STEINMAN STATION
Lancaster, Pa.
NBC and CBS

BROADCASTING, February 15, 1960
of House

Dr. Howard, who warned last week that Oversight staff members are probing rating services, presumably nosing around on possible rigging. This would invade area opened two years ago by Sen. A. S. (Mike) Monroney (D-Okla.) and still on Senate Commerce Committee future book. Presumably Harris subcommittee intends to pop rating inquiry after it wrings dry its current payola foray.

Station approval • NBC affiliates last Friday were singing praises of network for blue-penciling Jack Paar’s “water closet” sequence day before. Affiliates were mindful of FCC’s current revocation proceeding against KIMN Denver which involved disc jockey toilet-flushing sound effect. It wouldn’t be surprising if NBC-TV Affiliates’ Board of Delegates, meeting today (Feb. 15) in Boca Raton with NBC brass, adopted resolution commending network for protecting affiliates’ interest as well as its own in Paar incident.

Highest bidders • With lawyers for NBC and RKO General in process of drafting agreements for their major market station trades, offers are piling up for RKO’s WMSG-AM-FM Washington. Latest is from Gordon B. McLendon, offering $1.5 million. Among others in negotiations are Meredith Publishing Co. and Crowell-Collier, who, like McLendon, are multiple owners.

Tom O’Neil, RKO General president, will make no firm contract on WMSG until NBC deal has passed official muster, including Dept. of Justice clearance. This involves tax-free exchange of RKO’s WNAC-AM-FM-TV Boston for NBC’s WRCV-AM-TV Philadelphia; $9.5 million sale of WRC-AM-FM-TV Washington to RKO, and contingent acquisition by NBC of ch. 2 KTVU (TV) San Francisco for about $7.5 million (Broadcasting, Feb. 8).

Government control • How does FCC stand on program control issue, which served as basis of recently concluded hearings? There’s been no formal vote, but, based on comments and observations, lineup is: Comrs. Bartley, Ford and Lee inclined toward more stringent measures on ground that FCC has authority to consider program performance and balance, both in regard to original applications and renewals; Chairman Doerfer and Comrs. Craven and Hyde disposed toward hands-off policy. Swing man thus would be Comr. Cross, newest member. FCC will adopt policy on each of five issues specified in programing proceedings when it can muster four votes either way.

Money back • American Research Bureau’s discovery that vhf signals are reaching farther than commonly supposed (Broadcasting, Jan. 18) is costing ARB money. ARB has voluntarily been giving station subscribers refunds, in form of credit applying to future subscriptions, because of delays in issuing audience reports. When ARB completed first all-county sweep last fall, it discovered viewing at greater ranges than had previously been recorded. This necessitated re-design of station areas and re-arrangement of Univac system of computing station reports. Reports for many stations have been late, but ARB says it is catching up and will be on schedule soon.

Date for Doerfer • FCC Chairman John C. Doerfer, due back from vacation Feb. 23, will promptly get back into swim on Capitol Hill. House Anti-trust Subcommittee, which begins hearings this Wednesday on bills to prohibit bribery and conflict of interest of government officials, expects to hear FCC chairman Feb. 26. House Appropriations Subcommittee on Independent Offices expects to hear FCC membership on fiscal 1961 budget late this month or early next.

British imports • Associated Television, which is assuming sole ownership of Independent Television Corp., New York, by buying Wrather-Lobefold half-interest (see story, page 142), appears to be out for bigger share of U.S. tv market for its British product. Group of top ATV executives is slated to visit New York and its ITC subsidiary in about two weeks. ATV reportedly has filmed and shown such “cultural programming” in Britain as dramatic productions of Ibsen, Shaw, Shakespeare and Royal Ballet, has largest mobile tape unit in Europe.

No cops • Proposal of FCC General Counsel John L. FitzGerald that “Office of Enforcement” be created to ride herd on licensees (Broadcasting, Feb. 8) is likely to meet stiff resistance at Commission level. Actually it’s rejuvenation of old idea to which FCC Chairman John C. Doerfer initially gave his blessing, but he changed his mind after further deliberation. Thought now is being given to informal activity in investigatory field through spot checks to keep FCC apprised of conditions so it will have answers when Congress wants them. Presumably this could be done through existing field force and present personnel.

Descent on Detroit • Television Bureau of Advertising, whose annual membership meetings have alternated between New York and Chicago, has switch in mind for 1961. It’s booking hotel facilities in Detroit for November that year, hopes to attract automotive interests by meeting in their hometown, give TVB members chance to establish individual liaison with auto people. This November’s meeting will be held at Waldorf Astoria in New York.

Ads in Israel • Without fanfare, Kol Israel (Voice of Israel) began commercial radio broadcasting on its “second program” Feb. 1. Two hours were thrown open for commercial spots (no direct sponsorship yet) at 1500 Israeli pounds ($750) per minute to cover roughly 80% of state with 2 million population. Commercial operation was authorized last Jan. 24, limiting six minutes of commercial in hour from 5-6 p.m. and from 10-11 p.m. Sale of time would bring maximum of 900,000 Israeli pounds per year and one advertising agency offered to buy up entire schedule but was turned down.

Quiet introduction of commercial radio augurs introduction of television on commercial basis in not-too-distant future. Newspapers and theaters are vigorously opposing commercial tv for competitive reasons, but Ben Gurian government is conducting full investigation, headed by Abba Eban, minister without portfolio, and former ambassador to U.S. Harry Zinder, director of Israel Broadcasting Service, visited U.S. last December to study tv operations and Hanoch Gitron, deputy director, now is in U.S. on three-month study, under auspices of U.S. State Dept.

Down the drain • Some payroa members haven’t received their money’s worth, to judge by reports submitted by two stations in response to FCC’s questionnaire. Both stations reported similar situation—that disc jockey had admitted getting secret payment from record distributors but was in no position to deliver plays. At both stations music selections are made by management committee.
in DETROIT...

you know where you’re going with

it’s as basic as bread

It’s a fact. WJBK-TV is as basic to your advertising budget as bread is to the nation’s tables. With WJBK-TV you reach right into 1,900,000 TV homes and help yourself to a slice of the 9 billion dollar sales potential in the nation’s fifth market.
WEEK IN BRIEF

Ratings next? • Next project? Blue chip agency views radio • Kenyon<tbody>
Legalistic Oversight Commission has developed keen appreciation of radio’s fine points—and of the don’ts too. Some of the highlights are related in this week’s MONDAY MEMO by Alfred R. Tennyson, K&E vice president in charge of the tv-radio and commercial production departments. Los Angeles. Page 26.

Finding their places • The network’s fall nighttime programming plans are beginning to fall into line. Although still tentative, all three have men on the street feeling out advertiser interest in proposed schedules. So far, fewer than 20 new shows have found their way into the pitches. BROADCASTING reports the current outlook of a fluid situation. Page 31.

Toiletries and foods • Advertisers of these products place over 34 percent of gross time purchases on the tv networks, according to Tvb’s figures for Jan.-Nov. of 1959. Page 34.

Revamping Ban commercials • All has not been harmony in the effort to revise those controversial statuses. Page 39.

What happened in Boston? • Plenty, testimony indicates in payola hearing—and in Cleveland, too—at Westinghouse stations. But the “play for pay” type of payola was not one of them, disc jockeys say. Also touched on: that Miami Beach disc jockey convention. Page 52.

FCC reversed in Baton Rouge case • Appeals court overturns FCC on 1959 grant to WAFB-TV Baton Rouge to operate temporarily on ch. 9 there. Split decision says Commission must be more explicit in determining need. Page 64.

British move in U.S. tv • Associated TeleVision is buying Wrather-Loeb 50% interest of ITC, making ATV first important foreign-owned company that produces and distributes film for tv with a fully-active subsidiary in the U.S. Page 142.

Feb. 26: The day pay tv goes to Canada • 2,000 subscribers have signed for service in Toronto suburb. Page 151.

Even the moon is within reach of WMAQ's Sound of the Sixties...the new concept in sound that brings the Chicago area buying audience the programming it wants. Timely, knowing local news...the latest word on international affairs...up-to-the-minute traffic, transportation, and weather information...the newest beeps from outer space...tunes and rhythms of grown-up music. Here's programming an adult, buying audience prefers. Chicago is tuned to the Sound of the Sixties!
AT DEADLINE

LATE NEWSBREAKS ON THIS PAGE AND NEXT • DETAILED COVERAGE OF THE WEEK BEGINS ON PAGE 31

NBC-TV keeps 'hope', but Paar return dim

NBC-TV was undecided late Friday about future of Jack Paar Show following Thursday night incident in which Mr. Paar quit and walked off show during recording of tape which was aired in regular period. Network was hopeful Mr. Paar would reconsider and return but he was reported firm in his decision not to return and to rest on European trip. NBC-TV reported very heavy phone and wire response favoring Mr. Paar.

Network plans to keep show title for two weeks at least, with Hugh Downs continuing to fill in as m.c. Show figures prominently in current lineup, representing about $15 million in billings, and in fall plans (see fall preview story of all networks on page 31).

Unhappy because NBC-TV had deleted from Wednesday night broadcast what it considered off-color joke (involving confusion between "water closet" and "wayside chapel"), Mr. Paar went before taping session Thursday and told audience he was leaving show and network. He then did so. Network elected to leave tape as it was and ran it as scheduled without editing.

Decision to yank joke from Wednesday broadcast was made by newly created standards department of network, one of two divisions set up under James Stabile, head of standards and practices. Ernest Lee Jahncke is head of standards unit. Network substituted hastily-improved news program into Wednesday's tape where joke would have appeared.

Mr. Paar's departure occasioned intense press and public reaction, was front page on all New York newspapers Friday. NBC-TV said it had received about 3,000 phone calls and 1,500 telegrams by mid-Friday "overwhelmingly" backing Mr. Paar. Network said it did not know whether Mr. Paar would return, but pointed out his contract (under which he earns about $500,000 a year) prohibits his joining another network before 1962.

Fleming leaves M-E

Kenneth Fleming, media director, McCann-Erickson, Chicago, leaves agency about March 1 to assume ownership of Feature Foods Plan merchandising service which he has purchased from estate of late Lyman E. (Pete) Weld. FFP currently is on four tv and four radio stations in Midwest.

IRS on alert

Discussions about whether money and other valuables given to disc jockeys by record companies constitute gifts or income received close attention from one spectator in audience during payola hearing last week. He was Internal Revenue Service agent looking for unreported income (CLOSED CIRCUIT, Nov. 16, 1959). IRS source later indicated 61 district offices will be forwarded information involving their localities.

Stereo group quits

Electronic Industries Assn. regretfully wound up work of its National Stereophonic Radio Committee Friday (Feb. 12) but will continue it on standby basis. Decision to suspend, ELA President David R. Hull said, was because FCC failed to comply with industry request to establish TASO-type organization on stereo (BROADCASTING, Feb. 1). Work of committee on fm stereo will be submitted to FCC.

NARBA action asked

Senate Foreign Relations Committee expressed belief "national interest will be injured" by further Senate delay in ratifying NARBA and U.S.- Mexico broadcasting agreement in report to that body. Committee said it went to extra efforts to give Daytime Broadcasters Assn., which opposes part of Mexican agreement prohibiting nighttime operation of U.S. daytimers on Mexican clear, full hearing, but rest of industry "overwhelmingly supports" treaties. Senate group said failure to ratify may result in "further" derogation of treaties by signatories and that new negotiations might be less favorable to U.S.

Four join CBS

Addition of three affiliates to CBS Radio roster announced by Arthur Hull Hayes, network president. They are WRGA Rome, Ga., which operates on 1470 kc with 5 kw; WGGA Gainesville, Ga., on 550 kc with 5 kw day and 500 w night; WAAX (formerly WCAS) Gadsden, Ala., on 570 kc with 5 kw day and 500 w night; WVLK Lexington, on 590 kc with 5 kw day and 1 kw night. In addition it was understood WMCI Ashland, Ky., which left CBS Radio in February 1959, would return on Feb. 24. It is on 1340 kc with 250 w.

Grey Adv. gets part of Revlon billings

Some $6 million in Revlon billing is changing hands, mostly to Grey Adv. Billing represents business given up by both C.J. La Roche, which resigns from servicing more than $2.5 million in Revlon products July 1, and by Mogul, Williams & Saylor, which loses cosmetics-toiletries products but retains Esquire shoe polish and leather conditioners (via Knomark which is Revlon-owned).

Grey Adv. is newly-appointed by Revlon, getting $4.5-5 million and six products, while Warwick & Legler, already Revlon agency, receives additional product and more than $1 million in additional billing.

Mogul gives Aqua Marine fragrance and Satin Set to W&L and Top Brass and Hi and Dri to Grey; La Roche products include Love Pat, Moon Drops, Ultima cream and makeup and Sun Bath lotion to Grey and Intimate Fragrance and Baby Silicare to W&L. Warwick & Legler is agency of record for Revlon network tv activity, which reportedly played no part in client-agency parting said to have come about because of differences over time needed for changes to be made in advertising.

Five join Mutual

Five stations, formerly independents, have joined Mutual. They are WATP Chicago, on 820 kc with 5 kw; WCOW Sparta, Wis., on 1290 kc with 1 kw; WORX Madison, Ind., on 1270 kc with 1 kw; KTRY Bastrop, La., on 730 kc with 250 w day, and KIHO Sioux Falls, S.D., on 1270 kc with 1 kw, directional night.

Business briefly

One hour in Paris • Renault Inc. through Kudner Agency, N.Y., will sponsor special hour-long program, Invitation to Paris, on ABC-TV April 27 (Wed. 10-11 p.m.). Paris show will star French entertainers Maurice Chevalier, Edith Piaf, Jean Sablon, Fernandez, Jacqueline Francois and Patachou.

Full house • NBC-TV's Bonanza, western adventure series colorcast on Saturday 7:30-8:30 p.m., is near SRO status with announcement by network last week of five new advertisers joining Miles Labs, which sponsors thirds. Sponsor lineup now stands like this: RCA
via J. Walter Thompson for alternate hours through June; Procter & Gamble via Benton & Bowles for alternate thirds, along with Johnson Motor Co. via J. Walter Thompson, Chicago, I.E. du Pont de Nemours & Co. via BBDO, and Gold Seal Co. via Campbell-Mithun, Minneapolis.

Set for fall • Western Tablet & Stationery Corp., St. Joseph, Mo., maker of school supplies and stationery, has purchased participating sponsorship starting in late summer on Dick Clark’s \textit{American Bandstand} on ABC-TV (Mon.-Fri. 4-5:30 p.m.). Back-to-school campaign will be company’s national advertising debut, network said. Agency: Bozell & Jacobs, Kansas City.

\textbf{Daytime shoppers} • ABC-TV last week signed following advertisers to daytime (12-4 p.m.) schedules: Beech-Nut Life Savers Inc. for Beech-Nut coffee (Charles W. Hoyt Co.); Best Foods Div. of Corn Products Co. for Nucoa margarine (Dancer-Fitzgerald-Sample); Borden Foods Co. for Super Starlac (D-F-S); Dinner Redy Corp., subsidiary of Lever Bros., for Dinner Redy frozen dinners (Foote, Cone & Belding); EXEC Mfg. Co. for EXEC paste pen (Charles W. Hoyt Co.); General Mills Inc. for cereals (D-F-S); and Whitehall Labs Div. of American Home Products for various products (Ted Bates & Co.).

\textbf{WEEK’S HEADLINERS}

\begin{itemize}
  \item \textbf{Mr. Glasscock}
  \item \textbf{Mr. Colee}
  \item \textbf{Mrs. Colee}
\end{itemize}

\textbf{Harvey L. Glasscock}, vp of Metropolitan Broadcasting Corp. and general manager of WHK Cleveland, to similar post with WIP Philadelphia, following Metropolitan’s formal acquisition of station Dec. 29. \textbf{Benedict Gimbels Jr.}, WIP president and general manager under former management, named vp of Metropolitan and also is slated to become director of corporation, with offices both in Philadelphia and New York. \textbf{Ralf Brent}, sales vp and director WIP, becomes assistant to president of Metropolitan in New York. \textbf{John W. Kluge}, Metropolitan chairman of board, also announces new appointments for WTVH (TV) Peoria, Ill. \textbf{Donn Colee} joins WTVH as general manager from WLOF-TV Orlando, Fla., where he was vp and general manager. His wife, \textbf{Lee Colee}, becomes director of sales, moving from WLOF-AM-TV where she was sales manager. Metropolitan stations, in addition to WIP, WHK and WTVH, are WNEW-AM-TV New York, WTTG (TV) Washington and KOVR (TV) Stockton-Sacramento, Calif.

\textbf{Patrick J. Winkler}, assistant to president of RKO General Inc., assumes additional duties as vp in charge of standards and practices for company, newly-created post. He will be responsible for regulatory matters concerning all RKO General divisions, which cover five TV stations and seven AM radio stations, plus the Yankee network, and will conduct special studies of operations within these divisions. He has been with the company since 1949 in various executive positions. \textbf{Paul H. Martin}, general sales manager of KHJ Los Angeles, an RKO General station, appointed national sales manager for KHJ, KFRC San Francisco and WHBQ Memphis, all owned by RKO General. He will headquartered in New York. Earlier he had been sales manager of KFXM San Bernardino, Calif., and general manager of WSKI Montpelier, Vt.

\begin{itemize}
  \item \textbf{Mr. McCormick}
  \item \textbf{Mr. Keating}
  \item \textbf{Mr. Baer}
\end{itemize}

\textbf{Thomas A. Velotta}, vp in charge of special programs, ABC-TV, since last October, named to newly-created post of vp, special projects, news and public affairs, ABC. He will coordinate scheduling and sales developing of ABC’s expanded news and public affairs programming. Other appointments following Mr. Velotta’s shift: \textbf{John H. Secondari}, ABC News’ Washington bureau chief, named producer for special projects; \textbf{Robert H. Fleming}, who joined ABC News in 1957 and formerly with \textbf{Newsweek}, succeeds Mr. Secondari in Washington, and \textbf{John T. Madigan}, of ABC news department, becomes manager, New York bureau. Mr. Secondari will have three unit producers: \textbf{Mary Laing}, \textbf{Walter Peters} and \textbf{Helen Jean Rogers}. Mr. Velotta started in broadcasting as \textbf{NBC} page in 1928, moved into news and special events programming and joined ABC when NBC split into Red and Blue Networks. He was elected vp in 1948. In 1954 Mr. Velotta became ABC’s administrative officer in news-special events-public affairs, and in 1957 was assigned to ABC-TV’s west coast offices where he remained for two years.

\begin{itemize}
  \item \textbf{Mr. Velotta}
\end{itemize}

\textbf{FOR OTHER NEWS OF PEOPLE SEE FATES & FORTUNES}
NED SMITH, manager of our San Francisco office, one of ten offices providing fast, efficient service to Advertising throughout the U.S.—service that helps advertising dollars deliver extra value.

Manufacturing is California's major industry—a fact often surprising to those who think of the state mainly in terms of fruit or film. In just six years following World War II, California's industrial production more than doubled.

In helping west coast industries get a greater share of America's consumer dollars, Spot Television has played a big part. And in 25 key markets, the stations that consistently deliver top selling-power per dollar are represented by Blair-TV.

Efficient time-buying demands accurate down-to-the-minute data on these markets and stations—data instantly available to the Bay Area through our San Francisco office.

Blair-TV operates on this basic principle: that alert informed representation is a service vital not only to stations but also to all Advertising, and to the businesses dependent on it for volume and profit. From the first, our list has been made up of stations and markets we felt in position to serve effectively. Today these stations cover 56 percent of America's population—virtually 60 percent of its effective buying power.

In its area, each of these stations stands as a powerhouse of selling force. To help advertisers and their agencies make most profitable use of that force, is the constant objective of our entire organization.

CHIEF ENGINEER'S REPORT ON RCA-6166...

"OLD GRAND-DAD" RETIRES AFTER LONG AND FAITHFUL SERVICE

Henry Goldenberg, Chief Engineer of KMBC-TV, says: “Several RCA-6166 tubes in our 50 Kw TV transmitter have piled up quite an impressive number of hours. One of them—we call it “Old Granddad”—accumulated 28,616 hours on-air before it was finally retired. Two others went well past 18,000 hours before being replaced. We check all tubes regularly and make sure we stick within the proper operating voltages at all times.”

The extreme longevity experienced by KMBC-TV is, of course, exceptional. But it is an exception that forcefully demonstrates the high-quality of the RCA-6166.

This inherent quality plus proper care of the field-proven 6166 often results in performance beyond “normal” life expectancy. This means direct benefits in reduced transmitter maintenance and downtime as well as more hours of service per tube dollar.

Your RCA Distributor of broadcasting tubes will be happy to supply your needs promptly. He also carries RCA Sound Tape—the quality tape. Whether it’s tubes or tape, count on him for fast delivery.

A CALENDAR OF MEETINGS AND EVENTS
IN BROADCASTING AND RELATED FIELDS
(*Indicates first or revised listing)

FEBRUARY

Feb. 14-20—Advertising Federation of America's National Advertising Week (co-sponsored by Advertising Age—S.C., West). Cities will be announced later.

Feb. 15—Hollywood Ad Club luncheon. Richard Jencks, president, Alliance of Television Film Producers, will speak on "TV Films—Their Place In the Hollywood Sun." Hotel Roosevelt.

Feb. 15—Amex Corp. Videotape symposium, "Two Years of Videotape Progress." Lawrence M. Caring, general manager of WTW-TV New Orleans, will be among speakers. Sheraton Park Hotel, Washington, D.C.

Feb. 15-19—National Sales Executives-International Annual Convention of Radio Sales Management Institute, Sheraton-Cleveland Hotel.

Feb. 17—Hollywood Ad Club second annual Broadcast Advertising Clinic, all-day session at Hollywood Roosevelt Hotel. Producers' awards for best TV and radio commercials produced in Southern California during 1959 will be presented at luncheon. Phil Seitz of Advertising Age and Bill Merrit of Broadcasting are again chairman of the awards committee. Mary Salzman of MAC is clinic chairman.

Feb. 18-20—Thirtieth annual Western Radio and Television Conference. Broadcasters' responsibilities and etv will be among topics discussed. Beliveau Hotel, San Francisco.

Feb. 20-23—American Bar Assn. midwinter meeting, Edgewater Beach Hotel, Chicago. AAA board of governors and groups, along with National Conference of Bar Presidents and Fellows of the American Bar Foundation, meet in advance of House of Delegates sessions Feb. 22-23. Progress reports on study work with media representatives on governmental proceedings expected to be filed.

Feb. 19—Alpha Delta Sigma and Gamma Alpha Chi of U. of Houston chapters, Advertising Week banquet. Speaker: Gordon McLendon, president, McLendon Corp., on "Radio vs. newspapers—the competition giants."

Feb. 19—Senate Interstate & Foreign Commerce Committee session with spokesmen for federal regulatory agencies, networks, advertising agencies, advertisers, et al., on corrective measures being taken against alleged abuses in radio-television. Washington, D.C.

Feb. 19—Sales Executives Assn. and Advertising Club of St. Louis, combined meeting, Statler Hilton Hotel. Speaker: Robert Hurliegh, president, MBS.

Feb. 20-22—National Sales Executives-International midwinter board of directors meet, Robert Meyer Hotel, Jacksonville, Fla.

Feb. 24-25—Fifth annual State Presidents Conference under Mutual executives. Shoreham Hotel, Washington. Presidents of state broadcasters associations will attend; Voice of Democracy luncheon will be a feature.

Feb. 29—Assn. of Maximum Service Telecasters, technical committee. 1710 H St., N.W., Washington, D.C.

Feb. 29-March 1—CBS Network Affiliates and Network Officials, special conference. Shoreham Hotel, Washington. Speakers will include Sen. Warren G. Magnuson (D-Wash.), chairman, Senate Interstate and Foreign Commerce Committee; Rep. Oren Harris (D-Ark.), chairman, House Interstate and Foreign Commerce Committee and House Legislative Oversight Subcommittee; FCC Chairman John C. Doerfler and FTC Chairman Earl Kintner.

MARCH

*March 1—Comments due on FCC rulemaking requiring listeners to adopt procedures against payola and program deceptions.

March 2—Assn. of Maximum Service Telecasters, board of directors meeting, Sheraton Hotel, Washington, D.C.

March 8-11—Audio Engineering Society west coast convention, Alexandria Hotel, Los Angeles.

March 13-14—Texas Assn. of Broadcasters spring meet, Rice Hotel, Houston.

March 15—Radio & Television Executives Society timebuying-selling seminar. Richard S. Salant, vice president of corporate affairs, CBS, Inc., and speaker from advertising agency of one of the major political parties, discusses "The Fall Political Campaigns and Broadcasting." Hotel Lexington, New York, noon-2 p.m.

March 15—Academy of Television Arts & Sciences at New York, forum on educational tv, NBC.

*March 17—Southern California Broadcasters
There's more
There's **WJXT** in Jacksonville, where the most alluring figures are everyday statistics! WJXT starts out with well over double the county coverage in Northeast Florida and South Georgia...and goes on to all but monopolize the Nielsen ratings, in all time periods, inside Jacksonville, outside Jacksonville, any way you figure it.

Example: 166 out of 168 quarter-hour wins between 6 p.m. and midnight! Compare any category; you'll find there's more, much more to WJXT.

March 17-19—Advertising Federation of America North District Convention, Cornhusker Hotel, Lincoln, Neb.
March 18-19—Arkansas Broadcasting Ass'n, annual spring meeting. Principal speaker: John F. Meagher, NAB vice president for radio. Petit Jean State Park, near Morrilton.
March 20-23—National Educational Television & Radio Center, meeting of program managers of affiliated stations, KUHT (TV) Houston.

*March 21-26—Northwestern U. second annual Short Course for Newsmen in Crime News Analysis and Reporting, Fish Hall, Evanston Ill. campus, under co-sponsorship of university's Medill School of Journalism and School of Law. Among speakers: William Garry, news and public affairs director of WBBM-TV and Len O'Connor, newscaster and commentator with WNAD (TV) and WMAQ both Chicago.

March 21-23—Canadian Ass'n. of Broadcasters, annual convention. Meetings this year will deal primarily with business of association and BMI Canada Ltd. Latter will be open to advertisers and agency executives, but CAB meetings will be for members only. Chateau Frontenac Hotel, Quebec City, Que.

March 31—Academy of Television Arts & Sciences forum on "Do They [ratings] Really Know?"

APRIL

April 1—Comments due on FCC rulmaking to duplicate 23 clear channels with additional nighttime service.

April 1-3—Women's Advertising Clubs eastern inter-city conference, Sheraton-Biltmore Hotel, Providence, R.I.

April 2—Ass'n for Professional Broadcasting Education, Conrad Hilton Hotel, Chicago.

April 3-7—NAB Annual Convention, Conrad Hilton Hotel, Chicago.

April 4—Academy of Motion Pictures Arts & Sciences annual Oscar awards ceremonies, Pantages Theatre, Hollywood, and broadcast on NBC Radio.

April 5-6—American Management Ass'n's national packaging conference, Convention Hall, Atlantic City, N.J.

April 6—National Premium Buyers' 27th annual exposition, Navy Pier, Chicago. Premium Adv. Ass'n. of America will hold its annual conference in conjunction with exposition at same site April 5. And the National Premium Sales Executives conducts its sales and distribution seminar April 5.

April 8—Broadcast Pioneers annual dinner meeting. Sol Tashoff, publisher of BROADCASTING, is chairman of banquet committee. Conrad Hilton Hotel, Chicago.

April 6—Academy of Television Arts & Sciences forum on New York station operations.

April 9-10—Disc Jockey Ass'n., membership meeting. Minneapolis (site to be selected).

April 11—Deadline for filing reply comments to proposed FCC amendment of CONELRAD manual BC-3 to provide for transmission standards for the CONELRAD attention signal. Deadline for reply comments is April 25.

April 15-17—National Sales Executives-International spring finance and executive committee meeting, Hotel Lexington, Minneapolis.

April 19—Comments on FCC proposal to add additional vhf channels to several principal markets through reduced mileage separations.

April 25—Southern California Broadcasters Ass'n. Luncheon meeting with program to be presented by Cunningham & Walsh, L.A. Hollywood Knickerbocker.
WFBC-TV* CHANNEL 4, SERVING GREENVILLE-SPARTANBURG-ASHEVILLE ANNOUNCES THE APPOINTMENT OF AVERY-KNODEL, INC. AS EXCLUSIVE NATIONAL SALES REPRESENTATIVE EFFECTIVE FEBRUARY 1, 1960

*GREENVILLE, S. C.
**NOTHING SELLS LIKE ACCEPTANCE**

For 35 years in Minneapolis-St. Paul, WCCO Radio's acceptance has always been tops. Now it's at an all-time high—56.8% **share of audience**. That's the greatest share ever recorded since Nielsen began measuring the market. More so than ever, WCCO Radio delivers more listeners than all other Minneapolis-St. Paul stations **combined**—at the **lowest cost per thousand**. Makes this the perfect time to put your sales story where it will enjoy the **greatest acceptance ever**!

OPEN MIKE

Cunningham on control of tv
EDITOR: ... I appreciate the way you've handled my opinions (page 35, Jan. 25) because whenever I have gotten into controversial areas previously, I have not always been fairly handled by the press.—John P. Cunningham, Cunningham & Walsh, New York

Monday Memo 'brilliant'
EDITOR: Clay Stephenson's MONDAY MEMO in your Feb. 1 issue was a brilliant piece of writing and is true to the theme. But he overlooked one major reason for a lot of inferior thinking and that is the fervor everyone places on ratings ... —David A. Bader, President, Durham Telefilms Inc., New York

Inter-media cooperation
EDITOR: May I suggest that your story in the Jan. 25 issue (page 64) on the Worcester school board to ban WNEB from covering its meetings might have been even more interesting if it had pointed out that the Worcester Telegram, which editorially defended WNEB's coverage, owns WTAG, a competitor of WNEB.

You may have heard this from other sources, but I'm writing in case my Telegram friends and former associates up there are too modest to point this out to you themselves. ...—Joseph C. Dine, Ted Bates & Co., New York

Music & management: Part II
EDITOR: My comments on music and management (OPEN MIKE, Dec. 28, 1959) were necessarily brief and, for that reason, apparently misunderstood by some. I did not mean to infer that management should not know or care what music is being played by the disc jockey. On the contrary, if management would listen more to its own programs, their overall quality would surely improve.

My point was that disc jockeys should know music and be responsible persons who can be trusted to program their own shows interestingly and individually. Their standards should in every way be high. Whenever a jockey repeatedly plays records in poor taste or continually programs large doses of music aimed at a very limited segment of the available audience, a reprimand (or worse) is certainly in order.

However, a valuable performer (who must have at least a modicum of artistic temperament) can be undermined by unnecessary small criticisms, or by having his music prescribed for him.

A good disc jockey wants to respect management. He has no desire to usurp any of its traditional powers. But he is self-respecting, too, and wants the freedom he needs to do his best work.—Tom Eldridge, Hollidaysburg, Pa.

A miss makes Mrs. of Miss
EDITOR: Thank you for the splendid coverage you gave my address at the Retail Advertising Conference (page 44, January 18 issue). ... One thing: I've been trying for years to get a "Mrs." in front of my name. I see by your article I have succeeded.—(Miss) Josephine Brooker, Advertising Manager, Buttrey's Dept. Store, Great Falls, Mont.

KULA ownership status
EDITOR: In regard to your story on page 76, Feb 8 issue, I should like to set the facts straight on new ownership of KULA Honolulu. Purchaser (for $500,000 from Jack Burnett) is Charles Stuart III and not Stuart Investment Co. Latter is owner of other stations you mention but KULA is the first broadcasting venture for Charles Stuart III, nephew of James Stuart, president of Stuart Investment. Upon FCC approval, I will make my home in Honolulu and direct property as president of KULA Broadcasting Corp.—Charles Stuart III, Lincoln, Neb.

FCC hearing coverage
EDITOR: I just wanted to take this opportunity to tell you what a tremendous job Broadcasting has done in its coverage of the FCC hearing. It has been complete and accurate and has done a magnificent job in giving the sense of the statements and questioning.

This, as anyone who has read the lengthy transcripts can testify, is a difficult job. It reflects the work of good reporters with a solid background of understanding. This is a tremendous contribution to understanding—Louis Hausman, Director, Television Information Office, New York

Market report on Hawaii
EDITOR: I would like to take this opportunity to congratulate you for the...
The Ancient Greek letter ALPHA has become synonymous with the word FIRST. Similarly, the ALPHA character to WCCO Television's channel number goes even deeper... Channel 4 being synonymous with leadership in the competitive four-channel Twin City market.

The difference between GOOD and GREAT in Minneapolis-St. Paul Television is the 46% average share of total homes (7 AM-12 midnight) garnered by WCCO Television... Dec., 1959 Nielsen.

WCCO TELEVISION - CHANNEL 4

CBS IN THE NORTHWEST

excellent portrayal of Hawaii as it is today (page 67, Jan. 18).—Rep. Daniel K. Inouye (D-Hawaii)

EDITOR: ... exceptionally well done and all the comments I have heard from Hawaii were extremely good.—H. Walton Cloke, Coordinator of Public Relations, Kaiser Industries Corp., Washington.

[Reprints are available, 20¢ each.—THE EDITORS]

Radio’s stay-awake record

EDITOR: Today I was looking through some back issues and ran across the article “Honolulu d.j. fights Morpheus for 9 days” (page 62, Dec. 28, 1959).

Without any intention of hurting Tom Rounds’ feelings, I felt that I owe it to my former employer, WKEI, Kewanee, Ill., to bring the following information to your attention. On Aug. 16, 1959, the undersigned broke the “wake-a-thon” record established by Peter Tripp, also that of Stan Major, formerly of Peoria, who broke Tripp’s record and subsequently lost his title to Jim Austin of Miami (229½ hours if my memory serves me correctly).

My wake-a-thon was carried out in the showrooms of Lauterborn Buick-Pontiac, Kewanee. I was under constant supervision.

In one respect I was more fortunate than Mr. Rounds in that I suffered no ill effects and quit only at the request of the doctor and my employer. I slept well for 18 hours. Visited friends for 4 hours, slept for another 12 hours, then went on to a normal work schedule. Anyone who wishes to claim a new record will have to stay awake for longer than 231 hours and 11 minutes —my record—Robert Murray Wright, WAKI Galesburg, Ill.

‘Minds in conflict’ reprints

EDITOR: (Editorials, Dec. 7, 14, 1959) are masterpieces of good writing and of straightforward, constructive, meaningful thinking. Hats off! I’d like to send copies of “Minds in conflict” to all of your fellow members and because I’m sure there will be requests for extras could you start me off with 150 to 200 reprints.—William K. Beard, President, Associated Business Publications, New York

[Reprints containing both editorials are available. 10¢ each.—THE EDITORS]

‘Politics over principle’

EDITOR: Your editorial “Politics over principle” in the Feb. 1 book was right on target—one of the most powerful I have read.—Miller C. Robertson, President KUEN Wenatchee, Wash.

Salutes a different high school each day with news and feature highlights.

CALIFORNIA 11:00 PM

Ten-minute reports from leaders of education, government and industry.
FREEDOM FIGHTER?

One tube...a freedom fighter? In free radio, every component—electronic and human—must share its responsibility in the never-ending fight for the rights of free people: freedom of speech and worship, freedom from want and fear. At KRLA, Radio Los Angeles, this responsibility translates itself into a wisely-balanced program schedule: music and news to appeal to most of the people most of the time...planned blocks of religious, educational and discussion features to serve all the people all the time.

Newest among the leaders serving America's greatest radio market

How one blue chip agency views radio

Maybe it’s because radio has been around longer. Maybe it’s because it has dinned at us too much. But listeners have developed an almost complete psychological deafness to commercials that follow the old tired grooves.

The reward for being fresh is greater in radio than in any other medium. So say the researchers and so says Kenyon & Eckhardt.

The formula for keeping freshness in our radio commercials is a set of principles that has been documented and kept up to date within the agency ever since Board Chairman Edwin Cox was creative director. At that time he began analyzing successful advertising in all media to find the characteristics that apparently insured successful communication.

We put these principles into daily use here in the production of commercials for a number of top accounts. We think they are good principles because they get results.

Radio as an entertainment form has changed a lot since TV. So has its role in American life. But this lively member of our available media refuses to be killed by its glamorous successor. What have we learned about radio’s use?

**People Hear in Pictures** Researchers make the interesting observation that people respond when they can picture what they hear in commercials. They suggest that we use words and present situations that people can easily visualize. Abstractions are a waste of time.

Listeners wonder where the yellow went because they can see the yellow. A household antiseptic reconstructed an accident so that people had a picture of it. The radio writer should train himself to write in graphic terms.

We list “simplicity” under the cardinal virtues of all advertising. But it has a special significance in radio commercials.

Nine-tenths of commercials attempt to do too many things, to get over too many ideas, to flash too many changes of scene, to present too many arguments. Again, the law of parsimony—do less and do it better.

**Outlaw the Stogies** Let us, once and for all, banish from commercials the technique of the double stooge. This means a stilted dialogue in which two unbelievable characters ply each other with sales points in language that is barely recognizable as human speech.

Imagine a toot of six addressing her mother like this:

**TOT:** Mummie, I just love my milk since you’ve been enriching it with this delicious Double-dextrous Malt-a-lac Chocolate compound.

**MUMMIE:** Yes, darling, you really drink your milk now.

**TOT:** And, Mummie, every nutritious crystal dissolves instantly. And have you noticed how the complete Vitamin B complex is making me strong in fourteen different ways?

**BOTH TOGETHER:** Right—when it’s Schmaltz’s Double-dextrous Malt-a-lac Compound, we’re sure!

Have you ever been three rooms away from a radio and known instantly when the commercial came on? The pitch and tone of voice are different. It is either sugary or frantic. Often the decibels bounce off the walls. Combine this manner with the “commercialise”

in which the scripts are written and it’s little wonder that listeners become tone-deaf.

The road to salesmanship begins with writers and salesmen-on-the-air who act like human beings and who are acutely aware of the sense of values of the people at home or in their cars.

**Who Says It?** One of the simplest things we have learned is that the personality of the salesman is almost as important as what he says. It is an elemental rule of human persuasion that people give their confidence to individuals they like.

Such a personality may not be a letter-perfect reader of commercials; he may even commit an occasional flub. His diction might not pass the BBC. But if the people love him, he can be more persuasive than the slickest of the letter-perfect “announcers.”

As soon as they get a radio assignment some writers automatically send for the jingleers. This is getting to be cliche, chestnut and stereotype No. 1. There seems to be a widespread feeling that music can make vapid words more significant. Even when one has to strain very hard to hear the words through the music.

This is not to damn all jingles. Some have been superb. But they should always convey a selling idea. They should be brief, simple, catchy. And the words should come through like the ringing of a bell! Look at the words alone. Only if they are worth saying are they worth singing.

Too many workers underrate the public’s interest in products—and believe that they must sugar-coat a product story with entertainment. Certainly, outside the casual purchase products (beer, cigarettes and the like, where the “light touch” is highly appropriate) this is a fallacy. Our own research has proven repeatedly that listeners would gladly trade our attempts at entertainment for product information—if it is interestingly presented.

People take the common sense view that the purpose of the program is to entertain and the purpose of the commercial is to sell a product. They accept the arrangement and do not rebel against it in principle. When they reject our commercials it is not because these commercials fail to provide entertainment, but because they fail to do their own job well.
In the Maryland Market, nearly 700,000 television homes mark time in the swift clocks of commerce and industry. Here thrives one of the world's largest steel mills, one of the nation's leading chemical centers, a center of clothing manufacture, a center of the graphic arts, a multiplicity of mercantile activities that naturally ensue in the nation's second largest seaport—handling over 22,424,464 long tons annually, the production of aircraft and missiles, the fabrication of automotive components and many other activities vital to the economic welfare of our nation. These people are the producers of goods and services, the measure of whose effectiveness is accomplishment in time.

*Infinita est velocitas temporis*... *Seneca*

For these same 700,000 television homes, WBAL-TV charts time's deliberate and constant speed carefully each day with an elaborate and varied program schedule designed to meet all their needs for relaxation, for entertainment, for information.

