Storz Stations' Status Report

WDGY
MINNEAPOLIS-ST. PAUL

Now in first place, per all-day Hooper average! Spectacular growth per latest Nielsen, and per latest Pulse. Talk to JOHN BLAIR or WDGY GM Steve Labunski.

KOWH
OMAHA

Now in its sixth year of first place dominance. Latest Hooper—47.7%. First on latest Pulse and latest Trendex, in all time periods. Contact ADAM YOUNG INC. or KOWH General Manager Virgil Sharpe.

WHB
KANSAS CITY

First per Hooper, first per Area Nielsen, first per Area Pulse, first per Metro Pulse. 85% renewal rate among top 40 advertisers proves vitality. See JOHN BLAIR or WHB GM George W. Armstrong.

WTIX
NEW ORLEANS

Still rocketing, still leading, with increasing margins all the time, per latest Hooper. And wait 'til you see that newest Pulse. Ask ADAM YOUNG INC. or WTIX GM Fred Berthelson.

WQAM
MIAMI

Now bringing Storz music, news, ideas, excitement to all of Southern Florida, with 5,000 watts on 560 kc. WQAM is already a fine Miami buy, as JOHN BLAIR or GM Jack Sandler will demonstrate.

So today, in all of these important markets, you choose well when you choose

To Sol Taishoff...

Whose faith in the future of radio-television helped make this industry great.
UHF SOLUTION: Most optimistic report yet heard on combination uhf-vhf tuner, which would open way for all-band receiver, was given FCC last week by Comr. T. A. M. Craven after inspection trip to General Electric tube plant in Owensboro, Ky. New ceramic tube and tuner were demonstrated, picking up uhf and vhf stations in general area, and Comr. Craven reportedly told Commission he thought development has tremendous potential in solving both cost and service problems in production of all-band receivers.

CERAMIC tube development has been known in trade for about two years, but GE has been secretive during developmental stages. Comr. Craven was accompanied on Monday-Tuesday inspection by James E. Barr, assistant chief of Broadcast Bureau, and Willmar K. Rettig, assistant chief of Laboratory Division, constituting top level engineering team. While prices and longevity factors were not divulged, impression was given that GE engineers believe tube-tuner can be produced on low cost automation basis and that life will be comparable to conventional uhf tubes.

GINGERLY CRACKDOWN: First disciplinary action under NARTB TV Code Board's get-tough policy may be handled on indirect basis. Three eastern stations, which have been monitored closely and have had warnings, will be given final notice if code violations continue. Next step will be to offer them chance to resign. If they don't, board will instigate complicated procedure by which code subscriber is forced by code structure. This requirement is action by TV Code Review Board which then will refer matter to association's TV Board for final decision.

IN ITS QUEST for successor to Arthur Loew, as president of Loew's Inc. [B.T., Dec. 8], executives of parent of MGM have in several occasions felt out Eric Johnston, president of Motion Picture Association of America Inc., without avail. Conversations also were held with Sylvester L. (Pat) Weaver, among others, it's learned authoritatively.

BOOK OF BRAINING: Inter-office memos of NBC ex-Board Chairman Sylvester L. (Pat) Weaver, Jr.—which have gained legendary reputation for voluminousness, erudition, and sometimes bewildering depth and syntax—may find their way into public print. Mr. Weaver, now in Europe, reportedly feels wider exposure of its "communications philosophy" might help raise general broadcast standards. Officials of Simon & Schuster publishing house concede they "might do it"; Doubleday & Co. authority said his firm discarded idea after seriously considering it; spokesman for Random House did not comment.

Possible hitch: NBC might consider memos its own property, though offhand there appeared to be that network wouldn't be stuffy about it if Mr. Weaver got a publisher.

WESTINGHOUSE Broadcasting Co., which severed its NBC radio network affiliations, has been expanding its independent programming with emphasis on news. Management reportedly now is contemplating setting up its own national news bureau in Washington to service stations with special coverage at national and regional levels.

TEASER POSSIBLE: While FCC's Special Network Study staff has until end of fiscal year (June 30) to file its report and recommendations with FCC, there may be one or more interim reports on specific aspects prior to that time. One such report, it's indicated, will be on multiple ownership of broadcast stations (now limited to seven in each of three categories, am-fm and tv). FCC will consider revised M-O regulation again on Jan. 9, having deferred action month ago. It's presumed that "interim" report will be FCC's hands prior to that date.

MORGAN BEATTY, veteran NBC commentator (Alka-Seltzer News World; Monitors) breaks out as author next month with publication of Morgan Beatty's Your Nation's Capital (Farrar, Straus and Cudahy). This Washington guidebook is first of series planned by Mr. Beatty, and will be in both hard-back and paper-cover editions.

PARAMOUNT SWITCH: Does sale to National Telefilm Assoc. of Rainbow Films, with assets including six feature films (see story, p. 58), mean that Paramount Pictures has abandoned its "no feature films to tv" policy? Rainbow Films was wholly-owned subsidiary of Paramount Pictures, but Paramount spokesman refuses all queries to NTA, declining to explain whether sale means Paramount has released feature films to tv. NTA's comment is that it has bought subsidiary from Paramount Pictures.

WHAT'S thinking among engineers on unsympathetic reaction to Commission's proposed uhf curves to be used in determining population coverage in pending deintermixture cases [B.T., Sept. 24] Consensus seems to be that Commission will have to return to Sixth Report and Order curves (which now are part of rules) and also hold out welcome for measurements or other estimates to help guide decisions. Engineers feel averages for uhf measurements too open to attack because of wide variances resulting from different types of terrain, seasons of year, etc.
in every television market there is one dominant station...

NBC, Radio Affiliates Tackle Programming Plans

“GENERAL EXPLORATION” of “programming types, the hours of programming and the structure of the schedule which would best serve” NBC Radio affiliates and listeners occupied all-day meeting of NBC officials and NBC Radio Affiliates Program Advisory Board last Friday in New York. “Hours of programming” reportedly referred to network option hours, in which some changes have been suggested. Other specific plans considered, it was understood, included “imagery transfer” advertising concept and projected “Most Beautiful Voice in America” program.

Lester W. Lindow, WFDF Flint, Mich., chairman of Program Advisory Board, expressed satisfaction on behalf of board members in statement issued after meeting. He said: “We believe NBC is off to a great start in strengthening its radio network service to make it of maximum service to the affiliates and to the audience. We feel that the procedure for advance consultation with affiliates on program planning and development will be productive for the network and the stations, and we are looking forward to further meetings for continuation of this procedure on a regular basis.”

Next meeting to be held “within 30 days.”

NBC President Robert W. Sarnoff opened meeting. NBC discussion led by Matthew J. Culligan, vice president in charge of radio network. All advisory board members were on hand: Chairman Lindow; W. W. Warren, KOMO Seattle; Louis Read, WDSU New Orleans; Harold Grams; E. Culligan, of maximum audiences.

“We believe NBC is off to a great start in strengthening its radio network service to make it of maximum service to the affiliates and to the audience. We feel that the procedure for advance consultation with affiliates on program planning and development will be productive for the network and the stations, and we are looking forward to further meetings for continuation of this procedure on a regular basis.”

A. R. Hopkins to New Post In RCA Electronic Marketing

A. R. HOPKINS, former RCA Broadcast & TV Equipment Department manager, has been named to new post of Commercial Electronic Marketing Dept., Arthur L. Malcareny, RCA Commercial Electronic Products and president and general manager, announced Friday. He will head all product planning, marketing, advertising, sales promotion, contract and market research functions.

Department is made up of broadcast and tv equipment, communications products, theatre and sound products and Bizmac marketing departments.

Mr. Hopkins joined RCA in 1929 as engineer, was transferred to broadcast sales in 1935, and in 1946 assumed post of sales manager of Broadcast-Industrial Dept., forerunner of present Broadcast Equipment Dept.

AIMS Elects Morris, Commends BBDO Study

DAVE MORRIS, KNUZ Houston, elected chairman of Assoc. of Independent Metropolitan Stations (AIMS) at Kansas City meeting, succeeding John J. Hurley, WNEB Worcester, Mass., George (Bud) Armstrong, WHB Kansas City, elected vice chairman.

AIMS commended BBDO for its service to advertisers in producing report on modern radio listening (B+T, Oct. 1) and lauded B+T for bringing report to attention of industry. Resolution explained report “from an agency of this stature of necessity has to be unbiased in its attitude toward all media” and termed it “of unique value to buyer and seller alike.”

ABC Electionson VOA

U. S. Information Agency (Voice of America) will monitor ABC Radio and ABC-TV election night coverage for simultaneous-and-delay rebroadcast via short wave to worldwide audiences, parts in English, others in translated form, it was announced Friday.

AGILE ALTERNATE

RICHARD K. MANOFF Inc., New York, agency for Welch Grape Juice Co., New York, has devised new system of switching major and minor commercials for alternate week network shows. Last week, with Friday’s “Thursday buy in Comedy Time (NBC-TV, Mon.-Fri., 5-5:30 p.m. EDT), agency worked out arrangement with network whereby Welch’s has major commercial on Thursdays every other week and puts its minor plug on Fridays, alternating with Friday sponsor, Pharmaco, on same show. Normally, alternate-week advertiser gets its major commercial one week and minor mention during alternate sponsor’s week. But since alternate Thursdays on Comedy Time are un-sponsored, Manoff agency conceived new system which it dubbed “major-minor lateral switch.”

• BUSINESS BRIEFLY

Late-breaking items about broadcast business; for earlier news, see ADVERTISERS & AGENCIES, page 44.

SATURATION BUY • Welch’s Grape Juice Co., N. Y., planning saturation radio spot announcement campaign for Welch’s refreshment wine, using as many as 15 to 20 spots per station on Wednesdays, Thursdays and Friday in about 50 markets. Schedule starts Nov. 7 and runs for two weeks, takes hiatus for three weeks and then returns for three more. Advertiser also will use 26-week radio schedule in participation shows in New England area, starting Nov. 1, for Welch’s tomato juice. Agency: Richard K. Manoff, N. Y.

INSTANT ON RADIO • General Foods (Instant Sanka coffee), N. Y., planning radio spot schedule using as many as 25 spots per week on one station, starting Oct. 22 for two weeks in New England and eastern area. Young & Rubicam, N. Y., is agency.

MORE PEANUT BUTTER • Procter & Gamble (Big Top peanut butter), N. Y., through Compton Adv., N. Y., adding number of markets to its current schedule of reported 50 markets. Additional stations start Nov. 5 with contract running in usual P&G style, “til for bid.”

SHELL ANNUNCIATION • Shell Oil Co. (Super Shell), N. Y., using radio and television spot announcement introductory campaign Oct. 22 through Nov. 17 in Midwest, mostly Ohio. J. Walter Thompson Co., N. Y., is agency.

ANOTHER FOR NC&K • Colgate-Palmolive Co. naming Norman, Craig & Kummel, N. Y., to handle its nearly $1.5 million advertising budget for Veto deodorant. Appointment marks fifth major advertiser that agency has acquired within year.

GOOD GRIEF • Stroh Brewery Co., Detroit, has signed to sponsor Guild Films’ new Captain David Grief tv film series on 21 midwestern markets, starting in January. Agency: Zimmer, Keller & Calvert, Detroit. Also buying series: Standard Oil Co. of Calif., San Francisco, for telecasting in Pacific coast states and Hawaii in January. New series to replace Chevron Hall of Stars by Four-Star Productions, which company now is using in behalf of Standard Stations and Independent Chevron dealers. Standard Oil agency: BBDO.

DOG FOOD RENEWS • John Morrell & Co. (Red Heart dog food), Chicago, renews five weekly segments of Don McNeill’s Breakfast Club on ABC Radio (Mon.-Fri. 8-9 a.m. CDT) for 26 weeks effective Oct. 29. Campbell-Mithun Inc., Chicago, is agency.

TONI TO ALTERNATE • Toni Co. buys alternating Tuesday quarter-hour on NBC-TV’s Tie Tac Dough (Mon.-Fri., 12-12:30 p.m. EDT) effective Jan. 8. North Adv., Chicago, is agency.

FCC Confirms Ch. 13 Grant For KYAT (TV) Yuma, Ariz.

IN ORDER issued Friday (Closed Circuit, Oct. 8), FCC concurred with August initial decision of hearing examiner and confirmed Commission's January no-hearing grant of ch. 13 Yuma, Ariz. (KYAT [TV]), to Whorther-Alvarez Broadcasting Co. (KFMB-AM-TV San Diego). Exceptions to initial decision filed by KIVA (TV) Yuma, protestant in case, were held to be untimely filed.

KIVA exceptions were filed 18 days after close of hearing in keeping with examiner's order which gave 20-day deadline, but running counter to FCC's edict setting hearing on protests which specified exceptions were to be filed 15 days after close of hearing. In awarding grant, Commission ruled its order was controlling, that examiner lacked authority to alter time factor.

Comr. Hyde dissented to majority opinion, saying that while it was unfortunate orders of FCC and examiner were conflicting, he did not think it unreasonable for KIVA to rely upon examiner's ruling. In his written dissent, Comr. Hyde said: "I think the Commission ought to decide the case on the merits rather than dismiss it on a technical point of dubious validity."

Also last week, three applications were filed for TV stations. Industrialist Henry J. Kaiser, who has pending application for new am (1040 kc) at Honolulu, T. H., applied, for ch. 13 there, proposing 12.97-kw visual power with antenna height of 121 ft. above average terrain. Mr. Kaiser's application estimated construction costs at $135,653.40, first year operating costs at $116,000.

Harvard V. Shepard, owner of KDNT-AM-FM Denton, Tex., filed, for ch. 2 there, simultaneous requests to FCC to change to channel from reserved educational status to commercial. Another rule-making request is pending before FCC asking that Denton channel be assigned as commercial to Longview, Tex. Mr. Shepard's application proposes 0.746-kw visual power, antenna 169 ft. above average terrain. Costs were estimated at $40,915 for construction and $36,000 for first year operation.

WCBC-TV Anderson, Ind., on ch. 61, filed for ch. 26 there, which will not be allocated to Anderson until Nov. 7. The FCC fortieth ago [BWT, Oct. 8] finally allocated rulemaking giving Anderson ch. 26, deleting ch. 61 (WCBC-TV's authorization), deleting ch. 26 from Indianapolis and adding ch. 39 there. Change is to become effective Nov. 7, so until that date it's unlikely that Commission will accept WCBC-TV's application.

Ch. 54 W TOM-TV Suspends

W TOM-TV Lansing, Mich., ch. 54, last week informed FCC that it was "temporarily" suspending operations. This brings to 66 number of stations which have gone dark, of which 62 have been uhf. Total of 39 stations, including W TOM-TV, have gone off air and retained their construction permits.

**Eastern Seaboard NARTB Sets Regional Meet Record**

NEW RECORD for attendance at NARTB regional meetings set in Washington, D.C. when registration reached 300 at noon (early story page 60). Record also set at banquet, attended by 324 delegates and guests. Registration was more than one-third above 207 figure recorded by same region in 1955.

Resolution adopted at Friday business session commended Sol Taishoff, editor and publisher of BWT for 25 years service, terming him "one of the leaders in the industry's struggle to furnish a free broadcast service in the public interest." Other resolutions praised speakers for participating in program, commended George H. Clinton, WPARK Parsonsburg, Va., host director, and other region board members for handling of conference, and thanked RCA for reception.

J. Robert Gulick, WAVL Lancaster, Pa., was chairman of resolutions committee. Other members were C. Wallace Martin, WMSC Columbia, S. C.; Carl Lieber, Alexandria, Va.; John L. Cole Jr., WHLF South Boston, Va., and Robert T. Tincher, WHTN Huntington, W. Va.

**NTA Readyng Answers On Film Network Questions**

NTA FILM NETWORK is preparing point-by-point answer to questions raised by FCC staff regarding network's contracts with affiliates [BWT, Oct. 1], it was learned Friday. Statement will be filed this week. Meanwhile, in formal communication to Commission Oct. 5, film network rebutted contentions of KGEO-TV Emid., Okla., that some provisions of contract violated chain broadcast rules. KGEO-TV made allegations, particularly regarding 1/2 hour "option" time for network in letter to FCC Sept. 25. NTA declared no abdication of license control over programs intended or possible. Contract permits stations to refuse programs, gives them advance information on program and sponsor, and in fact—because it is film—permits station owner to preview material. Therefore, NTA Film Network declined, licensee control over film network programming even more stringent than over regular network fare. Network also averred it intends no control over station rate cards. Conference with FCC staff was requested.

**NBC Opera on the Road**

NUMBER of RCA and NBC executives, led by RCA Board Chairman David Sarnoff and NBC President Robert W. Sarnoff, will join Philadelphia civic officials tonight (Mon.) at eastern premiere of NBC Opera Company held by Philadelphia Forum at Academy of Music. NBC Opera’s initial tour got underway Thursday in South Bend, Ind., will visit 47 cities this season.

**KQUE to Everett-McKinney**

KQUE Albuquerque, N. M., today (Mon.) is announcing appointment of Everett-McKinney Inc. as national representative effective Oct. 16.

**PEOPLE**

KENNETH W. SELLERS, formerly with Pepsi-Cola group, Kenyon & Eckhardt, to copy chief, Richard K. Manoff Inc., N. Y.

FRANK D. JACOBY, formerly in radio-tv department, Biow Co. and BBDO, to Product Services Inc., N. Y., as executive tv producer. Others: THOMAS BRANDON BOGGS, sales representative; LEWIS DAVIS, production supervisor; BROOKE SMITH, scenic designer, and MOREY REDEN, director of animation.

RICHARD M. KLEIN, sales engineer, electronic product sales department, Sylvana Electric Products Inc., to newly created post of product engineering manager of department.

GEORGE E. REILING, distributor sales section, RCA Tube Div., Chicago, transferred to RCA Semiconductor Div., same city.

**New VOA Radio Technique Said to Boost Reception**

NEW SYSTEM of single side-band transmission, which improves radio reception without increasing transmitter power or adding much cost—and which holds possibility of increasing world's standard broadcast channels—put into effect by Voice of America at its 1,000-kw Munich, Germany, $30 million long wave broadcast station, U. S. Information Agency announced today (Mon.). Called "compatible single side-band transmission" (CSSB), USA reported method was developed by Kahn Research Labs., Freeport, L. I., and VOA engineers. CSSB provides most ordinary radio receivers with up to twice as much power as possible with old method (double side-band amplitude modulation), USA said. CSSB also limits effects of fading and decreases interference between stations, USA declared. Additional frequency space comes, agency said, from fact only single side-band of transmission used, freeing other side-band for additional use.

**KCLO Sold for $46,500**

APPLICATION seeking FCC approval to sale of KCLO Leavenworth, Kan., was filed with Commission Friday. Selling price of daytime outlet (1410 kc, 500 w) is $46,500. Principals in selling group own WVMC Mt. Carmel and WIZZ Streator, both Ill. Buyers are George B. and Florence L. Anderson, owners of KLIR Denver, Colo., KRIO Newton, Iowa, and KJXK Columbus, Neb.

WHEN BIG NEWS IS MADE

KRON-TV's Cameras are on the spot

...even in the mud-filled streets of flooded Yuba City, California. Last winter's Northern California flood was a dramatic and tragic disaster, fully recorded by KRON-TV's film and live cameras. The station's viewers saw it all, over a thirty day period.

Now, comes recognition from the California State Fair and Exposition with its TOP STORY AWARD for news coverage of this event. The only state-wide TV award, this is the third time in four years it has been granted to KRON-TV.

it takes...

To make Americans' teeth sparkle, 4,456 tubes of toothpaste were manufactured every 60 seconds of every working day—556,142,976 tubes in all last year.

And to make toothpaste sales sparkle—to spark any sales—the answer is clearly Spot Radio.

Spot Radio costs less to reach more customers, whoever they are, whenever and wherever you like.

And, 60 seconds is all it takes.

The Atlanta market...1,000,000 people by 1961
Stake out your claim now

You have heard it said that the South is America's last economic frontier. A region where great new consumer franchises can be built.

This is true. But as ever happens, late-comers seeking the promised land more often find that the frontier has vanished. Others are solidly entrenched at lesser cost and greater profit.

Already this picture takes shape in Atlanta. Population of the Metropolitan Area is now reliably put at 869,014. In less than five years it will surpass a million.

In 1961 what will be your competitive position in Atlanta? What is it now?

WSB Radio and WSB-TV invite you to share the rewards of this great and growing market's present and future. Put in your ground-floor claim on the South's largest radio and television audiences today.

Leadership is traditional . . .

“White Columns” is the home of WSB Radio and WSB-TV in Atlanta
Dear Reader:

MOST people are allergic to "special issues" of trade magazines, and with good reason. Too often the special issue is a self-serving device to entice compliments and extra advertising. This is a special special issue. It is fat, but not because advertisers were bludgeoned into using space. It is fat mainly because it contains, in addition to all the news of the past week, a running story of a miracle quarter-century of broadcasting as reported in this 25-year-old magazine.

The running story is not, however, about Broadcasting • Telecasting. It is about all of you who have created the magnificent arts of radio and television; you who started from scratch with no precedents to guide you; you who later entered this evolving field in which pioneering never ends.

Our assignment has been to gather, report and interpret the events of these 25 exciting years as accurately and swiftly as our own competence and the machinery of printed journalism allowed. We have tried in our news columns to be fair, objective and comprehensive. We have tried on our editorial page to advance the causes of responsible broadcasters and good broadcasting.

VOL. 1, No. 1 of Broadcasting, the News magazine of the Fifth Estate, made its bow Oct. 15, 1931, when the big depression was scraping bottom. The lead editorial said:

To the American system of free, competitive and self-sustaining radio enterprise, this new publication . . . is dedicated.

Some of our old friends know the story of our birth. Others may be interested.

We began publication with a $5,200 bank account advanced by the late Harry Shaw, then the owner of WMT Waterloo (now Cedar Rapids), Iowa, and afterward president of the National Assn. of Broadcasters. That $5,200 was 10% of the $52,000 Mr. Shaw had pledged to angel this risky venture at a time when the mortality rate among new publications was better than 90%. The balance of the pledge never came because Mr. Shaw's funds were frozen in a bank closure—one of the many which preceded the FDR-ordered bank holiday of 1933.

There were three stockholders at the start, Mr. Shaw, Martin Codel, who now edits the successful Television Digest, and I. Mr. Shaw retired from our struggling enterprise in 1932, relinquishing his publisher's duties to Martin. I moved from managing editor to editor.

During the eventful years from the start in 1931 until 1944 when I purchased Martin's half interest the magazine never swerved from its pledge to defend radio's free charter and to cover the news. Many broadcasters, agency and advertising executives, as well as government officials, saw the need for an authoritative trade journal in broadcasting and gave us a hand in those challenging days. Many of them are still active, most having risen to great prominence.

Broadcasting turned the economic corner in 1937. It could not have done it without the drive and imagination of Martin Codel and the loyalty and energy of a small, hard-nosed staff of editors, reporters and salesmen. Many of them are with us still, in responsible positions.

Our staff has grown from 6 to 60 (now the biggest by far in the field), our offices from one to five, our circulation from scratch to a press run exceeding 19,000 (this issue it's 19,500). We have grown in tempo with the remarkable field we serve. When we began, total radio billing was $60 million. This year radio and television will be well above $1.5 billion.

WITH this issue we start on our second quarter-century—as eagerly as we started on the first. We are excited by the wide prospects of the future in radio and television and by our opportunity to record the adventures yet to come.

Perhaps to celebrate the occasion, we give you a new B • T cover with this issue. There are more improvements immediately to come, in appearance and content of a magazine which must keep pace with the arts of radio and television.

And with this issue we make a significant announcement—our membership in the Audit Bureau of Circulations. We are the only magazine in our field to qualify for ABC—a fact we will tell you more about in the near future.

So we grow and, in growing, change.

In one way, however, B • T will never change. We will never deviate from our Vol. 1, No. 1 pledge to support and defend the American concept of free, competitive and self-sustaining broadcasting, dedicated to the public interest.

Faithfully,

[Signature]
ONE WILL DO!

You bag the biggest game in Columbus and Central Ohio with just one station... WBNS Radio. No need to scatter your shots, WBNS delivers the most (and the best) listeners... twice as many as the next biggest station. With 28 top Pulse-rated shows, WBNS puts push behind your sales program. To sell Central Ohio... you've got to buy WBNS Radio.

CBS FOR CENTRAL OHIO

IN REVIEW

PLAYHOUSE 90

THE UNDOING of the first of CBS-TV's long-heralded Playhouse 90 series was not so much Rod Serling's inadequate tv version of Pat Frank's spine-tingling novel, "Forbidden Area," but that inevitable factor of time. In this instance, surprisingly, there simply wasn't enough of it.

While Mr. Serling edited out all the inherent credibility of the book in the process of trimming its 252 pages to fit approximately 75 minutes of program time, he cannot be held wholly to blame for what generally seemed to be a dismal start to a promising series.

Within this time, he had to chronicle seven insane days that preceded Atomic Cataclysm I. hopscotching between Washington, Moscow and a Strategic Air Command base in Florida. Even in 252 pages, this was quite an order for Mr. Frank. It was an unbelievable one for Mr. Serling.

Most bothersome about Playhouse 90, however, is not so much that its initial venture turned out to be a lot of hokum, but that the series may not be able to keep the pace set by the opener. Here was a less-than-satisfactory script, but it was blessed with a cast that gave it a magnificent read, and it also received a beautifully tight production. Despite its hollow ring, it was timed to create suspense, and the 90-minute program was over, it seemed, almost before it started. Suppose, however, that the next few offerings aren't as exciting as "Forbidden Area." Then might not Playhouse 90 turn out to be little more than another of the 90-minute bores that have come the viewer's way all too often these past few seasons?

Production costs: Approximately $120,000. Sponsored by Bristol-Myers Co. through BBDO, Singer Sewing Machine Co. through Young & Rubicam, and Ronson Corp. through Norman, Craig & Kummel, on CBS-TV. Thurs., 9:30-11 p.m. EDT.

Premiere program, Oct. 4: "Forbidden Area" by Rod Serling, based on book by Pat Frank; producer: Martin Manulis; director: John Frankenheimer; assoc. director: Jack Kortner; story editor: Peter Ronson; art director: Walter Scott Herndon.

Cast: Charlton Heston, Tab Hunter, Diana Lynn, Vincent Price, Victor Jory, Charles Bickford, Tyler McVeigh, Robin Morse, Casey Allen & others.

OMNIBUS

ALTHOUGH Omnibus is now on ABC-TV on Sunday (9-10:30 p.m.) instead of CBS-TV on Sunday afternoon, the change of time and network has not been accompanied by any change of program format or content. Omnibus is still a learned friend chatting sociably about his special interests and whether the viewer is entertained or bored depends pretty much on how closely his own interests coincide with those of the Omnibus spokesman and how entertainingly the presentation is made.

On this season's opener, the subject was certainly one of wide-spread interest, American musical comedy, and the speaker chosen to present the life story of this peculiarly...
The Loyalty of Friendship.

Friendship, in our South, finds its roots in steadfast loyalty. But friendship of this nature is not lightly given—it must first be earned.

This tenet is sharply defined in the wealth of friends gained by WRVA Radio over the past 31 years. Through continued participation in community affairs, by the highest standards of entertainment and service, with a tradition of responsible, competent and experienced management — WRVA Radio has won (and held) the firm devotion of Richmond families.

Now comes WRVA-TV — endowed with this rich inheritance from WRVA Radio — and steadily winning the allegiance of Richmond's television viewers. They expect from WRVA-TV the finest that proven skill and imaginative minds can produce. They are not disappointed.

Mindful of such responsibility, Richmond's newest television station has moved inevitably to the position of leadership by earning the special loyalty that Southerners give only to those who earn it. Truly, WRVA-TV belongs to Richmond as no other television station ever has — or can.

Represented nationally by Harrington, Righter and Parsons, Inc.

WRVA-TV
Richmond, Va.
CBS Basic Channel 12

G. T. Lucy, President Barron Howard, Vice President and General Manager James D. Clark, Jr., Sales Manager
American type of entertainment, Leonard Bernstein, qualifies both as an expert in the field and as an entertaining lecturer.

The presentation was beautifully organized and just as beautifully presented, whether by Mr. Bernstein alone with a piano or by a stage filled with costumed performers. Its trouble was that it went on too long. What could have been a fascinating half-hour or even hour stretched into an interminable 90 minutes, leaving the viewer in boredom (if, indeed, he had not himself left the program before that).

In discussing show business the Omnibus editors unfortunately forgot a cardinal rule. Always leave the audience wanting more.

Production cost: Approximately $80,000.

Sponsored by Aluminium Ltd. through J. Walter Thompson and Union Carbide & Carbon through J. M. Mathes on ABC-TV, Sun., 9-10:30 p.m. EDT.

Producer: Robert Saudek; associate producer: Paul Feigay; film supervisor: Boris Kaplan.

Premiere program (Oct. 7) featuring Leonard Bernstein; director: Charles Dukin; choreographer: John Butler; orchestra conductor: George Gassman; set designer: Henry May.

YOU'RE THE TOP

THE Ford Star Jubilee got its CBS-TV season off to a high-powered start with the hour-and-a-half Cole Porter festival, "You're the Top." It's hard to imagine what heights are left for television to scale after this dazzling revue.

It was a brilliant collection of musical stars, arrangers, scenic artists and costumers, representing a lavish budget. But more impressive was the taste (Producer Robert Alton's presumably) that dictated how these material and artistic gifts were to be used.

And the incredible versatility: Could it be that was really the voice of George Chakiris (billed as a dancer) singing "Night and Day" before setting out with Sally Forrest on a romantic dance sequence? Did anybody know that Gordon MacRae has such a comic flair as displayed in his rendition of "I Love You" in the manners of Vaughan Monroe, Arthur Godfrey, Nat "King" Cole and Elvis Presley? Who would have guessed that Peter Lind Hayes and Mary Healy had such really good voices?

Whoever saw "You're the Top" in color saw the distinguished sets and costumes in all their glory, the pastellish, stylized backgrounds and bolde-color authentic costumes of "Kiss Me, Kate," Dolores Gray's breathtaking gold gown, Dorothy Dandridge's little beige nightie. . . .

A Cole Porter festival would have been a good excuse for somebody else to stop the show and start talking. Not Mr. Alton. He brought on the master only for a brief musical bow, surrounded by showgirls and cast during the closing reprise of "Another Opening." It was the end of a memorable evening, a show deserving of its title, "You're the Top."

Production cost: Approximately $200,000.

Sponsored on CBS-TV by Ford Div. of Ford Motor Co. through J. Walter Thompson.

THE WALTER WINCHELL SHOW
WHILE the cause of Walter Winchell probably was considerably advanced by his TV debut as an M. C., we doubt whether the medium fared as well. There simply wasn't a moment during the entire 30 minutes that he let us forget that it was his and his show only.

Mr. Winchell certainly can't be accused of wanting to imitate his arch-enemy on CBS-TV Sunday night at eight; here we had him holding forth on the word "class" from the gospel according to Damon Runyon; on the "breaks" and "pitfalls" of show business. There was an attempted "soft shoe" routine that seemed to bear out his own contention that he used to be a hoofer.

Before passing onto cheerier matters, we'd like to offer a quiet little toast to those celebrities to whom an appearance on such shows as Mr. Winchell's is "career insurance." After all, you can never know tonight what tomorrow's Winchell column will say about you. And, if Mr. Winchell's really supposed to be a guest in our living rooms, is it too much to ask of him to remove his hat?

Production costs: Approximately $55,000.
Sponsored by Lorillard Co. through Lennen & Newell and Toni Div., Gillette Co., through North Adv. on NBC-TV, Fri., 8:30-9 p.m. EDT, in compatible color.
Producer-director: Alan Handley; assoc. producer: Virginia Dunning; writers: Ray Allen, Harvey Bullock, Milt Rosen and Reelow Chellwin; technical director: Larry Elikann; unit manager: Tom Madigan; music: Carl Hoof.

RED GOOSE KID'S SPECTACULAR
A CHILDREN's show that is 90 minutes long cries for comparison. Only other remotely comparative programs on the airwaves today are the regular children's fare and the adult spectacular of the $150,000 to $350,000 and more production cost variety.
The moppets had at their disposal a whole crew of talented people who juggled, danced, sang, fenced, did acrobatics (including...
We're still using our first team at H-R today, as we did when this firm was started by a group of mature, sales-seasoned working partners. Today's line up includes all of the partners who head up this firm, plus a hand picked team of experienced radio and TV pros.

We have no second team!

This means that our stations and buyers of time, can be sure that when we are in the game, "we always send a man to do a man's job."

IN REVIEW

tumbling on canvas—a rather common sight on kiddie programs). Miss Dalton told one of her fables—about a little duck and its experiences in the enchanted forest. Andy Andrews cuddled a skunk in his arms and sang a fetching ballad about the pore ole lonesome animal, and later in the show led a donkey on camera and sang another ballad about the burro. A fellow (Tex Williams) with a bullwhip slashed a sheet of paper in two while it was held in the mouth of a courageous courtier (the bullwhip handler also gets a big play nowadays in kiddieland). Champion archers Ann and Frank Marston popped balloons at the usual distance. All in all it was a delightful 90 minutes of pure TV entertainment.

What this extensive, soft, easy-to-take TV fare does to tots' educational values belongs to extensive sociological research, but as a general guess we have our doubts. Another question is whether 90 minutes is too long for children's viewing.

Production costs: Approximately $30,000. Sponsored by Friedman-Shelby Div., International Shoe Co. through D'Arcy Adv. on ABC-TV, Sat., Oct. 6, 11 a.m.-12:30 p.m.
Stars: Alene Dalton, Andy Andrews, Johnny Olson, Tom Lockard and others.
Producer: Lee Cooley; asst. producer: Jack Beekman; director: Matt Harlib; music director: Nick Perito; choreographer: Lee Morrison.

SEE IT NOW

STARTING their hour-long look at the Suez crisis with July 26, 1956, the day Egypt's Gamal Abdel Nasser hoarsely told a screaming throng in Alexandria that he was nationalizing the canal, Messrs. Murrow and Friendly first gave us a fast review of the canal's history and next a tour of the 100-mile waterway, as Mr. Murrow and reporter Ed Scott talked to pilots of various nationalities and interviewed the canal's present administrator, Col. Mahboud Yunis.

But when Mr. Murrow sat down with the man France's Guy Mollet so aptly described as "that apprentice dictator," we got a sickening feeling that we had heard this before, say in the late '30s when H.V. Kaltenborn got Hitler to the microphone to talk about his lost Germans in the Sudeten. As an interview with Nasser, it was excellent. And while we did hear both sides of the debate (the West's stand being summarized by Britain's foreign minister, Selwyn Lloyd), Murrow & Friendly summarily dismissed the French point of view with a shot of the Eiffel Tower, and that of the U.S. with a brief glimpse of the Secretary of State espousing "moral force."

Production costs: Approximately $85,000. Sponsored by Shulton Inc. through The Wesley Assoc., Sun., Oct. 7, 5-6 p.m. EDT, on CBS-TV.

Produced & directed by Edward R. Murrow & Fred W. Friendly; narrated by Mr. Murrow and Edmund Scott; cameramen: Charles Mack; production staff: Palmer Williams, Don Hewitt and Edward Jones; film editors: Bill Thompson, F. Howard O'Neill and Mili Lerner.

Broadcasting • Telecasting
In the field of automatic programming the Gates "Auto-Station" is believed to approach a much greater degree of automation than heretofore attained. "Auto-Station" is not restricted to announce-record playing alone. Through the use of the binaural tape control system and the possibility of many control tones, much greater automation is obtained.

The complete "Auto-Station" equipment includes both production and playback equipments. By study of the 8-page brochure entitled, "This Is Auto-Station", gladly supplied on request, the broadcaster will find dozens of ways that his broadcasting day can become more effective by producing greater results for his advertisers and the resultant larger profits to himself.

"Auto-Station" may be available for demonstration to groups of 50 or more such as regional broadcasters meetings. Subject to advance reservations starting January 5. Where interested, please write "Auto-Station", Box 290, Quincy, Illinois.
WERE the ONE station first in ALL THREE....

* Nielsen*,  *Pulse*,  *Hooper*

Night and day the top name personalities beam the best in music, news and sports to Cleveland over WERE. WERE personalities reach more live audiences through personal appearances than any other regional talent. They enjoy more national and industry-wide recognition, too!

WERE excites people into listening with unique programming exclusives.

WERE participates in all major area events with its 16 ton studio-palace on wheels . . . the only mobile unit integrated into the civic and business life of Cleveland.

The long-night through, Clevelanders use a city-wide network of free phones to call their thousands of dedications direct to the highest rated dusk-to-dawn personality in the area.

WERE drew over 100,000 visitors to its flagpole studio broadcasts at one of Ohio's biggest fairs.

WERE was the only radio station to which TV viewers turned as a guide to political convention viewing.

... and only WERE offers the most complete, guaranteed merchandising program available in the Cleveland market....

* Latest Nielsen:
  WERE is first 6 a.m. to midnight in N.S.I. area audience and first in Cleveland's metro market, too!

* Latest Pulse:
  WERE has the greatest total share of in-and-out-of-home audience around the clock.

* Latest Hooper:
  WERE has the highest share of radio audience in every time segment.

buy WERE and sell CLEVELAND
our respects to the AMERICAN AUDIENCE

AMERICAN broadcasting is business, big business, billion-dollar business, operating nearly 3,000 radio stations and nearly 500 tv stations and employing more than 75,000 workers.

American broadcasting is advertising, blue chip advertising, its prime evening and choice daytime periods sought after and fought for by the nation's manufacturers and merchants.

American broadcasting is entertainment, all kinds of entertainment from grand opera to soap opera, Shakespeare to Sinatra, Heifetz to Presley.

American broadcasting is service, crop and market prices for the farmer, household hints for the housewife, hurricane warnings for a coastal city and flood warnings for a river town, presidential addresses and, most of all, news, on-the-spot at-the-time reporting of what's going on in Europe, Asia, Washington and Main Street.

But that's only half the story. What takes place at the station, in the studio, through the transmitter and out the antenna is of no value unless it reaches someone at the receiving end. American broadcasting is, above all, communication and there is no communication in words spoken into a microphone, action performed before a camera, in themselves. The point of all the business, advertising, entertainment and service and the recipient of B'T's RESPECTS today is the great American audience.

In the beginning—and that's only some 40 years ago—the audience comprised mostly amateur operators, turning the knobs of their home-assembled rigs to pick up the signals of ships at sea and other hams and stopping in amazement to listen to intelligible talk and music from such pioneers as the experimental forerunners of KQW San Jose (which first broadcast in 1909 and began regular programming in 1912), WWJ Detroit, KDKA Pittsburgh (first station to hold a commercial broadcast license) and the rest.

Then came the youngsters with their wire-wrapped oatmeal box and cat's whisker crystal sets, and then the first store-bought receivers, complete with gooseneck horn speakers and A and B batteries. Now listening became a group activity, the family gathered in the living room to hear the Happiness Boys, the Kansas City Nighthawks, the Hired Hand, Graham MacNamee and the hundreds of other local celebrities of the ether. And, in the mid-20's came three phenomena which took radio out of the novelty class and established it as a permanent part of American life: the American system of broadcasting, supported by the advertising dollars of American business, the all-electric receiver, and the radio networks.

For the next two decades the story is one of growth, growth in numbers from 4 million sets in 1925 to 56 million sets in 34 million homes in 1945, and growth in maturity as broadcasting added news and service to its entertainment function. Radio sets began to spread out from the living room into kitchens, bedrooms, workshops and automobiles; listeners were more and more individuals, less and less family groups.

Television, coming along in the late 1940's, brought the family, its friends and neighbors, together again, back in the living room to watch boxing, wrestling, parlors games and Milton Berle. Radio listening became more individualized, a group activity only at the breakfast table, and, while TV moved in on that time, too.

But, whatever changes in radio and television, the audience was always there, enjoying the entertainment, absorbing the information, buying the advertised goods and services, keeping the broadcasting business strong with its support and on its toes with its sometimes caustic criticisms. And today the audience is still there, more numerous than ever, with tv sets in three-quarters of the nation's homes, and radios, frequently two or more, in virtually every dwelling in the land, as well as in some 52 million cars.

Statisticians tell us that Americans spend well over a billion hours a week in broadcast reception, listening to the radio and watching television; well over a billion dollars a week for soaps and soups and motor cars they hear about on radio and see on TV.

Audience, we salute you. Without you, there could have been no broadcasting by the American system. Because of you, American radio and television have been able to deliver the world's best service and most powerful advertising impact. Because of you, the broadcast media wield the foremost social influence on our national life. May you continue to thrive and prosper and increase.

Suspension but Not Surrender
EDITOR:
Your Oct. 1 issue contains the following item which appears on page 9:
"York Uhf Suspends
"WNOW-TV York, Pa., ch. 49, was scheduled to cease operations today (Mon-
day), it was reported Friday. Cessation of WNOW-TV makes 66 stations which have
gone dark, of which 62 have been uhf. With
WNOW-TV retaining cp, this make 39 sta-
tions which have gone off-air but still retain
grants."
Since WNOW-TV makes the 39th station
which has gone off the air but still retains
grants, am interested in learning what the
other 38 stations are, since they are in a
similar situation as WNOW-TV.
Alan B. Miller Jr.
Ted Bates & Co., New York

EDITOR’S NOTE: The 38 other stations, in ad-
dition to WNOW-TV, which have ceased opera-
tions but have not returned their construction
permits are listed on page 38 of the Sept. 2 issue
of B+T. In the footnote to TELESTATUS,
montly feature. In a later development, WNOW-
TV was to have returned to the air last Friday.
See story, this issue.

Sabotage
EDITOR:
I don’t suppose you will mind me writing
you a letter concerning your very fine maga-
zine. No doubt, television has been one of
your greatest boons, and no doubt, radio ad-
vancing in your magazine is not what it
used to be; but it is a fact that radio did
nurture your tabloid.
Certainly you are trying to give radio all
the credit it deserves and you are to be com-
plimented on the article on page 38 in the
September 10 issue. It was a fine article on
radio, however, when you turn the page to
complete the story, you find in a huge box
in the middle of the radio story “Daytime is
Retailers Time in TV.” Your layout man is a
saboteur.
Let me give you my sincere thanks for
your fine article; radio needs and deserves
your help. As for your makeup man, my
worst regards.
R. Lee Glasgow, Vice Pres. & Gen. Mgr.
WACO Waco, Tex.

Telecasting Map
EDITOR:
Now that the shiny new 1956 version of
your B+T TELECASTING map is dominating
my bulletin board, my office has taken on
new sparkle. The previous one had become
quite shabby from over-use and over-tack-
ing.
Jean L. Simpson, Time Buyer
Doyle Dane Bernbach Inc., New York

EDITOR:
... you are to be congratulated on the fine
job in preparing it.
John J. Flanagan, Vice Pres.
McCann-Erickson Inc., New York

EDITOR:
As usual it is an outstanding job and
clearly represents your high standards of
quality and up-to-the-minute information.
Joe Gans, Vice Pres. & Dir. of Radio
& Tv
Maxwell Sackheim & Co., New York

EDITOR:
... It is certainly a very useful piece of
material to have around. I use it almost
every day.
Arthur S. Pardoll, Dir. of Bst. Media
Foxe, Cone & Belding, New York

EDITOR:
The telecasting map is certainly a valuable
addition to our office, and I assure you it
will be used and re-used. Knowing the au-
thority with which B+T speaks, I know that
we can count on the accurate quality of the
map.
Glen Bammann, Assoc. Dir. Tv-Radio
Marschalk & Pratt, New York

EDITOR:
We find this map most useful as a
quick reference tool.
We are also very happy about the fact
that because of your quick revisions, it
doesn’t get a chance to outlive its usefulness.
Edward A. Fonte, Dir. of Media
Joseph Katz Co., New York

EDITOR’S NOTE: B+T’s newest TELECASTING
map was published in August. This 24x24-inch map located cities with tv facilities, coaxial cable and
microwave radio relay routes for both black-
and-white and color and projected intercity con-
nections. Single copy $1. Quantity rates: $4.50
for 50, $8.50 for 100.

Hanau’s Comeback
EDITOR:
Marc Hanau, vice president and assistant
manager of KXO El Centro, and an em-
ployee of the station since 1951, has returned
to El Centro from Rancho Los Amigos, near
Los Angeles. He was taken there in an iron
lung last November, after being stricken by
polio. While being confined to a wheel chair,
he will do business from his home, and soon
will add some air work to his daily schedule.
His breathing capacity during the illness
dropped from 4500 cubic centimeters of ai
intake to 250, but that is now back up to
1800. His weight, which is now 160, has
dropped from 185 to 128. He looks and
feels better now than he has for the past ten
months, and finds breathing easier in the
Valley.
Riley R. Gibson, Gen. Mgr.
KXO El Centro, Calif.

The past 25 years have witnessed WIS grow from a small radio station to the State's most influential Television and Radio team.

We haven't grown alone— all Central South Carolina has expanded from basic agriculture to one of the best balanced and dynamic areas in the world.

Marketing experts point to this area as one of dramatic potential

... A FRONTIER OF THE FUTURE

Our next 25 years offer tremendous opportunities to us and to you! WIS-TV and Radio are equipped to attract and sell our market area as never before! Advertisers employ these stations which set the pace, which alone influence more South Carolinians who are the backbone of today's growth— the leaders of the future!

Peters, Griffin, Woodward, Inc. Exclusive National Representatives

No other station serves South Carolina like this.
This headline is an exact quote—made by a friend of ours—A man with whom we had worked previously—A man who as executive head of a new station organization was announcing Hollingbery as their new national sales representative.

It was a new station for us—in a new market—but previous experience had shown this executive that the Hollingbery organization was a “working” organization—the kind he wanted to “work” for him again. He wanted Hollingbery results. He had been spoiled by the Hollingbery brand of service. No other “rep” would ever satisfy him.

In short—Hollingbery had spoiled him for any other “rep.”

Saginaw Story —
While we rested...
This advertiser tested!

We don't like to rest on our laurels... but this was one time we couldn't help ourselves. A leading advertiser in the Saginaw-Bay City-Midland area wanted the best buy for his radio dollars. Our surveys showed WSAM to be the best buy. However, taking nothing for granted, this advertiser conducted an independent survey in this rich Tri-City Michigan area to be absolutely sure which radio station reached the most prospects for the least amount of money. Needless to say, WSAM led all the rest in his survey, too, and WSAM got the order—for the entire year! Proof again that WSAM's progressive programming of the big three in radio today—news, music, and sports—is what it takes to get and hold most of the listeners!

SNOWDEN M. HUNT JR.

on all accounts

WHEN Snowden Hunt Jr. gets a headache over a sales problem, he has three sure-fire remedies to cure it: radio, television and Alka-Seltzer.

Mr. Hunt is vice president, account supervisor and media director of Wade Advertising Agency Inc., Hollywood affiliate of Geoffrey Wade Adv., Chicago. He supervises buying of radio-tv time for Miles California Inc., the West Coast subsidiary of Miles Labs., Elkhart, Ind., and its products Alka-Seltzer, One-A-Day brand vitamins, Bactine antiseptic and Nervine. He also handles numerous other accounts, ranging from National Van Lines, Chicago, to See's Candy Shops, Los Angeles.

The agency executive has renewed Newspaper of the Air five mornings weekly on the Don Lee Network for the 23rd year for Miles as well as the afternoon five-weekly Here's the Answer on Don Lee. In western tv, Miles is using programs on stations in five major markets plus spots in 20 markets. Mr. Hunt told B-F current results from tv spots for Bactine are “fantastic.”

Snowden Morris Hunt Jr. was born in Liberty, Mo., Oct. 9, 1912. He went to high school in Oklahoma City and U. of Oklahoma at Norman and received his B.S. in business administration from UCLA in 1935. He then joined Forest Lawn Memorial Park, Glendale, Calif., which had begun institutional radio advertising about 1927. He was publicity director and advertising manager there until 1939, when he became Pacific Coast public relations director for American Red Cross handling all national Red Cross radio shows. From 1941 until V-J day, Mr. Hunt served in Navy intelligence, mostly China and was released as full commander. He joined Smith, Bull & McCleery, Los Angeles, as account executive and in 1944 switched to Mogge-Privett Inc. there. He joined Wade in 1952.

Mr. Hunt married Jacqueline Terry o Los Angeles in 1940. They have two boys Terry, 13, and Lee, 10, and live in North Hollywood. Active on the local Boy Scout fathers' board, Mr. Hunt also enjoys trout fishing, golf and hi-fi.
HELIUM, the colorless, odorless, tasteless, exceptionally light non-burning gas, comes from the natural gas and oil fields around Amarillo. Recovery methods were developed here; the main helium field and recovery plant are important points of interest. Once, when a slight touch of Panhandle weather turned the sky black and slammed the temperature down thirty degrees, a transcontinental plane was grounded. One of the impatient passengers, a high-spirited filly from the Coast, checked in at a hotel and bent the clerk's ear. "What's there to see in Amarillo?"

Civic-minded as all get-out, the hotel man volunteered, "We have the only helium plant in the world."

The lady brightened. "Indeed?" she said. "Is it in bloom now?"

The plant isn't in bloom, but Amarillo and the Panhandle are. There's dough-on-the-hoof and gold in the wheatlands. The oil wells are in flower, the livestock market's busy, the Amarillo area is, year after year, first in the nation in retail sales per household.

Come pluck the flars.

**AMARILLO GAS**

"ALL-IN-ONE" PROCESSING AMPLIFIER

SPACE SAVING EQUIPMENT

All-electronic unit provides identical control equipment for both live and film camera chains.

Only 100 inches of rack space required for all equipments necessary to operate camera chain. With monitors and processing amplifier at the console, only 3/4 of a rack needed for efficient complete installation.

NEW POWER SUPPLY

CENTRALIZED CONTROLS

Occupy only 1/2 space of former d-c power supplies... high efficiency plus high output... 1500 ma.

Minimize setup time... only two controls in "on-air" operation. In addition, overstability, peak camera performance and picture quality are assured.
equipped with RCA Live Color Camera Equipment, alert station managements are trail-blazing along the new frontiers of television...adding brilliant dimensions to programming techniques, transforming commercial products into thrilling reality. These progressive television stations are using local color originations to build prestige and stimulate sponsor interest.

RATHER than attempt an evaluation of the eight hour-long television plays contained in this volume—all of which have been subjected to either praise or criticism elsewhere—we would like to examine the first word in this anthology's title: "best." Mr. Vidal, a writer of all trades whose witty and urbane "Visit to a Small Planet" is to be found herein, presumes that all eight scripts are the "best" he and his peers have come up with. We disagree. "Best" in whose eyes? Mr. Vidal's? Then he should say so. We're all for doing away with that presumptuous word "best" and retitling the book, "Better Television Plays." This is what make horse racing and tv critics...

DR. EVERITT, "dean" of electronic engineering, presents a comprehensive, and up-to-date study of communications problems in this third edition of his well-known earlier work. The U. of Illinois Dean of Engineering, assisted by an associate engineering professor from that school, Professor G. E. Anner, has placed additional concentration on the area which must precede the study of all other divisions of communication, namely, the fundamentals of linear-network analysis and synthesis, including the use of unilateral elements. In order to demonstrate the design requirements which are imposed on the linear portions of communication-system networks, both an analysis of various types of modulation and the transformation of transients from the time to the frequency domain are thoroughly developed. The new edition, which has numerous additions over its predecessors, is handsomely illustrated with detailed charts and drawings.

THIS new volume—an extension of Mr. Arquimbau's Vacuum-Tube Circuits—has wisely been designed to be understood with ease by beginners, but still gives useful ideas to mature people in industry. The work includes up-to-date material on such topics as transistors, frequency modulation, inverse feedback and noise. Formalized mathematics are avoided wherever possible and fundamental principals are emphasized throughout the book. Mr. Arquimbau's book, which contains transistor contributions by Richard Brooks Adler, associate professor of electrical communications at the Massachusetts Institute of Technology, is explanatory rather than descriptive. It is intended to help in seeing through the fundamental processes treated, thereby providing a guide to new developments.

TELEVISION WRITING, by Robert S. Greene. Harper & Brothers, 49 E. 33rd St., New York 16, N. Y. 274 pp. $4. THIS is a revised edition of a work originally published in 1951. In the ensuing five years, Mr. Greene states, "production techniques have changed . . . a somewhat simplified approach has been developed in the relationship between the writer and his camera. . . . The big change has been in markets. Writers need to know not only how to write scripts but how to sell them." Retaining the material which made the first edition a valuable book for television writers, veterans as well as tyros, the revised edition contains a new section on markets for tv scripts which should be of great help to writers who are new to the tv field.

PUBLICITY should be a smooth-flowing and continuing process, according to author C. E. St. Thomas, a veteran public relations man. In his new book he tells how this process can be achieved. Clearly and concisely, Mr. Thomas covers setting up and operating of a publicity department including preparation of releases for radio and tv...
A new source of COPPER from "the richest hill on earth"

At Butte, Montana—"the richest hill on earth"—copper's future has never looked better. One reason is Anaconda's activity at Berkeley Pit, where a new open pit mining operation is recovering profitable low-grade copper ore.

Experimental work at Berkeley Pit, begun in 1954, assures an ore reserve of at least 100 million tons. Today Berkeley Pit is yielding ever-increasing ore tonnages. When fully developed in mid-1957, this project alone will be adding 65 million pounds of copper annually to the world's supply and will continue to do so for many years to come.

Berkeley Pit is just one phase of Anaconda's program which assures for Butte a mining future even brighter and longer than its long, productive past. Meanwhile, Anaconda continues to apply its more than 60 years' experience, not only to the development of new copper sources, but to meeting the expanding needs of industry for more and better products in the entire non-ferrous metal field.

GOLDBERG ATTEMPTS COUP AT ABC

- United Paramount interests reportedly want to unseat Kintner as president of the network.
- Action is stayed at least temporarily as Noble pleads for 'keeping the railroad running.'

REPORTS of a potential shakeup in top management of ABC ricocheted last week from New York to Los Angeles.

Despite a studied silence maintained by all participants, it was apparent that a basic disagreement had developed between the forces who controlled ABC before its 1953 merger with United Paramount Theatres and those in UPT who gained control of ABC when, through the merger, it became a division of American Broadcasting-Paramount Theatres.

Speculation preceding the October AB-PT board meeting last Wednesday centered on the possibility that ABC President Robert E. Kintner would resign and that AB-PT President Leonard H. Goldenson would assume active command of the network. The meeting lasted some three hours, it was understood, but broke up with speculation still rife and with no comment from the board members.

It was assumed that the meeting had deadlocked, or had ended in agreement to withhold disagreement—at least publicly—for the time being if not for good.

AB-PT's President Goldenson was pictured as the leading force in a movement to take over active direction of network affairs from Mr. Kintner. The ABC chief's present contract runs to Dec. 31, 1957. His pay in 1955 totaled $100,000. Mr. Goldenson's totaled $182,214.

The AB-PT chief was said to have the support of 12 other members of the 17-man board. The division was clean. All of these 13 are identified as "Paramount" men, while the three siding with Mr. Kintner are "ABC men" from pre-merger days.

Aligned with Mr. Kintner on the board, it was understood, were Edward J. Noble, former owner of ABC and now chairman of the AB-PT Finance Committee, a post which has been regarded as second only to Mr. Goldenson's; Robert H. Hinckley, ABC Washington vice president and long-time associate of both Mr. Noble and Mr. Kintner, and Earl E. Anderson, financial expert also long identified with ABC.

Mr. Noble, who induced Mr. Kintner to make the transition from newspaper columnist to radio-TV executive 12 years ago, was said to have led the opposition to top-level ABC changes in the discussions of the board last Wednesday. They should keep the railroad running, not tear up the tracks. He was quoted as telling the other board members.

Apparently his arguments prevailed, but whether the victory was temporary or permanent could not be ascertained or deduced.

It was understood another meeting was planned. Sources at AB-PT said the next regular meeting would be about Nov. 10, and that they knew of no plans for any special meeting before then. But a special meeting presumably can be called any time—even this week.

At ABC, inquiries regarding the reorganization reports were referred to AB-PT. There the official story of spokesmen was that they had no information to confirm reports of such a discussion at the board meeting and that they knew of no votes being taken. Mr. Goldenson could not be reached.

But the reports persisted, circulating on the West Coast as well as the East.

The principal protagonists in the tug-of-war are both youthful men who advanced far and quickly in their respective fields.

Mr. Goldenson, who was 30 last December, graduated from Harvard Law School at the bottom of the depression, was invited in 1933 by the receivers for Paramount Pictures to reorganize the company's New England theaters. He accepted, and progressed rapidly in the Paramount organization. In 1941 he was elected vice president in charge, and in 1950, when the consent decree forced Paramount to get rid of its theaters, he was named president of the new company, United Paramount Theatres. Upon UPT's merger with ABC he became president of the new AB-PT.

Mr. Kintner, who turned 47 last month, broke into broadcasting in 1944. Up to that time he had been a newspaperman and columnist—one of America's most famous. After several years with the New York Herald Tribune, he teamed up with Joseph Alsop in 1937 to write a column for North American Newspaper Alliance. The pair produced not only a daily newspaper column, but wrote regularly for the Saturday Evening Post and published collections of their pieces in two books. After wartime service in which he won the Legion of
Merit, he was preparing to return to his newspaper column when he was discharged, for medical reasons, as a lieutenant colonel in September 1944. A "friend" invited him to lunch with Mr. Noble, Mr. Noble invited him to join ABC, and on Sept. 15, 1944, he was elected a vice president of the network. In 1946 he was elected executive vice president, and in 1949 was elevated to the presidency.

Both Mr. Goldenson and Mr. Kintner are Pennsylvanians by birth, Mr. Goldenson from Scottsdale, Mr. Kintner from Stroudsburg.

The disagreement came at a time when ABC apparently is in its best financial shape in years. When the ABC-UPT merger finally was approved by the FCC, ABC was admittedly in a costly financial condition. Gradually, with UPT resources flowing into the network operations, business began to pick up and has since moved steadily forward.

For example:

In 1952, last full year before the merger, ABC-TV recorded $18,353,003 in gross time sales, according to Publishers Information Bureau compilations. In 1953 the total was $21,110,680. A year later it reached $34,713,098. Last year the figure came to $51,393,434. And in the first eight months of this year, according to PIB data released last week (see story, page 90), ABC has almost equaled its total for all of 1955.

The January-August PIB figure for ABC-TV is $50,855,477—a gain of almost 78% over the total for the same period a year ago. And in August of this year gross sales ran 92.1% ahead of August 1954.

By contrast, the news from AB-PT's theatre operations has not been uniformly good. This, coupled with AB-PT management's seemingly increasing emphasis on television activities and prospects in its public statements, led some observers to the belief that the company is looking to ABC as eventually its major revenue source. This, these observers felt, may have prompted AB-PT management to move toward more active direction of ABC.

In his annual report to the stockholders last spring, Mr. Goldenson noted that ABC had broken into the profit column in 1955 after operating at a loss during the first two years following the merger. He also reported that AB-PT's overall gross income in 1955 was down about 4% from the 1954 total. He attributed about a third of the decrease in theatre gross to AB-PT's disposal of additional theatres in compliance with a government antitrust decree. The rest of the drop was attributed to lack of quality films during 1955's fourth quarter.

While theatre gross was down, AB-PT's overall net operating earnings were up 74% to a total of $8,218,000, and its total income of $194,662,000 was reported to be the highest in the Paramount company's six-year history.

A few weeks later, Mr. Goldenson told the annual stockholders meeting in May that "the most significant development during the past year has been the emergence of the broadcasting division as a sound, rapidly growing and increasingly profitable operation with a solid position in an expanding field of activity" (B&T, May 21).

At that time he also reiterated that the company's theatre business currently was not up to the preceding year's level. But overall, he said, estimated net operating profit of AB-PT in the first quarter was 34% ahead of the same period in 1954, and that an increase in net earnings for the second quarter was indicated.

Reporting to stockholders again in July, Mr. Goldenson stressed that the ABC Broadcasting Division had continued to show improvement and said AB-PT's overall net operating profit for the first six months of this year had risen to $4,202,000 from a total of $3,355,000 for the first half of the preceding year. Including net capital gains of $907,000 from the sale of theatre properties and sites, he said, consolidated half-year earnings amounted to $5,109,000 as against $3,438,000 for the first six months of 1955. AB-PT's net operating profit for the second quarter was placed at $1,632,000 as compared with $1,438,000 for the second quarter last year.

ADVERTISERS & AGENCIES

MONOCROME TV LEVELS OFF AS COLOR STARTS ITS PUSH

C&W's annual Videotown survey shows viewing slightly down, not increasing as in past years (see below). At the same time, new NBC-BBDO ColorTown report shows viewing doubles when a color set comes to the home (see page 46).

FOR the first time in history, television viewing has reached an apparent plateau—with a decline in both the number of people watching and the hours of individual attention to the set.

This is the surprising import of the ninth Videotown survey as it is being released today (Monday) by Cunningham & Walsh, New York.

The advertising agency has been issuing reports on Videotown since 1948. It is a continuing annual study of trends in TV sales and set usage and the impact of television on family life. Videotown is New Brunswick, N. J., which now has a population of about 40,000 and is located 30 miles southwest of New York City. It was selected eight years ago as the C & W tv testing ground because it has a unique tv location and yet is typical of an average U. S. community.

It is unique in that its proximity to New York City permits good reception of seven tv stations. New Brunswick has developed into a mature market for television, both in set buying and in viewing habits.

It is typical of the urban American community, because it is an independent, self-contained market supported by its own industries and agricultural area. Although within distance of the Big City, few people within its limits commute to New York.

While Videotown for the first time are not increasing their viewing hours, they also are spending less time at the motion picture theatre or with magazines. These developments also underscore a reversal of a trend that had set in at Videotown about two years ago. Then, the family read more and attended more movies.

The benefactors in the leisure period on weekday evenings seem to be the more in-tangibles of social activity. For example, Cunningham & Walsh found that set owners are dining out more and are stepping up visiting and entertaining of friends. They are more inclined to attend meetings, clubs, dances, and (principally on the part of males) sports events.

According to Gerald W. Tasker, a vice president and the director of research at C & W, evidence at hand indicates only a definite pattern that TV viewing has entered a period of stability.

TV set saturation of as of May 1956 in Videotown was 90.5% and total individual viewing hours are at about the 1954 level. As shown in the Videotown survey:

Mr. Tasker's report surmises that the leveling off in viewing probably will continue until some major change occurs in programming.

The seed for such a change might be planted by color television programming.
but just how much it can increase TV viewing in either totals or percentages is moot.

Last summer in an exclusive interview with B&T, Mr. Tasker predicted that as an advertising medium, color television should be blossoming in the 1958-59 period. He then based his observation on Videotown studies, including a special canvass last spring.

By a plateau, Mr. Tasker explains, it is meant that TV viewing should have both its "up and downs" from now on, but most likely not taking over by any great length the "peak" reached in 1955.

Most of the loss this year was in the weekday evening viewing, which, the report concludes, apparently reached its level in 1953. Since that year, the average hours per week have been fluctuating. Morning viewing has reached a "temporary plateau, although its level seems low in comparison with other parts of the day." (Total for week for average person less than an hour in 1953 and 1955, 1½ hours in 1954 and just over an hour this year). Afternoon viewing (C & W places this period from noon to 5 p.m. because of Videotowners who start their days early) hit a peak of 1 hour 39 minutes in 1954, dropped a bit in 1955 and again in 1956 to 1 hour 22 minutes per week.

Hint of the Change

According to past Videotown surveys, the appetite of the American family continually has been on the increase. But only last year, C & W's study hinted that something was afoot by noting that evidence then indicated viewers were selecting their programs with more care.

Color TV has yet to get off the ground at Videotown. More Videotowners in TV homes have seen a color telecast—23% compared to 17% last year, and 9% in 1954. In non-TV homes, 14% of respondents had seen a color telecast, half of them liking the color.

About two-fifths of TV owners who saw color were favorably impressed, and three-fifths made unfavorable comments. About a half of set owners said they would like to own one, the majority favoring a set of the 21-inch size or larger. TV owners thought $300 to $400 would be a fair price for a color receiver, while non-TV owners who gave an opinion, felt they would be willing to pay about $250.

In its random sample, C & W found color sets owned in two homes. Its special canvass of dealers last April produced a list of 18 color receivers in the Videotown area with 11 in private homes and seven in bars (B&T, July 9).

The first Videotown study of 1948 found 1.4% of families had a TV set in their homes. By 1955, there were 8 out of 10 homes with a TV set as compared to 1 in 7 in 1948. Total TV viewing increased each year as the number of people watching on the average weekday maintained an upward trend. For average individual time in front of the set, 1955 was the peak year, with 87% watching TV on an average weekday for an average of 15 hours 33 minutes per week. This year, 79% watched TV on an average weekday which is only 2% above the 1954 level. Average viewing per week this year: 14 hours 25.8 minutes.

The decrease in viewing was general, regardless of sex, age and length of TV ownership. Early TV fans remain the most "ardent" viewers. Homes with TV before 1954 had sets tuned in for 3 hours 50 minutes on the average weekday evening, compared with a little over 3 hours for the newer owners.

Individual members of "older" TV families watched about 12 hours 15 minutes a week during weekday evenings but people in newer TV homes watched 10 hours 10 minutes per week.

Most consistent viewing is still in the evening with 8 out of 10 (includes husbands, wives, and teen-age children) watching TV nights total is available for viewing in the evening during the week (Monday-Friday). Of that number, about 13½ hours last year were used before the TV set on an average. This year the hours dropped to a little over 11.

Of all Videotown wives, about 85% watch TV sometime during the day. This is 7% less than last year. All other categories show declines: morning viewing down to 11%, off 6%; afternoon down to 20%, a loss of 7%, and evening viewing at 81% or 8% under last year. For all people the decline is from 87% last year to 79% this year.

There is a decline for the housewife in radio listening, too. This occurs mostly in the morning, however, where listening dropped from 43% to 39% holding steady in after-

* Watching or not.  ** Listening or not.  

at some time on the average weekday evening. This is a slight drop from the peak last year when the average was close to 9 out of 10. C & W found children under 10 now are the least apt to watch on any one evening and when they do watch TV, they spend less time than other members of the family, partly because of early bedtime.

In total hours spent on TV in the evening weekdays, children under 10 spent a little over seven hours, teen-agers about 10 hours, husbands and wives about 13 hours and "other adults" about 10 hours. This presents a drop of from 1 to 3 hours weekly for all of the categories, except for "other adult males" whose level was close to last year.

Again, supporting the decline in viewing, the Videotown study noted that on the average weekday evening, fewer sets tuned in—89% this year compared to 96% last year—and for a shorter time—3 hours 55 minutes this year and 4 hours 15 minutes last year.

Actually, about half of the available time on a weekday evening in Videotown is spent with television. C & W figures that about 30

noon and evening. But for all people, radio slipped only one percentage point, most of the decline in the morning hours and actually picking up in the afternoon and evening. Morning radio still tops TV in that period of the day.

The Videotown study also found that the amount of time spent listening to radio weekdays—when people listen—has remained steady for almost two years. Total hours for the average person for the whole day (2.86) are at about last year's level (2.85) and slightly below previous years.

In its census of radio ownership in Videotown, C&W found more radios in the bedrooms and kitchens of TV homes, which leads to a conclusion that perhaps these increases account for the maintenance in radio listening. The study finds about 94% of all families with one or more radios (near the national average of about 96%). In TV homes, 46% had more than one radio compared to 37% in non-TV homes (TV homes averaged 2.1 radios per home, non-TV homes, 1.8).

In 9% of the homes, both the TV and the
radio set were tuned in at the same time at some hours during the day—mostly in the evening
and in the morning.

In a look at viewing and listening habits of housewives in Videotown, the study found
26% listening to the radio (concentrated mostly in the morning) while they were engaged
in chores around the house. In tv, the percentage was 8%, with this combination of
housework and viewing occurring more often in the evening than in other parts of the
day.

A trend toward greater selectivity continues. Members of the family do not spend
as many hours viewing on any one evening as on the average. Of 20 sets a year turned
on for an average 3 hours 55 minutes each evening (last year 19 out of 20 sets were
on for 4 1/2 hours). Dad now watches 13 hours in the evenings, Monday through
Friday, compared to 14 last year; Mom spends 12.9 hours this year compared to 15
a year ago. Videotown study found the family shifting to other social and leisure time
activity this year, principally those outside the home that had not shown a previous
recovery.

Entertaining and visiting had been on the increase in Videotown in the years of low
level. But this activity slowed and then declined as set ownership became more widespread.
In 1950, about 25% of the adults in the tv families reported entertaining or visiting friends; in 1951, this
percentage was cut in half and remained there through 1953; then hit a low point (about 10%)
in the past two years. This year, the increase in set ownership is right—12%, but enough of a
rise to bring the level to about where it was in 1951 through 1953. Small increases also were noted in other social activities.

Movie attendance, which took its worst beating with the advent of tv (the family cutting its attendance by an average 77% with the purchase of a tv receiver), was brought back in 1953. The weekday at
tendance last year reached its peak in the post-tv period, although in tv homes it
still was less than two-thirds the pre-tv level. This year, however, attendance in tv homes was set back again, dropping to the level of the early tv years.

Magazine reading in tv families also dropped. In the first year of tv in the home, magazine reading on a weekday evening dipped 53% but, like movie attendance, a reversal of the trend set in by 1953 and reading increased each successive year. In 1955 about 50% more adults than in 1954 reported reading magazine on the average weekday evening. This year, however, magazine reading receded to about 25% above the 1954 level but below 1955. The loss in magazine readers is among house-
wives—men readers actually increased slightly.

No significant change was recorded in newspaper reading which has maintained a
high level in the family. In fact, tv set
ownership in Videotown has had little effect on newspaper reading (it went up in 1951,
1952 and in 1953 and since then has shown only "very slight fluctuations").

While no conclusions are made in the

study, it is speculated that moviegoing and magazine reading also are on a plateau with tv and thus "for a time . . . show slight ups and downs from year to year."

