outstanding sports figure in his own right.

cowboy
Canyon Kid
Jim Henry, the genial Kid's Kowboy with a faithful retinue of side-kicks. Sioux City's only daily children's participation show.

MR. SMITH GOES TO TOWN? • If Paul C. Smith, its dynamic president, has his way, Crowell-Collier will become most comprehensive communications combine in history. He has plans to build organization encompassing magazine and book publishing (already in the fold), radio and television (nearly $20 million in station purchases awaiting FCC approval), newspaper (which he hopes to afford after beefing up company’s profits) and even motion pictures. Mr. Smith envisions fabulous cross-pollinization among future properties: i.e., major stories created for magazines would be reworked as radio and TV programs, as books and as movies.

HOW FAST Crowell-Collier expands will hinge largely on success of its venture into broadcasting. President Smith is looking for top executive to run subsidiary which will operate stations and create and syndicate programs. Mr. Smith is counting heavily on broadcasting subsidiary for rapid buildup of company’s income and net which would make financing of further development easier.

COLOR FILM • NBC has been blowing alternately hot and cold on acquisition of Technicolor feature backlog of Metro-Goldwyn-Mayer with eye to plans for expanding color operations next fall. Prospect is that film would be used to help swing owned-and-operated KRLA (TV) Los Angeles and WRC-TV Washington to full-color schedule within year similar to WNBQ (TV) Chicago.

ONE reason FCC commissioners aren’t too keen about deintermixture was realization that only about 15 cities could be deintermixed (made all uhf or all vhf, even permitting single existing vhf outlet to remain in uhf market) without getting into chain reaction that could lead to major upheavals throughout country. This is just too few to be worthwhile, is feeling among majority on FCC.

MIAMI PURCHASE • WWPB Miami 250 watt (full time) is being purchased from Paul Brake, 100% owner, by William M. O’Neil, former owner of WJW Cleveland, for approximately $175,000. Mr. O’Neil is among bidders for WQAM, recently sold by Miami Herald to Todd Storoz for $850,000. Mr. O’Neil (now Miami resident) would have become president-general manager of WWPB upon FCC approval of transfer. Associated with him as minority stockholder will be William Lemmon, former executive vice president of WJW. Mr. O’Neil is son of W. O’Neil, president of General Tire & Rubber Co. which, in turn, owns RKO Telecolor Pictures Inc. and associated operations, including control of Mutual. He is not identified, however, with Telecolor operations. WWPB, established in 1947, is on 1450 kc.

NOT announced after NARTB TV Code Review Board’s meeting last week is proposal to clear up one of code’s foggiest paragraphs. This covers back-to-back announcements at station breaks and will conform to prevailing industry practice of using identification spots between announcements. Present language (Par. 6 Time Standards) would appear to condemn i.d. spots between announcements. Amendment will be submitted to NARTB’s Televis- ion Board next week.

MULTIPLE OWNERSHIP • Concerned over prospect that Congress might grab half on multiple ownership rule, FCC last week discussed possible revision of existing regulation which arbitrarily limits ownership of broadcast stations to seven in each category (am-fm-tv, with not more than five vhf to customer). It’s understood that Comr. John C. Doerfer suggested commission consider rescinding existing limitation, and substituting rule based on population limit of 25% rather than number of stations. Bricker bill (S 3859) introduced in Senate, and companion O’Hara bill (HR 10524) would substitute 25% of population coverage limitation. Further FCC consideration slated for next month.

THOMAS F. O’NEIL’s RKO Telecolor Pictures, already in radio-tv, motion pictures and record business, may next expand into legitimate theatre with RKO Radio Pictures converting top feature hits of past years into Broadway ventures. Mr. O’Neil and 11 other board members of parent General Tire & Rubber were in Hollywood last week, inspected revitalized RKO lot.

AFFILIATES’ INN • CBS-TV’s new network affiliate to appear before Senate Commerce Committee on TV investigation June 18 will represent cross-section of outlets from big city stations to EMP outlets, uhf as well as vhf, in one, two, three and four station markets. Kicking off presentation will be Miss John S. Hayes, president, Washington Post Broadcast Division (for WTOP-Washington and WMABR-TV Jacksonville), who proposes to answer explosive testimony of Richard A. Moore, KKTV Los Angeles, charter and vorse; August C. Meyer, WCIA-TV Champaign, Ill.; W. D. (Dub) Rogers, KDBU-TV Lubbock, Texas; John S. Cohen, KSBW-TV Salinas-Monterey, Calif.; H. Moody McElwee Jr., WNOK-TV Columbia, S. C., and Donald W. Thornburgh, WCAU-TV Philadelphia. Counsel is Ernest W. Jennes, Covington & Burling, Washington. Pitch will be that network and affiliates constitute partnership and that affiliates would suffer irreparable injury if current business relations were unduly interfered with.

ONE question expected to be popped during testimony of TV network presidents before Senate Commerce Committee this week is whether networks have been living up to advice contained in NARTB political broadcasting manual. It’s understood Democratic National Committee has been unable to get commitments for paid time from at least one network, and Democratic Senators want to know why.

NETWORK QUESTIONS • After talking with top network brass in New York last week, Senate Commerce Committee staff experts agreed to modify 4½ page questionnaire in number of particulars, which presumably would make it less onerous. Committee majority counsel Kennethuzzi and communications expert Nicholas Zappi after sessions agreed that some answers would be deferred until Aug. 15 but that questions nevertheless would be asked at hearings this week at which network heads will testify (see page 28). Instead of seeking complete breakdowns on programming, syndication, spot billing, representation and other operations for one year, it was agreed that typical week would reflect data.

W.M. WRIGHTYLE JR. Co. has definitely decided not to renew CBS-TV’s Gene Autry Show after July 7 after six years’ association with the cowboy and his band (see June 4). Reason: Network wants gum company to extend station lineup substantially. Wrighty has made “no other radio-tv commitments at this time” beyond retention of CBS Radio time for new Pat Buttram series, also replacing Mr. Autry. Thus, fabulous Wrighty Autry association (for 16 years) comes to end.

POLICY PROBLEM • Resignation of Frank P. Schreiber as vice president-general manager of WGN Inc., after 38 years with Chicago Tribune company, and appointment of Ward L. Quaal, Croley Broadcasting executive, as his successor, reportedly stems from differences in operating policies of Tribune organization since death last year of Col. Robert R. McCormick. Mr. Schreiber had reported directly to Col. McCormick. Tribune now is directed by Chester Campbell, president-publishing, and Robert E. Cox, vice president-general manager and president of WGN Inc., and W. D. Maxwell, editor. (See story page 58.)

WICK CRIDER, who resigned as vice president in charge of radio and television of Kenyon & Eckhardt, has joined Young & Rubicam, New York, early this summer in executive capacity.
second thoughts

Herewith some random thoughts on being second in average daytime audience in Minneapolis-St. Paul.

- Feels good. Much better than 4 months ago, before Mid-Continent took over with new music, ideas, news.
- WDGY has momentum. New Hooper shows gain again—to 19.1% all-day average.*
- Notice wider audience gap between WDGY and Nos. 3, 4 and 5. Ahead of #3 by 67%; ahead of #4 by 154%; ahead of #5 by 169%.
- Nielsen improving, too. Up 93% daytime since last time.**
- Buyers are buying, getting results, too.

Steve Labunski, WDGY GM, can give you a lot to think about.
So can an Avery-Knodel fellow.

Coming Soon—WQAM, Miami—Transfer Subject to FCC Approval
TURNABOUT: CBS RADIO UPS PAY RATE TO AFFILIATES, ASKS FOR SALES PUSH

IN FIRST REVERSAL of downward slide that started with blossoming of television, CBS Radio told its affiliates Friday that it is restoring part of reductions they've taken in rate of station compensation. At same time network called for affiliation cooperation in new sales drive aimed initially at 10 a.m. to 3:30 p.m. Monday-Friday periods and which, if successful, would materially strengthen network’s financial position and more than double current station compensation.

What amounts to 65% boost in current rate of compensation will go into effect Aug. 25 through new, one-year contract amendments specifying 15% rather than current 20% as amount of reduction borne by affiliates in comparison to pre-1951 compensation rates. Officials said it is actually first general increase in compensation ever granted by CBS Radio. When first general rate cut to advertisers was announced in April 1951, CBS Radio affiliates took 10% cut in compensation. This went to 15% in 1952, and has been on year-to-year basis since then. For year ending Aug. 25 it is 20%. New amendments restoring cut to 15% level for period from Aug. 25 this year to Aug. 25, 1957, were to be mailed to affiliates over weekend. Rates to advertisers are not involved.

Neither NBC Radio nor ABC Radio, advised of move late Friday, had any immediate comment. ABC spokesman maintained, however, that ABC's present rate of compensation to stations is higher than CBS' and would remain so under new CBS arrangement. Mutual is in process of adjusting its own compensation arrangements along different lines [B&T, April 23; also see below]. Arthur Hull Hayes, president of CBS Radio, and Kenyon Brown of KWFT Wichita Falls, Tex., chairman of board of CBS Radio Affiliates Assn., who announced compensation boost to affiliates in closed circuit to stations at 5 p.m. Friday, said they were confident it would have far-reaching effects not only on network radio but on radio generally. Speaking for affiliates board, which conferred with network officials in all-day session before announcement, Mr. Brown congratulated CBS Radio and said his group was pleased "that it is our network that is making this, what we consider important, announcement." They expressed hope that further "increases" would be possible year from now.

President Hayes made plain that return to 15% reduction level was not based on present financial situation but on "our complete confidence in the future." CBS Radio feels it is now at turning point where it could go either forward or backward, he indicated, reiterating confidence that movement will be forward. Outlining sales concentration on period from Godfrey through Linkletter (10 a.m. to 3:30 p.m., Mon.-Fri.), he told affiliates that if this whole period "were sold and other existing business retained, total station payments would be more than doubled." Godfrey and Linkletter are practically sold out, and periods between (largely daytime serials) are "over half sold." But to sell advertisers and keep them sold, it was emphasized, stations must cooperate by clearing time (CBS officials said for more option time than FCC rules permit, and also assured that they would cooperate with stations wishing to present local farm news programs around noon time).

Mr. Brown called attention to recent CBS Radio contracts with Colgate-Palmolive, Procter & Gamble, Bristol-Myers and General Foods as evidence of upsurge in advertiser interest, stressed need for stations to cooperate and expressed confidence that network "can get the business" through selling campaigns currently getting underway.

Mutual Goes on Road To Sell Affiliation Plan

SERIES of regional meetings with Mutual's affiliates to explain and urge acceptance of network's new affiliation contract, which requires stations to "pre-clear" 16 hours of network programs weekly but almost halves total option time and compensates stations in free programs as well as money [B&T, April 16], will be held this month in eight cities, Robert Carpenter, director of station relations, reported Friday.

Meetings will be held June 15 in Chicago (Sherman Hotel); June 18 in Salt Lake City (Utah Hotel); June 20 in Dallas (Baker Hotel); June 22 in New Orleans (St. Charles Hotel); June 25 in Atlanta (Dinkler Plaza Hotel), and June 27 in New York (Warwick Hotel). Meetings will start at about 10 a.m., with morning session consisting of network presentation followed by general affiliation meeting in Chicago during NABRT convention [B&T, April 23], followed by luncheon and then open discussion session with affiliates in afternoon.

Mr. Carpenter conceded new contract plan has encountered some opposition among affiliates but said that for most part reaction has been "extraordinarily good" and that he expects ultimate result to be highly favorable. Mutual plans to put new contract into effect Nov. 1, regardless. Stations refusing to sign would in effect be disaffiliating themselves from network [B&T, April 23].

Wesson Oil Buys 'Blondie' In Major Sale by Vitapix

NEW Blondie time-talent package sold by Vitapix Corp. and Hal Roach Studios to Wesson Oil & Snowdrift Sales Co. in $195 million television deal, first major Vitapix spot TV transaction. Weston list to include Vitapix 65-station group, which cleared time prior to offer of package for sale, plus additional group covering all remaining Wesson marketing areas. "Blondie" one-hour package totals $3 million, with remaining co-sponsorship now under negotiation. Wesson contract calls for firm 52 weeks, utilizing 39 episodes of Arthur Lake-Pamela Britton series on 15 repeats. Fitzgerald Agency, New Orleans, handled deal for Wesson.

• BUSINESS BRIEFLY

SUNBEAM BUYS FOOTBALL • Sunbeam Corp. (electric appliances), Chicago, has completed negotiations for one-quarter sponsorship of Pacific Coast and Eastern Collegiate Athletic Conference regional football telecasts on NBC-TV, as well as Big Ten and national eight-game slate announced earlier. Agency: Perrin-Paus, N. Y.

TEXACO EYES SPECS • Texaco Inc., through Kudner Inc., N. Y., expected to buy into TV spectacles and extravaganzas next fall. Actual schedule and shows now under consideration by agency.

RADIO FOR NESCAFÉ • Nestle Co. (Nescafé), White Plains, N. Y., set to launch special spot radio campaign next month in nine markets to push sale of product in these localities during summer months. Agency: Bryan Hous ton Inc., N. Y.

MAY TEST RADIO • Allied Chemical & Dye Co. (toacco insecticide) considering radio spot test for four weeks in four markets. If approved, campaign would start almost immediately. Atherton & Currier, N. Y., is agency.

SOUPS ON • Campbell Soup Co. (for Campbell "kidds" promotion), Camden, N. J., reportedly has bought 10:10:15 a.m. portion of Howdy Doody on NBC-TV, Nov. 17, 24 and Dec. 1. Other quarter-hour shows already picked up by Continental Radio Co. Campbell's agency: Grey Adv., N. Y.

ADMIRAL CHOOSING • Admiral Corp., Chicago, expected to name agency this week to handle radio-TV and other advertising. Choice understood to have narrowed down to Henri, Hurst & McDonald and another agency. Rus sel/Comstock, St. Louis, recently resigned Admiral account.

THEY'LL STAY • Brown & Williamson Tobacco Co. (Viceroy) and Procter & Gamble Co. (Cheer) will remain on CBS-TV through summer replacing The Lineup with Undercurrent, film drama series starring Pat O'Brien, Dane Clark, Jean Pierre Aumont and others. Program, to be seen Fri., 10:10:30 p.m. EDT from June 29-Sept. 21, handled through Ted Bates & Co. (Viceroy) and Young & Rubicam (Cheer).

NOT ALWAYS JAN • Procter & Gamble Co. (Drene, Dash, Crest), through Benton & Bow les' Compton Adv. places The Russ Morgan Show as summer replacement for It's Always Jan on CBS-TV, July 7-Sept. 1, Sat., 9:30-10 p.m.

REPLACEMENT • Purex Corp., South Gate, Calif., through Foote, Cone & Belding, L. A., to sponsor The Ina Ray Hutton Show as summer replacement for NBC-TV's Midwestern Hayride (Whitehall Plan Co.), Wed., 10:30-11 p.m., starting July 4.

TANGEE TAKING • Tangee Inc. (lipstick), N. Y., through Warwick & Legler, N. Y., planning four-week radio spot announcement campaign during July to reach teenagers. Nearly 50 markets are expected to be used.

PROPOSAL that agencies establish "hourly rates" for their services as test of "the reasonableness" of 15% media commission system of compensating agencies was proposed by Ira Rubel, New York advertising accountant, in speech released Friday. He was one of several speakers at Assn. of National Advertisers' third annual budget control workshop, account of which was made public by ANA.

Speeches generally did not attack media commission system as such, but rather seemed to give—more clearly than most advertiser speeches on this subject in recent months—indications that commission method might be made acceptable as one basis for compensation provided other points of advertiser criticism can be satisfied.

Mr. Rubel, endorsing current movement among advertisers to reappraise media commission system of compensation, termed it "fortunately" that there is apparent conflict between those favoring and those opposing present payment method. Actually, he said, there is basic agreement on importance of independent agencies in media field. He asserted:

"One measure of value is the price that an efficient producer needs to cover his cost plus a reasonable profit. It is precisely this kind of a base of comparison that is involved in the reasonableness of the 15% compensation . . .

I propose that agencies establish hourly rates for each kind and grade of service they perform, and keep a record of the work on accounts to show how much time has been devoted to each client's work . . .

"This hourly rate can be used to compare the cost of doing the work in the advertising department with the cost of doing it on the outside. It can be used to determine the cost of performing each area of work, to help plan how much to spend to perform each function . . .

It is up to agencies to find satisfactory methods to convince their clients that they are earning what they are getting. This will require more scientific methods to evaluate the results accomplished and to keep records. The commission system can continue to work as the main basis of agencies' compensation—the floor upon which to build, but agencies should apply other measures to show that the value of the service they perform is in proportion to the compensation they receive."

ANA President Paul B. West said "advertising management must be accountable for the amount and the kinds of services it gets from the agency and the final authority on how much the company will pay for the required agency services and the basis on which it will pay for those services. By the same token, it is the agency's prerogative, as an independent, outside purveyor of skilled professional services to determine what services it will provide the advertiser at what cost."

"The 'close working partnership' idea so well expressed by ANA Board Chairman Edwin W. Ebel, General Foods Corp., is so well accepted in most quarters today that we should have no insurmountable problems regarding the commission arrangement and in arriving at the most productive and profitable basis of compensation for both the advertiser and the agency. Since it is the advertiser's business that is at stake and his money that is being invested in advertising services, naturally it is his prime responsibility for exercising the proper control over these expenditures."

Mr. West said "the traditional 15% commission system of the past has been accepted without sufficient questioning of its merits weighed against actual practices and in too many cases it has been used as a crutch or coverall. Responsible advertising management simply cannot condone that kind of loose practice."

Glen Harold, advertising department comptroller, General Mills, stressed that management demands greater efficiency and more accurate control of advertising expenditures. He said, "Each account should be a substantial amount of responsibility for the advertising program even though it has the best of advertising agencies. Certainly, an advertising budget should be developed each year or more frequently and controls should be established to keep the expenditures within the budget. While many advertising transactions are complicated, the accounting records can be quite simple . . ."

Orin Spellman, vice president in charge of Philadelphia office of Kenyon & Eckhardt, spelled out contributions agencies can make to clients' advertising and promotion programs.

Mortimer Hall Buys KLAC From Mother for $845,000

APPLICATION for FCC approval filed Friday for sale of KLAC Los Angeles from Mrs. Dorothy Schiff Sonnenborn to her son, Mortimer W. Hall, KLAC president-general manager, for $845,000. Terms of purchase call for $245,000 cash and $600,000 remainder to be paid off in eight equal installments. KLAC, founded in 1928, operates on 570 kc with 5 kw daytime and 1 kw nighttime. Mrs. Sonnenborn is owner of New York Post.

Also filed with FCC was application for approval of sale of KHHO Sioux Falls, S. D., by Dr. John D. Connor, David J. Kemps and James Sweet to Leslie F. Ware for $20,000 plus certain debts. KHHO, affiliated with Mutual Broadcasting System KLFW, has no station interest in KGHM Brookfield and is buying KNIM Marysville, all Mo. KHHO operates on 1270 kc with 1 kw, MBS affiliated. Broker was Blackburn-Hamilton. And announced Friday was $60,000 purchase of WICE Providence, R. I., by WCUE Akron, Ohio, principals from Louis A. R. Plieri. WICE operates on 1290 kc with 500 w daytime. WICE, general sales manager, is Tim Elliott, Fredric O. Hatch, Jack Maurer, Philip A. Meyers and Rick Reighard. WICE purchase subject to FCC approval, negotiated by Haskell Bloomberg, Lowell, Mass., business broker.

something to cheer about!

WRCV and WRCV-TV, Philadelphia, are sold by NBC
Recently, Philadelphia turned out in force to welcome and honor WRCV and WRCV-TV, newest members of the NBC Spot Sales family.

After a spectacular parade to City Hall, Philadelphia’s Mayor Richardson Dilworth presented Lloyd E. Yoder, Manager of these new NBC Owned Stations, with the Key to the City!

This warm demonstration of welcome is characteristic of the way in which all NBC Spot Sales stations are regarded in their communities. You’ll find the same quality of showmanship and the will to serve in each of them. Each is familiar with its audience, sensitive to local sights and sounds that make popular programming. Each serves its advertisers, as it serves its public, with pride and responsibility.

Like WRCV and WRCV-TV in Philadelphia, every one of the stations represented by NBC Spot Sales is something to cheer about. Each can provide your product with the warmest reception it’s ever had in its market.

*There’s always something extra on the stations represented by NBC Spot Sales.*
AND it could be that this new product of the Ralph Edwards mill will find itself a big audience, each member hoping to be tapped for glory (or ignominy) by the Edwards sleuths. This espionage system could be formidable in the service of some aggressive government. Intimate bits of life—a woman has exasperated her husband by hanging the wash on their TV antenna; another in the audience hid her reporter card from her mother 17 years ago—are ferre- out and revealed on the show. For the home viewer there is a delivery of anniversary flowers, or advice to Mrs. Smith in Delaware to watch tomorrow for her surprise. And there's the Edwards signature act, the bang-up ending when long-separated loved ones (flew in by TWA) are reunited, as the audience drowsed in a sea of raw emotion. Bracketing the acts is the same dreary organ that's been on daytime radio and TV for a quarter-century or more.

But the Edwards tricks even now are causing the calculated number of pounding hearts around the country. And with m.c. Bill Leyden doing his humorous and talented bit, It Could Be You could become a daytime standard.

Production costs: Approximately $35,000 weekly.

Telecast Monday through Friday, noon-12:30 EDT on NBC-TV.

GOING PLACES
AS A SUMMER replacement for Super Circus in the Sunday afternoon 5-6 p.m. period, ABC-TV's Going Places started out June 3 with enough thrills and wild life to satisfy any circus fan. The only notable lack was comedy; Miami's Seaworld, where the program origi- nated, had no substitute for Super Circus' clowns. Perhaps this handicap will be over- come in subsequent telecasts from Hialeah Park, the Parrot Jungle, Spanish Monastery and other Miami area tourist attractions. Jack Gregson was adequate as master of ceremonies; Phyllis Newman was cute to see and hear as the show's singer and the acrobats and aqua- brides were skillfully thrilling, but the fish, turtle and porpoises, just by acting their natural selves, stole the show from the human per- formers.

Production costs: Approximately $15,000.

Telecast Sun., 5-6 p.m. EDT, on ABC-TV, originated live by WITY (TV) Miami, from various locations in and around Miami, with participating sponsors.

O'HOLIHAN AND THE LEPRECHAUN
SURE and there were great goings-on in the best (or worst, if you prefer) low-comedy Irish traditions on CBS-TV June 3, when the General Electric Theatre chose to present the story of a misguided leprechaun who, substi- tuting for an ailing banjo, came to escort the soul of O'Hoolihan to the land of the fairies and found himself at an ending party, instead of a wake. The plot was so complicated and the action so fast that the viewer had no time to find fault with its implausibilities or do anything but keep on watching and laugh- ing.

Highspots for one amused viewer: The adroit way in which the progress of the wedding party from gaiety to shambles was graphically re- ported by shadows and sound effects. The solemn deliberations of E. G. Marshall, as O'Hoolihan, and Roddy McDowall, as the lep- rechaun, of how best to rectify the mistake without turning the bridegroom into a corpse. The marriage of Meg, the militant bride, into Meg, the meek wife, brilliantly and comically performed by Anne Jackson.

Production costs: Approximately $35,000.

Sponsored by General Electric Co. through RBDQ, Sun., 9:30 p.m. EDT.

Host: Ronald Reagan.

Producer: Lee Davis; executive producer: Mort Abrahams; director: Don Medford; writer: George Lowther; costume designer: Gene Coffin; set director: John Robert Lloyd.

A BELL FOR ADANO
AT AROUND 11 p.m. last Saturday, our 17- year-old neighbor who had dropped in to see the Ford Star Jubilee was moved to speak—at last. "For this," he demanded to know, "they gave it a Pulitzer Prize?"

"This," he should hasten to point out, was the Arthur Schwartz-Horace Dietz musical ver- sion of John Hersey's 1944 Pulitzer Prize- winning A Bell for Adano, which our friend was too young to read at the time. (Nor was he old enough to see Paul Osborn's 1945 version with Fredric March or to appreciate the 1947 film starring the late John Hodiak.)

"No," we reassured him, "not for 'this.'" Advance reports from Television City had it that CBS-TV programming officials "saw" in Adano a perfect vehicle for musical adapta- tion. Perhaps the word "vehicle" blinded the Ford people, or maybe the smog was unusually heavy the day this thing was gone over in story conference. At any rate, we can only say that the emasculation of John Hersey's tale of the democratization of a war-battered Sicilian village and its people was criminal.

Production costs: $250,000.

Sponsored by Ford Div., Ford Motor Co., Dearborn, Mich., through J. Walter Thomp- son Co., N. Y., on CBS-TV, every-fourth-Saturday, 9:30-11 p.m. EDT.

Another thinly disguised WJR success story

OK, son, get out there and sell real estate!

Not exactly dressed for it, you say? Well, one of WJR's advertisers does it.

He sells lakefront lots. They're far enough off the beaten path to miss normal weekend traffic.

This chap makes it worth while. "Pack a picnic," he says. "Bring your bathing suits. Use the beach," he says. "After all, if you buy a lot, it's your beach."

The beach was swarming with buyers. He sold out his first lots—fast.

We wouldn't say it was all our doing, either. We merely point out this fellow with ideas who knows that WJR is the best way to get ideas across.

He's back again—back to that faithful audience only WJR gives him in the market.

Only WJR? If in doubt, here's what Alfred Politz Research, Inc. found out about us in his latest listener survey:

Politz found that 41 percent of all the adults in the area surveyed listen to WJR alone—day after day.

That's tough to match. Our advertisers—people who move goods fast in Detroit and the Great Lakes market—know it.

Your ad manager should know it, too. For all the details on WJR see your Henry I. Christal representative.

Questions for Mr. McLendon

EDITOR:
I have just finished reading, "News—The Ace Up Radio's Sleeve" [BT, March 19]. Although I agree with Mr. McLendon on a number of points in his article, I would like to take issue with him on several statements.

On the point of radio editors, Mr. McLendon states that his stations "don't run editorials unless we have something to editorialize about." This is all well and good, but why doesn't the same hold true for radio interviewing via telephone? Mr. McLendon states that the telephone-beeper is employed frequently to aid the news story, but what concrete value is there in placing a telephone call to Moscow just to hear an ambassador say "Hello?" Is this good news? Has an interview of this sort added any value to the news item . . .

Another point which the author makes is that news gathering at KLIF is a happy chore. Undoubtedly this is so, but is the listener equally happy and in a receptive frame of mind, after hearing five times in less than an hour that a fire is burning in Hug's Alley? . . . It would seem to me that this over-saturation of news broadcasting would tend to deafen the listener's ear.

Michael D'Angelo Jr., Prod. Dir.
American Forces Korea Network

Mythical Price Tag

EDITOR:
I note in your May 28 issue that a statement was made in connection with the recent approval by the FCC of translator tv stations that the cost of equipment for such stations would be $1,000.

Actually no such equipment is available on the market at this time, and our unit will sell for $2,750, including tubes, crystal and transmitting antenna. Extras involved will be a vhf receiving antenna, a shack to house the equipment, a supporting structure for the antennas and the cost of running power lines in.

The $1,000 figure was floating around about six months ago and probably resulted from a question put to me by one of the commissioners who asked if a $1,000 figure would be feasible if the equipment were built in quantities of 1,000. I answered that it would be feasible. Since then the equipment has become more complicated and the quantities are not expected to reach 1,000 for any one production; hence the higher cost.

I would appreciate your squaring this away because we are already receiving adverse comments concerning the mythical $1,000 equipment.

Adler Electronics Inc.
New Rochelle, N. Y.

Public Spirited Performers

EDITOR:
In Marie Torre's column in the New York Herald Tribune she blasted the "hankless nature of tv and radio stars" in an item headed "A Case of Unrequited Love." The column described an ad agency's frustration in attempting to line up performers for a public service chore in connection with a New York City campaign against juvenile delinquency.

It just happens that the Institute for Democratic Education, which has been producing public service broadcasts for the last ten years, had much the same idea at about the same time as the ad agency to whom Miss Torre refers. We felt that teenagers would respond favorably to straight-from-the-shoulder appeals from radio and tv stars they idolize on such subjects as respect for the rights of others, democratic living, brotherhood, good citizenship and law and order. So . . . in April we released a library of 23 celebrity spots to disc jockeys and program managers of radio stations across the country.

We managed to assemble a pretty fair cast consisting of Ed Sullivan, Martha Raye, Mitch Miller, Steve Allen, Count Basie, Jose Ferrer, Rosemary Clooney, Patti Page, Guy Lombardo, Ralph Flanagan, Vaughn Monroe, Cab Cal loway, Bill Hayes, Harry Belafonte, Frankie Laine and Julius La Rosa. . . .

The recordings have been requested by and are in use on over 500 radio stations to date. Practically every star we approached to participate in this project responded favorably and cooperated fully. Those who couldn't make the recording dates because of the press of other engagements asked for a raincheck . . . We pay scale for all talent and more often then not we find stars sending their own checks back to us as contributions a few days after the broadcast.

On the basis of our long experience in public service broadcasting we want to go on record with the unsatisfaction that no group in American life is more conscious of its community responsibilities or more willing to contribute time and effort to decent causes than the performing artists in every phase of show business. And that goes for their guilds and unions as well. AFTRA, SAG, Equity and AFM have always extended every consideration to the Institute.

Maurice J. Glazman, Program Dir.
Institute of Democratic Education
New York City

Filling Them in on Fm

EDITOR:
. . . I am writing to request your permission to allow us to photocopy the page which summarizes the Maxon report on fm broadcasting in order that we may reproduce it for distribution to our local sponsors in the area.

I am associated with William Colin Kirk in the construction of a new fm good music radio station to serve the Denver area. We will actually be the second good music station to serve this area. So we would doubly appreciate the privilege of being able to duplicate your article and be the station to really fill the local people in on the fm situation.

Irv C. Jackson
Lakewood, Colo.

[EDITOR'S NOTE: Permission freely granted, with credit to B.T.]

EDITOR:
Please send and bill us for 50 copies of the article concerning the Maxon Agency and its fm study . . .

Ben Stroh, President
WWDC-AM-FM Washington, D. C.

Free Loading

EDITOR:
Congratulations on a very effective exposure of "free loading on the air" in your May 21 issue.

While this practice [of sneaking mentions of commercial products into programs] is of minor effect on a small radio station, the cumulative damage to the entire broadcasting industry is such that everyone is affected and should be interested.

Keep up the fine work, of protecting our industry from attacks without and within.

R. T. Mason, Pres.
WMRN Marion, Ohio

KFBK

THE BEELINE’S 50,000 WATT SACRAMENTO STATION

KFBK has more top rated daytime shows...9 out of the 10 most popular daytime programs in the Sacramento area are KFBK shows, reports latest Pulse.

KFBK has greater coverage than any competitive station, daytime or nighttime. (SAMS)

KFBK has a greater FCC contour, daytime and nighttime, than any competitive station.

Beeline stations, purchased as a unit, give you more listeners in Inland California and Western Nevada than any competitive combination of local stations...and at the lowest cost per thousand. (SAMS & SR&D)
ALTHOUGH Fred Seaton, broadcaster, publisher and farmer, prefers the privacy of his midwest enterprises, he's likely to be a public figure as long as President Eisenhower is in the White House. Now, as the just-confirmed Secretary of the Interior, he will be a headline target every time he makes an important decision.

Secretary Seaton has behind him a quarter-century of broadcast experience plus two-score years of newspaper work. His media career started at the age of six in the composing room of his father's Manhattan (Kan.) Mercury. Perched atop a boiler-plate box mounted on a stoop, he learned to set type out of the case. All through his public school years he worked on the paper, doing every job in the plant.

He got into radio at Kansas State College of Agriculture & Applied Science (now Kansas State), broadcasting all types of sports events on KSAC, the college station. Since KSAC split time with KSAC-TV, the peak was carried on both stations. Before diploma time he had become involved in a student revolt over archaic curricula and left the campus without a degree, an oversight repaired 25 years later when he received an honorary doctorate.

For a time he freelanced around the midwest as sports announcer and reporter, and in 1931 turned down a CBS offer—"a lot of money in those days," as he put it. Instead he went to Hastings, Neb., joining his father and brother, Richard M., becoming general manager of the Hastings Tribune which the family had just purchased. They started KHAS Hastings in 1941 and Fred Seaton became president. He still holds the post, among other media responsibilities. When the Coffeyville (Kan.) Journal was acquired, KGGF became the second Seaton radio station. They started KMAN Manhattan in 1950 and just last Jan. 1 opened KHAS-TV in Hastings. Newspaper properties include journals in the three cities already mentioned plus Winfield, Kan.; Alliance, Neb.; Lead and Deadwood, S. D., and Sheridan, Wyo. The Seaton-published Western Farm Life has 170,000 circulation and there are weeklies in Deadwood and Manhattan.

The Seatons operate each property as a separate corporation, with their key executives owning up to 49% of stock purchased out of earnings plus any capital they contribute. They hold stock as long as they are connected with the firm. No stock is held by the public.

Secretary Seaton's quarter-century in radio has given him decided views on how a broadcast station should be operated. Because of his mechanical background he insists that each enterprise have the best possible physical equipment. As to programs: "If a station carries inadequate public service programming there's no excuse for its existence. Radio must have a heart and a conscience." And as to radio's future, "There's nothing dead about radio—only about some radio operators. It's future is unlimited."

Some phases of the secretary's White House activity since he joined the executive staff three years ago are hard to pin-point. Even before that time he had been credited with framing the strategy employed when Vice President Nixon became a controversial figure in the 1952 political campaign because of contributions.

Since that time he has been chief troubleshooter in many White House incidents, a role he will continue in the new post. It's known, too, that the President consulted him constantly, along with James C. Hagerty, news secretary, in developing radio-TV contacts with the nation. These include the recorded telecasting of all presidential news conferences.

The story of Secretary Seaton's entrance into political life started over a score of years ago with his involvement in a local paper. The firm was acquired, the newspaper the best possible physical equipment. As to programs: "If a station carries inadequate public service programming there's no excuse for its existence. Radio must have a heart and a conscience." And as to radio's future, "There's nothing dead about radio—only about some radio operators. It's future is unlimited."

WNEW

Enjoyable music... complete news and weather... 24 hours a day

1130 on your radio dial

One of a series of advertisements appearing in the NEW YORK DAILY NEWS and the JOURNAL-AMERICAN... to attract more and more listeners to the most popular radio station in the world's greatest market.

Represented by SIMMONS ASSOCIATES, INCORPORATED.
- In Eastern Iowa more people watch WMT-TV than any other station.

- The 25-county Area Pulse shows WMT-TV first in share of audience for 8 or 9 day parts measured, with 418 out of a possible 461 quarter-hour firsts.

- 13 of the top 15 once-a-week shows are on WMT-TV.

- 10 of the top 10 multi-weekly shows are on WMT-TV.

- Separate reports for 3 of Iowa's 6 largest markets show WMT-TV the overwhelming favorite in each.

- Dateline Iowa (early evening news) and the 10:30 Night News attract a greater average audience than any show, network or otherwise, on any other station in Eastern Iowa.

- The noon weather and market report is among the top 10 multi-weekly shows (with 69% of the audience).

- Marshall "J" (spur-and-bridle operator) attracts more small fry than any other children's program, including a mouse, programmed opposite, who comes in second.

- No other tv station whose mail address is Cedar Rapids has The Katz Agency as its national reps.
they're all ears...

SOUTHWEST and midwest radio-tv advertisers and broadcasters for nearly 30 years have been exposed to the creative and time-buying talents of Ray Stricker, vice president of Maxon Inc., Chicago. For such clients as Dodge, Dr. Pepper, Hotpoint Co. and Gillette Safety Razor Co., among others, the exposure has been a successful one.

