Thousands came from all over Big Aggie Land
Hundreds of others had to be turned away

The return of the WNAX Missouri Valley Barn Dance was a rip-roaring success!

The old-fashioned Saturday night entertainment habit in Big Aggie Land just had to come back. Too many people remembered the good times they had at the WNAX Missouri Valley Barn Dance. Live country music returned to these happy people last September 13. And what a success!

Nearly 5,000 people from all over Big Aggie Land got seats for the Barn Dance. Hundreds more had to be turned away. They came to see and hear their favorite daytime radio entertainers in person—“Casey” Clark and the WNAX Lazy Ranch Boys with Evelyn Harlene, plus the nationally famous Everly Brothers, “Smiley” Burnett and Bob Gibson.

Hundreds of thousands of people in Big Aggie Land hear “Casey” and the gang every day over WNAX-570. And now these popular entertainers are going to meet their fans in person. They’ll travel the length and breadth of Big Aggie Land to bring the Missouri Valley Barn Dance to a different town every Saturday night.

This is one of the ways WNAX-570 earns and holds one of the most loyal audiences in the country. The kind of listening loyalty that pays off for advertisers. See your Katz man.

Representative: The MEEKER Company, Inc. • New York • Chicago • Los Angeles • San Francisco
RCA SETTLEMENT • Consent decree in government's patent antitrust suit against RCA is in effect; may be made public this week. Justice Dept. brought civil complaint against RCA in November 1954, charged RCA's patent practices were monopolistic and in restraint of trade. RCA denied allegations in March 1955 and case has been pending in New York federal district court since. Earlier consent decree in 1932 broke up so-called "radio trust," required dissolution of RCA-GE-Westinghouse-A&T&T combine, and in effect, set up RCA as licensing and manufacturing entity. Philco has patent suit pending against RCA.

Ray L. Stone, media buyer at Mason's New York office, has been exploring fm situation on national level. He's been in discussions with NBC, Westinghouse, Triangle and other networks and station group owners sampling opinion on acceptance of fm on national basis for advertisers. Mr. Stone believes in possibility of national fm networking (particularly seeks overall research-program-promotion data on top 10 markets) and has put together some data on fm in form of "presentation."

KBET-TV DEAL • Successful bidder for ch. 10 KBET-TV Sacramento (at approximately $4.5 million) likely will be Corinthian Broadcasting Co. which thereby will acquire its fourth vhf, and with uhf ch. 15 WANE-TV Fort Wayne, its fifth tv outlet. Agreement reportedly was reached last week, with transaction now in contract drafting stage. Station, established in 1955, is licensed to Sacramento Telecasters Inc., of which William Wright and sons own 20%, John H. Schacht, 15%, with balance held by dozen minority stockholders. Corinthian, headed by C. Wrede Petersmeyer, is subsidiary of J. H. Whitney & Co., and operates KOTV (TV) Tulsa, KGUL-TV Houston, WISH-AM-TV Indianapolis and WANE-TV.

Negotiations are underway whereby controlling interest in ch. 7 WTRF-TV Wheeling will be acquired by present 30% owner Bloch-Harris interests from News Publishing Co., of West Virginia, and Dixon family which holds newspaper interests largely in Ohio. Price around $1.8 million. Robert W. Ferguson, executive vice president-general manager and owner of nearly 8%, will retain his holdings and continue as operating head.

FUTURES • With NBC riding high under management team of Bob Sarnoff and Bob Kintner, consideration is being given to promotion of two younger members of tv echelon who have played formidable roles in achievement of new business, new programming and top ratings. Stated for recognition, probably several months hence, are Robert F. Lewine, vice president tv network programs, and Walter D. Scott, vice president tv network sales. Scott's department and slots logically would be executive vice presidencies.

NBC chimes, trademark since aborning days of network in 1926, will give way soon to new insignia more representative of full range of NBC's activities in radio, television, film and other "family" operations. After months of internal consideration, new trademark soon will make appearance. For color programming, NBC's famed peacock will be retained.

SOME OTHER DAY • Revised FCC renewal forms, including changes in required program and commercial announcements listings, won't be out this month as expected; Commission had proposal before it last Wednesday, passed it over for two weeks. Among other reasons: Comr. John S. Cross asked for time to study document. Incidentally, FCC action, when it comes, will be in form of Notice of Proposed Rule-Making—requiring comments, reply comments and possibly oral argument. That's law. This may mean revised forms won't become effective until sometime in 1959.

Don't be surprised if Judge Horace Siern, retired chief justice of the Pennsylvania Supreme Court, is given other cases to hear for the FCC. Jurist, who presided over Miami ch. 10 rehearing (record on which was closed last Friday), was appointed regular FCC hearing examiner last August. His appointment was cleared with Civil Service Commission and his position is the same as any of other 14 FCC examiners. He is Grade 15 ($12,770 per year).

MORE FOR THE MONEY • While figures haven't been disclosed, fabulous success of British commercial television since its introduction three years ago is expected inevitably to lead to new competitive commercial service. According to informed London sources, profit figures, when revealed, will be so startling that Parliamentary demand is bound to rise for one and probably two competitive services. Stated British Broadcasting Corp., non-commercial state monopoly in radio but which in tv has been given terrific facing by ITA commercial operations, may be confronted with alternative of going commercial itself or facing new commercial tv competitors. Furthermore, BBC has eschewed commercialization although its various publications reap rich harvest from advertising.

Dancer-Fitzgerald-Sample had good news for its employees participating in D-F's profit-sharing plan. (degree of eligibility dependent on years of service). Special agency luncheon held at Roosevelt Hotel in New York Wednesday gave out news that D-F-S had good year, reportedly that share of profits to be placed in employe profit-sharing would be at maximum percentage. Each year, D-F-S holds extended luncheon meeting, keeps offices manned by skeleton crew, announces what employees can expect in way of company contribution to profit-sharing.

OUT OF UNIFORM • Chesterfield cigarette advertising in Steve Canyon to series (NBC, Sat., 9-9:30 p.m.) showing Air Force pilots happily puffing away at sponsor's product has had Air Force public relations in swivet. Fear was that uniformed actors might give impression Air Force was endorsing cigarette brand. Some quick liaison ensued between Air Force Secretary's office and McCann-Erickson and matter was worked out amicably. Solution: actors will puff their smokes in uniform. Change will take place in few weeks, after current batch of commercials are run off.

After pulling out of CBS-TV as sponsor of planned Mary Martin spectacular and tossing $400,000 into spot tv [ADVERTISERS & AGENCIES, Oct. 6], GM's Pontiac Motors Div. apparently has changed its mind. It will also sponsor spectacular this Yuletide, though not on CBS-TV. With specials already set for other months, Pontiac is about to sign for Dec. 21 NBC-TV telecast of Menotti's "Amahl and the Night Visitors," network's annual Christmas pageant. MacManus, John & Adams Inc., Pontiac agency, says it will stick with CBS-TV for Phil Silvers' one shot special in January.

WINDY CITY • Chicago chapter of American Federation of Tv & Radio Artists is trying to reap maximum political mileage out of complaint to FCC and Congress over cancellation of local live shows. Handling its public relations is Frank McNaughton, former Time-Life Washington correspondent and formerly on staff of Sen. Paul Douglas (D-Ill.), who has opened Chicago office, in association with Florence Abrahamson (former AFTRA employee, now Mrs. McNaughton).

While AFTRA complaint over NBC Chicago programming practices may not be politically inspired, it's not surprising Democratic politicians have hopped on union bandwagon with gusto. One such politician with known influence on Chicago Mayor Richard J. Daley's office is state Sen. William J. (Botoy) Connors (whose daughter Dorsey's local show was dropped by NBC's WNBQ [TV]).
In Greater Atlanta and 58 surrounding counties WAGA-TV is boosting sales and ratings with powerful new programming that includes multi-million dollar purchases of 732 Warner Brothers first-run films and hundreds of Screen Gems, RKO, UA and 20th Century films for the Early Show at 5:30 PM and late evening Starlight Movies.

Also, there's more news coverage—more modern equipment—more merchandising—and more market coverage on Atlanta's live Channel 5! See your KATZ man today.
Sequel on Liquor Advertising—The count of stations willing to accept hard liquor accounts is up to four, and one has a brand on the air. Others, unnamed, indicate they're all for it, but the advertisers haven’t yet rushed to the fore. The pros, and cons, are crystallizing their positions. Page 35.

Spend and Gain, "Save" and Lose.—That's the story among beers and cigarettes and their use of spot television, according to new study prepared by Petry’s television division. Analysis shows spot tv increases are generally followed by sales rises; cutbacks by sales declines. Page 37.

IT'S ALL IN HOW YOU LOOK AT IT,
TRENDEX SAYS OF RATINGS HASSLE

Trendex moved late Friday to clarify and if possible settle hassle that had developed between ABC-TV and NBC-TV over ads taken to promote new fall season ratings (story on page 68).

Trendex statement said that while its own findings for one period are comparable with those for another period, published claims differ because networks use different parts of Trendex report—that ABC used all commercial programs between 7:30 and 10:30 p.m. except religious programs; NBC used all Trendex data for that period including sustainers and where no network program was scheduled, 20-city time period ratings reflecting local programming; CBS included nighttime commercial programs between 6 and 11 p.m. Thus, Trendex said, data shown in these ads are not comparable.

"We feel that confusion can result from these apparent conflicting claims and suggest that careful attention be given to portions of the Trendex findings upon which each is based," statement concluded.

Trendex move came at end of day in which ABC-NBC hassle over program rating ads generated new heat. (1) NBC-TV took full-page newspaper ad claiming daytime leadership in latest multi-city Trendex and also reprinted portions of earlier Trendex letter saying ABC-TV had used "inexcusable" tactic in one ad (see early story), and (2) ABC-TV issued statement challenging position taken earlier by Trendex and also charging NBC ad included local programming of ABC affiliates and also network sustainers in ABC-TV's ratings.

NBC-TV ad said for week ended Oct. 17, in daytime periods where all three networks compete directly, NBC led second network by 11% and third network by 61%. Without referring by name to ABC-TV's new "Operation Daybreak" daytime project, ad also said Trendex figures show that "in those seven periods where the third network has introduced new daytime programs for the first time, NBC has increased to 40% its share of total audience, leading the second network by 17% and the third by over 200%. (The third network's new programs lost 49% of the audience share previously built up by their affiliates locally.)"

ABC-TV statement by Donald W. Coyle, vice president for research and sales development, challenged Trendex and NBC-TV contention that Trendex regular Oct. 1-7 nighttime measurement and special Oct. 8-14 nighttime study for NBC-TV are "comparable." By getting Oct. 14 into period, he said, NBC got benefit of one special program that made entire Oct. 8-14 week results show "reversal of standings from the period of Oct. 7-13." Mr. Coyle continued: "NBC, unlike ABC, included in its ad Trendex information reflecting sustaining programs and local programs of local ABC affiliates. ABC's ad was confined to commercial network shows."

To ABC contention that NBC choice of rating week enabled it to get benefit of one high-rated special, NBC-TV spokesman countered that ABC-TV had Bing Crosby debut in rating week it used and that CBS-TV had advantage of Desi-Lucy special.

Both NBC ad and Mr. Coyle's statement ended on somewhat more amiable note, both pointing out that important thing is that TV audiences are increasing. NBC had one more barb for ABC, saying that "with NBC and CBS in a neck-and-neck race for audience supremacy," public is "in for the most rewarding, most satisfying season of viewing in television's history." Mr. Coyle said ratings are "guides, not gods," and that long view shows not only that audiences are bigger but that "television networks are closer together than ever before."

Another ABC spokesman meanwhile told Broadcasting that "we have not cancelled Trendex," as reports speculated might happen. spokesman declined comment on what action, if any, might be taken in future.

HEAVY-SPENDING SCOT • Minnesota Mining & Mfg. Co. will spend more than half million dollars to promote line of "Scotch" brand Christmas ribbons and tapes via MacManus, John & Adams Inc. in addition to Nov. 30. ABC-TV spectacular based on "Peter and the Wolf." 3M is planning 100-market TV spot campaign plus participation in six NTA Film Network shows in 115 markets.

BACK AGAIN TO MBS • In its first use of Mutual in six years, Christmas Club A Corp., N.Y., originator of Christmas Club Savings Plan, is launching saturation campaign for four weeks, starting in mid-November. Advertiser, on behalf of more than 7,000 financial institutions, in plan, has bought 10 five-minute MBS newscasts per week, urging listeners to renew with Christmas Club. In recent years company has used spot radio-TV. Agency: Brooke, Smith, French & Dorrance, N. Y.

 IKE ON ABC-TV • Republican National Committee and National Citizen's Committee for Eisenhower-Nixon buying 8-8:30 p.m. tonight (Monday) on ABC-TV to present President Eisenhower in political address. Agency: BBDO, N. Y.

QUIZ QUIZ

On New York's tv ad row, quiz game was being played Friday by two advertisers and network. Question: What's going to replace The $64,000 Question Sunday night on CBS-TV? There was a "food" of answers, ranging from ficker of hope for Keep Talking to faint glimmer for Richard Diamond, Private Eye. Revlon and P. Lorillard Tobacco, co-sponsors of Question, figured in talks with CBS-TV, but as of Friday there was no decisive word on when Question would go off. Revlon, meantime, sought to co-sponsor Arthur Murray Party Mondays on NBC-TV with Lorillard, but Pharmaceuticals claimed it was already set as co-sponsor (Lorillard apparently had been reluctant to share its sponsorship with drug product firm but latter says it will be sponsor on the show).

BUSINESS BRIEFLY

Late-breaking items about broadcast business; for earlier news, see Advertisers & Agencies, page 37.

EDITORIALS GOOD FOR STATIONS, BAD FOR NETWORKS—NBC

Trend toward more editorializing by stations is good, but on network level situation is "different," Robert W. Sarnoff, NBC board chairman, told news conference Friday. Asked whether trend would develop enough for NBC to take political stand in 1960, he said political position would be ultimate in editorializing but that he could think of nothing worse for a network to do.

He pointed out that only way for any network to express its views is through its affiliates, that many affiliates might disagree with network stand, which would make for "peculiar" situation at best and which probably would mean those affiliates wouldn't carry network editorial anyway. He also raised question of what would result if all three TV networks endorsed same political candidate.

Mr. Sarnoff fielded questions over broad range of subjects in more than hour's session with some 50-75 leading newspaper radio-TV editors who were NBC's guests in New York last week.
DOUBLE TAKE

"Nobody asked us, so we didn't volunteer an explanation," said officials at Gardner Adv., St. Louis-New York, late last week. They were talking about charges by several TV critics that Gardner (for Ralston Purina) had slotted what was supposed to be summer reruns as premiere shows in new Rifleman series on NBC-TV. Gardner admitted that first Chuck Connors film had received earlier exposure on "Zane Grey Theatre," but said this was "test" of viewer reaction; apparently there were enough viewers second time to provide satisfactory rating. Gardner also said that use of this episode was necessary to set mood, theme and characterization of subsequent Rifleman plots.

Five Made VPs at NBLB

Election of five new vice presidents at Needham, Louis & Broby, Chicago, announced Friday (Oct. 24) by Maurice Needham, president. John F. Whalley, previously controller, business manager and operations director at NBC Central Div., named financial vice president, joining agency Nov. 3. Others named: Charles D. Ewart, account executive; Richard H. Needham, account executive and personnel director; George W. Oliver and Robert F. Steinboff, account executives and supervisors. Mr. Whalley, with NBC 28 years, succeeds Max D. Anwyl, resigned to enter private business.

Three Accounts on Move

New round of advertiser shifts underway Friday (Oct. 24) included Brown & Williamson Tobacco's du Maurier cigarettes to Ted Bates; Chun-Wong Inc. (frozen Chinese foods) to Compton (Los Angeles office), and Equitable Life Assurance Society of U. S. to Foote, Cone & Belding. Bates already has Viceroy and Kool, both B&W products. Du Maurier, which has used spot radio, formerly was serviced by Erwin Wasey, Ruthrauff & Ryan. Equitable, billing $2.3 million but not broadcast user, was with Kenyon & Eckhardt, moves to new agency Feb. 1, 1959. Chun-Wong had been handled by Mott & Siteman, Los Angeles.

KFMU (FM) Sold for $100,000

KFMU (FM) Los Angeles sold by Brazy Broadcasting Co. to Sherrill Corwin for $100,000. Background music service not included. Mr. Corwin's other interests: KBAY-AM-FM-TV San Francisco, KFMX (FM) and KEZY (TV) San Diego, KPAX (FM) San Bernardino, fm station in Santa Barbara and 11% of KPRO Riverside, KREO Indio, KROP Brawley and KYOR Blythe, all California. KFMU operates on 97.1 mc with 58 kw.
Not everyone listens to KBIG. And frankly, we rather enjoy this distinction. KBIG is interested in reaching only a stable, mature audience... and we do! 91% adult listeners (Pulse, Inc.) in 234 Southern California communities.

KBIG appeals to a convincible audience with the ability to buy your product.

This is an irresistible value in profitable radio coverage at 71% less cost than competitive stations!

America’s No. 1 Distributor of TV Film Programs

598 Madison Avenue • New York 22, N. Y. • Plaza 9-7500
and principal cities everywhere
We'd be the last ones to quarrel with timebuying techniques... for whether a station is selected by slide rule or rule of thumb... whether the facts come out of an electronic computer, S.R.D.S., or someone's hip pocket... they add up to the same thing. In Shreveport, KSLA-TV is the station which...

...always dominates the audience
... operates full-power with a clean, clear picture
... is a BASIC affiliate of the No. 1 Network
... promotes consistently
... programs imaginatively
... and, carries TWICE as much national spot.

No wonder the method that suits the time buyers best, suits us just fine, too. We come up with many "naturals."
AN EVENING WITH FRED ASTAIRE

Effortlessly and brilliantly, Fred Astaire demonstrated on his Oct. 17 special the difference between amateur and professional, artisan and artist, apprentice and master craftsman in the field of dance.

From the opening number, in which Mr. Astaire molded his company into varying rhythms like a sculptor, to the climax of "St. Tamara Infirmary," for which trumpeter Jonah Jones sang and played the back-ground for le maitre and his lovely shadow, Miss Barrie Chase, each number reflected the taste and precision characteristic of an Astaire production. Only the finale, "It's A Lovely Day," was a disappointment as the star attempted to prove that he could sing and dance simultaneously and failed.

In a medium where deliberate blandness is an inflexible rule, the variety and imagination of An Evening With Fred Astaire were intoxicating. The music of David Rose played no little part in the excellence of the show, particularly in his original "Man With the Blues," the number's haunting melody lovingly blending beautifully with the demi-ballet of Astaire and his company.

Somewhere in the middle of this delightful show, a question materialized: Where has the dance been? Since the days of Sid Caesar and his Show of Shows, dancers have been limited to brief spots on Ed Sullivan's vaudeville grab-bag and opening whirls on the Jackie Gleason Show. Mr. Astaire, Miss Chase, the entire troupe pointed up vividly what the viewer has been deprived of for too many years.

Production costs: Approximately $215,000. Sponsored by Chrysler Corp. through Leo Burnett Co., Chicago, on NBC-TV in color and black-and-white, Oct. 17, 9-10 p.m. EST.
Produced by Ava Productions Inc.; producer-director: Alan Yorkin; choreographer: Hermes Pan; music director: David Rose; special material: Herbert Baker.

GINGER ROGERS SHOW

The Ginger Rogers Show on CBS-TV Oct. 15 glided smoothly along in an aura of sentimentality created by the skilful blending of talents of stars Ginger Rogers and Ray Bolger, singing and dancing to nearly a dozen all-time favorite songs, with guest stars The Ritz Brothers providing their completely daffy brand of comedy.

After her opening dance number, Miss Rogers announced that this is a "fixed variety show"... fixed in the sense of serving "just entertainment." What followed was outstanding entertainment.

No talent was wasted in this imaginative hour-long variety show, telecast live from Hollywood's Television City. With Nelson Riddle's sparkling orchestrations, effective settings, excellent writing and sophisticated Pontiac commercials, Miss Rogers' show reflected her glamour throughout.

Production costs: Approximately $200,000. Sponsored by Pontiac Div. of General Motors through MacManus, Johns & Adams on CBS-TV Wednesday Oct. 15, 10-11 p.m. EST.
Producer: Bob Banner for Bob Banner Productions Inc.; directors: Mr. Banner, Julio Di Benedetto; musical director: Nelson Riddle; dance director: Nick Castle; writer: Joe Stein; art director: Robert Tyler Lee; set decorator: Buck Henshaw; associate director: Joe Hamilton; costume designer: George Whittaker; lighting director: Leard Davis; technical director: Bob Colvin.

BAT MASTERS

The West's fastest gun must have belonged to Bat Masterson. How else could he have sported those fancy duds—derby hat, gold-headed cane, etc.—and lived. That was more of an invitation to disaster than ordering sarsaparilla at the saloon.

In the series opener, Mr. Masterson, dressed to kill, comes to Tombstone to help a shy, retiring friend run a gambling joint on which the proprietor of the town's competing gambling house is putting the screws.

In what may be a tv first, alternate endings were presented. Both involved a winner-take-all card game between Mr. Masterson and the villain; one was described as the actual historical sequence.

Bat Masterson is an interesting character, ably played by Gene Barry. He is on the side of right but his non-conformist personality and rather heavy-handed methods sometimes alienate men on both sides of the fence. (Not so with women.) Plenty of opportunity for psychological overtones here.

Production costs: Approximately $42,000. Sponsored by Kraft Foods Div. and Sealtest Div. of National Dairy Products Corp., through J. Walter Thompson and N. W. Ayer & Son, respectively, on NBC-TV Wednesday 9:30-10 p.m. EST. Started Oct. 8.
Producers: Frank Pittman, Andy White; director of premiere: Walter Doniger; assistant director: Bert Glazer; director of photography: Glen MacWilliams; set designer: Robert Kinoshita; editorial supervisor: Donald Tait; film editor: James E. Smith. Filmed by Ziv Television Programs Inc.

SMALL WORLD

The first two Sunday installments of this CBS-TV series proved that patience is a virtue. The initial Small World program was merely a good try; the second was a joy to behold.

The ingredients in Small World are at once both simple and sophisticated. There is the wonderfully imaginative program concept: a four-way, short-wave and telephone conversation crossing continents and spanning thousands of miles while separate camera crews record the faces of the conversationalists at four locations.

On the first Small World edition, guests were Prime Minister Jawaharlal Nehru in New Delhi, novelist Aldous Huxley in Italy, and politician Thomas E. Dewey in Maine. The topics discussed were timely and important, but the show just didn't get off the ground. Little was said during the entire half hour which hadn't been said more

IN REVIEW CONTINUED

tellingly three dozen times before. The talk between Merton, Dewey and Huxley was sober, civilized and totally undistinguished.

Fortunately, the second offering developed the Small World possibilities more effectively. Nobel Prize philosopher Bertrand Russell in London, scientist Willard Libby of the Atomic Energy Commission in Washington and Indian atomic chief Homi J. Bhabha in Paris chatted with Edward R. Murrow on hopes and fears of the atomic age. Here, there was less restraint than on the first show and some sparks really flew. Something of a controversial subject was even broached: the world's population problem.

In sum, Small World has a future bound only by the limits of modern broadcast technology and the verve of its participants. Production costs: Approximately $27,000. Sponsored by Olin Mathieson Chemical Corp., through D'Arcy Adv. and Renault Inc., through Needham, Louis & Brophy Inc. (alternate basis first 12 weeks after which exclusively by Olin Mathieson) on CBS-TV, Sunday, 6-6:30 p.m. EST. Started Oct. 12.

Produced by Edward R. Murrow and Fred W. Friendly; moderator: Mr. Murrow; associate producer: Palmer Williams; film editors: William P. Thompson, F. Howard O'Neil, Miller Lerner.

LITTLE WOMEN

An old story and some new tunes combined Oct. 16 to provide an hour of pleasant televiewing, at least for those to whom Little Women is a fond recollection of a long-departed childhood. In adapting Louisa May Alcott's classic text for tv, Wilson Lehr selected exactly the right incidents: papa's letter from his Civil War post to his "little women" at home in New England, Marmee's dramatic departure to his hospital bedside in far-off Virginia, the ball, Meg's romance and Beth's illness (which on tv ended in recovery, not death). In his songs, Richard Adler emphasized the mood of each dramatic action without ever intruding. The song, "How Do You Write a Book?" was particularly adroit in providing an easy introduction to the various members of the March family and establishing Jo as the family historian.

The dynamic Jo, as interpreted by Jeanne Carson, dominated the telecast as she did the book. Her spirited rendition of "I'm the Man of the Family" was easily the high spot of the hour. Florence Henderson's Meg was softly romantic, especially in her solo "Does It Show?" Zina Bethune, as Amy, had her moment in the gay "Why Not?" Margaret O'Brien was sweetly serious as the over-generous Beth. Opera diva Rise Stevens proved her acting ability in the role of Marmee and displayed her vocal technique in "The Letter."

Production costs: Approximately $200,000. Sponsored by W. A. Sheaffer Pen Co. through BBDO on CBS-TV, Oct. 16, 8:30-9:30 p.m. EST.

ANN SOTHERN SHOW

Miss Sothern has done a craftsmanlike job these past years on tv and it's good to see her move ahead from Susie, the secretary, as she plays in One Man's Family, manager of a city hotel. It's good, too, to see her old colleague, the timorous Ann Tyrrell who plays Olive on the hotel's clerical staff.

In addition to the old 9:45-10 team of Sothern and Tyrrell, the new series introduces solid comic talent in the persons of Edna. Trues, abelowed innkeeper and Jack Mullaney as a bell hop-psychology student. Jacques Scott as a European desk clerk and Reta Shaw as the formidable wife of Mr. Trues also collect their laughs.

The new series probably won't offer any new starting innovations but it promises to be another good show.

Production costs: Approximately $37,500. Sponsored by General Foods Corp. through Benton & Bowles on CBS-TV Monday, 9:30-10 p.m. EST. Started Oct. 6.

MAN WITH A CAMERA

A weak punch in Friday night tv has been thrown by ABC-TV in Man With a Camera. The talk is tough and smack of the streets; its sentimentality, drivel-ish. Distinguishing this series from others suffering from Mickey Spillane-itis is the hero packing camera rather than pistol.

In Charles Bronson we have a John Garfield-type hero whose features are chiseled of rock. This is his story: He fights against evil men in all sorts of wicked enterprises. In the first film, "Second Avenue Assassin" or maybe it should have been "Man With a Mouse" (the kind that boxers wear)—freelance photographer Mike Kovac attempts to find the middleweight who is being pressured into fight fixing. Cameraman Kovac tries to help by shooting a conference attended by a sunglassed racketeet and almost gets his head blown off in a chase that follows.

Other than look the part of a fellow who ought to be a standout in a rough and tumble, city street brawl, Mr. Bronson is not asked to show talent. Neither writers nor the producer-directors were able to come up with anything imaginative or different; the plot was outrageously limp and the production passing. Camera has a long way to go if the first program is indicative or representative of the series.

Production costs: Approximately $34,000. Sponsored by General Electric (photo lamp department) through Grey Adv. Agency on ABC-TV Friday, 9-9:30 p.m. EST. Started Oct. 10.

"...And it must follow
as the night the day..."

Hamlet, Act I, Scene 3

NIGHT: As Trendex reported recently, the latest complete and non-fractionalized nighttime returns (full week of October 8-14, 7:30-10:30 pm) show NBC the leading network with an audience 6% greater than the second network and 35% greater than the third.

DAY: And now Trendex returns are in for the first week of three-network daytime competition, ending October 17. They show that in all those periods where the three networks directly compete, NBC leads the second network by 11% and the third network by 61%. They also show: in those seven periods where the third network has introduced new daytime programs for the first time, NBC has increased to 40% its share of total audience, leading the second network by 17% and the third by over 200%. (The third network's new programs lost 49% of the audience share previously built up by their affiliates locally.)

More significant than any network's competitive standing is the fact that both day and night are producing ever-increasing audiences for television. Over the last year total daytime viewing has increased 13%, surpassing even the pace of nighttime audience growth. Again, we offer our congratulations to those who have contributed to this dynamic record of growth.

With competition intensifying daily, with NBC and CBS in a neck and neck race for audience supremacy", "it must follow as the night the day" that the American people are in for the most rewarding, most satisfying season of viewing in television's history.

NBC TELEVISION NETWORK

"In the interests of the integrity of industry research and the fair use of Trendex rating data, we feel obligated to quote from a letter dated October 22, 1958 and signed by Robert B. Rogers, Executive Vice-President, Trendex, Inc.:

"In regard to the ABC-TV advertisement which appeared in 'Variety' on Wednesday, October 22nd... the inference that the figures produced during the week of October 8-14 for NBC-TV are not comparable to those produced during October 1-7 for the industry is inexcusable, and we certainly intend to bring this to the attention of ABC-TV officials."

The 1958 Yearbook

EDITOR:

Today we received our copy of the 1958 Broadcasting Yearbook. I want to compliment your organization on the tremendous improvement in the handling of this vast amount of information. There is no doubt that this is one of the most fascinating, informative and practical Yearbooks that we could ever hope to receive.

It is so clearly designed for easy readership that I virtually read it from cover to cover in a couple of hours. We are very certain it will find much use over the coming year.

Stanley G. House, President
House & Gerst in Inc.
Washington, D. C.

EDITOR:

Congratulations on the 1958 Broadcasting Yearbook. Not only does it have a smart new typographic look and format, but the additional wealth of information you've added to the normal updating of historical facts makes it even more valuable.

Gene Seehafer, Account Executive
Needham, Louis & Brorby
Chicago

Speak for Yourself

EDITOR:

First, I would like to congratulate the editors of Broadcasting for their fine editorial [Oct. 20] on the future of uhf. Not many people these days are looking beyond the scare headlines emblazoned in the average press. I am thankful that the responsible editors of your magazine have recognized the eventual need for the uhf channels in the future.