"Infinitely swift is the velocity of time..." the philosopher says. At WBAL Television 11 in Baltimore, YOU keep pace in the Maryland Market.

NBC Affiliate/Channel 11/Associated with WBAL-AM & FM.

**WBAL-TV BALTIMORE**

Nationally represented by Edward Petry & Co., Inc.
New Programming, new Personalities, new station policies at KOSI made November the month of important change for Denver radio listeners. They began to hear music and features that adults wanted to hear—good music, singable music, favorite music—unlike any other on Denver air.

Just as the Denver market today makes previous appraisals obsolete, so the new KOSI is setting new standards for radio broadcasting.
Walter Lake, McGavren Los Angeles manager and Bill Armstrong, executive vice president of KOSI make calls on leading Denver business executives. Denver is a cosmopolitan city of modern buildings and humming industries.

Fred Cohan, District Manager for Zale’s, largest jewelry chain in the U.S. with 6 Denver stores explains the complexities of competitive retail selling where sales results are paramount to Walter Lake, McGavren Co., Los Angeles.

Getting the complete Denver story of how to get sales results in the market, Harley Solt, Denver advertising agency executive reviews the approach and thinking of his organization with McGavren’s Walter Lake.

For **NEW** facts you can use about Denver
... ask the man who knows!

McGavren salesmen who all regularly work as local salesmen keep abreast of current market conditions and situations. Modern Denver is metropolitan complex of thriving communities — including Denver and Englewood, Golden, Littleton, Aurora, Derby, and between Boulder and Greeley.

This is the KOSI area that McGavren salesmen know and understand — and are prepared to discuss in advertising planning.

... ask the man who knows!
A LOT HAS CHANGED IN 30 YEARS

BUT NOT THE LEADERSHIP OF
WSPA IN THE PIEDMONT

FEBRUARY 17, 1930, WSPA went on the air in Spartanburg, and South Carolina enjoyed its first radio station. (there are now 70 stations in the state).

On February 17, 1947, WSPA-FM went on the air becoming the first frequency modulation station in South Carolina. On April 30, 1956, the Pioneer Radio Stations of South Carolina were joined by WSPA-TV, bringing to the people of the Piedmont CBS and the best in television programs.

WSPA grew from an independent 250 watt facility to a 5,000 watt day and night CBS station. During its 30 years of growth WSPA has been recognized as having more listeners and more family audiences than any other station in the Piedmont.

WSPA has attained its leadership and listening audience by being built on foundations of service to the public through radio with maturity. To promote the religious, educational, civic and economic life of Spartanburg and the surrounding area has always been paramount in the operation of WSPA ... Station philosophy is: To serve the listener first is to serve the advertiser best.

And so as WSPA celebrates its 30th Anniversary, the management pledges anew its determination to keep WSPA and its sister stations, WSPA-FM and WSPA-TV, in the forefront of public service, promoting at all times and above all else the educational, religious, civic and economic life of the region these stations are privileged to serve.

1930-THIRTY YEARS OF SERVICE-1960

BROADCASTING, February 15, 1960
WINTER BOOK ON THE FALL LINEUP

Here's what tv networks have pencilled in for new season

Outlook: fewer new entries than were introduced in 1959

The first faint outlines of next fall's nighttime tv network program schedule began to appear last week. It is far too early (which in today's early-buying climate means by a month or so) to be considered conclusive but it does represent what the networks were pitching to their clients last week.

If any conclusions are to be drawn from the tentative drafts, it is that next season will hold no great surprises. The rule, as in past years, will be that the established successes will stay, the marginals will make way for the new hopefuls. At this stage fewer than 20 new titles are being mentioned as strong possibilities; last fall saw over 40 new shows on all the networks.

This is how the night-by-night lineup looks. It is not official; rather, it was compiled by Broadcasting through conversations with agency executives, producers and other knowledgeable sources. The networks themselves, for "Macy's doesn't tell Gimbel's" reasons, declined to comment.

Sunday:

ABC-TV: Walt Disney Presents, shortened to a half-hour, is due to move from Friday night to open the Sunday schedule at 7 p.m. It will be followed by Maverick at 7:30, Lawman at 8:30 and Rebel at 9, all in their present slots. A new starter, The Islanders, is expected to replace The Alaskans in the 9:30-10:30 period. Another new show, the half-hour Winston Churchill series, will close the night at 10:30.

CBS-TV: Only one major change is in prospect for CBS-TV on Sunday. Alfred Hitchcock Presents, which has held the 9:30-10 slot, is expected to leave the network, reportedly headed for NBC-TV. It's understood Mr. Hitchcock was asking for a firm two-year contract, which CBS-TV was not prepared to give. Otherwise the night should remain: Lassie at 7:30, Ed Sullivan at 8, General Electric Theatre at 9, alternating Jack Benny and George Gobel shows at 10, and What's My Line? at 10:30. There has been some talk that Mr. Benny was unhappy with conditions at CBS-TV and was talking with other networks, but the best guess now is that they'll patch their differences and his show will remain.

NBC-TV: Overland Trail, which has recently replaced Riverboat at 7 on NBC-TV, should keep the job next fall. A new show, The Barbarians, is mentioned to replace the Sunday Showcase at 8-9. After that Dinah Shore Chevy Show looks good to stay at 9-10, and Loretta Young Show at 10:10-30.

Monday:

ABC-TV: Two new ones are being talked about for this night at ABC-TV, Project X to sub for Bourbon Street Bear (probably moving to Tuesday) at 8:30-9:30, and For Men Only to replace Man With A Camera at 10:30. Otherwise it's Cheyenne at 7:30-8:30.

TV PREVIEW

The nearsighted Mister Magoo, long a favorite character on movie screens, bumbles his way onto the tv screen starting Feb. 22 in a new General Electric commercial. UPA Pictures, Burbank, Calif., created the animation; BBDO is the agency.

The first spot finds Mr. Magoo coming to the aid of his attractive blonde neighbor, who has a lighting problem. He brings a supply of GE's new 100-watt light bulbs. He tells her they are smaller and brighter, able to fit where the older, larger ones never would.

In carrying out his mission, Mr. Magoo mistakes the girl's mother for (a) a lion on the tv set and (b) an old dress form. He asks the dress form, "Need a light for this elevator, mother?" The "elevator" is a clothes closet. The commercial closes with Mr. Magoo, having brought light to bear on the situation, peering at an eye chart and singing, "It's easy to see the best bulbs are GE."

The spots, featuring what GE calls "the light touch," were developed in cooperation with Arthur Bellaire, BBDO's vice president in charge of radio-tv copy. Rudy Larriva directed for UPA.
and Adventures in Paradise at 9:30-10:30.

CBS-TV: This year's schedule looks firm to repeat next fall, with the possible exception of Father Knows Best at 8:30-9. The word is that the cast of the seven-year success is anxious for other things, and the network re-run possibilities are tempting. The rest of the night: Kate Smith at 7:30, The Texan at 8, Danny Thomas Show at 9, Ann Sothern Show at 9:30, Hennessy at 10 and the June Allyson Show at 10:30.

NBC-TV: Riverboat, which has just moved into the Monday 7:30-8:30 slot, will likely stay there. It's due to be followed by Wells Fargo at 8:30, Peter Gunn at 9 and the alternating Alcoa and Goodyear theatres at 9:30. Biggest question mark on Monday revolves around the Steve Allen Show at 10-11.

Tuesday:

ABC-TV: The night should start again with Sugarfoot at 7:30-8:30. The show now alternates every other week with Bronco, which will either continue in that role or get its own every-week time period, perhaps on Thursday. Wyatt Earp at 8:30 and Rifleman at 9 should stay put, with Bourbon Street Beat moving over from Monday to occupy the 9:30-10:30 period now held by Philip Marlowe and Alcoa Presents. The Alcoa show will either move to 10:30 or give way to a new entry, One Step Beyond, in that period.

CBS-TV: The 7:30-8:30 period is open. The first half-hour has not been programmed this season, and the last half, now held by the Dennis O'Keefe Show, is due to be vacated. Dobie Gillis should repeat at 8:30, while Tightrope is a possible casualty at 9. Red Skelton at 9:30 and Garry Moore Show at 10-11 should be back.

NBC-TV: The only show considered a safe bet to repeat is Laramie at 7:30-8:30. Ford Starline is shaky, as are Arthur Murray Party and M-Squad. The Ford show has had a lacklustre ratings record, especially considering its budget. The Murray show probably will be moved, but just as probably will stay somewhere in the schedule.

Wednesday:

ABC-TV: A "Bugs Bunny" cartoon series is being pitched to start this night at 7:30, to be followed by Leave It To Beaver, imported from Saturdays, at 8. Ozzie & Harriet at 8:30 and Hawaiian Eye at 9-10 look safe. The Wednesday Night Fights at 10-11 are due to move to Saturday, and to be replaced by an hour version of Naked City.

CBS-TV: Be Our Guest is still considered to repeat in the 7:30-8:30 spot it took over from The Lineup earlier this year, although Guest has been no stirring success against NBC-TV's Wagon Train. Man Into Space at 8:30 and The Millionaire may give way to as yet undetermined replacements. The perennial I've Got a Secret is still in at 9:30, as are the alternating Armstrong Circle Theatre and U.S. Steel Hour at 10-11.

NBC-TV: The current lineup, one of the strongest in its schedule, is due to repeat for NBC-TV next fall. It starts with Wagon Train at 7:30-8:30 and goes on with Price Is Right at 8:30 and Perry Como Show at 9-10. This Is Your Life probably will repeat at 10. People Are Funny, now on Fridays, likely to take over from the departing Wichita Town at 10:30.

Thursday:

ABC-TV: At least two new shows are in prospect, Guestward Ho in for Gale Storm Show at 7:30 and Pat Buttram in for Pat Boone Chevy Showroom at 9. The Donna Reed Show at 8 and Real McCoys at 8:30 are due to repeat, as is The Untouchables at 9:30-10:30. Another new western, Stagecoach West is also talked about for this night, as is a weekly version of the Bronco, alternating hour from Tuesday night.

CBS-TV: An as-yet-untitled, hour-long underwater adventure show (a la Ziv's Sea Hunt) is being worked up for the 7:30-8:30 period, replacing the current To Tell The Truth and Betty Hutton Show. Johnny Ringo at 8:30 looks like a casualty, and Zane Grey Theatre at 8 may move to Friday. Markham, which moved into the 9:30-10 period after a Saturday night run, should repeat. The Revlon variety series, now at 10-11, may stay there, although there's some talk of a new hour-long public service entry taking over.

NBC-TV: Bonanza, which now is scheduled as the Saturday starter, is being readied as a Thursday replacement for the two 7:30-8:30 half hours, Plainsman and Bat Masterson. Staccato is questionable at 8:30-9. After that, the night could stay as is: Bachelor Father at 9, Tennessee Ernie Ford Show at 9:30, Groucho Marx at 10 and Lawless Years at 10:30.

Friday:

ABC-TV: Another Disney program, The Shaggy Dog, is on deck to move into the 7:30 spot that Walt Disney Presents would vacate in its move to Sunday. The 8-8:30 vacancy would be filled by The Flagstones, a full-animation comedy series. Current plans have Man From Black Hawk at 8:30, Sunset Strip at 9, Robert Taylor in The Detectives at 10 and Black Saddle at 10:30 retaining those periods.

CBS-TV: Rawhide should remain at 7:30-8:30, with Zane Grey Theatre (from Thursday) replacing Saturday Night de Paree at 8:30. The rest of the night is open to development. The much postponed Manhattan series might make it at 9-10, and there's an outside chance Twilight Zone will come back at 10-10:30. The last half hour of the night may hold a public service series.

NBC-TV: This one's wide open. People Are Funny and Troubleshooters aren't likely to be found at 7:30 and 8 as they now are with People perhaps going to Wednesday. The talk is that the whole night could go to specials, whereas now the 8:30-9:30 period alone is designed that way. A new show, Thriller, is a possible replacement for the Cavalcade of Sports fights which are exiting the 10-11 time.

Saturday:

ABC-TV: The Dick Clark Show will lead off at 7:30, with Lawrence Welk's Dodge Dancing Party moving up an hour into the 8-9 period. John Gunther's High Road is a casualty at 8; Leave It To Beaver, at 8:30, should move to Wednesday. The 9-10 spot is toss-up between a full-hour Pat Boone Show (leaving Thursday) and The Roaring '20s. The fights from Wednesday are due to go into 10-11.

CBS-TV: Saturday is one of CBS-TV's best nights, and it isn't likely to change. The lineup is Perry Mason at 7:30, Wanted Dead or Alive at 8:30, Mr. Lucky at 9, Have Gun Will Travel at 9:30 and Gunsmoke at 10-10:30.

NBC-TV: A new western, The Outlaws, may take over the 7:30-8:30 period now held by Bonanza, which is aiming for Thursday. The Deputy, now at 9, may move up to 8:30, which Man And The Challenge is likely to vacate. The only other show definitely in sight for Saturday is the World Wide 60 public service series now at 9:30-10:30 but eligible to move either way.
The Story of Warm Springs

NEWEST DOCUMENTARY IN THE WSB-TV "ROAD BACK" SERIES

This dramatic inside story showed WSB-TV viewers the personal struggle of paralysis patients on the "road back" from polio, arthritis and crippling birth defects. The half-hour film was written and produced by the WSB-TV staff, and filmed at Georgia's famous Warm Springs Foundation. It captured the spirit of plucky laughter and courageous hope so evident among patients. WSB-TV timed its showing to coincide with the New March of Dimes. Imaginative, responsible programming of this character has earned heart-warming rewards for WSB-TV...and for the station's advertisers.

COLD REMEDIES IN SEASONAL networks

Advertisers of toiletries and food products invested nearly $200 million on the three tv networks in the Jan.-Nov. period, or approximately 34.5% of total network gross time charges ($568,274,278) estimated at the one-time rate for the 11 months.

Procter & Gamble, which spent over $3.5 million, was top advertiser in November. It was followed by American Home Products (more than $2.5 million) and Lever Bros. ($2.43 million).

Leading advertised brands (according to billing) on the networks were Anacin tablets ($888,280), Dristan ($875,872), and Winston cigarettes ($627,332).

Network tv billing figures were released today (Feb. 15) by Television Bureau of Advertising. They are compiled for TVB by Leading National Advertisers-Broadcast Advertiser Reports. The bureau's report covers the month of November and the 11-month period of 1959 ending in November.

Gas Pedals • Gasoline advertising in the 11 months totalled more than $8 million, over three times the amount spent on network tv in the same period of 1958. During this period, nearly every product category was up. The major exceptions were automotive, office equipment, radio-tv sets and travel.

Four advertisers in November spent an estimated $2 million or more at gross rates for time on the tv networks: P & G, American Home Products, Lever and General Motors. Seven other advertisers spent less than that amount but were $1 million or over in the same month.

In the brand category, leadership went to two cold remedies—Anacin and Dristan. The other brand advertisers in November's top 15 were cigarettes, automobiles, toothpaste, a head-ache remedy (Bufferin), and a detergent (Tide).

Both Anacin and Dristan are products of Whitehall Labs which is owned by American Home Products. Bufferin is a Bristol-Myers product. The leading cigarette manufacturers represented among the top brands included R. J. Reynolds Tobacco, Liggett & Myers and P. Lorillard. Three of General Motors' autos hit the list (Chevrolet, Buick, Oldsmobile), as did one for Chrysler (Plymouth cars) and another for Ford Motor (Ford cars). P & G's brand leaders included Gleem toothpaste and Tide detergent; Colgate's top 15 entry was its Colgate toothpaste.

TvB's 1959 billing figures

Network and spot tv (national and regional) gross billing was "in excess" of $1.24 billion in 1959, Norman E. Cash, president of Television Bureau of Advertising, reported today (Feb. 15).

Mr. Cash said that final tabulations for 1959 national tv gross billing would be released in coming weeks. (Leading National Advertisers-Broadcast Advertiser Reports provide network figures for TVB, while for spot information, TVB-Rorabaugh is the source.)

The total 1959 figures, Mr. Cash said, represent an increase of about 15% over the $1,078,360,000 advertisers spent in 1958 in network, national and regional spot television. Mr. Cash's estimates do not include local advertising volume in tv nor talent costs. (Gross billing represents advertiser purchase of tv time computed at the one-time rate.)
WBAL IN BALTIMORE, NBC AFFILIATE, MARYLAND'S ONLY 50,000 WATT RADIO STATION ANNOUNCES THE APPOINTMENT OF THE DAREN F. McGAVREN CO., INC. AS NATIONAL REPRESENTATIVES, EFFECTIVE FEBRUARY 15, 1960
"Crusade for decency" urged for advertising

Creation of a "Crusade for Advertising Decency" on both national and local levels was called for by Ernest A. Jones, president of MacManus, John & Adams Inc., in an address to the Sales Executives Club in New York last week. He urged concerted action by advertising, business and media.

In Mr. Jones' view, "A great deal of the mistrust of all advertising is generated at the strictly local level where honest national advertising is sometimes perverted by the fly-by-night shyster with one eye on the sucker and the other on the Better Business Bureau." The "grass roots" level of the "crusade" would "watchdog" local media, advertising and business, and hopefully would operate "in every community in the land large enough to support commercial communication." Mr. Jones suggested the following ways to implement the "crusade."

"1. Seek out the objectionable advertising and call in those responsible for a face-to-face explanation and to point out the harm being done to all business and to the community."

"2. Serve as a clearing house and investigating body for consumer complaints which it would actively solicit."

"3. Refer to the Better Business Bureau or proper legal body incorrigibles who resist moral suasion."

"4. Judge questions of taste in advertising which, while objectionable, do not fall into the province of the Better Business Bureau or of the courts."

"5. Stand and act as the beacon of honest advertising in all of its forms." Not blaming media for dishonest advertising, Mr. Jones places the blame on the "dishonest discount house, the shady appliance dealer...the stores using a sprinkling of national brands as bait to peddle schlock merchandise." He also cited the lack of moral courage of advertising agents who crumbled under pressure from the client. "An ounce less greed...an ounce more courage anywhere in that chain and the advertising in question never would have reached the public."

What is needed, Mr. Jones said, is not more legislation, but the united action of the "crusade." Present controlling groups, such as the Assn. of National Advertisers, the American Assn. of Advertising Agencies, and the Advertising Federation of America suffer from limiting factors, principally lack of control over non-members and inability to punish offenders. Furthermore, they can operate only on the national level, he said, whereas much objectionable advertising originates locally.

A BOO-BOO OVER BAN?
Network screening of revamped statues causes friction with NAB code reviewers

NAB's Television Code is showing symptoms of underarm irritation.

The commercials for Ban—an antiperspirant whose Greek statues have harassed networks, the NAB TV Code Review Board and code stations—have been overhauled and are going into the studio production stage.

But the process of revamping the commercials has aroused internal problems centered around the screening processes of CBS and NBC and the routine NAB review of controversial copy.

Thus far the separate approaches of networks and NAB's code board have operated without open controversy. It's known around Madison Ave., however, that at least one network is seething over the NAB code board's handling of Ban, a product of Bristol-Myers. Ogilvy, Benson & Mather, New York, has handled the account since last summer. Formerly it had been at BBDO.

On the surface, Ban's role in the network and NAB code structures has been smooth. Network and NAB criticism of the Greek statue commercials has been accepted in a cooperative manner by Bristol-Myers and the agency, according to sponsor, agency and NAB itself.

The trouble is described as centering around the separate network and NAB efforts to meet station criticism of Ban commercials.

CBS Questions • It's known that CBS-TV questioned the statue commercials last autumn. The agency made revisions which apparently met network criticism. The nudity angle is understood to have been raised in network circles when the new agency took over the account.

Criticism from stations was heard by networks and NAB during the autumn and came out into the open in mid-December when Donald McGannon, Westinghouse Stations, NAB TV Code Review Board chairman, was queried by FCC counsel in the FCC's series of broadcast hearings.

The FCC questioning was dropped when Mr. McGannon explained the code board was in the process of studying Ban commercials.

Next step in the series of conferences and discussions came Jan. 14 when the NAB code board, at a New York meeting, adopted a resolution describing Ban commercials as violations of the code. NAB sent wires to the agency and the three TV networks notifying them of the action, and then went into a series of conferences with the sponsor and agency.

Explain Objections • The NAB code staff was directed to explain NAB's objections and to make clear that objections were based on the commercials rather than on the product. A previous major controversy at NAB, based on Preparation H, had been directed to the fact that it was a hemorrhoid remedy and therefore unacceptable under the rule banning intimate personal products from TV (Broadcasting, June 22, 1959).

Network reaction to the Jan. 14 step was bitter, in at least one instance. The criticism is believed to have taken the position that network action had led to a revision of commercials, with NAB climbing aboard and grabbing credit for copy it hadn't formally objected to during the autumn months.

In any case, NAB code people met with agency and sponsor June 22, considered revised story boards for the Ban commercials. These were circulated to the code's personal products subcommittee headed by E.K. Hartenbower, KCMO-TV Kansas City. Another meeting was held Feb. 5. At this time the revisions were considered in detail.

Lee H. Bristol Jr., of Bristol-Myers, told Broadcasting the sponsor, agency and NAB were in general agreement over revision of Ban commercials. "Everything has worked out," he said. "We're all pleased. Minor changes have been made in audio and visual copy. Bristol-Myers is glad to cooperate. NAB has been reasonable and we've reached a happy solution. We'll go into production when NAB sends written confirmation of our verbal agreement."

Revisal • Edward H. Bronson, NAB staff code director, said, "We met with the agency and sponsor, resolved our differences and the commercials are being revised."

NBC-TV and CBS-TV conceded they had been involved in code discussions with NAB, agency and sponsor but would not go on record as to details. Both are understood to have sent letters to NAB code officials following the code board's Jan. 18 telegrams but they did not reveal the specific nature of their contents.

James A. Stabile, NBC vice president who has been placed in charge of NBC's recently created program-commercial review unit, said the network some time ago had raised questions about Ban's Greek statues and the selling voice promoting the product. He said the network and code board "must know what each other is doing."

Joseph H. Ream, CBS Inc. vice president who is supervising the CBS-TV program-commercial review activity, said, "After the NAB Code Board's Jan. 14 meeting, CBS sent a letter to NAB reviewing the history of Ban commercials and the CBS-NAB discussions on the subject."

There's rancor and complaining in the code background that will come before the NAB code group at its next meeting, to be held March 3 in New York. The code board will report to the NAB Television Board at a March 9 meeting in Washington.

McGannon to AFA: we need your support

Importance of advertiser and agency support for the NAB TV Code Review Board was stressed by Donald H. McGannon, president of Westinghouse Broadcasting Co. and code board chairman, last Monday (Feb. 8) to an Ad-

Our Banners...

The flags of 9 great States fly over a part of America called WLW TV and Radio Land.

And the Crosley WLW Stations have tried to be good citizens under these 9 State banners—thru-service to their communities.

For it has always been the principle of the Crosley Broadcasting Corporation that a Television or Radio Station must be truly a good neighbor in its community — by performance and leadership in entertainment, religion, education, news, safety, health, civic and charitable causes, fine arts, and for the fundamental freedoms of our Nation.

The WLW Stations pledge continued service—unfurling progress and patriotism before them for the 20 million people of these communities. This is our Pride and our Privilege!

the dynamic WLW Stations:

WLW-D Television Dayton
WLW-C Television Columbus
WLW-T Television Cincinnati
WLW-A Television Atlanta
WLW-I Television Indianapolis

Crosley Broadcasting Corporation, a division of Avco
vertising Federation of America district meeting in Boston.

The final decision on what is to be broadcast must lie with the broadcaster, he pointed out. But he said the code board would continue, both as broadcasters and as code supporters, "to consult with advertisers and agencies on all manner of issues that touch upon code affairs."

"We will hope to find in the future," he continued, "as we have in most cases in the past, an understanding and cooperative attitude on your part—knowing, as I am sure that you do, that part of the effectiveness of television as a selling instrument depends upon not only its believability but also its decorum."

Reviewing the formation and work of the code group, Mr. McCannon noted that a Los Angeles consultative unit already is in operation and reported that "we are planning that during the next year there will be an increase in our activities in and around the New York area where so many television commercials are filmed for release." The code staff's headquarters is in Washington.

He recalled that 16 stations resigned their code affiliations and 19 others had their code seals revoked in the dispute over the propriety of carrying the Preparation H hemorrhoid treatment commercial a year ago (46 others dropped the advertising to stay with the code). Most of the defections, he reported, "have returned at this time to good standing."

From Sweeney • Radio sets will increase 70% and adult listening 50% in the next ten years, Kevin B. Sweeney, president of Radio Advertising Bureau, predicted at the AFA meeting last week.

By 1970, he predicted, sets will reach 250 million to 260 million, a net gain of 103.8 million or more; and listening will rise to better than three hours a day per adult, compared to a little more than two hours per adult now.

Mr. Sweeney also predicted that the 30-second commercial would replace the 60-second version as "the prime tool of both the retailer and national advertiser;" that use of radio would show "an almost incredible gain"; that a new type or advertising agency, specializing "almost wholly" in radio would develop; and that the automobile radio market would increase to more than 65 million sets and become virtually "a separate advertising medium" in itself.

Charles H. Bower, BBDO's president, termed the troubles of today's U.S. the symptoms of a national disease he called "epidemic cynical selfishness." He named inflation, delinquency, increasing divorce rate, church and synagogue desecrations, death on the highways as some of those symptoms along with "the evils which have recently beset our own business—rigged quiz shows, payola and tv commercials which are less than truthful." Mr. Brower urged the nation to turn itself to a cause as vital as any in wartime—the cause, he expressed as a need to discover leaders.

OLYMPIC SPONSOR
Winter games pool bought by Tidewater

Tidewater Oil Co., Los Angeles, is sponsoring radio coverage of the Winter Olympic Games in five Western states as the result of a special pool arrangement.

The Olympics broadcast committee queried stations as to their desires for broadcast coverage of the Games. It found that some 300 stations wanted to send reporters to Squaw Valley, Calif., where the Games are to be held. The space available is completely inadequate for such mass reporting. So the committee asked one of its members, Frank Mieuli, president of KPUP (FM) San Francisco and producer of the San Francisco Giants and 49ers broadcasts, to set up an Olympic broadcast pool.

Mr. Mieuli not only set up the pool, but persuaded Tidewater Oil Co. to pay line charges and talent costs in exchange for co-sponsorship of the broadcasts. The stations get the programs without charge in exchange for carrying the Tidewater commercials. They may sell the rest of programs locally.

Each day, from the start of the Winter Olympics on Feb. 18 to their conclusion Feb. 28, the pooled sports crew will broadcast 15-minute reports every hour beginning at 9:05 a.m. and ending at 3:05 p.m., (seven reports in all). At 3:30 p.m. there will be a half-hour summary of the day's events. And at 4 p.m. the day's broadcasts will conclude with play-by-play coverage of a hockey match. The crew includes sportscasters Russ Hodges, Lon Simmons, Bob Blum and Gordy Soltau, with Roy Storey doing the hockey games.

A total of more than 50 hours of eyewitness Olympics reporting will be fed to the pool, although not all stations will carry the full schedule. The 15-minute radio reports will be presented so stations which cannot devote a full quarter-hour to them can cut them off at the end of five minutes and still give their listeners a cohesive report which shows no evidence of being snapped off short.

Foote, Cone & Belding, Los Angeles, Tidewater agency is handling details.

Furniture dealers buy special tie-ins

A resourceful tie-in advertising campaign is being arranged by at least 150 local dealers of Broyhill Furniture Factories, Lenoir, N.C. They are purchasing 20-second time segments exploiting the Feb. 21 telecast of CBS-TV's Ed Sullivan Show. The reason: The program includes a commercial spotlighting Broyhill's Early American and French Provincial furniture groups.

The commercial on the program is for Eastman Chemical Products Inc., manufacturer of the Chromspun acetate fabric used in the upholstered furniture. Broyhill ordered two 15-second film spots to be produced by Elliot Unger & Elliot, New York, which filmed the Eastman Chemical commercial.

Broyhill immediately notified its dealers throughout the country that the spots were available for purchase from EU&E and recommended that time be purchased locally, preferably before or following the Feb. 21 telecast. The spots consist of a 15-second pitch for Broyhill, leaving five seconds open to identify the store and tie in with the network telecast. TVB cooperated in the project by alerting its members to the campaign.

A spokesman for EU&E said that at least 150 dealers were expected to participate in the campaign and termed the venture "rather unusual."

Two shows go begging as networks turn back

An advertiser who buys a program and then shops for a network these days had better tread warily. All three television networks have turned down a two-part documentary, The Race for Space, which Shulton Inc. (toiletries) had hoped to telescast. And, the Richard Hudnut cosmetic line of Warner-Lambert Pharmaceuticals was still waiting last week for an acceptance on its "unfixable quiz," Predictions (.Broadcasting, Jan. 25).

ABC-TV, CBS-TV and NBC-TV, when contacted about the space documentary, all said they like to produce their own news and public affairs shows. No one said the issue of program control was involved.

The space program was produced in two 60-minute segments by David L. Wolper, former head of Flamingo Films, who now is producing in Hollywood. It contains both U.S. and Soviet footage and is narrated by Mike Wallace, with special music by Elmer Bernstein. Part I, "The Missile," reports a "series of wrong decisions" by defense planners that cost this country the space race against Russia. This hour won a "best documentary feature" award at the 1959 San Francisco International Film Festival.

Neither Shulton nor its agency, Wessley Assoc., New York, had anything to say about what the firm might do with television rights to Race. Meanwhile, the Hudnut quiz apparently is holding out for a place on NBC-TV. ABC-TV, it was understood, has offered time for the show, although neither network would comment.

- Business briefly

Time sales

Tv smoke signals - P. Lorillard Co., N.Y., is introducing its new kingsize non-filter Old Gold Straights cigarettes in a soft package this month. Initial consumer advertising begins the last week of February via a spot tv campaign in more than 40 major markets throughout the country. Radio support for the new brand is expected to follow the introductory tv campaign. Agency: Lennen & Newell, N.Y.

Half of 'Journey' - North American Philips Co., N.Y., for its Norelco electric shavers, purchased one-half of NBC-TV's forthcoming coverage of missions by President Eisenhower and other world leaders, comprising 16 specials under the title Journey to Understanding - Volume III. Initial program, scheduled for Feb. 27 in the World Wide 60 time period (Sat. 9:30-10:30 p.m. EST), will deal with the first four days of the President's South American visit and Premier Khrushchev's tour of India, Burma and Indonesia. Entire series of six hours and 10 half-hours will be telescast in prime nighttime hours, including one hour in color, it was reported. Agency: C.J. La Roche & Co., N.Y.

Come 11 - Glenbrook Labs Div. of Sterling Drug, already on five NBC-TV shows, brings the total to 11 with purchase of time on four more night and two day shows. The new contracts, placed through Dancer-Fitzgerald-Sample, cover full sponsorship of Man From Interpol, which started Saturday (Jan. 30), 10:30-11 p.m. EST; alternate weeks of People Are Funny, Fridays, 7:30-8 p.m.; a third of Riverboat, Mondays, 7:30-8:30 p.m.; a third of Law of the Plainsman, Thursdays, 7:30-8 p.m.; alternate Tuesdays on the five-day Play Your Hunch, 10:30-11 a.m., and alternate Tuesdays and Fridays of Young Dr. Malone, 3-3:30 p.m.

Pepsi parcel - Pepsi-Cola, N.Y., will spend a net total of $775,000 on participations on NBC Radio as part of its four-network purchase announced earlier by the soft-drink firm (Broadcasting, Feb. 8). Schedule on

DULUTH-SUPERIOR TELEVISION

BROADCASTING, February 15, 1960
SKILLED EMPLOYEES, Tom McKennon (left) and Bob Townsend, perform final test of Centralized Automatic Message Accounting equipment. It will soon be installed in a Bell telephone company central office, helping bring its customers Direct Distance Dialing. Other major products manufactured by the Kearny Works include telephone cable, undersea cable amplifiers, switchboards and radio relay apparatus.
KEARNY, N. J.

Just across the Hudson River from New York City... in the heart of one of New Jersey's mighty industrial centers... Western Electric's Kearny Works plays an important role in the manufacture of telephone products for the Bell System.

The more than 17,000 employees of Western Electric's Kearny Works consist mostly of "commuters" who come by bus, train, tube and car... some arriving via the historic waterside approach known as The Old Plank Road.

Their main job at this major manufacturing plant is to help make telephone products like cable, switchboards and dial switching equipment. Their success is best measured by the years of trouble-free service these products have given to Bell telephone customers.

Sharing in this job—and in its success—are 2500 New Jersey companies which annually provide Western Electric with $83 million worth of supplies and materials.

But our employees and our suppliers share in more than our job for the Bell System. Their paychecks help support local merchants... they contribute substantially to state and local taxes... and they lend vital support to a myriad of community activities. In fact, they do all the things that come naturally to a good neighbor.

Besides Kearny, Western Electric has manufacturing plants in 24 other cities where we also make hundreds of different telephone products for the Bell System. In 1959 we bought over a billion dollars' worth of raw materials, products and services from our more than 35,000 suppliers in every state, 90% of them "small businesses." The things we make and buy are distributed to the Bell telephone companies through Western Electric distribution centers in 32 different cities.

EDITOR Eugene Farrell of The Jersey Journal in nearby Jersey City sums up Western Electric's contributions to the area: "The Kearny Works is the kind of solid, steady industrial neighbor we like. And its people are among our best citizens."

BLOOD BANK at Kearny Works is among the nation's largest. Every year thousands of Western Electric employees donate to local blood banks. Thousands more show their community spirit by enthusiastically supporting many civic activities.

W. E. BUYER, Dirk Van Gelder (left), discusses design of a subcontracted part with Kearny supplier, Walter Pabst, President and Founder of the Pabst Engineering Equipment Co. Mr. Pabst has been doing business with the Kearny Works for 27 years.

EDITOR, Marilyn Eley, of the Kearny Works, met her State Senator, Donald C. Fox, in a visit to the New Jersey Capitol in Trenton. Later, Marilyn addressed both the Senate and the State Assembly, expressing the appreciation of her fellow employees for the state's enviable record of good government.
NBC Radio started Feb. 1 and continues until next Oct. 23. Participations include a quarter sponsorship of News on the Hour and commercials on News of the World, You Bet Your Life, People Are Funny and Monitor. Kenyon & Eckhardt, N.Y., is Pepsi's agency.

Ruppert's big blast • Jacob Ruppert Brewery, N.Y., has earmarked $4 million for its 1960 campaign in its New England-New York distribution area. Included are spot TV and TV program participations. TV was said to be a "prime medium" for Ruppert this year but the media breakdown was not disclosed. Spot radio will be used heavily, particularly in summer months. Agency: Norman, Craig & Kummel, N.Y.

Mack back • Pharmaceuticals Inc., Newark, N.J., has paved way for the return to TV of the long-lived talent show, Ted Mack & The Original Amateur Hour. The program will be seen starting March 7 on ABC-TV (Mon., 10:30 p.m. EST). Agency: Parker Adv., N.Y.

Returns to spot • Lever Brothers Co., has brought its Handy Andy cleaning product back to spot TV after absence since April last year, although network schedules have continued. The new spot drive opens in 24 markets in eastern and midwest states. Number of minute spots ranges from 5 to 15 per week for 16 weeks. Agency, Kenyon & Eckhardt, N.Y.

Six-month lease • Beech-Nut Life Savers Inc., Canajoharie, N.Y., renewed sponsorship of ABC-TV's Dick Clark Show (Sat. 7:30-8 p.m. EST) for six months effective March 5. Advertiser has sponsored program since its network start, Feb. 15, 1958. Agency: Young & Rubicam, N.Y.

Agency Appointments

• Lincoln & Mercury Div. of Ford Motor Co. appoints Hixson & Jorgensen, L.A., as agency for its new compact car, the Comet. Billing is estimated at $250,000.

• Luer Packing Co., Vernon, Calif. (meat products), appoints Charles A. Mottl Inc., Beverly Hills, Calif. Media plans will be made after examination of trade and consumer survey results.

• Transport Aeriens Intercontinentaux (Intercontinental Air Transport), French airline operating through the Middle East to Australia and Tahiti, and starting in May, to Hawaii and Los Angeles, appoints BBDO, N.Y., for advertising in the U.S.

- Also in advertising

New opening • The affiliated Miami, Fla, agencies of Bishopric/Green/Fielden Inc. and Woody Keppner Assoc., Inc., public relations, has announced the opening of a Jacksonville office. The new division, known as Radcliffe Advertising Inc., is headed by Harry Radcliffe, active in Northern Florida advertising for many years. The two agencies employ a combined staff of 60.

Copywriter's award • A March 15 deadline is set for entries in the 1960 Arthur Kudner Award, "for excellence in creative writing for institutional advertising," established last year by the Arthur Kudner Foundation. The award of a bronze medal and $500 in cash will be given to the writer of the winning ad or commercial at the annual meeting of the American Assn. of Advertising Agencies to be held April 21-23 at the Boca Raton Hotel and Club in Florida. Entry rules may be obtained from AAAA headquarters, 420 Lexington Ave., New York 17.

Translator • John Gres, former program director of international station WRUL, New York, has organized Round Hill International Productions for foreign language work. Initial accounts include a long list of film commercials for U.S. Export Brands. Round Hill, located at 665 Fifth Ave., New York, produces advertising and programming in 50 languages. The firm's language package includes translation and adaptation of radio-TV commercials, programs and other film material; script service; narration and lip synchronization; recording and production supervision; technical assistance and consultation. Mr. Gres' staff has some 150 foreign nationals on call.

Consolidation • Ideal Toy Corp., N.Y., has combined its advertising, publicity and sales promotion divisions into one public relations department in order to coordinate all promotional activities under one corporate policy, it has been announced by Melvin Helitzer, director of public relations. Ideal's five divisions produce dolls and plastic toys, hobby kits, outdoor pools, stuffed animals and housewares.

Hatbox accessory • Diary-directory designed primarily for TV models but also including information for art directors and others in that side of advertising business, has been published by Peter Glenter, 444 E. 52nd St., New York 22, under title "The Madison Avenue Handbook." It contains listings of agencies with names of art directors and casting directors along with instructions to contact each. Art supply and costume houses, talent agents, TV producers, photographers and others. Although primarily concerning New York, handbook has special sections on Chicago, Detroit and Miami. Book also contains daily appointment and expense records section. Mr. Glenter himself a model, began directory as informal list for his own convenience several years ago, found demand among colleagues brisk enough to justify letterpress edition. It sells for $4.

Dow Chemical unveils new product on TV

Dow Chemical Co., Midland, Mich., which previously announced the purchase of three one-hour specials, "The Dow Hour of Great Mysteries," on NBC-TV (broadcasting, Dec. 21, 1959), last week reported the programs will be utilized to kick off a spring campaign in all major media (except radio) for Dowgard, a new all-year automotive coolant product.

Through its Bloomfield Hills, Mich., agency—Mac Manus, John & Adams—Dow will spend a reported sum of $4.5 million to launch the new product during the coming year. The Dowgard account reportedly brings the company's billings with MI&A to more than $10 million.

The Dow Hour will have Boston attorney Joseph N. Welch as host for three classic mysteries produced by Robert Saudek Assoc.

Dates for the mystery specials are March 31, April 24 and May 23.

Another new Dow product, called Pinksies, disposable plastic gloves for housewives, also was assigned to MI&A, it was reported last week.
Area survey rates WWVA first in average audience seven days a week

- More audience than next three stations combined from 6 AM to noon.
- More audience than next two stations from noon to 6 PM.
- More than twice audience of nearest competition at night.

HARRIS DRUMS UP PAYOLA PARADE

And a surprised Westinghouse finds itself leading the march

Westinghouse Broadcasting Co. officials looked on in stunned disbelief last week as the House Legislature Oversight Subcommittee unrolled the three-day opener of its payola hearing.

WBC people were amazed because—as one official expressed it—"we cooperated more than anybody else" to furnish information to the subcommittee and to root out situations that looked like payola.