Mr. Stricker joined Maxon March 1, after 18 years with Ruthrauff & Ryan in St. Louis and Chicago, first as an account executive and client relations specialist and later as a vice president.

Raymond C. Stricker originally planned an art career in St. Louis, where he was born Aug. 7, 1908. He attended Central High School and received private tutoring in art. While still in high school, he worked as a copy cub during the summers on the St. Louis Times. When only 16 he covered the old St. Louis Browns of the American League.

In 1927 he became advertising manager of the St. Louis Music Co., a mail order house for phonograph records, leaving there a year later to join the art department of D'Arcy Adv.

The following year (1929), young Stricker returned to the job of advertising manager, this time for the St. Louis zone of Buick Motor Co. (Vesper Buick distributor). A short time later he moved to Shaffer-Brennan Adv. Co. (now Shaffer-Brennan-Margulis), St. Louis. After another fling at art, he moved to account work, charged with bringing in new clients and writing and servicing their accounts.

He joined Ruthrauff & Ryan in St. Louis May 1, 1938, and, on the strength of his automotive background, was assigned to the Dodge account, buying time in Texas, Oklahoma and Missouri. He helped R&R open its Houston office in 1940 and its Dallas branch (with the acquisition of the Dr. Pepper account) in 1949. He was elected a vice president of the agency in September 1949 and transferred from St. Louis to the Chicago office three years later.

An "old timer" in the use of radio, Mr. Stricker has joined an agency that is tradition-
ally radio-tv minded and expects to bill approximately $30 million in all media during the current year. Radio will continue to prosper, he says, and predicts an "era of prosperity that will dwarf anything in the past."

Mr. Stricker married the former May V. Elchlag of St. Louis June 1, 1929, and they make their home in Wilmette, Ill. His love of art is apparent in one of his leisure-time pur-
suits, watercolor painting. Another favorite pastime is gardening.

CBS-TV TELLS INSIDE STORY OF TV NETWORK OPERATIONS

If they had the time and inclination, members of the Senate Commerce Committee last weekend could have learned a lot about the functions and fundamentals of television networking. In their possession was a 150-page primer prepared by CBS in anticipation of the testimony this week of Frank Stanton, CBS president.

Though it came from a partisan source and was frankly a defense of present network practices, the primer was a clear and comprehensive lesson in the complexities of network broadcasting. It explained, step-by-step, how a network functions, how advertisers use TV, how networks build and find the great volume of programming which they must present on regular, predictable schedules and why, in CBS's view, it would be fatal to the TV system to halter networking by more government regulation.

The primer was submitted in the form of a memorandum supplementing the testimony which Mr. Stanton will give tomorrow (June 12) as the first of three TV network presidents scheduled as witnesses this week in the Senate committee's investigation of network practices. Here B&T presents, in condensed text, excerpts of the CBS memorandum:

TODAY, over 34 million families in the United States have one or more television sets. They have invested $16.6 billion for the purchase and maintenance of these sets, and the latest figures show each family averages slightly over six hours a day watching television.

The universality of television in the United States is further evidenced by the fact that 99.2% of United States families live in areas which are within range of at least one television signal. More than seven out of ten United States families actually have television sets. Exclusive of educational stations, by March 1, 1956, there were 429 stations on the air, of which 393 were affiliated with a nationwide network.

Despite misconceptions to the contrary, in the vast majority of cases the American public has a considerable choice of service. A total of 9.4 out of every 10 television homes have a choice of two or more signals, while 8.7 out of every ten have a choice of three or more signals. The average television home has a choice of 5.1 different signals.

Thus the size of television today is established by the availability of television signals, by set ownership, by the choice of programs available to each viewer and by the amount of viewing. But there is another important measure of television today—the advertisers' evaluation of television in the concrete form of their dollar investment in television advertising. From a volume of $57.8 million in 1949, advertising on television grew to more than $1 billion in 1955, far outstripping the rate of growth of national advertising revenues for newspapers and magazines during that period.

There can be no serious question that the stimulus for television's growth and a basic, if not the basic, reason for its current size is network television.

The networks were active in the development of television long before most others now on the scene. By the end of 1930, both CBS and NBC had established television laboratories and had been licensed to operate experimental television stations. By the end of 1931, CBS was broadcasting on a regular schedule over its local station in New York. It was not until after the war, in 1946, however, that full scale broadcasting operations were possible.

But in the early postwar period there were few sets, numbering only in the tens of thousands. Because there were so few sets, there were few programs, since advertisers were unwilling to pay for programs which had such small potential audiences. Conversely, because there were so few programs, there was little incentive to purchase receivers. The industry was thus bound within a tight circle of economic frustration.

There was only one way to break out; to program far in excess of what was then justified by the number of sets, the potential viewers and advertiser interest. It was the television networks which, at enormous cost to themselves, broke the circle. They embarked on what was then an extremely uncertain and risky course. They provided the major entertainment programs and the broadcasts of popular sports events and important political events of national interest.

In priming the television network pump so as to lead to the flow that we know today, CBS, alone invested $53.1 million from 1934 through 1952, without a single year of network profit.

Today, through the networks and without paying any fee, the entire nation can see the Sadler's Wells Ballet, the World Series, "Peter Pan," "The Caine Mutiny Court-Martial," a debate between Leonard Hall and Paul Butler, a discussion of the Federal Constitution by Joseph Welch and an infinite variety of the best that the entertainment world has to offer. Never before have such opportunities for education and amusement been made so universally available, and on such a scale, to the people of any nation.

It should be emphasized that the only source of nationwide live programming is the networks. Only by live network programming can events of national interest be seen throughout the country as they happen. The entertainment and informative qualities of some film programs cannot be denied; indeed some programs require film and are better because of it. But good as film programs are, it is the live quality, the sense of seeing the actual event or performance taking place before the eyes of the viewer as he sits in his living room, that is the real magic of television. To remit television largely to film is to confine its ex-

June 11, 1956 • Page 27
Of Evolution and citement, and even more important, it is to destroy the only effective means of nationwide visual communication to the entire country for national emergency purposes.

Evolution and Economics Of One Network Show

U NLIKE tangible manufactured products for mass consumption, the product which a network offers—entertainment—is not fungible. Each program differs to a greater or lesser degree from the other; each has its own history, presents its own problems and has different requirements in terms of conception, production and costs. For purposes of this memorandum the full-hour drama entitled Climax!, broadcast on Thursdays from 8:30 to 9:30 p.m. (EST) and sponsored by the Chrysler Corp., has been chosen as illustrative of some of the functions of a network and some of its basic internal economics.

Climax! currently is broadcast over 164 CBS Television affiliates, of which 139 are in the United States and 25 are in Canada. The broadcast of March 1, 1956, was watched by more than 26,000,000 people in the United States. That is approximately 45.9% of all the people watching television at the time the program was broadcast. These figures are typical of the audience sizes which have been attained by Climax! this season.

In the fall of 1953 and spring of 1954, the hour went on at 9:30 p.m. (EST) on Thursdays and was occupied on the CBS Television Network by two half-hour sponsored programs. Those two programs were broadcast weekly on a line-up which averaged 80 stations and had an estimated total of 164,000 S. E. L. viewers, or 29.3% of the total audience watching television at that hour. Thus neither the public nor CBS Television affiliates were fully satisfied with the 8:30 to 9:30 p.m. time slot, which left less than half the number of affiliates supplied with the programs and less than half as many viewers tuning to CBS Television in 1954 as are currently tuning to it. As a result the network revised its schedule and one of the sponsors had issued a notice of cancellation.

Although the situation had crystallized in this fashion by the spring of 1954, actual detailed planning of the new program had begun late in 1953. The network had felt that a half-hour time period, then commonly utilized for mystery dramas and melodramas, was insufficient for development of this type of program and hence after discussion, it was decided to adopt concept of an hour program. In March 1954, although there was not yet a definite determination of what time period the program might ultimately fill, the actual preparation of Climax! began. Involved in the preparation were the research department, the program development department and the production department, each of which would eventually be to be broadcast in the fall of 1954.

By April 1954, 13 stories, representing an investment in excess of $40,000, had been acquired. By July 1954, seven or eight of these stories had been reduced to the form of a first draft—position which cost an additional $15,000.

The program was sold to the Chrysler Corp. late in May 1954. The sale was possible only because the months of preparation had sufficiently crystallized its ultimate form to permit concrete presentation.

From May until the fall of 1954, the creative work was accelerated and the station relations and sales service departments were active in informing CBS Television affiliates of the program and arranging for time clearance.

On Oct. 7, 1954, the first program of the Climax! series was broadcast on the CBS Television Network. In order to maximize all the planning, preparation and financial investment, the program, as it was actually broadcast, did not meet the network's expectations. Accordingly, almost immediately after the first weekly broadcast, the creative team which had been assigned to the program by CBS Television was reorganized and supplemented. The program department continued to work on the program, sharpening its concept, and changing its production team and developing it to the successful stage which it has since attained.1

The foregoing brief history of the inception and ultimate evolution of Climax! is representative of the effort and expense involved in program development. Some programs, even after investments in time and energy like those devoted to Climax!, never do evolve satisfactorily and are abandoned even before the first broadcast. Some are carried to the stage of pilot films, or to the point where several actual filmed programs of a series are produced, yet because they do not satisfy the network's standards, or do not sell, are abandoned. In some cases the planning and preparation have taken a far longer period—sometimes as much as two years between initial conception and ultimate first broadcast.

This is preparation—even to the purchase of stories—goes forward without any certainty as to the time period the program might fill, or whether, indeed, any time at all will be available.

In addition, during the first four months the program was on the air, the weekly audience of less than 28,000,000 viewers, or over $115,000 on special newspaper advertising to promote the program.

Committee Sets Prelims For Network Hearings

PRELIMINARY witnesses who will lead off with testimony today (Monday) before the Senate Commerce Committee—with the main events scheduled to begin tomorrow when the first of the television executives goes on the stand—were announced last week by the committee staff.

The two witnesses, scheduled to appear at 3 p.m. today before the Senate group, are Everett C. Peterson, executive director of the National Broadcasting Co., and Bertram D. Lewis, executive director of the National Association of Broadcasters. These figures underscore the special character of network programming activities: the process of reorganization and evolution that begins after the first broadcast and in response to the actual experience gained from it. Since Climax! was a live program, and since it had been conceived and planned and produced by the network's own personnel, the preparatory work was to take prompt action to remedy the initial defects which became apparent after its early broadcasts. Because it was a network produced program, all the skills and program and production resources of the network could be brought to bear promptly and directly to continue the process of shaping and evolving it. And, as noted, it was by this process that Climax! was ultimately brought to a successful state.

Necessarily involved in any television programming are the advertiser dollars which must support it. The average gross weekly charges to the advertiser for Climax! during January, February and March, 1956 totalled $157,007. This gross charge is composed of two elements: program charges of $43,287 and time charges of $93,720. These charges are applicable in the case of all programs—regardless of their source—broadcast by the network. They are the aggregate of the hourly rates, as published in the CBS Television Network rate card, of each of the 164 CBS Television stations which are used by the Chrysler Corp.

Program charges, however, are applicable only where the program is one created and produced or sold by the CBS Television Network. Where the program is produced and sold by outside producers, the program charge is made by the outside producer.

As noted, the Chrysler Corp. is charged $43,287 weekly for the production of Climax! Fifteen per cent of this amount, or $6,493, is paid by the network, in behalf of Chrysler, to the network's advertising agency as the customary agency commission. In addition to this deduction of $6,493, there remains to the CBS Television Network $36,794 to apply against the costs which the network incurs for the program. Those costs fall into two general categories: (1) the costs of creating and producing a series, known as "above-the-line costs," and (2) program production and (studio and technical) facilities costs, known as "below-the-line costs."

The direct above-the-line creative costs for Climax! average $26,065 weekly which is paid out in the form of salaries to 59 people who may be categorized as creative talent. Those 59 people, who prepare, rehearse and present the program, devote many hours each week, to each week's program, which may be broken down as follows:

This will be seen that, each week, a total of 322 people, devoting more than 4,539 man-hours, work directly in the creation of each Climax! program.

It will be noted from the foregoing that although the Chrysler Corp. pays $43,287 per week for program charges for Climax! the actual cost to CBS will be greater because of a $2,100 charge which it pays directly for the program total $52,309—$7,872 in excess of the amount paid by the sponsor.

It is in this sense that Climax! is not typical; the amount by which the program costs exceed program payments by the sponsor are abnormally large. CBS Television does attempt to attain full reimbursement for its program expenses. But some loss to CBS Television in production is unusual; the loss is the price the public pays in order to develop and maintain a strong over-all program schedule for the public, for the affiliates and for the advertisers.

In 1955, the loss for commercially sponsored programs alone was in excess of $7.1 million without any allocation of general overhead such as selling and administrative expense. In addition, CBS Television spent over $10.5 million for sustaining entertainment and public affairs programs for which it received no revenues. It is estimated by CBS accountants that an additional $4.5 million in overhead expenses is attributable to program production. In total, program payments and the loss of the sale of commercial programs cost more than $22 million in 1955.

The gross time charges, comprising the total of the hourly rates of the CBS Television affiliates carrying Climax! has been shown to be $93,720 each week. In order, however, to encourage (1) the advertiser's use of the maximum number of stations and (2) the flexibility and continuity in the use of the gross time charges by making it more economic for advertisers to support major programming throughout the year, the CBS Television Network provides for discounts designed for those purposes. In the case of Climax! these discounts total $23,175. Thus, net time charges to Chrysler are reduced to $70,545.

From this latter amount, in turn, the advertising agency commission of 13% is deducted—totaling, in the case of Climax! $10,582—the customary commission which is paid by the network to Chrysler's advertising agency.

After deducting the discounts and the 13% agency commission, there remains to the CBS Television Network $59,963 as revenue accruing from the time charges for the 164 stations over which Climax! is broadcast. But the network incurs another major category of expenses directly attributable to the program—the costs of physically bringing the program to each of the affiliates which carry it. These costs of distribution include a share of the network's payments to AT&T, estimated to be $6,036, which represents the approximate cost for use of AT&T transmission lines allocated to the program. The network also pays approximately $1,259 each week for television recording (CRT's) for stations which wish to carry the program on a delayed basis or which are not interconnected by regular AT&T facilities. Thus, the total gross time charges of $93,720 for Climax!, there remain after these several deductions and expenditures $52,648. This $52,648 amount is further substantially reduced by the network payment to the affiliates for the station broadcast hours which they devote to Climax! The network's payments to those stations each week total $26,185.

It is of first importance to note that the affiliation contracts normally provide for payment to the stations of a percentage of the gross time charges to the advertiser. As has been shown, this gross amount is not in fact received by the network; rather it is reduced by several direct major deductions and expenditures totaling $41,072 or about 43.8% of the amount of $93,720. Of the $26,185 paid by the network to the stations for their broadcast time for Climax!, is almost equal to the $26,463 which is retained by the CBS Television Network after all the deductions, payments and charges which have been described. Before taking into account the $8,722 deficit incurred by the network in the production of the program.
gram, there is an almost exact equality in the amounts shared between network and stations. For the $26,185 which is paid by the network to the CBS Television affiliates for their broadcast of Climax, the station provides the use of its transmitter and the most valuable commodity on which the station has to offer—its time. In providing its transmitter and time, the station must, of course, attribute to that hour a proportionate share of its investment and of the costs of its over-all operations. So CBS is produced for the station, sold to the advertiser by the network, carried to the station by AT&T or by television recordings prepared and paid for by station, and the actual out-of-pocket expenses of the station attributable to its programming are normally minimal. And, in turn, the personnel of the station are thus freed to create local programming, to sell the station's own products (produced non-network programs to national spot and local advertisers and to do all the things necessary for successful local operation. As a result of the network program, the stations benefit triply: (i) the share of the revenues, (ii) the saving in costs which would be incurred if the station were required to program that period itself, and (iii) the increased circulation which enables the station to charge substantial rates and to attract national spot and local advertising revenues directly to it.

As has been shown, the net residue to the CBS Television Network accrues from the gross charges of $137,007 to Chyrsler for the 8:30 to 9:30 p.m. (EDT) period on Thursdays, is only $17,741. This residue varies from program to program and in a number of cases is not subject to so large a reduction for loss in respect of direct program changes. Nevertheless, except for the program deficit, this amount of residue and its relationship to the gross charges approximates the magnitude of net revenues to the network for nighttime hours. It is out of this (and similar) net residue that the CBS Television Network must pay for the network staff and facilities, and for all the functions and services which it must render. Out of this residue, the network must maintain its organization and its over-all programming schedule, including all its sustained and public service programs.

The network organization is large and complex. It must be maintained in order to provide the highest quality programs possible, integrated into a balanced over-all weekly schedule of entertainment and information. Such a schedule requires an organization of the best creative personnel obtainable—executive and talent, writers and performers. Also there are enormous risks which must be taken through entering into the long term contracts and expensive commitments necessary to attract creative skills.

Not all risks crystallize in success, as they did in the case of Climax. Some of the programs which have hundreds of thousands of dollars invested have been abandoned; programs in which the network has made large investments in energy and dollars sometimes have failed to get on the air.

Inherent in the complexity of the network business is the phenomenon of the delicate balance and the violent swing.

Unlike most businesses, a decline in network broadcasting is not followed by a liable on the company's overhead. If a shoe factory's sales are reduced, the factory can reduce production and thus reduce costs. Its chief loss, when sales are reduced, is loss of revenue, which is normally offset in some substantial degree by reduced operating costs.

When a network loses time sales, it not only loses the revenues; in addition, its costs are vastly increased as it continues its network service. Its program service to its affiliates cannot, in general, expand and contract in direct proportion to advertisers' time purchases but must continue at the same pace regardless of whether time and program revenues are forthcoming.

Hence the network, when it loses a time sale, not only loses the revenue but incurs the costs involved in broadcasting the unsold program which must take its place.

Thus it is that failure to sell one hour between 7:30 and 10:30 p.m. each night for a year (whether because of refusal of stations to clear time or for any other reason) would result in an enormous swing in a network's profit and loss figures. The net revenues (net time charges less station payments) that would be lost from the failure to sell one nighttime hour each broadcasting day throughout 1955 would have been $13 million. In addition, the expenses to provide sustaining programs of comparable quality for the period would have been increased by some $13 million to $15 million. The possible swing, therefore, for one Class A hour each day for one year is in excess of $26 million.

Despite the risks and the complexity of the business and despite the inherent hazards, television networking has, in general, been profitable. According to public FCC figures for the year 1954 (the latest figures available), the profit before taxes of the four then existing networks as a percentage of broadcast revenue was 2.3 per cent.1 These profit percentages for the networks are in sharp contrast to those for stations. The 377 independently owned stations included in the FCC figures show a profit, before taxes, of 18.6% of sales.

Still further confirmation of the relative profits of stations and networks is drawn from data concerning the 1954 revenues and income of two station operators not engaged in networking. The operators are Storer Broadcasting Co., a revenue of CBS revenues and Gross Telecasting Inc., a licensee of one television and one radio station, at Lansing, Mich. These data are:

<table>

</table>

It is estimated by CBS that in 1954 the total net profits of the seven largest CBS Television affiliates (exclusive of the stations owned by CBS) exceeded the net profit of the CBS Television Network. In 1955, when the CBS Television Network profits were greater, it is estimated that nevertheless the total net profits of between 12 to 14 of its largest affiliates exceeded the total net profits of the network.

The several charges which have been leveled at the networks and the several proposals which have been advanced will be examined seriatim.

A. The Charge That the Networks Receive a Disproportionate Amount of Television Network Revenues. The facts concerning the economics of networking and the disproportionate share of revenues between stations and the network readily establish that networks do not receive a disproportionate amount of television revenues. In fact, as has been shown, the station profits in terms of percentage of network and broadcasting revenues (i.e., sales) far exceed network profits in percentage of return, despite the sharply contrasting functions of networks and stations and the relative risks which each takes. In order for a network to perform its functions at all, it must maintain a large organization and extensive facilities. Necessarily, therefore, the very nature of a network's functions is such that its revenues are large; but for the same reason, its expenses are also proportionately large.

In the circumstances, a comparison of the total revenues of the stations and the total revenues of the network would appear to be wholly irrelevant. If the liability of one at all, it must take into account the contrasting functions; and the basis of comparison must be the relative percentage of profits in their relation to revenues. On that basis, there is clearly no disproportion in favor of the network.

B. The Charge That Networks Insist on the Use of Network Produced Programs. The charge that the CBS Television Network discourages, or discriminates against, independent network produced programs by making valuable time periods available only to network produced programs is mistaken. CBS Television follows no such policy; there is no such discouragement or discrimination.

No evidence of a program tie-in has been adduced before this Committee and none can be for there is none. Indeed, the facts refute the charge: during the week ending April 7, 1956,

FRANK STANTON, CBS president, will submit more documents to Senate Commerce Committee this week. Among them will be detailed answers to Sen. Bricker's "Network Monopoly Report" and to anti-network testimony of Richard A. Moore, KTTV (TV) Los Angeles.

Page 30 • June 11, 1956

1Although AT&T costs are normally assumed by the network, there are cases in which stations assume a cost. 

2In 1955, CBS Television spent a total of one million dollars on the development of programs and program ideas which never saw the light of day.
724 hours of sponsored programs were broadcast by the CBS Television Network. A total of 45,020, 50.2%, were produced by programs created and produced entirely by 38 outside producers with whom CBS Television has no direct connection, and an addition 1959, 49.6%, were produced by programs produced by eight companies or individuals in association with CBS Television. That total of 724 hours was comprised of 74 different programs or program series, only 17 of which were produced by the network itself. Of the remaining 57 programs or program series, 47 were wholly produced by outside producers and ten were produced by outside producers in association with CBS Television.

Not only do the facts show that CBS Television does not insist on advertisers using CBS Television produced programs in order to buy time on the network, but the charge becomes frivolous when one considers that CBS Television lost $7.1 million on commercially sponsored programs alone in 1955, with any allocation of general overhead expenses. It can be easily understood that incurring such a loss is not the voluntary choice of a dominating businessman engaged in restrictive practices. Rather it is the natural result of trying to serve the public, the affiliates and the advertisers in the best manner possible even though such a result eats heavily into overall profits.

In the final analysis, it would seem that the charge that the CBS Television Network insists on using its own programs by making prime time available only if the advertiser uses a CBS Television produced program is in reality an attack designed to prevent networks from engaging in all at creating and producing programs.

If a network is to fulfill its responsibility to its affiliates and to the public, it must, however, engage in program production. Only in this way can the network produce programs of day-in, day-out, and week-in, week-out high quality programs.

Indeed, those basic facts have long since been emphasized by the FCC itself which, in "Public Service Responsibility of Broadcast Licensees" March 1946, p. 13, criticized networks for not engaging in program creation and production and hence failing to exercise their programming responsibilities.

2. THE CHARGE THAT THE NETWORKS HAVE A MONopoly

The charge that the networks, or CBS and NBC, constitute monopolies is reekless and insubstantial.

The facts establish that no monopoly exists in the broadcasting industry. Wherever it has been shown, many other national advertising media are in competition with network television. Network television has only a 9.8% share of the national advertising dollar. The CBS Tele-

vision Division—the Network and the four CBS-owned stations—receive only 3.2% of the na-
tional advertising dollar and about 29% of the television advertising dollar.

Indeed, the entire history of the growth of networks has been one of vigorous advertising competition. Ad-

vertisements in network television is wholly inco-
sistent with the normal indicia of monopoly—

i.e., a smaller and smaller share to those behind

the leader. In the television networks field, per-
haps the outstanding phenomenon of the past

years has been the growth of ABC. Like CBS and

NBC, ABC started in scratch in 1948, but it soon fell behind because of lack of capital to

sustained programs and programs in facilities, program and talent commitments since 1953 and its billings rose from $21 million in 1953 to $34 million in 1954 and to $51 million in 1955, while according to trade reports its current billings for 1956 are at the rate of $76 million a year.

It is true that the very nature of the network business, with its requirements of enormous effort and investment, makes the establishment of new networks difficult. But it is not impossible.

Under FCC regulations, no station is, or may be, closed to other networks even where the station may be a primary affiliate which grants option time to the network with which it is affiliated. The FCC regulations provide that option time is not effective against programs of competing networks and all three networks.

WHAT CBS-TV CONSISTS OF

Here's a summary of the description of the structure of the television network given in the CBS memorandum submitted to the Senate last week:

People

As of March 1, CBS-TV employed 2,412 people full-time and a total of 5,493, including per diem personnel, talent and supporting corporate personnel. Weekly cost of maintaining this organization and staff amounts to $700,000.

Plant

The network has 29 broadcast studios (22 in New York, five in Hollywood and two in Chicago) containing 146 live cameras and 35 film cameras with associated control equipment, 792 microphones, 1,403 video amplifiers, 896 picture monitors, 68 film processing units, and all telcon, master control rooms among other things. CBS has invested nearly $28 million in program production facilities, is now considering new investments of up to $25 million for more plant facilities "over the next few years."

Affiliates

As of March 1, CBS-TV had 151 primary affiliates, 38 secondary affiliates, 26 Extended Market Plan affiliates and per-program agreements with 52 other stations—a total of 267.

Interconnection Facilities

CBS-TV is paying AT&T $13.5 million a year for interconnection.

WHAT CBS-TV PRODUCES

During 1956 the network will broadcast 1,508 hours of its own programming and 1,053 hours of shows produced in association with outside sources—a total of 2,561 hours. These figures do not take into account programs broadcast by the network but produced by others.

Total production of U. S. feature film released in 1955 represented 427 hours of running time. Hence in 1956 CBS-TV's own production will be more than three times that of movies last year and the total broadcasting on the network six times the movie volume.

have programs which are carried by primary affiliates of the other.

The touchstone is strong programming. For example, ABC's "Dynasty" has crossed net-

work affiliation lines; even when the program is first broadcast, 60 CBS Television affiliates, including ten primary affiliates, carried the program. On February 11, 1956, CBS Tele-

vision affiliates carried "Dineland," including 65 CBS Television primary affiliates.

An additional network, therefore, is not restricted to new stations which are unable to obtain a primary affiliation with one of the existing networks. If a new network's pro-

gramming is strong, it will have a market even among stations primarily affiliated with another network, and if its over-all programming schedule should prove to be consistently better than the programming of the existing networks, there is no question but that stations would readily change their affiliation in order to obtain the best schedule.

D. THE CHARGE THAT NETWORKS CHANNEL A disproportionately share of television rev-

enues into stations in large markets andignore stations in small markets. Related to the charge of monopoly is the charge that networks tend to channel a disproportionately share of television revenues to stations in larger markets and to ignore small markets. That charge is inaccurate; the facts, indeed, are to the contrary, for networks are of particular importance and assistance to the stations in the smaller markets.

There are strong natural economic forces working to the advantage of stations in the larger markets, since their rates are higher, but their cost per thousand lower than those of stations in smaller markets. It is networks, in fact, that need to correct the normal dis-

proportionate flow of revenues to large markets and to divert a share, which would otherwise not be available, to stations in smaller markets. Standing alone, because of their rela-

Broadcasting • Teletacing 1957 • Page 31

Yes, there were 13 sustaining programs and 180 other programs, including 52 half-hour and more and 91 half-hour shows. Of those sustaining programs, CBS Television pro-

duced 13 sustaining programs and 526 network hours, the sustaining programs produced by CBS Television alone, 11 were news and public affairs programs which under CBS Television policy, must be produced under its supervision and control.
trends on behalf of small stations. The Extended Market Plan and the Extended Program Service Plan were explicitly designed for those purposes.

The CBS Television Network discount structure also provides positive stimulus encouraging advertisers to order small market stations. Its discounts depend on the number of stations ordered and the dilution of discount benefit as the number of stations ordered increases. This means that when an advertiser orders a large number of stations (including small market stations) he receives a larger discount on more expensive, large market stations than he would if he did not order the small market stations.

As a general rule, a national advertiser, even though he may have nationwide distribution, purchases fewer stations on a national spot basis than he does on a network basis. A vivid example is provided by Philip Morris, which sponsored I Love Lucy on the CBS Television Network in 1954. It may have to refuse any network program offered which the station "reasonably believes to be unsatisfactory or unsaleable" or, even though the program has been contracted for by the station, which the station "believes is contrary to the public interest." Those provisions have been construed by CBS Television to permit wide discretion to the station to reject network programs. It may contract for a program (and thus believe it will not sell) to the local audience as fully as a non-network program which the station proposes to broadcast.

The precise limits of the respective rights of the CBS Television Network and its affiliates under these provisions of the option time clauses have never been fully delineated, because in practice there has been no necessity for it. Rather, acceptance by stations of network programs has been based on the cooperation which is inherent in the basic partnership relations which exist between the network and its affiliates. There has been no rigid invocation of its option rights by the network, and affiliates’ schedules are studded with non-network programs in option time.

While option time is thus in fact administered by the network on some equivalent tool is the keystone of network operations. Without such a tool, networks cannot operate. Without some reasonable assurance of general clearance by stations, the effectiveness of the over-all, day-in, day-out, week-in and week-out network schedule would be eroded. It would take the defection of only a few key stations in major markets to deprive a network television advertiser of so substantial a part of his circulation that the program would be fatally weakened and thus would be lost not only to the network but, far more important, to the vast majority of stations which need and want the program. It is the public, the then, and the stations in the smaller markets which would suffer most acutely, if any major pattern of non-clearance developed.

It is wholly possible that an entire schedule could be voided by a pattern of non-clearance that would checkerboard across the schedule. It is hardly likely that key stations would pick the same programs and the same time periods for non-clearance. What would be more likely is that key stations would, by refusing to clear during one half-hour, another group of key stations might pick another half-hour and another still a different half-hour. If the stations were large markets, each network time period would then become unsaleable to national advertisers. Obviously, no network could afford to program, with a quality schedule, so many time periods on a sustaining basis. Option time, in sum, is a necessary device based on, and arising out of, the very nature of networking and network advertising. Its benefits to networking are not offset by detriment to other segments of the industry. Non-network time, it seems, is a necessary evil and must be endured if the network is to grow.

There is more than ample opportunity on stations and on networks for exposure of the product of these non-network sources, and indeed, they enjoy a wider exposure. And option time has had no contracting effect on network television advertising. On the contrary, the record is clear that such advertising has grown rapidly, and in recent years, at a higher rate than network advertising.

F. THE PROPOSAL TO ELIMINATE "MUST-BUYS." CBS Television, in accordance with a long standing practice in the broadcasting industry which has never before been seriously challenged, has a license of 195, comprising a network of 52 affiliates which it designates as "basic required" stations. Those stations cover substantially all the major markets in the United States and 81.8% of American television homes. With a few exceptions arising out of special circumstances and the special needs of network advertisers, the effect of the basic required list is to require advertisers who wish to use the networks to pay the minimum to clear during it.

It is interesting to note that the advertisers—the only group to whom the basic required practice directly applies—have never raised a question of the propriety of this restriction. The answer is simple. Those who need nationwide coverage use network advertising, and their normal wants include coverage in all the major markets represented by the basic required stations. Those who need something less than nationwide coverage turn naturally to spot advertising, or share the network facilities on a regional basis with other advertisers. Once a network has determined the characteristics and dimensions of its basic product (the basic required group) and geared its operations to satisfying the demand for that product, there are compelling economic reasons for prohibiting fragmentation of the product. The network, as a whole, makes commitments for AT&T interconnection service among its affiliates, on a minimum basis of eight hours per day. The cost of maintaining the interconnection service simply could not be supported by orders for only a few network stations. If an advertiser were to place an order, for example, limited to New York, Chicago and Los Angeles, the costs for interconnection facilities alone, would be immensely excessive. There must be stations along the line to provide sufficient revenues to defray the cost.

The other extensive network services that are described in this memorandum also require the broad financial sale of sales of the combined time of the major network affiliates. Those services cannot be supported by sales of only a small fraction of a network.

In summary, the policy of the basic required group is no more than a conformance to the normal demand of national network advertisers, and it is no different from any other minimum order policy which a distributor adopts when the nature of his product, the requirements of his customers and the economics of distribution justify it.

The proposal to prohibit network owning stations from purchasing network programs is wholly possible, but the adverse effect on the revenues of the major networks is likely to be fatal to those networks. The proposal is less economic for networks that have been based on the provision of national service assurance of substantial exposure for such programs. The networks have been based on a long-standing practice that serves the public interest, and because of this phenomenon of the violent swing, station ownership provides an essential bulwark supporting network operations. It has been suggested that the force of the economic justification for network ownership of stations is finally weakened by the success of CBS Television in the face of the fact that, unlike NBC and ABC, it has not owned its full quota of stations. But this is hardly assurance for the future; on the contrary, past history indicates that it is a weak reed upon which to rely. For the past few years hardly represent a typical period in the life cycle of television. It has been a period of explosive growth and of high stress on station operations. It is a period of normal conditions, nor a period of any degree of recession. Hence none of the stresses against which station ownership is such powerful insurance have in fact obtained. And, in any event, as the table below will indicate, most owned television stations have contributed a significant portion of CBS Television profits.
the map tells the story

WMAR-TV's coverage area encompasses more than 2,500,000 homes which means vast selling power for advertisers.

The WMAR-TV story means a lot of wonderful things to a lot of people. To the viewer it means the top comedy, dramatic, and variety shows such as: I Love Lucy, The Jack Benny Show, Studio One, Climax, The Ed Sullivan Show, and Arthur Godfrey and his Friends.

To WMAR-TV's advertisers, it means Baltimore's largest audience. We list the Nielsen report figures for April, 1956, showing total station shares based on quarter-hour homes reached by Baltimore stations in one week between 6 A.M. and midnight.

Off-the-map coverage . . . WMAR-TV's signal extends clear off the map, reaching out to the rich market surrounding Baltimore. It may be "fringe" to the TV engineer, but it is increased potential for WMAR-TV advertisers. That additional audience, which includes most of Maryland's rich countryside, has a buying potential on a par with the per household potential in Baltimore.

Important services . . . WMAR-TV services bring your product to meet the buyer through intense coverage of a quality market, continuing leadership of Baltimore's top-rated local and national programs, vigorous merchandising and promotion, and vast technical facilities . . . studio, film (including color film) and remote.

In Maryland, most people watch WMAR-TV

CHANNEL 2  SUNPAPERS  TELEVISION  BALTIMORE, MARYLAND

Telephone MULberry 5-5670 * TELEVISION AFFILIATE OF THE COLUMBIA BROADCASTING SYSTEM
Represented by THE KATZ AGENCY, Inc. New York, Detroit, Kansas City, San Francisco, Chicago, Atlanta, Dallas, Los Angeles
Greatest food merchandiser in America!

Baltimore supermarkets and corner groceries . . . Baltimore chains and independents . . . W-I-T-H delivers them all to you with the most powerful assortment of food promotions ever created by a radio station. Here's the "merchandising muscle" W-I-T-H will give your grocery product over a 13-week period.

- W-I-T-H Feature Foods Merchandising Service. You get all this:
  1. A minimum of 60 store calls in high volume groceries, including point-of-purchase merchandising such as increasing shelf exposure, restocking shelves and installing displays for your product.
  2. A minimum of 20 special one-week displays.
  3. 20 days of Bargain Bar promotions in chains and supermarkets, plus additional merchandising by demonstration, sampling, couponing, etc.
  4. Complete merchandising reports issued to you twice each 13 weeks.

- W-I-T-H Chain Store Food Plan, providing for dump, end-of-aisle and shelf extender displays in leading chain stores.

- PLUS merchandising letters . . . PLUS trade paper advertising of your product . . . PLUS potent advertising material for your own salesmen's kits . . . PLUS personal supervision by head of W-I-T-H Merchandising Dept.