Second, I would like to take strong exception to comments concerning uhf in the Springfield-Holyoke market made [in that same issue] by William Dwight of WHYN-TV. His statement to the effect that a uhf station in that area "cannot long continue" if uhf is permitted in the Hartford area is pure hogwash. To set the record straight as a uhf operator in the Springfield-Holyoke area, I would like to say that despite the many setbacks uhf has suffered, it still is far from being dead. And I can assure you that if I felt that WWLP could not survive uhf competition from Hartford, I would not have added another station, WRIP, nor the two translator stations we operate in northwestern New England, nor would I have revised WWOR in Worcester.

That fact that Springfield Television Broadcasting Corp. will gross more than $1 million in sales for the second year in a row should be ample evidence that we have provided and can continue to provide successful competition to vhf stations in our market. When Mr. Dwight spoke about uhf, he could only have been speaking from WHYN-TV's standpoint and not from the standpoint of either the uhf industry or stations WWLP and WRIP.

William L. Patnam, President
Springfield (Mass.)
Tv Broadcasting Corp.

Anniversary Salute

EDITOR:

Congratulations and best wishes on your 28th year of publication [Oct. 15]. Of all the trade journals I have followed over more than 20 years interest in the broadcasting field, I must say that for real news, comment, pictorial presentation and direction, I have felt you to be No. 1 in the field.

Anthology Entry

EDITOR:

I am editing an anthology on mass communication and would like very much to reprint your report, "Educational Television: 5 Years and $60 Million Later" [Broadcasting, Nov. 11, 1957]. The Free Press of Chicago will publish the textbook this coming winter.

[EDITOR'S NOTE: Permission granted]
It was Boot Hill for Paladin
and Marshal Matt Dillon
the night of September 27

It takes pretty rugged programming
to drop those two fellahs in their tracks,
but that's exactly what WOOD-TV did on
the night of September 27, 1958. WOOD-
TV scheduled MGM's "Boom Town". Gable,
with able support of Tracy and Colbert,
upstaged the gunslingers but good.
WOOD-TV has glommed onto the Para-
mount, Warner Bros. and the Lion's share
of the MGM package. And to celebrate, we
ran a humdinger of a film festival on
September 27 — "Boom Town", "Road To
Morocco" and "To Have And Have Not"
from 9 P.M. until everyone just plumb
dropped in their tracks.
Coincidental checking* from 9:00 to 10:30
P.M. awarded "Boom Town" 48% of the
audience — a higher share than any other
station in the area — including the one
carrying the usually top-audience eaters.
Features from Warner Bros., MGM and
Paramount are scheduled on a daily basis
for WOOD-TV's Channel 8 Theatre (10:45
P.M. Monday thru Friday; 11:15 P.M.
Saturday and Sunday) and on Channel 8
Matinee (1:00 P.M. Monday thru Friday).
Put your spot minutes in Western Michi-
gan on the only station that has the top
features — the only station that delivers
top audience on its movies 52 weeks of
the year.
Katz will sell you a schedule right now
that will satisfy you — call them.
WOOD-TV is first — morning, noon, night,
Monday through Sunday — May '58 ARB
Grand Rapids
WOOD-AM is first — morning, noon, night,
Monday through Sunday — April '58 Pulse
Grand Rapids

* Conducted by Western Union in Grand Rapids, Kalamazoo, Battle Creek and Lansing, 9:00 to 10:30 P.M.
Result — WOOD-TV, 48% share, WXIO-TV, 41% share, WJIM-TV, 11% share.
OUR RESPECTS

to James Henry Quello

In the view of Jim Quello, it's no mere coincidence that commercial stations known for outstanding public service invariably do well at the cash register, too. He believes simply—and avidly—that "good public service is good business," a credo identified with WJR Detroit, The Goodwill Station.

Mindful of his record for active participation in industry and civic affairs, the 69-station Michigan Assn. of Broadcasters last September elected Mr. Quello president for 1959. It was another milestone in the busy career of WJR's program and public affairs manager.

The MAB presidency seems vested not only in capable but dedicated hands, judging by his track record. For the past five years, Mr. Quello has served as the association's legislative chairman, helping coordinate efforts designed to avert state government restrictions on beer and cigarette advertising in radio-tv. Mr. Quello also initiated MAB's first good will dinner for state legislators three years ago, the better to acquaint them with industry problems.

Mr. Quello's credo is well suited to WJR's operational philosophy. Colleagues and other friends credit him with a keen sense of program values, an extensive background in publicity-promotion, and a practical common sense approach to the daily problems of program management. At WJR he heads up a 52-man program and public affairs department.

His credo might be summed up this way: "Public service in its broadest terms is a many aspect thing...service to listeners and consumers) by scrupulously policing your advertising, service to your clients through conscientious and skilled counsel on the use of media, establishing a personality as a good neighbor with a highly-developed civic consciousness—supporting civic and welfare and educational campaigns, performing many vital information services every day, impartially educating the public on current social and economic problems, promoting better human relations. All this is not only worthwhile, but essential. There is no doubt that public service pays in increased community and audience acceptance, in increased listener believability, in prestige and stature..."

Likable Jim Quello practices what he preaches. He is president of the Detroit Housing Commission for the second time, member of the board of trustees of the $50 million Michigan Veterans' Trust Fund, radio-tv chairman of the United Foundation Torch Drive in Detroit; and a member of the Detroit Committee on Aging, Michigan Veterans of Foreign Wars, American Legion, Detroit Round Table, advisory council for the Mayor's Committee on Human Relations, the Detroit Tomorrow Committee, Detroit Aedraft Club, and the advisory committee for Michigan Economic Development Bureau. It's apparent, as he points out, that civic leaders active on public service projects are "invariably your business and industrial leaders, too."

These varied activities, plus a general affection for people, have won both James Henry Quello and WJR a host of business, advertising and civic friends. And the WJR concept of programming comes naturally to the man who was born in Laurium in the Upper Michigan Peninsula some 43 years ago (April 21, 1915). Jim attended Calumet High School in Calumet and got his ground experience as a newscaster at WKAR East Lansing, in the early thirties. He was graduated from MSU in 1935, majoring in journalism and education.

Entering the service in September 1940, Mr. Quello put in 32 months overseas and was decorated with the Bronze star (with cluster), Croix de Guerre, seven campaign stars and combat infantry badge and discharged with rank of lieutenant colonel in November 1945.

Mr. Quello joined WXYZ Detroit that year as publicity manager for the station and two radio series, The Green Hornet and The Lone Ranger. In July 1947 he moved to WJR as publicity and sales promotion manager and later became advertising and public relations director. He was appointed in August 1957 to his present post at WJR, headed by John F. Patt, president, and Worth H. Kramer, executive vice president and general manager.

"Good public service is definitely not only good business but, even more important, it brings thè inward satisfaction of fulfilling a worthwhile purpose in life...and the gratifying experience of being proud of your industry...of your company and the part you play in it," says Mr. Quello with a twinkle in his eye.

He married an MSU co-ed, the former Mary Elizabeth Butler; they have two children, James M., 20, and Richard, 15, and live in Gross Pointe Park. Mr. Quello's favorite sports are golf and tennis. He still competes in local tournaments. He also has become a tropical fish hobbyist ("more effective tranquilizer than pills")—in what he laughingly calls "my spare time."
This group of mountain-ringed radio stations, purchased as a unit, delivers more radio homes than any combination of competitive stations...at by far the lowest cost-per-thousand.

(Nielsen & SR&D)

Beeline stations lead in programming, too. In news programs, for example, Beeline stations lead in their individual markets with locally produced shows. Beeline radio news editors coordinate closely with McClatchy newspapers to bring listeners complete up-to-the-minute coverage.

IN PUBLIC INTEREST

HELPING HAND • WCSV Portland, Me., extended a helping hand to the local American Legion’s drum and bugle corps when it needed additional funds for a trip to the Chicago American Legion Convention. WCSV contributed its entire 78 rpm record library for sale at 10 cents per record. The $250 raised put the travel fund over the top.

EDITORIAL STAND • WTVN St. Johnsbury, Vt., recently received plaudits of local civic organizations for its strong editorial stand in favor of a highly controversial local bond issue. The station supplemented its editorials with telephone question and answer forums and interviews. The local newspaper took no stand on its editorial pages. The bond issue passed by a 7-1 ratio.

TRANSIT MONEY • WRCA-TV New York commentator Leon Pearson made a plea recently on behalf of a woman subway change booth clerk who had been robbed while on duty. She would have had to make good the loss from her own pocket. But viewer donations of $188 relieved her of her problem.

RADIO FARM • KBBE Modesto, Calif. has turned its 10 acre transmitter site into a field laboratory for Modesto Junior College. The school’s agriculture department uses the land as a pasture to supplement lessons taught in the classroom.

TWO BIT RECORDS • WDGY Minneapolis listeners are requesting their “favorite hits for just two bits.” D.J. Bill Diehl plays requests in return for contributions for the Minnesota Assn. for the Mentally Retarded.

RECORD DONATION • WPEN Philadelphia donated 5,000 record albums to United Fund recreation agencies. The agencies will use them for music appreciation classes and dances.

FILE ’58 • WWSN St. Petersburg, Fla., has allocated a daily 15-minute time segment for public service broadcasts. Mondays are devoted to the county medical society, questions concerning Social Security are answered on Tuesdays, while local attorneys are in Wednesday’s spotlight. On Thursdays, the fire and police departments share broadcast time, and a variety of community agencies including Civil Defense present their stories on Fridays. Public Service Director Day Saltman moderates the series.

GIANT THERMOMETER • WOW-TV Omaha, Neb., is using its antenna tower as a unique measuring device to indicate the success of the local United Red Feather-Red Cross Drive. Strings of lights on the tower are lighted to represent the percentage of the city’s goal that has been reached. When the drive hits the top, a total of 600 lights will be ablaze.

ICE CREAM STICKS • WASA Havre de Grace, Md., collected over 27,000 ice cream sticks for the Harford County Tuberculosis Assn. during a four week contest. The sticks are used to make baskets and other items in patient therapy.
Philadelphia...1779: Benjamin Franklin founded the nation's FIRST designated University—the University of Pennsylvania!

Philadelphia...1958: WIBG-RADIO 99 is FIRST in total rated time periods, Monday through Saturday, and LOWEST in cost per thousand, too—according to Professor PULSE (July-August, 1958)!

... Add to this leadership the believability provided by responsible Storer Radio management and you have a selling effectiveness that can't be matched in this market.

Call Joe Conway or your nearby KATZ man for the profit-making facts.

HARD LIQUOR ON THE AIR: PART II

- More stations indicate readiness to accept now-taboo accounts
- Outlook: Though bridegroom's willing, the bride's reluctant

Last week on these pages Broadcasting reported the first "crack in the dike on liquor ads" on the air. One week later, the crack is a little longer and deeper, but the dike still stands.

Putting together the week's news, this is the picture that emerges. A broadcasting industry whose heretofore almost solid front against hard liquor advertising is beginning to crumble. A distilling industry which rejects the advantages of broadcast advertising for fear of prohibitionist reprisals. A few broadcasters ready to risk the wrath of the organized drys to accept a legal category of advertising. Officials of a broadcasting association preferring the status quo to action which might upset an already precarious situation.

This is the news from these points of the compass:

- Manitowoc, Wis.—The man who started it all, Francis Kadow of WOMT, found no liquor accounts pounding at his door two weeks after announcing his station would henceforth accept liquor advertising. He did make other news, however: He resigned from the NAB after being labeled by President Hal Fellows as "selling his birthright for a $20 bill."

- Boston, Mass.—Broadcasters attending an NAB regional meeting, polled by Broadcasting, indicated 2 to 1 they sided with WOMT's stand to accept liquor advertising. Additionally, seven stations (anonymous) indicated they already accept liquor advertising.

- Boston, Mass.—WCRB Waltham-Boston disclosed that it has begun an advertising campaign for a hard liquor (Nuyen's vodka).

- Washington—The Distilled Spirits Institute, organized voice of most major domestic producers, indicated its members had no intention of exposing themselves to further governmental, clerical and lay criticism by going on the air.

- New York—One major distiller, Schenley, not a member of the DSI and therefore not subject to its code ban against radio advertising, said it had no broadcast advertising plans at present.

- Chicago—Two other majors, themselves DSI members, went on record as not in favor of radio advertising.

BROADCASTING, two out of three broadcasters approve the action of WOMT Manitowoc, Wis., which announced Oct. 13 that it would take liquor business.

A questionnaire distributed at the NAB Fall Conference luncheon in Boston last Monday (Oct. 20) showed that while 65% of northeastern broadcasters figures it's all right for another station to carry liquor accounts, only 9% of stations are selling time to liquor advertisers (seven of the 82 stations that answered this question).

Interest in the liquor advertising situation shifted to New England last week as Theodore Jones, operator of WCRB-AM-FM Waltham, Mass., Boston suburb, asked for an NAB hearing following sharp criticism by President Harold E. Fellows at the Boston NAB Fall Conference (story page 70).

What hurt Mr. Jones was Mr. Fellows' slur at broadcasters "who sell their birthright for a $20 bill."

"I subscribe to the NAB Standards of Good Radio Practice," Mr. Jones told...
LIQUOR ON THE AIR CONTINUED

Broadcasting. "If NAB believes I am doing wrong, then I would like a hearing. I've been working with the campaign, which runs 26 weeks for more than a year. Mr. Sackel told me he had received calls from other northeastern stations interested in liquor advertising. "Retailers want to know what we are doing," he added. "It took someone to break the ice. The sale of liquor is a legitimate industry. We have taken every precaution to maintain standards of good taste and to avoid sensationalism.

"I suspect you'll see a lot more liquor advertising from now on. Common sense is appearing. The distillers have finally agreed to allow women in their advertising." [Mr. Jones' last statement is probably accurate, but premature. Indications are that the prohibition of women in liquor ads will be modified in the near future.]

Mr. Jones made clear that he is a supporter of NAB and its activities. "Mr. Fellows is a fine president," he said. "He is the best president NAB ever had, but I must disagree with him on this point."

In addressing the Boston NAB conference Oct. 20, Mr. Fellows said he was concerned because the traditional policy against liquor advertising had been violated. He termed it a "moral question" and added the situation was "most regretful." He described recent efforts in Congress to enact legislation affecting broadcasting programming. (The Broadcasting survey was conducted before Mr. Fellows gave his views on the subject to the Boston delegates. For results of that survey, see opposite page.)

PACEMAKER PULLS OUT AFTER NAB CRITICISM

WOMT's Francis Kadow was not nearly so generous with NAB and Mr. Fellows. He quit. The "birthright" remark which irritated Mr. Jones in Boston last week (above) was first made in Milwaukee two weeks ago, just after word was circulated that WOMT would accept liquor advertising [Lead Story, Oct. 27]. It apparently ignited already-smoldering resentment of association inaction, and led to a letter of resignation. The text:

"Your sanctimonious and pontifical 'sale of birthrights' utterance has failed to bring into focus the reality of the business. We are charged to operate in the public service and convenience, and are permitted to secure funds needed for this by moving merchandise and service. The commodity we propose to help sell is a legal item of trade in the United States except in some absurd instances.

"Polonics is not a way of life with me, but it seems everything I call to the attention of NAB flounders in the marshes of heavy-handedness and hush-hush.

"Five years ago I asked that a study be made and action started to have AT&T upgrade the "Class C" circuits that our networks use. The frequency response is not in keeping with the technological advances that have been made since 1932 when these standards were set. It is my belief that AT&T and its associated telephone companies have to spend money to degrade their present circuits to reach "Class C" standards. This matter has also been mired in the aforementioned marshes.

"Earlier this year I asked NAB to wait on the Post Office Department and secure a postage rate on our educational transcriptions and recordings that would give us the same postage tariffs educational phonograph records and 16 mm films have. Again the answer was the same old hush hush—"Wait. We are going to have something better. But whatever you do don't write the Postmaster General and upset things." What things?

"Before I get lost in the marshes of 1771 N St. N. W. or disturb the rank, still water further, I'm resigning from the organization effective this date [Oct. 22]."

Aside from the NAB resignation angle, Mr. Kadow's broadcasting position last week was unchanged. No accounts had yet come forward in response to the news WOMT would accept liquor advertising, although distinct reaction—both pro and con—was apparent both in Manitowoc and at the station's representation office (Hal Holman) in Chicago.

WQXR'S AN OLD HAND;
WKTX WILLING, UNWANTED

In New York last week, Elliott M. Sanger Sr., executive vice president of WQXR-AM-FM, a pioneer station in spirits advertising, indicated he would take on "hard liquor" advertising at this time. However, he said, the station would continue to carry liquor advertising on grounds that "people don't get drunk on cordials." WQXR as far back as 1945 began taking paid spots from such advertisers as Cointreau Wine Shippers Corp., through the years has serviced Julius W. & Sons (importers), Schenley Distillers Corp. (Dubonnet wines), Park & Tilford (John Harvey sherries and ports), Canada Dry Corp. (Pedro Domecq wines), Popper Morson Corp. (Peter Hagen cordials). It also features spots for Hans Holterbosch In (Loewenbrau Munich beer).

However, Mr. Sanger said that while the station had no present plans to break the industry-imposed taboo, such action, if taken, "would—I think—be perfectly acceptable to our listeners." He explained that 96% of WQXR's audience is adult, "and this is our biggest sales platform."

He noted the comment made in Broadcasting last week by one agency executive who suggested that liquor ads should be slotted in the post 10:30 p.m. period. "Were we to accept liquor ads," Mr. Sanger, "I wouldn't hide the products." WKTX Atlantic Beach, Fla., is willing to be involved among districts which accept liquor advertising. It has, in fact, since going on the air in January this year, but hasn't yet had a hard liquor account.

"They just won't buy," says Robert K. Lynch, station manager, who told Broadcasting last week that "we would accept hard liquor advertising as long as it can meet the standards of good taste which we impose on any sponsor. The fact that the liquor industry itself has imposed a voluntary ban on radio seems more to the point in question."

THE MEN WITH THE MONEY PLAY IT CLOSE TO THE CHEST

The Distilled Spirits Institute, which says it represents 70% of domestic producers, last week re-affirmed its intention to maintain the voluntary prohibition of broadcast advertising which it adopted in 1935 for radio and in 1948 for tv. As reported last week, its board has voted to maintain the code ban, although it is softening on another advertising angle—probably will allow pictures of women in liquor advertising in the near future. [Note: authoritative estimates place the
total alcoholic industry advertising budget at $416 million yearly.)

Schenley, the biggest American producer not a member of DSI, maintains an independent position in regard to advertising, but is not yet ready to commit itself on radio-TV.

A top echelon spokesman was vague last week when asked when the company might take a position—the answer: "Whenever we get around to considering it."

Two other major producers, both members of DSI, aren't in any great hurry to crack certain brands, heavily on television: cigarettes and beer.

The companies, traditionally heavy print advertisers, are Hiram Walker Inc., Detroit, represented with the client.

With the client."

As principal broadcasters, we'd want immediate charge of alcoholic beverages for Petry.

Alberta Distillers Ltd. and its U. S. subsidiary, Rogers, Allen & Co. Ltd., New York, last week announced they would try to broaden the U. S. market of Canadian whiskies, but their agency, Roy S. Durstine Inc., indicated they would not use the broadcast media to do so. Durstine at one time handled a hefty portion of the Seagram account (lost last year to Warwick & Legler Inc.). The account executive on Carrington's Canadian whiskey and Beau jer (the only cordial made of Canadian whiskey)—Roy S. Durstine Jr.—said Thursday that the firm might be using broadcasting for a beer that may be introduced next year from Canada, and perhaps a line of wines bearing the Alberta imprint.

TEMPERANCE LEAGUE VOICES NEW CALL FOR LEGISLATION

In Washington, the National Temperance League, commenting on the WOMT and WCRB actions, called them "a direct challenge to the 86th Congress to enact a law to ban all forms of alcoholic beverage advertising in interstate commerce."

It was apparent that the temperance organization and its kindred spirits would seize upon the current developments as they renew perennial campaigns to push such legislation through Capital Hill. Although the broadcasters' battle lines are not yet defined, the prohibitionists' are. One of the principal defenses used by both media people and liquor advertisers in the past has been the voluntary codes which kept such advertising off the air. Hitting directly at that argument, the temperance league's statement continued:

"The decision of the two stations to carry hard liquor ads on the air completely refutes the claims that self-regulation is adequate. The sure way to protect the American home from radio and tv advertising of alcoholic beverages is for Congress to ban all such advertising from interstate commerce. The demand for such action by the next Congress will undoubtedly be greater than ever before because of the decision of stations WCRB and WOMT."

PETRY PARALLELS SPOT TV, SALES

• More for one means more for the other, study shows
• Statistical cases in point: cigarettes, beers, P&G

Hike your spot television budget and your sales go up; cut the budget and sales drop.

That's the message offered advertisers and agencies last week by the television division of Edward Petry & Co., station representation firm. The advice was documented in a study of the relationship between changes in spot tv spending and ensuing changes in sales in two fields that rely heavily on television: cigarettes and beer.

The study showed, among cigarette brands, that eight out of nine which increased their spot tv budgets in 1957 also enjoyed an increase in sales, while eight out of nine which cut back on spot television showed a decline in sales. A similar pattern was evident among beer advertisers—10 of 12 leading companies that spent more on spot tv showed sales gains; three of seven who spent less sold less (see table).

Martin L. Nieman, vice president in charge of sales for Petry-TV, said that "to the best of our knowledge, this is the first time a firm has issued a thoroughly documented report which directly relates the increase or decrease in the use of advertising medium to actual sales performance on a brand-by-brand, industry-wide basis."

The Petry study also examined budgets and sales of filter cigarettes as against those of king-sized and regular. Filters got the biggest spot tv increase—and not only gained in sales at a faster clip than the others but also outsold regulars for the first time. The filters' spot tv appropriation in 1957 was 41% ahead of that for 1956, and filter sales also went ahead by 41% while sales of king-sized and regulars dropped back.

The presentation cited Anheuser-Busch and Falstaff as two "outstanding" beer success stories for spot tv in 1957:

• Anheuser switched from network to spot tv in late 1956, made spot television its No. 1 medium in 1957 by almost doubling its spot budget, showed a sales increase of 250,493 barrels and regained No. 1 position in the brewing field.
• Falstaff has been a heavy spot tv user since 1953, using more and more each year and, in 1957, almost doubling its spot allocation by giving it 41% of the overall company appropriation in measured media: from sixth place in the field in 1954, Falstaff rose to fourth in 1955 and 1956, to third in 1957. In addition, Falstaff's sales increase of 430,000 barrels was the largest among brewers last year.

The study also cited Procter & Gamble—"best managed company in the U. S."—as a disciple of spot television: its spot allocation was up from $17,522,450 in 1956 to $25,926,840 in 1957, a gain of 48% (more than four times the rate of increase for any other measured medium used by P & G), and its sales rose by $118,099,352 to a total of $1,156,389,726.

Petry officials said their study "was conceived and prepared as a service to the advertising industry in general," and that

**TvB Wields Statistics In Auto Budget Battle**

A new weapon was launched last week by tv forces in the continuing battle over auto makers’ media allocations.

The Television Bureau of Advertising has issued to members a new “actual graph” in the form of a “calculating wheel,” or as TvB terms it, a “Power Steering” wheel. Purpose of this graph: to convince dealers and manufacturers why television is basic to their purposes.

To support its position, TvB uses sources including A. C. Nielsen statistics showing percentage of new and used car homes viewing tv by half-hour segments each evening of the week, an NBC-TV study this year of auto dealers and shoppers of seven car makes representing 80% of new car sales; studies by NBC-TV and ABC-TV on auto dealers made in 1956; a CBS-TV study of dealers made in 1954 and a special TvB study of auto shoppers in 26 states made two years ago.

The marshalling of this material by TvB follows closely the bureau’s dissemination of an auto success story kit [Lead Story, Oct. 13] and its research report on the Bob Hope Buick Show released at the peak of newspaper resistance to the Buick-Mann-Erickson pro-tv approach in advertising for its 1959 models [Advertisers & Agencies, Oct. 6].

Along with the “Power Steering” wheel calculator, TvB issued a composite table which incorporates some specific information taken from the various auto dealer studies. The table sets forth in summary what the dealers thought manufacturers should do in increasing or decreasing their various media budgets. The table:

<table>
<thead>
<tr>
<th>Media</th>
<th>Increase</th>
<th>Decrease</th>
<th>Income</th>
</tr>
</thead>
<tbody>
<tr>
<td>Television</td>
<td>51%</td>
<td>5%</td>
<td>+46%</td>
</tr>
<tr>
<td>Magazines</td>
<td>10%</td>
<td>24%</td>
<td>-14%</td>
</tr>
<tr>
<td>Newspapers</td>
<td>29%</td>
<td>15%</td>
<td>+24%</td>
</tr>
</tbody>
</table>

The calculator, prepared by the TvB sales promotion department, gives answers for three groups, dealers, car shoppers and the general public, on advertising impact and effectiveness of major media. On the reverse side of the wheel, a chart shows actual percentages of new and used car homes viewing tv via evening half hours.

**Ad Budgets Up in Slump: Head**

The nation’s leading manufacturers, during the 1957-58 recession, tended to increase their advertising budgets, according to George W. Head, chairman of the Council on Advertising Clubs, Advertising Federation of America. This point was the subject of “Repros”—a new AFA club monthly newsletter which Mr. Head will edit and publish. Citing a 9¼% increase in advertising expenditures of the nation’s top 100 advertisers during the first nine months of 1958 over the preceding year, Mr. Head reported, “the country’s largest, most successful concerns, know that advertising is a sales tool. It is deadly logic to operate a business on the premise that ‘when business is good, there is no need for extra stimulus through advertising, and when business is bad, we can’t spare the dollars for advertising.’”
23-YEAR MAN BECOMES PRESIDENT AT Y&R

George H. Gribbin joined Young & Rubicam, New York, 23 years ago as a copywriter.

Last week he was elected president of the agency, one of the leading advertising agencies in the U. S. and in the top bracket in broadcast billings.

Mr. Gribbin spent most of his years at Y & R with copy but in 1951 he was elected a vice president and placed in charge of radio-tv commercials. Three years later he became copy director with responsibility over both print and radio-tv copy and in 1956 was appointed a senior vice president.

In the Y & R shift, Sigurd S. Larmorn, who has been the agency's president and chairman of the board since 1943, continues as chairman and also becomes chief executive officer. Louis N. Brockway, Y&R executive vice president, moves to a new post of chairman of the executive committee.

Appointment of three new executive vice presidents at Y&R were announced by Messrs. Larmorn and Gribbin. They are Frank Fagan, with the agency since 1934, a vice president and contact supervisor since 1943 and a senior vice president since 1953; Harry Harding, with Y&R since 1943, vice president in charge of contact since 1951 and a senior vice president in 1953, and Harry Enders, associated with the agency since 1936, secretary and treasurer of the company and elected a vice president in 1955.

Mr. Brockway joined Y & R in 1930 as a contact man, was made vice president in 1939, executive vice president in 1943.

BUSINESS BRIEFLY

GAMES ON RADIO • Milton Bradley Games, Springfield, Mass., is scheduling its first major Christmas push in broadcast media. Through Charles W. Hoyt Co., N. Y., Bradley is planning four-week saturation (20 announcements per week) spot radio push in 30 markets starting Nov. 17.

MORE GAMES • Pre Santa spot tv campaign planned by Selchow & Righter Co. (games, novelties and puzzles), N. Y., for few of its games in about 10 markets, beginning just before Thanksgiving and continuing to Christmas.

SUNLIGHT SALES • New and additional daytime business of $2.3 million gross was announced last week by NBC-TV, which reported sell-out of Monday through Friday, 10:30 a.m.-1 p.m. block of programs. Additional business was received from Procter & Gamble Co., Lever Bros. Co. and Whitehall Labs, and new business from Pharmaceuticals Inc., all of whom bought segments on various daytime shows.

OPERA SEASON • Texas Co. (Texaco), N. Y., will sponsor 20 matinee performances of Metropolitan Opera this season on CBS Radio (Saturdays, starting Nov. 29 at 2 p.m. EST), marking Texaco's 19th straight year of opera sponsorship on radio. This year performances will be on CBS Radio for first time (formerly was on ABC Radio). In Canada, performances will be carried by the Canadian Broadcasting Corp. under sponsorship of McColl-Frontenac Oil Co. Ltd. Cunningham & Walsh, N. Y., is Texaco's agency.

DAY'S WORK • Three orders totaling $800,000 gross for participations on NBC-TV's Today (Mon.-Fri. 7-9 a.m.) and The Jack Paar Show (Mon.-Fri. 11:15 p.m.-1 a.m.) were announced last week by network. Alberto-Culver Co. (hair preparations), Chicago, through Geoffrey Wade Adv., Chicago, has bought 93 participations on Today during the first half of 1959 and 93 participations on Jack Paar. G. & C. Merriam Co. (Webster's Dictionary), Springfield, Mass., through Anderson & Cairns, New York, four participations on Today, during the last quarter of this year and Block Drug Co. (Nycol), Jersey City, through Sullivan, Stauffer, Colwell & Bayles, New York, seven participations on Today during the final quarter of this year.

MIND OVER NETWORK • Aluminum Co. of America, currently sponsoring Alcoa Theatre (NBC-TV Mon. 9:30-10 p.m.) is negotiating with ABC-TV for film series of psychological dramas for programming in Tuesday 10-10:30 p.m. time period on approximately 100 stations. Alcoa has tentatively reserved time period, starting date undetermined. Fuller & Smith & Ross, N. Y., is agency.

TOYS ON TV • Fun Bilt Toys has launched "token" pre-Christmas tv campaign, using participations on children's programs in 10 markets to advertise juvenile photographic outfit called Foto Fun Kit, color-on-color-off book whose pages can be colored, wiped off and recolored, and other juvenile playthings. "We are using live tv demonstrations to sell these toys," Frank Moreland, partner in Killingsworth-Morland, L. A., agency for Fun Bilt, said. The pre-Christmas campaign is forerunner for much more extensive campaign for 1959, he stated, pointing out that Fun Bilt is new company which has been in business only since August.