For most of the three days, the subcommittee asked questions of present and former employees of WBC's KYW Cleveland and WBZ Boston which apparently were designed to make it plain that:

- WBZ management sent employees, hats in hand, to solicit a total of about a thousand records from 10 record companies in New York to rebuild its library at no cost to the station.
- WBZ used its facilities to stage a self-promotion event in the name of charity, from which charity got very little.
- KYW and WBZ executives allowed their disc jockeys to receive thousands of dollars in payments from record companies without seriously trying to determine if the practices were payola. Also implied: KYW didn't furnish the subcommittee its program logs showing records played, though its usual practice is to keep the logs at least 12 months.

Late Wednesday, the subcommittee swung off on another chase: Who spent what for whom at the second annual International Radio Programming Seminar and Disc Jockey Convention. May 29-31, last year at Miami Beach's Americana Hotel. The revelation, from hotel records subpoenaed and added to the record: $117,664 paid by record companies for disc jockeys' food, quarters and entertainment.

Recess for Speeches • The subcommittee chief counsel Robert W. Lishman hinted more would be heard about Miami Beach. The subcommittee heard one more disc jockey and the bell rang late Wednesday to give Republicans time to prepare their Lincoln's Birthday speeches. This week the hearing is to run five days.

During last week's testimony three former employees of KYW acknowledged they received altogether close to $30,000 in 1958-59 from several record companies. All claimed that for the most part the money was paid for off-air attention to the paying company's records or for advice on its commercial possibilities. Two WBZ disc jockeys also said they received money or gifts and a third, no longer at WBZ, testified to the House group in closed session.

One other Boston disc jockey testified to receiving money while at WILD Boston and another, Jack McDermott, formerly at WHIL Medford, Mass., testified in closed session.

Chairman Oren Harris (D-Ark.) said the hearing is to determine if (1) payments were made to stations or their employees for advantage without announcement of payments; (2) some products get unfair advantages through hidden commercials and deceptive broadcasting; (3) stations have misrepresented themselves in competing with other media; (4) stations have delegated control of material broadcast to others.

He said his group has not prejudged anything nor singled out any individuals of stations for unfair treatment.

Norman Prescott, former disc jockey at WBZ Boston, was heard in closed session at his own request and Rep. Harris afterward termed him "cooperative."

Paul G. O'Friel, general manager, WBZ Boston • Mr. O'Friel said in November 1959, he instituted the station's own investigation of payola practices. Two of the six d.j.s admitted receiving payments, although they denied it was payola, he said; they were suspended and are now on a probationary status. He stated his investigation consisted mainly of obtaining affidavits.

Mr. O'Friel also testified he sent George W. Givens, WBZ music librarian, and Norman Prescott, a WBZ disc jockey, to New York to get free records from distributors for the station's "miserably sparse" record library. The subcommittee estimated the value of the records garnered on the trip as up to $5,000. Mr. O'Friel said he did not consider this a form of payola, but a "long-standing business practice in the broadcasting industry."

Dave Maynard, WBZ disc jockey • Mr. Maynard admitted receiving $6,817 over a two-year period from three Boston distributors but claimed that these were "expressions of appreciation" for his playing records at teenage hops and advising the distributors of their sales potential. He denied that any of the money was payment for playing records on the air. One record distributor made payments totaling $2,600 for an automobile for Mr. Maynard, which he said he had considered an "outright gift until investigation began when he assumed payments himself. He explained he had done this because he felt himself guilty of "very poor judgment."

Rep. John E. Moss (D-Calif.) referred to the car payments as the distributing company's "regularly scheduled gratitude" and asked Mr. Maynard if he thought the company had done this "out of the goodness of its heart" or had expected him to air its records in return. Rep. Samuel L. Devine (R-Ohio) said, "I feel the witness has been less than frank."

Alan Dary, WBZ disc jockey • Mr. Dary was commended as a "cooperative" witness. He testified he received some $400 in Christmas gifts, occasional gifts of liquor, also at Christmas, and a hi-fi set from a record company. He said a Boston carpet company had carpeted his master bedroom free in exchange for additional work he
It's annoying to the many talented and conscientious people in radio broadcasting to read these days that disc jockeys and attention-getting gimmicks have taken over radio. It's presumptuous of newspaper and magazine reporters to add that this is typical of all radio. This attitude may be typical of some stations—certainly not radio in general . . . definitely not WJR.

Good radio programming is an art. It consists of careful blending of information, entertainment and public service. WJR backs that belief with a program payroll of a million dollars annually. This represents the highest program budget of any radio station in the country. Many stations, like WJR, practice the art of good programming with great success. Others, either lacking the art or inclination, resort to canned music around the clock.

Music, being a popular form of entertainment, is an important consideration in WJR's programming. But here it is a well-balanced blend of “live” musical shows featuring talented artists, and recorded programs that offer music for every taste. In catering to the listening preferences of 17,000,000 people, WJR does not emphasize any one type of music. No more than we could allow any one person to select the music for all of our listeners.

“Live” music on WJR consists of a pre-tested selection of current hits, old favorites, classical, semi-classical, and choral music. WJR does not sneer at any type of music. It has its record shows, too. But, and here's the big difference, our music emcees play a varied program fare with the main emphasis on music that endures rather than the so-called top ten.

WJR's recorded musical programs include popular songs, old favorites, western and folk songs, religious music and band music, as well as the latest hits. However, WJR is not in the record promotion business. It is in the business of satisfying the listening preferences of people at every social, economic, age and educational level. This has been our sole aim for 35 years. Proof of our success is the fact that more people listen to WJR than to any of the other 196 radio stations heard in the Detroit-Great Lakes area.

* The Storz file includes 34 other ledger cards in various names; charges thereon aggregate $9,500; payments $1,400. The names of the registrants are not listed herein as the Subcommittee does not know who is liable for the unpaid charges, $8,100.

had done helping the company plan its radio advertising. He described the gifts as “business amenities.” When asked by Rep. Moss if he had had knowledge of payola prior to the hearing, Mr. Dary stated he was shocked to learn of it. He said his show was mainly programmed for adults and avoided “the raucous music you would ordinarily associate with payola.”

Lester Lanin, orchestra leader • Mr. Lanin said he asked $2,500 but agreed to take $1,000 to appear in September 1958 with his orchestra at a “block party” in Brockton, Mass., arranged for “charity” by DuMont Record Distributing Co., which distributes the Epic label (Columbia Records subsidiary) in New England.

He agreed to $1,000 he said, and was promised “exposure” on WBZ. Chief counsel Robert W. Lishman said the party had been characterized as a promotion by WBZ rather than a “charity” effort. Mr. Lanin said DuMont paid him only $400 and that $600 is still unpaid, but he isn’t worried because Epic, which records the Lanin orchestra, will stand good of the debt. He admitted the exposure on WBZ was an inducement for his appearance.

George W. Givens, manager, WORL Boston • Mr. Givens said he was serving as promotion and musical director at WBZ in the fall of 1958, when he and Mr. Prescott, with the assent of Mr. O’Friel, went on a trip to New York to solicit free records from 10 major record companies to “rebuild” WBZ’s record library.

He and Mr. Prescott, Mr. Givens said, obtained about 1,000 records altogether from: Roulette, Epic, MGM, Decca, Capitol, Atlantic, Mercury, Victor, London and Columbia. Only Decca was reluctant, he said, but gave them some 200 records after promising “never to do it again.” All the companies were assured the records would be played on WBZ, he said.

He said all radio stations use a special arrangement to get records for $0.75 to $1 apiece. Mr. Givens said he didn’t think he did anything illegal, but felt he was “begging for merchandise.”

Mr. Givens, at Westinghouse stations from 1951-58, said all Boston newspapers except the Herald Traveler (which owns WHDH-AM-TV) carry the WORL schedule free and that the “omission by that newspaper hasn’t helped” WORL.

Joseph Finan, Cleveland • Mr. Finan, who was fired from a $38,40,000 job running a four-hour disc jockey show at KYW Cleveland on Dec. 3, 1959, admitted he accepted around $15,000 from record and record distributing companies from early in 1958 until he was discharged last December.

But, he said, most of the money was paid for “listening” to records of various companies on his own time or for advising record companies on producing hits.

One exception was Big Top Record Co., New York, for which he accepted money for airing a record which he thought had good possibilities anyway, he said.

Mr. Finan denied charges in an affidavit submitted by Myron O. Burnison, manager of Main Line Cleveland Inc., record distributing firm for Victor Records in the Cleveland area, that Mr. Finan agreed to play Victor records and give more attention to them for $50 each. Mr. Finan said his agreement with Allan Clark, then Victor field representative, was only to advise him which records to promote.

Mr. Finan said he received payments during 1958, 1959 or both as follows: Main Line, $1,250; Cosnat Record Distributing Co., New York (Jubilee and Jay Gee), $2,500; Mercury Records, about $3,200; Big Top Record Co. (subsidiary of Hill & Range Pub. Co.), $450; United Artists, about $600; Shad Record Co., New York, $1,400; Hugo & Luigi Productions (Hugo Paretti and Luigi Creatore, now top artist and repertory men for Victor records), $1,400; Decca Records, $600; Cameo

54 (GOVERNMENT)
Successful advertisers know the attention-getting power of a spot well-placed. Nothing is more flexible than spot advertising, and no other medium can offer the selectivity, exclusivity, and productivity of spot.

"We always send a man to do a man's job"
Homework • Former KYW disc jockey Joseph Finan said most of the money he took from record companies was for listening to their records—which he did mostly at home—to assure that potential hits would not be overlooked. Some payments were for "advice."

Record Co., Philadelphia, $450; Carlton Records, $1,050; Epic Records, $400; Coed Records, $600; Meridian Music Pub. Co. (Red label), $300; London Records, $200; Madison Records, $150.

He also acknowledged an interest-free $2,000 loan from Chess Records, Chicago, 18 months ago on which he still owes $1,700.

Mr. Finan and the following witness, Wesley Hopkins, both were fired Dec. 3, 1959, by letters from Westinghouse officials who said they had evidence of outside interests which obviously involved payola.

Rep. Harris in excusing Mr. Finan called the witness' experience "pathetic" and said his acts "throw a bad light on the industry." He later told newsmen he felt the disc jockey's conduct was "illegal."

Mr. Finan afterward issued a statement charging Rep. Harris' comments were "grossly unfair."

Wesley Hopkins, former KYW disc jockey at KYW, now unemployed • Mr. Hopkins said he agreed with Mr. Finan's statement charging unfairness by the subcommittee.

The witness said he received payments from record companies totaling about $5,000 in 1958 and $7,000 in 1959 for listening to records issued by these companies and giving his judgment on their commercial potential. He denied he ever gave their records preferential treatment on the air.

Rewarding trip • George W. Givens, now WORL Boston manager, told how as music director of WBZ Boston he successfully solicited 10 record companies in New York for about a thousand records to rebuild the WBZ record library.

He acknowledged receiving payments in 1958 or 1959 or both from record companies as follows: Main Line Cleveland, about $1,300; Mercury, $3,400; Cosnat, $1,675; Big Top, $300; Shad Records, $75; Cameo Records, $75; Carlton Records, $950; Jubilee Records, $900; Coed Records, $275; End Records, $200.

Mr. Hopkins said his salary was $21,800 a year. He said he attached no significance to the practice of big record companies "covering" a record made by a small company (i.e., recording the same tune by a "name" artist after a tipoff from disc jockeys that the original record had commercial possibilities). Most of the top 40 lists are made up of smaller labels, he said.

Mr. Hopkins said he felt companies paid money to him to keep their records from "getting lost in the shuffle"; no one person, he said, had time to listen to the many records that came in each week. He denied knowing anything to support a Cleveland newspaper story that the third-floor men's room at KYW was known as "the payola booth." He disagreed that a disc jockey can popularize a record by airing it, saying this might help, but a record has got to "have it" to "make it."

Charles Young, former record librarian at KYW Cleveland, now unemployed • Mr. Young said he helped produce the Finan and Hopkins four-hour record shows, selecting records to be played or those that were good enough to be played and consulting with the two disc jockeys on selections.

He acknowledged receiving payments in 1958-59 from: Main Line Cleveland, $450; Mercury, $800-$900; Time Records, $300; Roulette, $500; Coed, $500-$75; Cosnat, $300-$500.

Mr. Young said he realized the companies expected special consideration of their records, but that even though he accepted the payments, he never favored their records in making up his lists. Mr. Young said KYW fired him Nov. 1, 1959 a month earlier than Messrs. Finan and Hopkins were fired, when station officials found he was receiving outside money.

He denied that KYW played one record four times in two hours to pacify one record company official who was unhappy at the lack of exposure of his records and threatened to "go to Washington." Rep. Walter Rogers (D-Tex.) wondered whether Mr. Young thought the record companies were paying him because they "loved him" and why the payments stopped when he left the station.

All the former KYW employees said during their testimony that they were of the impression that the station log, showing tunes actually played, was kept by the station for at least a year. Counsel Lishman remarked afterward that the subcommittee had subpoenaed these logs and was "told they weren't available."

57
Business practice • Paul G. O’Friel, WBZ Boston general manager, said he sent two station employees to New York to solicit major record companies for free records to restock a "spare" station library. This way of getting records is a "long-standing business practice" in broadcasting, he said.

director of Americana Hotel, Miami Beach, Fla. • Mr. Eicher verified subpoenaed hotel records showing record companies paid $117,664 to that hotel for various expenses. He said Americana had reserved 2,000 rooms in the Bal Harbor area of Miami Beach for delegates (he estimated 2,000 to 2,500 attended the disc jockey convention), but that only 753 were used. He felt this was because the five Bal Harbor hotels refused to use "due bill" arrangements (furnish hotel facilities in exchange for advertising on the stations represented at the convention).

He said the hotel suspected one promotion planned by RCA Victor involved gambling; warned RCA and the convention sponsor, Storz Stations, that no gambling would be permitted. He said he was assured gambling was not involved.

He acknowledged record companies paid for the rooms of some disc jockeys and said they also paid for rooms occupied by singer Pat Boone and wife and former Gov. Frank Clement of Tennessee. Rep. Harris brought a big laugh by saying, "Maybe, I’d better stop there."

Mr. Eicher said Mr. Clement called the convention "dignified and proper" and made a speech on the "importance of disc jockeys in today’s way of life."

Mr. Eicher said 2,000 bottles of bourbon were served during an eight-hour recording session by Count Basie, sponsored by Roulette Records.

Counsel Lishman said the information furnished by Mr. Eicher was being entered into the record and that the convention would get further exploration later during the hearings.

Stan Richards, former disc jockey at WILD Boston, now unemployed • Mr. Richards admitted accepting $6,225 from Music Suppliers of New England Inc. and $50 from Mutual Records Inc., but said no payola was involved because the companies handled all labels and he played those he wanted to.

He also acknowledged staying at a hotel at the Miami Beach convention at the expense of Roulette Records and charging $117 worth of clothes to the hotel tab.

The subcommittee members almost forgot about payola as they listened, fascinated, to Mr. Richards’ fast patter. He told them, among other things:

- He played good music, not rock and roll. Frank Sinatra, he said, is his favorite all-time singer.
- He knew nothing of talk that Tommy Leonetti, a guest star on a show he conducted on WBZ-TV, had received a check for his appearance, endorsed it and returned it to the show’s producer. He said WBZ-TV didn’t like the show but was "forced" to put it on when a sponsor was found. The station did everything possible to destroy the show because "they couldn’t take the bows for it." He concluded: "I guess I’ll never work for Westinghouse."
- He wasn’t on record companies’ payrolls because his show (on WILD) had a low rating. "One time I owed Pulse six listeners for a month."
- He likened payments by record companies to disc jockeys to payments by political contributors to a candidate. Each, he said, "hopes something good will happen." This, he said, is the way of American business: "I do it for you and you do it for me."
- He told the congressmen that "you haven’t had much of a shake so far" and added: "This is a great trip for me."
- He charged that newspaper stories make disc jockeys "look like vicious characters, as if we’re tooting a gun." He said, "We’re being tried by newspapers." (Several newspaper reporters, writing furiously to keep up with his talk, stopped scribbling at this). Before the payola headlines, he said, he made a deposit on a house and the developer, who thought a disc jockey would be an asset to the neighborhood, cut the price $1,000. But after the newspaper headlines, he said, he lost his job, tried to get his deposit back and was refused.

Mr. Richards said his contract at WILD was not renewed last December because the station was losing money. He predicted "fly by night" record companies would fold as a result of the investigation and said he’d always played records by established stars, not by somebody named "Ookey Ook."

The hearing resumes today (Monday) at 10 a.m. and is scheduled to run through Friday. Witnesses scheduled this week:

William C. Swartley, WBC regional vice president; Don Masters, WHIL disc jockey; Lou Goldberg, who is librarian at WEZE Boston; Maxwell Richmond, president, Robert S. Richmond, general and commercial manager, and disc jockeys Mel Miller and Arnold Ginsberg, all of WMEX Boston; disc jockeys and executives of WHDH Boston.

Donald DuMont, president of DuMont Record Distributors, Boston; Harry Carter, president-treasurer, Gordon Dinerstein, vice president; Edward Smith, attorney, director and clerk, and Harry Weiss, promotion manager, all of Music Suppliers of New England Inc., Boston; Samuel Clark, president of Am-Par Records (AB-PT), who formerly held interests in Music Suppliers; Cecil Steen, Records Inc., Boston; Irwin B. Goldstein, general manager, Mutual Distributors, Boston, and other record company officials.

Advice & consent • Former KYW Cleveland disc jockey Wesley Hopkins (r) said the money paid him was for his expert advice on whether a record "had it and would make it," not for putting it on the air. Charles Young (l), former KYW record librarian, said he consented to accepting money from record companies, knowing they wanted special consideration, but that he didn’t let that influence his selection of records for airing.

BROADCASTING, February 15, 1960
In the public interest

Examples of responsibility to the community we are licensed to serve—

"STOP OR GO"—Saturdays, 10:30 A.M., Police Officer Baldy and Ned Locke preside over this safety quiz featuring Chicago Boys Club members—a WGN Public Affairs production in cooperation with the Women’s Board of the Chicago Boys Clubs.

"THE WORLD TODAY"—Monday thru Friday, 8:15 A.M. —A WGN Public Affairs program for teachers in cooperation with Chicago Public Schools.

"CHICAGOLAND CHURCH HOUR"—WGN Public Affairs presents remote telecasts from a different Chicagoland church each Sunday morning.

"RFD CHICAGOLAND"—Sunday morning program featuring subjects of interest to Chicagoland farm families and viewers interested in farm problems and information—hosted by WGN Farm Director, Norman Kraeft.

"YOUR RIGHT TO SAY IT"—A WGN Public Affairs presentation in cooperation with Northwestern University with moderator James H. McBurney, Dean of the School of Speech, "Your Right To Say It" features debates on vital topics of the day with leaders in industry, education and politics participating. Sundays, 7:00 P.M.

"GREAT MUSIC FROM CHICAGO"—The finest musical series ever seen on television. Telecast in color, it combines the best in music with the finest musicians of concert stage, opera and the jazz world. The program features the Chicago Symphony Orchestra and such world renowned conductors as Andre Kostelanetz. Sunday evenings, 8:00—9:00 P.M.

In addition, WGN Television presents such vital programs as the first public forum on the steel dispute between Joseph L. Block, Chairman of the Board of Inland Steel Co., and David J. McDonald, President of the United Steelworkers Union...five hours of news each week...over twenty hours of color programs...the greatest number of LIVE local shows.

WGN-TV Chicago symbol of responsibility in broadcasting
This is the mighty Carolina Triad, a flourishing, 62-county area stretching into six states. Retail sales are now over the $2 billion figure. It's "home country" for plants of a dozen big industrial companies . . . and for their payrolls, too. And WLOS-TV is the only unduplicated network signal in the entire triad.

The South's highest antenna carries the WLOS-TV signal into 446,650 TV homes in the Carolina Triad. Located atop 6,089-foot Mt. Pisgah, only WLOS-TV delivers total coverage of the market.

*NCS #3 updated

WLOS-TV's new Greenville studio now in operation (in addition to Asheville facilities)
SIGHT

To see five of the ten highest-rated shows in the area, viewers must watch WLOS-TV. The highest-rated movie is on WLOS-TV. So are the highest-rated daytime strip and the largest children's audience participation strip. The Carolina Triad watches WLOS-TV and loves it!

LIGHT

Let your PGW Colonel throw even more light on this subject. He'll be glad to show you how you can capture this big, bustling market with just one station buy. Talk to him now about selling your products to the Carolina Triad!

TOWERING NEW FORCE IN THE CAROLINA TRIAD

Unduplicated ABC in Greenville • Asheville • Spartanburg

42 ON FTC PAYOLA HIT PARADE

Latest complaints include radio stations

The Federal Trade Commission for the first time has charged that radio stations received under-the-counter payoffs for playing phonograph records on the air.

The allegation was made in payola complaints announced Feb. 7. They were filed against three Boston record distributors, charged with making secret payments to disc jockeys as well.

Neither the stations nor the disc jockeys were identified.

An American Broadcasting-Paramount Theatres' subsidiary was one of the record makers named in the latest batch of payola complaints.

This is Am-Par Record Co., New York, which produces the ABC Paramount, Apt, Chancellor, Addison, Command, Waldorf. Wren and Grand Award labels.

The Scorebook • In the last two weeks the FTC has issued five payola complaints. This brings the total number to 42.

The Boston distributors are Records Inc., Music Suppliers Inc. and Dumont Record Distributing Corp.

Charged with Am-Par were its affiliated company, Pamco Music Inc. The other New York complaint was filed against Herald Music Corp. and its affiliated Ember Records and Ember Distributors. They produce the Herald and Ember labels.

Information on these citations has been furnished to the FCC and the Internal Revenue Service, the FTC reported.

The trade commission customarily does not make public the names of the disc jockeys or the radio stations unless the case goes to a hearing before one of its examiners.

The complaints alleged that the record companies gave money or other valuable consideration to disc jockeys for "exposing" their records on the air in order to increase sales. This is an unfair trade practice, it is claimed.

The same charge was filed against the Boston radio stations.

Meanwhile, Alpha Distributing Co., New York, conceded "having given valuable consideration to certain individuals in radio stations to test, promote and expose records." The company contended that these payments were not illegal. It also challenged the jurisdiction of the FTC on the ground that only a small portion of sales were out of state. The FTC can only act on unfair practices in interstate commerce. The company asked that the complaint be dismissed.

FCC program authority upheld by Comr. Ford

Never has a court ruled that FCC consideration of programming was illegal or contrary to either the Communications Act or the Constitution, Comr. Frederick W. Ford told the T V & Radio Advertising Club of Philadelphia last week.

Moreover, he said, the Commission's authority (in programming) has been upheld by the Attorney General in his report to the President (BROADCASTING, Jan. 11) and by the House Legislative Oversight Subcommittee (BROADCASTING, Feb. 8). In his speech last Thursday (Feb. 11), Comr. Ford quoted from an earlier address in which he stated the Commission is not prevented from reviewing a licensee's overall programming at renewal time (BROADCASTING, Aug. 31, 1959).

Comr. Ford again recommended that license renewal forms be amended to require stations to report, in narrative form, the needs of their communities and how those needs are being met. He noted that the FCC now is considering rulemaking to amend its program renewal forms.

KIMN wins a round in fight for license

KIMN Denver won a preliminary round last week in its fight against license revocation proceedings. The FCC stayed its hearing order pending consideration of a KIMN petition for reconsideration.

The stay was granted on a 4-2 vote, with Comrs. Robert T. Bartle and John S. Cross dissenting. Earlier, Hearing Examiner Charles Frederick had denied the KIMN petition for a stay and two prehearing conferences had been held. The hearing proper was scheduled to begin March 1 in Washington.

Ten days ago, KIMN filed an addition to its original petition for reconsideration (BROADCASTING, Jan. 11) and quoted the FCC's own words to back its contention the Commission does not have legal authority to revoke the station's license. KIMN said the FCC's announcement Feb. 4 that it planned to seek legislation and rules changes to give it jurisdiction over certain undesirable program practices (BROADCASTING, Feb. 8) makes it "abundantly clear that continuation of instant revocation proceeding cannot be reconciled with the legal principles . . . "

"There is no issue in the proceeding as to the overall programming balance of station KIMN. There is no allegation that any specific law has been violated . . . " KIMN said. "This proceeding looks toward revocation of respondent's license because of specific programs carried on its station. Thus, this proceeding looks toward taking a kind of action which the Commission has now formally recognized . . . that it has no power to take."

In a related development, it has been learned, the Justice Dept. has turned down an FCC recommendation that criminal action be taken against KIMN disc jockey Royce Johnson who allegedly made off-color and smutty remarks over the station. The Commission instituted its revocation proceedings as a result of Mr. Johnson's broadcasts.

Justice told the Commission that "successful prosecution cannot be reasonably anticipated." Key personnel at the FCC reportedly are none to happy with the Justice opinion and feel it is in direct variance with the Attorney General's widely-circulated contention that the Commission had adequate power but failed to act to curb the quiz deceptions and payola practices.

IN THE CONGRESSIONAL HOPPER:

Here are caputated versions of legislation of interest to broadcasters:

HR 10,241. Rep. John Bennett (R-Mich.)—would prohibit use of station for deceptive advertising or preparation of programming involving deception (tricked quizzes, etc.), including commercial or any on-air promotion, with criminal penalty for violation. House Commerce Committee, Feb. 8, 1960.

HR 10,242. Rep. John Bennett (R-Mich.)—would give FCC power to issue licenses of one year or less at alternatives to regular three-year renewal where public interest indicates and to suspend licenses for 30-day periods in lieu of revocation. House Commerce Committee, Feb. 8, 1960.

HR 10,275. Rep. Thomas M. Polly (R-Wash.)—would authorize daytime am stations to operate from 6 a.m. to 6 p.m. House Commerce Committee, Feb. 8, 1960.
You will find extra care is everywhere aboard United Air Lines great DC-8 Jet Mainliner®. You will enjoy delicious meals on the DC-8, prepared by master chefs, served graciously by attentive stewardesses. You will settle back easily in the biggest, highest, widest seats in the sky. You will enjoy friendly conversation and relaxation in one of the two colorful "living room" lounges—one for First Class and one for Coach passengers. It's a real treat, flying the DC-8. Why not treat yourself soon? Call your Travel Agent or United Air Lines for de luxe First Class or thrifty Custom Coach accommodations.

The comfortable high, wide DC-8 seat adds privacy to your dining pleasure.
FCC REVERSED

Court overturns STA in Baton Rouge case

A longtime FCC practice of granting special temporary authorizations for interim tv operations pending the outcome of a comparative hearing for a final grant in a contested case was made suspect last week by the U.S. Court of Appeals in Washington.

The court, in a divided opinion, reversed the FCC's July 22, 1959, grant to ch. 28 WABF-TV Baton Rouge, La., to operate temporarily on ch. 9 in that city pending the outcome of a two-party comparative hearing.

The circuit court's two-to-one ruling held that the FCC erred in granting the STA by way of a simple order.

The Commission should have issued an order, the court said, with explicit findings on a number of issues raised by the other ch. 9 applicant, Community Broadcasting Co. (WIBR Baton Rouge). These include possible overlap between WABF-TV and WDSU-TV New Orleans and concentration of media, the court said. WABF-TV and WDSU-TV have common ownership.

A key point in the decision, written by Circuit Judge Warren E. Burger for himself and Judge Wilbur K. Miller, was that the Baton Rouge STA is likely to run 2½ to 3 years (due to the presumed length of the comparative hearing) and cost WABF-TV from $250,000 to $500,000. This is likely to prejudice the Commission in favor of WABF-TV the court said.

Integrity Unquestioned • This does not question the good faith or the integrity of the Commissioners, the court stated, "it is a recognition that they are mortal men."

Circuit Judge John A. Danaher dissented. He maintained that the FCC's judgment on the need for the issuance of the STA should prevail.

The STA was issued to WABF-TV following the FCC's move of ch. 9 from Hattiesburg, Miss., to Baton Rouge in June 1959. WABF-TV's request for temporary authority was protested by Community Broadcasting Co. The FCC denied the objection on the ground that a second vhf service in Baton Rouge was needed as soon as possible. Baton Rouge is served by ch. 2 WBRZ(TV) as well as ch. 28 WABF-TV. Last August the same court granted a stay of the STA in response to a request by WIBR.

Judge Burger's decision is considered a landmark ruling on this question, superseding previous court decisions which consistently upheld the FCC's authority to decide on the need for temporary authority.

FCC Authorized • The court upheld the right of the FCC to issue temporary operating authority, but maintained that the privilege was circumscribed.

"The grant of temporary authority to one of several competing applicants before there has been any hearing is pregnant with danger to truly comparative consideration," Judge Burger wrote. Aside from the investment, "intervenor [WABF-TV] will accumulate the great advantage of demonstrated past performance as against the promised future performance of the competing applicant," the court said.

In order to justify a temporary grant for as long as 2½ or 3 years, Judge Burger ruled, "the public interest must be clear and it must be made the subject of explicit findings in the particular case in unmistakable terms; and such deterrent factors as concentration of media and overlap must be explicitly dealt with in findings which afford an adequate basis for appellate review."

He added:

"The factual and legal issues involved in granting the STA are not whether a new channel is ultimately necessary, but whether the service in question is so immediately and imperatively necessary that it must be granted at once in spite of the great financial risk of one party and the possible prejudicial effect on the other who is not favored, and the derogation of the whole comparative hearing concept."

New Bedford tv grant termed 'possible'

An immediate grant of ch. 6 in New Bedford, Mass., "is now possible," Eastern Broadcasting Corp., one of the four applicants who have reached a merger agreement for the facility, told the FCC last week.

Eastern asked the Commission to schedule "an immediate conference" which will include the U.S. Coast Guard and the Broadcast Bureau. Final determination leading to the grant of ch. 6 to E. Anthony & Sons, the agreed applicant for the site, can thus be expedited, Eastern told the Commission.

The applicants have encountered strong objections to their proposed location by the Coast Guard which claims that its Lorcan-C station would be impaired by the New Bedford channel (BROADCASTING, Dec. 28, 1959).

To meet the objections of the Coast Guard, the Anthony interests have filed a petition with the FCC to change sites. The new proposed site, Eastern said, would "involve a trifling waiver of mileage separation standards which will become unnecessary if a proposed move of a co-channel station in Maine is approved."

Senator predicts more investigations

Additional investigations by the government into broadcasting because "they have not yet wrung all the juice out of this grapefruit," have been predicted by Sen. Eugene J. McCarthy (D-Minn.).

Speaking at the 13th Annual Radio-Tv News Short Course at the U. of Minnesota on Feb. 5, Sen. McCarthy said that "very little" in the way of new legislation against broadcasters can be expected if the industry makes its own "needed changes."

The course, sponsored by the school of journalism in cooperation with the Northwest Radio-Tv News Assn., also heard a plea for increased community service programming by Gene Wilkey, general manager of KMOX-TV St. Louis. Mr. Wilkey suggested that community service broadcasting is "the way to maturity—to stature and community influence open to any television or radio station. . ."

Another request appearance in Washington

The Senate Commerce Committee will host a "conference" this Friday (Feb. 19) to hear government agencies, broadcasters and advertisers tell what they are doing to correct alleged deception and other abuses in radio and tv (BROADCASTING, Jan. 25).

Scheduled to participate in the informal meeting are all members of the FCC (except vacationing Chairman John C. Doerfer) and Federal Trade Commission; Harold E. Fellows, NAB president; Donald H. McGannon, Tv Code Review Board chairman; Leonard Goldenson, American Broadcasting-Paramount Theaters president; Robert Kintner, NBC president; James Aubrey, CBS-TV president; John J. Ryan, legal counsel, Advertising Federation of America; Peter W. Allport, executive vice president, Assn. of National Advertisers and Frederic Gamble, president, American Assn. of Advertising Agencies.

Sen. Warren Magnuson (D-Wash.), committee chairman, said the meeting this week will be conducted on "roundtable, informal" type discussions.
An account executive, a time buyer, and a copy writer were working late. They were in a luxurious conference room; the handsomely upholstered chairs got the better of them; one yawned; another yawned; the third yawned. One after another dropped off to sleep. A supervisor peeked in, looked at a schedule, noted that WMAL-TV was missing, dashed back to the art department, returned with a brush and red paint, and painted their faces red.

He slammed the door as he departed. They all awoke—and began laughing at each other. Suddenly the time buyer stopped laughing, for she realized that her own face was red, too.

Aside from the fact that she knew her face ought to be red because of the omission, what was the reasoning that enabled her to conclude that her face was really painted?

FCC PROPOSES NEW LAWS

‘Crime doesn’t pay’ legislation would make payola, other deceptions, federal offense

The FCC last week publicly announced that it was sending to Congress proposed legislation which would make it a crime to (1) offer or accept payola and (2) participate in any way in deceptive broadcast practices. Proposed as amendments to the Communications Act, the legislation is the same as reported in Broadcasting, Feb. 8.

Under present statutory powers, the Commission pointed out that it could not reach networks directly or advertisers, producers, sponsors and “others who in one capacity or another are associated with the presentation of a radio or tv program which may deceive the listener or viewing public.” In many instances the Commission said, the licensee who carries a fixed quiz or similar show may have no knowledge of the deceptive nature of the program.

Of payola, the FCC said it is “greatly concerned over [this] surreptitious advertising practice.” Again, in this area, the FCC stated the Communications Act does not give it authority over station employees who accept payola or those who promise to pay.

Both proposals, which call for a fine of $5,000, one year imprisonment, or both, “would be a substantial and effective deterrent . . .” against payola and program rigging, the FCC said.

The Commission also has issued proposed rulemaking to institute procedures to prevent payola and to prevent the broadcast of “games of skill!” arranged in advance (Broadcasting, Feb. 8). Comments on both proposals are due by March 5 with replies due 10 days later.

The proposed legislation will be forwarded to Congress after it has been approved by the Budget Bureau. Similar legislation was recommended eight days ago by the House Legislative Oversight Subcommittee (At Deadline, Feb. 8).

FCC General Counsel John FitzGerald drafted the amendments to the U.S. Code. They follow:

Deceptive Broadcast Practices • Add a new Section 1344 to Chapter 63 of Title 18 of the Code to read:

“Whoever shall wilfully and knowingly offer, devise, produce, sponsor, or present, or cause to be offered, devised, produced, sponsored, or presented, or whoever shall wilfully and knowingly participate, or shall wilfully and knowingly cause any other person to participate in any program which is broadcast by any radio or television station operating pursuant to a license required by any law of the United States for which any money or other thing of value is given, awarded, or promised as a prize in a test or contest of intellectual skill or knowledge and which is offered or presented as a bona fide test or contest with knowledge that the outcome of such test or contest is prearranged or predetermined for the purpose of misleading or deceiving the public, shall be fined not more than $5,000 or imprisoned not more than one year, or both.”

Announcement of Sponsored Programs • Add a new Section 1345 to Title 18 of the Code to read:

“Any person who broadcasts, or knowingly permits or causes to be broadcast, over a radio station for which a license is required by any law of the United States, any matter for which service, money, or any other valuable consideration is directly or indirectly paid, or promised to, or charged or accepted by, such person from any other person without making at the time such matter is to broadcast an appropriate announcement that such matter is paid for or furnished, as the case may be, by such other person, shall be fined not more than $5,000 or imprisoned not more than one year, or both.”

Comr. Frederick W. Ford drafted the proposed rule change, accepted by the FCC, covering deceptive programs. The text:

“Quiz Programs and Other Contests of Intellectual Skill or Knowledge; Announcement.—(a) No television broadcast station shall broadcast any program in which the appearance of a bona fide game, contest, or competition of intellectual skill or knowledge is of significance if the licensee knows, or in the exercise of reasonable diligence should know, that the outcome of such event has been in fact prearranged, or participants or contestants have been provided with information, instructions or any other communication for the purpose of influencing the outcome, by any person acting in behalf of the licensee or in behalf of any producer, sponsor or advertising agency associated with the program, unless the prearrangement is disclosed by an appropriate announcement.

“(b) The announcement provided for in subsection (a) shall clearly and fully describe the nature of the prearrangement or assistance rendered to the contestant or contestants, in such manner that the audience will be apprised that the program is not in fact a spontaneous or genuine contest of intellectual skill or knowledge. Such announcement shall be made at the beginning and the end of such program.

“(c) No license shall be granted to a television broadcast station having any contract, arrangement or understanding, express or implied, with a network organization unless the station has received satisfactory assurance from the network organization that any program of the type described in subsection (a) will be accompanied by announcements in compliance with subsections (a) and (b) of this section.”

The proposed rule covering payola:

“(f) All licensees and operating permittees shall adopt procedures to prevent the broadcasting of any matter for which service, money or other valuable consideration is, directly or indirectly, paid or promised to, or charged or accepted by, any officer, employee or independent contractor of the station, unless at the time the same is so broadcast it is announced as being paid for or furnished by such person.”

April 25 new date for Mack re-trial

The retrial of former FCC Comr. Richard A. Mack and Miami attorney Thurman A. Whiteside on criminal charges they conspired to throw the 1957 grant of Miami ch. 10 to National Airlines has been rescheduled for April 25.

Federal Judge Alexander Holtzoff stated last week that the postponement of the second trial was ordered because Mr. Mack has been adjudged “temporarily incompetent.”

Mr. Mack is being treated at Miami’s Jackson Memorial Institute for mental and physical illness. A Florida state panel comprising two psychiatrists and a layman reported that the former FCC commissioner is tense, nervous and depressed. They said excessive drinking was a factor. He entered the hospital last month following court commitment on petition of his father.

Mr. Mack is also being sued for divorce by his wife, Mrs. Susan Mack. Mrs. Mack’s suit, filed in Miami circuit court, contended that Mr. Mack had refused to live with or support her and had developed the “uncontrollable” habit of drinking to excess.

Judge Holtzoff denied a petition by Mr. Whiteside’s attorneys that the Miami attorney and long-time Mack friend, be tried separately. Government lawyers objected to separate trials. Judge Holtzoff authorized the government to have Mr. Mack examined. If Mr. Mack is found unable to stand trial, the government will have to proceed against Mr. Whiteside alone, the court said.

The first trial of the two Floridians last year ended in a hung jury.
HUGE COVERAGE

If you want to cover the massive Cincinnati supermarket, you need real power. Nielsen proves that those 50,000 WCKY-watts pump a signal into 688 counties in sixteen states.

HUGE AUDIENCE

If you want to sell that market you need a man-size audience. Nielsen proves that WCKY reaches almost seven hundred thousand homes monthly in just one three-hour time block.

EFFICIENT RATES

If you want to make money in Cincinnati you need efficiency. Your own comptometer will prove that WCKY cost-per-thousands that huge Tri-State audience at less than ten cents!

WCKY IS SOME BUY!

When the chips are down, you'll find that the blue-chip accounts—national, regional and local—turn to WCKY for results in the Tri-State Cincinnati market. Only 50,000 watt WCKY nails down a major audience in the metro market, rains down a major signal in sixteen states and counts down a cost-per-thousand under ten cents. Power and audience make WCKY some buy!

WCKY RADIO — 50,000 WATTS — CINCINNATI
Regulation by FCC approved by catv group

The community antenna industry told Congress last week that it had no objection to regulation by the FCC, but insisted that legislation be framed "in the public interest."

The communication, approved by the National Community Television Assn. board of directors in a two-day meeting last week in Washington, was sent to the Senate Commerce Committee. It was in answer, NCTA said, to a mistaken impression that the catv industry was opposed to any regulation.

Follow up meeting is planned this week or next with Sens. Warren G. Magnuson (D-Wash.), chairman of the Commerce Committee, and John O. Pastore (D-R.I.), chairman of the communications subcommittee.

Expected then are detailed discussions about S-2653, a committee bill which superseded the bill (S-2303) recommended originally by Sen. Mike Monroney (D-Okla.) with NCTA support. Among disputed provisions of S-2653 are (1) the requirement that catv systems avoid duplicating programs carried by local tv stations; (2) that the local station must be carried on the catv system if requested, and (3) that the FCC must consider the fate of local tv stations in judging whether to certify catv systems in the same community. The legislative committee of NCTA is headed by George J. Barco, Meanville, Pa.

The bill is before the Senate Democratic Policy Committee and several senators had asked that it be held up, pending the NCTA statement, before being sent to the floor for action. The committee has set no date for its next meeting.

Meanwhile community systems looking toward microwave relay of distant city tv pictures suffered two setbacks last week.