Add W-I-T-H's low, low rates and W-I-T-H's complete coverage of Baltimore's 15-mile radius . . . and you've got the station that delivers the groceries!

Tom Tinsley
President
R. C. Embry
Vice Pres.

ARL’s year-long project concludes that method is ‘shade’ higher than telephone coincidental technique. ‘Important’ differences between television tune-in and viewership cited.

The diary method of measuring program audiences, often accused of under-rating TV viewership, actually produces ratings that are “virtually identical” to—but a “shade” higher than—the telephone coincidental technique, American Research Bureau maintained last week on the basis of a year-long study.

ARB Director James Seiler also reported that the study established “important” differences between television tune-in and actual viewership. He said that although A. C. Nielsen Co. has maintained such differences would not exceed .09%, the ARB study demonstrates that “tune-in” may over-state the size of the viewing audience by 5 to 100% in almost 41% of the programs. A sub-committee of the Advertising Research Foundation, which has been working on standards for audience measurements for some years, also is on record as favoring the use of “tune-in” rather than actual viewing as the standard for measurement [B & T, Dec. 27, 1954].

The ARB study released last week details of which have been turned over to ARF, Mr. Seiler said—was designed to answer two questions which in ARB’s opinion embody “practically every criticism” of the diary technique: (1) How do we know that the viewing habits of families refusing to keep the diary record aren’t different from those who do cooperate? (2) How do we know that the cooperating families keep a completely accurate record?

Proof of Method’s Validity

Mr. Seiler said the project was an “urgently needed” validation study of the diary method. More time is bought and sold in the nation’s tv market on the basis of figures produced by diaries than by any other method, he asserted. Under questioning, he said ARB probably would not have considered the study necessary if the ARF committees working on rating standards had acceded to requests that they conduct field tests themselves.

Mechanics of the ARB study were described as follows: From 1953 through April 1956 ARB conducted telephone coincidental cross-checks in eight major cities while ARB’s regular supervised-diary surveys were under way. Samples for both techniques were selected in the same way, from the same telephone directories (diaries were limited to telephone homes). The telephone coincidental survey included approximately 300 calls per half-hour per city in the 8 to 8:30 p.m. period covered. The tabulated diary sample also was about 300 half-hour per city. The eight cities were New York, Washington, Cincinnati, St. Louis, San Francisco, Los Angeles, Atlanta, and Chicago.

The test coincidental survey employed a modification designed to develop coincidental ratings for both “sets turned on” and “viewed sets.” Because of the “differences” between these two, the report said, ARB used the “viewed sets” figure in making comparisons with the diary figure.

On this basis the diary and coincidental method were shown to produce figures “virtually identical, with the diary slightly higher” (the difference was attributed to the fact that the diary measures total audience while the coincidental measures average audience). In

In 67.5% of all cases (739 pairs), the report continued, the difference between the diary and coincidental rating was less than 1.5 points, and in 83.8% of all cases it was less than 2.5.

By program type, average ratings as determined by the two methods were shown as follows:

<td>30.0</td>
</tr>
</tbody>
</table>

“The extremely close agreement between the two techniques,” Mr. Seiler said, supplies ample evidence that unadjusted television audience ratings obtained from diary homes do not differ appreciably from those obtained by the coincidental method. The complete findings emphasize that a properly engineered, interview-supervised diary correctly reflects viewing levels and program popularity with accuracy more than sufficient for day-to-day television decisions.”

He said the findings had been shown to several large advertisers and their agencies, and that their reactions “exceeded our fondest hopes.”

On the subject of differences between “sets turned on” and “viewed sets,” the report said the variations are “not constant nor significant. . . . When these differences are measured for individual programs, some cases show that over half of a program’s ‘sets turned on’ do not have anyone aware of what is being telecast.”

The following table, based on results of the coincidental sampling, was offered to show “the percentage of overstatement encountered from 8 a.m. to 8 p.m., Monday-Friday when ‘sets tuned’ is the standard rather than ‘sets actually viewed’”:

Anahist Denies Favoritism

In United Cigar-Whelan Ads

ANAHIST Co. (Anahist, Hlst-O-Plus), Yonkers, N. Y., last week denied Federal Trade Commission allegations that it discriminated against certain of its customers by paying United Cigar-Whelan Sales Corp. for participations on the latter’s tv shows. Anahist said the spot commercials it purchases on the drug chain’s shows are the same as all the other tv advertising it does and in no way violates any laws.

The FTC issued complaints last March [B & T, March 12] against Anahist, three other suppliers and the drug chain. The suppliers were charged with giving special allowances to United-Whelan in exchange for high participations on the latter’s tv shows while not making the same allowances available to other customers. United-Whelan was charged with accepting same with the knowledge that its competitors were not given the same opportunity.

Help Thy Neighbor

THE RELATIONS of two Los Angeles advertising agencies are very cordial, so friendly in fact that June 1, they began using the same production, traffic, art and research facilities. This came about when the McNeill & McCleery agency moved into offices adjacent to those occupied by The McCarty Co., at 3576 Wilshire Blvd. According to T. T. McCarty and Kenneth McNeill, presidents of the two agencies, the arrangement will be duplicated in San Francisco. Both presidents emphasized that “each organization will preserve its identity and individuality in every way.”

Merger of McCarty, Goebel Co. Announced

MERGER of McCarty Co. with Goebel Co., Phoenix, under the new name of the McCarty Co. Advertising of Arizona Inc., was announced last week by T. T. McCarty, president of the Phoenix firm, and Richard E. Goebel, president of the Phoenix firm. The Phoenix office becomes the seventh for McCarty, which already functions in Los Angeles, San Francisco, Seattle, Chicago, New York, and Dallas.

Local management and operation of the Phoenix agency will remain unchanged with Mr. Goebel as president and general manager; Richard R. Fanster, vice president in charge of creative work; Donald A. Elliott, vice president in charge of media, production and client services, and attorney Clarence J. Duncan as secretary-president of McCarty Co., becomes chairman of the board of the new Phoenix agency. New and enlarged office facilities are located in the Phoenix National Bank Bldg.

Six Advertisers Signed For Fall Como Program

COMPLETE sponsorship of the Ferry Como Show (NBC-TV, Sat., 8-9 p.m. EDT) has been set for the 1956-57 season, it was announced last week by George W. Frey, president in charge of sales for NBC-TV. Six advertisers will sponsor one-third of each program on an alternating basis, starting Sept. 15.

The six current advertisers who are renewing include the Gold Seal Co., Chicago, through North Adv., Chicago; International Cellucotton Products (Kleenex), Chicago, through Fotte, Cone & Belding, Chicago; Tonic Co., Chicago, through North, and the Noxema Chemical Co., Baltimore, through Sullivan, Stauffer, Colwell & Bayles, New York. New advertisers are S&H Green Stamps, New York, through "S&H" and the Sunbeam Corp., Chicago, through Perrin-Paus Co., Chicago.

Citrus Commission Earmarks $3.2 Million for Ad Budget

BENTON & BOWLES Inc., which a year ago was awarded the Florida Citrus Commission account, last week received approval "in principle" by the commission of a $3,000,000 budget for the 1956-57 citrus season, with nearly half the funds allocated for tv spots.

The proposed new budget, which must be approved by the commission’s budget committee before it can be effective, includes $1,571,000 for tv spots and $104,000 for radio spots.

Magazines and tv will be substantially raised

VISUAL COMMUNICATIONS ROLE STRESSED

N.Y. meeting of industry's first Visual Communications Conference sees top advertising executives exchange ideas on all facets of tv advertising.

PEOPLE can—and should—be sold "painlessly", for the day as to the week, Mr. Ketchum told the advertiser as well as the viewer, several leading agency and tv production art executives last week told the industry's first Visual Communications Conference held Thursday and Friday at the Waldorf-Astoria.

The sessions, climaxing the Art Directors Club of New York's 35th Annual Exhibition of Advertising and Editorial Art and Design, heard 16 top creative executives in the advertising and allied fields explore ideas ranging from the scientific basis of seeing and understanding to today's role of visual communications.

Leo Burnett, chairman of Leo Burnett & Co., Chicago, pointed out at the awards luncheon Wednesday (see story, page 98) that tv is in dire need of expert art directors to make the medium more palatable to current taste trends, and that the ABCD for "inspiring and encouraging a high and consistent standard of artistic excellence" in ads produced by the Burnett Agency. Others honored at the luncheon: Gardner Cowles, president of Look magazine, for the publication's "high standard of excellence...in visual appearance"; Donald McMaster, vice president and general manager, Eastman Kodak Co., "for technical improvement in graphic processes"; and Less Schneider, president of Chrysler Corp., for the "excellent...over-all concept and execution of Chrysler's automobile advertising." On Thursday, John K. Hubele, president of Storyboard Inc., New York and Hollywood, which won an ADC medal for the second consecutive year (following up its successful Heinz 57 campaign of 1954-55 with one for Snowdrift shortbread), said that tv commercials may "rival or even surpass the great radio commercials" and that animated commercials are "rival or even surpass the great radio commercials" and that animated commercials are "rival or even surpass the great radio commercials" and that animated commercials are "rival or even surpass the great radio commercials" (as well as the "infant of them all," Mr. Eckenbercht, chairman of the design department, Yale U. School of Architecture and Design, said that "psychologically, 80 if not 90 percent of all our perception is visual.

The extent to which Hollywood is going to make the most of the Hecht-Lancaster feature "Trapeze" was indicated in the June 3 CBS-TV Ed Sullivan Show. Realizing they would get exposure to some 35 million tv viewers, the Oscar-winning production team hired tv writer Herb Baker to prepare an act for Burt Lancaster and Tony Curtis which integrated "Trapeze" into the script without effectively. Messrs' Hecht and Lancaster rehearsed the bit a full week in Hollywood before going to New York for two more days of rehearsals before the Sullivan appearance.

Some Inc. in a speech scheduled for delivery Friday, Mr. Ketchum criticized the "prevalent illusion" that viewers en masse maintain a 14-year-old intelligence.

Because television is "the most powerful communications instrument of them all," Mr. Ketchum pointed out, the creator of successful messages must believe in people and respect their intelligence. Communication basically, he asserted, "is saying what people want to hear," but he warned that "we must never forget that there is a fatigue factor in the public mind, that when the brilliant expression of yesterday is followed by a host of dull, me-tooers, inevitably the reaction is less and less enthusiastic."

Fatigue need not necessarily come only of seeing "revolutionary" ads, added William H. Schneider, vice president and creative head, Donahoe & Coe, New York, but also can emanate from the traditional "hard sell or sledge hammer claims that have lost their impact." Calling for a realistic evaluation in agencies of the art director's function, Mr. Schneider urged top level executives to take the art director into consideration when planning campaigns.

Mr. Ketchum also recommended that the art director be given a complete dossier in each advertising problem including analysis on market, media and research, as well as a more forceful voice in the agency.

Eye Impact

Wallace Elton, vice president and director of J. Walter Thompson Co., quoted JWT researchers' contention that "65 percent of the audience of the hour is looked through the eyes. Twenty-five percent is obtained through auditory experience, and the remaining 10 percent is attributed to other senses...touch, taste, smell." Declaring that "men may have "understood the case some-what," Prof. Josef Albers, chairman of the design department, Yale U. School of Architecture and Design, said that "psychologically, 80 if not 90 percent of all our perception is visual.

Other points brought out before the 400-odd guests included:

• That too many agency people see house- holders as represented by the stove and the stove and always busy shopping for goods, but fail to realize that much of an advertisement's success depends on whether the "looker" likes what she sees. (Andrew Armstrong, vice president in charge of creative services, Leo Burnett Co., Chicago.)

• That "the great tv commercials are as yet undelivered, unproduced, unthought-of," and that with the stupendous growth of tv no artists (save perhaps the supporting cast) ever before had a chance of such "a mass audience." (John J. Cunningham, president, Cunningham & Walsh, N.Y.)

dent in charge of K&E's international operations. Burt S. Avedon, of K&E's San Francisco regional office, moves to Mexico as vice president and managing director of the Mexico City office; Pedro Valderrama, formerly with J. Walter Thompson as assistant manager and senior account executive in that agency's Mexico City office, has been appointed to K&E's Mexico branch in the same capacity, and Nicholas Remus has been named office manager and accounted there.

C-E Opens Hollywood Office

CAMPBELL-EWALD Co., Detroit Advertising agency, opened a new office in Hollywood June 1 with Richard L. Eastland as manager, according to C-E President H. C. Little. Located in the Capitol Tower, 1750 N. Vine St., the new office is in addition to the firm's Los Angeles operation, headed by R. C. Francis. Norris Poulson has been named an executive of Hollywood production.

Mr. Eastland has several years experience in the radio and television departments of advertising agencies. Other C-E offices are located in New York, Chicago, San Francisco, Atlanta, Dallas, Kansas City and Washington.

FC&B Has Celebration

FORTIETH anniversary of the Los Angeles office of Foote, Cone & Belding was honored June 1 at a luncheon meeting attended by Mayor Norris Poulson and other civic leaders plus executives of 17 western advertisers serviced by FC&B. The agency's Los Angeles office claims to be the West's oldest advertising operation. Don Belding, who started with FC&B's predecessor Lord & Thomas as office boy and now is chairman of the agency's executive committee, was host at the birthday party in cooperation with Roy Campbell, executive vice president in charge of the western division, including Los Angeles, San Francisco and Houston.

Life Savers, Beech-Nut Merge

PLANS for merger of Life Savers Corp. (candy confections) and Beech-Nut Packing Co. (chewing gum, coffee, peanut butter, and baby foods) into a new Beech-Nut Life Savers Inc., were announced last week by Edward J. Noble, Life Savers executive committee chairman, and W. Clark Arkell, Beech-Nut board chairman. Plans are subject to approval by the companies' boards of directors and their stockholders. Mr. Noble is chairman of the finance committee of American Broadcasting-Paramount Theatres and owned ABC before it was merged with United Paramount Theatres to form AB-PT.

New Address for Grey, Bates

LATEST agency tenants announced for the Capitol Tower, new Hollywood building of Capitol Records Inc., are Grey Advertising Agency and Ted Bates & Co. They will occupy their new quarters on Hollywood Blvd., just off Vine, by July 1. Campbell-Ewald Co. was moving in this week. Guild, Buscom & Bonfigli advertising took space in the Tower earlier this month, as did Peters, Griffin, Woodward Inc., radio-television representative.

(P) Participations, as distinguished from sponsorship.

In the above summary, monitoring took place the week ending April 20, 1956.

The Hooper Index of Broadcast Advertisers is a measure of the extent to which a sponsor's commercials are seen or heard. Each commercial is assigned a number of "commercial units," according to its length.* This number is then multiplied by the audience rating attributed to that commercial.** When each commercial has thus been evaluated, the results for all commercials of each sponsor are added to form the HIBA. For further details of preparation, see the basic reports published by E. E. Hooper, Inc., Broadcast Advertisers Reports Inc. and American Research Bureau Inc. Above summary is prepared for use solely by BROADCASTING • TELECASTING. No reproduction permitted.

* "Commercial Units": Commercials are taken from the monitored reports published by Broadcast Advertisers Reports Inc. A "commercial unit" is defined as a commercial exposure of more than 10 seconds but usually not more than one minute in duration. Four "commercial units" are attributed to a 30-minute program, and in the same proportion for programs of other lengths. "Station identification" equals one-half "commercial unit."

** Audience ratings for television, both national and local, are those published by American Research Bureau Inc. Those for radio are the ratings of C. R. Hooper Inc. In the case of station breaks the average of the ratings for the preceding and following time periods is used wherever feasible; otherwise, the rating is that of either the preceding or following time period, normally the preceding. In the above summary, monitoring occurred week ending April 22, 1956.

Armstrong Renews on NBC-TV

ARMSTRONG CORK Co., has renewed Armstrong Circle Theatre on NBC-TV for 26 alternate Tuesdays, starting Oct. 2, beginning the firm's seventh straight year as sponsor of a live Tuesday night dramatic production. BBDO is the agency for Armstrong. Alternate weeks will be sponsored by Kaiser Aluminum & Chemical Corp. (Kaiser Aluminum Hour) in the Friday, 9:30-10:30 p.m. EDT period starting July 3. Young & Rubicam is Kaiser's agency. Executive Producers: Washington (Tony) Minor and a team of three alternating producers-directors will individually select material ranging from musical to dramatic.

Wine Firm Signs for Quiz

MOGEN DAOVID Wine Corp. reportedly has signed for a new show, Treasure Hunt, to premiere on ABC-TV Sept. 7 in the Friday, 9:30-9:30 p.m. EDT period. The quiz show, offering a top prize of $25,000, will feature Jan Murray as host. It encores Dollar a Second on ABC-TV, which the new show will replace.

Weiss & Geller is the agency. Also understood to be considering the program as a co-sponsor is Helene Curtis Industries Inc., through Weiss & Geller, although decision reportedly was not firm last week. Helene Curtis now co-sponsors the Dollar a Second show with the Mogen David company.
WCTU President Hayes Again Hits Radio-TV Ads

ANOTHER attack on radio-tv beer advertising was made last Monday, this time by the head of the Women's Christian Temperance Union, Evanston, Ill.

Mrs. Glenn G. Hayes, WCTU president, claimed that "radio and television commercials influence hundreds of thousands of teen-agers to start drinking." She charged that "alcoholic beverage advertising will continue to be dishonest until it shows what it creates"—drunkards, associations with crime, reckless driving, and deserted families and impoverished children.

What's Heard, Seen or Read Before the Customer Buys?

WHICH of the various media has the biggest before-purchase impact on supermarket customers? Radio Advertising Bureau expects soon to release a special study of 10 high-volume grocery items, showing the "media exposure" of women before they purchased the products. The products measured: cake mix, canned soup, cigarettes, coffee, cold cereal, frozen orange juice, hand soap, laundry soap or detergent, packaged desserts and shortening or cooking oil.

RAB said last week the media study, which it described as one of the "most exhaustive" ever made among supermarket customers, was conducted by Advertest Inc., independent researcher. It included 14,000 supermarket customers at checkout stands in Atlanta, Boston, Los Angeles and Cincinnati and compares shoppers' exposure to radio, tv, newspapers and magazines during the day before they enter the stores. Advertest had made a study last year of the overall impact of media on supermarket shoppers in four cities: Buffalo, Kansas City, New Orleans and San Francisco.

Time Buys CBS-TV Show

TIME INC. (Time and Life magazines), New York, will sponsor Person to Person (CBS-TV, Fri., 10:30-11 p.m. EDT) on alternate weeks, succeeding Elgin American Watch Co. Time will start sponsorship of the summer replacement program, which may be Pantomime Quiz, and pick up Person to Person in the fall, alternating with American Oil Co. Young & Rubicam, N. Y., is agency for Time Inc.

Bristol-Myers Expands Buys

BRISTOL-MYERS Co., N. Y., for Sal Hepatica, will sponsor 15 minutes weekly (two 7½ minute portions) of CBS Radio's Road of Life daytime serial July 3-31, at which time the drug house plans to expand its sponsorship to two full programs weekly. Agency is Young & Rubicam, N. Y.

Brewery Takes 'Potter' Show

REGAL PALE BREWING Co., San Francisco, has signed for an hour kinescope version of Peter Potter Juke Box Jury on KRCA (TV) Los Angeles, for weekly airing on 18 tv stations in 11 western states, effective July 26. Juke Box Jury is aired 10-11 p.m., Fridays, on KRCA. The contract for 26 weeks was placed by Guild, Bascom and Bonfigli, San Francisco.
**TV NETWORK BUYS AND BUYERS**

**NINE SPONSORS TOP MILLION MARK IN MARCH OF ’56**

HIGH rate of blue chip money was funneled into network tv in March of 1956, according to a compilation of Publishers Information Bureau figures. Eight of the top 10 national advertisers allocated more in March than in February of this year.

This was the picture as gross time sales by the tv networks continued to register $6 million ahead of the totals of that month a year ago [8+W, May 28]. The 1956 gross for March was $40,603,332, the 1955 gross for the month, $34,594,139.

Six of the top 10 advertisers in network tv spent $1 million or more in March 1955; last March (1956) the number in this category stood at nine with the 10th, American Tobacco Co., spending $958,847. All of the leading advertisers except American Home Products and American Tobacco placed more “chips” in network tv in March than in February of this year.

Pacesetter of March’s top 10 was Procter & Gamble, ahead of its February total by more than $60,000 and in front of the March 1955 level by $600,000. General Motors was over $300,000 above the March of 1955 total; Chrysler nearly $400,000. Colgate-Palmolive off only some $10,000 dropped to the No. 4 ranking from its second-place perch in March 1955.

With the big boosts in individual spending, rankings were shuffled, causing some peculiar results. For example, General Foods spent about $80,000 more in March of this year than in March 1955 and yet moved from fifth to sixth in the lineup. American Tobacco spent more than $100,000 above its March 1955 total which had put the firm in eighth place but barely clung to the 10th spot in the March 1956 listing.

Most of the product categories showed a sustained strength, though minor drop-offs were noticeable (e.g., household equipment declined from $2.8 million to a little under $2.5 million; radios were off nearly $300,000 according to the current compilations of PIB).

AMERICA'S LARGEST GROUP OF INDEPENDENT RADIO STATIONS
Jan. 1 Working Radios Placed at 124 Million

TOTAL NUMBER of radio sets in working order in the U. S. stood at 124 million on Jan. 1, a gain of three million in six months, according to estimates released last week by Radio Advertising Bureau in conjunction with the four national radio networks.

RAB President Kevin B. Sweeney stressed that "this is a very conservative estimate" that does not take into account radio set sales made in the past five months. The unofficial forecast for mid-1956 has been 126 to 127 million sets in working order (Chicago Circuit, May 28). "Since January," Mr. Sweeney said, "radio sets have been selling at a terrific rate, right up with last year's record-breaking 14.9 million set sales. And we're just now getting into the portable radio season."

He also pointed out that latest RETMA figures place radio set production for the first quarter of 1956 at 3.5 million sets, including about 1.5 million car radios. The 3.5 million figure, he added, is approximately twice the number of tv sets produced during the same three-month period.

The 124 million estimate as of Jan. 1 includes 82 million working-order radios in 45 million homes (or almost two radios for every radio family); 32 million radio sets in automobiles, and 10 million radios in public places and business establishments. It was emphasized that the 124 million figure covers only those radios that are in working order. Additionally, RAB said, there are another 18 million sets out of repair, which would bring total radio ownership up to 142 million sets.

The January estimate by RAB and the four networks—ABC, CBS, NBC, and Mutual—is based on Advertising Research Foundation, Alfred Polizzi Research Inc. and A. C. Nielsen Co. data.

John A. Thomas Joins B&B

JOHN A. THOMAS, media director and member of the plans board, C. J. LaRoche & Co., New York, last week joined Benton & Bowles, N. Y., as a vice president and account supervisor. He will be working on General Foods Corp. products. Before his association with LaRoche, Mr. Thomas was advertising consultant to Willys-Overland Motors Inc., and before that with BBDO.

Armour Signed for 'Daddy'

ARMOUR & CO. (Soap Auxiliary), Chicago, completed negotiations for co-sponsorship of ABC-TV's Make Room for Daddy this fall through Foote, Cone & Belding, Chicago, confirming reports the past fortnight (BT, June 4). Starting Sept. 10 Armour will alternate as sponsor of the Danny Thomas show with Kimberly-Clark Corp. (Delsy tissues, Kleenex tissues and table napkins, other products), advertising its Dial soap, shampoo and liquid shampoo, in white, for 22 weeks, were placed through Foote, Cone & Belding, Chicago.

Pontiac Back to Network Radio With Irish Football on MBS

AFTER an estimated six-year absence from network radio, Pontiac Motor Div. of General Motors Corp. plans a return to the medium this fall with half sponsorship of the 10-game Notre Dame U. football coverage on MBS, in an agreement between MacManus, John & Adams, Pontiac agency, and MBS, which will carry the schedule over a guaranteed 85% of its total station grouping. Pontiac will sponsor half of each game, with the remaining half being offered for co-sponsorship by local Pontiac dealers. The contract is estimated to involve $175,000. Pontiac also will present another MBS football game—North Carolina U. vs. Oklahoma—on Sept. 29 when Notre Dame does not have a game.

An agency spokesman for Pontiac told B&T last week that while Pontiac's broadcast budget—as well as other GM divisions—will be somewhat lower next season than this year, the auto manufacturer will look into additional sportscasts. It already has signed with NBC-TV for sponsorship of the Dec. 30 professional football championship game and is contemplating purchase of NBC Radio's coverage of that event as well. The Pontiac spokesman also said that "as of now" no decision has been made on whether the auto firm will renew its segment of NBC-TV's Wide Wide World, which, he said, "is a good show for Pontiac."

Council of Churches Hits Paid Religious Broadcasts

THE PURCHASING of radio and television time for religious broadcasts was adversely criticized last week by the governing board of the National Council of Churches. A report to the board, meeting at Toledo, Ohio, by the council's broadcasting and film commission also said networks and stations do not adequately discharge their responsibility in providing free time for religious broadcasts and evade their obligations by airing paid and sponsored religious programs in the major time periods allotted for religious programs. The report called for free time for the nation's major Protestant and Orthodox groups and the council's affiliates.

Baptists Boost Tv Budget

AN ADDITIONAL $250,000 was added to the tv budget of the Southern Baptist Convention, which currently is sponsoring the first color-tv series based on Bible parables and titled This Is the Answer. The money, according to a SBC spokesman, will be used during 1957. Answer, currently showing on 60 tv stations in 27 states and Alaska, is reported as costing $250,000 per episode.

16,237 visit "White Columns" in 7 weeks

In the friendly vernacular of Dixie, we said, "Come see us!" The public invitation was tendered immediately after the formal opening of "White Columns" April 8. Just three little words — but what response!

Our neighbors, those who know us best, have come to see, marvel, and share with us a civic pride in the wonders of this modern home of broadcasting and telecasting. School children by the bus-loads, civic clubs, church groups, college students, adults, teen-agers from far and near. And they're still coming!

The experience imbues us with grateful humility. It is evidence for us, and for all who use the facilities of these stations, that a dedication to service in the Public Interest earns heart-warming rewards.

WSB and WSB-TV are affiliates of The Atlanta Journal and Constitution. Representatives are Edw. Perry & Co. NBC affiliate.

Leadership is traditional . . .

Stevens, vice president, sales and advertising; Mr. Ford; James Rayen, advertising and public relations director, and William Musser, account supervisor, Ted Bates agency.

Bon Ami Co. Names R&R
BON AMI CO., New York, has named Ruthrauff & Ryan, New York, to handle its advertising, effectively immediately. Billing is nearly $1 million. The firm is planning to place 13-week campaign in New York starting in July, using radio and tv with a budget of $250,000 for that market. The account had been serviced by Norman, Craig & Kummel, New York, which resigned a fortnight ago [B&T, June 4].

NETWORK NEW BUSINESS
Mack Trucks Inc., N. Y., will launch institutional campaign on trucking industry this summer with 42 announcements on NBC's weekend service, Monitor, starting June 30 and ending Sept. 2. Schedule will include a series of remote broadcasts from all parts of nation describing essential trucking operations. Doyle, Kitchen and McCormick Inc., N. Y., and Allied Public Relations Assoc., N. Y., are arranging campaign for Mack Trucks.

Warner-Hudnut (Richard Hudnut's quick home permanents) and American Tobacco Co. (Lucky Strike cigarettes) signed for alternate week sponsorship of NBC-TV's Adventure Theatre (Sat., 10:30-11 p.m. EDT). Agencies are Kenyon & Eckhardt, N. Y., for Warner-Hudnut and BBDO, N. Y., for American Tobacco. Film program replaces Your Hit Parade for summer, beginning June 16 and ending Sept. 1, after which Parade returns.

Reynolds Metals Co., Richmond, Va., will sponsor Circus Bay tv film series on NBC-TV (7:30-8 p.m. EST), starting Sept. 23. Agencies are Clinton E. Frank, Chicago, and Buchanan & Co., N. Y.

General Foods Corp., White Plains, N. Y., will sponsor new tv film series, Zone Grey Theatre on CBS-TV starting next fall on Friday, 8:30-9 p.m. NYT period currently occupied by Our Miss Brooks. Series is being produced by Four Star Films Inc., Hollywood. During interim, General Food, for Maxwell House coffee, Grape Nuts and 4095 Bran Flakes will sponsor Hollywood Summer Theatre (Friday, CBS-TV, 8:30 p.m. EDT) for eight weeks, starting Aug. 3. Agency: Benton & Bowles, N. Y.

NETWORK RENEWALS
Palst Brewing Co., Chicago, through Leo Burnett Inc., Chicago, and Mennen Co., Morris- town, N. J., through McCann-Erickson, have renewed ABC-TV's Wednesday Night Fights through forthcoming season. Frontier Airlines, Denver, through Rippy, Henderson, Kostka & Co., that city, has renewed five-day weekly newscasts on Intermountain Network and Arizona Network.

AGENCY APPOINTMENTS
RCA Victor de Mexico S. A. to Kenyon & Eckhardt de Mexico S. A. New N&K&E office, part of agency's international expansion, opened in late May [B&T, June 4].

Rexall Drug Co. Ltd. of Canada names BBDO, Toronto, effective Jan. 1, 1957. Agency currently is serviced by Cockfield, Brown & Co. Ltd., Toronto.

Dale Carnegie Courses Inc. and RCA Victor Distributing Co. appoint Beament & Howlin Inc., Chicago.

Perk Dog Food Co. (Perk, Vets dog and cat food, Peak mix and horsemeat), Chicago, appoints Weiss & Geller Inc., same city.

C. H. Muselman Co. (food products), Biglerville, Pa., to Arndt, Presto, Chapin, Lamb & Keen Inc., Philadelphia.

Otte Food Products Co. (Morton House packaged foods), Nebraska City, Neb., names Buchanan-Thomas Advertising Co., Omaha.

Toni Co., Chicago, names North Adv., that city, for Adorn hair spray and hair dressing products.

A&A SHORTS

North Adv. Agency, Chicago, has been elected subscriber to Advertising Research Foundation.

A&A PEOPLE
Barrett Brady, senior vice president in charge of creative services, Kenyon & Eckhardt, N. Y., elected director of agency. George Simons, vice president of Kenyon & Eckhardt Inc., appointed account supervisor in agency's Chicago office.

Dik Warren Twedt, formerly psychologist and research supervisor, Needham, Louis & Broly, Chicago, to Kenyon & Eckhardt, same city, as research director.

Thomas Wright Richley, formerly account executive, Young & Rubicam, N. Y., to Robert W. Orr & Assoc., N. Y., as vice president and account executive on Jergens Lotion.

S. Champion Titus, supervisor, Wildroot Co. account, BBDO, Buffalo, elected president of agency. Ralph W. Peck, account executive, Cockfield, Brown & Co., Toronto, to BBDO that city.

One television station last year used $3,204,089 worth of time and production facilities for local, unsponsored public interest programs and announcements.
RADIO-TV: PIED PIPER

MEDIA ATTRACT THOUSANDS TO OUTDOOR 'STORE'
IN LOS ANGELES, RING UP $600,000 IN SALES

TELEVISION and radio are credited with the major share of sales at a unique four-day merchandising venture by White Front Stores Inc., Los Angeles, to regain customers and sales volume after two weeks of no business because of a major fire.

Tv and radio brought us $600,000 of our $1-million volume and cost only one-half of what we spent on 19 full-page ads in the four local daily newspapers," according to Arnold Isaak, executive vice president of Robin, Lee & Arnold, Beverly Hills agency for White Front.

Mr. Isaak explained that White Front has been grossing about $100,000 weekly at its Los Angeles household and general appliance store, did a $4-million volume last year and expects to hit $6 million this year.

Before the fire, the company was a regular user of local television, spending about $150,000 annually, or the major share of its advertising budget and supplementing this with radio and newspapers.

The agency executive said a four-alarm fire closed the store in early April and all merchandise in it was turned over to the insurance company as salvage. To get back in business, White Front went to its distributors and stocked up on everything that was available and in two weeks rented a four-block open area in another location which formerly had been a used-car lot, for its huge outdoor sale. Hundreds of truckloads of new tv sets, radios, refrigerators, washers, dryers, ranges, freezers, hi-fi's, luggage, jewelry, furniture, carpeting and thousands of other items were unloaded and stacked high in their original factory cartons. The sale began at 10 a.m., Friday (April 29) and ran through Monday of the following week.

Advertising employed included 200 30-second and 60-second spots on KMPC, KLAC and KFWB and 19 20-second spots on KTLA (TV). A seven-hour remote show on KTLA was telecast on Saturday, 11 a.m. - 6 p.m., and another remote on the tv station on Sunday, 1-4 p.m. featuring circus talent and crowd interviews. A radio remote on KFWB was aired Saturday, 8 p.m. to midnight. Other advertising consisted of 19 full pages in local newspapers.

Sam Nasisi, White Front general manager, said: "It was unbelievable. Even though there was free parking for over 2,000 cars, there were thousands who were unable to get near the lot because of the traffic jams and lack of parking space. It was like a county fair."

Mr. Isaak told B&T the impact of tv and radio was visible in the crowd movement: "About 45 minutes after each broadcast we were just inundated with people and our interviews showed they were there as a direct result of hearing about the sale on radio and tv. People drove in from far distances during the Saturday night radio show and told us they came as a result of hearing it."

The agency said other non-competitive businesses in the area enjoyed big increases in store traffic as a result of the sale and the Safeway grocery across the street reported one of its biggest business days.

CUSTOMERS flock to White Front Stores open-air merchandising venture at the beckon of radio and tv commercials on Los Angeles stations.

Alexander Frances, account executive, Mumma, Mullany & Nichols Inc., named head of agency's N. Y. office, succeeding Arnold Coham, resigned to join the N. Y. public relations firm of Sidney S. Baron & Co. [B&T, June 4].

Jonathan Vost, writer-producer, Cunningham & Walsh, to L. A. office of Doyle Dane Bernbach as tv-radio director.

Bruce Hamilton, assistant advertising manager, U. S. Tobacco Co., to Kudner Agency, N. Y., as account executive.

Ken Thompson, radio-tv department, M. R. Kopmeyer Co., Louisville, Ky., promoted to radio-tv director.

Carl N. Everett, formerly account executive, Campbell-Mithun, to McCann-Erickson, N. Y., as executive on Coca-Cola account.

Alice J. Wolf, timebuyer, J. Walter Thompson Co., N. Y., to Grey Adv., N. Y., as group head timebuyer handling Block Drug Co., Chock Full O' Nuts coffee, Exquisite Form brassiere, and Dan River Mills for radio and tv.

Russel F. Willie promoted from advertising production manager to assistant advertising director of Norge Div. of Borg-Warner Corp., Chicago.

Edward D. Kuhn, account executive on Kendall Co. account for past 17 years at Leo Burnett Co., Chicago, to Weiss & Geller Inc., same city, as account executive on Mogen David wine.

Edward J. O'Malley, formerly with McCall Corp. and Hearst Magazines advertising departments, to Presba, Fellers & Presba Inc., Chicago, as account executive.

Niles Swanson, previously assistant production manager at Fred A. Niles Productions Inc., Chicago, and formerly with CBS Central Div. to production staff of D'Arcy Adv. Co., that city. Robert Q. Lewis, assistant radio-tv director at D'Arcy, Chicago, to Foote, Cone & Belding, same city, as radio-tv supervisor, effective July 18.

Gerald L. Brant, acting executive director of Tea Council of the U. S. A., N. Y., and previously director of advertising for National Assn. of Mfrs., appointed executive director of Tea Council.

Edward Reynolds, manager of radio press information, CBS, N. Y., to N. Y. office of Ketchum, MacLeod & Grove Inc. as public relations executive.