ORGANIZING • Radio-tv will "no doubt" figure in new advertising campaign for Organ Corp. of America being readied by its new agency, Wexton Adv., N. Y. agency official declared last week. But Wexton declined to specify whether broadcast would involve spot or network participations on behalf of client's new electric concert choral organ.

ELECTION PURCHASE • A-S-R Products Corp., (Gem razors and blades) New York, and Bayuk Cigars (Phillies) Philadelphia, will co-sponsor election night results over entire NBC-TV network. A-S-R will introduce new Gem push-button razor appropriately termed "The People's Choice." Kenyon & Eckhardt, N. Y., is agency for A-S-R; Feigenson-Werman, Philadelphia, is Bayuk agency.

CHRYSLER LOVES PARADES • Chrysler Corp., through Leo Burnett Co., will sponsor for fifth consecutive year ABC-TV's coverage of 32nd annual "J. L. Hudson Thanksgiving Day Parade," from Detroit, November 27, 10:15-11 a.m. Program will originate with WXYZ-TV Detroit.

ELECTRONICS ON SPOT • Shure Bros. Inc. (microphones, electronic components), Evanston, Ill., has launched short-term spot announcement campaigns on fm stations coincident with high fidelity expositions in each of six major cities to introduce new professional stereo dynetic phonograph cartridge. Two-week drive covers New York (two stations), Philadelphia, Boston, Los Angeles and San Francisco (one station each) is extension of campaign on four stations in Chicago during recent high fidelity show. One minute spots on fm are timed before, during and after local hi-fi expositions. Schedule varies from 14 to 30 fm spots per week in cities and is understood to represent expenditure of "several thousand dollars." Agency for Shure is William Hart Adler, Chicago.

TIMELY DRIVE • Four-week series of participations on three network programs has been purchased by Elgin National Watch Co. through J. Walter Thompson Co. Pre-Christmas campaign will run Nov. 25 through Dec. 20 on NBC-TV's Perry Como Show and Wagon Train; and ABC-TV's alternating Cheyenne and Sugarfoot.
Tv networks know well: where there's smoke, there's money

Of the 15 top brand advertisers in network tv last August, six were cigarettes. Winston, Salem, L&M filter tip, Viceroy, Herbert Tareyton and Kent made up the strength of tobacco brands spending the most on network tv in one month.

As usual, automobiles were heavy contributors to network tv, four cars figuring in the top 15: Chevrolet, Ford, Dodge and Mercury. Aside from cigarettes and autos, only five brands were left—two headache remedies (Anacin and Bufferin), a camera (Eastman Kodak) and two deterrents (Tide and Cheer).

The highest gross billing company remained Procter & Gamble ($2 million more in August than its nearest contender, Colgate-Palmolive).

Lever Bros., General Foods and American Home Products completed the first five.

The advertiser breakdown in network tv billing is provided by Television Bureau of Advertising based on reports by Leading National Advertisers and Broadcast Advertising.

**TOP 15 By Company**

**AUGUST 1958**

1. PROCTER & GAMBLE $4,176,016

13. BUFFERIN 371,115
14. MECUNY PASSENGER CARS 365,490
15. EASTMAN KODAK CAMERAS 355,938

The company will use up to 120 markets in cold weather, with each spot effort purchased on a one-week basis.

Filmed commercials for Medigum have been shipped to the first and second choice stations for future use. When cold incidence reaches a predetermined level in a market, the agency will advise the station representative that Medigum has a certain number of dollars for a one-week campaign. If the first station cannot deliver the spots, the second outlet will be notified.

When the cold incidence returns to a level which does not call for advertising support, orders will not be placed for the following week.

**LNA-BAR: Gross Time Costs Only**

The company now knows well: where there's smoke, there's money.

Matthews, Carpenter Form Agency

Tom Matthews, formerly with WSNR Norfolk, Va., and William M. Carpenter, vice president, Community Club Services Inc., New York, have formed an advertising agency as a subsidiary of CCS. Mr. Matthews is president of the Matthews & Carpenter. Other staffers include Joseph B. Matthews and John C. Gilmore.

in Chicago
Council Recession Push Outstanding, Ebel Says

The Advertising Council "Confidence in a Growing America" campaign to fight recession psychology and restore public confidence in the national economy has been one of the Council's most successful efforts, Edward W. Ebel, chairman of the Radio & Television Committee, reported last Monday (Oct. 27) at one of the last with $20 million pledged in time and space.

Speaking at a luncheon given by the council in Hollywood, Mr. Ebel, who is vice president in charge of advertising services for General Foods, reported that from April through July radio and tv delivered over a billion home impressions to the campaign with more than 350 million broadcast on network commercial programs alone. At the local level, over 500 tv and 2,500 radio stations have broadcast a average of 50 messages each, he said. The printed media have also helped and over 300,000 of the booklets, "Your Future in a Growing America," offered in all the messages, have been distributed.

Robert M. Gray, advertising manager, Esso Standard Oil Co., was volunteer coordinator for the campaign; McCann-Erickson was the volunteer agency, with Grey Adv. Agency volunteer agency for a special trade-paper campaign and Communications Counselors volunteer public relations agency.

Describing the campaign as "one of the Council's greatest challenges," Mr. Ebel pointed out that it began at a time when most economists believed that the "slump was getting slumpier" and that it probably would be worse than the recessions of 1948-49 and 1953-54. By pointing to the growing population and the concomitant need for more food, homes, autos, schools and almost everything else, as well as increased job opportunities, the council messages turned the tide. By the end of August, most economists agreed that the backbone of the depression was broken and credited the Advertising Council campaign with doing the breaking.

Dr. Frank Sparks, president of the Council for Financial Aid to Education, thanked the Advertising Council and its advertising agency and media supporters for the aid to higher education campaign, which he said had been largely responsible for increasing contributions to American schools and colleges from a little over $600 million a year to a little under $1 billion a year in only two years time. Gordon C. Kinney, council director of radio-television, reported briefly on its current campaigns. Waldo Bunker, Young & Rubicam vice president in Hollywood, chairman of the Hollywood Radio-TV Committee, was chairman.

The annual report of the Ad Council, distributed at the luncheon, states that in 1957 sponsored network radio programs delivered more than two billion home impressions donated to 18 major campaigns and 52 other causes, an increase of 57% over 1956. In the first half of 1958, "regular weekly radio support was contributed to 13 major campaigns and 29 other projects," the report continues. The 1958 support so far amounts to more than half a billion home impressions.

In tv, "circulation contributed by network advertisers alone in 1957 jumped 50% over the previous year's total, from 10 billion tv home impressions to over 15 billion. Results for the first half of 1958—9.5 billion home impressions—indicate that this is a continuing trend," the report notes, adding that in addition to the messages on sponsored shows, the tv networks and stations provided time and talent to many council campaigns. The Hollywood committee, for its part, "helped get steady increases in support from filmed programs."

The report also points out the efforts of NAB "to broaden local station cooperation in every community" and the cooperation of the Screen Actors Guild in "helping to make possible increasingly effective and dramatic film material for television." More and more stations, both radio and tv, are using the council campaign kits in their programming.

Reppier Sums Up 13-Year Drive In Report at Safety Conference

About $130 million worth of free advertising time and space, including an aggregate of 14 billion radio-tv home impressions, have been contributed to traffic safety campaigns the past 13 years. And advertisers donated about $20 million worth of free time and space to the recent anti-recession campaign.

These were some of the figures recounted by Theodore S. Reppier, president of the Advertising Council, in a banquet address before the 46th National Safety Council in Chicago's Conrad Hilton Hotel Wednesday evening (Oct. 22).

Mr. Reppier pointed out that when the Advertising Council launched its "Confidence in a growing America" drive last April, employment and industrial production were off and "almost everybody agreed the slump would be longer and deeper than any recent ones." Over a period of four months, an estimated $20 million was contributed by advertisers for "a peacetime record." The campaign hit its peak around June 15, Mr. Reppier recalled, and "the first cracks in the recession appeared soon thereafter."

While certain evidence was not conclusive, he added, "many economists and the Secretary of the Treasury feel this campaign helped shorten the recession." If it did, we have made a discovery perhaps equal in importance to a cure for tuberculosis, in terms of sparing human misery." The Advertising Council's 15 annual campaigns prove advertising "has the power to change habits," he commented.

Thirteen years of traffic safety campaigns have produced through advertising (1) over 62,000 full pages of newspaper space; (2) 250,000 outdoor posters; (3) nearly a million car cards; (4) 426 pages of consumer magazine advertising, and (5) the 14 billion radio-tv home impressions.

"This is more than 3,000 times the circulation obtained by a full season's run of the Ed Sullivan Show," Mr. Reppier observed.

Radio-Tv in 1959 Again Slated For 60-65% of Marlboro Budget

Marlboro cigarette advertising in 1959 will be slightly higher than the $5 million now spent yearly on this Philip Morris Inc. filter brand, but the 60-65% proportion spent in the broadcast media will remain the same. This was the information given by Thomas S. Christensen, Marlboro brand manager, in Washington last week.

Marlboro, Mr. Christensen stated, has been finding that professional sports on tv are growing year by year in popularity. It
They’re All Listening to AP News

Look at the bar graph (above). It represents the Trendex ratings for the first week of the new TV season. The bar graph for share-of-audience tells just about the same story: ABC up from 23.4 to 31.7 — an increase of 35%, as compared to an increase of only 6% for CBS and a drop of 13% for NBC.

No matter how you break it down, ABC-TV's early-season gains have been resounding. The season, of course, has just started. But even at this stage, it is rewarding to witness the mounting competitive strength of

**ABC TELEVISION**
intends, he said, to maintain its television sponsorship of professional sports all year round. Marlboro is now sponsoring professional football on eight regional TV networks, and just finished sponsoring CBS' baseball Game of the Week. Other sponsored sports will include hockey in season, Mr. Christensen said.

Marlboro is also a participating sponsor on NBC-TV's Jack Paar Show and CBS-TV's To Tell the Truth. It uses selected film series on a national spot basis.

Owen B. Smith, vice president of the Leo Burnett Co., Chicago, told the Washington Advertising Club about "The Marlboro Story" last week in Washington, D. C.

He illustrated his talk, which emphasized the origination of the flip-top box and the tattooed, virile type of advertising, with films of TV commercials and recordings of radio announcements. Mr. Smith's speech was opened with a "call for Philip Morris" by the radio-famous "Johnny," making a personal appearance.

Lorillard Credits TV for Gains

"Fantastic" increases in both third quarter and first nine-month sales and income for 1958 were reported last week by P. Lorillard Co., New York, attributing most of the gain to consumer acceptance of Kent cigarettes and the TV promotion behind them. For the third quarter of 1958, Lorillard reports $132,024,998 sales (as against 1957 third-quarter sales of $86,259,476) and income of $7,478,350 (as against $3,076,028 in 1957). First nine-month report for 1958 (ending Sept. 30) reports net sales of $333,292,387 as against $190,901,125 for the first nine months of 1957; income for this period in 1958 as against a similar 1957 period was $19,303,199 vs. $5,797,520.

Lorillard agency is Lennen & Newell Inc., New York.

Benrus Moves From L&N to Grey

The Benrus Watch Co., New York, announced last week it has appointed Grey Adv., New York, as its new agency, effective Nov. 1. The account has been handled for the past two years by Lennen & Newell, New York. Benrus had been billing about $2 million but it is reported that this year's figure is "well below" that amount. The watch firm has been a fairly active spot-radio TV advertiser in the past but Grey has not as yet announced media plans for the account.

FC&B Moves Tully to New York As Phase Two in Eastward Shift

Foote, Cone & Belding has taken another step in its gradual move toward a New York centralized operation geared to the East Coast.

Richard W. Tully is the second top-level executive to move from Chicago to New York in the past year.

Mr. Tully, vice president and general manager of the agency's Chicago office, has been named to a newly-created post of chairman, national operations committee. As of Jan. 1, he will be coordinating operations of the agency's seven U. S. offices. He becomes also a senior vice president and has been elected to the board. [AT DEADLINE, Oct. 20.]

Last May, John B. Simpson, vice president and director of broadcast at FC&B and located in the Chicago office, was moved to New York to become national director of broadcast, a new post. At the time, agency executives found in the Simpson cross-country move a shift in the agency toward a more national or "New York" flavor in broadcast activity (Mr. Simpson now controls the agency's radio-TV activity).

Also in FC&B's New York pattern: election of Rolland W. Taylor in the summer of 1957 as president, retaining his headquarters at FC&B's Park Ave. office.

BBDO, Eight Branch Offices
Now On Teletypewriter Hookup

Let's put it on the teletypewriter and see how it reads back has a special meaning now at BBDO.

The advertising agency's huge headquarters on Madison Ave. (at 383) in New York has been linked with eight of its branch offices located throughout the U.S. via a private teletypewriter system which the agency believes to be the first of its kind in the advertising field.

Of particular interest to the broadcast media: up-to-the-minute information on advertising media availabilities can be transmitted with speed. Included also are data on changes in advertising copy and administration.

The system was designed and provided by the Long Lines Dept. of AT&T. Though the control center is at BBDO, New York, any "outlying station" can send to any other and need not be relayed through New York.

Increasing TV-Radio Complexity
Inspires New Department at K&E

Television's growth as an advertiser's vehicle is the reason behind Kenyon & Eckhardt's formation of a separate unit to be known as the TV-radio cost and forwarding department.

Gordon White, K&E's TV-radio business manager, last week was named to head this new department. In this capacity, Mr. White will handle the buying of TV commercial production and programming including various administrative details of putting together shows.

Under the new setup, James Bealle, K&E vice president and director of radio-TV programming, and John Murphy, vice president in charge of commercial production, will be relieved of administrative problems of cost control, forwarding, preparation and policing of contracts, legal problems, union coordination and general management functions.

K&E management decided upon the new department to permit the TV-radio and commercial production departments to concentrate on creative and professional work, to accommodate increasing TV needs and to permit growth of the medium within the agency.

ACTIVITY

HOW PEOPLE SPEND THEIR TIME

NOTE: The Sindlinger interviewing week runs Saturday through Friday, with questions on the basis of "yesterday." Thus, the "Activity" week is Friday through Thursday.

There were 125,766,000 people in the U. S. over 12 years of age during the week Oct. 10-Oct. 16. This is how they spent their time:

<table>
<thead>
<tr>
<th>Activity</th>

**UA SIGNALS AGGRESSIVE TV DRIVE**

United Artists Corp., already a name to be reckoned with in television, last week took major expansion steps. It made final the acquisition of Associated Artists Productions Corp., a major distributor of feature films for tv, and announced that UA-TV has concluded arrangements for its fifth television series.

As working control of AAP passed officially to United Artists Associated Inc., a UA subsidiary, UA executives said no immediate changes were expected in operation or in personnel. Eliot Hyman, president of AAP, retains that post with UA, while Robert S. Benjamin, who is chairman of UA Corp., assumes the same capacity in UA.

According to UA, approximately 98% of outstanding shares of AAP sought by UA were tendered. UA is a multi-faceted entertainment enterprise, principally a financing-distribution organization, its major property being its current and projected pictures. In the past two years, UA has entered tv film production and financing, sale of feature film to tv, phonograph recording, music publishing and motion picture theatre management-ownership.

The fifth UA series that will be produced without benefit of pilot is "Hudson's Bay," a "northwestern" starring Barry Nelson and the second UA production under the Northstar Pictures Ltd. banner. The latter organization—comprised of talent agent John Gibbs and producers Richard Steenberg and Michael Sadlier—earlier commenced production of "The Troubleshooters" starring Keenan Wynn. Shooting is set to begin next month on location, though some secondary unit material already has been shot.

UA-TV also is engaged in "other activities" in the Far East, but principals declined to comment on these, preferring to wait another day before announcing details of this newest project.

The other three "firm-39" video film series which will bear the UA-TV stamp are Cypress Production's "Dennis O'Keefe Show," the first print of which should be ready this week; Hi-Brown's "International Airport," which should have its first film completed by Dec. 15, and Bryna Productions' "The Vikings," which will go before the cameras in Munich Jan. 12, and which won't be made available to tv until next season so as to compete with UA's theatrical film version of Kirk Douglas' "V" property. Filmmaker Markle's "The Young in Heart" (Aries Productions) is the only one which is now being shown to advertisers on the basis of one completed pilot film.

UA-TV is committed to some $10 million in time, production and pre-production costs with these six properties. To date it has not snared a sale, but UA-TV President Herb Golden maintains that UA-TV won't begin "hard-selling" its product until later this fall, "when we've got something to show the agencies." Nonetheless, it's been holding informal discussions with several shops, "just to keep them apprised of what we're now doing and what we hope to do."

Mr. Golden and Executive Vice President Bruce Eells claim that while "Vikings" hasn't even gone before the cameras, it's already got an interested advertiser, but UA says it may not be interested in this offer. New York-based UA-TV won't identify the advertiser, however, it has been described as "an out-of-town cosmetics house." The reason for UA-TV's reluctance: the advertiser wants "Vikings" in 45 markets on a spot basis, and though 30 of these are the top U. S. market areas, UA-TV apparently would rather wait for a network buyer.

And, that is why UA-TV would have its first advertiser-client signed before the end of the year; he also thought that UA-TV could hope to get "at least" three network deals out of its lineup of six properties. The reason for shooting a full complement of 39 installments, he said, is obvious: should UA-TV fail to get a network buy, it could immediately toss a property into syndication.

Mr. Eells disclosed that the company expects to set up a new syndication arm around March 1959 to handle sales of these properties; this organization would operate independently from UA-TV's already-existing syndication office, which now busies itself with the sale of theatrical feature film to tv. Reason for this two-fold operation: the latter group, headed by sales manager John Leo, deals principally with stations; the planned set-up, Mr. Eells explained, would operate in the realm of advertisers and agencies, thus would be staffed by specialists familiar with agency and network operations.

In all of its video film commitments, UA-TV acts as the banker-distributor. It will provide working capital to independent producers. UA-TV has distribution and ownership rights in perpetuity, and after the initial investment has been made up, the individual producer then participates in about 50% of the profits. Any dealings with advertisers and agencies rest with UA-TV, and the producer may not veto any advertiser arrangements.

At the closing Oct. 20 of the UA acquisition, funds were turned over to the depository banks for payment to AAP stockholders of $11 plus 6% from July 1, 1958, for each share held and pro-rata amounts for AAP debentures and stock option warrants. UA said this involved payment to security-holders of more than $23 million. When the assumption of liabilities and prior payments made in connection with the purchase are added, the total involved in the purchase was an amount "substantially in excess of $30 million."

Principal assets acquired: the Warner Bros. pre-1950 film library (about 800 sound and 200 silent pictures); 60 "Looney Tunes" cartoons, 277 "Merrie Melodies" cartoons, about 1,400 short subjects, 234 "Popeye" cartoons and many other features.

**KOP (TV) Owners Join Producer To Syndicate Tv Adventure Show**

The owners of KOP (TV) Los Angeles and Jack Douglas, producer-narrator of the adventure-travel tv series, Seven League Boots, currently on KOP, have formed Seven League Enterprises Inc. to put the programs into national syndication, Kenyon Brown, KOP president, announced. Principals in the new firm, in addition to Mr. Brown and Mr. Douglas, are Bing Crosby, George L. Coleman and Joseph A. Thomas, co-owners of KOP with Mr. Brown.

On KOP, Mr. Douglas provides live narration for the true adventure films which are made in Eastman color throughout the world by his own cameramen. Plans call for Mr. Douglas to begin immediately putting his live narrations for 52 programs on film, in preparation for syndication of the series early next year. "We know that in Douglas we have the outstanding producer of documentary films and we feel certain that in Seven League Boots we have acquired the best of Douglas' national creations in this type of programming," Mr. Brown commented. He stressed that even though the owners of KOP are interested in Seven League Enterprises, this is a separate company in which the Los Angeles station is not involved.

**New Paramount Sales by MCA-TV**

MCA-TV Film Syndication Div. last week announced the sale of its paramount library of 700 features in three new markets, raising the number of outlets which have contracted for the films to 22. It is estimated that MCA-TV, which has grossed $40 million on sales of the library which was purchased last April from Paramount Pictures for $50 million. The latest stations to sign for the library are WBJK-TV Detroit, WTLV-TOLV and WBAL-TV Baltimore.

**WHAT UA GOT**

The Allied Artists Productions annual report for the fiscal year ended June 28, 1958, shows an after-tax loss of $1,189,688, an improvement over the preceding year's $1,783,910 loss after taxes. Total gross income amounted to $15,977,000 compared with $16,138,000 the year before. The company's current assets in investing assets are reported to exceed current liabilities by $2,580,000 as of June 28. Though the final tally is not yet available for this fiscal year's first quarter, AAP President S. Brodsky stated that preliminary figures show a profit.

**BROADCASTING**

Official Films Board Re-elected

Official Films, New York, has announced that its board of directors was unanimously re-elected at its Oct. annual stockholders meeting. Re-elected: Harold L. Hackett, chairman; Seymour Reed, Lee Moselle, Robert D. Bernheim, Stanley Mitchell, William A. Cruikshank Jr., Leonard O. Fischer, Louis Levinson and Walter J. Smith. Official also announced promotions of
DID SUPREME COURT PULL BONER IN REMANDING DEINTERMIXTURES?

- Springfield ch. 2, Peoria ch. 8 go back to lower court
- Conjecture raised on like action in other influence cases

The U. S. Supreme Court has opened wide the gates to a flood of reconsiderations of television channel shifts made by the FCC in the last few years.

The Supreme Court is in what is considered an unprecedented—and in many minds an incomprehensible—action last week sent back to the appeals court two rule-making cases involving purported wire-pulling.

The high court returned to the U. S. Court of Appeals in Washington the Springfield, Ill., ch. 2 and the Peoria, Ill., ch. 8 deintermixture cases. It vacated the appeals court orders affirming the Commission’s 1957 orders moving ch. 2 from Springfield to St. Louis (where it is now held by KTVI [TV] that city) and ch. 8 from Peoria to Rockford (WFLA-Davenport, Iowa). It told the lower court to take “appropriate” action in the light of allegations of improper influences made before the House Legislative Oversight Committee last spring.

If the appeals court follows the procedure it has already established in two ex parte cases (Miami, ch. 10 and Boston ch. 5), it will return the deintermixture cases to the FCC for an investigation.

Last week’s action underlines, it is stressed by Washington lawyers in the communications field, that the FCC and the courts will be remanding both comparative and rule-making cases tainted by charges of behind the scenes lobbying. The Commission only last week announced that on its own motion it was reopening the Orlando, Fla., ch. 9 comparative case.

The Supreme Court vote was 7 to 2. Justices Tom Clark and John M. Harlan dissented and they said the allegations for review should be denied and that the allegations could be handled by the appeals court in its consideration of other elements of the same two cases.

While a stunned FCC and parties to both cases wrestled with the implications of the Supreme Court’s order, the Court of Appeals in Washington moved more swiftly.

On Wednesday of last week Circuit Court Clerk Joseph W. Stewart wrote to all counsel representing clients in the Evansville ch. 9 case asking if there were any allegations of improprieties in the pending matter similar to the circumstances in the Springfield and Peoria cases referred to in the Supreme Court’s order last Monday.

The Evansville case involves the FCC’s 1957 order moving ch. 9 from Hatfield, Ind., to Evansville and making it an educational station, and moving ch. 7 out of Evansville. The Evansville WTV5 (TV) operates on ch. 7 in Evansville. There are two applicants for Hatfield’s ch. 9—WOMI and WTVS, both Owensboro, Ky.

FCC lawyers were frankly nonplussed at the implications of the Supreme Court’s action. Just what the Commission’s attitude would be was not decided at week’s end.

Only one party—WEEK-TV Peoria—was “seriously considering” asking the Supreme Court to reconsider its ruling, its attorney, Jack P. Blume, announced last week. Other reactions varied from “watchful waiting” on the part of WICS (TV) Springfield, Ill., according to James A. McKenna Jr., attorney for that station and for American Broadcasting-Paramount Theatres Inc., “It’s too soon to make up our minds,” voiced by other attorneys.

The parties have 25 days to ask the Supreme Court for reconsideration.

Washington communications lawyers were outspoken, but requested anonymity. The consensus ran this way:

* The Supreme Court goofed. The allegations of improper representations were made after the cases were decided by the appeals court. They were not part of the matters before the high court. There would have been no knowledge of them except that J. Lee Rankin, Solicitor General of the United States, speaking for the Justice Dept., and the FCC, brought the matter to the attention of the court. Even so, Mr. Rankin emphasized that the appeals court still had jurisdiction over the questions of impropriety since a second part of the Springfield ch. 2 case is still pending before it.

* The Supreme Court goofed. There was no reference to purported irregularities in the Peoria ch. 8 case by the Solicitor General, yet the Supreme Court remanded this case on the basis of Mr. Rankin’s comments in the Springfield case.

In its petition for review, WRLV-TV Peoria alleged that Sen. Robert S. Kerr (D-Okl.) intervened to persuade the FCC to move ch. 8 out of Peoria. Sen. Kerr is one of the owners of uhf ch. 43 WEEK-TV Peoria. The Supreme Court, however, made no reference to these charges.

* The Supreme Court goofed. The FCC has two functions, judicial and legislative. There is a major distinction between talking to commissioners in an adjudicatory proceeding and a rule-making proceeding. Deintermixture proceedings are rule-making functions. There is no question of the impropriety of talking to a commissioner in a comparative hearing. But it has been an accepted fact that this ethical prohibition did not extend to rule-making matters. No one has ever questioned the propriety of this. In fact, in the legislative-type of proceeding the Commission must have the benefit of all ideas and thinking—from everyone, whether parties to the proceeding or not.

One lawyer flatly stated last week that the Supreme Court’s ruling has blanketed conversations with commissioners in rule-making cases with an “air of false impropriety.” Another predicted that from hence-

October 27, 1958 • Page 55
Local in management...

The Corinthian stations are first and foremost local in character... for great stations must be responsive to the needs and tastes of their individual communities.

Each Corinthian station has its own independent local management team... experienced men at the helm and in the key operating areas of programming, sales, engineering and promotion. The strength of each of the Corinthian stations attests to the abilities of these men and the role they play in Tulsa, Houston, Fort Wayne and Indianapolis.
Interrelated in service

The Corinthian stations have *more* than this. They benefit from each other’s experience. And have at their disposal the full-time staff services of specialists in the basic areas of broadcasting...each outstandingly qualified in his field...Corinthian’s Director of Programming, Robert H. Salk; Director of Sales, Don L. Kearney; Director of Engineering, George G. Jacobs; Director of Research, Charles H. Smith; and Director of Promotion & Advertising, Robert J. Sullivan. These men provide facts, judgment and the exchange of ideas upon which local management can base sound decisions.

Clearly, you get something *extra* when you buy a Corinthian station.
BUCK SLIPS—SUPREME COURT VARIETY

The Supreme Court's orders in the Springfield and Peoria cases were as follows:

235. Sangamon Valley Television Corp., petitioner, v United States of America, FCC, Signal Hill Telecasting Corp., et al. On petition for writ of certiorari to the United States Court of Appeals for the District of Columbia Circuit. Per curiam: The petition for writ of certiorari is granted. The judgment of the Court of Appeals is reversed and the case is remanded to the Court of Appeals for appropriate action in the light of the matter called to this Court's attention on page 7 of the Solicitor General's brief in No. 235, supra. Mr. Justice Clark and Mr. Justice Harlan dissent in the above cases. These petitions were not presented in the Court of Appeals and are not presented by these petitions. Agreeing with the Solicitor General that denial of the petitions for writs of certiorari would not foreclose appropriate consideration thereof by the Court of Appeals, we see no reason for vacating the Court of Appeals' judgments and, therefore, dissent from this disposition of the matter by the Court.

No. 242. WIRL Television Corp., petitioner, v USA, FCC, et al. On petition for writ of certiorari to the U. S. Court of Appeals for the District of Columbia Circuit. Per curiam: The petition for writ of certiorari is granted. The judgment of the Court of Appeals is reversed and the case is remanded to the Court of Appeals for appropriate action in the light of the matter called to this Court's attention on page 7 of the Solicitor General's brief in No. 235, supra. Mr. Justice Clark and Mr. Justice Harlan dissent in the above cases. These petitions were not presented in the Court of Appeals and are not presented by these petitions. Agreeing with the Solicitor General that denial of the petitions for writs of certiorari would not foreclose appropriate consideration thereof by the Court of Appeals, we see no reason for vacating the Court of Appeals' judgments and, therefore, dissent from this disposition of the matter by the Court.

Page 58 • October 27, 1958

forth out, the mantle of judicial procedure will be thrown around legislative as well as judicial proceedings.

An FCC lawyer raised an even more provocative question. Suppose, he said, the appeals court sends back to the FCC the two cases, as it has already done in the Miami and Boston comparative cases. Suppose the FCC investigates the charges and finds them true. The question he raised is how the FCC is going to disqualify a party in a rule-making proceeding; there are no applicants in the same sense that there are in comparative hearings.

He agreed, however, that the Commission might—if an investigation showed that there had been improper pressures—consider its decisions to deintermix the two cities.

Many lawyers called attention to the July 1956 Van Curler case in which the appeals court found "nothing improper or erroneous in the Commission's consideration of these interviews as depicted in this record." In this case, the charge had been made that CBS officials had seen FCC commissioners in camera and had made proposals involving Albany, N. Y. But, the court ruled, the CBS proposals were in the nature of nationwide allocations "concerning which the Commission was seeking all sorts of advice and information . . ."

The Peoria ch. 8 remand has raised the most intriguing question, in the minds of many observers. The Supreme Court said it was sending back this case for virtually the same reason it was returning the Springfield case.

But there is no mention of ex parte representations by the Solicitor General in the Peoria case. He only made this mention in the Springfield case. The appelleant, WIRL-TV, however, did make such representations in its brief asking that the Supreme Court review the appeals court affirmance.

