FCC Settles FM Allocations and Rules

53 Stations Get Frequencies; Licensees Have Till Sept. 25 to File

These were the headlines in Broadcasting just 15 years ago.

FCC Finds Total Time Sales Were $246,339,532 in 1944

TIME sales for the major and regional networks and 875 standard broadcasting stations during 1944 totaled $246,339,532, the FCC reported last Friday. The figure compares with $195,054 for the networks and 841 stations in 1943 at 31 kw.

There were more than 31 kw power were reported at 1624, 247, an increase of 24% over 1943. Clear channel unlimited time stations of five to 20 kw power submitted reports at 534 or a gain of 30.3%.

And in the same September 17 issue, there appeared an advertisement highlighting the formation of the predecessor company to Avery-Knodel, Inc.

In the decade and a half that followed, fabulous growth came to this industry. And to Avery-Knodel, too...from six employees in two offices to almost 100 people in seven strategically located offices...a selling organization fully qualified and really dedicated to sales and service.

With this record of healthy growth, we are pleased to celebrate our Fifteenth Anniversary.

Get it FIRST... Get it RIGHT on Channel FOUR.
CLOSED CIRCUIT

Moment of harmony - What may become museum-piece is slated to appear in newspapers in four major cities next Monday (Sept. 26)—ad signed jointly by all three tv networks. ABC-TV, CBS-TV and NBC-TV, which for legal if nothing other reasons rarely do anything together, reportedly have agreed that instead of promoting Nixon-Kennedy all-network appearance that night in separate ads, they'll do it in single ad carrying all their names. Ad is supposed to run in New York, Washington, Chicago and Los Angeles.

Catalyst bringing networks together was Television Information Office, which also has prepared advertising copy that all of its members may use, either individually or with their tv competitors, in local promotion of telecast.

Shift South - Frank White, vice chairman of McCann-Erickson, is now dividing his time between New York headquarters and expanded Washington operations in RCA Building, 1725 K Street. Reason: greater importance of Washington in lives of advertising agencies and their clients.

Film credits - First step in setting up new Sec. 317 sponsor identification rules in line with provisions of S 1898, signed by President last week, is special informal conference between FCC staff and representatives of motion picture producers. This is scheduled for Wednesday (Sept. 21), with film representatives to be led by Ed Cooper, tv specialist of Motion Picture Assn. FCC feels movie point-of-view important, since some Hollywood practices may have strong impact on responsibility of licensees.

Traditional Hollywood practice of manufacturers supplying motion picture studios with virtually any product without charge in exchange for its use in picture is causing Hollywood lawyers to pore over text of new anti-payola law to see whether this practice would have to be dropped or altered to permit sale of theatrical films in television.

Public issues - At least two multiple owners in tv and radio are contemplating “going public” in near future. They are awaiting favorable market climate before filing proposals for public issues with Securities & Exchange Commission.

Job ending - With issuance of recommendations in Miami ch. 7 ex parte case (see page 71) special examiner Horace Stern, retired chief justice of Pennsylvania Supreme Court, who has been handling such cases for FCC, is expected to announce resignation from special job. Judge Stern is 82 and has handled three such hearings in addition to Miami ch. 7; Miami ch. 10, Boston ch. 5 and St. Louis ch. 2. Commission has issued final orders in only two; Miami ch. 10 and Boston ch. 5.

Interesting sidelight to resignation of FCC associate general counsel Edgar W. Holtz who has been special counsel in ex parte cases (see page 71). He announced resignation last Monday, two days before special examiner Horace Stern came out with initial decision on Miami ch. 7 case, which recommended voiding grant to WCKT (TV) there and disqualifying it, as well as two other applicants, from further consideration for channel. Counsel for WCKT is Hogan & Hartson, law firm which Mr. Holtz is joining.

Canned guitarists - Fifty-station Country Music Network, New York, is gearing to add “recorded-network” programing to structure which so far has been limited to joint selling in conjunction with Charles Bernard Co., New York, station representative. Basic operating tool for CMN, survey of country-Western market, will be unveiled tomorrow (Sept. 20) by Dr. Sydney Roslow of The Pulse at presentation in New York for agencies and advertisers.

Before the blow - In San Francisco Chronicle application for ch. 4 Washington, D.C., now licensed to NBC's WRC-TV (BROADCASTING, Sept. 12), there's correspondence between Harold P. See, general manager of Chronicle's KRON-TV San Francisco, and RCA (NBC's parent) regarding equipment for new tv station "in undisclosed location." RCA assistant credit manager voiced pleasure at receiving inquiry, saying "We are happy to learn of your plans."

British viewer - Charles Fletcher-Cooke, Conservative member of Parliament, who participates in weekly panel television programs over Britain's Granada network, is making study of part tv and radio play in U.S. national elections. He is member of Queen's Council and attended American Bar Assn. sessions in Washington three weeks ago. He participated in panel that examined relationship of television programs to crime rate.

Options slipping - Though FCC's order of cut in television option time took spotlight last week (see page 31), option time on one radio network—Mutual—is heading downward voluntarily. Mutual has required its affiliates to carry six-and-one-half hours for religious programming on Sunday. Reports are that MBS is notifying stations that network is dropping option time on Sunday, and stations now may elect to carry or drop religious programs. Mutual's format provides for feeding affiliates two five-minute newscasts hourly, with affiliates selling one segment and keeping revenue and Mutual selling other and retaining payment.

Nomenclature - CBS Radio Division has run into name problem with its new "Dimension" programming, collection of short features that CBS-owned radio stations drop into local shows to "differentiate" those stations from other outlets (BROADCASTING, Aug. 29). Seems that Westinghouse Broadcasting Co. is claiming its WBZ-TV Boston has had weekly half-hour known as Dimensions for about 10 years and that its KYW Cleveland has had one under same name for four. WBC and CBS officials are talking it over. CBS officials say they don't expect it to involve "trouble."

Trend to comedy - CBS Films is pinning its network sale hopes on situation comedy in 1961-62 season. Production firm, which this season will have Angel (situation comedy, licensed to CBS-TV and in Thursday night schedule) as its only network entry, has earmarked additional six series for '61-62, all of them situation comedies.

New entry - H&B American Corp., which recently acquired nine cable systems from Jerrold Electronics for $5 million (BROADCASTING, Aug. 15) contemplates expansion in licensed broadcast field (both radio and tv). Company disposed of two non-communications interests last week. David E. Bright, board chairman, last January acquired control of KFBB-AM-TV Great Falls, Mont. Charles L. Glett, veteran west coast broadcast executive resigned vice presidency of National Theatres & Television Inst June to become president of H&B American Corp., and its subsidiary, Transcontinent Communications System.

Bonanza - Musings of radio-tv specialists in presidential campaign: Free time on barn-storming and whistle-stopping trips is being offered in profusion. Stations apparently are operating on basis that when in doubt, give 'em time. Everywhere there's concern about required reports to FCC on political time.
month after month...
NO 1 in the
4 station
Detroit market

ARB says:
FIRST

First in overall share-of-audience every ARB book since November, 1959, Channel 2 has led the audience race in Detroit, month after month, with leads ranging up to 22% greater share than the No. 2 station 9 a.m. to sign-off, Sunday thru Saturday. (May, 1960)

NIELSEN says:
FIRST

Month after month Channel 2 has led the parade in Nielsen as well. First in share-of-audience for four out of the six three-hour periods for May-June, 1960, with 50% more total rating points than the No. 2 station in June ... First in ALL SIX three-hour periods in July, and also First in 31 out of 38 quarter-hour periods, Monday thru Friday, 7:30 a.m. to 5 p.m. in July.

WJBK-TV
A Storer Station

NATIONAL REPRESENTATIVE: THE KATZ AGENCY
A rebuttal in behalf of radio ■ When L.S. Matthews of Leo Burnett Co., Chicago, discussed "How can radio be sold more effectively?" in his Aug. 22 MONDAY MEMO, he didn't expect that Newark agencyman Jay Victor would disagree rather tartly with some of his comments. For that matter, Mr. Matthews may not know the man from Newark. But Jay Victor is very much alive. And it appears that his 20 years of radio experience sort of choked up on him a bit when he stumbled upon a few of the verbs, nouns and adjectives that Mr. Matthews had assembled to convey his thoughts on certain problems in radio today. Of course, not everyone had this reaction. However, for Mr. Victor's, turn to page 18.

Option time cut by 30 minutes ■ A split FCC issues final order on option time, reducing it from the present three hours to two-and-a-half hours. Order also boosts pre-emption time notice to 17 weeks and asserts the right of stations to refuse programs even after a series has been accepted or to substitute local programs for network programs virtually at will. Commission withdraws proposal to force "straddle" programs to be counted in option time. Page 29.

tv vogue ■ Fall fashions previed on electronic runways, as retailers follow Macy's into television with local specials. Page 32.

Radio success in Denver ■ First Federal Savings & Loan Assn. rockets upward as a result of sponsorship of radio newscasts on KOA Denver. Page 49.

A matter of money ■ Republicans, running short of funds, delay purchases of time for campaign television and radio hookups. Final details of the Nixon-Kennedy telecast Sept. 26 are settled at a Chicago session. Page 54.

Another pay-tv battle ■ FCC orders a second hearing on pay tv, using RKO General's Connecticut application as a base. A Theatre Owners of America meeting was told pay tv would mean the death of the motion picture theatre. Page 58.

Cashbox in Toronto ■ Check by BROADCASTING of wired tv service shows the service is a selout for the experiment. Viewing falls off during the summer, however. Page 58.

Stern throws book in Miami ch. 7 case ■ FCC Hearing Examiner Horace Stern lives up to his name in Miami ch. 7 ex parte case. He recommends that the 1956 grant to Biscayne Television Corp. be voided and that Biscayne as well as two other applicants be disqualified for off-the-record contacts. Page 71.

Aviation agency rises to plague broadcasters ■ New rules by Federal Aviation Agency take over, it's believed, question of radio-tv towers. Proposed FAA rules conflict with FCC practice for last decade which reserves final decision on issuance of broadcast permit, including question of air obstruction, to communications agency. Page 78.

NAB's fall conferences ■ The autumn series of eight meetings starts Oct. 13 in Atlanta. NAB staff executives are completing program plans. Page 84.

* Area Potential
Nets split on free campaign feeds

Networks are divided into two camps on question of feeding Nixon-Kennedy radio-tv joint appearances live to independent stations in areas where they have their own affiliates. NBC will, CBS and Mutual won't, except on usual one-day delay basis to protect their own affiliates. ABC was reported Friday to be inclining toward will-do camp but officials there said definite decision hadn't been made. NBC's only charge will be for any special lines involved. CBS and Mutual, while protecting own affiliates, will feed to any market that cannot get Nixon-Kennedy broadcast otherwise (through affiliates of other networks, for example).