Age of sets is on the increase, thus signal-
ing "a lush replacement market,"
except that only about a third of those sets pur-
chased four years ago (average replacement
rate has moved from 4 years last year to
4.6 years this year) have been replaced.

While there has been a steady increase in
the number of two- and three-set homes (1% in 1951, 7.2% in 1955 and 8.7%
in 1956), C & W found that the second set market was well materialized only about
1/6th of total owners said they thought
of buying a set this year as a second set
for another room. The 21-inch screen, which
has dominated sales since 1953, continues
to be the size preference.

There was no evidence of high enthusiasm for portable tv sets. While three-fifths of
those questioned knew about portable tv, less than a quarter of all tv owners thought
they would be interested in buying a portable.

With saturation over 90%, the size of the "average tv family" now is 3.37, nearly
the same as Videotown’s "average family"
(3.26).

Average family size of new owners is
3.12; non-owners, 2.29; two-set families,
4.46 and all replacement families, 3.55.

The average family obviously shunned the radio dial in the evening hours once tv was
ushered into the house. In 1951, the Videoto-

town tv families listening to radio on week-
day evenings shrunk to a mere 5% as com-
pared to the fat 60% listening that existed before tv set arrival.

But since that time, the percentage of family listening (tv homes) in the evening has
increased with each year: 8% in 1952; 9% in
1953; 10% in 1954 and also 1955, and 12%
this year. In the afternoon, radio listen-
ing in the tv home has been erratic since its
6% low point in 1951—to 9% in 1952, at
8% for three years and now once again it is
at 9%. Housewives, however, who had
maintained a 15% to 19% average in the numbers listening to radio in the afternoon in
past years dropped this year to 14%.

The size of the morning radio audience has not been affected by tv. The numbers
listening to radio at some time in the morning have been increasing up until this year—
10% in 1951 (about the same as for non-tv homes), 15% in 1952 and 25% in 1955.

This year the percentage stands at 23, the same as in 1954. Again, the number of
housewives listening to radio in the morning
was down this year (39%). In the other
years: 1951, 25%; 1952, 33%; 1953, 42%;
1954, 45%; and 1955, 43%.

**COLORTOWN: NEW AMERICAN COMMUNITY GAUGES THE VIEWING PATTERNS OF TV**

CAN color deliver in terms of audience and commercial impact?

These questions apparently have been an-
swered in the affirmative, at least in part, in
the first findings released Friday from "ColorTown", a continuing study by NBC
and BBDO of the growth and impact of color
tv in a medium-sized American city.

As summarized in a joint announcement by Hugh M. Beville Jr., NBC vice president
for planning and development, and Ben Gedalecia, director of research at BBDO:

- Color boosts the impact of as well as the attention to commercials.
- Owners of colorful sets earn more, live better, are more influential and active in the community in which they live.

The initial findings of "ColorTown" were released at about the same time as the annual
Videotown survey which is conducted by Cunningham & Walsh (see story, page 44). Videotown did not go into color ex-
tensively, nor did it report on whether color programs increase audience or commercial impact.

But Videotown did report that of 14% of respondents who did not have any tv in
their homes, half liked the color, and that about two-fifths of tv owners who saw color
were "favorably impressed" while three-fifths made "unfavorable" comments. Such comments as "vivid," "beautiful," "in-
teresting" and "wonderful" were made by those who liked color. Unfavorable reactions included such expressions as: "disap-
pointed," "colors artificial, gaudy," "not per-
fected yet," "hurts eyes." Still other objections were based on the small screen and the
high price of a set.

The Videotown study was hampered in its color search as it found only a few color-
sets in existence. Privately, however, Videoto-

town researchers believe that color may provide the added excitement to tv program-
ming that would up the increase of tv view-
ing. For the first time in its history, the
Videotown (actually New Brunswick, N. J.)

Page 46 • October 15, 1956
study reported tv viewing had reached an apparent plateau.

The Videotown survey uncovered an important change, however, in that color is being seen by more people than ever before.

Last year, 17% had seen a color telecast. This year, the number jumped to 23%. In general, Videotown pollsters found people ready, willing and able to buy color once the price drops to a "fair" level. That price range varies from $250 among non-tv owners to between $300 and $400 among current tv owners. Median price of the latter category is $363, which is still below the current costs of color receivers.

The "ColorTown" survey—actually comparisons of color and black-and-white viewing—was based on an analysis of viewing during a sample week by two matched groups, one made up of color owners and the other of black-and-white owners. To assemble a sufficient number of color set owners, the regular "ColorTown" panel was augmented by additional color set owners who live within that community.

The joint BBDO and NBC announcement noted:

"Comparing the viewing of color programs in color homes and the same programs in black-and-white homes, two effects were noted:

"(1) More color homes watched the shows and (2) there were more viewers per home in color homes. The net result of these two effects was to double the audience to color shows in color homes. That is, twice as many persons watched these shows per hundred color homes as per hundred black-and-white homes.

"It was found that on a group of control programs in black-and-white, color set owners watched less than black-and-white homes. When a combination of black-and-white and color scenes was used on the same program, color viewers indicated annoyance, apparently preferring the entire show in color.

In its findings on commercials in color, the study showed, the color medium increased the number of viewers who could recall at least one of the products advertised. Color also increased the number of products remembered. According to the findings:

"The net result of these two effects is that total recall (number of products recalled per hundred viewers) is more than doubled."

Commercials in color increased attention. Viewers said they considered these commercials "superior" to those in black-and-white.

The NBC-BBDO research team stated:

"Overall, color more than doubles the number of viewers who report they are more inclined to buy this product after seeing the commercial."

In its findings, BBDO-NBC discovered that seven times as many color set owners is black-and-white receiver owners fall in 'high income' groups, with a quarter more owning homes. They also were found to be more influential and active in the community, belonging to more church organizations, social clubs, engaging in more 'fun' raising and taking part in more civic and business associations. In general, color set owners belonged to twice as many clubs and organizations as black-and-white set owners.

In a special Videotown study, last April, Cunningham & Walsh also conducted a special canvass of dealers and color set owners. In that study—of color alone—the agency found that the families with color sets in the New Brunswick area (11 in private homes and seven in bars) tended to be of a certain category. Generally, they were in the older age groups, middle or high income, and in executive or professional groups with a below average number of young children.

The joint announcement by BBDO and NBC said additional tabulations of the project are in progress and that a more complete report would be released "around the end of this year."

Institute of Life Insurance Using Radio in 30 Markets

The Institute of Life Insurance will use 2,200 spot announcements on life insurance on farm shows in 30 markets, starting today (Monday), the Institute announced last week. J. Walter Thompson, New York, is its agency.

The campaign will run through May, supplementing newspaper schedules in rural areas.

"This year's Institute-sponsored advertising," Holgar J. Johnson, president of the Institute, said "presenting information about life insurance performance, and keyed to an attention-getting theme, is a further step in the continuing program of developing a warmer public attitude toward life insurance."

October 15, 1956
MORE CREATIVITY SEEN AS AGENCY NEED

Solution to problems of growing competition in advertising and diminishing share-of-attention by consumers offered at annual meeting of western region of American Assn. of Advertising Agencies.

GREATER CREATIVITY—to overcome the growing competition in advertising and the diminishing share-of-attention by the consumer—was the keynote of the 19th annual meeting of the western region of the American Assn. of Advertising Agencies last week at Coronado, Calif.

A record attendance of more than 450 agency, advertising and media representatives also heard strong pleas for preservation of creative personnel, an expanded program of recruitment and training of all personnel for agency work and new evaluation of the 15% fee system. Speakers called for better proof to advertisers that they are getting what they pay for, as well as for closer and more stable agency-advertiser "partnerships."

Held Sunday through Wednesday at Hotel del Coronado, the western region meeting heard 4-A President Frederic R. Gamble remove all doubt that the advertising profession would have difficulty living under the Justice Dept.'s antitrust degree. Rather, he noted, the industry would find that the legal guideposts set out in the consent decree will be of considerable value in planning and operation, providing legal interpretations where only doubt and confusion existed before the Justice Dept. action, begun in January 1954.

Mr. Gamble cited growth of 4-A membership in the past year to a total of 325 member agencies (317 last year) with 33,000 people (up 4,000). He outlined plans to establish a regional 4-A office in San Francisco (see story page 51) and approval of a $20,000 budget to expand 4-A's personnel recruitment program which is replacing the annual aptitude examinations.

John H. Tinker Jr., senior vice president and creative director of McCann-Erickson Inc., New York, observed that with product difference rapidly diminishing, "the personal point of view of the gifted creative person can become the persuasive pivot for the sale to turn on." But, he explained, "not only have extra services made our business increasingly complex, but the pure creative operation has also become more complicated, placing a heavy responsibility on creative management personnel. Television alone has easily tripled our creative headaches."

Reflecting on the changes demanded by TV in agency management thinking, Mr. Tinker observed that the weekend of a TV executive "has been described as about an hour and a half. It's a happy life of hysteria—doom, despair and dyspepsia."

"Ten to 25 pictures for a storyboard, music, recordings, sound tracks, unions, rehearsals, 4,000 bucks to shoot a 60-second spot, royalties for the actors, production hassles, etc., etc."

"Then if you take the poor beat-up creative genius who's got to pull it all together and ask him to sort out per capita sales figures, marketing strategy, red, white and green charts . . . Mister, you're going to have a real glassy-eyed individual."

Mr. Tinker emphasized the need for TV commercials to "be brighter than ever these days. A few years ago my family and I would see from 20 to 30 commercials in an average evening. Today we have from 40 to 70 thrown at us. I saw five during a one-minute station break. In fact, they came so close together I thought I was still looking at a headache remedy commercial when I found I was half-way through a cigarette pitch."

Noting many of the seasoned men in management today are between 40 and 60 years old, he said "many of us grew up in the reasonably simple and sane days when print was the big boy and radio was a strong sideline." This group is a "lost generation" in TV, he said, but weekly sessions conducted at McCann-Erickson for all facets of management within the agency to study the fundamentals of creative TV are helping discover new talents in many men formerly afraid to tackle TV.

John R. Little, vice president and manager of Foote, Cone & Belding, San Francisco, said "creativity is everybody's business in the agency" and is becoming a more important factor as the bulk of advertising grows and the attention time of the consumer shortens.

Noting the great mass of competing ads in publications today for similar products as well as the mass of ads for all products competing for recognition, Mr. Little commented, "Television is no exception to the rule of bulk. When was the last time you fell through the floor because you saw your product commercial buried in a sequence of others—a phenomenon calculated to encourage the audience to use this particular time to go to the bathroom?"

To solve the problem through greater creativity, Mr. Little urged agency executives to organize their shops for better creativity and stimulate more individual participation. "Be willing to pay for creativity," he said, and praise it for a job done well. Communication with the staff must be improved and the environment kept democratic, he added.

Creative Thinking Stressed

Along the line of stimulating creative thinking and building idea resourcefulness, Charles W. Reed, BBDO, San Francisco, told how brainstorming makes people more productive. He said BBDO offices across the U. S. had 500 brainstorm sessions this past year which produced 15,000 "extra ideas."

Emphasizing that brainstorming never replaces the need for individual creative thinking, Mr. Reed said, however, that the sessions force people to learn more of their own creative capacity and resourceful ness and make them learn to think faster. Other values of such sessions are the "sensations of belonging" given to staff participants the building of morale and greater cooperation in all agency activities as well as the better understanding of company problems, said Mr. Reed.

Whitney Drayton, advertising manager of Hunt Foods Inc., Fullerton, Calif., asked agency representatives to "strive to build more permanent relationships between agencies and advertisers." He said there are too many changes of agencies and clients "just for the sake of a change."

Charles H. Brower, executive vice president in charge of creative services, BBDO New York, also noted the plight of the
Greatest food merchandiser in America!

Baltimore supermarkets and corner groceries ... Baltimore chains and independents ... W-I-T-H delivers them all to you with the most powerful assortment of food promotions ever created by a radio station. Here's the "merchandising muscle" W-I-T-H will give your grocery product over a 13-week period.

- W-I-T-H Feature Foods Merchandising Service. You get all this:
  1. A minimum of 60 store calls in high volume groceries, including point-of-purchase merchandising such as increasing shelf exposure, restocking shelves and installing displays for your product.
  2. A minimum of 20 special one-week displays.
  3. 20 days of Bargain Bar promotions in chains and supermarkets, plus additional merchandising by demonstration, sampling, couponing, etc.
  4. Complete merchandising reports issued to you twice each 13 weeks.

- W-I-T-H Chain Store Food Plan, providing for dump, end-of-aisle and shelf extender displays in leading chain stores.
- PLUS merchandising letters ... PLUS trade paper advertising of your product ... PLUS potent advertising material for your own salesmen's kits ... PLUS personal supervision by head of W-I-T-H Merchandising Dept.

Add W-I-T-H's low, low rates and W-I-T-H's complete coverage of Baltimore's 15-mile radius ... and you've got the station that delivers the groceries!

A TV Station Is Measured By...

...ITS PROGRAMMING!

And WSM-TV programming holds a popularity lead in this market, according to both A.R.B. and Pulse. This popularity covers all categories:

NETWORK HEADLINERS — As the NBC-TV station in this market, WSM-TV gets a consistently larger share of the local audience for network shows (according to A.R.B. and Pulse) than the national average (according to Trendex) — proof positive that national standings cannot be neatly applied to all local situations.

TOP FILM SHOWS — According to the most recent survey of this three-station market, the 10 top syndicated film shows are all on WSM-TV.

LIVE LOCAL SHOWS — With a talent pool of more than 200, many of them nationally famous stars. WSM-TV is recognized as one of the country's leading stations in the production of top caliber live local shows. Such headliners as NOON, OPRY MATINEE, TELEVISIT, and CHANNEL 4 CLUB consistently reflect the know-how of a staff that produces network commercial shows on both television and radio for such top-drawer advertisers as R. J. Reynolds, Ralston-Purina and Pet Milk.

NEWS TELECASTS — An aggressive 9-man news staff, five wire services, two film services, staff cars, and complete kleig lighting and motion picture equipment all contribute to the WSM-TV news coverage success story. The station has also telecast more than 675 remotes of special local and regional newsworthy events.

SPORTS COVERAGE — Vanderbilt University basketball, exclusive TV coverage of Nashville's Southern League baseball team, NCAA basketball remotes from as far away as Bowling Green, Kentucky, Vanderbilt football highlights, steeplechases and stock car races are just a few of the many local and area headliners in the WSM-TV sports parade that continues to fascinate viewers in this market.

EDWARD PETRY & CO., National Advertising Representatives

WSM-TV's sister station — Clear Channel 50,000-watt WSM Radio — is the only single medium that covers completely the rich Central South market.

Page 50 • October 15, 1956
creative worker and in a light-hearted sense presentation made the serious point of need for better preservation measures for one breed, the copywriter.

"The real top selling ideas come from inner thoughts, not minds," he said. "Men or women to call them brainstorms or what you will—can serve to stimulate the individual mind. But finally, and strangely enough usually in the last period of desperation, one man or one woman comes up with the idea. These are precious today. Unless we do something to protect and help them, they will be as extinct as the Passenger Pigeon in another 10 or 20 years."

His solution: Sympathetic and understanding management which guides and leads, doesn't dictate and acknowledges work well done.

Larry Nolte, advertising manager of White King Soap Co., Los Angeles, told agencymen "we must take the 15% matter seriously. The more you resist discussion, the more trouble you will have." He called upon agency executives to "work harder" to show that their 15% is justified and suggested that they take their books to the client in this attempt, rather than inviting the client to come and inspect them if he might want to.

Del Porter and Robert Sande, Song Ad Film-Radio Productions, Hollywood, explained how "rhythm, rhyme and repetition" of singing commercials in radio and the animated counterpart of animated TV are effective sales vehicles. Using typical case history spots, Mr. Sande showed the agency men how the musical and copy theme are integrated in both media for higher retention value. He noted that once a viewer has seen the animated spot, he automatically visualizes the TV commercial product picture in his mind's eye whenever he hears the radio jingle driving in his car, at an outing or at home.

A. F. H. Armstrong, Leo Burnett Co., Chicago, gave results of an informal survey of women's likes in both radio and the animated counterpart of animated TV are effective sales vehicles. Using typical case history spots, Mr. Sande showed the agency men how the musical and copy theme are integrated in both media for higher retention value. He noted that once a viewer has seen the animated spot, he automatically visualizes the TV commercial product picture in his mind's eye whenever he hears the radio jingle driving in his car, at an outing or at home.

A. F. H. Armstrong, Leo Burnett Co., Chicago, gave results of an informal survey of women's likes in both radio and the animated counterpart of animated TV are effective sales vehicles. Using typical case history spots, Mr. Sande showed the agency men how the musical and copy theme are integrated in both media for higher retention value. He noted that once a viewer has seen the animated spot, he automatically visualizes the TV commercial product picture in his mind's eye whenever he hears the radio jingle driving in his car, at an outing or at home.

But can for creative people work in another something value.

The real is the last thing and strangely enough usually in the last period of desperation, one man or one woman comes up with the idea. These are precious today. Unless we do something to protect and help them, they will be as extinct as the Passenger Pigeon in another 10 or 20 years."

ROY CAMPBELL, executive vice president in charge of the western division of Footle, Cone & Belding, Los Angeles, was elected chairman of the western region of the American Assn. of Advertising Agencies last week at the west coast group's 19th annual meeting in Coronado, Calif. He succeeds Trevor Evans, Pacific National Adv., Seattle.

Walter Guild, president of Guild, Rascon & Bonfigli, San Francisco, was elected vice chairman of the 4-A western region succeeding John C. Morse, Dan B. Miner Co., Los Angeles. Ray Clinton, media director of Philip J. Meany Co., Los Angeles, was named secretary-treasurer. Hon. alumnus Harry S. Pearson, McCarty Co. of Seattle, Wash.

Staff for Sales-Servicing Expanded by A. C. Nielsen

EXPANSION of the sales-servicing staff for Nielsen Station Index and Nielsen Coverage Service activities and opening of new centrally-located contact office in Chicago were announced last week by John K. Churchill, vice president of A. C. Nielsen Co. New office in London-Guarantee Bldg. (360 N. Michigan Ave.) is headed by William R. Wyatt, vice president and central division manager for local broadcast measurement services. Other personnel are Bernard T. (Ben) Wilson, formerly president-general manager of WTVI (TV) [now KTIV (TV) St. Louis], as account executive, and Elliott H. Johnson, former media analyst at Foote, Cone & Belding, as administrative assistant.

Nelson on Leave From Kudner

LINNEA NELSON, television analyst with Kudner Agency, is taking an indefinite leave of absence effective tomorrow (Tuesday). Prior to joining Kudner Miss Nelson was in charge of radio and television timebuying and research for J. Walter Thompson, New York, for 24 years. She resigned from that agency in 1951 and joined Kudner to help handle the '52 Eisenhower campaign and has been there since.

CONKLIN MANN, C & W TO MERGE

CONKLIN Mann & Sons, New York, an agency billing approximately $3.5 million, will merge with Cunningham, Walsh, New York, effective Nov. 1.

Conklin Mann, president, and Richard Mann, vice president, also will join C&W, along with the rest of the staff. Both executives will be vice presidents at C&W.

All of Conklin Mann's accounts, among them the chemical and agricultural divisions, American Cyanamid Co., sponge products division, B. F. Goodrich, and George W. Helme Co., are going to C&W.

The agency has placed very little in radio and television for its accounts.

Buchan Names Three VP's

ELECTION of three new vice presidents from its account and research ranks was announced last week by the Buchen Co., Chicago advertising agency. Elected by the board of directors were J. Wesley Rosberg, research director and formerly with Henri, Hurst & McDonald; Henry W. Tymick, account executive and onetime president of the Chicago Industrial Advertisers Assn., and George Weisenbach, also account executive and formerly with sales and advertising staff of Firestone Tire & Rubber Co.

Zenith Seeks New Agency

ZENITH Radio Corp. last week was seeking a new agency to handle its radio-television advertising after announcing it would drop BBDO effective Jan. 1, 1957. A selection will be made shortly, according to L. C. Truesdell, Zenith vice president. Zenith currently is one-quarter sponsor of NCAA-NBC-TV football telecasts. The company's hearing aid division account is handled by MacFarland, Aveyard & Co., Chicago.

'POWERHOUSE' QUOTE
CLARIFIED BY BBDO

No slight intended to 50 kw radio stations, according to letter following report. Conclusions 'perhaps too broad.'

CLARIFICATION of references to "powerhouse" radio station as used in a BBDO analysis outlining the history and potential of radio as an advertising medium [BBT, Oct 1] was sent last week to all members of the trade who had received the original report.

The report, "A Discussion of Radio," was prepared by the agency's research department and investigated the past, present and future of the medium. Its verdict was that radio as an advertising medium is not only alive but a necessity for the advertiser and the public. The reference to "powerhouse" stations mentioned that the influence of these stations has been relegated to the past along with "tonnage buys" (in which low cost overrides other considerations). Several stations have pointed out, privately, that the report contained no findings to justify this view.

In his clarifying letter, Fred Barrett, vice president and media director of BBDO, stated in substance that few radio campaigns placed by BBDO fail to include "a substantial representation" of 50 kw stations which are dominant in the areas they serve. He said conclusions in the report were "perhaps too broad and too briefly stated to clearly convey the impressions that were intended."

The full text of Mr. Barrett's letter:

"Within the past week, the BBDO radio and tv research department has distributed a booklet entitled "A Discussion of Radio-Past, Present and Future". It has been given great publicity within the trade and no doubt you have been asked about it.

"As you can see, this report is an extremely important research document and offers some very useful information on radio today. It is an analysis that will be invaluable in discussing the importance of radio in the television era. However, at the end of this report there are some 'conclusions' made that are, perhaps, too broad and too briefly stated to clearly convey the impressions that were intended. Specifically, there is one reference to so-called powerhouse stations' which, as quoted in the trade press, appears to contort the position and the practice of BBDO.

"The policy of the media department on this score is very clearcut. We believe that each situation calls for different strategies of buying. Judgment on the part of the buyer, account executive and client must be exercised at all times in the selection of a station list. There is no set formula or pattern that will serve the best interest of all accounts.

"However, as in all other media, we lean toward buying 'leadership' in radio. Our evaluation of stations is never limited to figures dealing only with watts or physical coverage. We give great weight to a station's influence and believability, as reflected in the attitude of the listeners. We consider programming, station management, and the service a station renders the public as well as its facilities. The quality of a station's circulation is as important as its quantity.

"Based on these criteria, there are few campaigns placed by BBDO which do not include a substantial representation of the 50,000 watt stations that are dominant in the areas they serve. But in every instance power is only one of the factors involved in station selection. There are excellent and mediocre clear channel stations, just as there are good and poor stations of lesser wattage.

"In short, we cannot make any generalizations on radio at the station level. In a medium characterized by continuous change, buying will always be subject to constantly differing stratagems. There is substantial research available documenting the difference between stations and their comparative importance and values. Our judgment of facts, based on the specific objectives of each client, must always be the controlling factor.

"We would appreciate your considered study of this important document. In discussing it with clients and reps, we should make it a point to clarify any misunderstanding that may develop from the interpretations some people elect to attach to the trade press quotations."

Hogan, Rose & Co. Opens New Offices in Knoxville

HOGAN, ROSE & Co., Knoxville, Tenn., advertising agency, has announced the opening of new offices at 105 W. 5th Ave. The firm, organized in 1954 by Joseph P. Hogan and John M. Rose, handles market planning, public relations and advertising for some 30 clients in Tennessee, Virginia, North Carolina and Georgia.

The new quarters have been remodeled and comprise about 2,600 sq. ft., which will house the general and executive offices, research, traffic and production departments.

Clifford, Steers Get Top Post at DCS&S

DONALD K. CLIFFORD, a founding partner and president of Doherty, Clifford, Steers & Shenfield Inc., New York, last week was elected chairman of the board, and William Steers, another original partner and executive vice president, was elected president by the agency's board of directors.

Mr. Clifford had been president of the agency since 1951. Mr. Steers was elected executive vice president in 1952. Mr. Clifford is secretary-treasurer of the American Assn. of Adv. Agencies. Mr. Steers is a board member of Audit Bureau of Circulations and of the National Better Business Bureau.

At the same time, Robert Hayes, William E. Holden and Joe F. Jacobs, vice presidents and account supervisors, were elected to the board.

OFFICIAL opening of Foote, Cone & Belding's new Detroit office brought out a welcoming contingent from Ford Motor Co.'s Special Products Div., whose account agency will handle [BBT, Oct. 1]. L. to r: Charles S. Winston Jr., manager of FC&B Detroit office; R. F. G. Copeland, assistant general sales manager, Special Products Div.; B. E. Kraft, division general manager; Fairfax M. Cone, FC&B president, who will head creative task force as special management representative; J. C. (Larry) Doyle, division's general sales manager, and Clyde E. Rapp, associate manager of agency's Detroit office. Division is designing and engineering new Ford car, to be unveiled next fall (1957).
Covers All Sports!

IOWA sports lovers get top television sports coverage on WHO-TV, because our TV operation uses the same great sports staff that has built such a tremendous reputation on WHO Radio!

In addition to daily sportscasts by Jim Zabel, Iowa's "most-listened-to" sportscaster, WHO-TV schedules scores of exciting sports contests — both live and on film.

How loyal and enthusiastic is the WHO-TV sports audience? Well, last Fall when there was a slight technical delay in getting one football telecast on the air, WHO-TV received 1500 phone calls — and the Northwestern Bell Telephone Company reported a backlog of 5000 other calls!

Let Peters, Griffin, Woodward, give you all the facts on WHO-TV — Iowa's BIG television value.
PREVIEW of the new West Point tv series was held a fortnight ago in Washington. In the audience were Gen. Garrison Davidson, superintendent of the U. S. Military Academy, seen shaking hands with Tim Stone, Benton & Bowles account representative for General Foods Corporate Advertising Office, and George Hartford, vice president in charge of television for WTOP-TV Washington, who acted as host of the preview party for high-ranking Pentagon and West Point officers. The series is being produced for CBS-TV in cooperation with the Dept. of Defense and West Point.

B&W Signs $450,000 CBS Bill

BROWN & WILLIAMSON Tobacco Co. (Kool, Viceroy cigarettes), through Ted Bates, N. Y., has signed a 52-week contract with CBS Radio for an estimated $450,000 in gross billings. Viceroy will pick up two five-minute segments of the Mon.-Fri. 8:30 p.m. Robert Q. Lewis Show while Kool renews two five-minute segments of the Amos 'n' Andy Music Hall.

Tv Spots to Plug Movie

CLAIMING it will be the most extensive tv spot campaign to date for exploitation of a new feature movie, Universal-International last week announced it will have more than 400 spots in 35 markets starting the first week of November for "Written on the Wind" Technicolor production by Albert Zugsmith. U-I also is using tv and radio as a publicity media through tie-up with CBS-TV and radio Strike It Rich program. Mr. Zugsmith has western radio-tv interests including a station brokerage firm. U-I agency is Cunningham and Walsh, New York.

Wilds Back to Ayer & Son

CHARLES M. WILDS, former head of timebuying in the radio and tv department, N. W. Ayer & Son, New York, has returned to the agency after a leave of absence and is taking over direction of the radio-tv sports staff. Mr. Wilds originally joined the agency in 1947 and before that was with Ruthrauff & Ryan.

(P) Participations, as distinguished from sponsorship.

In the above summary, the monitoring occurred the week ending Aug. 31, 1956.

The Hooper Index of Broadcast Advertisers is a measure of the extent to which a sponsor’s commercials are seen or heard. Each commercial is assigned a number of “commercial units,” according to its length. This number is then multiplied by the audience rating attributed to that commercial. When each commercial has thus been evaluated, the results for all commercials of each sponsor are added to form the HIBA. For further details of preparation, see the basic reports published by C. E. Hooper, Inc., Broadcast Advertisers Reports Inc. and American Research Bureau Inc. Above summary is prepared for use solely by BROADCASTING & TELECASTING. No reproduction permitted.

**Commercial Units**: Commercial units are taken from the monitored reports published by Broadcast Advertisers Reports Inc. A “commercial unit” is defined as a commercial exposure of more than 15 seconds but usually not more than one minute in duration. Four “commercial units” are attributed to a 90-minute program, and in the same proportion for programs of other lengths. A “station identification” equals one-half “commercial unit.”

**Audience ratings for television** are those published by the American Research Bureau, Inc. Those for radio are the ratings of C. E. Hooper, Inc. In the case of station breaks the average of the ratings for the preceding and following time periods is used whenever feasible; otherwise, the rating is that of either the preceding or following time period, normally the preceding.

Hasta Banana

BBDO, New York, last week came up with 'banana-language' in describing United Fruit's latest "well over six figures" radio-TV spot campaign [CLOSED CIRCUIT, Aug. 13]. The campaign, featuring the voice of Rosemary (Chiquita Banana) June and such an unorthodox battle cry as "Booostabana! Backabana! Bommbabana!" knighted off on radio Sept. 17, with TV scheduled to air about Nov. 11. Telling the new campaign's story to the banana trade is an Aura- vision disc manufactured by Columbia Records and mailed as part of a promotional folder last week.

AGENCY APPOINTMENTS

Lambert-Hudnut Div. of Warner-Lambert Pharmaceutical Co. names Sullivan, Stauffer, Inc., N. Y., to handle advertising for Hudnut hair products which includes new Quick home permanent, Pin Quick, Enriched Creme shampoo, Creme Rinse 'n Set and other products currently being developed. Kenyon & Eckhardt, N. Y., had been handling account. Appointment is effective Jan. 1, 1957.

Purex Corp. Ltd., South Gate, Calif., new owner of Manhattan Soap Co., N. Y., announces severance with Scheideler & Beck, N. Y. Weiss & Geller Inc., Chicago, now handling Purex Dutch Cleanser account, named to handle Manhattan products. (Sweethart toilet soap, Blu-white dry bluing, and Protek deodorant soap). Other Purex products retained by Foote, Cone & Belding, L. A.

A&A PEOPLE

Stuart D. Watson, director of advertising and merchandising, S. C. Johnson Co., Racine, Wis., to McCann-Erickson, N. Y., as vice president and senior marketing executive.

H. Schuyler Cole, manager of toilet goods division, and Mark Upson, manager of food products division, Procter & Gamble Co., Cincinnati, elected vice presidents in charge of respective divisions. Named to fill vacancy of vice president of overseas operations, created by elevation in 1954 of Walter L. Lingle to executive vice president of P&G, was Donald H. Robinson, director of overseas production.

Stephens Dietz, vice president and account supervisor, Kenyon & Eckhardt Inc., N. Y., appointed chairman of agency's marketing plans committee.

Wayne Pennington, account executive, Selvage & Lee, N. Y., to Edward Gottlieb & Assoc., N. Y., in same capacity.

Herbert Martin, former vice president and sales manager, WAPI Birmingham, Ala., to J. Howard Allison & Co., Atlanta, Ga., as account executive. He will work out of Birmingham office.

NTA-FOX DEAL REPORTED AT $5,850,000

Feature film understood to be slated for use on NTA Film Network, beginning operations today, with about half going into regular distribution.

NATIONAL TELEFILM ASSOC. reportedly has signed a $5,850,000 contract with 20th Century-Fox for television rights to 78 feature films as its subsidiary, NTA Film Network, prepared to launch operations today (Monday) to 110 affiliated TV stations [BWT, Sept. 17].

Up to late Thursday, no sponsor had been signed for the initial network film programming—a one and one-half hour spot in late evening time on Friday, Saturday and Sunday—but a spokesman said that the lack of available "topflight" feature film product had stood in the way of several sponsor transactions.

Before going into the closing stages of discussions with 20th Century-Fox, NTA obtained its first several weeks of network programming, acquiring the negatives to four Leo McCarey feature films and partial rights to two other McCarey films.

Signal Productions Formed For TV Filmed Commercials

SIGNAL Productions Inc., New York, has been formed as a company specializing in the production of television film commercials by its principals, George Tompkins, Richard Donner and Charles Green. Executive offices have been established at 5 E. 51st St., New York, N. Y.

Mr. Tompkins, who will serve as president of Signal, has been a production supervisor at Lennen & Newell, New York, for the past five-and-a-half years, and previously was television director of McCann-Erickson, New York. Mr. Donner, vice-president-secretary of the new company, served most recently as vice president in charge of production for George Blake Enterprises, New York. Mr. Green, vice president-treasurer, formerly was executive producer of George Blake Enterprises and at one time was head of the radio-television production department of Doyle Dane Bernbach, New York.

"Millionaire" Set for Re-runs

MCA-TV Film Syndication is offering 39 hours of "If You Had a Million" for local and regional sales, starting this month. The series consists of re-runs of earlier presentations of The Millionaire, which continues on CBS-TV (Wed., 9-9:30 p.m. EDT).

Telecine Film Adds Five

ADDITION of five new staff members at Telecine Film Studios Inc., Park Ridge, Ill., has been reported by Byron L. Friend, president. The new additions are Bryan Wright, formerly with John Ott Pictures, Winnetka, Ill., and earlier with CBS and NBC, as production supervisor; Jack L. Richards, Coronet Films, chief cameraman; Stan Vrba, independent producer, as unit manager; and Judy Buche and Gwen Pommer, trainees added to editing department.

Raycroft Heads Wilding Tv

RUSS RAYCROFT, recently vice president of Roland Reed Productions Inc., last week was named head of the new television division of Wilding Pictures Corp., which will produce tv film commercials. Mr. Raycroft will make his headquarters in New York.

The new tv division will utilize Wilding's production facilities in New York, Chicago, Detroit, and Hollywood.

Screen Gems Ups Marquis

PIERRE MARQUEIS, who joined Screen Gems Inc.'s sales staff in January this year, has been appointed director of sales planning. He will supervise market and media studies, audience measurement, and other sales services to stations and advertisers. Screen Gems also named Frank Price, assistant story editor, to succeed story editor Margaret Wilder, who has resigned. Miss Wilder will announce her future plans shortly.

broadcasting • Telecasting
Unlike this gentleman, we consider it foolhardy to plunge into anything without first having all the facts in hand.

When we make sales calls, intelligent advance preparation stands behind them. It's a ruling premise of successful representation for successful television stations.

Knowledge of advertisers' problems and station background is not only important, but necessary to the salesman eager for and interested in getting the most for the stations he represents.

All this — plus hard work and conscientious effort for a limited group of stations — add up to an outstanding calibre of performance. What it means in profitable results is, we think, worthy of examination by others.
REGIONAL MEETINGS HEAR SENTIMENT FOR UPSETTING CUT IN RADIO BOARD

Debates at all sessions scheduled to discuss matter before referendum at 1957 convention. Eastern seaboard unit convened in Washington last week. Coming this week: Boston Monday and Tuesday, Indianapolis Thursday and Friday.

REMOVAL of the eight at-large directors to NARTB’s Radio Board, ordered by a membership vote last winter, has developed as one of the main topics of interest during the autumn series of regional meetings.

Judging by sentiment voiced at the first five meetings, the by-laws change that will reduce the Radio Board from 29 to 21 members at next spring’s Chicago convention is not popular with a substantial part of the membership. The two at-large board members for large, medium, small and FM station groups, eight in all, go off the board at the time of the 1957 convention.

At the NARTB Eastern Seaboard regional meeting held Thursday-Friday in Washington, the at-large director plan was debated to give members a full review of the problem. This is being done at all regional meetings. A new referendum vote will be held after the regional meeting series is over. The vote will decide whether members want to change their minds about removing at-large directors.

Back of the debate is the association’s desire to meet criticism by members who charged that last winter’sballoting procedure didn’t give an adequate explanation of the problems involved. The members voted 533-406 to remove at-large directors from the board [B&T, March 5], considered a close vote for this type of referendum.

Washington delegates heard the subject debated by J. Frank Jarman, WDNC Durham, N. C., for restoration of at-large directors; and Herbert L. Krueger, WTAG Worcester, Mass., for the negative. Both are Radio Board members. Mr. Jarman being an at-large director for medium stations and Mr. Krueger the New England district director as well as vice chairman of the Radio Board.

The approaching referendum on the directorships was ordered by the board last June after more than 5% of the members (140) signed a petition calling for a new vote.

Mr. Jarman explained how he keeps medium stations informed on association affairs. He said the Radio Board should be kept at 29 to maintain a proper balance with the TV Board because of the much larger number of radio members. He felt the industry segments were entitled to board representation.

Mr. Krueger, speaking on the negative, said a special committee that studied the question felt that the board should be reduced in size while opposing redistricting or elimination of network directors. The committee felt all facets of the industry were represented by the radio district directors, adding that many broadcasters do not know their at-large directors.

This Week’s Schedule

Two regional meetings are scheduled this week—Boston today (Monday) and tomorrow, for New England, New York and New Jersey; Indianapolis Thursday and Friday (Wis., Ill., Ind., Mich., Ohio, Ky.)

Last Thursday’s meeting in Washington opened with the regular session on station administration. John F. Meagher, radio vice president, presided. All facets of station operation were reviewed, with broadcasters joining a round-robin discussion.

At the luncheon President Harold E. Fellows reviewed the association’s public relations problems. Donald H. Martin, his newly appointed public relations assistant [B&T, Oct. 8], made his industry debut. He is scheduled to attend the three remaining regional meetings, the final one being scheduled Oct. 25-26 at Birmingham.

Gene Accas, operations director of Television Bureau of Advertising, reviewed TVB plans for 1957 including a project matching TV against other media and the relationship between markets and media. He reviewed the Chicago Pulse study showing the average home spends 371 minutes a day looking at TV compared to 108 for newspapers and a Detroit auto dealer traffic study disclosing that 64% of persons going to auto salesrooms were impelled by TV.

TVB plans a new study of 30 to 50 products, showing what kind of people buy each of the products and relating product use to TV viewing. Howard Abrams, TVb retail

Page 60, October 15, 1956
Chicago, Chicago,
That Meat-Packin' Town—Number One in the World!

...AND ARMOUR & COMPANY SELLS MEAT IN CHICAGO WITH WMAQ's GEORGE STONE

No mean packer himself, George Stone crams a tremendous amount of selling for Armour & Company into his Monday-through-Friday 4:30 pm newscasts. For years an established radio favorite with Chicago's listening millions. George knows how to transform high audience-ratings into mounting sales figures for his sponsors. And he's ready to do that kind of a job for you, too . . . for as little as 21¢-per-thousand listeners.

Follow the leaders like Armour who really know this market. Put this dynamic salesman to work for you on his own "George Stone Record Show" (Monday-Friday, 4:35-4:45 pm) or on "George Stone and the News" (Monday-Friday, 5:45-6:00 pm). Get complete details from NBC Spot Sales. In New York, call your NBC Spot Sales representative for an immediate Radio-Phonic Spot Buying telephone audition of George Stone.

WMAQ Radio leadership station in Chicago sold by NBC SPOT SALES
sales director, described the Rochester department store tv plan in which tv was used exclusively, with more sales produced by tv than by newspapers for the same money spent. He said Sears, Roebuck and Montgomery Ward are now making tv commercials available to their stores.

FCC Comr. Robert E. Lee, speaker at the Thursday banquet, advocated relief for broadcasters from Sec. 315, the equal-time part of the Communications Act (see story, page 88).

At radio sessions Thursday afternoon A. G. Ferrie, WMN Fairmont, W. Va., led a small-market roundtable, and John B. Tansey, WRVA Richmond, Va., led a large-market roundtable. Thad H. Brown Jr., NARTB tv vice president, presided at the afternoon tv session.

George H. Clinton, WPAR Parkersburg, W. Va., Dist. 3 board member, was host director; James H. Moore, WLS-AM-TV Rohnoke, Va., Dist. 4 director, presided at the Thursday tv session. The Friday program included a tv program with David J. Bennett, Triangle Stations, Philadelphia, speaking on tv management sales problems. An open discussion followed. Mr. Brown reviewed Washington problems and Charles H. Tower, NARTB employee-employer relations manager, discussed small-market tv. Vincent T. Wasilewski, NARTB government relations manager, described the association's internal operations.

NARTB's tv code monitoring activity is increasing, G. Richard Shafto, WIS-TV Columbia, S. C., tv Code Review Board Chairman, said at the Thursday afternoon tv meeting. He and Edward H. Bronson, tv code affairs director, reviewed progress of the code program.

Mr. Shafto discussed the agreement that is to bring the Alliance of Television Film Producers into the code structure as affiliate subscribers. Basic agreement on the plan was reached at a recent west coast meeting, but minor changes in wording were suggested by the NARTB code board at its Oct. 3-4 meeting in Irvington, Va. The film pact will bring a majority segment of the tv film industry into the code setup.

Staff monitoring reports covering 64 stations were reviewed at Irvington, Mr. Shafto said, with follow-up procedure directed in a few cases. All but a few of the stations found in violation of the code have taken steps to correct their program and commercial material, with more than 90% of stations found to be operating consistently within the code recommendations.

While networks have been operating at a high commercial and programming level, he noted, two well-known nationwide programs have been found ignoring code time allowances.

Mr. Krueger will be host director at Boston today, W. C. Swartley, WBAZ-AM-TV Boston will debate the affirmative side of the proposal to reinstate at-large radio directors with Mr. Clinton handling the negative. The debate follows Mr. Fellows' luncheon speech. In the afternoon A. E. Spokes, WEAV Plattsburgh, N. Y., will preside at the small-market radio roundtable. Walter Johnson, WTIC Hartford, Conn., will handle the large-market discussion. President Fellows, instead of a tv Code Review Board member, will talk on the code along with Edward H. Bronson, code affairs director.

Oliver Treyz, president of Television Bureau of Advertising, will give the filmed tv sales demonstration shown previously at the Minneapolis regional meeting. FCC Comr. Richard A. Mack will speak at tonight's banquet. Sherwood J. Tarlow, WHIL Medford, Mass., is chairman of the resolutions committee. Mr. Swartley and James T. Allen, also of WBZ-TV, will lead the panel on tv management's sales problems.

Edward F. Baughn, WPAG Ann Arbor, Mich., will be host director when the mid-west region meets Thursday at Indianapolis. The at-large directionship debate will be handled by William Holm, WLPO LaSalle, Ill., a Radio Board member, for the affirmative, and F. Ernest Lackey, WHOP Hopkinsville, Ky., an at-large radio director, for the negative. Robert T. Mason, WMRN Marion, Ohio, a board member, will preside at the Thursday luncheon.

John F. Wismer, WHLS Port Huron, Mich., will direct the small-market panel. Robert J. McIntosh, WWJ Detroit, will moderate the large-market panel. Norman Cash, WTVB vice president, and Mr. Abrahams will give the tv sales demonstration. Richard A. Borel, BWNS-TV Columbus, will discuss the tv code, along with Mr. Bronson. FCC Comr. Robert T. Bartley will be the speaker at the Thursday banquet.

Robert Lemon, WTVT (TV) Bloomington, Ill., will conduct the tv management sales panel Friday morning. Robert B. McConnell, WISH Indianapolis, is chairman of the resolutions committee.

Wisconsin Broadcasters
Back License Extension

WISCONSIN Broadcasters Assn. has placed its support behind FCC Chairman George C. McConnaughey's license-extension proposal by adopting a resolution that broadcast licenses be granted for not less than a five-year term [B&T, Sept. 17].

Adoption of the resolution was one of the highlights of WBA's annual meeting at the Plankinton Hotel in Milwaukee. Featured speakers were Charles T. Tower, manager of NARTB's Employer-Employee Relations Dept., and Ray Hamilton, Blackburn Hamilton, station brokers.

Hugh Bolicher, WTMJ-TV Milwaukee, was elected new WBA president, succeeding Ber F. Hovel, WKOW-AM-TV Madison. Slats also includes Paul Skinner, WHBL Sheboygan, vice president; Carl V. Kolata, WTTW Watertown, secretary; Bruce Wallace WTMJ-AM-TV Milwaukee, director (re placing Mr. Boice), and Mig Figi, WAUWaukesha, re-elected treasurer. Edwin Con rad, an attorney, was retained as executive secretary.

WBA also adopted resolutions favoring exemption of radio stations from liability in political broadcasts; amendment to the Tall Tower Structure Law (which requires approval of the State Civil Aeronautics Commission on tall towers) to exempt station which secure approval by FCC and the National Civil Aeronautics Administration and continued efforts for passage of day light saving time in Wisconsin.

In supporting FCC Chairman McConnaughey's sentiment for five-year broadcast licenses, WBA said it would help relieve the Commission of a workload on renewal three-year renewals and "would be more equitable in view of the risk which is now used by the broadcaster in placing his station on the air."

COLOR TV, VIDEO TAPE, ELECTRONICAM STAR ON AGENDA AT SMPTE CONVENTION

Motion picture-television engineers award Progress Medal to Dr. Alfred Goldsmith; Sarnoff Medal goes posthumously to NBC-TV's Robert Shelby. Barton Kreuzer elected new president.

TECHNICAL ADVANCES in the fields of television film production and engineering highlighted a substantial portion of the 80th semiannual convention of the Society of Motion Picture & Television Engineers last week in Los Angeles.

Color tv, the Ampex video tape recorder and DuMont's Electronicam film system were among topics holding the attention of some 1,500 delegates to the full-week meeting.

SMPTE's top award, the Progress Medal, was given New York consulting engineer Dr. Alfred N. Goldsmith at the Tuesday night session. He was honored for his many engineering contributions to both the tv and motion picture field and particularly for his early recognition of the importance of a tricolor kinescope for color tv.

The David Sarnoff Gold Medal was awarded posthumously to Robert E. Shelby, former vice president and chief engineer of NBC-TV, for his technical contributions to the art. The medal was accepted by Mrs. Shelby.

Barton Kreuzer, director of product planning, RCA, Camden, N. J., was elected president of SMPTE for 1957-58 succeeding John G. Frayne, engineering manager, Westrex Corp., Hollywood. Mr. Kreuzer has been with RCA since 1928.

Other SMPTE officers elected for two-year terms included: executive vice president, Norwood L. Simmons, chief engineer, west coast division of Eastman-Kodak; editorial vice president, Glenn E. Matthews, research, Eastman-Kodak, Rochester; convention vice president, G. Carlston, president of General Film Labs, Hollywood; secretary, Wilton R. Holm, technical associate, E. I. du Pont de Nemours, Parlin, N. J.

Six new members were elected to the SMPTE board of governors for two year terms beginning Jan. 1, 1957. They are Gerald G. Graham, director of technical operations, National Film Board of Canada, Montreal; Howard A. Chinn, chief audio-video engineer, CBS New York; W. Wallace Lozier, National Carbon Co., Cleveland; James L. Wassell, coordinator, professional equipment division, Bell & Howell, Chicago; UB Iwers, head of the special effects department, Walt Disney Productions, Sherman Oaks, Calif., and Edwin W. Templin, electronic design supervisor, Westrex Corp., Hollywood.

Among the 16 engineers awarded fellowships in SMPTE were Willy Borberg, General Precision Labs; Edward P. Genoek, manager of television programming, Eastman-Kodak; Herman M. Gurin, NBC-TV; Warren R. Isom, RCA Victor; Frank L. Marx, vice president in charge of engineering, NBC, and Michael Rettinger, RCA.

Savings of approximately 58% on film costs have been realized by using lenticular film instead of color negative for color television recording, delegates to the convention were told Monday evening by R. D. Dell of RCA, Princeton, N. J. Addressing a session on color television at the NBC-TV color studios in Burbank, Mr. Kell cited the factors which led to the selection of lenticular film for time zone delay of color tv programs [BWT Sept. 17].

In his paper, prepared in collaboration with E. Dudley Goodale, NBC, New York, and John Brumbaugh, RCA, Camden, Mr. Kell stated that lenticular film meets the requirements made necessary by the expanded tv programming in color and is capable of quality comparable to black-and-white kine recording. Processing time allows some safety factor in the three-hour delay between recording, playback costs are reasonable and 16 mm color prints can be made from it, he said. The embossed film itself costs less than color negative and the processing cost is approximately one half, Mr. Kell said.

At the same session, R. G. Neuhauser, RCA, Lancaster, Pa., discussed tube requirements for color tv and outlined performance characteristics of vidicon and image orthicon tubes now in use compared with required characteristics. He evaluated various operating devices used to improve performance. John Kennedy, NBC-TV Hollywood, presented a description of the network's Burbank facilities.

A new method for identifying tv release prints has been developed at Consolidated Film Industries, Hollywood, according to Sidney P. Solow, company vice president and general manager. Addressing the Tuesday morning technical session, Mr. Solow reported a white opaque head leader in use by CFI automatically carries information which heretofore had to be inserted by hand. It will aid tv stations, he said.

The new technique involves only one manual operation: initial inscribing on the negative of the title, code number, name of producer or production company, air date, etc. This information is then "printed through" onto the release print where it appears in bold black type against a clear background. The transparent leader is then converted to white opaque leader by the application of white cellophane tape to the underside of the film prior to shipment.

Whereas conventional systems utilized hand labeling of each head leader and possible shipment of mislabeled prints, the new leader guarantees elimination of this problem once the negative has been correctly inscribed. Other benefits of this technique, according to Mr. Solow, are strengthening of the film by tape reinforcement, greater legibility of inscribed information and elimination of the usual splice—since the head leader is now an integral part of the film itself.

On Tuesday also, a new method of splicing films with a dielectric heating device to assure stronger and more reliable splicing was described by Du Pont technicians R. W. Upson, Emery Meschter and W. R. Holm.

The theatrical motion picture industry would do well to emulate techniques developed by tv producers, delegates were told by Karl Freund, president of Photo Research Corp. and former CBS-TV Love Lucy camera director.

Major source of studio trouble lies in large expenditure for excessive shooting schedules, he said, yet tv film producers achieve greatest savings in this very field by properly utilizing the day for tv. Savings, according to Mr. Freund, result from eliminating non-essential retakes permitting the director to make on-the-spot decisions affecting every aspect of production and policing of cast and crew to insur promptness and to "speed up" shooting schedules.

Ralph B. Ausrain, western manager o Allen B. DuMont Labs, and John S. Auld manager of operations, Electronicam division, was hosts to delegates Thursday morning at Paramount-Sunset studio, Hollywood for demonstration of the DuMont electronic film system being introduced to west coast feature film and tv producers [BWT Oct 8].

Arthur E. Holch, NBC-TV news, New York, told a Thursday afternoon session how the network's experiences in providing same day news coverage with color film for color tv presentation. Such coverage was blocke prior to December 1955 because of slow processing and slow film sensitivity, he recalled, but now fast Anscochrome film since then has permitted rapid coverage.

Experimental development by RCA of radically new type of picture screen that makes possible the viewing of television an
The Timebuyer asks...

DOES KTRK-TV OPERATE AT FULL POWER?

A GOOD QUESTION

that every smart timebuyer must know about every station he buys. Power, height of tower, lack of interference, and general data on terrain make up the coverage story...the basic story of every buy.

TED BATES & COMPANY, Inc. timebuyer, Bill Kennedy, and Edward Kenefick, George P. Hollingbery Co. man, national representatives for KTRK-TV, discuss channel 13 coverage in the Gulf Coast market.

KTRK-TV OPERATES AT FULL POWER,
316,000 watts, from the most rugged tower and antenna ever built for television, and at a height of 1,049 feet above sea level. A permanent, steel-frame, concrete building houses transmitter equipment, complete facilities, sets, and studio space for extended temporary emergency operation, and the transmitter supervisor and his family.

Located just the proper distance from metropolitan Houston, channel 13’s transmitter insures a non-saturated city signal and clear, powerful, reliable picture farther to the outer fringes of the Gulf Coast area.

Complete lack of freedom from overlapping channel interference...Diesel-driven auxiliary power supply...continual dual-Microwave signal—these features assure the viewer a quality picture and advertisers the fullest market coverage. Add the KTRK-TV plusses—exceptional local programming and ABC’s big, BIG plans—and you have the permanent, lasting factors that have made KTRK-TV the best television buy in Houston!

Lima Bean Radio

ALTHOUGH he told newsmen he is too busy on about 30 other important projects to commercially exploit his tiny “throw-away” transistor radio development, Hughes Aircraft consulting engineer Glenn A. Schmidt said he has made a three-quarter-inch self-powered delta shaped radio capable of tuning five stations and which fits in the ear. He has patented “and capulated” three ordinary transistors to make it, he said.

He has planned an even smaller model the size of a “small lima bean” which slips in the ear. It would contain its own battery, be pre-set to a specific station with container color identifying which station would play continuously for a year and be discarded when worn out. Why not now? No automatic manufacturing process is available, he said, and a worker cannot hold his hand steady enough to assemble the parts. Mr. Schmidt used a 100-power microscope on his delta model.

motion pictures in artificially or naturally lighted room, theatres and auditoriums was disclosed Thursday by Dr. George L. Beer, RCA engineering executive who developed the screen.

“This experimental RCA screen,” he told the engineers, “makes possible increase of up to 20-to-1 in picture contrast under adverse ambient light conditions and has produced, in tests, startling results in the reproduction of both television and motion pictures.”

Although RCA has not yet established any commercial plans for the experimental screen, Dr. Beer said that numerous tests conducted in various locations under a variety of light conditions indicate the screen has potential for presentation of tv and motion pictures in lighted schoolrooms, homes, showrooms and theatres and for special applications such as observation of airborne and ground-based radar-scopes.

The RCA development, known as a directional viewing device, is similar in structure to a homemade network of tiny, interconnecting cells. The device is fabricated with aluminum foil, .001-inch thin, and cell width, length, and depth can be varied to produce a range of viewing angles.

For the motion picture use, Dr. Beers explained, the directional viewing device can be mounted directly in front of the theatre or home-motion screen, or can be fabricated complete with a backing screen. For television use, with both direct-view and projection-type tv receivers, the device would be positioned directly in front of the receiver.

Joseph A. Tanney and Alan M. Macauley, SOS Cinema Supply Co., New York, told about their compact hot press title machine for producing three-dimensional and other effects for tv commercials. They also described a new small animation stand for achieving multiple optical effects.

The Ampex video tape recording system held convention attention at the Thursday evening session. Comprehesive description of the machine was presented by Ampex Corp. engineers Charles P. Ginsburg, Charles Anderson and Ray M. Dolby.

Growing field of transistors and their application to all phases of electronics headlined Friday meetings. State of transistors in audio and video equipment in tv was outlined by H. J. Woll, RCA, Camden, while their use in a portable audio mixer was cited by Kramberg, RCA Hollywood. William V. Stancil, Stancil-Hoffman Corp., Hollywood, related their advantages in magnetic recording and microphone preamplifiers.

NARTB Names Members Of 4 Standing Committees

MEMBERS of four NARTB standing committees for the 1956-75 term were announced last week by President Harold E. Fellows. They follow:

Employer-Employee Relations Committee: Leslie C. Johnson, WHBF Rock Island, Ill.; chairman; Joseph J. Bernard, WGR-TV Buffalo; Richard Brown, KPOJ Portland, Ore.; Herbert Evans, Peoples Broadcasting Corp., Columbus; Robert B. Jones Jr., WFBF Baltimore; Ben Ludy, WIBW-TV Topeka, Kan.; Herbert Ohr, KGLO-TV Mason City, Iowa; Calvin J. Smith, KFAC Los Angeles; Harold C. Stuart, KVOO Tulsa. Network representatives: George Katz, Pitts, CBS; B. Lowell Jacobsen, NBC; William Regan, MBS; Mortimer Weinbach, ABC.

Radio Standards of Practice Committee:

Worth Kramer, WJR, Detroit, chairman; Carleton Brown, WTVL Waterville, Me.; Ralph Evans, WOC Davenport, Iowa; Paul R. Fry KBON Omaha; Cliff Gill, KBIG Hollywood; James L. Howe, WIRA Fort Pierre, Fla.; William B. McGrath, WHDH Boston; Cecill Woodland, WEJL Scranton, Pa.

AM Radio Committee: Groover C. Cob, KVGB Great Bend, Kan., chairman; George Cory, KUBC Montrose, Colo.; Benedict Gimbel Jr., WIP Philadelphia; Cecill Hoskins, WWNC Asheville, N. C.; Richard H. Mason, WPFT Raleigh, N. C.; John Patt, WJR Detroit; Todd Storz, KOWH Omaha; W. H. Summersville, WWL New Orleans; C. L. Thomaz, KING St. Louis; Merle H. Tucker, KGAK Gallup, N. M.; Owen F. Uridge, WCKR Miami; Jack Younts, WBBB Southern Pines, N. C. Network representatives: Charles R. Denny, NBC; Don Durgin, ABC; Arthur Hull Hayes, CBS; John B. Poor, MBS.

RAB HEAD DEFENDS ADVERTISER VISITS

Sweeney answers agency criticism citing “growing” number of stations discussing abolition of local agency commission.

A “MILITANT and growing group” of radio stations around the country is “discussing the abolition of agency commission on retail business in their communities” because many agencies either fight radio or use it so badly that stations themselves have to “save” the campaign, RAB President Kevin B. Sweeney declared last week.

He made the assertion in a letter explaining to a San Francisco agency why RAB makes sales presentations direct to advertisers as well as to agencies. James C. Knollin, of Knollin Adv., had complained that in a recent visit to San Francisco RAB executives called upon advertisers direct. In his reply, Mr. Sweeney made clear that his comments did not apply to the Knollin organization, which he said was described by RAB members in San Francisco as being “both fair and competent.” But he asserted:

“There is quite a lot of unhappiness in radio with the practices of some agencies. For instance there is a militant and growing group of stations that is discussing the abolition of agency commission on retail business in their communities.

“The basis on which this decision is being weighed is—if I may quote fairly accurately what the stations said—I, the stations won’t recommend radio. When we take the deal directly to their client, they fight it. When we get a contract they don’t know how to use radio properly and lose it up. We have to step in and save it with the new copy, think up the merchandising ideas, write a jingle, etc. And for this we pay them 15%.”

Mr. Sweeney said that “while none of these criticisms may apply to many agencies, they should be a matter of concern to the entire agency community. Our industry, more than any other, has evidenced that friendly cooperation with agencies that you recommend. We ask no special consideration from agencies as a result. All we want is the right to an open-minded hearing, recommendations that treat us fairly even though radio may not be as fashionable as some other media, and competence at least equal to that shown in print media advertising in the development of radio campaigns.”

The RAB president said that “I have never

encountered in our diverse membership any-one who is opposed to the continuation of the agency system in its present framework," and that "all are apparently satisfied that the present compensation system does most of the things that the 4-A claims for it." But, he added, "satisfaction with a system and satisfaction with some agency practices are not synonymous."

Mr. Sweeney said RAB scheduled San Francisco presentations directly with advertisers for "the same three reasons" that RAB's national sales staff calls on advertisers direct as well as on agencies:

1. Because we have found advertisers avidly interested in listening to presentations which talk comprehensively about their marketing problems in relation to an advertising medium; e.g., the presentations made to your clients discussed savings and loan association marketing problems extensively.

2. Because we wished to ensure what we said reached the advertiser complete and unalloyed.

3. Because, presumably, most agencies have been kept informed by our member stations, networks and station representatives of the material we presented; more would be accomplished by exposing the advertiser who is generally less knowledgeable about media trends."

He continued:

"These are the reasons we call direct and not to circumvent agency analysis, which you seem to feel is the only reason any medium would call on an advertiser direct.

Notional Policy

"At the national level, our policy is and will continue to be to call direct on advertisers only after the agency has either heard the story or declined to hear it. In our regional selling we will call on agencies whenever possible but will put our emphasis on direct because of time limitations. We urge our members—those that need urging—to adopt the policy of calling on advertisers as well as agencies because unfortunately the experienced, unbiased agency examination you refer to is not as widespread as you feel it is."

"Several of the largest agencies in the nation, it is a complete waste of time to make a radio presentation—they will scarcely listen, much less recommend radio to a client. In one of the very largest it has been impossible for several years to assemble a group of decision-making executives to hear a radio presentation by any group. I am sure you must agree in these cases there is a very cogent reason for 'by-passing of agencies involved.' And by doing so, radio does get business from these agencies' clients who are not as unsympathetic to radio as they are depicted by the agency. . . ."

With regard to RAB's San Francisco presentations he said that "we strove to present radio's story to a cross-section of advertisers, and agencies" and that "actually eight of 13 agencies we asked for presentation time were able to grant our request." He also said that "incidentally, we find it quite often more difficult to see an agency account man than the president of the advertiser.'"

ADLER FIRM SHOWS ITS TV TRANSLATOR

Full-scale test of new service authorized by FCC takes place at Quincy, Wash., side-by-side with reflector system.

A full-scale demonstration of the new tv translator service—authorized by the FCC last summer to permit small, inaccessible communities to receive major city video—took place last week in the 3,500-population community of Quincy, Wash.

The demonstration was arranged by Adler Electronics Inc., New Rochelle, N. Y., and consisted of a side-by-side comparison of the reception of Spokane, Wash., ch. 4 signals (KXLY-TV) from a reflector and an Adler translator.

The reflector system picked up and retransmitted on the same channel the Spokane ch. 4 signals. The picture 6.5 to 18 miles away from the reflector site was reported to be snowy and easily jittered by man-made and natural interference.

The translator, radiating 200 w on ch. 78, delivered a three millivolt signal 6.5 miles away from its site and a 1.8 millivolt field strength 18 miles away, according to Ben Adler, president of the firm bearing his name. Local interference had no impact on the picture, he reported.

Second Test

The test was the second of its kind in the northwest. Mr. Adler has been running an experimental translator transmitter at Manson, Wash., for the past few months. Reflectors are considered unlawful by the FCC because no licenses have been requested or granted. The Commission, after hearing pleas for some sort of service to permit mountain-bound areas to secure tv signals from distant tv stations, established the translator service to answer the need. Translators pick up tv signals, amplify them, and translate them to one of the 14 upper uhf channels, after which they are broadcast.

Out of Quincy's 1,000-odd tv receivers, about 30 had been converted to receive the uhf signals, Mr. Adler said. He also declared that 10-ft. corner reflectors were sufficient to pick up the translator signals, whereas, 40 to 100 ft. towers were needed to pick up the reflector signals.

Among those attending the demonstrations, which took place Thursday and Friday, were James E. Barr, assistant chief, FCC Broadcast Bureau; Rep. Don Magnuson (R-Wash.), area tv and radio station engineers and reflector operators.

Mr. Adler said he had commitments for more than 100 translator units. He said translators were already operating in Hawthorne, Nev.; Kingman, Ariz., and Bishop, Calif. Each translator sells for $2,750, with a package of three units to service three channels for Quincy coming to about $18,000 including accessories, building and land.

The Quincy reflector operation is under an FCC order to shut down. Its appeal is pending a U. S. Court of Appeals decision in Washington, D. C.

**STATIONS**

**WBUF OPENS TV CENTER; UHF SET INCREASE CITED**

$1.5 million Buffalo project formally dedicated last week.

Nine-month campaign in the community on behalf of uhf keeps local dealers busy.

NBC's plans to develop a flourishing uhf operation at its WBUF (TV) Buffalo (ch. 17) reached a peak last week when the station formally dedicated its new $1.5 million television center. At the same time it was revealed that nine months of uhf promotion in Buffalo has resulted in a 73,000 increase in uhf sets there.

Called "Project 17" (after the station's channel number), a vigorous promotional effort began early this year when the station undertook to stimulate interest in WBUF with presentations to civic clubs, fraternal organizations and business groups in the Buffalo area. As time went on, each new development at WBUF—such as the new $1.5 million studio building, its high tower and increased wattage (500 kw)—was publicized by on-the-air promotion, newspaper advertising and point-of-sale dealer displays.

The nine-month period from Jan. 1 to Oct. 1 of this year, WBUF officials said, the number of sets in the Buffalo metropolitan area able to receive the uhf signal rose from 105,000 (31%) to 178,100 (52.9%). The latter figure was based on research conducted by the American Research Bureau.

**Demand Exceeds Supply**

During the past few weeks, Buffalo distributors and dealers reported they have not been able to stock enough converters to keep pace with demand and that the sales of uhf receivers have zoomed. A survey of major distributors of electronic equipment in Buffalo showed that Radio Equipment Corp. had sold 10,000 converters in the last two months, about half of these in the last two weeks; Genesee Radio & Parts & Co. had sold 2,500 converters, two-thirds of them in the last two weeks, and that RCA Service Co. had sold 50% more converters and antennas in September than in August.

Two days of ceremonies last week were designed to impress a group of industry executives and newsmen invited to the city, as well as viewers in the outlet's coverage area, with the station's readiness to take its place in the market in a strong competitive position. In talks and demonstrations, NBC and station officials stressed that WBUF is fortified with these "plusses": strong technical facilities, including 500 kw power and extensive studio set-up; "powerhouse" programming, provided by extensive community coverage and NBC affiliation, including live color programs; the substantial number of homes equipped to receive the uhf signal, placed at 178,100 (52.9% of all tv homes) as of Oct. 1.

The station was dedicated formally Thursday on NBC-TV's Today (Mon.-Fri., 7-9 a.m. EDT) by Charles R. Denny, NBC's executive vice president in charge of opera-

APPOINTMENT of Paul F. DeChant as manager of WMIL Milwaukee, succeeding Neil Searles, has been announced along with station's plans for occupancy of new offices and studios now under construction. Mr. Searles resigned to become vice president, director and general manager of WFOX Milwaukee.

Mr. DeChant has been affiliated with WOKY Milwaukee, and formerly was in the sales department of the Milwaukee Catholic Herald Citizen.

WMIL will remotely control its broadcasting operation when it moves into new quarters at 2625 W. Wisconsin Ave., said Gene Posner, president of the 1 kw-daytime independent.

McClenahan Forms Rep Firm

ESTABLISHMENT of W. E. McClenahan Co. as a station representative firm designed to represent area and regional radio-TV outlets in Milwaukee, Madison and surrounding Wisconsin areas has been announced by W. E. McClenahan, former station executive. Offices will be located at 5415 N. Berkeley Ave., Milwaukee. Mr. McClenahan formerly was assistant sales manager of WITI-TV Whitewater Bay (Milwaukee), commercial manager of KCRR Cedar Rapids, Iowa, and area sales manager for Pabst Brewing Co.

WNOW-TV to Resume

WNOW-TV York, Pa., ch. 49, which went off the air Sept. 30 because of "uhf troubles," a fortnight ago told the FCC that it intended to resume operation last Friday. The station said that it has received many local comments since going "dark" and that while the immediate outlook remains "unpromising," the station will continue with the hope that conditions will improve.

Representing phase one of the three-phase construction program of WBUF (TV) Buffalo, this structure at 2077 Elmwood Ave. was dedicated last week.

WRCV-AM-TV Philadelphia Makes Sales Appointments

FIVE appointments in the sales departments of WRCV and WRCV-TV Philadelphia were announced last week by Lloyd E. Yoder, NBC vice president and stations' general manager.

Ted Walworth, former WRCV-TV sales manager, moves to the newly-created post of WRCV-TV sales director. He has been with NBC since 1952 and previously was with Edward Petry Co. and ABC.

Chet Messervey, WRCV time salesman, becomes WRCV-TV local sales manager, a new position. In broadcasting sales for the past 12 years, he has been associated with Westinghouse Broadcasting Co. and WHPE High Point, N. C.

Harold W. Waddell, WRCV sales manager, moves to the new position of WRCV sales director. A veteran of 28 years in radio, his earlier associations include WGAR and WJW Cleveland and WHBC Canton, Ohio.

William S. Dallmann, WRCV merchandising manager, becomes local sales manager. Mr. Dallmann's former associations include WLW-WLWT (TV) Cincinnati, the former WTAM-WNKB (TV) Cleveland and radio-tv director for Mueller, Liebling & Parkins, Cincinnati.

Mary C. Doyle, former director for NBC Philadelphia's Feature Foods Inc., fills the merchandising manager position.

CBS Ups Hughes, Christeon

APPOINTMENTS of Allen J. Hughes as sales development representative in the New York office of CBS Radio Spot Sales and of Gilbert H. Christeon to a similar post in the Chicago office were announced last week by Ray H. Kremer, manager of sales development for CBS Radio Spot Sales.

Mr. Hughes most recently served CBS Radio Spot Sales in the post which Mr. Christeon has assumed with the station representative firm. Previously, he had been with the network sales departments of NBC and ABC. Mr. Christeon previously was an account executive for Weed & Co. in Chicago and earlier had been on the sales staff of WGN in that city.

KING-TV, KTVR, KTTV Launch M-G-M Package

TWO stations started programming Monday the first of their 725 M-G-M feature pictures acquired from Loew's Inc. on an exclusive, seven-year lease basis, and a third station was to begin Tuesday. Programming details were made final along with promotion, advertising and exploitation plans following a cross-country swing by Monroe Mendelsohn, promotion director of Loew's tv division.

KING-TV Seattle launched its M-G-M feature exposure Monday night at 10:45 with "Night of the Opera," starring the Marx Brothers; KTVR (TV) Denver kicked off its program at 9 p.m. with "Her Highness and the Bellboy," starring Hedy Lamarr, and KTTV (TV) Los Angeles was to begin Friday night at 8 with "Thirty Seconds Over Tokyo" with Spencer Tracy and Van Johnson.

KTTV plans to show its M-G-M product Mon.-Fri., at 10:15 p.m., with a double feature on Friday—at 8 p.m. Colgate is sponsoring a film showing weekly. Eventually, the station may rerun some of the films. KTVR will show two films daily, six days a week, Sun.-Fri. at 3 p.m. and Mon.-Sat. at 9 p.m., while KING-TV will show the films at 10:45, Mon.-Sat.

Sales and promotion side supplied by Loew's include a three-minute trailer on each picture; introductory ad mats, stills and publicity stories; point of purchase display in stores; a special audition print containing clips of all M-G-M features and 20-second billboard that has the Leo the Lion trademark over which audio can be used.

Loew's Inc. acquired 25% interest in both KTTV and KTVR when agreements for leasing of the films were made.

KGEQ-TV Antenna, Tower Collapse, Crash to Ground

AFTER two weeks of planning and labor the 193'-ft., 22-ton antenna of KGEQ-TV Enid, Okla., was within three feet of being taken out of its seat atop its 650'-ft., 100-tor tower and lifted to the ground when both the tower and antenna toppled over, deconstructing an estimated $140,000 in tee

. . . the MEn in the Grey Flannel Sweatshirts

The characters in the KLOR ad on page 75 are definitely not Powers Models.