Curtis R. Winters Jr., associate manager of Chicago office of The McCarty Co., to firm's L. A. office as director of plans. Bill Wood, account executive, named creative director for all accounts in L. A. Chester Craft, account executive, named to succeed Mr. Winters as Chicago associate manager.

H. M. Robinson, former assistant general advertising manager, Armour & Co., Chicago, named creative director of Lowe Runkle Co., Oklahoma City agency.

Edward Boris, art director, Rogers & Smith, Chicago, and Richard Heiser, Gears-Marston, Reading, Pa., agency, to art department, Arndt, Preston, Chapin, Lamb & Keen, Phila.

Truman Fossum appointed assistant account executive on Florists Telegraph Delivery Assn. account at Grant Adv. Inc., N. Y.

Dr. R. I. Freeman, chief engineer, A. C. Nielsen Co's broadcast division, N. Y., elected vice president and named coordinator of field, inspection, and engineering operations. He will be succeeded as chief engineer by C. H. Curry, former assistant chief engineer.
For the Second Year...

KONO Proudly Announces Winning the Alfred P. Sloan Award

For Our Contribution in the Promotion of Highway Traffic Safety

We are grateful that the Alfred P. Sloan Foundation once again has recognized KONO for its outstanding service to the cause of traffic safety. The campaign for traffic safety will continue to be a vital part of the station's broad program of public service ... service in the best interest of the people of the great Southwest.

DEDICATED TO PUBLIC SERVICE FOR THREE DECADES
PARAMOUNT BIDES TIME ON LIBRARY SALE

Barney Balaban tells stockholders that company will not sell features to television until price offered approaches "realistic relationship to value."

CONSIDERATION of price is what holds back Paramount Pictures Corp. from selling part or all of its library of feature pictures to television. Until the movie company is offered the value it thinks its features are worth, it has no intention of selling.

This restatement of Paramount's policy on its feature film library was made Tuesday by Barney Balaban, president, at a stockholders meeting held in New York.

Noting the "recurring questions" about such a sale, Mr. Balaban would refer in answer to what he told the FCC that "the then current television market did not justify serious consideration of the sale of any of our feature pictures; that only when the price for such pictures approached a realistic relationship to their value could we consider it seriously." Mr. Balaban asserted, "our position remains the same."

Also at the meeting Mr. Balaban reviewed:

- Short subjects to tv—Paramount is "concluding negotiations" for the sale of its "Popeye" shorts for about $1.5 million (see story page 52); has sold all of its short subjects made before Sept. 30, 1950, and for which payment is being made in installments and totaling to $2,771,000 before taxes, and has sold a "couple of minor properties" that will yield $345,000.

-National Telefilm Assoc. now has the short subject library, except for the "Popeye" series, the output including film shorts, cartoons, musical shows and specialized presentations.

- Television operation—New policies and management at DuMont Broadcasting Corp., (WABD (TV) New York and WTTG (TV) Washington) "should result in a cash profit for this year which represents a material improvement over the substantial losses sustained by this unit over a period of years."

- Paramount Pictures holds a "substantial" interest in both the broadcasting firm and Allen B. DuMont Labs. It also has about 51% interest in Famous Players Canadian Corp. Ltd., which in addition to its movie picture interests, has 50% ownership of two Canadian TV stations—CFCM-TV Quebec City and CKCO-TV Kitchener, Ont.—where "profits are up to all expectations and considerably exceed the profits of a year ago."

- Pay television—International Telemeter Corp. (Paramount has an 85% interest) is considering closed-circuit pay TV which does not require FCC approval "and could well be the basis for establishing the validity of pay television."

- Color TV—Chromatic is nearing "commercial acceptability" for its color set that would sell under $400 (see story, page 52).

- Productions and movies—Paramount Pictures expects record net income for the second quarter as a result of non-recurring profits; earnings for the first quarter were the highest in the corporation's history but profits from movie operations in the second quarter will be lower than the comparable 1955 period. The firm is continuing a policy of shrinking its capital structure with the picture business progressing through a period of "transition."

Mr. Balaban admitted that tv "has unquestionably influenced the level of our grosses since it became a major competitor for the leisure time of the public," and that "there can be no doubt that certain new types of tv programs are having an effect on theatre business." He held forth hope, however, that these may be "transient" and would not be a "basic, long-term influence ... that we cannot meet competitively."

Old Warner Bros. Movie Lot Opened for TV by Paramount

THE OLD Warner Bros. movie lot at 5842 Sunset Blvd., Hollywood, where Al Jolson made history nearly three decades ago in the filming of the first talking picture, will reopen July 10 as a modern TV film studio rental facility under Paramount Sunset Corp. The lot also is headquarters for Paramount's KTLA (TV) Los Angeles.

Paramount has completely renovated six huge sound stages, ground floor dressing rooms, storage areas, film vault, executive offices and production offices in the new facility. General Manager Stanton Osgood said the rental lot can handle every possible type of TV program, from the personal, intimate one-man show to the most elaborate productions. Every type of production, including recording and lighting facilities available.

Mr. Osgood announced appointments of Fred Alvin, formerly with ABC-TV and RCA, as technical manager and Fred Gammon, formerly assistant comptroller of Paramount's Telemeter Corp., as manager of business affairs. Mr. Alvin is known as one of the developers of the Kingscope film process.

WCBS-TV New York Buys 152 Warner Bros. Features

IN A TRANSACTION estimated at $1.5 million, WCBS-TV New York last week purchased 152 Warner Bros.-produced feature films from Associated Artists Productions, New York. The purchase was described by the station as "the largest single purchase" it has made to date.

The contract, which was signed by Sam Cook Dion, general manager of the station, and Robert Rich, Associated Artists general manager, calls for WCBS-TV to acquire most of the films by Jan. 1, 1957, for exclusive showings in the New York area. The remainder will become available to the station on July 15, 1958, after the films have completed re-runs in theatres.

Included in the package are such feature films as "The Maltese Falcon," "Juarez," "The Petrified Forest," "Arsenic and Old Lace," "Dodge City," "Greenwich Village," "Movie Crazy," "Of Human Bondage," and "Adventures of Mark Twain," William C. Lacey, manager of WCBS-TV's film department, observed that he purchased the station's current library of films to more than 300 features.

Producers Decry Poor Quality Of TV Commercial Film

DISCUSSION on the increasing problem of poor quality prints of tv film commercials at the regular monthly meeting of the Film Producers Assn. of New York last week brought agreement that the condition resulted from lack of control of finished negatives by producers.

It was noted that in the last few years, agencies have followed a policy of consigning finished negatives to service organizations which arrange for mass production of release prints and for shipping. Producers reported that this practice began when a number of heavy spot producers and agencies decided to utilize the location of agency-owned negatives heretofore spread among many producers.

FPA members, who produce the bulk of tv commercials, said producers insisted that optimum quality images and sound tracks of release prints "are best attained when the individual producer involved deals directly with the film processing laboratory."

At the next meeting of FPA on July 2, according to an association spokesman, concrete proposals will be offered to help expedite the centralization of agency-owned negative film without sacrificing release print quality.

Van Praag Productions Expands N. Y. Facilities

OPENING of expanded studio and executive offices in New York of Van Praag Productions on the fourth floor of 1600 Broadway is being announced today (Monday) by William Van Praag, president of the film company. The new offices are modern and air conditioned, occupying 21 rooms and equipped to handle all phases of film production.

The enlarged space in New York follows the Van Praag decision to open a new studio in Hollywood, Calif., in order to handle increased business volume of the firm, which is in tv, industry, commercial and theatrical film.

The company also has studios and offices in Coral Gables, Fla., and Detroit.

National Telefilms Session Discussing New Sales Plans

SALES plans on behalf of National Telefilm Assoc.'s newly-acquired 20th Century-Fox package of 52 feature films and the Paramount short subjects library were to be discussed at a four-day sales convention opening Monday which opened in New York last Saturday and continues through tomorrow (Tuesday).

Company officials who will address the meeting are Harold Goldman, vice president in sales; Ely Y. Cohan and Oliver Unger, executive vice president. Sales personnel attending includes E. Junno Graaf and Al Wallace, Chicago; Edward M. Gray, Peter S. Kligerman and Gene Elster, Los Angeles; Donald Swartz and Gerald Corwin, Minneapolis; Nicholas W. Russo, Boston; Charles D. McNamee, Memphis; Bill Boyce, Dallas; Bill Whalen, Kansas City; Seymour Kaplan, New York and Napoleon Vaillancourt, Montreal.

Page 50 • June 11, 1956
New Madrid Film Firm Plans
First U. S. Release in Fall

ESTABLISHMENT in Spain of Martin Gosch Productions as a tv and motion picture production organization was announced last week in New York by Martin Gosch, president. He claimed the company's output is comparable to American standards but can be produced at less than one-half what the production costs would be in the U. S.

Mr. Gosch reported that the company currently is filming in Madrid a 39-episode, half-hour series, The Adventures of the Americano, starring Scott McKay. He said the series is slated for fall release and he has been negotiating with ABC Film Syndication as distributor. A second tv series, The Red Mask, will be filmed in color. Mr. Gosch revealed, with starting date not set.

AAP Buys 'Popeye' Films
For Tv Station Release

ASSOCIATED Artists Productions has acquired from Paramount Pictures Corp., a library of 234 "Popeye" cartoons, which will be released to tv stations, it was announced last week by Eliot Hyman, AAP president. The cost of the library is estimated at $1.5 million (also see Paramount Pictures stockholders story, page 50).

AAP previously had obtained distribution rights to 337 Warner Bros. cartoons, including such characters as "Bugs Bunny," "Porky Pig," "Daffy Duck" and others. The AAP cartoon library, according to Mr. Hyman, now includes 411 different subjects in color.

Former Employe Sues Loews

DAMAGE SUIT for $202,000 against Loews Inc. was filed in Superior Court at Santa Monica, Calif., last week by Marvin Lee Miller, charging that the format of promoting upcoming MGM feature movie releases on ABC-TV's MGM Parade is an appropriation of a suggested format which he submitted to MGM several years ago. Mr. Miller, now a civilian employee with the U. S. Army in Germany, formerly was secretary to the late Harry Rapf, an MGM executive. Mr. Miller contends in the suit that MGM told him it was not interested in his program format idea and failed to return his manuscripts or to compensate him for them.

Briskin to Form Company

IRVING BRISKIN, studio manager at Columbia Pictures, Hollywood, relinquishes his post July 1 to form his own tv production company, which will release through Columbia's tv film subsidiary, Screen Gems. According to his agreement with Columbia President Harry Cohn, Mr. Briskin and his new unit also will supervise all Screen Gems production.

FILM SALES

Steeling Television Corp., N. Y., has sold Sports Shorts and Vienna Philharmonic to WATV (TV) Newark; King's Crossroads to WHIO-TV Dayton; Movie Museum to KOMO-TV Seattle and WTVD (TV) Durham, N. C., and Music for Everybody and Tales of Tomorrow to KFBB-TV Great Falls, Mont.

Screen Gems, N. Y., has sold 78 quarter hours of The Fatty Page Show to WCBS-TV New York. Show will be scheduled Saturday, 6:15-6:30 p.m. EDT, replacing The Frankie Laine Show, effective July 7.

WHEN WLAC-TV Nashville, Tenn., set out to obtain the film show Code 2, it found that the show was for regional sale only. So station executives got busy and sold the show in two other tv markets—Chatanooga and Knoxville. At the contract signing are, l to r: T. B. Baker Jr., executive vice president-general manager of WLAC-TV; J. Robert Clark, station accounting executive; W. L. Mitchener, general manager of Nashville Chase Co., sponsor; Joe Porter, manager of Atlanta branch of ABC Film sales, and Jack Sandefur, Buford-Lewis Agency, Nashville.

Television Programs of America, N. Y., reports Campbell Soup Co., Camden, N. J., has purchased The Count of Monte Cristo for showing in Puerto Rico starting this summer. Robert Otto & Co., N. Y., is Campbell agency for international advertising.

FILM DISTRIBUTION

CBS-TV Film Sales, N. Y., has placed Brave Eagle tv film series into syndication following completion of cycle on CBS-TV June 6.

Richard S. Robbins Co., N. Y., public relations—sales promotion agency, has obtained syndication rights to 30 British film comedies, which firm is making available on library basis to stations. Robbins also has secured radio-tv syndication rights to Pip, Squeak & Wilfred comic strip in London Daily Mirror. Negotiations are under way for filming of 39 episodes.

Arts & Agencies Inc., N. Y., non-profit cultural agency, has produced series of 13 half-hour tv films on music appreciation for children, Musts for Young People, for distribution to educational stations by Educational Television & Radio Center, Ann Arbor, Mich. Following its cycle on those stations, films will be made available for other showings, including presentations on commercial tv stations during sustaining time.

Alfred D. LeVine, Chicago film salesman, announces acquisition of national tv rights to new Bud Wilkinson Show (formerly Sports for the Family), 13 quarter-hour series starring Bud Wilkinson, U. of Oklahoma coach, and produced by Bud Wilkinson Productions. In June 4 issue of Better TV it was incorrectly indicated that Screen Gems Ltd. of Canada had acquired rights. This organization has been appointed Canadian distributor for the Byron Nelson Let's Go Golfing film series.

FILM PRODUCTION

Youth in Focus Films Inc., Hollywood, has been formed by producer Ronald V. Ashcroft, attorney Leon Selzer and Irving Berlin of Hollywood to film 26 half-hour programs.

Victor Stoloff, L. A., has purchased rights to Tales of the Turf, novel by Harris Wade, with intention to start production of adapted tv series in early summer.

Guild Films Co., N. Y., will produce special color feature film for National Arthritis & Rheumatism Foundation featuring actor Charlton Heston. Film will be distributed by Guild's public service division.

Bill Stern, ABC sportscaster, will play himself in semi-documentary half-hour tv series, College Coach, being written and produced in New York by Thor Brooks and Malvin Wald. Series is to be available to tv stations in fall.

Walter Schwimmer, president of syndication firm, announces new group of 26 filmed Championship Bowling programs will be produced this summer and be available for distribution to tv stations around Oct. 1. Five regional beer advertisers have signed for additional series in New York, Texas and other major markets. Peter DeMet Productions will shoot series. Current series has been sold in 140 markets.

K-T Productions, N. Y., tv package and theatrical property firm, announces plans to produce new tv comedy-panel series, Brain Trust, and has signed Russell Beggs as writer.

Robert Alexander Productions Inc., Hollywood, has announced plans to begin three new romantic-adventure film series at Calif. studios in addition to Fremont, The Trailblazer, starring Steve Cochran, now underway for showing on CBS-TV in fall. Mr. Cochran, film head, will direct three new series with Harrison Reader as producer and John Dunkel as writer.

FILM PEOPLE

W. A. Pomeroy, Detroit representative of Guild Films, resigned. Mr. Pomeroy is former summer general manager of WILS and WILS-TV (uhf no longer operating) Lansing, Mich., has filed application for am station at Tawas City-East Tawas, Mich. He is past president of Mich. Assn. of Broadcasters.

Ben B. Odell, vice president, California Bank, Hollywood, to Cathedral Films, Burbank, Calif., as treasurer.

Walter K. Scott, formerly chief of motion picture services, U. S. Department of Agriculture, Washington, to Capital Film Laboratories, Washington, as special sales representative.

Louise Gruner, previously with college department of Rinehart & Co., N. Y., publishing company, named assistant to advertising-publicity-promotion director of C&C Television Corp., N. Y.

Marvin Schaffer, Emil Mogul Co., N. Y., to National Telefilm Associates, N. Y., as sales service coordinator.
When should a new model replace the old? Our automobile industry says, "annually". If it's boats, possibly every two years. If our daughter's formal, then one party is the duration.

The formula adopted by Gates is no secret. "Keep a new model on the drafting board all the time." True, it may be on again off again but each time a new advancement appears, the drawing addition is made. --- Progress, in this way, is continual and not spasmodic. Engineers are always alive to today's needs. Production people know what's coming and prepare in advance.

Indeed Gates puts new models them all! By no means to set a record but to fill the need of a progressive industry. It is through the parade of new and better things that leadership becomes factual -- more than just a claim.

Gates new Five for 1957 is already being installed in American broadcasting stations
Executive Director of Cox Stations Named Assistant Chairman of Democratic National Committee to Plan Party’s Nominating Parley. He Announces Plans to Press for GOP Agreement on TV Debates.

J. Leonard Reinsch, Executive Director of the James M. Cox radio-tv properties (WSB-AM-FM-TV Atlanta, WHIO-AM-FM-TV Dayton, Ohio, WIOD-AM-FM Miami, Fla.), last week was appointed as assistant chairman of the Democratic National Committee in charge of the 1966 Democratic nominating convention, which begins Aug. 13 in Chicago.

As convention manager, he succeeds William Neale Rouch, who resigned May 18 “for personal and personnel reasons,” according to Democratic National Chairman Paul M. Butler, who announced the new appointment last week in Chicago.

Mr. Reinsch, as voluntary tv-radio consultant to the Democratic National Committee, has been handling arrangements for television, radio and newsreels, physical planning of the convention, and development of the convention program.

Mr. Butler, who expressed appreciation to former Gov. James M. Cox and his son, James M. Cox, Jr., owner of the radio-ty properties which Mr. Reinsch directs, for making the broadcast executive’s services available. He said the Democratic Party is fortunate to have a man of Mr. Reinsch’s background working with the committee. The elder Mr. Cox was the Democratic presidential nominee in 1920 and was defeated by Warren G. Harding.

Mr. Reinsch was radio director of the 1944 convention and presidential campaign, is a former radio advisor to the White House and was radio-tv director of the 1952 Democratic national convention. He is a member of the board and stockholder of the Knight-Cox WCKT-AM, WIOD-FM and WNAC-FM (ch. 7), due on the air next month.

Mr. Reinsch also serves on the Democratic National Committee’s Zone 5 committee and the Democratic Committee on Civic Education in Florida. Last week he attended the Democratic Party’s 18th national convention in Miami, observed Democratic President John F. Kennedy discuss the Democratic Party’s position on various social and economic issues and heard James M. Cox express appreciation to the approves and agencies.

Mr. Reinsch addressed the last meeting this season of the Broadcast Adv. Club of Chicago at the Morrison Hotel in that city.

Weekly appearances of DNC Chairman Butler and Representative Leonard Hall, on a program like NBC-TV’s Today, as originally suggested by the Democrats and rejected by the GOP, would prove “advantageous to the American people” on certain controversial and crucial issues, Mr. Reinsch felt. He also reported “not much interest” by the Republicans in the proposed debates involving joint appearances by presidential candidates on a single program.

Mr. Reinsch said he had in mind actual debates and not “discussions” like those held by Sen. Estes Kefauver (D-Tenn.) and Adlai Stevenson, Democratic Presidential aspirants, on ABC radio-tv from Miami last month.

At that time Mr. Hall called the broadcast a “hop.”

The Democrats’ radio-tv campaign has been set, he noted, with formats depending somewhat on what candidate the party selects.

Convention planning for Chicago’s International Amphitheatre and Conrad Hilton Hotel were reviewed in detail by the Democratic radio-tv consultant, with comparisons of 1952 coverage. He also expressed passing interest in WNBQ (TV) Chicago’s color tv operations.

Among his new duties, Mr. Reinsch cited telephone installations, hotel accommodations, radio-tv facilities, press corps, the use of television, air conditioning, transportation, food, camera placements and a host of other arrangements. He said “we think we have the problem licked” on avoidance of any “view-blocking” between convention chairman and state delegates.

The Democratic National Committee has devised a miniature “mock-up” showing the amphitheater floor arrangement.

Mr. Reinsch also observed that, contrasted to the Republican convention “the Republicans should be able to schedule San Francisco (the GOP convention site) like a studio show.” He traced streamlining of convention procedures already adopted in view of 1952 experience, such as polling of delegates, to be backgrounded this year. He also felt the GOP does have a “tremendous financial advantage” and that “finances are and will continue to be a problem in the Democratic Party.”

Hall Likes Time Requests

Butler-Hall Debates Still Goal of Democrats

THE DEMOCRATIC PARTY will “continue to press” for GOP agreement on a series of proposed weekly Butler-Hall debates on network television, Mr. Reinsch (see above) asserted last Wednesday.

Mr. Reinsch suggested to midwest broadcasting advertisers and representatives that “the more we become acquainted with the candidates, the better chance we have to discuss problems of interest to us” when one of the “famous presidential candidates” is on the panel. In that way, he noted, “our case will be heard and our treatment will be on a fair rather than prejudicial basis,” notwithstanding newspaper headlines. He obviously alluded to the various broadcast and related investigations in Congress and government departments and agencies.

Mr. Reinsch addressed the last meeting this season of the Broadcast Adv. Club of Chicago at the Morrison Hotel in that city.

Weekly appearances of DNC Chairman Butler, and Representative Leonard Hall, on a program like NBC-TV’s Today, as originally suggested by the Democrats and rejected by the GOP, would prove “advantageous to the American people” on certain controversial and crucial issues, Mr. Reinsch felt. He also reported “not much interest” by the Republicans in the proposed debates involving joint appearances by presidential candidates on a single program.

Mr. Reinsch said he had in mind actual debates and not “discussions” like those held by Sen. Estes Kefauver (D-Tenn.) and Adlai Stevenson, Democratic Presidential aspirants, on ABC radio-tv from Miami last month. At that time Mr. Hall called the broadcast a “hop.”

The Democrats’ radio-tv campaign has been set, he noted, with formats depending somewhat on what candidate the party selects.

Convention planning for Chicago’s International Amphitheatre and Conrad Hilton Hotel were reviewed in detail by the Democratic radio-tv consultant, with comparisons of 1952 coverage. He also expressed passing interest in WNBQ (TV) Chicago’s color tv operations.

Among his new duties, Mr. Reinsch cited telephone installations, hotel accommodations, radio-tv facilities, press corps, the use of television, air conditioning, transportation, food, camera placements and a host of other arrangements. He said “we think we have the problem licked” on avoidance of any “view-blocking” between convention chairman and state delegates.

The Democratic National Committee has devised a miniature “mock-up” showing the amphitheater floor arrangement.

Mr. Reinsch also observed that, contrasted to the Republican convention “the Republicans should be able to schedule San Francisco (the GOP convention site) like a studio show.” He traced streamlining of convention procedures already adopted in view of 1952 experience, such as polling of delegates, to be backgrounded this year. He also felt the GOP does have a “tremendous financial advantage” and that “finances are and will continue to be a problem in the Democratic Party.”

Hall Likes Time Requests

REINSCH TO RUN DEMOCRAT CONVENTION

CBS-TV to Show Delegates How It Covers Conventions

AN UNUSUAL service will be provided by CBS-TV to more than 7,000 delegates and alternates to the presidential nominating conventions this summer when they will be invited to attend two special orientation telecasts showing how tv and radio do the job.

The telecasts will be on closed-circuit over CBS-TV from 5:30 p.m. EDT July 23 for all Democratic delegates and July 25 for all Republican delegates. According to Sig Mickelson, CBS vice president in charge of news and public affairs, delegates will be invited as soon as their names are received. Each delegate will receive a written invitation to view the telecasts at the CBS-TV affiliated station nearest to him. Mr. Mickelson noted that recording of the telecasts will be made available to delegates in Alaska, Puerto Rico, Canal Zone and the Virgin Islands.

These delegates constitute perhaps the only special group in the nation who will be unable to watch the progress of their conventions on television, Mr. Mickelson pointed out. "As a matter of fact, the participants in the convention broadcasts, we feel it both useful and important that they be familiar with the workings of the broadcasts and their part in them."

The closed-circuit telecasts, which will originate in New York, will show delegates sections of the interiors of Chicago’s International Amphitheater and San Francisco’s Cow Palace through tv cameras’ drawings and life-size “mock-ups.” The telecasts will show delegates where they will be located, plus information on delegate and party headquarters, hotels, airports and rail terminals, scenic highlights and direct routes to the convention halls.

ike Not Set on Speeches

President Eisenhower has no idea how many campaign speeches he will make in the autumn race, he said Wednesday at his news conference. Answering a question by Ray Scherer, Iowan and head of the President’s press office, the President might make more than the six speeches GOP Chairman Leonard Hall had specified. The President said he had not discussed campaign details with Mr. Hall or anyone else in a specific or definitive form.

Hall Likes Time Requests

To Gratis Campaign Trains

Republican National Chairman Leonard Hall said last week he feels networks should no more be asked for free time by political candidates than a candidate would ask the railroads to furnish him an expense-free campaign train.

Mr. Hall expressed this sentiment in an address to the National Press Club Thursday after being asked about “equal time” bills pending in Congress. He cited the difficulties encountered by broadcasters from candidates of minority parties asking for equal time.

The GOP national chairman said he was not disclosing campaign plans, but declared the Republican effort would emphasize full and intensive use of the “new” medium.

WNAC-TV Gives Low Rates To Political Candidates

CANDIDATES for state-wide public office will receive lower rates than other advertisers on WNAC-TV Boston, according to George W. Steffy, vice president.

Rate Card No. 9, which incorporates a general rate in radio, became effective June 1. However, until the general election Nov. 6, political candidates will be charged at the rates quoted in the old card, which had a top hourly rate of $2,000.

Get-Out-Vote Campaign Scores in Davenport Test

PILOT CAMPAIGN to test ways of increasing registration of voters during the campaign year, conducted in Davenport, Iowa, brought out 2,267 new registrants compared to a normal 200, according to American Heritage Foundation. The drive was conducted in cooperation with radio stations KIMB and KINB in an effort to develop techniques for get-the-out-the-vote effort planned later in the year.

The local steering group consisted of the American Legion, Junior Chamber of Commerce, NAACP, and local radio broadcasters. The broadcast stations staged a series of special programs and promotions, with Ernest C. Sanders, WOC-AM-TV, as local chairman. John A. Carter, Charlotte, N. C., agency head, is on leave to ARH to work on the drive.

KNUCKLE-RAPPING FACES CODE VIOLATORS

NARTB Tv Code Review Board to issue ultimatums to chronic offenders. Disciplinary action would be in form of code membership withdrawal.

TELEVISION'S self-regulation project, designed to prevent advertising and programming excesses, is nearing the crackdown stage.

Last Thursday the NARTB Television Code Review Board decided to give a number of tv code violators a last chance to raise their standards and thus avoid the first disciplinary action in the four-year history of self-regulation.

G. Richard Shafto, WIS-TV Columbia, S. C., Tv Code Board chairman, announced Thursday that several tv stations had been advised their code memberships are in jeopardy. Operators of the stations are being asked to confer personally with Edward H. Bronson, director of tv code affairs, and to consider "remedial measures in order to bring their operation into conformity with the code."

This policy action was taken after code officials had increased their monitoring of tv stations and networks. It's known that similar disciplinary action is considered with other stations now under review.

In a three-day meeting that started Tuesday the code board issued rulings on pitch programming and piggy-back or combination announcements. The board issued a directive to all code subscribers to take pitch advertising off their schedules as soon as present contracts have expired. Pitch programs, designed to entice buyers with bargain offers for merchandise the advertiser has no intention of selling, are found mainly in major metropolitan centers. Because of recent agitation, many pitch programs have been shortened from a quarter or half-hour to a minute or less.

Under the new interpretation, the board held "sponsored programs . . . consisting substantially of continuous demonstration or sales presentation violate not only the time standards established in the code, but the broad philosophy of improvement implicit in the voluntary code operation."

After reviewing a series of spot announcements that advertised more than one product, the board held, "When unrelated products are advertised as separate and distinct messages within one announcement, they in effect constitute separate announcements." However, it was noted that it is "an acceptable practice to advertise related (e.g., various frozen food products, or automobile factors) or compatible (e.g., pancakes and syrup, or furniture and carpeting) products within the framework of a single announcement, when integrated to form a single message."

The board issued an earlier ruling that film plugs should be counted against the advertising copy time allowance for the program in which they appear.

Amendments to the tv code language were adopted, covering multiple announcements and admission of producers and distributors of tv films as affiliate code subscribers. These actions are subject to NARTB Tv Board action at the June 20-22 directors meeting in Washington.

RETMA Annual Convention Opens Tuesday in Chicago

ANNUAL convention of Radio-Electronics-Tv Mfrs. Assn. opens tomorrow (Tuesday) at the Edgewater Beach Hotel, Chicago, winding up Thursday night with presentation of the association's medal of honor to Paul V. Galvin, president of Motorola Inc. and a RETMA board member for 22 years.

H. Leslie Hoffman, RETMA president, will preside at meetings. All directors and officers will be elected simultaneously, a change in present contracts.

A meeting of the Public Relations & Advertising committee will be held Tuesday morning. Topics are expected to include plans for National Television Week, to be held in September.

Panel at AFA's Convention To Feature Jones, McGannon

MERLE JONES, executive vice president of CBS-Tv, and Donald H. McGannon, president of Westinghouse Broadcasting Co., will represent tv and radio, respectively, at a media panel session tomorrow (Tuesday) at the Advertising Federation of America's 32nd annual convention in Philadelphia.

CBS-Tv President J. L. Van Volkenburg had been slated to join Mr. McGannon at the tv representative but yielded his place to Mr. Jones in order to be available at the Senate Interstate & Foreign Commerce Committee hearings in Washington this week (see story page 28). The nine-man media panel, appearing at AFA's Tuesday luncheon session, will discuss "How Will Media Meet the Changing Trends in Marketing?"

AFA's convention was scheduled to open yesterday (Sunday) with a brunch, sponsored by the Council on Women's Clubs, at which Mrs. Harriet Edmunds, president of Chartmakers Inc., New York, was to be designated as 1956 Advertising Woman of the Year. Bonnie Dewes of D'Arcy Adv., St. Louis, was to make the presentation. Mrs. Edmunds was chosen by a judging panel consisting of Leo Burnett, Leo Burnett Co., Chicago; Allan Clark, D'Arcy Adv., St. Louis, and Herman C. Sturm, Nation's Business magazine.

Nine Vice Presidents Named By International Advertising

APPOINTMENTS of nine new vice presidents of the International Advertising Assn. were announced last week by IAA as a step toward improved coordination of association activities throughout the world.

Radio, Tv Sets Session For Engineers' Conference

THREE sessions on radio and tv are scheduled at the 1956 summer and Pacific general meeting of the American Institute of Electrical Engineers at 25-29 at San Francisco's Hotel Fairmount.

One session, Wednesday afternoon, June 27, will deal with high fidelity amplifiers, am-tv research and transmitter remote control. J. B. Brown, WEW-TV, Cleveland, Ohio, will preside. The Thursday morning session will be devoted to television networks, measurements, recording and vhf propagation, with O. W. B. Reed of Tandy-Leiby Inc., the Middle East; Hideo Yoshida, president of Dentu Adv. Ltd., Tokyo, the Far East; Charles W. Applegate, export sales manager, The Esterbrook Pen Co., eastern U. S., and FitzHugh Granger, manager merchandising services, International Harvester Export Co., central U. S.

Michigan AAAA Council Plans Detroit Meeting

THE Michigan Council of the American Assn. of Advertising Agencies will hold its spring meeting tomorrow (Tuesday) at the Rackham Memorial Bldg., Detroit. Robert E. Anderson, Batten, Barton, Durstine & Osborn and chairman of the Michigan Council, will open the meeting.

Speakers include George Wolf, vice president in charge of radio-tv, Rutheflrauf & Ryan, New York, and Barrett Brady, vice president in charge of creative services, Kenyon & Eckhardt, New York.

Page 56 • June 11, 1956
Which ad would you run?

Who stole the banana?

Who stole the banana?

Who stole the banana?

Who stole the banana?

One of these four advertisements will appear in LIFE and The New Yorker magazines the week of June 30. Which do you think it should be?

It took us some time to decide on the best copy approach—mainly because there are so many good things to say about bananas. They have a rich supply of protective vitamins, minerals and energy-building sugars. They're a wonderful food for dieters—and they're also one of the easiest foods to digest.

Bananas know no age barrier—they're an important food from infancy to old age. And they come wrapped in a nature grown dustproof package.

We narrowed the banana story down to four different copy approaches. Then we selected four different photographs. And, after careful consideration, we made our choice. Wonder if it's the same one you would choose?

P.S. Write and tell us which ad you would pick to run—A, B, C, or D. Pick the winner, and United Fruit Company will send you an award in keeping with your status as an advertising expert. Send your choice to United Fruit Company, Pier 3, North River, New York, N.Y.
PROBLEMS moved the budget to 12 months, instead of one. Another major reorganization involves the selection of photography or material upon which pictures are a significant force in communications, quoting a research study that "65 percent of the knowledge of the human being is assimilated through the eyes." He cautioned that it takes a better picture to hold the eye because it is constantly being "assaulted by competing pictures." Mr. Elton used slides to demonstrate steps in the development of advertisements and indicated the reasons for selecting a particular approach for a particular selling job. He explained that the selection of photography or art work and other components of an advertisement usually involves the research of an agency's knowledge of its audience and of the media in which it is to appear. He pointed out that changes made along the way toward the finished filmed commercial are necessary ones but often lead film producers to consider an agency a difficult customer.

GILTIN Talks On TV's Service

IRVIN GILTIN, CBS director of public affairs, is scheduled to address the principal luncheon of a June 13-14 workshop on tv production for national social welfare organizations, in New York, under the sponsorship of the National Social Welfare Assembly. Mr. Giltin will discuss "Television's Role in Interpreting Community Service and Social Welfare." Other broadcasters who will participate in the program—part of which will be on "Solving Basic TV Problems"—are Clarence Worden, WCBS-TV New York public affairs director; Robert B. MacDougal, WATV (TV) Newark program director, and A. Cledge Roberts, New York U. radio and summer workshop director.

RAB PLANS INCREASED SALES ACTIVITIES

Bureau board of directors also approves second budget increase in six months, sets four regional management conferences for August and September and intensifies participation in local selling program.

HEAVILY stepped-up sales activities backed by the second budget increase in six months were approved by the Radio Advertising Bureau's board of directors last week.

The board, headed by Joseph E. Baudino of Westinghouse Broadcasting Co., approved:
- A series of four regional management conferences to be held in August and September as "seminars" for managers and sales managers.
- Intensification of RAB's local "sales committee" program, enabling teams of RAB executives to make more presentations to more local and regional advertisers in more cities during the next year.
- Expansion of this year's second annual National Radio Advertising Conference, to be held Oct. 29-30 at New York's Waldorf-Astoria Hotel (BT, June 4).
- Expansion of RAB's "blitz" plan of bombarding key advertisers with material on radio's selling power.
- Increase of RAB's operating budget to an annual rate of $790,000. This represents a $15,000 increase over the figure set three months ago when 1956's first upward revision moved the budget to $775,000.
- Plans for participation in next year's National Radio Week, endorsing the week of May 5 as the period for that salute [BT, June 4].

Each of the four regional management conferences will bring together between 40 and 50 stations and station sales managers in two-day sessions to hear "125 different solutions to problems that impinge on sales—sales management problems, promotion problems, program problems and general management problems," President Kevin Sweaney told the directors.

First of the conferences is scheduled Aug. 16-17 at Rickey's in Palo Alto, Calif., for west coast station executives. It will be followed by one for the Midwest on Sept. 6-7 at a site to be selected; a southern meeting Sept. 10-11 at the Buena Vista in Biloxi, Miss., and an eastern meeting Sept. 13-14 at Skytop Lodge, Skytop, Pa.

Under RAB's local "sales committee" program, RAB member stations in an area work jointly with an RAB executive in making unified presentations on radio's sales effectiveness to key local advertisers. The expanded plans approved last week call for such visits to 20 cities during the next year, with four RAB executives (instead of one) working each city and making up to 45 presentations (instead of three to nine) to local and regional advertisers [BT, June 4]. First cities to be visited are Boston, Chicago and San Francisco.

In the expansion of the second National Radio Advertising Conference, RAB plans to invite more than 500 agency-advertiser decision-makers, as against 300 who were RAB's guests last year. RAB sponsors and arranges the conference but principal speakers are advertiser and agency people who present case histories on their successful use of radio.