All four network organizations meanwhile designated newsmen—one from each—who will represent them as panelists on first joint appearance next Monday, CBS, which will produce that broadcast, named Howard K. Smith moderator (BROADCASTING, Sept. 12) and Stuart Novins as its panelist; ABC designated Robert Fleming as panelist; NBC, Sander Vanocur, and Mutual, Charles Warren.

After next Monday's joint appearance, 9:30-10:30 p.m., timing of other Nixon-Kennedy all-networks broadcasts will be: Oct. 7 and Oct. 13, 7:30-8:30 p.m. and Oct. 21, 10-11 p.m. (all times EDT).

WNEW New York, independent, will carry Sept. 26 program live, picking up from NBC.

WBAZ to ignore Khrushchev UN visit

WBAZ Kingston, N.Y., decided last week to give short shrift to Premier Khrushchev's UN visit. Except for telling listeners of his arrival and departure, and unless something of significant nature develops, station plans silent treatment. Other Communist leaders at UN meeting this month will get minimum coverage in WBAZ newscasts.

Jack Marquardt, station news director, said Friday that announcement of these plans resulted in "many letters, calls and telegrams in support of the move." As far as WBAZ is concerned, Khrushchev's visit is "not particularly newsworthy," he said. Radio Free Europe called Mr. Marquardt Friday morning and planned to broadcast taped interview with him behind Iron Curv...

Cleric applies

Proverbial faith of ministers was exemplified Friday when Rev. Robert M. Parr, pastor of Detroit's Gilead Baptist Church, filled application with FCC for ch. 62 in Allen Park, Mich. Mr. Parr, who filed in own name, estimated cost at $32,600, expenses first year at $40,000 and prospective income first year at $50,000. Minister spelled out net worth at almost $114,000, reported he had all equipment on hand. He proposed regular commercial operation, with emphasis on local programming, including news coverage and church and club affairs.

Two Kemper series on NBC-TV aid agents

Commitment by Kemper Insurance Cos. for one-hour, twin-program spread on NBC-TV starting Sept. 25 was described Friday by C. R. Bishop, advertising manager, as supporting agency system among insurance firms. Two series (Chet Huntley Reporting and Celebrity Golf) on 26 Sundays are expected to reach 9.5 million viewers, providing agents in coverage area "with prestige television programming to help pre-sell top insurance prospects." Programs represent investment of nearly $1 million in support of system. Kemper has used tv advertising past four years as "most dramatic means of supporting agents," it's noted by Clinton E. Frank, agency handling account.

ARB plans seven national Arbitrons

American Research Bureau will provide Arbitron overnight national tv ratings for seven weeks during coming season, with NBC as first customer, ARB announced today (Sept. 19). Originally ARB had hoped to provide overnight Arbitrons on regular daily basis, but signing of all three tv networks with A.C. Nielsen Co. curtailed plans to seven weeks, at least for present (CLOSED CIRCUIT, Sept. 5).

Those seven will include four in heart of introductory season for new fall programming (Sept. 18-24, Sept. 25-Oct. 1, Oct. 2-8 and Oct. 16-22), plus Nov. 13-19 and, next spring, March 17-24 and April 1-7. Overnight nationals will be in addition to ARB's regular seven-city Arbitrons and diary-based national reports.

Congress pressures cited by Lishman

Congress and administration often interfere in impartial rule-making functions of regulatory agencies, Robert W. Lishman, chief counsel of House Legislative Oversight Subcommittee, said in talk to committee of Federal Bar Assn. in Chicago Friday.

He said members of Congress have interceded in such cases in behalf of constituents or supporters and executive branch has used appointive and budget-control power to bend agencies to its will.

Mr. Lishman said Congress can relieve some of pressures by giving agency people better salaries, and realistic expense accounts and other incentives so they can resist "blandishments" from outside.

Liberal FCC stand on uhf cps urged

Call for sympathy on behalf of uhf grantees who have held on to cps without building for many years has been placed before FCC weeks before oral argument on requests for extensions of permits, which is scheduled to take place Sept. 23. Request for liberal attitude was made by four uhf cp-holders: WAZA-TV Hazleton, WQCY (TV) Allentown, both Pennsylvania; WEHS-TV Chicago, Ill., and WHLS-TV Port Huron, Mich.

At same time, WERE-TV Cleveland, one of 30-odd uhf grantees ordered to oral argument on request for extension informed commission it was surrendering cp. FCC in February notified 54 uhf grantees that requests for extension would be turned down unless they showed good reason why they haven't built. On June 3 it ordered 31 to hearing.

WHDH-TV asks delay

Boston Herald-Traveler went to court Friday seeking judicial order which would force FCC to stay its July 14 decision voiding WHDH-TV Boston grant. Herald-Traveler wants
effectiveness of decision held in abeyance until court rules on its appeal. Meanwhile Herald - Traveler's petition for reconsideration filed with FCC Aug. 15 was opposed by two parties to three-year-old case: Massachusetts Bay Telecasters Inc. and FCC's general counsel. FCC's July 14 order voided the grant to Boston newspaper on grounds its principals had engaged in off-record talks with commissioners. Commission said, however, WHDH-TV could remain on air temporarily until it made new decision in case.

Porter criticizes news suppression

Decisions to suppress information are made by government attorneys rather than heads of agencies, former FCC Chairman Paul A. Porter told Federal Bar Assn. in Chicago Sept. 15. Appearing on panel at three-day convention in Conrad Hilton Hotel, Mr. Porter claimed “suppression is also felt to be easiest by some agency heads because disclosure might lead to criticism of the agency in Congress or show its inefficiency.”

He held that government attorneys want to extend scope of information and favor fourth category of privileged or classified information—relating to “the interest of efficient administration.”

Mr. Porter predicted courts eventually will recognize it but to “more limited” degree. He urged courts to adopt requirement that government state specifically why certain information should not be disclosed, noting judiciary trend toward greater privilege for government. Mr. Porter is now engaged in private law practice in Washington, D.C.

**WEEK'S HEADLINERS**

Alvin E. Unger, vp in charge of syndication at Independent Television Corp., joins UPA Pictures as national sales head. He is building sales staff to handle syndication of Mr. Mongoo and Dick Tracy. He will headquarter in New York.

David C. Stewart, with Kenyon & Eckhardt for 15 years, most recently as executive vp and treasurer, elected president of agency in new top management alignment. Also affected: William B. Lewis, formerly president, elected chairman of board, succeeding Edwin Cox who becomes chairman of executive committee. Mr. Stewart was corporate officer and director of several companies in oil industry before joining K&E just after World War II, was elected secretary and general manager in 1947, named director in 1949, elected treasurer and member of executive committee in 1952, elected senior vp and treasurer in 1956. He has been chairman of K&E's management review board and member of plans board. He was elected to newly-created post of executive vp in 1958, in which capacity he was operations head of K&E.

George J. Abrams, who resigned last month as president and chief executive officer, cosmetics & toiletries division of Warner-Lambert Pharmaceutical Co. (Broadcasting, Aug. 15), has joined The J.B. Williams Co. as vp effective Oct. 1. He will report to Matthew B. Rosenhaus, president of J.B. Williams (formerly Pharmaceuticals Inc.). Mr. Abrams was with several companies including Block Drug Co. (vp of advertising and sales) and with Revlon for four years leaving in February 1959 as advertising vp.

**For the birds**

New use for fm multiplex subchannels—chasing starlings—was revealed to FCC Friday by Dwight Harkins, owner of Harksins Radio Inc., Phoenix, Ariz. Working with Bud Boudreau, Phoenix pipeline-and-pump man, Mr. Harkins has tested use of tape-recorded starling distress calls, with portable transistorized multiplex equipment broadcasting sounds over 1,000-acre field. Playback of distress sounds is described as having memory effect. FCC discussions were held preparatory to filing application for permit to use device. Mr. Harkins is former owner of KTYL-AM-FM-TV Phoenix.

**Telemeter to stage technical test**

International Telemeter Corp. asked FCC Friday for permission to set up six months' experimental technical test in Saugus, Calif. Company, developer of Telemeter system of coin box pay tv, estimated it would spend $46,700 on equipment and about $25,000 for operations. In addition it is leasing land at $250 per month. Purpose of test, ITC said in its application, is to test out new developments which have been incorporated in its system during last two years. It also wants to test transmissions in hilly terrain around transmitter site. It asked for 60.25 mc, with 1.25 w; 61.25 mc with 5 w, and 65.75 mc with 1.25 w. All these frequencies are part of ch. 3.

Telemeter system is method being used in Toronto system which began last February (see story on page 58). ITC is subsidiary of Paramount Pictures Inc.

**Religious debate**

Two clergymen will debate campaign religious issue today (Sept. 19) on KMOX St. Louis, CBS-owned outlet. Rev. Frank Kellogg, pastor of Maplewood Baptist Church, will debate with Father David Bayne S.J., research associate of Institute of Social Order of St. Louis U. and former dean of U. of Detroit law school. Topic will be “Should religion play a role in the presidential campaign?” Debate will be heard during At Your Service program, starting at 3 p.m. Transcript will be made available by KMOX, according to Robert Hyland, KMOX general manager.

Ad week extended to 12-month basis

Advertising Federation of America board decided Friday to extend annual Advertising Week to year-round, continuing campaign. McCann-Erickson is task-force agency, kicking off campaign during previously announced Ad Week, Feb. 5-11. Emerson Foote, M-E president, is national plans chairman. George W. Head, advertising director of National Cash Register Co. is Ad Week committee chairman; Hugh Collett, executive assistant to AFA president, is campaign director.

Decision to extend Ad Week follows closely intensified pre-election program to improve advertising's image in eyes of legislators at all government levels, national, state and local.
The NEW Keystone Market...

Served BEST by the Keystone U's

Harrisburg, Lebanon, Lancaster and York comprise the new Keystone Market in the Keystone State . . . served BEST by the Keystone U's.

The three Keystone U's, now available as a group buy with one billing, can deliver* more homes at lower cost-per-1000 than the VHF station in the market. Buy the Keystone U's . . .

"IT WAS A WHALE OF A SALE!" said the fellow who gained fame by selling refrigerators to Eskimos. He thought he'd be "in solid" with the igloo and kayak trade, but he didn't cut enough ice for repeat business in our 49th State. He learned that, unless the sales impact is delivered where it counts, the man who thinks in terms of seals must settle for whale blubber.

Whether you're selling refrigerators, rockets, or raisins in Kansas, KTVH delivers local programming impact where it is important. This exclusive CBS-TV affiliate for Central Kansas reaches the audience that counts, delivering The News at 6 p.m. and 10 p.m. and The Weather and Sports at 10:15 p.m. to more Central Kansas homes* than any other TV station. KTVH covers a GROWING market that is already more prosperous, more densely populated than Alaska. To sell Kansas...buy KTVH.