To compound what many communication lawyers feel is the Supreme Court's incomprehensible error, the U. S. Court of Appeals in its October 12 letter to counsel involved in the Evansville, Ind., ch. 9 case referred to the WIRL case and not to the Springfield case at all.

The appeals court letter to counsel in the Evansville case was short. Signed by Joseph W. Stewart, clerk, it read: "I have been directed by the court to inquire of counsel in the above-entitled cases whether or not there exists in these cases circumstances similar to those which caused the Supreme Court on Oct. 20, 1958, to vacate the judgment of this court in WIRL Television Co. v. U. S., et al, No. 242, October Term, 1938, and which might affect the disposition by this court of the above-enumerated cases." Mr. Stewart asked that replies be made on or before Oct. 31.

One lawyer credited the Supreme Court with greater knowledgeableness than others gave it credit. He pointed out that the Supreme Court must have realized that there is a community of interest between the Springfield and Peoria cases—both involved deintermixture, both were central Illinois areas, both were deintermixed on the same day, both involved grantees who had been awarded vhf channels but had been denied the right to construct. This attorney pointed out that when the Commission deintermixed these two cities, it implied that it had to deintermix both—it couldn't remove the vhf channel from one city without doing the same in the other city, since the vhf signal in one city had a partial overlap in the other city. Springfield and Peoria are about 65 miles apart.

The Supreme Court referred to the comments in the brief of the Solicitor General in remanding the cases. What was it that the Solicitor General said? These are his exact words, stated in the government's brief in the Springfield case only:

"We believe it proper, however, to call the court's attention to certain testimony given before the Subcommittee of the Legislative Oversight of the House Committee on Interstate and Foreign Commerce on May 22, 26 and 28, 1958, and June 9, 10 and 11, 1958, subsequent to the decision by the Court of Appeals affirming the Commission's order. The testimony indicates that after the rule-making proceeding here had been initiated by notice of proposed rule-making, and while it was under consideration by the Commission, representatives of the St. Louis operator of a uhf station who was interested in having a new vhf channel assigned to St. Louis and representatives of the petitioner and the other applicant for vhf ch. 2 in Springfield, who were interested in retaining that channel in Springfield, presented written representations with respect to merits of the rule-making proceeding to various members of the Commission.

"These matters were not presented to the court below and are not presented by the petition. For this reason, the respondents do not and would not regard denial of certiorari as foreclosing appropriate consideration thereof by the Court of Appeals."

The gist of the allegations before the House Oversight Committee last spring, some admitted by KTVI (TV) St. Louis principals and some denied, were: That KTVI President Harry Tennenbaum lobbied U. S. FCC commissioners to get ch. 2 moved from Springfield to St. Louis; that KTVI hired former FCC Commissioner Robert F. Jones and paid him $55,000 without making him an attorney of record and without the knowledge of KTVI's regular counsel, William A. Roberts; that KTVI used the aid of Supreme Court (D-Mo.) and Cleveland attorney Charles Steadman; that KTVI ordered ch. 2 equipment from GE and signed an affiliation contract with ABC before the final assignment was made.

The Springfield ch. 2 comparative case was decided in June 1956 when the FCC reversed its examiner and granted a special authorization to WMAV-TV Inc., denying the application of Sangamon Valley Television Corp. The grant carried a prohibition against construction pending the outcome of deintermixture proceedings.

WMAV-TV Inc. is wholly owned by WMAV Springfield. Sangamon Valley is 40% owned by WTX Springfield.

In February 1957, the Commission decided 15 deintermixture cases. Five of these involved shifting vhf channels to other localities—Springfield and Peoria being two of these (the others: Evansville, Ind.; Fresno, Calif., Vail Mills—Schenevus, N. Y. In place of ch. 2, Springfield was assigned uhf chs. 26 and 36. WMAV-TV's authorization currently is for ch. 36; it is not yet operating.

Sangamon Valley appealed both the loss of the grant and the deintermixture action to the U. S. Court of Appeals in Washington. This court upheld the Commission's
The New LITTLE ROCK Story

Is...

"MISS EMILY"

... the warm, vibrant lady who comes alive with a vivid presentation of American History each weekday morning on KTHV, Channel 11. A Little Rock school teacher for thirty-five years, "Miss Emily" participated in the School Board-sponsored "television school" upon the closing of Little Rock's High Schools. Though "television school" lasted only one week, Miss Emily's warmth, knowledge, wit, and wisdom shone through brightly, and she became a regular member of the KTHV staff.

She draws people from every walk of life, every economic strata and educational level, to their television sets. She possesses that intangible spark of a teacher, leader and performer. She has received an avalanche of fan mail and the heart-warming story of "Miss Emily" has been carried nationwide by most major newspapers in the country. A talented, deserving person, "Miss Emily" is truly the "NEW" Little Rock story.

SEE YOUR BRANHAM MAN

HENRY CLAY, Executive Vice President
B. G. ROBERTSON, General Manager
The Senate wants to know more about the tv rating services than it learned at a one-day hearing by the Senate Commerce Committee last summer. Accordingly, Chairman Warren G. Magnuson (D-Wash.) of that committee last week announced the Senate group will hold new hearings next January soon after the new 86th Congress convenes.

Additional hearings on complaints and innuendo by the same good service that had been tentatively scheduled after the congressional elections—about Nov. 10—until Sen. Magnuson's announcement last week.

The one-day session on Capitol Hill last June [GOVERNMENT, June 30] was presided over—and attended by—only one senator, A. S. Mike Monroney (D-Okl.). Testifying were A. C. Nielsen, A. C. Nielsen Co.; James W. Seiler, American Research Bureau; Edward C. Haynes Jr., Trendex; Sydney Roslow, Pulse Inc.; Allan S. Sarnoff, NBC, and A. C. Sindlinger, Sindlinger & Assoc. Sen. Monroney expressed disappointment after the hearing at what he felt was the failure of rating services to bring improvement in programs.

If the committee carries over its previously-mentioned next step into the new Congress, witnesses will be ex-ecutives of networks, advertising agen-ties and national advertisers, who will explain how they use tv rating services.

vote was the same as in the Springfield action.

WIRL appealed this vhf loss and in March 1958 the U. S. Court of Appeals in Washington upheld the FCC's action. WIRL immediately asked the Supreme Court to hear its appeal.

In the WIRL brief to the Supreme Court, the charge is made that Sen. Kerr pressured the FCC into removing ch. 8 from Peoria because the senator wanted to remove vhf competition from uhf ch. 43 WEEK-TV in the same city. Sen. Kerr is the principal owner of WEEK-TV. WIRL alleged that Sen. Kerr brought pressure to bear on the FCC through his colleague, Sen. A. S. Mike Monroney (D-Okl.), a member of the Senate Commerce Committee. It referred to the hearings on deintermixture held by the Senate Commerce Committee over the past few years. WIRL also implied that Sen. Kerr's membership on the Senate Finance Committee played a part in influencing the FCC.

In his opposition to the WIRL petition, the Solicitor General made no mention of ex parte representations—as he did in the Springfield action. Other parties opposing the FCC's action, including ABC and AT&T, are represented by Mr. Swain.

Meanwhile six applicants are vying for ch. 8 in the tri-city area. At one time there were eight, but two withdrew. There has been one pre-hearing conference, with another scheduled for Nov. 21. The hearing proper is scheduled to begin Dec. 1.

The applicants are: Iowa-Illinois Tele-vision Co., 65% owned by multiple owner Peoples Broadcasting Co.; Community Tele-casting Corp., among whose stockholders is Mel Foster who owns 25% of KSTT Davenport; Illiway Television Inc., owned by Stanley H. Gayer, L. F. and Bruce Gran all of whom had stock interests in WREX-TV Rockford, III.; Midland Broadcasting Co., owned by H. Leslie At-las Jr. and family; Moline Television Corp., among whose stockholders is Frank P. Schreiber, former general manager of WGN-AM-TV Chicago, and Tele-Views News Co., whose principal interests are in the local TV Guide.

NBC, Douglas to Meet On Chicago Show Issue

A meeting of NBC executives and Sen. Paul H. Douglas (D-III) is planned in Chi-cago this week for the network to elaborate on why it made cutbacks in local live pro-gramming on its WMAQ and WNBQ (TV) Chicago.

The conference was called after Sen. Douglas asked for clarification of several points in NBC Board Chairman Robert W. Sarnoff's reply to the senator's query [AR DEADLINE, Oct. 6]. Sen. Douglas' telegram to NBC followed complaints to the FCC by the Chicago chapter of American Federa-tion of TV & Radio Artists against NBC's planned program changes for the fall [GOVERNMENT, Oct. 6].

While waiting for the NBC answer, Sen. Douglas impatiently shot a telegram to Gen. David Sarnoff, RCA board chairman, asking Gen. Sarnoff "as the real head of NBC to review this entire matter" and "restore all the programs which your company so ruthlessly eliminated."

Additional protests were lodged with the FCC last week against NBC by the Chicago City Council and by Rep. James F. Mack (D-III.). The Chicago City Council by resolution called on the FCC to investigate WNBO's operation "in the public interest." Rep. Mack asked the FCC to consider "pub-lic interest" questions and added, "Our net-works seem bent on making tv production a monopoly of Broadway and Hollywood."

The FCC replied to Rep. Mack that it is checking the AFTRA chapter's protests and that no action is planned until all pleadings are received.

(Other protests to the FCC against the proposed NBC changes in Chicago have been filed by Rep. Sidney R. Yates (D-III) and Chicago Mayor Richard J. Daley, while NBC has filed an answer to the AFTRA complaint to the FCC [GOVERNMENT, Oct. 20].)

In his wire to Gen. Sarnoff, Sen. Douglas declined the re-shuffling of news programs (reinstating of Cliffone Uley and dropping of Clifcom) and stated the principle of providing local shows in the public interest. Sen. Douglas added that "personalities are not involved in my stand."

Rep. Mack, a member of the House Inter-state & Foreign Commerce Committee,
wired FCC Chairman John C. Doerfer, raising “public interest questions” arising from network cancellation of programs. He held that “many television viewers in Illinois, and throughout the Midwest, support the position of AFTRA in demanding that the Commission do everything within its power in encouraging telecasters to use good talent wherever it is found.”

FCC Sides With WFBG In Equal Time Dispute

FCC last week supported the claims of WFBG Altoona, Pa., that it didn’t violate the “equal time” provisions of Sec. 315 of the Communications Act as claimed by Mrs. Julia Maietta, Democratic candidate for Congress who is trying to unseat incumbent Rep. James E. Van Zandt (R-Pa.).

In a letter to Mrs. Maietta, the Commission said it had written WFBG and that from the station’s answer it “doesn’t appear” WFBG failed to meet its obligations under Sec. 315.

Mrs. Maietta had complained that WFBG granted Rep. Van Zandt “unlimited free and paid time” and denied her access to WFBG and that the station had rejected copy submitted by her to the station, had attempted to censor such copy and had engaged in “stalling tactics” to keep her off the air.

WFBG replied that it charged both Mrs. Maietta and Rep. Van Zandt for time and that Mrs. Maietta canceled time contracted for on WFBG but had used some of the time on WFBG-TV Altoona that she contracted for.

The station said it granted no free time, as such, to Rep. Van Zandt, but that he had made short talks on four radio-television programs since Aug. 1 as follows: Aug. 20, an explanation of a railroad bill in Congress; Sept. 23, an explanation of why the bill failed to pass; Sept. 26, an explanation of a tour of Altoona businessmen to the Curtis Steel plant located near Quehanna; Oct. 2, a talk to a reserve officers group on the need for armed forces scientific advances.

On Sept. 29, WFBG carried a talk by Rep. Van Zandt introducing Admiral Hyman Rickover to the local Lions Club and offered Mrs. Maietta equal time, but she refused; the station explained.

More Microwaves Ask Court To Act on Relay Applications

Five more appeals have been made to stir FCC action on applications for microwave relay systems by common carriers which feed community antenna tv systems. The first appeal was made by Mesa Microwave Inc. [Government, Oct. 20].

Carter Mountain Transmission Corp., Cody, Wyo.; East Texas Transmission Co., Tyler, Tex.; Idaho Microwave Inc., Twin Falls, Idaho; New York Penn Microwave Corp., Corning, N. Y., and Valley Microwave Inc., Florence, Ala., have petitioned the U. S. Court of Appeals for the District of Columbia to order the FCC to act on their applications for microwave relay facilities or to tell them why it can’t grant the applications and set them for hearing. The FCC has withheld action on nearly 50 relay applications since initiating a study of CATV operations, boosters, satellites, etc., last May [Government, May 26] and has granted only one such application since that time.

DBA Asks Extension, Offers Alternate Plan

The Daytime Broadcasters Assn. last week asked the FCC to reconsider denial of DBA proposals to extend the operational hours of daytime am stations [At Deadline, Sept. 22] and asked that, if DBA’s proposal for extended time is not granted, the FCC grant a more limited to 60 hours a day less than the original proposal.

The alternative requested of the FCC was to permit daytimer operation from 6 a.m. or sunrise (whichever is earlier) to 6 p.m. or sunset (whichever is later). DBA initially proposed an additional hour both in the morning and evening.

DBA said that since the FCC found to the 5 a.m. to 7 p.m. plan would be largely obviated by the 6 a.m. to 6 p.m. proposal.

The daytimers’ group charged the FCC denial was “inconsistent” with statutory responsibilities and that FCC findings were “arbitrary, capricious and not supported by the record.” The DBA said it ignored recommendations made by the Senate Small Business Committee in September 1957 that findings be based on “actual radio-listener preference and practice” instead of “theories of radio signal propagation and interference.”

DBA said “mail survey” data furnished by “clear channel interests” was improperly relied upon by the FCC and didn’t support Commission findings. This data, besides, was furnished in another proceeding and proponents of extended hours had no opportunity to study it or reply to it, DBA continued.

DBA said the “mail survey” data did not specifically cover the times of day under question in the daytime proceeding and that the mail responses were for the month of June 1958, when sunrise and sunset occur almost everywhere within 5 a.m. to 7 p.m. and distant listeners could not possibly be listening to clear channel stations during the hours under question.

An attached engineering statement by Everett L. Dillard, Washington consulting engineer, charged the FCC with overly-simplifying the “twilight hours” by considering “day” as all the time after sunrise and “night” as all the period after sunset, thus disregarding the changing degrees of skywave propagation during these hours. DBA said this interpretation exaggerated the losses of service from clear which might occur under the proposal and under-estimated gains from daytimer service.

WNOE to Go to Supreme Court With Appeal of Jesuit Tv Grant

WNOE New Orleans last Wednesday (Oct. 22) notified the federal Court of Appeals in Washington that it plans to ask the U. S. Supreme Court to review the appellate court’s decision upholding the grant of ch. 4 New Orleans to WWL-Loyola U.

[Government, Oct. 20]. The lower court mandate will be held up pending possible action by the Supreme Court.

WNOE, a losing applicant for ch. 4, appealed the FCC grant on the grounds Loyola, a Jesuit institution, is an “alien” corporation and not eligible to own a broadcast station. The applicant, owned by James A. Noe (former Loyola Trustee), has 90 days from the date of the lower court decision (Oct. 15) to file a writ of certiorari with the Supreme Court.

The third applicant for ch. 4, the New Orleans Times-Picayune (WTPS), also originally appealed the grant to Loyola. This protest was withdrawn after the Times-Picayune acquired the New Orleans Item and as a condition of this purchase, sold WTPS [Changing Hands, Oct. 13].

Comes Now Philco Protest To NBC-RCA Review Petition

Philco Corp. has filed its opposition with U. S. Supreme Court to a petition by NBC-RCA for writ of certiorari asking the court to review the appeals court June 19 decision upholding the right of Philco to protest the license renewals of NBC’s Philadelphia WRCV-AM-FM-TV. RCA has appealed the renewals, but FCC refused to entertain the objections on the ground Philco had no standing to protest. The appeals court, by a 3-2 vote, held Philco has standing to object.

NBC-RCA last month asked the Supreme Court to review this ruling.

The gist of the appeal is that the right of Philco to standing even though it is not a licensee of broadcast facilities in Philadelphia. Philco claimed it has a right to protest since it is a competitor of RCA in the manufacture and sale of electronic equipment and household appliances. Philco’s basic objection is that RCA enjoys unfair advantage in advertising its products through ownership of the Philadelphia station. Philco also objected to request of Gerity Broadcasting Co. two weeks ago to file a brief in support of the NBC-RCA position as amicus curiae [At Deadline, Oct. 13].

Magnuson Officially Disbands Bowles’ Allocations Committee

Sen. Warren Magnuson (D-Wash.), chairman of the Senate Interstate & Foreign Commerce Committee, has disbanded the special ad hoc committee on allocations headed by Prof. Edward L. Bowles of Massachusetts Institute of Technology. The study group submitted its report four weeks ago [Government, Sept. 29].

In a letter to Prof. Bowles dated Oct. 15, Sen. Magnuson stated: “Now that the report has been submitted and made public, the purpose for which the ad hoc advisory committee was formed has terminated. Therefore, I am dissolving the committee as of this date.” The senator thanked the committee members for “your generous and able cooperation in undertaking this difficult assignment.”

The Senate committee has taken no action on the report, which was highly critical of the FCC. It has been sent to that agency and the Justice Dept. for comments.
NBC-TV SAYS IT'S NUDGING CBS-TV

- Affiliates drink in network's claims of superiority
- Gains: program popularity, billings, clearances, sellouts

A seemingly confident corps of top NBC officials told an audience of seemingly contented affiliates last Thursday that NBC-TV is on its way to becoming the No. 1 television network—and has already arrived in some areas.

The confidence on one side and contentment on the other seemed to stem from the great extent from the contents of the network's comprehensive progress report on the past year's achievements. The report included claims of: CBS-TV already overtaken in program popularity; billings gains almost twice those run up by CBS-TV; clearances better and longer lines being ordered; and CBS, NBC's 1958-59 schedule "basically" sold out despite the early softness in the television market.

More than 200 video affiliates were on hand for the network's presentation, which used both live and film techniques as the 12th annual NBC-TV convention opened in New York Thursday. The radio affiliates had heard the NBC Radio network presentation the day before (see page 64) and further meetings of both radio and TV groups were held Thursday afternoon and Friday morning. Some 75 radio-TV editors from across the U.S. also were NBC's guests and went over the week and participated in many of the affiliate proceedings (see following pages).

Walter Damm, retired head of WTMJ-TV Milwaukee, presided as chairman of the NBC-TV affiliates board of delegates, but promptly turned the Thursday morning session over to NBC Station Relations Vice President Harry Bannister and other network officials.

NBC President Robert E. Kintner, chief presiding officer for the presentation, reviewed NBC-TV programming and challenged critics who have contended that television programming is in a rut. On all three networks, he said, more creative effort is going into television than ever before.

While Don Durgin, vice president and national sales manager, carried the main burden of the overall presentation, top representatives of the programming, sales, news, sports and public affairs departments were called in to deal with their jurisdictions in detail. Climaxing the 2½-hour production was an address by Board Chairman Robert W. Sarnoff (see page 66).

Brig. Gen. David Sarnoff, board chairman of NBC's parent RCA, received an ovation when his presence in the audience was called to the attention of the affiliates.

Mr. Durgin devoted much of his time to "the great audience shift of 1957-58," citing Nielsen figures as showing that NBC ratings rose and those of CBS fell to a point where there was no "discernible difference" in some categories and that NBC pulled ahead in others. The nighttime change alone, he said, reflects a shift from one network to the other of an average of over 5 million viewers per minute, the greatest audience shift ever witnessed in network television."

The specials, as well as last year's overhauling of nighttime programming generally, also contributed to the audience swing, Mr. Durgin asserted. He pointed out that where the average Nielsen rating for all evening programs last season was 20.6 the average NBC special had a 25.9 rating.

He said NBC's programming had been good for the affiliates as well as the network, using ARB figures to show that in 29 markets where all three networks operate, the NBC affiliate in all but three improved their shares of evening audience by up to 10-20%. The same study showed CBS improvement in only four of the 29 markets.

In morning time, Mr. Durgin reported, CBS led by more than 2 to 1 in 1956, but "by mid-1958 NBC had more than doubled its average audience—a rating increase of 117%, while the CBS competition during this same period declined by 21%." He also noted, as announced earlier, that by the end of the past summer NBC's daytime schedule averaged better than 70% sold out and "by early fall a total of some 654 million gross advertising orders have already been placed for the 1958-59 season."

Station clearances for NBC programs improved considerably, Mr. Durgin reported. In 1957 the NBC average was about 125 stations and in the past season it was about 135, compared to 140-145 for CBS both years, he said, adding: "I am pleased to say that for the 1958-59 season our ordered nighttime lineup average 153 stations vs. 139 for a year ago—a 10% increase. In daytime last season our average ordered lineup was 80 stations. This season the average order is for 124 stations—an increase of over 50%. "We have the station orders this season to pass CBS; it is up to you gentlemen from the stations as to whether or not we do. On clearance depends not only billings but more important national ratings for us and local standing in the market for you."

Striking out at new-season ratings ads placed by ABC-TV (see story page 68), Mr. Durgin said it is still "too early to tell" but that "on the basis of early returns, NBC starts the new season as the No. 1 network according to Trendex."

On the question of live vs. film programming he said 24 regularly scheduled nighttime half-hours are on film and 21 are live. In a typical week, daytime and nighttime, he said NBC carries 108 half-hours live to 26 half-hours on film.

To frequently aired charges that networks have yielded program control, he cited the numerous sources of programming—but emphasized that the network retains total control—and pointed out the large number of creative people concerned with developing programs and program ideas for NBC.

He reported that 50 top advertisers participated in color programming on NBC last year and said there will be more NBC color this season than ever before—more than 600 hours in all.

Bob F. Lewine, vice president for TV network programs, told the audience that NBC telecasts 13 hours daily—the equivalent of more than 3,100 feature pictures a year, or seven years of output by major Hollywood studios.

He said NBC necessarily works a year in advance on programming, that it screens thousands of scripts and ideas and views 100 pilot films in its search for a handful.

**NBC LEADERS** at the convention of NBC affiliates in New York last week included (1 to r) Robert E. Kintner, president; Robert W. Sarnoff, board chairman; Harry Bannister, vice president, station relations, and Matthew Culligan, executive vice president, radio network.

of regularly scheduled programs.

NBC's policy, he said, is "never to be satisfied with what you have on the air" and "make the next season better than the last," and he told the affiliates that he was confident this would be accomplished.

Walter Scott, vice president for tv network sales, said the "economic coffee break" earlier this year was "real, real tough" but that actually the recession merely delayed the placing of network orders.

"We'll deliver to you an essentially sold-out schedule," he assured the affiliates.

Mr. Scott also noted that NBC already has "important fourth-quarter orders" from three advertisers in a field which seemed especially hard hit by the recession. He listed the three as Bulova, U. S. Time and Elgin watches.

NBC's news operation and the development of this department by Vice President William R. McAndrew were praised both by Mr. Kintner, who said that as an ex-newspaperman he considered NBC news coverage the best in the business, and by newsman Chet Huntley, who noted that he had also worked for CBS and ABC but regarded NBC's news operation as the most capable in broadcasting.

Mr. Huntley said the "upsurge" in NBC News was not accidental, that it was built to endure and "this is only the beginning." The news department's requests for time periods and budget have not once been refused, he asserted. He said Mr. McAndrew was determined to build a team and have no "star system" and that "he had never known an NBC newsman to withhold a story for his own broadcast although, he asserted, this is "standard procedure" in some other organizations.

Lindsey Nelson, substituting for Sports Director Thomas S. Gallery, who was ill, said NBC-TV not only is No. 1 sports network but has a new concept to strengthen that position. The concept: a year-round sports package which will include—in addition to the present NCAA football, post-season games, pro championship finals and the regular Gillette Cavalcade of Sports package—a college basketball game of the week, pro basketball, the U. S. Open Golf Tournament, U. S. tennis championships, horseracing, etc.

Advertisers are buying into this package "like nothing before," Mr. Nelson reported.

NBC public affairs activities were described by Edward Stanley, director of this field, who put special emphasis on work in and with educational television. He reported that NBC-TV thus far has delivered 167 half-hour programs to educational tv stations and that the number will reach 200 by the end of the year. He stressed NBC-TV's Continental Classroom course, offering college credits in atomic-age physics, and the impact it had had in the country's schools and colleges.

Mr. Stanley urged affiliates to establish and maintain good relations with the colleges and universities in their respective communities. The work which NBC has done in public affairs, he said, demonstrates that the tv network is a "natural resource."

WALTER DAMM, who retired recently as head of WTMJ-AM-TV Milwaukee, presided as chairman of the NBC-TV affiliates board of delegates for the last time last week. It marked the end of a quarter-century of Mr. Damm's active participation in affiliate affairs.

NBC RADIO UNWRAPS 'IMAGE' SERIES

- Weekday series to pre-empt 'Nightline,' affiliates told
- Network notes upped network sales, plans for local boosts

A major new program series, reports of stepped-up network sales and increased payments to affiliates, pleases for better clearances and further plans to ease the way for affiliates to make more local sales dominated NBC Radio's presentation to its affiliated stations at their annual meeting in New York last Wednesday.

Approximately 150 affiliates also heard NBC President Robert E. Kintner give assurance that it is a "definite policy" of NBC to make the radio network bigger and better and to give all the resources it needs, "comparable with television." They also were told by Station Relations Vice President Harry Bannister that while the sales picture is better there is still room for improvement, which is just a fancy way of saying "we're still losing money on the radio network."

In the main presentation Matthew J. Culligan, executive vice president in charge of the radio network, said the new programming, to be called "The NBC Image Series," will consist of "audio documentaries," each of which may take up to a month of nighttime strip programming to complete. The first, set for January, is Image: Russia, and Mr. Culligan said it was expected to take 30 to 40 hours of on-air programming extending over more than four weeks. The "Image" series will run Mondays through Thursdays, pre-empting Nightline. Features including Pocketbook News, Family Living '58, and Pauline Frederick at the UN will be integrated into the various "Image" programs.

Mr. Culligan said he was confident "Image" would rival Monitor and Nightline in audience appeal but that he doubted it would equal those shows in interest to advertisers—at the network level. On the local level, under the network's so-called "no waste" policy, he saw the series as a stimulant to sales.

The radio network chief assured the affiliates that NBC now leads all radio networks in terms of sponsored hours. He noted that figures for Mutual are not available but said that among the three others NBC in October had almost half of all sponsored hours—48.1% as compared to 33.4% for CBS Radio and 18.5% for ABC Radio.

The affiliates also were told that NBC Radio had led CBS Radio in sponsored hours almost consistently in each quarter since the first one in 1957. (CBS Radio has consistently dismissed such estimates, pointing out that NBC sells in six- and ten-second lengths while CBS does not and asking how such diverse computations could be comparable.)

As last year, Mr. Culligan appealed for better clearances but at the same time noted that clearances have improved sufficiently in the past year so that the network now is definitely able to guarantee to advertisers from 75-85% of the total network lineup of stations.

"But please remember that we are still a little shy of delivering our advertisers this 85% clearance," he asserted, pointing out that on an overall basis clearances have gone from 74% in July 1957 to 75% in October 1958 and 80% now. Best clearance is on Monitor—83%, while the 10 a.m. to noon Monday through Friday block is up to 82%.

In appealing for further improvement in clearances, Mr. Culligan reminded the group that NBC had cautioned a year ago that it could not comply with affiliates' requests for increased prices "until we could deliver higher circulation through improved clearances." He said that now, "although we still need improvement in some areas, the overall picture is improving."

Tying clearances to circulation, circulation to more sales and higher prices, and increased volume to greater compensation for affiliates, he reported that payments to stations in 1957 were 75% above those in 1956 and that 1958 to date is running 94% ahead of last year. "Looking at it another way," he said, "each of you knows, from examination of your monthly check, that you have about tripled your income from the network in 1958 over the year 1956, if you have cleared a reasonable level of programming."

Mr. Culligan offered a demonstration of NBC's "Memory Vision" concept, using sounds to create appropriate moods and hence add impact to sales messages and radio communication, and also cited work on "Engineered Circulation," a concept to promote consumer use of a product after it has

been bought. As long as a box stands unopened in the home, he said, it is a bar to the next sale of that product.

He also outlined new program plans apart from the "Image" series. One was "Analysis Stardust," an extension of the NBC "Star"-type programming of name talent. This would use "Stardust" talent in analyses of art, culture, style, home life and other areas in which these stars have special interest. As examples, Dave Garaway analyzed for the affiliates American reaction to Russia's world dominance drive; newscaster David Brinkley examined Congress; Les Durocher, sports, and Marlene Dietrich, human relations.

George A. Graham, director of sales planning for the network, reported on NBC Radio's activities designed to promote local sales by affiliates. For instance: The "National Local Plan" in which sales to network advertisers are promoted via closed-circuits from an advertiser to his dealers and distributors, and by other means—to help the stations sell spots to the network advertiser's local outlets.

Mr. Graham said more than 172,000 local spots have been sold on the basis of this network-and-station concept in the last 18 months, and Mr. Culligan observed that if a station hasn't averaged 900 spots in connection with this approach over the past 18 months then "your sales manager needs talking to."

Mr. Graham also reviewed NBC's "Summertime Is Outdoor Eating Time" campaign and "Dinner A la Carte," a promotion of NBC— but he also cautioned the stations that "aggressive follow-through" is necessary on their part.

In the "National Local Plan" he singled out the Ruberoid Co. promotion as an example of what this concept can mean. After Ruberoid signed for a network campaign, he found that local dealers and advertisers used NBC network and station facilities to present a closed-circuit program explaining the campaign to local dealers and users. The result: more than 5,000 local spots sold by NBC stations to Ruberoid outlets, according to Mr. Graham.