However, they are basic TV men who know the Portland buying habits from stem to stern.

Clockwise, they are: Bill Plummer, Production Manager; Bill Nutt, Merchandising Manager; Sam Herrick, Program Manager; John Schile, General Manager; Jack Provis, Chief Engineer and Jim Sherard, Promotion Department.
...the MEN in the GREY FLANNEL SWEATSHIRTS

The sales crew that goes to work for you in the billion-dollar Portland market the moment you place a schedule on KLOR Channel 12. A "task force" representing over 100 years (combined) experience in sales, merchandising, radio and television.

Is it any wonder that Portland retailers, brokers and distributors invariably cast their vote in favor of this winning combination.
Who is this top banana?

What is this device?

What instrument does this musician play?

Who is this dragon's team-mate?

Where is this castle?
We'll bet you've already discovered the catch.
You'd have to have seen commercial television to get the right answers. And nobody in 1931 had. Not even a Broadcasting-Telecasting reporter.

These days Broadcasting-Telecasting is packed with headlines and stories and comment about radio and television. We know—because ABC has been a part of those headlines, stories and comments.

And if you'll pardon a direct compliment, we like the way B-T reports the news about ABC. Fast . . . freshly . . . absorbingly.

We'll do our best to keep the news about ABC every bit as fast, fresh and absorbing as B-T's coverage of it. No question at all about that.

KOIN-TV
Channel 6 - Portland, Oregon

Represented Nationally by CBS Television Spot Sales
Here are scenes from some of KPIX’s recent good mixing activities.

Top row, left to right: (1) Director’s view of “Ten Seconds to Live,” part of Channel 5’s continuing study of the Bay Area’s transportation crisis. (2) Sandy and Faye enjoy an authentic luau on “This Morning.” (3) Announcer-director, Phil Lasky and Hal March huddle before March’s emceeing of BIG MOVIE contest award ceremonies. (4) “Decision or Dilemma—The Facts About Rapid Transit,” San Francisco’s first television editorial.

Second Row, left to right: (1) Captain Fortune in a rare serious moment. For five years, the Bay Area’s number one children’s attraction. (2) Stanford University Summer Institute to which KPIX’s staff annually devote over 200 hours of planning and instruction. (3) CBS President, Frank Stanton and Thomas E. Dewey join the regular “Face the Nation” staff after one of the “Nation” telecasts originated by KPIX. (4) Westinghouse’s own Betty Furness at the Cow Palace. (5) “Deputy Dave” with his musical history of conventions, campaigns and Presidents.

Third Row, left to right: (1) Subjects of His Honor the Mayor’s official “I Go Wolo” Day proclamation, were KPIX’s Wolo, puppet-master of the West Coast and his friend, Aloysius. (2) “Everyman’s Religion” remote telecast direct from the flight deck of the aircraft carrier, Essex.

Bottom Row, left to right: We were there... helping CBS-TV produce “audience preferred” convention coverage. (2) Recently, KPIX originated a full week of Arthur Godfrey’s shows. (3) Kirk Douglas as the “Champion.” One of KPIX’s complete new library of great feature films. (4) Louie Jordan’s Band blows up a storm on the “Dei Courtney Showcase,” San Francisco’s top, live variety show.
GOOD MIXERS!

Above all, KPIX believes that truly outstanding television can only be achieved through the efforts of “good mixers.”

“Mixers” who start with the pace-setting entertainment and educational programs of the CBS Television Network, add their own award-winning local, live community service and commercial productions, the cream of the syndicated packages and the finest feature films available.

“Mixers” who add a bright bit of showmanship to everything they do.

“Mixers” who think of their medium as probably the most influential community force and respect and treat it as such.

“Mixers” who know that a sale doesn’t end at the contract signing . . . who know that exciting audience promotion and sound merchandising are the keys to the real pay-off in this, the most powerful selling tool of them all.

In short, “Good Mixers” who personify the bold thinking that guides the Westinghouse Broadcasting Company . . . “mixers” ready and able to help you solve your selling problems.

Call Lou Simon, KPIX Sales Manager, or your nearest Katz representative for availabilities or more information.

In San Francisco, no selling campaign is complete without the WBC station . . .

$21 MILLION IN STATION SALES FILED; FCC APPROVES WHITNEY & CO. PURCHASE

Crowell-Collier details financing plan for its near $16 million purchase from Consolidated. Also filed with Commission is application for $5.3 million WIND sale to Westinghouse.

THE FCC was called upon to approve broadcast station sales totaling more than $21 million last week—and at the same time it okayed a $10 million transaction. Filed with the FCC was the $16 million purchase of Bitner-controlled Consolidated Television & Radio Telecasters Inc. properties in Indianapolis, Grand Rapids, Minneapolis and Flint.

Also submitted for FCC approval was the $5.3 million purchase of WIND Chicago by Westinghouse Broadcasting Co. This includes a construction permit for ch. 20 in that city.

And, by a vote of four to two, the Commission approved the $10 million purchase of Universal Broadcasting outlets in Indianapolis and Fort Wayne by J. H. Whitney & Co.

PRINTING PLANT SALE, JANEWAY STOCK BUY IN C-C FINANCING

THE second largest financial transaction in broadcasting history was laid before the FCC for its approval last week when Crowell-Collier Publishing Co. on Thursday submitted its application for permission to buy the stock of Consolidated Television & Radio Broadcasters Inc. for slightly less than $16 million.

The application was filed five and a half months after the first public announcement was made of the agreement for the giant publishing firm to enter into broadcasting ownership [B&T, April 30].

Company subsidiaries are WFBM-AM-TV Indianapolis, Ind.; WOOD-AM-TV Grand Rapids, Mich.; WTCN-AM-TV Minneapolis, Minn., and WFDF Flint, Mich.

Crowell-Collier publishes Collyer’s and Woman’s Home Companion magazines, Collyer’s Encyclopedia, Harvard Classics, and other books. It has also recently established a radio-television recording production division.

If approved by the FCC, Crowell-Collier will become the third largest non-network station group—exceeded only by Storer Broadcasting Co. and Westinghouse Broadcasting Co.

The largest broadcasting transaction was the $25.5 million merger of ABC with Paramount Theatres Inc. in 1953. This, however, involved a stock transfer.

Delay in filing the application, which caused speculation for a while that the deal had fallen through, was caused by problems in securing financing, it was understood.

In the interim, Crowell-Collier bought 5 kw independent KFWB Los Angeles (on 980 kc) from Harry Maizlish for $2.5 million. Another contemplated purchase, that of KULA-AM-TV Honolulu for $1 million, was cancelled by mutual consent, it was reported.

Crowell-Collier has secured $11 million through (1) sale of its Springfield, Ohio, printing plant to Webb & Knapp for $5 million, and (2) sale of $6 million in preferred stock to a syndicate headed by economiist Eliot Janeway. Webb & Knapp is 50% owner of ch. 9 KBTV (TV) Denver, Colo.

An agreement for a $1.15 million loan from the National Bank of Detroit is also included in the financial arrangements.

Crowell-Collier subsidiary Collier Broadcasting Co. is buying the entire outstanding 607,200 shares of Consolidated at $20 per share. It already has received acceptances from 90% of Consolidated stockholders, it was reported.

Collier Broadcasting holds the $1.5 million bank credit. Collier Broadcasting is also advancing $9.5 million. Collier Broadcasting holds the $1.5 million bank credit.

Collier Broadcasting is paying $12,144,000 for the 607,200 shares of Consolidated stock, plus retiring a Consolidated debt that now amounts to $3.2 million. The $20 per share price is subject to a deduction of up to 50 cents per share for brokerage commissions.

The Webb & Knapp purchase of the C-C Ohio plant also contains a leaseback arrangement which provides for a 25 year rent at $750,000 annually, with renewal options. There is also a repurchase option, capable of being exercised five years later whereby Crowell-Collier can buy back its plant for $7.5 million. This agreement was due to be executed Oct. 15.

The Janeway group includes Col. Henry Crown and family (Empire State Bldg. Corp.), Charles Wiener and Myron Hokin, Chicago industrialists. This agreement was to be concluded in the “next several days” because of Mr. Janeway’s illness.

Mr. Janeway was at one time business editor of Time magazine; adviser to the editor-in-chief, Time Inc.; business trends consultant to Newsweek magazine; columnist for the Chicago Tribune Monitor and the New York Times as well as professional journals; and today is publisher and owner of Janeway Publication & Research Corp.

The Detroit bank agreement, in the form of a letter from the bank agreeing to establish the $1.5 million credit, provides for repayment in two years with 5% interest.

The original agreement between Crowell-Collier and Consolidated included an Oct. 31 deadline for consummation. This has been extended to Nov. 27 for FCC approval and Nov. 30 or Dec. 31 for consummation.

Included in this portion of the contract is a complex provision for $100,000 for “liqui- dated damages” in case FCC approval comes after Nov. 21 or consummation occurs after Nov. 30 or Dec. 31. On a pro-rated basis, this amounts to about 16 cents a share if this option is exercised by any of the stockholders.

The Collier Broadcasting board was named as Paul C. Smith, chairman and president (he is president of Crowell-Collier); Eugene J. McCaffrey, executive vice president-treasurer (C-C treasurer); Carl O. Hoffman and R. Carl Chandler, directors (same with C-C); Denis O’Sullivan, secretary (C-C); and William J. Seif, assst. secretary-treasurer (asst. treasurer-auditor of C-C).

Invited to join the Crowell-Collier board is the senior Mr. Bitner. Harry M. Bitner Jr. has been invited to be president of the broadcast properties, the application reported.

As before, Crowell-Collier reported that William H. Birnie, a vice president of the publishing house, owns 4% of WKNE-AM-TV Keene, N. H., which in turn owns 51.2% of WKNY Kingston, N. Y., and that both of these broadcast entities own a total of 20.7% of WKNY-TV Poughkeepsie, N. Y.; and that Edward L. Elliott, a director of C-C, is a director of WROW-WCDA (TV) Albany, N. Y., which also owns WCDI (TV) Hagarman, N. Y.

The Bitners will receive $19.50 per share for their 56.03% interest, to be paid $3 at closing, another $2 on Jan. 2, 1957, plus $14.50 to be paid in eight annual installments beginning one year from closing.

The Consolidated balance sheet as of July 31, 1956—covering all Consolidated properties including the Indianapolis outlet—which are licensed to Consolidated—showed that total assets amounted to $6,687,773, of which $776,005 were current assets. Total current liabilities were listed as $914,652; notes payable amounted to $2,784,643, earned surplus as $2,581,369 and profit for Aug. 15 $296,760. Replacement costs for all Consolidated properties were totaled $1,865,028.

Individual balance sheets for July 31, 1956, for subsidiary companies showed that WOOD-AM-TV had an earned surplus of $1,097,566, with profit for 1957, $14,50 to be paid in eight annual installments beginning one year from closing.

The consolidation balance sheet as of July 31, 1956, for subsidiary companies showed that WOOD-AM-TV had an earned surplus of $1,097,566, with profit for Aug. 10 of $359, 518; WTN-C-AM-TV had a deficit as of Nov. 30, 1955, of $475,667, with a loss to Aug. 1 of $110,877; WFDF had an earned surplus of $214,010, with a loss to Aug. 11 of $10 $5,000.

WFDB-TV operates on ch. 6 and is affiliated with NBC; WOOD-TV on ch. 8, affiliated with NBC and ABC, and WTCN-T on ch. 11 affiliated with ABC.

WESTINGHOUSE’S WIND BUY INCLUDES CHICAGO TV CP

THE WBC purchase of WIND Chicago for $5.3 million marks this transaction as of the largest sums ever paid out for a radio station. The ch. 20 tv outlet is not open as of now.

WIND, founded in 1927 on 560 kc with 5 kw directional. It is owned by Ralph L. Atlass, 11.1%; H. Leslie Atlass Jr. at Frank and Harriet Jane Atlass, 29.7%; Jol
Swift and cunning, Michigan's Red Fox has rusty-colored fur, black-fronted forelegs, and white-tipped tail. The young are born in springtime. Mice and other rodents are caviar to this crafty family.

Original sketch by conservationist Charles E. Schaefer

Put your money where the people are

Flirting with foxes is great sport—but seldom puts a dollar in an advertiser's till.

WWJ’s radio signal, personalities, news coverage, and feature programming concentrate on people—the big-earning, big-spending folks in southeastern Michigan to whom WWJ is a constant companion and trusted friend.

Cry "Yoicks!" when you're hunting for foxes. Use WWJ when you're gunning for sales.

Seventy per cent of Michigan's population commanding 75 per cent of the state's buying income is within WWJ's daytime primary area. In the Detroit area alone, over 3½ million people drive nearly 1½ million cars and spend over $5 billion annually for retail goods.

FCC APPROVES UNIVERSAL'S $10 MILLION SALE TO WHITNEY

FCC last week approved the $10 million sale of Universal Broadcasting Co. to a 100% owned subsidiary of J. H. Whitney & Co., New York investment firm. The action was taken by four commissioners; Comm. Rosel H. Brundage, absent abstaining from voting and Comm. Robert T. Bartley dissenting. Chairman George C. McConnaughey was absent.

Involved in the ownership transfer were WISH-AM-TV Indianapolis, WANE Fort Wayne and WINT (TV) Waterloo, Ind. All are CBS affiliates, with WISH-TV operating on channel 8 and WINT on channel 15. Universal bought WINT from Tri-State Television Inc. for $800,000 last June, dropping a permit for channel 69 in Fort Wayne when the Waterloo transaction was approved.

Comr. Bartley, as he has in similar transfers, objected, asking for hearing on the question of concentration of control. Calling attention to what he termed "possible dangers toward which we are heading in the broadcast field" by permitting increasing concentrations of ownership of broadcast facilities in the major markets, he said, "It appears that the primary purpose of the transference is to diversify its corporate activities. The widespread development could have profound effects on the broadcast structure, Comr. Bartley said, "extending to network affiliation, national spot advertising and even local advertising...program service...public interest."

The fact that Universal bought WINT last summer and "now proposes to sell at a profit" raises questions regarding trafficking in licenses, Comr. Bartley said.

Universal stations are owned primarily by C. Bruce McConnell who holds nearly 55%. Robert B. McConnell remains as general manager of WISH-AM-TV. The two McCollins are also members of the board of Indiana Broadcasters Corp., the Whitney subsidiary. Other board members are C. Wrede Petersmeyer, Walter N. Thayer and Robert F. Bryan, Whitney partners, Howard Brandung, Whitney associate, and former Universal stockholders Stokes Gresham Jr., chief engineer of the stations, and Frank E. McKearn, who is associate National Party official in Indiana. The McConnell-owned WHCU Anderson, Ind., was not included in the sale.

Transaction gives the Whitney company its third broadcast property — its third tv outlet, and first two radio stations. Whitney owns 90% of ch. 8 KOTV (TV) Tulsa, Okla., and 90% of ch. 11 KGUL-TV Galveston, Tex. The Whitney firm bought KOTV in 1954 from Wratcher-Alvarez Inc. for $4 million. It bought the KGUL-TV property last summer. The Whitney firm also has interests in a number of community tv systems.

Among other sale applications filed with the FCC: KDON Salinas, Calif., sold by Frank Oxarart Inc. to KDON Inc., for $116,446.16. KDON Inc. principals are Clark E. and Irene H. Fee and Helen M. and William M. and Helen N. Studer, the latter two of whom own KEED Springfield, Ore. KDON is on 1460 kc with 5 kw and was founded in 1935. The station showed a loss of $19,926.39 for the seven-month period, ending Aug. 31.

WGAT UTC, N.Y., sold by Central Broadcasting Co. to Star Broadcasting Co., for $85,000. Star Broadcasting operates WBBF Rochester and WGVG Geneva, both N.Y., and is owned by Maurice R. Forman (50%) and E. Menden (33%). WGAT showed a net 1555 loss of $9,994.97 and net loss for the first seven months of 1956 of $10,688.44.

KWIE Kennewick-Richland Pasco, Wash., remaining 40% of KWIE was sold to Cascade Broadcasting Co., 40% owner, for $79,000 and assumption of obligations. Sellers are Clarence J. McCredie and Harold A. Clark. Cascade owns KIMA-AM-TV Yakima, Wash., satellites KLEV-TV Lewis, Idaho, KEPR-TV Pasco and KBAS-Tv Ephrata, both Wash., and is applicant for channel 8 in Walla Walla, Wash.

Seven New Am Facilities Given Grants by FCC

THE FCC approved seven new am stations last week. They were:

Clarksville, Ark.—Peach County Radio, 1360 kc, 500 w, daytime. Pat S. Goosby, former general manager, KFNA Mena, Ark., and Chester Wilkerson, merchandise interests, are equal partners.

Riverside, Calif.—KAPC, 1570 kc, 1 kw, daytime. Mr. Lapica is sales, news and research director of KBLA Burbank, Calif.

Pocatello, Idaho.—J. Ronald Bayton (50% owner-manager of KOFK Pullman, Wash.), 1290 kc, 1 kw, daytime.

Omaha, Neb.—Central Plains Best Stg. Co., 1420 kc, 500 w, daytime. President and 65% owner Harold A. Soderlund is general manager of KFAB Omaha.

Abingdon, Va.—Burley Best Co., 1230 kc, 250 w, unlimited. Lindy M. Seamon, general manager-chief engineer, WRIC Richlands, Va., and Nelson T. Barker, fuel and automotive interests, are equal partners.

Colorado Springs, Colo.—Taylor Best Co., 1460 kc, 1 kw, daytime. Principals are President-Treasurer W. C. Taylor (50%), Gene Reischman (20%), Homer Glover (10%) and J. Kenneth Smith (10%).

FTC FORMS UNIT TO MONITOR AIR

T. Harold Scott named to head new investigative branch which will keep eyes and ears open for questionable广告ising on radio-tv.

THE Federal Trade Commission last week sketched its plans for stepped-up monitoring of radio and tv advertising and named T. Harold Scott, FTC attorney, to head the new investigative unit.

FTC Chairman John W. Gwynne said Mr. Scott will be legal adviser and assistant for radio-tv to Sherman R. Hill, chief project attorney of the FTC's Bureau of Investigation.

As indicated last August by Alex Akerman Jr., FTC executive director [BT, Aug. 6], FTC's attorney-investigators in its eight branch offices will assist the new unit by monitoring radio and tv broadcasts as a part of their routine activities, in addition to their other investigative work.

These branches are in New York, Chicago, New Orleans, Cleveland, Kansas City, San Francisco, Seattle and Washington.

Mr. Akerman at the time explained that these field attorneys-investigators "cover the whole country during a year" on their regular investigations and will use spare time to monitor local radio-tv broadcasts in each city for fraudulent and misleading ads.

The FTC's present "task force" of four attorneys at Washington headquarters, which examines scripts and continuities furnished by radio and tv stations on a scientific sampling basis, will be moved to the new unit. Mr. Akerman feels that trained legal investigators—actually monitoring broadcasts in person and continuing to check sample scripts furnished by radio-tv stations four times a year on request from the FTC—will increase effectiveness of the FTC checks by use of both methods. Although a few stations have objected to the FTC's requests for sample day scripts four times yearly, they usually have become mollified when FTC tells them that they are not being singled out and that all stations must furnish the scripts, an FTC spokesman said.

Mr. Akerman said that while radio-tv stations have "done a good a job of screening out false advertising," FTC's new monitoring unit "undoubtedly will offer even greater protection to the public."

The FTC has been confering with FCC staff members to work out a system whereby the FTC is notified when an advertiser is using questionable advertising practices on a given broadcast station or network, according to Mr. Hill, and expects to announce a new FTC-FCC liaison formula "shortly."

Discussions for such a formula were un-

KFBK has a greater FCC contour, daytime and nighttime, than any competitive station.

McClatchy Broadcasting Company

SACRAMENTO, CALIFORNIA • Paul H. Raymer Co., National Representative
DERTAKEN after an exchange of correspondence last spring between Chairman Warren G. Magnuson (D-Wash.) of the Senate Commerce Committee and FCC Chairman George C. McConnaughey, in which Mr. McConnaughey said the FCC staff would consult with the FTC in working out a plan whereby the FCC would be notified if radio or television network involved in FTC charges and other action against questionable advertisers.

Sen. Magnuson, who as chairman of a Senate Appropriations subcommittee was largely responsible for restoring a $100,000 cut from the FTC's fiscal 1957 budget with the understanding FTC would increase its monitoring of fraudulent radio-television commercials, indicated he thought the FCC and FTC should exchange specific information where radio-television abuses are involved.

U.S.-Mexico Am Talks To Resume This Week

RESUMPTION of U.S.-Mexico talks regarding an agreement on the use of standard broadcasting frequencies is scheduled to get underway this week in Mexico City. FCC Comr. Rosell H. Hyde, head of the American delegation, leaves Washington this morning and expects to spend the week discussing the two countries' frequency agreements.

Asst. chief of the U.S. Delegation is John C. Cross, State Dept. Sr. Carlos Nunez, Ministry of Communications, is chief of the Mexican delegation.

INDUSTRY SPOKESMEN TAKE THE STAND BEFORE SENATE PROBE OF ELECTIONS

MBS President Poor opposes proposals that broadcasters donate free time for campaigning. Agency representatives (NC&K for Democrats, BBDO for Republicans) tell about spending, remain quiet on legislative recommendations.

INVESTIGATION into political campaign expenditures, including those for radio-telephone time, was kicked off last week by the Senate Elections Subcommittee headed by Sen. Albert Gore (D-Tenn.). The unit heard testimony from MBS, the two major national political committees and their advertising agencies, and others Monday through Wednesday last week.

MBS President John B. Poor said his network has sold only three half-hours of time for the presidential campaign, all to the Democrats. Also testifying were Eugene H. Kummel, vice president of Norman, Craig & Kummer, New York, Democratic agency; and Carroll P. Newton, vice president and board member of BBDO, New York, GOP agency.

Among other witnesses testifying on matters affecting the radio-television industry were Democratic National Chairman Paul M. Butler; GOP National Chairman Leonard W. Hall; Robert R. Nathan, executive committee chairman, Americans for Democratic Action (ADA), and Alexander Heard, political science professor at the U. of North Carolina.

Mr. Poor objected to free time proposals under the present equal access provisions of Sec. 315 of the Communications Act. The two agencies reported their spending on behalf of the two parties, but declined to make recommendations on legislation. Mr. Nathan asked that networks be required to give free time to candidates. Prof. Heard reported on political contributions and spending in the 1952 campaign.

Sen. Gore said plans for another session before the Nov. 6 election are indefinite, although hearings will be held after the voting. Scheduled for late November, he said, are reports on political spending with individual radio and TV stations, to be secured through cooperation with NARTB.

At one point, Sen. Carl T. Curtis (R-Neb.) requested that tv newsreel cameramen covering the hearing identify themselves. One of the units was hired to cover the hearings by United Auto Workers (AFL-CIO). Sen. Curtis didn't object to the coverage on perfection that UAW was covering the hearing by film and tape for radio-television programs on individual stations. Sen. Curtis said various labor unions were making 1,500 to 2,000 broadcasts a week, mostly in behalf of Democrats.

MBS President Poor said Mutual has sold or contracted for three half-hours, all to Democrats. This includes the Sept. 13 broad-

THESE INDUSTRY FIGURES

A NUMBER of persons associated with the broadcasting industry were named last week in a report of contributors for the Republican and Democratic party coffers. The list was introduced into the record of the Senate Elections Subcommittee, and was compiled by the Clerk of the House of Representatives to indicate donations in excess of $500 to one or more of 14 GOP and three Democratic groups from Jan. 1 to Aug. 31, 1956. Names with broadcast connotations:

DEMOCRATS

Robert H. Hinckley, ABC Washington vice president, $500; Lou Poller, WCAN-TV Milwaukee (now suspended), $2,500; William A. Roberts, Roberts & McInnis, $800; Mrs. Edgar B. Stern (Edgar Stern Jr. is president of WDSU-AM-FM-TV New Orleans), $1,000.

REPUBLICANS

Louis N. Brockway, executive vice president, Young & Rubicam, $1,000; Bob Hope, stockholder, KOA-AM-FM-TV Denver, $5,000; Time, Inc. officials, Roy E. Larsen, president, $3,500; Henry R. Luce, editor-in-chief, $8,500, and James A. Linnen, publisher, $1,000; Edward J. Noble, director, AB-PT, and Mrs. Ethel T. Noble, $17,000; Stanley Resor, board chairman, J. Walter Thompson Co., $1,000.

George B. Storer, Storer Broadcasting Co., $5,000; Thomas G. Tinsley Jr., WITH-AM-FM Baltimore, WXEX-TV Petersburg, Va., and Patricia McCord Tinsley, $12,000; John Hay Whitney, J. H. Whitney & Co., and Mrs. Whitney, $26,000; Oveta C. Hobby, Houston Post (KPRC-AM-FM-TV Houston), $1,000; John S. Knight, John S. Knight stations, $1,000; Sigurd S. Larmorn, president, Young & Rubicam, $500.

Gardner Cowles, Cowles stations, 1, $100; J. H. S. Ellis, president, Kudner Agency, $500; Bruce Barton, board chairman, BBDO, $1,000; Robert T. Colwell, vice president, Sullivan, Stauffer, Colwell & Bayles, $500; Henry C. Flowern, jr., vice chairman, J. Walter Thompson Co., $2,000; Emerson Foote, executive vice president, McCann-Erickson, $1,000.

Frederick B. Manche, executive vice president, BBDO, $1,000; Harrison K. McCann, board chairman, McCann-Erickson, $1,000; Robert Montgomery, tv publisher and tv adviser to President Eisenhower, $1,500; F. B. Ryan Jr., board chairman, Ruthrauff & Ryan, $500; George Ketchum, president, Ketchum, MacLeod & Grove, $1,000; M. Robert Rogers, WGMS Washington, $2,000.

Also last week, Prof. Alexander Heard of the U. of North Carolina, submitted a list of persons who contributed $10,000 or more to political campaigns in 1952. They included former Sen. Wm. Benton, board chairman of Encyclopedia Brittanica Inc. which has a tv film-producing subsidiary, $15,033 to Democrats; E. L. Cord, owner of KFAC-AM-FM Los Angeles, $36,500 to Republicans; Mr. and Mrs. H. L. Hunt (his Facts Forum Inc. underwrites Reporters Roundup on MBS and produces a tv film version), $38,300 to Republicans; Mr. and Mrs. Joseph Katz (he is president of the Baltimore agency by that name), $10,000 to Democrats; Henry R. and Claire Booth Luce (he is editor-in-chief of Time Inc. publications; Time Inc. owns, KLZ-AM-FM-TV Denver, 80% of KDYL-AM-FM-KTGT [TV] Salt Lake City and 50% of KOB-AM-TV Albuquerque, N. M.), $28,000 to Republicans, $500 to one Democrat; Mr. and Mrs. John Hay Whitney (he is senior partner in J. H. Whitney & Co., investment firm which owns 90% of KGUL-TV Galveston-Houston and individual radio and tv stations in Tulsa and has bought WISH-AM-TV Indianapolis and WANE-WINT [TV] Ft. Wayne), $31,000 to GOP.

cast by Adlai Stevenson ($6,065), and half-hours on Oct. 23 ($6,055) and Nov. 3 ($6,704).

Mr. Kummel said NC&K has contracted for $1,306,356 in advertising for the Democratic National Committee through Nov 6, predominantly for radio-tv time plus production and pre-emption costs; $110,534 for the Stevenson-Kefauver Campaign Committee; $82,449 for Volunteers for Stevenson-Kefauver; $24,500 for Businessmen for Stevenson-Kefauver, and $7,000 for the Florida Stevenson-Kefauver Campaign Committee. NC&K is not presently negotiating for additional time, he said.

BBDO's Mr. Newton said his agency has contracted for $290,019 in advertising as of Oct. 5 for the Republican National Committee, of which $218,958 was for three half-hour tv time periods plus 20-second spots and $17,192 was for two half-hour radio periods, with an additional $23,502 in production and pre-emption costs.

For the National Republican Senatorial Committee, he said, BBDO has contracted for $497,568 in advertising, of which $416,194 was for five half-hour tv time periods plus 12 five-minute periods and $17,672 was for two half-hour radio time periods, with production and pre-emption costs of $63,351.

For the National Republican Congressional Committee, BBDO contracted $646,454 in advertising, with the radio-tv share as follows: $514,153 for six half-hour tv time periods, one quarter-hour tv period, 11 five-minute tv periods plus 20-second spots; $25,895 for three half-hour radio periods and one quarter-hour of radio; $41,071 for network radio-tv production and pre-emption costs; $50,384 for production costs for five-minute and 20-second films for tv.

Thus, of the $1,434,041 in advertising under contract by BBDO for the three committees, $1,388,272 is in radio and tv. There will be additional production and pre-emption costs which cannot be estimated at present, Mr. Newton said.

The subcommittee reported expenditures of $796,268 by both major political parties from Sept. 1 through Oct. 7, including production and pre-emption costs. Total time-only sales were $706,440 ($629,774 for tv, $76,666 for radio), Republicans spending $411,651 and Democrats $384,617.

Total costs of time reserved as of Sept. 1 through Nov. 6, including production and pre-emption costs, was quoted at $2,179,695, with Republicans reserving $1,489,668 in time and Democrats $690,026.

A report by Prof. Alexander Heard of the U. of North Carolina indicated 1952 campaign expenditures by 15 national Democratic groups and 18 Republican organizations totaled $4,500,000 for Democrats and $6,600,000 for Republicans.

What Parties Got, Spent

Democratic National Chairman Paul M. Butler reported that the committee received a total of $582,047 during September and expended $602,808 for the month. Of the expended amount, $40,598 was spent for radio and $351,373 on television for time and pre-emption and production costs, he said. The $582,047 received in September brings total receipts as of Sept. 30 to $1,146,572, he said. Noting that the committee had a balance of $14,894 and unpaid bills of $120,664 on Sept. 30, he said all major tv addresses by Democratic nominee Adlai Stevenson are followed by appeals for contributions.

GOP Chairman Hall said his committee received $244,586 during September and expended $168,922 of which $99,270 was spent on television. Total receipts for the year through Oct. 1 were $1,996,728. Balance on Oct. 1 was $540,289, with unpaid bills of $24,000.

Mr. Nathan said ADA favors amendment of the Communications Act to require the networks to make available a "reasonable amount" of free time to candidates of the major parties.

Pro Football Case May Affect Radio-Tv

THE U. S. Supreme Court has agreed to consider whether professional football is—like baseball—exempt from the antitrust laws. The decision may affect pro football's radio and tv broadcast activities.

The high court made that decision last Monday when it accepted for argument an appeal from a former National Football League tackle—William Radovich, one-time Detroit Lions lineman—against a lower court dismissal of his $150,000 damage suit against NFL. The lower court had upheld a district court ruling which dismissed Mr. Radovich's suit. It held that football was a team sport and thus exempt from the antitrust laws in line with the 1953 Supreme Court decision holding that baseball was not liable to be sued for monopoly.

In baseball and boxing cases, the rise of television—and its interstate character —was a key argument advanced by appellants in favor of a ruling that neither should be exempt from the Sherman Act.

The boxing antitrust suit, heard in New York federal court last spring, is still pending a decision. The theatre case was settled by consent decree.

STATIONS SHOULD SET OWN NORMS—LEE

Comr. Lee reviewed the problems involved in granting air time where splinter groups and other factors complicate equal access. He recalled the controversy a decade ago when an atheist petitioned the FCC to revoke the license of some stations that carried religious broadcasts. FCC ruled that the existence of a Divine Being is a controversial issue, Comr. Lee quoting this sentence from an editorial in the July 29, 1946, issue of BWT: "Jot down July 1946 as the day the FCC took jurisdiction over God."

Sec. 315, with its equal time doctrine, is a "headache section" for the Commission, he said, reminding that no court case protects the earnest broadcaster against charges of unfairness or libel. "The broadcaster is damned if he does and damned if he doesn't," he explained.

Congress should provide relief, exempting broadcasters from libel in talks by qualified candidates whom they are not allowed to censor, he proposed, adding that many states have adopted libel protection for broadcasters.
WOODland-TV is BIG territory!

Hot? You bet! WOODland-TV is one of the country's hottest markets. You'd expect it, too, with a set count of 562,875 and a '55 sales record of $176,855,000 for appliances and general merchandise. It's Western Michigan... the country's 18th television market... and it's YOURS when you buy WOOD-TV, Grand Rapids' only television station. Ask us how to heat up your sales.

NBC, MBS CAUGHT IN CALIFORNIA OIL FEUD

Group opposing referendum proposal asks FCC to investigate NBC Radio's western network 'Richfield Reporter' for 'bias' in favor of proposal; sponsor Richfield Oil and pro group ask 'equal time' on MBS to answer 'attack' by Fulton Lewis Jr., plus retractions.

Proposition Four, a California referendum in the November election which would establish a three-man commission to enforce a new oil production conservation act and which has split the state's oil industry down the middle, gushed into national dispute last week as:

- The California Committee Opposed to Oil Monopoly (against Proposition Four) petitioned FCC to investigate immediately why NBC has allowed Richfield Oil Corp. to use its nightly Richfield Reporter newscasts on the western network to "propaganda in support of Proposition Four. The committee charges violation of the Communications Act and asks "appropriate action" for relief before Nov. 6. NBC Hollywood said the network's reply would issue from New York.

- The "Citizens Conservation Committee for Proposition Four" demanded equal time on every Mutual station carrying Fulton Lewis jr.'s "attack" on Proposition Four.

- Richfield Oil Corp. demanded that Mr. Lewis and MBS retract statements made on the commentator's Oct. 1 broadcast or face a $7 million damage suit. Richfield charged the statements demonstrated "actual malice."

Spot Warfare Rages

Meanwhile, the ears and eyes of California citizens continue to be bombarded by radio and television spots, first to vote "yes" and then to vote "no" on Proposition Four as both camps wage an intense all-media advertising campaign for their respective causes. Two San Francisco agencies are spending the money. Whitaker & Baxter is representing the "yes" and Harry Lerner & Assoc. the "no" group.

Basing its action on recorded monitoring extending over a period of four months, the California Committee Opposed to Oil Monopoly complaint charged that the Richfield Reporter, with repeated dissemination of "biased, slanted, distorted, and grossly prejudiced political propaganda, is support of Proposition No. 4, in the guise of news."

The complaint attributed responsibility for the "biased" broadcasts directly to Richfield Oil Corp., stating:

"The petitioner is informed and believes that NBC at its Hollywood office does not exercise supervision and control of the program content of the broadcasts of The Richfield Reporter but it is in fact under the sole supervision and control of the sponsor, the Richfield Oil Corp." The complaint charges NBC with failing to supervise and control the program, and cites this failure as a violation of the Communications Act of 1934 and FCC rules and regulations.

W. H. Geis, chairman of the California Committee Opposed to Oil Monopoly, who signed the complaint, said:

"This is a flagrant and utterly indefensible case of the systematic poisoning of news reports at their source. NBC itself admits we have an airtight case. We began the monitoring of The Richfield Reporter last April and piled up overwhelming evidence of bias, prejudice, and slanted reporting in favor of Proposition 4."

"On Aug. 13 we sent telegrams of protest to NBC New York and NBC Hollywood, and submitted to them the monitored newscasts of The Richfield Reporter, together with copies of a score of news releases issued by our committee during the four-month period."

"This evidence proved that during the entire four-month period, The Richfield Reporter referred only once to a news release issued by us, while during that time he broadcast numerous statements by Charles S. Jones, president of Richfield, and R. W. Ragland, vice president, whose corporation pays for a program supposed to report the news objectively."

"Even the single reference by The Richfield Reporter to a news story from this committee was used merely as an excuse for a longer statement undermining our position."

"NBC informed us a week after our telegraphic protest that it had issued a 'kill order' forbidding The Richfield Reporter from mentioning Proposition 4 in any way until an investigation of our complaint could be made."

"NBC advised us also that Richfield's Vice President Ragland was notified of this action. It was continued in effect for nearly a month despite his protest."

"After making its investigation and comparing our news output with The Richfield Reporter's coverage of Proposition 4, NBC made the unprecedented offer of a 15-minute free program to tell our side of Proposition 4. However, the offer was refused by NBC to permit us to state why the program was offered to us without cost. It was our position that the offer in no way compensated for the harm and injury inflicted on us by the Richfield Oil Corporation, who continued use of its new program as an instrument for political propaganda, and we rejected it."

"On Sept. 14 The Richfield Reporter was evidently permitted to resume coverage of the Proposition 4 story, which he mentioned on that date for the first time in nearly a month. However, he was careful to give equal time to two news items, one of them supporting the proponents of the

GROSS TV NETWORK CHARGES UP 40.7%

Total in August up 42.6 million over August 1955. ABC-TV up 92.1%, CBS-TV 29.9%, NBC-TV 39.5%.

RECORD gross time charges by the tv networks for August—a total of $42,687,975, or 40.7% above August 1955—were reported last week by Publishers Information Bureau.

Each of the three networks grossed more in August than in any other month in the Jan.-Aug. period this year. They also topped their individual gross billings of August 1955 by hefty margins: ABC-TV chalked up a gain of 92.1%; CBS-TV, 29.9% and NBC-TV, 39.5%.

Previous high month of the year for ABC-TV was March, for CBS-TV it was July and for NBC-TV it was March. CBS-TV, which grossed more than $19.4 million in August and more than $144.4 million in the first eight months, remained the top network in gross time charges.

For the eight-month period, gross billings totaled $314,943,801 for a gain of 22.3% over the same period last year when the total billings was $257,517,496.

ABC-TV showed the biggest gain in the comparative eight-month periods: 77.8% above this year. The PIB compilation follows:

measure and the other giving our views."

The complaint advised FCC that documentary proof of the biased broadcasts—including the monitored reports and the committee’s news releases—are available for Commission inspection and requested the Commission to take action under Sec. 303 of the Communications Act, which empowers the Commission to proceed with respect to licensees “as public interest, convenience, and necessity requires.”

Demand for equal time on MBS to answer attacks upon Proposition 4 by Fulton Lewis jr. was made by the Citizens Conservation Committee for Proposition 4 and by Charles S. Jones, chairman of the policy committee of the California Citizens Conservation Committee, in a telegram to MBS Board Chairman Thomas F. O’Neill. Mr. Jones also is president of Richfield Oil Corp. He said in part:

Stranger From the East

“Into an atmosphere where certain men of more wealth than conscience have demonstrably tried to stop at nothing to prevent California from adopting a fair oil conservation law now steams a stranger from the East Coast, one Fulton Lewis jr. Without any attempt to approach any of the sponsors of Proposition 4 or to inform himself about the arguments in favor of this measure, Mr. Lewis attacked it and its supporters two times on four broadcasts.

“For Mr. Lewis, identified as a crusader for the Far Right Wing, to join forces with the Left Wing which is openly and loudly determined to defeat Proposition 4, is in itself an amazing performance considering that Mr. Lewis lives on the Atlantic Coast and is not known to be one of those who has anything to gain by stifling conservation in California.

“We regret that Mr. Lewis saw fit to indulge in an attack based upon personal vilification, distortions, half truths, and misrepresentation without making any approach to inform himself about the conservation story.

“But Mr. Lewis has done more than lift the eyebrows of citizens. He has attempted to butcher the cause of conservation. He has used the facilities of MBS to do so. He has done more than chop viciously at the cause of conservation. He has launched a blunt, point-blank attack upon the reputation of certain companies and persons in defiance of principle and honor, if not of law.

“For these reasons, we serve demand upon MBS for the same amount of broadcast time, the same number of broadcast periods, over all of the same outlets, and at exactly the identical and corresponding broadcast time, so that it may reach as many as possible of the listeners of Mr. Lewis with the other side of this story.”

Mr. Lewis and Mutual face damage suits of $7 million by the Richfield Oil Corp. for “scurrilous and maliciously false defamatory statements” against the company. This was revealed in demands served on Mr. Lewis and Mutual last week by Richfield President Jones for retraction of statements made by the news commentator which the company said demonstrated “actual malice.”

Mr. Jones stated that failure to retract the damaging statements would result in legal action against both Mr. Lewis and the network for $5 million general damages, $2 million exemplary damages for “actual malice” and for “such additional special damages as are found to have been caused this corporation by the broadcast.”

During his Oct. 1 broadcast, Mr. Lewis according to Mr. Richfield, said: “The ringleader of this little enterprise is the Richfield Oil Co., which, of course, has a very unsavory past history. Two of its former officials went to jail. This is the outfit that was tied in with the Teapot Dome scandal in the Harding Administration, if you remember.”

Mr. Jones charged that “Lewis knew these slanderous statements were untrue and deceitful.” He said in his demand for retraction: “You will know that this corporation and its management does not have a ‘very unsavory past history’, but on the contrary, enjoys a fine reputation. None of its present or former officers ever went to jail. Further, as you well know, this corporation never had any connection whatever with the Teapot Dome matter.”

Mr. Jones said he was shocked by Mr. Lewis’ apparent “complete lack of regard for the facts and obvious intent to injure Richfield Oil Corp’s excellent reputation in its marketing communities.”

The Richfield president said that “any responsible reporter would have thoroughly checked the facts before making such irresponsible and purposefully damaging comments on a nationwide broadcast.”

“It seems obvious,” Mr. Jones added, “that Lewis’ statements were maliciously intentional.”

Mr. Jones’ letters were in compliance with the Civil Code of California which requires that notice of demand for retraction be made before suit for slander by a radio broadcast can be instituted.

Under the California code, Mr. Lewis and the network have three weeks to comply.

ABC Names Western Heads To Replace Petry Sales

DIRECTORS to head up ABC’s sales representation of its western radio and tv networks, effective Nov. 1 on resignation of representation by Edward Petry & Co., were announced last week.

ABC-TV western network sales in the west will be handled by Vincent Francis, ABC-TV western division sales manager, with headquarters in San Francisco. He will report to Sioumc Chapin, ABC-TV vice president in charge of sales.

ABC Radio western network sales in the west will be handled by Harry Woodworth, director of radio for ABC Radio western division, with headquarters in Hollywood. He reports to George Comtois, national sales manager of the ABC Radio Network.

The western networks will be represented in New York and Chicago by ABC radio and TV network sales offices in those cities.

Murrow Quits Board To Talk CBS Contract

With salary exceeding president's, newscaster wants nobody to say he was in favored spot in negotiating new employment contract.

NEWSCASTER Edward R. Murrow, in the process of negotiating "a new and possibly long-term employment contract" with CBS, last week resigned as a board member of CBS Inc. to avoid any possible subsequent contention "that my presence on the board had influenced the nature of the negotiations."

The board accepted the resignation with regret, said it would keenly miss his presence, and voiced unanimously its appreciation for his contributions to board deliberations during his seven years as a member.

Details of the contract now in negotiation were not disclosed, but it was understood to be one that would supersede, if completed in time, the present agreement between Mr. Murrow and CBS. The present contract reportedly has more than a year to go—some sources said considerably more—but it was said that the complexity of such contracts made it desirable to start negotiations early rather than wait and face the prospect of negotiating against an imminent deadline.

Mr. Murrow's present contract dates to 1947. During 1955, according to the company's latest proxy statement, he was paid $316,076.12. CBS President Frank Stanton received $281,522.16.

Murrow Explores Position

In his resignation letter Mr. Murrow said it seemed "inappropriate" to remain on the board during the negotiations. "Years of association with you and the other members of the board have convinced me that considerations of a personal nature could in no circumstances influence the judgment or decision of the board," he continued. "It will continue to make decisions in the light of what it regards as being in the best interests of the corporation and its stockholders. However, were I to remain a member of the board during this period there would, I believe, exist the possibility, even though limited, of some contention that my presence on the board had influenced the nature of the negotiations."

Mrs. Weiss Marries Oilman

MRS. LEWIS ALLEN WEISS was married Friday in Las Vegas, Nev., to oilman Lawrence Frankley. Her daughter, Patricia (Mrs. John Armitage), flew to Las Vegas from Moscow, where her husband is in the U. S. diplomatic service. Mr. Frankley, a longtime family friend, was attorney for the late Lewis Allen Weiss when the latter became vice president and general manager of the Don Lee Broadcasting System.

ABCP REVEALS PLANS TO EXPAND OFFICES

Network initiates a 'costly' project to add two floors to its five-story headquarters at 7 W. 66th St., New York.

FACED by staggering real estate costs in midtown Manhattan (estimated price per foot: $4,800) on the one hand, and by the fact that it is growing too fast for comfort—at least for the comfort of those employees packed into its 1.2 acres of administrative and creative office space—the American Broadcasting Co. is looking skyward.

Currently under way: A "very costly" and delicate project of adding two complete floors to its main, five-story plant at 7 W. 66th St., just off New York's Central Park. Through the block, on the 67th St. side, it is completing a novel way of creating two tv studios out of one.

The administrative end of the project, which will add 9,500 sq. ft. of space to ABC's current 200,000 sq. ft. of office area, will see a sixth and seventh floor added to the network's headquarters, but in such a way as to leave the sixth floor free of columns that would ordinarily support the seventh. Explained space-conscious ABC: The sixth floor will be literally suspended by the seventh through "floating" steel beams and construction that will put the brunt of the weight on the frame of the building itself. Both floors will incorporate the latest "contemporary" designs and will be—like the five other floors—completely air-conditioned.

To facilitate "getting there," ABC is eliminating its manually-operated elevators and installing "magic brain" lifts.

On the other side of the building, the network is converting its massive W. 67th St. studio back into Tv 1 and Tv 2 by erecting a giant 25 x 50 ft., 15-ton, movable, sound-proof (by fiberglass) door that can be raised or lowered by the flick of a switch on a 5 horsepower motor. Raised, it will give ABC an 11,700 sq. ft. studio; lowered, it will create two studios, one 73 x 90 ft., the other 67 x 86 ft. The network claimed that this was the first such experiment in the history of telecasting, citing the fact that that it had to commission the American Stage Equipment & Iron Works to construct it after having retained MIT acoustical engineer Leo Beranek to act as consultant to ABC's engineering facilities staff.

Network spokesmen declined to indicate the cost of these two projects, but noted them as "very substantial." They likewise begged off from discussing in any detail ABC's other expansion plans, saying that such comment may jeopardize real estate negotiations now going on or on the planning boards.

Of the three major networks, ABC-TV seems to be the only one permanently "set." After its spin-off from NBC, ABC remained in Rockefeller Center, and in 1949 purchased the property of the New York Riding Academy, its clubhouse, riding arena and stables. The latter two were converted into studios, the former into administrative offices. It moved in during early 1953, following years of painstaking reconstruction.

Today, it owns 1.2 acres (300 ft. frontage on W. 66th St., 150 ft. frontage on W. 67th St.) of property off Central Park, some of which hasn't yet been converted into usable space for further expansion and parking garages. It owns a corner building on Broadway at 70th St., housing storage space and several other administrative departments such as accounting. It leases space in the Hotel Des Artistes on W. 67th St., in several office buildings on W. 66th St., and in three theaters in the West 40s, the latter used for audience participation shows.

NETWORK PEOPLE

J. A. Driscoll, vice president in charge of ABC San Francisco office, elected to board of directors of San Francisco Employers Council.

Ed Sullivan, CBS-TV star, will be guest of honor and speaker at the 15th annual luncheon to be held by The Pulse, Inc., on Oct. 24 at New York's Plaza hotel.
MARKET POWER ... measure of accomplishment at KOMO-TV, Seattle

In just 30 days a series of one-minute spots on KOMO-TV's news program "Deadline" helped triple used-car sales for a prominent Seattle auto dealer. In fact, in all instances except one the car shown on "Deadline" was actually sold at the conclusion of the telecast. And this one customer bought a more expensive auto than the one displayed on TV!

Such sponsor reports mean a great deal to us. For at KOMO-TV we look for more than "adequate" success.

Western Washington viewers have learned to look to KOMO-TV for imaginative, ambitious programming... for public service, entertainment and news reporting far better than "adequate"

They turn to KOMO-TV with confidence.

For it follows—a product is known by the company it keeps.

Our viewers see—trust—and buy.

This is market power. A source of great pride to us—
a source of great profit to our advertisers.

for greater influence in Seattle and Western Washington

CHANNEL 4 NBC the COLOR station

SOLD BY NBC SPOT SALES
Zenith-RCA Antitrust Case Postponed in Chicago Court
TRIAL in the antitrust patent suit involving RCA and Zenith Radio Corp. has been de-
layed in Chicago Federal District Court un-
til June 17, 1957, to permit RCA to com-
plete gathering of foreign depositions.

The action was taken Oct. 5 by Judge
Michael Iggo in dening Zenith’s latest plea that RCA be prevented from obtaining de-
positions from foreign witnesses. Earlier
Zenith had been permitted to increase its
requested damages on grounds it had in-
curred additional costs in gathering foreign
depositions and had suffered alleged business
losses in other countries [B&T, Oct. 8].

In denying Zenith’s appeal contesting an
RCA move for delay, Judge Iggo gave the
latter until next April 1 to take depositions
in 11 countries and set a pre-trial conference
for June 3. He also urged both parties in
the eight-year dispute (which also includes
General Electric Co. and Western Electric
Co. with RCA) to speed up the case for
settlement next year.

RCA filed the original suit, charging Zen-
ith with patent infringement. Zenith filed a
counter-suit against the three companies,
saying treble damages ($16,056,549) and
was permitted to increase the sum last sum-
mer [B&T, July 23].

RCA Short-Night Picture Tube Climax Two Years Research

RCA last week announced a shorter receiv-
ing tube for use in home television sets.
RCA has been developing the tube for the
past two years. It employs wide-angle 110-
degree diagonal deflection.

RCA’s new 21% inch tube, an aluminized
rectangular glass type, weighs less than 23
lbs., and has an overall length of 14½ inches—5½ inches shorter than the standard
20-inch tube that has 90-degree deflection.
The new size will permit set manufacturers
to make “substantial reductions” in cab-
netry. For its 110-degree tube, RCA also
has developed special circuitry and is cur-
rently developing other required matched
component parts.

Another manufacturer, Allen B. DuMont
Labs, has been showing tube boasting a neck
two inches shorter than the standard for
14-, 17- and 21-inch sizes.

Amphen Splits Service Unit
AMPEX Corp. effective Nov. 1 will divide
its service engineering unit into audio and
instructional divisions with Robert Miner
and John Jipp, respectively, as marketing
managers. Fred Van Chills will be instru-
mentation service engineering manager with
Kenneth R. Hall named manager of audio
service engineering.

lay to WCVBY-TV (ch. 3). Announced Oct. 4.

WAPA-TV San Juan, P. R.—Granted mod. of cp to install non-commercial eqn. changes. Announced Oct. 9.

CALL LETTERS ASSIGNED

KOOS-TV Coos Bay, Ore.—KOOS Inc., ch. 16

APPLICATIONS

KWWL-TV Waterloo, Iowa.—Seeks cp to replace
cancelled expd cp (as mod. which authorised new tv)

BROADCASTING • TELECASTING

Page 98 • October 15, 1956
To my old friend, Sol Taishoff, and his great staff:

May the next 25 years find you continuing to go: the news as quick as a ferryboat shoeshine, printing the facts cold as a stepmother's kiss, being square as a set of dime store teeth, treating phonies like a pigeon at a bald-headed man's convention, happy as an old goat in a tin factory and continuing to leave your competitors stranded as a medicine show in a Kansas tank town.

With admiration from,

The Old Scotchman

[Signature]

Gordon M. London
and seeks mod. of cp to change aur. ERP to 221 kw and make ante. changes. Filed Oct. 4.

WBFL-TV Philadelphia, Pa.—Seeks cp to make changes in trans. facilities. Filed Oct. 5.

WDAF-AM Omaha, Neb.—Seeks mod. of cp to change trans. and studio location as State Hwy., 24, 2.5 miles south of State Hwy., 24 and 2.5 miles north of State Hwy., 24. Filed Oct. 5. Oct. 6.

Our thanks to you, Sol, and to all of the staff of BROADCASTING-TELECASTING for the wonderful help your magazine has been to us since we began operations as "Florida's First Television Station."

We feel that our advertisements in BROADCASTING-TELECASTING have done a tremendous job in informing our many "publics" about the WTVJ operation—and the information we have gained from reading BROADCASTING-TELECASTING week by week has been a powerful aid to us in building WTVJ's stature in South Florida.

LEADING CITIZEN in a LAND OF PROMISE...

WJW-TV

Industrial expansion nearing $3 Billion!
Unequalled transportation facilities!
Vast, well-trained working force!
Superb geographical situation!

A vital part of booming Cleveland is WJW-TV, now housed in a handsome new Williamsburg colonial structure in the heart of the downtown area. Presenting the tops in television programming and public service to the market that tops the country in television set saturation, this basic CBS outlet will carry your sales story to new heights in the Best Location in the Nation.

WJW-TV Channel 8 (Formerly WXEL)

Represented Nationally by The Katz Agency
rich middle Georgia means Macon... to sell it, you've got to buy it... to buy it you need WMAZ and WMAZ-TV

Middle Georgia's booming! Population doubled in last decade. $368 million spent in retail stores last year. Hub of Middle Georgia: Macon, which alone had 41.6% retail sales gain during the past 5 years.

You wouldn't use New York Stations to sell the Philadelphia area. Atlanta stations are even farther from Macon than New York is from Philadelphia—give only fringe coverage of the market. Only two stations deliver the entire, rich 47-county Macon Market... WMAZ and WMAZ-TV.

To move merchandise, go Macon. To go Macon, use ...

QUARTER-CENTURY REPORT

THE WORLD was still big in 1931. To fly around it was a daring trick. To talk around it was a novelty. Sight ended at the horizon.

Since then man has learned to use the air to shrink the earth. At jet speeds he transports himself from continent to continent. He talks with ease between the hemispheres. His field of vision is not global yet, but until it is he may content himself, if he is an American, with his present ability to see some 3,000 miles.

Radio in the U. S. was securely established in 1931, although its great growth period was still to come. There were 608 am stations and radio sets in two of every five U. S. homes. Fm was 10 years away. Television was in the crude stage of early experiment.

In 25 years am stations increased to nearly 3,000; fm was begun amid high hopes, was outshone by the coincidental development of television, is now at a level of 527 stations on the air; television was transformed from a laboratory oddity to the most miraculous communications device ever known, with nearly 500 stations operating. Almost every American home is a radio home; three out of four homes have television.

The reports which follow are not merely a record of what has been. They are a record of what is in the light of how it came to be and a forecast of a future that promises to be even more exciting than the tumultuous, productive past.
WHERE HAS THE MONEY COME FROM?

LUCKILY for radio and television, as well as other media, television burst upon the American scene in the midst of a fantastic advertising boom. The boom was generated, of course, by the rocketing U. S. economy and, to at least some extent, by the tremendous growth of television itself.

No matter what its source of fuel, the advertising business for the past 10 years has been an amazing business, indeed it has been out-racing the economy in general. As the top chart on page 109 shows, total advertising expenditures have been climbing faster than total disposable income, the target at which advertising shoots.

In 1945 total advertising expenditures were $2.8 billion and total disposable income $1.503 billion. In 1955, both had soared—advertising to better than $9 billion, income to better than $27 billion. But advertising rose more rapidly—from 1.9% of income in 1945 to 3.3% in 1955.

Advertising had sunk to 1.9% of disposable income in 1945 after a period of production and scarcities of consumer goods. It had recovered considerable momentum in the postwar period before television came along to help give it an unmeasurable but definite kick.

In 1949, the first year that television expenditures were estimated, total advertising volume was $5.2 billion, 2.7% of disposable income. That was about the ratio of advertising to income that had prevailed before the war (2.9% in 1937-38, 2.8% in 1939, 2.7% in 1940).

How much television and the general economic boom contributed individually to the increase in advertising to 3.3% of income in 1955 cannot, of course, be determined, but obviously both provided push. Television added to the total advertising volume, but it also subtracted something—though it is impossible to say how much—from old media.

In gross dollars, the other key advertising media have not suffered acutely since television arrived. Newspaper advertising increased from $1.9 billion in 1949 to $3 billion in 1955—a little above the television increase of $58 million to $1 billion (see chart in middle of page 109). Magazine advertising was up from $492 million to $723 million. Only radio advertising slipped in dollar volume—from $571 million in 1949 to $545 million in 1955. (There is evidence the radio volume will be bigger this year.)

But dollars do not tell the whole story.

The size of bite that each medium has been taking out of the total advertising pie has diminished since the advent of television. As the bottom chart on page 109 shows, the percentages of total advertising going to newspapers, magazines, radio, and television have steadily declined since 1949, the only exception being the gain recorded from 1954 to 1955 by newspapers.

In 1949, newspaper advertising accounted for 36.8% of total advertising, magazine 9.5%, radio 11%, television 1.9%. Television made its appearance that year with 1.1% of total advertising.

In 1955, newspaper advertising was 34% of the total, magazine 8%, radio 6%. Television advertising was 11.1% of the total.

What has happened since television came along is that newspapers and magazines have continued to gain in dollar volume (because of the great growth of total advertising volume) while radio slipped. But the rate of expansion of all three other media has been decelerated. Their futures obviously will be determined not only by their ability to compete with TV (and with each other) but also by the general state of advertising. The surest guarantee for the health of all four major media would be a continued growth of the U. S. economy and with it the growth of the total advertising effort.

In the 19 years that disposable estimates have been available (1937-55) $82.5 billion has been spent for advertising.

Newspaper advertising has accounted for 35.3% of it, $29 billion; radio for 9.7%, $8 billion; magazine for 9.5%, $7.8 billion; television 4.2%, $3.4 billion.

In the seven recorded years since the beginning of TV, total advertising has amounted to $49.4 billion. Newspaper advertising was 34.7% of it, $17 billion; radio 8.3%, $4.1 billion; magazine 8.6%, $4.2 billion, and television 6.9%, $3.4 billion.

In those same seven years the character of advertising in various media changed.

Conceivably more than half (57%) of total radio advertising was spent by national advertisers (network and spot) in 1949. Local business accounted for the rest.

In 1955 the proportions of national and local advertising on radio were most reversed. Local business was 59%, national only 41%.

Newspaper advertising has been predominately local historically. Local advertising constituted 75% of the newspaper total in 1949 and the same percentage in 1955.

Magazine advertising, of course, has been all national.

It was the strength of newspapers in the local advertising field that enabled them to keep on gaining dollar volume after television. For television has been predominately a national medium ever since it had the first vestiges of national coverage. In 1955 national advertising amounted to 78% of all television business.

Radio has had to adjust its operations to build up local revenue as replacement for that which it lost in the decline of its share of national advertising. All indications are that it is succeeding in the adjustment. Local radio advertising volume has increased by year, in the face of dwindling total radio volume. Spot radio advertising has held firm and this year appears to be rising significantly. These two will probably succeed this year in getting radio back on the upward curve despite the continued sluggishness of network advertising.

Figures for advertising so far used here pertain to advertising expenditures—all the money which advertisers spend in their numerous advertising efforts. Only a part of these funds, of course, reaches the media.

The tables on this page show the revenue taken in by radio and television from time sales during the years.

Dollar expenditures in four key media have been rising, except for radio which sagged in 1953-54-55 (but is expected to rise this year). In 1937-55 newspaper advertising rose from $872 million to more than $3 billion, magazines from $192 million to $723 million, radio from $165 million to peak of $624 million in 1952. Television zoomed from $58 million to $1 billion in seven years.

But despite rising dollar volume, newspaper, magazine and radio advertising trail total advertising rise. Curves in chart above trace percentages, year by year, of individual media compared to total advertising. In these terms, newspapers peaked in 1937, with 42.1% of total advertising, magazines in 1945-46 with 15.7%, radio in 1944 with 14.8%. TV peaked last year with 11.1%, but obviously is headed higher.
In the 34 years since the first known broadcast commercial, radio and tv have sold everything from 'high grade' dwellings to 'mm-mmm good' soups by means of dramatic episodes, jingles, program integration, subtle wit and shrill exhortation—to name only a few.

AT 5 p.m. on Aug. 28, 1922, an announcer stepped to the microphone of WEAF New York and said:

"This afternoon the radio audience is to be addressed by Mr. [H. M.] Blackwell of the Queensborough Corp., who through arrangements made by the Griffin Radio Service Inc. will say a few words concerning Nathaniel Hawthorne and the desirability of fostering the helpful community spirit and the healthful, unconfined life that were Hawthorne's ideals."

Mr. Blackwell then came forward and talked for 10 minutes about the happy, healthful, unconfined advantages of Hawthorne Court, a group of "high-grade dwellings" in Jackson Heights, New York, where people "can enjoy all the latest conveniences and contrivances demanded by the housewife and yet have all of the outdoor life that the city dweller yearns for but has undoubtedly supposed could only be obtained through purchase of a house in the country."

In the spirit of Nathaniel Hawthorne, then 58 years dead, Mr. Blackwell exhorted the "city martyrs" to heed the "cry of the heart," a voice which he described as clamoring for "more living room, more chance to unfold, more opportunity to get near Mother Earth, to play, to romp, to plant and to dig."

"Let me enjoin upon you"—Mr. Blackwell now was warming to his task of really selling the Hawthorne Court apartments—"as you value your health and your hopes and your home happiness, get away from the solid masses of brick, where the meager opening admitting a slant of sunlight is mockingly called a light shaft, and where people grow up starved for a run over a patch of grass and the sight of a tree."

Thus radio listeners in New York heard what is generally accepted as the first radio commercial. It is testimony to the innate appeal of the medium that the first was not also the last.

By way of contrast, a few months ago Campbell Soup Co. filled the western airwaves with a series of commercials, carried on an ABC regional network, that consisted in their entirety of phrases like: "Campbell soups are mm-mm good."

These chronologically extreme examples are neither the long nor the short of the commercial, but side by side they point up the distance that the broadcast sales message has come. En route, it has taken many forms—dramatic episodes, jingles, program integration, subtle wit and shrill exhortation, to name a few—and when it got into television it became a complex thing whose production, once involving one man and a few dollars, enlisted scores of people, cost thousands of dollars.

Actually the Hawthorne Court apartments, of which Mr. Blackwell thought so highly and talked so long, were not the first products sold by radio.

Some seven years before that, in 1915, a young fellow named Arthur B. Church, whose name later became synonymous with KMBC Kansas City, helped build himself a business in radio parts and supplies by "advertising" them over his ham station GWJ in Lamoni, Iowa. And in 1919 Dr. Frank Conrad, on his experimental XSK (later KDKA Pittsburgh), boosted the business of a friendly music store by giving it on-the-air credit in return for free records with which to program his station.

The Pre-emption

Sponsorships increased gradually after Queensborough Corp. paid WEAF $100 for its 10 minutes. On WEAF, A&P figured big—and, incidentally, was one of the first victims of the institution that later became known as The Pre-emption: On the night of Nov. 15, 1926, when NBC's inaugural program was presented, listeners to WEAF heard this announcement:

"Thanks are due the Great Atlantic & Pacific Tea Co., which regularly engages these facilities, between the hours of 9 and 10 p.m. on Monday evenings, for they have consented to withdraw tonight's program by the A&P Gypsis so that we may broadcast the special opening program of the National Broadcasting Co. . . ."

NBC's special opening program was presented without sponsorship, but the next night WEAF and a lineup of 13 stations carried a sponsored program of music from 8 to the odd closing time of 8:33, with opening and closing commercials as follows:

"These facilities are now engaged by the makers of Scott's Emulsion of Pure Norwegian Cod Liver Oil for the broadcasting of another Vikings program."

And:

"The Vikings come to you through the courtesy of Scott & Bowne, the makers of Scott's Emulsion of Pure Norwegian Cod Liver Oil."

The closing announcement also invited listeners to let the sponsor know what they thought about his program. "Each of you who writes," the announcer said, obviously wanting to find out how many were listening, "will receive a copy of the Viking Hand Atlas of the World."

The Vikings program was followed that night by a series of other sponsored programs utilizing assorted station lineups. Among the programs were the Jolly Buckeye Bakers, sponsored by Buckeye Malt Syrup; Eveready Hour, sponsored by National Carbon Co., and an account of the auction bridge games sponsored by U.S. Playing Card Co. Almost uniformly their commercials followed the 'These facilities are now engaged by . . .' line.

The evidence of the Queensborough commercial to the contrary, commercials at the outset clearly were expected to be kept to a bare mention of sponsor and product. As far back as about 1923, when Browning, King & Co., New York—one of the first broadcast advertisers—applied to AT&T for time on WEAF, a set of rules had been laid down by that station:

1. Entertainment on sponsored programs had to be up to the standard set by the station for its sustaining programs; (2) the commercial must be kept, so far as reasonably possible, to the mention of the name of the sponsor and product; (3) mention of price was forbidden; (4) if the sponsor failed to conform to these rules, the station could cancel his advertising.

The commercials went a little further however, in the first sponsored broadcast on CBS. That was an hour and five minute program—nothing seemed to come out ever in those days—immediately following the CBS inaugural show on Sept. 18, 1927. The program consisted of music, jokes (?), and patter, with announcements by Maj. J. Andrews White, then president of CBS, and Harry C. Browne, who used the title of "producer." He told an entertaining story, and helped out with the commercials.

After a few preliminaries, the opening commercial worked into this:

Judge: ... Well, then, I'm representing the Emerson Drug Co. of Baltimore, Md. I know you recollect that little blue bottle o' Bromo Seltzer well, that's one of the things we make. Am I permitted to say all this? Major White: You say it first and then ask me if you are permitted. Pretty wise old fox. Go on."

Judge: "No, I guess I told enough. Every body knows Bromo Seltzer so well, we an' already acquainted anyhow . . ."

A little later in the program the
We make our bow

"Edmund Burke said that there were Three Estates in Parliament, but in the Reporters' Gallery yonder there sat a 'Fourth Estate' more important far than them all."

—Carlyle's Heroes and Hero Worship

And now Radio! Who is there to gainsay its rightful status as the Fifth Estate? Powerful medium for the conveyance of intelligence and entertainment to the masses, Radio Broadcasting has come to take its place alongside "the Lords Spiritual, the Lords Temporal, the Commons and the Press" to whom the redoubtable Burke alluded in one of his unpublished flights of oratory.

Radio as the mouthpiece of all the other Estates occupies a peculiar position of its own in American life. It furnishes all of man's other high Estates voices that reach far beyond their cloistered chambers, their limited social circles, their sectional constituencies and their circulation areas.

But beyond all that, it brings new cheer, new intelligence, new light to the multitudes in providing all the many and diversified forms of education and entertainment that the human ear can convey to the mind. Soon sight will be added to radio's voice; and when and how, it is too soon to say, but that it will be added to radio's voice, when and how, it is too soon to say, but that it will the best minds of radio are agreed.

All this broadcasting does in this country while sustaining itself as an economic entity, without the direct aid or subsidy of government. It does all this, under the American scheme, while lending new stimulus to business by making available to business a new vocal medium of sales approach. It does all this, we believe, without encroaching upon, but rather in close cooperation with, the other realms of education, entertainment and business.

Broadcasting makes its bow firm in its belief in the American system of radio. With all its youthful faults, Radio by the American Plan still expresses a certain genius of the American people—the genius of free enterprise.

It would be idle here to expatiate upon the blessings, the faults and the future hopes of radio. The columns of Broadcasting will be devoted to the news of radio, particularly to bringing the various elements that make up this great art and industry to a greater awareness of another. Broadcasting intends to report, fairly and accurately, the thoughts and the activities that motivate the field of broadcasting and the men who are guiding and administering broadcasting.

To the American system of free, competitive and self-sustaining radio enterprise, this new publication, accordingly, is dedicated.

Co-founder, Editor, Publisher
BROADCASTING
VOLUME 1, NO. 1 OCTOBER 15, 1931

85,000,000 WORDS LATER...

It is evident that these memorable words came from a man of vision. The high standards set forth in Sol Taishoff's first editorial pointed the young Broadcasting magazine in the right direction. Twenty-five years and 85,000,000 words later these high standards have become promises fulfilled and a job well done.

Sol Taishoff envisioned high standards for the "Fifth Estate" as well as for his new publication. Just as BET has ably served the broadcast industry through 25 growing years...so WTCN has, for the same quarter of a century, served the Upper Midwest.

At WTCN Radio and WTCN-TV we turn toward the years ahead with eagerness and enthusiasm to continue to "bring new cheer, new intelligence and new light to the multitudes."

MINNEAPOLIS-ST. PAUL
ABC Network
THE use of premiums in radio and television advertising has become one of the commonest commercial techniques. Here’s how the first network premium offer originated, as recounted by Duane Jones, agency veteran, in his book, Ads, Women and Boxtops, which was condensed in a B + T series of articles in June, 1954:

The first network radio application of a special premium technique to a nationally advertised product occurred in 1933. Benton & Bowles offered a seed deal on the air in behalf of Colgate-Palmolive-Peet’s Super-Suds.

As contact man on the account I had suggested the deal. To my knowledge, it was the first boxtop offer ever carried by a national radio network. And it was the first seed premium ever offered by air. Furthermore, it was the first campaign ever conceived as a fundamental package goods advertising technique. It was made for the corner of a new sales structure, a form of advertising not yet born. It presented an entirely new sales approach. Although no one knew it then, in time it would become one of 15 techniques used exclusively for package goods advertising. It would help to make millions of women habit-minded in their purchase of packaged foods, drugs and other commodities.

But when I suggested the idea to Bill Benton, co-founder and then head man of Benton & Bowles, and destined later to become one of Connecticut’s august United States Senators, he told me it sounded like sheer madness—a diabolical form of financial suicide.

"Who ever heard of paying such a terrific sum for radio time just to give garden seeds to listeners?" he said. "Why, the whole thing is absurd!"

After much persuasion, however, he finally consented to take a chance, but from that moment I was painfully aware I was a marked man if it failed.

Having come from the West Coast, I was acutely conscious of the pulling power of the name, Hollywood. So I decided to commercialize this magic to the utmost. With that in mind, we announced the offer as a Hollywood garden, one with gorgeous flowers like those grown by the movie stars, available to all takers for only a dime and a Super-Suds boxtop.