SEPTEMBER

Sept. 18-21—American Radio Television Francaise annual meeting. Alpine Inn, Ste. Mar- querie, Que. Among the speakers will be Dr. Andrew Stewart, chairman of the Board of Broad- cast Governors, and Murray Brown, CFPL-AM- FM-TV, president of the Canadian Assn. of Broadcasters.

Sept. 20—Academy of Television Arts & Sciences, Hollywood membership meeting. 8 p.m., Beverly Hilton, Beverly Hills, Calif. Steve Allen, Dr. Frank Baxter, Sheldon Leonard, Rod Serling, Bill Stout and David Susskind will discuss "Should Celebri- ties Be Seen and Not Heard?"

Sept. 20-21—Atlantic Assn. of Broadcasters annual meeting at Amherst, N.S.

Sept. 21—Chicago Federated Advertising Club luncheon. Morrison Hotel, Jay Berry, vice president and general manager of Alexander Film Co.’s Na- tional Sales, will show one of top American and European films commercials from 1960 Venus Film Festival.

Sept. 21—Radio & Television Executives Society’s kick-off newsmaker luncheon at the Grand Ball- room, Hotel Roosevelt, 12:30 p.m., features ad- dress by FCC Chairman Frederick W. Ford.

Sept. 22-23—Illinois Broadcasters Assn. annual meeting. Urbana-Lincoln Hotel, Urbana, III.

Sept. 23—Broadcasters Sales Seminar at U. of Missouri, Memorial Student Union, Columbia, Mo. Three sales and sales promotion symposiums will be held featuring leading Missouri broadcasters and agency representatives. Ben Wells, vice presi- dent and sales manager, Seven-Up Co., St. Louis, will be guest speaker.

Sept. 23—FCC has scheduled oral argument on 23 applications for extension of time to con- struct uhf tv stations, pursuant to hearing order of June 11. For list of stations see FOR THE RECORD, Aug. 1 issue.

Sept. 26—Hollywood Ad Club luncheon meeting at Hollywood Roosevelt Hotel. Awards made by Advertising Assn. of the West (BROADCASTING, July 1) will be presented to Hollywood stations.

Sept. 26-30—Board of Broadcast Governors meeting at Ottawa, Ont., for hearing of station applications.

Sept. 28—Assn. of National Advertisers workshop on advertising management. Ambassador Hotel, Chicago.

Sept. 28—ASCAP West Coast membership meet- ing Beverly Hills Hotel, Beverly Hills, Calif., 4 p.m.

Sept. 28-29—CBS Radio Affiliates Assn. annual convention. Wadsworth-Astoria Hotel, N.Y. Dr. Frank Stanton, president of CBS, will speak at second day’s luncheon.

Sept. 29—Chicago Federated and Women’s Ad- vertising Clubs annual workshop clinics. Radio-TV programming, "how to sell" will be held each Thursday for eight weeks starting this date.

Sept. 29-30—Assn. of National Advertisers ad- vertising management seminar. Hotel Ambassador (West), Chicago.

Sept. 29-30—Radio Advertising Bureau course (in eight cities) on better radio station manage- ment. Diplomat Hotel, Hollywood, Fla.

Sept. 30—Minnesota Broadcasters Assn. annual convention. Leamington Hotel, Minneapolis.

OCTOBER

Oct. 1—Virginia AP Broadcasters Assn. Patrick Henry Hotel, Richmond.

Oct. 2-4—Advertising Federation of America Seventh District convention, Chattanooga, Tenn.

Oct. 3-4—Radio Advertising Bureau course (in cities) on better radio station management. Terrace Motor Hotel, Austin, Tex.

Oct. 3-5—Institute of Radio Engineers sixth na- tional communication symposium. Hotel Utica and Utica Memorial Auditorium, Utica, N.Y.

Oct. 4—Los Angeles Ad Club luncheon at Hotel Statler. Robert Light, president, Southern Cali- fornia Broadcasters Assn., will be chairman of a Radio Day program.

Oct. 4—Retrial of former FCC Commissioner Richard A. Mack and Miami attorney Thurman A. Whiteside, charged with conspiring to rig the Miami ch. 10 tv grant (first trial ended in a hung jury).

Oct. 4—NAB tv Code Review Board meeting, NAB Headquarters, Washington. Girdle-br advertising and theatrical film clips used in tv promotion are among problems under review; FCC scheduled rulings will be drawn for integration of code operations among Washington, Hagerstown and Hollywood.

Oct. 6—NAB Broadcast Engineering Conference Committee. NAB headquarters, Washington, D.C.

Oct. 7—Radio Advertising Bureau course (in eight cities) on better radio station management. Rickey’s Studio Inn, Palo Alto, Calif.

Oct. 9-11—North Carolina Assn. of Broadcasters
THE X-15 IS THE PACESETTER IN JET TRAVEL

A rebuttal in behalf of radio

In this publication on August 22, L.S. Matthews, vice president of marketing services for Leo Burnett Co., Chicago, stated some thoughts he had about radio in his MONDAY MEMO, "How can radio be sold more effectively?" He made one mistake. He stated them.

Of all the disadvantages that print has over radio, the most significant, I believe, is that sometimes print is read. This phenomenon takes on even greater importance when you're out to nail a guy with his very own words. You can then read and re-read what he said—tear each phrase apart as you'd dissect a fly and use the feet and wings of his own dismembered thoughts as clubs against him.

That's exactly what I intend to do with Brother Matthews. As a man who has worked in radio and with radio stations some 20 years, I have asked for "equal space" to pose a number of questions as an answer to Mr. Matthews because I earnestly believe that some of the things he said demand an answer—and fast.

Selling Proof Mr. Matthews stated: "We need proof to show our clients that you can still do a selling job in radio with a 1950-sized schedule." Let me ask—why? On what grounds of logic should radio have to produce 1960 results with a 1950 schedule? Does anyone demand this of other media? Could Leo Burnett Co. or any agency sell a 1950 car to a 1960 buyer? Could they sell a woman a 10-year-old dress with any schedule at all? Or is Mr. Matthews not aware that 1950 is dead? Is it. Should he not, as a marketing man, be cognizant of the fact that different times demand different approaches to a selling problem? Is it not plain to any agency man that 1950 thinking will not work in a 1960 market? And certainly Mr. Matthews didn't intend to imply that his clients are so childish in their beliefs as to honestly expect this miracle.

rate cards Mr. Matthews stated: "With few exceptions, you can't rely on a rate card any more." Let me restate that more accurately: There are a few exceptions in radio where you can't rely on the rate card. Are there not a "few" people in every walk of life you cannot trust? Does this make all of us bad? Incidentally, does not this same "lack of reliance" obtain with a "few" marginal magazines as well? And a "few" newspapers? And a "few" tv stations to boot? Isn't there always somebody somewhere who will make "a deal"? Is it fair to stain the integrity of the great majority of honest managements with the actions of this "few"?

Mr. Matthews stated: "Radio is close to becoming a reminder medium—a supplementary medium to be used only on top of print or television or for short-term promotional purposes." Isn't this kind of smug? Especially when you consider that radio is listened to on an average of 3 hours and 11 minutes every day by housewives—which far exceeds the total reading time of all newspapers and magazines combined. And may I ask—what medium by itself (used for a national product) is not a reminder medium? When an agency employs print, radio and tv in its media strategy, which "reminds" and which "sells"? And if the agency really knows, why is it wasting its clients money just "reminding" people instead of putting all of the budget into the area that produces the actual sale.

Field of Products Mr. Matthews stated: "As long as radio is sold to us as a great mass medium where we can achieve high frequency of impact with relatively low reach at a low cost-per-thousand, it will be used only for products which require this combination of media values—and from a marketing standpoint this certainly narrows the field."

Narrows the field to what? To food, drugs, cigarettes, gasoline, automobiles and you name it? What can't radio sell today that it sold in 1950? Did it ever pretend it could sell a turbine to an engineer?

As for "low reach" I have some questions on that, too. How does Mr. Matthews figure it—on an individual spot basis? Is it fair to measure Life or the Saturday Evening Post on its weekly cumulative total against this sort of yardstick? Every statistic I've seen seems to prove that on the same cumulative basis, major radio stations in every major market reach from 50% to 80% of that total market in any given week. And we all know that although a magazine promises 5 million readers (plus 10 million more in a barber shop) that doesn't mean every one of them sees your ad. Aren't we doing real great in magazines if 30% of them note our message? In radio, the figures we get are of people who actually listen.

Programming Mr. Matthews objected to the "town crier" type of radio—whatever that is. Isn't he showing his age? A 16-year-old can listen to this music by the hour. His nerves don't seem to frazzle as easily as ours. Yet doesn't he buy cigarettes and Coca-Cola and name it?

I could go on but space is running out. Nor need I enter a defense of spot radio whose benefits are too well known to every buyer and seller of time. The reason spot is treated as a stepchild, in my honest opinion, is that it takes much more work to buy in the first place, and second, the actual bookkeeping and follow through involved just eat up too much time to make an exciting profit picture for the giant agencies in the field. Efforts are being made to solve these problems. Then independent radio can look ahead to an even greater future than before.

Jay Victor has operated his own advertising agency for the last 11 years. Before that he was a radio writer (starting shortly after graduation from Columbia U., New York, in 1928), playwright and freelance writer. Manhattan Merry-Go-Round was one of the first of a dozen or so shows for which he wrote.
In the Maryland Market, nearly 700,000 television homes mark TIME in the swift clocks of commerce and industry. Here thrives one of the world’s largest steel mills, one of the nation’s leading chemical centers, a center of clothing manufacture, a center of the graphic arts, a multiplicity of mercantile activities that naturally ensue in the nation’s second largest seaport—handling over 22,424,464 long tons annually, the production of aircraft and missiles, the fabrication of automotive components and many other activities vital to the economic welfare of our nation. These people are the producers of goods and services, the measure of whose effectiveness is accomplishment in TIME.

*INFINITELY SWIFT IS THE VELOCITY OF TIME... Seneca

OPEN MIKE

Compliments L. S. Matthews

EDITOR: The Monday Memo of Aug. 22 (page 14) by L. S. Matthews of Leo Burnett Co., Chicago, "How can radio be sold more effectively?", is a sound, analytical piece that should be read in every agency media department.

In hailing the trend away from certain types of radio, he gave an indirect vote of confidence to the kind of foreground, community-centered radio which KCBS and the other CBS-owned radio stations have consistently followed. We know well how to achieve "boxcar ratings," but we believe this has often been done without regard to either the kind of listening (background) it induced or the commercial atmosphere it provided.