Acting on the protest of two western tv stations, the FCC has stayed its approval of two microwave relay systems. Protests by both KIVA (TV) Yuma, Ariz., and KSWS-TV Roswell, N.M., were granted by the Commission in separate actions.

Under the KIVA protest, the FCC stayed its approval of the construction of private microwave facilities by Antennavision Service Co. to furnish the signals of four Phoenix tv stations to a catv system serving Yuma.

Microrelay of New Mexico Inc. has its Dec. 16 grant set aside for a common carrier microwave relay system to carry programs of KOB-TV, KOAT-TV and KGGM-TV all Albuquerque into Roswell for distribution there by a catv system. The action was the result of a protest by John A. Barnett, licensee of KSWS-TV.

The Commission ordered the Yuma case set for hearing to determine if "disastrous and probably fatal" economic injury would result to KIVA, as the station claimed.

• Government briefs

Grant and deny • The FCC last week granted a modification of license to WTVM (TV) Columbus, Ga., to operate on ch. 9 instead of ch. 28 while denying a request for a comparative hearing by the Georgia State Board of Education. The board, applicant for ch. 9 in Savannah, had asked for a withdrawal of petition for waiver of Sec. 3.610 of the Commission's rules. The board noted that the WTVM transmitter at Columbus would be four miles short of the 190 mile separation with the board's proposed transmitter site.

Hearing set • The FCC last week designated for consolidated hearing the applications for a new tv station to operate on ch. 9, Baton Rouge, La. Applicants involved are Modern Bstg. of Baton Rouge Inc. and Community Bstg. Inc., that city.
In Television Central, the main control center of the new WBEN-TV studios, camera directions are delivered and executed by the most experienced hands in Buffalo telecasting.

Equally important, these hands work with the finest, most advanced electronic equipment.

These new facilities are dedicated to quality—quality that builds audience loyalty and client satisfaction. To make your TV dollars count for more, we suggest you "take four"—Channel 4, pioneer television station on the Niagara Frontier and now, in its new home, the most modern and finest facility in America.

WASHINGTON, D.C.—REPRESENTED NATIONALLY BY JOHN BLAIR & CO.
And in growing Jacksonville, Fla.—it’s WWDC-owned Radio WMBR
In the past few months broadcasters have learned to live with a paradox of plenty—plenty of money and plenty of trouble.

It has not been a comfortable way to live, but broadcasters are beginning to think it will be the unavoidable way for much of 1960.

Business was never better than it was in 1959 and business in 1960 promises to be best of all.

But criticisms of both television and radio also set new records in 1959 and give no indication of abating. In a time of unparalleled prosperity television and radio are enduring unparalleled abuse.

So far there is no sign of serious damage to the public's confidence in television and radio. The quantitative measurements of audience suggest slight, but hardly terrifying, decreases. Such qualitative surveys as have been done suggest that the public is fully aware of the subjects under investigation and generally critical of out-and-out deceits but that most people do not think all broadcasting is bad because a few practices have been objectionable.

The question that disturbs thoughtful broadcasters is this: Will there be a point at which the cumulative effect of one government investigation after another begins to drive advertisers and audiences away from television and radio? The question takes on added meaning when a list of present and future investigations is examined. The calendar of inquiries already scheduled stretches into the spring.

There is still another complicating factor. This is a political year. Many of the politicians who have been berating broadcasting will be candidates in 1960. As such, they will come under provisions of a changed political broadcasting law which, after a significant amendment in 1959, will be put to its first big test this year.

Even if the investigations of quizzes, payola and advertising abuses peter out by mid-year, the beginning of a strenuous political campaign will give the politicians a new broadcasting angle to work on.

The outlook is described in detail in the following series of special articles.
THE RECORD OF 1959: BIGGEST BILLINGS IN RADIO-TV HISTORY

In a time which has brought a series of excruciating headaches, broadcasters can look to the financial record of 1959 to find quick, quick relief.

Both television and radio set new dollar records in time sales in 1959. The trend promises to continue. Leading economists predict 1960 will be the biggest year of all (see story, page 74).

Broadcasting, as well as the entire economy, was in the doldrums in 1958, but the revival in 1959 was spectacular. Television sales' growth, which had been prodigious in its early years and had levelled off to less than 10% a year in 1957 and 1958, picked up a giant advance of more than 20% in 1959.

TV time sales broke the billion-dollar mark for the first time. Radio in 1959 increased its sales 12.5% over the previous year, the biggest percentage spurt since 1943. National network gains contributed most to TV's banner year; spot sales increased measurably to spearhead radio's resurgence.

These are Broadcasting estimates of net time sales after all frequency and promotional discounts but before deduction of commissions to agencies and station representatives. They are comparable to the net time sales records compiled annually by the FCC. The FCC report for 1959 will not be issued until late in 1960.

Television • In previous years, network, national spot and local spot advertising all increased. In 1956, local time sales started to show a slower growth rate than in the other categories, dropping off increasingly until in 1959, for the first time, local billings were below those of the previous year. It is believed that this is due to the increased rates for station time, which are rising beyond the means of many local advertisers.

But the rise in national advertising more than compensated for the loss in local. Network and spot advertising increased 31.2% and 24.9%. Once again, TV network time sales ($557 million) were more than $100 million more than the next highest category of advertising, spot ($431 million), and almost $400 million ahead of local ($163 million). In almost every year, network billings have shown the strongest gains and in 1959 they provided special impetus to the overall increase.

Radio • Although the total time sales involved were only about half those of TV, radio's advance in 1959 was impressive. Local advertisers increased their use of radio. National radio network sales, which have declined for the past 11 years with the exception of 1957, continued ailing. But the transfusion of sales from national spot and local advertisers boosted the total more than $60 million over 1958, which had been the best year in recorded radio financial history.

The 1959 Broadcasting estimates of time sales were compiled from a survey of a large sample of stations according to a formula that has been used successfully since 1935. The statistical information was audited by Sinrod and Tash, certified public accountants. For annual records see tables at right.
### TELEVISION TIME SALES 1948-1959

These are billings after all frequency and promotional discounts but before payment of commissions to agencies, sales representatives, etc. Figures are those officially reported by the FCC except for 1959 which are BROADCASTING estimates. The FCC report for 1959 will not be available until later this year.

BROADCASTING, February 15, 1960
IN '60: ECLIPSE OF 1959's RECORD
But more selective buying dictates revised selling strategy

More people with more money to spend—and more products than ever before to select from.

This, in essence, is the 1960 outlook that puts a rosy glow in the eyes of advertising executives.

Economists generally look upon this year as one that will carry forward the advances since mid-1958, when the economy shook off a short but sharp recession. And with more and more products being turned out, economists expect advertising to become more and more necessary to make any one item stand out from its competitors.

Broadcasting leaders have full confidence that television and radio will get their fair share of the increased advertising budgets—budgets which national advertisers, themselves, expect to be 10% higher, on the average, than they were in 1959.

The Forecast • Here is the 1960 outlook for television and radio as evaluated by broadcasting authorities:

Television: Expenditures close to $1.688 billion, or more than 10% over the 1959 total, according to TbA. Estimates cover both time and talent. The comparable 1959 figure was estimated at $1.527 billion, or more than 12% more than in 1958. (Note: Broadcasting estimates of time sales [not including production expenses] for both television and radio in 1959 appear on page 73.)

Radio: Expenditures totaling about $699.3 million, up $61.3 million from the 1959 tentative figures and giving network radio its first upturn in years. The estimate for network radio is $52.5 million compared to $50 million for 1959, according to Radio Advertising Bureau and other industry sources. Local is expected to go from $390 million to $429 million, and national spot from $198 million to $217.8 million. These estimates, like those for tv, cover time and talent.

Few sales executives in national radio and television expect the broadcast crises to bring any harmful economic effects—unless the crises somehow manage to become worse.

Selective Buying • Lawrence Webb, managing director of Station Representatives Assn., offers a sobering word. He feels the need for advertising, in an expanding product market, can mean nothing short of “a steady rise in gross revenue for broadcasters from national advertisers,” but he adds:

“The selection of local media by national advertisers in the future is going to be more thoughtful than ever before, and this will be particularly true in the case of television. This process of selection will, without a doubt, run more to a study of the quality and performance of the medium...

PORTRAIT OF TODAY'S BUSINESS EXPANSION: FOUR KEY INDICATORS

CHART 1—The United States economy in 1959—after a period of sharp recession—back on the uptrend and reaching toward new highs in key areas of growth.

Chart from McCann-Erickson.

NATIONAL OUTPUT: BACK ON TREND FOR 1960

CHART 2—By 1960, national output (gross national product) is expected to pass the 500 billion dollar mark—up about 60% in the 13 years since 1947.

Chart from McCann-Erickson.
HAVE TELECHROME VIDEO TRANSMISSION TEST EQUIPMENT WILL TRAVEL

IT'S PORTABLE

1003-C VIDEO TRANSMISSION TEST SIGNAL GENERATOR
Produces multi-frequency burst, staircase, modulated or line sweep. Variable duty cycle. Regulated power supply.

1005-A VIDEO TRANSMISSION TEST SIGNAL RECEIVER
Very rapid and versatile measurement of differential phase and differential gain characteristics of video circuits. Puts to standard staircase test signal modulated with 3.58 mc or any differential phase or gain test signal.

1005-A VIDEO TRANSMISSION TEST SET
1005-A1 - Produces composite television waveforms suitable for measuring amplitude vs. frequency, differential phase vs. amplitude, high frequency transient response, low frequency phase of streaking, smear, mismatches, and other video characteristics.
1005-A2 - Supplies composite EIA Sync, blanking, horizontal and vertical drive signals and regulated +12 v power for itself and 1005-A1, Features magnetic core binary counters.

1008A VERTICAL INTERVAL KEYER
Permits test and control signals to be transmitted simultaneously with program material between frames of TV picture. Any test signal (multi-burst, staircase, color bar, etc.) may be added to the composite program signal. Test signals are always present for checking transmission conditions without impairing picture quality. The home viewer is not aware of their presence.

1073-CR SQUARE WAVE GENERATOR
Produces new waveform for testing or monitoring of other television or system for amplitude and phase characteristics. New SQUARE Wave pulse is equal to the square wave signal but appears more sensitive than a square wave. In indicating ringing, video test signal is adjustable for 1.4 volts peak to peak. Now in use by major TV networks and telephone companies.

CHART 3—From 1959 to 1960, national output will climb by about $28 billion. More than two-thirds of this increase will be personal consumption.

Chart from McCann-Erickson.

of the broadcasting station, and less to the index of ratings, than ever before.

"In addition to the dimension and description of a market, and all the aspects that would interest marketing experts, advertisers in the future will insist on knowing more specifically the kind of programming a station does, so that they may have some index as to the kind of people the station seeks to appeal to.

"Broadcasters in the years just ahead must recognize the significant changes in the attitudes of consumers in the purchasing of products, as they become more selective, more critical, and more demanding. These same characteristics will manifest themselves in the listening and viewing habits of our ever-increasing population."

A Big Decade • Norman E. Cash, president of TVB, took a look not only at this year but at this decade:

"Our Gross National Product, the experts say, will top $700 billion in 10 years from the current one-half-trillion level. If inflation is considered, we will probably top $800 billion. Average family income before taxes will near $10,-

000. Advertising expenditures will hit an annual rate in excess of $25 billion. "These estimates, it might be noted, carry a big 'if.' Namely, we've got to work hard."

Looking at specific industries, Mr. Cash predicted that steel production in 1960 "will meet all needs and replenish strike-depleted inventories," with an outlook of over-capacity—perhaps less than 100 million tons need as compared to a 150-million-ton capacity— in 1961.

Petroleum and aluminum industries, the TVB head said, already have been forced to reduce production because of lack of demand, and the automotive industry—while optimistic—can hardly be expected to sell the 8 million cars it is capable of turning out in a year. In short, Mr. Cash said, many fields are up against "too great a capacity for current demand." His conclusion (and that of many economic experts):

"In the sixties, our economy to grow at a fast rate must sell more goods—and to sell more goods is, of course, the function of advertising.

"In order to keep pace with our growing population and the increasingly more complex problems of marketing, advertising must increase at a faster rate than is now anticipated. The results achieved by one dollar in 1959 may require as many as five dollars to achieve by 1970."

Good Radio Year • Kevin B. Sweeney, president of RAB, foresees no economic development that is "likely to drive radio up on a reef or beach us on some economic Bali in 1960." Actually, he looks for the start of a trend toward increased rates in summertime radio. He says:

"Radio's advertiser diversification is so great that the only economic trend
that could affect us materially would be a prolonged strike crippling the automotive industry." And this, he adds, "appears unlikely in 1960."

Mr. Sweeney says a growth of 6-15% a year in radio volume for the next five years seems as independent of economic happenings as radio's 1930-35 era when "growth proceeded as if the depression wasn't raging."

The RAB head continues: "In 1960 RAB expects a better-than-average gain in radio volume resulting from: (1) improving retail business; (2) the traditional fall caution of an election year that will dictate the sanity of radio as a buy; (3) the predicted good year for automobiles, tobaccos and beer—three of our staunchest admirers.

"But the single most important factor this year in swelling radio's volume has nothing to do with economic trends. It will be our summer sellout. Radio's position as the summer medium will be unchallenged after this year, and this year will start the trend of special—and higher—summer rates for radio."

An Exploding Economy • The optimistic outlook for advertising in the next few years—and the decade—is shared by many economic leaders.

Secretary of Commerce Frederick H. Mueller said in his year-end report that "1959 was the best yet" and "1960 will be even better with prosperity and peace growing stronger." President Keith Funston of the New York Stock Exchange thought it possible that in the next 10 years the U.S. "could witness a 35% rise in disposable personal income per family, a 10-million-car year, about $20 billion for research and development and a gross national product of about $700 billion."

McCann-Erickson's Market Planning Corp. took a look at 1960-70 as the "decade of incentive," in a special study issued at the start of this year (Broadcasting, Jan. 4). Of the immediate future, specifically 1960, the study had this to say:

"The year ahead is likely to set an impressive new record for the American economy as a whole. What will be its distinguishing features?"

"In 1960, total national output of goods and services for the first time will gross the $500 billion mark—a half-trillion dollars, to use a term that is just entering the economic lexicon:

"In 1960, total employment will be at a record high average of over 66 million, and unemployment will be close to the more or less irreducible minimum of 3 million.

"In 1960, consumer incomes will rise another $23 billion, on top of a $20 billion rise [in 1959]. Purchasing power of the consumer will thus be about $45 billion higher in 1960 than during the recession year 1958."
Scientific stunt man

Jonathan Karas is a pleasant-faced young man who has battered an auto chassis with a building wrecking ball, has run over auto mufflers with a truck, and has flattened an ancient automobile by driving a 35-ton bulldozer over it.

Mr. Karas is not an adult delinquent. He is perhaps television's first “scientific stunt man.” He conceives and often appears in TV film commercials and industrial films that aim to point up dramatically and scientifically the soundness of a client’s product.

Two years ago, Mr. Karas gave up his full-time post as an assistant professor of physics at the U. of New Hampshire to set himself up as a scientific stuntman. In his first full year of operation in 1958, he grossed about $35,000. In 1959, he hit almost $100,000. This year he is shooting for “a considerably higher income.”

In these times of the beleaguered commercial, Mr. Karas believes the climate is appropriate for an expansion of his organization. He now operates with a staff of four from offices in Durham, N.H. Starting in a few weeks, he will open a New York office to be headed by Sydney Giellerup, who retired as a senior vice president with the Marschalk & Pratt Div., McCann-Erickson, New York, and until recently served as consultant to the agency. In addition, Mr. Karas plans to add an experienced film producer to the New York staff.

Scientific Proof • While teaching at the U. of New Hampshire, Mr. Karas conducted and produced weekly TV science shows over WBZ-TV Boston and WCHR-TV Portland, Me. He had to “dream up” attention-catching demonstrations of products and devices, supported by scientific proof. From time to time, he was asked by agencies and industrial firms to help conceive dramatic situations involving their products for film commercials or promotional motion pictures. Out of this evolved his present company, Jonathan Karas & Assoc., in mid-1957.

The automobile he battered was for a recent Ford TV commercial on NBC-TV (through J. Walter Thompson Co.). He has helped conceive stunts for commercials and promotional films for IBM (Benton & Bowles), Libbey-Owens-Ford Glass Co. (Fuller & Smith & Ross) and for several gasoline companies. (Mr. Karas stresses that he had nothing to do with the recent Libbey-Owens-Ford commercial cited recently by the FTC.)

A J. Walter Thompson official said that “Mr. Karas has worked with us on about eight commercials and we are fully satisfied with his work.”

Mr. Karas sums up his work this way: “I help translate a copywriter’s idea into scientifically sound, dramatic, believable proof. Fakery is out. You have to have an advantage before you can dramatize it.”

... With the greatest of breeze •

Prof. Karas floats—or, is blown by 80-mile-per-hour wind, a prelude to a commercial for the Ford Motor Co., designed to show the snug construction of a Ford car auto body by subjecting it to a hurricane-force windstorm (carried over NBC-TV).
The Top Six Stations* command 63.4% of the Los Angeles Radio Audience

*we're one of them

(according to December 1959 Pulse)

With 59 AM and FM radio stations listed in Los Angeles newspapers, it's a matter of pride here at KFAC AM and FM that we're one of the top six consistently capturing nearly two-thirds of the audience. It's good to know that KFAC's fine music and thoughtful commercial format attract not only a quality audience but a big one as well.

KFAC renewals tell the story. 41 current advertisers are in their 2nd to 20th continuous year of successful KFAC selling. We invite you to join them.
THE BIG BULL MARKET IN RADIO-TV

It's the market in station trading; it's been running more than $120 million a year; and it gives no signs of let-down in 1960

In the week of Feb. 1-7, 1960, two television stations and five radio stations were sold for a total of $11.45 million.

The week before, four radio stations were sold for $672,000; and the week before that, two television and three radio stations went for $1.53 million.

So far the volume of station trading in 1960 is at about the same levels it has maintained in the past several years. Unless there is a sharp and unexpected decline in sales activity, at least 450 radio and television stations will change hands this year. Transfers of majority control have exceeded that figure annually since 1957.

Station trading began to be big business after television began recovering from the effects of the FCC's 1948-52 freeze on station construction and after radio began recovering from the effects of television. By 1954, the pre-freeze television system of 108 stations had expanded to 356. There had been considerable station sales activity before then, but the volume began to build into sizeable figures in 1954.

In the six-year period from 1954 through 1959 there were 2,058 sales of radio stations and 272 sales of television stations.

The transfers of ownership control are shown in an extensive BROADCASTING study of station sales since television became an established national medium following the FCC's freeze.

Adding the transfers of minority interests, the compilation of individual FCC records shows 2,538 sales involving radio stations and 334 sales involving tv in the six years.

The total dollar value of station transfers in the six years was $624,250,491, an average of $104 million a year.

Duplicate Sales * Some stations were sold more than once: 282 radio stations had two owners in six years; 66 stations, three owners; 14, four owners. Twenty-seven radio-tv or tv-only station properties changed hands twice in six years and one tv outlet was transferred three times.

No broadcast station was sold more than four times in the six-year period. In 1954, 8% of all radio stations went through transfer proceedings; in 1959 the figure had risen to 13%.

On the other hand the percentage of tv station transfers dropped from 13% of all stations in 1954 to 7% in 1959.

Here are average figures per station sale (combined control and minority transfers):

Radio only—$40,410 per station in 1954, $140,000 in 1959.

Tv only—$650,000 in 1954, $600,000 in 1959.

Radio-tv combined — $1,088,000 in 1954, $2,530,000 in 1959.

Radio-only station transfers throughout the six years (1,945 majority control, 456 minority) averaged $97,500.

Tv-only station transfers (159 majority control, 38 minority) averaged $640,000.

Radio-tv combined transfers (113 majority control, 24 minority) averaged $1,935,000.

Major Project * The BROADCASTING analysis, based on a research assignment involving five staff members and three months of inquiry and compilation, is the first study of its kind ever conducted. (See table on these pages.)

Included in the project are all transfers and assignments approved by the FCC from Jan 1, 1954 through Dec. 31, 1959. Not included are many minority changes in ownership which did not require FCC approval and could not be tabulated. All the transactions on which this study is based have been reported in Broadcasting on the basis of formal Commission actions.

Sales of radio stations, on a percentage basis, rose to a peak in 1957 and the ratio of sales to operating stations has continued at that level. In contrast, 1957 was a peak year for tv station sales, 14%, but the figure has been cut in half since that year.

Why all this activity in station transfers?

Property Values • A new yardstick for the value of a broadcast property developed during the last decade. The current criterion is: “How much is the property worth on the open market?” A few years ago such factors as earnings, profit, income, surplus and related factors were the price sale for a property.

Now the seller and buyer of stations talk about depreciation, cash flow and rate of return. The buying and selling of broadcast properties is expected to assume new dimensions in the coming decade, in the opinion of station brokers.

They are talking, of course, in terms of the investment potential in broadcast stations. The future of radio-tv stations, taking the national view, is considered highly favorable. The operations are deemed stable and relatively free of speculation.

The returns run as high as 15% to 20% yearly on invested capital, though this basis of income must be considered against the professional and service background of broadcast operation—the theory that a doctor’s income shouldn’t be based on the value of his office furniture, automobile and little black bag.

Scurrily a radio or tv broadcaster hasn’t been approached in the last decade with some kind of an offer to sell his property or to buy another property.

In 1934 there were 82 radio station transfers; in 1959, according to the FCC, 1,412 applications were filed for ownership changes (some haven’t been decided).

When the old Federal Radio Commission opened for business in 1927, no mention was made of sales figures. In recent years the transfers have ranged to a high of $20 million (WCAU-AM- TV Philadelphia, including valuable real estate, sold to CBS Inc.)

Brokers Galore • A decade or more ago the number of station brokers—the middlemen who bring buyers and sellers together (for a 5% fee)—could be tallied on the fingers of one hand; today there are more than 30.

---

Note: Dollar volume figures represent total considerations reported for all transactions, whether majority or minority interests were involved. In computing the number of stations in the trading an am-fm facility was counted as one radio unit; an am-only or fm-only transaction similarly was counted as one radio unit. (The number of fm-only transactions was negligible.) In many transactions involving joint radio-television properties, individual values were not assigned to the radio and television stations. Such sales are reported in the columns headed “Combined Radio-Tv.”

The simple transaction of the 1940’s has become a complicated computation of gross and net, depreciation, cash flow, down payments, pay outs and, in increasing number, stock deals.

Television, with its enormous earnings, has spurred this activity and has accounted in great measure for the soaring prices.

But radio, too, has shared. In both instances the attractive return has been a major factor.

There is a prestige factor, too. Many businessmen once bought newspapers to enjoy a voice in the community; now they are turning to radio and tv.

Stations are considered to be operating in a closed economy insofar as facilities are concerned. There are few openings in better markets.

Radio frequencies in these markets are extremely scarce. Television is nearing this point. Pending a radical revision of tv allocations television stations are strait-jacketed in the present vhf band.

Obviously the only way to get into a good market is to buy in.

Who’s Who • The roll call of those who have bought into the broadcast field, or who have used this means to upgrade their holdings, is a who’s who of the broadcasting industry:

How can a radio or tv station be bought?

Surprisingly, though there are stations “on the block,” most are not peddled at all. It is the buyer who must scout a likely looking property and then persuade the owner to sell.

Luck is a factor. The owner of a broadcast facility may be expanding in one of his allied fields. He must raise some cash or its equivalent.

This was exemplified recently when
ch. 12 WRDW-TV Augusta, Ga., was sold by Southeastern Newspapers to the Friendly Group for $1.5 million. WRDW-TV was sold because the newspaper chain is expanding into Savannah and needed the money.

**Time to Retire** • More recently another element has come to the forefront—the retirement urge. This is particularly true of those who have grown up with the industry. Men who were in their thirties in the 1930's are now heading into their sixties and are beginning to set their estates in order and to enjoy the rewards of their business success. There have been many instances of this in recent years. Two instances involve broadcast pioneers C. Bruce McConnell and Harry Bitner. The age factor was described as an element in their decisions to sell. The 1956 McConnell transaction involved the sale of radio and tv stations in Indianapolis and Fort Wayne, both Indiana, to J.H. Whitney interests for $10 million. Mr. Bitner three years ago sold his Indianapolis, Minneapolis and Grand Rapids radio-tv properties to Time Inc., for $15 3/4 million.

Retirement, of course, is not the single reason for selling. But the nearer a man is to 60 the more receptive he becomes to offers to buy.

**Dual Factors** • In the buying and selling of broadcast properties, two factors have come to the forefront in determining the worth of a station—depreciation and cash flow.

Depreciation becomes money in the pocket to a buyer. If a station has laid out several million dollars for new equipment and is depreciating this outlay over a period of 10 years, each annual entry under this category in the balance sheet is that much tax deduction in the pocket of the owner.

Another aspect of this tax approach making the purchase of a radio or tv station a good buy is this: when a new owner takes over a broadcast outlet, he can value the equipment or other assets at a worthwhile figure and then depreciate again.

So depreciation works both ways. The original owner finds his income reduced, sometimes drastically, when he

Note: Figures for total stations on the air are as of the first of each year. Only those transactions in which majority control of stations was transferred are counted in the calculations of stations sold each year.
Fargo is the SPENDINGEST city in the U.S.A.

And WDAY gets by far the biggest audience in this 54-county area!

The Consumer Markets pages of "Radio Rates" show that Fargo is the No. 1 city in the U.S.A., for Retail Sales Per Family!

Also — the Jan. 19-Feb. 13, 1959 Pulse Area Survey shows that WDAY is by far the top station among 37 that compete for audience in our 54-county area.

All this confirms the wisdom of you advertisers who have been choosing WDAY since 1922! There just ain't no station anywhere else in the U.S. that does so much — for so many — for so little! Ask PGW!

PETERS, GRIFFIN, WOODWARD, INC.,
Exclusive National Representatives
has finished depreciating his assets. A new owner can realize this type of income all over again.

The cash flow approach is the latest refinement in assaying the worth of a radio or tv station. Cash flow means the total emoluments that accrue to an owner. Items in this category, besides the usual profits and salary, include depreciation, expense account, entertainment and travel allowances, and such personally useful appurtenances of the business as an automobile or two, telephone service, sports tickets, etc.

The old rule-of-thumb fixed a station's worth at 11/4 times its annual gross or five times its net earnings. This rule has been superseded in recent years by more sophisticated approaches.

One at a Time • An intriguing aspect of this new look is the price disparity in what are apparently equivalent stations in comparable markets. There is no simple explanation for this. Each transaction must be studied individually to determine its basic elements.

Obviously where a buyer pays all cash, the price is likely to be reasonable. It's when a comparable station is sold for more than that eyebrows go up. Here the buyer has put up only a small amount of cash—30% of the total price is a common down payment—and is paying out the remainder over a long time, perhaps 10 years.

There will be a 20% "discount" for cash in such circumstances, according to informed circles.

Another difference may appear in the depreciation picture of one station compared with another. Or the cash flow may vary considerably.

Fees and Such • In many instances the disparity in prices is due to the long-term or short-term obligations of the station, or the fatness of the net quick assets. There may even be a consulting fee involved that is not publicized when the sale is announced.

A buyer may place personal and subjective values on a station. He may desire to live or operate in the community. He may have sentimental reasons for choosing this particular station. He may also realize that as the owner of the station, the seller will become a voice in the area and be "in the lodge", so to speak. Thus he will become privy to business events, along with the local businessmen and office holders—and these contacts can be valuable.

And not the least explanation for the high prices is plain inflation.

A station which sold for $100,000 a decade ago and for $350,000 this year is simply following the same economic fact of life which has boosted the $6 cup of coffee to 10c and the 50c haircut to $1.75. This applies, of course, to the worth of a static station in a static market.

More realistically, inflation is one of the factors that has been responsible for soaring prices for the same facility in the last decade. Obviously the growth of the market and the upgrading of the station through more efficient and more imaginative management are key factors in explaining the differences in what the same station sells for from one year to the next.

This station, plus a tv adjunct and radio property in another city sold for $7.5 million in 1957.

• WYDE Birmingham, Ala., bought in 1957 for $335,000, and WAKE Atlanta, Ga., bought in 1955 for $100,000. Both stations sold last month for $1,025,000.

• WHAD Providence, R.I. Sold in 1955 for $469,000 and again in 1957 for $640,000.

• KGIL San Fernando, Calif. Bought in 1956 for $475,000 and sold in 1959 for $800,000.

Ways To Pay • The new sophistication in judging the value of a radio or tv station has also gone into methods of payment. The simple exchange of checks which cleaned up the transaction at one sitting is vanishing.

Today's closings in many instances are comparable to Wall Street transactions, employing not only the principals but batteries of lawyers, accountants and economic advisors.

Added to the complex of some large sales are stock transfers. The merger of Transcontinent and Marietta last year into a new Transcontinent worth about $30 million is one example of this trend. Another was the sale last year of WSAI Cincinnati by Sherwood R. Gordon to Consolidated Sun Ray Inc.

Mr. Gordon sold 100% of the stock at an overall price of $1.9 million. But Consolidated paid only $377,000 in cash; the remainder was in stock.

Mr. Sherwood began to receive blocks of Consolidated Sun Ray stock on Jan. 15. The first block was valued at $5 per share; this valuation rises during the next seven years until the last block will be valued at $6.25 per share.

Getting Involved • This is not the first time that payment for a station has been made in stock. When Westinghouse Broadcasting Co. bought KPIX (TV) San Francisco from Wesley Dumm and associates in 1954, it paid in Westinghouse stock. The original transaction was figured to be $6 million, but by the time the FCC approved the transfer of the station and the sale was consummated the value of the stock had risen to $7.6 million.

One of the best examples of the complexities of today's transactions occurred in the 1957 sales by RKO Gen-

Now American Airlines offers jet-powered Electra Flagship service between New York and Toronto that's more than 20 minutes faster.

From New York frequent departures are scheduled throughout the day. American's jet-powered Electra Flagships wing nonstop to Toronto in only 86 minutes. You can depart from Toronto either in the morning, afternoon or evening ... arriving in New York in only 84 minutes.

Enjoy the wider, deeper seats of the spacious Electra cabin ... only two abreast, with a table between. You'll fly in air conditioned radar-guided comfort with matchless service that makes American Airlines the first choice of experienced travelers.
eral of its WEAT-AM-TV West Palm Beach, Fla.

RKO General sold its WEAT stations to Palm Beach Television Inc. for $600,000. This is now 80% owned by Rand Broadcasting Co. (WINZ Miami) and 20% by Bertram Lebhar Jr.

First, RKO transferred all current assets and all liabilities from the station licensee to the parent company. This left the property with $346,000 of fixed and miscellaneous assets and outstanding stock valued at $169,000.

The sales agreement called for a closing payment of one-tenth of the purchase price at closing, with the remainder to be paid over a nine-year period.

The agreement between Mr. Lebhar and Rand Broadcasting called for Rand to advance Palm Beach Television Inc. $40,000 to make the first payment of $60,000. PBT was capitalized at $25,000—25,000 shares at $1 par value.

Mr. Lebhar subscribed to 5,000 shares of PBT at cost of $5,000; Rand took the remaining 20,000 shares at a cost of $20,000.

Rand also agreed to advance working funds to PBT on 5%, five-year promissory notes.

It's Contagious • Perhaps the future of station transfers—assuming that neither the FCC nor Congress changes the rules (and there has been talk along these lines in recent months)—can be found in the latest annual report of the FCC.

In a short paragraph, the Commission pointed to fm’s resurgence as exemplified in the fact that fm stations in Los Angeles and in San Francisco were each sold for $100,000 in the 1959 fiscal year.

When the FCC begins to use the market price for stations as the basis for judging the economic health of a service, buying and selling has become a part of the industry.

The dream of independence

Buying a small-town newspaper used to be the stereotype of the good life imagined by big-city dwellers. Now the small-market radio station is the ideal.

The appeal is the independence of owning the property you’re working for. It’s on the strength of that appeal that a good many radio stations have been sold and are still being offered.

A common come-on used by station brokers is the argument that a property that hasn’t done well under hired management could do much better if someone bought it and took over personal command. And the records show that a good many cases have turned out that way. That kind of a promise is implied in the following poop sheet sent out by one of the brokerage services. It offers for sale a network-affiliated daytime radio station in a small eastern town:

“Capitalization is $50,000—500 shares at $100 per value.

“Outstanding are 325 shares, split between two owners.

“Network affiliation costs $112.50 per month; network income amounts to $56 per month, but the network provides programming for station and also enhances the value of adjacencies.

“The station’s billings for the years it has been operating: 1950 (partial operation), $14,314; 1951, $54,889; 1952, $61,870; 1953, $55,877; 1954, $60,392; 1955, $47,859; 1956, $51,192; 1957, $51,098; 1958, $44,319.

“Estimated 1959 billings, $42,000.

“Operating costs amount to $1,500 per month. In addition there is a manager who draws $100 per week, plus $50 per week as a corporation officer, plus one-tenth of the net profit before taxes. He also holds a $50,000 insurance policy on his life.

“Other expenses: Bookkeeper and assistant manager, $55 per week; continuity writer (part-time), $21 per week; receptionist-stenographer (plus some announcing), $40 per week; two full-time announcers, $50 each per week; part-time announcer, $1 per hour; engineer (part-time) $35 per week and janitor (part-time), $15-$16 per month.

“Note that owners draw no salary.

“Leases run—$50 monthly for studios; $120 per year for tower site. News service runs $32 weekly.

“In this station’s coverage are two weekly newspapers, one daily newspaper and three local radio stations. The radio stations are located at X, 10 miles away.

“The station’s spot rate is $2.50, with a special rate of $195 for 156 spots at a flat fee.

“Asking price is $81,000, of which 20% must be in cash and the remainder in 6% notes over a 10-year period.”
There are 30 members of the 86th Congress—13 senators and 17 representatives—who hold financial or other interests in commercial or noncommercial educational broadcasting, either in their own right or through their families or relatives, according to FCC records.

Not one member of Congress owns a tv or radio station outright, but several hold sole controlling ownerships within their families. Interests held by congressmen in radio or tv stations range from token to controlling stockholdings.

A number of these interests are not financial. These include directorships or trusteeships, held by a senator or representative or a member of his family, in educational institutions or the like.

The congressional list, showing station network affiliations where they exist, follows:

**Sen. Clinton P. Anderson (D-N.M.)**
Albuquerque — owns 250 of 4,500 sh. common voting stock of KGGM-AM-TV Albuquerque and KVSF Santa Fe, N.M. His son, Sherbourne P. Anderson, is director and owns 4 sh. of the same stations.

KGGM: CBS; KGGM-TV: CBS; KVSF: CBS.

**Sen. Norman Brunsdale (R-N.D.)**
Mayville—is member of board of regents, KWLC Decorah, Iowa, educational station. His brother, Karl H. Brunsdale, Fargo, N.D., owns 900 of 144,000 sh. common voting and 5,002 of 400,000 sh. preferred non-voting stock of KDUB-AM-TV Lubbock, KPAR-TV Sweetwater and KEDY-TV Big Spring, all Texas.

KDUB-TV: CBS; KPAR-TV: CBS; KEDY-TV: CBS.

**Sen. Roman L. Hruska (R-Neb.)**
Omaha—his brother, Victor Hruska, Ponte Vedra Beach, Fla., is a member of board of trustees of WJCT (TV) Jacksonville, Fla., educational station.

**Sen. Lyndon B. Johnson (D-Tex.)**
Johnson City—his wife, Claudia T. (Lady Bird) Johnson, is board chairman-director and owns 304 of 588 sh. common voting (unrestricted) and 34 of 588 sh. common voting (restricted) stock of KTBC-AM-TV Austin and KRGV-AM-TV Weslaco, both Texas. His brother, Sam Houston Johnson, owns 1 of 588 sh. common voting stock of the same stations.

K T B C: CBS; KTBC-TV: CBS; KRGV: NBC; KRGV-TV: NBC.

**Sen. Olin D. Johnston (D-S.C.)**
Spartanburg—his wife, Gladys A. Johnston, is vice president-director and owns 125 of 500 sh. common voting stock of WQFN Gaffney, S.C.

WFGN: KBS.

**Sen. B. Everett Jordan (D-N.C.)**

WBBB: MBS; KBS; WHKY: ABC, MBS.

**Sen. Robert S. Kerr (D-Okla.)**
Oklahoma City—is vice president-director and owns 327 of 2,500 sh. Class A common voting stock of KVOO-TV Tulsa, Okla.; is president-director and owns 50,611 of 100,000 sh. common voting stock of WEEK-AM-TV Peoria and WEEQ-TV La Salle, both Illinois.

His wife, Grayce B. Kerr, owns 371 sh. of same type stock in KVOO-TV and 11,488 sh. in Illinois stations; his brother, T.M. Kerr, owns 172 sh. in KVOO-TV and is secretary-director and owns 11,141 sh. in Illinois stations; Geraldine H. Kerr, wife of T.M. Kerr, owns 3,235 sh. of Illinois stations.

KVOO-TV: NBC; WEEK-TV: NBC; WEEQ-TV: NBC.

**Sen. Warren G. Magnuson (D-Wash.)**
Seattle—owns 10,186 of 253,726 sh. common voting stock of KIRO-AM-FM TV Seattle.

KIRO: CBS; KIRO-TV: CBS.

**Sen. Joseph C. O'Mahoney (D-Wyo.)**
Cheyenne—his wife, Agnes V. O'Mahoney, owns 15 of 3,051 sh. common voting stock of Cheyenne Newspapers Inc., which in turn owns 1,850 of 7,591½ sh. common voting stock of KFBC-AM-TV Cheyenne and satellite KSTF (TV) Scottsbluff, Neb.

KFBC: ABC; KFBC-TV: CBS.

**Sen. Winston L. Pryouty (R-Vt.)**
Newport—his cousin, John A. Pryouty, owns 1 of 1,643 sh. common voting stock of WIKE Newport.

**Sen. A. Willis Robertson (D-Va.)**
Lexington—his brother, Harold G. Robertson, Roanoke, Va., is a director of Shenandoah Life Insurance Co., licensee of WSLS-AM-TV Roanoke.

WSLS: NBC; WSLS-TV: NBC.

**Sen. John J. Sparkman (D-Ala.)**
Huntsville—his wife, Mrs. Ivo H. Sparkman, is partner and owns 49% of WAVU-AM-FM Albertville, Ala.

**Sen. Herman E. Talmadge (D-Ga.)**
Lovejoy—his aunt, Mrs. Julius Y. Talmadge, Athens, Ga., is a board member of WEGS-TV Waycross, Ga., educational station.

WTAD: CBS; KHOA-TV: CBS.
BROADCASTING’S YEAR OF TROUBLE

The beginning: an unhappy quiz contestant, a grand jury
The present: payola investigation, industry self-regulation
The future: more investigations, possibility of new laws

“What happened?”

Clubbied unexpectedly from behind, the TV hero usually mumbles this bewildered question. But broadcasters are borrowing the phrase frequently these days. It expresses the confusion they feel in the onslaught of public investigation and castigation.

They are scarcely recovered from last fall’s exposure of TV quiz rigging by the House Legislative Oversight Subcommittee and the more recent FCC inquiry into the scope of its program authority (if any).

Now, they are enmeshed in the payola probe of the same House group. Later this week they go before the Senate Commerce Committee to explore possibly the entire gamut of charges of abuse and deception in radio-TV and advertising.

There is still more (see box page 94).

The Beginning • Some would say it all started in the summer of 1958 when an unhappy quiz contestant went to the New York District Attorney with a complaint that the show was rigged. The incident mushroomed into a sequence of events that involved not only broadcasters and advertisers, but also committees of Congress—the White House, Justice Dept., Federal Trade Commission and the FCC.

The New York D.A. • Early probe into the integrity of the big quizzes on TV didn’t get much notice or action. The Federal Trade Commission in December 1956 received a complaint about The Big Surprise. But the case was closed in May 1958 since the show was then off the air and the executive producer had sworn the show was clean.

News and feature articles in 1957 which questioned the quiz programs apparently went unnoticed too by officials of the networks and the government regulatory agencies (New York World Telegram & Sun, April 17-20; Time, April 22; Look, Aug. 20).