We carried the deal nationally for ten days over NBC on a daytime serial, "Clara, Lu ‘n Em", and it drew more than 600,000 returns. Naturally this was sensational. It was both colossal and supercolossal.

"Well," I said to Benton, "we sold more than half a million packages of SuperSuds in ten days—an average of 60,000 a day. What’s more, the premium washed its own face—paid its own way." "Not bad," Benton grinned, "Not bad at all. I told you all the time it was a swell idea. I thought it was terrific right from the start."

Boxtops and Broadcasting

"For those who are listening in and who may have tuned in late, this is the Effervescent Hour in charge of Judge Browne, representing the Emerson Drug Co. The Columbia chain station to which you are listening will now identify itself..."

A few jokes and musical numbers later, time came for another sales message:

Judge: "... It seems to me, suh, that the folks out there who are listening may not know as well as we do the virtues of that dainty, delightful, appealing, exquisitely refreshing—"

Major: "Yes?"

Judge (laughs): "... fragrant, delectable, soda fountain drink, Ginger Mint Julep."

Major: "You are entitled to tell them what it is, suh."

Judge: "Tell them what the Ginger Mint Julep is? There aren’t words sufficient for expression, suh."

Major: "You were going along pretty well a moment ago."

Judge: "Why, I hadn’t got started, Major. The only way you can ever know how good a Ginger Mint Julep is, is to try it."

Major: "And how do I rate that distinction?"

Judge: "It is my pleasure, suh, to extend to you this little hospitality, if you will accept the drink."

"Now, here it is, and if it doesn’t remind you of putting your face into a fragrant bed of mint and sipping the nectar fit for the gods, suh—well, I know it will mean more than that to you. And while you are enjoying its cooling flavor, I shall endeavor to indicate the contrast by having a hot number played by the Ginger Mint Julepers. This number is known as ‘Let Her Fizz.’"

End of commercial, suh. For the closing, Major White said:

"That brings to a close the visit of Judge Browne and his friends from Baltimore, appearing very frankly in the interest of the Emerson Drug Co., which makes Bromo Seltzer and Aperio and Ginger Mint Julep, and we leave you with the refrain of the appropriate song of this old established concern—‘There Is No Love Like The First Love’;"

Apparently the commercials, or the program, or both, brought a pleasing reaction. The following week Judge Browne told his listeners that “we are gratefully conscious and appreciative of the many kindly comments made across the counters of soda fountains throughout America about Ginger Mint Julep and its delightful bouquet.”

And right there Judge Browne and Emerson Drug got into what was to become a familiar broadcast habit: they announced a contest. "So," said Judge Browne, "the Emerson Drug Co. announces to the soda fountain dispensers their mailing to them the best comments of whose whom they serve..."" Pretty good rewards, too: $500 each month for the 10 best comments; $250 for the next 10; $150 for the third 10; and $100 for the fourth 10.

For the most part, the early commercials were practically carbon copies of the sponsors’ print ads. One exception, American Tobacco Co.—which later came up with such unforgettables as the chant of the tobacco auctioneer and "SOLD American!"; LS-MFT, " ‘Be Happy, Go Lucky" and the Hit Parades of both radio and tv—inaugured in the early days put its print copy on the air virtually without change. This was about 1928, and the habit among major advertisers continued for several years.

Not until 1934, in fact, did an agency hire a copywriter to handle radio commercials exclusively. The agency was Young & Rubicam. The copywriter was Joseph A. Moran, now vice president of Y&R. In Mr. Moran’s words, radio commercials were first written, they were written by the left hand of a right-handed copywriter."

But changes came, and the late 1920s and early 1930s brought a number of new developments—among them informality in handling the sales message, the dramatized commercial, the integrated commercial, the haberdash of kidder’s premiums.

Among the earliest dramatized commercials was one for Fels-Naptha soap which was heard about 1929. It was a long-winded story of a girl who won a handsome man sion by proving she was a good housekeeper and her proof? She used Fels-Naptha, of course.

The integrated commercial was born, according to the best available vital statistics, in the mid-30s—about 1934-35—with Fred Allen, Ed Wynn, Jack Benny, Burns & Allen, and Phil Baker among the foremost practitioners of this new art form (also see Benny interview, page 118). Many of these performers also found in this technique an unpassable opportunity to kid the commercial, which they did with considerable sales effectiveness. It was an approach that was developed into a way of life by Artie Godfrey and other latter-day salesmen.

The early ’30s saw the networks shak off one set of shackles which they had in posed on themselves from the beginning (but which many stations had disregarded in their own commercial operations). This was the ban on quoting prices on the air.

In July 1932 NBC withdrew its price-mention prohibition insofar as daytime hours were concerned (except on Sundays). R.C. Witmer, NBC sales vice president at the time, explained that NBC felt prices would be interesting to housewives. First advertiser to take advantage of the new policy was A&P, then one of NBC’s largest accounts, which listed the prices of certain commodities on two morning programs.

Two months later both CBS and NB lifted the ban—for nighttime as well as day. A&P again was first in line, carrying price mentions on the A&P Oyster on NBC c Sept. 12, 1932. CBS’ new policy became effective three days later, on Sept. 15. Both networks imposed limits on the number of...

BROADCASTING-TELECASTING MAGAZINE

Few men in the broadcast industry have done more for our business than has Sol Taishoff, leader of a great team. It's a real pleasure to say it... and to pay for saying it.

A tireless worker, yet with always a few minutes to spare for any of us, Sol has proven a powerful friend and a potent voice in broadcasting's behalf.

Few industries, if any, have a trade magazine to compare with the Taishoff team's handiwork, and we point to BROADCASTING-TELECASTING with justifiable and sincere pride.

Sol Taishoff has won marked success—and he well deserves it. We hope he and his guys and dolls have many, many more years of forward progress.

31 YEARS IN RADIO — 6 YEARS IN TELEVISION

THE QUAD-CITY FAVORITE
Rock Island, Moline, East Moline, Illinois; Davenport, Iowa
price mentions permissible within 15-minute periods.

A mid-30s development that worked itself into a future was the transcribed spot announcement. Cecil Widdifield of Schwinmer & Scott Adv, has been credited with pointing out the commercial possibilities of the 20-second intervals between programs—and with selling the idea of the transcribed spot. Comedian George Givot (“The Greek Ambassador”) was one of the first—if not the first—to be featured in a series of transcribed announcements.

Pretty soon, transcribed commercials were being heard all over the U.S. In the 1940’s a related phenomenon, the transcribed jingle, had become the rage—and to many, the bane—of radio. A storm developed, in which some stations banned all jingles. In 1944, WQXR New York imposed such a ban (and it still stands; a fortnight ago, Barney’s clothing chain went to the expense, in order to get its commercial on WQXR, of having its “Calling All Men to Barney’s” jingle arranged and recorded as an instrumental number to be played on WQXR without words).

Also in 1944, WWJ Detroit announced it was banning not only jingles but all transcribed announcements, effective the following Feb. 1. Harry Bannister, then manager of WWJ (now NBC station relations vice president), explained that the move was made to enable the station “to carry out its mandate of operating in the public interest. We believe that transcribed announcements have impaired the entertainment value of radio . . .”

Agencies were concerned by the move; meetings held at which alternatives to the WWJ ban were proposed and considered. But WWJ held fast, at least for the time being. WWJ representatives explain that the ban remained in force throughout the rest of World War II and on to about 1948, when it was dropped.

Singing commercials meanwhile were the subject of considerable research. Pulse Inc. reported on the basis of a study made in 1947 that, whatever their artistic value, they must have selling power: in each of five separate product categories, Pulse found, brands identified with singing commercials were remembered best.

The singing commercial that touched off the jingles wildfire was “Pepsi-Cola Hits the Spot,” which hit radio about October 1939. But this was not the first.

Earl Gammons, former Washington vice president for CBS, now a consultant, has been credited with offering the first singing commercial on Christmas Eve, 1926. The

GEORGE WASHINGTON

BY FAR the most controversial figure ever to explode upon the modern advertising scene was a rotund authoritarian who was named George Washington Hill.

Mr. Hill is the man who used radio to sloganize Lucky Strike into the top-selling cigarette for 12 of his 21 years as head of American Tobacco Co., according to company figures and awards.

Mr. Hill wore his hats indoors, but he still had a way with women. He added American womanhood to the cigarette market almost single-handedly shortly after he succeeded his father as president of American Tobacco in 1925. Aware that the ladies restrained themselves from the “vice” of tobacco only because they thought it wasn’t ladylike, Mr. Hill set out to tell them, by advertising, that that idea was a myth.

In 1928, he entered network radio to introduce the now-classic slogan, “Reach for a Lucky instead of a sweet!” When the figure-conscious ladies responded by the thousands and the candy companies started revolting against this tack, the Federal Trade Commission warned Mr. Hill to desist. Mr. Hill thereupon began telling his new-found customers to “Reach for a Lucky instead!” By 1931 Lucky Strike was leading the cigarette pack.

In the depression years of the Thirties, when most people felt they were wallowing in luxury to have a radio in the parlor, Mr. Hill had one in every room of his house. Here he liked to listen to his slogans on the Lucky Strike Radio Hour, forerunner of Lucky’s Your Hit Parade, and the radio advertising of his competitors.

Mr. Hill’s career as a radio impresario included the Metropolitan Opera, Hit Parade, Ben Bernie, Kay Kyser, Eddie Duchin, Jack Benny, Phil Harris, Wayne King, Information Please and columnist Dorothy Thompson. He liked his radio music loud and syncopated, with a minimum of “arranging.” According to a sketch of his career in the book, Sold American! distributed by American Tobacco Co., Mr. Hill “insisted the tunes be played just as people ordinarily heard them, feeling that the familiar context would help his commercials get across.”

A trademark of the Lucky Strike programs was the “chant of the tobacco auctioneer.” Mr. Hill paid two tobacco auctioneers $25,000 each a year to sound their nasal pitches which always concluded with the familiar “Sold American!” Radio, claims the biography, is the “one-word reason” why Lucky Strike was able to cut its number of salesmen in half while continuing to boost its sales.

As a “one-man” advertising agency, Mr. Hill was the undisputed boss of American Tobacco’s promotion, and although he had a corps of executives around him, their manifest efforts seem to have been used in restraining him until some of his more wild-eyed advertising schemes had cooled.

When World War II came, Mr. Hill was informed in 1942 that the gold panels and the green background on the Lucky Strike package would have to go because the gold panels were made from copper and the green from chromium, both metals critical to the war effort. The Hill biography describes how Mr. Hill was told by an executive that “just like the soldiers, green ink has gone to war.” The narrative continues:

“Hill’s pen hit his glass-topped desk like a thunder-clap. For the next few days he pondered over the verbal possibilities, and ‘Lucky Strike Green Has Gone to War’ was the result.”

The slogan was used only on the radio and on Luckies cartons and repeated over and over again, sometimes with no other identification. The slogan campaign broke very close to the North African invasion of 1942 and in six weeks sales of Luckies had jumped 38%. Besides that, American added, enough copper was saved in a year to provide bronze for 400 light tanks.

Despite Mr. Hill’s large purchases in radio, a Saturday Evening Post survey in 1945 showed that Lucky Strike in ten years had spent a total of $55.5 million in advertising, to sell 436.1 billion cigarettes, while its two main rivals spent $85.9 million and $84.2 million to sell 817.6 billion units between them. Thus, Lucky Strike’s “traceable costs” were 12.7 cents per thousand cigarettes as against 20.8 cents per thousand for the two major competitors.

While some of Mr. Hill’s slogans went awry and failed to sell Luckies and many others were eased out of ad campaigns by more conservative subordinates, one of his slogans, originated in 1942 and its initials used widely on radio as a teaser with no further identification, won full approval from Vincent Riggio, who succeeded Mr. Hill as president upon the latter’s death in 1946. This was “L.S./M.F.T.” (Lucky Strike Means Fine Tobacco). Mr. Riggio assured Mr. Hill he thought these words would last longer than any other ad the company had coined.

American’s narrative of the discussion ends this way “In his own broad pen-strokes Hill wrote out the initials and ordered them printed on the bottom of the white lucky pack. They are still there, just as he wrote them.”

Broadcasting Telecasting October 15, 1956 Page 115
station was WCCO Minneapolis, where he was then commercial manager. The product was Wheaties. And the commercial, sung by a male quartet, went so: “Have you tried Wheaties? They’re whole wheat with all of the bran. Won’t you try Wheaties? For wheat is the best food of man.”

From then till now there have been more jingles than man can count, much less sing. One of the hardest, dating from the early 1930’s is Jello’s choral “J-E-L-L-O.” Others among a vast lot of especially noted ones are “Duz does everything”; Adler elevator shoes’ “You can be taller than she is”; Chesterfield cigarettes’ “Sound off — for Chesterfield!”; Gillette’s chimes and “Look sharp—be sharp!”; Luckie’s “Be Happy, Go Lucky”; Arrid’s “Don’t be half-safe”; Halo shampoo’s “Halo Shampoo Halo”; Pepsi-dent’s “You’ll Wonder Where the Yellow Went.”

But the ring-tailed wow that led the parade was Pepsi-Cola’s. This was a product of the team of Allen Kent and Ginger Johnson (Herbert Austen Croom-Johnson), who had met at NBC and, about 1935, turned out a series of Mother Goose parodies that they sold to a bread sponsor.

Edgar Kobak, who now is a business consultant and station owner and then was with the Lord & Thomas agency but preparing to return to the old Blue Network, was one of a small group who, in 1939, encouraged Kent-Johnson to apply their talents to the writing of a jingle that would sell a 12-ounce bottle of cola for five cents. The result, using a frisky adaptation of the English hunting song, “John Peel,” is reprinted here for the benefit of the very young, the older deaf, and the extremely short-memory: “Pepsi-Cola hits the spot. “Twelve full ounces, that’s a lot. “Twice as much for a nickel too. “Pepsi-Cola is the drink for you! “Nickel, nickel, nickel, nickel. “Trickle, trickle, trickle, trickle. “Nickle, nickle, nickle, nickle . . .”

Pepsi-Cola not only liked the song but acquired the copyright as well, which it still holds.

Another unforgettable one, often credited with turning a tide of public resentment that was by then running against the singing commercial, was a ditty that BBDO brought out about 1944 featuring “Chiquita Banana” and making the point that refrigerators and bananas are not compatible. “Chiquita” was critical as well as public acclaim — and, given new lyrics containing dietary advice, received acclaim also from the radio head of the U.S. Dept. of Agriculture, from the head of Famine Emergency Committee, and from other officials for its work in combating the postwar famine in the world.

Meanwhile, the commercial had been introduced to tv.

The first authorized tv commercials appeared July 1, 1941, and were on WNBT (now WRCA-TV) New York, the only television station that was then ready for business with both a commercial license and a rate card. There were five.

(1) Bulova Watch Co. opened and closed WNBT’s transmissions that day with a visual adaptation of its long-familiar radio time signal — and promptly signed up for daily tv time signals for 13 weeks.

(2) Sun Oil Co. sponsored a television version of Lowell Thomas’ radio newscast over the Blue Network. For the cameras, announcer Hugh James read the commercials from a desk piled high with cans of Sun oil.

(3) Lever Bros. put on a special version of Uncle Jim’s Question Bee, one of its radio shows. "Aunt Jennie," star of another Lever radio series, did the commercials. Among other things, she opened a can of Spry and displayed its contents to viewers. and later cut and served a Spry-made cake to the cast and contestants.

(4) Procter & Gamble sponsored an adaptation of its Truth or Consequences radio series, in behalf of Ivory soap. In addition to the familiar "red hands" story for the viewers, contestants were given large cakes of Ivory whose labels were clearly visible to the home audiences.

In the 15 years since then, tv commercials have in many ways followed the evolutionary pattern of commercials in radio developing through trial and error, constant experimentation — and, by comparison with radio, almost staggering expense. Despite the comparative complexity of television however, several parallels might be drawn between the development of the sales message in the two media. It is to be doubted however, that television has yet produced the equal of a singing commercial that is said to have been carried on a Canadian radio station: “Dignity, peace, and more for your dollar "At CooperSmith’s Funeral Parlor.”
Two powerful voices of Western radio

Salute the powerful voice of All radio

Broadcasting - Telecasting
SOL TAISHOFF and STAFF
Congratulations
on their 25th Anniversary!

★ For 25 years KMPC, KSFO and their management have watched BROADCASTING grow in influence and size in the field of Radio. Under the guiding hand of Sol Taishoff and his loyal staff all these years, BROADCASTING quickly became — and has always remained — the outspoken advocate of every important improvement in broadcasting. Sol and the magazine he co-founded and still heads have helped us, as they have helped broadcasters throughout the U.S. We know today we render a better service to our communities because of Sol Taishoff and BROADCASTING. May you both celebrate a glorious 50th Anniversary, and may we be around to share the fun!

NO PERFORMER in broadcasting has kept at or near the top as consistently or long as Jack Benny. Here, in this recorded interview with B*T's Associate Editor Larry Christopher, Mr. Benny explains how he has kept his star shining for nearly 25 years.

Q: Jack, since you have sustained about the longest run on radio and television of a single personality during the past quarter of a century, your impressions are of special significance to the broadcasting profession at this time. For instance, how did you happen to decide to leave radio and devote full time to television?
A: I didn't have to decide. Television decided that for you. TV and sponsors. There's no such a thing as making a decision there. You go where you have to go.

Q: The decision is not up to the entertainer?
A: No. Not at all. I don't care how good your radio program is at the moment, if you have to make a transition to television and if you don't make a good one, it certainly isn't good for the star.

Q: What are the problems for the star in making the transition?
A: Some people might be very, very good in radio and not make it in television because maybe before radio they hadn't had real show business experience. On the stage. You see, television brings you back on the stage. I fortunately had had many, many years of experience on the stage, including vaudeville. Now, on the stage I used to do practically what Ed Sullivan does today except he goes for it pretty straight and I go for comedy. If I had started years ago and done that type of show, that would have been the type of show would be doing today. Now that would have been easy for me to do—a weekly show as an m.c. As long as I knew the acts that were coming in I could prepare for it and also do some work with them. Outside of that, on my first year I sort of had to feel my way around and it seemed that the oftener I did them the better the shows were because I got into the groove like I did on radio.

Q: You're on your seventh year in tv on CBS-TV and with great frequency than before, are you not?
A: For the last three years it's been every other week. Before that, once a month. Before that, once every six weeks. Before that, six years. And before that four a year. The fewer you do the tough they are.

Q: The frequency keeps you sharper?
A: Not only keeps you sharper but you don't feel the responsibility that you have when you only go on four times.

Q: Did you feel a more significant responsibility?
A: Yes. If you only go on four times then every show has to be knockout. This way, the way I go on now, if every show isn't great it doesn't make that much difference. I try to keep them great. (let me say, I try to keep them from being lousy!)

Q: Do you feel television is draining on your creative capacity much more than radio, the movies or vaudeville did?
A: I think it's a big drain on people. I must say fortunately it has been a little easier for me because of the build-up of the character
On October 15, 1931, a young man in Washington, D. C., eagerly thumbed through the 32 pages of a dream come true... the first issue of a new magazine, destined to serve, and grow with, the young industry of Broadcasting. As Sol Taishoff read the copy—most of which he had written himself—his dream leaped ahead, and he visualized a publication which should grow in importance and value as the industry grew.

Two years earlier... September 16, 1929, in Covington, Ky., another young man pushed a switch which put into operation his dream... a 5,000 watt radio station. L. B. Wilson, like Sol Taishoff, was a practical dreamer, and he, too, visualized the growth and importance of his dream during the years to come, when his station would be one of the nation’s most important.

Today... as Sol Taishoff, his staff, and his magazine celebrate its Silver Anniversary, Mr. Taishoff looks back on 25 years of constant growth and increasing importance to the industry it serves, of a great trade publication—The Bible of The Broadcasting Industry. It is the realization of his dream.

And during its 27 years—the growth of WCKY has paralleled that of Broadcasting Magazine. From a 5,000 watt station sharing time with three others—WCKY today, with 50,000 watts, is as powerful as any radio station in the United States. With a selling impact covering much of the nation, WCKY's position in the field is unchallenged. And although he isn't here to share it, L. B. Wilson's dream, too, is a reality.

WCKY has always recognized BROADCASTING • TELECASTING's Advertising value, too—

The fewer shows you do the harder they are.

Q: The impact of radio reaching such a mass audience, and later television adding its visual impact, these have been a vital factor in establishing this characterization, have they not?
A: Of course. It's the whole thing.
Q: You mentioned Ed Sullivan. Didn't you make your first radio appearance on his NBC show in 1932?
A: Yes, that's right. That's where they first heard me.
Q: How did it happen?
A: I had known Ed Sullivan for a long time and he asked me to be a guest on his radio show. At that time I was doing shows in New York in vaudeville. Vaudeville was beginning to die.
Q: Did you make a free appearance or for pay?
A: I don't recall. But the agency for Canada Dry ginger ale heard me and called me and gave me a job. We went on then for 39 weeks.
Q: What was your first reaction to this new medium after so many years on the stage?
A: Well, the reaction was a little bit frightening because in vaudeville you had one show and that was it. You changed it whenever you felt like it. And in this, when you realized that every year you needed a new show, this got a little bit frightening. But your storm through it some way because everybody is in that same spot.
Q: As a talent personality, what was it like to find yourself looking to a sponsor instead of a box office? Did you meet the Canada Dry people?
A: Oh sure. I don't recall our first meeting. All I recall is leaving the stage show. You see, I was always looking ahead for something. Sometimes I left good jobs. I didn't have much money in those days. I was making good money, but I used to spend it all. But I always looked ahead. And I said, "If this is the new medium, then I must get into it." So I left the stage show, Earl Carroll's Vanities. I asked for my release from a show for which I was getting $1,500 a week. This was a lot of money in those days. And I left to try and get into radio. I didn't even have a job. I turned down $1,500 a week and didn't have a job. My wife agreed with me that I was doing the right thing. As a matter of fact, she sort of encouraged it. She said if it's the thing to do to get into radio, then get into it. Don't worry, she said, they'll find you someplace.
Q: Was radio inevitable in your mind?
A: There is probably no doubt even had I finished the season I would have gotten into radio sometime. But I realized while I was with the show that names we had never heard of beforehand had become more popular around the country than we who had been in show business all of our lives. Some of these people had no background of show business. It was just the fact they were hitting the whole country all at once. So I thought, well, if these people are in it without any great backgrounds and have a bigger reputation than any of us around the country who have worked in show business all of our lives, this is the business to get into. . . And the only reason I got a release from the Vanities is because they were going back to the small cities after leaving New York and Earl Carroll at that time probably was very happy to lose me at $1,500.
IN SAINT LOUIS

they turn to...

KSD-TV

The viewers turn to KSD-TV for the special, the spectacular and the best. So KSD-TV with its 10 years of experience in television, was selected to televise the 90-minute remote “Spectacular” from the world-famous St. Louis Zoo to a 74-station network. Involved were 8 cameras (one on a special fork-lift truck), a mile of camera cable, an air conditioned, studio-equipped truck trailer, a microwave tower, and a staff of 32 men.

NBC SPOT SALES

THE SAINT LOUIS POST-DISPATCH STATION
I'd rather get a laugh . . . that I paid for.

It's a hard thing to have as a kind of a thing of your own, but to have it is a difficult thing. When you've paid your money, you're ready to go and do what you want.

Q: Why did you cancel your association with General Foods?
A: I think that finally the last couple of years they switched to Grape Nut Flakes. When we first took over for Jello, the product wasn't selling.

Q: How long did you stay with General Foods?
A: About 10 years. It was in 1944 when I switched to Lucky Strike because I was in the South Pacific in '44 and when I came back I went with them.

Q: Did Niles Trammell negotiate for them?
A: Yes, I did. I was handling the sponsorship of the show and was able to negotiate for them.

Q: Why did you cancel your association with General Foods?
A: I just wanted to switch. I thought I should go with another product.

Q: About 1940-41, you had achieved a very unique thing with respect to your Sunday night 7 p.m. spot on NBC. You became the only personality in radio to control his own time period.
A: That's right. NBC gave me the time and as long as I was staying on it I could have the 7 o'clock period. Any sponsor who got me got that time.

Q: What were the steps leading up to this unique contract with NBC?
A: It came up because I had an opportunity to leave them. No, I'll tell you how it came up. I was going to leave General Foods the year before. That would have been 1940. I intended to leave my present sponsor and go with somebody else and my present sponsor wanted to keep the time whether I left him or not. So NBC came along and said if you will stick with General Foods this time we'll see that you'll always have 7 o'clock Sunday as your time. So I renewed with General Foods.

Q: Did Niles Trammell negotiate this for NBC?
A: Yes. But this was not contractual. This was merely a letter.

Q: When you dropped General Foods, how did you happen to sign with American Tobacco Co.?

**SO, ON TO LUCKY STRIKE**

A: There were five different companies that went after whatever deal we wanted. I didn't recall at this time. The two of them we were trying to decide on were Campbell Soup Co. and American Tobacco and I finally picked Lucky Strike because of a man in the agency that I happened to know who represented Lucky Strike at that time, he sort of brought me over that way.

Q: Who was this person?
A: Don Stauffer.

Q: That was Sullivan, Stauffer, Cowell & Bayles then?
A: I believe so.

Q: Did you think this personal relationship was important for the best development of the show?
A: Well, I felt that I had one person whom I knew to work with should there be any problems. Because I used to hear at that time that the president of American Tobacco who was George Washington Hill was tough to work for. But we didn't find him that way at all. He was simply wonderful.

Q: Do you remember your first meeting with George Washington Hill?
A: Yes. I didn't meet him until about four months after I was working for him.

Q: Where was this?
A: I had lunch with him at his office. And he said a very, very wonderful thing to me. A very funny thing, let me put it that way. He knew he had a reputation for being tough, so as we sat down to

If you depend on salary, you'll go broke.

Q: In later years you moved over to CBS and were one of the first to work out the capital gains arrangement so familiar throughout show business today. Like Amos 'n Andy, the talent property became a business property, did it not?
A: That wasn't my case. My case was that I had a company and more than just my own show. We started on CBS Radio network Jan. 4, 1949. My company was Amusement Enterprises Inc. This is the company I sold. I didn't sell Jack Benny. I was just a stockholder in the company.
Q: The company itself packaged the programs and handled all the details of your activities?
A: That's right.
Q: I think this was one of the original capital gains arrangements in our profession. Wasn't the original case with General Eisen-book, which set the precedent after World War II, and then came Amos 'n Andy?
A: Well, you see, Amos 'n Andy had a legitimate deal because they themselves do not appear on any of their shows, so they have something all separate.
Q: They were selling the characterizations and you were selling a company?
A: I was selling a company with other shows. Like Let's Talk Hollywood. We had a movie, too. Whatever it was, the first year we had a profit-making company.
Q: What was perhaps the most influential factors in your decision to move from NBC to CBS?
A: To make some money like everybody else would like to make. That was the only reason. I was very happy at NBC. The deal was offered to NBC first. This was strictly a business deal for me to make some money. There is no way for an actor to make some money by getting a salary. If he depends on a salary, he'll know how much he makes, he's going to go broke eventually. I wouldn't care if I worked for ABC, CBS, NBC or the American Trucking Co. if there was a chance for show business to make some money.
Q: The salary concept, then, has not been satisfactory . . .
A: . . . Oh, as far as earning, as far as salary was concerned, nobody could make any more money than I did. But suppose right now I make half a million dollars a week, let's go that broad; suppose I was given a half million dollars a week, but it was salary. What could I get out of it? About five dollars.
Q: While you were with NBC, I assume you got to know others in the NBC-RCA organization in addition to Niles Trammell. For instance, Gen. David Sarnoff?
A: Never met him until after I went to CBS.
Q: What was the occasion of your meeting General Sarnoff after you switched to CBS, do you recall?
A: Not at all.
Q: Had you met Bill Paley before you went to CBS?
A: Oh yes. I had known Bill Paley for some time. Bill Paley and I were friends without even discussing my ever moving to CBS.
Q: Had you known Dr. Frank Stanton previously?
A: No. Frank Stanton I only knew after I moved there. But Paley I'd seen a lot of at parties in New York. He might have said once, "I'd like to have you with us," and that would be the end of that.
Q: Your present contract with American Tobacco Co., is it coming up for renewal soon?
A: It's a yearly contract.
Q: Your characterization and comedy format through the years, Jack, have been unusually distinctive. Take Fred Allen, for example, your approach was different. Oh, I'm reminded of your big "fight" with Fred Allen. Didn't that start in 1936?
A: Something like that. It was an accident.
Q: Did you see immediate public reaction to this interplay?
A: No. As a matter of fact, we did it just as a gag between ourselves. It didn't start out to be a feud at all. It just started out with Fred Allen saying something which I picked up the next week and then he picked it up the next week and so on. The first thing we knew we had it. Of course, I've always said that if Fred Allen and I ever had gotten together and said "let's have a feud" it probably wouldn't have lasted a month as it would have been contrived. Imagine what Fred Allen, God rest his soul, would have said about my appearance at Carnegie Hall Oct. 2. If he knows anything about it now, he is talking plenty. Say, that would have been a good line to use to Carnegie Hall, wouldn't it?
Q: What, perhaps, was different about your approach to the transition from radio to television. Fred Allen never made the change. I think that's one of the saddest stories in show business, that a man of such great genius . . .
A: . . . Well, Steve Allen describes this very, very well in his book. That Fred Allen was one of the greatest writing and creative comedians in the business. He was a fine comedian, a great writer. Probably better than an acting comedian, you know. And so, therefore, it might have been difficult for him to find the right thing to do. But, sometimes, even he could have found it accidentally. He might have something right away that would have been great for television. Right away. But he just didn't happen to do it. But by the same reason he didn't, he also could have. He just didn't get into the right thing.
Q: Many of the other old timers in radio made the switch to tv and have had their problems. Eddie Cantor began a syndicated series for Ziv but had to give it up. He makes occasional appearances now.
A: Well, I think in Cantor's case his illness took a big toll there. You know, he had this bad heart attack a few years ago and then an operation before that. It's very tough to think and be able to be successful when you have these other worries on your mind. You're too busy to do this and I imagine this would have quite an affect on anybody. A lot of his humor was physical too. Lots of jumping. No question he is a fine comedian.
Q: What about Danny Kaye's approach?
A: Well, he doesn't need anything. He doesn't need radio or television. His pictures, his personal appearances or wherever he goes, he does very big. He's a stylized kind of comedian who is excellent in what he does. He doesn't need any other facets of show business in order to stay one of the top comedians. Now, Bob Hope fits into everything.
Q: That takes considerable versatility.
A: Right. And energy. And he's got that. Besides, he's got a terrific personality and he's not only got a great wit but a great warmth in his personality. He finds time to do nice things for others. All together he's damn well liked. It's almost impossible for Bob to do the wrong thing. And if he does do anything wrong, he's forgiven almost immediately.
Q: Your good friend George Burns has certainly found a successful home in tv.
A: True. And George Burns is a very, very creative comedian. He does what I do in the fact that he's always got his hand in everything. He's got his hand in it from the time they start on the show.
Q: This close attention is very necessary, isn't it?
A: I think very few comedians or stars can be successful and not be a part of the whole organization working to make it a success. Only in the movies can this happen.
Q: In the final analysis, the comedian has to deliver the entertainment product.
A: That's right. He either lives or dies with it.

## The Ascending Statistics of Radio-TV Station Growth

IT was a generation ago, the post-war (World War I) era. It was the year of normalcy. Warren G. Harding was in the White House. The Jazz Age and the flapper were just coming into being.

And, also at its inception was radio. The American public marveled to voices in the air. And they were hearing them from what at that time seemed myriads of broadcasting stations—382 of them. The year was 1922.

Since then the number of radio stations has mounted almost 10-fold. The miracle of DX, so much a thrill of radio tuning in the 20's, has virtually disappeared with dozens of broadcasting stations in the backyard of almost every American. In fact, there are almost 3,000 am broadcast outlets on the air today—plus more than 500 fm stations and 500 tv stations.

In five years, 1922-27, the number of standard broadcast stations doubled. With unregulated individualism, broadcasters jumped all over the spectrum. This was the action which pushed the Radio Act of 1927 through Congress. In that year the Federal Radio Commission was established. Admiral W. H. G. Bullard was the first chairman, and he operated with 57 employees and a budget of $102,186 for fiscal 1928 which ended June 30 of that year. There were 677 radio stations on the air in 1928. In 1927 there had been 682 outlets broadcasting.

Seven years later the Communications Act of 1934 was passed by Congress and the present-day FCC was established. The number of radio stations had decreased between 1927 and 1934, but this was largely due to mergers of share-time stations. It was the only time in standard broadcasting's history that the number of outlets failed to gain. From then on the figures that tell the story of radio facilities have climbed every year.

There were not only 632 am radio stations operating by June 30, 1936, but there were also 21 “experimental visual broadcasting” stations in existence. Anning S. Prall was chairman of the FCC, and that two-year-old agency had 442 employes and operated on a budget of $1,146,885.

The number of World War II was reflected by almost 1,000 am outlets. As of June 30, 1942, there were 925 standard stations authorized, 60 fm and five tv stations operating. (There were 21 tv authorizations in that first year of “commercial” telecasting.) James Lawrence Fly was chairman of the FCC, which employed 2,108 (of which 733 were regular employees). The FCC operating budget was $5,658,024 (of which $3,340,695 was for regular expenses).

All during the war no new facilities were authorized, but by June 30, 1946, with the end of war-time restrictions, the number of radio stations moved upward ace. There were 1,215 am outlets, 100 fm authorizations (55 on the air), and 31 tv grants (six operating). This was the first year that fm operated on its new 88-108 mc frequencies. Charles R. Denny was FCC chairman and the Commission employed 1,345 and operated on a budget of $5,489,900. It still handled some war work.

Ten years later, June 30, 1956, there were 3,020 authorizations for standard broadcast stations, of which 2,896 were operating. There were 546 fm grants, with 530 on the air, and there were 609 tv authorizations, with 496 on the air. Republican George C. McConnaughey headed the FCC, which had 1,116 people on its payroll and operated with an appropriation of $7,323,000.

As of Sept. 30 of this year, the official FCC reports show 3,064 standard broadcast stations authorized with 2,958 operating 546 fm stations authorized with 527 on the air, and 620 tv outlets granted with 507 operating (including 23 educational). The FCC, still under the chairmanship of Mr. McConnaughey has 1,133 employees and is operating under a $7,828,000 Congressional appropriation for fiscal 1957.

## Wheeling and Dealing in Station Ownership

THE first recorded sale of a radio station was in 1927, immediately following the establishment of the Federal Radio Commission. It involved the assignment of the license of what was WBCN Chicago (250 w on 1040 kc) from Southtown Economist Foster & McDonnell to Great Lakes Broadcasting Co. This was approved by the FRC June 13, 1927.

Unfortunately, that is all the information given in the minutes of that June 13 FRC meeting. There is not even an inkling of how much the Great Lakes Broadcasting Co. paid for this facility.

In the early days, the FRC apparently did not care too much what the purchase price of a broadcast property was. No mention of price appears even in the work sheets prepared for Commission meetings. It is possible that somewhere in the discussion among the commissioners, the general counsel, the secretary or others of the staff, a price may have been mentioned. But no such data appears in the records.

Sales of stations obviously began taking place almost immediately after the start of broadcasting. Apparently all that was necessary in those early days was notification to the Dept. of Commerce or its successor the FRC, that a transfer had taken place.

There were other transfers and assignments in the first few months of the FRC Some of the call letters and the communities to which they were assigned still remain; others have lost their identity.

ARB: June 2-8, 1956
NEARLY three decades ago—April 7, 1927—Secretary of Commerce Herbert Hoover, in Washington, communicated by voice and picture with AT&T President Walter S. Gifford, in New York, in an intercity demonstration of wire television.

sold by Triangle Broadcasters Inc. to Goodson & Wilson. All these were approved by the FRC in July and August of 1927. All shared time with one, two or three other stations.

The initial issue of Broadcasting, dated Oct. 15, 1931, contained a news story telling of William Randolph Hearst buying what was then WGBS New York (500 w on 1180 kc, limited to Pacific sunset) for “an unnamed price.”

The very next issue of the News Magazine of the Fifth Estate, Nov. 1, 1931, carried another sales story; that of NBC buying 50% of WMAQ Chicago (5 kw on 670 kc) for a “reported $600,000.” The other half of what became NBC’s owned-and-operated midwest key origination outlet was kept by Chicago Daily News.

There was also a report in the Nov. 1, 1931, issue that CBS bought the remaining two-thirds ownership of WCCO Minneapolis (5 kw on 810 kc) from General Mills Inc. for $300,000.

The first recorded sale approved by the FCC, which succeeded to the FRC’s regulatory mantle in 1934, was that of WTRC Elkhart, Ind. (100 w day, 50 w night on 1310 kc), sold by Truth Publishing Co. to Truth Radio Inc. for $300.

Strangely these sums are still being paid for radio stations—but not in the primary markets. These are the current prices for good radio properties in the secondary markets—like independent daytimers WHIM Providence, R. I. (1 kw on 1110 kc), sold last year by Robert T. Engeles-C. George Taylor group to Frank Miller for $469,000, or KXL Portland, Ore. (10 kw on 750 kc), sold by Ed Craney and associates to Lester M. Smith and Lincoln Dollar for $450,000.

Or independent WTRY Troy, N. Y. (5 kw on 980 kc), sold last year by Harry Wilder and associates to Mowry Loewer-Robert T. Engles-C. George Taylor and associates for $500,000.

Stations in the major markets have gone for much higher figures. If Mr. Hearst were willing to spend $500,000 for WLW in New York in the 30s, a syndicate of J. D. Wra- ther- John L. Loeb-Richard D. Buckley was willing to spend eight times that amount for WNEW New York (50 kw on 1130 kc) last year when it paid more than $4 million to buy the property from Mr. Buckley and others. Mr. Buckley had bought the New York independent from William S. Cherry and associates in 1954 for $2.1 million. Mr. Cherry bought WNEW from Bernice Judice and associates in 1953 for $1.6 million.

Only last month the FCC approved the $2.5 million purchase of independent KFWB Los Angeles (5 kw on 980 kc) from Henry Maizlish by Crowell-Collier Publishing Co. (Colliers, etc.). And Westinghouse Broadcasting Co. has agreed to pay $5.3 million in Westinghouse Electric Co. stock to Ralph L. Atlass and associates for WIND Chicago (5 kw on 560 kc) and a permit for ch. 20.

Television transactions have, of course, seen multimillions paid for outlets. The pending Crowell-Collier $16 million purchase of the Binner-controlled Consolidated Television & Radio Broadcasters Inc. properties (WFBB-AM-TV Indianapolis, WOOD-AM-TV Grand Rapids, WTCN-AM-TV Minneapolis and WFDF Flint, Mich.) is the best example of that.

Only last Wednesday, the FCC approved the $10 million purchase by J. H. Whitney & Co. of the McConnell stations—WISH-AM-TV Indianapolis, WANE Fort Wayne, and WINT Waterford, Ind.

Others range as high. Giant Westinghouse Electric Co. paid $9.75 million in 1955 to get into its home city of Pittsburgh; it acquired ch. 2 KDKA-TV (then WDTV [TV]) from Allen B. DuMont Labs. for that sum.

Transcontinent TV Corp., a relatively new broadcast corporation, paid $5.1 million earlier this year to General Dynamics’ Strom- berg-Carlson Division for ch. 5 WHAM-TV and WHAM and WHFM (FM) Rochester, N. Y., and then sold the am and fm outlets to Riggs & Green Inc. for $500,000.

The first tv sale took place in 1949 when Palmer K. Leberman sold ch. 5 KING-TV Seattle, Wash., to Mrs. Dorothy Scott Bullitt for $375,000. And the following year, CBS bought what was then ch. 2 KTSI (TV) Los Angeles (now KNXT [TV]) from Thomas S. Lee Enterprises for $3.6 million.

There is speculation whether these prices are going to hold up. The general consensus is that for radio they will as long as general business conditions are up. Let business slide and so will radio prices. In tv there are two opposing views; one holds that tv is a growth industry and nothing can stop its steady advance upward (neither recession nor worse) and that just as in radio during the depression the values of tv will continue to increase. The other viewpoint holds that the many recent multimillion dollar sales are inflated beyond good judgement and that the day may not be too far off when the bubble may burst.
...and we always watch your station because the shows on WHTN-TV are always the best.

Sincerely,

James Brown

WHTN-TV
Channel 13
Huntington, West Va.

Dear Sirs:

Your Navy Talent Show is far the best to come out of Huntington yet. Those fellows are not only talented musicians but great actors. We especially liked their closing number. The little lady was very good too. Speaking of your station, your reception is perfect in our area.

Sincerely,

William Reutinger
Colon Park
Portsmouth, Ohio

Mr. George Miller
WHTN-TV
Huntington, West Virginia

Dear George:

I would like to express my appreciation for the fine job which you and your staff did on our commercials during the recent political conventions.

The sales created by these commercials were far beyond anything we had anticipated. We had a complete sell-out on the television and radio receivers featured on these commercials. We were amazed at the listening audience WHTN-TV pulled in spite of the fact that the conventions were being broadcast simultaneously on our local NBC and CBS stations. John Daly did a tremendous job and we have had many compliments from our dealers on Philco's choice of networks.

The results of these recent broadcasts have definitely sold us on WHTN-TV and we will be using your station more in our future advertising.

Yours truly,

[Signature]

Vice-Prez., Gen. Mgr.

Mr. George Miller
WHTN-TV
Huntington, W. Va.

Dear Mr. Miller:

We wish to thank the personnel and management of WHTN television for the splendid promotion and cooperation extended Bryant Motor Sales on its recent television spectacular.

On reviewing our recent sales, we are proud to inform you that our sales have been increased seriously. Floor traffic and phone calls have revealed the public interest in your station performance to us.

We look forward to negotiating a continued program with your station.

Yours truly,

[Signature]

Les Bryant

PORTLAND, MAINE
NO MARTINIS ON MADISON AVE.: TV LEAVES NO MARGIN FOR ERROR

RODNEY ERICKSON, an expert who knows advertising from the agency, broadcaster and advertiser viewpoints, is a vice president and radio-tv supervisor of Young & Rubicam, which in 1955 ranked first among agencies in volume of broadcast billings ($72 million). He joined Y&R in 1948 as a radio-tv producer (We the People, Fred Waring Show, and others) after serving with Procter & Gamble’s radio department in Cincinnati. Before that, he was a producer-director with NBC in New York and then Washington, later was with CBS in a similar role, and subsequently served WOR New York as director of program operations.

Here, in a recorded interview with B&T New York staffers Rufus Crater, Florence Small and David Berlin, he puts down his impressions of contemporary broadcast advertising.

Q: You’ve been around for quite a while for so young a man. What are the main changes in agency operation that you have seen as caused by radio and tv?
A: In the earlier days of radio, an agency man assigned to radio generally came from a network or a local station. On occasions he came from show business, from the theatre and even at times he was a performer. And his major function was to take one radio show—sometimes two at the most, a half-hour nighttime show or a daytime serial—and completely supervise it, and on occasions direct it and on occasions write it.

The heads of departments in those days generally came from this group of trained show business people. But the investment in a half-hour radio show was rarely over $750,000 to a million dollars a year for 52 weeks. And many new shows could be developed economically and many experiments could be conducted that if they didn’t turn out to be 100% correct, relatively little was lost—you started over again.

In those days, too, NBC and CBS not only dominated listening habits at night and with the serials in the daytime, but the act of getting a valuable time franchise on either NBC or CBS—and there was a standing list for any franchise—virtually meant the success of a program. In retrospect, it looked as though a lot of people had some easy jobs.

Q: Television made life tougher?
A: By comparison, radio was very simple. In fact several agencies, when television was invented, had little cans sitting on the receptionist’s desk which said “Help Stamp Out Television.”

I think this is certainly the attitude of a great many of the former radio people who found that they didn’t know how good they had it.

As television developed, very quickly it was apparent that it was going to be a high out-of-pocket cost medium; although on a cost-per-thousand basis it was and is indeed a good advertising buy. Very quickly, within six years, the cost of a television program rocketed to approximately $3 million a year time and talent gross for either a half hour nighttime program or a five-time a week quarter-hour daytime serial.

Now compared to the radio prices, this is about four to one higher than radio in out-of-pocket costs. Fortunately, the sale of television sets also sky-rocketed and the cost-per-thousands were favorable although a dollar a thousand homes in radio was not uncommon and some lower costs were achieved. If a television program achieves three dollars a thousand a commercial minute or nine dollars a thousand for a half-hour show, it is doing very well indeed. But the power of television—the selling power of sight plus sound plus demonstration—caused a transference from radio to television probably more quickly than it should have. As the dollar expenditures of television got greater, there were fewer and fewer dollars left for radio. Therefore, the agency radio departments quickly became the television departments. Then the trouble began.

Q: What kind of trouble?
A: At first the people who were trained in radio quickly transferred to television and the men were separated from the boys. Because of the grueling requirements of television it became necessary to nimbly make the adjustment from a million dollar expenditure to what is today a $4 million expenditure and the responsibilities that go with it. The suede shoes quickly disappeared, and the slacks and the sport jackets were gone, and the drinking of martinis at lunches became a thing of the past because it takes a sober and reflective man with iron will and nerves to conduct the business today.

The kind of a man has changed, too. More and more in the administration of a television department are fellows who can work slide rules, can understand Nielsen and all the ramifications of cumulative audience, cost-per-thousands, flow of audience and many, many aspects in which a judgment is made in either the selection of a program or the selection of a time period. And the adult weighing of these values often means the difference between a successful buy and a mediocre buy. There are very few bad buys in television actually.

Q: You speak of television costs being high. Aren’t values high also?
A: A program may range from a million homes to I Love Lucy or the $64,000 Question’s 17 or 18 million homes at the peak of the season. But yet there are values in all of these because of the power of the medium.

The average show now reaches 6 million homes. It costs 80 to 90 thousand dollars a week at this point. In a co-sponsorship deal without discounts, an advertiser with a single alternate week program can run $100,000 a week for alternate weeks. Added in these costs must be the cost of promoting the show, publicity expenditure, commercials—all gross costs in addition to time and talent.

As the out-of-pocket cost of television increases and the little cans sitting on the receptionist’s desk which said “Help Stamp Out Television” you realize that the great majority of their advertising expenditure is in television. The increase of agency billing in television in relation to total agency billing means an increase in percentage of responsibility as the television department for programming and the media department for the selection of time.

Q: What are some of the basic problems involved in putting together a successful television advertising vehicle?
A: There is one fallacy which ought to be corrected immediately before we go any further. No television program, per se, ever sold a nickel’s worth of merchandise. A program is only the vehicle which carries a commercial message.

So therefore, we start out with the premise the show gets the customers in the tent and then the “pitch” man comes in and makes the sell. Therefore, as much time should be devoted to the creation of a proper commercial

ABC Radio, 1090 kc, 50,000 watts
KING
Ask your BLAIR Man
As to the selection of a program. Both must be in balance to get perfect results.

But even if the commercial is tremendous and the program is colossal or even spectacular, the product has got to be a good product—it's got to have repurchase value, it's got to have distribution, it's got to have assurance of sales support and all these factors, and it has to have a well-designed package—or television is a complete waste of time and money. There is no way that a medium can make a bad product a good product.

Q: Will the agency still use summer programs as the trial period? Will they still use summer replacements for possible fall shows?

A: The economics of television dictate against it, unfortunately. There were only two situation comedies tried last summer. Both were received unfavorably by the critics but fairly favorably by the viewing public, which is generally the case.

The reason why this is difficult is that no matter how you look at it, a show costs $35,000 to produce and costs are going up in Hollywood. The summer audience because of the decrease by as much as 50% of sets in use does not justify this kind of a talent expenditure.

The second reason why it's difficult is that most shows are based on the principle of 39 originals and 13 repeats because the producer these days rarely gets his money out of the first run, and the second run is the only way he can be assured of profit. The general pattern is in the neighborhood of $35,000 for originals and $15,000 to $17,000 for repeats. The residual costs on the repeats run the producer about $5,000. Therefore, he gets $130,000 profit on his repeat which pays him in effect for the losses that he has on producing the originals.

While I'm on the subject, I might say according to information we received from the Coast almost every show is over budget this year. Costs range from $60,000 to $80,000 per show for these initial shows—which is unheard of in the past and is very frightening in its future relationship to what costs will be. There have been a cumulative series of 10 percenters; actors cost more, scripts cost more, production facilities cost more, a five day week has increased costs to a considerable margin. Costs are upward perhaps as high as 25% this year over last year.

Q: Color too?

A: Color will cost between $8,000 and $10,000 more as we know it today. These are the estimates we've been getting; we have heard of costs as low as $4,000 a show but these are not substantiated. The known film costs that we have are $8,000 per half-hour for color over the black and white.

Q: You say the ratio is approximately four to one as the cost of a television show to a radio show. What do you think it will be in the future?

A: For television, if the color costs go up proportionately, it could go up in the foreseeable future five to one. However, I'd like to say very quickly that these costs are always governed by supply and demand and they're also governed by a favorable cost-per-thousand. The plateau will shortly be reached in the growth of television because we're approaching saturation on the sale of sets and now the sale of second sets and color sets is responsible for about 50% or more of the sale of six million sets this year and six million television sets sold next year—as it is in radio, of course.

And competition is increasing. Multi-network competition is coming in as more stations come in and all we can expect, if you assume sets in use have reached their level, is that circulation will soon level out. It will only go up in proportion to the increase in the population and, therefore, cost-per-thousand must be pegged at a certain point.

The time has come when there should be a leveling out of television prices, but I would judge that five to one may be the leveling out point provided only that the cost-per-thousand remains $5 a thousand homes a commercial minute or less. I think $5 is probably the breaking point.

There is one thing in the future that may help us a lot and we don't know much about: and that is magnetic tape. If magnetic tape is a reality, as we assume it will be within a few years, it could materially reduce film cost so that summer experimentation could be possible.

Q: Speaking of the cost and the relative scarcity of time, what will those two factors do to the type of sponsorship? Will it be more alternate and co-sponsorships?

A: I think undoubtedly. The advertisers now who can maintain important franchises and have exclusive ownership—that is corporate ownership not brand ownership because you know corporations pay for their advertising expenditures by spreading the costs among multi-brands. Soap, grocery, the automotive companies, the cigarette companies, the cosmetic companies certainly will always be able to afford a complete television franchise—if they're permitted to have franchises in the future. But the smaller companies with budgets of under $4 million are automatically eliminated from being major television sponsors, that is, 52 week half-hour nighttime television sponsors. Therefore, there must be some place for the controlled minute participation spots in major nighttime shows and it certainly is an important function of the network to supply vehicles like that either for co-sponsorship or tri-sponsorship.

Q: Perhaps you can give us an idea of what the billings of Y&R radio and television were some years ago and what they are today.

A: I think the best source for that is Broadcasting & Telecasting magazine. M 1 s s [Florence] Small has done a very excellent job of putting together the relative billings of agencies over the years.

Q: How soon do you think color will be a major factor?

A: RCA and NBC are promoting color, as you know, very heavily. They assume that the fall of 1957 will be a crucial time for color when perhaps a million sets will be in use. Needless to say, we want to be in color as quickly as possible because anyone who has seen a color commercial—particularly for food products—quickly realizes the impact of it. And since the system is completely compatible and increasingly more
The word's the same, but we've coined a new meaning!

NETWORK means many things to many people... but we here at Keystone have a new concept that we think you should know about.

NETWORK is Keystone's over 900 radio stations—covering a prosperous pattern of non-metropolitan America that reaches from coast to coast and border to border.

NETWORK is the term that applies to any neat parcel of Keystone stations that best suits your marketing needs. Keystone delivers these markets to you with an amazing absence of red tape... makes your job twice as easy.

NETWORK a la Keystone means 87 million pairs of ears... in rich Hometown and Rural America—a grass roots, loyal listening audience localized for better response thru more intimate communication.

NETWORK merchandising thru Keystone's facilities is a wide vista of local impact results that are unique in concept and overwhelming in response.

NETWORK advertising for your product with Keystone will open your eyes to how BIG Hometown and Rural America really is... what a slice, sized to your choice, can do for your market exposure where the media merchandises, the audience listens, and the customers buy!

compatible as electronic developments progress, the only problem of going to color 100% is who's going to pay for it.

In the 1957-58 season the burden should really be on the manufacturers to support color and on the broadcasters because this is their investment and it's a perfectly legitimate tax investment, it would seem to me.

By the fall of 1958 I think the advertisers will be willing to pay for a share of the transfer to color and can justify it at that time on the grounds of impact. But we're fighting and will continue to fight to keep those costs to an absolute minimum.

Another development, of course, in addition to magnetic tape, are new processes which may enable the show to be filmed in color for as little as $1,500 an episode. If that happens, we'll go to color more quickly. In fact, as you know, a number of NBC shows are being filmed in color now. \textit{Lancelot, Noah's Ark} and most of the live shows where possible are done in color. Live is much simpler than film. Film, of course, is shot six months ahead and the costs now are prohibitive to any advertiser.

One thing we haven't touched on which is somewhat amusing is that in the old days a sponsor used to try to figure out what type of show would fit the personality of his product. In the present thinking with the cost as it is, the safest way is to buy any kind of a show which has a high circulation and make your commercials and your product personality conform to the show. Any high-rating show which is accepted by so many people is bound to be a good show and you certainly make your product fit in on that kind of a show.

\textbf{The Length of Programs}

\textbf{Q}: What about program lengths? NBC seems to be cutting down on the number of spectaculars and CBS is coming on with a 90-minute show every week.

\textbf{A}: There is room, in my opinion, for all types and lengths of shows. There is no evidence that a long show can compete with a popular half-hour show. The instance of \textit{I Love Lucy}, which, of course, is the extreme, when the hour and a half spectaculars on Monday night were programmed by NBC against \textit{I Love Lucy}, only one made any substantial dent in the \textit{Lucy} audience and most of them tended to inflate the \textit{I Love Lucy} rating. The exception was \textit{Peter Pan}, which is again in class all by itself. At no time did \textit{Peter Pan} top \textit{I Love Lucy} ---it merely ate into its audience. Therefore, you must conclude, I think, several things: We have conditioned people in television to accept the half-hour as the principal length. A half-hour is a convenient length in that it allows the individual to attend to chores around the house, time out and relaxing from concentrated viewing; while the hour and a half is very demanding on his time and family habits. The difference between Nielsen total audience, for example, and average audience, which on an hour and a half show can be three to one, means that the viewing is done in bits and pieces. It would tend to argue that if possible an hour and a half drama should be so organized that a viewer can see any portion of it and be satisfied.

We are watching with great interest to see what happens with the motion pictures that are available now for television in marginal time periods or in large metropolitan areas where they are programmed against popular half-hour programs---such as New York and L.A. However, at this point there is no evidence that a good motion picture is denting the popular half-hour programs.

\textbf{Q}: What about syndicated programs?

\textbf{A}: The question often arises---should an advertiser use a national program or should he use a selective market and syndicated program. It's very difficult to have a general answer to a question as complex as this. In general most national advertisers with national distribution maintain national network franchises because there are certain discounts which accrue to them by important corporate buying that are substantial and because they can be researched more accurately and there is a control of program adjacency which is probably as important as anything else.

Most syndicated programs serve the purpose of supplying regional advertisers and local advertisers with a good vehicle at a reasonable cost to be used on a local or a

\textbf{CONGRATULATIONS, SOL, ON YOUR}

\textbf{25th ANNIVERSARY AN EDITORIAL JOB WELL DONE WIND}\n
\textbf{CHICAGO'S TOP MUSIC, NEWS, SPORTS STATION--24 HOURS}
limited network basis. And both of these have their purpose. Unfortunately, most of the syndicated programs are in marginal time—before 7:30 or after 10:30 Eastern time—simply because the major stations have network contracts which require them to deliver the prime times to the network first. Various plans have been proposed and more are being proposed today by the motion picture companies disposing of their properties, which are trying to open prime time to either half-hour syndicated programs or hour and a half films. But it is very unlikely that this will happen on the major stations because of the strong economic reason that network affiliation means the most money to an owner or a manager of a station. But there is an opportunity as the third and fourth station comes into being for an alert station manager with relatively low cost programming through good syndicated films now available to him and through feature films to compete on an equal basis with either an NBC, a CBS or an ABC affiliate.

About Network Policies

Q: What do you think of the network operating policies? Option time, must-buys, that sort of thing?

A: I defer to our media section for the final answer on this. Naturally, as everybody else, I have opinions. And that is that the must-buys never seem too demanding and that generally, a national advertiser requires more stations than a must-buy. Must-buys, for the most part, are stations he would select anyway. As far as the option time is concerned, that's a matter between the network and its affiliate. As far as the national advertiser is concerned, it would be to his benefit to have all the times option times so he could pick whatever he wanted all day long including 10:30 to 11 p.m. and be assured of a substantial list whenever he wants.

Q: What about package programming on a network?

A: If it's a small advertiser who wishes to participate in television and can't afford a show of his own he must buy a partially owned or controlled network program. Because there is no other way a small advertiser can get into a network on an important basis, where he can promote his network expenditures with his dealers, distributors or salesmen and also get a substantial circulation on a spot within the body of a program.

However, when it comes to a delicate decision of a network weighing a choice of three or four programs and three or four large advertisers for a specific time period, there is no precedent I know of for a fellow giving out a time period to be coldly objective when he realizes a financial income or return on a program which he owns or controls. This is a conflict of interest. Therefore, it would seem that wise as they may be, the men making the decision on all of the networks—not just one, but all networks—cannot maintain objectivity and they would select their own program over the outsider's program. I'd better not say any more than that.
A. C. Nielsen Company Reports ...WLW Radio consistently with one of the ten largest audiences among the more than 2870 Radio stations in America. And WLW Radio gives you the nation's fifth largest unduplicated radio audience. So before you buy radio time, check with your WLW Radio representative. You'll be glad you did!

Crosley Broadcasting Corporation, a division of
Q: Going back a minute to the operating policies of networks. Do you think that if there were enough stations so that each network could have its own affiliate that the major problems that exist today would be eliminated? Or do you think that some of them are serious enough that they would still exist?

A: I think that if there were three or four stations operating in every major market area—not necessarily city but major market area, the top 100 markets—that we would then quickly have our problem confined to program dominance in every area. Every man would be for himself and many problems would be eliminated. The 4A's and, I think, individuals in this business have constantly urged the FCC to address themselves to this problem with as much celerity as possible.

Q: There has been a tremendous growth, I should say, in the billings of most large agencies. And much I suppose is due to television and the growth of that medium. And also there have been consolidations among smaller agencies. What do you think is the place of the small agency in the future?

A: Can I ask for a definition of what a small agency is?

Q: Under $5 million or under $10 million.

A: I think it is probably directly related to any small business in this country. If a few men can handle $5 million, they can make a profit. If there is a great deal of work required in servicing the $5 million, they'll soon consolidate because they'll have to have some way to support the people required. The one way to do that is to raise your volume of business and hold your personnel down to a minimum. But there certainly are agencies of $5 million and under where one man has made a substantial profit in the past. And there is probably no reason to assume that these agencies can't continue that way. You certainly can't have the depth of service, you can't have the research that any larger agency is now almost required to supply, unless you get it from outside vendors and pay it at cost. Or you may have a client that doesn't require it. But the trend would seem to be to consolidations and larger agencies because of the supplying of services of research and merchandising, in particular.

Q: What particular comments come to mind about radio?

A: I could say a lot of good words about radio. I think it's unfortunately the orphan of the advertising business at this point and very undeservedly. The Nielsen reports can demonstrate to any advertiser that a combination of radio plus television can get him almost absolute coverage. I think the audience of the political conventions—the Nielsen report on the audience of the conventions with radio plus television—is a very interesting study in that respect. I would like to divorce print from this completely now and I'm not saying other combinations may not achieve it, but I doubt that any combination of advertising media can do as well in penetrating into every home as radio plus television.

And radio today is delivering cost-per-thousands of a dollar and less. And deals can be made in radio today which are extremely advantageous—deals to get frequency. There have been certain campaigns now which have made extensive use of spots and network participations in radio that have been quite successful.

Therefore, the only thing that is blocking radio's continued progress is the fact that the out-of-pocket costs to do a good job in radio with enough frequency still come to half a million dollars a year. Now when the advertiser gets through paying his bill for television, which is his first choice in most instances, or color print, he has got very little left for radio. And this is the dilemma which faces radio today. However, in my opinion, the aggressive selling that's being done of radio now and the bargains that are being offered are bound to penetrate sooner or later, and radio will, I believe, not decrease any further. Its form and character might change some more—there might be more trend to use of radio on a local basis. However, radio today is an excellent buy on a cost-per-thousand homes delivered.

Q: Do you think it's coming up again in use?

A: To a degree. But again out-of-pocket cost will regulate how far it can come.

Q: You mentioned that deals can be made. Do you mean off the rate card deals?

A: I mean that an advertiser placing a substantial amount of business with any given radio station or network is entitled to special discounts on a volume basis.

COLOR TV: ALMOST, BUT NOT QUITE

FEW CAN dispute that color tv is the rainbow advertising medium, but is there a pot of gold at the end and if so when will it be found?

Predictions on future growth of color have come thick and fast ever since compatible color was born commercially in December 1953. Everyone agrees there will be a big industry boom in color tv, but opinions vary as to the time table and conditions.

Forecasts, however, now seem to be following a fairly common pattern. On Madison Ave., those agency executives hop to the broadcast media as well as to client needs cautiously point to 1958 as the year when the national advertiser no longer will just look at color tv but will buy.

Two such executives publicly have so called their shots—1958.

* Gerald W. Tasker, vice president and director of research at Cunningham & Walsh, predicted in an interview [BT, July 9] that color tv by 1958 should reach the stage that black-and-white entered six years ago. Soon after, he thought color may emerge as one of the top advertising media.

* Rod Erickson, vice president and radio-tv supervisor at Young & Rubicam, predicts elsewhere in this issue (see page 136) that "by the fall of 1958," advertisers will be "willing to pay for a share of the transference into color and can justify it at that time on the grounds of impact."

A number of executives—in set manufacturing, in broadcasting, in the agency business—tend to think today in terms of a basic million color tv sets in circulation as the first benchmark on the road to color dominance.

Brig. Gen. David Sarnoff, board chairman of RCA, which by virtue of its estimated $70 million investment alone is indisputably in the forefront of color development, recently forecast 500,000 to 1 million color sets in use sometime next year. It should be then, he says, that RCA will expect a return at both the program and manufacturing ends.

All Signs Point Up

Two tv networks—NBC and CBS—are colorcasting more program hours than ever before; there are more stations equipped to broadcast network color and to originate color locally than ever before. As set makers produce and the dealers sell color receivers and as long as there is a firm U.S. economy, there should be no reason for color acceleration to run out of gas.

The greatest hurdle to color dominance has been high costs to prospective set buyers, to potential advertisers, to broadcasters who must invest in equipment and to networks which must have facilities. Already, the cost barrier is being lowered, however slowly, by an increasing set circulation and lowering prices of sets, acquired program production know-how and engineering advances affecting the quality as well as price of color gear.

The $1,000-plus price floor on color tv sets has given way to under $500— and electronically (tubes and circuitry) today’s receiver is a far cry from that of yesteryear. This year alone, RCA, according to Gen. Sarnoff, hopes to sell 200,000 color receivers.

In programming, it is estimated that a half-hour color film program (on network) adds a third more in the below-the-line cost (program production and studio and technical facilities) than in black-and-white, and in some cases 10-15% more in the above-the-line cost (program creation). Even these “averages” vary with the type of show being put together. This is true in live production, too, where the shows have great variance, but the average added cost has been whittled to approximately 9-10%—much less than even a year ago and the gap is expected to narrow further.

For the national advertiser, however, who has a product that looks better and more attractive in color and which receives greater brand identification with color, it is lack of circulation even more than high cost that at present keeps him away from the multi-hued medium.

A network official in New York explains: A national advertiser pays about 40% more
for a color ad in a magazine (i.e. over black and white) while for a regular network show the increase to his total tv expenditure on an hourly basis would run from 5 to 10%. So far as a color message is concerned, he asks: "Which is cheaper?" The network executive fails to add that until there is color tv circulation the magazine is cheaper in its color costs.

Although basically the national advertiser who uses color today is doing so more as an experiment than anything else, the list of such advertisers is growing. On NBC this year there are 29 "color" advertisers; on CBS, eight with two others on a one-time color basis (see box, this page).

Both networks are geared to program still more color at almost any time, and ABC, which is not yet colorcasting, has the means to prepare itself when the time is considered ripe.

NBC is increasing color programming by 500% this season. It will have 120-130 hours of color in the final quarter of this year compared to 22.5 hours the fourth quarter last year. Translated into color hours per week, NBC will be programming from 10 to 11 hours in color each week (it programs 80-90 total hours weekly). At CBS, the average number of hours weekly of regular colorcasting is not so great. CBS-TV programs about 87%4 hours weekly; if this an average 3½ hours will be color.

ABC President Robert Kintner says his tv network will stick close to this position: ABC-TV (via parent American Broadcast-

ing Paramount Theatres Inc.) has $10-15 million set aside for its use once color is off the ground. That time may come when perhaps there are 5 million sets in circulation. Many of ABC-TV's film shows, seen in black and white, are in color—e.g. Disneyland, Mickey Mouse Club and The Lone Ranger. ABC-TV would invest in color studios and related facilities for live production.

The number of stations equipped for color is on the increase. NBC-TV's owned and operated stations are stepping up color schedules: WNBQ (TV) Chicago is an all-color station, has been since April; WRCA-TV New York can telescast 65½% of its weekday schedule in color; WRCA-TV Philadelphia is broadcasting 15 hours a week in local color; WRC-TV Washington is having studios built that will be designed and constructed with color in mind (will be completed next year); KRCA (TV) Los Angeles starts local programming about Dec. 1 and WBUF (TV) Buffalo (uhf) can carry network color and plans local transmission in color, too.

As of September, there were 478 tv stations on the air in the U.S., of which 456 were commercial and 22 educational. Of the 478 stations, 249 were equipped for network color; 72 for local color slides; 66 for local color film and 29 for local live color.

These figures compare to 188 network color; 43 local slide and film, and 15 local live, as of May 1955 (B'T estimate, May 9).

(On Jan. 1, 1954, when NBC-TV colorcast the Pasadena Tournament of Roses on New Year's Day, about 20 stations carried it in color.)

Thus, the color facilities on the network and station level are coming of age but how about set circulation? In the main, the out-

JEFFERSON STANDARD BROADCASTING COMPANY
Public service organizations who come to WNEW for assistance really get results!

For WNEW takes seriously its responsibility to serve the public interest.

Instead of ineffectual "gestures" of a few spots a week, WNEW goes all out for worthy causes with result-getting saturation schedules.

The technique of creative, selling copy—delivered around the clock by WNEW's entire team of persuasive personalities—brings results for community projects just as it does for WNEW's commercial sponsors.

This year WNEW is broadcasting approximately 25,000 announcements on behalf of some 800 local and national educational, religious, civic and governmental organizations.

The money value, in time alone, of WNEW's contribution: $1,500,000. The value of the results to the organizations—well, just glance at these excerpts from a few of the many grateful letters in our files.

New York's Favorite Station for Music and News
FORDHAM UNIVERSITY
"... more registrations in adult education for a single semester than at any time in Fordham's history."

NEW YORK STATE DIVISION, VETERAN'S ADMINISTRATION
"... WNEW saturation campaign produced more requests for Veteran's Timetable than any other single campaign we have experienced."

VOCATIONAL GUIDANCE SERVICE OF PATERNON
"... tremendous effect of WNEW announcements a source of amazement. This experience has given me the satisfaction of having a project 'put across' almost primarily by WNEW, as well as a tremendous respect for WNEW as an influence for good."

LOCAL HADASSAH CHAPTER
"... our Festival was so successful we could not accommodate all who attended. WNEW was the only station that used our announcements."

PLAY SCHOOLS ASSOCIATION
"... your station has been doing a perfectly splendid job of promoting our guide book, TRIPS FOR CHILDREN ... the tremendous number of requests we are getting from your parent listeners is astounding ... the largest return we have ever received from a single radio station."
standing set makers which would turn out color receivers are RCA, Westinghouse, General Electric, Emerson, Sylvania, Philco, Motorola, Admiral, Muntz Tv and a few others. Just how many are actually producing sets—other than RCA—is difficult to learn.

It is in this general area that predictions are the most conflicting and puzzling. RCA at one point hoped to turn out 300,000 color sets by next Christmas, perhaps even more. Other sources tone down this figure somewhat. Gen. Sarnoff places the figure at 200,000 sets this year—but this is in sales, not production. This would indicate production at RCA is humming along.

How about the others? Except for RCA, there is not too much activity. Each firm checked by B&T admits it has much in blueprints or is ready to go when the "demand materializes." The check found:

**Westinghouse:** Makes a 22-inch color glass rectangular tube color receiver. Has no production estimates. Does not report a price range.

**Emerson:** Will not estimate production for this or next year. It is pricing its color console at about $678.

**General Electric:** Priced competitively with RCA (RCA’s lowest priced color model is a table set at $495). Finds more public interest in color now than ever before. Ready to produce as many color sets as the public wants but so far reports slow pace. GE is getting into mass production just now, having announced color set making only last month.

**Sylvania:** This firm puts out a table model at $595 and another—$100 higher—model (console). Sylvania is watching public acceptance of color very closely this year for its base on which to plan for next year. No estimates.

**PhiloC:** Has been off and on. Stopped color early in summer, although it did produce a "limited" quantity. No predictions, no estimates. Philco will study what happens in color sales this year.

**Olympic (Radio-Tv div. of Unitronics Corp., New York):** Pilot models delivered on request. Priced competitively: $495, table set; $595 and $695 for consoles. Waiting for "right market."

**Motorola:** Gears thinking to market. No immediate plans to expand output. Has three 21-inch models in $500-$600 range. Selling "token quantity" daily.

**Admiral:** Still thinks color tv "logjam" will break in fall. Not releasing production estimates. Has complete line of 21-inch color models from $499.95 up to $799.95.