The consistent comments we receive about KCBS, from people who recognize it as the most aggressive station in the Bay Area, convince us that every market needs one or several stations which don't live or die by their musical format.

Our new "Dimension" concept of local radio goes one vital step further in adding excitement and interest to our daily programs. We think it is genuinely the radio of the future. It is, however, the kind of radio a local station cannot hope to develop for itself.

Our mail response which indicates how vital our kind of radio has become among the lives of our audience, our sales successes (many of which are based on limited, not saturation, schedules), and our important position in the community are all proof that there is much more to measuring radio than just audience ratings or cost per thousand.

Thank you, Mr. Matthews, for your endorsement of the many strengths of good radio.—Maurie Webster, Vice President and General Manager, KCBS, San Francisco.

[But Newark agencyman Jay Victor in this week's Monday Memo disagrees with some of Mr. Matthews' views. See page 18.—The Editors.]

Clear channel issue

EDITOR: Robert J. Miller is completely misinformed on the clear channel issue.

Back in 1956 when Ampex introduced the *Videotape* Television Recorder, customers were content to record a program on tape and then play it back at the right time. Today’s needs are different! Picture quality must be indistinguishable from live even up to a fifth generation copy. Transitions between tape and film/network/live programming must be flawless and complete with wipes or lap dissolves. All operating functions must be remote controllable to meet future system requirements. The demand is for rugged equipment designed for mobile use today—human engineered for efficiency in meeting tomorrow’s needs. Ampex—the specialist in tape recorders, has met these needs with a package of features you can order today!

**AND WHAT ABOUT PROFITS?** Profit from tape is no accident, it must be planned. With experience, backed by personal visits to more than 100 VTR-equipped stations, Ampex’s famed Station Relations Team has the right plan to custom fit your tape operation and pave your way to profits with tape. Their experience is yours for the asking...they’ll work with your people, right in your station!

Wire, phone or write for detailed information on an Ampex package plan to start you on your way to profits... today!

*Profits in politics...taping regional political candidates can pay for your Ampex. Send for “Election Time Is Profit Time.”*
NEW, DELUXE CONSOLE
The Ampex VR-1000G combines proven, table-top convenience with major new features. No pins to line up; no hold-down knobs mean fast tape handling! Schedule tapes back-in-back—pay for your VTR.

NEW STANDARD OF THE UPRIGHTS
The VR-1001A incorporates the advanced features of the console in a pink-sized package...just 11½ sq. ft., only 51⁄8 high! Convenient, detachable work-shelf makes setup for splicing in seconds with the Ampex precision Splicer.

Improved picture quality
You get new picture clarity, sparkle and "snap." SN ratio is improved by better than 4 db for interchanged tapes, up to 48 db on non-interchanged basis. Improved frequency and transient reponse deliver picture indistinguishable from live!

Remote control operation
Control your VTR from studio floor or transmitter. Ampex Remote Control operates all record/playback functions...including cue tone button and even remote switching between B/W and color standards. Remote panel operates video gain, sync gain and pedestal height, too!

Improved color stability
Exclusive Differential Phase Compensator electronically holds color hues where they belong! Brilliantly engineered DPC typically holds different phase within 3 degrees in commercial operation! No more green shadows and purple cheeks!

New freedom from picture distortion
Revolutionary new Time Element Compensator electronically and instantly corrects Venetian blind, scallops and out-of-quadrature effects. Although all Ampex VTR's offer individual control for correction of misalignments, new TEC's instantaneous action is an invaluable operator aid in playback of interspersed tapes of unknown recording accuracy.

Smooth transitions: tape/live/film
Inter-Sync TV Signal Synchronizer locks the VTR to station sync...now, mix and match tape with all your picture sources! Wipe smoothly from automobile spot on tape to slide...or lap dissolve from movie or rerun to your station announcer on taped spot. No loss of mood—no abrupt changes—no dead air!

Combination mobile/studio use
Many stations have found it practical...and profitable...to move their console VTR between studio and truck, thanks to heavy-duty wheels. For built-in mobile use, Ampex's 90 upright model VR-1001A is the perfect answer. Both models have proved shake-resistant design—all tubes and essential components are clamped.

Ampex tapes are made and played around the world.

in his letter published in Broadcasting, Sept. 12, page 22. His statement that a listener "should be able to receive a good signal from all 24 [clear channels] since they justify sole possession of the frequency by claiming national coverage" demonstrates abysmal ignorance of fundamental engineering.

The necessity for unduplicated nighttime operation on the clear channels arises not from the fact that each clear channel station claims "national coverage," but from the fact that the vast "white areas" today served by clear channel stations would be severely limited by nighttime duplication. Mr. Miller closes his eyes to the fact that exacting engineering realities and not "abstract arguments" demonstrate that over 25.5 million rural and small town Americans, residing in over half the land area of the U. S., depend upon clear channel stations for their only nighttime radio service and that additional millions must necessarily rely on such service for a nighttime choice of programs.

There is a compelling need for the improvement in the clear channel stations' signals in these underserved areas, not a deterioration.

As the only radio voice that is available to those millions of Americans at night, clear channel stations are an indispensable national asset and vital to the building of unity and our national defense.—Gayle Gupton, Director, Clear Channel Broadcasting Service, Washington, D.C.

PLAYBACK®

QUOTE WORTH REPEATING

When columnist Tony Burton of The Knickerbocker News in Albany, N.Y., wrote a scathing rebuke of television for alleged lack of responsibility and poor programming, it quickly drew rebuttals. One came from David Rosen, assistant to the general manager, WAST (TV) Albany, and was printed by the News:

"We in the broadcasting industry are well accustomed to the intemperate accusations that have been leveled against us since the initial days of commercial radio, and we are resigned to the fact that as long as the press feels that broadcasting is invading the provinces of advertising and public influence, these attacks shall continue.

The broadcaster's first reaction is usually to hurl back at the newspaper the same type of accusation pointed at himself. The tendency is to call attention to the emphasis on sensationalism, sadism and sex on the pages of our nation's papers and to point to the circula-

offering a schedule which includes both entertainment which is easily digested, entertainment on a higher and more cultural level, and a great deal of news, informational and educational programming. It is true that the easily digested entertainment might predominate during the evening hours, but it is also true that a medium dedicated to serving a total audience must be concerned with the needs and desires of the majority in order to properly serve the public interest, providing this is not done to the exclusion of the minority. An unbiased, objective evaluation will show that the minority is not being neglected as many assert.

The person whose tastes differ from those of most is protected first by his intellectual integrity which permits him to turn to other pursuits, and secondly, by the set manufacturers who put dials on the set permitting him to switch channels or turn the set off. I know of no circumstances such as Mr. Burton alluded to which requires a person to sit in front of a television set and watch what does not appeal to him.

To be more specific now about this question of making money, no honest broadcaster would say, that he programs the evening hour such as he does solely to perform a public service. Naturally, he is interested in the income that will accrue to him by giving the public what it wants. But let's stop being naive and immature about this. It is this income which permits him to operate 18 hours a day instead of four since the large majority of programs throughout the day are put on at great expense to him without any income coming in to balance this expense. This income also permits him to operate costly news and public service departments, and to put on the many high level shows which the critics are always crying for even though they might not be commercially acceptable...

Free Enterprise • We believe in a free press and a free broadcasting industry in this country because of our devotion to the principle of free speech and expression. The concept of government ownership of mass communications is distasteful to most of us. In order to have our principles of free enterprise extend into the areas of communications, it is necessary to permit those who risk their capital in these areas to get a return on their investment as people do in all other industries in our economy. If one disagrees with our free enterprise system, he should have the courage to discuss it in its proper context and not in a discussion of television programming. He should be willing to face the economic facts of life inherent in this system, and should be willing to recognize its attributes as well as its shortcomings...
The objective of the Crown Stations is to build an institution of communication commanding the confidence of the Pacific Northwest; an institution offering the highest quality of service and program fare, that in its news tells the truth, in its selling can be trusted, and in its promises can be believed.
ARE OUR MORALS DISINTEGRATING?

Alarmists paint a frightening picture of today's moral climate. Others are more optimistic. Both viewpoints were frankly expressed recently by a panel of distinguished guests on CBS Owned WBBM-TV, where Chicagoans look for—and expect to see—high-quality, unflinching, provocative local programming.

People who value their time find far more worth watching on WBBM-TV. Which naturally is why time is so valuable on WBBM-TV, Chicago's top-rated television station for 63 consecutive Nielsen reports.

WBBM-TV, CHANNEL 2 IN CHICAGO—CBS OWNED
HALF HOUR CUT FROM OPTION TIME

FCC adopts new rules to loosen network control of schedules

The FCC by a split, 4-3 vote on Friday ordered television networks to top off a half hour from option time for each of the four segments of the broadcasting day.

It issued a final decision on the proposal it first advanced in April 1959.

The order, however, relinquished one proposal which also had been opposed by networks and affiliates.

This was to count straddle programs—those that begin in station time and run into option time, or vice versa—as all in option time.

The commission said in last week's order that it had determined this would not work. It withdrew the recommendation.

Four members of the commission voted for the issuance of the order. They were Commissioners T.A.M. Craven, Robert E. Lee, John S. Cross and Charles H. King.

Dissenting were Chairman Frederick W. Ford and Commissioners Rosel H. Hyde and Robert T. Bartley.

The nub of the dissent was that the commission had no right to find that option time practices were "reasonably necessary" to successful network operation. The trio expressed the feeling that deletion of all references to option time from the rules would permit greater competition and result in better broadcasting. They also expressed the fear that FCC endorsement of option time might inhibit antitrust attack by the Department of Justice.

Commissioner King issued a concurring opinion in which he declared he was making no judgment on the legal question, but only voting as between continuing the present three-hour limit on option time and reducing it to two-and-a-half hours.

Nets Unhappy • Network officials expressed dismay at the news, but ventured conflicting opinions as to how the reduction in option time would affect them. They had not seen the order when they were queried.

One spokesman said it "probably won't hurt us, but it might." Another said: "It probably will hurt us, but then again it might not."

There seemed general unanimity that no appeal will be taken from the commission's order.

None of the network sources knew for sure just how the networks would put the order into effect. The consensus seemed to be that 30 minutes would be deleted from present three-hour option agreements with affiliates either at the front end or the rear of the segments.

Film syndicators and other independent program packagers were cautious in their reaction, but obviously considered the action a move in the right direction.

This is what the order, which applies solely to stations and is effective Jan. 1, 1961, does:

• Forbids a station to option more than two-and-a-half hours to a network in each segment of the broadcast day.

• The broadcast day is divided into four segments: from 8 a.m. to 1 p.m.; from 1 p.m. to 6 p.m.; from 6 p.m. to 11 p.m. and from 11 p.m. to 8 a.m.