"In nine out of ten station cities," he asserted, "when a closed-circuit meeting was held, related local campaigns were sold. This is overwhelming evidence as to how much local revenue potential there is for you when you hold these closed-circuit meetings and aggressively follow them up. . . . Time after time, stations tell us that related campaigns are sold out to retailers, right in the studios, just minutes after the conclusion of the special closed circuit. Ruberoid's attitude is best summed up by the fact that they came back to us again last spring with a national-local campaign, and now we fully expect to, third time."

Mr. Graham said there is "no more eloquent testimony to the value of such promotions than the fact that . . . CBS Radio network has just organized a merchandising department for the first time in their history. But meanwhile we have two years lead time and believe me, we are going to stay more than two years ahead."

Dr. Thomas E. Coffin, NBC research director, spelled out details of a research study showing that Universal C.I.T. Credit Corp. averaged a 95% gain in knowledge, favorable opinion and preference among Monitor listeners after a four-weekend campaign on Monitor last spring, while among nonlisteners C.I.T. gained nothing and in some instances lost ground in its campaign, (see above).

The presentation closed after a brief talk by President Kintner, who also presented Board Chairman Robert Sarnoff and David Adams, executive vice president, corporate relations.

SARNOFF CAUTIONS NBC-TV AFFILIATES

- Resist outside pressures
- Future depends on network

NBC Board Chairman Robert Sarnoff last week called on affiliates to work with the network and "jointly withstand" stresses from divergent interests which tend to pull them in opposite directions. The future of TV may depend on just how well they withstand the pressures, Mr. Sarnoff told the affiliates at their annual meeting in New York (see pages 62, 64).

The network-affiliate relationship, he said, hinges on the networks' ability to continue as "the creative hub" of television, and "rests on the powerful structure of mutual interest."

While recounting past illustrations of affiliates working with the network—in traveling to Washington to support the network—Mr. Sarnoff warned, "It was under fire in the Barrow hearings"—Mr. Sarnoff cautioned that the "joint asset" could slowly erode through "misunderstanding or . . . failure to recognize the narrow margin between network success and failure."

"If that happens," Mr. Sarnoff warned, "the affiliates themselves could bring about the very result which they have pleaded so eloquently with the government to avoid."

The pressures depicted by Mr. Sarnoff: three-network competition and its effect in both network and spot; multiplication and diversification of program sources; slowness in network sales and final programming decisions because of a buyers' market; rising costs with accompanying leveling off of advertising profits; reduced demand for total network profit margins; new interests entering the station field who "may be tempted to judge individual transactions on the transient basis of immediate financial effect, without first weighing the ultimate effect on the overall network-affiliate relationship."

Mr. Sarnoff explored the "dilemmas and frustrations of networking"—in which the networks receive charges of monopoly but yet actually are a business "whose hallmark is no-quantity competition"; a public official suggests more network programming to improve the quality of radio stations which, he also said, "seem dedicated to reducing the amount of network programming carried by television stations."

In a look at other TV areas, Mr. Sarnoff saw:

- Program sources—A "basic stability" has come from outside packagers who have grown in number and also from NBC's "Image" series, the motion picture industry, from syndication and from the talent agency field, who have become firmly anchored as program originators.
- Movies—"Only a soothsayer would west and midwest cities. The interviews were conducted just before the campaign opened up.

The 126% gain in familiarity with C.I.T. reportedly was an average of six different measures of knowledge. It included "spontaneous awareness" of C.I.T. and the number of listeners who were able to identify the company's advertising slogans on Monitor.

The study also shows, Mr. Coffin said, that there was a 63% rise in "favorable attitudes" toward C.I.T. among Monitor listeners. When asked to rate C.I.T. in comparison with other finance companies, the proportion rating it "excellent" rose by 79%.

Following the Monitor campaign, the survey reveals, there was an increase of 21% in the number of listeners who said they would consider C.I.T. for financing the purchase of a new car. A report on the complete findings is available through NBC Radio's sales department.
Our road-rallying friends are more surprised to see the wrangler than vice-versa. They seldom see horses these days, except those owned by rodeo riders and a few working cowhands. The West has changed.

Westerners' Secret Revealed

We may be gunned down for this, but it's time you knew. Few people around here ride horses anymore. Horses are too slow. Distances are too great.

For example, many salesmen for Amarillo's 370 wholesale firms drive 200-300 miles a day to make regular calls on close-to-home customers. High school football fans willingly motor 120 miles to see Friday night games. To attend a party 60 miles from home isn't unusual.

The vastness of the Plains puts everybody on wheels. We have more cars. We drive more. While national sales of things automotive average $768 per family, KGNC-TV viewers buy $1085 worth.

Lest you think all this means it's a long way between waterholes, note well. More than a half-million people live in our service area. Amarillo is their trade center, of course. But they also buy in 271 other cities, towns, villages and wide-places-in-roads. And KGNC-TV covers them all.

For a generous sample of change from the New West, add to your list

hazard a forecast on whether the features will soon wane in appeal through play and replay, bringing an end to this chapter in television's history; or whether they will continue as a television staple."

- Color—Expanding steadily and rapidly from full support of "only one network and one manufacturer," soon the market will be big enough to enlist other manufacturer support, he said.

- Videotape—"We stand on another frontier opened by new technology, revolutionizing station and network operations."

Organizational changes in the network—"We have fashioned a network organization that I consider the most competent anywhere," with "skilled and energetic" executives at its operational head, and geared for "the rough competition of today and for the rougher competition of the future."

ABC-TV Rating Claim Starts Three-Way War

A rhubarb broke out last week over fall-season program ads placed by ABC-TV. In the process, ABC, NBC and Trendex found themselves firing and fired at.

As recounted to assembled NBC-TV affiliates (see page 62) by Don Durgin, ex-ABC executive and now vice president and national sales manager of NBC-TV, it all started when ABC-TV took out ads promoting Trendex figures showing that for the week of Oct. 1-7 the rating of ABC-TV's sponsored evening programs was up 35% over 1957, giving it a 17.2 behind CBS-TV's 20.7 but ahead of NBC's 16.8.

NBC cried "foul," and so did Trendex. NBC contended that ratings were for a week when most of its new fall schedule had not yet been introduced, and that furthermore ABC should have shown the ratings of all programs, not just those with sponsors. Both NBC and Trendex wondered why ABC, in counting up commercial time, had excluded the sponsored Billy Graham religious program from its own total (Mr. Durgin said it was because "it was too low-rated"). Trendex had a separate beef about the ABC ad's identifying the other networks rather than showing them as "Network A" and "Network B."

Trendex Executive Vice President Robert B. Rogers wrote NBC last Wednesday (Oct. 22) saying that ABC had given assurances that it would stop identifying the competing networks and that ABC authorities omitted the Billy Graham rating from their count because "they do not consider this a commercial program."

NBC meanwhile had Trendex do a survey for Oct. 8-14, by which time all but one of its shows was on the air. On an all-evening program base, which Mr. Durgin pointed out is the Trendex reported base, this showed NBC first with 18.4, CBS second with 17.3 and ABC third with 13.5. Mr. Durgin also pointed out an all-program basis for the Oct. 1-7 study would have shown ABC in third place. He also re-figured ABC's Oct. 1-7 rating with the Billy Graham show included and said this way ABC came out third again with 16.5 behind 16.8 for NBC and 20.7 for CBS.

But the sparks really flew when ABC took out another ad last Wednesday, repeating the Oct. 1-7 ratings for sponsored programs (excluding Billy Graham), using the CBS call letters but referring to NBC only as "the third network," and added this footnote: "Important: The figures are from the latest (and only) official Trendex reports available to the television industry . . . and not from a special study prepared for any specific network." The footnote also pointed out that the ratings were for sponsored evening programs "excluding news and religious programs.

In his letter to NBC, Trendex's Mr. Rogers called attention to the new ad. He said: "I would like to point out that every special survey we conduct is just as 'official' and just as unbiased as the survey we conduct during the first through the seventh of each month. The sample size is identical, the distribution of the sample is identical and, therefore, the results may be compared directly."

"The inference that the figures produced during the week of Oct. 8-14 for NBC-TV are not comparable to those produced during Oct. 1-7 for the industry is inexcusable, and we certainly intend to bring this to the attention of ABC officials."

ABC authorities meanwhile gave their side of the ruckus as follows: "They decided that, since the Oct. 1-7 Trendex would be the only one that Trendex subscribers generally would receive in October, they would use it in their advertising. They cut some programs out of the compilations because they wanted to show advertisers what other advertisers were getting on ABC-TV. This, they say, is standard practice which has been followed by NBC as well as ABC. They deleted the Billy Graham rating on the ground that this program is not of general interest."

Moreover, they charged, NBC, ABC-TV picked Oct. 8-14 for its special measurement because NBC knew it had three specials (Bob Hope Show, Johnny Belinda and Swiss Family Robinson) and two premières (Million Berle and Cimmaron City) scheduled in that period to help boost audience.

In the meantime, reports circulated that ABC officials had threatened to cancel Trendex if word of the Trendex complaint leaked out. This could not be immediately confirmed at ABC, and Trendex Mr. Roberts would say only that Trendex had received no official, written notice of cancellation.

Record Attendance Expected At CBS Affiliates Convention

An all-time high in registration is expected for the fifth annual convention of the CBS-Radio Affiliates Assn., to be held Wednesday and Thursday (Oct. 29-30) at the Waldorf-Astoria Hotel, New York.

Mr. Charles C. Coyle of WABD-Philadelphia, chairman of the affiliates group board, and CBS Radio President Arthur Hull Hayes, last week announced that the advance registration a week before showed that 116 stations—more than 80% of the network's rate card—would attend. Frank Fogarty of WOW Omaha, convention committee chairman, said the number is running ahead of last year. Total registration a year ago was 119 stations, or 82.4% of the rate card.

General managers of CBS-owned radio stations meet with CBS Radio executives at the Berkshire Hotel, New York, Oct. 27 (Jules Dundes, CBS Radio's vice president in charge of station administration, presiding), and will meet again Oct. 28 along with sales managers with CBS Radio Spot Sales at the Hotel Pierre and on Oct. 31 in closed session.

The sales will have a luncheon featuring Mr. Hayes as speaker, while Spot Sales General Manager Gordon F. Hayes will preside over a day-long session on sales, research, programming, promotion and advertising plans for the coming year.

Gen. Curtis E. Le May, vice chief of staff, USAF, is slated to deliver "an off-the-record" talk at a luncheon meeting Oct. 29 at the Waldorf-Astoria Starlight Roof.

Seattle Partner-Change in '59: KOMO-TV to ABC; KING-TV to NBC

ABC-TV moved quickly for an affiliation agreement in Seattle, announcing last week it has effected a pact with KOMO-TV, the station from which NBC-TV switches its primary affiliation in a year from December to KING-TV [NETWORKS, Oct. 20].

W. W. Warren, KOMO-TV's executive vice president and general manager, and Alfred R. Beckman, vice president of ABC-TV station relations, announced the signing which makes effective a secondary affiliation immediately and primary affiliation on Dec. 10, 1959, the date when NBC-TV switches its primary Seattle affiliation to KING-TV.

With this affiliation swap in Seattle made final, ABC-TV still has a gap to fill in Portland, Ore., where KGW-TV becomes a primary NBC-TV affiliate May 1, 1959, while ABC Radio has affiliations to make in Seattle and Portland (both tv and am stations operated by King Broadcasting Co. in the two markets move from ABC-TV to NBC-TV).

LOOK TO YOUR BRAND IMAGE—
FENIGER AT NAB BOSTON SESSION

- Stations must work on selling selves, agencyman says
- Record crowd at Boston; final regional underway today

Madison Avenue isn't getting a very good brand image of the broadcasting business.

This thought, backed by some tips on what broadcasters should do about their promotion and programs, was given the NAB fall conference held Oct. 20-21 in Boston. The speaker was Jerome R. Feniger, programming vice president of Cunningham & Walsh, New York.

The Boston conference drew 226 registered delegates, highest of the seven conferences in the autumn series that started Sept. 18 in Biloxi, Miss. The final conference opens today (Oct. 27) at the Statler Hilton Hotel, Washington, D. C.

Mr. Feniger reminded the Boston delegates about his tips to radio stations, offered in a National Radio Month talk before the Washington Ad Club [ADVERTISERS & AGENCIES, May 19]. Television, a newer medium, must improve its presentation of station and market information to agencies, he said.

"I feel there is a place in any tv program schedule for imaginative, locally produced, live programming," Mr. Feniger said, adding that videotape may lead to more local live shows to strengthen schedules built around syndicated half-hours, feature films and network programs. He contended a five-minute newscast, with about 3½ minutes of actual news, is not adequate to cover world, national, regional and local news for intelligent audiences. On the other hand he lauded tv and radio stations for their improved on-the-scene local reporting.

"More local news coverage will result in better ratings and better ratings will result in more business, and more business will result in more profit at the end of the year," he reminded.

Broadcasters should tell a better story to Madison Avenue, and should "present it through the broadcasting trade press, through representatives and local salesmen, through personal calls on key accounts and in every other way possible," Mr. Feniger said in suggesting his ideas of what stations should do to improve agency opinion of their operations.

"I would do highly effective research on the audience my station reaches," he said. "This audience represents my greatest asset. It's really all I have to sell. Once I had this basic research information I would carefully analyze my program schedule and determine the type of programming that best appeals to this audience.

"I would eliminate those shows with limited appeal and add shows with more general appeal. However, I would definitely not sacrifice my responsibilities to run my station in the public interest, convenience and necessity in the broadcast scope of those words.

"After a reasonable time I would then research the effectiveness of this program approach to my audience. With the results of this material I then would have a strong selling case. Once I had this information I would carefully put it into the most effective possible form for presentation to my local, regional and national advertisers and their agencies.

Having presented this story to agencies and accounts, he said, "I would devote every effort to letting my advertisers' announcements and programs sell and sell hard. I would not triple spot. I would not overload participating programs with one-minute announcements. I would endeavor to give each advertiser's message an opportunity to gain a share of the consumers' mind. When we consider that the average American is confronted with over 1,500 advertising impressions per day you can recognize readily the importance of allowing each and every message on your station the greatest opportunity for penetration."

Mr. Feniger saw "a bright future for the broadcasting business," and adding this reminder, "Never before in the history of modern advertising have clients and agencies analyzed more carefully the relative selling ability of the various advertising media. In any well-rounded marketing and advertising plan all media must be carefully considered. However, the great growth of both spot and network radio and television over the past 10 years attests to the fundamental selling power of sound alone, or sight plus sound plus motion."

If broadcasters "more carefully document the effectiveness of the medium," he said, "they cannot help but improve both the quality of their facility and the profitability of their property." Mr. Feniger said he had served in the broadcasting business as a buyer, a seller and a station employee.

NAB President Harold E. Fellows led NAB's headquarters staff in staging a series of joint radio-television management-administrative sessions at Boston. Separate radio and tv meetings were directed by John F. Meagher, NAB radio vice president, and Thad H. Brown Jr., tv vice president.

A discussion of broadcast editorializing was led by Daniel W. Kops, WAVZ New Haven, Conn., and C. Wrede Petersmeyer, Corinthian Broadcasting Corp., members of NAB's committee on editorializing. Mr. Petersmeyer contended the FCC was still confused about broadcast editorializing. He suggested that a survey NAB is conducting at the eight fall conferences will prove helpful to the Commission and provide the basis for an NAB editorializing guide. He felt the FCC merely gives "lip service" to editorializing, arguing broadcasters must have "a clear picture" of what they can do.

Mr. Kops described his active editorializing procedure and said the station has endorsed candidates for local office. Paul Adanti, WHEN-TV Syracuse, N. Y., wondered if there were enough qualified people on station staffs to do a professional editorializing job. Donald A. Thurston, WJKE Newport, Vt., replied with the statement that "a lot of newspaper editorial writers aren't qualified."

Mr. Petersmeyer suggested "broadcasting will not be a wholly vital medium of communication until it has the same rights as newspapers. Their holier than thou position galls me."

A showing of hands showed only seven stations that editorialize on a regular basis.

The final Fall Conference in Washington will follow the format set at the opening Biloxi session. The advertising speaker at the Tuesday luncheon in Washington will be Felix Coste, vice president and director of marketing, Coca-Cola Co.

Maj. Gen. Robert Jefferson Wood, deputy chief of research and development of the Army, will address the Washington banquet Oct. 27. He will describe missile research and military implications of possible future international laws governing outer space.

KENTUCKY Broadcasters Assn. elected its officers at an Oct. 12-15 meeting in Hopkinsville. (L to r): Al Temple of WKCT Bowling Green, president; Francke Fox of WHLN Harlan, first vice president; Don Horton of WVLK Lexington, second vice president, and Dee Huddleston of WIEL Elizabethtown, secretary-treasurer. Mr. Huddleston is outgoing KBA president. New executive committee members are W. T. Isaac, WHIR Danville; Jim Caldwell, WAVE Louis ville, and Katherine Peden, WHOP Hopkinsville.
IBA Calls for Change
In FCC Editorial Rule

The answer to broadcasters’ editorial dilemma is the adoption of a common sense editorializing policy by the FCC.

Illinois Broadcasters Assn. took this stand Oct. 21-22 at its Champaign meeting, proposing the formation of an industry committee to confer with the FCC, members of Congress and other government officials.

What irked the Illinois group most was the requirement that broadcasters must affirmatively seek out responsible persons to present the other point of view. After all, IBA contends, the broadcaster assumes the role of publisher in airing editorials.

Station ownership, responsible to the FCC, must be responsible for editorial policy, according to IBA. The requirement of “a reasonable standard of fairness” was considered acceptable but the duty to seek opposing views “makes practically impossible an editorial policy of force and effect,” according to a unanimous resolution.

The obligation runs into a number of problems, IBA found. These include: Lack of organized opposition or responsible persons willing to oppose the broadcaster’s editorial viewpoint; unfair burden on broadcasters, putting the station in an unrealistic position; if a person is deemed not to be a responsible person, such person might have grounds for court action, requiring proof of irresponsibility.

All this makes it “impractical and unrealistic for a broadcaster to entertain and pursue a serious editorial policy in conformance to present Commission rules, lest his license and livelihood be placed in jeopardy,” IBA said.

Practically anyone who has the money can buy time to say “most anything he desires subject to legal limits and FCC rules,” IBA added, “yet it is illogical that the broadcaster himself is not presently under responsibility to go seek out and sell an ad to someone else to present another point of view, nor can he present such views himself.”

According to IBA, under a strict legal interpretation of present rules “anybody but the broadcaster can have his opinion published.”

Currently there are several important issues before Illinois voters which broadcasters should be free to explain and on which to take a position without fear of FCC or the federal government, IBA explained. These issues include education, hospitalization, welfare and judicial reform.

The editorializing question has been discussed at panel sessions during the NAB Fall Conferences (see Boston conference, page 70). NAB is conducting a detailed survey to determine how stations editorialize. The information is expected to provide a basis for policy guidance and will be submitted to the FCC.

The IBA resolution was offered by Leslie C. Johnson, WHBF-AM-TV Rock Island, Ill., from a committee headed by Joe Bonasinga, WGEM-AM-TV Quincy.

IBA met at the Inman Hotel in Champaign Oct. 21-22.

IBA also elected new officers, including

R. Karl Baker, WLDS Jacksonville, pres., succeeding Charles R. Cook, WJPF Herrin; Vernom A. Nolte, WJBC Bloomington, vice president; M. H. Stuckwisch, WSOY Decatur, (re-elected) secretary-treasurer, and John Dixon, WROK Rockford as director, replacing Adial C. Ferguson Jr., WPRS Paris. Mr. Cook automatically became immediate past president and board member.

The association’s broadcast education committee, named last spring, recommended use of radio-television internships from the University of Illinois for the summer months and also ideas from stations on suggested curriculum subjects for radio-television courses at the University of Illinois and Southern Illinois U.

Speakers at the IBA meeting were Robert T. Mason, WMBN Marion, Ohio, and Mr. Johnson, on All-Industry Music License Committee Developments; Mr. Nolte on the annual Voice of Democracy contest (he reported substantial progress in terms of participation by Illinois stations); Howard Bell, assistant to the president and coordinator for state broadcasters’ associations, NAB (reporting on freedom of information); Irvin Cochrun, director of business management, U. of Illinois (luncheon speaker); Maj. Paul MacDonald, deputy regional director, mobilization region 4, Federal Civil Defense Administration; Paul Bouban, public relations director, FCDA; Tom Vannier, radio relations director, Illinois Agricultural Assn.

VIDEO TAPE MUST BE HARNESSED, Young Tells Pennsylvania AWRT

A cautious view of videotape was expressed over the weekend by a leading station representative. Addressing the seventh annual conference of American Women in Radio & Television (Pennsylvania chapter) in Erie Saturday (Oct. 25), Adam J. Young, president of Adam Young Inc., described VTR as “another mechanical monster” that needs harnessing. Videotape, said Mr. Young, “can hurt you or help you and this may depend on circumstances and on you.”

This is how Mr. Young suggests VTR “might hurt.” Metropolitan stations now are syndicating their locally-produced programs. More of this type of programming will in time displace the local show. “But,” Mr. Young added, “I am not suggesting you are all going out of business. On the contrary, the same machine used on a local level by you, can be your greatest defense against the possibility of any encroachment.” Suggested Mr. Young: Upgrade not only the program quality but that of the commercial, as well.

FULL participation in the FCC 25-890 mc proceedings was voted last week by the board of the Assn. of Maximum Service Telecasters. Meeting at Washington, D. C., headquarters, the board declared it would emphasize the “tremendous stake” the public has in the television portion of the radio spectrum.

The board also voted to offer facilities and funds to the Television Allocations Study Organization in its current tv directional antenna experiments and tests, with particular stress on testing DA’s both before and after installation. The directors also heard a report on completion of the AMST uhf-vhf propagation studies in Wilkes-Barre, Pa.; Baton Rouge, La.; Madison, Wis.; Columbia. S. C.; Fresno, Calif.; Buffalo, N. Y., and Philadelphia, Pa. New members elected to AMST are WDAF-TV Kansas City, Mo.; and, KSPW-TV Salinas, Calif.

Attending the meeting were the following (I to r): Seated: Alex Keese, WFAA-TV Dallas, Tex.; John H. De Witt Jr., WSM-TV Nashville, Tenn.; Joseph B. Epperson, WEWS (TV) Cleveland, Ohio; Ernest W. Jennes, Washington, D. C., attorney; Jack Harris, KFRC-TV Houston, Tex.; Roytit, director of AMST; Letter W. L. Wed-
The broadcast industry has been "unable to establish an audit bureau to set standards for television" and would welcome such an organization for television "if such were possible," Walter P. Lantz, board chairman of Audit Bureau of Circulations said Thursday.

At the same time Mr. Lantz, advertising director of Shulton Inc., told the ABC 44th annual meeting that "print media must stop following the sales and promotion tactics of other media and must sell more intelligently on the positive and indisputable value of accurate, audited circulation facts."

Many publishers, he claimed, have tried through surveys to prove their readers "are as great in numbers as popular television and radio programs" and thus have "prostituted themselves to the false lure of thin air." He noted that print media has a "unique selling tool in ABC" and should concentrate selling efforts on that distinction.

Mr. Lantz was one of several Thursday speakers including "Frank" M. Cone, chairman of the executive committee of Foote, Cone & Belding.

Andrew Heiskell, publisher of Life magazine, asserted that the responsibility for "leadership necessary for our survival" rests not with broadcast media but newspapers and magazines. So many groups involved in radio-ty-FCC, networks, agencies and advertisers "makes it unlikely that the broadcast media will be anything more than transmitters of entertainment the next ten years."

Networks' preoccupation for buying and selling stations, signing sponsors and talent and promotion represent "heavy duties" which "precludes giving more than casual thought to journalism," he asserted. On other hand, he added, newspapers and magazines think of news as history and not as a commodity to "sponsor a sponsor's jingles."

He called on print media to give more thought to "achieving editorial excellence."

The ABC annual meeting was held at Chicago's Drake Hotel Oct. 23-24, comprising a morning general session and various divisional meetings for advertiser, agency, newspaper, business and farm publication, magazine and other groups. The luncheon speaker Thursday was Robert F. Kennedy, chief counsel for the Senate Rackets Committee.

The text of Mr. Cone's talk pertaining to TV:

"The large national advertiser finds the huge audiences of television an economical means for reaching the necessary millions."

"Most often this large advertiser uses printed advertising, too."

"However, there are some people who use only broadcasting and there are others who use only print."

"The latter, and these are the great majority of advertisers, simply cannot afford the number of dollars required to buy important television."

"These do very well in print."

"The question that has not been answered is whether printed advertising run on television schedules would not produce results.
the all new—632 pages
BROADCASTING YEARBOOK
"One-book library of television and radio information"
46 separate directories indexing the world of broadcasting

Designed to meet your specialized needs, the all-new BROADCASTING Yearbook is the largest and most complete encyclopedia-type book ever published for the business of broadcasting. The information in this book is massive (more than half a million words), and it is organized for speedy reference.

It's a desk-top book. You'll use it constantly throughout the year for facts and figures, names and addresses—for data available in no other single source.

Compiled, edited and written by the same staff that produces BROADCASTING — The Businessweekly of Television and Radio. Serving the business side of broadcasting for more than 27 years.

equal to those from television relative to total audience and total cost. "There are those who think the continuous scheduling of television advertising may have a greater effect than the nature of the medium.

"Television, like radio, demands weekly scheduling in the case of most nighttime programs and five-times-a-week scheduling in the case of daytime programs. "Printed advertising can be bought and generally is bought on a far less frequent schedule. "Some testing of much greater frequency in printed advertising currently is indicated." 

**SMPTE Names Simmons At Semiannual Meeting**

Dr. Norwood L. Simmons, West Coast Div., Motion Picture Film Dept., Eastman Kodak Co., last week was elected president of the Society of Motion Picture and Television Engineers, SMPTE held its 84th semiannual convention at Detroit's Sheraton-Cadillac Hotel. Dr. Simmons, former governor, editorial vice president and executive vice president of the society, succeeds Barron Kreuzer of RCA.

Elected as executive vice president is John W. Servis, vice president of National Theatre Supply Co. Glenn Matthews of Eastman Kodak was re-elected editorial vice president. President Reid H. Ray of Reid H. Ray Film Industries, St. Paul, Minn., is the new convention vice president. William H. Holle of DuPont's Photo Products Div. remains in the post of secretary.

Newly elected to two-year terms on the board of governors: Gerald G. Graham, director of technical operations, National Film Board, Montreal, Quebec; Robert C. Reineck, chief engineer, CBS News, N. Y.; Kenneth M. Mason, manager, Midwest Div., Motion Picture Film Dept., Eastman Kodak Co., Chicago; James L. Wessell, market manager, professional equipment, Bell & Howell Co., Chicago; Ub Iwerks, director of technical research, Walt Disney Productions, Burbank, Calif., and Theodore B. Grenier, chief engineer, tv and radio, ABC, Hollywood.

The society's 6,500 members were addressed one opening day by Encyclopaedia Britannica Films President Maurice B. Mitchell. He called for provision by the schools of more basics in the sciences and sociology to keep pace with technological development.

**Electronics May Replace Brain, Spaceman Tells Electronics Meet**

The world will become "more and more influenced by electronic technology" as it nears the real space age, delegates to the National Electronics Conference in Chicago were told.

That view was expressed by Dr. Simon Ramo, president of Space Technology Labs (division of Ramo-Wooldridge Corp.), in a talk on "Space or Electronics—Which Will Dominate the Century?" (Ramo-Wooldridge Corp. has overall scientific direction of the USAF ballistic missile program.) Dr. Ramo spoke at the Hotel Sherman Oct. 15. More than 10,000 scientists, engineers and educators attended this 14th annual meeting, held Oct. 13-15. Sponsors were American Institute of Electrical Engineers, Illinois Institute of Technology, Institute of Radio Engineers, Northwestern U. and U. of Illinois.

"What the world needs most today is a good $5 electronic brain," Dr. Ramo told delegates, adding man's activity the next century will be determined largely by the replacement and extension of his intelligence by machine.

Some 300 technical papers were presented at the conference, including a report on work being done by Panel Four of the Television Allocations Study Organization. TASO's tv field strength measurement and analysis program was reviewed by Harry Fine of the FCC, and Howard T. Head of A. D. Ring & Assoc. (consulting engineers), both Washington. Dr. William H. Pickering, California Institute of Technology, appeared on an Oct. 14 panel, discussing satellite instruments used to transmit information back to earth.

Highlights among exhibits at the conference were a new transistorized mobile communications center displayed by the Air Force and electronic components by the Army.

**BPA Adds 7 Members in Month, Shooting for 300 by Convention**

Broadcasters' Promotion Assn. added seven members during September and hopes to attain 300 memberships by the time of its third annual convention in St. Louis next month.

Elliott W. Henry Jr., ABC Chicago and BPA president, reported 70 stations and associated companies have joined the organization since Jan. 1. BPA was founded in November 1956 and now claims 250 members.

Nearly 100 advance registrations have been received thus far for the BPA convention seminar at St. Louis' Chase Hotel Nov. 16-19, Mr. Henry also reported, with the agenda near completion [Trade Assns., Oct. 13].

September additions were Walter G. Paschall, WSB-AM-TV Atlanta, Ga.; Mike Shafer, WAVY-AM-TV Portsmouth, Va.; Evelyn Winters, KIDO Boise, Idaho; Charles Sebastian WTAQ La Grange Ill.; Robert W. Bidlock, WIBC Indianapolis; Connie Blackstead, North Dakota Broadcasting Co., Fargo, and Thomas F. McCollum Jr., WXEX-TV Petersburg-Richmond, Va.

**Mutual Adv. Agency Network Re-elects Faber, Other Incumbents**

The Mutual Advertising Agency Network re-elected present officers, including F. H. Faber, president, at its fourth quarterly business meeting and workshop session in the Bismarck Hotel, Chicago, Oct. 10-11.