**Hallicrafters:** Not in production, has no plans. Did produce a 21-inch set last year.

**Zenith:** No plans this fall, will go into color once sets are "practical" and tube "situation" resolved.

**Hotpoint Co.** Will market color sets probably next year (receivers made by parent GE).

**Muntz Tv:** Earl Muntz has glowing predictions. Plans to turn out 1,100 consolettes at $399.95 by today (Oct. 15). Expects to triple production later this year.

**Sentinel** (Magnavox-owned): Working on new models with new chassis at its Evanston, Ill., plant. Will increase output but has no estimates.

Other companies such as Warwick Mfg. (Silvertone color units for Sears, Roebuck), have plans only in "discussion stage."

It is as difficult to get an estimate as to what overall unit production is today as it is to pin down Greta Garbo’s age. Private estimates range from 100,000 units for the year to RCA’s more optimistic figures. Be that as it may, color circulation is on the way up.

There are some signs that new color developments may affect the level of set prices. Allen B. DuMont Labs and Chromatic Labs (50% owned by Paramount Pictures) are combining their facilities in an attempt to place a color set, priced perhaps as low as $350, into mass production sometime late next year. Other firms, like Philco, have been working on new color set design.

Work has been underway at RCA Labs for some time on a tricolor video camera. RCA, Ampex and other companies are working diligently on commercial-type color tv magnetic tape, a development that could revolutionize colorcasting. As recently as May 1955, RCA-NBC transmitted a color tv program recorded on magnetic tape closed circuit from New York to St. Paul. Use of tape would make it cheaper to broadcast color than black-and-white or color film. Its speed of operation would cut the volume of live shows and the number of hours needed for both commercials and programs.

NBC has placed into operation its new lenticular film system it developed jointly with RCA and Eastman Kodak Co. The system permits NBC to delay color programs for the West Coast. The lenticular process.

TO SOL TAISHOFF AND YOUR ASSOCIATES
FOR A JOB WELL DONE
DURING YOUR 25 YEARS OF SERVICE

During this quarter of a century we have witnessed radio develop into the nation’s greatest mass medium, and television mushroom into the most powerful force in the economic, religious, educational, and political life of our nation. In these exhausting years Broadcasting and Telecasting Magazine has afforded a leadership unsurpassed in trade magazine journalism.

WSPA had been serving the people of Carolina Piedmont two years when Broadcasting began publication. During these years WSPA Radio, now joined by WSPA-TV, has placed service to the public foremost in its operation, and as a result became and remains the outstanding station in South Carolina.

As one veteran of the industry to another, we join in saluting B-T on its 25th anniversary and wishing for it a century of progress and continued success.

WSPA WSPA-FM WSPA-TV
THE SPARTAN RADIOCASTING COMPANY

Wally Bass
PRESIDENT
registers electronic color information on black-and-white film via minute lenses which form a portion of the film itself. This film can be processed rapidly in the manner of normal black-and-white techniques and then played back as a color tv program.

In the past year, NBC has completed its $12 million color expansion program: the lenticular system; conversion of WNBQ (TV) to all color; the building of additional color studios on the West Coast, in Brooklyn, on the East Coast and in the Ziegfeld Theatre in New York City.

Color tv has had a turbulent history. And yet the history is "young" by any yardstick. Only 15 years ago, the FCC allocated spectrum space for black and white tv but put aside color as too far in the future. By 1945, FCC had reserved uhf channels for the future expansion of television, including color.

But the march to commercial tv was heralded by 1946-47, the years when CBS petitioned for commercialization of color. The FCC denied these petitions, feeling the art was not far enough along. The Commission felt that both CBS and RCA required too much spectrum space for their individual systems.

A lengthy—from Sept. 26, 1949, to May 26, 1950—FCC hearing took up the color question. This was during the "freeze" on all tv expansion which had begun in September 1948. On Sept. 1, 1950, FCC authorized CBS's color system.

On June 25, 1951, CBS, which used the field sequential system as compared to the compatible system of RCA, put on the first commercial color telecast. It was an hour long and was sponsored by 16 advertisers.

The CBS system, however, was short-lived. Defense Mobilizer Charles E. Wilson requested manufacturers to cease work on color equipment for the duration of the Korean War. That was Oct. 19, 1951. From then on, color tv development was dormant. It was not until March 26, 1953, that the National Production Authority revoked its ban on the manufacture of color equipment.

The historic decision of Dec. 17, 1953, made by the FCC was approval of the National Television System Committee's compatible color standards (both NTSC and RCA-NBC had individually petitioned the Commission for such approval).

There were then some 340 tv stations on the air, an audience of about 27.5 million who watched tv on black-and-white sets. They had an estimated $7 billion invested in television.

When FCC authorized compatible color standards, CBS-TV went on the air that day at 6:15 p.m. with a color show. NBC-TV, however, had been on the airwaves at 5:32 p.m. with the "first authorized color signal" showing its trademark (chimes) in three primary colors, and at 6:30 p.m. it put on its color show.

Although color was lucky to make even a ripple in an ever widening stream of black-and-white sets, shows and sales to national advertisers, persistence in the industry, led principally by RCA and its NBC broadcast arm, started the push that today shows signs of cracking the color barrier within another couple of years.

The first color commercial by a big national advertiser was reported in B'Ts Jan. 4, 1954.

A picture in four colors—a still from the commercial—was printed depicting the colors and setting used in the commercial itself. American Cigar & Cigarette Co. for its Pall Mall cigarettes and its agency, Sullivan, Stauffer, Coldwell and Bayles, through Film Counsellors, commissioned Peter Elgar Productions Inc., New York, to shoot the one-minute commercial film experimentally.

Color Laboratories

Since that time many color film and live color commercials have been placed on the air. Agency activity is increasing along the color road. N. W. Ayer now has its own "color laboratory" and many other agencies similarly produce, test and place on the air various types of color commercials.

Color in commercials will have a great effect on the whole concept of merchandising and selling of many products. Already it has affected package design—and yet color tv has not "come of age." It will increase color-consciousness, in studio design and layouts, in lighting, in setting, in the clothes worn by sport participants, and even more important, what people buy and eat, use for home decoration, furnishings etc.

Fashions in clothing may be directly affected by what is shown on color tv; retail sales will most certainly be affected by color tv advertising. The ceiling is unlimited.

RCA President Frank Folsom predicts 12 million color sets in homes by 1960 and thinks that by 1963, virtually all of tv may be in color.
Dear Sol:

On the occasion of the 25th anniversary of Broadcasting-Telecasting, we salute the pioneering accomplishments of you and your great organization. We appreciate this opportunity to pay tribute to the outstanding contributions you have made in recording the pertinent history of the radio-television industry during this past quarter century. We are sincerely grateful for the encouragement you have given to the highest principles in broadcasting. We have profited in the past and will do so in the future by the use of Broadcasting-Telecasting in reaching our friends in this great industry.

INDELIBLE TALENT OF

FAME—sometimes fleeting, sometimes enduring—has come to hundreds of performers since radio and television have been on the American scene. But however brief their stay at the top or near it, those who achieved stardom on the air earned a special place in the memories of millions. For in broadcasting, more than in any other phase of show business, stars have become an intimate part of the daily life of their audience.

Any account of the many who achieved stardom on the air must necessarily concentrate on the most famous. For the purposes of this study, ratings—the radio-tv entertainer’s constant concern—are the yardstick. They range from the first reports of CAB (the Cooperative Analysis of Broadcasting) through the Hooperatings and up to today’s Nielsens. Together, they reflect the voices and faces most familiar to the audiences of a quarter-century.

TOP PROGRAM on the air when the first issue of Broadcasting was published in October 1931 was Amos ‘n’ Andy. Its popularity has held through the years, at least to the extent that it is still on radio 25 years later. The other leaders listed by the Cooperative Analysis of Broadcasting for 1931: (2) Lucky Strike show, starring the B. A. Rolfe orchestra; (3) Chase & Sanborn program, with Eddie Cantor and violinist Rubino; (4) Rudy Vallee, sponsored by Fleischmann’s yeast; (5) the musical Palmolive Hour; (6) True Story; (7) the Blackstone cigar show starring Crumit and Sanderson; (8) the Interwoven show, starring Jones and Hare; (9) the Goodyear program and (10) the Camel program with Morton Downey.

By 1932 Eddie Cantor had put the Chase & Sanborn program on top, pushing Amos ‘n’ Andy into second place. This also was a year which saw many new faces in CAB’s top 10. Among them were Capt. Henry’s Maxwell House Show Boat, starring Charles Winninger (“It’s only the beginning, folks.”) which then commanded the third position. Other new leaders held the next three spots: Ed Wynn for Texaco, Al Jolson for Chevrolet and Jack Pearl (Baron Munchausen) for Lucky Strike. Mr. Vallee had dropped to seventh. (He was, however, to be the only star to stay in the top 10 each year until 1940. Myrt & Marge had moved into a three-way tie for eighth place with Sherlock Holmes and the Sinclair Wiener Minstrels.

There was a new leader in 1933: Walter O’Keefe for Lucky Strike. And two new shows in the top 10: Ben Bernie for Pabst Blue Ribbon and Burns & Allen for White Owl cigars.
25 YEARS

The year 1932 had marked the start of one of broadcasting entertainment's biggest and most successful stars—Jack Benny. He managed sixth place by 1934, and was to be on top in 1935. Another famous name new to the leaders was that of Joe Penner, ("Wanna buy a duck?"), who was third place in 1934 on Baker's Broadcast with Harriet Hilliard and Ozzie Nelson. Appropriately enough, 1934 also was the year that introduced Fred Allen to the leaders; he won eighth place with Town Hall for Bristol-Myers. Al Jolson and Paul Whiteman were in 10th place for Kraft-Phenix.

During March-September of 1935 Jack Benny had come into first place, according to the CAB rating. In third place for that period was another new show, Major Bowes Amatuer Hour for Chase & Sanborn. By October Major Bowes (and his well-remembered gong) had taken over the No. 1 spot and pushed Mr. Benny into second place. He kept him there until October 1936, when they swapped places with Mr. Benny on top until October 1937. Another star was rising back in 1935. That was Bing Crosby, who went on the air for Woodbury in that year (and made seventh place). In 1936 he went under Kraft-Phenix sponsorship.

No. 6 in 1936 was a program called Lux Radio Theatre, featuring Cecil B. DeMille. The program has continued through today,
although now it's on tv alone as the Lux Television Theatre.

Chase & Sanborn, which through the years exhibited a deft touch for picking winners, started another one on the road in 1937. That starred Edgar Bergen, Charlie McCarthy, Don Ameche and Dorothy Lamour. It made fourth place soon after going on the air, and by the end of the year was running first. At the other end of the top 10 for the 1937-38 season was Al Jolson, on the air for Rinso.

A name that was to become one of the best remembered in radio joined the leaders in 1937. Bob Burns, the "Arkansas Traveler," and his famous Bazzooka joined the Bing Crosby Kraft Music Hall.

Tender Leaf Tea made its mark on radio history when its one Man's Family crowded into the leaders in 1938. It was to become a classic among broadcast shows. A surprise that year was the rise of Big Town, with Edward G. Robinson, from 40th the year before to eighth place.

In 1939 another of the long-time favorites made its way into the hallowed ten. Fibber McGee & Molly took over fourth place after being 16th the year before. Kate Smith also made the grade that year. Bob Hope ran in seventh place during December, he had been 23rd. Still Nos. 1 and 2: Chase & Sanborn Hour and Jack Benny.

Big news in 1940 was the spectacular rise of The Aldrich Family from 40th to sixth. Another new name to the roster was that of Kay Kyser, up to ninth from 12th. The front runners exchanged places, with Mr. Benny nosing ahead for the first honors.

Three new programs were conspicuous among those earning audience honors in 1941. They were Lovell Thomas, Mr. District Attorney and Red Skelton, who for the first time found themselves in the first 20 programs. Another, Burns & Allen, was back in the picture. Four others dropped out: Dr. Christian, Rudy Vallee, Hit Parade and Big Town.

(Biggest excitement in ratings for 1941 occurred, not unexpectedly, with President Roosevelt's two radio addresses following the attack on Pearl Harbor. On Dec. 8 he scored 65.7% of audience, then topped that record the next day with an 83%.)

Fibber McGee & Molly, still on the climb, bested Jack Benny for the No. 2 position in 1942, placing second to perennial leader Chase & Sanborn with its Bergen-McCarthy team. Following Benny, third, was Bob Hope. Only newcomers to the top 20 were Abie's Irish Rose and The Great Gildersleeve.

By 1943 Fibber had risen to first place, Bob Hope into second and Bergen and Benny were third and fourth, respectively. Two new names were in the first 20: Abbott & Costello and Take It or Leave It. The latter will be remembered as the genesis of the presentday success, the $64,000 Question. In 1943 it gave away a new prize $64. Take It or Leave It enjoyed the distinction of being the first quiz show to make the top 20.

In addition to the honor winners, a number of new names came to broadcasting in 1943. Among them were Groucho Marx and Jimmy Durante, both of whom had enjoyed stage and screen careers previously, and the Grand Ole Opry, which graduated from regional to national stature. Also new, and another which has lasted in one version or other, was Mr. and Mrs. North.

Bob Hope, who made a permanent notch for himself with his shows from service camps during the war years, moved into first place in 1944. Fibber McGee was second, while Jack Benny and Walter Winchell were in for third. Names which arose in 1944 and which strike a familiar chord today are Life of Riley, Truth or Consequences, Correll & Cahill and Dunninger.

With 1945 came the end of World War II, and with it several revisions of the popularity roles. Back from war duty, Red Skelton promptly took over seventh place. Rudy Vallee also was back, but not among the leaders. New programs to the air included the Danny Kaye Show and Beulah.

Jack Benny made a comparative comeback in 1946, the first peacetime broadcasting year after the war. He moved back into first place after having been fifth the year before. The only other name new in Hooper's ratings of the first 15 shows was that of Fannie Brice.

A new complexion came on the radio scene in 1947 as the hint of competition to come made itself apparent. Still, the leaders were virtually unchanged from their standings of the year before. New to the first 15 was Marie Wilson as My Friend Irma. Also new, and soon to skyrocket in popularity, was No. 15 Arthur Godfrey's Talent Scouts.

There was a radical change in the ratings picture with 1948. That year's first position was garnered by Walter Winchell. Radio Theatre took over second place, while My Friend Irma moved up to sixth, Duffy's Tavern to seventh and Arthur Godfrey to eighth. Phil Harris and Alice Faye ranked 10th that year, while Charlie McCarthy had dropped to 14th.

More significant than the change in radio ratings, however, was
In the rural Northwest, nearly six times more people listen to WCCO Radio than all other Minneapolis-St. Paul stations combined!*

**how we keep 'em down on the farm!**

Small wonder, for WCCO Radio is the only Twin Cities station with the power and programming to serve Northwest agriculture. Its 50,000-watt voice covers a 109-county primary listening area in four states; an area with 223,000 farm families whose annual income is 1.6 billion dollars. Its Farm Service Department is the only one of its kind in the area. Headed by Maynard Speece and Jim Hill, WCCO farm broadcasters air 44 programs a week, each loaded with vital information about farming conditions, the weather and market trends. All of which makes WCCO Radio the ideal place to sow your advertising message if you want to harvest a bumper sales crop in the rich Northwest farm market!

*Nielsen, June 1966 -- Audience in vast Northwest beyond inner NSI area.
the listing, for the first time, of the 10 top television programs. Granted, they reflected viewing only in the New York metropolitan area, but they were a portent of things ahead. That first top 10 in tv: (1) Texaco Star Theatre, with Milton Berle; (2) Toast of the Town, Ed Sullivan; (3) We, the People; (4) Small Fry Club; (5) Amateur Hour; (6) Kraft Television Theatre; (7) Chevrolet on Broadway; (8) Americans; (9) Bigelow-Winchell, and (10) NBC Symphony.

With 1949 television was beginning to increase its pace, so much so that Hooper extended its ratings of the medium from the New York area to all cities having network service at the time. "Mr. Television," Milton Berle, again was on top, in 30 cities. Arthur Godfrey programs had taken over the second and third rankings. New shows also listed, in order: Fireball Fun for All, Fireside Theatre, Philco TV Playhouse (with the longest [36] cities list), Stop the Music, Original Amateur Hour and Cavalcade of Stars.

Top place in radio in 1949 had been taken over by the Lux Radio Theatre, with Mr. Godfrey's Talent Scouts second. Bob Hope had dropped to 13th.

In 1950, Nielsen, which had taken over from Hooper, felt called upon to say that "Television is a fast growing youth; radio remains a healthy adult." Tallulah Bankhead was blatantly defying tv with her spectacular Sunday night program. The Big Show on NBC. Mr. Berle was still top banana among the youths. In seventh place was a comer: Your Show of Shows, starring Sid Caesar and Imogene Coca.

Jack Benny, who had been in and out of the top radio position for years, was in again in 1951. He was accompanied by most of the by-now familiar, with the addition of Horace Heidt and Suspenze.

A surprise entry captured the affection of tv audiences in this period. Bishop Fulton Sheen, matched on DuMont against Milton Berle on NBC, gave the comedian a stiff battle for share of audience. The bishop was an immediate sensation, and quickly garnered every honor in the book for that program type.

Edward R. Murrow, one of radio's top newsmen, became the pioneer of a new type of journalism, the television documentary. His See It Now set the standard for others to follow.

By 1952 Mr. Berle's unquestioned dominance of first spot in tv ratings was being challenged by Lucille Ball of I Love Lucy. The ratings for that year began to take on the form they hold today.

The leaders: Colgate Comedy Hour, You Bet Your Life, the Godfrey programs, and What's My Line, among others.

In December of 1953, the FCC approved compatible color standards. NBC, out to pioneer the technique, soon introduced Pat Weaver's "spectaculars" to the art form. They marked the big break from the half-hour and hour standards of the past, and made it legitimate to tailor the time to the program, not vice versa. This also was the first major departure from the regularly scheduled, running series; now the network picked the biggest stars it could find to run on a one-shot basis. Perhaps the most spectacular of all was the Mary Martin Peter Pan, which captured the largest tv audiences in history during its two performances.

Two other major tv departures can be traced to NBC. The early-morning television show (Dave Garroway's Today), which became one of the network's biggest money makers at hours when tv was thought to be unable to compete with radio. It later, in 1954, did the same thing at the other end of the day—Steve Allen's Tonight.

Miss Ball, in turn, had to give way in part to Jack Webb's Dragnet in 1953. The "veterans" still had their hold in the ratings, but new names like Jackie Gleason were beginning to be felt, and Ed Sullivan was beginning to dig into the Colgate Sunday night audience.

The Sullivan Show made it official in 1954, jumping with increased frequency into first place over Lucy, Dragnet and the other leaders. That year also saw freshman Walt Disney leap overnight into prominence with his Disneyland series. Also spectacular was the appearance of George Gobel, who quickly took all comedy awards of the year.

The 1955-56 season was the year of the giveaways, with the $64,000 Question bursting on the scene to become unquestionably the biggest thing of the year. It was followed rapidly by other big money shows—The Big Surprise and the $64,000 Challenge, to name two. To Jackie Gleason, who previously held an unchallenged foothold on Saturday night, it was the year of Perry Como, opposing him on NBC and steadily gaining big audiences.

For several stars the past 25 years have been steadily successful—Jack Benny and Burns & Allen are notable for having stayed there through the years. For others success has been less permanent, and with the rapidity of things television, threatens to be even more so as audiences and the almost incredible pace becomes more demanding.

HOW GENERAL MILLS SPENDS ITS $24 MILLION AIR BUDGET

WHAT do General Mills advertising people think about when they set out to spend $24 million a year in media? What do they think of radio? Television? Color tv? Soup operas, sports and a host of other broadcast topics?

B&T wondered, so Senior Editor J. Frank Beatty went to Minneapolis headquarters of General Mills. The following is recorded interview with Lowry Crites, who has been with General Mills nearly three decades as a sales and advertising executive. Mr. Crites currently is advertising manager for cereals.

Q: What is the overall General Mills' media budget this year?
A: According to the trade papers, we show up in the neighborhood of $24 million.

Q: Can you give an approximate breakdown of that budget by media—radio, television, newspapers, magazines?
A: It is about 50-50—50% broadcasting-telecasting and 50% print. The radio side has declined in the past four to five years but we still use a substantial amount of radio. Tv, of course, has shot much ahead.

Q: Do you find radio effective?
A: Yes. At certain times and for certain jobs we firmly believe in radio.

Q: Where do you find radio particularly effective?
A: Right now, for example, we're using radio on Family Flour and in this past calendar year we used close to six months on one of our cereals. Radio isn't limited to a particular product.

Q: How do you find radio on a cost-per-thousand basis?
A: Radio has always been among the foremost in media on a cost-per-thousand basis.

Q: Do you use network radio now?
A: No. right now we aren't. During the first six months of this calendar year we had Lone Ranger on five days a week on NBC. At the current time and for the balance of this calendar year, it's mostly spot.

Q: What type of a program do you use to reach farmers?
A: We seek the best availability, naturally. I think most people, if they're trying to reach the rural market, would tend toward news or marketing quotations, things of that nature. But we don't
the first 24 years were the greatest

Twenty-four years ago WFDF introduced the BLUES CHASERS to Flint. The show is still going strong today. Billy Geyer (Flint's Mr. Music), was on hand from the beginning with organ melodies, and his partner, Bud Haggart, adds vocals. Both fill in with the kind of light and easy conversation that strikes the local fancy. It's the same kind of show that started 24 years ago. About the only thing really different is a full complement of commercials. Flint sponsors discovered the boys could sell. Then national sponsors found this old, accepted show a sure way to open doors here in Flint. It can do the same for you each weekday from 12:30 to 1:30 P.M. Katz has all the details.

emphasize that. It depends upon the availability and the compatibility of the show to the product advertised.

Q: Do you give agencies a lot of latitude in how they spend the spot money?
A: Normally, yes. Naturally we impose budget restrictions and business safeguards. We might put some overall restrictions on it, but the matter of taking up an availability or not—that's pretty much their decision.

Q: How about your distributors and wholesalers and jobbers? If you have a radio campaign, do you tell them about it?
A: Yes. We are merchandising minded. All advertising is aggressively promoted by salesmen through the chain of distribution.

Q: Do you find that radio stations cooperate with distribution outlets? If they are carrying a General Mills' campaign, for example?
A: Yes, as far as I know they cooperate very well. They often send out letters and post cards and other promotional pieces to the various dealers.

Q: Do you find instances where radio does not cooperate?
A: No, not to the best of my knowledge. And I think that would be particularly true on spot buys—that they would cooperate.

Q: Do you ever say, "If only radio stations would do such and such or do this and that, how much better it would be"?
A: After the first couple of years that television came in, radio had a pretty hard time. I believe most radio stations became very conscious of the merchandising aspects of their medium. And while there may have been some evils a few years ago, to the best of my knowledge that's not true today. I think competitively they were, you might say, forced into it.

Q: What television are you buying now?
A: Most of our television is on a network basis. We have three daytime shows or portions of daytime shows. We have part of Garry Moore in the morning on CBS. We have Valiant Lady, the dramatic serial which goes back to the days of radio, and then we have a part of Bob Crosby on CBS in the afternoon. In the kid show serial area, we have Tales of Texas Rangers on Saturday mornings on CBS, Lone Ranger Saturday morning on CBS, Lone Ranger Thursday evening on ABC. Wyatt Earp Tuesday evening on NBC, Mickey Mouse Club Wednesday and Friday afternoons on ABC and Burns and Allen Monday night on CBS. We are also just getting ready to put on a new show, which will start in early November, called The Giant Step—that's one of the quiz shows produced by the Lou Cowan organization. Then we are using some spot television. We have a series of spot buys in various parts of the country.

Q: What about the criticism of the soap opera?
A: I have always personally felt that it is rather unfairly criticized. We've always had very good success with soap operas on radio and we're having reasonably good success today. We also like to have personality programs as well. But I think soap operas have been subjected to unjust criticism, particularly from an advertising viewpoint.

Q: In General Mills' advertising department, how do you keep track of what happens to the money you are spending?
A: We usually subscribe to most of the important research services that are available. Our agencies buy them, too. Out of four agencies, I'm sure the majority of them are covered. We supplement these services with a variety of research projects. But the payoff is always in sales—profitable sales.

Q: Do you develop your own market statistics?
A: Yes, we subscribe to MRCA and some of the commercial services and then inevitably there are some questions or certain problems that arise that can't be answered or answered only in part by existing services. Therefore, we do quite a bit of our own research; and obviously we maintain detailed records of product performance.

Q: If you are a planning a campaign, say for Cheerios, do you have anything pretty definite in mind before you talk to the agency?
A: That would be Dancer-Fitzgerald-Sample. There I assume that you are talking about a product which has been in existence. By that time the agency is pretty well aware of the inherent attributes of the product. We have naturally followed the progress of the product during the year and have formed our opinion of certain areas of strength and/or weaknesses. These we point out to the agency for their consideration for future planning.

When we start them out on a new product, for example, we have sessions with our research people, nutritional experts, home economists—everybody who can tell them something about the product. Then from marketing-strategy viewpoint and from a creative viewpoint, it's pretty much up to the agency.

Q: What qualities do you look for in a radio station if you're buying, say, a spot campaign?
A: I don't think you can generalize. There are times when you want a highly urban station and other times when you may want an entirely rural station; there are still other times when you want a 50,000 watt clear channel station to cover the universe—it depends on what you're up against. Every station has a place in the scheme of things and it even goes broader than that—every medium has. It depends on what you're up against and what you're trying to accomplish and what the objectives are.

Q: Do you have any products where you use only one medium?
A: I don't recall any. Every product has at least two or more media.

Q: What is your general media philosophy?
A: We look at it in terms of the individual product, what market we're trying to reach, what type of people we're trying to reach, what we think the sales points are in regard to that product, how best to put those sales points over. For example, if demonstration is important, certainly television would come to mind as an ideal medium to get over a demonstration.

Q: Ten years ago General Mills was spending $5 million in radio. Are you spending that much in radio now?
A: I am sure that it is less than that now. As you know, we don't reveal information.
Congratulations to Broadcasting-Telecasting for 25 years of service to the broadcasting industry.

of the advertising in those particular areas.

Q: What about premiums?
A: We have used premiums extensively over the post-war era.

Q: Do you have any current premium offers?
A: We probably have 15 or 20 breaking currently on one product or another.

Q: Do you promote premiums in all media?
A: Yes, that's the usual thing—all media we're using on the product.

Q: Do you recall any early impressions you had of radio?
A: I will never forget the first few rate cards I went through and how terribly complicated I thought they were at the time. I can remember that distinctly.

Q: Do you still think they're complicated?
A: I'll put it this way, I don't think they're any worse and maybe they've been simplified some.

Q: Should they be simplified?
A: It seems to me they have been simplified. I recall, maybe seven or eight or more years ago and maybe you at B.T. were partially responsible or maybe it was the NARTB or whatever the initials were at that time—there was a drive on for uniformity, which was the big thing. At one time everybody's rate card was based on a different principle. It's my impression—I haven't worked with it for quite some time—there have been big steps toward uniformity. Uniformity was the greatest simplification that could have been made, because you could learn any one but learning all of them was difficult.

Q: Do you think nighttime radio is effective since the advent of television?
A: Certainly I think it's effective.

Q: General Mills has been in radio now 30 years—1926 to 1956. It has been active in television almost since the start.
A: I think we entered television—that is in a commercial way—in 1949. We had some experimental things going before that.

Q: Where?
A: As I recall it, several years prior to 1949 we had some Blackhawks Hockey games out of Chicago.

Q: Does General Mills use much sports?
A: No. We haven't used sports a great deal since a year or two after the war.

Q: Did you use sports before the war?
A: We used lots of baseball for Wheaties at one time. We were probably the biggest baseball sponsor.

As I recall, and I believe the records will support me, Washburn Crosby Co., predecessor to General Mills, bought the old WLAG Minneapolis in 1924, changing the call letters to WCCO after the company title. In 1926 Earl Gammons succeeded Henry Adams Bellows, both of whom later became CBS vice presidents, as WCCO manager. Earl developed the first singing commercial, "Have you tried Wheaties?" Sam Gale was director of advertising. When it was found that Wheaties sales had declined except in the WCCO area, General Mills went into network radio. The Skippy series was followed by a pioneer daytime serial—Betty and Bob—with Frank Hummert, of Blackett-Sample-Hummert, the guiding genius. Jack Armstrong replaced Skippy and baseball games were sponsored on 67 stations.

Q: And Wheaties sales increased?

---

The proof is in the pudding.

In this era of 10-day trials and taste-tests, people like to be shown! They like conclusive proof ... and that proof is only in the pudding. The July 1956 Washington Area Conlan report shows WITN with a 51.3% share of audience in the afternoon and 45.7% share at night ... a jack-rabbit leap from the January Pulse that was taken after WITN was 90 days old. But hold on ... there is a lot more to come. WITN has double the NBC shows of a year ago. More proof is coming ... just watch WITN's smoke in the ARB study this fall!
Congratulations and Best Wishes

TO BROADCASTING—TELECASTING MAGAZINE

FROM

ZIV TELEVISION PROGRAMS, INC.
ZIV RADIO PRODUCTIONS, INC.
WORLD BROADCASTING SYSTEM, INC.
A: Fast, especially after Knox Reeves invented the phrase “Breakfast of Champions.” Wheaties and radio grew up together.

Q: Having been in radio 30 years, can you look ahead, can you see any trends in radio in the future?

A: Radio has reached and passed its low spot. Just based on local observation here in the Twin Cities, it seems to me that the stations are doing a very good job in programming, which represents an improvement over past practices from the standpoint of reaching an audience.

Q: Do you think radio has reached a peak in ingenuity and in development of ideas? Do you think that there will be new programming techniques or better management? Do you think that radio will continue to progress?

A: I'm not going to be put in the position of the fellow in the patent office—who was it in 1850—who said that everything had been invented. With my long association with the people in the radio industry, I know there are going to be plenty of new things coming up and all kinds of ingenuity and new twists, I'm certain of it.

Q: Have you become interested in color tv?

A: Yes, we have been interested in color television. I should think any food advertiser would be interested in color with the appetite aspects of it as well as the program aspects of it.

Q: You're thinking in terms of a package of Cherios?

A: I'm thinking about the ability to show a luscious cake in all of its actual color and to make people hungry when you put one of those commercials on the air. That's the commercial aspect of it. Many programs, perhaps all types, will be better in color. I am thinking about the Lone Ranger, the outdoor western, which to me is kind of a natural in the field of color.

Q: Have you done any research on packaging with color in mind?

A: Yes, we started some three or four years ago—television our present packages in color to see how they came over.

Q: Do you anticipate you may redesign packages to meet color specifications?

A: Well, I doubt that it is necessary. My guess is that we might have to redesign the package that appears in front of the camera to get a projected image equal to that on the grocer's shelf.

THE NEVER-ENDING SERIALS

THEY'VE been sniping nearly three decades at one of broadcasting's more controversial art forms, the soap opera, but like the plots of these five-weekly serials, the programs go on and on.

Seven national radio and tv networks now show not more than two dozen daytime dramas compared to over two score a decade ago prior to television's advent. Some of the serials haven't changed since pre-World War II days other than to add vision to the sound. Others have new names or partly new story lines.

The serials have survived some of the roughest and loudest criticism heard on the sociological front. These slow-moving accounts of life in average surroundings have been called everything from an affront to the average woman's intelligence to a slough of slimy infidelity.

With all the shooting, the stories have held ratings that hold sponsor interest and bring regular renewals. A decade-and-a-half ago the popular sport of soap-opera shooting was at a peak. Women's clubs resolutely furiously, with the charge often heard that meetings were adjourned in time to allow members to get home in time to catch their favorite dramas.

Chicago spawned the earliest soaps. Mrs. Gertrude Berg, Elaine Carrington, Irma Phillips, Paul Rhymer and Frank Hummert operated opera factories that got underway, mostly around Michigan Ave., in the late 20s and early 30s. Mr. Hummert, flanked by Mrs. Anne S. Ashenhurst and Robert D. Andrews, sparked the Blackett-Sample-Hummert production line.

First major achievement of the soap opera—named, of course, after the Procter & Gamble, Lever and Colgate underwriting—was to popularize daytime radio. Women, who made the breakfast dishes, fed the baby, dusted the chairs and ate lunch while the elements of ordinary living were unfolded through loudspeakers.

Stolen husbands, harried doctors, anxious wives and troubled children moved in and out of difficult situations, at a leisurely pace. Delicately handled infidelity became acceptable as well as inherent in many of the plots. It's a troubled world, judging by these stories, with few humorous moments. Because women at home have their own troubles, the serials provide an escape and an aura of diversionary suspense and misery that many psychologists now concede can help them through personal miseries. Their outrage at the unjust accusation of murder against the obviously innocent young swain can be helpful, this school contends.

Networks themselves have occasionally disclaimed the abandoned serials, with zeal and flourish, only to re-accept them into their schedules after scanning a few program rating reports. A decade or so back ABC ranted eloquently, if ineffectively, about the soap opera but soon its salesmen were offering once again its nationwide facilities to sponsors of five-weekly drama.

So long as women have home problems, it's likely their road to happiness will be paved with the woes of Helen Trent and illuminated by the guiding light of indomitable heroines triumphing over adversity.
Back in 1931, when Broadcasting Magazine made its first appearance, the WLS NATIONAL BARN DANCE was already eight years old and the Midwest's most popular program. The very next year, 1932, to meet the demands of listeners who wanted to see the show, WLS took over Chicago's 8th Street Theatre to broadcast the program before two capacity paying audiences every Saturday night. That's when everybody said it couldn't last and no one would pay to see a radio show!

Well, WLS listeners have been coming and paying every Saturday since... 2,572,030 of them to date. And the perennially popular WLS NATIONAL BARN DANCE, with its successful formula of genuine neighborliness and old-fashioned merriment, still draws the greatest listening audience of any Chicago station every Saturday night.

(For proof, see figures from a recent Pulse Survey in 164 Counties of the WLS Major Coverage Area.)

We're wishing for Broadcasting Magazine another twenty-five years of success in its service to our industry. We plan to be around to greet you on your Golden Anniversary with radio's oldest, most popular program, the WLS NATIONAL BARN DANCE.

THE HIGHLIGHTS AND SIDELIGHTS OF RADIO-TV'S PAST 25 YEARS

The events which have made broadcasting news during the past 25 years are of such number to defy the person who would try to catalog them. Nevertheless, B+T has attempted the task and here sets down those things which seem most significant in the perspective of today.

Some of those events are of major and profound importance. Others are less monumental. All are part of the fabric that is broadcasting in 1956.

BEFORE B+T

1895: Guglielmo Marconi sent and received his first wireless signals across his father's estate at Bologna, Italy.

1899 (March 27): Marconi flashed the first wireless signals across the English Channel.

1901 (Dec. 12): Marconi at Newfoundland intercepted the first transatlantic signal, the letter "S," transmitted from Poldhu, England.

1906: Dr. Lee de Forest invented the audion, a three-element vacuum tube, having a filament, plate and grid.

1910 (Jan. 13): Enrico Caruso and Emmy Destinn, singing backstages at the Metropolitan Opera House, broadcast through De Forest radiophone and were heard by operator on S. S. Avon at sea and by wireless amateurs in Connecticut.

1910 (June 24): United States approved an Act requiring certain passenger ships to carry wireless equipment and operators.

1912 (April 14): S. S. Titanic disaster proved the value of wireless at sea; 705 lives were saved. Jack Phillips and Harold Bride were the wireless men. David Sarnoff, at Marconi wireless station on Wanamaker Bldg. in New York, received signals.

1916 (Nov.): Station 2KZ, New Rochelle, N. Y., operated by George C. Cannon and Charles V. Logwood, broadcast music between 9 and 10 p. m. daily except Sunday.

1920 (Aug. 20): Station WWJ Detroit, owned by Detroit News, operated a radiophone. (Regular broadcasting license issued Oct. 13, 1921.)

1920 (Nov. 2): Radio broadcasting began with KDKA Pittsburgh (Westinghouse Co.) sending out the Harding-Cox election returns.

1921 (July 2): Dempsey-Carpentier fight was broadcast from Boyle's Thirty Acres in Jersey City through a temporarily installed transmitter at Hoboken, N. J. Major J. Andrew White was the announcer. This event gave broadcasting a tremendous boost.

1921: The superheterodyne as a broadcast receiver was demonstrated by its inventor, Edwin H. Armstrong.

1922 (Sept. 7): Station WEAF New York broadcast the first commercially sponsored program of the Queensborough Corp., a real estate organization.

1923 (Jan. 4): The first "chain" broadcast featured a telephone tieup between WEAF New York and WNAC Boston.

1923: A picture of President Harding was sent by the C. Francis Jenkins television system between Washington and Philadelphia.

1923 (June): The first multiple station hookup by wire featured WEAF New York; WGY Schenectady; KDKA Pittsburgh and KYW Chicago.

1924: Republican convention at Cleveland and Democratic convention at New York were broadcast for the first time over nationwide networks.

1924 (Nov. 30): Facsimile radio from London to New York carried pictures of President Coolidge, Prince of Wales and Premier Stanley Baldwin across Atlantic in 20 minutes, using the Ranger System.

1925: Coolidge inaugural was broadcast by 24 stations in transcontinental network.

1926 (Feb. 23): President Coolidge signed the Dill-White Radio Bill that created the Federal Radio Commission and ended chaos caused by wild growth of broadcasting.

1926 (Nov. 1): National Broadcasting Co. was organized, with WEAF and WJZ as key stations and Merlin Hall Aylesworth as president. Headquarters were established at 711 Fifth Ave., New York.

1927 (March 2): Federal Radio Commission was appointed by President Coolidge; Rear Admiral W. H. G. Bullard, John F. Dillon, Judge E. O. Sykes, O. H. Caldwell and Henry A. Bellows.

1927 (Sept. 18): Columbia Broadcasting System went on the air with a basic network of 16 stations. Major J. Andrew White was president.

1929 (Nov. 18): Dr. V. K. Zworykin demonstrated his kinescope or cathode ray television receiver before a meeting of the Institute of Radio Engineers at Rochester, N. Y.

1930 (July 30): Experimental television transmitter W2XBS opened by National Broadcasting Co. in New York.

1931

[NOTE: Events are listed by date of publication in B+T.]

Oct. 15: First issue of Broadcasting magazine appears.

Oct. 15: "Broadcasting in the United States today stands in grave jeopardy. Politically powerful and efficiently organized groups actuated by a selfishness and with a mania for power, are now busily at work plotting the complete destruction of the industry we have pioneered and developed." Walter J. Damm, president, National Assn. of Broadcasters, in his message to the 1931 annual NAB convention.

Oct. 15: Federal Radio Commission grants full power (50 kw) to nine stations, making a total of 23 outlets now authorized for full power operation out of 40 clear channel stations.

BROADCASTING • TELECASTING
With its population almost 18 million, and with its very high per capita income, you can paint a beautiful sales picture of the Pacific Coast, if you reach all the people. No matter what other media you may use, Don Lee (and only Don Lee) with its 45-station radio network, will add the broad base you need for complete coverage of the Pacific Coast.

DON LEE IS PACIFIC COAST RADIO

Represented nationally by H-R Representatives, Inc.
THE ease of delivery and the intimate approach which won Mrs. Eleanor Roosevelt wide compliments on her televised address at the 1956 Democratic national convention did not come from coaching by her late husband; nor did it come from her various political activities.

Mrs. Roosevelt learned from radio—as a paid performer—during her early days as First Lady in the White House.

The noted widow of President Franklin Roosevelt, from her first paid radio appearance shortly after the 1932 election of her husband as President up to 1940, had earned what is estimated to be around $150,000—although she gave it all to charity.

Unlike her husband, Mrs. Roosevelt apparently was not a "natural" for the aural medium but had to work long and hard for perfection, according to a biography published in 1940 [H*W, Nov. 1, 1940]. Ruby Black, Washington newspaperwoman, in her book, Eleanor Roosevelt, tells how the First Lady from 1934 to 1939 "was slowly acquiring a radio technique. Her series for the Selby Shoe Co. provided her best training. She rehearsed constantly and faithfully, under skilled direction, went over and over her script to make it fit the time allotted, down to the last second. She also took lessons in speech to learn how to breathe properly and to keep her voice from skidding up into the higher registers." Her contracts as a woman's commentator specified occasional remote broadcasts which were made from various locations and often she went back to radio stations at midnight to rebroadcast her programs for the West Coast.

During the 1934-39 period, Mrs. Roosevelt turned over $99,410.03 to the American Friends' Service Committee. This did not include a 13-week series she completed in 1940 on NBC for Manhattan Soap Co., from which income after tax was distributed to charities of her own choosing, nor her earlier broadcast activities, proceeds from which also went to charity.
The returns* are already in from upstate Florida

*Many happy returns, to BROADCASTING TELECASTING on its 25th anniversary, from THE JOHN H. PERRY STATIONS, which cover rich northern Florida the way B*T covers the industry (completely, effectively, and with apparent but deceptive ease)

Feb. 15: Gross incomes of CBS and NBC in 1931 totaled $35,791,999, a gain of 33.6% over 1930.

March 1: House Committee on Patents begins investigation. The committee's chairman, William L. Sirovitch (D-N.Y.), termed its "racketeering" activities. New copyright legislation designed to protect broadcasters and other users of music is planned.

March 1: KSTP Minneapolis-St. Paul reports on building a model home and at the same time selling 36 half-hour broadcasts to individuals and firms participating in the construction.

March 15: CBS, NBC and New York area stations, notably WOR, go into round-the-clock operations to cover the Lindbergh kidnapping, radio's biggest spot news reporting job to date.

March 15: Samuel Clyde, director of advertising, General Mills, urges that broadcasting stations operate on standard time the year round as railroads do, eliminating the semi-annual time change which he called "the one big drawback" in radio advertising.

March 15: William S. Parker, General manager and associates buy the half interest in the network held by Paramount-Publix Corp., giving them complete ownership of the network.

March 15: Leh & Fink, in daring experiment, puts complete 1932 advertising budget of Pabst tooth paste into radio.

March 15: KNX signs three-year contract with United Press for wire service for four broadcasts a day plus "extras" as necessary.

April 1: WFLA-WSUN Clearwater, Fla., installs country's first directional antenna, designed by Raymond Wilmotte, "British authority on transmitting aerials."

April 15: ASCAP boosts copyright fees to broadcasters 300%, to 5% of gross income, totaling some $3.5 million annually, compared with $960,000 for 1931.

May 1: NBC lifts ban on recorded programs for its owned and operated stations, leaving it up to judgment of the station managers, but still bars them from network use.

May 1: Rejecting ASCAP's demands, NAB sets up committee to negotiate better deal with the copyright owners, secures moratorium until Sept. 1.

June 15: Federal Radio Commission, after a six-month investigation of broadcasting, particularly its advertising activities, reports to Congress that "any plan...to eliminate the use of radio facilities for commercial advertising purposes, will if adopted destroy the present system of broadcasting." Advertising agencies, also queried, say that any law limiting advertising on the air to a maximum of 30 minutes per hour "would cause most advertisers to cease their use of radio.

July 15: NBC withdraws prohibition against price mentions on air during day-time hours; A&P is first advertiser to take advantage.

Aug. 1: ASCAP breaks off negotiations with NAB; prepares to start negotiations with individual stations; offers three-year contracts at 3% of net income for first year, 4% for second and 5% for third, plus annual sustaining program fees.

Aug. 1: A broadcasting survey of free-advertising propositions currently flooding radio stations reveals several national magazines as most shameless and persistent in demands for free time on the air.

Aug. 15: Republicans allot $300,000 for radio time for the presidential campaign, two-thirds for network time, one-third for spot.

Sept. 1: NAB resumes negotiations with ASCAP, submits demands for progressing percentage-of-income fees for music used on commercial shows, plus flat sustaining payment.

Sept. 15: CBS and NBC permit price mentions, night as well as day; again, A&P is first advertiser to take advantage.

Oct. 1: Mexican government authorizes XER, across border from Del Rio, Tex. to broadcast with 50 kw; NAB files protest with State Dept. asking protection from interference for U.S. broadcasters.

Oct. 15: ASCAP offers special reduced fees to newspaper-owned stations in recognition of "substantial contributions to the promotion...of music made by newspapers."

Oct. 15: To protect broadcasters from the dangers inherent in the Nebraska Supreme Court ruling on radio libel, John W. Guilder, acting chairman of the committee on communications, American Broadcasting Assn., advocates a rule freeing a station from liability "whenever it appears that the management of the station exercised due and reasonable care to avoid the utterance of defamation."

Nov. 1: Chrysler Corp. introduces the 1933 Plymouth Six to 75,000 salesmen via 25-city CBS hookup; insures this radio business conference for $500,000 against line break or equipment failure.

Nov. 1: Interstate Commerce Commission, dismissing complaint of St-Shine Co. against NBC and WGBB Freeport, N.Y., rules that broadcasting stations are not public utilities and that ICC therefore has no power to regulate their advertising rates.

Dec. 1: NAB St. Louis convention elects as president Alfred F. McCosker, director, WOR Newark; plans program of aggressive opposition to exorbitant copyright fees and line charges, spearheaded by prominent public figure and supported by near chest three or four times as big as present annual income of $50,000; agrees on self regulation as best preventive of governmental interference in broadcasting.

Dec. 1: Accepting government consent decree, General Electric and Westinghouse agree to divest themselves of their stock control of RCA, which becomes a completely independent company; patent pool becomes non-exclusive, but RCA retains licensing rights to patents of GE and Westinghouse as well as its own.

THE NIGHT THE MARTIANS LANDED

ANY doubt that network radio had become a nationwide entertainment, educational and news-dispensing medium of profound power was dispelled the evening of Oct. 30, 1938. A serious dramatic effort, "The War of the Worlds," on CBS, 8:30 p.m., drew excited attention to network radio, to young Orson Welles as producer-actor in a fantasy dealing with an invasion from Mars and to the need for caution behind the microphone.

The news bulletin and eyewitness technique of this drama plus the blending of other dramatic devices soon had many in a state of uncertainty and even hysteria. "This is the most terrifying thing I have ever witnessed," an actor shouted, describing the devastation from Martian missiles.

Had not an estimated 10 times as many sets been tuned to Edgar Bergen-Charley McCarthy McCarthy on NBC, the panic would have been much worse. Before the one-hour drama had closed, Associated Press had wired all its editors and bureaus that the Martian invasion was radio fiction. But already thousands had abandoned their homes, fleeing before the Martian invasion. Police stations were busy; newspapers and radio stations everywhere had to answer as best they could until they had definite information. Telephone traffic was up around 7%, according to Broadcasting [Nov. 15, 1938].

FCC received several hundred complaints. After considering the problem it handed down a decision dismissing complaints but advising broadcasters to avoid repetition of such incidents, with special care devoted to simulated news broadcasts. Some newspapers took advantage of the chance to challenge radio's qualifications to compete in the news field. Although none stood up in court, damage suits ran to a total of $750,000, filed by citizens who claimed they were injured because of the drama.

An important lesson was taught that night—so well taught that no similar incident of importance has occurred since.

sociations of barbers, beauticians, florists, grocers, druggists and other trade groups whose members buy collectively what they can't afford individually.

March 15: Radio places full facilities at disposal of Roosevelt administration during banking crisis; largest audience in history reported for President Roosevelt's CBS-NBC broadcast on plans to reopen the nation's banks.

March 15: Canadian Radio Commission acquires its first three stations, CNRA Moncton, N.B.; CNRO Ottawa, Ont., and CNRV Vancouver, formerly owned by Canadian National Railways.

April 1: Post Office modifies rules so stations can forward fan mail to sponsors in bulk without paying additional first class fees.

April 1: NBC discontinues its Pacific Coast Gold network to save line costs; Orange network continues, absorbing some Gold programs.

April 1: Southern California broadcasters carry on amid wreckage to keep nation informed of effects of earthquake.

April 15: NAB organizes Radio Program Foundation to make available for broadcasting the copyrighted works of non-ASCAP composers and publishers.

April 15: Federal District Court in Sioux Falls, S.D., grants Associated Press permanent injunction against unauthorized broadcasting of AP news by KSOO Sioux Falls.

May 1: AP membership votes to ban network broadcasts of AP news and to curtail local broadcasts to bulletins at stipulates times with air credit to member newspaper which is to pay an extra broadcast assessment.

May 1: American Newspaper Publisher Assn. annual meeting resolves that radio logs are advertising and should be published only if paid for.

May 15: Federal Radio Commission granted absolute power in distributing radio facilities by Supreme Court ruling upholding Commission's decision to delete WIBO an WPCC Chicago (overquota by the curre allocation plan) and give the 560 kc region channel to WIKS Gary, Ind.

May 15: News on air is undiminished a UP and INS fail to follow AP's example networks establish own correspondents i key cities; President again uses combine CBS-NBC networks for second "fresid chat," phrase coined by Harry Butcher, CB Washington.

July 1: NAB-sponsored Radio Progr Foundation acquires broadcast rights Ricordi catalog of 123,000 composition offers package to member stations at rates $2.50 to $25 a month.

July 1: George B. Storer, president, CKL Detroit-Windsor, heads Point-O-Purchas Broadcasting System, which plans to insta radio receivers in grocery and drug stores receive programs broadcast by Point-O-Purchase during peak shopping hours an so provide "the missing link between man facturer and consumer."

Aug. 1: National Recovery Administratio program involves broadcasters two ways: employers and as operators of a medium which can publicize the program. NA sends questionnaire to all broadcasters o employment practices, appoints advisor
NOW is the time to buy color television

Color TV is here! It's right and it's ready. You can now see Color Every Night—and RCA Victor "Living Color" TV sets are now priced within the reach of every family! Here's the full story:

Like 2 sets in 1! You get Color and all black-and-white shows, too! This is RCA Victor Compatible Color TV! You see all the great Color shows in "Living Color"—regular programs in clear, crisp black-and-white. With Big Color, you see everything.

Big-as-life 21-inch picture tube—overall diameter. Actually 254 square inches of viewable picture area. And every inch a masterpiece of "Living Color". Here are the most natural tones you've ever seen—on a big-as-life screen!

Color every night—right now! Something for everyone! You'll have "two on the aisle" for the best shows ever—drama, comedies, Spectaculars, children's shows, local telecasts. For now 216 TV stations are equipped to telecast Color.

Big Color TV is so easy to tune, even a child can do it! Turn two color knobs and there's your Big Color picture! It's easy, quick, accurate. You're in for a new thrill when the picture pops onto the screen in glowing "Living Color".

Practical and trouble-free! Service is low-cost and dependable! Big Color is dependable Color. And RCA Factory Service is available in most areas (but only to RCA Victor owners) at new low cost. $39.95 covers installation and service for 90 days.

Color TV is a common-sense investment—costs only a few cents a day. It's sure to become the standard in home entertainment for years to come—yet you can enjoy Color every night right now! And you can buy on easy budget terms.

Now starts at $495—no more than once paid for black-and-white. This is the lowest price for Big Color TV in RCA Victor history! There are 10 stunning Big Color sets to choose from—table, console, luxurious, lowboys, and consoles, too.

Make sure the Color TV you buy carries this symbol of quality. RCA pioneered and developed Compatible Color television. Because of this unique experience, RCA Victor Big Color TV—like RCA Victor black-and-white—is First Choice in TV.

There will never be a better time than now to buy Big Color TV. Be among the first to enjoy television's greatest advance in 20 years. Manufacturer's nationally advertised VHF list price subject to change.

committee to work with William B. Dolph, former RCA Photophone salesman, now in charge of radio publicity for NRA.

Aug. 15: First North American Radio Conference breaks up when Mexico refuses to budge from demands for 12 clear channels; interference problems foreseen as Latin American countries, not bound by any international agreements, are free to use whatever frequencies they desire.

Sept. 1: Rate cutting, per inquiry business, song plugging, excessive coverage charges, excessive commission payments, lotteries and similar practices are barred by broadcasting code drafted by NAB committee and submitted to NRA; Sol A. Rosenblatt is named code administrator.

Sept. 1: New York business group headed by Alfred E. Smith acquires commercial and program rights of WMCA New York in $155,000-a-year deal whose legality is questioned by Radio Commission.

Sept. 15: NAB special counsel Newton D. Baker files suit in federal court asking dissolution of ASCAP as illegal trade combination.

Sept. 15: CBS assigns publicity director Paul White to task of organizing a nationwide staff to collect news for network broadcast.

Oct. 1: General Mills sponsors twice-daily broadcasts on CBS of news collected by Columbia News Service; Washington Star drops program log of WJSV (CBS outlet serving Washington) in line with policy of "not advertising our competitors."

Oct. 1: After many delays, Ed Wynn's Amalgamated Broadcasting System gets under way as third national network with 100 outlets, connected by Western Union lines.

Oct. 1: Stations file for 50 kw power as Radio Commission lifts limit from four to eight per zone, or from 20 to 40 for U.S.

Oct. 1: NBC moves into Radio City headquarters, world's largest broadcasting plant.

Oct. 15: NAB convention reelects Alfred J. McCosker, WOR Newark, for second year as president; urges abolition of requirement that recorded programs be so identified; urges three-year licenses in place of current six-month ones; agrees to intensify fight against ASCAP; denounces concealed commercial interests in sustaining programs and contingency accounts as unfair practices; urges retention of 48-hour week for operators and control men.

Oct. 15: Yankee Network adds rider to political contracts absolving network from liability for libel or defamation by speakers.

Nov. 15: Repel of prohibition act raises question of advertising of hard liquor on radio; CBS and some stations announce they will not accept it all.

Nov. 15: Other groups ponder "third network" organizations as Ed Wynn's Amalgamated Broadcasting System goes bankrupt.

Nov. 15: WGN Chicago, WBZ Boston and WHAM Rochester are first to get 50 kw under revised regulation.

Dec. 1: President signs broadcasting code, calling for minimum wages of $40 a week for technicians, $20 a week for announcers and program production employees ($15 if fewer than 10 such employed at station).

Dec. 1: Washington newspapers agree to publish radio logs only as paid advertising.

1934

Jan. 1: Broadcast band widened to include three new channels—1530, 1550 and 1570 kc—with 20 kc separation, for experimental operation (but with full authority to broadcast commercial programs), with goal of high-fidelity broadcast transmission.

Jan. 1: KNX Hollywood announces plan to pay salesmen commissions on talent as well as time sales, as incentive to stimulate use of station-built programs by local advertisers.

Jan. 15: WLW Cincinnati starts tests of new 500 kw transmitter, world's most powerful.

Jan. 15: Group programming, a station-built half-hour show sold to six sponsors instead of one, developed at WTMJ Milwaukee to stimulate sales during the depression, proves successful for both station and sponsors.

Feb. 1: NRA Code Authority for broadcasting outlaws per inquiry and contingent business, launches study of status of performers to determine whether they should be covered by code's wage-and-hour provisions.

Feb. 1: Students remember advertising they hear better than they read in text. Concluded by Prof. Frankston of Ohio State University psychology department.

Feb. 15: CBS and NBC withdraw from news-gathering field as AP, UP and INS agree to provide material for morning and evening network newscasts.

March 15: Press Radio Bureau begins operations; Yankee Network and KFI Los Angeles set up own news organizations with exchange of news contemplated.

March 15: George B. Storer, chief owner of CKLW Detroit-Windsor, WSPD Toledo and WWVA Wheeling, becomes president and majority stockholder of Federal Broadcasting Corp., lessee-operator of WMCA New York, designated as key station for projected nationwide network.

April 1: Three independent news service organizations merge into Radio Stations Inc.

May 1: Federal Radio Commission announces that after June 1 it will periodical ask stations, networks, transcription companies for copies of all commercial copy a part of overall survey of advertising.

June 1: Federal Radio Commission rules that when unconnected numbers recorded on two or more disc are combined into a program, each number must be individually identified as an electrical transcription.

June 15: Communications Act becomes law; FCC to replace Radio Commission.

July 1: E. O. Sykes, charter member of Federal Radio Commission, is named chief man of new FCC. Other members are: Thad Brown, also a holdover from the Radio Commission, Paul A. Walker, Norman Case, Irvin Stewart, George Henry Payne and Hampson Gay.

July 1: George B. Storer announces new American Broadcasting System will begin operations in mid-August; hire Frederick H. Weber, former Chicago man ager of NBC station relations, as operation vice president.

July 15: Clear channel stations attic

Broadcasting • Telecasting
Twenty-five years ago — August, 1931, Cherry & Webb Broad-casting Company became a broadcast station licensee. Ded-icated to the highest ideals of American broadcasting, Cherry & Webb has been a leader in bringing to the people of Southeastern New England the best in entertainment and public interest programs. The familiar call letters WPRO and WPRO-TV are symbols of service. So, too, is BROADCASTING + TELECASTING a symbol of a quarter of a century of outstanding service to the broadcasting industry. In this joint anniversary year, Cherry & Webb salutes Sol Taishoff and his most competent staff!

1320 kc... Music and News

May 15: United Press and International News Service offer news to radio; Associated Press permits member papers to provide news for local newscasts but still forbids sponsorship.

May 15: RCA announces it is taking tv out of laboratory for $1 million field test program.

June 1: Code Authority for broadcasting industry shut as Supreme Court of the United States declares the National Recovery Act unconstitutional.

June 1: Transradio Press Service files $1 million damage suit against CBS, NBC, AP, UP, INS and ANPA, alleging that the press-radio program agreed to in 1934 was illegal and unfair competition.

June 15: Plan for a bureau of agency recognition and credit information to be operated for and by the broadcasting industry is adopted by the NAB commercial section.

June 15: NBC launches Thesaurus, recorded library service.

July 1: Warner Brothers announces with withdrawal of its five music publishing firms, sale to account for 40% of all ASCAP music performances, from ASCAP on Jan. 1, 1936.

July 15: NAB elects Charles W. Myers KOIN Portland, Ore., president, name James Baldwin as managing director; re elects as treasurer Isaac D. Levy of WCAL Philadelphia, a controversial figure in the acceptance of new five-year license from ASCAP; endorses agency recognition plan adopts revised code of ethics which outlaw per inquiry and contingent business.

July 15: Washington State gets restraining order preventing ASCAP from collecting royalties for broadcast performances of hit music within the state on grounds that ASCAP is a monopoly in violation of the state constitution.

Sept. 15: Scripps-Howard decides to end radio and applies for permission to be WFBE Cincinnati; seeks stations in other of its publication cities.

Sept. 15: Committee of 15, with equal representation from NAB, ANA, AAAA, starts work on creation of a rad counterpart of the Audit Bureau of Circulations for papers and magazines.

Oct. 1: FCC demonstrates it is still scrutinizing programs by giving score of station temporary renewals pending further investigation of "questionable" programming.

Oct. 15: Esso's sponsorship of Unit Press news on group of NBC radio stations leads Associated Press board of directors to reaffirm its ban on the use of AP news in sponsored broadcasts.

Nov. 15: Tax law of the State of Washington imposing tax of 0.5% on gross income of radio stations, is declared unconstitutional by Federal court in suit brought by KVI Seattle; state supreme court had upheld law's validity in earlier suit of KOMO-KJ

Dec. 1: Yankee Network underwrites KVIN survey of listening made by mechanic meter devices attached to sets in 1,000 homes to measure tuning; developed by MIT professors, Robert F. Elder of the marketing department and L. F. Woodriff of the electrical engineering department.

The Katz Agency.
IN THE period immediately after World War I a number of experimental broadcasting stations were established by engineers and amateur radio operators, and an audience, listening on homemade sets, developed rapidly. Frank Conrad, Westinghouse engineer, built such a following with his home station, 8XK, that Pittsburgh department store stocked a few receivers and advertised them for sale.

Westinghouse officials then decided that if there was sufficient interest in radio to justify a department store in advertising sets there was enough to justify Westinghouse in establishing a broadcasting station of its own, largely as a means of advertising through announcement of the company name on the air at frequent intervals. An application was filed with the Secretary of Commerce and granted, and KDKA Pittsburgh became the first licensed commercial broadcasting station in November, 1920. Meanwhile, a Detroit experimental station which later became WWJ had begun daily programs in July, 1920, and WHA Madison, Wis., had been transmitting weather and market reports.

Other companies also wanted to operate stations. "By the end of 1921," William Peck Banning recounts in his Commercial Broadcasting Pioneer, "the situation was that hundreds wanted to broadcast, that millions wanted to listen, that no one was sure how broadcasting was going to be supported, and that the rapidly growing industry was in an unhealthy semidemoralized state." AT&T, which had developed much of the basic equipment for this new form of communications so closely allied to telephony, felt that the way to support broadcasting was the way telephone service had been supported, with the cost borne by the person making use of the facilities to transmit his message, whether to another individual by telephone or to many individuals by broadcasting. To demonstrate its theory, AT&T started a radio station of its own, WEAf (now WCRA) New York, and announced that time was for sale at $50 for 15 minutes of evening time or $40 for an afternoon quarter-hour. Several weeks went by with no takers. Then, Mr. Banning reports the birth of commercial radio in these words:

"Aug. 28, 1922, is the date of the first 'commercial' broadcast; at 5:15 in the afternoon the Queensboro Corp. broadcast the first of a series of 15-minute announcements regarding its tenant-owned system of apartment houses at Jackson Heights, New York. Sales amounting to several thousand dollars were reported as resulting from the broadcast, the last of which was made on Sept. 21, which was also the date when two other business concerns, the Tidewater Oil Co. and the American Express Co., made experimental announcements.

"The station's commercial representatives were finding that, although there had been many 'prospects' at the beginning of operations, the prohibition against price references or package descriptions—

the type of advertising called 'direct'—made business concerns skeptical of the new medium. After two months' operation a total of only three hours of air time had been bought and the station's revenues had amounted to only $550."

Jan. 15: ASCAP cancels temporary licenses, threatens infringement suits against stations: not signing new five-year contracts at same price for less music.

Jan. 15: Following industry survey, 120 members of Distilled Spirits Institute agree not to advertise hard liquor on the air.

Feb. 1: FCC liberalizes recording-transcription announcement rules; now requires only one announcement per quarter-hour.

Feb. 15: Warner Brothers files infringement suits totaling more than $3 million against networks and stations; NAB revises plan to establish its own music rights organization.

March 15: CBS broadcasts speech by Communist Party Secretary Earl Browder; some affiliates refuse to broadcast it; editors and congressmen attack and defend CBS action.

April 1: CBS buys KNX Los Angeles for $1.3 million, biggest station deal to date.

April 9: Heurt Radio acquires KTAT Fort Worth, WACO Waco and KOMA Oklahoma City.

April 12: AT&T works out agreement with WCOA Pensacola to reduce rate on backhaul by 50% (saving of about $2,000 a year for WCOA).

April 15: U.S. Supreme Court rules broadcasting is instrumentality of interstate commerce, not subject to state taxation, in reversing Supreme Court of Washington State, which had upheld a state tax on gross receipts of radio stations.

May 1: NAB board approves plan to create a "Bureau of Copyrights" with a "measured service" method of compensation.

June 15: President Roosevelt signs bill repealing Davis Amendment to original radio law, which required equal division of broadcasting facilities among five zones and among states in each zone, opens way for more stations, increased power.

June 25: Don Lee Broadcasting System starts first public demonstration of cathode-ray television in U.S. with daily broadcast of 300-line pictures using system developed by Harry K. Laube. Don Lee director of tv.

July 1: First broadcasting, a new system in which the May. E. Armstrong, is described at FCC hearing as static-free noise free, free from fading and cross talk, uniform and night throughout the entire area.

July 15: Charles W. Myers, KON-KAL Portland, Ore., elected NAB president; Isaac D. Levy, WCAU Philadelphia and retire NAB treasurer, attacks the NAB board managing director for copyright mismanagement, then resigns from NAB promising to form a new association; convention bud Baldwin and board and maintains a solid front. Sales managers organize as an NA division.

July 15: RCA shows radio manufacture its system of tv, being field tested with test transmissions from New York's Empire Sta Building.

Aug. 1: Warner Brothers returns ASCAP, drops infringement suits of nine.

Aug. 1: National Assn. of Regional Broadcasting Stations organizes to protect interests of upcoming bc stations in Hearst Broadcasting System;

Aug. 15: Philco Corp. demonstrates system of television with seven-mile range mission of live and film subjects in 1845 images per second.

Sept. 1: Mutual Broadcasting System starts drive to become nationwide network by signing five midwestern affiliates—KWK Louis, KSO Des Moines, WMW Cer Rapids, KOIL Omaha, KFOR Linco WLW Cincinnati in its MBS stock 17.5 mg.

Sept. 15: Television shows in Englewood with twice daily teletests using alternat the Baird and EMI-Marconi systems.
Congratulations on its 25th Anniversary of quality reporting and coverage of the air media—

October 15, 1956 • Page 183
Oct. 1: After KFI and KECA Los Angeles refuse to carry President Roosevelt's "fireside chat" as a sustaining program, Democratic National Committee cuts them from network outlets getting paid campaign broadcasts.

Oct. 15: A.C. Nielsen proposes metered tuning method of measuring size of program audiences at ANA meeting, reveals his firm's acquisition of "audimeter" developed at MIT; Edgar Felix urges coverage measurements to determine audience.

Nov. 1: CBS cancels "Champ" (R-Mich.) with recording of President Roosevelt's statements as violating its no-transcription rule, then reinstates the broadcast; mob at Terre Haute prevents Communist candidate Earl Browder from reaching WBOW studio; parties step up time purchases as campaign closes.

Nov. 15: Complete election return coverage by networks and stations winds up campaign in which the political parties spent an estimated $2 million for radio time.

Nov. 15: Demonstrations of RCA's 343-line TV system are highlight of NBC's 10th anniversary celebration.

Dec. 15: Don Lee Broadcasting System affiliates with Mutual, making it a coast-to-coast network.

Dec. 15: Lang-Worth Feature Programs Inc. offers library of 200 hours of copyright-free programming.

1937

Jan. 1: Chicago Federation of Musicians forbids members to make recordings except under special conditions as move to halt threat of "canned" music to employment of live musicians.

Jan. 1: U.S. Supreme Court throws out suit of Associated Press against KVOS Bell- ingham, Wash., for AP's failure to show damages of over $3,000, minimum needed for Federal jurisdiction, but looks with disfavor on KVOS practice of buying newspapers and reading news from them on air.

Feb. 1: Radio goes on round-the-clock duty to provide communication for flood stricken Ohio and Mississippi valleys, and aids relief work; job wins nation's praise.

Feb. 1: Station sales managers, in first national meeting, reject requests of recording companies for third 15% (in addition to commissions paid agencies and station representatives), ask networks to discontinue chain break announcements from their odo stations before asking affiliates to do so.

April 1: North American Radio Conference at Havana agrees on technical principles of broadcast allocations, paving way for treaty conference in November.

April 15: CBS operates experimental video station in New York, plans to install RCA tv transmitter in Chrysler Bldg. tower and to construct special studios at total cost of $500,000.

April 15: CBS recognizes American Guild of Radio Announcers and Producers, independent union headed by Roy S. Langham, CBS producer; bargaining begins for network's announcing-production employees.

April 15: George H. Payne, FCC Tele- graph commissioner, urges Congress to levy a tax on broadcasting stations of $1 to $3 a watt.

May 1: CBS breaks ground for $2 million Hollywood studios.

May 1: American Radio Telegraphists Assn. (CIO), International Brotherhood of Electrical Workers (AFL) and Newspaper Guild (claimed by both AFL and CIO) start drives to organize station employees; NBC institutes 5-day week for production staff.

May 15: WLS Chicago recording team, Herb Morrison, announcer, and Charles Nohlsen, engineer, on routine assignment at Lakehurst, N.J., record on-the-spot, at-the-time account of explosion of the German dirigible Hindenburg; NBC breaks rigid rule against recordings to put it on network.

May 15: RCA demonstrates projection tv, with images enlarged to 8 by 10 feet, at Institute of Radio Engineers convention.

June 15: Transradio Press $1,700,000 suit against networks and press associations is settled out of court.

July 1: NAB elects John Elmer, WCBM Baltimore, as 1937-38 president; James W. Baldwin is reappointed managing director; NAB Bureau of Copyrights gets 58 subscriptions to its tax-free library.

July 1: WWJ Detroit announces plan of "balanced programming" with programs kept in scheduled time periods whether sponsored or not.

Aug. 1: American Federation of Musicians demands that broadcast stations increase their employment of musicians to a number satisfactory to the union or lose their musical programs.

Aug. 1: Actors' Equity withdraws from radio with organization of a new AFL union, American Federation of Radio Artists.

Aug. 1: Guglielmo Marconi, 63, died of heart attack in Rome.

Aug. 1: WWJ Detroit announces that in addition to its balanced program plan, it will abolish all between-program announcements between noon and 3 p.m., concurrently increasing its rates for the three-hour period.

Sept. 1: Independent Radio Network Affiliates organize to deal with AFM; ponder suggestion of AFM president Joseph N. Weber that a weekly sum of 3½ times station's one-time evening quarter-hour rate be used to employ live musicians, amounting to some $5.5 million a year overall.

Sept. 1: International Brotherhood of Electrical Workers (AFL) starts drive to organize radio technicians after NLRB certifies ARTA (CIO) as bargaining agent for WHN technicians, overruling petition of IATSE (AFL).

Sept. 15: AFM strike averted as network affiliates agree to spend an additional $1.5 million a year to employ staff musicians; NAB calls special convention.

Sept. 15: Chicago stations broadcast lessons as infantile paralysis epidemic closes schools.
This woman enjoys housework. And WCAU Radio is why. She's part of its huge captivated audience that laughs and sings and muses and chuckles through daily chores. In Philadelphia, you see, when the lady of the house is at home, she turns to WCAU. We know because Pulse indicates, report after report, the top five women's participating programs are all on WCAU Radio. That's WCAU magnetism for you.

Oct. 1: American Bar Assn. recommends that broadcasting of court trials be "definitely forbidden."

Oct. 1: FCC gives two stations — WGH and WHN — permission to experiment with facsimile broadcasts on their regular frequencies in midnight-6 a.m. period; both plan to use system developed by W. G. Finch, former assistant chief engineer of the FCC.