• Requires networks to give affiliates 17-weeks notice before pre-empting option time, in the cases where the affiliate has a firm, written contract for the time on a spot basis. The affiliate has no contractual non-network program in the time.

The present rule requests not less than 56-days notice before a network can take possession of option time.

• Permits affiliates to reject network programs as unsuitable for local audiences, even after a series has started, and permits affiliates to substitute a more suitable local program for a network program when the licensee believes it is in the best interest of his audience to do so.

Under present practice, stations may only reject a network program when a series is first offered. Also a station may only pre-empt network time for an "outstanding" local program.

As it did last year when it issued the proposal, the commission based its action on its determination that option time is reasonably necessary to successful network operation and in the public interest.

Antitrust Issue • In its final order, the Commission took cognizance of arguments, particularly by KTTV (TV) Los Angeles and the Dept. of Justice, that option time violates the antitrust laws.

It added, however:

"[The commission] is loathe to strike

Close decision • It was a split FCC that put out the option time rule last week and the split went to the heart of the practice: its legitimacy under the antitrust laws. The majority, comprising Commissioners Craven, Lee, Cross and King, voted to put out the order with the finding that option time was "reasonably necessary" for networking and in the public interest—although Commissioner King specifically stated he was not making a judgment on this question. The opposition. Commissioners Ford, Hyde and Bartley, took the view that option time is not required, that the majority's findings were not bolstered by sufficient arguments, and that regulation along these lines foreshadows more and more regulation—all to the detriment of the principle of free and open competition in broadcasting.
THE NEW RULES FOR TV OPTION TIME

Here is the text of the revised regulations issued last week by the FCC to govern television network option time. The rules become effective next Jan. 1.

Section 3.658(d) and (e) of the Commission’s Rules is amended to read as follows:

§ 3.658 Affiliation agreements.

(d) Option time. (1) No license shall be granted to a television broadcast station which options for network programs any time subject to call on less notice than is required by subdivisions (i), (ii), and (iii) of this subparagraph.

(i) In no event may a station subject its time to call, under an option, for a network program to commence earlier than four weeks after notice of exercise of the option.

(ii) If a station has a written contract with one or more advertisers pursuant to which a non-network program series is being broadcast the time so contracted shall not be callable under an option held by a network until the earlier of (a) the end of a 13-week waiting period or (b) the end of the program series so contracted.

(iii) If a station has entered into a written contract with an advertiser or advertisers for the broadcast of a non-network program scheduled to commence no later than four weeks after the network exercises its option for the same time segment, the network may not under its option require the station to substitute a network program until the earlier of (a) 13 weeks from the commencement of such non-network program or (b) the end of the program series so contracted.

(iv) If the station has contracted with more than one advertiser for the program series, the end of the program series for the purposes of this section shall be the latest of the several contract termination dates.

(2) No license shall be granted to a television broadcast station which options for network programs more than a total of 2 1/2 hours within each of four segments of the broadcast day, as herein described. In determining the number of hours of option time, any network program which begins during the hours agreed upon by the network and stations as option time and extends into non-option time, or which begins during non-option time and extends into the hours agreed upon as option time, shall be considered as falling entirely outside option time. The broadcast day is divided into four segments, as follows: 8 a.m. to 1 p.m.; 1 p.m. to 6 p.m.; 6 p.m. to 11 p.m.; 11 p.m. to 8 a.m. (These segments are to be determined for each station in terms of local time at the location of the station but may remain constant throughout the year regardless of shifts from standard to daylight saving time or vice versa).

Time options may not be exclusive as against other network organizations and may not prevent or hinder the station from optioning or selling any or all of the time covered by the option, or other time, to other network organizations.

(3) As used in this section, an option is any contract, arrangement or understanding, express or implied, between a station and a network organization which prevents or hinders the station from scheduling programs before the network agrees to carry over into option time, the FCC report concluded, the station would be required to drop from option time a period equal to the amount of outside option time it was carrying the network program. But since this would be well within prime evening time, for example, and the network programs would be prime programs, the station would desire to continue carrying network programs in this time.

Therefore, the FCC reasoned, its proposal on straddle programs would actually limit a station’s freedom.

The new rules do not apply to radio, but the commission said it would keep radio network-station relationships under review.

Dissenters Stand on Law • The three commissioners who dissented took the position that the commission’s action on option time gives approval to this practice.

The dissent was written by Commissioner Hyde and concurred in by Commissioners Ford and Bartley.

The finding that option time is reasonably necessary to successful network operations and in the public interest is not justified, the dissent stated.

“We do not believe that networks and affiliates operating as they do in a relationship of interdependence and mutual advantage cannot and do not
utilize the time during which such programs are scheduled, or which requires the station to clear time already scheduled when the network organization seeks to utilize the time. All time options permitted under this section must be specified clock hours, expressed in terms of any time system set forth in the contract agreed upon by the station and network organization. Shifts from daylight saving to standard time or vice versa may or may not shift the specified hours correspondingly as agreed by the station and network organization.

Right to reject programs. No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which, with respect to programs offered or already contracted for pursuant to an affiliation contract, prevents or hinders the station from (1) rejecting or refusing network programs which the station reasonably believes to be unsatisfactory or unsuitable or contrary to the public interest, or (2) substituting a program which, in the station's opinion, is of greater local or national importance.

maintain this relationship without the use of option-time arrangements.

"In most instances, network affiliation is eagerly sought by stations as essential to successful station operation, and networks as a matter of definition cannot exist without station outlets. "This mutuality of interest provides substantial assurances that without option contracts there would be clearances of time necessary for successful operation."

The dissent also raised doubts as to the legal theory on which the majority based its action. The commission has not justified its assumption that option time is not a violation of the antitrust laws, the dissent said.

But beyond this, the opposition declared, is the fundamental issue whether the broadcasting industry should operate "under traditional concepts of competition which the antitrust laws are designed to foster, or whether it should be subject to a system of increasing governmental regulations..."

The dissent added:

"When the commission undertakes to sanction the protection of networking because it considers protection provided by option time reasonably necessary, it must inevitably find it is more and more deeply involved in regulating the terms and conditions under which stations make their program choices. Regulation may well be required to provide adequate access for local and national programs during prime viewing hours. This indicates a trend toward a system of commission rationing of station time among competing applicants. The type of regulation which has been approved points to still more regulation..."

Barrow Report The legal position of option time was found shaky by the Dept. of Justice several years ago. At one time Justice called option time a violation of the antitrust laws per se. In February 1959, when the FCC sent over its proposed order on option time rulemaking, the Justice Dept.'s antitrust chief, Victor R. Hansen (who later resigned) repeated its opinion, but in softer terms: He said he thought option time runs "afoul" of the Sherman Antitrust Act.

In issuing its final order on the subject, the FCC turned down various alternative proposals submitted by National Telefilm Assoc., Spot Representatives Assn. and Westinghouse Broadcasting Co.

The option time proposals originated in the 1957 Barrow Report. This was the television network study headed by Roscoe Barrow, dean of the U. of Cincinnati Law School. The report found that option time violated the Sherman Act and recommended that it be abolished.

In the spring of 1958, a hearing on the whole gamut of the Barrow recommendations was held before the FCC. Virtually all witnesses testified to the importance of option time and the serious impact on networking its prohibition would entail.

Network Reaction Networks and film companies were generally hesitant about discussing the option time ruling or its possible effects, pointing out that they had not yet seen it.

There was widespread speculation, even among network sources, that the decision would not be appealed. Legal authorities thought it would be hard to find a basis which offered much assurance of success.

An appeal, they said, would have to prove that the FCC's decision was arbitrary, unsupported by evidence and unreasonable—and this would require an appellant to show, in effect, that there was some special magic about three hours that did not apply to two and a half.

Another expert thought the pertinent issues were so much alike that Supreme Court Justice Felix Frankfurter would need only to dust off his famed decision in the chain-broadcasting case in 1943 to make it equally applicable to an appeal in this one.

Moreover, it was noted, the Justice Dept. could be expected, in event of appeal, to get into the case and argue its already announced contention that all option time violates the antitrust laws.

Where to Cut Richard Salant, vice president of CBS Inc. and frequent spokesman for its tv network in Washington hearings, said CBS-TV remained opposed to any cut in option hours. He said the network could not decide whether to appeal until it had seen the actual decision. As to possible effects such a curtailment would have on network operations, Mr. Salant said they were "so horrible to contemplate" that the network had not considered what it would do should the decision be made and stick.

If the ruling does stick, the networks will have three principal options that they might pursue in renegotiating with affiliates: (1) cut a half-hour off the beginning of option time, (2) cut it off the other end, or (3) take it out of the middle. Actually, they might have other choices—for instance, each network might try to negotiate different periods with different affiliates—but variations of this sort were considered unrealistic from the standpoint of offering advertisers uniform clearances.

The possibility that a network might return to the stations a half-hour within the present three-hour option span—making option time run, for example, from 7:30 to 9 and from 9:30 to 10:30—was considered unlikely.

Generally speaking, NBC's evening option time is 7:30-10:30 p.m., while CBS's and ABC's are 8-11. Nobody knows what it might become under FCC's ruling. A half-hour cut, but there was some speculation that "8 to 10:30 sounds like a reasonable bet."

Film syndicators, like the networks, were reluctant to comment on the decision, although they have been among the chief advocates of option time limitations. Obviously they considered it a move in the right direction and thought it would expand the market for their programs, but they said they did not feel they could comment before studying the decision itself. Some also said their reluctance to comment lay at least partially in the fact that networks are now substantial customers of the syndicators and that accordingly they did not wish to open old wounds needlessly.

The option time issue was opened in March 1956 when Richard Moore, president of the independent KTTV (TV) Los Angeles, argued before the Senate Commerce Committee that option time was an antitrust violation. Later that year the House Antitrust Sub-committee heard Mr. Hansen, then antitrust chief of Justice, agree with Mr. Moore's point. Some film syndicators also advanced that view.
FASHION FINDS PLACE IN TV’S SUN
Retailers find tv fashion shows pay off at the cash register

Women’s fashions, a late bloomer in television, is flowering in New York and at scattered other points. The Seventh Ave. trade press is hailing the development and Television Bureau of Advertising is looking for an epidemic of fashion parades. Production costs are going into the hundreds of thousands.

In New York last week, three department stores rushed to the cameras with fall-winter imports, and the same thing is going on in Dallas, Atlanta, Los Angeles, Milwaukee and Portland, Ore.

It looks as if a new show species has evolved, the fall and spring fashion special. Early characteristics of the burgeoning form: A half-hour of local prime time showing Paris-Florence imports (originals and adaptations) on live mannequins, sometimes in colorful settings and always "commentated" by a host-hostess team.