But New York District Attorney Frank Hogan moved quickly in August 1958 after ex-Dotto contestant Edward Higrumeier Jr. charged the show was rigged in a statement to both the FCC and the District Attorney. So did Dotto sponsor Colgate Palmolive which yanked the daytime and nighttime versions off CBS-TV and NBC-TV.

Charges involving other quiz programs promptly followed and flooded the news columns of the New York daily press. Within weeks Mr. Hogan was presenting a long list of witnesses and evidence to a local grand jury. Leaks from the closed proceeding continued to make the story big headline material locally. But it wasn’t enough. It would take another year and the crumbling of quiz idol Charles Van Doren at the Harris Oversight Subcommittee hearing in Washington to focus national attention and mass public opinion on the issue.

Clean-Up Campaign • The decay of the quiz shows themselves came more quickly, however, as the industry acted to clean house on its own initiative. The biggest of them all, $64,000 Question, was dropped Nov. 2, 1958, by co-sponsors Revlon and P. Lorillard. The show since its inception in June 1955 had given away $2.1 million in prizes and 29 Cadillac “consolation” prizes. Within three months after the New York District Attorney began action, most of the big money quizzes were dead.

Mr. Hogan fought unsuccessfully in 1959 to have the grand jury presentment (no indictment was returned) made public but Judge Mitchell D. Schweitzer sealed the findings in November, a ruling which affirmed his earlier decision that year. In August 1959, however, Judge Schweitzer, upon petition by the Harris Oversight Subcommittee, released the grand jury minutes to the House group. The Harris subcommittee went into action last fall, parading on the public witness stand those who earlier had testified to the New York grand jury.

Public concern mounted with each disclosure and even President Eisenhower expressed shock (see page 98), calling upon the Attorney General to investigate and report to him.

Hogan Carries On • Although the spotlight shifted from the New York District Attorney to congressional committees and government agencies, Mr. Hogan’s office still is very active in the business of broadcasting. The specialist is Assistant District Attorney Joseph Stone. He currently is presenting witnesses and evidence to a grand jury on payola within the music and broadcasting fields. This activity should run through March.

Then, expected next on the District Attorney’s schedule, is the presentation to a grand jury of the some 100 possible cases of perjury by witnesses before the 1958 TV quiz grand jury. One witness already has been indicted: Albert Freedman, producer of Twenty-One for Barry & Enright. Mr. Freedman appeared a second time before the grand jury to confess, as he did to the Harris subcommittee, that he had given advance questions and answers to contestants. He also testified that with the knowledge of his employer, Dan Enright, he had approached contestants whom he knew were going to appear before the grand jury. Some of these he told that if he were asked by the District Attorney whether he had given assistance to them, “I am going to say I didn’t.”

The Harris Committee • On Nov. 2, 1959, as the sensational testimony of Charles Van Doren unfolded, all those present at the Harris subcommittee hearing in Washington—broadcasters, legislators, government agency representatives—were aware they had reached the point of no return.

“I was involved, deeply involved, in a deception.”

The nation’s No. 1 quiz show idol, the son of a prominent family whose scholarly attainments were widely acclaimed, was speaking. The witness, whose boisterous appearance during his “struggle” through great intellectual battles on NBC-TV’s Twenty One had won the heart of America’s viewing millions, confessed: “I would give almost anything I have to reverse the course of my life in the last three years.” But even his $129,000 in prize money was gone.

And so was public confidence in tele-
Confidentia nititur in fide
(confidence is built on faith)
Investigations: those underway and in prospect

Here's a summary of what broadcasters can expect this year in investigations and hearings before Congress and by government agencies:

**Payola** • House Oversight Subcommittee, led by Rep. Oren Harris (D-Ark.), has been hearing testimony on the payola racket in radio-tv. It began Feb. 8. FTC has acted on numerous payola complaints, is expected to continue proceeding on such cases and has supplied FCC with case details. FCC, having ordered stations to supply information on any payola incidents and their protective measures against future activities, plans to consider this data when acting on renewals and new-facilities grants. The New York District Attorney currently is presenting payola evidence and testimony before a grand jury there. This should run at least through March.

**Deception** • Senate Interstate & Foreign Commerce Committee, headed by Sen. Warren G. Magnuson (D-Wash.), on Friday (Feb. 19) starts a broad probe of deceptions and other abuses in advertising, radio and tv. It begins with an informal conference of representatives from FCC, FTC, NAB, the networks, American Assn. of Advertising Agencies and Assn. of NationalAdvertisers. FTC actively is prosecuting a mounting number of false and misleading advertising complaints, newly issued since the Harris tv quiz hearing last fall. They emphasize tv ads although all major media are involved. FTC has stepped up its radio-tv monitoring.

FCC has just completed its own major hearing on its authority in the area of programming and is expected to eye closely any deception tinge while processing individual radio-tv cases. Justice Dept. is expected to press for adoption of recommendations which the Attorney General set forth in his Dec. 31, 1959, report to the President: that FCC and FTC have ample authority to curb deceptions and other abuses and that they should exercise this authority more vigorously.

**Ratings** • Sen. A.S. (Mike) Monroney (D-Okla.), third-ranking Democrat on the Senate Commerce Committee, is pressing for a hearing on abuses in radio-tv rating practices and how competition for ratings hurts development of better programs. Harris subcommittee also plans probe of ratings. Date not set.

**Multiple ownership** • House Antitrust Subcommittee, Rep. Emanuel Celler (D-N.Y.), chairman, in late March or April plans to begin a hearing on a bill plans Rep. Celler which would prohibit common ownership of mass media (radio-tv with newspapers, magazines) in the same area, if the ownership represents an undue concentration of communication control.

**Conflict of interest** • Celler subcommittee, Wednesday (Feb. 17) is to begin a hearing on measures which would prevent bribery and conflict of interest among officials in government agencies or departments.

**Ex parte contact** • House Communications & Power Subcommittee, headed by Rep. Harris, plans a hearing on bills which would forbid ex parte contacts with government agencies and establish ethical standards for their conduct. No date is set. Rep. Harris' Oversight Subcommittee already has held panel discussion hearing on ex parte contacts and related issues.

**Sports** • Celler subcommittee may hold further hearing on six bills to exempt professional sports from the antitrust laws, with emphasis on provisions dealing with radio-tv blackout agreements. The probe was begun last fall. The Senate Antimonopoly Subcommittee plans no further hearing on similar legislation, but its chairman, Sen. Estes Kefauver (D-Tenn.), expects to introduce a bill to impose a 75-mile tv blackout on professional football games in areas where college games are being played.

**Political broadcasting** • This year, as a result of amendment of Sec. 315 in 1959, the Senate Commerce Committee's "watchdog" subcommittee headed by Sen. Ralph Yarborough (D-Tex.) will keep surveillance for possible abuses by broadcasters in news shows involving political candidates.

Mr. Oversighter sets his sights • Rep. Oren Harris (D-Ark.), chairman of the House Subcommittee on Legislative Oversight, led the investigation of rigged tv quiz shows which saw quiz idol Charles Van Doren crumble. His current target: payola.

This changed their attitude or opinion of the television industry. Despite their knowledge that quizzes were rigged, 57.4% found them educational and interesting enough to want them back. But a second national survey on Nov. 3, the day following Mr. Van Doren's confession, discovered 50.9% of the public had changed their opinion of television and only 39.9% wanted quizzes back on the air.

The second survey, also conducted by Sindlinger and commissioned by Broadcasting, further disclosed that the public (53.8%) blamed the producers most for the scandal. (Interestingly, people...

"THE COMMONWEALTH OF NATIONS"

a new public affairs TV series for the 60's

Now, with viewer interest keen for films about people and places, this new "COMMONWEALTH OF NATIONS" series gives you a unique opportunity to make your public service programming important, vital and newsworthy.

13 informative half-hour TV films take the viewer on a trip around the world through a comprehensive camera report on various peoples, cultures, traditions, philosophies, customs—men and events that have shaped history for the past 500 years. Statesmen, tribesmen, kings, conquerors, explorers—they’re all here in their true-life roles building, shaping, forging the Commonwealth of Nations.

KJEO-TV—ABC for Fresno, California's $600,000,000 market—stepped up its metropolitan Nielsen rating a full 10% in its December 1959 survey over the corresponding 1958 period. 32% of the audience 6 to 9 p.m.—33% of the audience 9 p.m. to midnight.

In contrast, one of the other two stations in the market showed a static position with 1958, the other a decline.

Your HR representative will help you get your share of the stepping out and stepping up TV buy for 1960—KJEO-TV, Channel 47, Fresno.

'I was involved . . . in a deception' • So testified Charles Van Doren (r) of his participation in Twenty One. He told the House Subcommittee last fall he was coached in dramas as well as seemed more concerned that Mr. Van Doren had lied about the rigging than about the rigging itself.)

Mr. Van Doren testified he had been coached by Mr. Freedman not only on questions and answers but also how "to pause before certain parts of the answers, to skip certain parts and return to them, to hesitate and build up suspense."

Mr. Van Doren lost two jobs right after his testimony; his $50,000 commentator post with NBC and his assistant professorship in English at Columbia U.

Lesser disclosures, charges, denials and counter-charges swept the Harris subcommittee hearing along for another week. When it was over, 152 witnesses has produced 21 days of testimony.

A Tough Report • Last week Chairman Harris submitted his interim report. It declared stations "have virtually surrendered control of programming during the best broadcasting hours to the networks, who in turn have often abdicated control to advertisers." It called for sweeping legislation to amend the Communications Act and the Federal Trade Commission Act (AT DEADLINE, Feb. 8).

Among other things, the report would make it a crime to participate in or conspire with others to broadcast a program with the intent to deceive viewers or listeners. Payola would become a crime. Networks would be licensed.

Other proposed laws would materially sharpen the regulatory teeth of FCC and FTC.

In the preface to its legislative recommendations, the subcommittee report noted that the testimony record "shows how far certain advertisers, producers and others will go to wring the last possible dollar of profit out of the privilege of using the airwaves. They have ruthlessly exploited many persons in all walks of life, including a member of the faculty of a great institution of learning, a minister of religion, the executive director of a national organization of business and professional women, a labor organizer, and, worst of all, children, for their private gain. "They only used children as pawns on their rigged shows; they also instructed them to lie, even to their parents or guardians, about the fact that they had been coached. After the rigging of quiz shows was publicly disclosed and the grand jury investigation begun, some producers tried to persuade contestants to become criminals by giving perjured testimony before the grand jury.

"This sordid story demonstrates the futility of the theory underlying the present statute that the use of the airwaves in the public interest can be assured by holding only station licensees responsible for everything they broadcast."

Failure of Industry • The Harris report argued that self-regulation alone
Now, you can reach every viewing man, woman and child in Michigan's other big market with one single-station buy! (Grade "A" signal or better, too!)

WJRT
Channel 12—Flint

Represented by HARRINGTON, RIGHTER & PARSONS, INC. • New York • Chicago • Detroit • Boston • San Francisco • Atlanta

BROADCASTING, February 15, 1960
The report expressed expectation that "an administrative agency with a vigorous and resourceful conception of its duties should take a larger view of its jurisdiction than that revealed by the chairman of either FCC or FTC in our recent hearings."

The report observed, "Fear of reversal by the courts should not paralyze agency action in the face of novel situations."

The Harris group felt it "heartening" that since the hearing both FCC and FTC "seem to have exploded in a burst of regulatory energy."

But, the report, continued, it is "hardly reassuring" that the concern of the two Commissions for vigorous enforcement "had to await a grand jury investigation, the subcommittee's hearings, a public expression of dismay by the President of the United States, and a Presidential direction to the Attorney General of the United States to investigate the situation."

**Failure of Government**

The report was no less caustic in its appraisal of the attitude of the regulatory agencies, FCC and FTC: "Where a commission takes a passive view of its role, it is clear that the public interest suffers by default. Where a public evil is allowed to grow, unchecked while administrators sit idly by and deplore in silence, the Congress must exercise its duty of legislative oversight to restore lost public confidence."

The report's suggestions included: where a public evil is growing; where a public evil is being ignored; where a public evil is being created by regulatory inaction; or where a public evil is being created by regulatory inaction and deplore in silence, the Congress must exercise its duty of legislative oversight to restore lost public confidence.

**Program Power**

In the Justice Dept. document, the legal arm of the federal government unequivocally stated that:

- The FCC and the FTC do have the power to consider programming.
- Both should exercise that power more rigorously.

The Attorney General's report also indicated that there might be need for legislation to endow the FCC and the FTC with more authority.

In a nutshell, Mr. Rogers' and the Justice Dept.'s approach was that broadcasting must live up to a goal of public interest which overrides "naked commercialism."

Mr. Rogers also discussed the possibility of criminally prosecuting those responsible for the rigged quiz shows under Sec. 1343 of Title 18 of the U.S. Code.

Broadcasters were stunned. The whole point of the Attorney General's report was to give the FCC and the FTC more power than even those agencies had claimed previously. Few would comment publicly. Privately they seethed.

**Reaction to the Report**

Harold E. Fellows, president of NAB, applauded those references in Mr. Rogers' report that commended the industry for moving to clean up its house. Mr. Fellows took issue with that part of the report which painted broadcasting as overly commercial.

At the FCC the statement was greeted cautiously. Chairman John C. Doar stated it would be considered among other viewpoints entered into the FCC's program hearing then getting underway. Conr. Frederick W. Ford, on the other hand, hailed the report as resolving the legal issue of the FCC's powers in the programming field.

Rep. Oren Harris (D-Ark.), whose House Oversight Subcommittee was credited with ripping the veil from the quiz show chicanery, called the report substantial but added it did not go far enough. He said he didn't think the Rogers Report was adequate "to 
WHY IS VIDEO TAPE MADE ONLY BY 3M?

When the first video recorders were introduced in 1956, there was a big "if." Video recording would revolutionize the television industry IF someone could make a magnetic tape that would meet its fantastic demands for quality and durability.

This meant a tape with an essentially perfect oxide coating that would hold up under tremendous operating pressures, heat and tension under repeated use. This, then, would result in cutting production costs for TV commercials in half, provide perfect rehearsal conditions, eliminate fluffs and insure a "live-looking" finished product. In short, it meant doing the nearly-impossible.

3M did it . . . and when the daylight saving time deadline of April 27, 1957, brought demands for video tape in quantity, 3M did it again.

What made the difference? Experience and research. 3M had 50 years of experience in precision coating processes. 3M pioneered in magnetic tape manufacture.

After three years, 3M remains the only commercial manufacturer of video tape. While others try to make a workable video tape, 3M can concentrate on further advances in "Scotch" Brand, the tape that is already time-tested.
vision News Directors Assn. meeting in October heard Chairman John C. Doerfer state that congressional quiz investigations were “nudging the Commission closer and deeper into exercising regulatory controls over programming content.” But, he said, the FCC is “reluctant to plunge in and exercise government supervisions very extensively over programming formats. . . .”

In a letter to Rep. Harris, chairman of the House Legislative Oversight Subcommittee, FCC Comr. Robert E. Lee said that it might be necessary to enact additional legislation placing networks under direct FCC regulation.

Chairman Doerfer, in an interview in U.S. News & World Report, said no new laws are warranted “until we know precisely where we’re going—until we know definitely what evils there are.”

These divergent statements came on the eve of the FCC order for a massive study of broadcast policies and practices, announced in mid-November. The purpose of the order, the Commission stated, was to find out whether the FCC should issue new rules governing broadcast output or if it even has the authority to issue such rulings.

The investigation was brought about, the Commission asserted, by the revelations of the TV quiz scandals, payola charges and complaints about offensive commercials.

Other purposes of the study, the FCC said, were to find out if the Communications Act needs overhauling and to look into advertising material and policies pursued by broadcasters in its selection, presentation and supervision.

Hearing Begins • The FCC hearing began Dec. 7, with testimony from agencies, producers, writers, civic groups, advertisers, and religious leaders. Witnesses were asked to direct their remarks toward (1) whether current broadcast practices are “inimical to the public interest;” (2) whether present review procedures in programming and advertising are adequate; (3) whether existing FCC rules are adequate and if more detailed standards are needed, and (4) whether changes are needed in the Communications Act. The hearing ran through Feb. 1.

Meanwhile, Comr. Lee told a Catholic advertising group in New York that stations guilty of imbalanced programming would be liable to disciplinary action. However, Comr. Lee was opposed to license revocation in such cases. “Perhaps,” he said, “some form of probation such as a temporary license or a one year extension pending further review is the answer.”

The Commission announced that in conjunction with its hearing it was sending a two-part questionnaire to every broadcast station in the U.S. Question No. 1 asked: “What matter, if any, has been broadcast by any of your stations for which money or any other valuable consideration has been directly or indirectly paid. . . .”? Question No. 2 asked what “internal controls and procedures have you established to provide you with information concerning remuneration . . . received by individuals . . . of programs broadcast by your station.” Deadlines were Jan. 5 for Part I and Feb. 5 for Part II.

Chairman Doerfer took time out to tell the Federal Communications Bar Assn. that the “future of broadcasting hangs in the balance.” How far can the Commission go, the Chairman asked, in achieving program balance and how can it aid the industry to “do more public service broadcasting and still observe the fundamental law of the land?”

Public Service • The answer was soon forthcoming. In mid-January, Chairman Doerfer proposed to the three networks that they set aside, on a rotating basis, one-half hour of prime time each weekday evening for public service programming.

The networks agreed to the plan:

Rogers report • It was a bombshell to broadcasters. Attorney General William P. Rogers told President Eisenhower both FCC and FTC have power to curb abuses in programming and they should exercise that authority more vigorously.

really clean things up."

Federal Trade Chairman Earl W. Kintner declined to comment. The FCC • During the past three months the FCC has announced three major moves to “clear the air” of scandal and alleged abuses.

In mid-November the FCC ordered a massive study of broadcast policies and practices; next it sent a two-part payola questionnaire to every broadcast station in the U.S., and then announced that the answers to the questionnaires will form an integral part of new grants and license renewals. The Federal Trade Commission also has referred to the FCC 100 cases involving payola charges.

The FCC left little doubt that its “get tough” policy will continue to get tougher in the months ahead.

Although some broadcasters were taken by surprise, many had read the signs in the public pronouncements by the commissioners earlier.

In August 1959, FCC Comr. Ford announced publicly that the Commission was considering an investigation of its own programming policies.

Doerfer Warning • A Radio Tele-

Get tough policy • Citations of misrepresentation in TV advertising and payola in radio-TV are flowing from FTC these days. Chairman Earl W. Kintner also has ordered stepped-up radio-TV monitoring, both when at home and when on-the-job.
because:

MORE ADEQUATE station audience facts... needed by buyers and sellers of radio and tv time... and pioneered by Nielsen Station Index:

- Station Totals as well as Central-Area ratings
- Listeners per home in terms of men, women, teens and children
- Season-to-season measurements of each market from two to 12 times a year
- Cumulative audience and frequency
- Compatibility between local and National Nielsens

MORE ACCURATE station audience facts... needed by buyers and sellers of radio and tv time... and again pioneered by Nielsen Station Index:

- High-quality sampling
- Nielsen-designed meter-based techniques
- Checks and controls at every step of data processing and report production
- Putting "product quality" first

UNEQUALLED EXPERIENCE AND FACILITIES. The men responsible for NSI service are seasoned radio and tv executives with years of experience in agencies, networks, stations and with advertisers. These men are supported by the unequalled technical and human resources of the A. C. Nielsen Company. The result is NSI... a local audience research service of unique value to subscribers.

Write for the whole story. Ask for the NSI Kit. You will receive sample NSI Reports for radio and tv, a map detailing NSI coverage, and other helpful local audience information. You will then see why leading agencies, advertisers, and stations consider NSI a "must" for efficient time buying and selling.

BROADCASTING, February 15, 1960
They announced that effective after the November elections, they will present a full hour of high-level programming weekly during evening network option time, 52 weeks a year. Once every third week affiliates will have a half-hour period to originate informational shows on a local basis.

Following the windup of its hearing to explore its program authority, FCC approved for transmission to Congress proposed legislation amending the U.S. Code to make criminal offenses of both offering or accepting payola and of broadcasts designed to deceive. The Commission also issued proposed rulemaking to cover both subjects in its own regulations and invited comments by March 1.

Both of the bills proposed by FCC are designed to reach persons other than licensees (i.e., disc jockeys, record firms, publishing houses and distributors on payola; producers, directors and independent performers on program deceptions). The bills would impose a fine of $5,000 or one-year imprisonment or both for each violation.

The FTC • Not the least of the effects of the quiz and payola scandals has been the injection of the Federal Trade Commission into the affairs of broadcasting. This agency, for 40 years the conservative guardian of truth in advertising, within a matter of months has become a major factor not only in broadcasting, but also in the whole advertising field.

The FTC jumped into the broadcasting picture in the fall of 1959. The leap was made by the FTC's new chairman, Earl W. Kintner.

At the NAB Fall Conference in Washington, he jolted the 300 broadcasters in attendance by telling them that if they didn't clean up the mess themselves, they were asking for more federal controls.

The sharpness of Mr. Kintner's tone might have resulted from his appearance before the Harris subcommittee the week before. He told the committee that the FTC had jurisdiction over false advertising but not over deceptive programming. One suggestion advanced (Mr. Kintner called it "far fetched") was that deceptive programming might be considered deceptive advertising since the sponsor held out the program as being truthful.

In Chicago the same month, October, Mr. Kintner warned broadcasters again. On Dec. 3 he and other commissioners met with the presidents of the radio and tv networks to press for self-regulation. At this session broadcasters learned the FTC was engaged in an intensive probe of payola.

Payola Actions • Soon after, FTC acted. Nine complaints were issued against two record makers, RCA and London, and seven distributors. Within two weeks RCA signed a consent decree. London Records admitted the practice, but contested charges of unfair trade practices.

Since then the FTC has issued 40 such complaints—mostly against record distributors in New York and Philadelphia. The names and affiliations of the disc jockeys who were the alleged recipients of payola have been furnished to the FCC.

The payola complaints, however, are only one facet of the FTC's activity. In 1956 FTC established a TV and Radio Monitoring Unit. This group, now headed by Charles A. Sweeney, specializes in scanning tv and to a lesser degree radio. The organization initially was small—three men and a couple of stenographers. Occasionally advertising was cited. But, as the cries of fraud mounted additional personnel were assigned and more specific targets were noted for this monitoring group.

Late last fall all FTC personnel were encouraged to report commercials which seemed off-base, whether they were monitoring on government time or at home on their own. The result was a spate of complaints which hit its peak early in January when four of advertising's biggest were charged with video hanky-panky.

The four: Lever Bros., Standard Brands, Alcoa and Colgate Palmolive. They were charged with fixing commercials so their products looked better or acted better than they really were.

Three steps to cleanliness • Moving to "purify" the atmosphere of broadcasting, FCC has conducted major hearings on its program authority, issued two-part questionnaire to all radio-tv stations on payola (practice and prevention) and said station replies will be considered in license renewals, new grants. L to r: Comrs. Frederick W. Ford, Robert E. Lee, Rosel H. Hyde, John C. Doerfer (chmn.), Robert T. Bartley, T.A.M. Craven, John S. Cross.

weeks an even more startling approach to responsibility has been implied. This is to make the medium as responsible as the advertiser and the agency for misleading advertising. The word was first broached by Chairman Kintner early this year. It was mentioned again by him in a tv interview Jan. 24. And it was reiterated by him in an exclusive interview late in January (BROADCASTING, Feb. 1). It reached its summit in Mr. Kintner's speech, Feb. 2, in New York before the Assn. of National Advertisers.

This is Mr. Kintner's position: The primary responsibility for advertising lies with the man who pays the bill. Next in line is the advertising agency, and, depending on circumstances, the account executive. At the bottom of the chain of responsibility is the medium—radio, tv, newspapers or periodicals.

Mr. Kintner feels that if the medium actually participates in the preparation of a misleading advertisement, it will be considered a party to the violation. Beyond this, Mr. Kintner feels that media have a moral responsibility to screen advertising—for claims, for deception and, above all, for taste.

The Congress • As the 86th Congress heads into the new year of the decade, many of its members may be said to have two overriding attitudes toward broadcasting: (1) a suspicion that tv and radio have overplayed their entertainment and advertising potentials at the expense of informational and cultural aspects; (2) a speculation that often amounts to hunger over the potency of the two media in bringing candidates' messages to the voters in an election year.

If Congress runs true to form, there will be little legislation affecting broadcasters that is enacted into law, though it's granted enough hue and cry on Capitol Hill can often gain the desired effect without a new law. This is already evident in the expanded activities of the FCC, FTC, NAB and its Tv Code Review Board, stations, networks and advertisers and agencies in sundry clean-up or crackdown campaigns.

Here is a rundown on activities in the first session and probable activities this session of the various Senate and House committees on matters affecting tv and radio broadcasting:

House Legislative Oversight Subcommittee • This nine-man offspring of the House Interstate & Foreign Commerce Committee, its muscles bulging with a $410,000 appropriation and a staff of more than 30 people, is attempting to cap its sensational hearing last fall into rigid tv quiz shows with an equally-headlined plunge into alleged payola practices involving broadcasters, the networks and the music recording and publishing industry (see news story this issue).

In the meantime, the House group on Feb. 7 released its interim report based on its tv quiz hearing and recommending legislation (see page 96).

Senate Interstate & Foreign Commerce Committee • Chairman Warren G. Magnuson (D-Wash.), who adopted a hands-off policy after the House Oversight Subcommittee first announced it would probe tv quiz shows, has centered his sights instead on alleged deceptions in tv and radio advertising, over-commercialization, generally and the lack of public service and other cultural programming.

The committee plans to get in its licks beginning Friday (Feb. 19) when it hears spokesmen from the FCC, FTC, NAB, NAB's Tv Code Review Board, the networks, American Assn. of Advertising Agencies and Assn. of National Advertisers in an "informal round-table conference."

Sen. Magnuson has described the NAB Tv Code as "ineffective" against deceptive and distasteful tv advertising; has charged FCC with laxity in failing to halt misleading advertising and over-commercialization; has criticized FCC for not prescribing minimum public service program standards for stations and for not using a heavier hand on networks; has hinted the FTC has not been doing as thorough a job as it should have against deceptive broadcast advertising.

Sen. Magnuson's committee last year pushed through the Senate a bill which would allocate up to $1 million to each state for education tv stations. The bill ($12) now is in the House. The Senate group also held hearings on and reported favorably on bills to place community antenna tv systems under FCC regulation and to legalize vhf boosters. The bill to legalize boosters ($1886), was passed by the Senate and pending before the House Communications & Transportation Subcommittee this year.

Senate Communications Subcommittee • This group, headed by Sen. John O. Pastore (D-R.I.), held a hearing earlier this month on tv allocations, of concern to the subcommittee and the parent Senate Commerce Committee for several years.

Sen. Pastore also has indicated he may act on a possible congressional study of the spectrum now that a similar subcommittee on the House side

Deception probe • Sen. Warren G. Magnuson (D-Wash.) this Friday begins his Senate Commerce Committee conference on deceptions in radio-tv. To attend: representatives of networks, NAB, FCC, FTC, AAAA and ANA.
With the Gates BC-1T 1000/250 watt transmitter, you efficiently reduce power to 250 watts nighttime operation by changing the primary voltage of the plate transformer. In this manner, when operating at reduced power of 250 watts, the primary power consumption is at a minimum, and the use of plate voltage dropping resistors, which are power consuming, is eliminated. The reduced plate voltage at 250 watts power to both the modulator and power amplifier tubes results in hundreds of added tube hours and a great savings in power cost.

The exclusive Gates feature of the inbuilt dummy antenna will also be appreciated by the engineer. With two-power operation at 1000 and 250 watts, initial alignment and periodic proof of performance required at two power levels is accomplished with utmost simplicity.

In summary, the BC-1T 1000/250 watt transmitter offers you the convenience of already having a one kilowatt transmitter installed—needling only to throw the switch for a change in power. Power change may also be remote controlled.

For complete technical information on the BC-1T 1000/250 watt transmitter, write today for Engineering Bulletin No. 109-D—yours for the asking.
has dropped such plans for the present.

The Pastore subcommittee last year initiated successful efforts to amend Sec. 315 on the Senate side and, after similar work by the House Commerce Committee, it was enacted into law. The communications group also shepherded several bills through the Senate, most of which would streamline FCC procedures, plus one that would prohibit FCC members from receiving honorariums. The House communications group has announced no plans for action on these.

The Senate Communications Subcommittee also held hearings during the congressional recess on community antenna tv systems, vhf boosters and tv broadcast stations in the same areas, mostly in western states.

**House Communications & Power Subcommittee**
- This unit headed by Rep. Oren Harris (D-Ark.) plans to hold sessions soon to hear testimony on two House bills which would prohibit improper influence on federal agencies, set up ethical standards for the agencies and prohibit *ex parte* presentations to them.

The group also is to hold a hearing on S 12 passed by the Senate to grant $52 million in federal subsidies to educational tv stations, but Chairman Harris has indicated that tours to various parts of the country to study etv are not yet complete.

No dates have been set nor plans announced for hearings on a large number of other House bills on various aspects of broadcasting and the FCC, nor on several bills passed by the Senate and pending before the House unit, one of which calls for legislation of vhf boosters. Rep. Harris also has indicated the subcommittee will not follow through on its plans, announced last year, to conduct a study of the spectrum. Rep. Harris said money appropriated for the study will be used by his Oversight Subcommittee because differences between government and non-government users of the spectrum have brought the proposed study to an impasse.

**House Interstate & Foreign Commerce Committee**
- This committee, also headed by Rep. Harris, apparently is going to refer all or most matters involving broadcasting to its two subcommittees (see foregoing) which Rep. Harris heads.

The committee last year held a hearing on the Sec. 315 amendment and helped secure House approval of the legislation. Chairman Harris also held several private sessions with FCC which resulted in the FCC's decision not to try to force "illegal" vhf boosters off the air.

**House Antitrust Subcommittee**
- Chairman Emanuel Celler (D-N.Y.) plans to hold a hearing in late March or April on a bill he introduced this session which would amend the Clayton Act to prohibit common ownership of a newspaper or magazine together with a "substantial" portion of tv or radio stations in "any section of the country."

The antitrust group also has scheduled a hearing Wednesday (Feb. 17) on measures to prevent bribery and conflict of interest among officials in government agencies or departments.

The antitrusts held three days of hearings last September on six bills which would exempt professional sports from the antitrust laws, with emphasis on the radio-tv provisions of the legislation. Rep. Celler indicated additional sessions would be held, but these have not been announced.

**Senate Antimonopoly Subcommittee**
- No plans this year for hearing legislation affecting tv and radio have been announced by this group, but Chairman Estes Kefauver (D-Tenn.) has said he will introduce a bill to impose a 75-mile tv blackout for professional football games in areas where college games are being played.

The Senate unit last year held hearings on sports legislation and reported favorably on a bill that would place professional sports (except baseball) under antitrust laws.

There also was talk last year that the group would probe into professional boxing, with emphasis on tv rights (CLOSURED CIRCUIT, Nov. 2).

**Senate Administrative Practices & Procedures Subcommittee**
- Headed by Sen. John Carroll (D-Colo.), this three-man group held hearings during the first session on bills to curb *ex parte* presentations to federal agencies. The bills have not been reported and no additional hearings have been announced.

**Special (Morse) Subcommittee of Senate Foreign Relations Committee**
- This group, headed by Sen. Wayne Morse (D-Ore.), held a hearing Jan. 25 on the 1950 North American Regional Broadcasting Agreement and the 1957 U.S.-Mexico treaty on use of broadcast frequencies. The parent group approved them and they now go to the floor for ratification, probably this week.

**Senate Commerce Committee's "Watchdog" Subcommittee**
- This group headed by Ralph Yarborough (D-Tex.), was formed by Sen. Magnuson last year following the Sec. 315 amendment. Sen. Magnuson said one of its duties will be to keep watch on possible broadcaster abuse of the discretion to present political candidates on certain types of news shows. No plans have been announced, though more may be heard as the election campaigns begin to wax hot later in the year.

**House Independent Offices Appropriations Subcommittee**
- Headed by Rep. Albert Thomas (D-Tex.), this group will hear FCC and FTC budget requests for more funds in fiscal 1961—$13.5 million total for FCC and $7.6 million for the FTC.

The FCC is asking an increase of $2.95 million over fiscal 1960—which includes $2.25 million for a special two-year study of uhf and $160,000 for an increased workload in broadcast activities. The FCC wants manpower increased by 62 people for a total of 1,427 employees.

The FTC is asking an increase of $800,000 with $160,000 of the new amount for increased surveillance of tv and radio advertising. The FTC budget earmarks a total $1.94 million for "investigation and litigation" of deceptive practices. Rep. Thomas' group traditionally receives testimony by the agencies in closed session.

**Senate Independent Offices & Appropriations Subcommittee**
- This unit, headed by Sen. Magnuson, who has jurisdiction over FCC and FTC as chairman of the Senate Commerce Committee, will hear the FCC and FTC in open sessions after the appropriations bill is acted upon by the House.

THE CASE FOR SELF REGULATION

In face of persistent attacks threatening government regulation, radio-tv leaders aggressively seek ways for broadcasting industry to solve its own problems

The broadcast industry—beset all around by many who think they know its ailments and by almost as many who think they know the cures—has its own ideas about what ought to be done, and is striving mightily to make them heard above the din.

With the taste of the tv quizzes, payola allegations and claims of deceptive and nauseous advertising bitter in their mouths, broadcasters and those who use tv and radio as advertising vehicles have brought their best brains to bear on the problem of fulfilling public interest obligations while continuing to make a profit.

Arriving at the answers to the problems of imposing stricter self regulation is made no easier by a nervous industry under the eyes of a Congress in high and often pious indignation, two federal agencies egged on by Congress and the White House, trigger-happy competing media on a field day of pot-shooting and a band of idealists whose ideas are largely remote from reality.

Against this climate, broadcasters, the networks, agencies and advertisers and their trade organizations all are moving forward—and some were moving long before the tv quiz scandals broke—toward self-disciplinary measures they hope will remove the threat of more government regulation of broadcast advertising and, far worse, programming.

Loose Screws • Progress is being made. The networks, from whose programs arose the quiz mess, have devised and are implementing new policies and practices they think will obviate the need for the government to step in. Stations and their trade associations have set about tightening up some screws that were loose. Agencies and advertisers, heretofore somewhat aloof from the growing government threats, have begun stirring.

Both CBS-Tv and NBC-TV, each in its own way, have handed down new operational policies designed to plug loopholes in programming and advertising. Both have explained their plans and hopes to the FCC, the FTC and Capitol Hill, as well as their convictions that the government should let the industry run itself. Both also have moved to accept and acknowledge program responsibility. ABC-TV is standing pat on its record, which up to now has been clean, but has put in appearances before the Washington groups.

NAB, as its latest move, has retreated from its 12-year-old position that stations should enjoy an untouchable status from the FCC in regard to programming and has proposed a new programming doctrine based on public responsibility and a new kind of report to the FCC. NAB's Tv Code Review Board has overhauled the Tv Code and the radio standards have been improved. A big drive is on for increased Tv Code subscriptionship and commercial and program monitoring is being expanded considerably.

The advertising agencies, some smarting under FTC actions and all watching Congress, are becoming more Washington-conscious, a state of affairs that their broadcaster associates have not fully begun to appreciate. Their trade organization has acted to assure more compliance with its "Copy Code." And while agencies have indicated some willingness to hear the case for leaving programming up to the networks and broadcasters, some have reacted with varying sensitivity toward such proposals. Their concern: the advertiser client. The advertiser's concern: identity with the program; choice of program as advertising vehicle, and an expected climate for his product based on the type of program. There was an implication that many advertisers would move to another medium rather than loose their hold.

Sponsor Identification • Assn. of National Advertisers has made the foregoing advertiser viewpoint abundantly clear in a statement to the FCC last month, taking the position that the nature of broadcasting is such that a sponsor must be identified with his program. But ANA took a more positive view of broadcast advertising itself at a Feb. 2 meeting, adopting plans to improve advertising and the climate surrounding it.

Television Bureau of Advertising, whose function is that of a salesman for the tv medium, has issued a statement warning that "cure-all" plans for tv could lead toward "thought control" and opining that regulation and censorship could run both advertising and the economy aground.

Image Builders • Radio Advertising Bureau has announced its plans to inaugurate a radio image-building campaign, both to meet the present crisis facing radio and to benefit the medium on a long-range basis. RAB sees danger in continuing negative images, doesn't think present radio advertisers have been influenced by the publicity, but feels potential advertisers may have shied away from radio.

Stations and Representatives Assns. feel that local station programs, particularly tv, will receive more critical attention in the future. SRA sees changes in the attitudes of consumers, both as to products being advertised and programs.

Television Information Office, formed last year to improve television's image, went to work after the tv quiz scandals by underwriting a nationwide survey which indicated the public had not lost faith in tv as a result of the scandals.

Specifically, here is what the foregoing groups are doing to meet the crises.

Networks: how CBS, NBC tighten reins

The time since the quiz-payola scandals late in 1959 has been one for soul searching and house cleaning for the tv networks.

The results, to the networks, have been far-reaching; to many network critics, they have yet to change substantially what is on the air.

If in some respects the changes seem superficial, it is perhaps because the networks themselves find so little wrong, while the pressures of governmental, press and other criticism have suggested wrongs that require drastic remedies. This perplexity among the networks was made most clear when Dr. Frank Stanton of CBS told the FCC last last month (in opposing governmental regulation of programming):

"I must in all candor tell you that I

BROADCAST ENGINEERS

A phasor designed with easily adjusted networks and conservatively rated components contributes greatly to the stability of a directional antenna array

By FRED DAMM
Collins Radio Company

The successful tune-up of a directional antenna array depends to a great extent upon how well the phasing equipment meets the requirements of the array. No two directional arrays are identical in all respects. Consequently, your phasing equipment must be designed and built for your specific directional array if it is to be successfully tuned up in a reasonable amount of time. The circuitry of Collins phasing equipment is designed to give sufficient latitude of adjustment to include all conceivable variations in tower base and mutual impedances, transmission lines and other variations encountered in the normal tune-up of an array.

Precise information on parameters, physical layout and over-all requirements of your directional array and transmitting plant must be obtained before your phasing equipment is designed and built. Your consultant's approval concerning circuitry, components and design is obtained before construction of the equipment begins.

Other factors are important, too, in the design and manufacture of Collins antenna phasing equipment. Only components with generous overload factors are used. Where the rating of a component, such as a capacitor, is questionable because of unknown factors which could result in higher currents or voltages than the design anticipates, the component is duplicated or its rating is increased.

Complete compliance with the requirements of your directional array, the close consideration of your consultant and chief engineer, adjustment latitude, components with generous ratings — all are necessary factors in the design and manufacture of Collins directional antenna phasing equipment.

Collins 81M 1 kw Phasor
The underdog • Least seriously criticized has been Leonard Goldenson’s ABC-TV, which had no big money quiz shows when scandals broke.

am not comfortable when I see where I have been driven. Surely, since it is the airwaves which are being used, since the impact of television is so large, since

Policy architect • Dr. Frank Stanton, CBS Inc. president, said everything on network would be “what it purports to be.”

its promise is still not yet fulfilled, the government ought to be able to do something about it... I wish there were some way out of this dilemma. But I have been able to find none.”

Changes Made • Which is not to say that the networks have not made changes. They have, each in varying degrees.

• The big-money quiz shows, whose transgressions started it all, have disappeared from the air. CBS-TV banned them altogether, taking the position that the temptations are too great to be overcome by even the most careful surveillance. NBC-TV, although dropping the offenders, left the door open to “rigproof” quizzes. ABC-TV had no big-money quizzes in the first place, so has not had that problem.

• Both CBS-TV and NBC-TV have established internal “standards and practices” units to study network operations, recommend improvements and safeguard and enforce their administration. Both networks have issued memoranda putting into effect some preliminary prohibitions and defining new policies.

• Acting on a suggestion by FCC Chairman John Doerfer, all three TV networks have entered into an agreement guaranteeing a minimum of public service programming in prime time and opening certain prime time periods for local public service programming by affiliates.

• The networks have established liaison with affiliates for showing the latter program product prior to airing and

Opposite view • While CBS-TV banned quiz shows, Robert Sarnoff and NBC-TV said they were legitimate entertainment if “rigproof.”

conceivably increasing their opportunity to reject programs they find unsuitable for local audiences. This move tends to share with affiliates more of the burden of responsibility for the overall schedule, another subject that has led to some criticism in the past.