Re-elected for 1959 with Mr. Faber, head of Faber Advertising Agency, Minneapolis, were Gladys Lamb of Kelly & Lamb Adv. Agency, Columbus, vice president-treasurer; Ken Warren, Warren & Litzenberger Adv., Davenport, Iowa, vice president, and James C. Taylor, head of his own agency in Ottumwa, Iowa, as secretary.

MAAN also announced plans for 1959 meets, starting with the Plaza Hotel in New York, Jan. 16-17, and the Bismarck Hotel in Chicago April 10-11, June 26-27 and Oct. 23-24.

**ETV Signal Techniques To Be Studied by EIA**

Methods used for signal distribution in educational television service will be studied by Electronic Industries Assn. Ben Adler, president of Adler Electronics, will head the project. It will cover signal methods within in school systems under a project started by W. J. Morlock, General Electric Co., chairman of the EIA equipment task force, Educational Coordinating Committee.

Mr. Morlock said the study "will involve tv distribution problems which are now unsolved. It is expected to provide the basis for a series of recommendations to the FCC covering educational transmissions. The EIA committee is preparing a booklet designed to aid educators in evaluating educational tv systems.

**Radio’s Need of New ‘Package’ Cited by Sweeney at Texas Meet**

The suggestion that radio “redesign and repackaging” itself to dramatize the medium’s ‘newness’ was offered last Thursday (Oct. 23) of Kevin Sweeney, president of the Radio Advertising Bureau, in a talk before the Assn. of Broadcasting Executives of Texas in Dallas.

Mr. Sweeney asserted that radio salesmen have a new product both in network and the spot field and claimed that the product is “substantially improved.” He recommended that radio be given a new “dress” and a new type of selling and promotion campaign and added: “Half-seriously, we might consider [giving] the product a new name like ‘supervision selling’ instead of ‘radio advertising’ [it] might dramatize radio’s function in 1960 marketing.”

**ANA Urges Educational Assist**

The Assn. of National Advertisers is encouraging its members to donate ANA's advertising management guidebook series to colleges and universities of their choice to assist in the education of future advertising managers. ANA's President, Paul B. West,
In New Orleans....
WDSU-TV gives you the picture

Sailing, cruising, fishing, golf—outdoor activities like these will go on right through the winter in America's most different city.

This means that marketing opportunities are different, too. With WDSU-TV's years of experience as a guide, advertisers can take full advantage of this individual marketing picture.

Knowing what New Orleanians like has enabled WDSU-TV to deliver more audience than all other stations combined—day after day, night after night, month after month.*

*ARB—May 26-June 22, 1958
Telepulse—August 1-8, 1958
Nielsen—July-August, 1958
An experimental system of stereophonic broadcasting on a single am channel using a modified conventional am transmitter will be demonstrated without requiring completely new receivers in the home and auto—was unveiled last Wednesday (Oct. 22) by RCA at the David Sarnoff Research Center in Princeton, N. J. Existing am radio receivers could reproduce the stereocasts without the stereo effect; hence the new system is described by RCA as "compatible."

Hailed as "perhaps the longest forward stride in the standard radio broadcast field in nearly 30 years" by Dr. James Hillier, vice president, RCA Labs, the "laboratory system demonstrates the practicality of stereophonic am broadcasting and reception with a single receiver and single transmitter operating within the presently assigned frequency of each am broadcast station."

An application to the FCC for an experimental license to field test the am stereo system in the Princeton area is to be filed momentarily, it was learned. Dr. Hillier said the system is "strictly at the developmental stage, but noted that "with the mounting public interest in stereophonic sound reproduction as a means of achieving the highest fidelity, a new system that provides stereo for the first time exclusively within the standard am radio broadcast band is a development of major significance."

Stereo in fm through multiplexing currently is a hotly-contested issue before the FCC, different multiplexing systems fighting for recognition. Stereo has been considered a potent factor in arousing public interest in fm broadcasting and a significant program and potential booster to help fm broadcasters move farther to the profit side of the ledger. Similarly, stereo has put new life into the consumer phonograph and high fidelity field this year, with manufacturers and recording firms offering new lines of tape and record players and stereo albums and tapes.

The RCA am stereo system uses the two symmetrical sidebands to the main carrier frequency to provide two "channels" needed for stereo material.

Although technical details were not related fully, it was learned that the am stereo program could achieve no higher "fidelity" than the normal am broadcast station, or about 5,000 cycles under existing environment of the crowded standard radio spectrum. The absolute ideal of a clear channel signal with no adjacent channel interference would be 10,000 cycles, it was said.

The am stereo signal is not necessarily any more susceptible to adjacent channel interference than the present am station, RCA engineering officials said, but the am stereo signal possibly would be more susceptible to man-made and natural interference. The am stereo system was disclosed to visiting groups of NBC affiliated station managers and radio-tv newspaper and magazine columnists. The newsman from throughout the U.S. were on NBC's annual general managers junket, this year New York program and production facilities.

Also demonstrated to the group—and in various stages of development—were many other products which included:

- A portable television system using a seven-inch reel of special quarter-inch videotape (playing time: five minutes at ten feet per second; double program track). About the size of a high quality home magnetic sound tape system, the new 7v tape unit is described as an eventual adjunct to the home tv set and having portable field pick-up application in the broadcast and industrial fields. Because of picture lag due to the vidicon's present photodiode material, its first use will be in closed-circuit application. It's still in the laboratory stage.

- A portable, transistorized color tv system using new one-half inch ("king-size cigarette size") vidicon pickup tubes. The camera weighs 20 lbs.; monitor and control pack (suitcase size), 45 lbs. The system uses 75 w against a 4,000 w drain of the conventional studio color camera chain. Laboratory stage.

- A battery-operated portable television receiver using transistors. Self-contained batteries run the 14-inch picture tube set for 12-14 hours or hook it into the auto cigar lighter. It weighs 30 lbs. A personal eight-inch portable also was shown. "Pretty well out of the laboratory," now in hands of the Commercial Product Div. of RCA.

Host for the Princeton demonstration besides laboratory officials was RCA board chairman, Brig. Gen. David Sarnoff, introduced by NBC board chairman Robert Sarnoff. NBC President Robert E. Kintner and other network officials also attended. Laboratory officials with Dr. Hillier at the demonstration also included Dr. Irving Wolf, vice president-research, and Humboldt W. Leverenz, assistant director of research.

General Sarnoff said an editor asked him if RCA wasn't concerned about having some competitor beat it to the patent by displaying details of research achievements so early. Commenting, "Of course, patent is a dirty word around here," Gen. Sarnoff continued extemporaneously in a more serious vein, "It is RCA policy to make research and development work public as soon as possible." He said it shows the pathway of art and industry through which can be estimated certain trends for the future.

"What we are engaged in is the communication business. The communication of messages to the human brain," he said. "Who is to say how the brain wants to receive the messages . . . our job is to make all of the avenues available . . . to provide a combination of some or all of the messages which inform, educate or entertain, or aid national defense . . ."
out there first. Our industry has grown up. There are opportunities for everyone—those who are second and third. There is sufficient reward—or ought to be—for the pioneer.”

General Sarnoff compared the pioneer of a former age, who seldom beheld the fruition of a life's labor, with the electronic pioneer today who is able to witness it.

Dr. Hillier told newsmen it would require “several years” of field testing and FCC rule-making before the am stereo system could be put into practical operation. He cited four advantages of such a system:

1. Stereophonic music and other program material can be sent from a single transmitter operating within the present am frequency of a broadcasting station.
2. Stereophonic reception is accomplished with a single receiver feeding into matched speakers that can be brought into balance with a single control.
3. Since the system operates in the regular am broadcast band, it can be used for automobile radios “for which am systems are not practical.”
4. The stereo system is adapted to present am broadcast techniques, so that it could be introduced without causing obsolescence of present conventional receivers.

Dr. Hillier noted that a stereo system using am and fm together “requires the home listener to use two different types of radio which are usually unmatched and difficult to tune to the proper relationship for a full stereo effect. Moreover, it requires the broadcaster to use two transmitters and two separate broadcast frequencies. The fm system benefits listeners who have appropriate special fm equipment, but many home radios and all automobile radios receive only am broadcasts.”

Although listeners would have to buy a completely new stereo am receiver—also still in the developmental stage—to pick up the stereocasts, RCA spokesmen said those who have stereo phonograph equipment with separate speakers would be able to use the speakers and purchase only a stereo receiver and tuner.

The RCA engineers noted existing am radios, as a practical matter, could not be converted to stereo nor could some form of external adapter units be used.

A passing observation was that the usual “corner drugstore” version of the cheap am table radio—a very common item in the U. S. household—doesn’t deliver much more than 5,500 cycles of frequency response, or “fidelity.” Although the stereo system doesn’t go much above that, one official admitted, the stereo effect produces an “awareness” of fidelity greater than that of a “monophonic” signal which has the same frequency range.

The new am stereo system was developed by Dr. H. F. Olson, director of the acoustical and electro-mechanical research laboratory, and a research team which included R. W. George, D. S. McCoy, L. E. Barton, H. G. Allen and C. W. Hansell.

The experimental tv tape player shown represents a “major advance” over the original equipment first demonstrated in 1956 on the occasion of Gen Sarnoff’s 50th anniversary in radio. Among recent developments incorporated in the player are newly developed magnetic heads with uniform pickup characteristics and gains in signal-to-noise ratio achieved by the perfection of components to carry the low frequency part of the picture signal. The double-program “track” on the quarter-inch tape also is an innovation to double the playing time of the reel. With new reel and hub design RCA expects to extend the playing time up to a half-hour from the present five-minute run. Each program track can actuate a composite containing four recorded tracks: one for synchronizing signals, a second for picture high frequencies, a third for picture low frequencies and a fourth for audio. Thus, there are eight tracks recorded side by side on the quarter-inch tape. Although the seven-inch reel is similar to that used in audio recording today, the tape used in the tv player is of the same quality and precise manufacture as the professional two-inch video tape now in use.

The ultimate goal is a videotape reel, recorded with tv program, which RCA can market to the consumer for $5, one company official disclosed. The tape is a reel-to-reel reel, similar to the one-inch vidicon tube, that includes a tape unit attached to the tv set in the living room, just like the audio tape reels of music now being marketed by RCA for home tape “phonographs.”

Work is now underway on a recording attachment to be added to the player to permit it to function as a portable videotape recorder as well as player, functioning off the tv set in the home or in a tv broadcaster’s mobile field unit. Home tv photography, using a yet-to-come cheap home vidicon camera with the player-recorder and tv set, is another sales goal for the future, RCA said.

RCA engineering officials said the tape player, operating at 10 feet per second, records 20 kc of information on each inch of tape and passes 2 to 2.5 mc of information. The picture played back through the monochrome tv set presently has a resolution of 200-250 lines, they said.

Dr. Olson’s research team on the tape player project includes W. D. Houghton, A. R. Morgan, J. G. Woodward, George Kasyk, R. F. Sanford and R. E. Morey.

Dr. Hillier estimated the tape player-recorder will take “less than 10 years and at least 2 years” to become ready for commercial product design and production.

The new vidicon color tv system using half-inch vidicon pickup tubes was shown along with the larger one-inch vidicon color system now in color-circuit use at Walter Reed Hospital in Washington and elsewhere. The smaller system is intended to ultimately supplement the larger system with “possible” applications cited as field pickup for color telecasting, the military and sales promotion.

Considerable work is still to be done on the cigarette-size vidicon pickup tube as well as the system itself, since some of the 300 translators used also are just in the developmental stage. The picture “lag” problem makes it unsuitable at the present for following fast motion, but RCA officials

BOZO®

CAPITOL

CLOWN

156 CARTOONS IN MAGNIFICENT ANIMATION

BRAND-NEW—FULL COLOR—ESPECIALLY MADE FOR TELEVISION

Now—Jayark brings to TV the most successful personality ever conceived. BOZO is pre-sold to countless millions of children and adults. BOZO's universal appeal and sales impact have never been equalled.

BOZO'S CARTOON STORYBOOK

156 CARTOONS • EACH 6 MINUTES • FULL COLOR or B/W • MAGNIFICENT ANIMATION • PACKED with ACTION • LOADED with LAUGHS

BOZO and his friends will keep your viewers in suspense and in stitches. They travel to the moon ... They climb Mt. Everest ... They even "run" Macy's and Gimbel's. Each thrilling cartoon is jam-packed with action and jaw-cracking laughter ... No Cliff-Hangers!

AVAILABLE WITH ANIMATED COMMERCIAL LEAD-INS STARRING BOZO HIMSELF

Backed by huge merchandising and promotion. BOZO merchandise items now carried in stores, coast to coast. More than $1 million BOZO Capitol Albums already sold!

BOZO is a guarantee of absolute top-rated cartoon leadership in your market. Fresh, new and pre-sold, BOZO is sure to deliver the lowest cost-per-thousand audience ... sure to deliver unparalleled impact in advertising results!

MERCURY
ΣΠΟΤΔΗ
SPEED

all right, all right,
we know his Greek name is Hermes, but
out here in Ohio, we like to call him by
his plain everyday Latin name of Mercury.

Now—in very olden times, when
the gods hung around Mount Olympus,
doing the nectar and ambrosia bit,
Mercury sped around the place on his winged
feet, acting as Messenger for Zeus,
and spreading the news around among
the gods. The gods probably were very fond
of Mercury, because without him to tell
them what was going on, they'd have
to scrounge around and get the news
as best they could.

No doubt about it, Mercury was
the fastest kid of his day, but in this elec-
tronic century, he'd be way out of date.
For instance (and here comes the com-
commercial) he couldn't compete today with
WCKY's Newsbeat. Cincinnatians know
they can depend on WCKY's Newsbeat
to bring them the news of the day, and
we do mean fast! Most local stories are
heard FIRST on WCKY's 33 Newsbeats
a day. All Cincinnati is speedily in-
formed of what goes on locally and
nationally in concise, up-to-the-minute
newscasts on the hour and half hour.
Cincinnati relies on WCKY for news,
because Cincinnatians know that WCKY
brings them the news first!

If you'd like to know
more about WCKY and how it can sell
your product, call Tom Welstead
at WCKY's New York Office, or AM Radio
Sales, Chicago and on the West Coast.

were optimistic about overcoming this
hurdle.

In the field the suitcase size system would
function from auto batteries. Contact
transistorized synchronizing generator and a
colorplexer unit to produce an NTSC
color signal are included. The tiny system
also permits the use of standard 8 mm
motion picture type lenses in the camera.

The new vidicon system was developed
under the supervision of Dr. V. K. Zwortyn-
kin, honorary vice president of RCA, by
a technical team headed by L. E. Fiory and
including J. M. Morgan, W. S. Pike and
L. A. Boyer. The half-inch vidicon pickup
tube was developed by A. D. Cope of the
RCA Labs technical staff.

Electronic Research Millions
Provided by American Industry

American industry is spending large sums
for electronic research, according to a
survey conducted by the U. S. Bureau of
Labor Statistics for the National Science
Foundation.
The study shows $137 million was spent in
1956 by American industry for telecommu-
nications and broadcasting research and
development effort. The total amount spent
for all electronics research and development
was $1,393 million. The 1956 tele-
communications and broadcasting expendi-
ture was up 51.4% over 1953.

MANUFACTURING SHORTS

International Radio & Electronics Corp.,
Elkhart, Ind., reports marketing of auto-
matic tape player which will play up to 16
hours with 14" reel at 33 1/3 ips and eight
hours at 7 1/2 ips. Also plays stereo automatic-
ally both ways. Includes Crown-O-Matic
Transport with four-track heads and two

Miratel Inc., St. Paul, Minn., announces
new "Instrumentation Series" of rack
mounted monitors. Features include front
panel controls, plug-in construction, 8 mc
video bandwidth, self-supported kine. Front
panel is removable without having to remove
monitor chassis or tube. Panel space re-
quired for 14" monitor is 14 inches and
17" requires 15 3/4 inches. Models are avail-
able in 8" at $221, 14" at $228 and 17" at
$234. Miratel's address is 1080 Dionne St.,
St. Paul, Minn.

RCA semiconductor and materials division
is expected to start construction soon of new
90,000 sq. ft. expansion in Somerville, N. J.,
plant, according to Dr. Alan M. Glover,
v.p. and general manager. Expansion, said
Dr. Glover, is expected to be completed
by April 1957.

Mackenzie Electronics Inc., Inglewood,
Calif., announces Model SCPB, five channel
selective program repeater designed for use
in radio, tv, film and sound recording fields.
Main feature is instantaneous stop-start "on
cue" playback of pre-recorded spot an-
nouncements, music bridges, sound effects,
station breaks and similar material which
can be cued in at push of button by d.j.
sound effects or control engineer.

Fry to Crisler as Midwest Mgr.

Paul R. Fry, president of Inland Broad-
casting Co. Omaha, Neb., is joining R.
C. Crisler & Co. (station broker) as
midwest manager. Inland sold KBON
Omaha last month [CHANGING HANDS,
Sept. 22].

With headquar-
ters in Omaha (P. O.
Box 1733 Benson
Station), Mr. Fry
will cover an area
extending from Can-
da to the Gulf of
Mexico. He is a director of Nebraska
Broadcasters Assn. and a member of NAB's
Radio Standards of Practice Committee.

Sid DuBroff Assoc. Formed

Formation of Sid DuBroff Assoc., 570
Fifth Ave., New York, to specialize in mer-
chandising and sales promotion for tele-
vision, radio and advertising, has been an-
nounced by Sid DuBroff, president of Prize
Merchandising Inc., New York. The new
firm will handle merchandising for NBC-
TV's Haggis Baggis and syndicated tv series
Bingo-At-Home, Lucky Partners, and Spino.
Mr. DuBroff formerly was managing direc-
tor of Spotlight Promotions.

PROFESSIONAL SERVICES

Management Consulting Firm
Organized by Stubblefield

William T. Stubblefield, member of the
broadcast brokerage firm of Hamilton, Stub-
bblefield, Twining & Assoc. since the group's
formation early last year [PROFESSIONAL
SERVICES, Feb. 18, 1957], last week an-
nounced the forma-
tion of his own man-
agement consulting
organization, effec-
tive Oct. 31. Mr.
Stubblefield will
service his station
clients from his head-
quarters in Washing-
ton, D. C.'s Ring
Bldg. The telephone
is Republic 7-7383.

A former broadcaster and station rela-
tions director of NAB, Mr. Stubblefield
joined Hamilton, Stubblefield, Twining &
Assoc. as Washington chief. The then new
brokerage firm was an outgrowth of the dis-
solution of the 1957 Blackburn-Hamilton
Co. Mr. Stubblefield had been di-
rector of the Blackburn-Hamilton San Fran-
cisco office with W. R. Twining. Mr. Black-
burn continued in the brokerage business
with his own organization. At present,
Hamilton, Stubblefield, Twining & Assoc.
haves offices in Chicago, Washington, Cleve-
dland, Dallas and San Francisco.

ANOTHER STEP TOWARD EQUAL ACCESS

Radio and television will be admitted to hot Indiana murder trial

There will be no restrictions on radio-tv when the much-publicized Forrest Teel murder case comes up in an Indiana criminal court next month.

Indeed, broadcasters appear to have won another round in their fight to cover courtroom proceedings on a par with the press—and discovered a new champion in Saul I. Rabb, judge of Div. 2 of the Marion County (Ind.) Criminal Court. He said:

"Canon 35 violates the inherent right of the people to know what is going on in their courts."

Judge Rabb, who handles over 1,200 cases annually, laid down ground rules for the forthcoming trial of Mrs. Connie Nicholas, charged with the murder of Forrest Teel, executive vice president of the Eli Lilly Co. The Teel killing last July attracted national attention. The case comes up in late November.

Judge Rabb's views were contained in an interview with Bob Hoover, mobile news chief of WIBC Indianapolis.

In it he summarized his views on the American Bar Assn.'s rule prohibiting cameras and microphones in courts of law. Excerpts of the interview were made available to Broadcasting last week.

The trial is expected to attract radio and tv newsmen from all parts of the country—but it is "no different from any other trial of its kind," according to Judge Rabb. "I cannot see why it should be treated differently." Visiting and local newsmen are expected to bring cameras, microphones, tape recorders and other assorted gear, prepared for both live and delayed radio-tv coverage. What can radio-tv reporters, especially visiting newsmen, expect from Judge Rabb?

"They will be treated just as local news media have long been treated in my court. There will be nothing denied them as long as they do not attempt to interfere with the smooth and legal operation of the trial. How well they succeed is up to them. Hereinafter, I have experienced the most pleasant relations with men of this vocation and I hope it continues. They need fear no interference from me as long as they conduct themselves as the gentlemen I know them to be . . ."

Judge Rabb feels inherently that anyone coming into the public eye through the medium of the courts thus forfeits his right to privacy, he told Hoover. "He becomes what we call quasi, which translated into a phrase understandable by the layman, means that he has become a halfway public official. By that I mean a borderline public official, not necessarily an elected or appointed one. When a man has placed himself in such a position, then I think he gives up his right to privacy when it concerns the public."

Judge Rabb told Mr. Hoover he has permitted perhaps 10 or 12 cases to be televised, broadcast, photographed, or taped during his years in court and that "news media are always welcome."

Judge Rabb started disregarding Canon 35 several years ago at a widely-publicized trial at which he permitted news media to circulate freely, which was considered news itself.

He explained his position thusly:

"This rule about not taking pictures in court is a canon of the bar association. I think that if they would go into it now and see how news media operate without noise, without flash lights and with modern equipment that they would re-write the regulation and permit it generally just like they have permitted newspaper reporters to operate for years. The camera and the tape recorder are the pens of radio and tv."

"Canon 35 should be interpreted by each judge in the community in which he lives. Each judge knows his own problems. They can act accordingly. I have never been opposed by the Supreme Court for my feelings toward Canon 35 and 1,200 cases go through my court annually."

"In other words I feel that since the camera and tape recorder are the pens of tv and radio there can be no errors made in the taking down of testimony or of any conversation by judge, prosecutor, defense lawyers, witnesses or the defendant. When it is on film or tape it is a permanent record speaking for itself."

"Let me say this. A court is a place where justice must be meted out fairly and squarely. I will go along with all news media at all times. I shall expect them to conduct themselves as gentlemen and to go along with me."

"I will not tolerate anything which I deem not to the good of the defendant who is presumed to be innocent until proven guilty beyond any reasonable doubt. Naturally I can get tough if the situation demands but I know that I will never have to resort to this because the record of the past will continue to be the record of the future among news gatherers."

'NEWS MEDIA ARE ALWAYS WELCOME'

Judge Saul I. Rabb, who will preside at the trial of the woman accused of killing Forrest Teel in Indianapolis, is an old friend of newsmen. Here's a report on Judge Rabb as given to Broadcasting last week by Bob Hoover, WIBC newsmen:

Judge Rabb began his legal career in about 1940. He engaged in private law practice for several years and then was appointed a deputy Marion County prosecutor. One of his outstanding investigations concerned the brutal slaying of Naomi Ridings, a WAC stationed at Ft. Benjamin Harrison near Indianapolis during World War II. Her body, chopped to ribbons with a broken whisky bottle, was found in a room in the Claypool Hotel. The mystery never was solved although Mr. Rabb and a number of special deputies and homicide men together with FBI agents worked for weeks. At the time, Mr. Rabb shot straight from the shoulder with the news media. Nothing was withheld within reason.

The Indiana state legislature created Criminal Court Div. 2 some 10 years ago and Mr. Rabb was appointed judge. Later he ran twice for election and won. He is running this year for a third term.

"In all," he continued during our interview, "I believe that I have allowed to be televised, broadcast, photographed, taped and what have you, about 10 or 12 cases. Of course, news media are always welcome and they flock around in the less prominent trials for human interest stories and pictures. But the 10 or 12 I speak of have been dillies and I could see no reason for disallowing [newsmen] the right to function as long as they kept within the bounds of propriety and did not interfere with the meting out of justice. I've never had a squabble with any one of the 40 or 50 who have been my guests."
“I always look forward to Ad Age…”

says GORDON BEST
President
Gordon Best Company, Inc.

“I look forward to Monday morning as the time to get my advertising signals straight because, if there’s any business that’s full of rumors—it’s advertising. I start the day with Ad Age. First I look at the front page headlines, then ‘Last Minute News Flashes.’ By this time, half the rumors have been blown sky-high, and some are confirmed in detail. I get this information in minutes—the rest I absorb at home. I always look forward to Ad Age as an informative starter for each busy week.”

Fifty-two Mondays a year, most of the executives of importance to you count on Ad Age to get their advertising signals straight. For week in, week out Ad Age reports, analyzes and clarifies the news and trends of particular interest to those who influence as well as those who activate the selection of markets and media.

At Gordon Best Company, Inc., for example, where $7,300,000* of its 1957 billings were placed in radio and television, planning broadcast schedules is a vital part of the agency’s operation. Among its accounts are such major broadcast advertisers as Helene Curtis Industries, Inc.; Dumas Milner Corp. (Pine-Sol, Perma Starch, etc.); and The Maybelline Company.

Every week, 14 paid-subscription copies of Ad Age keep Gordon Best executives up with the changes and developments affecting them. Further, 23 paid-subscription copies reach advertising and marketing professionals of the companies mentioned.

Add to this AA’s more than 42,000 paid circulation, its tremendous penetration of advertising with a weekly paid circulation currently reaching over 12,500 agency people alone, its intense readership by top executives in national advertising companies—and you’ll recognize in Ad Age a most influential medium for swinging broadcast decisions your way.

---

GORDON BEST

Mr. Best has chalked up an enviable record of over 40 years in the agency field—all at the same company. In 1917, after attending Northwestern University, he joined the McJunkin Advertising Company. Starting in production, he advanced to positions in media and copy, and by 1929, he had become vice-president in charge of all creative departments. He was named president of the McJunkin company in 1941. Seven years later, the agency’s name was changed to Gordon Best Company, Inc. Like its president, some of the firm’s accounts also have “stayed put” successfully for more than four decades.

Identified with the creation of many well-known advertising themes—including “Just the Kiss of the Hops” for Schlitz beer, Mr. Best continues to head his agency’s creative services and planning for clients. His after-hours interests include painting in oils, taking color photographs and playing the organ.

*Broadcasting magazine 1957 report.
Kohn Appointed General Manager As WGMS Revises Its Good Music

Raymond F. Kohn, president of WFMZ (FM) Allentown, Pa., has been named general manager of WGMS Washington.

S. Ury, who served in the capacity at WFMZ and WFMZ-FM; chief engineer, Rogers B. Holt, formerly with WGTH-AM; TV and WPOP, all Hartford, Conn., and director of public relations, Sol Hurwitz, former account executive with House & Gersten Adv., Washington.

WONA Commences Operations

Regular programming was scheduled to begin on WONA Winona, Miss., Saturday (Oct. 25). The outlet is owned by Southern Electronics Co. (Bob McRaney, formerly general manager, Mid South Network, and Bob Evans, Mid South's present general manager). Southern Electronics also owns WAMY Amory, Miss. Mr. McRaney owns WROB West Point, Miss. Bob Chisholm, formerly owner-manager of WMBC Macon, Miss., is WONA's station manager; Billy White is chief engineer, Les Campbell is chief announcer. The daytimer is 1 kw on 1570 kc. Its address: 107 Summit St., Winona. WONA is affiliated with Mutual, Mid South and Keystone networks.

WTOL-TV Hopes for ’58 Kickoff

Ch. 11 WTOL-TV Toledo, Ohio, has announced that it expects to begin transmitting test signals next month and regular programming in December. Frazier Reams, president of companion WTOL, is 75% owner of WTOL-TV. Permittee is The Community Broadcasting Co.

WJIM Stations Give Dividend

Gross Telecasting Inc. (WJIM-AM-FM-TV Lansing, Mich.) has announced payment on Nov. 10 of the regular quarterly dividend of 40 cents a share on common stock and 7.5 cents a share on Class B common, to shareholders of record Oct. 27. Harold F. Gross, president of the firm, reported that revenues for the nine months ended Sept. 30 increased to approximately $2 million as compared with $1.9 million the previous year. It was also reported that net income on the 200,000 shares of common stock and the equal number of Class B common increased to $1.32 as compared with $1.26 last year.

The campaign is now in Phase Three. Because word of the first sets had spread fast among the 450 tv repair companies in the area, new sets were obtained and put into new locations, and a second list of 30 companies is being called.

These are the principal irregularities WGDC has uncovered to date: (1) over-pricing—one firm charged $4.05 for a 65 cent resistor; (2) replacing good tubes along with the bad—the same firm ran its bill up to $15.51 by making unnecessary repairs; (3) taking the replaced tubes from the home rather than leaving them with the set owner; (4) manipulating the set to indicate other defects—one repairman adjusted the ion trap on the picture tube to make the picture darker, then tried to sell a $7.95 “picture tube rejuvenator” to make it bright again; (5) advertising house calls for “no charge, or $1, or $1.25, or $1.50” when in reality the charges would run between $3.50 and $5 plus parts.

WGDC itself cancelled all tv repair advertising after the start of the editorial campaign and will continue the ban until after the first of the year then will reevaluate the situation in light of findings.

The editorials are run at frequent intervals during the broadcast day on WGDC and WGDC-FM. They are presented by Ben Strouse, station president; the campaign is under the direction of Joe Phipps, news director.

No doubt about it—when the boss, or any other non-professional, wants to make a public appearance on TV, it’s best to have him do it on film!

When it’s on film, you’re in control. Flubs are just scissored out. Mistakes won’t get through because you see the show before you show it. You’re in control, too, of time and station . . . show it any time, anywhere you can get a clearance.

Use black-and-white—or color—there’s an Eastman Film for every purpose.

Motorola Uses Twin-Am Stereo
Via WFPS, WMID Atlantic City

An all-am approach to binaural transmission—utilizing two am stations—for stereophonic broadcasting is reported by Motorola Inc., Chicago electronics manufacturer, for one of its eastern distributors.

The experiment was launched on WFPS and WMID Atlantic City, Oct. 3, with “excellent results,” according to Motorola. The test was extended to a daily hour-long program 7-8 p.m. on Oct. 15, with Motorola as exclusive sponsor.