Not that this is the idea form, although recognized in the trade as one of the more successful tried so far by retailers, many of whom have been slow and experimental in adapting to the television environment. TVB’s Howard P. Abrahams, vice president-director of retail sales, believes retailers might have even more success with a quarter-hour show heralding each of the four big selling seasons: pre-Easter, pre-vacation, back-to-school in late August and holidays in late November.

Forerunner. It was a half-hour show, however, that Macy’s produced and WNBC-TV New York sold to a cigarette sponsor last March. So when other retailers leaped into the tv act this season, it was with the half-hour special. It was the “sensational” retail success of the spring Macy’s show that became the pattern, as the trade took national notice and TVB spread the story.

The fashion trio on the New York dial last week were (in chronological order) Fashion Is News, Sunday (Sept. 11) on WNBC-TV, 10:30-11 p.m.; Alexander’s Fashion Imports: France and Italy, Tuesday (Sept. 13) on WCBS-TV, 8-8:30 p.m., and Paris Fashion Show on WABC-TV, also Tuesday, 10:30-11 p.m. Generally they were considered a rating success against network competition.

Sponsors and agencies respectively: Holiday magazine through BBDO (Macy’s packaged the show), Alexander’s department store through Henry Bach Assoc. and Ohrbach’s department store through Doyle Dane Bernbach.

The color tape of Fashion Is News is being played again tonight (Sept. 19) at 10 by WSB-TV Atlanta, where Macy’s owns the Davison Paxon store, which in this case sponsors Fashion Is News itself. Ohrbach’s imports will be seen again next week, sponsored by the house’s Los Angeles store on KABC-TV there, Thursday (Sept. 28), 10-10:30 p.m.

In spite of a hurricane that in one case interfered with post-show shopping and in another with pre-show production, initiators of the electronic salon shows generally seemed pleased.

Everybody Happy. Macy’s, back into production of its second color fashion package in six months, said it was very pleased with results in the store, despite hurricane-depressed conditions the next day which discouraged shopping. The event unveiled originals and Macy’s copies of gowns by Balenciaga, Givenchy, Monsier X, Gres, Ricci, Cardin, Fabiani, Capucci and others in France and Italy. Macy’s merchandised the show in newspapers and throughout the store.

Sponsor Holiday used Fashion Is News to offer a booklet, “What To Wear Where.” While the actual pull was not announced, a spokesman for the BBDO agency said those involved with the sponsorship were very happy with the promotion. The last WNBC-TV color introduction of Macy’s imports, Fashion First, was a spring preview, Sunday March 13, 10:30-11 p.m., sponsored by Alpine cigarettes through Doyle Dane Bernbach.

Wednesday Sales. Alexander’s WCBS-TV show produced an immediate, big response in stores, Milton Hertz, account supervisor at Henry Bach Assoc., said after the program. Sales success of the tv debut points definitely to another show in the spring. Unlike the two other dress specials, Alexander’s show advertised prices, offering store adaptations of Paris and Florence originals with tags starting at $29.95 for dresses, $49.90 for coats and suits from $55, all ranging upward.

The Alexander’s mannequins modeled creations of Givenchy, Ricci, Cardin, Lanvin-Castillo, Fabiani, Capucci, De Luca and others in the new terminal of Pan American World Airways at International Airport, Idlewild, Long Island. The job, which according to one

'Holiday' wear. Merchandise by Macy’s, showcased at New York’s Four Seasons restaurant and sponsored by Holiday magazine (through BBDO) on WNBC-TV New York Sunday, Sept. 11. Models, one wearing an imported original and the other wearing Ohrbach’s “translation,” pick their way across a watery runway as Melvyn Douglas and Kitty Carlisle (r) report.

BROADCASTING, September 19, 1960
source must have cost upward of $30,000 for production alone, was produced by CBS Television Production Sales on a crash taping schedule between Sunday and Tuesday night, complicated by the hurricane (the original script was "washed out" and had to be rewritten) and West Coast commitments of the program host and hostess. Robert Sterling and his wife Anne Jeffreys. Neal Wilder produced, Michael Levin and Lou Tedesco directed and Marsha Dealy wrote the Alexander's program for CBS Television Production Sales. Mr. Levin did original music for the production and Roberta Davis was fashion coordinator. Henry Bach Assoc. is Alexander's agency for special projects.

The Line • Ohrbach's Paris Fashion Show (including Italian designs with the French) foreshook elaborate settings to show 20 imports beside Ohrbach's "translations" in dramatic light and motion. Actually the show was a translation of a special advertising program created by President William Bernbach of DDB for Ohrbach's, an institutional campaign, editorial in approach and omitting price tags. The tv parade designs emphasized "clean" production.

Production cost of the taped WABC-TV program was on a network scale, but "you can't skimp on fashions," says Maxwell Dane, agency vice president and account supervisor, said. Reaction in the trade Wednesday morning, following the 10:30 show of the night before, was good, Mr. Dane found. Ohrbach's, always a top design production seller, Mr. Dane said, is looking for long-term benefits from its tv show, and while he considers the show's rating a "respectable" one, "We were not trying to get everybody in New York City, because not everybody is interested." Mr. Dane was encouraged by early reaction of men, traditionally the hardest to "sell" in this field. He mentioned television's unique ability to demonstrate fashion to a wide audience.

Don Trevor, tv director of the agency, headed the tape production team. Maggie McNellis and Art James were host and hostess. Another fashion assignment for DDB earlier this year was a half-hour film last spring written by the International Ladies Garment Workers Union and distributed free to stations, stores and organizations around the country.

The rash of local fashion shows had a network predecessor last spring when Chesebrough-Pond's presented Paris A La Mode on NBC-TV on Feb. 29, through J. Walter Thompson Co. Fashion also plays a subsidiary role from time to time on other network specials and appears on an editorial feature basis in regular programming. But it took a local special in New York last spring to show what tv really could do for a store. After the first Macy's show, Senior Vice President John A. Blum of the store was quoted on the front page of Women's Wear Daily in such superlatives as "fabulous," "tremendous," citing unit sales almost tripled over the past year in one day of selling after Fashion First. The Macy-produced shows carry no price mentions, but the line-for-line copies sell between $50 and $250.

The idea seems to be catching fire. TwB reports similar shows this season in Dallas by Tinche Goetinger, in Portland, Ore., by Meier & Frank, a good probability for Gimbel's in Milwaukee and a lot of talk in other markets. The garment business is beginning to find its place in the television sun.

Mobile Audience It's big outside rush hours, too—Petry

"Drive time" is important to radio advertisers, but they need "shift time," too, to reach the rest of their million mobile prospects.

That is the point of a new study made public last week by the radio division of Edward Petry & Co., station representative. It is designed to sell radio advertisers on the value of adding schedules in afternoon and late-evening hours as a means of reaching more of the nation's 20 million blue-collar workers who in sizable numbers are driving to and from work during those hours.

'Shift' and 'Drive' • Drive time, consisting of the morning and afternoon hours when work-bound and home-bound traffic are heaviest, has long headed the list of periods most preferred by national spot radio advertisers. It is generally defined as 6 or 7 a.m. to 9 a.m. and about 4-7 p.m. "Shift time" in the Petry lexicon consists of those off-hours in early and mid-afternoon and in the evening when blue-collar workers are driving to and from work as shifts change in plants and factories.

Actually, the Petry study shows, automobile listening represents a bigger proportion of radio's total evening audience (25.1%) than it does in the com-
In the WFBR audience, not only are there more single car families and two car families, but proportionately 14% more families who bought their car(s) NEW than did the families in the total sample, which includes listeners to all Baltimore stations.*

When you advertise on WFBR, you reach the people who have the spendable income and who spend it.

* In a recent Qualitative Survey in the metropolitan Baltimore area, The Pulse, Incorporated, matched certain socio-economic factors with radio station listening habits.

Gordon Best expands
in both east & west

Gordon Best Co., Chicago, agency has opened a west coast office in Pacific Palisades, with Roy Kirtland as vice president and general manager. Best may add a radio-tv production man there, according to Carl Post, agency president. Best also plans to open a New York office "in the near future" and to construct its own building in Chicago.

As part of the expansion program, John H. Pinto, formerly vice president and creative director of Grant Adv., New York, joins Best as vice president and chairman of the plans board. He will supervise creative services for present clients and devote his time to new business activity, with headquarters in New York.

Among the agency's active radio-tv clients are Dunias Milner Corp. (Pine-Sol deodorant), General Finance Corp., Maybelline Co. (eye beauty aids) and Jos. Schlitz Brewing Co. (Old Milwaukee beer). Best recently lost the Amity Leather Products Co. account with the departure of Burton G. Feldman, vice president who resigned to open his own agency.

Proper media urged
by NL&B executive

Advertisers should pick the media which best present their products rather than clinging blindly to newspapers, Paul C. Harper Jr., executive vice president of Needham, Louis & Brorby, told the Cincinnati Advertisers' Club last week.

His subject at the Wednesday luncheon meeting was "Let's Stop Wasting Newspaper Space." If radio, tv or any other medium is better for the advertiser's purpose than newspapers "because it delivers a more appropriate audience, or better frequency, or a better expression of your story, use it," he said. "Eighty-five percent of all the adults in Cincinnati or anywhere else is no bargain if you can't use it, or can't afford it or don't need it."

Too much newspaper advertising today is ineffective and wasteful, Mr. Harper stated, because it ignores the competition for reader attention and "the awful reality of the time squeeze." He charged that too often these ads showed "misapplied mechanics, misconceived design and misdirected copy." Many newspaper copywriters don't recognize the peculiar requirements of the medium and fail to capitalize on its power, he further pointed out.

Mr. Harper suggested that while the "basic postulates" of directness, simplicity, ease and pattern-breaking hold equally for radio, tv, magazines and other media, "nowhere do they have a more vital application than in the crowded, cluttered, often confusing pages of the daily newspaper."

An 'actuality' spot for du Pont's Telar

du Pont, maker of Telar year-long coolant anti-freeze figured real people—not cartoon characters as used in all other Telar commercials—ought to demonstrate the product in at least one of its commercials. To do the commercial "right," E.L. du Pont de Nemours & Co. decided on actuality, casting one of its officials in the featured commercial role.

Telar's more than $2 million seasonal spending in television this fall-winter is indicative of the battle among the Big Three in anti-freeze. The clash involves du Pont (also makes Zerone and Zerox anti-freeze), Dow Chemical Co. (its new coolant is Dowgard) and Union Carbide (maker of top-selling Prestone and producer of a newly-developed Prestone Long Life Coolant).