The "blitz" plan, also to be expanded, involves the concentration of RAB direct-mail, original research, special presentations and similar radio sales material upon all important executives within a given industry for a 30-day period, instead of spreading it over a period of a year. This technique has been used in the beer industry, is currently being used among watch advertisers, will be expanded to other fields including tobacco, food, chain stores, appliances and cosmetics.

The board meeting was held Wednesday. It was preceded by Tuesday sessions of the executive and finance committees, whose members were on the board.

John Poor, president of Mutual, was elected to the board and appointed to the finance committee. He replaces Robert A. Schmid, also of Mutual but now more closely identified with activities of the parent RKO-Teleradio Pictures and the General Teleradio Film Div., than with the radio operation alone.

Agency Film Demands Explained to SMPTE

IN AN attempt to familiarize film producers with the reasons behind the demands made upon them by advertising agencies, two executives from J. Walter Thompson Co., New York, last week spoke on current day advertising practices before the Atlantic Coast section of the Society of Motion Picture & Television Engineers in New York.

William Briggs, account executive, briefed the SMPTE audience on the growing importance of market (product and consumer) research today. He stressed the increasing popularity of new population and shifting tastes as considerations that make it impractical to rely on experience in predicting marketing attitudes. He explained that advertisers and agencies must make use of product research to determine "the preferences of the market as applied to the characteristics of products and their containers." Consumer research, he said, is used to analyze the characteristics of the ultimate user in reference to a specific product . . . and provides a better understanding of end uses of the product.

Wallace Elton, vice president and director of J. Walter Thompson, spoke on the "use of pictures in communications." He made the point that pictures are a significant force in communications, quoting a research study that "65 percent of the knowledge of the human being is assimilated through the eyes." He cautioned that it takes a better picture to hold the eye because it is constantly being "assaulted by competing pictures.

Mr. Elton used slides to demonstrate steps in the development of advertisements and indicated the reasons for selecting a particular approach for a particular selling job. He explained that the selection of photography or art work and other components of an advertisement usually involves the research of an agency's knowledge of its audience and of the media in which it is to appear. He pointed out that changes made along the way toward the finished filmed commercial are necessary ones but often lead film producers to consider an agency a difficult customer.

Earnings for Writers In Tv, Films Increase

A STRONG JUMP in tv and film writers' income in Hollywood was registered during the past year, according to the annual financial report of Writers Guild of America (West) by its treasurer, Curtis Kenyon. Important gains were made in both motion picture and television fields with the result that revenue for film writing is showing signs of recovery and television writers have pulled within nearly 30% of total earnings of screen writers. Gains in radio earnings also have been made.

Dues from screen writers increased from $86,200 for the year ending March 31, 1955, to $107,500 for the year ending March 31. According to Don Taradash, president of the Screen Writers branch, this means that screen writer income is back above the $10 million annual figure for first time in three years. After a 1952 high of $11.8 million, screen income by mid-1955 had slid to $8.6 million, he said. But for this past year the figure jumped to $10,750,000. Television dues rose from $19,600 for the year ending March 31, 1955, to $47,400 for the twelve months ending March 31, 1956, representing income of $4.74 million.

Approximately $250,000 in re-run payments have been collected by the Writers Guild of America (West) for members in its television writers branch, according to David Dortort, president of the latter group.

In a report at the guild's annual meeting in Los Angeles, Mr. Dortort said that the payments accrued under a film television contract now superseded by new agreements. These new agreements, recently concluded with major film tv subsidiaries and the Alliance of Independent Film Television Producers, will assure an even quicker and greater return on re-runs, Mr. Dortort said.

AFM Opens Convention Today; Local 47 Battle in Spotlight

THE American Federation of Musicians opens its annual convention at Atlantic City, N. J., today (Monday), with the spotlight centered on an expected appeal to be laid before the meeting by 11 rebel leaders of Los Angeles Local 47 who have been ordered suspended from the union for varying periods of times [B*T, May 14]. The International Executive Board of AFM agreed to hold the suspension in abeyance until their appeal could be placed before the AFM.

AFM Hearings Will Continue

FURTHER investigation of the AFM music performance trust fund, with hearings expected to be held in New York and Washington, was reaffirmed last week by Rep. Joe Holt (R-Calif.). He is the Republican member of the three-man subcommittee of the House Labor and Educa
tion Committee which probed the trust fund and its relation to the anti-Petrillo rebellion within AFM Hollywood Local 47 a fortnight ago [B*T, May 28]. Congressman Holt said the hearings will be resumed after the AFM national convention in Atlantic City this week.

Radio Station WCKY
Cincinnati, Ohio

Dear Top:

31,835 new customers!

Yes, Top, WCKY has produced, in a few months, exactly 31,835 new customers with more coming every day, for our client, Ellers Company of Burbank, California.

WCKY has always produced box-car totals for our clients. We're writing you about the Eller results because they prove that WCKY is still booming along, even as of old, despite television.

And here is a point which interests our client (and us) even more than the actual results: As you know, Ellers Company distributes on an ON-APPROVAL FREE TRIAL basis, an automotive item called the GAS SAVER or GAME NEEDLE. Ellers collects no money in advance—none until and unless the prospective customer wants to pay for the Gas Saver. So, it looks like our client takes TWO chances:

1. That their automotive item will do the job claimed for it.
2. That the quality of your listeners is satisfactory and enough listeners will pay for the Gas Saver, if they like it.

The fact that we've just authorized you to produce 50,000 more responses is proof beyond doubt, of the quality of your listeners. And, of course, it's proof that WCKY is still the best-producing station in the country.

Sincerely,

SHAFER BRENNAN MARGULIS ADV. CO.

FCC PREPARED TO FINALIZE PROPOSALS ON TELEVISION ALLOCATIONS THIS WEEK

Commission meets tomorrow to study problem and is expected to entertain plans looking toward moving major portion of U.S. to highband if present coverage can be maintained; some deintermixture seen permitted soon.

BUTTRESSED by a new court ruling giving it virtual carte blanche in handling of tv allocations, the FCC this week is prepared to finalize pending proposals designed to get it off the Congressional hook, and pave the way for greater competition in nation-wide video service. The action will be preliminary, and preparatory to new rule-making proceedings. It looks toward a spectrum that will encompass both uhf and vhf, but with the immediate objective of providing at least three competitive tv services in primary markets (three basic network competition), even if it entails some slight deviations from established standards.

THESE 20 KANSAS COUNTIES ARE DOMINATED BY WIBW-TV for the full story SEE YOUR A.R.B. for the TOPEKAREA

While the report to be considered tomorrow (Tuesday) will anticipate the eventual move of tv service to uhf, either for the entire country, or a major segment of it, there will be no "dead-line" for the shift. It would come only if uhf is found capable of providing adequate coverage, comparable to that offered by vhf.

It will also, it is generally known, offer to entertain petitions for deintermixture or vhf drop-ins—provided that certain conditions are met.

And it will boost uhf maximum permissible power to 5 million watts. Uhf maximum at present is 1 million watts.

The Commission met last Monday and was in general agreement on its course of action. Only Comr. Rosel H. Hyde was understood to completely oppose the move. The vote is expected to be 6-1.

[For a more detailed report on the pending proposal, see below.]

If accepted by the Commission tomorrow the report could be issued this week. However, this is believed problematical because editorial revisions may be required.

One of the major editorial changes is expected to be concerned with the implications of Thursday's Court of Appeals decisions in the deintermixture cases (see story page 68). There is anxiety in some FCC circles that the appellate court's ruling was based in part on one of the FCC's arguments—that the Commission felt deintermixture could only be accomplished on a nationwide scale, not on a piecemeal basis. Since this is virtually what the Commission is proposing to do, some rewording of the report to bolster the Commission's decision to provide for case-by-case consideration may be expected.

Meanwhile, behind the scenes activity which was aimed at establishing a non-profit foundation to upgrade uhf along the lines of Chairman McConaughhey's call for a "crash" uhf program, made at the NARTB convention last April, reached a climax last Monday when a group of manufacturers and broadcasters met and failed to agree on a method of operation.

At the same time, it was learned that the ad hoc committee appointed by Sen. Warren G. Magnuson (D-Wash.), chairman of the Senate Commerce Committee, within a week or two may agree on a report which would call for an independent "audit" of television from a technical, economic and social aspect (see story page 72).

How It Might Be Done

The FCC's plan of action—if adopted without serious revision tomorrow—envisages a possibility of eventually moving all television to the uhf band or doing so in certain areas (such as Zone I or that area east of the Mississippi River).

But, the Commission holds, this cannot be done until it is known whether uhf can do the job now being accomplished by vhf. The goal the Commission apparently seeks is that uhf perform in coverage and otherwise on a par with vhf. This means a development program—not only to determine uhf's overall potential, but also to increase the capabilities of uhf transmitters, antennas and receivers.

Chairman McConaughhey called for a uhf development "crash" program in his speech before the NARTB convention last April.

Until the potential of uhf is known, and equipment is improved, the Commission is agreed, it is understood, that there should be no mass deintermixture, no deletion of the table of allocations, no formal changes in milage separations. The Commission will, however, look with favor, it is understood, on deintermixture requests where such a move will
Fastest aircoach coast-to-coast

THE
ROYAL
COACHMAN
DC-7 NONSTOP

New York-Los Angeles $99
Washington-Los Angeles $98

The first nonstop trans-continental DC-7 aircoach

Already the star of the vacation season, American’s new “Royal Coachman” is the first nonstop aircoach service coast to coast on the DC-7, world’s fastest airliner. This luxury aircoach is an all-coach service. It offers reserved seats... passenger lounge... and fine meals, served at economical prices. There are three “Royal Coachman” flights daily—two between New York and Los Angeles offering the fastest daylight or overnight low fare service—and one between Washington and Los Angeles, over 2 hours faster than any other aircoach. Make your reservations now!
COUPLE OF NEWCOMERS MOVING

ABC Radio adds
Grand Central Station and
The Jack Paar Show
to its successful
morning programing bloc
INTO THE BLOC!

July 2 is moving day. First, Grand Central Station moves into the 11 AM (NYT) slot, Monday through Friday. And right next door, at 11:15 AM (NYT), Monday-Friday, comes the lively Jack Paar Show!

Grand Central Station — the famous drama series created by Martin Horrell — returns to radio with all the expert acting, production and scripting that made it famous. Stories are weekly — start Monday, end Friday to maintain ABC Radio's unique morning programing formula.

The Jack Paar Show — built around Paar's special brand of humor. Jack comments on human foibles, plays hit tunes, talks and kids with famous guests. He not only delivers the commercials for you, but also is one of the nation's most merchandisable personalities to trade and public alike.

Two bright newcomers in a bloc of old (and substantial) friends:

Two additional quarter hours of topflight network morning radio from the network that is e-x-p-a-n-d-i-n-g.

*Special introductory rates through Dec. 28, 1956, to prove to you, your slide rule and the most merchandising-minded sales manager alive that ABC Network morning radio is the move for you.

ABC RADIO NETWORK
result in assigning to a market at least three comparable facilities. Presumably, such a request will have to prove no serious loss of service to viewers now being served by existing or potential vhf stations.

The FCC will, it is indicated, accept some reduction in vhf co-channel separations in order to permit the shoehorning of additional vhf channels into a market in order to meet this three-to-a-city goal. No change in adjacent channel separation will be tolerated, it is presumed.

Present vhf mileage separations call for 170 miles between stations on the same channel in Zone I, 190 miles in Zone II and 220 miles in Zone III.

The only affirmative action which it is believed the FCC will take in tomorrow's meeting will be the boost of vhf maximum permissible power to 5 million watts. This compares to today's maximum of 1 million watts. Only four vhf stations are operating, or are authorized this maximum today. They are WBRE-TV and WLK-TV Wilkes-Barre, Pa.; KPTV (TV) Portland, Ore., and WJMR-TV New Orleans, La.

Zone I Tower Proposal

The proposal to permit vhf stations in Zone I to increase their antenna height above average terrain from the present 1,000 ft. maximum to 1,250 ft. will be denied, it is indicated. Maximum antenna heights are those heights at which maximum power may be used. Stations over the maximum heights today must reduce power according to a height-power ratio. Last December, the Commission revised its antenna height rules to approve the 1,210-ft. antenna of WBEN-TV Buffalo, N. Y. The tower was built in 1951 when the Commission issued its Third Report on tv allocations permitting this height.

However, when the Commission issued its Sixth Report and Order in 1952, the maximum was set at 1,000 ft.

Running throughout the Commission's thinking regarding the future move of all tv to uhf (or in a major section of the country) is the fear that uhf may not be able to meet the service performances now in existence with vhf. Yet, it is acknowledged that the uhf band provides the only space where there are sufficient channels to permit a national, competitive television service.

There are strong inferences that proposals for selective deintermixture, changes in mileage separations to permit more vhf channels in various markets and other plans are palliatives, at best. The Commission presumably is denying these suggestions, including recommendations submitted by ABC, CBS, Comr.-designate T. A. M. Craven, Mullaney-Welch, Mott & Morgan.

Will Solicit Comments

It is understood that the FCC will call for comments on its plan to move tv to uhf and its desire for research and development with the deadline to be in 60 days after issuance of the report on the allocations proceeding. After that, the Commission is understood to hold to the idea that further proceedings may be necessary.

In requesting ideas and recommendations on how it should go about realizing this move of tv to uhf (provided uhf is shown to have the desired capabilities), the Commission inherently also is inviting comments from non-broadcast services, military services and government agencies on their needs and intentions regarding the use of uhf. The lower uhf band (chs. 2-6) is said to be particularly desirable for international communications, "scatter" communications and for additional spectrum space for such non-broadcast services as taxicab, petroleum, railroad, industrial, etc.

Among the ideas the Commission seemingly is looking for regarding uhf's potentials are those involving shadow areas, the use of boosters and satellites, as well as improvements in transmission and reception equipment.

A basic implication in the Commission's thinking, it is believed, is that uhf must be the equal of vhf—not in every respect, perhaps, but certainly on an overall basis.

If there is a changeover to uhf, the Commission presumably would afford uhf stations a transition period—the figure of 10 years has been mentioned. This would also protect the public's investment in vhf receivers. During this transition period, uhf stations would undoubtedly be permitted to operate simultaneously on vhf and uhf. There has been some talk of a deadline date—perhaps five years after official notice of the changeover—when vhf stations would be required to begin simultaneous broadcasting.

May Seek Shipment Plan

There may be a request that Congress cooperate by passing legislation forbidding the interstate shipment of vhf-only receivers after a certain date. This would force manufacturers to fall in line with the FCC's action if it is felt.

This synopsis of Commission thinking is expected to be adopted by a six to one vote. Comr. Rosel H. Hyde is understood to be the lone holdout. There also is talk that Chairman McConnaughey will try to get Mr. Craven to express his approval of this approach to the vexatious allocations problem.
Hugo Bondy, Chief Engineer, WAGA-TV, Atlanta

**Says:**

"**G-E image orthicons pay us a bonus in extra hours of top-grade performance!**"

"The first General Electric tube that WAGA-TV bought has clocked over 800 hours, and image reproduction is as sharp and clean as the day we put it in the camera. Other G-E 5820's are showing the same long-life efficiency.

"In all ways, General Electric image orthicons are proving a good investment. Even the packaging is professional—the square containers won't roll off shelves, and damage to the tubes from handling is prevented by cushioning, so that the tubes are protected top and bottom. "Plenty of research, manpower, and money went into G-E Broadcast-Designed camera tubes. That's evident to satisfied users like Station WAGA-TV!"

**Progress Is Our Most Important Product**

GENERAL ELECTRIC
COURT UPHOLDS FCC IN VHF GRANTS

Appellate unit says it is for Commission to decide if granting v's in established u markets will destroy the uhfs, upholds Corpus Christi, Evansville and Madison grants.

IT IS UP to the Commission to bear the responsibility of deciding whether the grant of a vhf facility to a uhf city might destroy the uhf outlets now in operation there.

That is what the full nine-judge U. S. Court of Appeals in Washington decided last week when it issued a sweeping affirmation of the FCC's power to use its discretion in refusing to stay vhf grants in Corpus Christi, Tex.; Evansville, Ind., and Madison, Wis. These were the bellwether cases involving the petitions of uhf stations to intervene in pending vhf cases or to have the FCC "freeze" vhf decisions until the allocations proceeding was completed.

Argued last April before the full appellate court, the precedent-making ruling upheld the right of the Commission to proceed in making vhf grants, even while it was considering a possible revision of its allocations standards.

The court's decision, written by Circuit Judge George T. Washington, with Judge David L. Bazelon concurring, asserted that "the Commis-

**FCC Gets Protests On 'Economic Injury'**

HOW the FCC should handle "economic injury" protests is due to come into focus today (Monday) in oral argument in the Cleveland, Tenn., case where WBAC, that city is objecting to the grant of WCLE there.

Briefs covering legal and policy questions raised by the Commission last month (BT, May 14) have been filed by the Broadcast Bureau, WCLE, WBAC and WHLN Harlan, Ky.

The latter also was involved in an economic injury protest case, but protestant WKYV Harlan gave up the fight and withdrew its application. WKYV received a monetary settlement from WHLN for this move (BT, June 4).

Broadcast Bureau and WCLE took the position that the FCC cannot legally deny a broadcast application because of economic impact on an existing station, and they said, even if the Commission has this authority it should not exercise it. WBAC and WHLN took the opposite view.

The economic injury factor, raised by WALP and WLRA Laurel, Miss., against the grant of WPWR to that city, was dropped prior to oral argument before the Commission en banc last week. However, protestants argued that the Rev. Carroll E. Jackson, Baptist minister and WPWR principal owner, had misrepresented financial qualifications and technical elements to the Commission. Mr. Jackson, arguing his own case, denied any wrongdoing.

Broadcast Bureau held that there had not been "willful intent" to deceive and indicated it was agreeable to the grant being sustained.
Case History No. 21

The worst California disaster since the San Francisco earthquake struck unexpectedly three days before Christmas, 1955. Within hours, the heaviest torrents anyone could remember inundated entire communities. In the north, the rain-gorged Eel and Klamath Rivers burst their banks. Eureka, a city of more than 23,000, was isolated—its transportation and communication facilities out. To the south, 325 miles away, six feet of water submerged Santa Cruz, where communication facilities also were disrupted.

Frank R. Brown, manager of Eureka’s KHUM, had a story to tell—and what a story! He told it to The Associated Press over a short wave system he had the foresight to set up among amateur radio operators in Eureka and AP in the San Francisco bay area. Working round-the-clock, Brown ranged the flood-stricken area. Then he hitched a ride with a helicopter pilot and returned to Eureka. He used the air waves to furnish fellow AP members graphic descriptive such as this: “Can’t say how many houses I’ve seen go down the river, but there were at least 70 or 80—some with people hanging on and yelling.”

At Santa Cruz, Gloria Lorenzo, News Director of KSCO, also had a story to tell—and what a story! She decided to risk a 20-mile drive across the Santa Cruz mountain to Los Gatos in hope of finding a telephone line over which to reach AP. She weaved her way around twelve landslides, only to face another disappointment. The wires at Los Gatos also were out. She pressed another hazardous ten miles to Saratoga. Telephones there were operating. She called AP in San Francisco and poured out her story.

Days later a final count on the California holocaust began to emerge. Known deaths rose to 66; 12,500 were evacuated from one community alone, and damage was estimated at $150,000,000.

It was one of the big stories of the year, and AP coverage was fast and accurate, thanks to the cooperation of AP members.

Miss Lorenzo and Frank Brown are among the thousands of reporters who make AP better... and better known.

If your station is not yet using Associated Press service, your AP Field Representative can give you complete information. Or write—

Those who know famous brands... know the most famous name in news is AP.
CRAVEN BID FINDS FAVORABLE RESPONSE

One-man subcommittee hears first stage of FCC candidate’s nomination. There’s no opposition in sight; confirmation could come this week.

THE NOMINATION of T. A. M. Craven to the FCC breezed through a hearing by the Senate Commerce Committee’s Communications Subcommittee last week in a session that lasted only a few minutes.

No testimony was offered opposing President Eisenhower’s nomination of Mr. Craven, a Democrat, to fill the FCC vacancy which will be caused by the expiration June 30 of the term of Comr. Edward M. Webster, an Independent. He was questioned briefly on only two subjects—deintermixture and daytime broadcasters’ problems—but was not asked to commit himself beforehand.

Sen. John O. Pastore (D-R.I.), subcommittee chairman, was the only senator present at the brief proceedings. Other members of the subcommittee are being polled and the unit no doubt will report favorably on the nomination to the parent committee, which will act on the nomination at its regular meeting Wednesday morning. The nomination is not expected to meet any significant opposition, either in the Senate Commerce Committee or the Senate itself. The latter body could confirm Mr. Craven’s nomination the following day.

Other members of the subcommittee who are being polled: Sens. A. S. Mike Monroney (D-Okl.), Sam J. Ervin Jr. (D-N.C.), John W. Bricker (R-Ohio) and Charles E. Potter (R-Mich.).

Mr. Craven told Sen. Pastore he was severing “absolutely” his connections with Craven, Lohnes & Culver, Washington radio-television consulting engineers firm of which he is a partner. He listed 45 applications by CL&C clients to the FCC on which he said he will disqualify himself from voting and will not attempt to influence the vote of other commissioners. He has no other interests, he said, which are “incompatible” with FCC membership.

Most of the 45 CL&C client applications are routine, Mr. Craven said, and the only ones which are likely to prove troublesome are the Boston ch. 5 case, in which Greater Boston TV Corp., a CL&C client, has been favored for the grant by an initial decision, and the Pittsburgh ch. 4 case, in which WTV City Inc., a client of CL&C, has been recommended by an examiner for the grant.

To a question on whether he had any comment on North Carolina daytime broadcasters’ troubles, submitted by Sen. Ervin, Mr. Craven said that he was generally familiar with daytimers’ problems all over the country, recalling his service on the FCC from 1937-44.

Asked by Sen. Pastore whether he wanted to state his views on deintermixture, Mr. Craven said he would rather join the FCC with an “open mind.” He said he realized, however, that “something must be done to rectify the existing situation.”

Sen. Pastore entered into the record statements by Virginia’s two Democratic senators—Harry F. Byrd and A. Willis Robertson—supporting the nomination. Others approving the nomination included Norwood J. Patterson, KSAN-AM-TV San Francisco, and Charles S. Rhyne, District of Columbia Bar Assn.

TWO FAVOR CUEING PROPOSAL

TWO COMMENTS — both favorable — had been received at the FCC by last Monday’s deadline for comments on a proposal to license cueing transmitters on a regular basis. NBC and WRFC Athens, Ga., went on record as favoring rulemaking which would license the cueing transmitters (broadcast station intercom units), under the provisions for remote pickup broadcast stations. The FCC advanced the cueing proposal early last month (B&T, May 7).
"What happens to the money a business takes in?"

W. J. Hellmann, General Accounting Department, Standard Oil Company, Chicago, Illinois:

"Our company did a whale of a business last year... $2,102,308,189. That's what we 'took in' as you say and includes taxes collected from customers for government agencies. At the same time we were spending $1,424,739,000 for materials used, operating and general expenses, and salaries and wages. That's equal to 73.6 per cent of the total we took in. Charges for wear and tear amounted to $139,184,000—6.6 per cent. Federal taxes on income and other taxes, including those we collected from customers for government agencies, amounted to $381,267,000—another 18.1 per cent. These costs and expenses amounted to $1,945,190,000 for Standard Oil and its subsidiaries in 1955. That's more than 92 per cent of what we took in."

P. M. Towe, Research Group Leader, Standard Oil Laboratories, Whiting, Indiana:

"In a business as competitive as ours you can't stand still or you won't stay in business very long. You have to keep on improving your product and your service all the time—and that takes money. The two-octane number increase in gasoline made between July 1, 1954, and July 1, 1955, costs the consolidated company over $10,000,000 each year. And last year alone Standard Oil invested millions of dollars in research to bring our customers more powerful gasolines, all-weather motor oils, and other product improvements."

Cyrus Wright, Payroll and Tabulating, Standard Oil Company, Sugar Creek, Missouri:

"There are more than 50,000 Standard Oilers, so you can imagine the size of our payroll! Our people earned $330,500,000 last year in wages and benefits. Yet, believe it or not, large as our payroll was, we paid out $381,267,000 for taxes of all kinds. That includes our own taxes and the taxes we collected from customers for local, state and national governments."

Marvin L. Hayes, Treasurer's Office, Standard Oil Company, Chicago, Illinois:

"Well, it's a small part of the total taken in, but as a return on our investment, a company pays dividends to its share owners. Dividends were paid in 1955 for the 62nd consecutive year. Our last dividend of the 1955 year went to 132,400 owners, many of whom are educational or charitable institutions like Children's Hospital, Detroit (shown above). Dividends amounted to 2.7 cents of each dollar we took in. The rest of what we took in, 4.8 cents per dollar, was retained for use in the business. Including the market value of the special dividend in Standard Oil Company (New Jersey) stock our dividends were equal to about 1/2 of net earnings."

What makes a business a good citizen?

Being open-end-above board, for one thing. That's the American way. Standard Oil Company and its subsidiaries report fully each year to government, shareholders, employees, and the public just what use was made of the money we took in. Copies of our Annual Report for 1955 are available on request as long as the supply lasts. Our address—Standard Oil Company, 910 South Michigan Avenue, Chicago 80, Illinois.
HOPE EVAPORATES FOR UHF PROJECT

Closed meeting of broadcasting and manufacturing executives in Washington fails to agree on common ground for non-profit organization for improvement of equipment.

HOPE faded last week for the establishment of a non-profit foundation which would contract out development and research projects among university and industry laboratories for the improvement of uhf equipment.

The project, which was instituted in answer to FCC Chairman George C. McConnaughey's call for a "crash" uhf development project at the NARTB convention last April, failed when broadcaster and manufacturer representatives could not agree on a common ground for the undertaking at a closed informal meeting of broadcasting and manufacturing bigwigs in Washington. It had been hoped that the foundation would be financially underwritten by broadcasters and manufacturers.

Manufacturers are expected to offer to undertake directly the development program called for by Mr. McConnaughey. Through Radio-Electronics-Television Manufacturers Assn., manufacturers last October offered to establish another National Television System Committee. NTSC was instrumental in hammering out the compatible color system finally adopted by the FCC. RETMA convention begins tomorrow (Tuesday) in Chicago's Edgewater Beach Hotel, Chicago.

Among those at last Monday's meeting at NARTB headquarters in Washington were: Broadcasters, Harold Fellows, Thad H. Brown, Robert Heald, and A. Prose Walker, NARTB; Jack Jett, WMAR-TV Baltimore; Campbell Arnoux, WTAR-TV Norfolk, Va.; Joseph E. Baudino, Westinghouse Broadcasting Co., and Frank M. Russell, NBC. Manufacturers: W. R. G. Baker, GE; O. B. Hanson, RCA; Wilson Boothroyd, Philco; and James D. Secret, RETMA. Present as an observer for the Senate ad hoc committee was Donald Fink, Philco. Mr. Fink is secretary of the Senate working committee.

Meanwhile, a recommendation that Congress appropriate a large sum of money ($1 million has been mentioned) to permit the FCC to contract out to a leading university or research organization a full-scale socio-eco-technical "audit" of television was in the works by a panel of the ad hoc committee established by Senator Warren G. Magnuson (D-Wash.), chairman of the Senate Commerce Committee. The ad hoc committee is headed by Dr. Edward Bowles, MIT professor of industrial management. The report is being drafted by a panel under the chairmanship of Ralph N. Harmon, Westinghouse Broadcasting Co. engineering vice president.

Stanton, Fellows Named

FRANK STANTON, president of CBS Inc., and Harold E. Fellows, NARTB president-board chairman, last week were named co-chairmen of the Radio-TV Committee of the President's Conference on People-to-People Partnership. The conference, including a select group of national leaders in various fields [B&T, June 4], was called by President Eisenhower to promote understanding among peoples in a common effort to advance world peace. The conference will meet Tuesday in Washington.

Second Biloxi Initial Grant Favors Ch. 13 for WVM1

SECOND initial decision—reversing a 1954 proposed grant of another FCC examiner—was issued last week recommending that television ch. 13 at Biloxi, Miss., be awarded to WVM1 there with denial of the competing application of WLQX, also Biloxi. Last week's decision was handed down by FCC Hearing Examiner J. D. Bond; the first was issued by former Examiner Harold L. Schilz, in July 1954, and favored WVM1 for integration of ownership with management, past radio experience and local programming proposals. Examiner Schilz found unfavorable to WLOX's cause the fact that J. S. Love, president-44.6% stockholder, permitted alcoholic beverages to be sold in his Biloxi hotel, contrary to the laws of the state.

The Commission reopened the case on charges that Edward Ball, 1.5% WVM1 stockholder and himself the owner of a local hotel also was guilty of law violations with respect to the sale of liquor in his hotel. Also questioned was an agreement whereby Mr. Ball would lend WVM1 money to construct the tv station and would receive as security 55% of the stock.

Mr. Bond found that the loan arrangement with Mr. Ball would not deprive Odes E. Robinson, WVM1 principal, of "unimpaired management authority" of the proposed tv station.
"Our key executives read Advertising Age regularly"

says EDWARD H. WEISS
President
Weiss & Geller, Inc. (Chicago)

"We believe it is our responsibility to both our clients and ourselves to keep in touch with the pulse and thinking of current advertising. That is why our key executives read Advertising Age regularly, and I might add this has proved to be a real service to our organization."

_______________________________________________________________

Getting the pulse of today’s marketing and advertising through Advertising Age is a weekly habit with most of the executives who are important to you. Wherever important people need up-to-the-minute information to formulate important advertising plans, there you’ll find Advertising Age getting read, quoted and discussed — by those who influence as well as those who activate important market and media decisions.

Take Weiss & Geller for example. Ranking among the top agencies, it placed some $13,000,000 in 1955 billing — $10,000,000* of it in radio-tv. Among its clients, W. & G. counts such spot advertisers as Wm. Wrigley Co., Sealy Inc., Mogan David Wine, Visking Corp. and Helene Curtis.

Every week, 48 paid subscription copies of Ad Age reach important desks at Weiss & Geller, copies that get intense, page-by-page readership in executive homes as well as executive offices. Further, Ad Age gets similar readership among advertising, sales and marketing executives of Weiss & Geller clients, for example, 14 copies each week among those mentioned above.

Add to this AA’s penetration of advertising agencies with a weekly paid circulation of almost 9,000, its intense readership by top executives in national advertising companies, its unmatched total readership of over 120,000 based on 32,500 paid subscriptions, and you’ll recognize in Advertising Age a most influential medium for swinging broadcast decisions your way in 1956.

*Broadcasting-Telecasting 1955 Report

--

EDWARD H. WEISS
A member of the board of directors of both the Menninger Foundation and the Institute for Psychoanalysis, Mr. Weiss pioneered in the use of social science techniques to uncover keys to better understanding of buying behavior. The result has been a new approach to advertising ideas that have consistently helped to set new sales records for clients. "The task of an advertising agency," says Mr. Weiss, "is to find and touch the buyer's 'pocketbook nerve'. We have learned that this task can be discharged more effectively by utilizing the knowledge and techniques of social scientists. In combination with other forms of market and consumer studies, we have found this understanding of the psychology of buying helps our creative staff."
Examiner Favors Transmission By ABC to Tijuana TV Outlet

FCC Hearing Examiner Herbert Sharfman last week recommended that ABC be permitted to transmit live programs to ch. 6 XETV (TV) Tijuana, Mexico, as the ABC affiliate in the San Diego, Calif., market. Mr. Sharfman's ruling came after a hearing on the protests of San Diego stations KFMB-TV and KFSD-TV to FCC approval to this arrangement last November.

The San Diego stations, each of which has a secondary affiliation with ABC (KFMB-TV is CBS and KFSD-TV is NBC), objected to the FCC grant of ABC's request on the ground that XETV's program policies violated both FCC and Mexican regulations and that the association between ABC and XETV would mean unfair competition to San Diego stations. Examiner Sharfman held that ABC's effort to improve its competitive position in the San Diego area could be met through use of XETV and that there was no policy objection to using a Mexican station to reach American viewers. Charges that XETV violated Mexican radio regulations, Mr. Sharfman dismissed as not possible of adjudication by the FCC. ABC already has an affiliation contract with XETV for film and kinescope programs. This did not require FCC approval.

Station Comments Favorable To Remote Control Extension

ABOUT 50 comments have been filed with the FCC on the Commission's proposed rulemaking to extend remote control transmitter operation to all am and fm stations. Most of the comments are from stations, which are overwhelmingly in favor of the proposed rulemaking, which is backed by NARTB.

Deadline for comments was extended by the FCC last month to July 2 [B+T, June 4].

Of the stations, 20 have opposed the proposal while 27 were in favor of the proposal, as of last week. Comments were filed by RKO's affiliates in Miami and New York, and the stations objecting are consistent in their objections with those filed by the San Diego stations.

Many of the stations and engineers, while approving the FCC proposal, suggested specific methods for maximum efficiency and safeguards.

The International Brotherhood of Electrical Workers is collecting performance data on individual stations from local chapters whose members are employed by the stations concerned [B+T, June 4].

Brownwood, Tex., Milwaukee TV Grants Issued by FCC

GRANT of tv ch. 19 Brownwood, Tex., was made by the FCC last week to O. L. Nelms, Dallas realtor, who a fortnight ago was awarded a grant in Flagstaff, Ariz., for ch. 9 [B+T, June 4], and who has two other tv applications pending for his native state—for ch. 12 in Alpine and ch. 19 in Victorville.

Also granted last week by the FCC was ch. 10 in Milwaukee to Milwaukee Board of Vocational & Adult Education, marking the 41st educational tv grant.

Mr. Nelms' grant calls for .645 kw visual power. Proposed antenna height above average terrain is 307 ft. Costs are estimated at $67,635 for construction and $84,000 for first year operation. First year revenue was listed at $120,000. The educational grant calls for 107 kw visual power, while operating with an antenna 370 ft. above average terrain.

AshTabula Uhf to Quit

EXPRESSIONS of hope that a truly competitive tv service will result from the FCC's decision on the overall allocations, ch. 15 WICA-TV AshTabula, Ohio, last week informed the Commission that it will indefinitely suspend operations commencing Saturday, June 16. WICA-TV told the FCC that a return to operations will take place as soon as economic conditions warrant. This makes the 37th uhf station to cease operation and retain its construction permit. A total of four v's and 23 u's have gone off the air and returned their cp's.

Gladstone to New FCC Div.

APPOINTMENT of Arthur A. Gladstone, chief of Services and Facilities Branch, FCC's Common Carrier Bureau Telephone Div., as head of newly-created Domestic Radio Facilities Div. was announced last week. The new division will handle common carrier functions concerning the radio services and facilities of domestic common carriers, now under the Telephone and Telegraph Divisions. Mr. Gladstone joined the FCC in 1941.
That's just what WTOC-TV wanted... and Ideco tower engineers met this unusual requirement, neatly solved the problem of putting tower and transmitter building in the tiny area shown in the photo.

Unusual? Sure... and maybe you'll never have to wrestle with such a problem. But it does dramatize the breadth of knowledge, the varied skills, that Ideco tower engineers have to draw on for every tower job. Since broadcasting's infancy, towers by Dresser-Ideco have served the broadcasting field.

Whatever your requirements, a tower by Dresser-Ideco... tailored to your specific needs... can best serve you, too. Write us... or contact your nearest RCA Broadcast Equipment representative.

Tax Relief for Uhf Sets
Proposed in Senate Bill

SEN. EDWARD MARTIN (R-Pa.) last week introduced a bill (S 3994) to reduce from 10% to 5% the federal excise tax on tv sets which receive uhf channels and 50 or more uhf channels. The tax on uhf-only receivers would be kept at 10% under the bill.