• And, perhaps most important, the networks’ executive chieftains have spent much time just thinking about what the network’s role should be, and how best to achieve it. Even those who had been content with the networks’ track record in the past agree that this high-level concern about basics will accelerate future progress of the medium.

Area of Unanimity • Although the scandals necessitated a certain area of unanimity among the networks in agreeing that “something must be done,” the three have remained some distance apart in their approaches to the problem. Their individual philosophies seem to suggest these categories:

For CBS-TV, the tacit admission that many imperfections existed in network practices prior to the scandals, the determination to root all of them out, and the position that all aspects of both programming and sales philosophy must be re-examined and changed if necessary.

For NBC-TV, the “practical approach,” admitting that while there may have been certain areas of looseness in network operations, they were not basically unsound and could be remedied by tightened supervision. As NBC Chairman Robert Sarnoff put it: “We must challenge the hysteria which
has painted quiz show rigging as typical of the whole character of television."

For ABC-TV, the conviction that its present programming philosophies are in tune with its obligation to the mass audience, and that its emergence as a third network will increase both competition and the search for new program forms. Of the three networks, it has been touched the least by the scandals, first because it did not share blame for rigged quiz programming and perhaps because it still enjoys "underdog" status.

CBS-TV Most Dramatic • Among the three TV networks, CBS-TV's actions since the crisis have been the most dramatic and have attracted most public mention—and, sometimes, criticism. Dr. Frank Stanton, president of CBS Inc., has been both the principal spokesman and, to all appearances, the principal architect of these policies. For Dr. Stanton the role is not unusual, although it undoubtedly was amplified by the coincidental departure of former CBS-TV President Louis G. Cowan and the subsequent appointment of James T. Aubrey Jr. to that post.

Dr. Stanton made the first major gambit for CBS-TV in a speech in New Orleans last Oct. 16—even before Charles Van Doren purged himself before a Congressional committee in Washington. CBS-TV, Dr. Stanton said, would ban big-money quizzes and exercise increased control over all programming, even over shows produced by independent production companies. Later, he enunciated his now-established requirement that everything on CBS-TV would have to be "what it purports to be."

CBS-TV's ultimate stand in regard to canned laughter and applause was somewhat less severe than at first reported.

Joseph H. Ream was named to head CBS-TV's internal practices unit.

The Changes • To date, the following innovations have been instituted by CBS-TV:

1. Announcements must be made regarding any elements of contest or game shows which require prior rehearsal, or of any interview or discussion programs which similarly contain rehearsed elements.

2. Any pre-recording of program material must be announced as such.

3. Artificial laughter and applause must be announced as such, and must be subject to limitations of "good taste and moderation."

4. Free plugs have been prohibited. No product can be mentioned or used on a program unless "reasonable and natural" to the program. Prizes may not be identified by brand name, and will be paid for by the producer and

charged to the program budget.

5. CBS officers and employees are forbidden from either accepting or giving "anything of value" in connection with network or program operations.

6. The network will, insofar as practical, witness all demonstrations used in commercials or require affidavits attesting to the demonstration.

7. For serious dramatic shows, CBS-TV established itself as final arbiter of what would be treated and how it would be treated.

This strikes to the heart of one of TV's most controversial problems: It has been standard practice for an advertiser or his agency to dictate changes in a plot, or scrap it altogether, because of possible controversy or just plain difference of opinion. Under the new policy, (a) the advertiser may participate in creative activities and if his suggestion is constructive, it will be accepted, (b) the advertiser may object to a program, or an element thereof, if he believes it will be detrimental to his product or good will, (c) if the objection is well-grounded, the network will make corrections if it does not impair the program, but if this is not possible the original production will be telecast without obligation to the advertiser, and (d) if there are no grounds for the objection, CBS-TV will telecast the show and hold the advertiser to his commitment.

CBS-TV also has commissioned a nationwide public opinion study in an attempt to determine what the public wants from television. It is now in preliminary stages, and results are not expected before early summer.

In general the attitude of CBS-TV and Dr. Stanton seems to be that the scandals and investigations could turn out to be blessings in disguise. That is, they could provide the impetus for widespread improvement of certain things about which the broadcaster himself has been dissatisfied, but until now has not felt he could buck on his own. If they can be turned to an advantage, CBS-TV is determined to do so.

NBC-TV Differs Some - The "practical approach" of NBC-TV in its efforts at self-correction has been in most apparent when one of its actions dealt with a subject treated earlier by CBS-TV. Particularly in the two most-publicized instances - those relating to quiz shows themselves and to canned laughter or applause - NBC-TV has taken positions diametrically opposed to its rival.

Whereas CBS-TV banned quizzes categorically, NBC-TV defended them as legitimate entertainment concept requiring only rigid supervision to assure honesty. It has said it will accept "rigproof" quizzes should they appear on the scene.

And whereas CBS-TV held that canned laughter and applause must be identified as such when used in a program, NBC-TV defended their legitimacy as show business devices, requiring no announcement and stipulating only that they be done well if at all.

NBC-TV, too, set up a standards and practices unit. It operates under James A. Stabile, an attorney who was vice president and director of talent and program contract administration for the network before taking over the standards job. He has two principal lieutenants: Ernest Lee Jahncke Jr., director of standards, and John A. Cimperman, director of practices. Edward G. Smith was named west coast administrator for the department.

To date NBC-TV has issued these principal directives:

1. It forbade "kickbacks." This is the policy of paying performers scale on low-budget programs to meet union requirements, then accepting rebates from them. The incident came to light after the Clara Ward singers had complained they had to make kickbacks for appearances on the Today program.

2. It forbade payola.

3. It assumed as a network function the obtaining of prize merchandise for NBC-TV programs.

4. The network reaffirmed news policies, saying they were already in existence in fact but were being codified to avoid any dispute. In general these regarded such things as honesty, accuracy, objectivity and identification of opinion when merited and qualified.

5. The network advised program producers, within the network and in outside companies supplying NBC-TV programs, to exercise extreme discretion in regard to violent or objectionable aspects of children's programs, referring them to the NAB code requirements governing such programming.

Kintner's Blueprint - In general the network has relied on a definition of principle first laid down by President Robert E. Kintner in addressing network affiliates last fall. It had five points: (a) not to abdicate any program format, but to root out deceptive practices which might exist within them, (b) to continue to buy program product from all sources while programming a substantial part at NBC-TV itself, (c) to take complete responsibility for what goes on the air, (d) to push color television, and (e) to tell NBC-TV's story honestly and fully.

NBC-TV is sincerely convinced that the network generally has not been at fault, except for being "had" by producers of the rigged quiz shows. Like CBS-TV, it laid its program achievements in the area of public service and general entertainment on the line before Washington investigators without feel-
Here is a VHF high-band antenna that has inherently low VSWR and produces smoother patterns. The design, based on slot radiators, results in improved circularity. This new antenna is strongly resistant to high winds and offers better weather protection.

INHERENTLY LOW VSWR
The traveling wave nature of the feed results in a low VSWR along the antenna. This characteristic gives the antenna an inherently good input VSWR without compensating or matching devices. The input has been broad-banded to provide a smooth transition from the transmission line to the antenna.

EXCELLENT VERTICAL PATTERN
The null-less vertical pattern is extremely smooth. This provides uniform illumination of the desired service areas. Gains from 9 to 18 can be obtained.

IMPROVED CIRCULARITY
The individual patterns produced by slot radiators when added in phase quadrature result in an overall pattern with improved circularity. This design combines radiating elements, feed system and antenna structure in one unit, giving excellent horizontal circularity.

LOW WIND RESISTANCE
The smooth cylindrical shape of the antenna is ideal for reducing wind load and has high structural strength. It is designed to withstand a wind pressure of 50 psf on flats, or 33% on cylindrical surfaces. In addition, the absence of protruding elements minimizes the danger of ice damage.

The steel outer conductor is hot-dip galvanized for better conductivity and protection. The inner conductor of the antenna is rigidly supported at the bottom end without relying on any insulator type of support to carry the dead weight. Polyethylene slot covers are fastened to the pole over every slot for better weather protection.

SIMPLIFIED FEED SYSTEM
The feed system is completely self-contained with only one point of connection. Simplified feed system consists of a large coax line and coupling probes.

Your RCA Broadcast Representative will gladly help with TV antenna planning. See him for details on this new antenna. Or write to RCA, Dept. DC-22, Building 15-1, Camden, N. J.

In Canada: RCA VICTOR Company Limited, Montreal.
ing the need to apologize.

Unlike the other two networks, ABC-TV has not felt the need to establish new standards units or to issue extensive new policies to correct prior programming practices. Its principal embarrassment came in regard to payola charges against the Dick Clark program, and aside from requiring Mr. Clark to divest himself of certain recording interests ABC-TV has not been involved publicly to a large measure.

Admittedly, as a still-growing third network, ABC has not mustered the extensive public service record the other two have compiled. ABC-TV has been the leading exponent of many of the program forms that have been most criticized—westerns, private eye and other adventure programming—yet it has been the other two networks (who adopted these programming forms in order to compete with ABC-TV's unquestioned success with them) who have borne the brunt of official disquiet about them.

ABC-TV has increased its public service programming in recent months, and indicates still further plans to progress in that area as circumstances and resources permit. It has left to its existing continuity acceptance department the job of policing both program and commercial material.

NAB, Code Board: altered attitude on controls

NAB's Jan. 26 action modifying its position on its 12-year-old stand holding the FCC should keep out of programming is the latest important move taken by organized broadcasting as a result of the TV disclosures last fall.

President Harold E. Fellows, testifying at FCC's hearing, announced NAB's retreat from its "hands off" programming enunciation in 1947 and proposed a new "test of public responsibility" doctrine for FCC in evaluating a station's service—past, present or proposed. He also suggested for license renewal a basic memorandum by the station instead of the present program percentage statistical form required by the FCC.

The new FCC position was the result of a special meeting of the NAB's Joint Board Dec. 4 at which Mr. Fellows was instructed to name a task force of six directors and six NAB staffers to prepare NAB's presentation to the FCC. The board issued a statement deploring unethical practices by a few in the industry who have brought shame on all and pledged cooperation with the FCC and FTC so broadcasting's contributions to the public "can be properly evaluated."

TV Code Overhaul • NAB's most extensive overhauling was made in connection with its TV Code, administered by the TV Code Review Board, and the Good Standards of Practice for Radio Broadcasters.

The number of station subscribers to the TV Code now is 378, a record high. There also is a sharp increase in subscribers to the radio standards, to 1,190 stations on Jan. 20. The NAB Radio Board has given informal approval to a proposal that non-members be allowed to subscribe to the standards and formal action is set for the board's meeting in March.

New TV Code provisions against rigged quiz programs, payola and other deceptive practices have been approved.
Every housewife sees big trucks unloading supplies from everywhere at her favorite shopping center... truckline names telling of far-off places contributing to her family's good living. She sees gasoline trucks, moving vans, dairy trucks, utility trucks—yes, and auto haulaway trucks delivering that dream car of hers... Use trucks? They're Mrs. America's supply line, and she knows she couldn't get along without 'em.

AMERICAN TRUCKING INDUSTRY
American Trucking Associations, Inc., Washington 6, D. C.

THE WHEELS THAT GO EVERYWHERE
film commercials. The Code Board staff will seek to include language in both agency and advertiser contracts for TV commercials which will state that the commercials were produced in compliance with the TV Code.

The Review Board, NAB announces, "is considering every possible means of making the Seal and Code subscription by a station a more important factor in the public's mind, and therefore a more important asset to a station—one that it would be most unhappy to lose."

Wants Copies • The Code Board is asking the White House, FCC and FTC to supply it with all copies of complaints received from viewers so the board may act on them.

In radio, provisions against payola and other deceptive practices not previously covered have been adopted for the Standards of Good Practice for Radio Broadcasters. The NAB Radio Board is to act on a proposal requesting more personnel for enforcement of the standards, which now are applied under an honor system.

Among the agencies: disagreement on program role

It appeared inevitable even during the last year that major advertising agencies soon would be caught in the wave of criticism that was sweeping the broadcast industry.

As expressed by Frederic R. Gamble, president of the American Assn. of Advertising Agencies, last October: Although the TV quiz scandals involved agencies, producers and directors rather than advertising, no doubt advertisers will share in some of the disgrace. Mr. Gamble called attention to a need for "ever higher standards of morality in advertising."

The AAAA promises to deal more sternly with agencies violating its copy code, promulgated in 1937. Last month the association issued a new guide for agencies, an "Interpretation of the AAAA Copy Code with Respect to Television Commercials" (Broadcasting, Jan. 25), and a new section provides that unless an offending agency provides a satisfactory answer within 30 days, the agency may be asked to resign from the association or, if necessary, steps may be taken to annul the agency's membership.

Already there had been rumbles. NAB gave warning in August of 1959 of "objectionable advertising" in personal products and served notice it would move to initiate a clean-up through its TV Code Review Board. NAB last November also brought up the question of authenticity of TV commercials. The TV code review board, it was said, was probing charges that some TV commercials were faked.

During these months—a period in which rigging of quiz programs and reports of payola made the headlines—agencies were adopting a "wait-and-see" attitude. For the record, they spoke out in favor of the broadcast industry cleaning its own house. Agencies, they said, were not involved.

Program Control • In the meantime, aroused by phony quizzes an anti-advertising sentiment mounted. Coty Cosmetics' president, Philip Cortney, took to the public platform in support of disvesting advertisers of all control or influence over programming. Former agencyman Rep. Chester Bowles (D-Conn.), in a speech before broadcast advertising executives in New York, joined the refrain that advertisers ought to stick with commercials.

But the commercials themselves were coming under direct attack. The Federal Trade Commission expanded its TV monitoring, promising a stepped-up campaign against deception in TV commercials. Then the FTC cited General Motors and Libbey-Owens-Ford Glass Co. for alleged misrepresentation in an auto windshield commercial.

From FTC came dicta. The governmental agency warned it would crack down on "advertising excesses that dance on the edge of the law"; broadcasters were told they ought to reject illegal advertising and screen out commercials which "exaggerate, irritate and nauseate."

The advertiser was under the gun. Renewed inquiry was being made in the offices of network brass, in publications and through public forums on these questions: Just how does the agency and its client fit into TV programming? Do they influence programming, perhaps control it, and if they do either, why are they in it?

No Voice Wanted • For the advertising agency, there is a dilemma. Most agency executives say they don't want a voice in programming. They would rather be out of it. But in some cases they would put themselves in an awkward position, perhaps jeopardizing accounts, should they suggest program dissociation to clients. Divorce, it was implied, would mean a walkout for some advertisers, a reduction in TV use for others.

This was clear at the Assn. of National Advertisers' convention in mid-November at Hot Springs, Va. Top advertisers indicated they would have to be forced out of program selection and presentation, and if they were, it would mean a financial loss to broadcasters through price or commensurate concessions.

The agency voice—silent or softened up to this point—was being heard. In New York during the week of the ANA convention, McCann-Erickson's Mr. Harper parried barbs thrown at TV and said it was proper for broadcasters to hold the reins. But, he warned, advertisers and their agencies must exert strong influence in viewer selection; must keep up with—and ahead of—audience tastes, and help networks provide more choices in programming.

Executives Speak • Mr. Harper's top broadcast executive at the agency, C. Terence Cline, a week later worked over the theme before a radio-TV audience in New York. TV advertisers ought to continue to have a strong voice in the programs sponsored, he said, and commercials in bad taste or deceptive should be dumped off the airways. Thomas D'Arcy Brophy, retired chairman of Kenyon & Eckhardt, called for a code of ethics and self-policing, while agitation continued for stronger TV codes. Sigurd Larmon of Young & Rubicam sought a meeting of minds of all three TV networks on corrective measures.

By early winter the advertising self-appraisal had sharpened. ANA members, it was reported, were reviewing commercials and several advertisers were giving closer supervision to their TV advertising.

This was the climate as 1960 brought a fresh year and fresh complaints from FTC against alleged false and misleading advertising. Deception, deceit, fraudulent and phony were the de-
General Electronic Laboratories, Inc. Y.—Field offices coast to coast.
Advertisers: ANA plans bootstrap lift

In 1960, ANA's blueprint seems fairly clear: it will advance vigorously the viewpoint of its membership that advertisers should not be barred from participating in the selection and participation of TV programs they will sponsor; but on the other hand, the association promises to push hard to persuade members to underwrite advertising that meets "high standards of public acceptability."

The ANA adopted on Feb 2 a three-point program of action to (1) achieve better understanding and better working relationships between national advertisers and the FTC; (2) to establish continuing liaison machinery between national advertisers and the various organizations or individuals and entities in agency and media ranks, who have or may initiate self-regulatory procedures and (3) to establish an Advertising Advisory Council of individuals with high professional advertising attainments to serve in a consultative and advisory capacity on both broad and specific issues relating to taste and propriety in advertising. They would be empowered to take such initiative as they deem necessary or desirable in the area of taste and propriety to help assure the credibility of advertising.

Told to FCC • The ANA made a forthright statement on its position in both the programming and commercial spheres before the FCC last month (Broadcasting, Jan. 11). Peter W. Allport, vice president of ANA, conceded, in the first instance, that advertisers do not maintain the same "censorship" right over the contents of newspapers or magazines carried in advertising of ANA member. But he asserted this is not comparable to programming participation on TV, because the sponsor, in most cases, must be closely identified with the program. With respect to advertising content, Mr. Allport insisted that most ANA member companies have "an absolute requirement" that advertising be acceptable to the public, but he acknowledged that "most" or "nearly all" is not enough. He said ANA is taking "vigorous steps" to guide its membership to the end that the advertising will fully meet high standards of public acceptability.

In late November, the FTC conveyed some thoughts on this to the ANA which promptly reported to its members. In brief, the FTC is not con-
A leading TV film producer uses Greyhound Package Express to circulate a weekly TV film to local stations. Making enough prints to go around would be too costly. Greyhound "gets the show on the road" right on schedule and at the least cost.

When getting it there in a hurry means business, you can count on Greyhound Package Express! Your packages go anywhere Greyhound goes, by dependable Greyhound buses on their regular runs. That means you get service seven days a week...24 hours a day...weekends and holidays! And you can send C.O.D., Collect, Prepaid—or open a charge account. For information, call any Greyhound bus station, or write Dept. 8B, 140 South Dearborn St., Chicago 3, Ill.
cerned with artifice which is incidental and used to heighten effects for production purposes. On the other hand, there is theatrical artifice which represents "material deception" as to what a product is made of, does or looks like. But when further definition is made, the picture becomes fuzzy, ANA cautioning that FTC is going along "case-by-case" and that general "formulae" cannot be relied upon "indiscriminately." FTC's chief interest:

Where advertising on TV gets into competitive claims and tests or other supposed proofs of claims.

There's been admission by McCann-Erickson that it is policing the advertising it creates. The No. 2 broadcast billing agency has appointed a top executive (Frank White) to oversee this area.

One agency in the top 10 which cannot be identified has acknowledged privately it is taking a careful second look at all commercials to ensure no misrepresentation in copy or picture.

Ad Council: an underscoring of the good

The Advertising Council is minding its own business, which is to coordinate volunteer public service work by advertisers, agencies and media. At the same time, it is doing what it can to accentuate the positive at a time when the negative is making all the news.

Council President Theodore S. Repplier, at the request of his directors, told the FCC about the broadcaster-advertiser record of public service in a statement filed during the FCC hearing. He made the same presentation in person at the annual Washington conference of Advertising Federation of America Feb. 5 (Broadcasting, Feb. 8).

Council campaigns last year came in for more than 18 billion radio and television home impressions in commercial network time periods alone, he said. Although the price tag is hard to estimate, the council figures time and talent contributed by networks and their advertisers to the 14 major council projects alone would amount to nearly $100 million. This does not take into account "the vast additional contribution of individual radio and television stations and local advertisers" to the 14 major campaigns and 65 others, including some in cooperation with the government.

"Support of the council's public service activity has become so accepted a part of broadcasting that the general public does not stop to think of the vast quantity of valuable time, work and talent contributed free by the networks, stations, sponsors, advertising agencies and performers," Mr. Repplier said.

AFA: plumbs for realistic self-appraisal

Delegates to ANA's second annual Washington conference Feb. 5 found to some consternation that the nearer to the seat of government, the more undiluted governmental strong medicine sometimes can be.

They heard FCC Chairman John C. Doerfer propose that the broadcaster and advertiser submit programs and commercials for preview before airing them to earn the TV Code seal. The alternative, suggested Comr. Doerfer, might be an "inflexible rule or law" (Broadcasting, Feb. 8).

Other highlights during the annual AFA meeting included a proposal for advertising self-regulation, advanced by James S. Fish of General Mills and AFA board chairman; a call for a realistic facing-up to the consequences to advertising brought on by quiz and payola revelations, issued by John J. Ryan, AFA counsel; a summary of broadcasting-advertising public service by Advertising Council President Theodore S. Repplier; an evaluation of advertising's role in the economy by Walter A. Edwards, Deputy Assistant Secretary of Commerce, and a report that cigarette advertisers are following the Federal Trade Commission's suggestion that they stop using advertising claims about effectiveness of filters and health benefits resulting from use of filters, made by FTC Chairman Earl W. Kintner.

Old Hand - AFA considers that it has been campaigning for truth and good taste in advertising since its first "Truth in Advertising Crusade" in 1911 — opinions of some critics to the contrary.

Theoretically the crusade has never lapsed, but inevitably it is forgotten from time to time. Implementation is up to more than 130 AFA member clubs, which maintain ethics committees. In effect, much of the burden of the crusade is carried by Better Business Bureaus, an outgrowth of the 1911 offensive. Lately there have been calls for a new AFA "truth" offensive by Fairfax Cone, executive committee chairman of Foote, Cone & Belding, by Thomas D'Arcy Brophy, retired chairman of Kenyon & Eckhardt, and other key figures.

AFA counsel Morton J. Simon in testimony before the FCC voiced the federation's fear of any new ad regulation and begged everyone not to push the panic button. He also reminded Washington that the AFA was the Federal Trade Commission's "No. 1 sponsor" before it was created and has supported it ever since.

TIO: finds little public antipathy

Television Information Office, which came into being just before the scandals broke, registered its biggest achievement to date by underwriting a study by the Elmo Roper & Assoc. research organization dealing with the public's attitude toward TV after the scandals. Most people were found to feel that television was still doing an excellent or good job (Broadcasting, Dec. 21, 1959).

Mr. Roper had this to say in reporting his findings to the FCC:

"It seems to me that in view of the tremendous amount of newspaper space which has been devoted to the abuses of public confidence which have been revealed, the public has taken a pretty sane position. They are properly critical of abuses, but they have not lost confidence in the medium as a whole ..."

The position of TIO and its director, Louis Hausman, repeatedly has been that in the face of the crisis television should own up to whatever mistakes it has made and make clear that they have been corrected and will not be repeated.

To keep them informed of what people are saying about television — and what the facts are, when studies are made — TIO sends mailings to broadcasters every two or three weeks containing clippings, copies of editorials, statements, research and similar material.

There also are special mailings, such as one going out last week consisting of a reprint of Mr. Roper's testimony before the FCC, extracts from the questions and answers, and material that had not been fully compiled when Mr. Roper testified. The latter mailing went to congressional authorities, opinion leaders, news media, etc., in addition to broadcasters.

Similarly, copies of a study by Dr. Paul Wittig of Northwestern U., dealing with the effect of television on school children of the Chicago area, is slated to go out shortly to broadcasters.
SUCCESS OF "RADIANT RADIO KHJ", LOS ANGELES IS CREDITED IN GREAT PART TO FAST, EFFICIENT OPERATION OF MACKENZIE ELECTRONICS AUTOMATIC AUDIO FIVE-CHANNEL REPEATERS • Frequency 930 kilocycles, Los Angeles is "Radiant Radio KHJ" • And "Radiant Radio KHJ" features a new format...a format of fast, extra-fast news, music, and information put into effect when KHJ changed over from being a key network station to completely independent operation. The change was highly successful...made so by careful pre-planning, by careful rehearsal before format change, and by the use of newly-developed instant cuing, and instant-playing, tape machines manufactured by MacKenzie Electronics, Inc. • Mr. A. J. La Frano, vice-president and program director says..."Our programming, now made up of much smaller segments than before, had to appeal to and hold our listeners. It had to be tight, bright, and fast. In the success we have had we owe a great deal to the program repeaters manufactured by MacKenzie Electronics. They prevent missed cues, fluffs, and retakes. They save us time and save us money, and have been of tremendous help in smoothing out our operation!"

"IT HAD TO WORK!" Says A. J. La Frano Program Director, KHJ-Los Angeles

Model SCPB Five-Channel Selective Program Repeater. Delivered as illustrated, mounted on a standard relay rack panel (8 1/2" high), complete with self contained power supply. Included with each machine are five magazines and accessories. Price $1,250 F.O.B. Los Angeles. Leasing available. Demonstration upon request.

Gentlemen,

☐ Please send me literature describing Model SCPB Repeaters.
☐ I am attaching my company calling card. Please send typical "Air Check" tape of KHJ Los Angeles operation.

BROADCASTING, February 15, 1960
A BIG TEST FOR AN UNTRIED LAW

Here's how new rules will affect political broadcasting in 1960

Next November the U.S. presidency, vice presidency, 33 seats in the U.S. Senate and all 437 seats in the House will be up for grabs. So will 27 state governors' jobs and thousands of assorted offices in state, county, municipal and local governments. Except in some southern communities, there will be at least two candidates for almost every office.

At various times between now and the final elections primaries will be held. The candidates in these will out-number the candidates next November.

For broadcasters it used to be possible to count the headaches they could anticipate in a political year by adding up the number of candidates in primary and final elections. This year the formula is neither that simple, nor of that magnitude. Two important changes in the government's political broadcasting rules in 1959 have considerably lessened the number of problems that broadcasting will face in covering the 1960 campaign.

The Court • In June 1959 the U.S. Supreme Court eliminated the libel danger that had historically troubled broadcasters. The court decided that because broadcasters are forbidden by the political broadcasting law to censor anything a candidate says, they are therefore immune from libel actions that may follow.

The Congress • In September 1959 the Congress adopted and the President signed an amendment excluding newscasts, news interviews, news documentaries and on-the-spot coverage of news events from the equal time provisions of the political broadcasting law. This was the first relaxation of government control over political broadcasting in 32 years. It relieved broadcasters from the need to give equal news coverage to important candidates and to splinter party representatives whose chances at the polls were nil.

If the Congress had stopped there, broadcasters could plan for the 1960 campaigns under an infinitely easier set of rules than they had in the past. But the amendment also added a new phrase to Sec. 315 after stating the new exemptions.

"Nothing in the foregoing," said the amendment, "shall be construed as relieving broadcasters, in connection with the presentation of newscasts, news interviews, news documentaries and on-the-spot coverage of news events, from the obligation imposed upon them under this Act to operate in the public interest and to afford reasonable opportunity for the discussion of conflicting views on issues of public importance."

It is this sentence that raises new questions in the coverage of political news. So far the FCC has issued no official interpretation. FCC Chairman John C. Doerfer has said it is doubtful that an interpretation will be made until the Commission has had a chance to sort out actual cases.

In a speech just last month, Mr. Doerfer said the FCC expects "some difficulties" with this subsection of the law. He said it would be difficult to ascertain what issues are of "public importance" and to assay "conflicting views." "Only a case-by-case approach

How to cover political candidates this year

Here is the text of Sec. 315, the political broadcasting section of the Communications Act, as now written. The amendment of 1959 appears in italics. The only other amendment ever adopted since the political broadcasting law was first incorporated in the Federal Radio Act of 1927 was Sec. 315 (b) which prohibited stations from charging candidates more than they would charge regular customers. That subsection was adopted in 1952.

"Sec. 315 (a) If any licensee shall permit any person who is a legally qualified candidate for any public office to use a broadcasting station, he shall afford equal opportunity to all other such candidates for that office in the use of such broadcasting station: Provided, that such licensee shall have no power of censorship over the material broadcast under the provisions of this section. No obligation is hereby imposed upon any licensee to allow the use of its station by any such candidate.

"Appearance by a legally qualified candidate on any—

(1) bona fide newcast,
(2) bona fide news interview,
(3) bona fide documentary (if the appearance of the candidate is incidental to the presentation of the subject or subjects covered by the news documentary), or
(4) on-the-spot coverage of bona fide news events (including but not limited to political conventions and activities incidental thereto), shall not be deemed to be use of a broadcasting station within the meaning of this subsection. Nothing in the foregoing sentence shall be construed as relieving broadcasters, in connection with the presentation of newscasts, news interviews, news documentaries, and on-the-spot coverage of news events, from the obligation imposed upon them under this Act to operate in the public interest and to afford reasonable opportunity for the discussion of conflicting views on issues of public importance.

(b) The charges made for the use of any broadcasting station for any of the purposes set forth in this section shall not exceed the charges made for comparable use of such station for other purposes.

(c) The Commission shall prescribe appropriate rules and regulations to carry out the provisions of this section."

Added Provisions • In addition to the amendment of Sec. 315 (in italics above), the Congress simultaneously adopted the following language as Sec. 2 of Public Law 86-274. Sec. 1 of that law was the amendment to Sec. 315 of the Communications Act. Here is the second part of the Congressional action:

"Sec. 2. (a) The Congress declares its intention to reexamine from a time to time the amendment to section 315(a) of the Communications Act of 1934 made by the first section of this Act, to ascertain whether such amendment has proved to be effective and practicable.

(b) To assist the Congress in making its reexaminations of such amendment, the Federal Communications Commission shall include in each annual report it makes to Congress a statement setting forth (1) the information and data used by it in determining questions arising from or connected with such amendment, and (2) such recommendations as it deems necessary in the public interest."
over a period of time will develop a law which can give the broadcaster any reliable guides," the chairman said.

How It Began • Lar Daly, Chicago's perennial political candidate, caused the review of Sec. 315 when he demanded—and got through a 4-3 FCC decision—equal time from Chicago stations which had shown Mr. Daly's opponent for mayor of that city on regular newscasts. The Commission ruling that the word "use," as written in Sec. 315, meant exposure to the public on broadcast stations in any way was handed down three days short of one year ago (Broadcasting, Feb. 23, 1959).

There followed immediate damnation of the FCC ruling, even from the President of the U.S. who described its effect as "ridiculous." Riding a wave of bipartisan demands for a reversal of the Commission, 15 bills were introduced in Congress. They varied in what they would accomplish, from simply exempting newscasts from equal time demands on the one extreme to the "Fair Political Broadcasting Law of 1959" on the other. The latter bill, introduced by Sen. Vance Hartke (D-Ind.), not only exempted all types of news shows, but also defined a qualified candidate and specified that broadcasters were not responsible for libelous statements made by candidates.

Congressional Debates • Both houses held hearings on the various measures and both sides of Congress passed their own versions of Sec. 315 amendments. A majority of broadcasters testifying said that nothing short of outright repeal would be satisfactory in the long run and that only the Hartke bill would provide sufficient protection for adequate coverage of the 1960 elections.

Major contention during congressional debate was whether newsmagazine panels and documentaries should be exempted. The original House bill had the proviso attached that a candidate's appearance had to be "incidental" to the presentation of the news, which its advocates claimed, would have excluded such shows.

In a lengthy and often heated joint conference to settle the differences in
the two bills, the words “incidental thereto” were kicked out of the final version. (The exchange reportedly got so out of hand at one point during the secret meeting that Sen. John Pastore [D. R.I.], chairman, ordered House members to sit down and not speak until given permission to do so.)

The conference report spelled out that news interview shows such as Face the Nation and Meet the Press would be free from demands for equal time. This led Rep. John Moss (D-Calif.) to refuse to sign the report (“I buy none of it,” he said) and to lead an unsuccessful fight to defeat the conference bill when it came up for final passage (it carried on a 142-70 standing vote, Broadcasting, Sept. 7).

Watchful Eye • What of the other provisions of Public Law 86-274? In the second part of it Congress warned that it will “re-examine from time to time the amendment . . . to ascertain whether such amendment has proved to be effective and practicable.” To do this, Chairman Warren Magnuson (D-Wash.) of the Senate Commerce Committee has appointed a special three-man “watchdog” subcommittee. (See box on scheduled investigations, page 94.)

The Congress also ordered the FCC to report annually on how it settles disputes arising from the new version of Sec. 315 and to make “such recommendations as it deems necessary in the public interest.”

Sleeping Watchdog • To date, the Senate’s watchdog subcommittee has taken no official actions nor has it received an official complaint. According to Sen. Magnuson, the subcommittee was formed to “insure freedom, fairness and impartiality in the treatment of news by media operating under government license.” It is headed by Sen. Ralph Yarborough (D-Texas) with Sens. Gale McGee (D-Wyo) and Hugh Scott (R-Pa.) as members. As of two weeks ago, the committee still had not scheduled its first meeting of the new year.

Sen. Yarborough said his subcommittee was appointed because of “… a general uneasiness among many senators concerning the fairness and objectivity of news communications.” Although no one as yet has successfully defined a broadcaster’s public service obligations, Sen. Yarborough said the subcommittee would make sure such obligations are fulfilled.

Sen. Scott has taken a dim view of the subcommittee’s true purpose. “Since 1960 is an election year and the Democrats in control of Congress were the ones who dreamed up this watchdog, I have a feeling . . . that the Democrats feel it is only fair that since they have a two-to-one majority in Congress they are entitled to two-to-one coverage in..."
the news. . . I will probably have to be a watchdog of the watchdogs," Sen. Scott said.

Broadcasters' Reservations • How do broadcasters feel about the new law? Comment to date has been one of "thanks" to Congress for giving them the necessary freedom in news reporting to cover political campaigns. Immediately after the bill cleared Congress, CBS Inc. President Frank Stanton wired all network affiliates: " . . . The bill represents a significant step forward in permitting radio and tv to . . . more fully use their special tools in informing the public in the democratic processes. . . ."

Sig Mickelson, president of CBS News, said that he did not anticipate any major problems on the national level. He said the network's normal "fairness in balance" policy would guard against any violations of the "reasonable opportunity" provision. It was Mr. Mickelson's network which canceled a scheduled appearance of Sen. Hubert Humphrey (D-Minn.) during the equal time debates in Congress because of the senator's possible candidacy for the White House. Under the present Sec. 315, Sen. Humphrey could have appeared without any fear by the network of demands for equal time. And, during the upcoming Presidential campaign, the major networks will have no reservations in putting the major candidates on interview shows.

The new law will make network coverage of news events an easier task, predicted William R. McAndrew, vice president of NBC News. "It will help relieve us of the indecision which has plagued us in the past. It will prevent the 'circus performances' that hampered us . . ." while creating no new problems for the network, he said.

Important to Politicians • "Tv has rapidly become the most important medium in assuring the office seeker's success at the polls—and politicians have been quick to recognize this fact. "Personal attributes played a far greater part than policy statements in developing a public image of the candidates in the last two Presidential elections," according to U. of Michigan research.

Despite Adlai Stevenson's concentration on foreign issues, the public was largely unaware of his positions in either 1952 or 1956, according to a book, The American Voter, to be published by the university in May.

Politicians have recognized that there is no force that can approach tv in exposing a candidate's "personal attributes," upon which voters base their choice. Another concrete example of this can be found in a study by Cunningham & Walsh of tv's impact on the voter. It disclosed that during the 1958 race for governor of New York, voters definitely favored Nelson Rockefeller over incumbent Averell Harriman because of tv.

Libel Cleared • The entire broadcast industry hailed a 5-4 decision by the U.S. Supreme Court last summer that a station could not be held liable for defamatory statements made on the air by a candidate. The case in question was a $150,000 libel suit filed by the Farmers Union against WDAY-TV Fargo, N.D., and senatorial candidate A.C. Townley.

Mr. Townley, in a broadcast during the 1958 election, charged that the farm group was tainted with communists. The decision by the U.S. Supreme Court upheld a ruling by the North Dakota Supreme Court.

The majority ruled that by "no censorship," Congress meant just that and Sec. 315 must confer immunity from libel otherwise it would "sanction the unconscionable result of permitting civil and perhaps criminal liability to be imposed for the very conduct the statute demands of the licensee."

The opinion, written by Associate Justice Hugo Black, said the FCC has consistently held that a station is not liable and that " . . . with full knowledge of the Commission's interpretation, Congress has since made significant additions to that section without amending it to depart from the Commission's views."

Expressing the views of the four dissenters, Associate Justice Felix Frankfurter questioned the position that the Commission has consistently held that a station is not liable for a candidate's statements. The FCC has never strongly maintained such a principle of immunity or held a public proceeding to determine the point, he said. He also said that Congress, although asked to do so several times, has never specifically spelled out immunity for broadcasters.

Legislation Still Needed • Despite the WDAY-TV decision, there still is a feeling among some that express immunity via legislation is needed. This faction points to the narrow (5-4) majority. Sen. Vance Hartke (D-Ind.), for instance, still wants Congress to pass such legislation, which was a provision of his "Fair Political Broadcasting Act of 1959.""

Notwithstanding, the two new guides for radio and tv in 1960, a statement made in this magazine over eight years ago still holds true. In a November 1951 article describing the legal implications of airing political speeches, BROADCASTING stated:

"There's no sure way for broadcasters to play politics without risking their necks, but they can keep their necks from getting out so far as to invite decapitation by studying up on the history and the rules of the game."
HAVE SCANDALS CUT THE AUDIENCE?

Nielsen finds inconsequential drop in television viewing...

Despite all the publicity about scandals in television, there's little evidence of a drop-off in viewing.

Latest Nielsen figures indicate a 3-4% decline in night-time watching, primarily on the West Coast where CBS-TV recently changed its pattern of repeats.

Otherwise there's been no evidence of decline—and no sign of any fall-off in radio listening.

Nielsen measures radio differently, but the data that is available indicates no different audience trends after the scandals developed as compared to those before.

Viewing. In television, though preliminary December figures indicated a slight drop-off, Nielsen reports for November had shown that, at the height of the trouble, the average tv home watched television for 5 hours 25 minutes a day. This was two minutes more than in November 1958 and 22 minutes more than in October 1959, just before the brunt of the storm struck.

The 22-minute gain between the October and November measurements is not regarded as particularly significant, mainly because viewing traditionally rises from month to month, starting in September, reaching its peak in January-February. Thus November viewing is normally higher than October, and December is higher than November. For example, in 1958 the total of 4 hours 58 minutes in October rose to 5 hours 23 minutes in November. (See Table 1.)

Similar evidences of normalcy are found in an examination of the number of homes using television. In all three day periods—morning, afternoon, evening—Nielsen found that gains comparable to those recorded a year ago were run up in the two-week measurement period in late October and early November 1959 as compared to the one made a month earlier. And in each daypart, 1959 was higher than 1958. (See Table 2.)

Although the crisis could hardly be said to have any bearing either way, because it broke so late in the year, the

... But Sindlinger sees adult audience decline

A drop of 43 minutes per day in television viewing of the over-12-years-old audience during the last quarter of 1959, compared with the similar quarter of 1958, is reported by Sindlinger & Co., Philadelphia. The drop occurred even though some 2.5 million more Americans in that age group were in the tv audience last year.

Sindlinger's reckonings: In the fourth quarter of 1958 an average of 90,734,000 watched tv every day for 3 hours and 3 minutes; in the fourth quarter of 1959, an average of 93,257,000 watched tv every day for 2 hours and 20 minutes. The average week's viewing total was 1,925.9 million hours in 1958; it was 1,525.3 million hours in 1959.

These findings, researchers felt, do not necessarily conflict with those of the A. C. Nielsen Co. (above), which themselves showed a drop-off of 3 to 4% in nighttime viewing. It was noted, for example, that Nielsen is talking in terms of homes while Sindlinger is speaking of individuals—and only individuals over 12 years of age. Sindlinger figures, too, measured the entire day, whereas Nielsen is speaking of prime evening time.