Oct. 15: NAB special convention votes for complete reorganization, approves 50% hike in dues.

Nov. 1: FCC allocates 75 channels with 40 kc separation (41,020 kc to 43,980 kc) for "apex" stations and 19-6 mc bands for television (44-108 mc), with 16 channels in the 30-40 mc band for relay stations.

Nov. 15: NBC refuses to let Gen. Hugh S. Johnson broadcast talk on venereal disease.

Nov. 15: Bell Labs demonstrates intercity tv program transmission over 90-mile coaxial cable connecting New York and Philadelphia.

Dec. 15: Inter-American Radio Conference reaches agreement on broadcast allocations that protect U.S. broadcasters by eliminating Mexican border stations, but require many shifts in U.S. station frequencies.

1938

Jan. 1: U.S. Court of Appeals for District of Columbia, in opinion written by Associate Justice Justin Miller, sharply criticizes the FCC for reversing its denial of the application for Paul H. Hittmeyer for a new station in Cheyenne, which the Court calls "arbitrary and capricious."

Jan. 15: FCC sharply rebukes NBC for "Mae West incident" but takes no further action at this time.

Jan. 15: FCC announces policy of not licensing second station in same community to existing licensee unless it is "clearly shown" that the public interest would be best served by such a license; denies application of WSMB New Orleans for second station there.

Jan. 15: John Shephard, III, president of Yankee Network, starts construction of 50 kw fm station in M. W. Wachusett at cost of $250,000; Maj. Edwin H. Armstrong, fm's inventor, builds own 50 kw fm station at Alpine, N. J.; others are planned to test this new medium.

Feb. 1: RCA puts stations on notice if they institute "reasonable fees" for broadcasting of Victor and Bluebird records; move said to be self-protective in view of attempts of National Assn. of Performing Artists to establish their performing rights in recordings through court action.

Feb. 1: FCC sets 25 channels, 40 kc wide, in the 41-42 mc band, for exclusive use of noncommercial educational stations.

Feb. 15: Under leadership of Mark Ethridge, general manager of the Louisville Courier-Journal and Times, operator of WHAS Louisville, and Edwin W. Craig, WSM Nashville, two-day NAB convention sweeps through reorganization plan, elects new board of 23 directors—one from each of 17 geographic districts and six at large names Philip G. Loucks, author of reorganization plan, special counsel to guide NAB affairs pending selection of first paid president. Broadcasting publishes first facsimile newspaper in demonstration for convention delegates.

Feb. 15: With most network affiliates signing local musicians union contracts on basis of AFM-IRNA agreement, AFM submits new contract terms to recording companies.

CRUSHED BY MONEY

THE LATE Fred Allen, one of radio's great wits, found that money can talk louder than humor, especially when it's big money like $30,000 and upward assorted jackpots on the Stop the Music series of the late '40s.

Driven down to 38th place in Hooperatings by the musical guessing game that played opposite him Sunday evenings, Mr. Allen offered a gimmick new to radio—a $5,000 insurance payment to anyone who could prove loss of a Stop the Music award because of listening to his NBC series.

He retained another comedian, Henry Morgan, to do a spoofing musical quiz, Cease the Melody, offering such prizes as miles of railroad tracks, saloon with bartender, several miles of dental floss almost as good as new and 20 minutes alone in Fort Knox with a shovel.

These devices were novel and amusing, but Fred Allen was never able to regain his radio popularity. Worse yet, along came television. With all his caustic wit and showmanship, he could never find a satisfactory television vehicle. A top-flight humorist had to yield to the lure of the money-bag fad and a new broadcast medium.

March 15: Non-network stations are drawn into AFM employment picture with union requirement that recording companies do not serve stations without AFM licenses.

March 15: Southern California stations turn over all facilities to emergency public service as other means of communication fail in flood crisis.

April 1: Mark Ethridge is drafted as first president of revamped NAB to guide industry for interim period while paid president is sought; to serve without pay but with plenary powers.

April 1: FCC sends stations detailed questionnaire seeking full information on fiscal operations during 1937.

April 1: Wheeler-Lea Act, giving Federal Trade Commission new powers to curb false and misleading advertising, becomes law.

April 1. Hitler's quick conquest of Austria gets full coverage from U.S. networks.

April 15: Plea to FCC to keep its regulation of radio to the minimum necessary to provide interference-free service to the public and to give broadcasters licenses for longer than six months is made by William S. Paley, CBS president, in tradition-breaking broadcast of the network's annual report to public as well as to stockholders.

May 1: National Committee of Independent Broadcasters negotiates agreement with AFM for employment of musicians based on that of IRNA.
Dear Sue,

Now for the really important anniversary of the year 3-T's 25-65
Congratulations to the whole gang and myself to you for 25 more years.

P.S. Thanks.

Bob
Anyone for peanuts?

In Eastern North Carolina, it's nearly everyone for peanuts when you use WNCT!

With a Class D 20-second "10 Plan," the cost per thousand is only 30c!

If that's too much to shell out, then try a Class D ID "10 Plan" for a cost per thousand of 15c.

Whether your budget is peanut-size or elephant-size, your best buy is WNCT... first in every minute of every hour of every day... day and night, according to the Jan. 19 Telepulse of 19 countries. Eastern Carolina's No. 1 TV Station.

WNCT Greenville NC
Represented Nationally by Hallinger

SOUTHWEST VIRGINIA'S Pioneer Radio Station

Normally we hold that "today" and "tomorrow" are the really important days—except on occasions like this—then it is with pride that we look backward for a moment on what we believe to be a job well done—because for 32 years we've thoughtfully and conscientiously served the people of Western Virginia.

We salute all of those who have, in the public interest, contributed their talents to our industry through the years.

Established 1924 — CBS since 1929

May 15: U.S. Court of Appeals for District of Columbia cites FCC for lack of a consistent policy as it reverses FCC's denial of a new daytime station at Pottsville, Pa., to Pottsville Broadcasting Co., and reminds it, making reconsideration mandatory.

June 15: Senate resolution that broadcast power in excess of 50 kw would be against public interest removes superpower from FCC consideration as hearings on new rules and regulations get under way.

June 15: Neville Miller, former mayor of Louisville, to assume presidency of NAB July 1 as first paid president, at salary of $25,000 a year, plus $5,000 for expenses.

June 15: House votes down resolution for an investigation of monopoly in radio by overwhelming vote of 234 to 101.

July 1: Radio broadcasting's average weekly paycheck of $45.12 is highest of all U.S. industries, Bureau of Labor Statistics reveals in answer to Broadcasting's query.

July 1: Senate ratifies Havana Treaty calling for many shifts in frequencies of U.S. stations to be made a year after treaty has been ratified by three of the four participating countries: U.S., Canada, Mexico and Cuba.

Aug. 1: Census Bureau survey finds 62% of farm homes equipped with radios.

Aug. 1: W. Lee O'Daniel uses radio exclusively to win Democratic nomination for governor of Texas, boosts sales of Hillbilly Flour at same time.

Aug. 15: Paramount Pictures acquires interest in Allen B. DuMont Labs.

Sept. 1: Atlantic Refining books record football schedule of 168 east coast games.

Sept. 15: World Broadcasting Systers launches "wax network" with 25 major market affiliates.

Oct. 1: New York stations pool equipment to keep public informed as hurricane hits city; New England stations also rise to meet emergency of crippling storm.

Oct. 1: Lang-Worth Feature Programs issues catalog with 2,000 tax-free music compositions.

Nov. 1: NBC moves western headquarters into Hollywood Radio City, new $2 million building.

Nov. 1: FCC superpower committee recommends ending WLW Cincinnati's license for 500 kw operation and returning static to 50 kw.

Nov. 15: Mexican Senate refuses to ratify broadcast agreement section of treaty with U.S.

Nov. 15: Agreement to avoid simulcasts in dramatic programs is reached by network heads, in conference with FCC following hysterical reaction to Orson Welles "War of the Worlds" broadcast on the CBS Mercury series.

Dec. 1: Three stations refuse to carry Father Coughlin programs without advance scripts following broadcast considered anti-Semitic.

Dec. 1: David Sarnoff, RCA president, urges industry self-regulation of programming at opening of chain monopoly hearings.

Dec. 15: Suits of Paul Whiteman against WNEW New York and Others, Jr., sponsor of a record program on WNEW, and RCA against Whiteman, WNEW and El
TV power boost in mind?
get ahead with S-E amplifiers!

**LOWER INITIAL INVESTMENT!**
- Add-A-Unit design allows low-cost power boost through addition of S-E amplifiers.
- No need to dispose of or replace existing transmitters, in whole or part.
- Engineered for color—meets FCC specs.

**FITS THE SPACE!**
- Self-contained, compact construction—no external blowers, power supplies, pumps or transformers—takes less floor space.
- Place units in straight line, "U," "L" or split arrangement.
- Fits into standard elevators and thru doorways.

**EASIER OPERATION!**
- Only S-E equipment has full-length, tempered glass doors—permits visual inspection of tubes at all times.
- Components of highest quality, readily accessible.
- All tuning made at front of equipment.

When you investigate equipment, be sure it measures up to practical, as well as technical standards. For example, you have a right to demand...and expect lower initial cost, greater operating economy, complete reliability, easier maintenance, and adaptability to small space requirements...when you boost power with Standard Electronics TV Amplifiers. With exclusive Patchover, Add-A-Unit design and self-contained construction...S-E equipment alone meets all these requirements! Put your thoughts into action now...send for new free bulletin showing how you can boost power the more dependable, more economical way...with S-E!

**standard electronics corporation**
A SUBSIDIARY OF DYNAMICS CORPORATION OF AMERICA, INC.

285-289 EMMET STREET  NEWARK 5, NEW JERSEY
become a suit of RCA against Whiteman when Mr. Whiteman drops his suits and WNEW and Elin make no defense against RCA; at stake is determination of whether a recording company or a recording artist, or either, has control of broadcast performances of phonograph records.

1939

Jan. 1: CBS enters recording field with purchase of American Record Corp. for $700,000; ARC subsidiaries include Columbia Phonograph Co., one-time owner of the network.

Jan. 1: Patent for iconoscope-kinescope tubes, basis of electronic tv, is granted to Dr. Vladimir Zworykin after 15 years of litigation.

Jan. 15: FCC Comr. George Henry Payne drops $100,000 libel suit against Broadcasting.

Jan. 15: Federal statutory court issues permanent injunction restraining New Jersey Board of Public Utility Commissioners from interfering with NBC's erection or operation of an experimental station, holds broadcasting to be interstate and therefore outside authority of a state commission.

Feb. 1: FCC is legally bound to consider economic factors if issue is raised, U.S. Court of Appeals for District of Columbia rules in remanding Commission's grant of new station in Dubuque, Iowa, to the Telegraph Herald.

Feb. 15: AFRA strike is averted as networks sign commercial program contracts.

A NEW-BORN WISHES AN ADULT WELL!

Congratulations! B-T has realized success from spirited determination in twenty-five years of serving the industry! WCYB-TV . . . infant station in a full-grown market, will surge ahead just as successfully. It isn't the brashness of youth that prompts that statement. Serving the Tri-Cities . . . Bristol, Virginia - Tennessee, Johnson City and Kingsport, Tennessee . . . plus five states . . . how could we miss?

NBC & ABC NETWORKS REPRESENTED NATIONALLY BY WEED TELEVISION CORP.

Page 190 • October 15, 1956
July 15: NAB adopts code of self regulation which bars liquor advertising and sale of time for controversial issues, limits commercial time to 10% of program in evening; demands action on copyright.

July 15: Federal District Court in New York grants RCA a permanent injunction against WNEW New York broadcasting Victor and Bluebird records without permission in decision holding recording company, not artist, holds performance rights except where contract places them with artist; RCA plans to offer license to stations.

Aug. 1: New FCC rules governing broadcasting become effective, with station licenses extended from six months to one year and horizontal power increases for qualified local and regional stations.

Aug. 15: Angered by refusal of ASCAP to offer terms for new licenses, NAB Copyright Committee retains Sydney Kaye, New York copyright attorney, as special counsel to aid broadcasters in building their own source of music.

Aug. 15: James L. Fly, general counsel of TVA, named by President and confirmed by Senate to succeed Frank R. McNinch as FCC chairman, retiring Sept. 1.

Sept. 1: Appellate Court rules that economic interest must be considered in issuing station licenses, scuttling FCC theory that competition does not constitute an appealable interest; Commission calls ruling a body blow at American system of broadcasting.

Sept. 15: Special copyright convention of NAB unanimously approves a $1.5 million fund to set up its own supply of music.

Sept. 15: Supreme Court of Pennsylvania, overruling lower court, finds NBC not liable for ad libbed remarks of Al Jolson; ruling sets precedent that a broadcaster is not liable for remarks spoken without warning by an artist employed by a sponsor using the broadcaster’s facilities.

Sept. 15: Networks draft code for war coverage: goal is full, factual reporting with minimum of horror, suspense and undue excitement.

Oct. 15: NAB Code Committee, in first action, bars sponsored broadcasts of Father Coughlin and Elliott Roosevelt under the “no sale of time for controversial issues” rule; some broadcasters say they’ll resign from NAB.

Nov. 15: Elliott Roosevelt organizes Transcontinental Broadcasting System, to start operating Jan. 1 as fifth national network.

Nov. 15: NAB board backs up Code Committee; John Shepard goes along by forfeiting payment for Father Coughlin broadcasts; four Texas State Network stations resign.

Nov. 15: United Fruit Co. buys time on NBC’s international stations for daily newscasts to Latin America; first advertiser to sponsor such broadcasts.

Dec. 15: Triple fm relay, with program broadcast by one station picked up and rebroadcast by a second, whose signal was again picked up and rebroadcast, without loss of quality.

1940

Jan. 1: Mexico’s ratification of the North American Regional Broadcasting Agreement, following similar actions by Canada, Cuba and the United States, paves way for shift...
in broadcasting frequencies agreed on in Havana two years earlier.

Jan. 1: NBC gets biggest news beat of 1939 with eye-witness description of sinking of Naval Graf Spee, broadcast as it happened in Montevideo harbor.

Jan. 15: Pin Broadcasters Inc. is organized at New York meeting.

Feb. 1: U.S. Supreme Court decision in so-called Pottsville case gives FCC a freer hand in dealing with applications for new stations, eliminating all questions of priority of filing.

Feb. 15: New “crackdown” era foreseen as FCC refers complaints on Pot o’ Gold and other giveaway programs to Dept. of Justice for possible action under the anti-lottery laws.

Feb. 15: AFM sets scale of $18 a man for recording a 15-minute transcription.

March 1: FCC approves “limited commercialization” of television effective Sept. 1.

March 15: Sun Oil Co. becomes first sponsor to have programs regularly telecast; company’s Monday-Friday Lowell Thomas newscasts on NBC-Blue are also carried on W2XBS, NBC experimental tv station in New York.

March 15: RCA cuts price of sets, starts sales drive intended to put a minimum of 25,000 tv sets in homes in service area of NBC’s New York video station.

April 1: Supreme Court of U.S. upholds “free competition” stand of FCC General Attorney William J. Dempsey, emphasizes that Communications Act gives the FCC “no supervisory control of the programs, of business management or of policy” nor contains any order to consider the effect of the competition of a new grant with existing stations.

April 1: FCC suspends order for “limited commercial” operation of tv, censures RCA for sales efforts which are seen as an attempt to freeze tv standards at present level, calls new hearing; critics call move “usurpation of power.”

April 15: Justice Dept. declines to prosecute Pot o’ Gold.

April 15: New 42-page license application forms require so much information that many radio attorneys fear they will be virtually impossible to fill out.

Westinghouse terminates contract for NBC management of sales and programs of KDKA Pittsburgh, KYW Philadelphia, WBZ Boston and WBZA Springfield after nine years; will assume management of owned stations itself.

May 1: William J. Dempsey and William Koplovitz resign as FCC general counsel and assistant general counsel to open own law firm.

May 1: BMI acquires catalog of M. M. Cole Music Publishing Co. as first major step toward building reservoir of music for broadcasters.

May 15: Justice Dept. subpoenas ASCAP files.

May 15: FCC names Telford Taylor, special assistant to Attorney General, and Joseph L. Rauh Jr., assistant general counsel of Wage & Hours Administration, to head Commission’s legal staff.

June 1: FCC authorizes commercial operation for fm, assigns it 35 channels 200 kc wide between 43 and 50 mc; puts television back into laboratory until industry reaches agreement on standards.

June 1: Henry W. Grady School of Journalism of U. of Georgia institutes George Foster Peabody awards for radio; first awards to be given in 1941 for achievements of 1940.

June 15: James C. Petrillo is elected president of American Federation of Musicians, succeeding Joseph N. Weber, retiring after 40 years as AFM head.

June 15: FCC Chain Monopoly Committee report recommends drastic changes in network operations, such as limiting network ownership of stations and length of affiliation contracts, taking networks out of transcription and talent booking business, forcing them to serve remote areas whether this is profitable or not.

July 1: Republican convention adopts first radio plank ever put into a political party platform, upholding the application of Constitutional principles of free press and free speech to radio; was also the first party convention to be telecast.

July 15: Niles Trammell become NBC president, succeeding Lenox R. Lohr, re-signed to head Chicago’s Museum of Science and Industry.

Aug. 1: U.S. Circuit Court of Appeals upholds right of broadcaster to put phonograph records on air without need to get permission from either recording company or recording artists; reverses decision of Federal District Court in RCA-Whiteman-WNEW case.

Aug. 1: Democrats also adopt a “free radio” plank for party platform, urging radio be given some protection from censorship as press.

**The Shenandoah Valley Market is Vital to Sales in Virginia . . .**

- $694 million dollars in retail sales — up 43.8%, 1951-1956.
- 756,000 population in WSWA area.
- WSWA-TV coverage, 89,284 TV homes. *(Television Magazine, Sept. 1956).*
- New Industry: General Electric, Westinghouse, duPont, American Safety Razor, Reynolds Metal . . . adding new payrolls and population to the Valley.

The Dominant Radio Station in the Shenandoah Valley
WBEN-TV's

"Speaker of the House"

talks the sponsor's language!

John Corbett, "Speaker of the House" on WBEN-TV's prestige program, covers the home with helpful information on everything from painting to potting flowers.

And John Corbett, WBEN-TV's "Speaker of the House", talks their language. His typical afternoon TV stint, a fact-filled 15 minutes of practical help for homemakers and homeowners, gets results. 820 lawn rockers from four minute spots; 5,800 kitchen dish towels from three minute announcements; 8 refrigerators and 257 Bar-B-Q sets from just a minute each.

Money talks and the "Speaker of the House" makes the kind of conversation that rings the till. When Johnny speaks for you he's heard in the WBEN-TV market — New York state's second largest.

Before you let anyone tell your product-story in Western New York learn all about another of the prestige programs of WBEN-TV — "The Speaker of the House" — heard daily Monday through Friday at 1:45 p.m., on Channel 4 — Buffalo.

October 15, 1956 • Page 193
Aug. 1: BMI ships transcriptions with more than 50 non-ASCAP numbers to member stations; first product of plan to make stations musically independent.

Aug. 15: National Television Systems Committee, representing tv manufacturers and broadcasters, organizes to seek determination of proper standards for tv broadcasting.

Sept. 1: CBS demonstrates system of color television developed by its chief tv engineer, Dr. Peter Goldmark.

Sept. 15: Assignment shifts affecting 777 standard broadcasting stations in the U.S. are ordered by FCC for March 29, 1941, in accordance with North American Regional Broadcasting Agreement reached in Havana in December 1937.

Oct. 15: Independent Radio Network Affiliates conferences confer with NBC and CBS executives to block the "alarming encroachment of network advertisers on spot announcement periods" which stations feel belong to them; report progress.

Nov. 1: President Roosevelt withdraws nomination of Thad H. Brown for new seven-year term as FCC Commissioner at Mr. Brown's request, after Senate recesses without acting on the appointment, which met vigorous opposition.

Dec. 1: BMI makes performing rights to the more than 15,000 compositions in the catalog of Edward B. Marks Music Corp. in last month of preparations for the broadcasters' break with ASCAP.

1941

Jan. 1: After FCC approves transfer of WMCA to Noble, former owner Donald Flamm asks Commission to reconsider and dismiss the sale.

Jan. 1: Dept. of Justice prepares criminal suits against ASCAP, BMI and broadcasting networks and groups for music monopoly; U.S. Supreme Court will review state anti-ASCAP laws; broadcasters are confident they'll win their battle against music monopoly.

Jan. 13: After more than 10 years of semi-monthly publication, BROADCASTING becomes a weekly.

Jan. 27: BMI and Dept. of Justice agree on terms of consent decree.

Jan. 27: Press Association Inc. is formed as new subsidiary of Associated Press to handle news for radio.

Feb. 10: Clear channel stations form Clear Channel Broadcasting Service, name Victor A. Sholis, former public relations chief of Dept. of Commerce, as director, with Washington headquarters.

Feb. 10: U.S. Court of Appeals for District of Columbia, in series of decisions holds itself powerless to issue stay orders enjoining FCC from putting its rulings into effect unless public interest would be adversely affected, and then solely on questions of law.

Feb. 17: Broadcasting editorial "Don't Give It Away" suggests that merchandising which stations provide without charge be strictly limited.

Feb. 24: ASCAP accepts government consent decree; will offer broadcasters both blanket and per-piece licenses.

Feb. 24: AFM President James C. Petrillo, in ruling aimed at American Guild of Musical Artists, orders AFM members not to perform with any instrumentalist who is not an AFM member.

March 3: Thad H. Brown dies at 54, four months after his retirement from FCC to re-enter private law practice.

March 3: Shortage of recording blanks foreseen as Office of Production Management places aluminum in "much needed" category, giving defense program first call on this metal.

March 10: Ray C. Wakefield is nominated for FCC to fill place vacant since last June.

March 17: General Foods signs unprecedented contract with Jack Benny giving comedian control of his Sunday night period on NBC Red network at its termination, whether or not he continues under GF sponsorship.

March 24: FCC orders public hearings on newspaper ownership of radio stations.

March 31: Group of nearly 100 newspaper publishers with radio interests name Mark Ethridge, Louisville Courier-Journal (WHAS), chairman of steering committee to oppose governmental action outlawing newspaper ownership of stations; 292 of country's 893 broadcasting stations are newspaper-affiliated.

March 31: Wholesale switch of frequencies in compliance with Havana treaty goes through without a hitch.

April 28: President Roosevelt drafts Mark Ethridge to undertake survey of the entire broadcasting situation.

April 28: Newspaper stations elect Harold Hough, Fort Worth Star-Telegram (WBAP-KGKO), chairman of steering committee; appoint Thomas D. Thatcher, former Solicitor General, as chief counsel; vote $200,000 for hearing expenses.

May 5: FCC authorizes full commercial operation for tv as of July 1, fixes standards at 525 lines, 30 frames per second.

May 5: Major reorganization of radio network operations is called for by FCC network monopoly report, which would bar option time, exclusive affiliations, ownership of more than one station in a market or operation of more than one network by the same interests.

May 12: MBS signs ASCAP blanket license at 3% of gross for four years, 3½% until 1950, on eve of NAB convention NBC, CBS continue negotiations for better terms.

May 19: Industry's stormiest convention votes fight to finish against FCC monopoly rules, backs plan for Senate investigation of FCC, asks legislation to aid broadcasters and angers FCC Chairman James L. Fly into a rebuttal in which he describes NAE and its leaders as akin to "a mackerel in the moonlight—it both shines and stinks."

May 19: NAB President Neville Miller urges broadcasters to stand by BMI, condemns MBS-ASCAP pact; several MBS stockholder stations resign from NAB; 35 MBS affiliates organize to investigate the ASCAP deal, tell MBS they won't accept ASCAP music.
Our ratings are higher in saturated San Diego!

There are more people in San Diego watching Channel 8 more than ever before.

**Sales Management 1956 Survey of Buying Power.
May 26: BMI growth continues; has 190 affiliated publishers, 690 station members.
June 2: CBS withdraws from talent management field, sells Columbia Artists Bureau to Music Corp. of America for $250,000, Columbia Concerts Corp. to its present management.

June 2: FCC amends rules so "any person" can petition for a change in rules of practice or procedure; formerly only "an applicant" had that right.
June 2: Socony-Vacuum Oil Co. becomes first fm network sponsor by signing for newcasts on American Network, fm network serving New England.
June 2: Recording companies turn to glass for recording bases as government priorities curtail supply of aluminum.
June 30: Bulova Watch Co., Sun Oil Co., Lever Bros. Co. and Procter & Gamble Co. sign as sponsors of first commercial telecasts on July 1 over NBC's WNBT (TV) New York (until then W2XBS); first tv rate card puts WNBT base rate at $120 per evening hour.

Aug. 4: NBC reaches agreement with ASCAP calling for blanket licenses with network to pay 2 3/4% of net time sales, stations 2 1/4%; stations' approval needed.
Aug. 11: FCC adopts order banning multiple ownership of stations in same area.
Sept. 1: After arguments by broadcasters, broadcast unions and others, Senate Finance Committee deletes tax on time sales from the 1941 Revenue Act.
Sept. 8: Completion of arrangement for a 92-station Pan American Network to re-broadcast NBC programs shortwaited from the U.S. is announced by John F. Royal, NBC vice president, on his return from a six-week 20,000-mile tour of Latin America.
Oct. 13: FCC extends license term for standard broadcasting stations from one to two years.
Nov. 3: Clifford J. Durr, former general counsel of the Defense Plant Corp., is confirmed as an FCC commissioner, filling post vacant since the expiration of the term of Frederick I. Thompson on June 30.
Nov. 24: BMI offers new eight-year blanket licenses at $300,000, reduction from original one-year contracts, covering both commercial and sustaining programs, with clearance at source on network shows.
Dec. 8: NBC separates Red and Blue networks by setting up Blue Network Co. with Mark Woods as president, Edgar Kobak as executive vice president.
Dec. 15: Defense Communications Board becomes supreme communications arbiter with the U.S. at war; plan is to keep broadcasting on as normal operations as possible.
Dec. 15: Dr. Frank Conrad, assistant chief engineer of Westinghouse known as the father of broadcast radio, for his pioneering achievements, dies of a heart attack at 67.
Dec. 15: President Roosevelt's broadcast to the nation on Dec. 9, day after war was declared, has largest audience in radio history (about 90 million) and highest ratings (CAB: 83; Hooper, 79).
Dec. 22: Thomas A. McClelland, chief engineer of KLZ Denver, on duty as an ensign with the USNR at Pearl Harbor, was killed in action during Japanese attack Dec. 7, radio's first casualty of the war.
Dec. 29: J. Harold Ryan, vice president, Fort Industry Co., is named assistant director of censorship, in charge of broadcasting.

1942
Jan. 5: Dept. of Justice files antitrust suits against NBC and CBS.
Jan. 5: Manila radio stations are "dismantled and destroyed" to keep them from falling into hands of Japanese.

FATHER COUGHLIN: CLERIC OF CONTROVERSY

AN OBSCURE but eloquent Catholic priest, Fr. Charles E. Coughlin, serving a parish at Royal Oak, Mich., near Detroit, rose swiftly to national prominence in the early '30s when his CBS network broadcasts captured the ears of millions. Soon it took 119 stenographers to handle his mail.

The broadcasts moved to an independent network in the summer of 1932, with 24 major stations carrying the Golden Hour. By 1935 his program was supported by a $300,000 kitty for time and telephone lines, one of the industry's major seasonal budgets.

Despite heated criticism both from his own church and non-Catholic sources, Fr. Coughlin had the support of his bishop. His radio counsellor was Leo Fitzpatrick, vice president-general manager of WIR Detroit; his agency, Aircast ers Inc. By January, 1938 the independent hookup extended to 58 stations.

Signs of serious trouble began to appear in late 1937 after a change in bishopry. Fr. Coughlin, in his typical free-swinging manner, stated in a news interview that President Roosevelt showed "personal stupidity" in appointing Hugo L. Black to the U.S. Supreme Court. More trouble appeared when WOR New York rejected his program on the ground it would not sell time for commercial religious broadcasts.

By 1939 WMCA New York had rejected the program unless it could see the script in advance. WDAS Philadelphia adopted a similar policy, and both were promptly and indignantly picketed by aroused friends of the cleric. FCC remained discreetly silent.

Though Fr. Coughlin had taken strong stands on religious and political topics, including material that was called anti-Semitic, he reached a controversial peak in 1939 when he urged listeners to organize an "army of peace" and march on Washington to protest the liberalization of neutrality laws. Charges followed that the priest was an enemy of democracy, disciple of fascism, advocate of violence and purveyor of hatred.

In August, 1939 Elliott Roosevelt, the President's son, criticized Fr. Coughlin on his MBS program, starting a fresh feud. NAB's new Code Committee went into operation Oct. 1, that year, with its compliance group ruling that neutrality discussions in sponsored programs were controversial and hence violated the code. This ruling didn't mention Fr. Coughlin specifically but a number of stations promptly cancelled his broadcasts. NAB's board endorsed the code interpretation and more stations cancelled.

FCC Chairman James Lawrence Fly gave the NAB implied endorsement by saying the code was a manifestation of democratic processes and urging that it be given a chance. A few years later he roundly rebuked NAB for some of the code clauses.

The program had fatal troubles in 1940. Another code ruling, issued in September, was construed as permitting Fr. Coughlin to be entitled to commercial time "but only during the period of the (Presidential) campaign."

When many large stations refused to sign contracts for the Fr. Coughlin series, the project was finally abandoned for lack of adequate facilities.

CONGRATULATIONS
Feb. 12: Radio censor J. Harold Ryan gets Fourth Interceptor Command at Los Angeles to rescind ban on testimonials and request numbers, instituted for fear of coded espionage.

Jan. 19: Censorship code outlaws man-on-the-street and other ad lib interviews and quiz programs.

Jan. 19: Office of Facts & Figures is designated as clearing house for governmental broadcasts, with William B. Lewis, former CBS program vice president, as coordinator.

Feb. 2: Broadcasters' Victory Council is formed as liaison with all government agencies having wartime radio functions; chairman is John Shepard III, president, Yankee Network.

Feb. 2: FCC shuts off construction of new stations in all areas now getting primary service, pending formal orders from War Production Board freezing broadcast assignments for duration.

Feb. 2: ASCAP approves clearance at source on transcribed programs.

Feb. 23: The Advertising Council is organized by advertisers, agencies and media to put the talents and techniques of advertising at the disposal of government to inspire and instruct the public concerning various phases of the war effort.

Feb. 23: CBS cuts time allowed for commercials on newscasts by 20%, bans jingles or other "undue gaiety," puts restrictions on middle commercials.

March 23: Office of Censorship forbids any mention of weather on baseball broadcasts.

March 23: Committee on War Information issues war policies, pledges that public will get bad news as well as good, so long as aid is given enemy.

March 30: Edward Klauber, CBS executive vice president, is elected to new post of chairman of the executive committee; Paul W. Kesten becomes vice president and general manager, with all departments reporting to him except programming, which reports to President William S. Paley.

April 13: Minimum program time required of tv stations is cut from 15 hours to four hours a week for war period.

April 13: U.S. Supreme Court upholds power of U.S. Court of Appeals of the District of Columbia to issue orders staying FCC decisions during the pendency of appeal; decision, called major legal victory for broadcasters, comes after three years of litigation by Scripps-Howard Radio on behalf of WCPO Cincinnati.

April 20: War Production Board cuts supply of shellac for phonograph records to 30% of last year's figure; transcriptions, made of vinylite, are not affected.

April 27: Deems Taylor, music composer, critic and commentator, is elected president of ASCAP, succeeding Gene Buck who had held post for nearly 20 years.

May 4: FCC issues freeze order on station construction.

May 18: NAB convention by-passes reorganization proposals, votes to set up industry-operated equipment pool, admits networks to active membership.

May 18: Keystone Broadcasting System, transcription network, holds first meeting of some 50 affiliated stations.

May 18: Blue Network grants 2% cash discount long sought by AAAA.

June 1: FCC eases operator requirements to meet shortage.

June 15: CBS revises its discount structure to include a new 15% discount for advertisers using the full CBS network of 115 stations.

June 22: President Roosevelt creates Office of War Information, appoints Elmer Davis, CBS commentator, as its director.

June 29: American Federation of Musicians notifies recording companies that after July 31 no AFM member will play for recordings of any kind.

July 13: Gardner Cowles Jr., publisher-broadcaster, is named assistant director of OWI in charge of all domestic operations; William B. Lewis, former CBS program vice president and radio chief of Office of Facts & Figures, heads radio bureau of Mr. Cowles' branch of OWI.

July 20: Petrillo ruling forces NBC to cancel broadcasts from National Music Camp at Interlochen, Mich.

July 20: Broadcasting is declared an essential industry by Selective Service System.

Aug. 3: Justice Dept. asks injunction as AFM President Petrillo refuses to cancel the strike against recordings.

Aug. 24: Ratings battle begins when OWI asks why C. E. Hooper Inc. shows audiences up in 1942 over 1941, while Cooperative Analysis of Broadcasting reports a decline.

Sept. 7: AFM makes record ban complete by canceling permission previously given to members to make commercial transcription for one-time air use.

Our CONGRATULATIONS TO B-T

ON ITS 25 YEARS OF SINCERE SERVICE TO THE INDUSTRY

WRBL, Columbus, Georgia, too, has seen a quarter century and more of service. In 1928 WRBL Radio and in 1953 WRBL-TV, Channel 4, embarked on careers dedicated to serving the community, the Chattahoochee Valley and their total audience with THE BEST OF PROGRAMMING.

That policy remains today and will continue to guide our radio and television programming. We believe it pays big dividends for our advertisers. *

CONGRATULATIONS

BROADCASTING

TELECASTING

ON YOUR 25th Anniversary

To Sol Taishoff and our other good friends at BROADCASTING-TELECASTING, who have done such an outstanding job of furnishing the radio-television industry with up-to-the minute information, we TAKE OFF OUR TEXAS SIZE HAT! Sincerest congratulations on your 25th Anniversary.

From a humble beginning as one of the pioneers of Southwest radio broadcasting, WBAP-RADIO is now in its 34th year of radio service to the Fort Worth-Dallas area. With two great stations — WBAP-820 and WBAP-570 — delivering IMPACT RADIO to a 10 BILLION DOLLAR, 4-STATE market, WBAP-RADIO now stands out as one of the foremost radio advertising mediums in the entire nation!

On September 27, 1948, WBAP-TV, Channel 5, became the first television station on the air in the Southwest. Now entering its 9th year of telecasting, WBAP-TV has scored many other firsts: First to offer complete color telecasting facilities . . . first with consistent good programming, both local and network . . . first in delivering the full Fort Worth-Dallas audience to advertisers! And as in the past, WBAP-TV will continue to set the pace for the television industry in the Southwest!

WHICH ONE HAS THE FRENZY?

TO MODERATE the concern of those upset by Elvis Presley’s TV performances, here’s a picture of some earlier-day rock and roll. It was called swing. Announcer Harry Lytle (l) was snapped in September 1938 conducting a swing session on WOSU Columbus. Mr. Presley was snapped in September 1956 preparing for a CBS-TV broadcast. The mood’s the same; only the names have been changed.

Oct. 12: Radio time contributed to government would cost $64 million a year at regular commercial rates, Elmer Davis, OWI director, states in testimony before House Appropriations Subcommittee.

Oct. 19: Chicago Federal Court dismisses government suit against AFM on grounds a labor dispute is involved; AFM President Petrillo rejects request of Chairman Wheeler of Senate Commerce Committee to lift recording ban for duration of the war; transcription companies plan united action.

Nov. 2: Government leases shortwave stations from private owners; Office of War Information and Coordinator of Inter-American Affairs to handle programming.

Nov. 16: Dr. Miller McClintock, executive director of the Advertising Council, is named first paid president of MBS.

Nov. 23: FCC adopts wartime equipment pool plan for all licensees.

Dec. 21: General Tire & Rubber Co. contracts to buy Yankee Network, its four AM and two FM stations, for $1.2 million.

1943

Jan. 4: Office of War Information asks stations to clear a quarter-hour, Monday-Friday strip for important war information broadcasts, which will be available for local sponsorship.

Jan. 18: Under pressure of Senate committee, James C. Petrillo agrees to convene the AFM board to draft terms for resumption of work on recordings.

Jan. 25: House approves Cox resolution to investigate the FCC; Rep. Eugene Cox (D-Ga.) attacks FCC as “ nastiest nest of rats in this entire country.”

Feb. 15: AFM proposes recording companies pay fixed fee for each recording into union unemployment fund, amount to be negotiated, as price of ending strike; transcriptions for one-time use exempted.

March 1: Recording companies reject Petrillo “fixed fee” plan involving unacceptable philosophy that recording industry has “special obligation to persons not employed by it.”

March 1: FCC adopts policy to protect applications for TV and FM facilities until end of war.

Note: According to a study of SRDS use made by National Analysts, Inc., 83% of all account men interviewed have SRDS available at meetings in clients' offices.
March 8: First Alfred L. du Pont awards of $1,000 each for public service broadcasting go to KGEI, General Electric shortwave station, and Fulton Lewis Jr., MBS commentator.

May 17: Supreme Court upholds right of FCC to regulate broadcasting practices, specifically to compel compliance with its network monopoly rules; networks rush to work out new contracts with affiliates by June 14 deadline; exclusivity is forbidden, option time curtailed.

May 17: Transcription companies and AFM reach impasse in negotiations as companies refuse to meet union demand that they withhold recording from any station deemed unfair by AFM.

May 24: Supreme Court rules FCC erred in breaking down 850 kc channel and assigning WHDH Boston fulltime on that frequency without hearing testimony from its occupant, KOA Denver; decision seen as guaranteeing right of stations for full bearing before their order is modified by Commission, with burden of proof on applicant.

June 21: CBS affiliates open drive to bar hitch-hike, cow-catcher announcements.

June 21: Assn. of Radio News Analysts adopts code opposing censorship; Paul White, CBS news director, insists on right to "edit."

July 5: House Select Committee opens hearings on FCC with charges of gross inefficiency and interference with war effort.

July 5: Transcription companies ask War Labor Board to help after AFM President Petrillo tells committee the union will "make no more transcriptions for anyone at any time."

July 12: Decca Records buys World Broadcasting System; P. L. Deutsch to continue as president with five-year contract.

July 19: CBS tests program analyzer to find out what makes people listen; device is invention of Paul Lazarsfeld, director of Office of Radio Research at Columbia U., and Frank Stanton, CBS vice president.

July 26: War Labor Board accepts jurisdiction in AFM recording ban, but fails to order union to return to work for transcription companies.

Aug. 2: Edward J. Noble buys Blue Network from RCA for $8 million cash; will dispose of WMCA New York.

Aug. 9: Plan to end AFM recording strike by getting broadcasters to agree to pay performance fees to union for all musical record broadcasts and to work for legislation giving copyright in records to both recording artist and recording company finds little favor among broadcasters.

Aug. 9: Edward Klauber resigns as CBS director and chairman of executive committee because of ill health.

Aug. 30: MBS plans to use 3-5 p.m. time for recorded repeats of top evening network programs; offers free time to advertisers during test period of 13 weeks.

Sept. 13: General Dwight D. Eisenhower himself broadcasts the news of Italy's surrender, the first such event to be announced by radio.

Sept. 20: CBS acts to eliminate "cow-catcher" and "hitch-hike" announcements.

Sept. 20: NAB news and public relations committee adopt resolution on editorializing on air, that management must have final say as it is responsible to public as licensee.

Sept. 27: Decca Records and World Broadcasting System sign with AFM, agree to pay royalties direct to union.

Oct. 18: Mark Woods remains as president of Blue Network and Edgar Kobak as executive vice president as Edward J. Noble assumes ownership.

Oct. 18: Government drops antitrust suits against networks; MBS dismisses its action against RCA-NBC.

Oct. 23: Treasury Dept. and OWI permit sponsorship of war bond announcements, for first time; OWI rejects idea of government itself buying time.

Nov. 8: R. Morrie Pierce, chief engineer of WGAR Cleveland, on leaving with OWI, is revealed as having major role in surrender of Italian fleet, broadcasting surrender terms from "bailing wire" transmitter he built at Algiers.

Nov. 29: FCC bans multiple ownership of standard broadcast stations in same area, effective immediately for new grants, June 1, 1944, for existing "overlapping" situations.

Nov. 29: Edward Klauber, former chairman of CBS executive committee, becomes associate director of OWI, succeeding Milton S. Eisenhower.

Dec. 20: FCC extends broadcast licenses to three years. 1944

Jan. 17: FCC decides not to adopt any general rule on newspaper ownership of radio stations but to consider all applications on individual merits; announcement ends three years of uncertainty.

Jan. 17: NBC makes its programs available to fm outlets of its am affiliates without charge to sponsors until increased audience warrants it.

Jan. 17: Some 6,000 radio station and network employees, nearly a quarter of the industry total, are in armed forces, a Broadcasting survey reveals.

Jan. 31: FCC-WBC ease construction ban, permitting new stations where such grants would serve an "outstanding public need or national interest."

Jan. 31: CBS makes its programs available for fm stations of am affiliates at no charge to sponsors.

Feb. 7: J. Harold Ryan, assistant director of censorship, is elected president of NAB for an interim period.

Feb. 14: Gov. John W. Bricker of Ohio urges legislation to restrict the FCC and keep radio as free as the press.

March 6: MBS restricts commercial religious programs to Sundays before 1 p.m., limits to half-hour, bans fund appeals.
Poor Ab O'Ridginy, so she'd repine no more, Promised his helpmate to knock off a dinosaur.

Promised his helpmate to knock off a dinosaur.

This, on reflection, seemed good for no yaks— No one yet, you must know, had invented the axe.

So Ab did—and whanging the big lizard's gizzard, Proved that the right weapon makes you a wizard!

Moral: You don't have to invent it!

Your best sales weapon for Dayton is ready and waiting—Dayton's first and favorite WHIO-TV

For sales prowess in Dayton

THE SHOW MUST GO ON [whio-tv]

How's to get your share of sales from Dayton’s 593,856 families of viewers and their 511,310 TV receivers? Via WHIO-TV! How else? Surveys say that they really keep their eyes on us, morning, afternoon, and evening.” And don’t forget, those figures prove that our rich Miami Valley audience is 86.1 televised. CHANNEL 7 DAYTON, OHIO

One of America's great area stations
**WHEN NBC BEGAN REGULAR NETWORKING**

NOV. 15, 1926, saw the beginning of a new era in American broadcasting. On that day the first NBC program inaugurated network broadcasting on a regular, permanent basis. Before that there had been a number of network broadcasts, but each had been an individual affair, with stations booked together only for the time required to carry some special event like a championship prize fight or a Presidential address. But with NBC came regularly scheduled programs and the beginning of regular listening each week “same time, same station.”

A guest at the first NBC program, Bruce Barton, today chairman of the board of BBDO, described the coming network radio in an article in the August 1927 issue of American magazine, from which the following paragraphs are quoted:

“On Nov. 15 of last year, I put on my stiff shirt and went down to the Grand Ballroom of the Waldorf-Astoria Hotel to attend the inaugural program of the National Broadcasting Co. There were perhaps 500 other stiff-shirted gentlemen there, and as many ladies in evening dress.

“Down in front was Walter Damrosch with his orchestra, playing the accompaniment for Titta Rufo, Metropolitan Opera star. Harold Bauer, the famous pianist, came in a few minutes later. His ship had been delayed, and a special tug had been sent down the harbor to hurry him to the dock, so that he might appear on this program at the exact minute announced. Following his performance was a second’s pause, and then suddenly, as clear and strong as though the voice were there beside us, the announcer—Ladies and gentlemen: We are now in the Drake Hotel, Chicago, in the parlor of Miss Mary Garden. Miss Garden will sing.”

“And Miss Garden did.

“Another second’s pause, and again a different announcer—Ladies and gentlemen: We are now in Independence, Kansas, in the dressing room of Mr. Will Rogers. Mr. Rogers will speak.”

“And out of the air about us came the unmistakable tones of Will, who said he was traveling around the country as ‘God’s gift to those who had failed to see Queen Marie.’

“I was sitting in Mr. [Owen] Young’s box, and while Will Rogers was still speaking, a messenger entered and passed us a photograph. A photograph of Mary Garden before the microphone in her parlor at the Drake Hotel; a photograph taken less than half an hour before and sent to us over the wire. I passed it back without any comment. What comment could one make that would not be inane?’

“Where’s Deac Aylesworth? [the late M. H. Aylesworth, NBC’s first president]’ I asked.

“‘Downstairs,’ somebody answered. ‘Weber and Fields are to wind up the program. They have never been in front of the microphone, and they’re scared half to death for fear they won’t remember their lines.’

“I went downstairs. Behind a big screen in one of the dressing rooms I found the veteran comedians, studying bits of paper like schoolboys cramming for an examination. And with them Deac Aylesworth, holding their hands and telling them not to worry, because everything was going to be all right.’
in order to make a color camera versatile we use a [GPL] Vari-Focal Lens…”

Color or black-and-white—the GPL Vari-Focal Lens doubles the versatility and usefulness of any camera with which it is used.

As WDSU-TV and many other stations have found, with a Vari-Focal Lens you can handle an entire show with one camera. In fact you can perform most work ordinarily requiring two chains, for the GPL Vari-Focal Lens can zoom continuously from a long shot to an extreme close-up without disturbing pick-up continuity or camera orientation. Speed of full zoom is variable from 2 to 30 seconds. The Vari-Focal Lens is completely color-corrected, and fits all monochrome and color image-orthicon cameras.

Equally useful in studio and field, the GPL Vari-Focal Lens has a focal range nearly twice that of any other lens in the industry. It can make a 10:1 change in focal length in two 5:1 steps—from 3” to 15” and 6” to 30”. Once the camera is focused, the object remains sharp, including corners, as the focal length is varied.

Silently motor-driven, the lens can be operated from camera or control room. A new feature, manual focus control, is now available. With this control, located at the cameraman’s fingertips, changes in focal plane can be made by simple turns of the knob.

And, of course, the GPL Vari-Focal Lens has same standard of resolution as high-quality camera lenses of fixed focal length. Its field is flat over the entire range.

No wonder the GPL Vari-Focal Lens is used by progressive stations all over the country. They know that there is no more effective way to multiply the usefulness of their camera equipment.

All three of the big TV networks have multiple installations

Find out for yourself just how versatile a TV camera can be—write or phone us for full information or a demonstration of the GPL Vari-Focal Lens.
strikes against recording companies and KSTP St. Paul, War Labor Board refers matter to Office of Economic Stabilization.

Sept. 25: Chester J. LaRoche, former chairman of Young & Rubicam, is elected vice chairman of the Blue Network board, making him operating head of the network.

Sept. 25: FCC approves exchange of Cowles’ WMT Cedar Rapids for American Broadcasting Co.’s WOL Washington, previously cleared with Internal Revenue Bureau which agreed there need be no tax payment since no money is involved in transfer.

Oct. 2: FCC opens hearings on postwar allocations with testimony of Radio Technical Planning Board that agreement had been reached to recommend the 41-56 mc band for fm, tv allocations to extend upwards from there.

Oct. 2: Democrats begin five-minute broadcasts, using last part of popular half-hour network shows where advertiser will clear it.

Oct. 9: CBS, in testimony presented by Paul Kesten, executive vice president, asks for more space for fm, with tv being moved to uhf part of spectrum above 300 mc.

Oct. 16: Muzak Corp., now owned by William B. Benton, asks FCC for a “suitable number” of fm channels for a non-commercial subscription broadcasting service, non-subscribers to get “pig-squeal.”

Oct. 16: AFM President Petritello rejects direct appeal of President Roosevelt to call off recording strike against RCA, CBS, NBC.

Oct. 23: Invasion of the Philippines is first announced by radio from a floating broadcasting station off Leyte; Maj. A. A. Schechter, former NBC news chief, directs radio coverage.

Oct. 23: Morris Pierce enlists the cooperation of an armored division to capture Radio Luxembourg intact, giving OWI a 150 kw transmitter to use in support of advancing Allied armies.

Nov. 6: Edgar Kobak resigns as executive vice president of Blue Network to become president of Mutual.

Nov. 6: Chairman James Lawrence Fly resigns from FCC to open own law office in New York.

Nov. 20: Paul Porter, former CBS attorney, wartime government official, publicity director of the Democratic National Committee, is nominated for FCC.

Nov. 20: RCA, CBS and NBC give up fight against AFM; submit to royalty payments to union unemployment fund.

Nov. 20: Broadcast Measurement Bureau plan is approved by ANA and AAAA; NAB appropriates $75,000 for first year’s operation.

Nov. 27: WWJ Detroit bans all transcribed announcements as of Feb. 1, 1945.

Nov. 27: Blocking AFM plans to take over transcription handling, National Labor Relations Board certifies NABET; technicians union, as bargaining unit for all NBC and Blue owned stations outside Chicago (where AFM local already has the contract).

Dec. 4: Robert D. Sweezy, general counsel of Blue Network, moves to Mutual as vice president and assistant general manager.

Dec. 18: First convention of Television Broadcasters Assn. has attendance of 750; calls for united effort to get tv started properly; elects J. R. Poppele, WOR New York chief engineer, as second president.

Dec. 18: FCC adopts rule calling for disclosure of identity of person or organization sponsoring or supplying program; NAB convinces Commission words “paid for” are not necessary.

Dec. 25: Paul Porter is sworn in as FCC chairman on recess appointment of President when Congress adjourns without confirming him.

Dec. 25: FCC transfers odo station licenses, ratifying change of Blue Network to American Broadcasting Co.
BMI

ENDURING PROOF OF THE POWER AND THE DETERMINATION OF AN AMERICAN INDUSTRY TO CREATE AND MAINTAIN THE RIGHT OF FREE TRADE IN A COMPETITIVE MARKET

This advertisement first appeared in the Broadcasting Yearbook, 1942
announcements eliminated, only news and music retained.

**April 23:** Phlco Corp. dedicates world’s first multi-relay network between Philadelphia and Washington, seen as forerunner of nationwide tv networks.

**May 14:** Pooled coverage of Nazi surrender brings American people full details of end of war in Europe; for broadcasters V-E Day means end of ban on man-in-the-street programs, request numbers and other wartime program restrictions, but continued demands for men and material mean freeze on new construction won’t be lifted until V-J Day.

**May 21:** FCC allocates spectrum space above 25 mc with exception of 44-108 mc; delays decision as to placement of fm for propagation studies to be made by FCC and industry engineers.

**June 4:** In joint request, FMBl and TBA ask FCC to allocate 44-108 mc immediately fm to get 50-54 mc for education use, 54-68 mc for commercial operation; tv to receive 68-74 mc and 78-108 mc.

**June 4:** Stations object to FCC questions on commercial-vs-sustaining time; point out that sponsorship does not prevent a program from being public service and that commercial-sustaining ratio is not a true measure of operation in public interest.

**June 4:** Radio’s top client, Procter & Gamble Co., spends $11 million a year for time, probably the same for talent, Broadcasting study reveals.

**June 25:** Judge Eugene Octave Sykes, charter member of the original Federal Radio Commission, dies at 69.

**June 25:** Frank Stanton, vice president of CBS, is elected a director and appointed general manager; vice presidents Joseph H. Ream and Frank K. White also elected.

**July 2:** FCC allocates fm to 88-106 mc band; tv: ch. 1, 44-50 mc; ch. 2-4, 54-72 mc; ch. 5-6, 76-88 mc.

**July 9:** FCC eases rules on transcription identifications, dropping requirement for identifying each record played and leaving language up to broadcaster.

**July 16:** William H. Willis, former governor of Vermont, becomes newest FCC Commissioner.

**July 23:** Associate Justice Justin Miller is picked as new NAB president, to assume office Oct. 1 for five-year term.

**Aug. 4:** FCC adopts new provisions requiring licensees to file annual ownership reports, plus interim reports on changes in "policy making personnel"; ownership data to become public record but network and transcription contracts and financial data not to be open.

**Aug. 6:** FCC, by 4 to 3 vote, approves sale of Crosley Corp., including WLW Cincinnati, to Aviation Corp. for $21 million.

**Aug. 6:** Westinghouse discloses "stratovision" plan for airborne tv transmitters to serve as relay stations for tv and fm programs as networks without wire connections.

**Aug. 6:** U.S. Circuit Court of Appeals upholds NLRB ruling in awarding platter-turning jurisdiction at NBC and ABC to NABET, turning down AFM.

**Aug. 13:** FCC decides financial data it collects will be kept confidential or disclosed at Commission’s discretion; to broadcasters’ protests that disclosing their financial affairs would put them at disadvantage with competitive media, Comr. Clifford Durr replied that newspapers and magazines are private, radio is public.

**Aug. 13:** FCC announces that on Oct. 7 it will start acting on applications in its pending files, presaging radio’s greatest construction boom.

**Aug. 13:** NAB chooses A. D. Willard, manager of WBT Charlotte, as executive vice president at $25,000 a year; replaces Code with Standards of Practice that leave vital question of selling time for controversial topics up to individual station operator.

**Aug. 13:** Rep. Emanuel Celler (D-N.Y.) demands that FCC "crack down" on broadcasting, pay more attention to renewals of station licenses, order designated hours set aside for sustaining educational and cultural programs, pass on station sales prices; criticizes programs for having too much "corn," commercial content and boogie-woogie.

**Aug. 13:** In first proceeding under Sec. 315 (equal time for political candidates provision), Commission dismissed complaint against WDSU New Orleans with strong admonition that stations must not give advantage to any single candidate.

**Aug. 20:** World learns of Jap acceptance of Potomac terms and end of World War II by radio.

**Sept. 10:** Approving sale of Crosley radio properties to Avco by 4-3 vote, FCC announces "open bid" proposal for future station sales, permitting number of applicants to compete for acquisition of any station put on market with FCC determining the successful buyer on same basis as awarding a new facility.

**Sept. 17:** FCC issues rules and regulations for fm broadcasting.

**Sept. 17:** Associated Broadcasting Corp. puts fifth national network on air.

**Sept. 24:** FCC issues plan for distribution of 13 vhf channels among 140 markets.

**Sept. 24:** Mark Woods, ABC president, resumes active direction of network as Chester J. LaRoche drops executive duties.

**Sept. 24:** Subscription radio plan is dropped as William Benton becomes Assistant Secretary of State.

**Oct. 1:** Networks sign NABET contract, including recognition of platter-turning jurisdiction.

**Oct. 22:** James C. Petrillo, AFM president, tells networks that dual broadcasting of musical program on fm as well as am outlets violates their AFM contracts.

**Oct. 22:** FMBl board votes to merge with NAB, which will establish an autonomous fm division.

**Nov. 5:** President Truman opens radio news gallery broadcast room in Senate wing of Capitol.

**Nov. 26:** Broadcasting becomes Broadcasting - Telecasting with first appearance of Telecasting on cover and masthead.

**Nov. 26:** New FCC tv allocations plan follows proposals of Television Broadcasters Association, assigns seven channels each to New York, Chicago and Los Angeles, gives additional channels for 33 other cities, sets 28 hours a week as minimum operating schedule.

**Dec. 10:** U.S. Supreme Court rules that FCC must hear all mutually exclusive appli-
Using grid-flange design—an RCA development—this RCA power triode contributed to a new era in VHF operation.

HOW TO GET MORE HOURS FROM AN RCA-5762
- Hold filament voltage at 12.6 volts—right at tube terminals
- Operate each new tube as soon as you receive it
- Keep air-cooling system clean. It helps prevent tube and circuit damage caused by overheating
- Always operate tube within RCA ratings. Follow instructions packed with tube
- Handle tube carefully—to avoid mechanical damage
- Operate spare tubes periodically.

Incorporated within this well-known air-cooled triode are some of the most unique technical advancements in the history of power-tube design. Many of these RCA techniques have evolved from experience gained over years of actual tube operation on the air. All of them contribute substantially to the remarkable endurance of this tube in day-in, day-out transmitter service—over many thousands of hours.

Backed by more than a quarter century of specialized experience in designing and building world-famous high-power tubes, RCA-5762’s are paying dividends for broadcasters—continually—in lower tube costs per hour of operation, and in stable performance of the transmitter.

Your RCA Tube Distributor can handle your order for Type 5762’s—promptly. Call him.
Congratulations

to

cations before making grants; reverses grant to WJEI Grand Rapids, Mich., sustains appeal of WKBJ Muskegon, Mich.

Dec. 17: Licensees must retain control of programs, U. S. District Court for New Mexico rules, outlawing contract whereby KOB, Albuquerque, was to turn over an hour a day of broadcast time to New Mexico College of Agriculture & Mechanical Arts.

Dec. 24: FCC announces tentative allocations plan for fm, providing for over 1,500 fm stations; makes 32 more conditional grants, bringing total to 229.

1946

Jan. 14: William S. Paley is elected board chairman of CBS; Paul W. Kesten becomes vice chairman; Frank Stanton is elected president.

Jan. 28: After two days of hearings, FCC denies petitions of Zenith and General Electric, rules that fm stay at 88-108 mc.

Jan. 28: Achievement of John H. DeWitt in "shooting the moon" is sensation of IRE convention; reports details how the chief engineer of WSM, Nashville, as an Army Signal Corps officer, bounces a radar signal off the celestial body some 240,000 miles away and got the echo back on earth.

Jan. 28: U. S. Court of Appeals reverses FCC denial of license renewal to WOKO, Albany because of concealed minority stockholdings, holds the Commission acted arbitrarily; FCC plans appeal to U. S. Supreme Court.

Feb. 4: General Mills allocates $5 million, half its advertising budget, for radio in 1946.

Feb. 4: CBS demonstrates color television film program broadcast from its new uhf transmitter; says with industry cooperation color for the home can be available within a year.

Feb. 18: Charles R. Denny Jr. becomes acting chairman of FCC as Paul Porter is drafted to head Office of Price Administration.

Feb. 18: First Washington-New York telecast through AT&T coaxial cable is termed success by engineers and viewers.

Feb. 25: House approves Lea Bill to outlaw union excesses, chiefly those of AFM against radio, by a 222-43 vote.

Feb. 25: Westinghouse report on Stratovision reveals that usable signals transmitted with 250 w from altitude of 25,000 feet have been picked up 250 airline miles away.

March 4: NARBA signatory nations negotiate three-year interim agreement; clear channel stations protest compromise which gives Cuba right to use five U. S. clear channels, foreseeing damaging interference.

March 4: Donald Flamm, former owner of WMCA, New York, wins $350,000 verdict against Edward J. Noble, ABC board chairman, in New York Supreme Court; jury upholds Mr. Flamm's charge he was forced to sell station to Mr. Noble in 1940.

March 11: FCC issues 139-page report on "Public Service Responsibility of Broadcast Licensees," soon nicknamed "The Blue Book," which lists carrying of sustaining programs, local live programs and programs devoted to discussion or public issues, along with elimination of advertising excesses, as factors to which FCC will give "particular consideration" when asked to renew station licenses; NAB declares basic freedoms of radio are at stake.

You're Always In Good Company When You Use Independent WNEB!
AMOS ‘N ANDY BROKE CONVENTIONS

AMOS ‘N ANDY, aided and abetted by the Pepsodent Co. (or maybe that should be put the other way round), changed the course of radio programming—and advertising. Here’s the story, direct from Harlow P. Roberts, Pepsodent’s advertising manager, excerpted from a talk made March 24, 1932, to the Advertising Council of the Chicago Chamber of Commerce.

“When we were first approached on the idea of using radio, musical programs were the vogue; there was little else on the air. And, frankly, we couldn’t get very enthused. If Pepsodent was to use radio at all—and we weren’t certain it wanted to—we wanted something different.

“This went on for about three years. Then, right under our noses in Chicago, we found a program that we thought might be the thing for us. It was a 15-minute dialogue act, a serial story built around the lives of two colored boys.

“Well, we went to the chain [NBC] with this and now it was their turn to be discouraging. They sold time exclusively, they told us, in units of hours and half-hours. They had never broadcast any quarter-hour programs before and they weren’t sure they wanted to start doing so. It might make a bad precedent. Also, there was no other advertiser putting on a program six times a week . . . . It was nearly nine months after we broached the subject before NBC lined things up to put Pepsodent on the air.

“And so we started out, not knowing what radio would do for us but hoping for the best and determined to give it a fair trial. We thought that our program was all right; . . . the time did not suit us so well. Ten p.m. in the Middle West was fair enough but 11 o’clock in the East seemed pretty late. So NBC maneuvered and finally was able to clear a period for us at 7 p.m. Eastern time.

“The result of that move was a revolution . . . Complaints poured in by the thousands . . . . The upshot was that we were forced to blaze another trail by putting on a double broadcast, one for the East and another for the West. We were doing things to radio and radio was doing things for us . . . .”

March 11: William H. Wills, FCC Commissioner dies of heart attack at 63.

March 18: FCC makes first postwar full grants of construction permits for commercial fm stations.

April 1: ABC adopts elaborate system for recording and rebroadcasting network programs developed by Charles E. Rynd, network vice president, to keep them on air at same hour locally despite variations in time from city to city as some adopt daylight time, others remain on standard time.

April 15: Rosel H. Hyde is confirmed as FCC Commissioner.

April 15: Clear channel broadcasters ask for more power to improve service to rural areas as hearings resume.

April 21: President Truman signs Lea Act, drafted to stop feather-bedding practices of unions; AFM plans court test of law’s constitutionality.

April 22: If FCC adopts Avco “auction” plan it will also seek control of station sales prices, Charles R. Denny, acting chairman, tells hearing on open-bidding proposal.

April 22: CBS color tv program is successfully transmitted over 450-mile coaxial cable link from New York to Washington and back.

April 29: Associated Press votes to admit stations as associate members, in recognition of “radio as a great medium for the dissemination of news”; stations not to have vote in AP affairs.

April 29: World Wide Broadcasting Corp. wins fight for return of shortwave stations when board of War Communications rescinds order of Nov. 4, 1942, seizing WRUL and other World Wide transmitters.

May 6: ABC buys King-Trendle Broadcasting Corp. (WXYZ Detroit, WOOD Grand Rapids and Michigan Radio Network) for $3.65 million, subject to FCC approval; sale of network stock to raise $15 million for this and other expansion planned.

May 6: Defying Lea Act, AFM President Petrillo notifies members not to play for combined am-fm programs.

April 29: CBS presents plan for fm network of 200 stations, with five superpower am stations providing nighttime coverage for remote areas; cost put at $10.8 million to install, with $4.8 million annual operating expenses.

May 20: Census Bureau reports 90.4% of U.S. homes had radios in 1945, up 17.9% from 1940.

May 27: FCC Comr. Durr contradicts Mayflower rule, advocates “editorial page” for radio stations, balanced by a “letters to the editor” period.

June 3: AFM strikes WAAF Chicago over station’s refusal to hire three additional “musicians” to work as librarians in move seen as precipitating a court test of the Lea Act.

June 3: Proposed amendments to Standards of Good Engineering Practice for fm include designation of community stations as Class A, with maximum power raised from 250 w to 1 kw; metropolitan and rural stations to comprise Class B (adopted June 24).

June 3: FCC proposes to deny sale of KQW San Francisco to CBS, as CBS already owns seven am stations, of which six are 50 kw channel stations, and “the Commission is of the opinion it is against the public interest to permit a concentration of control of broadcasting facilities in any single person or organization . . . .”

June 10: AFM President James C. Petrillo tells union’s convention that if Supreme Court upholds Lea Act as constitutional he will forbid musicians to play on network.
Ponder this!

programs at expiration of present contracts on Jan. 31, 1947.

June 17: FCC denies fm license to WWDC Washington because of plan to duplicate a give-away program, which Commission holds of questionable legality under Sec. 316 of Communications Act.

June 17: Maj. Edward Bowes, originator of the radio amateur show, dies after long illness on eve of 72d birthday.

June 24: Telecast of Louis Coan heavyweight title bout, sponsored by Gillette Safety Razor Co. on four-city hookup, reaches estimated 100,000 viewers, convince skeptics that television is here.

June 24: Comdr. E. F. McDonald Jr., president of Zenith Radio Corp., in Collier's magazine article, declares advertising alone cannot support television, public must pay for tv programs as it does for movies, magazines, newspapers.

June 24: Cooperative Analysis of Broadcasting announces "temporary suspension" of service on July 31 after 17 years; Hoope-ratings made available to exclusive CAB subscribers.

July 1: Politz devises method for measuring impact of radio commercials.

July 8: Hearing procedure is radically altered under Administrative Procedure Act, effective June 1947, when hearing examiners responsible to Civil Service Commission instead of FCC will issue initial decisions that, in absence of objections, shall be adopted as final.

July 8: Congress limits State Dept. to purchase of 75% of time of international short-wave stations; licensees to get 25% control.

July 22: Denying petition of Robert Harold Scott for revocation of licenses of three San Francisco stations for refusing him time for talks on atheism, FCC nevertheless warns that "if freedom of speech is to have meaning...it must be extended as readily to ideas which we disapprove or abhor as to ideas which we approve."

July 22: FCC approves sale of WINN New York to Crosley after time trade provision, which Commission had felt would violate law is eliminated.

July 22: FCC adopts plan to set aside for one year every fifth Class "B" fm channel.

July 29: Religious leaders of all faiths denounce FCC opinion on atheism case.

Aug. 5: Census Bureau finds that 76.2% of U.S. farms have radios.

Aug. 5: NAB membership passes 1,000 mark.

Aug. 5: Commission adopts watered down version of Avco plan that lacks features which broadcasters most strenuously opposed.

Aug. 12: FCC adopts interim clear channel policy providing for consideration of some clear channel applications with mutually exclusive non-clear channel requests; industry puzzled whether this means breakdown of clears or not.

Aug. 12: Paul W. Kesten resigns as vice chairman of the board and a director of CBS because of ill health; to continue to serve as a consultant.

Aug. 19: Bing Crosby signs $30,000-a-week contract to do series for Philco, broadcast on ABC but transcribed in advance; deal said to stipulate return to live broadcasts if program's rating falls below an agreed-on level.

Sept. 2: CBS changes call of New York station from WABC to WCBS.

Sept. 23: Drew Pearson, columnist-commentator, and his former partner, Robert Jenks, make application for facilities of Hearst Radio's clear channel station, WBAL Baltimore, under "comparative consideration" clause of FCC rules.

Sept. 23: NBC changes call of its New York station from WEAF to WNBC, also WEAF-FM to WNBC-FM.

Sept. 30: CBS petitions FCC to adopt standards and authorize commercial operation of color tv stations in uhf frequencies immediately.

Sept. 30: Licenses for am stations pass 1,000 mark.

Oct. 21: AFM, after demanding increases ranging from 233% to 566%, accepts record manufacturers' offer of flat 37½% increase in musicians' pay; asks transcription firms for $50 a man to make commercial discs of one minute or less.

Oct. 28: Clear Channel Broadcasting Service proposes realignment of clear channels whereby 20 stations (five to each network) would get 750 kw power.

Oct. 28: Promotional organization (subsequently named Fm Ass'n.) is organized to foster growth of fm and succeed FMBI, now a division of NAB.

Nov. 4: RCA demonstrates all-electronic system of color tv.

Nov. 4: National Temperance & Prohibition Council sues CBS for $33 million for refusing to sell time to the organization, whose spokesmen have refused free time on CBS.

Nov. 4: Transcription firms accede to AFM demands, agree to pay 50% more for musicians or $27 per man for a 15-minute program rehearsed and recorded in more than one hour (up from $18).

Nov. 1: Bristol-Myers is first advertiser to sponsor a tv network program: Geographically Speaking, which started Oct. 27 on NBC-TV's two-network station.

Nov. 18: Robert Harold Scott gets time on KQW San Francisco to argue cause of atheism; more than 5,000 listeners write station to praise or condemn its grant of time for the broadcast.

Nov. 18: Robert E. Kintner, ABC vice president in charge of news, special events and publicity, is elected executive vice president.

Dec. 9: Charles R. Denny is promoted from acting chairman to regular chairman of FCC.

Dec. 9: Federal District Court Judge Walter LaBuy rules Lea Act unconstitutional, sustains motion of AFM President James C. Petrillos to dismiss charges of violating Lea Act in calling strike at WAAF Chicago; appeal to Supreme Court planned.

Dec. 16: Supreme Court upholds FCC in denying license renewal to WOKO Albany for failure to disclose 24% interest held by Savannah Pickard, former FCC Commissioner and CBS vice president, for 12 years.

Dec. 23: FCC orders networks to report on sustaining programs for week of Nov. 17-23, making good on Blue Book promise to request this information every quarter.

1947

Jan. 13: Roy Hofheinz, KTHT-KOPY (FM) Houston, is elected president of new Fm Assn. at first general meeting.
Dear Sol:

To conduct a medium such as yours for so long a time, with dignity and consideration to the prestige and growth of radio and television, is deserving of the heartiest congratulations, which I herewith send to you and your wonderful staff.

Best wishes for many more years of the devoted service, that you are rendering to us all.