Sen. Martin's bill is identical to one (HR 10,424) introduced by his colleague in the House, Rep. Carroll Kearas (R-Pa.). Rep. Kearas' measure was introduced in April following a meeting of the Pennsylvania congressional delegation with representatives of the Committee for Competitive Television [B&T, April 16]. CCT asked the Pennsylvania and North Carolina delegations at that time to introduce bills to reduce the tax on uhf sets.

The Martin bill was referred to the Senate Finance Committee.

KITE Protests KTSA Sale

KITE San Antonio, Tex., has protested to the FCC against the $306,000 sale of KTSA there to McClendon Investment Corp., approved by the Commission last month [B&T, May 7]. KITE (930 kc, 1 kw day) told the FCC that operation of KTSA by McClendon interests puts KITE in an unfair economic position and subjects it to economic injury. KTSA becomes the eighth Noema (James Noe-Gordon McClendon) station and with its enhanced purchasing power the station is in a better position to compete unfairly, KITE said. In asking a hearing on the sale, KITE also attacked the new KTSA programming practices, claiming they are designed to destroy competition.

WQAM-AM-FM Sale Filed For Commission Approval

APPLICATION seeking transfer of control of WQAM-AM-FM Miami, Fla., from Miami Broadcasting Co. (Miami Herald-Knight) to Mid-Continental Broadcasting Co. for $850,000 has been filed with the FCC.

Mid-Continental, headed by Todd Storz, was selected from a score of bidders for the property, required to be sold under the FCC's duopoly rule because John S. Knight interests and the James M. Cox interests (WIOD-Miami Daily News) are joint stockholders in new ch. 7 WCKT (TV) scheduled to begin operation in July.

WQAM's balance sheet as of April 30 showed the following: total assets, $184,288; cash on hand, $75,946; receivables, $28,166, and current liabilities, $39,857. Mid-Continental's figures as of April 30 were reported at: total assets, $1,257,230; current assets, $507,205, and current liabilities, $94,659.

Acquisition of WQAM will give Mid-Continental its fifth radio outlet, others being KHOW Omaha, WTIX New Orleans, WHB Kansas City and WDGY Minneapolis.

KAKC, WJBC-AM-FM Sales Win Commission Approval

AMONG 10 ownership changes approved by the FCC last week [see For the Record, page 103] were the sale of KAKC Tulsa, Okla., by Forrest G. and Charlene Conley and Allen E. Barrow to Lester Kamin for $115,000, and transfer of 50% ownership of WJBC-AM-FM Bloomington, Ill., from The Daily Pantagraph Inc. to Leslie G. Johnson for $75,000.

Mr. Kamin owns the Kamin Adv. Agency, Houston, is 20.5% owner of WMRY New Orleans and KCIP Shreveport, La., and 33.3% owner of WCKG (TV) New Orleans.

In the WJBC transfer, Mr. Johnson, 25% owner of WHBF-AM-FM-TV Rock Island, Ill., will own 50%; Pantagraph will continue to hold 50%. Principal Pantagraph owner is Adlai E. Stevenson, Democratic presidential hopeful, who owns 24.6%.

Senate Approves Bill Seeking Over $7.8 Million FCC Budget

THE SENATE last week passed the Independent Offices Appropriation Bill (HR 9739) for fiscal 1957, which carries an FCC budget of $7,828,000—$28,000 above the House-passed figure for a monitoring station at Douglas, Ariz. The measure goes to a Senate-House conference committee to resolve differences.

The Senate also approved $5,550,000 for the Federal Trade Commission, representing restoration of a $150,000 cut in the House, plus $50,000 for enforcement of the Fur Products Labeling Act. The $150,000 restoration had been recommended by the Senate Appropriations Committee with the understanding that "increased effort will be exerted in the field of monitoring radio and television advertising."

Seaton Formally Sworn In As Secretary of Interior

FRED A. SEATON, midwest broadcaster, was sworn in Friday as Secretary of the Interior after receiving unanimous confirmation from the Senate (see Our Resources, page 20). He succeeded Douglas McKay, resigned.

Since late 1953 he has been deputy assistant to President Eisenhower, serving in important administrative roles.

At his news conference Wednesday, Presi- dent Eisenhower, answering a question, said he had picked Mr. Seaton because he felt he was the best qualified man for the Cabinet position. Mr. Seaton is a former U.S. Senator from Nebraska. At a Tuesday hearing before the Senate Interior Committee, Mr. Seaton was questioned about his views on water resources, Alaskan statehood and public power. The committee reported his nomination unanimously.
Behind Today’s Miracle Machines...

**a Master’s Touch in Oil**

World’s largest outdoor turbine plant, producing electricity for Atomic Energy Works at Paducah, Kentucky...

Giant eye of the Mt. Palomar telescope through which man sees farther into space than ever before...

World’s most completely automated plant, manufacturing automobile engines...

First successful diamond-making machine...

One of every six industrial wheels turning in the free world—more than half the big turbines (5000 kilowatts and over)...

All have one thing in common—**SOCONY MOBIL’s master touch** in lubrication.

Good reason! Men who depend on machinery depend on **SOCONY MOBIL**, as a partner in its protection.

Wherever there’s progress in motion—in your car, your factory, your farm or your home—you, too, can look to the leader for lubrication.

VIEWERS WANT IT FREE, POLITZ SHOWS

Survey for 'Look' reveals that public, by two to one vote, does not want pay tv, even at 25 cents a show. Even fewer want to pay 50 cents or a dollar for programs.

THE PEOPLE's preference for free television — commercial and all — is at least 2 to 1 over toll television, even if the charge were only 25 cents.

This conclusion emerges from results of a survey conducted by Alfred Politz Research Inc. for Look magazine and released by Look last week. The magazine published an article by FCC Comm. Robert E. Lee last March recommending a public trial of toll TV [B&T, March 26].

The Politz study showed that the number of people interested in watching seven out of nine specified program types for free was within fractions of being twice as large as the number who would pay a quarter for the privilege. In the two other categories (a World Series baseball game and a leading current Broadway play) the difference was only slightly less.

Viewers were even less willing to pay 50 cents or a dollar to see such shows, although proportionately the dropoff was not so great. (In the case of a World Series game and of a performance by a leading ballet company, according to the tables released by Look, slightly more people were willing to pay $1 than to pay 50 cents. Among people in the over-$5,000 income class, more were willing to pay $1 than 50 cents for both a variety show and a heavyweight championship boxing match.)

In the case of a political convention—a facet of national affairs where television is deemed to have a particularly high potential for vital public education—the number of viewers who would drop from 23.9% to 7.6% if a 25-cent tax were imposed and to 3.5% if the cost were $1, the report showed.

Look stressed that the percentages willing to pay, though much smaller than those inclined to watch free TV, are nevertheless considerable. For instance, it was pointed out, the 22.6% who said they would be willing to pay $1 to see a World Series game on TV represent 19.7 million people 15 years or older living in U. S. TV households.

The survey was part of a broader one dealing with the current buying mood of consumers, conducted for Look by the Politz firm. In the TV portion, the samples was split three ways: One-third were measured on their willingness to pay 25 cents to watch TV shows in which they were interested (by program type, not specific shows); another third on their willingness to pay 50 cents, and the remaining third, willingness to pay $1. Each group represented a statistically accurate cross-section of the population and therefore the findings of each represent a national sampling of opinion, Look asserted.

The overall findings were broken down three ways: by sex; by age groups (15-39, 40 up); and by annual household income (under $4,000, $4,000 to $4,999 and $5,000 and over). Income, the magazine concluded, does not seem to be the determining factor in willingness to pay for TV shows.

The following table, prepared from those released by Look, compares reaction—in terms of percentage of total respondents—where no money consideration is involved, when the price would be 25 cents, 50 cents and $1:

SEAC INC., New York, last week reported that it has adopted a new policy whereby its SEAC Transcribed Library now will be available also in individual sections to stations that have specialized needs. Stations now may order one or more of seven sections, plus a special gospel section. Sections are made up of American folk, cowboy, hillbilly and western music ("A"); band music ("B"); concert ("C"); Hawaiian music ("H"); novelty dance and jazz music ("N"); religious music ("R"); and Spanish and Latin-American music ("S").

Welp to Star on Thesaurus

LAWRENCE WELK last week was signed by RCA Program Services as star of his own RCA Thesaurus musical series, thus giving radio station subscribers — according to Ben Selvin, Thesaurus artists and repertoire director — "an enviable programming lead over rival stations.

Meehan Heads WCAU Muzak

EDWARD J. MEEHAN Jr. has been appointed manager of the newly-organized Magnetic Muzak Div. of WCAU Philadelphia, which will take over the Muzak franchise for the Philadelphia area Aug. 7. He has been an executive in the sales department of RCA for the past 10 years, most recently as head of the am sales office in Camden, N. J.

PROGRAM SERVICE PEOPLE

Charles D. Hilles Jr., vice president in charge of IT&T telephone and radio operating department, named executive vice president of IT&T. Also reassigned: Henri G. Bastogne, executive vice president, Federal Telecommunications Labs., IT&T research arm, to president, and Henry H. Scudder, vice president, International Standard Electric Corp., IT&T's holding and management unit, to executive vice president. George A. Banino, assistant comptroller of Federal Telephone & Radio, IT&T manufacturing division at Clifton, N. J., promoted to comptroller. Charles G. Horstman, chief cost accountant of Federal, named assistant comptroller.

BROADCASTING • TELECASTING
TRUCKS ... And Tomorrow ... And You!

Your life is blessed by trucks in many ways—and not the least of the good things they bring you is the freedom to live or do business anywhere under the sun—so long as there's a road by your door!

And man—America is really moving out into the suburbs as a result!

In the next 20 years, the U.S. Census Bureau forecasts a population boost of more than 63 million people! And 80% of this booming population growth will take place in suburban U.S.A.!

Naturally, it just wouldn't be possible without trucks. They provide the only transportation flexible enough to serve the shopping center in the valley, the house on the hill, the manufacturing plant off Highway 11—and do it just like downtown.

The trucking industry welcomes the challenge of an America on the move—on the move as it has never been before. Constantly adding new and better equipment, improving driver selection and training, and perfecting its fine safety record, the trucking industry is gearing itself to be well ahead of the growing demands which will be made upon it in the years ahead.

Like all public transportation in this country, trucking owes much of its progress to intelligent, time-tested and just regulation.

Your own interest—and the public interest—both call for sharp and vigorous protest by you against proposals to neutralize or destroy public controls over transportation ... proposals now being made in the name of "improved competition."

AMERICAN TRUCKING INDUSTRY
AMERICAN TRUCKING ASSOCIATIONS, INC., WASHINGTON 6, D.C.

If You've Got It ... A Truck Brought It!

QUOTES WORTH REPEATING

WAITING AT THE CHURCH
The New York Times, commenting editorially on the North American Regional Broadcasting Agreement, which has awaited Senate ratification for five years:

INTERFERENCE from Cuban radio stations is effectively destroying the service rendered by some United States broadcasters, particularly in the South and along the eastern seaboard. Radio waves do not respect national boundaries and an international agreement is the only practical method of obtaining mutual protection.

Although the proposed NARBA does not satisfy everyone, in many respects it is more favorable to the United States than any earlier agreement. Opposition to it comes from only 15 of the more than 2,500 AM stations in this country. Some critics of NARBA say that ratification still will leave us without a radio treaty with Mexico. Efforts are being made to work out an agreement with that country, but in order to strengthen our position in Mexican negotiations we should have a deal with the other North American stations. NARBA would give us a much-needed bargaining tool.

The work of the FCC constantly is hampered by trying to adhere to the provisions of a treaty which in fact does not exist. The Senate should make a decision before adjournment this summer and, in the public interest, we think that decision should be to ratify NARBA.

RADIO, THE UNIFIER
Dr. Preston Bradley, pastor of Peoples' Church of Chicago and pioneer (33 years) user of radio, in a sermon:

IN MY humble opinion, radio has been one of the greatest influences for understanding. More Protestants have heard Catholic priests than they would ever have heard without it; more Catholics have heard more Protestant ministers than they otherwise would have heard; more Jewish people have heard more Protestants and more Catholics, and more people have heard Jewish speakers. There are great segments of distinction that separate our body politic, and radio has given the opportunity of hearing all sides, various personalities—radio has been the great unifier in our whole opportunity of trying to solve the problems of civilization!

SPEEDER-UPPER
David F. Austin, executive vice president, commercial, U. S. Steel Corp., addressing National Industrial Advertisers Assn. in Chicago:

ADVERTISING has one function and only one function—to speed up the selling process... Picture, if you can, a single industry suddenly deprived of the forces of mass communication. Under these conditions, the sole contacts with customers would be confined to the personal calls made by salesmen. Under these conditions the salesman would have to explain, in detail, the function and worth of the product. He would be forced to spend his time introducing the company, what it does, and why the company warrants confidence and he would have to see personally all the people who might have a negative influence on purchases. Think in the matter of time alone how the efficiency of the salesman would be impaired by the lack of proper communication...

A company can survive without advertising, but an industry—not ever.

COMEDIAN'S LAMENT
Comedian and author Steve Allen, commenting in his introduction to The Funny Men (a study of broadcast comedy techniques, to be published June 14 by Simon & Schuster, New York):

THE TV HUMORISTS are fallen upon evil times. They have learned a depressing fact: people get tired of you a lot quicker on TV than they do on the radio. They pick you up faster, but they drop you faster, too. On the radio, it took a long time to become a star, and if you made it you could stick around for maybe 10 or 15 years right at the top.

On television, the first favorable reviews are hardly dry before critics, cab drivers and relatives are telling you what's the matter with your program. Maybe it's just that familiarity breeds contempt, and people can get a lot more familiar with you if your face pops right into their living rooms week after week.

It's a little like falling in love. You meet an attractive person and all you want to say to her is "You're lovely." Six months later you're saying "You're lovely, but do you have to do your fingernails in public?" In another year, if you've married the girl, you're saying, "Of course I love you, but don't you think you ought to take off a little weight?"

HE WHO HESITATES
U. of New Hampshire Prof. Jonathan Karas, criticizing educators for lack of enthusiasm for TV:

It's completely unrealistic to wait until educational stations are built before taking advantage of the available time offered by commercial stations to gain valuable experience. Building a $400,000 station for an uninitiated group who might like to try the medium is like building a symphony hall before checking to see whether anyone is available to play.
QUAAL SUCCEDES FRANK SCHREIBER

Crosley-Quality Radio Group executive returns to WGN Inc. succeeding Schreiber, vice president and general manager, who resigns from Chicago stations.

WARD L. QUAAL, for four years vice president and assistant general manager of Crosley Broadcasting Corp., Avco's radio-tv subsidiary, returns to WGN Inc., Chicago, Aug. 1, succeeding Frank P. Schreiber, who has resigned as vice president and general manager. Announcement of Mr. Quaal's appointment was made by J. Howard Wood, president of WGN Inc. (WGN-AM-TV).

A major figure in industry affairs, Mr. Quaal goes back to the WGN properties after seven years service in executive broadcast posts. He left WGN in 1949 after eight years service to become director of Clear Channel Broadcasting Service, headquartering in Washington. Before joining WGN he had worked at WDMF Marquette, Mich., and WJR Detroit as announcer, writer and producer.

During World War II he was in the Navy, serving as communications officer with the Atlantic Fleet and later as officer in charge of the Navy radio installation at Norfolk, Va. In the Korean conflict he served on the President's Broadcast Advisory Council and as a member of the Citizens' Committee assigned to a Hoover Commission task force.

His present assignments include membership on the NARTB TV Board; vice president for tv, Ohio Assn. of Radio & Tv Broadcasters; president of Quality Radio Group and president of Cincinnati Executives Club.

Mr. Wood said the new WGN executive will have the major responsibility for the stations' plans to become the leading independent radio and tv properties. "These plans reflect our belief that both WGN radio and tv will play an important role as advertising as well as entertainment and public service media," Mr. Wood said. "As independents with no network commitments we can better serve the Chicagoland audience."

Mr. Schreiber joined the parent Chicago Tribune in 1918 and moved to WGN in 1931, becoming station manager in 1940. He is expected to announce his plans shortly and reportedly intends to remain in station operation.

WDSU Announces Separation Of Radio, Tv Operations

A COMPLETE separation of the am and tv operations of WDSU New Orleans was announced last week by Robert D. Swezey, executive vice president and general manager of WDSU Broadcasting Corp. Simultaneously, Mr. Swezey announced the appointment of Harold F. Mathews as manager of WDSU-AM.

Mr. Mathews has been a member of the radio sales staff of WDSU for the past six years and sales manager for the last three. Hal Fredericks, veteran St. Louis and Chicago broadcaster, recently joined the station as radio program director.

Mr. Swezey also stated that plans are under consideration for a separate physical plant for the two.

MESSRS. Swezey, Mathews and Fredericks discuss WDSU separation plans following the announcement last week.

GUILD FILMS BUYS WISCONSIN AM-TV

APPLICATION for FCC approval of the sale of WMAM and WMBV-TV Marinette-Green Bay, Wis., by William E. Walker, Joseph Mackin and associates to Guild Films Co. Inc., New York, tv film syndicator, for more than $600,000 was filed last week.

The transaction involves the acquisition of 100% of the stock of M&M Broadcasting Co., licensee of both stations, for $287,500 in cash, plus the assumption of current and long-term liabilities totaling $407,800.

WMAM was founded in 1939 and operates on 570 kc with 250 daytime and 100 w nighttime. WMBV-TV on ch. 11 began operating in Sept. 1954. Both stations are affiliated with NBC, with the tv station having ABC also. Both are represented by Venard, Rintoul & McConnell.

Guild Films, the stock of which two weeks ago was admitted to be traded on the American Stock Exchange [DT: June 4], came into existence in 1952. Its first property was the Liberace Show. It now has a catalogue of 12 television series, plus cartoons and features.

Reub Kaufman, president of the company, and with his wife the principal stockholder (7.5%), announced the purchase last week as the initial move of Guild in station ownership. "Someday we expect to own and operate the full quota of stations permitted by FCC regulations," he said.

Guild's balance sheet as of Feb. 29 of this year showed total assets of $5.6 million, of which $5.5 million was in current assets. Total liabilities amounted to $3.3 million, with capi-

Mr. Mackin, who has minor stockholdings in WBEV and WRRR, will remain as general manager of the Marinette-Green Bay stations, it was announced. No personnel changes will be made, it was said.

Corporate Worth

Balance sheet of M&M company as of March 31 showed total assets of $590,000, with total current assets amounting to $79,798. In addition to the $407,800 liabilities ($163,600 current liabilities), M&M company showed capital at $182,000, earned surplus at $37,000. The TV station lost $11,543 last year, while the radio station earned $6,700, the balance sheet showed.

Negotiations were conducted by Aaron Katz, vice president-treasurer of Guild, and Mr. Walker, for M&M. Herman Odell, general counsel for Guild and Ben C. Fischer, of Fischer, Wayland, Duval & Southmayd, attorney for M&M, assisted.

Shapiro, Walls Appointed To WCAU-TV Sales Posts

WCAU-TV Philadelphia has reorganized its executive sales staff as the result of the establishment of national and regional sales divisions, Robert M. McGredy, vice president in charge of television sales, is announcing today (Monday).

National sales manager will be Marvin L. Shapiro, returning to WCAU-TV from the CBS-TV Spot Sales staff in Chicago, which he joined as an account executive in March 1955 after five years on the WCAU-TV local sales staff.

E. Gordon Walls will be regional sales manager. Mr. Walls joined the WCAU-TV sales staff in April 1950 from General Outdoor Advertising and has been in charge of local sales since July 1954.

The appointments become effective June 25 according to Mr. McGredy's announcement of last week.

AFTRA Goes to Sponsors In Dispute With WPAT

NEGOTIATIONS continued last week between WPAT Paterson, N. J., and the New York local of the American Federation of Television and Radio Artists on a strike by five station announcers in a wage dispute. The station has continued operations since the May 17 start of the strike, utilizing the services of "non-union professional help," according to a station spokesman.

AFTRA last week inserted paid advertisements in New York newspapers, calling on WPAT advertisers to withdraw their commer-
Versatile Staff

EMPLOYEES of KFSD-TV San Diego are getting a first hand opportunity to learn about their fellow workers’ jobs.

On the station’s recent tour, the workshop, the station’s chief news cameraman is set designer, announcers are directors, directors are communicators, floormen are actors and so forth.

Plans call for a show a month to be telecast locally. One has an audience participation format, another is a panel show, still another is a musical-variety program and a fourth is a drama. Studio Operations Director Jean Pythian is producer. The plan was spearheaded by William E. Goetze, general manager of KFSD-TV, who says that the workshop idea “is creating great rapport and respect among employees.” Mr. Goetze adds that due to union restrictions, no one but an engineer can work in an engineers’ position.

Officials for the duration of the strike. It also sent letters to the station sponsors urging them to boycott the station and stating that “in spite of newspaper reports and false statements by management, the strike is not settled.” There had been several reports of settlement. On one occasion, the strikers returned for one day.

The dispute centers around wages. Announcers, who currently earn $160 weekly, reportedly seek an increase in commercial fees that would raise their average earnings to about $180 weekly. Dickens Wright, president of WPAT, told B&T through a spokesman that he has proposed a formula that would raise average weekly earnings to $180, but that the union has countered with an offer that would raise announcers’ remuneration beyond that figure. Officials claim that Mr. Wright’s proposal would make it difficult for staffers to attain the $180 figure.

WSAZ-AM-TV Promotes Hurd

JOHN HURD, WSAZ-AM-TV Huntington, W. Va., news director, has been promoted to supervising editor of the station’s news operation, it was announced last week by Lawrence H. Rogers, vice president-general manager.

Mr. Hurd, who came to WSAZ-AM-TV from WMBS Uniontown, Pa., also will be seen on the air with a Sunday evening news and sports show.

A-K Opens Dallas Office; George Stevens Named Head

AVERY-KNODEL Inc., radio-television representatives, last week announced the opening of a newly expanded Dallas office at 320 Fidelity Union Life Bldg. Telephone is Prospect 7330.

Named to head the new facility was George A. Stevens, former tv salesman, Edward Petry & Co., Chicago. He also has been sales and program director, KOCA Kilgore; merchandising and publicity director, KNOW Austin, and local sales manager, WFAA Dallas, all Texas.

The new Dallas operation will service the firm’s clients in the Southwest.

Milly Sullivan is the personable hostess on “Valley Playhouse,” highest rated local daytime show in the big Sacramento TV market.

Everyday from 2-5 P.M., following “Queen for a Day,” Milly presents a first-run double-feature from the complete Columbia-Screen Gems film package.

“TV This Week” says of Milly: “...her real charm is the NON-professional touch she gives her show...It has endeared her to her viewers.”

Petry has the full story on Milly and “Valley Playhouse.”

**WJR Re-Elects Officers, Reports Increase in Sales**

OFFICERS and directors of WJR Detroit, Mich., the Goodwill Station Inc., were re-elected at the company’s annual stockholders’ meeting, which also heard a report by President John F. Patt of a record increase in WJR sales and earnings in the first four months of this year.

Re-elected as officers were Mr. Patt; Worth Kramer, vice president-general manager; William G. Siebert, secretary-treasurer and F. Sibley Moore, vice president. Directors re-elected: Mrs. Frances S. Parker, Mr. Patt, Mr. Kramer, Mr. Siebert, Selden S. Dickinson, Mr. Moore and G. F. Leydorf.

Mr. Patt reported that WJR sales for the first four months of 1956 were $1,139,849, compared with $870,736 for the same period last year. Net profits after taxes were $186,537, compared with $85,998 last year, and earnings for the period were 36 cents a share, compared with 16 cents the year before.

The stockholders voted a dividend of 10 cents a share to be paid June 20 to stockholders of record at the close of business June 8.

**WHUM-AM-TV Names Magee As New General Manager**

ROBERT C. MAGEE, veteran broadcaster, has been appointed general manager of WHUM-AM-TV Reading, Pa., it was announced by Paul A. Flickinger, secretary of Eastern Radio Corp., which operates the stations. Mr. Magee succeeds H. J. Greig, who served as both general manager and president.

Mr. Magee formerly was vice president and general manager of WHUM and owned 18% of the stock of Eastern Radio Corp. from July 1946 to November 1949. In 1949 he sold his stock interest and settled in Florida, where he became engaged in non-broadcast endeavors.

Mr. Flickinger said the position of president of Eastern Radio Corp. is being left vacant for the time being.

**KFMB-TV San Diego celebrated its seventh birthday with a Going on 8 special telecast and party. Present were (l to r) J. D. Wrather Jr., president of Wrather-Alvarez Broadcasting Inc.; Bonita (Mrs. Wrather in private life) Granville, one of the stars of the special telecast; Beverly Jean Stotts, “Little Miss Ch. 8”; Maria Helen Alvarez of Wrather-Alvarez, and KFMB-AM-TV General Manager George Whitney. Meredith Willson, Edgar Bergen and Charley McCarthy, Red Skelton and Art Linkletter also appeared on the 30-minute Going on 8 special birthday telecast.**

**WOR-TV Billings Up 142.6%**

BUSINESS from local advertisers played the “major role” in boosting WOR-TV New York billings in the first five months of 1956 by 142.6% over the corresponding period of 1955 and 454.9% over 1954, it was announced last week by Gordon Gray, vice president and general manager of the station. He said one plan which proved “particularly attractive” to the local advertiser was a package consisting of 25 run-of-the-station, one-minute announcements per week.

**New KAVE-AM-TV Building**

KAVE Carlsbad, N. M., began operating June 1 from its new 30x80 ft. building, which also will house KAVE-TV when that station goes on the air early in JULY with DuMont equipment. A downtown office and studio also are being maintained in the Crawford Hotel for broadcasts and sales personnel.

**Parents Should Approve**

A NOVEL PROGRAM course—that WNHC-TV New Haven, Conn., believes can provide an answer to critics of TV who decry the medium as a factor in fostering juvenile delinquency—is set to appear on the station July 2. The series, to be shown Mondays, 1:15 p.m. EDT, for eight weeks, will be called Baby Sitters, C. O. D. The “course on decorum”, featuring Joan Crowther, is designed to meet informational needs of sitters by pointing up responsibilities.

The station reported last week that it already has received 2,000 applications for registration. Graduates will be presented with wallet-size certificate cards.
WCCO Cashorama
LISTENING gets more and more worthwhile for Twin Cities radio fans as WCCO Minneapolis-St. Paul expands the "Cash on the Line" promotion it began last March 12. Latest development in the big giveaway is a 10-day "Cashorama." By the time it ends Saturday, WCCO will have given away $250,000 in lots of $1,000-$5,000 to each recipient. "Big Bill Cash" is making telephone calls throughout the broadcast day and asking telephone operators to repeat a key word announced before each call. Phone numbers are selected at random from the station's 109-county primary listening area in Minnesota, Wisconsin, Iowa and South Dakota.

Roddy To Manage KILT-TV, July 1 Air Date Planned
JOE RODDY Jr. has been named manager and Glenn Callison technical director of KILT-TV El Paso, Tex., which has a target date of July 1, according to Gordon McLendon, president. Mr. Roddy also will continue as manager of KELP El Paso while Mr. Callison moves from chief engineer of KLIF Dallas.

KILT-TV will operate on ch. 13 with a power of 28.2 kw. Initial programming will consist principally of film. McLendon Investment Corp., KILT-TV owner, also owns KELP, KLIF, KTSA San Antonio, WTAM Atlanta and programs WNOE New Orleans and KNOE Monroe, La. The firm has an application before FCC for a 10 kw outlet in Houston.

KPDQ Builds New Quarters
KPDQ Portland, Ore., plans to move into its new studio and office building at 4903 N. E. Sandy Blvd. in the near future, according to Jack Davis, owner-manager. KPDQ operates on 800 kc with 1 kw.

LESLIE G. ARRIES Jr. (l), general manager of WTTG (TV) Washington, D. C., and Fred J. Hughes Jr., manager of the Washington branch of Anheuser-Busch Inc., sign a contract for half sponsorship by Budweiser beer of four of the television station's new programs. The programs are The Great Gildersleeve, Crunch & Des, Stars of the Grand Ole Opry and Dangerous Assignment.
Helping Hand

EXECUTIVES and staff members of WFDF Flint, Mich., donned their work clothes the weekend of May 19-20 to help ease the plight of a fellow worker, Mrs. Clarissa Musolf. The Musolfs' home was destroyed by a tornado May 12.

The volunteer workers, led by General Manager Lester W. Lindow, helped clean up the debris and install the Musolfs in a house trailer, serving as their temporary home.

The cleanup work was going on while special crews were at work repairing damage to WFDF broadcasting towers. One of three towers was blown to the ground and the other two were damaged [BdT, May 21].

WBC Sets Up New Award
For Its Program Managers

ESTABLISHMENT of annual Westinghouse Broadcasting Co. Lamp of Knowledge awards for outstanding achievement in public service and educational programming is being announced today (Monday) by Donald H. McGannon, vice president in charge of WBC.

The program managers of WBC's five radio and four television stations will compete for the two top awards—$1,000 college scholarship grants for a child of each of the winners. Two members of the winning radio program manager's staff will receive grants of $500 and $300, and one grant of $500 and two of $300 will be awarded to three members of the winning TV program manager's staff.

In addition, each of the winning stations will receive a silver Lamp of Knowledge trophy, which will travel from station to station in the WBC group as the award changes hands each year.

The awards will be judged on the basis of programming during the 12-month period, beginning this month, specifically in four general areas: American history, mental health, the teacher, and America's need for more scientists and engineers. Judging the competition will be Mr. McGannon and Richard Pack, vice president in charge of programming for Westinghouse; Will Kalandra, WBC national program manager, and two nationally-known educators whose names will be announced at a later date.

"These awards," Mr. McGannon stated, "will be based on the overall quality and impact of the station. Taken into consideration will be news, special programs, adaptation of regular programming and general showmanship. Our goal is to make public service and educational programming as exciting and interesting as our commercial shows."

WTRI (TV) Issues Rates

ISSUANCE of the first rate card of WTRI (TV) Albany (ch. 35) under its new management was announced last week by William A. Riple, general manager. WTRI, which suspended operations early in 1955 and is set to return to the air July 1, has established a $400 hourly rate for class "A" time.

Other one-hour rates of the ABC-TV affiliate are Class "B", $300, and "C", $200. Announcement rate ranges from $15 to $60. WTRI will go on the air with test programming June 15, according to Mr. Riple.

WISE Manager Added
To Soell's Video Duties

JOHN B. SOELL has been named acting manager of WISN Milwaukee in addition to his duties as director of WISN-TV, D. L. (Tony) Provost, vice president in charge of the radio-TV division of the parent Hearst Corp., announced.

He replaces former manager Harry Goodwin, who resigned to return to the East Coast in an unannounced capacity. Before joining WISN-TV, Mr. Soell was associated with H-R representatives and the DuMont Television Network.

Jones Funeral Services Held

FUNERAL SERVICES were held last week for financier Jesse H. Jones, 52, who died June 1 in Houston. His vast business holdings included interests in KTRK-TV and KTRH Houston. Mr. Jones also served as head of the Reconstruction Finance Corp. for several years and as Secretary of Commerce.

Survivors include his widow, Mary Gibbs Jones; Tifford Jones, Houston attorney, a stepson, and a nephew, John T. Jones Jr., president of the Houston Chronicle and of KTRK-TV.

KDOK Tyler, Tex., on Air

KDOK Tyler, Tex., has gone on the air as a 5-kw daytime operation on 1330 kc.

Dana W. Adams is president and general manager of the station, whose personnel includes Robie Morgan, chief engineer; Pat Morgan, sales manager; Rusty Reynolds, chief announcer; R. J. Dodson, newsmen; Allen Bobbitt, disc jockey-librarian; Helen Harvey, secretary, and Lathon Young, copywriter.

KYW-AM-TV Sales Pitch

KYW-AM-TV Cleveland sales managers made sales presentations June 5 in Chicago and New York before Peters, Gann, Woodward representatives. John McIntosh Jr. made the radio pitch in Chicago while Al Krivin did the TV honors in New York. The stations are owned by Westinghouse Broadcasting Co.

BIG SMILES mark the renewal of the 3,120-announcements-a-year contract on KBIG Catalina, Calif., by McDaniels Supermarkets of Los Angeles. L to r: Jimmy Fritz, president of Jimmy Fritz & Assoc. advertising agency, Hollywood; Phil Dexheimer, KBIG account executive; Albert L. Wolins, McDaniels' general manager; Bob McAndrews, KBIG vice president-commercial manager, and Cliff Gill, the station's vice president and operations manager. With the KBIG campaign as the only addition to its previous newspaper-tv budget, McDaniels enjoyed a 1955-56 business increase of over 100%.
PROFILE ON A CRUSADING NEWSMAN

A HARD-HITTING editorial policy is building a large following for a news program on one television station in the South. The program, Knight Beat, is conducted each evening on WDXI-TV Jackson, Tenn., by John Knight, head of the station's news department and only seven months removed from the news desk of a large metropolitan newspaper.

Each evening Knight Beat features five minutes of local news followed by a strong editorial which ties into the local picture. In the short time in which the telecasts have been aired, WDXI-TV has been given credit for a number of civic improvements and has received public praise from city officials, civic and church groups and the general public.

Among the improvements:

A Knight editorial pointing out the need for new traffic lights and protesting against shabby hiding a dangerous intersection has brought about police action on one hand and a rash of hedge trimming on the other.

Three traffic lights have been installed in line with his suggestions.

In response to a series of editorials on the need for slum clearance in Jackson, the city commission is making plans for an urban renewal project which will eliminate the substandard housing groups throughout the city. A survey is in the process of development.

When the administrator of the local hospital reported the need for a new wing to take care of a large increase in hospital patients, Mr. Knight appealed directly to the county court and the city for support. Both groups have given approval to a hospital expansion program.

A series of editorials on speeding and reckless driving appeared just a week before the police department staged an all-out traffic drive which has resulted in an absence of traffic fatalities within Jackson since Jan. 1.

A controversy developed around the location of a new Negro high school in a white residential district. Mr. Knight came out strongly for the location and pointed out the need for a central location for Negro students. The city commission voted unanimously to locate the school at the spot favored by Mr. Knight.

More than 8,000 citizens went to the polls in a recent recall election and returned a five-to-one vote of confidence for the incumbents. Fewer than 800 voters had gone to the polls in the earlier general election, and subsequent editorials by Mr. Knight were given credit for arousing the public to the danger of a light vote.

REPRESENTATIVE SHORTS

Radio-Tv Representatives Inc. moved to larger N. Y. offices at 7 E. 47th St. Telephone Murray Hill 8-4340.

W. S. Grant Co. L. A. office moved to 6606 Selma Ave. Telephone Hollywood 3-7194.

STATION PEOPLE

Edward D. Somes, chief engineer, WTSA Brattleboro, Vt., appointed assistant manager.

Robert J. Heiss, sports director and chief announcer WTMJ-AM-TV Milwaukee, named assistant manager.

Wade Patterson, account executive, WDGY Minneapolis, to KSTP (TV) Minneapolis, as member of sales staff. He also has been general manager of KCRG-AM-TV Cedar Rapids, Iowa.

Stanley Kaplan, formerly commercial manager of WEIR Wheeling, W. Va., appointed to similar

NEWSMAN KNIGHT

His editorials end in action

"We feel the public is ready to support television as an editorial and news source but very seldom has the viewer been rewarded for his loyalty by meaty and thought-provoking materials," says the news editor. "There is no sense to the idea that the public must look to the newspaper and other printed media for its editorial fare. This field, I believe, is wide open to the station which will give its viewers what they want.