Sindlinger's figures come from that firm's "Activity" report, which is compiled monthly from data obtained in daily interviewing, year-long. These same "Activity" reports give some clue as to where this audience went. In a breakdown of viewing of movies on tv (generally in afternoon or late night time periods), Sindlinger found a drop of 25 minutes per day in per capita viewing. In 1958's fourth quarter 31,391,000 watched movies on tv for a total of 1 hour and 47 minutes daily; in 1959's, 31,225,000 watched movies on tv for 1 hour and 22 minutes daily. This leaves an 18 minutes per day viewing drop which must be attributed to other portions of the tv day and schedule.

Sindlinger research suggests that some of the audience that isn't watching movies on tv may be watching them in theatres. Its studies in that medium show weekly movie attendance for the average week in 1959 up almost 2.5 million over the average week in 1958; 41,954,000 against 39,621,000. The outdoor theatres grabbed the bigger portion of this jump, a 13.3% gain against conventional theatres' 3.3%.

Sindlinger's reports on radio audience also show a loss. The audience of over-12-year-olds dropped 200,000 in 1959 (72 million per day against 72.2 million per day in the last quarter of 1958), while listening dropped 81 million hours a week (947.2 million hours weekly in the last quarter of 1959 against 1,028.5 million hours weekly in the same period of 1958).

Earlier Sindlinger Reports • Sindlinger & Co. was commissioned by Broadcasting last fall to conduct nationwide public opinion surveys about the quiz scandals. One was conducted the week before Charles Van Doren testified before a congressional subcommittee, the other a day after his testimony. Sindlinger found (among other things) that before Van Doren's testimony 76.9% of respondents had not changed their opinion of television as a result of the scandal, whereas after his testimony only 46.3% had not changed their opinion, and 50.9% had. (These reports appeared in the Nov. 2 and Nov. 9 issues of 1959.)

Roper Survey • Another nationally known research organization, Elmo Roper & Assoc., New York, found in a nationwide survey Dec. 5-12, 1959, conducted under auspices of the Television Information Office, that most people thought tv was still doing a good job. Presented to the FCC during December sessions of its hearings (Broadcasting, Dec. 21, 1959), the results also showed that television ranks close to newspapers in believability of news and ranks first as the medium that would be most wanted if only one were available. The study also showed that while two out of three people thought quiz-rigging was wrong, they didn't condemn all television as a result, and three out of four felt television itself was correcting the publicized abuses.
upward trend in TV set ownership also continues. Nielsen figured that as of January 1960 there were 45.2 million television homes, representing TV penetration of 86.9% of all homes, as compared to 44 million (85.6%) in January 1959 and 42.5 million (84.1%) in January 1958.

Radio Trends • Although again not pertinent to the crisis in broadcasting, radio set ownership remains on the rise. During 1959, Nielsen estimates, the number of radio homes rose from 48.7 million to 49.5 million, based upon 96.3% penetration of all U.S. homes. And average daily tune-in rose from an even two hours to 2 hours 16 minutes, according to a special annual measurement prepared this past March. This

[More tables on next page]
even though the number of homes reached by radio in an average week dropped from 43,587,000 to 41,244,000.

On an 11-month basis, average daily radio usage just about maintained its old pace: taking the average for January through November, it came to 1 hour 51 minutes per day as against 1 hour 53 minutes in the same period of 1958.

None of these figures includes the almost countless number of portable, automobile and other radio sets used outside the home.

October-November comparisons of home radio usage show trends similar

BROADCASTING, February 15, 1960
to those found in the same "before and after the scandals" tabulations of television usage. With some variations, usage followed much the same patterns in those months of 1959 as in 1958 (see Table 3).

The growth in radio homes since 1922, as compared to the growth in total homes, is shown by Nielsen in Table 4.

**Tv Ratings** • While the number of daily hours spent with television remained stationary, the average evening program rating declined in 1959 as compared to 1958 (see Table 5). This drop, amounting to about 9%, might seem contrary to the findings on viewing, but researchers point out that it comes from increased competition as a result of a sharp rise in the number of sponsored programs.

To explain this phenomenon in which better sales mean poorer ratings, Nielsen authorities point out (1) that the averages take into account only those programs that are sponsored; and (2) that the evening hours are now so nearly sold out that practically the only time recently available has been in so-called fringe periods, such as 7:30-8 and 10:30-11, which traditionally have smaller audiences and in less prosperous years have been occupied by local programming.

This sales gain to a virtually sold-out status, dramatized in the figures at the bottom of Table 5, shows only five hours of prime time per two weeks unsold on all three networks as of last November. A year earlier, 27 hours were unsold. In the peak-viewing 8-10 p.m. period the sell-out is complete—84 hours sold out of 84 hours programming, as against 78 out of 84 in November 1958.

**Fewer Blockbuster Ratings** • The trend of evening ratings over a longer period, 1956 through 1959, is examined in another way in Table 6. The first part shows that the percentage of programs getting a rating over 30 has been declining steadily. The big middle group—those with ratings from 15 to 30—has been getting bigger, and the lowest-rated group has fluctuated somewhat. The decline in number of high-rated shows, and the increase in those in the medium range, are attributed primarily to ABC's evolution as a full-fledged third network. More competitive programming is available, splintering the audience to a degree.

The second part of Table 6 is a different and longer (1956-59) look at rating trends developed in Table 5. It shows year by year the average audience for all evening programs and also for those in the Top and Bottom Tens.

With the need for "program balance" much in the news these days, Nielsen's studies also provide some insight into this subject. It would seem to show that networks on the whole are anticipating pretty accurately the preferences of viewers—that programming and viewing, on the whole, are "in balance" (see Table 7).

Widest discrepancy is in the category which is most often criticized—westerns. The Nielsen figures indicate the networks are not spending as much time on these shows as audiences are: where westerns represent 23% of all program hours, the viewer spends 28% of his watching time on them. Otherwise, the percentages never vary by more than one point, and in some cases are identical.

---

**PROGRESS IN BROADCAST GEAR**

**Video tape, station automation, color tv help refine routine technical tasks**

Broadcast equipment will eventually feel the revolutionary breakthrough in electronic communications as the distant skies are harnessed for signal transmission and miniature equipment is developed.

But while this dynamic technical art is penetrating new fields whose potential is beyond the imagination of the 1960 electronic mind, the practical side of broadcast transmission is marked by steady state-of-the-art progress.

From studio to transmitter tower, broadcast equipment is going through a refinement stage. The progress centers, from a management standpoint, around tv tape recording, transmitters, transistors, studio-office automation and all-around efficiency—the application of mechanical and electronic ingenuity to the apparatus and functions involved in the job of sending an audio or audio-visual service from one point to all the living rooms within electronic reach.

Many better ways of performing routine tasks are coming out of the laboratories of equipment makers. Sometimes they start in the front office or...

on the work bench of a radio or TV station, eventually becoming available through the processes of manufacture and distribution.

Via the Moon • These rather routine signs of progress are dimmed by the glamour surrounding the relay of a Presidential voice from a sky-born, rocket-fired satellite, or the Navy's newly announced Communications Moon Relay (CMR).

For broadcasters the immediate prospect of CMR and other sky apparatus is international transmission of television, now limited to speed of a jet plane and sometimes local traffic jams.

In essence the Navy's CMR is a four-channel teletypewriter-facsimile circuit between Washington, D.C., and Pearl Harbor, Hawaii, via the moon. A highly directionalized 435-445 mc signal travels to the moon and bounces back to Hawaii in 2½ seconds, requiring a 480,000-mile trip to span 5,000 miles (BROADCASTING, Feb. 1).

This same route was the scene of a historic radio voice service in World War I. At that time a string of five-watt tubes was used to transmit voice from the Navy Dept. to Pearl Harbor, quite a trick in that early day of broadcast development.

Moon Vs. Balloons • The moon service is described as one-tenth as efficient as the proposed balloon satellite project. This plan will use 100-foot balloons operating in a 1,000-mile high orbit. Tests by Bell Labs have been successful. A fullscale tryout is due during the spring.

An interesting twist to the approaching breakthrough into transoceanic TV is the discovery of the first of a series of natural radio pipelines. The first one, over the South Atlantic, will be joined by other ducts, experiments indicate. The Army is working with a relay system based on high-in-the-sky transmitters orbiting around the earth.

There are bottlenecks in the efforts of technical people and broadcast management to improve and expand their services. Stalled in the FCC and in military channels are proposals to juggle spectrum assignments to permit improved TV transmission, now crowded in a tight little VHF band and a partly utilized UHF band. Multiplexing (use of FM sidebands for separate services) has been getting the poor-relative treatment from the FCC, which is on record as wanting to give multiplexing a boost. The matter has been hanging around for years.

Stereophonic broadcasting is sidetracked pending FCC action. But there are signs the Commission will soon consider industry proposals for the adoption of necessary standards.

Remote Control • Automation has avoided many of the delays inherent in bureaucratic regulation. Remote control of transmitters through simple telephonic and electronic devices is widespread, reliable and economical. Tape, discs, clocks, cartridge tapes and memory devices are combined to permit orderly compilation of the day's program service and minimizing of human error.

Television tape recording (vtr) is overcoming one of its early problems—interchangeability. Ampex and RCA, the main manufacturers, have concentrated on this problem (see below). The tape apparatus is appearing widely in portable form, suitable for fast movement to program origination spots anywhere in the world.

VTR is subject to the limitations of studio pickup equipment. Imminent introduction of tiny, pocket-size television cameras and improvements in other steps in the broadcast operation will speed vtr's progress as a basic industry device.

Broadcast managers are deeply interested in ways to reduce mounting technical costs, said Arne Rose Walker, NAB engineering manager. Automatic transmitter logging has reached a high state of reliability. It can't become widespread, however, until the FCC amends its rules, he said. Minneapolis-Honeywell, for example, has recording gear that does the meter-reading job accurately and without human error.

All types of transmitters—am, fm and tv—can be logged automatically.

More Automation • WTOP-AM-FM-TV Washington is using remote control for its 50 kw directional am transmitter along with automatic logging at the three transmitters. KFI Los Angeles, has similar equipment. A low-power radio station, 1 kw for example, could amortize the cost of automatic control in a year by removing the need for one first-class ticket man. Besides economy, there would be increased efficiency.

A new field of technical methodology and use of equipment will open later in the year when NAB unveils its new Engineering Handbook, according to Mr. Walker.

A notable 1959 development was AN ANSWER

Automatic apparatus for station programming is getting better and appearing in larger quantities every month, inspired by the desire of station operators for more efficiency and reduced costs.

A half-dozen or so companies are marketing automation devices and assemblies for studio use. The results, users and marketers agree, are crisp switching, reduction of human error
Harbinger of limitless relays • 1960 was just days old when the U.S. Navy unfolded the story of its moon relay system (Broadcasting, Feb. 1). This is the aerial shot of the U.S.S. Hancock.

completion of the first three-antenna candelabra tower for Baltimore’s three television stations.

The first three-antenna candelabra tower was put into operation in Baltimore last year with RCA as prime contractor. The array was erected at the WJZ-TV site with WBAL-TV and WJZ-TV using traveling wave antennas and WMAR (TV) a superturnstile. Dresser Ideco built the tower, which was erected by J. F. Beasley Co. Height is 730 feet above ground.

Color’s Future • RCA, which should know more about color tv than the rest of the industry, calls the 1960 color outlook “highly favorable.” Its official position is this: “Color will continue to grow and eventually most programs will be telecast in full color.”

Rapid growth in color acceptance was reflected in 1959 among advertisers, transmitted from Pearl Harbor to a point near Washington, D.C., by radio signals. Among the many possibilities seen for the system: live international television.

tv critics and the buying public, says RCA. “Notable stimulation to color tv’s progress came from the high quality of color sets and the increase in local and network color programming,” a spokesman said. NBC color scheduling, for example, increased 30% over 1958.

“Color set sales mounted steadily throughout 1959 and at the end of the year were running at a rate of 30% above the previous year. For the first time since the introduction of color tv in 1954 RCA showed a profit on the sale of color receivers. If sale volume continues, so will profit.”

James W. Seiler, American Research Bureau head, told Broadcasting ARB plans to measure the color audience when set circulation reaches 400,000.

The following articles focus on the status of leading technical developments.

TO COSTS: AUTOMATION

and greater efficiency.

As in the case of the meter-reading and transmitter-logging devices developed for remote operation of transmitters, automation is catching on fast in the industry. But where transmitter logging by automation is delayed by the need for modernized FCC rules, the record changers and cueing apparatus for studio use have not been held back by the governmental process.

Each NAB convention shows new ways and new apparatus in the automation field, and 1960 will follow this pattern. Both major and small manufacturers have entered the automation field. Sometimes their devices blend to perform all-around station functions, such as long periods of unattended program origination.

In the Studio • RCA’s versions of studio automation include a Flexo-
writer-electronic brain technique. It controls both audio and visual sources at TV stations and audio sources of radio installations.

The TV system is operating at WKRC-TV Cincinnati (a Taft station). The $2 million WKRC plant is equipped with facilities that permit live programming without camera crews. A day's programming is punched on a Flexowriter tape that triggers eight sound-on-film projectors, four 2x2 slide projectors, two audio tape machines, two audio turn-tables, two live remote cameras and four live microphones (two in announcer booths and two in live studios). Confusion is eliminated and production is improved, using fewer people, according to WKRC-TV (BROADCASTING, Jan. 11).

The radio station system starts with a keyboard that punches information into tape. This is read by a device that sets the program apparatus in operation and controls it. Two types of automatic record machines (BQ103 and BQ104) hold 100 45-rpm discs. The BQ104 uses RCA discs having magnetized grooves to permit electrical recording instead of mechanically produced information. This is an adaptation of the magnetic tape principle to discs. Erasure and re-use of discs are possible. The BQ104 primarily handles station identification announcements, commercials and similar information. The two machines permit random, sequential or manual selection.

Cartridge Tape • Collins Radio Co. unveiled its cartridge-tape control system at the 1959 NAB convention. Collins says the automatic "tape-jockey" was first used for complete program operation of a station at KXOL-Fort Worth. With four playback units, KXOL-pre-recorded cartridges from other tapes and discs. The station said the system "tightened up its operation over 20%, paving the way for economical savings," according to Earl Fletcher, manager (BROADCASTING, Nov. 23, 1959).

With Collins equipment, cartridges are loaded with tapes varying from 30 seconds to 31 minutes. The tape runs, stops and automatically re-cues itself. There is no manual threading or cueing. The four playback units are teamed with a combination record-playback unit.

WJBC Bloomington, Ill., developed automatic tape control under the direction of Vernon A. Nolte, vice president-general manager, because of "sheer necessity." Exclusive sales distribution rights were granted to Collins. Mr. Nolte first showed tape-cartridge cueing of commercials in late 1958 to the Illinois Broadcasters Assn., crediting Ted Bailey, engineer, with the technical development.

Automatic Tape Control Inc. was formed, with production reaching about three-dozen units a week, later stepped up to 50 units (50 playbacks, 15-20 amplifiers and other components). About 200 station installations have been made, including a dozen TV outlets. Sales orders from Collins in 1960 are estimated by Mr. Nolte at over $1 million.

Gate Equipment • Gates Radio Co. offers four versions of automatic equipment—the pioneer Auto-Station unit, Spot Tape Recorder (accommodating 101 announcements up to 90 seconds long), Nite Watch automatic system for up to six hours of continuous programming and Auto-Trans unit (a 200-selection automatic changer for 45 rpm records).

The Auto-Station is designed for 14 hours of completely automatic programming. Some 80 automatic programming systems have been sold and over 250 Spot Tape Recorders have been delivered or are on order, said Larry Cervone, Gates general sales manager. He reports sales of automation equipment are "definitely on the upgrade with over a quarter-million dollars worth of Gates automatic units already in use, not including the huge volume from sale of Spot Tape Recorders."

The recorder is a vertical playing belt 13 inches wide, with an indexing system on its control panel and automatic rewinding after each playback. Nite Watch consists of a production console, tape control unit and 45 rpm automatic cueing transcription changer for 100 records. It permits announcing.

Greyhound bus . . . Meet the newest timesaver adopted by the four Imperial Broadcasting System stations in California—"net-work" connection by Greyhound bus. Frank Crane, manager of KPRO Riverside and the Imperial group (also including KREO Indio, KROP Brawley and KYOR Blythe), has backed up its automated programming with bus transport of tapes.

Longest jump, Riverside to Blythe, is 180 miles. Greyhound hauls the tapes in five hours compared to two days for the U.S. mails. In a tight spot Bonanza Airlines can make the jump in two hours.

"Automation lets us use our people at Riverside (a city of 95,000) to program all four stations," Mr. Crane said. Blythe has about 5,000, Brawley 10,000 and Indio 15,000.

Mr. Crane said expenses had been cut about $5,000 per month by automa-
Dubbing, automatic record playing along with professional tape recording and automatic transcription equipment for separate use. Auto-Station, Mr. Cervone said, allows an announcer to set up a day's programming in the time needed to read off the commercials, station breaks and between-record comments. These are recorded on one track of a dual-track system.

Spot Device • Schafer Custom Engineering division of Textron Inc. will be out in a fortnight with a tape cartridge device. Before the NAB convention (Chicago, April 3-6) the company will introduce a spotter that will store some 200 spots. Any one can be selected by a twist of a dial. Or the sequence can be predetermined indefinitely through a memory unit, according to Paul C. Schafer, head of the firm.

At the close of 1959 over 100 stations were using Schafer automation and over 500 had installed Schafer remote control equipment.

Some stations use automation as an adjunct to live programming. Mr. Schafer cited KNUZ Houston, where top disc jockeys are live in the daytime but automated for night and weekend radio. This plan permits disc jockeys to work daytime hours but be heard seven days a week, 24 hours a day, he said.

KDOT Reno, Nev., uses full automation, he pointed out, and KARA Albuquerque, N.M., built from the ground up for automation, has a staff of three providing completely automated programming during the entire broadcast day, seven days a week.

Schafer's Model 1,200 automation system includes four Ampex recorders, two Seeburg library units and completely new automation electronics. The Seeburg 45 rpm record players can be augmented or replaced by tapes, if desired. "The cut-dot system makes it possible to prepare program material in a much shorter length of time because only announcements that must change need be erased," according to the instructions.

Muzak Subsidiary • Programatic Broadcasting Service, New York, markets automation programming and equipment as a Muzak subsidiary. The prototype was built for Muzak's WBFM (FM) New York but was never used. Sixty-two stations are using Programatic, the company said, with others on order. Programatic uses an electronically controlled, time synchronized tape playback device. One machine can be loaded for eight hours, including station breaks; two for 16 hours, with automatic switching.

Two banks of tape players are connected with a clock. One reel is programmed; the other has time signals, commercials, public service and other announcements.

Programming in no way resembles Muzak background music, according to Programatic, being designed to reach people who control family spending. WQMN Superior, Wis., began using Programatic last June 18, with music running in 15-minute segments. A daytimer headed by Gene Halker, president, WQMN has a total of eight employees including the manager. KGNC-FM Amarillo, Tex., claims it quickly showed a profit after it stopped duplicating KGNC-AM. Cost was $600 a month for power and Programatic.

Programatic says it has an inventory of over 10,000 programs and show tunes.

Audiomation Labs making tape systems, features a Consecutor 8-hour tape system, Varytype system intermixing 12-minute segments on Magne-Tronics tapes and an Autosplicer that intermixes individual selections and inserts commercials on tapes having pauses between selections. L. S. Subber, general manager, said the gear is used in package deals by DuKane, Gates, Industrial Transmitters & Antennas, RCA International, Schulmerich Electronics and others. He said over half of all multiplexers use the firm equipment.

Magne-Tronics Inc. will announce a new am-fm tape program service featuring 8-hour tapes of "easy listening" at the April 3-6 NAB convention in Chicago.

Industrial Transmitters & Antennas, Upper Darby, Pa., manufactures remote control units, multiplexing gear and fm transmitters.

VIDEO TAPE: AN EXCITING PLUS TO TV

Ampex and RCA take lead in offering new program dimension

Tape's future? Ampex feels the present degree of interchangeability "is not enough" and believes tape must become "as intersplicable as photographic motion picture film." Devices on the drawing board should solve the problems, according to Ampex.

The Future • A summary of tape's future, Ampex says, emphasizes Inter-Sync, magnetic head improvements, better TV cameras and improvement in system-translating devices (from 405 to 525-line TV, for example). Four line variations are used internationally. Magnetic progress is described as "a slow, unglamorous, painstaking effort." Ampex summed it up this way, "Tape will become the commonest way of distributing commercials, syndicated programs and public service shows."

General Electric Co. jolted the electronic world a few weeks ago by unveiling an experimental thermoplastic recorder. The apparatus combines the processing speed and versatility of magnetic recording with the storage capacity of photography, according to GE. It also concentrates 100 times as much information in given space as present tape (BROADCASTING, Jan. 18). GE emphasized its process is still experimental. Even so, Ampex stock suffered some bad days on Wall Street.

GE's broadcast line includes a new super-sensitive camera tube claimed to cut by 90% the light requirement for monochrome and color.

Japan is using some American vtr recording gear but meantime its technical laboratories are working on other versions of tape recording. One would use spiral-driven tape contacting a single recording head. However, this would not be compatible with RCA or Ampex tape-recorded programs. England, too, is working on vtr.

From a competitive standpoint, the most exciting spot in the equipment field has been the RCA-Ampex race to develop and manufacture television tape-recording apparatus.

Ampex was first in the field with quantity production. It introduced its wide-tape system after RCA had been

The magic land of vtr at CBS Hollywood

A new video-tape recording center, now operating at CBS Television City, Hollywood, includes 12 recorders (two color), service equipment and a battery of four TV film recorders (three 16mm, one 35mm). The network's Hollywood facilities included a mobile vtr van.

The CBS system, housed in a 5,000-sq.-ft. space, has a specially designed relay system. Essentially it is a complex of simple switches arranged to allow recording and playback to be handled from the vtr machine once a single master connection has been made. This eliminates complex manual routines. There are 12 picture sources for recording and seven playback circuits.

Video-tape machines in the center handle a maximum program schedule, with six taking care of delayed broadcasts and the rest available for program recording. Total staff numbers 47.

A movable partition is used to close off the main portion of the center during tape-cutting. The tape storage vault is temperature and humidity controlled. Equipment was designed by the CBS TV Network engineering department, New York. Work was started in September 1958 and completed a fortnight ago by the West Coast building and technical departments.

Color videoboy • This section includes a pair of color video tape recorders. Grills directly above the vtr's are audio speakers for each of the two consoles. Price Fish, of the New York engineering staff, was responsible for much of the design work on the center and supervised equipment installation together with CBS-TV's west coast staff headed by Les Bowman.

Key switching point • This is the patchwork terminal that serves as a vital link in the CBS-designed-and-developed preset relay system at the center. Upper tier holds connections for all the studios at Television City. Lower tier carries the jacks for the vtr's in the new center.
The turning point place the manufacturer: production. this each. pressed. NAB convention. Ampex are conducting training courses two other markets other catch points head scribeks ability Ampex 155 as RCA-40 The RCA features rack-mounted video recording equipment that has been in broadcast personnel. In the RCA’s rack-mounted vtr was demonstrated at the 1959 NAB convention, using a color-equipped unit. First station to install an RCA rack was WBTV (TV) Charlotte, N.C., which ordered two recorders.

As new vtr uses develop and more units are installed, both RCA and Ampex are conducting training courses for broadcast personnel.

In the compatibility competition, RCA cites its electronic quadrature adjustment in a list of advantages that also mentions cue facilities and audio dubbing. Ampex has come out with a new playback delay equalizer described as a compatibility device.

The Army Signal Corps is using mobile RCA vtr recording for training purposes. It is installed in a specially designed van.

Mobile Units • Ampex says its mobile version of Videotape is growing in popularity, with 21 now operating and another 50 to be added in 1960. MVI Television, New York, has an Ampex tape-equipped DC-4 for world-wide use. CBS borrowed it to cover President Eisenhower’s European trip. Medium markets are joining major cities in mobile installations. KYTV (TV) Springfield, Mo., for example, is nearing the first full year of tape mobility. Its Ampex XR-1000 has an Onan power supply. RCA monitors and camera chain are used in the air-cooled truck. It’s sent to county fairs, shopping centers, farms and other program sources. Loading the truck takes a half-hour.

Affiliated TV, New York, has an Ampex mounted in a metal capsule. It can be loaded into any type of moving vehicle. Once it tape-recorded Art Carney in San Diego one day and a swimming pool pickup in Las Vegas the next. Sports Network has produced bowling shows in three days from three locations.

Much progress in tape-recording has been made since November 1956 when Doug Edwards’ CBS-TV news show was the first regular vtr-produced program, according to Ampex. Newest Ampex development is Inter-Sync, synchronizing a tape playback with other tapes, eliminating much of the splicing in favor of electronic editing. Separate shots can be “melted” together with the precision and polish of film and with the speed and low cost of live tv, Ampex emphasizes.

Many Uses • Inter-Sync uses are numerous in program production. It permits synchronizing a single machine to station sync, thus permitting the one-recorder owner to cut, wipe or lap-dissolve from any program into local tape, for example. In all, Ampex describes Inter-Sync as a “revolution in program production.”

As to interchangeability, Ampex says it is “a long-proved reality in black-and-white recordings, demonstrated by tape syndication and extensive program exchange. Color tapes made on Ampex color-converted VR-1000 machines also have been proved interchangeable,” Am-
AMPEx said. The Nixon-Khrushchev debate was "recorded on an Ampex color unit in Moscow, and dubbed and played back in color by NBC New York on a different recording head."

Ampex calls color interchangeability "a matter of degree" and has "avoided carelessly exaggerated claims about this phase of tv tape recording while continuing an extensive research program to bring this problem under complete control."

**STEREO: AWAITING FCC ACTION**

At standstill until standards are adopted

Stereophonic broadcasting is standing still and will continue in that posture until the FCC makes up its mind about the shape this new audio form will take. Some experimental work is going on but the stereo art can't move until standards are adopted.

An industry group, National Stereophonic Radio Committee, has studied more than a dozen stereo systems and has made a partial report to the FCC. It can merely offer recommendations for broadcast standards. RCA and CBS are not members of the national committee for what they term legal reasons. Naturally broadcast receiver and transmitter construction for the public is held up pending FCC action.

Tape and disc stereo recording, however, is slowly gaining public acceptance. Some record firms say their stereo sales exceed monophonic business. James D. Secrest, executive vice president of Electronic Industries Assn., said manufacturers simply can't make stereo broadcast transmitters or consumer receivers without standards. EIA feels the issues are too technical for FCC to review at a public hearing, noting that industry brains have been pooled in the committee studies as was the case when the present tv standards were developed for FCC guidance. EIA is raising a campaign fund to promote phono stereo and remove confusion from the public's thinking.

Some manufacturers feel the stereo phonograph business has been badly hurt by public confusion over technical aspects. They contend the public was sold a phony bill of hi-fi goods by some equipment makers who hung the label on low-quality merchandise, and now entrance of stereo has added to the confusion. Monaural records are still selling well. Production costs for stereo records and equipment are only slightly more than monophonic lines. In the case of transmitters, however, dual-channel signals are required and this increases the cost.

While the FCC has hinted it may state its position on fm stereo after mid-March, the prospects for other, fm multiplexing (mx) can't be put on a calendar basis at this time.

One of the basic stereo broadcast methods, fm multiplexing, has been snarled in Commission routine for years. Fm's wide band (200 kc) provides room for two or more sidebands that can allow a station to transmit more than one service on its frequency or to duplicate a program for stereo purposes on sidebands. Of course, stereo can be accomplished by the use of any two transmissions of a single program—fm-mx, am-fm, am-tv, fm-tv, etc. Techniques have been devised to split the narrow (10 kc) am band, using two am receiving sets, to accomplish stereo. Kahn Research Labs has sold am-fm apparatus to four foreign stations, it told the FCC, adding that it finds their operation successful (Broadcasting, Feb. 1).

Kahn Research has also announced sale of its new all-am stereo adapter system (STR-59-1) to CJAD Montreal, two stations in Caracas, Venezuela, and a major station in Mexico City. The adapter system allows a single am broadcast transmitter to function as a stereo transmitter. The two channels are carried as independent sidebands to the main carrier. Regular am sets can tune the main carrier monaurally as usual, or, by using two sets, one tuned just above the main carrier and the other just below, stereo is received. Only 0.5% total harmonic distortion is produced, Kahn claims. The system cannot be used in the U.S. since the FCC has not completed its consideration of stereo engineering proposals for am and fm.

The FCC recently extended the deadline for filing of reports on proposed mx rules to March 15, having in mind non-broadcast activities such as private communications services.
THE MEDIA

ABC RADIO'S FIXED INTERVAL

Allows station leeway in scheduling shows

A new “fixed interval” plan permitting affiliates to delay certain broadcasts within stated limits was announced last week by ABC radio. It is effective immediately.

Edward J. De Gray, president of the network, said the plan will afford flexibility for stations and yet let the advertiser know exactly when his program will be carried. Stations will be required to stipulate in advance exactly when, within the “fixed interval,” the show will be carried. Variations will not be permitted for the duration of the commercial schedule.

The programs which may thus be delayed consist primarily of five-minute strips. Among them are the Eydie Gorme Show, Teen Town and Space Scope. The “fixed intervals” within which stations may schedule such programs are 10 a.m. to 12 noon; 12 to 4 p.m., and 7 to 10 p.m. The advertiser specifies the “fixed interval” in which he wants his program to appear.

Mr. De Gray said the plan recognizes “that each station has its own unique community situation and listening patterns.” Yet it assures advertisers that their programs will be heard within the day-part they wish. He said it also should increase program clearances substantially by “virtually erasing” local programming conflicts.

Alabama group to apply for any vhf allocated

Incorporation of the Alabama Telecasting Corp., with veteran broadcaster Henry P. Johnston as president, to apply for any vhf channel allocated to Birmingham was announced last week.

The Alabama company plans to apply for either ch. 4 or ch. 8, whichever is dropped into Birmingham. The FCC has under consideration a proposed rule-making, issued last July, to make either of these moves.

Birmingham is now served by two commercial vhf outlets (ch. 6 WBRC-TV and ch. 13 WAPI-TV), and one educational station (ch. 10 WBIQ [TV]). There is a grant outstanding for ch. 42 WBMG [TV], half owned by multiple owners H.&E. Balaban Corp. (WICS [TV] Springfield, Ill., and others) and half-owned by Winston-Salem Broadcasting Co. (WTOL-AM-TV Winston-Salem, N.C., and WSBN Birmingham and 80% of WAPA-TV San Juan, Puerto Rico).

Mr. Johnston, former president and general manager of the WAPI stations, owns 40% of Alabama Telecasting. Other stockholders are Houston Post Co. (KPRC-AM-TV Houston, Tex.), 25% and the following 5% stockholders: Frank P. Samford, president, Liberty Life Insurance Co.; William P. Engel, Birmingham industrialist; Lewis Jeffers, president, Hayes Aircraft; W. Cooper Green, former mayor of Birmingham and executive vice president of Alabama Power Co.; Jack Harris, vice president, Houston Post Co. (and general manager of KPRC stations); William P. Hobby Jr., associate editor, Houston Post, and Jessica Hobby Catto, San Antonio.

BLAIR'S SPOT TV STORY: COLOR FILM Explains PRE-SELLING

How spot television can pre-sell and then move goods off counters is the theme of a new presentation for advertisers shown publicly in New York for the first time Friday (Feb. 12) by the representative firms of Blair-TV and Blair Television Assoc. The half-hour animated color film will be presented to advertisers and their agencies in New York and other major U.S. cities.

The showing Friday was the highlight of a three-day assembly in New York of managers of Blair’s 10 regional offices.

The film moves quickly through a wealth of material containing facts and figures on population movements, changing consumer tastes, rising income levels, spot tv’s pre-sellng and capture of advertiser dollars, as well as specific advertiser use of the medium.

The film makes the point that the 265 tv markets in the U.S. are becoming 14 marketing areas in spot tv lingo. Related is the use of spot tv in Blair’s test market plan by such advertisers as Surprize cereal (increase over 12 weeks in brand awareness of 300%), Welchade (product identity up 87% and purchases 37% in 15 weeks), Thorexin (brand identity climbed 53% in four weeks) and Maxwell House (product purchases increased 108% in eight weeks).

Other than animation, there is one live sequence. John Blair, president of the station representative companies, delivers a “thank you” note to advertisers and their agencies.

What gets the money • In this frame from the film, the arm of the “announcer” explains to the “Redhead” (strong resemblance to Arthur Godfrey) last year’s leadership of spot tv in foods ($136 million) compared to network ($108 million), newspapers ($126 million) and magazines ($76 million). Plans and data were assembled by Blair-TV and Blair Television Assoc.
Overseas vtr issue raised in CBS case

The growing practice of video taping TV programs overseas for broadcast in this country has given rise to another labor-management dispute over union jurisdiction, the second vtr-caused case in the last two weeks.

The latest is a CBS-TV action seeking to prevent the International Brotherhood of Electrical Workers from bringing to arbitration the question of whether the network can sub-contract such taping to outside, non-IBEW companies. A week earlier all three networks had moved to stop arbitration involving a vtr dispute with the United Scenic Artists Union (Broadcasting, Feb. 8).

IBEW notified CBS-TV late in January that it would seek to bring the jurisdictional question to arbitration. Last Tuesday (Feb. 9) the network filed a petition with the Supreme Court of the State of New York asking a stay of such action. The union wants determination of when its members must be used for vtr work, its position being that union jurisdiction extends to overseas work. The network disagrees, feeling that its current contract with the union permits it to use other facilities both outside the U.S. and within this country where IBEW jurisdiction does not reach.

The issue is similar to that which lead to a strike at NBC-TV last April. At that time NBC workers belonging to the National Assn. of Broadcast Employees & Technicians walked off their jobs at NBC installations throughout the country when the union charged that French technicians (non-NABET) were used in key assignments during taping of the Today show in Paris. The 18-day dispute ended with NABET relinquishing its claim to jurisdiction over programs produced outside the limits of the U.S. (At Deadline, May 18, 1959).

Long History • The current union move toward arbitration traces back to May 1958, shortly after IBEW had agreed on terms of its current contract with CBS-TV, which runs until Jan. 31, 1961. IBEW has protested CBS-TV’s use of outside vtr facilities to handle a Jimmy Dean Show from Washington, two Arthur Godfrey broadcasts from Hawaii, Ed Sullivan broadcasts from Italy and Moscow, Geneva Conference news programming and a Conquest show in Baltimore. It holds the use of non-IBEW technicians for these tapings was in violation of a contractual ban against sub-contracting.

CBS-TV, on the other hand, argues that all these incidents occurred out-side the jurisdictional area covered by its contract with IBEW. Those are within 200 miles of its owned-and-operated stations, 300 miles in the case of KNXT (TV) Los Angeles. Further, the network cites another contract provision saying that outside the continental U.S. the network need not use IBEW technicians. The only exception to that provision is for parts of Mexico which come within the 300 mile circle of KNXT.

Aside from these considerations and another which says that any move toward arbitration must be made within six months of a grievance, the network petition says that even if the union interpretation of the contract were correct regarding the no-subcontracting clause, the argument would be nullified by the recently passed Landrum-Griffin Act’s “hot cargo” provision. This is an amendment to the National Labor Relations Act which provides that “it shall be unfair” for any employer to agree not to use the work of any other employer and provides that any such agreement is unenforceable and void. This interpretation, if applied to the non-subcontracting provision itself, conceivably could void its application even within the IBEW jurisdictional area.

The petition initially was set for hearing Feb. 15, but by agreement of both parties has been postponed until March 17. Attorney for CBS-TV is Emanuel Dannett of the New York firm of McGoldrick, Dannett, Horowitz & Golub. The union is represented by Louis Sherman, Washington.

WJJD drops ‘top 40’

Plough Inc.’s WJJD Chicago last Wednesday (Feb. 10) dropped its top 40 tune format in favor of a new “broad base” musical programming. Frederick G. Harm, vice president and general manager of the Plough station, said a careful study of radio listening preferences, in relation to present available fare, called for a format that would satisfy a greater variety of listeners. The new music policy will be augmented with broader and more interesting news and other service features.

WMPS Memphis was the first Plough station to drop top 40 programming. It was indicated then that, if its new format proved successful, it would be extended to other Plough outlets (Broadcasting, Dec. 21, 1959).

Changing hands

ANNOUNCED • The following sale of station interests was announced last week, subject to FCC approval.

• WKCB and WKCQ (FM) Berlin, N.H.: Sold to Richard P. McKee to John Bowman, former record retailer in Bridgeport, Conn., for $157,500. Mr. McKee bought the Berlin stations from John W. Guider in 1957 for $110,000. Station is 250 w on 1230 kc. Broker was Blackburn & Co.

APPROVED • The following transfers of station interests were among those approved by the FCC last week (for other Commission activities see For The Record, page 154).

• WMPS Chattanooga, Tenn.: Sold by B.F.J. Timm to Leon S. Walton for $180,000. Mr. Walton, president of Na-

CBS INCOME HITS NEW HIGH

Consolidated net income is $25 million

Record sales and consolidated net income for CBS Inc. have been announced by Board Chairman William S. Paley and President Frank Stanton. Income of $25,267,000 and sales (consolidated net) of $444,311,000 cover fiscal 1959 ending Jan. 2, 1960.

It was understood that this was the first time in CBS corporate history that its consolidated net income has passed the $25 million mark. Sales are at the highest point in the 32-year history of CBS.

Net income moved up from the $24,429,000 in a 33-week period in 1958 (last year’s figure covers 52 weeks). The fiscal 1959 total represents a 3% increase. Sales went up $32,511,000, or 8% above the 1958 total.

Per share earnings for 1959 were $3.11 as compared to $3.01 per share (and adjusted for stock dividend) earned in 1958. At a board of directors’ meeting Feb. 10, a first-quarter cash dividend of 35 cents per share on common was declared payable March 11, 1960. (Two cash dividends of 3% each were declared during the fiscal year 1959).

The statement by Mr. Paley and Dr. Stanton was in advance of the issuance of CBS Inc.’s annual report which is expected next month.

Nominees announced for NAB Radio Board

Two nominees for each of eight NAB districts and four at-large posts have been nominated for Radio Board vacancies with final election ballots to be counted March 3.

Even-numbered NAB directorates will expire at the April 3-6 convention in Chicago, along with one each of the two at-large directors (representing large, medium, small and fm stations). Final ballots will be mailed Feb. 16.

Nominees for the 12 posts follow:

District 2—Simon Goldman, WUTN James-

lown, N.Y. (incumbent) and Michael R. Hanna, WHCU Ithaca, N.Y.

District 6—Carter M. Patham, WDEF Chattanooga, Tenn., and F.C. Sowell, WLAC Nash-

ville, Tenn. (incumbent and chairman of Radio Board).

District 8—J.M. Higgin, WTHI Terre Haute, Ind. (incumbent), and John F. Wismer, WHLS Port Huron, Mich.

District 10—Richard W. Chapin, KFOR Lincoln, Neb., and G. Pearson Ward, KTTV Spring-

field, Mo. (Ben B. Sanders, KICD Spencer, Iowa, incumbent).

District 12—Matthew H. Bonebrake, KOCY Oklahoma City, and Allan Pope, KGWA Enid, Okla. (Robert L. Pratt, KICD Spencer, Iowa, incumbent).

District 14—George C. Hatch, KALL Salt Lake City (incumbent), and Jay W. Wright, KSL Salt Lake City.

District 16—William J. Beaton, KKWO Pas-

dena, Calif., and Robert J. McAndrews, KBIG Avalon, Calif. (incumbent).

Small Stations—J.R. Livesay, WLBH Mattoon, Ill. (incumbent) and Robert F. Mason, WMRN Marion, Ohio.

Fm Stations—Merrill Lindsay, WSDY-FM Decatur, III. (incumbent) and Ben Strouse, WWDC-FM Washington, D.C.

PROGRAMMING

WGA, NETWORKS SUSPEND TALK

But writers union doesn’t call a strike

Negotiations between Writers Guild of America and the tv networks for a new contract covering employment of freelance writers on tv film programs have been suspended. WGA has postponed calling a strike against the networks, however, presumably because the union is due to start negotiating with them for a new pact for staff tv film writers and those writing live tv and radio programs. The tv film agreement with ABC, CBS and NBC expired Jan. 31, after two previous extensions. The contract for live writers runs through March 31.