Programming originated from the studios of WFPS, which airs the left half track, while WMID broadcasts the right one. Range of the stereo broadcasts is claimed to be about 50 miles around Atlantic City.

Motorola noted that while previous stereo programs have utilized one am and one fm, or perhaps a tv plus am or fm outlet, the Atlantic City broadcasts are believed to be the first employing two standard am stations.

WIS-TV Seeks Army Permission To Cover Nearby Court-Martial

WIS-TV Columbus, S. C., is currently involved in an argument with the U. S. Army over the right to film certain court-martial proceedings at nearby Fort Jackson, S. C.

The controversy was brought to the attention of the resolutions committee of Radio Television News Directors Assn. at its recent Chicago convention (see page 72; also, TRADE Assns., Oct. 20), but no action was taken. The matter was referred to Ed Ryan, WTOP Washington, head of the organization’s freedom of information committee.

Bill Minshall, news director of WIS-TV, said the station has been covering activities of Fort Jackson by tape and film on a regular basis. Recently, Mr. Minshall unsuccessfully requested permission to shoot film in the court-martial room and tape-record the testimony in a case involving mistreatment of recruits. He also sought free use of film outside the courtroom and sound camera interviews.

Mr. Minshall reported he filed another direct request with Secretary of Army Wilber Brucker and is awaiting a reply.

Retail Group Hears McGannon
On Radio-Tv and Sales Patterns

Westinghouse Broadcasting Co. President Donald H. McGannon, sees a distinct connection between the sales curve and the advertising wave length. Speaking before an audience of 1,000 business leaders attending the 30th annual Boston Conference on Distribution (sponsored by the Boston Chamber of Commerce’s Retail Trade Board) last Monday (Oct. 20), the WBC president pointed out that the recent recession sparked close re-examination of advertising policies.

One possible result of this re-appraisal to Mr. McGannon: more radio-tv in the future of national advertisers—probably at the expense of other media. “Any major store,” he said, “that is not using television and radio advertising, is 10 years behind the times.” Broadcasting media, unlike others, “have no delivery problem and reach people wherever they are”—a reference to the rapid growth of suburbia. “There are more homes with tv sets today than there are homes with bathtubs. With the decline of the bathtub, this would seem to suggest that bathtub manufacturers ought to be using radio and television to sell bathtubs.”

After describing “many strange and wonderful things” radio-tv can do and have done for advertisers, Mr. McGannon waxed theoretical. “Perhaps some of you are not convinced,” he said, “because it didn’t work out that way when you tried it. Gentlemen, broadcasting is not the universal panacea, the magic elixer that cures all distribution ills. However, it cures a good many of them and where radio and television fail, there is often a good reason.” Among them: (a) how the story was presented in radio-tv; (b) whether a fair trial was given the media; (c) whether radio was used “as what it is—a saturation medium delivering countless thousands of impressions at low cost”; (d) whether timing was right (“... Did you consider [that] failure because it couldn’t sell snowshoes in July?”) and (e) “Do you try to carry over print media techniques into broadcasting? Did you buy a bright, shiny new Cadillac, and then hitch a horse to it?”

STATION PROFIT & LOSS

- Earned surplus of the Northwestern Publishing Co., licensee of WDAN-AM-TV Danville, Ill., and publisher of the Commercial-News, was $393,930 as of June 30, according to a license renewal application filed with the FCC. The company is associated in ownership with the Gannett Co. newspapers and radio-tv stations.

- Northwestern listed current assets of $431,673, fixed assets of $475,021, intangible assets of $360,581 and total assets of $475,277. Current liabilities were $251,347.

- West Central Broadcasting Co., licensee of WDEQ-TV Peoria and WEEQ-TV La Salle, both Illinois, had an earned surplus of $63,288 and a capital surplus of $169,283 as of last July 31, according to applications for license renewal with the FCC.

- Current assets were listed as $269,593; property and equipment $598,764, and total assets $902,895. Current liabilities were $221,160 and long-term obligations included $28,145 in notes payable to stockholders.

- The Chicago Federation of Labor, licensee of WCFL Chicago, had $925,902 current assets as of June 30 of which $253,358 was in accounts receivable by WCFL, it was indicated in the station’s application filed with the FCC for license renewal. The federation had total assets of $1,872,767, including $668,177 in investments and $278,687 in fixed assets.

- Current liabilities were $57,716 and long-term liabilities and credits $94,171.

- Total net worth was $1,778,595 including $1,029,893 invested in WCFL.

Lee Named Executive V.P. For Fetzer Broadcasting Co.

Top-level executive changes, including the elevation of Carl E. Lee, sales manager, to executive vice president and general manager of Fetzer Broadcasting Co., was announced Wednesday by John E. Fetzer, president.

In other appointments: Donald W. Desmond, sales manager, of WKZO-TV Kalamazoo, Mich., took on additional duties as administrative assistant for tv; Otis T. Gaston was promoted from administrative assistant to station manager of WKZO Radio; E. L. Tait was named secretary-treasurer and Robert C. Van Horn, assistant secretary, both of Fetzer Broadcasting Co., and Robert L. Hoffman was appointed station manager of Fetzer’s WJEF Grand Rapids. Mr. Van Horn also becomes secretary of the affiliated companies. Mr. Lee joined Fetzer in 1939. He was promoted to administrative assistant in 1951, and elected a vice president, man-
"I believe that the time is coming when all the wheels—the railroad wheels, the truck wheels, the air liner wheels and the wheels in the pilot houses—will be moving in closer concert for the good of agriculture and industry.

"I don’t believe we need common ownership in transportation in order to work more closely together. I think that joint rate and service arrangements are just around the corner.

"I feel certain that we can have truly coordinated transport in this country, given reasonable initiative and at least a minimum of good will and good intent."

Guy W. Rutland, Jr., President

AMERICAN TRUCKING ASSOCIATIONS, INC.

WASHINGTON 6, D. C.
aging director and board member of Fetzer Broadcasting in 1953. He is a past president of the Michigan Assn. of Broadcasters.

Mr. Desmit joined the organization in 1946, becoming sales manager of WKZO-TV in 1950. Mr. Gaston came to Fetzer in 1947, serving in various program and sales capacities of WKZO Radio. He was named administrative assistant in 1954. Mr. Tait, formerly with Lear Inc. and Libbey-Owens-Ford, joined Fetzer in 1946, while Mr. Van Horn moved to the company recently after being associated with Allen Electric Co. Mr. Hoffman was identified with stations and civic groups in Galesburg, Ill., and Lincoln, Neb.

**DISCOUNT TICKETS**

Investigations arising out of editorials by KFKF Bellevue, Wash., and a statement aired on the station by a former police sergeant, have resulted in the suspension of the local police chief and a policewoman.

In KFKF's editorials it called for a special city council meeting to investigate the ex-officer's charge that certain of Bellevue's leading citizens paid traffic tickets at a discount or had them dismissed. A public hearing was set for the taking of testimony and the receipt of evidence.

**CHANGING HANDS**

**ANNOUNCED** The following sales of station interests were announced last week. All are subject to FCC approval.

KWRC FENDELTON, ORE. * Sold to Fred W. Stevens by Western Radio Corp. and V. B. Kenworthy for $37,500. The sale was handled by Allen Kander & Co. KWRC is on 1240 kc with 250 w.

**APPROVED** The following transfers of station interests were approved by the FCC last week. For other broadcast actions, see For the Record, page 104.

**KWIP MERCED,CALIF.** * Sold to HDH Stations Inc. (Maxwell Hurst, president) by Joseph Gamble Stations Inc. for $141,500. KWIP is on 1580 kc with 500 w, day.

**WAPX MONTGOMERY, ALA.** * Sold to Ralph M. Allgood and Grover Wise, doing business as The Southland Broadcasting Co. of Montgomery (WDNG Anniston, Ala.) by United Broadcasting Co. for $125,000. This sale was granted on the condition that the assignee dispose of all interest in notes of licensee of WRMA Montgomery, held by it prior to consummation of the WAPX assignment. WAPX is on 1600 kc with 1 kw, directional antenna night, with ABC and MBS affiliation.

**Engineer Points Up Difference In Producing TV, Theatre Shows**

The belief that good theatre can be moved before the tv camera with little adaptation is a "misconception," a leading station engineer observed last week. Speaking before the Women's Press Club of New York Saturday (Oct. 25), G. Edward Hamilton, chief engineer of WABC-TV New York, explained the varying requirements of stage and television.

The theatre, he said, involves triple perception—visual, aural and mental—while television (with the exception of several stereophonic experimental telecasts) relies predominantly on the visual and mental elements. The theatre doesn't rely as heavily on mood lighting as does television where engineers must not only consider the actual lighting of the moment but how it will look in the home.

These two examples, he pointed out, merely illustrate the basic incompatibility of the two media; they can work harmoniously, but only with their own respective tools.

**WCCO Buys Minneapolis Theatre**

The purchase of Radio City Theatre (Minneapolis Amusement Co.) by Midwest Radio Television Inc. (WCCO-AM-TV Minneapolis) [Stations, Sept. 8] was consummated Oct. 16. The quarter-block area in downtown Minneapolis involved in the sale contains the 4,000-seat theatre plus WCCO-TV's studios and offices. Midwest Radio plans to razé most of the theatre. Future plans for the site are not yet set.

**WIND Reprices Peak Hours**

Independent WIND Chicago has issued rate card No. 3, effective Oct. 19, adding a new AA time classification that takes cognizance of peak traffic hours. Rate increases were understood to average about 25%. Class AA time, the only change from the previous card, includes 6:30-9 a.m. and 5:30 p.m., Monday through Friday, and charges for news service are tied to time costs in various classifications. No rate boosts were effected for evening hours.
THROWING the switch at the opening of WJRT (TV) Flint, Mich., is John F. Patt, president of licensee WJR The Goodwill Station Inc. He is accompanied by (c) Worth Kramer, executive vice president-general manager, and A. Donovan Faust, station manager.

WJRT advanced its Oct. 12 opening [STATIONS, Oct. 13] from 5 p.m. to 1:15 p.m. to carry the Detroit Lions' football game. The station originally was granted its FCC permit six years ago but commencement of operations was delayed by court proceedings [GOVERNMENT, Dec. 20, 1954 et seq.].

STATION SHORTS

WQXR Network in New York state has added its 12th affiliate [CLOSED CIRCUIT, Sept. 29]. WHAM Rochester's fm operation (WHFM [FM]) has begun carrying WQXR New York-originated program schedule.

WPIX (TV) New York has signed 51 national advertisers, representing more than $2 million in gross billings, for new tv season, John A. Patterson, sales manager, has announced. Mr. Patterson attributes upswing in business to station's "block-night" programming concept under which programs of similar type and appeal—adventure, drama, movie and family—are scheduled back-to-back for entire evening.

Hildreth Stations (WABI Bangor, WAGM Presque Isle, WABM Houlton, WPOR Portland, all Maine) name Ab-ventures Inc., Portland, Me., as advertising agency in Maine.

WABC-TV New York has achieved record third-quarter in sales paced by gross of $1,250,000 in local and national business in past three weeks, Robert L. Stone, v.p. in charge of station, has reported. Mr. Stone estimates 1958 third-quarter business exceeds that of 1957 by 25%.

KLUB Salt Lake City—Independent since Dec. 31, 1956—has realligned with ABC Radio. KLUB, owned and operated by KLUB Broadcasting Co., operates on 570 kc with 5 kw.

WNBC (TV) New Britain, Conn., announces new rate card, No. 8. One hour of Class AAA time, one time, is $700.
KOBY PLANNING TO ADD GOLD MEDAL TO SILVER NAIL AWARD NEXT YEAR

Planes for selecting the Station Representatives Assn.'s second annual "Silver Nail" timebuyer of the year winner—and for establishment of a new award for former timebuyers—are being announced today (Monday) by SRA Managing Director Lawrence D'Humy.

The new award will be known as the "Gold Medal" and will honor outstanding contributions to the radio and television advertising business. At least 15 years' service in the agency field, including work as a timebuyer at some point in that span, is required for eligibility.

Both the second Silver Nail and first Gold Medal awards will be presented at a luncheon during the latter part of next April. The Silver Nail was created by SRA to honor Frank Silvernail, who was its first recipient at the time of his retirement from BBDO last spring after more than 30 years in advertising.

Winners of Silver Nails are selected by vote of the sales personnel of SRA member firms. Winners of Gold Medals are chosen by heads of member firms from a group of candidates designated by the SRA awards committee. This committee consists of Lewis H. Averly of Avery-Knodel, chairman; Richard O'Connell of the firm by the same name, and Ed Fitzsimmons of the Weed radio and TV firms.

BUTTER-NUT, CALO COMMERCIALS IN CARTOONISTS GUILD FESTIVAL

The "subliminal" commercial for Butter-Nut coffee and the Calo cat food commercial featuring a cat and a lion were judged best among 24 animated TV commercials made by members of the Screen Cartoonists Guild and shown Oct. 17 at the Guild's sixth annual Film Festival at the Sheraton West Hotel, Los Angeles.

The top-ranking Butter-Nut commercial was a product of Fine Arts Productions. The commercial for Calo cat food was produced by Cascade Pictures for Foote, Cone & Belding, San Francisco.

Firms contributing entries this year as in the past were limited to employers of Screen Cartoonists Guild members, but attempts are being made to reach an agreement between this independent union and IATSE's Motion Picture Screen Cartoonists Local 839 for an industrywide animation festival in 1959.

LA. ART DIRECTORS AWARDS OPEN

The Art Directors Club of Los Angeles has invited persons and organizations producing advertising or editorial art or TV commercials within the 12 western states or Hawaii during the year, Dec. 1, 1957-Nov. 30, 1958, to submit entries for the club's annual competition. Deadline for entries is Nov. 3. Awards, medals and certificates of merit will be presented to the winners Feb. 14, 1959, at an awards dinner-dance at the Los Angeles Statler. Outstanding entries will be exhibited during February in the California Museum of Science & Industry, Los Angeles.

AWARD SHORTS

Paul Saliner, conductor of Gadabout Show on WGN Chicago, honored with 1958 VIP award of Illinois Club for Catholic Women for publicizing activities of Chicagoland club events and service to teenagers.

Bishopric/Green/Fielden Inc., Miami advertising agency, has won first place award for TV commercials in annual Miami Art Directors Club contest for fourth time in five years.

San Francisco Giants presented with inter-city Golden West Broadcasters trophy given annually to team winning most games during Giants-Los Angeles Dodgers series. Giants took possession by winning 16 out of 22 games with Dodgers.

WFMY-TV Greensboro, N. C., and its newscaster, Charlie Harville, presented Certificates of Merit by American National Red Cross for "extraordinary cooperation in promotion of Red Cross Blood Program."

W. Dall Cannon, radio-wire transmission research engineer for Western Union Co., N. Y., awarded 1958 F. E. d’Humy medal for scientific research resulting in important technical advances to the nation’s communications.

J. L. (Lee) Berryhill, chief engineer, KRON-TV San Francisco, given Scott Helt Award for his technical paper on “Automation Applied to Television Master Control and Film Room.” Mr. Berryhill's paper pointed up chance for error in tv’s “frantic period,” 30 seconds during station break time when technician must make as many as 20 or more carefully timed switching operations.

Patches, WBAL-TV Baltimore personality, has received annual Youth Award of Post 717, Catholic War Veterans, for “outstanding contribution to Maryland youth.” Patches, host of Patches Show for children, is first radio or TV personality to be so honored.

William L. Putnam, president, WWLP (TV) Springfield and WRLP (TV) Greenfield, both Massachusetts, and Kitty Brommen, director of women’s services for both stations, have been given Public Service Awards in field of Civil Defense in Massachusetts.

We've read thousands of U.S. and Canadian newspapers in the past 9 years, looking for unusual local retail promotions: traffic-building stunts, give-aways, anniversary gimmicks, slogans, etc. used by local retailers. Result? We've assembled over 300 ideas and we challenge anyone selling local retail advertising to read them without finding at least 10 good usable ideas: 108 pages, well-illustrated, these 300 ideas are yours for only $25.

WNEM-TV uses

one film for all light conditions...Du Pont 931

Charles Ray, Director of Photography for station WNEM-TV, Bay City, Mich., says that he and his six cameramen keep their cameras loaded with Du Pont Type 931 Rapid Reversal film for all newsreel photography.

"931 has the high speed and latitude we need for news shots anywhere, any time," says Mr. Ray. "We can shoot indoors or out, rain or shine, and be sure we'll get good, usable pictures."

WNEM has built up a large "morgue" of filmed background material on local activities, so that when a story breaks, they'll have films immediately available to help round out the news coverage. When a cameraman comes in with footage on a hot local story, WNEM can go on the air with a complete, edited news show. Du Pont 931 helps here, too—its wide processing latitude and extra short drying time mean it can be force processed at high temperatures, dried, spliced and on the air in a matter of minutes.

"We don't see how you can beat 931," concludes Mr. Ray, "for this combination of speed, latitude and processing ease."

For more information on 931 and other hard-to-beat Du Pont Motion Picture Films for TV use, contact the nearest Du Pont Sales Office. Or write Du Pont, Photo Products Department, 2432-A Nemours Building, Wilmington 98, Delaware. In Canada: Du Pont Company of Canada (1956) Limited, Toronto.
Pay for Re-Use of Videotapes Dominates Networks-AFTRA Talks

Negotiations between the three networks and the American Federation of Television & Radio Artists continued in New York last week, with primary discussion centered on a formula for re-runs of videotaped commercials and programs.

An AFTRA spokesman denied reports that talks had “bogged down” over this issue but said payment for re-use of taped products has dominated the negotiations. A formula to be devised would stipulate full payment for one or more runs; a reduced percentage for a certain number of subsequent runs and a sliding downward scale for additional uses. The current pact expires on Nov. 15 and a settlement is not anticipated before the deadline.

On a related matter, the National Labor Relations Board will re-open its hearing in New York Nov. 6 on a petition by AFTRA to hold a referendum among performers to select a single union to represent them in the videotape commercial field. The hearing was recessed more than two weeks ago when testimony was presented by AFTRA, the Screen Actors Guild, the Screen Extras Guild and the television networks. The last named organizations have all voiced opposition to AFTRA’s petition and asked NLRB to dismiss it.

Second Independent Movie Firm Signs Musicians Guild Contract

Musicians Guild of America has signed a contract with a second independent motion picture company, Dore Schary Productions, and again is the target of unfair labor practice charges, filed with NLRB by American Federation of Musicians. A similar protest resulted from MGA’s first independent studio contract, with Hecht-Hill-Lancaster [PERSONNEL RELATIONS, Oct. 6] which AFM said was outside the scope of MGA’s collective bargaining realm, the major movie studios.

The first scoring under the Schary contract began Oct. 15 at Goldwyn Studio, on the picture, “Miss Lonelyhearts.”

Judge Alfred Gitelson of Los Angeles Superior Court postponed until Oct. 28 his ruling on requests of members of AFM Local 47 in Hollywood for preliminary injunctions preventing AFM from expelling them from membership for alleged support of MGA [PERSONNEL RELATIONS, Oct. 13]. Judge Gitelson dissolved temporary restraining orders in effect since Sept. 22 [PERSONNEL RELATIONS, Sept. 29, 22] but AFM is not expected to take any action against the approximately 100 musicians involved before his ruling. It was understood that in the interim, Judge Gitelson hopes that AFM and MGA can come to an agreement on an outside referee to hold a hearing within the framework of AFM bylaws. Petitions for an injunction followed an attempt of AFM to institute an injunction hearing.

Labor Protests to CBS, FCC WKRC Right-to-Work Editorials

The Committee on Economic Stability in Cincinnati last week protested to CBS and to the FCC against editorials by WKRC there. The brief editorials have been broadcast five times daily in behalf of the right-to-work constitutional amendment in Ohio. Committee chairman John J. Gilligan said the station should present the other side of the issue. His committee—made up of union leaders—opposes the amendment that would make it illegal to require an employee to join a union in order to keep his job. The issue goes to the polls Nov. 4.

The station’s president, Hubert Taft Jr., pointed out that WKRC offered a half-hour free to John J. Hurst, president of the Central Labor Council, to voice opposition to the amendment, an offer of which Mr. Gilligan said he was not aware. Mr. Taft also noted that the legal requirement on equal time pertains to political broadcasts, specifically with candidates for office. WKRC’s editorials deal with issues, he said. Arthur Hull Hayes, CBS Radio’s president, was surprised that a protest had been sent to the network (WKRC is a CBS Radio affiliate). “We have no voice in their station’s management,” he commented.

Tv Producers Guild Organizes To Secure Producer Benefits

To secure better working conditions, residuals, minimum salaries and other benefits for the producers of tv programs, Television Producers Guild has been organized in Hollywood. The group has no relationship to Screen Producers Guild although there may be some overlapping memberships. Ben Brady, producer of the Perry Mason series on CBS-TV, is chairman of a steering committee to serve until permanent officers are elected at a general membership meeting scheduled in 30 days.

Other committee members are: Cecil Barker, George Cahan, David Dortort, Ben Feiner, James Fonda, Alex Gureenberg, Hal Hudson, Roy Huggins, Charles Isaacs, Sheldon Leonard, Ralph Levy, Nat Perrin, Edgar Peterson, and Darrell Ross. Richard Irving of Revenue Productions, as well as a member of the steering committee, drew his name explaining that he is "much too close to management" to give TPG the kind of wholehearted support the new organization needs. Mort Abrahams of National Telefilm Assoc. was named to the steering committee as representative of New York tv producers, which TPG hopes to include eventually, although currently the new organization is set up only on the West Coast.

Aaron to Hear Local 47 Charges

Benjamin Aaron, nationally known labor arbitrator, has been appointed referee to hear charges brought by Local 47, Hollywood, of the American Federation of Musicians against several members for alleged violations of AFM laws. Mr. Aaron replaces George Bodle, Los Angeles labor attorney, and a committee of the AFM International Executive Board which were to have held hearings last month. Those hearings were delayed by litigation.
One of a series of salutes to successful Radio and TV stations across the nation ... and to the Northwest School graduates who have contributed to their success.

KPEG

The ALL-GIRL-STATION
Spokane, Washington

No "Square-Pegs" here . . .

"Peg" Snyder... one of the first "Pegs" of KPEG. Mrs. Snyder has been with the station since its first day of operation and has contributed greatly toward the station's popularity.

"Peg" Parcher, another popular personality on KPEG, daily delivers news, weather reports, in addition to her regular disc jockey duties. The voice of this "Peg" is a familiar one to listeners in Spokane area.

Northwest Schools graduate, Larry Lester, has been manager of this unique station since August 16, 1957. Since that time the audience has been doubled, according to recent surveys. One important reason for the rapid growth of KPEG is Mr. Lester's early training and experience as an engineer, disc jockey and sportscaster.

KPEG is owned and operated by Bellevue Broadcasters, with studios at 1527 West Second Avenue in the city of Spokane. The All-Girl Station has been on the air since February 14th, 1957. Actual station operations and all broadcasting is handled by four girls (all named "PEG"). These girl disc jockeys spin records, deliver newscasts and special events, and stress easy-to-listen-to music. Their policy is paying off in listener dividends... more and more people, as they hear about KPEG, are staying tuned to this station.

Reds Rubbing Lamp To Spread Propaganda

Chinese Communists are evoking the spirit of Aladdin to propagate their faith via radio, according to an exclusive TV report by CBS News' Far East correspondent, Peter Kalischer.

The Peiping regime is blanketing the neutral nations on its geographic periphery with small, compact kerosene-type lamps that not only generate light and heat, but also sufficient wattage (2.6) with which to operate a small medium-wave and short-wave radio. The potential consumer count: 14 million Chinese comprising the minority population in these nations—a power which, if properly harnessed to the Communist tune, might sway the political climate in favor of Communism.

Mr. Kalischer made his report on film. It will be shown next Sunday (Nov. 2) during part II of CBS-TV's study of Soviet propaganda techniques on The Twentieth Century (Sun. 6:30-7 p.m. EST). While news of "Aladdin's lamp" has been making the rounds of European and Asian capitals for several months, CBS believes its report will be the first made here in the U. S.

The lamps are made and distributed by state-controlled China National Instruments Imports Corp., Peiping-Shanghai-Canton-Tientsin, via its Hong Kong branch (China Resources Corp.). The Red Chinese firm sells—at rock-bottom price—both lamp and radio to Red agitators in the outlying countries who then effect the widest possible distribution. The limited power output of the set enables the listener to pick up only one station—usually the most powerful transmitter in the area which happens to be a Red Chinese propaganda outlet. (Mr. Kalischer noted that Peiping broadcasts 24 hours a week in 16 languages and dialects, 66 hours and three languages more than the Voice of America from Okinawa and Manila.)

The "Aladdin" semi-conductor, thermoelectric generator in effect, acts as a battery for the radio, and according to the instructions attached by the Chinese, "is convenient for use in pastures, in desert districts, in villages, on outskirts, in boats or in some other place where electric power source is unavailable." There are no moving parts nor coils, thus requiring little maintenance. To quote the instruction sheet again: "Inside... there are two groups of thermo-piles, one of which produces low voltage to heat the filaments and the other supplies high voltage for the plate circuits. The radio receiver is coupled with the generator by connecting the terminal plate of the generator to the socket of the receiver with four wires." Power increase may be effected by heightening the flame, but this will cut down the playing hours.

MBS Attacks Junket to Russia; USSR Continues to Battle CBS

Mutual network last week called on NAB President Harold E. Fellows to protest "the State Dept-sponsored junket by six radio-tv men to Russia" under the cultural exchange plan [At Deadline, Oct. 20]. Charles Godwin, MBS station relations vice president, cited on flying trip of CBS correspondent because of the network's TV drama on Stalin's death, as well as the prohibitive tax recently leveled on newsfilm [INTERNATIONAL, Oct. 20].

"All reporters, including ours, are under strictest reporting wraps," Mr. Godwin said, suggesting Russia should ease the present regulations if they wish to continue cultural exchanges.

Last week Russia refused to accept Richard S. O'Brien, CBS director of audio-video engineering, as a member of the delegation. A Soviet delegation is expected to come to the United States later this year. The Soviet action was described in Washington as part of that government's continuing battle against CBS. On Oct. 8, CBS newsman Paul Niven was ordered out of Moscow.

Other members of the U. S. cultural exchange delegation are Ralph Harmon, Westinghouse Broadcasting Co. engineering vice president; Jerry Danzig, NBC radio network programming vice president; Ralph Cohn, president of Screen Gems; Mike Wallace, ABC interviewer, and Dr. Burton Paulu, U. of Minnesota.

Cuba Bars Traveling Salesmen

Radio and television stations and other media in the United States are now prohibited from soliciting advertising in Cuba through unauthorized personnel. Legislation to that effect became effective Oct. 6, it was announced last week by Media International Inc., New York and Havana.

Media International, which represents various media, has made a study and translation of the law, which is obtainable from the company, 45 W. 45th St., New York 36, N. Y. Company officials explained that U. S. media may not secure advertising from a Cuban company through representatives or sales personnel on flying trips there, unless the selling is done by persons who are members of the College of Advertising Professionals in Cuba. Media International spokesmen said it is believed that few, if any, Americans qualify for solicitation, since requirements for certification include study in specific courses at the Cuban college.
He's not dishonest—or doing anything illegal. But present federal laws give him and many other people an unfair tax advantage over you and most Americans.

Here's how:

About 23 cents out of every dollar you pay for electricity goes for taxes. But under present tax laws, several million families and businesses escape paying most of the taxes in their electric bills that you pay in yours. They are people whose electricity comes from federal government electric systems. Unlike you, these people pay no federal taxes at all and little or no state or local taxes in their electric bills.

What's more, the taxes they escape have to be made up by other people—including you!

Most Americans believe everyone should pay his own fair share of taxes. How do you feel about it?

The United States can expect occasional programming of "outstanding merit" from the Eurovision system of broadcasting in Europe and this source promises to be a more fruitful one in the days still to come.

This analysis was offered by Ted Rogers, NBC-TV staff producer, who has returned from an eight-week trip to study Eurovision. Mr. Rogers noted that the 11 countries in the Eurovision hookup were holding a meeting in Wiesbaden, Germany, this month and one of the proposals before it was an NBC-TV request for production of several programs to be carried on the network.

Mr. Rogers, who was accompanied on his visit by NBC-TV staff writer Harold Azine, was asked by the network to survey the programming potentials of Eurovision for U.S. television and to provide technical assistance and information to European producers, when requested. Since Mr. Rogers was executive producer of NBC-TV's Wide Wide World for more than a year, he was able to offer suggestions on lighting and production techniques for the type of programming in which Eurovision is particularly interested.

Mr. Rogers pointed out that Eurovision programming is not scheduled on a regular basis and there is "no particular pattern" of countries involved. There is no extensive preparation for coverage of a particular event, he said, and members might have only a few days' notice that a program is available.

The quality of Eurovision programming is "uneven," Mr. Rogers acknowledged, and much of it would not be appropriate for U.S. audiences. On the other hand, Eurovision sometimes comes up with "superb programming." He mentioned a New Year's Eve program last year from various nations, a French under-water origination and various programs from the Brussels Fair.

NBC-TV's proposal to the Eurovision conference in Wiesbaden, according to Mr. Rogers, calls for the system to produce a group of programs of 60 or 90 minutes in length and including Europe After Dark, Europe on a Sunday Afternoon, Children of Europe and Challenge to Humanity, an inspirational show. A segment of this latter program would be produced by NBC-TV from churches in the U.S., Canada and Mexico. Mr. Rogers stressed that no payment would be made by NBC-TV for initial "experimental" programs.