"I don't mean by this that we will get into the field of yellow journalism or strive for the sensational but any station that's worth its salt should be ready to stand up and be counted on important issues. We are a mature medium for mature people and they have a right to expect our whole-hearted support, yes, and leadership, in anything which benefits the community."

On several occasions Mr. Knight has invited rebuttal and has a standing offer for anyone who disagrees with his views to appear on his program or to write. Whenever a letter is sent in disagreeing with the editorial policy, it is read over the air without comment. As yet no one has asked to present personally an opposing argument on the air.

Knight Beat, sponsored by a department store and a loan company, currently is simulcast over WDXI-TV's sister radio station, WDXI, and may in the future be carried over other stations in the Dixie Network.

Mr. Knight has no restrictions placed on him by Aaron B. Robinson, president of the network.

"He's a trained news man," says Mr. Robinson. "He knows what we want. As long as he's right and as long as he's objective, we feel that his news judgment is the only guarantee we need that Dixie will be getting the best possible coverage. . . ."
SHELL Oil Co. has signed a contract with WKZO Kolamazoo for sponsorship of the U. of Michigan football broadcasts this fall. Completing arrangements at Shell's annual spring dealer meeting in Kolamazoo are: (1 to r): Len Colby, sports director of WKZO; John W. Southworth, Shell's Detroit division manager; Orville F. Schneider, Grand Rapids district manager, and Tony Gaston, WKZO radio administrative assistant.

position with WBMS Boston. He formerly headed his own advertising agency in Pittsburgh, Pa.

Ian K. Harrower named program and production manager, WWJ-TV Detroit; Frank A. Picard II to producer-director and Robert A. Benyi named film services manager.

Bob Van Roo promoted from assistant promotion manager to promotion and publicity manager at WXIX (TV) Milwaukee. He succeeds Bill Ryan, transferred to KPIX-TV San Francisco.

Herman Amis, Mary Cunningham and Bill Jenkins to WOV New York for Negro merchandising project.

Dick Smith, news director, KXOL Fort Worth, Tex., to KFSD San Diego, Calif., in same capacity. Reginald George Bennett, Detroit agencyman, to KFSD as account executive.

Milt Flack, news editor, WBML Macon, Ga., appointed news director. J. Howard Abolom, WMAZ Macon, Ga., to WBML as night news editor. John Robinson and Dale Bagley to WBML as reporter and announcer, respectively. Joe Lipton, WTOC Savannah, Ga., to WBML as announcer.

Phil Young, formerly advertising manager of Pontiac (Ill.) newspaper, to WICS (TV) Springfield, Ill., as account executive. Bryan S. Halter Jr., formerly with WLDS Jacksonville, Ill., to WICS as continuity assistant-announcer, and Marion Leimbeck, formerly advertising department of Chicago Tribune, to same station as continuity and traffic assistant.

Jacques Biraben, with WINS New York for two years in various sales capacity, to sales staff of WOR New York.

William B. Reed, announcer, WKNB New Britain, Conn., transferred to sales staff, WKNB-TV.

Ken Miller, news director, KVOO Tulsa, Okla., named news director of KPHO-AM-TV Phoenix, Ariz. Paul Gribben, newscaster formerly with KOY and KTAR Phoenix, to KPHO-TV.

Stuart Leslie, Syracuse U. graduate, to WTAP-TV Parkersburg, W. Va., as account executive.

Charles M. Pickering, account executive, Chambers & Wiswell, Boston agency, to WBZ-TV Boston in same capacity.

Leslie Nichols, news division, WGN Chicago, to KIBM Denver and Intermountain Network.

Leonard Mosby, director-producer, WMBR-TV Jacksonville, Fla., promoted to production manager.

Everett Holle returned to WABT (TV) Birmingham, Ala., after Army duty.

Mary Pyemont Marsh, traffic manager of KGMS Sacramento, Calif., to traffic department of KFMB Hollywood.

Richard J. Jennings, announcer and writer-producer, WGY-WRGB (TV) Schenectady, N. Y., to WRCA New York as staff director.

Mel Fine, disk jockey, WIKK Erie, Pa., to WICH Norwich, Conn.

Bill Dunn, journalism graduate, Creighton U., Omaha, to WOW-TV Omaha promotion staff.

Bob Segreti, newscaster, WISN Milwaukee, broadcasting daily on 15-station Wisconsin Network.

Henry Kimbrell, musician and night club entertainer, to WAPL-WABT (TV) Birmingham, Ala., as member of production department assigned to create musical commercials.

Overwhelmed

RADIO spot commercials publicizing the opening of a San Diego, Calif., drive-in restaurant brought such an overflow of customers to the eating place that the advertising campaign had to be cancelled three hours before its completion. The spots, aired over KCQB San Diego by Pat's Drive-In of that city and broadcast by the station's "Parade Dee Days," advertised 45-cent hamburgers at 11 cents as a grand opening special.

Jim Turner, manager of Pat's, had this to say about the opening:

"Friday, the first day ... we sold more than 4,200 hamburgers. Saturday, well over 7,200, and we must have turned away at least the same number. We just couldn't handle it."

"On Saturday night, we had to close three hours early—at midnight—cancel the radio spots, and beg the people to go home. We were completely sold out of everything ..."

Mr. Turner feels that "the remarkable part of this success is that KCQB was the only advertising used, and we used only one 1-minute spot per hour for 45 hours plus a remote. KCQB did a sensational job and can count us as a permanent customer."

Said the owner of a competitive drive-in a few blocks away:

"We were swamped just from the overflow. If they plan any future deals like this, how about letting me know in advance so I can get extra help and supplies."
IMPORTANT

to 10,000 present
Magnecord users...

INSTANTLY
convert your present tape recording equipment
to the industry’s highest standards

Now, by replacing your present Magnecord tape transport with the new magnificently engineered P-63-AX, you instantly convert your professional equipment to the finest available in the industry! And you save the cost of a new amplifier at the same time! Just plug the P-63-AX into your present amplifier—you’re ready to go!

The P-63-AX is powered by 3 motor direct drive, with two-speed hysteresis synchronous drive motor. All controls are swiftly operated by push buttons. Tape speeds of 71/4 and 15 IPS are changed by switch ... no outmoded changing of rollers. Deep slot loading and automatic tape lifter for fast forward and rewind are provided. Both manual and electric cueing simplify programming, editing.

Solenoid brake control automatically puts greatest brake action on unwinding reel to eliminate tape spillage. Easily adjustable bias current. Takes 10y 1/2” NAB reels; automatic shutoff at end of reel, no thrashing! Separate erase, record and playback heads allow simultaneous record and playback.

Performance? We guarantee the P-63-AX to be even greater than its laboratory specifications; Frequency response, 40 to 15,000 cycles at 1 IPS. Signal to noise ratio, 50 db at 3% THD full track; wow and flutter, 2% at 15 IPS; timing accuracy, 3 sec. plus or minus in 30 minutes.

Just plug the P-63-AX into your present Magnecord amplifier (any of the PT6, PT76 and PTV models). The P-63-AX heads are compatible with your amplifier. On-the-spot servicing of the new P-63-AX is simplicity itself; all motors and controls are on separate assemblies held by four easily removable bolts.

NOTE: New NABTS equalizer and modification kit will be available at very modest cost.

In one short year, thanks to ABC network and good local programming we have come up faster than "Needles" — and twice as sharp. April pulse ratings multiplied by total coverage divided by KLR rates equals the best bet by far — on the nation’s fastest track: the Portland market.

**Comparative standing based on all quarter hours 6:00 p.m. to midnight Monday through Friday in April pulse.**

**The payoff is GOOD too— Portland’s Brightest Picture Sellingest Merchandising**

**TV NETWORK GROSS UP 19.2% IN APRIL**

Time charge gain over same month in 1955 reflected in totals of three networks which topped the $39 million mark.

GROSS time charges of the tv networks totaled $38,964,728 in April, or an increase of 19.2% over April 1955, according to Publishers Information Bureau data. The April gain compared to the 17% increase in March of this year over March 1955.

Four-month total for all three networks this year was $155,642,508, or 17.9% ahead of the period last year. Dumont with $462,335 was included in the April 1955 total.

All three networks boosted their gross billing in April, CBS-TV by 14.4% over that month in 1955; NBC-TV, 13.9%, and ABC-TV, 75%. ABC-TV grossed $25,722,106 in the four-month aggregate, placing the network’s gross billing 75.9% above last year’s total for the January-April period.

The full PIB table of gross time charges for network tv follows:

* Revised as of May 31, 1956.
** Effective September 15, 1955 Dumont Television Network changed from a national network to a local operation.

**NBC Yearend Figures Show ‘Monitor’ Take $4 Million Plus**

A PROGRESS report on NBC Radio’s Monitor weekend service issued by the network last week showed that in its first full year of operation the program attracted a total of more than 40 advertisers and grossed billings “well over $4 million.”

Fred Horton, director of NBC Radio, said that 4,349 announcements were ordered the first year of Monitor. He claimed these announcements had delivered an estimated 2,039,681,000 home commercial impressions. Mr. Horton said sales on Monitor mark “a record for weekend advertisers on NBC Radio during the past few seasons.”

**CBS Promotes Finn**

ALLAN FINN, staff member of CBS-TV Press Information department, last week was named manager of CBS Radio Press Information, succeeding Edward Reynolds, who has resigned to join Ketchum, MacLeod & Grove, New York.

Mr. Finn has been with CBS since 1946, joining the Hollywood office press information section and then transferring to the news staff before joining the New York tv press department in 1948. He also has been radio-tv editor of Newsweek.

**Clayton Shields Promoted**

CLAYTON SHIELDS has been named assistant business manager of ABC Radio, reporting to business manager Stephen C. Riddleberger, it was announced last week by Don Durgin, vice president in charge of ABC Radio. Miss Shields, who has been with ABC since 1945 in various administrative capacities, served most recently as business manager of the ABC Radio program department.

**Twining Gets NBC Offer**

NBC reported last week it had offered its “full facilities” to be put at the disposal of Gen. Nathan F. Twining, U. S. Air Force chief of staff, when the general visits Moscow as a guest at Soviet Air Force Day ceremonies on June 24. The offer was made in a telegram by Davidson Taylor, NBC vice president in charge of public affairs.

Mr. Taylor encouraged Gen. Twining to consider the use of tv and radio facilities of NBC, either while he is in Moscow (through Irving R. Levine, NBC correspondent there) or "immediately on your return" to the U.S.

**Keeping in Touch**

ABC NEWSMEN will be able to keep in touch with the network’s convention headquarters in San Francisco and Chicago through means of a newly-developed audio-receiver (Page-Boy) during the periods they leave the convention halls. The Page-Boys will be "locked" to the frequencies of ABC stations—WLS Chicago and KGO San Francisco—with the stations broadcasting signals during their station breaks.

Each staff member carrying a Page-Boy will have a particular signal, which will indicate to him that ABC conventional headquarters is paging him. The Page-Boy is intended for use outside the convention hall, while the recently-an- nounced Audi-Page is designed for use in the hall. Both devices were developed by the Philo Corp., sponsor of ABC’s radio and television coverage of the conventions and of election day returns.
NETWORK PROBE—(Continues from page 32)

grams that it is possible to plan and produce them all.

Similarly, owned stations are laboratories for program ideas and talent. In a number of cases, programs developed by its owned stations have later been added to the network schedule.

But television stations owned by CBS contribute not only to the network but, even more important, to the communities which they serve. It has long been the policy of CBS that both the personnel of the owned stations and the stations themselves play an active role in the civic life of their cities. The stations owned by CBS have concentrated heavily on local programming and community service.

It is submitted that no facts and no considerations of public policy would justify discriminating against networks, among all potential owners, as ineligible to own stations. On the contrary, as has been shown, the public would be seriously deprived by such a prohibition, not only because of its grave effect on networking operations, but also because it would deprive important local communities of station ownership which has proved by its record that it serves the communities well.

H. THE PROPOSAL TO REGULATE NETWORK AFFILIATIONS. The proposal that the Federal Government intervene in the question of network affiliation with stations and in effect determine which stations a network must affiliate is apparently based on the premise that networks have been arbitrary and whimsical in their affiliation determinations. The facts are to the contrary.

It is submitted that any careful examination of the procedures, practices and criteria which the CBS Television Network has adopted in making its affiliation determinations readily establishes that the network is not arbitrary or whimsical. These practices, policies and criteria have been described in full in response to a "Questionnaire for TV Networks," submitted to this committee in December 1954. [For full text, see B/W, Feb. 21, 1955]

I. THE PROPOSAL TO REQUIRE VHF STATIONS TO SHARE NETWORKS. ABC has suggested to this committee that vhf stations in one- or two-station markets be required, for an unspecified "interim" period, to "share their service equally and equitably among the three networks.

Proposals such as this have been advanced in recent years. A similar proposal was the subject of FCC rule making proceedings in 1950-51. It was also advanced by DuMont in 1954. Both times it has been rejected; both times, indeed, it was opposed by ABC itself.

In essence the proposal, under the guise of encouraging and equalizing competition, in fact is antithetical to competition. It would dilute the incentive of networks constantly to provide the best possible programs, for no matter how good their programs, the networks would by law be forbidden access, during certain periods of the day, to stations in favor of a competitor.

Nor can those undesirable consequences be considered, as ABC seems to suggest, in the light only of a third network. The possibility of fourth, fifth, sixth, etc. networks must also be considered, particularly if, as the proposal contemplates, each has a right automatically to a free ride in sharing stations' time. Thus, the moment a fourth organization declares itself a network and enters the business, it would have an automatic right, regardless of its performance, schedule, or record, to share one quarter of the aggregate time of stations in markets which have less than four stations; a fifth network would get one fifth of stations' time in markets of less than five stations—and so on, cutting down on the time available to existing networks with each new "network."

J. THE PROPOSAL TO LICENSE NETWORKS. The proposal to license and regulate networks is, on its face, simple. But since the Commission already exercises considerable regulatory powers over a network through its licensing of the stations owned by the network, as well as through its licensing of stations affiliated with the network, the implications of a proposal directly to license and regulate networks are both wide and unknown. In effect, it would seem that the proposal is designed to regulate, and hence license, anyone entering into the business of networking, irrespective of the fact that the network may own no stations and thus make no use of any portion of the broadcast spectrum. Yet it is the use of the spectrum which has always provided the basis in law for licensing and regulating broadcasters.

By abandoning this concept, the proposal enters into a novel and dubious realm. Its implications are perhaps most clearly assessed by regarding it as a proposal to regulate and license a network, not only in its affiliation practices, but also as a supplier of program material—just as are film producers, independent program packagers or advertising agencies which produce programs. That is an extreme concept which may well lead to the complete destruction of the principle of free competition embodied in the Federal Communication Act and basic to the American system of broadcasting.

To the extent that the proposal is an attempt to regulate networks per se and wholly apart from station licensing, it is no different from saying that newspaper wire services or news-

FOR A HAPPY PRESENTATION

The joy of accomplishment is a universal happiness. Especially in the case of a film which is your creation, born out of hard work and careful planning.

Because Precision's staff of specialists adds its own creative efforts to yours by the use of specially designed equipment, and by careful handling and intelligent timing—
you might say we are fellow creators, working with you to bring out all you've put into the original...Yes, and maybe more!

So, when you turn those 16mm dreams into realities, be sure to call upon Precision for the accurate, sound and exact processing your films deserve.

Remember: Precision is the pace-setter in processing of all film. No itching of originals—some to scene color in perfect, optical track freezing, all are the very best...24mm service, too!

you'll see...and hear...

FILE LABORATORIES, INC. 21 West 46th Street, New York 36, New York A DIVISION OF J. A. BAURER, INC.

In everything, there is one best...in film processing, it's Precision...

Moore-Salant Debate Planned By Communications Bar Assn.

DEBATE between Richard A. Moore, KTTV (TV) Los Angeles, and Richard S. Salant, CBS vice president, has been scheduled by the Federal Communications Bar Assn. at a luncheon meeting June 21 in the Willard Hotel, Washington.

Mr. Moore advocated a major revision in network rules to eliminate option time and must buy—a proposal before the Federal Communications Commission last March [B+T, April 2]. He also strongly urged these moves in a meeting with the FCC's network study staff.

Mr. Salant once before upheld the networks' side of things in an FCBA debate with Harry M. Plotkin, former FCC assistant general counsel and at that time television counsel to the Senate Commerce Committee majority. This was last year [B+T, April 4, 1955].

Two Promoted by ABC

ROYCE L. (VERNE) POINTER, in charge of maintenance at ABC, was promoted last week to chief video facilities engineer and Herbert C. Florance, ABC-TV maintenance engineer, was advanced to supervisor of maintenance for the New York engineering department. The appointments, announced by Frank Marx, ABC vice president in charge of engineering and general services for ABC, were effective immediately. Mr. Pointer started in broadcasting with KFJB Marshalltown, Iowa, in 1939, later joined KTRI Sioux City, WKBB Dubuque and WOI Ames, all Iowa, becoming design engineer for RCA Victor Div. in 1946 and joining ABC in 1948. Mr. Florance had been with MBS, NBC, WCHF New York and KDEC San Francisco before joining ABC in 1950.

'Lassie' Suit Settled

OUT-OF-COURT settlement for $165,000 of a two million dollar suit disputing the division of profits from the CBS-TV Lassie show has been filed in superior court at Santa Monica, Calif. Clarence Euriist will get the settlement on his contention he once owned 40% of the program.

KOME Joins ABC

AFFILIATION of KOME Tulsa with ABC Radio was announced jointly last week by E. William George, general manager of the station, and Edward J. DeGray, national director of station relations for ABC Radio. KOME is owned by the Oil Capital Sales Corp., and operates on 1300 kc, 5 kw night and 1 kw day.

CBS-TV 'Evidence' Sought

BRITISH security forces in Cyprus have requested a copy of a film taken by CBS news cameramen of the May 21 rioting in Nicosia, Cyprus, for purposes of reconstructing and evaluating the outbreak in which one British soldier was killed and five wounded, according to the network. Films were shot during the riot by CBS correspondents Paul Bruck and Alexander Ethvylou, who were within six feet of exploding hand grenade tossed by rioters, according to CBS-TV. Footage was used on various CBS-TV news programs.
Funeral for Jean Hersholt
Held in Los Angeles June 4

LAST RITES were held June 4 at Church of
the Reckless, Forest Lawn, Los Angeles, for
Jean Hersholt, 69, veteran movie actor who
played the late Dr. Christian for more than 16
years on the CBS Radio series of that name. The
half-hour weekly program began in late 1937.
Mr. Hersholt died just 17 days after more
than 500 members of the entertainment industry
paid tribute to him at a $100-a-plate testimonial
banquet honoring his years of service. He had
left his hospital bed to attend. Mr. Hersholt
had been seriously ill for some time.

President of the Motion Picture Academy
from 1945 to 49, Mr. Hersholt for 20 years
had been president of the Motion Picture Re-

Presenting a birthday cake to mark a
star’s anniversary is pretty routine in the
promotional game. Not so giving 155 cakes.
That’s the gimmick conceived by Wauhillian
La Hay of the public relations department
of Kenyon & Eckhardt, the results of whose
labor surround CBS-TV’s Ed Sullivan in the
scene above.

Occasion was the eighth anniversary (June
24) of Mr. Sullivan’s Ed Sullivan Show,
until this year Toast of the Town, KAE,
agency for Lincoln-Mercury on the Sunday
night variety program, enlisted a major hunk
of the 180 or so stations which carry Mr.
Sullivan to send him a culinary offering.
This not because the star has an insatiable
sweet tooth (the cakes themselves went to
charitable organizations), but because it
seemed a good vehicle for both network and
stations to effect more than cursory notice
of the program’s longevity. The evidence
supports the idea.

Many stations (like WBEN-TV Buffalo)
had the cakes baked on the air, during regu-
lar cooking programs. Others (like KLZ-
TV Denver and KOSA-TV Odessa, Tex.)
made a production out of sending the cake
off at airports. One, CHCT (TV) Calgary,
Ont., gave out samples of the cake to pas-
engers on the flight to New York. Another,
KTVH (TV) Hutchinson, Kan., built a pro-
gram around the cake, with telegrams from
the governor and other notables.

For his side of the bargain, Mr. Sullivan
posed with each of the cakes, and the pic-
tures were sent back to the stations for local
promotion. He also made an open-end an-
nouncement thanking the station for the
cake. A film clip of him accepting the
cakes will be used on the June 24 show.

The death of Mr. Hersholt will not alter
production plans on Ziv Television Program’s
new Dr. Christian TV film series, it was an-
nounced by a spokesman for Ziv TV. He said
the title role will be carried by MacDonald
Carey, who will portray Dr. Mark Christian,
nephew of the older physician.

Community Network Changes

THE Community Network, with headquarters
in Montrose, Colo., has been renamed the
Colorado Network, according to George Cory,
president. Mr. Cory said the network functions
for the purpose of improved service to both
advertisers and listeners.

Other officers in the organization include
Kenneth J. Stone, treasurer; John N. McRae,
national sales and operations manager, and
Shulom Kurtz, executive secretary. Stations in
the Colorado Network are KVOD Denver,
KUBC Montrose, KRAI Craig and KSLV
Monte Vista, all Colorado.
18 Join Keystone

ADDITION of 18 new affiliates was announced by Keystone Broadcasting System June 1. KBS now numbers 890 stations, according to Blanche Stein, station relations director. Stations added:

WFBR, ABC Will Split

WFBR Baltimore Vice President and General Manager Robert B. Jones Jr. announced last week that the station would drop its ABC affiliation, effective May 31, 1957, or earlier if the network desires. WFBR has been an ABC affiliate since 1945.

An ABC spokesman in New York said last week that the network at this time has no plans for a replacement.

NETWORK PEOPLE

James A. Macdonald Sr., sports director of N. W. Ayer & Son, N. Y., to executive radio producer for CBS sports, effective July 11.

Fred Pierce, member of ABC-TV's research and sales development department, father of boy, Richard Wayne, June 5.

Gene Bayliss, ABC-TV choreographer, father of boy, Philip Martin, May 2.

PROFESSIONAL SERVICES

Pearson Starts New Firm

LLOYD PEARSON, Assoc., new tv merchandising consultant firm, opened in New York last week at 420 Madison Ave. Lloyd Pearson, former west coast film producer, is head of the firm.

The firm will specialize in tv marketing and the merchandising of consumer products, stressing local markets where merchandising pro- grams can increase sales to dealers, distributors and retailers of national manufacturers. Phone is Templeton 2-8821.

PROFESSIONAL SERVICE PEOPLE

Frank H. Burgmeier, newscaster, WHEN-TV Syracuse, N. Y., to Carrier Corp., that city, as national publicity representative.

Dr. Rene G. Smoller, named public relations counsellor to public relations department of Richard S. Robbins Co., N. Y., sales promotion agency.

Virgina McFheeters, Hollywood actress and motion picture producer, to Methodist Church Television, Radio & Film Commission, Nashville, Tenn., as assistant production supervisor and unit manager.

Richard S. Smith, formerly public relations di- rector of Advertising Producers, Chicago agency and previously staff writer at ABC, to Chicago editorial staff of Harshe-Rotman Inc., public relations firm.

PROFESSIONAL SERVICE SHORT

Engineers Joint Council, N. Y., announces di- rector of all local, regional and national en- gineering societies, published by the Engineers Joint Council, N. Y., will be made available this summer at pre-publication price of $3.50. Copies may be ordered from E. Paul Lange, EJC secretary, 29 W. 39th St., New York 18.
RCA COLOR TV RECEIVER TO SELL FOR $495

Announcement of new low in color video set prices made at Miami Beach session.

As early as last winter, RCA tipped its hand it would whittle the price tag of its 1956-57 color tv receiver models [B&T, Feb. 6]. Last week it was made a fait accompli.

At Miami Beach, Fla., where RCA Victor television distributors and sales executives were introduced to the lines, Robert A. Seidel, executive vice president of RCA's Consumer Products, announced the public next month would see the new RCA 21-inch color tv table model priced at $495. The new model is in mass production.

The 1955 price tag is $200 below the current bottom price of RCA's color tv receivers. It also is the lowest price yet announced for a large-screen color set. Close to the RCA price is the Admiral Corp.'s 21-inch color receiver that is expected to retail this summer for $499.95. Other manufacturers reportedly also have lower-priced lines under study.

Mr. Seidel promptly hailed RCA's new color receiver price as an open door to the "public's realization that color television . . . has arrived."

Said Mr. Seidel: "Development by RCA engineers of a totally new color television chassis which utilizes an array of technical advances makes possible the introduction of the $495 color sets. These receivers were conceived to create a volume business and to provide the public with budget-priced color sets featuring top-quality performance and stability.

"The new chassis uses 23 tubes, including the kinescope, two crystals and four rectifiers. The set has a viewable picture of 254 square inches, using RCA's 21-inch tri-color picture tube. There are 10 RCA color models in all, covering three series, "Special," "Super" and "Deluxe." Prices will range up to $850 compared to the current maximum price on RCA's color line of $995.

C. P. Baxter, vice president and general manager of RCA Victor Television Div., said the color receivers would be called the "Spectacular" line. He noted that the sets make extensive use of printed circuit boards with both color and monochrome models using up to six such boards in each chassis.

From 80 to 90% of the circuitry is printed-circuit boards compared with about 20% in previous color models. RCA also explained that circuits have been added to all its color set models to improve reception of black-and-white pictures. When color programs are not being telecast, the color circuits are electronically "killed," thus favoring superior monochrome reception. All 10 of the color models are available with uhf-vhf tuning at "nominal extra cost," RCA explained. Other improvements in installation, tuning, color "fidelity" and sound are claimed.

Also announced at the Florida meeting were 25 newly-styled RCA black-and-white models which will be tagged from $125 to $500 compared to the current advertised $149.50 to $300 price range, and a line of multi-speaker high-fidelity music systems to be marketed in eight models ranging in price from $79.95 to $1,600.

James M. Toney, vice president and general manager of RCA Victor Radio and "Victrola" Div., told the sales meeting that RCA will market a stereophonic tape player under $500, or less than half the price of similar equipment now being marketed. Portable unit will sell for $295 and a console at $330. The system plays on two separate amplifiers and speakers from a dual track on the tape. Also on RCA's list are eight hi-fi phonographs, ranging in price from $79.95 to $1,600.

Under-$400 Color Prospects Mulled

A day after RCA announced a $200 cut in the price of its lowest-priced color tv receiver for the firm's new 1956-57 line, renewed interest in a color receiver that would sell under $400 was sparked by Paramount Pictures Corp. RCA's bottom price will be $495.

Barney Balaban, Paramount Pictures' president, told stockholders at an annual meeting in New York (also see story, page 50) that Chromatic Television Labs' color set design—i.e., Chromatic's single-gun (Lawrence) tube and circuitry—"has reached the stage of commercial acceptability. Mr. Balaban also said that once certain problems "in the production design of some of its components" are solved, "we will be able to offer to the industry a color television set which can be sold to the public at a price below $400 per set." Paramount Pictures hold a 50% interest in Chromatic which for sometime has been working on color design using the Lawrence tube.

After the meeting, a showing for stockholders was held by Paramount using a hand-made color models. A color film was telecast by cable from within the Paramount Bldg. for the demonstration. Three sets—two 21-inch and one 22-inch—were used with the color reproduction, according to observers, ranging from poor to excellent. Those who witnessed the showing noted that the colors of fabrics and product packages (cigarette packs, cereal containers, etc.) showed up "good" but that shots of a salad plate and a fish course were "poor." Major stopper to mass production of the Lawrence tube was the making of the accelerating

Radio-Controlled Watches

NEW CLAIMANT for radio spectrum space may be on the horizon if the prophecies of Fred Cartoun, Longines-Wittnauer Watch Co. board chairman, come true. Mr. Cartoun, appearing before a Congressional subcommittee on foreign policy, predicted that the day may not be far off—maybe within 10 years—when watches will be activated by radio impulses; even now, Mr. Cartoun said, firms are experimenting with electronic timepieces.

After a check with the FCC could uncover no applications for experimentation in the electronic watch field, 3MT queried Bell Labs and GE, firms which Mr. Cartoun predicted would be among pioneers in the development of the techniques for radio-operated timepieces. A Bell Labs' spokesman said his firm has no plans to develop an electronic watch, but is now engaged in developing electronic timing devices for industry-use.

A report from GE indicated that the company was ahead of time, electronically speaking: a spokesman said GE already has developed an electronic clock. This clock is mounted on a wall without cord. A tiny transmitter is plugged into the power line and the radio impulses run the clock.
DuMont Sales Staff Reduced

SALES STAFF of Allen B. DuMont Labs’ tv transmitter department has been more than halved—actually five out of eight have been let go—in past weeks as part of a general overhauling or streamlining of its transmitter sales operation, it was learned last week. About a month ago, DuMont resigned its technical products division, which among others includes transmitter, mobile communications and the instrument departments. DuMont’s annual report for 1955 indicated that the firm was having difficulty with the sale of its transmitter and other tv equipment because of “excessive inventories and credit problems with broadcasters” [BTW, April 9]. The report traced much of the trouble to uhf.

Emerson’s Net Profits Drop

EMERSON Radio and Phonograph Corp., Jersey City, has reported a consolidated net profit for the 26-week period ended April 28 of $317,666, equal to 16 cents per share, as compared with consolidated net profit of $1,111,981, equal to 57 cents per share, for period ended April 30, 1955. Figures for both periods were computed after provisions for federal and the tv income taxes. The company offered no explanation for the income-profit drop.

University Doing Research On Antenna for Satellites

RESEARCH is underway at Michigan State U. on new receiving and transmitting antennas which might be used eventually as a means of communication with the first artificial satellite launched into space of the first rocket sent to the moon.

Two MSU professors have been conducting research on mathematical equations involved in cigar-shaped antennas, the university reported Wednesday. Dr. Charles P. Wells, assistant professor of mathematics, and Dr. Alfred Leitner, associate professor of physics, feel it may be at least theoretically feasible to treat the rocket itself as an antenna by applying electrical charges to certain parts.

“Rockets or satellites could not use clumsy outside antenna like the ones that perch on roofs,” according to Dr. Leitner. “They would slow down trave-speed and break off.”

The study was prompted, according to MSU, by this future need on outer space projects as well as that for improving present radio and television antennas, proximity fuse devices and radar. The project has the support of the U. S. Army Office of Ordnance Research.

The two MSU faculty members also believe it may be possible for a tv set owner to get more than one channel in the same area without rotating his antenna. Prof. Wells feels “the antenna pickup can be altered by feeding to points other than the center the same amount of power now fed into the center of the antenna.” This would set up reception waves simultaneously in and from two to several directions from the antenna, he contends.

“Stations lying within range in those additional directional areas should be received if practical application of the theory proves successful,” Prof. Wells declared.

Ampex Sells to WISN-TV

WISN-TV Milwaukee has ordered a $50,000 Ampex video tape recorder, John B. Soell, station director, announced last week. The recorder will be installed in the new WISN-AM-TV center, scheduled for completion early next year.

W. B. VALENTINE, RCA field sales representative, points out a feature of an RCA 5 kw transmitter (BTA-SH) to O. Wayne Rollins, president of Rollins Broadcasting Co., who purchased five om radio transmitters of the new 5-kw and 1-kw types. Rollins also bought complete studio facilities from RCA for WIRI Indianapolis, a new station in the Rollins group which includes, in addition, WRAP Norfolk, WNJR Newark, N. J., WAMS Wilmington, Del., WBEE Harvey, Ill., and WJWL Georgetown, Del.

Radio, Tv Receiver Output Off Slightly

PRODUCTION of radio and tv receivers for April fell slightly below 1955 levels, according to Radio-Electronics’ tv receivers. Radio output totaled 992,982 for April 1956, including 299,523 auto sets, compared to a total of 1,099,773 sets in the same 1955 month. Tv production amounted to 549,630 sets in April compared to 583,174 in the 1955 month. Current April production figures were well below those of March, a five-week statistical month.

Four-month production totaled 4,525,225 radios and 2,394,264 tv sets compared to 4,739,919 radios and 2,771,426 tv sets in the same 1955 period. Of the April 1956 tv production, 74,102 sets had uhf tuners and 2,150 had fm band tuners.

April sales of radios at retail stores totaled 471,193 sets, well above the comparable 1955 figure, 367,841. These sales do not include auto sets, which seldom move through retail channels. April tv sales totaled 347,630 sets compared to 411,748 in the same 1955 month.

Radio sales for four months of 1956 totaled 1,984,915 sets, compared to 1,609,182 in the same 1955 period. Four-month tv sales were 2,036,808 this year, compared to 2,355,740 a year ago.

Factory sales of tv picture tubes totaled 830,902 units in April, compared to 788,317 a year ago. Factories sold 35.1 million tv tubes for April, compared to 35.4 million in April 1955.

Following are radio and tv set production figures for April and the first four months of 1956:

New Armchair Tv Control Developed by Zenith Corp.

DEVELOPMENT of a new model remote hand-operated tuner to activate and control tv receivers was announced by Zenith Radio Corp. for large-screen receivers that are scheduled for late in the year. The latest design is claimed to work without need of wires, batteries, electricity, light or radio waves.

Called the “Space Commander,” the eight-inch unit may be operated from anywhere in a room to change or turn stations on or off or “silence annoying commercials,” according to L. C. Truesdell, vice president and sales director. It may be used with 10 Zenith tv receivers and is also available in a “limited version” with eight other models, changing channels in one direction and “turning annoying commercials on and off.” The Commander is a self-contained unit with push buttons. Last year Zenith introduced a “Flash-matic” gun device which serves the same purposes.

The new unit is standard equipment with all Zenith “Space Command” sets. Suggested retail prices of the sets range from $259.95 for large-screen consoles, and from $349.95 to $359.95 for large-screen consoles.

CBS Buys GPL Projectors

SALE of eight 35 mm telecast projectors (Model PA-200) to CBS was announced last week by General Precision Lab, Pleasantville, N. Y. The units, GRL-5H, are scheduled for early delivery, six to the West Coast and two to CBS’ New York operations.
Olympic Radio & Television Changes Name; Expansion Set

BOARD of directors of Olympic Radio & Television Inc., Long Island City, N. Y., has voted to change the corporate name of the firm and its affiliated companies to Unitronics Corp., which now becomes the parent company with ORT functioning as a separate division.

William H. Husted, chairman of the executive committee and a director, announced Tuesday that the reorganization is in step with an “activated expansion program.” Negotiations are in an “advanced stage” to acquire several additional businesses, he said. One of them he identified as a west coast manufacturer of electronics equipment.

Another division of Unitronics will be David Bogen Co., maker of public address, high fidelity sound equipment and inter-communication systems and acquired by Olympic last February as a wholly-owned subsidiary. Olympic two weeks ago leased warehouse and shipping space in Brooklyn, N. Y. Another phase of its expansion program is the speeding up of efforts to develop new products and to improve existing ones in the radio, phonograph, tv and electronics equipment fields.

Olympic’s first quarter sales increased from $4,800,986 in last year’s period to $6,676,365 this year, with net income after taxes totaling $159,464, or 35 cents a share on 433,352 shares of common stock outstanding. Expressed in the first quarter of last year were $82,631, or 18 cents per share.

Unit sales of Olympic tv sets last month rose 102% above the number sold in May of last year, Herbert Kabat, vice president in charge of sales, announced last week. According to Mr. Kabat the sales jump was attributable to Olympic’s 14-inch and 17-inch portable tv sets and to the firm’s increased number of dealers.

GE to Build New Facility

GENERAL ELECTRIC Co. will begin construction this summer on a new building near Gainesville, Fla., which will be the headquarters and manufacturing facilities of the company’s Communication Equipment Section, it was announced last week by Harrison VanAken Jr., general manager of the section.

Mr. VanAken said that it will take about two years to complete construction. He estimated the cost of the project “in excess of $4 million.” The Communication Equipment Section has four major product categories—two-way mobile radio communication, microwave, power line carrier and terminal equipment.