Most Sincerely,

Harry Mailish

THE HEART OF HOLLYWOOD
Feb. 3: Competing color systems are viewed by FCC as prelude to direct testimony on hearing on CBS petition for approval of commercial licenses for color TV stations now.
Feb. 10: CBS and NBC work out plan with NAB to become associate, rather than active members.
Feb. 10: Climaxing two-year drive, MBS signs 400th affiliate.
Feb. 17: Money paid AFM by recording companies will be spent for free public concerts, James C. Petriello announces; nearly $2 million already collected.
Feb. 24: Tests prove Stratovision feasible, Westinghouse tells FCC.
March 3: Clear Channel Broadcasting Service asks FCC to investigate characteristics of daytime skywaves.
March 10: Commodore Edward M. Webster is nominated for FCC post.
March 10: Joseph H. Ream, CBS vice president and secretary, is elected executive vice president of network.
March 24: FCC denies CBS petition for commercial color TV operation, sends color back to labs for continued search for "satisfactory" system.
April 7: Carl Haverlin, MBS station relations vice president, is appointed first paid president of BMI at salary of $35,000 a year.
April 7: U.S. now has 35.9 million radio families (93% of all homes) who listen a total of 150.8 million hours a day, according to surveys made by Market Research Co. of America and A. C. Nielsen Co. for CBS.
April 14: E. M. Webster is sworn in as FCC commissioner.
April 21: Justin Miller, NAB president, urges stations to editorialize despite Mayflower case edict.
April 28: FCC denies renewal of license to WORL Boston on basis of concealed ownership.
April 28: Fred Allen uses gag about network vice presidents which NBC had ruled off air while he tells it; story is front-paged across nation as agency demands rebate for the 35 seconds of dead air.
May 12: FCC votes to ban union-controlled "slush funds" in amendment to Labor Bill; would permit payments such as those made to AFM by record manufacturers only if funds jointly administered by union and management.
May 26: WAGAR Cleveland wins grant for $220,000 for 1220 kc and 50 kw after long fight with WADC Akron, whose application was denied solely on program grounds, FCC states.
June 9: AT&T files proposed rates for coaxial cable intercity TV program service; base rate of $40 per mile per month for eight-hour daily service is called exorbitant.
June 23: Withdrawing reappraisal of Comm. Ray C. Wakefield for another seven-year term, President Truman sends name of Rep. Robert F. Jones (R-Ohio) to Senate for confirmation as an FCC Commissioner.
June 30: Within an hour, Taft-Hartley Act becomes law and Supreme Court upholds constitutionality of Les Act ban on feather-bedding.
July 7: NAB referendum provides associate membership status for networks by vote of 629 to 28.
July 7: Abolition of federal ban on new construction lets broadcasters go ahead with building plans.
July 7: FCC proposes to approve sale of KMED-Medford to Medford Radio Corp., which matched prior offer of Gibson Broadcasting Corp.; decision is first under Avco Rule "auction" provision in which approval went to competing bidder rather than to original "purchaser."
July 14: Senate confirms Robert F. Jones for seat on FCC.
July 28: FCC gets largest peacetime budget as both houses of Congress approve 1948 appropriation of $6,240,000.
July 28: A 15-point plan for permanent continuous operation of BMB is approved, with ANA, AAAA and NAB support.
Aug. 4: Finch Telecommunications demonstrates Colorfax, full color facsimile process.
Aug. 18: Survey of NAB member stations shows average of commercial time is 66%, sustaining 34%, well within Blue Book 80-20 ratio.
Sept. 1: RCA offers to help other manufacturers get started in production of TV receivers by disclosing complete technical data of RCA's own new model.
Sept. 22: Fm Assn. convention plans aggressive promotion of fm in year ahead; Everett L. Dillard, founder and president of Continental (fm) Network, is elected FMA president.
Sept. 22: Self-regulation is theme of NAB convention; NBC and CBS affiliated meetings plump for code in preconvention sessions; convention votes for self-improvement code "to be promulgated as expeditiously as possible"; new NAB board, on day following convention, adopts new standards of practice, to become effective Feb. 1, 1948; AFM orders vote, despite warning by Procter & Gamble vice president Neil McCloy that radio's biggest customer would not favor any move to limit radio's commercial flexibility.
Sept. 29: National Assn. of Station Representatives is formed at five-hour meeting in New York called by Paul H. Raymer and Edward Petry; goal is promotion of spot radio.
Oct. 13: Charles R. Denny Jr. resigns as FCC chairman to join NBC as vice president and general counsel.
Oct. 13: First telecast from White House is made when President Truman addresses nation on food conservation.
Oct. 20: Government renewes prosecution of AFM President James C. Petriello; files amended bill of criminal information in U.S. District Court in Chicago.
Oct. 27: AFM orders members to stop making recordings and transcriptions as of Dec. 31, and never again to make them.
Nov. 10: MBS subscribes to BMB, bringing all networks into industry research organization as earlier subscriptions of ABC,
celebrating its 25th anniversary
salutes the 25th anniversary of

BROADCASTING
TELECASTING
NBC, CBS had been conditional on network unanimity.

Nov. 17: Tv network service extends to Boston with opening of AT&T & radio relay system between that city and New York.

Nov. 24: Networks and AFM begin discussions for renewal of contracts after present pacts conclude Jan. 31, 1948.

Dec. 1: AFM President Petrillo calls off ban on performing for network co-op programs.

Dec. 29: President Truman appoints Wayne Coy, director of Washington Post stations, as FCC chairman; George E. Sterling, FCC chief engineer, as FCC commissioner to assume office immediately as re-appointee. Mr. Sterling succeeds E. K. Jett, resigning to join Baltimore Sunpapers as vice president and radio director.

1948

Jan. 5: Year begins with AFM President James C. Petrillo pulling all AFM members out of recording studios; companies have two-year backlog of records on hand.

Jan. 5: WFIL-FM, Philadelphia Inquirer station, starts regular transmission of two facsimile editions a day, an eight-pager at 2:15 p.m., a four-pager at 5 p.m.

Jan. 12: NBC plans east coast microwave relay system for networking tv programs as alternative to AT&T coaxial cable.

Jan. 12: Westinghouse breaks with Clear Channel Broadcasting Service, tells FCC that 20 superpower (750 kw) stations will not "adequately or economically solve the issues" of clear channel proceeding.

Jan. 12: Mrs. W. J. Virginia, owner of KMED Medford, Ore., refuses to sell station to competing bidder selected by FCC in preference to original "purchaser"; asks reconsideration and permission to complete that transfer.

Jan. 19: Federal Judge Walter La Buy again finds James C. Petrillo, AFM president, not guilty of violating Lea Act by causing strike of librarians at WAAF Chi-

cago; Rep. Clarence F. Lea (D-Calif.), author of act, calls verdict "unwarranted."

Jan. 26: AT&T files fm tariffs; base monthly airline mile cost for 16 consecutive hours a day is $10, compared to $6 for am.

Feb. 2: FCC says programs of horserace information are all right if they're part of balanced overall program service.

Feb. 2: James C. Petrillo agrees to drop AFM ban against musicians performing for am programs duplicated on fm; extends network contracts 60 days.

Feb. 2: Senate approves appointments of Wayne Coy and George E. Sterling to FCC.

Feb. 2: FCC, by four to two vote in WHLS Port Huron, Mich., case, holds Sec. 315 of Communication Act to comprise "absolute" prohibition against a station's censoring political broadcasts; states this federal prohibition will relieve station of responsibility for liberal material in political broadcasts.

Feb. 2: RCA announces development of a 16-inch tv picture tube, first metal kinescope, with picture area of 125 square inches.

Feb. 2: Loren Ryder, head of Paramount Pictures sound department, demonstrates film developed in 66 seconds.

Feb. 9: Western Spokesman reveals plans to enter tv network field, starting with microwave relay between New York and Philadelphia.

Feb. 23: FCC assigns band for intercity tv relays operated by broadcasters for interim period until permanent common carrier facilities are available.

Feb. 23: Following successful test in Cincinnati, Transit Radio plans installation of fm receivers in bus and trolley lines of other cities, to receive special program service, largely music.

March 1: Senate Interstate & Foreign Commerce Committee orders FCC to hold up clear channel decision as Sen. Edwin C. Johnson (D-Colo.), ranking minority member, introduces bill to break down clear channels and limit power to 50 kw.

March 1: NAB board approves $200,000 promotion campaign for radio.

March 1: Rural Radio Network, fm project in New York State, financed by 10 farm cooperative organizations and calling for investment of $400,000 in six outlets, to begin operation with three stations in May.

March 8: FCC starts hearings on right of stations to editorialize.

March 15: American Jewish Congress petitions FCC for revocation hearing for KMPC Los Angeles, charging station with "slanting" news comments.

March 22: FCC holds three-day hearing on proposed standards for facsimile broadcasting.

March 29: AT&T files new tariffs for intercity tv transmission, substantially lower than those proposed year ago.

April 19: Court of Appeals for District of Columbia reverses FCC's non-hearing grant to Joseph P. Stanton of 10 kw daytime station at Philadelphia on WCKY Cincinnati's 1-B clear channel (1530 kc), rules that when licensee claims a grant would adversely affect him, he must be given an opportunity to argue his cause and if the argument indicates that his rights would be adversely affected, a full dress hearing on the application must be held.

April 26: As Senate Commerce Committee closes hearing on Johnson Bill to break down clear channels, Acting Chairman Charles W. Tobey (R-N.H.) issues surprise order for new hearing to investigate broadcast allocations, regulations and patent ownership.

May 3: Affirming lower court's denial of an

Aug. 26: Giveaway programs on radio networks alone total $165,000 a week, a B.T survey reveals.
Aug. 26: U.S. District Court of New York orders ASCAP to stop collecting performance fees from motion picture theatres.
Aug. 26: Five Baltimore stations are charged with contempt of court for broadcasting wire service dispatches of arrest and confession of a man charged with two murders; press associations join NAB in fight against "Baltimore gag rule".

Aug. 9: FCC proposes rules for giveaways which would bar practically all such programs from air.

Aug. 9: Frederic W. Ziv buys World Broadcasting System from Decca Records for $1.5 million.

Aug. 9: House Select Committee starts investigation of FCC by questioning Commission officials on their stand on political broadcasts.

Aug. 16: Westinghouse applies for commercial use of Stratovision.

Aug. 23: FCC proposes to limit ownership of am stations to seven by any entity in line with present limit of six fm and five tv stations.

Sept. 13: Complaints received from stations by NAB indicate that time chisels and per inquiry business are at all-time high.

Sept. 20: AFM President James C. Petrillo offers to end 8½-month old ban on recordings; proposes royalty payments to be made to a disinterested trustee, who would collect funds from recordings and use them to hire unemployed musicians, avoiding Taft-Hartley ban on direct payments to union.

Sept. 27: NBC proposed new tv affiliation contracts call for station to give NBC 30 hours of free time a month, while network assumes all connection costs; NBC sets objective of 28 hours a week of network service.

Sept. 27: Philco asks court to force AT&T to transmit from New York to Boston tv programs sent via Philco's own relay system from Philadelphia to New York; charges AT&T with insisting its intercity facilities be used all the way.

Oct. 4: FCC puts freeze on tv licensing and hearing functions, pending decision of changes in present tv standards.
Oct. 11: CBS purchases Amos 'n Andy outright for $2 million; makes strong effort to get Bergen and McCarthy away from NBC.

Oct. 11: Court of Appeals for District of Columbia rules that FCC must grant hearing to any station which claims it will be harmed by a grant of another application, even if interference would occur outside the normally protected contour, in decision re¬versing a non-hearing grant to put a 1 kw daytime station at Tarboro, N. C., on the 760 kw I-A clear channel of WJR Detroit.

Oct. 18: Avco's Crosley Broadcasting Corp. (WLW Cincinnati, WINS New York) files application to buy WHAS Louisville for $1,925,000.

Oct. 25: FCC rules that equal time provision of Communications law applies only to candidates competing against each other in the same contest.

Oct. 25: Ultrafax, high-speed communications system capable of transmitting and receiving a million words a minute, developed by RCA in cooperation with Eastman Kodak Co. and NBC, is demonstrated.

Nov. 13: Record companies and AFM reach agreement; companies to pay royalties to "public music fund" administered by impartial trustee.

Nov. 8: Robert D. Swezy resigns as vice president and general manager of MBS over appointment of Linus Travers, executive vice president of Yankee Network, as MBS vice president for sales and programs reporting directly to Edgar Kobak, network's president.

Nov. 22: FCC orders hearing on news policies of G. A. Richards, owner of KMPC Los Angeles, WJR Detroit and WGAR Cleveland.

Nov. 22: Assn. of Federal Communications Consulting Engineers is organized by 26 consultants.

Nov. 29: CBS gets Jack Benny program; will start Jan. 2 in same Sunday evening period (7-7:30 p.m.) and with same sponsor.

Dear Betty and Sol:

Twenty five years is a quarter of a century. That long ago you gambled on broadcasting as an industry and started Broadcasting-Teletcasting.

Thirty-one years ago WSOY, over the license signature of Secretary of Commerce Herbert Hoover, became known in Central Illinois.

The years have been kind to both of us. I hope we have deserved it... and I think we have.

Let's hope that the next quarter of a century will be equally as fruitful and satisfying for us, for our customers, for our associates.

Affectionately,

Merrill Lindsay

(American Tobacco Co.) it had on NBC; Edgar Bergen dealt awaiting Internal Revenue Dept. ruling; Phil Harris-Alice Faye show to remain on NBC for time being.

Nov. 29: Bulova Watch Co. introduces plan for combining time signals with tv station identification announcements; 1949 advertising budget includes $500,000 for tv, $3 million for radio.

Nov. 29: Negotiations are in progress for sale of ABC to 20th Century-Fox.

Nov. 29: U.S. Court of Appeals for District of Columbia reverses FCC on denial of license renewal to WORL Boston; calls action arbitrary, capricious and without "substantial" evidence.

Dec. 6: Verdi's "Otello" is telecast in full from stage of Metropolitan Opera House in New York on ABC-TV with Texas Co. as sponsor.

Dec. 13: Justice Dept. investigates practices of major and minor leagues with regard to broadcasts.

Dec. 13: Fort Industry Co. files bid for WHAS Louisville matching that of Crosley Corp.

Dec. 20: Recording peace near as Labor Secretary Maurice Tobin and Attorney General Tom Clark approve "trust fund" plan as within Taft-Hartley Act; Samuel R. Rosenbaum, one-time president of WFIL Philadelphia, is chosen as impartial trustee and administrator of the fund.

Dec. 20: Bob Hope also files for WHAS Louisville under competitive bidding rule.

Dec. 27: Transcription companies sign five-year agreements with AFM.

1949

Jan. 3: Affirming FCC's denial of applications of Bay State Beacon Inc. for Brockton, Mass., station which would offer 95% of its time for sale, Court of Appeals of District of Columbia rules Commission has right to examine percentages of commercial and sustaining time proposed by applicant.

Jan. 10: Daytime Stratovision tests deliver good pictures to some areas but in others local station interference mars reception.

Jan. 10: With Jack Benny and Amos 'n Andy in its Sunday night lineup, CBS now tops NBC ratingwise in the critical 7-8 p.m. period.

Jan. 10: Resisting FCC order to move all fm to 88-108 mc, fm inventor E. H. Armstrong wins stay order from U.S. Court of Appeals for District of Columbia permitting his experimental station, W2XMN Alpine, N. J., to continue operating on 44.1 mc pending a hearing.

Jan. 13: Admiral Corp. will sponsor hour-long musical revue series, Friday Night Frolic, on combined NBC and DuMont tv networks, starring Sid Caesar, Imogene Coca and the Gower and Marge Champion dance team.

Jan. 17: John Churchill resigns as BMB research director; NAB lends its director of research, Dr. Kenneth H. Baker, to supervise BMB's second nationwide study of station and network audiences.

Jan. 17: Liggett & Myers contracts for baseball telecasts also include exclusive right to in-park advertising, so that camera in covering games will have only Chesterfield ads in background.

Jan. 17: AT&T coaxial cable links east coast and midwest tv stations; 90-minute dedicatory telecast is far from great.

Jan. 24: CBS gets services of Bing Crosby for both radio and tv.

Jan. 31: Baltimore court finds three stations guilty of contempt for violating court's rule prohibiting publication of crime news, fines WITH $500 and costs, James P. Connolly, WITH commentator, $100 and costs, WFBR $300 and costs, WCBM $300 and costs; WISD, in suburban Essex, found not guilty in absence of proof its broadcasts were heard in city.

Jan. 31: CBS signs Edgar Bergen and Red Skelton; other deals reported near to signing stage.

Jan. 31: Academy of Television Arts & Sciences presents first Emmy awards; KTSL Los Angeles telecasts ceremonies.

Jan. 31: KMED Medford, Ore., tells FCC its sale to Gibson Broadcasting is off and all because of Commission's competitive bidding rule.

Feb. 7: Appellate Div. of New York Supreme Court sets aside award of $490,419 to Donald Flamm, former owner of WMCA New York, in suit against Edward J. Noble, ABC board chairman, to whom Mr. Flamm sold WMCA in 1941.

Feb. 7: Pennsylvania State Board of Censors of Motion Pictures orders censorship of tv films before they are telecast by any Pennsylvania station.

Feb. 14: NBC rescinds rule against use of transcriptions on network.

WORLD NEWS SERVICE
One Score and Five Years Ago...

A lot of history has been made during the twenty-five years since "Broadcasting" began to serve the radio industry. And we now seem to have gone full cycle in programming to public taste.

Remember in 1931 that the leaders among radio stations did not allow price mentions? Remember the great appeal of "soft sell" announcers like Norman Brokenshire, Frank Gallup, John Reed King, Frank Knight, David Ross and other great names? As audiences grew, the competition increased, and so did the sound and fury. Then some radio stations began to specialize.

It was 1938 when KFAC programmed its first concert. The audience acceptance of that first hour led to the gradual development of KFAC as it is today—the music station of Southern California. Over 50% of the radio homes of this area listen to KFAC during the week, according to Pulse. Twenty-seven of our advertisers have been with us two years or more. They have found that the KFAC "soft sell" does sell. Our business reflects the growing awareness of this fact. We are happy to have played our part in the development and progress of the still young industry which "Broadcasting Telecasting" serves so well.
Feb. 28: Crosley Broadcasting Corp. is left as only bidder for WHAS Louisville as Bob Hope and Fort Industry Co. drop out.

March 7: NBC affiliates give network a vote of confidence at Chicago meeting.

March 7: Hugh Felts resigns as president of BMB to become general manager of KING Seattle.

March 21: Fred Allen signs contract giving NBC exclusive rights to his services for radio and tv.

April 4: NAB protests limitations on use of 540 kc channel proposed by FCC: to limit power to 1 kw and no use at all within 25 miles of some 224 military installations; points out that 1947 Atlantic City allocations made 540 kc a broadcast channel.

April 11: Frank K. White, president of Columbia Records and previously vice-president and treasurer and vice president of CBS, becomes president of Mutual, succeeding Edgar Kobak, retiring to open office as business consultant.

April 18: After stormy debate on convention flood, with expansion of Broadcast Advertising Dept. of NAB demanded, board creates Broadcast Advertising Bureau, names Maurice B. Mitchell as its director, operating under a board policy committee, and earmarks $100,000 to get it going.

May 2: Two New York-Chicago channels added to AT&T coaxial cable service now provide three west-bound and one east-bound channel for tv programs.

May 9: President Truman nominates FCC Comr. Edward M. Webster for reappointment to a 7-year term.

May 9: FCC authorizes NBC to operate a uhf station at Bridgeport, Conn., for experimental rebroadcasts of programs of uhf WNBT (TV) New York.

May 9: Arthur Godfrey was top CBS wage-earner in 1948 with pay of $258,450, not including the $123,624 paid by CBS to Arthur Godfrey Productions for "program services" nor the $58,441 AGP got from Columbia Records. Lowell Thomas was top "independent contractor" on the network, getting $402,300 for program services.

May 16: CBS signs Frank Stanton to 10-year contract to continue as president at base salary of $100,000 a year, followed by 10-year consultant's contract at $25,000 a year.

May 16: Don Lee Broadcasting System, 45-station Pacific Coast network, elects President Lewis Allen Weiss to post of board chairman, promotes Willet H. Brown from executive vice president to president.

May 16: Don McNeill, conductor of ABC's Breakfast Club, was paid $180,229 by ABC in 1948, top pay made by network for services.

May 23: Mark Woods signs five-year contract with ABC to remain as president at $75,000 a year; Robert E. Kintner as executive vice president at $50,000 and C. Nicholas Priaux as vice president and treasurer at $27,500; all provide for increases if earnings improve.

May 23: Associated Actors & Artists of America, parent AFL talent union, sets plans for new branch, Television Authority, to end conflicting claims of Actors' Equity, AFRA, Screen Actors Guild and others.

May 30: FCC consolidates all major tv problems, including uhf-vhf allocations and color, plans hearings to start in August.

May 30: Arkansas Supreme Court upholds Little Rock's city tax on radio stations.

May 30: Rep. John Rankin (D-Miss.) introduces bill rendering networks, stations and broadcaster-commentators liable to suit by a person slandered in district where he resides "at the county seat" by law of Congress; FCC is "too slow," Rep. Rankin states.

May 30: Disputing suggestion of FCC Chairman Wayne Coy that fm stations be forced to duplicate am programs when facilities jointly operated, Fm Assn. President William E. Ware declares that "such regulations would sound the death knell of fm."

May 30: WORL Boston goes off air after fighting for license renewal since 1945.

May 30: Longest direct tv pickup, 129 miles, made by KPMB-TV San Diego during dedication when it got and rebroadcast salute from KTLA (TV) Los Angeles without special equipment of any kind.

June 6: FCC sanctions editorializing by broadcast stations within undefined limits of "fairness" and "balance" by 4-to-1 vote, overriding eight-year-old Mayflower decision; Comr. Frieda B. Hennock, dissenting, contends majority's standard of fairness is "virtually impossible of enforcement"; CBS announces it will editorialize "from time to time."
WFIL-TV films “hot” news with Du Pont 931 — and it’s on the air in minutes

An explosion shook Philadelphia’s Market Street at 8:03 P.M., March 28, 1956, and WFIL-TV cameramen were on the scene moments later—their cameras loaded with Type 931 Motion Picture Film.

Well-known WFIL-TV News Director Gunner Back says: "Our photographers fed film back to the station for our 11 P.M. ‘RCA-Victor News Reel’ just as fast as it was shot. Although it was still coming out of the processing machine 10 minutes before air time, we were sure of the good pictures we would get."

Du Pont High Speed Rapid Reversal Film, Type 931, is a favorite of WFIL Photographer Harry W. Krause, who reports: "Du Pont 931 has what it takes for TV work—it’s a rugged film with high speed, wide latitude, good contrast and never blocks up an optical sound track.

FOR MORE INFORMATION about Du Pont Motion Picture Films, ask your nearest Du Pont Sales Office or write the Du Pont Company, Photo Products Department, Wilmington 98, Del. In Canada: Du Pont Company of Canada Limited, Toronto.

Better things for better living through chemistry

October 15, 1956 • Page 227
June 13: FCC repeals Avo rule which for four years has required stations up for sale to be advertised for competing bids; admits rule had failed its purpose and often inflicted "severe economic and other hardships" on buyers and sellers. 

June 13: Maryland Court of Appeals reverses lower court ruling that upheld "Baltimore gag" rule, reverses contempt citations against WCBO, WITH and WFBT Baltimore and James P. Connolly, former WITH news editor.

June 13: Frank E. Mullen's contract as president of the G. A. Richards stations is cancelled; he retains 15% interest in KMPC Los Angeles acquired for $54,787; will be paid year's salary of $75,000 for next 12 months, plus $75,000 more if NBC affiliates with KMPC before Aug. 1, 1952.

June 13: FCC's right to use discretion in granting or denying oral arguments on legal sufficiency of a licensee's claim of potential interference from pending applications is affirmed by U.S. Supreme Court in decision reversing lower court's ruling in WJR Detroit daytime skywave case.

June 13: NAB TV Music Committee and ASCAP reach tentative agreement on am formula plus 10% as basis for tv music licenses; stations and ASCAP members asked to approve before July 1 deadline.

June 27: Broadcast Advertising Bureau transfers headquarters to New York; plans expanded operations with $200,000 budget.

July 4: CBS, having announced that it would broadcast editorials over its own name, now says it will sell time for "expression of opinion on public issues."

July 11: Sylvester L. (Pat) Weaver, vice president and radio-tv director of Young & Rubicam, joins NBC as vice president in charge of television.

July 18: NAB Board streamlines association organization, establishes an audio division comprising both am and fm and a video division; A. D. Willard, executive vice president, declines appointment as head of video division and resigns to return to private industry.

July 18: FCC announces tv allocations plan: to add 42 uhf channels to the present 12 uhf channels, with another 23 to 28 uhf channels reserved for experimental television, providing for 2,245 tv stations in 1,400 communities.

Aug. 29: FCC bans giveaways as violation of criminal lottery laws.

Sept. 5: ABC, CBS, NBC seek injunctions to prevent FCC from putting its anti-giveaway ruling into effect.

Sept. 12: AT&T's policy of not connecting its network tv facilities with those of private broadcasters is called "unlawful" in proposed FCC report.

THE HIRED HANDS HAVE PROSPERED, TOO

Broadcast employees have long been the second highest paid in American industry, according to a compilation of average pay by the Office of Business Economics, Dept. of Commerce.

Starting with 1930, the second year in which average income figures were compiled, broadcast salaries and wages have been far ahead of most industries. They have ranked second to brokerage employees most of the time, except in the mid-30s when air transport employees were ahead temporarily.

Broadcast wages averaged $6,333 in 1955, a figure second only to the $8,078 for brokerage employees. Since broadcasting became a nationwide industry the average wage level has risen 21/2 times.

A factor in the broadcast average pay is the high degree of variance in pay levels of different types of employees.

Preliminary figures compiled early this month by NARTB show that salaries and wages comprise approximately 40% of total expenditures at television stations (includes non-member as well as member stations but does not include networks or their owned stations, educational stations or stations in territories).

Highest wage-salary item at tv stations was program salaries (total money spent, including talent). Technical pay was next, about two-thirds the program figure. General administrative ran half of programming, with sales almost one-third.

NARTB's compilation for tv was not broken down by exact percentage figures, but a more detailed story is told by the association in the case of radio stations.

Total wages and salaries comprise 55.8% of total money spent, of which technical and programming comprise 31.4%, sales 11% and general-administrative 13.4%.

Joseph B. Haigh, Chief Engineer, KFJZ, Fort Worth, Texas, SAYS:

"Low image retention... that's why KFJZ finds General Electric camera tubes a good investment!"

"We particularly like the low image retention of G-E camera tubes. Some days our cameras must preview commercials for hours at a time. They are required to focus on a stationary object like a trademark, and then image burn-in becomes a problem.

"With General Electric camera tubes, we've found that the risk of burn-in is reduced. Also, the tubes have good image resolution, and pick up fine detail. Black-white contrast is sharp.

"Furthermore, G-E tube packaging is the best we've seen. It protects spare image orthicons from dirt and damage, and makes it easy to store them compactly, so that they take up minimum space.

"From package to performance, General Electric camera tubes have proved themselves here at KFJZ. They help us provide crisp and clear pictures that mean pleasant viewing in Fort Worth homes."

Benefit from the many quality features of General Electric Broadcast-Designed image orthicons! Your G-E tube distributor stocks them... can give immediate delivery. Call him today! Electronic Components Division, General Electric Company, Schenectady 5, New York.

Progress Is Our Most Important Product

GENERAL ELECTRIC
How much should a Tape Recorder cost?

$45,000* The new Ampex Videotape Recorder at $45,000 achieves flawless reproduction of TV picture and sound. The system not only promises to revolutionize network telecasting but will actually reduce material costs by 99%. In hundreds of TV stations throughout the country Ampex Videotape Recording will repay its cost in less than a year.

$1,315* The Ampex Model 350 studio console recorder at $1,315, costs less per hour than any other similar recorder you can buy. Year after year it continues to perform within original specifications and inevitably requires fewer adjustments and parts replacements than machines of lesser quality.

$545* The Ampex Model 601 portable recorder at $545 gives superb performance inside and outside of the studio. This price buys both the finest portable performance available and the most hours of service per dollar.

YOU CAN PAY LESS FOR A TAPE RECORDER BUT FOR PROFESSIONAL USE YOU CAN'T AFFORD TO BUY LESS THAN THE BEST

*Net price as of August 1, 1956 and subject to change.

MORNING ’TIL NIGHT
EVERY HOUR ON THE HOUR

NONSTOP BETWEEN

NEW YORK-CHICAGO

From 8 am to 9 pm New York to Chicago and 7 am to 11 pm Chicago to New York
Feb. 20: Finding that NBC's plan for a 2½-hour Saturday night tv program violates the FCC's network rules, Commission starts issuing temporary licenses to stations which have agreed to take all or part of the program.

March 6: New Mexico appellate court rules all KOB Albuquerque broadcasts are interstate commerce and therefore not taxable by state; Virginia General Assembly passes bill prohibiting cities, towns or counties in state from levying license or privilege taxes on broadcasting stations.

March 6: A. C. Nielsen Co. buys national network Hooperings from C. E. Hooper Inc.

March 6: Richland County Common Pleas Court dismisses petition of WMAN Mansfield, Ohio, for injunction against Mansfield Board of Education so station might broadcast high school basketball games.

March 20: Broadcast Audience Measurement is formed as successor to BMB; to be financed through sale of stock to broadcasters on BMI pattern.

March 20: Gov. John S. Battle of Virginia signs law prohibiting city, town or county tax on radio or tv stations.

March 20: Forbidden by the FCC from censoring political broadcasts, broadcasters are not liable for defamatory remarks in such broadcasts. Federal District Court Judge Kirkpatrick rules in suit of David H. H. Felix against five Philadelphia stations.

March 27: WFIL Philadelphia cuts night rate increases daytime rates, as move to adjust radio price scale to growing audience for tv.

April 3: RCA shows its new tricolor picture tube; calls for adoption of compatible color standards.

April 3: WTMJ-FM Milwaukee, first fm station west of the Appalachians, turns back its license and goes off air after 10 years.

April 17: FCC, interpreting its decision on editorializing, says stations have "an affirmative duty to seek out, and encourage the broadcasting of opposing views on controversial questions of public importance."

April 17: Procter & Gamble Co. asks for two-year contracts with no rate increases and a third year option at not more than a 33-1/3% boost from tv stations to carry its Beulah Show on ABC-TV; NARS protests the proposed rate freeze.

April 24: William B. Ryan, general manager of KFI Los Angeles, is elected general manager of NAB to direct departmental operations.

May 15: Television does not hurt attendance at sports events after first year of set ownership, when novelty has worn off, according to study conducted by Jerry Jordan.

May 22: CBS and its owned stations withdraw from NAB.

May 22: Color Television Inc. demonstrates its color system to FCC.

May 22: DuMont shows its new three-color direct view tv receiver tube.

May 29: Chromatic Television Labs and Don Lee Broadcasting System both announce development of new tricolor tv tubes.

June 5: NAB appears in favor of proposed FCC restrictions on tv programs in which sight and sound are not integrated on behalf of its radio members and opposing these restrictions on behalf of NAB tv members.

June 5: ABC and its five owned stations pull out of NAB.

June 5: NBC starts counter raid for CBS talent; signs Groucho Marx to eight-year $3 million capital gains contract; goes after other name stars.

June 12: NBC signs Bob Hope to five-year contract.

June 12: KFI-AM-FM-TV Los Angeles asks all employees to sign loyalty oaths disclaiming membership in the Communist Party or other subversive groups.

June 19: ABC signs Don McNeill, conductor of Breakfast Club, to 20-year contract; also purchases Screen Guild Players; NBC signs Kate Smith to five-year tv contract.

June 19: John Shepard III, founder of Yankee Network, dies of heart attack at 64.

June 19: Skatston Corp. announces "Subscriber Vision" as its entry in toll tv field.

July 3: In an advertisement headed "Two Umpires Behind the Plate Isn't Any Good in Broadcasting, Either," Stanley Breuer, commercial manager, KJBS San Francisco, challenges Hooper and Pulse to undertake a house-to-house coincidental survey in the

WOC-TV
They Get the Picture
Proved by 648,330 Pieces of Program Mail received by this Station During 6 full Years of Telecasting...
1. This is the famous Raytheon KTR-1000A microwave relay—just one in the biggest line of TV microwave relays in the industry.

2. Available in rack mounted or portable, 100 milliwatts or one watt at 6200 and 7000 mc, and 100 milliwatts in portable at 13,000 mc.

3. Four light, compact, portable units, total weight only 162 lbs., ideal for remotes. Provide simultaneous transmission of high fidelity audio with full NTSC color or monochrome video.

4. As STL's too, Raytheon links provide reliable, low-cost operation, with either portable or rack mounted equipment.

5. These and many other advantages add up to one big FACT—Raytheon KTR links outsell all competitive makes.

6. For full details, please write Raytheon Manufacturing Company, Equipment Marketing Department, Waltham 54, Mass., Dept. 6120.

See Raytheon's exhibit at Rooms 659-660, at the USITA Show, Conrad Hilton Hotel, Chicago, Ill., Oct. 15-17
San Francisco area and to match their own data against its findings.

**July 17:** National Assn. of Radio Station Representatives names committee to explore feasibility of setting up spot option time plan similar to network option time.

**July 24:** Following outbreak of hostilities in Korea, White House calls for formation of all-inclusive Broadcasters Defense Council to organize radio-tv for instant availability for government.

**July 24:** John J. Gillin Jr., WOW chief, dies of heart seizure at 45.

**July 24:** FCC upholds right of networks to act as advertising representatives for their affiliates after two-year investigation of complaint of NARS.

**July 31:** Assn. of National Advertisers starts drive for lower radio rates, citing inroads of tv on radio audience.

**Aug. 21:** Hugh M. P. Higgins, vice president and general manager of WMOA Marietta, Ohio, is named interim director of Broadcast Advertising Bureau.

**Aug. 28:** FCC dismisses complaint against KOB Albuquerque filed in March 1946 by then New Mexico Gov. John J. Dempsey accusing the station of broadcasting libelous attacks against him; admonishes KOB to "re-read" the Commission's new decision on editorializing.

**Sept. 4:** FCC states it will adopt the CBS color tv system unless set makers agree to "bracket standards" to enable sets to receive both present 525-line pictures and the 405-line images proposed by CBS; if they agree, Commission will adopt "bracket standards" for black-and-white tv, postpone color decision.

**Sept. 4:** General Foods drops Jean Muir from Aldrich Family after protests against her appearance from "a number of groups"; Joint Committee Against Communism claims credit for her removal, announcing a drive "to cleanse" radio and television of pro-communist actors, directors, writers; Miss Muir denies any Communist affiliations or sympathies.

**Sept. 4:** U.S. District Court in Cleveland holds that a newspaper which refuses to carry advertisement of local radio sponsors violates the antitrust laws, in deciding government antitrust suit against the Lorain (Ohio) Journal for unfair competition with WEOI Elyria, Ohio.

**Sept. 4:** Special agency-advertiser-broadcaster-researcher committee set up by Stanley G. Breyer of KJBS San Francisco to supervise test of relative merits of Hooper and Pulse rating systems votes to expand study to "include an appraisal of all methods of producing local audience-size measurements."

**Sept. 4:** Color Television Inc. announces new compatible "dash sequential" system of color tv; petitions FCC to reopen color hearings.

**Sept. 4:** National Opinion Research Corp. will survey attendance at college football games to determine effect of telecasts; project is jointly sponsored by the tv networks and National Collegiate Athletic Assn.

**Sept. 11:** Three tv networks—ABC, CBS, NBC—agree to pay $30,000 apiece to Gillette Safety Razor Co. for pooled telecast of World Series, Gillette having paid $800,000 for tv rights; stations to be paid for one hour's time for each first four games; Dumont refuses to take part, denounces deal as "economically detrimental" to tv.

**Sept. 20:** Schenley International Corp. buys time on Hawaiian and Alaskan radio station to advertise whiskies.

**Sept. 28:** Multiplex Development Corp. demonstrates method for simultaneous broadcast of three signals on single fm channel.

**Oct. 2:** Liberty Broadcasting System starts operating as fifth national network, feeding more than 10 hours of programs a day to 240 outlets.

**Oct. 2:** Lewis Allen Weiss resigns as board chairman of Don Lee Broadcasting System, ending 20 years with the regional network.

**Oct. 3:** Set makers tell FCC they can't begin turning out tv sets with bracket standards by proposed November deadline.

**Oct. 9:** FCC initiates rule-making proposal to equalize competition among the tv networks and eliminate the dominance of NBC-TV and, secondarily, of CBS-TV.
This one is for the corner drug store...

Frankly, we think this is a good way of illustrating how “local” we feel — and are — in doing our job as the manufacturing and supply unit of the Bell System.

When Vincent Koes and his co-workers at Western Electric finish equipping this telephone booth it'll be just what the local druggist wanted from his local Bell telephone company.

It's pretty much the same way with the Bell telephone equipment we make—the telephones, telephone wire and cable, and central office switching equipment—much of it “made to order” by Western Electric people so your telephone company can give your town the telephone service it needs. As part of the Bell System, we join the Bell telephone people in your community to bring about a common goal: providing good, dependable telephone service... offering convenience at a reasonable cost.
Oct. 14: FCC approves CBS color, effective Nov. 20; CBS promises 20 hours of color programs a week within two months; RCA continues work on its compatible system; manufacturers divided as to whether to make sets and converters to receive CBS colorcasts.

Oct. 16: FCC denies renewal of license to WTXU Wilmington, Del., on grounds that station, despite due notices, continued horse racing programming that was of a "high degree of aid" to local bookmakers.

Oct. 23: NBC presents four-part radio plan to affiliates: Operation Tandum, rotating participation by six sponsors in five separate hour-long programs on different nights: Night and Day, three-advertiser participation in two daytime and one nighttime period on rotating three-week schedule; Sight and Sound, three advertiser rotating participation on a half-hour radio and half-hour tv program; This Is Television, radio show made up of excerpts from six tv shows to be sold to the tv sponsors.

Oct. 23: Mexico withdraws from NARBA conference, already in difficulty over failure of U.S. and Cuban delegations to agree.

Oct. 23: RCA files suit in Federal District Court in Chicago asking temporary injunction against FCC's color order being made effective pending determination of suit for a permanent injunction; Pilot Radio Corp. files similar suit in Brooklyn but withdraws it when FCC moves to transfer RCA suit to New York.

Oct. 23: President Frank Stanton of CBS goes on network to "clear up" the reaction of some of the television set manufacturers; Robert C. Sprague, president, Radio Television Mfrs. Assn., asks for and gets time to reply.

Oct. 30: Reporting on its experience with uhf operation in Bridgeport, RCA states: "It will be most unfortunate if television expansion has to go into the uhf band."

Nov. 20: Cuba gets right to use six U.S. 1-A clear channels and Jamaica two under new five-year North American Radio Broadcasting Agreement signed by United States, Canada, Cuba, Bahamas-Jamaica and Dominican Republic; Mexico, which withdrew from the conference, and Haiti, which did not participate, will be given chance to subscribe.

Nov. 20: Chicago federal court issues temporary restraining order halting FCC from putting its color rule into effect before a final decision is made.

Dec. 11: FCC, by 4-to-2 vote, proposes to renew license of WBAI, Baltimore and deny application of Drew Pearson and Robert S. Allen for the 50 kw, 1-B clear channel facility.

Dec. 25: Chicago federal court dismisses RCA complaint against FCC adoption of CBS color system but bans commercial operation pending decision by U.S. Supreme Court.

Dec. 25: CBS asks all employees to sign loyalty oaths; NBC has inquired as to its employees' Communist Party membership since 1944.

1951

Jan. 1: FCC approves General Tire & Rubber Co. purchase of Don Lee Broadcasting System for $12,320,000; company also owns Yankee Network; sells KTSI (TV) Los Angeles to CBS for $333,765.

Jan. 1: New antenna rules call for special study of all towers over 500 feet for air safety purposes; those under 500 feet need special studies only if located near airports or airways systems.

Jan. 1: Gillette Safety Razor Co. buys tv rights to World Series and All-Star baseball games for six years at $1 million a year; also holds radio rights through 1956 with Mutual.

Jan. 1: Zenith Radio Corp. starts Phonovision tests in Chicago; 300 families to get "top-flight" motion pictures daily for 90 days which they can see by calling an operator, agreeing to pay $1; otherwise they and other tv sets get only a scrambled signal.

Jan. 8: William B. Ryan, NAB general manager, is elected president of Broadcast Advertising Bureau.

Jan. 8: NBC shelves proposed nighttime rate cut for its radio network after majority of affiliates register opposition.

Jan. 22: AFM sets 50% increase in base pay plus employment quotas; seen as tripling music costs as price for signing new contracts at radio-tv network key stations in New York, Chicago and Hollywood.

Feb. 5: NAB board revises by-laws to provide a board chairman (and elects Justin Miller to the post, relieving him of operating duties), and tv participation; changes name of organization to National Broadcasting • Telecasting
That's just what WTOC-TV wanted... and Ideco tower engineers met this unusual requirement, neatly solved the problem of putting tower and transmitter building in the tiny area shown in the photo.

Unusual? Sure... and maybe you'll never have to wrestle with such a problem. But it does dramatize the breadth of knowledge, the varied skills, that Ideco tower engineers have to draw on for every tower job. Since broadcasting's infancy, towers by Dresser-Ideo have served the broadcasting field.

Whatever your requirements, a tower by Dresser-Ideo... tailored to your specific needs... can best serve you, too. Write us... or contact your nearest RCA Broadcast Equipment representative.

Assn. of Radio & Television Broadcasters; grants active membership privileges to radio and tv stations and networks; creates autonomous 25-member radio and 13-member tv boards of directors.

Feb. 5: Progressive Broadcasting System suspends operation two months and five days after its opening, Nov. 26, 1950.
Feb. 5: Clear Channel Broadcasting Service vigorously opposes ratification of new NARBA treaty sent to Senate by President Truman with request for favorable consideration.
Feb. 12: Average family sees movies at home slightly better than twice a week in Phonevision test, Zenith Radio Corp. says in report on first four weeks of toll tv experiment.
Feb. 19: Glen McDaniel, RCA vice president, is elected first fulltime paid president of Radio-Television Mfrs. Assn.

March 5: Special Test Survey Committee, founded at proposal of Stanley G. Breyer of KJBS San Francisco to decide whose ratings are best, recommends creation of a $140,000 project to analyze present rating methods and conduct field tests to show why different survey techniques agree or disagree.
March 5: Broadcast Advertising Bureau elects Edgar Kobak as board chairman.
March 5: Television Broadcasters Assn. dissolves; Thad H. Brown Jr., TBA counsel, becomes counsel for tv branch of NARTB.
March 12: After more than a year of negotiations between ASCAP and the All-Industry Tv Per Program Committee fail to produce agreement on per program license terms, ASCAP mails out license forms calling for payments of 8.5% to 9.5% of card rate for use of its tunes on commercial tv programs; terms had been rejected by industry committee.

March 19: Renewing drive for lower radio rates, ANA asserts that inroad of tv on full networks now amounts to 19.2% for NBC, 19.4% for CBS, compared to 14.9% for both networks in summer of 1950.
March 19: ABC offers sponsors of afternoon programs on NBC 45% discounts on one-fourth of full hour rate, plus $1,000 a week toward program costs, to switch these shows to ABC.
March 19: National Assn. of Radio Station Representatives becomes National Assn. of Radio & Television Station Representatives, changing from NARSK to NARTSR.
March 19: Former federal judge Simon H. Rifkind is retained as special counsel by All-Industry Television Program Committee; Dwight W. Martin, WLB-TV Cincinnati, committee chairman, asks tv stations to contribute four times highest quarter-hour rate to finance whatever action may be called for.
March 19: Frank Costello's hands provide tv's picture of the week as he refuses to expose his face to the tv cameras covering the New York hearings of the Senate Crime Investigating Committee whose chairman is Sen. Estes Kefauver (D-Tenn.).
March 26: FCC reveals proposed allocations plan making full use of uhf band in addition to 12 vhf channels to provide for some 2,000 tv stations in more than 1,200 communities; about 10% of channels are to be reserved for "indefinite" period for non-commercial educational stations.
March 26: First multiplex facsimile network is operated as joint venture of Columbia U., Hogan Labs, Rustler Radio Foundation, WOR-FM New York, WHC-TV (FM) Poughkeepsie, N. Y., WOAN (FM) Scranton, Pa., and WHCU-FM Ithaca, N. Y., newspaper prepared by Columbia Graduate School of Journalism is sent by land-line to the WOR-FM transmitter and relayed in turn by the Poughkeepsie and Scranton stations to Ithaca, using equipment designed by Hogan Labs.
March 26: Skiatron Electronics & Television Inc. shows its Subscriber-Vision system of toll tv to FCC in test broadcast from WOR-TV New York.
April 9: Harold E. Fellows, general manager, WEEI Boston, is chosen as NARTB president.
April 16: CBS cuts radio rates 10-15% as of July 1; ABC says it will match this reduction.
April 16: ABC signs its president, Robert E. Kintner to seven-year contract at $75,000 a year, with option on three additional years at $100,000 a year, plus bonuses.
April 23: Network affiliates, at special meeting at NARTB convention, elect Paul W. Morency, WTIC Hartford, chairman of special committee charged with persuading CBS to rescind its proposed rate cuts and the other radio networks from cutting their rates.
April 23: U.S. Supreme Court refuses to review ruling of lower court that Communications Act does not prohibit stations from censoring political talks by persons who are not candidates.

An open letter to BT
on its 25 years of service to the broadcasting industry and, a challenge for the future

B&T is 25 years of age and about to begin the second cycle toward its first 100 years—the hardest years. Well, B&T, may we say congratulations and thank you for your service to a young and growing industry. And our best wishes for the future—a future in which you will render even greater leadership to a vital service to mankind, the field of broadcasting.

When a birthday rolls around, it seems a logical time to take stock—to review good and bad habits, to set higher goals for the years ahead. Here are a few points from a sincere well-wisher.

An industry is as great as its leading business paper and judging from what we read and hear, the business of broadcasting could stand improvement. A quarter of a century ago, Sol Talshoff and Martin Codel started a publication for broadcasters patterned after that fine paper Editor & Publisher. The publication Broadcasting was needed and welcomed. At times, in addition to a fine news service, its articles and editorials were far-reaching and far-seeing. The stations and networks prospered and so did Broadcasting. The reporting was and still is of the best. When news was scarce you even dared to make news to keep us on our toes and remind us of our responsibilities to the people.

Martin Codel left and started a new type of service and Sol Talshoff carried on—both continued to help this growing field and both men and their organizations prospered. When television became a reality after World War II you broadened your base and became B&T in name, too. You demonstrated standards of dissatisfaction with the field you serve and with your publication. That is always a healthy sign for a business paper publisher. Please continue to have high standards of dissatisfaction. It is good for the field and the publication.

You have followed close to the line you laid down when you started. You have done a good job but not good enough. A good publisher must always say to himself, "We must do a better job," but we must help to think and not just record what happens—we must meet the changing times just as we must tell our readers how to meet the changing times."

May this broadcaster (WTWA—Thomson, Georgia), with a business paper publishing background, make a few suggestions and pass the air. Let down a few challenges to a fine publication on its 25th anniversary—in a paid advertisement:

1. Do more to point up weaknesses before those not engaged in this business do so and at the same time, make constructive suggestions on how we can better meet our responsibilities when we report on a license or operate a network or produce programs or present advertising messages.

2. Review the idea of whether you should publish two papers—one for radio, the other for television. These are two separate mediums of communication, in competition for audience and for advertising. Each one deserves a separate publication, to our way of thinking. There are some common problems but there are many points of difference and certainly, they are competitive. You can help each to grow stronger and render better service.

3. And, the publication, if separated or kept as one, should consider the idea of editorial departments where the program activities, selling of time, technical operations as well as promotion and publicity to secure more listeners and more advertisers. And while you are at it, consider how you can be of help to the producers of programs and the people who buy time and sell products and ideas.

4. The heart of this business is what goes out over the airwaves. Strengthen your reviews—review all network and as many local programs as possible. There is no perfect program and we need challenging reviews to point up the weak parts of all programs on the air. Let the chips fall where they may. We have the practice—point up how to make them stronger and point out where these standards are not met. We are judged by what comes out of the receiving set—give strong leadership at all times on the many weaknesses. That will be helpful—this will be leadership—that will strengthen all efforts to render better and sounder programs in the public interest, convenience and necessity.

5. Many of your readers are broadcast advertisers. Give them more help and you will increase the number of your paid subscribers in this important segment of our business.

6. Point out the dangers—be even more fearless, no matter whether you irritate every broadcaster. He can take it—he wants and needs leadership from a strong, independent business paper. And when the industry is attacked, continues to defend it if it deserves to be defended, as you have on many occasions. But hammer home hard when the industry or any broadcaster is wrong and keep it up till the correction is made.

7. Don't worry about making and keeping friends—make us, as readers and broadcasters, think of our errors and responsibilities and make us do right. In that way, as long as you are fair and honest, you will make real friends. A large number of your readers are your advertisers. Forget that they buy space and always remember that they want and need unbiased help and advice. The stronger they get, the better they serve, the more they will realize the value of your publication and the more they will use your advertising pages to sell their ideas and programs and time.

8. Give the industry greater leadership in public relations. We are still weak in this field—we need to be better understood—we need guidance on how to tell our story as it should be told—truthfully, factually and regularly. The industry is full of people with a sense of public relations for others but is too busy in its day-to-day work to think through how to tell its own story. Recent congressional hearings certainly point up this industry's weakness. We are more in need of leadership in this direction than in defense of our efforts to do right. And, help us to point out the need of freedom of information at all times.

9. Do you really sell space as hard and intelligently as you should? Do you get it in the modern way as you tell stations and networks to do it? Well, you don't. You should have twice as many advertising pages as you carry and that would make your magazine that much more interesting. And the same goes for selling subscriptions. Selling can always be improved.

10. You recommend that broadcast media make sound circulation and coverage figures available but, do you? You think it is good for broadcasters to give facts about circulation, listening and viewing and coverage—and we think you should be ready to do the same about your paid circulation. What's good for others could be good for you. Perhaps if you join the Audit Bureau of Circulations and the Associated Business Publications you would soon find that your advertising pages would grow and grow and grow. (I've got to stop listening to commercials.)

You are constantly improving B&T. We hope you are taking a new look at your publication just as we try, in your help and guidance, to take a new look at the broadcasting business. Now, more than ever, radio and television broadcasting need a great business paper—two of them, one for radio and one for television—which will lead us all to greater heights. An industry is as great as its best business papers and our industry needs leadership to live up to the challenge before us. And so we challenge B&T to lead the way during the coming years.

Happy Birthday, B&T, to your fine people and may you have a healthier and more prosperous future. Thanks for letting me buy this page to say "Thank you" and to challenge you to meet the challenge ahead for you and for our industry.

Sincerely,

EDGAR KOBAK
BUSINESS CONSULTANT
341 Park Avenue, New York 22, N. Y.

**May 7:** NBC announces 10-15% cut in radio rates, comparable to that of CBS; ABC and MBS plan similar reductions.

**April 30:** Thomas F. O’Neil, vice president and director of Don Lee and Yankee regional networks, is elected board chairman of Mutual, succeeding Theodore C. Streibert, president of WOR New York.

**May 14:** Tilting the antenna of a uhf transmitter can double its signal strength, RCA engineers report after Bridgeport experiments.

**May 28:** United Paramount Theatres and American Broadcasting Co. agree on $25 million merger; Leon Goldenson, UPT president, would be president of new company, with ABC President Robert Kintner continuing as president of its broadcasting division and Edward J. Noble, ABC board chairman and chief owner, becoming chairman of the finance committee.

**May 28:** Justice Dept. starts probe into restrictions placed on broadcast and telecasts of all professional and amateur sports, with special emphasis on baseball play-by-play policies.

**June 4:** Supreme Court affirms lower court ruling upholding FCC adoption of color standards; CBS plans to start colorcasting by end of June; RCA says it will continue public demonstrations of its “improved, compatible, all-electronic system.”

**June 4:** G. A. (Dick) Richards dies at 62 after suffering for many years from a serious heart ailment; long-standing FCC proceedings for renewal of licenses of his three stations—KMPC Los Angeles, WJR Detroit, WGAR Cleveland—are still not ended.

**June 4:** U.S. Court of Appeals for District of Columbia orders WWDC-FM Washington and Capital Transit Co. to cease commercial announcements in street cars and buses as depriving "objecting passengers of liberty without due process of law"; appeal planned.

**June 11:** General Tire & Rubber Co. buys KFI-TV Los Angeles for $2.5 million.

**June 25:** ABC reorganizes into four divisions with a vice president in charge of each: Ernest Lee Jahnecke for Radio Network Division, Alexander Stronach Jr. for Television Network Division, Slocum Chapman for Owned Television Stations and Television Spot Sales, James Connolly for Owned Radio Stations and Radio Spot Sales.

**June 25:** Louis-Savold heavyweight fight, telecast to nine theatres in six cities but not to homes, draws capacity crowds.

**June 25:** After years of hearings, FCC grants renewal of license to WBAL Baltimore, dismissing the application of Drew Pearson and Robert Allen for the facilities.

**July 2:** Mark Woods resigns as vice chairman of ABC.

**July 2:** Sixteen advertisers co-sponsor first commercial colorcast, hour-long program on five-station East Coast CBS-TV hookup.

**July 16:** CBS separates its operations into six divisions, each with its own president: CBS Radio Div., headed by Howard S. Meighan; CBS Television Div., headed by J. L. Van Volkenburg; CBS Laboratories Div., headed by Adrian Murphy; CBS Columbia Inc. (set manufacturing), headed by David H. Cogan; Columbia Records Inc., headed by James B. Conkling; Hytron Radio & Electronics Corp., headed by Bruce A. Coffin.

**July 16:** Failing in its attempt to raid NBC, ABC introduces its own set of daytime serials.

**July 23:** U.S. Court of Appeals orders FCC to resolve the 10-year-old 770 kc dispute of WJZ New York and KOB Albuquerque.

**July 23:** Failing to agree with ASCAP on proper terms of tv per program licenses after two years of negotiations, the All-Industry TV Per Program Committee files a petition on behalf of over 50 tv stations asking U.S. District Court in New York to set reasonable fees, as provided in the 1941 ASCAP consent decree.

**Aug. 20:** Robert Saudek, ABC vice president, resigns to become director of Ford Foundation's Television-Radio Workshop.
If Michigan is your home state, chances are you have already seen this advertisement. Or, if you live in one of the other Midwest and Rocky Mountain states where Standard Oil Company (Indiana) products are sold, you may have seen an advertisement very much like it with the same straightforward information about direct taxes on a gallon of STANDARD RED CROWN Gasoline in your state. This is the type of factual, informative advertising so vital to development of a sound public understanding of the oil business and its products and services.

Who is building Michigan’s new roads?

Not everybody in Michigan. Neither is it only highway contractors and their crews. It is you millions of car, truck and bus owners who pay state gasoline taxes on every gallon you buy—you are building the roads of which your state is proud.

Getting your money’s worth? We think so. Look at it this way. A gallon of STANDARD RED CROWN Gasoline in mid-Michigan areas, for example, typically costs you 24 1/10 cents—excluding direct taxes, of course. For that, we find oil, transport it hundreds of miles, refine it to the finest quality gasolines you can buy for your car, and deliver it to your independent Standard Dealer. And your dealer’s mark-up, which must cover his costs and what he earns for serving you, is included in the same 24 1/10 cents. Pretty reasonable, isn’t it?

Then add your 6-cent state gasoline tax. Your state uses this tax, all of it, for maintaining and building better, safer highways.

Uncle Sam adds 3 cents more. That’s the current federal tax on gasoline in all states. Under the new Federal Highway Bill, the federal government will be spending all this money on highways, too.

Finally your state sales tax amounts to more than 8/10 of a cent per gallon. This money helps support general governmental services, state and local.

These direct taxes you pay on gasoline total more than 9 8/10 cents a gallon

Remember, every time you pay the gasoline tax most of your money is buying better, safer roads in Michigan. And the next time you fill up at your Standard Dealer’s you’re getting one of the best bargains of any commodity you buy today—the highest quality, most powerful RED CROWN Gasoline we’ve ever made for only 24 1/10 cents per gallon, excluding taxes.

STANDARD OIL COMPANY (INDIANA)
THE FIRST QUIZ CONTESTANT MISSES

ONE of the most powerful influences in early broadcast programming was the birth of the quiz in the mid-30s. When Prof. Quiz took the nationwide CBS network March 6, 1937, the question-answer motif caught fire. Within two years there were more than a hundred variations. Prof. Quiz was conceived by John Heine, now of the Ford Motor Co. advertising department. At the time Mr. Heine was promotion manager of WJSV (later WTOP) Washington. The first sponsor was G. Washington Coffee, with the late Jim McWilliams as professor. G. Washington added a half-dozen or so CBS outlets and the program soon moved to a nationwide CBS hookup. Craig Earl (in photo above), a magician who bought the program from Mr. Heine many years later, succeeded Mr. McWilliams in the professional role.

The guessing game was first sponsored nationally by Nash-Kelvinator Corp. The first Prof. Quiz question was: "What is the difference between a llama with one 'L' and a llama with two 'L's'?"

The contestant didn't know the answer. But broadcasters and sponsors soon knew they had an answer to the problem of developing a new and attractive program. Quickly such programs as Double or Nothing, Dr. J. Q. and countless others had appeared, plus some assorted law suits.

Those who answered Prof. Quiz correctly in the early years received a handful of silver, all getting the same amount. The basic guessing-game idea hasn't changed much, except for details, but the money has—$64,000 and even $100,000 or more in the case of the popular tv quiz shows of today.

Aug. 20: Screen Actors Guild, opening contract negotiations with motion picture producers, asks for ban on tv use of pictures made after Aug. 1, 1948, until an agreement is reached on conditions of tv exhibition.

Sept. 10: President Truman's address at Japanese peace treaty conference in San Francisco is pooled telescop to open $60 million coast-to-coast tv network microwave facilities of AT&T.

Sept. 10: NCAA announces tv schedule of 19 games featuring 29 teams on nine Saturdays; each city to get seven games with two "blacked out"; Westinghouse Electric Corp. sponsoring on NBC-TV; colleges to get about $700,000 of $1.25 million paid for rights plus time.

Sept. 10: Gillette Safety Razor Co., holder of World Series tv rights for six years, signs four-year contract with NBC-TV as network to carry the games.

Sept. 17: Sen. William Benton (D-Conn.) proposes that a limited amount of radio and tv time be given free to responsible candidates for federal office as a means of reducing campaign costs.

Oct. 1: Brig. Gen. David Sarnoff, RCA board chairman, on completion of 45 years in radio, asks RCA scientists for three "gifts" for his 50th anniversary: an electronic amplifier for light for tv, a television picture recorder and an electronic air-conditioner for home use.

Oct. 8: Completely revamping its policies, NBC Radio eliminates "must buys" to let advertiser pick the stations he wants; changes in network rates of affiliates, some up, some down; addition of more stations, possibly as many as 200, to the network; "Minute Man" programs with top stars broadcast as network sustained for local sale by affiliates on a "pay as you sell" plan; offer of certain network programs to advertisers on a one-time-more basis; revision of network option time to conform to changed sales requirements.

Oct. 8: Major league baseball teams drop "territorial" rules cramping radio-tv rights; Dept. of Justice starts court effort to break down professional football's bans on broadcasting.

Oct. 8: Merger of radio-tv properties of General Tire & Rubber Co. and R. H. Macy & Co. combines WOR-AM-FM-TV New York with Don Lee and Yankee Networks, giving new firm majority (58%) control of MBS.

Oct. 15: RCA publicly shows its improved color system in New York and Washington; viewers agree quality is excellent.

Oct. 22: Complying with request of Defense Mobilization Chief Charles E. Wilson, CBS agrees to stop color tv manufacturing and broadcasting for "duration of the emergency"; halls plans of James Lees & Sons Co., carpet firm, to be first regular network color sponsor.

Oct. 22: NARTB TV board approves new strict tv code with seal which subscribing stations may show, review board to enforce advertising and program provisions and to check unfair competition within the industry; seal may be withdrawn for code violations.

Nov. 5: Judge Ira E. Robinson, one-time chairman of Federal Radio Commission, dies at 82.

Nov. 12: Federal District Court orders KSFO San Francisco to make time available for campaign broadcast for communist candidate as refusal would constitute censorship beyond authority of licensee.

Nov. 19: NBC Radio offers to guarantee to deliver 5.3 million messages a week at cost of $2.75 per thousand for three-program deal; rebate will be made to any advertiser if Nielsen audit at end of 13 weeks shows total listener-impressions is below guarantee.

Nov. 19: Bing Crosby Enterprises announces development of system for recording sight-and-sound programs on magnetic tape; pictures shown at demonstration described as "hazy" but "viewable.

Nov. 26: Transradio Press Service shuts down its news service after 17 years.

Dec. 3: NBC affiliates reject its "guaranteed advertising attention plan"; ask network to delay its new rate formula until new research determines present radio values; approves establishment of an NBC merchandising department but turns down its "market basket plan" of merchandised advertising.

Dec. 3: Three-year old hearing on renewal of licenses of the Richards stations, WJR Detroit, WGAH Cleveland and KMPC Los Angeles, ends with FCC accepting assurances of Mrs. G. A. Richards that the stations would not broadcast biased or slanted news and granting the license renewals.

Dec. 3: National Television Systems Committee starts field tests of tentative standards for compatible tv.

Dec. 17: William H. Fineshriber Jr., MBS program vice president, is appointed executive vice president of the network.

Dec. 17: Upholding lower court, U.S. Supreme Court holds that Lorain (Ohio) Journal violated antitrust laws when it refused to sell advertising to local advertisers who bought time on WEOL Elyria, Ohio.

Dec. 31: Westinghouse Electric Corp. buys $3 million campaign package on CBS Radio and CBS Television, including conventions, 13-week get-out-the-vote campaign and election night coverage.

Page 242 • October 15, 1956
937 FOOT
BLAW-KNOX TOWER
MEETS STORM
CHALLENGE

Designed to rigid specifications for WGBS-TV, Miami, this Blaw-Knox tower must withstand the hurricane-force winds that sometimes sweep its location just six feet above mean sea level. To meet these unusual operating conditions, Blaw-Knox engineers developed a custom-designed tower featuring dual guying and round structural members throughout... achieving a windload rating of 70 lb./sq. ft. for an overall height of 937 feet.

Tower and antenna inspection and maintenance are no problem. A special-design two-man Marshall service elevator installed within the tower permits easy access to any level. This completely enclosed, automatic elevator features ground-to-cab telephone communications and can be controlled from either the cab or lower landing.

This is but one of many examples of Blaw-Knox engineers working in close cooperation with broadcasters to overcome local operating problems. The experienced staff of Blaw-Knox engineers will work with you in designing a tower that will best meet the requirements of your installation. The performance records of more than 3,000 Blaw-Knox towers around the world are evidence of Blaw-Knox experience and skill.

Send for illustrated Bulletin 2417 showing special construction features and typical installations of Blaw-Knox Antenna Towers. Write or call us today.

BLAW-KNOX EQUIPMENT DIVISION
PITTSBURGH 38, PENNSYLVANIA

Blaw-Knox Type TG-70 Tower for Storer Broadcasting Company—WGBS-TV, 186 kw, channel 23, Miami, Florida. Overall height—377 feet. Windload rating—70 lb./sq. ft.
Jan. 7: Philco Corp. buys NBC radio-tv coverage of political conventions and election night for $3.8 million.

Jan. 28: Admiral Corp. buys convention and election coverage on ABC radio and tv networks for reported $2 million; DuMont announces its coverage, in cooperation with Life magazine, will be available for local sale by affiliates on co-op basis; (offer later withdrawn and Westinghouse buys DuMont as well as CBS coverage).

Feb. 25: Wayne Coy resigns as FCC chairman to become consultant to Time Inc.

Feb. 25: Liberty Broadcasting System sues 13 of the 16 major league ball teams for $12 million, triple the damage allegedly suffered through loss of Game of the Day broadcasts; MBS announces that nine teams have contracted for participation in its Game of the Day broadcasts.

March 3: Speaker Sam Rayburn (D-Tex.) bars radio-tv coverage of House committees.

March 10: CBS acquires 45% interest in KQV Pittsburgh; arranges merger of WCCO and WTTCN-TV Minneapolis-St. Paul, with CBS holding 47%, subject to FCC approval.

March 10: CBS demonstrates all-electronic color tv receiver operating with CBS color system.

March 17: Adrian Murphy, president, CBS Labs, becomes president, CBS Radio Div., succeeding Howard S. Meighan, who joins the general executive group of CBS Inc.

March 17: Naylor Rogers, executive vice president of Keystone Broadcasting System, who entered radio in 1925 as general manager of KNX Los Angeles, dies at 66.

April 7: Wallace A. White Jr., former Republican senator from Maine, co-author of the Radio Act of 1927 and active in communications during his 32 years in House and Senate, dies at 74.

April 14: FCC issues "Sixth Report and Order," lifting freeze on tv as of July 1; provides for 2,053 stations in 1,291 cities, 617 vhf and 1,436 uhf, including 242 non-commercial educational stations (80 of them vhf); three zones are established, with different mileage separation and antenna height regulations; Comr. Robert F. Jones dismisses vehemently on whole report; Comr. Frieda Hennock objects to "inadequate" educational reservations.

April 28: MBS Board Chairman Thomas F. O’Neil assumes presidency as well, following resignation of Frank White.

May 19: Liberty Broadcasting System, unable to break broadcasting restrictions of major baseball leagues, suspends operations.

June 2: Overruling Court of Appeals finding that transit broadcasts deprived riders of their liberty without due process of law, U.S. Supreme Court holds that D. C. Public Utilities Commission was within its rights in permitting radio programming for street cars and buses in the nation’s capital.

June 2: Walter Evans, president, Westinghouse Radio Stations, dies at 53.

June 2: FCC approves sale of KOB-AM-Tv Albuquerque to Time Inc. and Wayne Coy for $600,000.

June 16: U.S. Supreme Court, reminding to FCC its grant of a new station to Texas Star Broadcasting Co., states that in considering an application for a new station the Commission must weigh the gain of the new proposed service against the loss to be suffered by an existing licensee.

June 23: NBC reorganizes with Vice President Sylvester L. Weaver put in charge of both radio and tv networks; Frank White joins NBC as vice president and general manager for radio and tv; Vice President Robert W. Sarnoff heads newly created film division; NBC launches promotion drive for combined use of radio and tv as most effective advertising buy.

July 7: CBS Radio affiliates, at crisis conference, adopt resolution asking network to rescind 10% cut of year before and boost daytime radio rates by 20%.

July 7: Radio Writers Guild calls strike against ABC, NBC, CBS over issue of extra pay for writers on commercial programs.

July 14: Joseph H. Ream resigns as executive vice president and a director of CBS Inc., retiring to Florida for "purely personal reasons."

July 28: President Truman signs McFarland Bill, first major overhaul of Communications Act of 1934, permitting FCC to issue cease and desist orders in addition to revoking licenses; prohibiting broadcasters from charging more for political advertising than for normal business ads; requires FCC to act on a case within three months of filing or six months after a hearing is concluded, or to explain reason to Congress; forbids staff personnel to recommend actions to Commissioners; puts on FCC burden of proof that licensee is not qualified for renewal; permits protests against grants to be made up to 30 days after grant but requires FCC to answer protests or petitions for rehearing within 15 days; forbids Commissioners who resign to practice before FCC for one year after resignation; deletes permission to FCC to revoke licenses of those found guilty in federal court of antitrust violations.

July 28: Dept. of Justice files suit against 12 motion picture producing and exhibiting firms charging conspiracy to restrain interstate commerce in 16 mm films in violation of Sherman Act in move to free films for use in television.
"Ad Age is 'must reading' for admen at Checkerboard Square"

says: G. M. PHILPOTT
Vice President of Advertising and Sales Promotion
Ralston Purina Company

"Advertising Age is 'must reading' for everybody at Checkerboard Square who has a responsibility for advertising and sales promotion. We know this is one way for busy people to keep abreast of what's new and what's important in the field of distribution."

Wherever you find executives with important responsibilities in advertising, marketing and merchandising, there you'll also find Ad Age getting "must readership" every week. Wherever there's a vital need for decision-shaping information about marketing news, trends and developments, Ad Age is filling the bill every week—not only for those who activate, but those who influence market and media decisions which are important to you.

Ralston Purina, for example, ranks high among the top 200 broadcast advertisers. Its TV spot expenditure for the first six months of 1956 amounted to $314,900*, while its tab for TV network ran over $1,161,000**. Radio is used extensively for advertising Purina Chows and other products.

Every week, four paid subscription copies of Ad Age get read, routed and discussed among advertising, sales and other executives at Ralston Purina. Further, 47 paid subscription copies of AA reach executives at the agencies handling R-P advertising, Gardner Advertising Agency and Guild, Bascom and Bonfigli.

Add to this AA's 35,000 paid circulation, its tremendous penetration of advertising agencies with a weekly paid circulation of over 9,000 agency people alone, its intense readership by top executives in national advertising companies, its unmatched total readership of over 120,000 — and you'll recognize in Advertising Age a most influential medium for swinging broadcast decisions your way in 1956.

October 15, 1956 • Page 245
DETERMINATION that broadcast stations are not public utility common carriers and that their advertising rates are not subject to governmental regulation was handed down on Oct. 26, 1932, by the Interstate Commerce Commission, which then held the regulatory powers over telephone and telegraph rates that were transferred to the Federal Communications Commission by the Communications Act of 1934.

The ICC ruling, adopted by an 11-2 vote, was brought about by Sta-Shine Products Co., polish manufacturer, which complained that NBC's rates were unreasonable and discriminatory and asked the ICC to prescribe reasonable rates for the network. The majority opinion pointed out that a common carrier transmission is defined as one from a definite sender to a definite receiver, quite a different phenomenon from "putting on the air or other this instruction, entertainment or advertisement, to that part of the public who may, by their receiving sets and antennae, go out to get this matter." Broadcast rates, the ICC opinion concluded, "are not subject to our jurisdiction."

The ruling still stands, but not because it has not been questioned from time to time by those who feel that the public interest would best be served by public utility type regulation of stations and, especially, networks.

As recently as June 1956, Sen. John W. Bricker (R-Ohio), in arguing that networks, like stations, should be licensed by the FCC, stated that the time "may come" when the networks should be subjected to "full public utility regulation." This, he conceded, probably would include rate-fixing on advertising and regulation of the network rates of affiliated stations.

Aug. 18: CBS Radio affiliates approve discounts tantamount to a 25% reduction in nighttime rates and accept a 15% cut in network compensation, but win a restoration of the 1951 10% cut for daytime serials and an increase of 5.5% in their pay for carrying these shows; network also gives assurance that its card rates won't be cut for at least a year and that "deals" are out for good.

Sept. 1: Empire Coil Co. buys RCA's experimental uhf transmitter for commercial operation in Portland, Ore.