Breakdown of writers' negotiations with the networks was over the same issues over which WGA is now on strike against the alliance of television film producers and the tv divisions of the major motion picture studios. The Guild wants payments to writers when a tv series is sold abroad and extension of domestic residual payments beyond the present cut-off point at the sixth broadcast.

In a bulletin to its members on the status of tv film negotiations, WGA reported that the contract with independent packagers has been extended from Feb. 12 to March 12. Negotiations with these companies, who do not have financing or distribution agreements with the major studios and are not affiliated with ATFP, have not yet begun.

Despite the failure to make any headway with the WGA insistence that its members be given a share in revenues from sales abroad and increased residual payments at home, the union reported progress on other issues at meetings held with ATFP last week. "These producers," WGA told its members, "are maintaining their position that they will not make any move in the areas of foreign use and domestic reruns. Their present position on pay tv is unacceptable because, in part, it ties in with the concept of an extension of the theatrical box-office. In other important areas—speculative writing, authorized representatives, elimination of cut-offs, rights in literary material—progress is being made and discussion is continuing."

Concerning the major studio tv contracts, the Guild stated: "No meeting has taken place since Jan. 14. When negotiations broke off, the majors made it clear that they would not make any move in the areas of foreign use and domestic reruns. With respect to pay tv, it was their position that it was an extension of the box office and should be discussed in connection with the
theatrical motion picture contract. There was no agreement in the speculative writing area or other important areas where agreement has been reached with the networks or the alliance.”

Negotiations with the networks, members were told, “were suspended last Friday (Feb. 5) when the networks submitted a package which did not include any movement in the area of foreign use or domestic reruns. Agreement has been reached with them on pay tv. Agreement has also been reached in several important areas, including speculative writing, authorized representatives and certain rights in material. Their package also included acceptable proposals in other areas.

“Pending further developments, the council has not set a strike date.”

CBS Radio adopts programming rules

CBS Radio followed the lead of CBS-TV on Feb. 5 when it distributed an internal memorandum establishing new rules governing programming practices. They cover the same subject areas already treated by CBS-TV. In announcing the policies, CBS Radio President Arthur Hull Hayes said the network had instituted a “careful and detailed re-examination” of all operations, and although not finding any deceptions as serious as those of tv quiz programming, did find things that prevented it from saying all programs were “exactly what they purport to be.”

New rules cover:
1. Games and contests, banning all high money quizzes and setting up qualifications for announcement of prepared elements in other shows that might not be obvious.
2. Interviews and discussion entertainment shows, again requiring announcement of prepared elements or limitations on area of questioning, and also requiring announcement of pre-recorded elements.
3. Canned laughter or applause, which must be limited in use and identified as such when used.
4. News, public affairs, sports and information programs, requiring announcement of rehearsed elements, editing and pre-recording and advising discretion in use of sound effects. It also emphasized requirement for identifying opinion when used in CBS Radio programs, and for attributing that opinion to the organization which sponsors it, if any.
5. Identification of products or services, prohibiting direct or indirect identification of brand names except where “reasonably necessary and natural,” permitting credit for products which are actually used on a program and contributing to it, and forbidding credit for prizes or gifts (which must be paid for under program budgets).

The radio rules went into effect Feb. 10.

ASCAP revenues up $1.5 million over ’58

ASCAP revenues last year totaled $30,030,967, an increase of more than $1.5 million from the 1958 total, board member Arthur Schwartz told a west coast membership meeting in Los Angeles Wednesday (Feb. 10). Expenses of slightly more than $6 million left $23,982,560 available for distribution to members, a gain of $720,888 over the previous year. A total of $22,553,007 was distributed to members in four quarterly installments during 1959, he said.

ASCAP President Stanley Adams, in a review of the past year said that acceptance of the government consent decree (Broadcasting, Jan. 11) clears the way for more businesslike and less troublesome relations between ASCAP

**ANGLO ALLIANCE**

**British firm purchases Wrather's half of ITC**

Associated Television Ltd. of London, England, is purchasing the half-interest of Independent Television Corp., New York, owned by Jack Wrather and John L. Loeb, senior partner, Carl M. Loeb, Rhodes & Co. investment house. The purchase price was not announced.

Result of the sale: The first foreign company of any consequence which both produces and distributes tv programming will do business in the U.S. ATV is a publicly-held company, its chief ownership held by C. O. Stanley of the Pye Ltd. electronics firm in England, the Moss empires (theatrical interests) and the London Daily Mirror. A program contract, for British commercial tv stations in London and the Midlands, ATV also is in broadcasting in Australia and has been looking for broadcast interests in Canada.

Two Subsidiaries • ATV now will have two subsidiaries. Incorporated Television Co. producing and distributing for ATV in England, and Independent Television Corp. doing the same in the U.S. The British ITC owns such tv series as Robin Hood, William Tell and Invisible Man. The American ITC has Ding Dong School, Sweet Success, Cannonball and Brave Stallion in syndication.

ITC's *The Four Just Men* is in 155 markets in the U.S. and is on the full Canadian Broadcasting Corp. network and in 18 other countries; *Interpol Calling* is in 40 markets domestically and in 12 foreign countries with *Danger Man* and *Whiplash* (to be produced in Australia) soon to be released.

The Jack Wrather Organization owns *Lassie* and *The Long Ranger* which are nationally sold (on the networks) and *Sgt. Preston of the Yukon* (distributed by ITC). ITC during the past year sold *Fury* and *The Gale Storm Show* to the networks. It also has the rights to and distributes Jeff's Collie, re-runs of *Lassie*, and has the foreign rights to *Lassie* and *Lone Ranger*.

Michael Nidorf, a former ATV vice president and at one time connected with General Artists Corp. (talent agency), represented ATV in negotiations with Messrs. Wrather and Loeb.

In the new ITC (in the U.S.) Mr. Nidorf becomes chairman of the board, Walter Kingsley continuing as president and becoming a member of the board as well as Leslie Harris, now in charge of ITC's international division and Morris Wright of Kuhn Loeb (investment house). Other board members will include Prince Littler (ATV's managing director) and Lew Grade (deputy managing director of ATV). Also active in ATV but not on ITC's new board: Norman Collins, deputy chairman of ATV and "father of British commercial tv."

**Closed circuit tv unaffected by decree**

TelePrompTer Corp., New York, announced last week that its agreement with the Attorney General of New York, cancelling its ancillary (radio-tv-film) rights to the Ingemar Johansson-Floyd Patterson bout will have no effect on its continued activity in the closed-circuit telecasting of boxing and other sports events.

TelePrompTer, its president, Irving B. Kahn, and the Attorney General entered into a consent decree on Feb. 5, under which the company cancelled its contract for ancillary rights to the bout (with Floyd Patterson Enterprises), and coincidentally the state's dissolution and anti-monopoly proceedings against TelePrompTer were terminated. Similar proceedings against Floyd Patterson Enterprises are still in effect.

Mr. Kahn pointed out that TelePrompTer, under the consent decree, did not waive the privilege of bidding or negotiating for the Johansson-Patterson ancillary rights, if it so desires. He stressed that TelePrompTer accepted the consent decree because "our counsel advised that long and costly action would be required to contest the proceedings," and because the telecasting of boxing "represent less than 10% of the company's total corporate revenue."

**JAZZ IS SERVED**

**WNCN-FM night block offered by new firm**

There is a need in radio for continuous and varied programming to reach a growing and responsive audience of adult jazz buffs.

This is the premise behind the formation of a new production company, Communicating Arts Corp., which is implementing its conviction by providing WNCN-FM New York with 35 hours per week of jazz programming fare—news, live interviews, Broadway, dramatic and literary coverage, plus varied music formats.

CAC officials view their efforts at WNCN-FM as a testing ground for expansion of their service to other radio stations throughout the country. The project was kicked off at WNCN-FM Feb. 1.

**Dough-Re-Mi Data** • The company's arrangement with the station is to supply the programming and receive its compensation on the basis of advertising sold. It is understood that an initial contract, which runs for 18 months, stipulates that CAC will pledge a minimum monetary guarantee. All advertising revenues will be split on a pre-arranged scale. CAC officials said its arrangement has been approved by the FCC, and stressed that the contract specifies that WNCN-FM has final word on programming and will share in syndication rights.

Thomas B. Wilson Jr., CAC president, said that the company, in conjunction with the sales staff of WNCN-FM, is attempting to line up sponsors. CAC believes that its concept of programming jazz material on a continuous basis, five hours a night, seven nights a week, will heighten sponsor identity. With slight variations, the programming is on a Monday-through-

CBS Labs' develops 'Photoscan' system

CBS Labs, Stamford, Conn., last week announced the development of an all-electronic, high resolution to reconnaissance system for use in combat surveillance. It is called the Photoscan System and is said to be the "first" of its kind.

Dr. Peter C. Goldmark, president and director of research for CBS Labs, said the system is capable of "virtual instantaneous transmission" from manned or unmanned vehicles to other airborne relay stations or to ground receiving equipment. He noted that Photoscan provides "far higher definition than conventional television techniques," which have approximately 500 lines of resolution while the Photoscan picture has more than 10,000 lines.

He explained that in the Photoscan System, an entirely new type of airborne electronic scanner, processes the visual image obtained from an aerial camera or other sensing device and converts the image to an electronic signal. The signal then is transmitted to another airborne relay station or directly to the specially designed receiving equipment on the ground. New image enhancement techniques, he said, are applied to the signal before reconstituting the original image for nearly instantaneous viewing and storage on film.

One of the key components of the system, he said, is a cathode ray tube developed and produced by CBS Labs—the Line Scan tube. He claimed the tube represents an "entirely new approach" to scanning and transmitting photographic or other visual information and is the only known device which permits the transmission and reception of such material, regardless of the amount of detail and with no loss of resolution.

Radio-tv sets up

Radio and tv set production and sales for the year 1959 continued an upward spiral—with radio taking a zooming jump in production (the highest since 1948) and a modest increase in retail sales and with tv moving upward in both production and sales.

Here are the year-end figures reported by Electronic Industries Assn. last week:

First Choice
For Lasting Economy

Precision design and rugged construction to meet the exacting, professional requirements of the broadcast industry assure long, trouble-free life for true economy.

Consistently high performance and virtually trouble-free operation of the Ampex 351 have established it as the first choice of not only broadcasters, but educators, professional recording studios, research laboratories, religious and business organizations.

Actual case histories document the fact that Ampex, on a cost-per-operating-hour basis, is the most economical recorder made. Write for new comprehensive catalog 2032.

Ampex Professional Tape Recorders have been selected for official use at 1960 Winter Olympics, Squaw Valley, California

Audio Products Division
Ampex Professional Products Company

Broadcasting, February 15, 1960
• Don Graham, formerly news director with WCFI Chicago, who for past year operated own pr firm there, named midwest division merchandising representative for Paramount Pictures, N.Y.

• Thomas Wolf, partner-writer-producer with U.S. Productions, N.Y., to produce new Tomorrow series for CBS-TV.

Equipment & Eng'ring

• Marvin R. Zidel, formerly sales manager with Bell Electronics Corp., Los Angeles, appointed U.S. distributor sales manager of Pacific Semiconductors, Culver City, Calif.

• Fred H. O'Kelly Jr., New York regional manager on corporate marketing services staff for Raytheon Co., Waltham, Mass., appointed marketing manager of commercial apparatus and systems division.

• James O. Weldon and Lee D. Webster both elected to board of directors of Ling-Altec Electronics, Dallas. Mr. Weldon, president of Continental Electronics Manufacturing Co., subsidiary of Ling-Altec, also promoted from vp to executive vp. Mr. Webster is vp and secretary-treasurer of Ling-Altec.

• Carl Boyer Jr. appointed chief engineer of Rubicon Instruments Div., Philadelphia, subsidiary of Minneapolis-Honeywell Regulator Co. He previously was elevation engineer for firm's Brown Instruments Div.

• John Soldavini named controller at Foto-Video Laboratories Inc., Cedar Grove, N.J.

• Dr. Leon S. Nergaard and Duane C. Brown named 1959 recipients of RCA's David Sarnoff Outstanding Achievement Awards in Science and Engineering. Dr. Nergaard is associate laboratory director of RCA laboratories, Princeton, N.J. Mr. Brown, data reduction analyst with RCA service company at Atlantic Missile Range, Patrick Air Force Base, Fla.

• James D. McCracken joins Packard Bell Electronics as assistant to sales manager, Home Products Div. Larry J. Konrath, formerly chief accountant, named controller.

• Dale Matheny appointed sales supervisor for northwest district of Audio Products Div. of Ampex Professional Products Co., Redwood City, Calif.

• Frank K. Clark Jr. appointed chief engineer of M.C. Jones Electronics Co. Bristol, Conn., subsidiary of Bendix Aviation Corp. Jones company manufactures test equipment for monitoring radio frequency coaxial transmission lines.

• James Hannum, formerly of Hughes Aircraft Co., appointed manager, communications research of Houston Fearless Co., Los Angeles.

• Van M. Stevens Jr., advertising and sales promotion manager for marine products, Raytheon Co., Waltham, Mass., named assistant to corporate director.

International

• Jack Davidson, executive vp of CKY Winnipeg, Man., named manager of new tv station at Winnipeg, which was recommended for license Jan. 30 by Board of Broadcast Governors (Broadcasting, Feb. 7). R.E. Moffat, president of CKY Winnipeg, will be technical advisor for new tv station.

• Donald H. Hartford, sales manager of CFAC Calgary, Alta., named acting manager, succeeding A.M. Cairns, appointed vp and general manager of CHCT-TV, that city.

• Ken Marsden, promotion manager of CFRB Toronto, Ont., named assistant to president.

• Brian Jupe named radio-tv director of McConnell, Eastman & Co., Winnipeg, Man., office.

• Andy Irwin to sales department and Glen Garvin to promotion department of CKNW New Westminster, B.C.

Deaths

• Joseph R. Stauffer, 62, head of tv development at N.W. Ayer & Son, N.Y., until retirement last Sept., died Feb. 7 in Stamford, Conn. He joined Ayer as manager of radio production department, producing many series, most notably, the Telephone Hour.

• Eugene W. Castle, 62, founder of Pacific Coast division of Fox News and founder of own firm, Castle Films, died Feb. 9 in New York.

• Ford L. McGraw, 49, member of technical staff of KNCA(TV) Los Angeles for past seven years, died Feb. 8 following short illness.

• James E. Wemple, 40, account executive with KRCAC(TV) Los Angeles, died Feb. 8 from injuries sustained in automobile accident.
INTERNATIONAL

FEB. 26: PAY TV GOES CANADIAN

2,000 subscribers signed so far for service in Toronto suburb

Canadians get their first look at pay television on Feb. 26 when around 2,000 or so subscribers in Toronto’s suburban Etobicoke can drop their money into coin boxes to watch film programs.

One thing subscribers have been promised is a live closed circuit TV sporting event on Feb. 28, when the Toronto Maple Leaf hockey team plays the New York Rangers in the latter city. The game will be brought to the pay TV viewers in full at a cost expected to be $1 per set.

Early this month about 2,000 subscribers had signed up for the service in what has been estimated to be the fastest growing area in Canada. The Etobicoke western suburban Toronto area is claimed to have an immediate potential of 13,000 pay-TV homes, and TCT estimates the eventual potential of the area is 40,000, within a five mile radius of the studios.

Decided by Survey • As the result of a national survey the Toronto area was chosen as the first test for Trans-Canada Telemeter, a division of Famous Players Canadian Corp., which is affiliated with International Telemeter Corp. and Paramount Pictures Inc. Toronto viewers already have a choice of five TV stations: CBLT (TV) Toronto (ch. 6), CHCH-Tv Hamilton, Ont., (ch. 11), WGR-Tv (ch. 2), WKBW-TV (ch. 7) and WBEN-TV (ch. 4), all of Buffalo, N.Y. Toronto has the highest concentration of TV sets in Canada. There are about 350,000 sets in the metropolitan area (population of about 1.6 million) in a 240-square-mile area north of Lake Ontario. Toronto has the biggest Canadian income tax source per capita, has far more moving picture theatres than any Canadian city, and has always been a theatre-going urban area.

“Basically our plan is to extend the theatre box office into the home with current pictures from all major studios,” E.E. Fitzgibbons, operating head of Trans-Canada Telemeter, said. “We will also have live community programs from the studios of interest to the people of Etobicoke. These and public service shows will be free. There will be a Community Hour magazine type show, and we have arranged with the local ministerial association and others for discussion programs.

“The film and live entertainment shows will be available on two of the three channels on the coin box. Dependent on the picture, we plan to change programs about twice a week on each channel. Some pictures may be changed as often as three times a week, others once a week.”

Several methods will be used, especially the first few months, to make sample checks on viewing. This is to be done by telephone survey of subscribers and by collecting a sample number of coin boxes at frequent intervals, rather than on a monthly basis.

Installation: $5 • Subscribers pay a $5 installation charge. There are no further fixed payments. All other receipts will come to TCT by way of the coin boxes installed. About 100 miles of coaxial cable have been laid by Bell Telephone Co. of Canada under contract at a cost to TCT estimated at $300,000, with line charges to follow.

Just ahead of the cable crews TCT salesmen have for several months been canvassing the area. To date Mr. Fitzgibbons said, only three people have refused installation on the grounds they were against pay-tv in principle. TCT has opened its studios to visitors.

TCT hopes to have 5,000 subscribers by early summer. Plagued by the steel strike, sleet storms and other delaying actions, it expects to have 1,000 subscribers ready with coin boxes when it begins operations. Enough coin boxes are now arriving from the U.S. to meet installation needs.

Famous Players Canadian Corp., is financing the entire operation at Etobicoke. It has the co-operation of all major film companies and neighborhood theatres, even to the extent of being able to program the same picture being shown at a local theatre. On later installations local theatres may be asked to participate financially, and franchises may be given in various localities.

Break Even Point • The company estimates that if subscribers spend an average of $2 weekly to see films and live theatre or sporting events, it will be able to break even with 5,000 subscribers. This includes fees for film rental, theatre or sporting event costs, line charges and studio operation.

It was planned when the Etobicoke
The installation was first announced last June that commercial advertising would be sold for use on the free community programs. This idea has now been abandoned, and there will be no advertising of any kind sold as it begins operation.

Coin boxes set on top of the TV set.

The box has three dials and a coin collecting mechanism with a magnetic tape, recording every program paid for. The collecting mechanism and tape form a sealed unit to be collected every 30 days and replaced with another unit. The tape is audited by computer to tell TCT officials what programs were sold.

The subscriber can turn the center knob to “On” and from the left-hand knob learn the programs available on A, B and C channels, with time and cost. This left-hand “barker” dial is free, and is operated on a continuous tape from the studios.

**To Get Program** — To receive a program the subscriber turns to ch. 5 at Toronto, selects the A, B or C channel on the Telemeter center knob, and turns the right-hand knob to “Telemeter.”

The coin box takes coins up to 50 cents, and has two small windows, one showing the price of the show, the other a credit in the subscriber’s favor, if any (see picture, page 151). Either the right amount of money can be dropped in the coin slot or a larger amount can be deposited, which will show on the credit window. Dropping the coins actuates a magnetic tape which records the transaction. The credit can be used on the next paid show by pressing a credit button near the coin slot. This will reduce the amount showing in the price window.

Subscribers can switch at any time from pay-TV to free TV programs by turning the right-hand knob to the broadcast position, and can switch back to the paid program for its duration, provided the center A, B or C channel selector is not moved. Moving it wipes out the amount paid for the show and cuts off that channel.

**Live Studios** — Live community shows will come from the 18 by 25 foot studio, equipped with television cameras. Here also will be made community announcements and other public service programs.

The studio at 3010 Bloor St. West, is also equipped with a Video Tape Recorder and a console which can control and mix three simultaneous pictures or television programs and four simultaneous sound programs. It was designed and built by A.G. Day, Telemeter’s executive engineer.

Chs. A and B will be used for feature films and live theatrical or sporting programs. Films will be shown twice each evening, just as in a movie theatre, and the one payment will allow viewing all evening of such a film. This enables a subscriber tuning in after the start of a picture to see its continuation. Both black and white and color films are being shown.

Special electronic controls permit large-screen films without distortion for the average home TV set. The top and bottom of such films will appear expanded on the TV screen, filling in the entire area, rather than making for a black line at top and bottom without the electronic controls. There will be contraction at the sides when words appear so that all letters will show on the television screen. The controls were developed by Telemeter’s staff.

**Theatre Chain** — Famous Players Canadian Corp. and its associates operate more than 376 motion picture theatres in all 10 provinces of Canada, constituting the largest circuit of theatres in the country. It has been in business over 40 years. More than 8,000 Canadians are shareholders in the corporation.

The company also has almost 50% interest in three Canadian television stations: CFDM-TV (French) and CKMI-TV (English) Quebec City, Que., and CKCO-TV Kitchener, Ont. President and managing director is J.J. Fitzgibbons, Toronto, who also has a qualifying personal interest in each of these television stations.

When TCT announced its plans at Toronto last June, J.J. Fitzgibbons said: "We feel that pay-TV will reach the 'lost' theatre audience and will develop a totally new audience. If they won't come to the theatre, we will bring our entertainment to their homes—through the electronic theatre provided by pay-TV."

**USIA reports the foreign TV picture**

Television was 'booming' abroad in 1959, with 349 new stations and nearly 10 million TV sets added during the year, the U.S. Information Agency is reporting today (Monday).

Covering all foreign countries except Canada (also excluding Armed Forces stations), USIA reports that there now are 1,088 foreign TV stations (up 47% over 1958) serving 32,090,000 receivers (up 40%). During 1959, 282 new stations began operating in the Free World and 67 behind the Iron Curtain. All told, there are 189 stations operating under communist control, 136 in Russia proper.

Italy showed the largest 1959 growth, with 91 new transmitters going on the air. West Germany had 61 new outlets, Russia 45 and Japan 38. At the end of the year, 56 countries had TV station. Seven countries—Chile, Haiti, Honduras, Panama, Lebanon, Nigeria and New Zealand—put their first TV stations in operation during the past year.

The number of foreign TV sets increased by 9,250,000 million, 7.2 million in the Free World. Total Free World sets at the end of the year reached 26.8 million, with 5.3 million behind the Iron Curtain. England leads with 10 million sets, followed by Japan, West Germany, Italy and France. USIA reported that Russia has 4 million TV sets in use.

**• Abroad in brief**

**CBC budget** — Canadian Broadcasting Corp., was allotted $71,739,400 for the fiscal year 1960-61 in the official Canadian government estimates announced at Ottawa on Feb. 4. This is up $2 million from the current fiscal year, ending March 31, in which CBC was allocated $69,641,975. This covers operating expenditures of CBC and the international shortwave service CBC operates for the Canadian government. In addition CBC receives revenue from commercial advertising on both radio and television.
Big campaign for little cars

A couple of KPOA Honolulu personalities were clowning at an island party awhile back. An automobile dealer saw them and an act was born that may tax the talent before the month is out.

Last Monday (Feb. 8) at 6 a.m. George Kerster and Tom McCollum, went on as Tom & Jerry in the sign-on of a non-stop, 30-day campaign for HAX Automotive & Finance Co., Honolulu dealership in the German DKW car. Monday through Sunday, Tom & Jerry will originate 18 hours a day from the roof of the corner building downtown where HAX is located, while hula dancers, Tahitian dancers, musicians and other Hawaiian acts entertain in the sponsor's car lot. At midnight, the show switches back to the KPOA studio, adding six hours to the regular 18-hour broadcast day this month.

Perry W. Carle, general manager of KPOA, says the promotion is the largest automotive schedule ever placed locally, amounting to $21,000. In addition, HAX has brought schedules on two other am's and a four-week half-hour series on KONA (TV) Honolulu.

HAX' marathon on KPOA got a two-week buildup in all media. The Honolulu station, one of the Founders Corp. group (WFBL Syracuse and WSBN New Orleans), is on 650 kc with 10 kw.

Power boost campaign

WFYI Mineola, N.Y., in the days preceding a switch to 10 kw is lining up listeners in a "Bumper to Bumper Club." For the membership drive, the station has tie in with the 10-day Long Island Home Exposition, which annually draws 100,000 to the Roosevelt Raceway and Shopping Center where WFYI studios are located.

At the WFYI exposition booth, members are given buttons and the station sends them bumper strips plugging its traffic information service. Later station spotters give a silver dollar to any motorist with the bumper strip on his car and two dollars if he is wearing his membership button. The WFYI news gathering facilities are featured in an exposition exhibit which includes pictures of its sky patrol plane and foreign correspondents for the Herald Tribune Radio Network (WFYI, WVOX-AM-FM New Rochelle, WVIP Mount Kisco and WHQ Saugerties, all New York).

*Drumbeats*

WFYI's fringe audience • It looked as if hundreds of people would have to be turned away from Carnegie Recital Hall in New York, Feb. 6 when WFYI there, sponsored its seventh annual $50,000 celebration • Martin Block, veteran air personality of WABC New York, celebrated his 25th anniversary as a broadcaster Feb. 3 by raising $50,000 for the Heart Fund. Mr. Block broadcast an 11-hour auction selling personal items of famous entertainers to the highest bidder. Pat Boone (l) is shown presenting a pair of his famous white buckskin shoes to Mr. Block for auction. Highest bid: $3,000 for a Dinah Shore evening gown.

festival of Negro music and drama. After the hall, which seats 350, was filled and people kept arriving, the alert president of WLIB, Harry Novik, rushed to neighboring shops and bought several small radios which he set up in the hall's adjoining rooms. The overflow crowd of some 700 persons was then ushered in to listen to WLIB's two-hour broadcast of the festival.

Choo-choo contest • The Brakeman Bill Lucky Train contest on KNT-T-TV Tacoma, Wash., has built up quite a head of steam with 16,522 entries from area moppets in the first 10 days. Each entry is placed in a revolving drum displayed on the Brakeman Bill program and each weekday, he selects six postcards. The benevolent brakeman calls the kiddy whose name and phone number is on the card and asks him what cartoon character was last seen on the show. The child's voice is heard on the air and if he answers correctly, he is allowed to select one of the Lucky Model Trains which bears a number on its back. This number corresponds to one of the prizes, which range from toys and games to bicycles. Each entrant has more than one chance to win for the winner's card goes back into the drum. The station announces it will continue the contest for at least six months.

Last alarm • KOOL-AM-TV Phoenix is donating a historic 1920 fire engine which it has used for the past six years in parades and at civic activities to the city of Globe, Ariz. The old firefighter originally belonged to Globe and had been used for over a quarter of a century when KOOL bought it. It will be retired to a museum.

Gift of health • In response to a plea for funds from Captain Puget, children's show personality with KOMO-TV Seattle, over 15,000 children and others contributed more than $3,000 towards a hospital in the Paengnyong Islands. Sending coins to help the beleaguered people of the island (which is only 7,000 yards from the Communist North Korean mainland), viewers provided the means to help construct a hospital and pay a doctor to attend the 12,900 natives of the islands.

Logorhea • Disc jockey Coffee Jim Dandy of KDEO San Diego brought forth a deluge of words when he started a contest to see who could make the longest, grammatically correct sentence using only words beginning with one of the KDEO call letters. The winning entry was a breathtaking 1,527-word sentence for which a local housewife was awarded $50.

Ernest E. Harper
Bellingham, Washington

TOP G.M. & PERSONALITY

Seldom does a station or group owner have an opportunity like this—to acquire a first class executive-personality of our man's caliber. In 2 1/2 years, in a very competitive market, he more than doubled our station's billing and tripled its value. Now we have sold the station and plant to take our capital gains, profits and leave the radio field. It means that our President and General Manager—a former network executive and personality—must find another position. This man is an exceptional executive and public spirited community leader. He is 38, married and the father of three children.

If you need a man with ideas, if your sales and programming need building, if you feel your radio property has not reached its full potential, if you are looking for a man equally at home behind a desk, in the street, or in front of a microphone, then contact:

Box 2605, BROADCASTING.

This is the fourth current international broadcast license petition by WSPA-TV (ch. 59) to the Federal Communications Commission (FCC) for a new station to operate on 1460 kc with daytime power of 150 kw for a daytime coverage area of 4.8 million acres in the eastern portion of the state of Texas, including a portion of counties adjacent to the border with Mexico. The petition is for the purpose of expanding the broadcast service of the current station to the public in the area of coverage proposed for the new station and for the purpose of providing additional television channels to the public in the area.

The petition was granted on March 15, 1960, and the new station is to be known as WSPA-TV. The station is to be located in the city of San Antonio, Texas, and is to be operated by the owner of the current station, KWWL-TV (ch. 59), San Antonio, Texas. The station is to be a full-service station, providing news, sports, weather, and other local programming.

Upon the filing of notice of appeal by the owner of the current station, KWWL-TV (ch. 59), San Antonio, Texas, the station is to be operated by the owner of the current station, KWWL-TV (ch. 59), San Antonio, Texas, and is to be operated by the owner of the current station, KWWL-TV (ch. 59), San Antonio, Texas, and is to be operated by the owner of the current station, KWWL-TV (ch. 59), San Antonio, Texas.
Inings involving BROADCASTING, to Wash., install trans. change trans. location, install engineering data for group hearing scheduled for Feb. 9 in proceeding on their am applications. Action Feb. 4.

RCA Magnetic Disc Recorder

Is a Great New Tool for Broadcasters!

It makes possible fast recording and playback of commercials and announcements. Extremely simple to operate, it minimizes the skill required to produce a professional recording. Erasable magnetic discs have a long life, equal to or greater than tape, thus production costs can be reduced. Whatever your equipment requirements, SEE RCA FIRST!
OK, KLM...WHAT'S SO SPECIAL ABOUT YOUR JET?

All sorts of things. Mainly, the friendly things that happen inside the KLM DC-8.

FRIENDLY? And then some! Everybody in the KLM family knows just how to make flying fun for you. Unexpected little pleasures pop up all along the way. Real china at dinner. Shaving and vanity kits. Your own personal towels. Many other welcome touches.

IS IT FAST? COMFORTABLE? Well, the KLM DC-8 cruises at close to 600 mph. Inside it's so quiet you can hear a whisper. Vibration-free, too. And seats perfectly custom-contoured.

WHEN CAN I GO? Anytime from April 1st on. Make your reservations to Europe now and — Whoosh! Wow! Go! — on the KLM DC-8! See your travel agent (professionals plan better trips) or KLM Royal Dutch Airlines.
No one would ever accuse Tom Chisman of walking on eggs.

Walking a tightrope, perhaps. But not eggs. Egg-walkers simply don't practice the art of plain talk the way Mr. Chisman does.

This inborn faculty was whetted on the stone of economic necessity. Mr. Chisman founded and for six years operated WVEC-TV Norfolk-Hampton, Va., as a uhf outlet in a vhf market. Finally, last November, he flipped the switch to put WVEC-TV on vhf ch. 13, thus securing an even stronger position as a significant competitive factor in the broadcast community there. The move to ch. 13 came after merger of three applicants competing for the vhf.

WVEC-TV now is an ABC-TV affiliate, bolstering this service with substantial educational and other local public interest features. It has alternate main studios and full production facilities in both Norfolk and Hampton. WVEC-TV has a radio affiliate in Hampton, WVEC, which Mr. Chisman put on the air in July 1948.

Not Done Alone • Many have showered Mr. Chisman with personal praise for surviving his uhf venture successfully, but the youthful executive nips this exuberance in the bud. Talking plainly he observes he could not have sustained this service to the Norfolk area without "friends" such as General Electric and NBC executives Tom Knodle and Dave Adams (WVEC-TV was an NBC-TV affiliate while on uhf). Among these and others who encouraged him during trying times, he also includes his older brother, J.W.W. (Bubber) Chisman, and his station staff.

The staff of 32 agreed to an across-the-board salary cut in July 1958 (since restored, plus other increases) in order to help WVEC-TV survive. Of this group, 28 are still serving the station. "With loyalty like this, how can an operation fail?" Mr. Chisman asks.

WVEC-TV is in its third year of presenting nearly 2½ hours daily of in-class educational programming for area schools. Some 13,000 pupils are learning American and Virginia history, Spanish, science and mathematics in these tv classes. Last year the Governor of Virginia appointed Mr. Chisman to a special Virginia State Commission on Educational Tv. This body has explored and recommends use of regular commercial tv facilities for educational programming pending any establishment of fulltime educational outlets.

"For our new generation, television will be as important an adjunct to education as the textbook is today. I really believe this," Mr. Chisman says. Education is part of the commercial broadcaster's responsibility to his community, Mr. Chisman asserts, "and he must help." educators learn how to make the fullest, most effective use of this new medium. The Norfolk experiment has been under the auspices of Ford Foundation aid.

The Public Knows Best • Mr. Chisman talks plainly about threats of government regulation of broadcasting. Last month he told the Norfolk Kiwanis Club. "Tv is capable of greatness. However, government regulation will not end abuses in the industry. In the end the public must decide what it wants." He asked his audience, "What right have you to expect to be entertained all the time?" He reminded them, "If you don't like what you see on tv, turn it off. The finest censor you have of television is the on-off button." Even the Chisman children can't watch tv after 7 p.m. on school nights.

It's impossible for a tv station to be "everything to everybody," he notes. "That's why we've concentrated on our educational series."

Mr. Chisman also believes in backing his network "100%." If an affiliate is going to be worth its salt, he says, the network must have full cooperation. This effort is bolstered by strong local service, he stresses.

The Chisman family has been making its mark on the Hampton scene since 1621. Thomas Pescud Chisman arrived Dec. 8, 1921. He was one of six children. Their father died when he was 11, so he learned at an early age some of the economic facts of life. He delivered his share of newspapers, started working at a gas station when 14 and helped earn his way through the U. of Virginia with a variety of business operations. Some of his classmates were announcers at WCHV Charlottesville, Va., marking his first interest in broadcasting.

Starting in Radio • During World II he served as lieutenant (j.g.) and executive officer aboard an LST on ammunition duty in the Atlantic. After the war he worked with his brother in the retail oil business, but felt his future could be brighter in radio. After exploring station operation at WFIL Philadelphia and WCHV, he ventured on the air with WVEC as its president-general manager. He holds the same title now at WVEC-TV.

Mr. Chisman continued his military affiliation as a major in the National Guard 1947-50 and during 1950-52 he was called to active duty as captain in the Army, commanding an anti-aircraft battalion defending the National Capital (he says he frankly would have preferred Korea to his "paper-clip war").

Mr. Chisman has served in a number of executive positions with the Virginia Assn. of Broadcasters, is president for the 1959-60 term. In 1954 he was one of the originators of the Committee for Competitive Television, the national group which fought to strengthen the survival prospects of uhf in the long-established vhf climate. Locally he is one of seven commissioners on the Peninsula Port and Industrial Authority. He is director of the Peninsula Industries Commission and the Peninsula Assn. of Commerce and previously had served with various other civic, business and fraternal organizations.

WVEC-AM-TV have received numerous citations attesting to their part in this community service. On Jan. 29, for example, WVEC-TV aired a half-hour tribute to Hampton on the occasion of its 350th birthday.

Apparently Mrs. Chisman is a plain talker too. Back in 1943, when she was still Miss Martha Pamela Merritt, she received a letter from Mr. Chisman which indirectly speculated about possible discussion of marriage after completion of certain education, establishment in the business world, etc. Her reply: they would be married that October. They were.

The Chisman children include Thomas Jr., 14; Martha Pamela, 12; Lila Elizabeth, 10, and Anne Meriwether Miche, 4. Occasionally Mr. Chisman enjoys his game of golf, but more frequently he's relaxing by swapping notes with his son about sailing and speed boating.
EDITORIAL

He who throws stones

FAIR-minded people are bound to feel that broadcasters and advertisers are being subjected to cruel and unusual punishment.

Admittedly, some broadcasters and some advertisers and agencies were caught napping on quiz program trickery or payola or misleading commercials. But they moved swiftly as soon as the abuses were disclosed. The FCC, although it may have dawdled before, acted as expeditiously as the law permitted. The FTC even more promptly instituted proceedings in its area of authority amid charges it was going beyond the law.

When the stunning disclosures emerged from the House Legislative Oversight Committee last fall on quiz-rigging, there were expressions from high places that the shortcomings should be corrected from within—by voluntary self-discipline—to avoid legislation that might veer dangerously toward censorship. The President, the Vice President, the Attorney General, the FCC, and the FTC, as well as many Congressional leaders urged voluntary action.

And that is exactly what has been happening. Individual broadcasters swiftly took inventory and fired offenders—both in quiz-rigging and in payola. Networks invoked new disciplines to purge their schedules of deceitful or improper practices. NAB strengthened its voluntary codes. Advertisers and agencies convoked extraordinary meetings to clean house and clean up copy.

It seemed all were convinced that broadcasters and advertisers had seen the light—all except the House Oversight Committee. First came its “interim report” (handed out Friday, Feb. 5, but for release on Sunday, usually a dull news day). Then, last Monday, it resumed hearings, snatching headlines on payola, even though the FCC already had instituted rulemaking proceedings to end that and other objectionable practices, and the FTC had been moving almost daily against recording companies, distributors and others on the hand-out end of payola.

How many times does the committee want the broadcasters to say “uncle”? Payola and quiz-rigging are as dead as the hula hoop. They died the day they were exposed. No station would dare risk loss of its license by willfully permitting undercover payments to disc jockeys or smuggled unpaid advertising on its facilities. And if one did, the FCC can take punitive action, not only under seldom-exercised existing regulations but under its proposed new rules, which should be implemented forthwith.

So some broadcasters and some advertisers were duped. It won’t be the last time in our country that such things will happen. The record also shows that some members of Congress (and others in public life) have been indicted for tax evasion, bribery and various forms of payola, like mink coats, refrigerators and oriental rugs. Some, without contributing anything to benefit the public, have gone on junkets at taxpayers’ expense, using counterpart funds for spending money. Some have and do practice nepotism, not necessarily a nefarious practice, but certainly questionable if the government does not get its quid pro quo in services performed. Then there’s patronage wherein unqualified but politically loyal folks have been known to get good-paying sinecures.

The number of Congressmen who have abused their privileges is obviously a fraction of the total Congress. The number of broadcasters and advertisers who have misled the public is a minute percentage of the legions in these proud and hitherto respected professions. It should be noted that Congress has been in business 184 years; radio 40 years and television just about a decade as a full-blown mass medium.

In its “interim report,” the House Committee ignores the maxim that he who is governed least is governed best. It has thrown together a mish-mash of legislative proposals going beyond anything ever seriously entertained by any Congress.

The report is a shining example of inconsistency. After holding that the FCC and the FTC have ample authority to “eradicate most, if not all, of the deceptive and corrupt practices in broadcasting” it reaches the conclusion that broadcasters cannot be relied upon to correct abuses and that all indications “point unmistakably to the need for further legislation.” There are equally muddled observations, legal misinterpretations and non sequiturs.

Chairman Oren Harris says he will seek legislative action at this session. This does not square with what the leadership on both sides has indicated, particularly in the light of early July adjournment in time for the political conventions.

There’s no urgent need, therefore, to discuss the merits of the committee report. It does not constitute legislation. Bills to outlaw payola and fraudulent practices, however, might well be enacted. No responsible broadcaster would offer serious objection. Network licensing and authorization of suspensions or fines present infinitely more delicate problems, and Congress can be expected to move on them with care and deliberation.

There has been a superabundance of loose talk and shallow thinking. The Oversight Committee cannot be denied credit for exposing wrongdoing. It has put broadcasters and advertisers and the regulatory agencies on their good behavior.

The fast and loose era is over. Broadcasters and advertisers, and all media, will find it tougher to do business with the government. They are under surveillance as never before.

All must police their ranks to eliminate the offenders and the charlatans. The alternative will be regulation that will be harmful, restrictive and dangerous to our free institutions.

Based on past performances, the Oversight Committee can be expected to lay it on as long as it can capture headlines from a gloating press. It has $450,000 to spend. And we imagine every subcommittee member feels he can ride the investigation hell-bent for higher political office.

Advertising and advertising media will be judged on the basis of what takes place between now and when the new Congress and administration take over next January. A good start has been made in self-correction. There can be no letdown if onerous legislation is to be avoided.
The South's vast brick industry is another reason why WFMY-TV... located in the heart of the industrial Piedmont...is the dominant selling influence in this $3,000,000,000 market. WFMY-TV serves...and sells in this heavy industrial 54-county area where 2,250,000 people live, work and buy.