MANUFACTURING PEOPLE

Alton K. Marsters, formerly general sales manager, CBS Hytron Div., was appointed sales vice president, Bausch & Lomb Optical Co., Rochester, N. Y. Russell E. Craytor appointed manager of Ray-Ban sun glass sales for company.

C. J. Gentry promoted from salesman to national car radio specialist at Motorola Inc., Chicago, with responsibility for development of Olympic’s automobile radio field sales.

George H. Clark, 75, with RCA in various executive capacities for 27 years and retired in 1946, died June 3 in New York following long illness. He was founder and former president of Veteran Wireless Operators Assn.

CBS WILL SET UP $50,000 IN COLLEGE DONATIONS

Organization continues plan of making grants to alma maters of top executives. This round: $2,000 each for 25 men at 16 schools.

GRANTS of $2,000 each for a total of $50,000 will be made this year by CBS Foundation Inc. on behalf of 25 top CBS executives to 16 colleges and universities.

This is the third year of the foundation’s grant program which will have allocated $122,000 in the aggregate to educational institutions. Grants are made to schools from which top-level CBS executives have graduated.

Grants made for 1956, indicating university, number of grants and executive or executives, follow:

Amherst (1), Robert Strusnsky, copy chief, CBS-TV’s advertising and sales promotion department; Dartmouth (2), Raymond D. Builter, assistant controller, Columbia Records, and Dudley Faust, network sales staff, CBS Radio; Davidson (N. C.) College (1), Willard Edwards, general sales manager, CBS Television Film Sales; Doan College (Crest, Neb.) (1), Gerard W. Wiebe, assistant to the president, CBS Inc.; Fordham (1), Merritt H. Coleman, director of business affairs, CBS-TV; Harvard (3), Milton Neaman, CBS Inc. senior attorney; Richard S. Salant, CBS Inc. vice president, and Newell T. Schwin, tv sales manager of Terrytoons (Div. of CBS Television Film Sales).

TV Rebroadcast Receiver

NOW IN USE FROM COAST TO COAST

The Model TR-1 TV Rebroadcast Receiver has been designed specifically to meet the requirements for a high-quality receiver for use in direct pickup and rebroadcast of television signals. It embodies features which give the reliability necessary for full-time commercial use and provides signals of exceptional quality, fully equal to, or better than, that provided by the usual intercity network facility.

RCA Gives to Bryn Mawr
RCA has contributed a gift of $25,000 to Bryn Mawr College in recognition of its work "in providing advanced training for women in the physical sciences," it was announced yesterday (Sunday) by Katherine E. McBride, president of the college. She termed the gift "the largest single donation Bryn Mawr ever has received from industry.

EDUCATION SHORTS

American Council on Education for Journalism has published Choosing a Career in Journalism, 52-page, illustrated booklet, covering jobs in radio, television, newspapers, magazines and advertising. Copies are available at stations, newspapers, trade associations and others at 25 cents each, or 20 cents in quantities of 100 or more. Requests may be addressed to Secretary, Treasurer, ACEJ, Ernie Pyle Hall, Indians U., Bloomington.

1956 AWARDS PRESENTED BY ART DIRECTORS CLUB
Medals given to networks, stations, agencies and independent production firms at 35th Annual Exhibition of Advertising and Editorial Art and Design, held in New York City.

NETWORKS, stations, agencies and independent production firms cited in last week's 35th Annual Exhibition of advertising and Editorial Art and Design [BT, June 4] submitted entries in categories ranging from live TV commercials to promotional brochures and newspaper advertisements. Listed below are the top winners—those receiving the club's highest award, the Art Directors Club Medal and those tapped for the second-place awards of Distinctive Merit. One special medal for extraordinary art conception also was presented.

Live commercials (16 mm kinescope)—Ford Motor Co. commercial on NBC-TV's Producers' Showcase, Kenyon & Eckhardt, N. Y.; David Buxby & Co. — NBC-TV's 9th "Detroit's Greatest Story"—(Distinctive Merit).

Film commercials (live technique)—Personal Products Corp. (Modens), Young & Rubicam, N. Y.; Eliot, Unger & Elliot, production firm (medal); Dade Div., Chrysler Corp., "I Built Me a Dodge" song commercial (not single), Grant Adv., Detroit; B. C. Marks, Wertheim & Van Prag Productions Inc. (Distinctive Merit).

Film commercials (full animation)—Piel Bros., Brooklyn, N. Y., Young & Rubicam, N. Y.; Jack Sidebotham, art director; Chris Imai and Gene Delitch, UPA-New York, production firm. (Special Art Director Club Medal for the "Jitter and Harry" series of Chrysler Co. Oil Co. (Snowdrift shortening), Fitzgerald Adv. both New Orleans; Art Babbitt, art director; Storyboard Inc. production firm (medal). Diamond Crystal Salt Co., Benton & Bowles, N. Y.; John K. Hulsey, art director, Storyboard Inc. production firm (Distinctive Merit).

Station breaks (single frames, slides, telop, titles, etc.)—CBS-TV, promotion for Petite Secretary sponsored by American Tobacco Co.; George Olden, art director; Bob Ollin of CBS-TV Art Dept., artist (medal). CBS-TV, promotion for Mrs. Get a Secret sponsored by R. J. Reynolds Tobacco Co.; George Olden, art director and artist (Distinctive Merit). CBS-TV, station break for Studio One sponsored by Westinghouse Electric Co.; George Olden, art director and artist (Distinctive Merit).

Show openings—Guild Films Inc.'s Confidential File on TV, NBC-TV New York; Jerome Gould of Gould & Smith Assoc., art director (medal); Magazine advertisements (black and white)—CBS-TV, Joseph Golden, art director; Ludwig Bemelmanns, artist (Distinctive Merit).

Newspaper advertisements—CBS Radio; Lou Dorfsman, art director; Harry Gordon, artist (Distinctive Merit).

Trade periodical advertisements—CBS Radio; Lou Dorfsman, art director and photographer; Leon Golomb, artist (medal). NBC; Grey Adv., N. Y.; Robert Dolokoff, art director; Hans Moller, artist; NBC Photo Dept. (Distinctive Merit).

Point of sale record album jackets—RCA Victor, Dun & Hensssey Inc., N. Y.; Robert M. Jones, art director Carl Fischer, photographer; Herb Lubalin, designer (Distinctive Merit).

Trade periodical advertising—CBS Radio; Lou Dorfsman, art director; Becker-Horowitz Inc., photographer (Distinctive Merit).

Booklet & direct mail art—NBC; John Graham, art director; Joseph Low, artist (Distinctive Merit). ABC: Andrew Ross and Zalo Calabrese, art directors; Milton Glasser, artist (Distinctive Merit).

American Women's Clubs

Cite Radio, TV Programs

 RADIO-TV citations for 1956 were awarded by the General Federation of Women's Clubs at its 65th annual convention in Kansas City. NBC received seven citations, CBS six and ABC five.

Winners in radio:

News—Morgan Beatty, NBC; Entertainment—The Voice of Firestone, ABC; Education—Biographies in Sound, NBC; Youth or children—Adventures in Science, CBS; Promotion of Individual Responsibility—American Savings & Loan Association.

Winners in television:

News—News Caravan, NBC; Entertainment—Hallmark Hall of Fame, NBC; Education—You Are There and Adventure, both CBS; Youth or Children—Let's Take a Trip, CBS, and Mickey Mouse Club, ABC; Promotion of Individual Responsibility—Home, NBC; Meets Problems of Juvenile Delinquency—Young Wants to Know, NBC; Stress Values—Cross Roads, ABC; Special Awards for Variety—Wide World, NBC, and Omnibus, CBS.

AWARD SHORTS

ABC-TV's Crosstracks program (Fri., 8:30-9 p.m. EDT) cited by Salvation Army as "an eminent and memorable service to the community in the realm of fine arts."

WITH Baltimore awarded Certificate of Appreciation by American Legion, Dept. of Baltimore, for cooperation in legion activities. Presentation was second legion award to Maryland radio station in seven years.

Frank M. Folsom, RCA president, received honorary degree at commencement exercises conducted by U. of Notre Dame.

Arthur Hall Hayes, CBS Radio president, graduate of U. of Detroit, class of '26, will be presented with honorary Doctorate of Laws Thursday at university's 73rd commencement exercise.

Lawrence Walk, ABC-TV, cited with honorary degree of Doctor of Fine Arts, U. of Portland, Ore., for furnishing "the nation (with) clean entertainment."

Helen Delich, producer, The Port That Built a City and State series on WMAR-TV Baltimore, received annual world trade award of Advertising Club of Baltimore and named Advertising Woman of the Year by Women's Advertising Club of Baltimore. She is maritime editor of Baltimore Sun.
EUROPEAN COLOR EXPERTS FAVOR AMERICAN SYSTEM

THE American color tv system is by far the best system now available to television stations all over the world. This is the essence of what European color tv experts from 25 nations said about the American, French, British and Dutch color television demonstrations.

The experts, who visited Paris, London, Eindhoven (Holland) and New York, learned that the French Broadcasting Service, Radiodiffusion et Television Francaise and French manufacturers, have developed three different color television systems. The first has been developed by Henry de France and is dubbed Line Sequence System. The second is a so-called double message system devised by Prof. Boutuuy and the third is the Valensi coding system.

All of the three have reportedly considerable disadvantages compared with the American National Television Systems Committee (NTSC) system. In Eindhoven the Philips Co. demonstrated before the experts two different color systems. The first is a European version of the American NTSC compatibility system. The principle difference between the NTSC and the Philips experimental system is that Philips uses the 625-line standard dominant on the European Continent. The second Philips system uses two color subcarrier systems. Philips people explained that the two systems are strictly experimental and that the company has no plans to promote one of the two before uniform European color standards are set.

The experts watched special test transmissions in London over the BBC's Alexandra Palace transmitter, which has been set aside for such tests from the regular b & w transmis-

Distance Overcome

AN ELECTRONICS engineer in Salisbury, Southern Rhodesia, has modified two commercial tv receivers and antennas which enable him to receive European tv programs regularly. George F. Cole, director of Electronic Services (Pvt.) Ltd. first began his television experiments to develop a receiver sufficiently sensitive to pick up tv waves reflected by the ionosphere, which could then be strengthened to provide satisfactory reception at long distances from the transmitter. Southern Rhodesia is located in south-central Africa. He has modified an English and a German set and is now receiving regularly programs from London, Moscow, Switzerland and Italy. Mr. Cole says that the sound is clearer, stronger and of better quality than is received from the local radio station. However, the picture still lacks sharp definition. Mr. Cole believes his experiments may lead to the development of tv relay stations and has registered a patent for his system. He also submits monthly reports to the BBC engineering information department and plans to import an American made set to modify in an effort to receive U.S. tv programs.

'Thought Control' Called Aim Of Canada's Broadcast Policy

THE Canadian government is trying to control thought through its broadcasting policy, a spokesman of the Alberta provincial government told the Royal Commission on Broadcasting when it held its sitting in Edmonton last month.

Alberta Telephones Minister Gordon Taylor described Canadian radio as a muddle of free enterprise and totalitarianism, with the government controlling private stations through the CBC.

At an earlier sitting in Vancouver, the Fowl- er Commission was told about a previously-secret draft bill presented to the Canadian government three years ago by the Canadian Association of Radio & Television Broadcasters. The bill would establish a five-man board to control every aspect of broadcasting. Existence of the draft was made known by Mr. Taylor also termed present broadcasting regulations contempt of free enterprise, because 'men who want to invest money (must) kowtow to a government board.' At an earlier sitting in Vancouver, the Fowler Commission was told about a previously-secret draft bill presented to the Canadian government three years ago by the Canadian Association of Radio & Television Broadcasters. The bill would establish a five-man board to control every aspect of broadcasting. Existence of the draft was made known by Mr. Taylor also termed present broadcasting regulations contempt of free enterprise, because "men who want to invest money (must) kowtow to a government board."

Canadian Embassy Protests Beer Ads on Border Outlets

U.S. AUTHORITIES have been informed that some American border radio and tv stations are violating the intent of Canadian broadcast regulations by carrying advertising for Canadian breweries aimed at Canadian viewers. The problem was raised in Washington by the Canadian Embassy, following complaints on the matter in the House of Commons.

Beer and liquor advertising is banned from Canadian radio and tv. To get around the ban, Canadian breweries have been buying time on American stations, among them WGR-TV and WBEN-TV, both in Buffalo, N.Y., which reach much of the heavily-saturated southern Ontario market.

A Canadian Washington correspondent (Harold Greer of the Toronto Daily Star) said the government's approach was half-hearted and was not expected to achieve anything. The question was raised only "informally" with appreciation that it was probably beyond the scope of the U.S. State Dept.

SUPER is the word for Sound Effects

Over 1000 effects—Send for your FREE catalog and a copy of CUE-TEASERS, a collection of spots cued to sound effects as attention getters.

Classified Radio

RADIO ADVERTISEMENTS in Afghanistan are sold and broadcast on the formula used for newspaper classified ads in this country, according to Abdul Hak Waleh, program director of Radio Kabul, government station in Kabul, capital of Afghanistan.

Advertisements, placed almost entirely by merchants, are priced at so much a word and are read by an announcer one after another with no entertainment in between. These ads are broadcast during two periods each day, following the morning and evening newscasts, he said. Mr. Waleh is studying American broadcasting at WGY Silver Spring, Md. (a Washington suburb), as one of a group of foreign broadcasters brought to this country by the State Dept. each year as part of its international educational exchange program.

F. H. Elphicke, vice president of CKWX Van-
couver. Mr. Elphicke also told the Commis-
sion that Canada has the room and money to support a private network in competition with the CBC.

GERMANS TO TOUR U. S.

DEUTSCHE Staaten-Reise-Gesellschaft, Nurnburg, West Germany, is planning a tour of German radio and television experts from the non-technical side of the industry through the U. S. from Jan. 5 to 24, 1957. DSRG is a private institution specializing in organizing study tours.

FOURTH BRITISH COMMERCIAL

BRITAIN'S fourth commercial tv station, serving Yorkshire, will begin broadcasting test signals in July from Emley Moor. Station is scheduled to start program service Oct. 7. The first, to be built at Black Hill, near Glasgow, has a tentative target date of August 1957.

INTERNATIONAL PEOPLE

Shau Hui Yao, chief engineer, China Broadcasting Co., part of Formosan ministry of information, and Shih Chuan Chang, chief operating engineer, visiting U. S. electronic equipment plant under UN sponsorship.

Andre F. Rhoads, public relations director, Radio Free Europe, Munich, Germany, is on a study tour in the United States. During his visit, Rhoads will be shown how life in one of the world's oldest cities is changing in a modern era.

INTO EUROPE

Britain and the United States have given all-expense paid vacations (for two) to Sarasota, Fla.

WESTERN EUROPE

Deutsche Lumber Co. of New York is analyzing reports of the August 1956 flood in the ancient east states and onetime Washington resident, Mr. District Attorney” who handled the story of how life in one of the world's oldest cities is changing in a modern era.

INTERNATIONAL SHORTS

CKDA Victoria, B. C., appoints Radio Representatives Ltd., Toronto, exclusive representative.

Radio receiver sales in first three months of 1956 in Canada were 105,024, up from 96,628 in comparable period of 1955. Projected production for second three months was fixed at 181,877 sets. Actual sales last year for second three months of year totaled 120,493 sets.

British color tv receivers will be shown for first time at Canadian National Exhibition at Toronto, Aug. 24-Sept. 8. Alongside latest in British tv receivers will be model of television equipment developed in 1926 by Dr. John L. Baird at London.

CKWX Vancouver to move into its new $300,000 building at end of June.

BIG BIRTHDAY PULL ON WKZO

WKZO Kalamazoo reports it received more than 60,000 pieces of mail from 50 Michigan and Northern Indiana counties and three other states in the 13 weeks it conducted its “Scramble-town” contest as part of the station’s 25th anniversary program. During the contest, listeners were given scrambled letters and hints of a town’s identity and asked to name it on post cards. A winning card was selected each week for a portable tv set and grand prize winners were given all-expense paid vacations (for two) at Sarasota, Fla.

WBKB (TV) TAKES LAW IN HANDS

WBKB (TV) Chicago issued public subpoenas to all station talent, directing them to “view Mr. District Attorney” as part of a promotion campaign for two film series—Mr. District Attorney and Federal Men—in cooperation with Courtesy Equipment Co., sponsor of both shows, and its agency, Malcolm-Howard Adv.

WBBM ASKS AUDIENCE HELP

LETTING the audience write its commercial copy, the Gee Lumber & Coal Co. of Chicago has asked for a slogan to describe its goods and services in a contest conducted by Paul Gibson on WBBM (AM), Chicago. The sponsor is offering $1,000 for the best slogan and major appliances to second and third-place winners, as well as merchandise certificates to others.

MONTGOMERY REPEATS ‘STOCK’

FOR the fifth consecutive year, NBC-TV’s Robert Montgomery show, sponsored alternate Mondays by Johnson’s wax and Schick shavers, will offer viewers an eight-week series of “Summer Stock Plays,” featuring groups of lesser known, but permanent stars and a rotating system of directors. The series gets under way July 2 and will be seen every Monday but Aug. 13 and 20 when tv coverage of the two major political conventions will pre-empt the Montgomery shows.

ABC AIRS FOUR NEW SHOWS

FOUR new programs have been announced by ABC Radio. They are Grand Central Station (Mon.-Fri., 11:15-11:30 a.m. EDT), starting July 2; The Jack Pear Show (Mon.-Fri., 11:15-11:30 a.m. EDT), starting July 2; Diaspora (Sun., 5:05-5:30 p.m. EDT), effective yesterday (Saturday), and Unit 99 (Sat., 7:30-7:55 p.m. EDT), which started June 2.

‘CIRCLE’ TO SHOW KINE REPEATS

FIVE plays will be repeated by kinescope this summer on Circle Theatre (NBC-TV, alternate Tuesdays, 9:30-10:30 p.m. EDT), sponsored by Armstrong Cork Co. The repeats will start June 26 and conclude Aug. 21.

KAISER PICKS DIRECTOR TEAM

WORTHINGTON (TONY) MINER, creator of Studio One, Frontier and Medici, will head a four-man producer-director staff for Kaiser Aluminum Co.’s new 60-minute drama series starting on NBC-TV July 3, Young & Rubicam, Kaiser’s agency, has announced. Named to the team for the Kaiser Aluminum Hour (alternate Tuesdays, 9:30-10:30 p.m. EDT) were Franklin Schaffner, Fielder Cook and George Roy Hill, whose collective credits include Kraft Tv Theatre, Ford Star Jubilee and Studio One.

TWAIN MEET ON WTOP-TV

WTOP-TV Washington, serving a city that is a modern crossroads, went to the ancient east-west crossroads of Istanbul to document the life of a typical government girl and onetime Washington resident. The half hour report, filmed over a period of three weeks by WTOP-TV, will be telecast tomorrow (Tuesday) evening. Viewers will follow Miss Mary Catherine Thompson, U. S. Con- sulate secretary, among minarets and through mosques and ancient bazaars in an account that includes not only the story of a government girl abroad but the story of how life in one of the world’s oldest cities is changing in a modern era.

FUTURISTIC RADIO ON MBS

Radio and electronic developments of the future were demonstrated on a Mutual program carried last month in cooperation with the U. S. Army Signal Corp Research Labs as a salute to National Radio Week. Originating from the laboratories at Fort Monmouth, N. J., the program included a talk by Col. C. W. Jones, director of component parts re- search at SCRRL. Col. Jones, who stressed that these developments would not be restricted to civilian use for five or ten years, discussed and demonstrated new solar energy converters (a transistorized radio set was played by placing it under a 100 w lamp); a voice-power radio (sound waves activate the set); the latest tiny mercury batteries; a palm-sized walkie-talkie receiver, and wave-control crystal units, de- signed to permit even more extensive usage of side-bands in radio transmission.

NTA SEEKS GRASSROOTS FEELING

WHAT does the viewing public think about feature films, commercials and television in general? National Telefilm Assoc., New York, to get an answer from “grassroots America,” inserted paid advertisements in newspapers in North Carolina, Nebraska and Iowa several weeks ago, and reports more than 1,200 replies received so far. NTA found several areas of agreement among respondents. All wanted “top quality film” on tv; many said they “would think more of the sponsor’s product if he had a very good program on tv,” and most letters complained of “too many commercials all through the movies.”

KROX FAN STREAMLINES MAIL

NOBODY likes to be a “rubber stamp” for anybody else. But KROX Crookston, Minn., admits to being rather pleased when it finds its listener correspondence addressed to “rubber stamp.” The Krox team admitted to being rather pleased when it finds its listener correspondence addressed to “rubber stamp.”
WHAT happens to the big-money winners of The $64,000 Question after they leave the CBS-TV program? One of them—James N. Egan, a Hartford lawyer, who with his brother copped $32,000 on the program—now is a quizmaster, himself. He holds forth on a competition, World Quiz, for secondary school students that is telecast Saturday afternoons on WKNB New Britain, Conn., and sponsored jointly by the station and the Foreign Policy Assn. of Hartford.

COPS FOR REAL ON WGR-TV

NBC-TV's Dragnet was cancelled by WGR-TV Buffalo May 31 to bring viewers a real-life law enforcement program—a discussion of the Crystal Beach Amusement Park fracas which some officials called a race riot. Eight Buffalo policemen, social and civic leaders took part in a WGR-TV 9-9:30 p.m. telecast to discuss the incident at the invitation of Van Beuren W. De Vries, WGR-TV program manager.

'$64,000' VET NOW QUIZMASTER

WHAT happens to the big-money winners of The $64,000 Question after they leave the CBS-TV program? One of them—James N. Egan, a Hartford lawyer, who with his brother copped $32,000 on the program—now is a quizmaster, himself. He holds forth on a competition, World Quiz, for secondary school students that is telecast Saturday afternoons on WKNB New Britain, Conn., and sponsored jointly by the station and the Foreign Policy Assn. of Hartford.

REMEMBER FROM WBKB (TV)

SOME timebuyers may be forgetful, but they are not forgotten by WBKB (TV) Chicago. In its latest agency promotion mailing, WBKB is asking timebuyers and account executives to supply personal information to be inscribed on a laminated plastic “Remember Plate” for use as a key ring or in a wallet. One side of the plate will carry the agencyman’s name, address, city and state, telephone number, blood type and social security number, while the other will remind him of birthdays and anniversaries of family and friends.

KYW TAKES TO ‘OPEN ROAD’

FEEDING seasonal wanderlust, Open Road, Ohio, new weekend program service of KYW Cleveland, gives Ohioans most everything they need to know about travel, sports and recreation. Newscasts beginning at 5:30 a.m. Friday and running through Sunday night brief listeners on golfing, tennis, fishing, picnicking, road and weather conditions. KYW has set up a special telephone network to gather the Open Road information and added a man to the weekend staff.

CKAC SENDS WHOLESALE CHECKS

CKAC Montreal has been sending bank checks to advertisers and agencies made out to Jerry Timebuyer for the amount of 1,056,408 listeners, drawn on Canada’s First Audience Bank and signed by Phil Lalonde, manager of CKAC. Each check also was marked “Certified, Elliott-Haynes Circulation Report, March 1956”.

AIRBORNE NEWS ON KDKA-TV

WITH the help of its flying staff photographer, Chuck Boyle, KDKA-TV Pittsburgh, Pa., is bringing faraway newscast news home to viewers at record speeds. When a major train wreck occurred last month at Ravenna, Ohio, 90 miles away, Mr. Boyle and KDKA's Al McDowell emplaned and within two hours had direct reports on the air, with film rolling shortly after the broadcasts. KDKA-TV also serviced the United Press with complete film coverage of the accident.
CAPSULE SPORTS ON ABC
A SERIES of 10 five-minute weekend sportscasts featuring Howard Cosell was to make its debut Saturday on ABC Radio. The capsule programs are heard at 2:05, 3:05, 8:25, 10:05 and 10:55 p.m. EDT Saturdays and Sundays at 5:30, 6:35, 7:05 and 9:55 p.m. EDT.

WCFL GETS BIRTHDAY WINGS
MARKING its 30th anniversary on the air this month, WCFL Chicago is planning to equip a helicopter and station wagons with necessary equipment for direct air pickups. Both facilities are now used for on-the-spot tape interviews carried later on WCFL newscasts. The "Voice of Labor" outlet recently appointed Vic Barnes news editor to direct the expanded operation for its 24-hour broadcasting schedule.

RADIO ON FLOOR OF CONGRESS
A FOLDER distributed last week by Radio Advertising Bureau to members contains a reminder to political campaigners of the important role radio plays in politics. Titled "Congressmen Really Are Like People," the folder describes an episode at a House subcommittee meeting on Feb. 23, when Rep. F. Edward Hebert (D-La.) suddenly declared that President Eisenhower had announced his intention of running for re-election. Other subcommittee members were surprised that Rep. Hebert, without any visible means of receiving the information, had learned of the development. It turned out that the congressman was listening to a transistor radio with a hearing-aid-type earphone.

RAB concludes it is reasonable that at least one radio should turn up in House committee rooms, since there are more than twice as many radios in the U. S., as there were votes cast in the last national election.

UAW 20TH BIRTHDAY TELECAST
UNITED AUTOMOBILE WORKERS, through Henry J. Kaufman & Assoc., Washington, D. C., will sponsor a special dramatic and musical telecast to mark its 20th anniversary June 10 on NBC-TV (3:30-4 p.m. EDT). It marks the UAW's first such national tv venture. The telecast will originate in New York, replacing the regularly scheduled Zoo Parade.

NEW weather and time sign in downtown Charlotte, N. C., was set up by Jefferson Standard Broadcasting Co.'s WBT and WBTB (TV). The sign contains red, blue and orange neon lights and creates 300,000 daily impressions on motorists and pedestrians, according to the Charlotte Traffic Bureau.

WAVE-AM-TV PROMOTE PRIMARY
TO help a ballot-conscious public keep tabs on the Kentucky primary vote, WAVE-AM-TV Louisville provided audiences with tally sheets listing precincts, candidates and spaces to enter returns as they came in over WAVE radio and television. The promotion piece also listed times and sponsorship of WAVE-AM-TV's extensive coverage of the primary vote.

WLOS-TV ACTS ON ABC-TV ADS
NOT stopping at mere transmission of the ABC-TV Lawrence Welk weekly Dodge show, WLOS-TV Asheville, N. C., has been looking and listening too. Evidence: two new four-wheeler drive Dodge power wagons, used by the station to negotiate the five-mile daily trip up the side of Mt. Pisgah to the transmitter.

WHEN-TV TELEVISIONS ORDINATION
ROMAN Catholic ordination into the priesthood was telecast for the second time in two years May 20 by WHEN-TV Syracuse, the station reported last week. The special, two-hour ceremony originated from Syracuse's Cathedral of the Immaculate Conception.

NEW WAR STORY ON ABC-TV
A NEW half-hour adventure film series, Combat Sergeant, will be launched on ABC-TV on June 29 (Fri., 8-9:30 p.m. EDT). The series, centering around the battle for control of North Africa during World War II, was produced by Jack Skirball for National Telefilm Assoc., N. Y., and stars tv and motion picture actor Michael Thomas.

DR. GALLUP FEATURED ON NBC
DR. George Gallup, founder and director of the American Institute of Public Opinion, is appearing on NBC radio and television programs this spring and summer interpreting the polls and background of political opinion surveys made during the pre-convention and campaign periods.

LADIES' MAN
LADIES' Day at Hills Dept. Store, Milwaukee, proved such a resounding financial success it will be repeated next year thanks to an unusual broadcast gimmick. John Michaels, WOKY Milwaukee, was the only male permitted to remain in the store for the one-day event, as all other men were escorted from the store including male employees and the manager himself. Mr. Michaels made himself useful by offering gifts and refreshments and announcing on-the-spot price slashes by lady department heads on the public address system. A check of the cash register at day's end prompted Store Mgr. Nat Zimmerman to request Mr. Michael's return in 1957.

**F**

*IF you pride yourself on being expert at spotting “off label” songs with great potential...*  
*IF you think Elvis Presley is the greatest thing since Daylight Saving Time and are proud to prove it on the air...*  
*IF you know the square root of Bill Haley’s Social Security number, OFF-HAND...*  
*IF you’re deeply enthralled by what you hear on your headphones while you’re doing your show—and if your concept of a “great” show is a soft and dreamy one...*  
*IF you’re adept at taping 5 minute news summaries from the machine and reading them cold with not more than 5 or 6 fluffs...*  
*IF you’re more interested in getting your listings to Variety and Cash Box each week than in preparing your show...*  
*IF you feel that you have to let “VOX JOX” know every time you have a headache...*  
*IF you think Frank Sinatra’s latest release is Ava Gardner and that Tommy Leonetti is an r & b trio...*  
*IF you need a teleprompter to say “Hi there folks”...*  
*IF your answer to all of the above is in the affirmative—then stay where you are—you’ve FOUND A HOME.*

**HOWEVER**

If none of your answers to the above were in the affirmative and if you’d like to become a part of America’s fastest growing radio organization—let us hear what you have to offer. We’re looking for disc jockeys who are alert enough to sound alert on the air. If you have any gimmicks, if you sing along with the records, all the better. We can offer you top pay, a challenge to grow along with a growing organization, many employee benefits and the benefit of the years of Mid-Continent know-how.

Send all tapes to: Todd Stora, President

Desires eastern market. New key man in west. Must have $7000.00 min. Don’t write unless you mean business. Box 909G, B-T.

Announcers

Versatile on-camera announcer available $7500.00 in Florida wants relocation in metropolitan market at $10,000 minimum. Bold ten year background with top station, agency experience. Will fly anywhere for interview. Box 910G, B-T.

Market of 500,000. Improve your announcing staff with versatile 10-year veteran tv-radio on-camera salesman and performer, who puts pride preparation, personality into everything from station ID to one hour show. Box 912G, B-T.

Ty sports director available. 6 years experience. Regional network play-by-play, studio. Box 787G, B-T.

I’ve often been called “one of country’s top five sportscasters.”

Known and respected as energetic hunter. Reliable, inventive and industrious.

YOU’VE SEEN AND HEARD ME —

• On Gillette’s “Cavalcade of Sports”
• Calling the Nation’s Biggest Horse Races
• Painting Word Pictures of Grid Classics
• At Courtside During Basketball’s Hottest Action
• Doing My Own Radio and TV Stunts
• AND On Play-by-play of All Major Sports

NOW—

I’m seeking a connection with a more sports-minded operation. So, if you’re looking for a Sports Director with a 15 year broadcasting and telecasting background, facile with words (I haven’t read a line from a teletype machine in nine years. Everything gets my inimitable rewrite treatment), and with a photographic mind which allows me to do-off teletypes while looking directly into camera lens, I’d like to talk with you. Address Box 805G, B-T.

Oh yes. References. They include a matchless set of names including network officials, agency bigwigs, college coaches and even state Governors.

**Tv History—In Full Color**

RCA’s announcement of a 21-inch color TV set to retail at $495 (following Admiral’s earlier announcement of a $499.95 color set) makes it official that 1956 will go down in TV history as the year that color arrived.

Marketing experts have long set $500 minus the price at which color sets could be sold in quantity. With Admiral and RCA having squeezed beneath the magic figure, other manufacturers will be obliged to follow suit.

Two months ago in an editorial prediction that manufacturers would break through the $500 color barrier this fall [B&T, April 16], we pointed out that “now in vogue is the portable black-and-white receiver, selling in the $100 range. It is the TV counterpart of the radio midget: high volume but low net return. It is reasoned that to maintain sales volume and build toward future volume and earnings, major set manufacturers perforce will follow the RCA lead into color.”

The push behind color set production at affordable prices is the main ingredient that has been lacking in color development.

Broadcasters who have pioneered in color programming have been wondering when they would have an audience. Already more than 200 stations are equipped to broadcast network programs in color. A third of that number can broadcast color films. About 30 stations have taken the expensive plunge into local live colorcasting.

The situation is not unlike that which existed in the early postwar development of black-and-white when the first TV stations struggled to keep programs on the air while TV households were counted by the dozen. Then suddenly black-and-white sets came on the market at prices the public could afford, and television burst into one of the most fantastic growth enterprises in history.

History, we believe, is about to repeat itself. The color expansion is apt to be as dazzling as that of black-and-white.

**This Week’s Spectacular**

This week the Senate Commerce Committee puts on its own television spectacular, with the three TV network heads in the key roles. If this extravaganza had a title, it would be “The Network Monopoly,” written and scored by Sen. John W. Bricker (R-Ohio), the free enterprise zealot who has done an about-face by favoring more stringent government control of private business and who advocates the cutting back of coverage of existing TV stations to single markets or less.

Sen. Bricker’s one-man report was released last month out of the blue. It brought a fiery rejoinder from CBS President Frank Stanton. The other networks to date have maintained silence. They will have their say this week through NBC President Robert W. Sarnoff and ABC President Robert Kintner.

Mr. Bricker’s attack has had other repercussions. Without question it had a bearing on the formal organization 10 days ago of the Assn. of Maximum Service Telecasters, which had been incubating for months. Since one of the avowed objectives of Mr. Bricker is the curtailment of service of VHF stations to make room for drop-ins, the pioneer stations found they could tarry no longer to protect the sanctity of full service to rural and remote areas provided by maximum power operation, whether uhf or vhf.

Further light on Sen. Bricker’s views is shed in an exhaustive article by Carl B. Pauly, published in the Sunday, June 3, issue of the Columbus (Ohio) Citizen, in the Senator’s home town. Mr. Pauly reveals that Mr. Bricker first gained the attention of people in Ohio in the field of public utilities regulation and that his long public career “rests on the record he made and the reputation he built in that area of government.” That was 33 years ago, when he got his first state position as counsel in the attorney general’s office assigned to public utilities rate cases. Afterward he served three terms as governor and went to the Senate in 1947.

Mr. Pauly quotes Sen. Bricker this way: “I don’t think the time has come, but it may, when the networks should be subjected to full public utilities regulation. Whether they ultimately are so regulated will depend on how they use the authority and power in their hands.”

Then Mr. Pauly comments that he (Bricker) “concedes that full public utility regulation of networks probably would include rate-

**More Hands in the Grab Bag**

The Democratic Party may not as yet have achieved unanimity on the candidate it will back this fall, but it apparently is solid on how to finance the man’s television campaign. Solution: Make the nation’s networks and stations provide it free.

There was a gesture in this direction last month when Rep. Percy Priest (D-Tenn.) introduced a bill that would require all television stations and networks to give to each bona fide candidate for President (or for use by his running mate) one half-hour of time per week during September, one hour per week during October and one hour during November preceding the election.

Rep. Priest obviously was only the advance runner. Last week the baton was picked up by a coalition of five Democratic senators and introduced in that chamber. The new backers: Sens. Humphrey (Minn.), Mansfield (Mont.), Sparkman (Ala.), Murray (Mont.) and Morse (Ore.).

The strategy is obvious. The Democratic campaign coffers are low. The party is up against a rugged test, and it is counting on television as the medium it knows to be most effective.

At the time of the Priest bill’s introduction, B&T pointed out the extent of the time giveaway the Democrats proposed. Those figures bear repeating: one hour of prime network time is worth around $100,000, a half-hour about $60,000. Such legislation, if passed, would cost the networks alone time valued at $2,220,000 per candidate. For the two major parties: $4,440,000. Plus: equivalent time on all the independent stations, meaning a minimum campaign bill to U. S. broadcasters of $5 million.

Equally obvious in the Democratic strategy is that they don’t mean to pass this legislation for 1960. They mean to do business now. Broadcasters can expect to see a concerted push behind both Senate and House bills in the weeks ahead. Today is not too soon for broadcasters to mount their opposition.