Sept. 8: NBC cuts rates through new discounts, an average of 25% at night, with affiliates taking a straight 14% cut in compensation; raises daytime rate 11.1% to restore 10% cut of 1951, but revises discounts so increase to advertisers will be only 4% in morning and none in afternoon.

Sept. 15: Standard Radio Transcription Services announces plan to discontinue monthly library releases and offer library, in whole or part, to stations on outright sale basis.

Sept. 22: Robert F. Jones resigns from FCC to return to private law practice.

Sept. 22: By rushing equipment across country from Bridgeport, Conn., to Portland, Ore., KPTV (TV) Portland goes on air as first commercial uhf tv station.

Sept. 22: ABC Radio revises discounts to lower evening rates an average of 25%, raises morning rates by 5%.

Sept. 29: Max Ule of Kenyon & Eckhardt is named head of committee to set up ideal standards for broadcast rating measurements, subcommittee of Advertising Research Foundation's committee on radio and tv ratings methods whose chairman is Dr. E. L. Deckinger of Biow Co.

Oct. 20: MBS reduces nighttime time costs 30% in tv areas, 10% in areas not yet served by tv.

Oct. 20: NARTB and AAAA adopt standard contract form for spot tv time purchases, make it available to agencies and stations.

Nov. 17: CBS opens its Television City in Hollywood.

Dec. 1: Don Lee Broadcasting System announces single rate, 7 a.m. to 1 p.m.

Dec. 15: Niles Trammell resigns as NBC board chairman to become president of Bis-cayne Television Corp., applicant for ch. 7 Miami; Brig. Gen. David Sarnoff assumes post in addition to remaining RCA board chairman.

1953

Jan. 5: BBDO had broadcast billings of $40 million in 1952, making it top agency customer of radio-tv for that year, B-T survey discloses.

Jan. 5: Frank White becomes NBC president, succeeding Joseph H. McConnell; Sylvester L. Weaver is elected to new post, vice president of NBC.
Or how much highway in a gallon of gasoline?

"Ask a person what he pays for a gallon of gasoline and even if he remembers correctly, his answer is usually wrong."

"Because nine times out of ten the price he quotes includes the tax."

"Gasoline, you see, is one of the few things we buy where the tax is lumped-in with the total cost of the product."

"Don't misunderstand me. The tax helps build the highways this country needs, and certainly we are in favor of it.

"But since by law we have to collect it — and many motorists figure it's part of our profit — it doesn't make the dealer's or our selling job any easier. Especially since the federal tax on gasoline went up another cent last July.

"That means direct state and federal taxes now average 8.8¢ per gallon. In some states it is even as high as 10¢.

"We get only a few cents more than that at the refinery for a gallon of gasoline. But the tax is still cheap if it buys the best highway system in the world.

"Next time you get your bill for filling up, though, just remember that at least 8.8¢ per gallon is the cost of roads, not gasoline."

Allen Ely—with Union Oil since 1927— is responsible for paying our fuel and gas taxes to the government. Last year, for example, we collected from our customers and turned over to state and federal agencies some $63,000,000 as fuel taxes.

In spite of this, you never got so much for your money as you do today when you drive in and say "Fill her up!"

For while the cost of everything else has tripled and quadrupled in the past 20 years, we're getting only a few cents more for gasoline.

And two gallons of our new Royal 76 premium do the work of three of our old product.

Your comments are invited: Write: The Chairman of the Board, Union Oil Co., Union Oil Bldg., Los Angeles 17, Calif.
chairman of NBC board; John K. Herbert becomes vice president in charge of the radio and tv networks; Mr. McConnell is to be president of Colgate-Palmolive-Peet Co.

Jan. 5: Bing Crosby Enterprises demonstrates its magnetic tape recording, judged "more than 20 fold" improved over demonstration a year ago.

Jan. 12: International News Photos uses Facecom to deliver spot news photos to Today on NBC-TV, using equipment developed by Hogan Labs.

Feb. 2: FCC revises rules for operating personnel; opens way for remote operation of transmitters.

Feb. 9: Both Senate Commerce Committee and FCC investigate tv shakedown racket; applicants whose sole interest is in collecting fancy fees for clearing way for serious applicants.

Feb. 9: NARTB tv board authorizes intensive exploration of standard circulation measurement plan for television presented by Dr. Franklin R. Cau, market research consultant.

Feb. 9: Federal Court in New York, in two-to-one decision, says FCC’s giveaway rules misconstrue the lottery law and represent "censorship" of sort forbidden by First Amendment to the Constitution.

Feb. 9: William H. Fineshriber, executive vice president of MBS, moves to NBC as vice president and general manager of the radio and tv networks.

Feb. 16: Merger of American Broadcasting Co. and United Paramount Theatres is approved by FCC in five-to-two decision; Comr. Hennock vigorously dissenting; Comr. Webster wants further study of UPT’s qualifications; Commission also approves sale of WBKB (TV) Chicago to CBS, with move to ch. 2, dismissing Zenith Radio Corp. application for that channel; FCC rules that Paramount Pictures Corp. controls Allen B. DuMont Labs.

Feb. 23: Westinghouse Radio Stations Inc. buys WPTZ (TV) Philadelphia from Philco Corp. for record price of $8.5 million.

Feb. 23: Philip Morris & Co. and CBS sign Lucille Ball and Desi Arnez to $38 million, 21/2 year non-cancellable contract.

March 2: Special commission on educational tv in New York State finds “no justification” for proposed 10-station educational tv network; state’s educators are not using all time available on commercial stations.

March 2: Station Representatives Assn. (formerly National Assn. of Radio & Television Station Representatives) launches Crusade for Spot Radio; asks stations to underwrite national promotional campaign with fees of one-half one-time one-minute rate per month.

March 2: ABC stations in New York drop WIZ call for WABC-AM-FM-TV.

March 9: NARTB votes to give first Keynoter Award to Brig Gen. David Sarnoff, RCA-NBC board chairman; award, created to honor outstanding service to broadcasting industry, will be presented at NARTB convention.

March 23: Both Senate and House Commerce Committees prepare to investigate color tv situation and whether failure of manufacturers to turn out color sets (under CBS standards) is a result of a conspiracy.

March 23: Whitehall Pharmaceutical Co. (Ana- cin) offers stations non-cancellable April-September contracts for spot campaigns; asks extra 10% discount for summer guarantee.

March 30: Empire Coil Co. and Wraithall-Carrman-Smith join NBC, CBS and AB-PY as owners of five tv stations, maximum rules permit, as FCC approves construction permits; Storer Broadcasting Co. will be in group if its tentative purchase agreement of WBR-AM-TV Birmingham goes through.

April 20: Rosel H. Hyde is given one-year appointment as FCC chairman, first Republican chairman since FCC was created in 1934.

May 4: Ending years-old argument, ASCAP accepts broadcasters’ position on network co-op programs; agrees on payment at local instead of national rate.

May 4: Listener protests of bait-switch advertising on air draw attention of both FCC and FTC.

May 11: Expansion of Vitapix Corp. into a nationwide, tv station-owned film distributing syndicate is announced by John E. Fetzer, WKZQ-TV Kalamazoo, board chairman; Frank E. Mullen, former NBC executive vice president, is elected president of Vitapix; 40 stations is goal.

June 1: Brig. Gen. David Sarnoff outlines RCA-NBC history and future plans in two-hour address to NBC-TV affiliates, who reaffirm “complete allegiance” to NBC; incipient revolt seems quelled with no rush to follow WTAR-AM-TV Norfolk to CBS.

June 8: World-wide radio covers Queen Elizabeth’s coronation; race of NBC and CBS planes with tv films ends in victory for ABC-TV, which took feed from Canadian Broadcasting Corp. and shared it with NBC-TV.

June 22: Two-hour Ford 50th Anniversary program, telecast on both CBS-TV and NBC-TV, makes tv history, with Mary Martin-Ethel Merman songfest in its high peak.

June 22: FCC awards ch. 7 Pine Bluff, Ark., to Central-South Sales Co., dismisses application of Arkansas tv Co. on grounds it was a delaying action.

June 22: Lewis Allen Weiss, former MBS board chairman and top Don Lee executive, dies at 60.

June 22: James C. Petriolo, AFPM president, tells tv networks he will not tolerate AFTRA infringements on his union’s domain; AFTRA insists that musicians who sing and act as m.c.’s must be its members.

June 29: RCA-NBC asks FCC to approve compatible color standards for the RCA dot-sequential color tv system on a commercial basis.

Listen! Look! Talk! Argue! Think! then VOTE
The Seal of the American Society of Composers, Authors and Publishers on music is a mark of distinction. It may only be used by members of ASCAP. It is the hallmark of the skilled professional whose talents create the top tunes of television, radio and records, the song hits of Broadway and Hollywood and the finest in the fields of classical and religious music. It is the seal of public approval.

By means of a single ASCAP license the entire repertory of America's foremost creative talent is made available to the users of music.
June 29: FCC denies motion picture theatres the allocation of special channels; rules that theatre tv transmission should be a common carrier operation.

July 6: MBS executives meet with affiliates committee to plan revision of operations to improve programming, increase sales.

July 13: Box Office Television Inc. signs five-year contract for home football games of Notre Dame for closed circuit theatre television.

July 13: B-T survey shows non-network film programs occupying a quarter of the time of tv network interconnected affiliates, half the time of non-connected affiliates and three-fifths the time of non-affiliated stations.

July 20: NBC separates sales, programming and promotion of its radio and tv networks; Vice President William H. Fine shiriber Jr. heads radio network; Vice President John K. Herbert heads tv network; both report to President Frank White.

July 20: FCC revamps its tv processing procedure to give first priority to biggest market with least tv service.

July 20: Mutual presents to affiliates plan to cut option time from nine to five hours a day, to stop paying them for network commercial programs in option time in money but to give them 14 hours a week of “highest calibre” programs for local or national spot sale; majority of MBS affiliates must approve deal by Aug. 1 for it to become effective in October.

July 27: FCC proposes extension of tv licenses from one to three years.

July 27: National Television System Committee files petition with FCC to establish its compatible color tv standards to supersede the CBS field sequential color system approved by the FCC in 1950; CBS-TV announces plan to start colorcasting with the NTSC system in September.

July 27: Bill to make subscription television and theatre tv common carriers, removing them from broadcasting category, is introduced by Rep. Carl Hinshaw (R-Calif.).

Aug. 3: Frank White resigns NBC presidency because of ill health; Gen. Sarnoff will serve as president until new one is chosen.

Aug. 10: Four uhf station permittees ask FCC to authorize subscription tv as their only means of meeting strong vhf competition.

Aug. 10: Court of Appeals upholds FCC’s table of tv allocations, ruling that the Commission has the authority to establish a nationwide tv allocations plan.

Aug. 31: MBS gets FCC approval for its new affiliation plan; prepares to put it into effect Oct. 1.

Aug. 31: B-T publishes Kenyon & Eckhardt survey of merchandising services offered, free or for a fee, by nation’s tv stations and networks in Telecasting Yearbook; first such study ever made.

...it pays to advertise to advertisers

Tell your market and media story to top men in marketing management.
Schedule your advertising-to-advertisers continuously and consistently in the magazine which reaches over 30,000 advertising, selling and marketing executives—PRINTERS' INK.

Because it is edited for advertisers, Printers' Ink has a larger circulation among advertising and marketing executives, the Men of Decision—at the advertiser level—than any other publication in its field.

And, because Printers' Ink does such a sustained idea-job for its readers, it does a great impact job for its advertisers.

Use Printers' Ink to reach the men your men can't always reach—the men who have the final say on Budget Day.

CLEAN YOUR FILMS WITH THE NEW IMPROVED
ECCO #1500 ANTI-STATIC FILM CLEANER
Non-Flammable
NO CARBON TET or TRICHLORETHYLENE

Used by NBC, CBS and many others. Better cleaning means cleaner, brighter projection. Eliminates dust attraction which causes poor screenings.

Here's Why ECCO #1500 is Better:

✓ Cleaning properties better than carbon-tet
✓ Leaves film permanently free of static
✓ Dries faster than carbon-tet
✓ Keeps film pliable, eliminates waxing
✓ Mild, non-irritating odor
✓ LOW COST—less than 2¢ per foot of film
✓ Equally effective for negatives or prints
✓ Invisible anti-static coating

In ECCO 1500 you have all the cleansing qualities of carbon-tetrachloride without the dangers. Add years of life to your film.

CLEAN and INSPECT FILM in one easy operation with the
ECCO SPEEDROL APPLICATOR

Save time, fluid, labor, money

ELECTRO-CHEMICAL PRODUCTS CORP.
60 Franklin Street • East Orange, N. J.

Sept. 28: William Weintraub Co. queries stations on proposal that they carry Revlon Theatre film series, with Revlon commercials, free every other week in exchange for right to sell program locally on alternate weeks.

Sept. 28: NBC Spot Sales introduces "Electronic Spot Buying," with timebuyers enabled to monitor tv and radio programs on stations represented by NBC via closed circuit.

Sept. 28: New York State Supreme Court denies International Boxing Club an injunction to stop WOV New York from broadcasting a summary of action at end of each round of Marciano-LaStarza fight, but forbids broadcasting of present tense re-creations.

Sept. 28: With end of Daylight Saving Time, CBS-TV, NBC-TV inaugurate "hot kinescope" systems to put programs on air on West Coast at same clock hour as in East.

Sept. 28: Station Representatives Assn. attacks NBC's "NB3" plan of letting advertisers buy participations in daytime serials at reduced rates as unwarranted network invasion of spot business.

Oct. 5: Jack Gross and Phil Krasne become full owners of United Television Programs; buy one-third held by Sam Costello and Ben Frye of Studio Films and one-third held by Milt Blink of Standard Radio Transcription Services and Jerry King.

Oct. 5: John L. Sinn, president, Ziv Television Programs, announces sale of Spanish-language versions of five program series to advertisers for use in Mexico as first step in multi-lingual global tv program distribution plan.

Oct. 5: Emerson Radio & Phonograph Co. exhibits what it calls first compatible color tv receiver; puts probable price at $700.

Oct. 19: FCC rules that examiner has the right to enlarge issues of hearing to determine if the applicant has the financial resources to carry out his program proposals.

Oct. 19: Fm multiplexing system permitting simultaneous transmission of two programs on a single 200 kc fm band is demonstrated by Dr. Edwin H. Armstrong, inventor of fm.

Oct. 26: FCC starts another investigation of Edward Lamb (WTOD Toledo, WICK and WICU [TV] Erie, WMAC-TV Massillon, Ohio, WHOO Orlando and purchaser of cp for WTVQ [TV] Pittsburgh, subject to FCC approval); authorship of The Planned Economy of Soviet Russia in early 1930's and alleged association with organizations subsequently listed as subversive by Attorney General stimulated earlier investigations of his fitness to be licensee.

Oct. 26: NBC announces "Run-of-Schedule Advertising-Holidays" plan to attract special holiday ads usually going to magazines.

Nov. 2: Extending divestiture of radio and tv, ABC names Oliver Treyz director of its radio network, Slocum Chapin director of its tv network.

Nov. 9: Ted Bergmann is appointed director of broadcasting for Allen B. DuMont Labs, succeeding Chris Witting.

Nov. 9: MBS executives meet with affiliates advisory committee; agree to drop plan of paying for time in programs rather than dollars at end of year.

Nov. 9: Bureau of Budget orders FCC and other licensing agencies to draw up schedules of fees which broadcasters and others should pay for privilege of holding government licenses.

Nov. 9: WSM-TV Nashville asks FCC to authorize commercial establishment of booster or satellite tv stations.

Nov. 9: FCC finalizes extension of tv license renewal period from one to three years over renewed protest of Comar Hennock.

Nov. 16: Dissolution of NARTB, divestiture of BMI from its broadcaster ownership and $150 million in damages is asked by 33 writer members of ASCAP, banded together as Songwriters of America, in suit filed in federal court in New York.

Nov. 16: Federal Court Judge Allan K. Grim rules a professional football team may ban telecasts of other teams playing in its area when it is playing at home, but not when it is away; ban on radio broadcasts is held completely illegal.

Nov. 16: WPIX (TV) New York offers its programs for rebroadcast by uhf stations on edge of its coverage area.

Nov 23: "Sound on FAX," audio transmission of tape recordings of news events together with pictures over International News Service facsimile circuit, is introduced by INS.

Nov. 30: FCC sets five tv, seven am and seven fm as maximum number of stations which any one entity can own.

Dec. 7: Sylvester L. (Pat) Weaver is elected NBC president, Robert W. Sarnoff becomes executive vice president.

Dec. 7: RCA demonstrates monochrome and color tv programs recorded on mag-
ON AN IMPORTANT PUBLICATION ANNIVERSARY

"That country is the richest which nourishes the greatest number of noble and happy human beings; that man is richest who, having perfected the functions of his own life to the utmost, has also the widest helpful influence, both personal and by means of his possessions, over the lives of others."

JOHN RUSKIN

The Broadcasting-Telecasting industry has its daily share of management headaches. But one thing is certain—fundamental principles in human relations never change.

We hope that Ruskin's philosophy—down through the years—will help us all get a clearer perspective of our responsibilities and opportunities.

ALLEN KANDER AND COMPANY

Negotiators for the purchase or sale of radio and television properties

New York  Washington, D.C.  Chicago
BOND BONANZA

ALL mass-influence precedents were shattered during World War II by a singing saleswoman, Kate Smith.

In a 20-hour turn that started at 6 a.m. Oct. 6, 1942, Miss Smith spoke 30 times to an eight-state audience keyed from WABC (now WCBS) New York. She was credited with $2,013,-500 in bond sales. Three weeks later a similar assignment at WJSV (now WTOP) Washington sold $1,015,950.

Less than a year later, Sept. 21, 1943, Miss Smith spoke 64 times in 18 hours over a nationwide hookup that include two-minute spots, her regular noon show and some 15-minute interludes. Total bond sales credited to her amounted to $38 million.

The figures were startling but they shrank into the background after her Feb. 1, 1944, plea for the fourth bond issue. In 18½ hours she made 57 separate appeals over 134 stations. Sales totaled $108 million—a dramatic example of the power of the spoken word.

Pack's 'em in!

WXIX's Twelve Plan packs in so many customers at low cost that even herring packers are amazed. The producers of Ma Baensch Herring "needed frequency of impact, package identification and emphasis on brand name." Their agency reports: "All these goals were achieved through the Twelve Plan on WXIX, which has resulted in increases in total sales, in the number of retail placements, and in the frequency of purchase by retailers. A healthy progress at all levels!" Let us show you how low-cost WXIX can pack 'em in for you.
A distinguished book comes out of BMI's Award-Winning Radio Series

THE AMERICAN STORY

For the first time in broadcasting annals a series of radio programs has been preserved in a book that will take a permanent and prominent place in the literature of American history.

To the many broadcasters who are presenting THE AMERICAN STORY and to the noted American historians who contributed to the series we extend our sincerest appreciation.

BMI is proud that it conceived the idea and prepared the radio scripts now in their 3rd year as a continuing series. THE AMERICAN STORY has been honored by a Freedoms Foundation Award and Ohio State University's Institute for Education by Radio and Television (IERT) citation.

THE AMERICAN STORY is being published by CHANNEL PRESS on November 12th, 1956 it has already been named a BOOK-OF-THE-MONTH CLUB DIVIDEND for January, 1957

"A remarkable history in which the story of the country is told in 60 episodes by as many historians, each contributing in his special field. They include almost every professorial name you ever heard of and the result, with introductory bits outlining background is fascinating reading."

—Donald Gordon, AMERICAN NEWS OF BOOKS

If THE AMERICAN STORY is not yet on your program schedule, we invite you to take another look. We'll be happy to send you the scripts.
March 29: General Foods withdraws nearly all its $3 million advertising allotment from Foote, Cone & Belding in a move to consolidate its advertising in the company’s two other agencies, Young & Rubicam and Benton & Bowles.

March 29: RCA begins color TV receiver production as the first 15-in. open face console, to sell at $1,000, comes off the Bloomington, Ind., factory line.

April 5: ABC and Walt Disney sign long-term contract under which Disney studios will produce at least 26 hour-long programs a year for ABC-TV.

April 12: By an 8-0 ruling, the U. S. Supreme Court turns down an FCC appeal from 1953 three-judge special New York court decision holding that one of the Commission’s key provisions in its lottery regulations is invalid; court finds the FCC exceeded its authority in attempting to define listening to a radio program or watching a TV show as a “consideration” in the meaning of the lottery statute.

May 10: A new TV sales promotion project, Television Advertising Bureau, promises it will be operating in time to influence fall-winter planning by advertisers and agencies. Richard A. Moore, KTIV (TV) Los Angeles, chairman of organizing committee, announces 38 stations have joined.

May 24: Potter Subcommittee hears pleas from uhf operators, who ask “hiatus” in vhf grants, other relief, including deintermixture; FCC defends intermixture, says move to all uhf unwise, sees programming help in films and tapes; Comr. Frieda Hennock calls for vhf freeze, power cutbacks; RETMA asks elimination of 10% excise tax on all-channel sets; DuMont submits plans to strengthen DTN and ABC-TV; GE, RCA present uhf data.

May 31: CBS Radio reduces nighttime rates about 20%, effective in fall, in effect establishing a single day-night rate for the network; gives affiliates 70-second station breaks in evening hours; agrees not to follow NBC Radio plan to sell spots on the network; affiliates accept proposal.

May 31: Mutual proposes to affiliates plan for network to sell spots in a half-hour morning and half-hour afternoon program, affiliates to carry first spot in each period without pay, to be paid for others.

June 7: President nominates John C. Doerfer to replace Eugene H. Merrill on FCC.

June 21: Potter Subcommittee resumes hearings on uhf troubles, with uhfs renewing pleas for help; vhs oppose proposed freeze, deintermixture, power cutbacks on uhf, move to all-uhf, with FCC majority support; CBS urges study of deintermixture; ABC asks expansion of vhf by adding channels from fm band, educational reservations and other parts of spectrum.

July 5: TvAB and NARTB television factions merge to nip intra-industry feud in bud; form Tvb.

July 5: Senate confirms nomination of John C. Doerfer to FCC.

July 12: Potter Subcommittee meets with FCC, with latter suggesting excise tax on all-channel tv sets be lifted, multiple ownership rule be liberalized to allow ownership of five vhs, two uhfs, and that all-industry ad hoc group be named to study long range allocations.

July 12: SRA opposes admission of networks to Tvb.

July 12: Clear Channel Broadcasting Service opposes FCC’s daytime skyline proposal.

July 19: Chairman John W. Bricker (R-Ohio) of Senate Commerce Committee said he is readying investigation of tv industry as aftermath of Potter Subcommittee hearings on uhf problems.

July 19: The Pulse reports new instantaneous radio-tv rating service.

July 19: ABC Radio backs music-news formula to bolster radio.

July 26: Potter Subcommittee recommends tv allocations study by ad hoc industry group, continues “record” on uhf inquiry.

Aug. 9: FCC proposes uhf tv satellite and “budget” stations, in move to reduce cost of uhf station operation.

Aug. 9: Chairman John W. Bricker (R-Ohio) of Senate Commerce Committee formally announces impending probe of tv networks, uhf-vhf problems.

Aug. 16: Quality Radio Group (power radio stations) is organized to produce, sell night radio shows.

Aug. 23: Former FCC Commr. Robert F. Jones to head Senate Commerce Committee’s tv probe as counsel for GOP majority. Former FCC Assistant General Counsel Harry Plotkin to represent Democrats as counsel.

Aug. 23: House Commerce Committee issues report rebuking broadcasters for beer-wine ads, calls for industry data, report on remedial actions.

Aug. 30: CBS President Frank Stanton broadcasts first network editorial, urging radio-tv right to cover congressional hearings.

Sept. 13: FCC Commr. George E. Sterling to retire from FCC as of Sept. 30 after 31 years’ government service.

Sept. 20: FCC boosts tv ownership limits; seven tv stations allowed, five vhs, two uhf.

Sept. 20: FCC opens license renewal hearing against Edward Lamb, WICU (TV) Erie, Pa., on charges Mr. Lamb lied about Communist affiliations.

Sept. 20: Skiatron Tv Inc. petitions FCC for approval of its toll tv system.
BELL & HOWELL VIDICON PROJECTORS
Versatile Programming...Low Initial Cost

Originally produced to meet rigid JAN (Joint Army-Navy) specifications, this Bell & Howell projector is noted for its ruggedness, trouble-free performance, simplicity and ease of servicing. It includes the following special features:

- Optical and magnetic sound reproduction
- Fixed-axis framing
- Easy threading
- Built-in loop setter
- Forward and reverse operation
- Operating hour meter
- Single-phase operation
- 600-ohm balanced line output.

As an integral part of Vidicon film chains, this new 16mm Bell & Howell projector provides many unique advantages. For example, you get complete manual control, plus connection for remote control. At the push of a button, you can change from picture and sound on one projector to the same set-up on the other.

This Bell & Howell projector also conforms to proposed new ASA standards for placement of magnetic sound. All in all, the full potential of versatile programming is in direct proportion to the creativeness of your production people.

Talk to your Systems Supplier soon. His quotation will be a pleasant surprise. Or write for specifications on Design 614 CVBM projector. Bell & Howell, 7139 McCormick Road, Chicago 45, Ill.

**DUMMY AND DAME AROUSE**

**THE NATION**

The sexy inflections in Mae West's voice and the sly rejoinders of Edgar Bergen's irrepressible dummy, Charlie McCarthy, set off a broadcasting chain reaction the evening of Dec. 12, 1937. NBC's 8-9:30 p.m. Sunday half-hour led to an official FCC investigation, nationwide discussion of the saucy dialogue and demands that broadcasting be censored.

In essence, Miss West and Charlie kicked around a "come and see me sometime" dialogue. If the script looked reasonably innocent, the way the two read their lines left a lot of listeners convinced they were hearing night-clubbish entertainment instead of the more careful comedy of the airlines. Miss West reeked of seduction, an effect she could lend to Little Red Ridinghood or most any fictional heroine. The resulting "Adam and Eve" routine was more devastating than the program producers had anticipated, and the post-broadcast results astonished all concerned.

FCC went into the matter thoroughly, led by Chairman Frank R. McNinch, and emerged with a stiff scolding for NBC. The chairman officially notified NBC President Lenox R. Lohr that no further action would be taken but he described the program as far below "even the minimum standards which should control the selection and production of broadcast programs." He termed it "a very serious offense against the properties."

Demand for a Congressional probe was made on Capitol Hill, and religious interests voiced indignation. Newspapers had a field day, with colorful stories and stern editorials.

Here are some excerpts from the original continuity:

**Bergen:** Tell me, Miss West, have you ever found the one man in your life you could really love?

**West:** Sure . . . lots of times.

**Charlie:** Could you even like Mr. Bergen?

**Bergen:** Mr. Bergen is very sweet. In fact, he's a right guy and, confidentially, you'll have to show me a man I don't like.

**Charlie:** That's swell. Bergen's your man. You know . . . he can be had.

**West:** On second thought, I'm liable to take him away from you. Then what will you say?

**Charlie:** If you take Bergen away, I'll be speechless.

**West:** Or are you afraid I'll do you wrong?

**Charlie:** Well, now that you ask . . .

**West:** Or are you afraid I'll do you right?

**Charlie:** I'm slightly confused. I need time for that one.

**West:** That's all right. I like a man that takes his time. Why don't you come home with me? I'll let you play in my Woodward.

You're all wood and a yard long. You weren't so nervous and backward when you came up to see me at my apartment. In fact you didn't need much encouragement to kiss me.

**Charlie:** Did I do that?

**West:** You certainly did and I got marks to prove it, and splinters too . . . Come here, honey—closer—we can talk intimately.

**Charlie:** If you don't mind, I'd rather keep my distance, Mae.

**West:** I don't like long-distance conversations. Come here. I thought we were going to have a nice long talk yesterday, in my apartment. There was so much I wanted to tell you. Where did you go when the doorbell rang?

**Charlie:** I went out the back door.

**West:** Don't tell me you went out through the French windows? I'm on the third floor, you know.

**Charlie:** I was going to say you were pretty skimpy with the back steps.

**West:** You look pretty good to me, Charlie. I'm here.

**Charlie:** But I thought you only liked tall, dark and handsome guys.

**West:** Oh, that was my last year's model. This year I'm on a diet . . .

**Charlie:** Oh, Mae, don't . . .

**West:** That ain't love—that's sleep.

Jan. 24: President Eisenhower opens his news conference to tv film coverage for the first time.

Jan. 31: Radio's 1954 time sales of $453,385,000 show 5% decline from previous year; first dip in radio sales since 1938.

Feb. 7: Senate Commerce Committee issues counsel Harry M. Plotkin's report calling for radical network restrictions and reduction of multiple ownerships. Sen. Magnuson says committee will investigate uhf troubles, network power plays, station ownership and military spectrum use.

Feb. 7: CBS' Stanton says if Plotkin proposals are adopted, network tv would be gravely crippled; summons 30 CBS-TV affiliates to plan strategy on Senate probe.

Feb. 14: Key witness Marie Natvig license renewal for WICU (TV) Erie, Pa., states she was "brainwashed" into giving false testimony linking Edward Lamb with Communist Party.

Feb. 21: Sen. John W. Bricker (R-Ohio), ranking Republican member of Senate Commerce Committee, says networks might be made subject to public utility-type regulation in releasing minority counsel Robert F. Jones' report.

Feb. 28: U.S. Court of Appeals, on Storer appeal, rules that FCC cannot set an arbitrary limit on number of stations one entity can own.

Feb. 28: Bing Crosby Enterprises demonstrates color video tape recording system.

Feb. 28: WXIX (TV) Milwaukee begins operation as first CBS-owned uhf station.

Feb. 28: RCA reports record $941 million income during 1954, 10% higher than 1953.

March 7: Hal Roach Jr., buys father's studios in a $10 million deal.

March 7: FCC proposes rule to keep tv towers within five miles of assigned city.

March 7: AT&T lowers its audio tariff by dropping the minimum from 16 to 8 consecutive daily hours and reduces the per hour-per-mile charge from $5 to $4.50.

March 14: Procter & Gamble leads 1954 radio-tv buyers with $36 million; Colgate-Palmolive second with $19 million.

March 14: NBC reaches maximum of five v's and two u's with purchase of WBUF-TV Buffalo, N.Y.

March 14: An estimated 65 million persons watch Peter Pan on NBC-TV, an audience Broadway predicted it would take 65 years to reach.

March 21: General Electric and National Telefilm Assoc. play key roles in formation of first film "network." National Affiliated Television Stations Inc.; will give assistance to ailing tv stations.

March 21: B-T's third market study, this one covering the Carolinas.

March 21: FCC Chairman McConnaughhey's appointment confirmed by Senate.

March 21: NBC-TV's $3.7 million Color City in Burbank, Calif., opens.

DELAWARE VALLEY CAN'T MISS A TRICK BECAUSE WPBH TELEVISION performs the most extensive programming feats right before their eyes. That's why trade in the Philadelphia-Wilmington-South Jersey area is at an all-time high. Advertising is seen and believed by a steadily increasing number of people on Channel 12.

March 28: IRE convention in New York witnesses disclosure of transistorized radio, tricolar vidicon, improved uhf transmitting antenna and earth satellite relay station for transoceanic tv.

March 28: The Simon video-film camera, capable of simultaneous motion picture filming and live telecasting, completed after four years in development.

March 28: DuMont introduces its Electronicam live-film system.

March 28: FCC authorizes functional music or other secondary programming via multiplex for fm stations.

April 4: NBC announces Monitor programming for weekends with time to be sold under magazine concept; beginning of major revision in radio selling, schedules.

April 4: Woolworth signs with CBS for its first use of network radio.

April 4: FCC makes first move toward deintermixture; asks for comments on making Hartford, Peoria, Evansville and Madison all uhf.

April 11: Pay-tv controversy raises more public reaction than any tv issue since color hearing in 1950; Zenith cancels advertising on CBS-TV charging network censored commercials, which is denied by CBS.

April 11: Coty sues Revlon, Weintraub, CBS charging theft of tv commercial copy; Hazel Bishop says same copy was created for its lipstick, not Coty or Revlon.

April 11: White House announces President Eisenhower will address May 22-26 NARTB convention in Washington, making him first Chief Executive to address broadcasters in person.

April 11: B-T survey shows that film now occupies more than a third of total tv broadcast time.

April 11: Witnesses appearing before Senate Juvenile Delinquency Subcommittee call for probe to determine if tv is a factor in delinquency.

April 18: DuMont switches to film network, using Electronicam, reserving live relays for special events and sports.

April 18: NARTB tv Board takes strong stand against pay-tv, tower restrictions.

April 25: Adrian Murphy retires as president of CBS Radio; replaced by west coast vice president, Arthur Hutt Hayes.

May 9: FCC launches probe into KPIX (TV) San Francisco damage, reported coincident with a walkout of NABET engineers at station.

May 9: Liquidation of DuMont tv Network demanded by group of stockholders, headed by Carl M. Loeb.

May 16: Justice Dept. files restraint of trade suit against ANPA, AAAA, four other associations; 15% commission challenged.

May 16: RCA-NBC, Minnesota Mining participate in first transmission of color tv program on magnetic tape over commercial tv network facilities.

May 16: CBS nets $3.9 million in first quarter of 1955; billings 36% above same period of 1954.

May 23: Lever Bros. products with accounts totaling $8 million move to J. Walter Thompson and Foote, Cone & Belding.

May 23: NBC swaps its WNBK (TV) and WTM-N AM-FM Cleveland and $3 million to Westinghouse for WP2Z (TV) and KYW Philadelphia.

May 23: The Katz Agency, station representative, discontinues subsidiary Station Films Inc.

May 23: DuMont unveils Vitascan system for originating live color without use of color tv cameras.

May 30: President Eisenhower nominates Richard Mack to succeed Frieda Hennock on FCC.

May 30: Affiliates stymie CBS Radio plan for one-rate structure.

June 6: Tv networks’ January-April gross of $132,018,674 up 35%; offsets radio’s drop.

June 6: Disney six-month gross income of $9,876,175 up $.5 million over 1954.

June 13: Supreme Court upholds FCC right to make grants according to the needs of cities involved. Under decision, WHOL Allentown, Pa., must cease operating to make way for WEEK Easton, Pa.

June 13: DuMont Labs names James Cadigan head in realignment; separate Electronicam unit set up.

June 13: Musicians’ 1954 income from radio-tv reaches $24.7 million, with radio leading in employment of musicians.

June 20: ABC-TV billings for 1955 are 68% above total gross in 1954, with major reasons Walt Disney and fade-away of DuMont.

June 20: RETMA holds 31st convention in Chicago; H. Leslie Hoffman elected president and board chairman.

June 20: Senate unanimously confirms Richard Mack for FCC.

June 20: Montana antenna system refuses to stop rebroadcasting KXL-TV Butte signals.

June 20: AB-PT expands into recording field; Sam Clark named to head new subsidiary.

June 20: Ralph W. Hardy succeeds Earl Gammons as Washington vice president for CBS.

June 20: DuMont begins the manufacture and sale of high fidelity phonographs, radios and clock radios.

June 27: NARTB board strengthens radio code; plans enforcement similar to that of tv.

June 27: FCC forbids stations in one city from entering into network affiliation pacts which prevent stations in nearby cities from carrying the same programs.

June 27: Mutual fixes single rate for day, evening; establishes single discount table. Network also revises program format to “Companionate Radio” plan.

July 4: CBS reaches agreement with radio affiliates for a single day-night network rate, affiliates to take a 20% cut in compensation; deal must still be negotiated individually with affiliates.

Write Box 190C, B'T

NEEDED NOW: One Man with Triple Qualifications.

Announcer: Who can handle a routine shift of music, news, sports; likes good music; can pronounce classical music titles and composers’ names confidentially and correctly; who can take an evening shift with the understanding it is permanent and (If) who will be heard by limited FM good music audiences for at least half his shift and won’t feel his talents are being wasted.

Engineer: Whose understanding of equipment is not limited to the minimum required to get a ticket; who knows how to carry out routine maintenance and won’t look helpless if trouble puts the station off the air and the Chief Engineer isn’t around to help.

Music Librarian: A man who can type rapidly, understands simple alphabetical filing and can distinguish between popular music with general appeal and that which has only a rock ’n roll, jive, jazz appeal and reject it before satellite.

If you are this man: want to settle in a good Central Pennsylvania community; become associated with a station that continues to grow, and take over the evening shift which features LP records giving ample time for librarians work, please get in touch with us. The man with these qualifications will be paid $100 for a 40 hour work week. Contact Manager, WFLY, Box 385, Williamsport, Pennsylvania. Phone 2-4675.

NEWS EDITOR WANTED

Dominant CBS television station in a pleasant medium-sized midwestern community needs a top-flight combination writer and newscaster for radio and TV. Send resume—experience, picture, anticipated salary and tape to...

Box 189C, B'T
Continues from page 260

July 4: Harold E. Fellows signs five-year contract to continue as NARTB president.

July 4: NBC-TV revamps daytime programming; will have "service" in morning, "entertainment" in afternoon.

July 11: Contract between DuMont and Jackie Gleason Enterprises calls for Gleason's The Honeymooners to be done as Electronic film program for CBS-TV 30-minute Saturday night series.

July 11: CBS buys second uhf station, WGTW, Hartford Conn., from General Teleredio for $650,000.

July 18: Canada, a B-T report on the post-war boom above the border.

July 18: Paul W. White, former CBS vice president and news chief, dies at 53.

July 25: FCC names committee to conduct study of network operations.

July 25: FCC Comr. John C. Doerfer proposes changing New York City's seven tv stations from vhf to uhf and perhaps making some change in other major markets on theory that if uhf is capable of delivering good service the big city is the place to put it to work.

July 25: House Un-American Activities Committee announces it will hold hearings in alleged Communist infiltration of radio-tv and other entertainment fields.

Aug. 1: Westinghouse Electric Co. will sponsor 1956 Presidential campaigns from conventions to election on CBS Radio and CBS-TV at $5 million cost.

Aug. 1: Combination diary-recorder method of audience measurement comes close to meeting "ideal" established by Advertising Research Foundation's Radio-Television Ratings Review Committee.

Aug. 1: WFMZ-TV Allentown-Bethlehem-Easton, suspended uhf station, offers to serve as toll tv guinea pig with operation 56% pay-to-see programming, 44% normal tv basis for three-year test period.

Aug. 1: U. S. Court of Appeals for District of Columbia rules that FCC erred in dismissing protest of WSAY Rochester against 1952 grant of ch. 10 in that city to share-time WHEC-TV and WVET-TV; law requires FCC to postpone effective date of grant, but station has been operating since Nov. 1, 1953.

Aug. 8: Plan to liberalize tv mileage separation and drop in channels between existing stations, providing for 200 more uhf stations, is proposed by Washington law firm of Welch, Mott & Morgan and consulting engineer John H. Mullaney.

Aug. 8: Aluminum Co. of America buys all available on eight NBC-TV programs for a one-day saturation campaign on Dec. 6 for $140,000.

Aug. 15: DuMont Tv Network to cease operations if stockholders of Allen B. DuMont Labs ratify "spinoff" proposal to separate manufacturing and broadcasting functions into individual organizations.

Aug. 22: U. S. Census Bureau says 32 million homes, 67% of all U. S. households, have tv.

Aug. 29: Senate Juvenile Delinquency Subcommittee headed by Sen. Estes Kefauver (D-Tenn.) recommends that FCC establish program censorship, that all broadcasters join NARTB and all tv film be urged to subscribe to the TV Code.

Aug. 29: TV proves its ability to cover court proceedings unobtrusively and decorously in test performance at American Bar Assn. meeting in Philadelphia.

Sept. 5: Claiming interference in Havana, Cuban broadcaster suggests that Miami be made an all-uhf city.

Sept. 12: NBC Radio proposes to extend Monitor to weekdays, reduce station compensation by 25% and open up additional evening programs for network sale of participations.

Sept. 12: NARTB prepares for fall schedule of eight regional meetings in place of previous pattern of 17 district sessions.

Sept. 19: Radio, recovering from the impact of tv competition, is on the way up in audience and sales; medium's 1955 status is examined from all angles in a special 150-page section of B-T.

Sept. 19: Republic Pictures signs government consent decree to make its feature pictures, in 16 mm process, available to tv and other non-theatre purchasers.

Sept. 19: FCC will consider subscription tv, but will handle more pressing problems, such as those of uhf-vhf and deintermixing, first, Chairman McConnaughy states.

Sept. 26: FCC Comr. Robert E. Lee proposes that Commission give up on uhf and expand vhf by relaxing rules and getting more spectrum.

Sept. 26: Commercial television starts in England as Independent Television Authority puts its London station on air.

Oct. 10: FCC asks Office of Defense Mobilization to give some of its uhf channels to broadcasting, take uhf bands in return; CBS proposes drop-in plan to provide at least two competitive tv services for nation's top 100 markets; ABC suggests retaining uhf, deintermixing where practicable and adding vhf frequencies wherever possible to give at least three vhf channels to major markets.

Oct. 10: FCC agrees to release financial and operational data obtained from stations and networks to Senate Commerce Commit-
Oct. 10: NBC announces Program Extension Plan to build network business for small market stations by making them available to advertisers on dividend formula that lowers their cost per the sponsor without reducing their rates.

Oct. 17: MBF cuts personnel 25% in "belt-tightening" program reportedly designed to free more money for programming.

Oct. 17: Under present economic conditions 600 tv stations is maximum the nation can support, according to an analysis prepared by Sidney S. Alexander, economic advisor to CBS.

Oct. 17: Coca-Cola shifts its $18 million-a-year advertising budget to McCann-Erickson after 49 years with D'Arcy Agency.

Oct. 17: Radio's ability to sell wristwatches and trucking service, to solve problems of small local or large national businesses, is described and praised at first National Radio Advertising Clinic, two-day New York meeting held by Radio Advertising Bureau.

Oct. 17: U. S. Supreme Court refuses to review decision of New Mexico Supreme Court that state school tax of 2% on gross incomes is legal on local revenues of broadcast stations; KOB Albuquerque has fought tax for 10 years on basis that broadcasting is interstate commerce and so exempt from state and local taxation.

Oct. 17: ABC Radio affiliates praise network's plan for evening programming based on personalized listening concept; plan calls for 2-1/2 hours to be programmed and sold in five-minute segments.

Oct. 17: DuMont Broadcasting Corp. is organized with Bernard L. Goodwin, vice president and general manager of music publishing subsidiaries of Paramount Pictures, as president.

Oct. 31: Jack Wrather, John L. Loeb and Richard Buckley buy WNEW New York for $4 million, top price to date for a radio station.

Nov. 7: NBC board appropriates $9 million for color tv; to build new studios in Brooklyn and Burbank and turn WNBD (TV) Chicago into world's first all-color station.

Jan. 23: Biow-Beirn-Toigo gives up newly-acquired $9 million Schlitz account.

Jan. 23: FCC grants Miami ch. 7 to Knight-Cox group.

Jan. 30: Democrats name Norman, Craig & Kammel as agency: GOP keeps BBDO.

Jan. 30: Magnuson Committee opens tv hearing with testimony from FCC on to allocations.

Jan. 30: J. Walter Thompson Co. gets Schlitz account to top total $60 million 1955 radio-tv billings.

Jan. 30: AT&T reaches consent agreement with Justice Dept. on patent licensing.

Jan. 30: B-T's sixth market story, on California.

Feb. 6: AAAA enters consent decree with Justice Dept., agrees not to require 15% agency commission.

Feb. 6: Biow-Beirn-Toigo loses $6 million Philip Morris account to N. W. Ayer & Son.

Feb. 6: House Transportation & Communications (Harris) Subcommittee opens hearings on several communications bills with testimony from FCC on newspaper-ship of tv stations, equal political time, antenna farms, broadcaster libel relief; from CBS on Stanton proposal to amend Sec. 315 of Communications Act.

Feb. 13: Broadcasters argue unobtrusiveness of coverage in arguments before Colorado supreme court.

Feb. 13: Foote, Cone & Belding gets $15 million Ford account.

Feb. 20: B-T estimates radio sales in 1955 at $455.6 million, up from 1954 slump.

Feb. 20: MBS guarantees circulation to advertisers, based on Nielsen ratings.

Feb. 20: NARTB asks FCC for remote operation for all radio stations.

Feb. 20: Senate and House Commerce Committees hear usual pro, con testimony on bills to ban alcohol ads.

Feb. 27: B-T finds no public groundswell against alleged ad abuses; government officials warn broadcasters, anyway.

Feb. 27: NBC billings up 23% for 1955, tv up 35%.

March 5: President Eisenhower uses radio-tv to announce intention to run. Democrats ask for equal time.

March 5: PRM, investment firm, buys Warner Bros. library of 850 feature movies, 1,500 shorts for $21 million.

March 5: Long-smoldering revolt by Hollywood AFM Local 47 erupts against parent AFM's $14 million trust fund; Local 47 moves to impeach its president; AFM orders probe by 5-man group.

March 5: Colorado Supreme Court favors radio-tv court coverage in historic recommendation.

March 5: Magnuson Committee hears Justice Dept. antitrust head on pending probes of WBC-NBC swap, option time and must buys, network control of programs; uhfs in criticisms of FCC allocations and requests for deintermixture; and others.

March 5: House Antitrust (Ceager) Subcommittee opens broadcast industry probe with testimony by Justice Dept. antitrust head pending probe of WBC-NBC stations swap.

March 12: B-T lists top 25 agencies in spot broadcast buying, led by Ted Bates, Young & Rubicam, McCann-Erickson.

March 12: Free & Peters becomes Peters, Griffin, Woodward Inc.

March 19: Hubbell Robinson Jr. and Merle S. Jones elevated to CBS-TV executive vice presidents.

March 19: ANA convention hears 15% agency commission likely to continue.

March 26: CBS Inc. reports sales $316.5 million, net income $13.39 million in 1955 for all-time high.

March 26: Evins Subcommittee subpoenas CBS, RCA-NBC records, quizzes two broadcasters on "influence," in FCC decisions.

April 2: Magnuson Committee hears Richard Moore, KTTL (TV) Los Angeles, charge that tv network option time, must buys, violate antitrust laws. ABC, CBS, NBC testify on allocations.

April 2: FCC proposes antenna farms.

April 2: ABC breaks into profit column in 1955, AB-PT annual report says.

April 9: B-T survey finds auto advertisers think tv effective—in follow-up of earlier criticism of tv effectiveness by Ernest Jones, president of MacManus, John & Adams (agency for Pontiac).

BIRTH OF A FAMOUS PHRASE

THE term "Fireside Chat," employed by President Franklin D. Roosevelt to describe informal White House radio and tv broadcasts to the people, originated in a radio studio.

Shortly before FDR went on the air following declaration of the bank holiday in March 1933, right after his inauguration, Harry Butcher, at that time director of the CBS Washington office at WTOP (then WJSV), was talking over the Presidential introduction with Ted Church, CBS Washington newsman who was special events director at the time. Mr. Butcher later became CBS Washington vice president and currently is president of KIST Santa Barbara, Calif., and minority stockholder in KEYT (TV) that city.

The following dialogue took place between Messrs. Butcher and Church:

CHURCH: I don't like this one, Harry. I made it a little too stiff. It's the usual formal thing. I think we ought to get something more human.

BUTCHER: You're right, Ted. The President says he isn't just making a speech. He wants to sit down and talk to people just as if they were here.

CHURCH: Just a sort of friendly chat.

BUTCHER: Sure. Let's see . . . he's broadcasting from the diplomatic reception room; that sounds stuffy—mmm—there's a fireplace in there, isn't there?

CHURCH: Sort of a fireplace.

BUTCHER: Fireplace . . . friendly chat . . . people listening to their President as if he were right at their own firesides . . . I know, I think I've got something. Let's call it a "fireside chat."

Later Marvin McIntyre, Presidential secretary, said FDR liked the fireside chat idea. "Maybe we'll have a series of them . . . fireside chats to the nation," Mr. McIntyre told Mr. Butcher. "I think maybe you put a new phrase in the American language."

Bob Trout, CBS newsman, was the first to use the phrase on the air.
Competition In Transportation Has Been Good For You!

Nowhere else in the world does the businessman, the farmer, the consumer enjoy the kinds and quality of transportation service available here in the United States.

Under the spur of competition, the trucking industry makes remarkable improvements in terminal operations through efficient mechanization — railroads strive to cut running time — airlines tailor air-freight to shipper requirements — the whole field of transport service researches, adapts, changes and improves.

This is service competition which benefits everyone concerned — which has given American agriculture and industry the finest transportation in the world.

Now, some would like to throw the emphasis on virtually unrestricted rate competition. We tried unrestricted rate competition once before — and it nearly wrecked our developing country. Now we have vigorous price competition, to be sure, but with built-in safeguards to protect shippers, carriers, and public alike.

Does service competition result in lower costs to the public? The answer is that all transportation today receives less of the national sales dollar than it did in 1929, although performing far more service for every dollar received.

AMERICAN TRUCKING INDUSTRY

AMERICAN TRUCKING ASSOCIATIONS, INC., WASHINGTON, D.C.

If You've Got It . . . A Truck Brought It!
THE EFFORTS TOWARDS SELF-DISCIPLINE

SELF-DISCIPLINE as an industry policy in maintaining program and advertising standards began with the formation of the old National Assn. of Broadcasters in 1923. General rules of conduct were adopted for the guidance of broadcasters with a revised version adopted in 1929. This lasted until 1935 when a 10-point code was adopted.

The 1935 version included a ban against per inquiry business, a tough clause that was dropped when the first detailed set of standards was put into operation. Further programs, controversial issues, education, news, religion and commercials along with a statement listing 13 types of unacceptable advertising accounts.

Limits on commercial copy in the 1939 code were roughly the same as those now prevailing for radio and tv, ranging from 2½ minutes for a nighttime quarter-hour to six minutes for a nighttime hour. But the most controversial part of the code—a part which eventually was to bring about its death—was a clause banning discussion of controversial issues in spot programs unless they were of the forum type or political broadcasts.

This clause, and a provision specifying that religious broadcasts should be spiritual rather than crusading, encountered trouble within weeks. A code compliance committee issued a September ruling interpreting the 100-word code. While not specifying Father Charles E. Coughlin, militant clerical broadcaster (see story, page 196), the interpretation was generally accepted as a slap at the priest and many stations refused to join his independent radio hookup. The interpretation struck at "neutrality" references on the air, an obvious reference to Fr. Coughlin's effort to form an army of peace to march on Washington in protest against a change in neutrality laws. Some civic groups strongly opposed the code clause as a form of censorship.

The code ran into serious trouble June 2, 1944, when the United Automobile Workers (CIO) protested renewal of the WHKC Columbus, Ohio, license on ground the station had refused to sell time for a union program soliciting membership and discussing controversial topics. WHKC offered a defense that cited the NAB code. WHKC and the union made peace when the station agreed to base its policy on individual cases rather than the NAB code.

A year later the FCC pulled the props out of the NAB code structure by ruling that broadcasters should sell time for controversial issues. That was June 26, 1945. Within six weeks NAB had completely rewritten its code, deleting the controversial issue language and turning the decision over to station managers. Time limits of commercials were sharpened, with the one-hour commercial time limited to six minutes, day and night.

Two years later—Atlanta City in September 1947—NAB again rewrote the code, insisting on the formal title, Standards of Practice. The convention debate was lively. A re-worked version was approved in spring, 1948 at the industry convention in Los Angeles. This stronger document was designed to meet the criticism of organized groups.

The association's name was changed to National Assn. of Radio and Television Broadcasters, bringing in tv, with a special video code discussed and adopted in October 1951. A new enforcement device, the tv seal of good practice, was added to the tv code and a five-man board was elected to administer the document. John E. Fetzer, WZKO-TV Kalamazoo, Mich., was first chairman. He was succeeded by G. Richard Shafto, WIS-TV Columbia, S. C.

As of October 1956, NAB has two codes in active operation. There is no enforcement device for the radio document, but a committee is working on ways of promoting adherence to its provisions.

April 16: ODM denies additional vhf spectrum space to broadcasting.
April 16: Tvb, in first report of kind, says national advertisers were buying tv—spot and network—at rate of $880 million a year in last quarter of 1955.
April 22: More than 4,500 broadcasters, others attend NABT Chicago convention, keynote by ABC President Robert E. Kin- ner. Ampex Corp.'s new tv tape recorder ($4 million in orders) steals show; NBC's WNBJQ (TV) Chicago goes full color; CBS unveils new sales plan; fm stations plan group separate from NABT; vhs plan proposed to maintain maximum power.
April 30: AAA convention dominated by talk on merits of 15% agency commission system. Robert D. Holbrook, Compton Advt., elected chairman.
April 30: Crowell-Collier Publishing Co. buys four radio and three tv stations in $16 million-plus agreement to become third largest non-network multiple owner.
April 30: John B. Poor named MBS pres- ident.
May 7: FCC reported studying plan to make U.S. west of Mississippi River all-vhf, east of river all-uhf.
May 14: SRA to issue monthly report on radio spot sales.
May 14: Tvb reports national tv—net- work and spot—hit $217 million billings for first quarter of 1956.
May 14: FCC sends questionnaire to tv networks asking financial data on affiliate compensation and costs to advertisers in FCC's network study.
May 21: President Eisenhower nominates engineer T. A. M. Craven to FCC.
May 21: National Telefilm Assoc. buys UM&M Corp., leases 52 200th Century-Fox Film Corp. features.
May 28: NBC charges film interests are be- hind attack on tv networks by Richard Moore of KTTV (TV) Los Angeles before Magnuson Committee.
May 28: McCann-Erickson gets $12 mil- lion Chesterfield account.
May 28: U.S. Supreme Court upholds FCC's multiple ownership rule in Storer case decision.
May 28: Triangle Publications hits top bracket of multiple owners with $5.4 million purchase of WNHC-AM-FM-TV New Ha- ven.
June 4: Power tv stations, mostly vhs, organize to resist curbs on maximum coverage.
June 11: CBS Radio announces 6 1/4% boost in rates to affiliates.
June 18: Magnuson Committee hears testi- mony against regulation of networks by FCC from network presidents Frank Stan- ton of CBS, Robert W. Sarnoff of NBC, Robert E. Kintner of ABC. They defend option time, must buys and other network practices as wholly legal and not monopolistic; say the present networking system works to the advantage of stations, adver- tiser and public; that network regulation of restrictions would endanger networks and television; that present tv allocations should be changed to meet new facts.
June 18: AFM convention supports parent union in Hollywood's Local 47 revolt against trust fund.
June 25: Federal grand jury begins probe of Westinghouse-NBC stations swap; summons NBC and WBC officials for testimony.
June 25: Magnuson Committee hears testi- mony by tv network affiliates in support of option time, must buys; Westinghouse Broadcasting official says NBC "forced" radio-tv stations swap.
June 25: Fund for Republic report charges "blacklisting" in radio-tv industry by power- ful individuals.
June 25: Loew's Inc. announces intention to enter tv field.
June 25: Senate confirms nomination of engineer T. A. M. Craven to FCC.
July 2: FCC uncovers plan for long range tv to all-uhf; nor for present, proposes deintermix in 13 markets.
July 2: National Telefilm Assoc. outlines plans for tv film network.
July 2: Cellar Subcommittee resumes hear- ings on probe of broadcast industry with testimony from FCC on Westinghouse-NBC swap. Reveals FCC staff report indicating possibility of "merger" on part of NBC.
July 9: SRA reports national radio spot sales well ahead of 1955.
July 9: Industry skeptical of FCC alloca- tions plan B'T check finds. Unidentified indus- try spokesmen are doubtful that FCC is serious about move to all uhf.
July 16: Westinghouse Broadcasting Corp. radio stations drop NBC Radio affiliation, meet NBC criticism that WBC insisted on "special treatment."
**July 16**: Celler Subcommittee hears FCC on alleged monopoly of tv by networks; reveals confidential FCC figures on tv network returns for 1955.

**July 16**: CBS Inc. shuts down tv set-making division, CBS-Columbia.

**July 20**: Magnuson Committee issues report supporting FCC on allocation proposals, urges speed to help uhf. Two members of committee dissent, urging FCC to keep present plan.

**July 23**: New Gates Radio Co. tape-disc system promises entirely automatic radio station operation.

**July 23**: B-T seventh market story, on Texas.

**July 30**: ABC submits plan to FCC and Congress for equal tv facilities in top 200 markets.

**Aug. 13**: 97 telecasters join new Assn. of Maximum Service Telecasters, which plans $100,000 engineering survey in efforts to resist curbs on maximum coverage.

**Aug. 13**: B-T estimate indicates filmed shows will account for half-billion dollars for the 1956-57 season in time-and-program

**Aug. 27**: 725 MGM features leased to CBS, King Broadcasting Co.'s two tv outlets and Triangle Publications' four tv stations for estimated $16-$20 million.

**Aug. 27**: Planned WIND Chicago sale to Westinghouse Broadcasting for $5.5 million is record for radio outlet; J. H. Whitney & Co. signs to buy radio-td properties in both Indianapolis and Ft. Wayne for total $10 million.

**Sept. 3**: Crowell-Collier Publishing Co., after some uncertainty, comes through with financial backing for $16 million stations purchase.

**Sept. 3**: Sindlinger & Co. says tv lost viewers because of political convention coverage; Trendex says tv viewing exceeded that for regular programs.

**Sept. 3**: Network officials say they lost $4.1-$5.1 million by convention coverage.

**Sept. 3**: NBC-TV plans to increase color schedule 300% in fall.

**Sept. 10**: Big push for release of post-1948 movies to tv begins as men from 10 major studios huddle in Hollywood to explore a united plan for same.

**Sept. 10**: NBC Board Chairman Sylvester L. (Pat) Weaver resigns, leaving President Robert W. Sarnoff in charge. Four executive vice presidents named.

**Sept. 17**: NTA Film Network reports lineup of 104 affiliate tv stations, plans Oct. 15 start.

DOMINION'S RADIO-TV MAKES IMPORTANT STRIDES
DURING THE LAST QUARTER CENTURY

IN THE QUARTER CENTURY since B+T
began reporting on the Canadian broad-
casting industry, Canadians have continued to
show a preference for United States pro-
grams. While there have been fundamental
changes in the control of broadcasting in
Canada in that quarter century, there has
been no basic change in the demand by list-
teners and viewers for American type pro-
grams.

U. S. advertisers, mostly through Ca-
nadian subsidiary companies, have been the
mainstay of commercial broadcasting de-
velopment. In recent years this has grown to
such volume that more and more U. S.
advertising agencies have opened offices in
major Canadian cities to handle the ac-
counts. About one-fifth of all advertising agen-
cies in Canada today are subsidiaries of
U. S. agencies.

U. S. equipment also dominates in Ca-
nadian radio and television stations, record-
ing and film studios, though some British
equipment has entered in recent years with
opening of television stations. Much of this
American-designed equipment is made in
Canada, in Canadian subsidiary factories.
The same goes for radio and television re-
civers, most of which are made in Canada.
U. S. design by subsidiaries of American
companies or by Canadian companies on a
licensing basis.

Despite this predominance of U. S. broad-
casting preference in Canada, there is
practically no U. S. capital involved in the
ownership of Canadian radio and television
stations. While the Canadian government
owns a large number of stations, the majority
are owned by Canadian businessmen, most
of them in the community in which the
station is located.

When B+T began to report on the Ca-
nadian broadcasting industry 25 years ago,
Canada's broadcasters were just recovering
from the shock of the first Royal Commissi-
on on Radio Broadcasting, headed by the
late Sir John Aird. That commission recom-

dended to the government the nationaliza-
tion of the radio broadcasting industry, the
establishment of high powered government
stations to cover the country, and a mini-
mum of commercial programs.

The Canadian government never fully im-
plemented the Aird Commission report, but
in 1932 established the Canadian Radio
Broadcasting Commission, with authority to
develop Canadian programs and take over
a chain of stations operated till then by the
government-owned Canadian National Rail-
ways. Privately-owned stations were to re-
main in existence.

That commission lasted till 1936 when
new legislation brought into being the
Canadian Broadcasting Corp. as a govern-
ment-owned company to regulate all broad-
casting in Canada and enter the business of
commercial broadcasting on a national scale
with 50 stations. Stiff regulations for control

Broadcasting • Telecasting
commercial network business, it added privately-owned stations to the networks and recommended licensing of new independent stations by the Canadian government. To fight the stiff restrictions on programming and advertising time limits, the privately-owned stations strengthened their national organization, the Canadian Assn. of Radio & Television Broadcasters. Gradually easing of regulations was won, including price mention, increased commercial content per quarter-hour and sponsorship of newscasts. As CBC required constantly increasing commercial business to stay within its budget more restrictions were lifted, especially in recent years with the advent of television.

Today Canadian broadcasters are anticipating the report of the third Royal Commission on Broadcasting, headed by R. M. Fowler, president of the Canadian Pulp & Paper Assn. This commission has been holding hearings since spring. Its report is due sometime this winter. While primarily looking into new ways to finance the CBC, the Fowler Commission is also expected to advise on the future regulation of the entire broadcasting industry. The private stations have asked through their association for an independent body to regulate both CBC and the independent stations, and for the right to form their own networks.

The fact that more and more radio and television stations are being licensed by the Canadian government on the recommendations of the CBC leads to the belief that the future will see little change in the status quo of Canadian broadcasting.

Favor U.S. Programs

While Canadians as a matter of national pride want to develop their own culture by way of dramatic and other radio and television productions, the majority of Canadian listeners and viewers tend to favor U.S. programs, both live and recorded. Canadian subsidiaries of American companies such as Kraft Foods, Lever Bros., Procter & Gamble, General Foods, Kellogg, Westinghouse, Miles Laboratories, Gillette, Texaco, to mention a few, sponsored radio network shows over the years and now sponsor network TV programs. Others such as Colgate-Palmolive, H. J. Heinz, Household Finance, S. C. Johnson & Son, Bulova, Bristol Myers, General Mills, Coca-Cola, Singer Sewing Machine, Carnation Milk, Swift, to name but a few, sponsor recorded radio and filmed TV programs on individual and network stations.

A big business, mostly financed by Canadian capital, has been built up over the years in the Canadian representation of United States and some British transcription and film companies. Practically all such organizations are represented in Canada; few deal directly with Canadian stations.

In the quarter century since B & T has covered the Canadian broadcasting industry the number of radio stations has grown from about 50 to 182 today, with 37 television stations now in operation. The number of radio homes has quadrupled in that time to the present 3,750,000, and Canada's population has increased from 10.5 million to just over 16 million today.

FOR A HAPPY PRESENTATION

The joy of accomplishment is a universal happiness. Especially in the case of a film which is your creation, born out of hard work and careful planning.

Because Precision's staff of specialists add its own creative effort to years by the use of specially designed equipment, and by careful handling and intelligent timing — you might say we are fellow creators, working with you to bring out all you've put into the original...Yes, and maybe more!

So, when you turn those 16mm dreams into realities, be sure to call upon Precision for the accurate, sound, and exact processing your films deserve.

Remember: Precision is the pace-setter in processing of all films. No matching of originals — some to some color correction, optical track printing, all are the very best...35mm service, too!

you'll see it and hear

First Quarter

IN THIS issue our editors take you on a tour of the last 25 years, as reported in the pages of this journal. It is an exciting, vivid narrative of an art and industry without parallel in our history. There are photographs that awaken memories. Radio and television have outstripped even the wildest predictions made for them.

We can learn from the past. But we cannot live in it. What happens next week or next year is the concern of all of us. The pioneers fought the battle for "Radio by the American Plan" as against the European plan of state control (or government ownership). That battle was won. The fight now is to acquire for broadcasting professional acceptance at all levels like that accorded the press, which it now is an integral part. Broadcasting must defend its free estate against incursions by conniving politicians, bureaucrats and reformers.

We round the bend into our second quarter-century proud of the field we serve. Our constant effort is to do a better job of reporting the news of our field. And we'll continue to express our own views in these columns as constructively as we know how, without grinding anybody's axe.

The Energetic Mr. Benny

CONSIDER Jack Benny.

In the early 1930's he left Earl Carroll's Vanities, and a salary of $1,500 a week, "to try to get into radio." Before, as he told B.T. just a few days ago (see interview, page 118), if people in radio "with names we never heard of before had become more popular than we who had been in show business all our lives . . . this is the business to get into."

Twenty years later, along came television and into it went top radio star Jack Benny. "I didn't decide," he stated. "There's no such thing as making a decision there. You go where you have to go." Where there are people seeking entertainment, that's where Jack Benny has to go, and not for just an occasional guest shot.

You know, he may be telling the truth about his age. With his energy, he couldn't be more than 39.

Commercial Clinic

ADVERTISERS, agency people and broadcasters all stand to benefit if they will take to heart some of the points made so articulately by Rod Erickson, vice president and radio-tv supervisor of Young & Rubicam, in the tape-recorded interview which begins on page 136.

We commend the entire interview to the attention and interest—self-interest, we might say—of all readers. But several points have particular merit which we feel justifies their being singled out and reproduced briefly in this space, too. For example:

". . . No television program, per se, ever sold a nickel's worth of merchandise. A program is only the vehicle which carries a commercial message. We start out with the premise the show gets the customers in the tent and then the 'pitch' man comes in and makes the sell. Therefore, as much time should be devoted to the creation of a proper commercial as to the selection of a program. Both must be in balance to get perfect results. . . ."

". . . I think [radio is] unfortunately the orphan of the advertising business at this point, and very undeservedly. The Nielsen reports can demonstrate to any advertiser that a combination of radio plus television can get him almost absolute coverage. . . . I doubt that any combination of advertising media can do as well in penetrating into every home as radio plus television . . . Radio today is an excellent buy on a cost per thousand homes delivered . . ."

The importance of the commercial message as television's "sole" sales agent is one that too often is overlooked, or forgotten. This obviously does not mean that broadcasters—or agencies or advertisers—can concentrate on the commercial to the neglect of the program. Clearly the commercial cannot "sell" unless and until, in Mr. Erickson's words, "the show gets the customers in the tent." But by the same reasoning advertisers who are dissatisfied with their tv results should examine their commercials rather closely before blandly proclaiming—as too often they are inclined to do—that "television" just won't work. Television does work when used right—as large numbers of advertisers testify regularly by continuing and expanding their use of it.

It is encouraging that Mr. Erickson's appraisal does not lose sight of radio in its enthusiasm for television. Too many agencies and too many advertisers in the past have developed an unaccountable radio blindness from staring too long at the wonders of television—although, happily, there are signs now that this is to be a passing malady. Mr. Erickson's prediction for radio is not one of uncontrollable optimism, but he does see a return to reason by advertisers in the face of aggressive selling and eventual re-recognition of the many values radio holds out to anyone with the sagacity to grasp them.

Below the Belt

PARTISAN politics isn't our particular dish of tea. Irrespective of party fealty, we're for those candidates who perform conscientiously and efficiently, and who recognize the virtues of free, unfettered broadcasting.

In Washington State a hot contest is being waged for the Senate, with Warren G. Magnuson, Democrat, running for reelection against Republican Gov. Arthur B. Langlie, who was keynoter at the San Francisco convention last August. Gov. Langlie last week raised ethical questions about his opponent, because he is chairman of the Senate Commerce Committee which handles communications legislation and because Sen. Magnuson owns stock in KIRO Seattle, one of three applicants for ch. 7. The fact that Sen. Magnuson held this stock (less than 4%) before he became a senator is disregarded.

We think Gov. Langlie took that low road. There are at least two dozen members of Congress who hold interests in broadcast stations. They belong to both parties. The majority of our legislators have other business or professional interests. Senate Minority Leader Knowland of California had his interest in KLX Oakland before he was elected to the Senate. The same is true of a number of others. Three members of President Eisenhower's secretariat have minorities in radio and television stations. Secretary of the Interior Fred A. Seaton, who distinguished himself both as a senator and an aide to the President, is a publisher-broadcaster.

All committee chairmen are important, and Sen. Magnuson holds one of the key Senate chairmanships. We question whether he has ever lifted a finger in behalf of KIRO's tv application because of the very fact that he is a stockholder.

It is not our purpose to espouse favorable action on any one of the three applicants for Seattle's ch. 7. It is the FCC's job to make its decision on the weight of testimony adduced at protracted hearings.

If there is ground for criticism, it should be over the time that this and other hearing cases have languished before the FCC without final action.
The eye-patch, the beard and the tattoo seem to be top attention-getters these days. And just to be doubly sure you notice this advertisement for the Northwest's first television station, we've included a few other sure-fire ingredients (or so our agency tells us) . . . a Baby, a Pretty Girl and, of course, the Faithful Dog.

So, after all that work, please allow us to point out that KSTP-TV is still your best buy in the vital Twin City market of more than 600,000 TV homes. The sparkling new entertainment line-up means sales—as so many KSTP-TV advertisers have already discovered.

Now is the time to put KSTP-TV to work for you . . . effectively and economically. Contact your nearest Edward Petry office or a KSTP-TV representative today.
JOINT KMBC RADIO-TV PROMOTION SETS BOX OFFICE RECORD IN K. C.

Gross Gate Receipts for KMBC-Promoted Lawrence Welk Show Set 21-Year One-Nighter Mark at Municipal Auditorium Arena!

$34,580 GROSS GATE—the largest one-nighter box office take in the 21-year history of the Municipal Auditorium—was recorded as a result of this KMBC Radio-TV promotion. Tickets went for $2, $3, $4 and $5 a copy—and the hall was jammed to capacity, seats being sold back of the stage. The entire Lawrence Welk promotion—except for almost negligible newspaper publicity and a small ad in TV Guide, was conducted exclusively by the broadcast facilities of the KMBC Broadcasting Company—KMBC and KFRM Radio, and KMBC-TV.

The amazing record-setting results of the Lawrence Welk promotion give dramatic evidence of the effectiveness of KMBC-KFRM-KMBC-TV sales power. Perhaps your product or service could use the same kind of smashing broadcast impact. The man to see for details is your Peters, Griffin, Woodward Colonel.

See Peters, Griffin, Woodward, Inc. for availabilities.

the SWING is to KMBC-TV

Kansas City's Most Popular and Most Powerful TV Station
Basic ABC-TV Affiliate

...and in Radio, it's KMBC of Kansas City—KFRM for the State of Kansas