Each is using the broadcast media as a platform from which to launch brand identity and new sales. Dow is spending more than $1 million in spot radio and in exposures in Dow's Hour of Great Mysteries specials on NBC-TV; Union Carbide has $2 million working in spot radio and network tv participations, while du Pont is participating in a lineup of several network tv shows and has a saturation spot radio schedule making up its more than $2 million expenditure. (Some of these monies represent expenditures also for regular anti-freeze products as compared to the new coolants).

The newer and heavier bombardments in radio-tv come from Dowgard and Telar, Prestone having been historically the broadcast media's big customer at the time of the first frost.

The Telar demonstration commercial (through BBDO) uses the voice of Dr. Frank Kennen, head of du Pont's anti-freeze research group that developed Telar, for portions of the narration. Dr. Kennen appears on camera in the commercial. Filming took place in the Chestnut Run, Del., research facility of du Pont. Elliot, Unger & Elliot handled the production of this three-minute commercial which first will be seen Sept. 30 on Show of the Month (Lee J. Cobb in "Men in White" on CBS-TV).

Du Pont and station rep Broadcast Time Sales also worked out an arrangement in which 27 stations will carry spots for Telar on an "instant airtime" plan that permits a doubling of the schedule in a market the day that frost first is predicted for the area.

All of the coolants are emphasizing the year-round, both summer and winter desirability of the products. Telar claims it is usable the year round, needs no changing though any deterioration of the Telar protection is detectable via a built-in indicator (changing of the substance's color from red to bright yellow). These are among the points underscored in the commercial.
For something they said would never get off the ground, the airplane is riding pretty high.

In fact, the airplane and aviation in general can do more than lift people. It can help lift entire markets.

It’s doing just this in the Greater Oklahoma City market where aviation is putting money in increasing amounts into the hands of people who in turn buy the products you have to sell.

How high this market will soar is an estimate that is being revised upward with regularity. A leading business magazine reports that Oklahoma City is the 5th fastest growing in the nation.

The contribution of aviation to the industrial, economic and business development of the Greater Oklahoma City market is part of the story of the outstanding sales opportunities awaiting WKY RADIO AND TELEVISION advertisers. It is natural for us to be analyzing the market for you, because WKY-TV and WKY RADIO are recognized by the people who buy, as the prime communicators in the market. An interesting part of the analysis follows.
Years ago, two brothers named Braniff started an airline in Oklahoma City. Another airline named “Safeway” carried passengers in a Fairchild between Oklahoma City and Tulsa. It’s now part of American Airlines. It was natural for a young vital city to have enthusiasm for a young industry which was greeted with skepticism in many other quarters.

This enthusiasm has paid off in a giant aviation industry which is contributing to the growth of the Greater Oklahoma City market.

**FACTS:**

- Tinker Air Force Base (part of which is pictured to the right) is the largest supply depot in the world.
- Tinker’s Annual Payroll ... $115,000,000 to 24,000 people.
- Tinker disburses 34% of the total U.S. Air Force budget ... 16% of the entire defense budget.
- Aero Design and Engineering manufactures business airplanes ... sales volume over $15,000,000 a year.
- Giant FAA Center is worldwide civil aviation headquarters ... expanding as more and more activities are moved here from Washington.
- Airmail origination ... 289.6% increase over 1950.

It is indicative of the growth-mindedness of the market that civic-minded businessmen have safeguarded thousands of acres of buffer zones around the area’s airports, insuring safe room for future growth.

What all this means to the marketer of products is more good jobs in the aviation industry for more people every year.

WKY RADIO AND TELEVISION, in its established role of communicator, tells the story of your products to the people enriched by the aviation industry in Oklahoma. Some of the reasons we are able to tell your story so effectively are set forth on page 4.
Take local programming

WKY RADIO AND WKY TELEVISION have more successful local programming than any other stations in the market.

WKY RADIO News, for example, averages over half the radio audience every time it's on the air (17 times a day). Six other stations divide the other half of the audience.

WKY TELEVISION News and Weather are consistently rated among the top ten programs in the market.

This indicates more than lower costs per thousand. It signifies a knowledge of what people want in this market...a closeness between audience and media upon which advertisers can build more sales.

Our supremacy in local programming is the measure of how well we serve the market...and how well we serve, is the basis of how well we sell to the market.

Not only is Oklahoma City a good market in which to do more business...WKY RADIO AND TELEVISION ARE GOOD STATIONS ON WHICH TO DO MORE BUSINESS.
COMMERCIAL PREVIEWS

A maximum of action, a minimum of words. That just about sums up the new animated commercials for the new Fords which Playhouse Pictures of Hollywood made on order from J. Walter Thompson Co., New York.

One 20-second spot for the 1961 Ford opens with a herald holding a standard marching across the screen to regal music. Behind him come two pages and behind them a knight, whose armor squeaks as he walks. He approaches the queen, seated on her throne and bows as she speaks:

"Would you like to go up to 30,000 miles without a chassis lubrication?"

She taps him with her sceptor, his armor drops and turns into a 1961 Ford. She gets in beside him and they drive merrily off as she continues:

"Then get a '61 Ford. Beautifully built to take care of itself."

The "beautifully built to take care of itself" theme is used in all the animated commercials and will be the basic slogan of all advertising for the new Ford. Another 20-second spot opens with a statue of a general on horseback brandishing a sword, with several white pigeons sitting on the stone figures as the announcer, offstage, says: "Beautifully built . . ." The plink of a raindrop is followed by a flash of lightning. The pigeons fly off. The rain comes down in earnest. The general raises his sword which becomes a sheltering umbrella. The pigeons fly back to roost safely beneath the rain-shielding shield as the offstage voice continues: " . . . to take care of itself. The '61 Ford at your Ford dealers."

Four 20-second commercials and four eight-second versions of them were shipped last week by Playhouse Pictures to more than 350 tv stations, along with almost as many teaser spots containing the tag line, "At your Ford dealers Sept. 29."

The Ford spots were created and produced by Playhouse. Chris Jenkyns and Ed Levitt were story editors; Bill Melendez, director; Sterling Sturtevant and Brenard Gruver handled layout and design; the animators were Bob Carlson, Rod Scribner and Ed Levitt.

The same theme of the self-servicing automobile is carried in a group of three radio commercials created and produced for Ford by Freberg Ltd. of Hollywood. Stan Freberg, president of the firm, which specializes in the creation of radio-tv commercials, did the Ford spots in conjunction with William Hockerr of the Detroit office of J. Walter Thompson Co. under the supervision of Ed Rodgers, Ford's radio-tv advertising coordinator.

One of the one-minute commercials for the 1961 Ford goes like this:

(Note: man and woman are very British.)

Woman: Harry isn't that fellow taking an unusually long time to put the gas in?

Man: Now where did he go? (He calls) Hello . . .

Guy: (OS) I'm under the car.

Man: Under the car?

Sound: Car door opens and closes; footsteps.

Man: Look here, what are you doing under there? This is a brand new '61 Ford. There's nothing wrong with it.

Guy: (Crawling out from under the car) Oh . . .

I know that. I was just waiting for it to adjust its own brakes.

Man: What?

Guy: But I guess it wasn't ready yet. Every '61 Ford comes in I keep hoping it's getting ready to do it so I can watch. I read there's a little mechanical brain in the wheel that decides when it's time.

Man: How's that?

Woman: (OS) What's he doing, Harry?

Man: (Calls) He's watching our brakes. (To guy) Now look here there's nothing to see.

Guy: (Crawling out from under the car) I mean the Ford makes its own mechanical brake adjustments during the life of the lining. You don't have to worry about it.

Guy: Oh, I'm not worried about it. I just want to see how it handles a wrench.

Man: Ahh, look I hardly think there's anything to see under there?

Guy: Well, I heard a little click just now.

Sound: Screeching.

Woman: (Calling) Harry, what are you doing?

Man: I'm under the car. It looks like we've bought ourselves a phenomenon!

Woman: Really? I thought it was a Ford.

Music: Tag 1 second.

A CASE HISTORY

Hot cereal uses radio to boost summer sales

If there is any doubt that radio can move hot cereals in summer months, the Cream of Wheat Corp., Minneapolis, is quick to cite its own case history of the past 12 months.

Last September the client, which had been using nighttime tv IDs, decided it needed a new advertising approach to meet heated competition from Maypo and General Mills' Protein Plus. So it sunk about $1.5 million into radio spots —just about its entire budget. The commercials (utilizing the "It's Cream of Wheat Weather") appeared on over 220 stations in some 80 markets.

The campaign proved so successful that Cream of Wheat kept the air campaign going right through spring and summer. Delighted with its success, the company has started a new cycle on roughly the same number of stations.

"There's no doubt that radio turned the competitive tide for Cream of Wheat" George H. Alarik, BBDO account supervisor, said. "Perhaps not so much in terms of actual sales percentage increases as in the realization of the fact that it's competing in a slow moving market during the hot months."

Actually, Cream of Wheat sales have risen about 3% in the past 12 months. Significantly, however, its brand share of hot wheat cereal sales rose to 38.8% by last December, 39.4% by February-March and to 41.2% by this past June the end of the spring and start of the summer seasons. (About 40% of its total sales during the spring-summer seasons.)

By now the Cream of Wheat commercials are well known to breakfast-time listeners. The announcements initially ran 20-30 seconds in length and were expanded to a full minute on 186 stations for summertime. They have been running as often as 20 times a week in a given market under a formula devised by the agency: a base of 10 per week, plus five fixed spots and five
“bulk” announcements from what the client calls its “slush fund.”

It’s the announcer at any given station who actually decides whether “It’s Cream of Wheat Weather” on a given day and if it so appears, the extra spots are aired (between 6:30-8 a.m.). The 60-second spots feature a live leadin by the station announcer, plus a 21-piece orchestra, vocalist Lynn Roberts and the voice of Mason Brown, veteran actor. It is claimed the commercials reach 70% of all U.S. radio homes.

**TV TAPE A KILLER**

The vtr revolution in local commercials

“The guy in front of the gray drapes,” who used to deliver the local live commercials on most tv stations, is dead and tv tape has killed him, Russ Baker, manager of station relations for Ampex Professional Products Co., told the Hollywood Ad Club last Monday (Sept. 12). The opening meeting of the 1960-61 season, was devoted to video tape and was held on Stage 6 of Paramount Television Productions in Hollywood (Broadcasting, Aug. 29).

Describing the local tv announcer as having two commercials in his repertoire, Mr. Baker said, “He either talked loud and fast and pointed his finger at you, or he talked slowly and softly and confidentially wheedled. He’d either beat you into submission or snuffle you to death.”

The “guy in front of the gray drapes” was a necessity for most tv stations during the early evening “panic period,” that half-hour of news, sports, weather—and commercials when “each segment is handled in a separate area in the studio and each of the live commercials had an area of its own, with the entire operation handled by the same two cameras and director. The idea was not to do the most effective commercial, but to do one without mistakes. The guy in front of the gray drapes was the answer.”