QUAD-CITIES

ROCK ISLAND • Moline • E. Moline • Davenport
now the nation's 47th TV MARKET according to Television Age Magazine

A WEEKLY REPORT OF FATES AND FORTUNES

ADVERTISERS & AGENCIES

NORMAN GLEANEY, formerly v.p. director and plans board member of Reach, Yates & Matson (now Reach, McClinton), N. Y., named director of television and radio, Calkin & Holden, N. Y. For past year, Mr. Gleaney has headed his own marketing consultant firm and had been acting in consulting capacity with CBS. Mr. Gleaney from 1955-56 was director of tv and radio sales promotion, Bulova Watch Co.

MARTIN SAMIT, NBC Radio advertising coordinator, announced his resignation to devote fulltime to his activities as director of Consumer Behavior Labs, N. Y., formed to offer advertisers and agencies creative and research services on socio-psychological problems in marketing and advertising.

RAYMOND A. ROBINSON, research director of Foote, Cone & Belding, Los Angeles, elected v.p.-director of research.

WILLIAM H. GENGIE, account supervisor of Ketchum, MacLeod & Grove, Inc., Pittsburgh, elected v.p. of agency. Mr. Gengie, who joined KMA-g in 1953, was previously in advertising department of Gulf Oil Corp., Pittsburgh.

PETER HILLER, assistant v.p. of Institute for Motivational Research, appointed director of the latter's new consumer research division.

BERT W. FLOR JR., previously with Campbell-Rwaid in Detroit, to Erwin Wasey, Ruthrauff & Ryan's Los Angeles office as senior account executive.

EARL COLLINS, previously v.p. of Gordon & Hampstead Inc., Chicago, to Talman-Laied Inc., same city, as group copy supervisor. JOHN WILSON, formerly commercial writer-producer at Gardner Adv., St. Louis, also to T-L as group copy supervisor.

GEORGE C. MEAD, formerly copywriter at Earle Ludgin & Co., Chicago, to Reach, McClinton & Co., same city, as account executive and copywriter.

PATRICK CONNOLLY, with experience in appliance business on both agency and advertiser levels, named account executive on RCA Victor at Kenyon & Eckhardt, N. Y.

ROBERT B. CONROY appointed account executive on Chrysler Corp. tv account at Grant Adv. Inc., Chicago.

NORMAN C. WIDENHOFER, assistant manager of WGL Ft. Wayne, Ind., in charge of programming, to Willis S. Martin Co., Ft. Wayne advertising agency as assistant account executive and consultant in radio and tv planning and programming, effective Nov. 3.

HARRY AIEVA, formerly with Arthur Murray as advertising manager, to William Warren, Jackson & Delaney, N. Y., as agency's radio-tv production director.

SAUL GRUBSTEIN, former CBS art director, most recently with Gore-Smith/Greenland, to executive art director, Hicks & Greist Inc., N. Y.

LUCIAN R. BLOOM, formerly media manager, Cunningham & Walsh, N. Y, and before that with Ketchum, MacLeod & Grove, Chicago, named director of tv and radio research for Hackett & Greist Inc., and as media supervisor at K & E's New York office, to Ted Bates, N. Y., as assistant media supervisor.

EDWARD R. BOSLEY, formerly creative director at Lennen & Newell, San Francisco, appointed copy...
Why do diabetic doctors live longer than other diabetics?

Anyone who develops diabetes can take hope from the personal experiences of doctors who have the disease. They have proved that by strict adherence to treatment, they can live almost as long and as actively with the disease as without it.

When mild diabetes is discovered early, it can often be controlled by diet alone, or by diet and exercise. In other cases, a combination of insulin, diet and exercise may be required.

New compounds, taken by mouth, appear to be beneficial in selected cases, usually those who have mild diabetes which developed after age 40. Their use, however, requires strict medical supervision . . . and their true place in diabetes treatment awaits further study.

Anyone at any age can develop diabetes, but your chances of doing so are increased . . . if you are overweight; if diabetes has occurred in your family; if you are between the ages of 40 and 65.

Today, about one million people in our country have diabetes and are getting treatment. Another million Americans have the disease, but are completely unaware of it. This is because diabetes, early in its course, causes no noticeable symptoms, and may not until it is well advanced.

So, everyone should have periodic health examinations, including simple tests for diabetes. And no one should delay seeing the doctor if any of the following common symptoms of diabetes should occur . . . weight loss despite constant hunger and excessive eating, increased fatigue during normal activities, excessive thirst and frequent urination.

If diabetes is found, the usual reward for obedience to the doctor's orders is added years of comfort and of life. Doctors know this . . . and that is why those of them who have diabetes live longer than other diabetics.

wide facilities of Voice of America. Mr. Marx and Mr. Guy, both members of broadcast ad-
visory committee of U. S. Information Agency, plan to evaluate ability of Voice facilities to meet "challenge of the Communist barrage." Their itinerary will include Lebanon, Tangier, Madrid, London, Munich, Athens, Rhodes, Sal-
onika, Colombo (Ceylon), Singapore, Hong Kong, Manila and Honolulu.
UN’s Role in World Affairs
Told in Broadcasters’ Series

Commemorating United Nations Day Friday (Oct. 24), the first in a series of 26 quarter-hour programs entitled Dateline: UN was telecast on 60 stations in the U. S. The series, being produced by the newly-formed United States Broadcasters Committee for the United Nations, is designed “to give the American viewing audience an understanding in depth of the role which the UN has assumed in world affairs.” While avoiding live news, “because networks and stations are doing an excellent job in this area,” the series will aim to “supply a graphic interpretative background for current developments.”

Committee headquarters are located at 422 Madison Ave., New York, office of Frederick Kugel, Television magazine, committee chairman. P. A. (Buddy) Sugg, NBC, is vice chairman, and David C. Moore, Transcontinent Television Corp., is secretary-treasurer. Executive committee members include: Roger W. Clipp, Triangle Publications; R. E. Dunville, Crosley Broadcasting Corp.; Harold Grams, KSD-TV St. Louis; Jack Harris, KPRC-TV Houston; Donald McGannon, Westinghouse Broadcasting Corp.; C. Howard Lane, KOIN-TV Portland; C. Wrede Petersmeyer, Corinthian Broadcasting Corp.; James G. Ridgell, ABC; I. S. Sinclair, WIAR-TV Providence; George Storer Jr., Storer Broadcasting Co.; Robert D. Sweezy, WDSU-TV New Orleans; E. K. Wheeler, WWJ-TV Cleveland; George Whitney, KFMB-TV San Diego.

Working with the broadcasters on production of the series are the following principals in the United Nations Radio and Visual Services Div.: Frank Passigl, deputy director; William Henson, chief of UN television; Mavor Moore, production; Arnold Rabin, associate producer-director; Michael Hayward, chief of operations.

Group Discussions to Follow WMAL-TV’s ‘Talk Back’ Series

A television program designed to help people solve their own problems is scheduled for the first and third Sundays of each month at 12:30 p.m. on WMAL-TV Washington, D. C. Entitled Talk Back, the program is part of the This We Believe series and will start Nov. 2.

The experimental format of the new series includes a 12-minute dramatic sketch filmed in Hollywood to present a basic problem, a 15-minute televised panel of qualified persons discussing the problems, and discussion groups around tv sets to continue after the show concludes each Sunday. The viewer groups are being organized by churches and community agencies.

Talk Back is filmed by the Methodist Television Ministry; released through the National Council of Churches, and produced locally through the Dept. of Radio and Television of the Council of Churches, National Capital Area.

KDKA Inaugurates Disc Clinic

Representatives of Pittsburgh record distributors have been invited to audition their latest releases with KDKA Pittsburgh’s music programming personnel in a new system of Monday night “Record Clinics,” Program Manager Guy S. Harris has announced.

Under the clinic plan disc jockeys and record men will exchange ideas, give opinions and bring each other up to date on what listeners are requesting and what customers are buying, Mr. Harris said. Because of the constant rise in the number of records produced, KDKA expects to improve programming through discussions of the records. Record companies are not restricted to bringing in their releases on Monday evenings, Mr. Harris pointed out.

WHB Puts Check Artists on Run

A program that broadcasts the names and modes of operation of known bogus check artists is credited by Kansas City police and businessmen as being “one of the greatest strides taken in years to help stamp out the menace of these criminals,” according to WHB Kansas City. Entitled Check-Alert,

WHB's twice-daily program also broadcasts the description and numbers of stolen checks to make identification easier if presented for payment. WHB quoted one police official who said "WHB is accomplishing in minutes what might take us years to do. It's just not humanly possible for us to call all merchants in time to catch these phony's."

WEI Probes Creative Expression

Exploration of the creative personality, its problems and methods, is the subject of the series, The Creative Way, which started its second season on WEI Boston Oct. 17, 9:30-10 p.m. The programs feature guest "creators" who discuss the birth of their ideas, obstacles they had to surmount in producing their works and general principles which may aid others who seek insight and creative expression. Moderator of the series is Dr. Kenneth D. Benne, director of the Boston U. Human Relations Center, who also is producing the series with Mitzie Kornetz, radio and tv editor of the Boston U. News Bureau.

Welcome Wagon Introduces KROC

KROC-AM-TV Rochester, Minn., hitched a promotion campaign to Welcome Wagon Service Inc., whose hostesses present letters and gifts to newcomers, new parents and newly engaged girls. In addition to introducing the stations in a friendly fashion, Welcome Wagon hostesses also do valuable survey work during their calls, KROC-AM-TV reports. All questions are asked before the KROC letter and gift are presented, and before the individual is aware that KROC is a Welcome Wagon sponsor.

Stars Plug NTA Films on Tour

Coincident with the start of the NTA Film Network programming schedule, the first of a series of nation-wide personal appearances by stars of the shows began this month. The first unit consisted of Lori Nelson, Merry Anders and Barbara Eden of How to Marry a Millionaire, and they are being followed by Patty Ann Gerrity and her dog Hector of This Is Alice, and John Conte of Tv Hour of Stars. The appearances are scheduled in more than a dozen major cities throughout the country.

WLW Farm Radio Survey Released

Peak radio listening periods by farm families are from 6 to 8 a.m., again around noon and in early evening about 6 p.m., according to a farm radio survey report sponsored by WLW Cincinnati for distribution to advertisers and agencies. Radio listening habits and programming preferences in the WLW coverage area are analyzed in the report prepared by the American Advertising Service, Cincinnati. Survey results are based on 1,126 returns from farm residents out of a total of nearly 22,000 questionnaires mailed to rural route boxholders in April and May. 67% of total survey respondents reported that they usually listen to WLW.

Kiwanis Plans Tv Week Salute

National Television Week (Nov. 16-22) is being saluted this year by Kiwanis International, which has prepared kits to help local Kiwanis clubs pay tribute to the television stations of their community. Each kit contains letters from Harold E. Fellows, president of NAB, Kenneth Loheed, president, Kiwanis International, and O. E. Peterson, Kiwanis International secretary. Also included are fact sheets, "how-to-do-it" sheets on presenting a National Television Week program, and two sample press releases. Kiwanis clubs are urged to emphasize this year's special-week slogan, "Nothing brings it home like television."

WBAL Animals Court Clients

WBAL. Baltimore is currently promoting its "Full Range Programming" through the use of colorful animal paper cutouts in a series "from the zoo to you."

Among the animals thus far distributed are the "Rubberneckus-Newzus," which "Eats choice news morsels—provided by Maryland's largest radio new staff;" and the "Mastodonic Kilocycleus," which is an "amiable ambulatory giant" travelling "over all of Maryland, all of Delaware and parts of Pennsylvania, Virginin and West Virginia." Each of these cutout animals, which resemble an oddly colored giraffe and elephant, respectively, come mounted in trophy-like fashion suitable for hanging on the wall. Each is supposed to represent some of the advantages of WBAL.

KETV (TV) OMAHA took advantage of its floor-to-ceiling lobby windows facing well-traveled Douglas St. to announce an additional 3½ hours of air time, Monday through Friday, and a new lineup of daytime shows. The billboards were displayed prominently on all the front and side windows of the lobby. KETV's full-time operation includes the new daytime shows of ABC-TV, of which KETV is a basic affiliate, and NTA Film Network programming, Eugene S. Thomas, station vice president and general manager, said.

In an "8:55 Baby" contest, more than 125 prizes were awarded the couple whose child was born closest to the new Oct. 13 starting time.

Hoops Announce WWDC Rating

In letters to advertisers and agencies last week WWDC Washington asked "What's all this hoopla?" With small plastic hoops attached, the letters announced that the station has placed first in Washington in share of total radio audience rating for the month of September. According to Pulse Inc. WWDC's reported percentage is 19.3. The letter explains that just as chubby ladies slim down with hoops . . . so WWDC was supplied with hoops in case it's "considered fat and sassy" with its No. 1 rank.

S.F. Agency Visitor Bears Gifts

San Francisco agency rating authorities were treated to gifts delivered by Miss Benzie Morgan (39-22-36), theme girl of Fabulous Features movies on KPIX (TV) San Francisco. Dressed in a swim suit, Miss Morgan visited the city's agencies and tv columnists to present products donated by sponsors of the Sunday evening movie program.

Best Letter Wins KTIX Contest

KTIX Seattle, Wash., listeners who completed the sentence, "I like KTIX because ..." in 25 words or less had as an incentive the chance to win a four-day, all-expense paid vacation for two persons in San Francisco. The final winner will be chosen from a list of weekly winners in the contest.
WWJ describes selling service

“RadioVision,” a colorful brochure highlighting WWJ’s Detroit’s advertising merchandising service at Detroit, Northland and Eastland shopping centers, has been distributed to agency executives and Peters, Griffin, Woodward Inc. sales representatives. The four-page brochure illuminates the display space available to WWJ advertisers at the station’s two permanent remote studio locations in the shopping centers, WWJ personalities Bob Maxwell, Dick French and Jim DeLand originate broadcasts twice daily from the glass-enclosed remote facilities.

Susskind Hosts WNTA-TV program

Well-known television producer David Susskind is featured as host on a weekly, interview program, Open End, which had its premiere last Tuesday (Oct. 14) on WNTA-TV Newark, N. J., starting at 11 p.m. An unusual aspect of the program is that Mr. Susskind may stay on the air as long as he chooses. The format of the program involves interviews with provocative individuals. The first program was a remote from New York’s Chinatown and spotlighted guests associated with the new Broadway production, The World of Suzie Wong.

Kbig offers flight to Paris

A vacation flight for two over the North Pole to Paris is first prize in a contest designed for agency personnel by KBIG Avalon, Calif. Tied in with the station’s fall “refreshing sound” promotion campaign, the competition requires the completion in 15 words or less the statement “KBIG—as refreshing as..." The contest was announced in a direct mail campaign to advertising agencies utilizing giant two-and-one-half-foot postcards. The winner’s flight is arranged with Scandinavian Airlines.

Models introduce WTAR ‘Blend’

Two 6-ft. models representing WTAR Norfolk recently visited Norfolk advertising agencies and sponsors to hand out cards which read “Look—I’m full size... Listen—WTAR’s new programming is too! Have you tried 790 this week?” The station’s restyling of its programming to what it calls “Full Size” was adopted, WTAR announced, on the theory that independents offer only local service and networks offer only general service, but WTAR’s concept presents a “perfected blend of both.”

WWRL issues Negro market report

WWRL New York is distributing to its clients a six-page monograph on various aspects of the structure of New York’s Negro market. The report breaks down the distribution of the population by county; analyzes such things as Negro birth rate as compared to that of the white population; breaks down population into age groups, etc. A similar report on New York’s Spanish-Puerto Rican population also will be issued by the station.

Contest marks WOHO milestone

A fourth anniversary promotion contest at WOHO Toledo, Ohio, which garnered more than 200,000 entries, offered weekend Miami Beach vacations for the winner and a companion and duplicate prizes for the owner or manager of the store in which the contestant had submitted his entry. WOHO sold spot packages to participating advertisers and supplied them with entry blanks, window banners, cards and deposit boxes. The station utilized on-air promotion with break spots and advertiser tags during the September offer.

WCSH-TV to telecast debate

The outdoor patio studio of WCSH-TV Charleston, W. Va., tonight (Oct. 27) will be the scene of a telecast debate on The Issues of 1958, with four senatorial candidates participating. Republican Sens. Chapman Revercomb and John D. Hoblitzell will discuss the issues with their Democratic opponents Robert C. Byrd and Jennings Randolph. An old-fashioned torchlight political parade through the streets of downtown Charleston will precede the debate, which is scheduled from 7:30 to 8:30 p.m.

WNHC-TV extends news coverage

The use of three local newscasters on overseas assignments for world-wide news coverage has been inaugurated by WNHC-TV New Haven, Conn., announced General Manager Edward D. Taddei. The newscasters who will travel to the world’s news centers to cover headline stories for WNHC-TV and the other Triangle Stations are all with WFIL-TV Philadelphia. They are Gunnar Back, director of news and special events, John Raleigh, director of news-caster operations, and Allen Stone, reporter. Mr. Raleigh recently presented audio reports direct from Taipei, Formosa.
Pre-Dawn TV Spots Rocket Sales

"Will tv spots sell at 3:30 a.m.?" To the surprise of WSPA-TV Spartanburg, S. C., and local advertisers the unheard of idea worked effectively during the station's live coverage of the Cape Canaveral launching of the "Pioneer" rocket to the moon. WSPA-TV promoted several times on station-breaks the preceding evening that it would offer some "unheard of values" during its "Moonshoot" coverage. With one station break spot and two 60-second adjacencies, advertisers sold 15 ladies' coats, 11 pairs of jeans, three electric trains and other merchandise, the station reported. The advertisers had instructed their sales people not to offer the particular merchandise used on "Moonshoot" at the advertised price unless the prospective buyer mentioned the word "Moonshoot" voluntarily, as they were asked to do by the commercial announcer.

WPIX (TV) Produces Hitler Film

An hour-long documentary film, The Private Life of Adolph Hitler, has been produced by William Cooper, film manager of WPIX (TV) New York and Walter Engels, the station's news director, for showing on WPIX at a date to be announced shortly. The station said that much of the footage never before has been shown on tv, and includes sequences on the fall of Berlin shot by Russian combat cameramen.

The program is the station's second venture into the documentary field, preceded by The Russian Revolution, telecast last April, which has been syndicated to other markets in the country. WPIX is beginning work on another special film show project, The Secret Life of Eva Peron.

Houston Income in KNUZ Brochure

Results of a Pulse survey are being released by KNUZ Houston in a brochure designed to enable advertisers to determine the spendable income and audience composition of the area's radio stations. Using Sales Management and A. C. Nielsen Station Index figures, KNUZ estimates its share of the Houston market.

New transistorized headset amplifier
for TV studio communication

Daven announces a new Transistorized Interphone Headset, Type 52, that provides a marked improvement in studio communications. As a companion unit to the Western Electric Type 52 headset, advantages of this transistorized amplifier over the normal induction coil are:

1. Greater range of 20 db.
2. Mounts directly in place of the induction coil.
3. Sidelobe automatically adjusts when additional stations join the circuit. Receiver level minimized.
4. No significant increase in power consumption.
5. Permits up to 32 stations.

Write today for further information.

FOR THE RECORD CONTINUED

3; scheduled oral argument for Nov. 17 at 11 a.m.

By Chief Hearing Examiner James D. Cunningham on dates shown

Granted motion by St. Anthony Television Corp. for extension of time for filing proposed findings of fact and conclusions on Oct. 20 to Oct. 27 on its application for new TV station to operate on ch. 11 in Mounds, La. Action Oct. 22.

Here's how

WSB-TV dominates television in Atlanta

When you weigh the three Atlanta television outlets preparatory to placing a schedule remember this: Your choice of stations can make a sizeable difference in the sales your advertising produces.

One station in Atlanta, WSB-TV, is viewed by the most people 52.8% of the time. A viewer, and buyer, preference greater than that of the other two stations combined! Chart shown here is a 3-month average. It reflects viewing habits which hold steady month after month in Atlanta.

Superior local programming, news service which devastates competition and a deep public interest responsibility have built this massive preference for WSB-TV. Certainly your advertising belongs on WSB-TV.

WSB-TV is affiliated with The Atlanta Journal and The Atlanta Constitution.

NBC affiliate. Represented by Edward Petry & Company
Stretching the dollar in big-money tv

Last night (Oct. 26), an example of twentieth century television at its best commenced its second season. Since the sponsor, The Prudential Insurance Co. of America, is our client and since the show has not only been an award-winner but a sales-starter, I’d like to cite it as unique.

The show is, of course, CBS-TV’s The Twentieth Century, a series of half-hour, Sunday evening documentaries about the time in which we live and about the people who shaped it. Sample subjects for the start of the ’58-’59 season: drug addiction; the men and means of Red propaganda; Knute Rockne; Peron and Evita; the Russo-Finnish War. Sound interesting? Right—and the reason that Americans have grown (up?) to realize that “educational” tv can be entertaining.

Of course there are other “serious” tv shows—just as other agencies have clients who are similarly conscientious about their responsibilities to the public. And so I do not intend here to pontificate about the excellence of the series—or pontificate about anything else. I’d like to report how The Prudential and we at Reach, McClinton have learned how to extend further the impact of an already sizable tv commitment.

All network television is costly—and getting costlier. It is, therefore, imperative that sponsors’ tv investments be extended further for further effectiveness. If The Twentieth Century makes an impression—or a point—with its viewers, then it becomes necessary for us to take that point, extend it in space to form a line—and then take that line and extend it further to form a plane. The plane, mathematically speaking, covers space, has dimension. What The Prudential has been doing with The Twentieth Century also has dimension.

What The Prudential’s been doing is three-fold:

1. It has a “Television Teaching Aid” program;
2. It has just launched a “Television Film Loan Program;”
3. And it has embarked on an extensive public service message program.

Behind all these, as you might expect, lies a story.

Years ago, when The Prudential co-sponsored the beginnings of You Are There, it became apparent that the show’s educational nature offered the sponsor a unique opportunity for extending a message to classrooms. Accordingly, the first Television Teaching Aid was issued. Soon, The Pru became sole sponsor and issuer of the Aids. From then through the rest of You Are There, through Air Power, and through the first year of The Twentieth Century, only those schools which actually requested the Aids were included on the lists. Today, as the Aids move into the second year of The Twentieth Century, 8,667 schools currently receive them—all on their own.

Why the enthusiasm? First of all, the Aids are professionally prepared—always with the classroom in mind. They consist of (a) background information about the historical event or individual dealt with in the show; (b) suggested reading, material; a bibliography of books and magazine articles dealing with the subject under discussion; (c) a long list of audio-visual aids and how to obtain them, and (d) suggested classroom activities. And, since the Aids reach the teachers in advance of the show, they can ask list all the CBS-TV stations showing The Prudential’s program. The second reason for the enthusiasm is obvious: the shows themselves are exciting and informative, entertainment geared to the adult and the ripening mind, the kind of stuff that makes us at the agency, The Pru, CBS’ News and Public Affairs Dept., and teachers all over the country proud of the potentials of television.

As fan mail on the Aids was received, The Prudential noted that more and more schools were requesting film prints of the shows. The requests kept mounting—and Prudential’s interest in helping out kept mounting too. And so, just recently, The Prudential inaugurated its Film Loan Program, this time not directed only at schools, but at anyone who wanted to show The Twentieth Century programs before any group. Prudential notified the schools on its Aids list about the start of the new film loan program; it also notified its 25,000 Prudential agents throughout the country. Result? In the first three months of the film loan program, a total of 7,394 requests came in! The films, incidentally, are just as they are seen on tv—commercials included. But then The Pru prides itself on its commercials.

So much does The Prudential pride itself on its commercials that it decided this autumn to relinquish half of them. That is to say, half The Prudential’s commercial schedule has been given over to “public service messages.” These parallel The Advertising Council’s themes. This year, Prudential will show its “Messages for Americans” on such subjects as Confidence in America, Mental Health, Conservation and Supporting our Colleges. Of these “Messages” we at Reach, McClinton are very proud indeed.

Again, we have taken our point and extended it along a line and into a plane. We have not only shown these “Messages,” but have made them available to interested groups. As for sponsorship, identification, that’s provided at the start, when Bill Shipley opens a book which reads: “From The Prudential Insurance Company of America—A Message for Americans. . . .”

Three-fold, then, is our twentieth century extension of television into the community. That it’s been effective is evident, for one thing, by Prudential’s ever-increasing tv commitment. And the men who know it’s effectiveness best—the Prudential agents in the hometowns of America—are perhaps the most enthusiastic.

As for us here at the agency, we’re proud of this extension of effectiveness for yet another reason: it proves that television can be marketed locally. We have another client, also heavily committed to television, International Latex Corp., one of the biggest spot tv advertisers in the country. There we also—but that’ll have to be the subject of a future MONDAY MEMO.

EDITORIAL

Whose Birthright?

It does not surprise us that the announcement of a radio station's willingness to accept liquor advertising has provoked cries of alarm.

We have had some experience of our own in that line, and we can freely predict that the cries of alarm will intensify before they subside. They will come from an odd, but also predictable, assortment of sources.

A year ago we published a series of editorials advocating the acceptance of liquor advertising—under appropriate self-restraint—by radio and television.

We received perhaps a dozen telephone calls and half a dozen letters approving our suggestion.

We received half a dozen phone calls and more than 3,000 letters objecting to it.

Evaluating this response simply by the numbers would suggest that we had embarked upon an astonishingly unpopular course. But, as they often are, numbers were misleading. The half-dozen phone calls which expressed opposition were from broadcasters who were horrified by the political trouble our proposal might generate. All but a handful of the letters of disagreement were from Prohibitionists who were drafted in a letter-writing campaign conducted by the Southern Baptist clergy.

The organized letter-writers can be expected to go to work again, now that it has become widely known that some stations are accepting liquor advertising. They will write their Congressmen to urge the passage of legislation outlawing liquor from the air.

But this will be nothing new. At every session of Congress since repeal of the 18th amendment there has been a flood of mail proposing similar legislation. The drys have historically carried on a vigorous campaign to reimpose prohibition by stages, the first stage being the limitation or outright elimination of liquor advertising.

It has been and will be the kind of mail which, in volume, is one-sided. There is no organized group of equal size to write letters in favor of liquor or liquor advertising. The mail which goes to Congress on the liquor subject is very much like the mail which came to us—one-sided to the point of being meaningless.

It is the vocal, organized opposition of the professional drays that is feared by those broadcast leaders who object to the admission of liquor advertising to the airwaves. Unhappily, those leaders are not being frank about the reason for their fear. They are citing "moral" grounds as the basis of their objections. They are talking about the ban against liquor advertising as the "birthright" of broadcasters, a tradition so sacred it cannot be questioned.

What these leaders neglect to mention is that the radio and television codes, in which the bans against liquor commercials are contained, were drawn up and voluntarily accepted by broadcasters.

The same broadcasters have the power to modify the codes.

We yield to no one in our respect for the men who fashioned the radio and television codes, but we are not naive enough to equate them with Moses or the Twelve Apostles.

What they wrote can be changed to suit changing times. There is evidence that as far as liquor advertising is concerned, times may be changing.

Dateline: Booby Hatch

NEWSPAPERS in this country have had a good deal of fun lately with stories about an English youth who was turned into a "Zombie" by television.

U. S. wire services have meticulously followed the case since the boy's father complained three weeks ago to the Wimbledon juvenile court that his son was transfixed by TV and wouldn't work. "Zombie" is the word the father used, according to the wire services.

If this is regarded as news by U. S. newspapers, they are missing a bigger beat.

Mental hospitals right here at home are full of patients who sit staring all day at the wall.

Walls, as any alert newspaper editor ought to know, are often used for display advertising. Connect mental aberration with wall-staring and you have taken a whack at still another rival of newspaper advertising.

What a headline could be written for a story of that kind: "Wall Turns Youth Into Zombie."

It doesn't sound any nuttier than the heads which have used "TV" in place of "Wall."

The FCC Image

THE FCC image, sullied by the onslaughts of the House Oversight Committee, battered by the U. S. Court of Appeals, is now subjected to indignities from the highest court in the land.

In remanding to the lower court last week two television cases in the Midwest, the Supreme Court dealt the FCC prestige another blow. Both cases happened, incidentally, to involve the deintermixture of areas (Springfield, Ill., and Peoria, III.) to all uhf. The FCC has been berated by the Senate Commerce Committee for failing to cope with the deintermixture problem.

The reason the Supreme Court majority ordered the two cases remanded was because of reference before the House Oversight Committee to purported ex parte contacts with members of the FCC. But in these cases, the FCC was functioning in its legislative capacity in rule-making, and not in its judicial role in comparative proceedings.

The FCC, like all agencies of government, has blundered in the past, and probably will blunder in the future. If the FCC has been influenced, it is because of the weakness of individual members. If mere conversation by an applicant or a potential applicant constitutes overt action or improper influence, every administrative agency in Washington has flagrantly violated the law.

From the very beginning of the independent agency type of regulation, contact with their areas of activity has been the rule, rather than the exception. Most of the commissioners are selected because of their expert and specialized knowledge of the particular fields. Commissioners cannot isolate themselves from the areas they regulate and perform their jobs.

Congress created the FCC. It can abolish it or change it. We think the FCC is no worse—or better—than most of the other administrative agencies. But Congress, through the Oversight Committee, and the courts are destroying the FCC by degrees.

We think the FCC, as now constituted, is striving to perform honestly and efficiently. It deserves a chance to do its job without spending half its time preparing for congressional hearings, and a good portion of the other half re-investigating cases that the courts throw back because of congressional hearings.
Vast New Urban Complex, defined by The Ford Foundation dominated by wfmy-tv

Just what is this area . . . this Piedmont Industrial Crescent? Defined by the Ford Foundation, it is a vast "area laboratory," stretching across North Carolina’s fertile Industrial Piedmont. It is more, too. It is a bustling, urban complex engaged in unsurpassed growth patterns of manufacturing, distribution and marketing.

Strategically centered at the hub of this massive urban market is WFMY-TV, the most powerful selling influence, by far.

North Carolina’s INTERURBIA

At the very axis of the CRESCENT lies INTERURBIA . . . the largest metropolitan market in the two Carolinas. INTERURBIA plus the Piedmont CRESCENT where more than two million people are sold on WFMY-TV.