But today, with tape, Mr. Baker declared, “it is now possible to show three rooms of furniture and four automobiles and do a good beer commercial where the head on the beer is just right, all in the same panic period.” And this can be done at any vtr-equipped station, in small cities as well as large.

James Schulke, vice president in charge of PTP, demonstrated tv tape’s versatility for both commercials and programs with numerous segments of material taped by PTP, both in the studio and on location. Many of the segments were taken from The Wrangler, first taped western in which PTP produced both in its studio and on location for use on NBC-TV as summer program for Ford Motor Co. Mr. Schulke stressed the technical quality of the taped production and pointed out that new techniques, such as PTP’s TV-ola editing device and the sound editing method developed by Loren Ryder (Broadcasting, Aug. 29), were what made it possible. He also commented that with the experience achieved through producing The Wrangler, PTP can now save $5,000 on the production cost of any western and up to $10,000 on any other tv program, compared with film.

Kenneth C.T. Snyder, vice president and tv-radio creative director of Needham, Louis & Brorby, Hollywood, program chairman for the meeting, commented that tape is a new tool for the production of tv programs and commercials and not a substitute for either live or film production. He urged agencies to design commercials specifically for tapping, not to try to take scripts written for live production or for filming and put them on tape.

**A cost-cutting formula from TvB**

The advertiser ought to consider spot in weekend afternoon periods to help him work out of an otherwise tight situation created by limited prime-time availabilities in television. This in essence is the advisory from Television Bureau of Advertising.

TvB does its prime-time roadsign painting in a new presentation booklet for advertisers that has been sent to stations and to potential tv customers. The trade organization explains it viewpoint on the afternoon weekend supplementary (or substitute) for nighttime by computing the added audience reach (and cost) to a spot schedule in prime time (evenings).

For example, it’s pointed up that:

- An advertiser can reach 37% of the prime evening time audience at a cost that’s 36% of the prime evening time rate.

- A Saturday-Sunday afternoon schedule of a fixed number—say four spots—becomes cheaper and reaches more people proportionately to the fewer nighttime prime spots used along with the schedule. Or, to illustrate how this works out in the purchase of four afternoon spots:

  When used along with but two nighttime spots per week, the afternoon time cost only 71% more than the two prime time spots but will reach 98.3% more of—or nearly double—the audience.

  When used with three nighttime spots weekly, the cost increases 48% and reach increases 48.5%.

  Is ratio of four weekend afternoon to five nighttime spots, audience jumps 281.6% at a 29% more cost.
valuable new minutes in radio

Now, these and all other KBIG minutes are new... and more valuable. The big reason? Southern California's positive reaction to 3 talented personalities: Joe Niagara (6-10 a.m.), Jim O'Leary (10 a.m.-2 p.m.), and Bob Gage (2-6 p.m.). This dynamic threesome adds new freshness, new vitality to radio selling. Result: Better sound for listeners... more profitable climate for advertisers.

Get the facts! New file-folder now available from your KBIG or Weed rep.

WHO CARESSES TOILET PAPER?

Dodge ad chief assails unbelievable ads

Every moment in advertising is, or should be, "a moment of truth," W.D. Moore, director of advertising and sales promotion for Dodge, declared Tuesday (Sept. 13) at the Los Angeles Advertising Club.

Advertising should be honest, he stated, not because honesty is "morally acceptable" or "the Christian thing to do" or even "the American way," but simply because truth "is pure advertising power, far more effective than anything else I know."

When television shows "cars roaring up what seems or is purported to be a 60 degree incline, it's a very simple trick—just tilt the camera. But worse, it's an insult to our fine civil engineers who don't build highways like that. So why show them."

Moreover, Mr. Moore asked, "How many people walk into a dealer's showroom and say, 'Mr. I want a car that can really climb? It's bad enough for ads to be unbelievable and worse for them to be ridiculous, he stated, charging that too much advertising today underestimates the intelligence of readers, listeners and viewers.

"Let's toss out ads that show ecstatic housewives smelling their towels, or caressing their two-ply, super-soft, double-strength facial-quality, negligee-colored toilet paper. Let's treat toilet paper like nothing more, nor less, than it really is: toilet paper. If my wife or your wife ever re-enacted in real life the tv commercial toilet paper bit, we'd probably call the wagon—or go on it."

The responsibility for improving advertising's image, for producing more

believable, more effective advertising, is a three-way deal, Mr. Moore asserted. The copywriter must use more imagination, must turn out "brighter, shorter, tighter copy, honest sincere stuff—facts, not fancy," he said. But the advertiser and the media also have their parts to play. "The client certainly doesn't have to okay what the agency submits," he stated. "And even if he does, media doesn't have to accept it."

"You media men—why don't you get tough with us once in a while?" he challenged. "Why don't you tell us (in a nice way) that your copy is not quite up to snuff, that we're too devious, flirting with bad taste or losing sight of honesty—if such is the case? Don't be afraid to challenge us."

Chicago firm forms tv leasing service

Development of a closed circuit tv leasing service for advertising agency and other potential clients was announced last week by Graphic Pictures Inc., Chicago-based video tape production firm.

Robert H. Estes, Graphic president, reported that about $1 million in electronic equipment, including a Telco coaxial cable hook-up and air check service, will be available to business and industrial users of closed circuit tv facilities.

Clients will be able to monitor and video tape predesignated programs and play them back via cable anywhere in Chicago, pre-test live, taped or filmed commercials or productions; hold personnel or sales meetings any place in the country, with direct feeds to clients' offices, or conduct news conferences; and receive individual or simultaneous exposures of pilot films or rushes of commercials. The Telco coaxial cable hook up extends throughout the U.S., Canada and Alaska, Mr. Estes said.

Name's the thing

Dodge really ought to be the sponsor of Gunsmoke, Dodge ad manager W.D. Moore, told the L.A. Ad Club last week (see story page 44). "Just imagine, the next time you snuggle down to watch this western epic, the built-in commercials we could get. Notice how many times the word 'Dodge' is mentioned in the half-hour. It would be so easy to play off, 'Chester, let's head back to Dodge,' right into a commercial. If we had this show we could make it into one half-hour commercial every week—just be mentioning Marshal Dillon's seat of operations."

Well as radio. AA. Ballantine is the company's advertising manager and Aikten-Kynett, Philadelphia, is its agency.

Full swing Continental Baking Inc., Rye, N.Y., through Ted Bates, N.Y., steps up its tv spot activity this month with schedules being prepared for indefinite runs in a total of 91 markets on behalf of Wonder bread and other baked goods. A lesser amount of radio spot buying is underway in other markets for short campaigns running on an in-and-out basis. A heavy spot tv user in recent years, Continental cut back nationally last year to concentrate advertising money in individual markets. The forthcoming tv drive consists of new minute and 20-second commercials, with day and night schedules varying in each market. Continental's bakeries have distribution in all but a few southeastern states and certain parts of the Southwest.

Network splash The Mogen David Wine Corp., Chicago, in its first NBC-TV purchase, has ordered participations in two daytime and four nighttime programs during the 1960-61 season. Programs are: Jan Murray Show (2-2:30 p.m.) and Here's Hollywood (4-4:30 p.m.), both Monday through Friday; Riverboat (Mon. 7:30-8:30 p.m.), Outlaws (Thurs. 7:30-8:30 p.m.), Dan Ravenc (Fri. 7:30-8:30 p.m.) and Westerner (Fri. 8:30-9 p.m.). All times are EDT. Agency: Edward H. Weiss & Co., Chicago.

Spot polish Knomark Inc. (Esquire Shoe Polishes), Brooklyn, N.Y., will employ a new 10-second radio jingle in the top 15 markets to announce that the odor is out and Esquire Boot Polish now "shines brighter than bright." The six-week radio campaign, with up to 80 announcements per week, gets underway next week. In Canada, new one-minute tv commercials for the dual language population are scheduled for heavy exposure in eight markets Agency: Mogul Williams & Saylor Inc., N.Y.

Bakery renewes kid's show The Kitchens of Sara Lee (baked goods), Chicago, renews Fri. 8:45-9 a.m. segment of Captain Kangaroo on CBS-TV, Mon.-Fri. 8-9 a.m. EDT. As a part of overall $2 million advertising budget for 1960-61 season. Agency: Cunningham & Walsh, Chicago.

Whole truth The Savings & Loan Foundation, Washington, D.C. (reps 4,000 insured savings and loan associations), will sponsor NBC-TV's "The Real West," a full-hour Project 20 documentary telling the story of the American west from 1849 to 1900. The program is to be presented next March and will mark actor Gary Cooper's tv debut. Donald B. Hyatt is producing and directing. Agency: McCann-Erickson, N.Y.

In driver's seat Reynolds Metals Co., Richmond, Va., will sponsor Auto Wonderland on CBS-TV Oct. 16 (Sun. 6-7 p.m. EDT). The live program, which will preempt Face the Nation and The Twentieth Century, will be a telecast of the 43rd National Automobile show being held in Detroit. The 1961 model cars will be on display. Executive producer for CBS News coverage of the event will be Paul Levitan, with Harve Fishman and Phil Sykes as co-producers. Vern Diamond will direct. Agency: Clinton E. Frank, Chicago.

Tryout for new Quota Quaker Oats Co., Chicago, is buying tv spot announcements in its Chicago and Minneapolis sales districts of Illinois, Wisconsin, Minnesota and North Dakota to introduce its new Quota low-calorie, weight control product. Plans call for about six announcements per week for six weeks in four cities (Chicago, Milwaukee, St. Paul and Minneapolis) starting the second week in October. Agency for Quota is J. Walter Thompson Co., Chicago.

Warming up Downyflake Foods Inc. (frozen waffles, pancakes and french toast), N.Y., a newcomer to television.

Year's growth realized in five months via radio in Denver

The oldest savings and loan association in Denver is enjoying remarkable growth as the result of an advertising budget that is close to 100% radio.

Since starting a newcast schedule on KOA in 1953, the First Federal Savings & Loan Assn. of Denver has seen its assets rise from $9 million to $33 million, according to Malcolm E. Collier Sr., president.

The schedule of 22 newscasts weekly—7,176 by next year—is based on the belief that radio "reaches the people First Federal wants to reach," according to Lynn Reed, account executive for the newly appointed agency, Duray Ranck Advertising.

First Federal's save-by-mail plan has brought depositors from 42 states and two foreign countries, according to Mr. Collier. The association learned a vivid lesson in ways of influencing people when it first started sponsoring KOA's 6:55 p.m. newscast. "We enjoyed what would have been a full-year's growth in the first five months of radio," he recalled.

Soft-Sell □ During the years, First Federal has advertised consistently on KOA with 5-minute and 15-minute programs. Copy is soft-sell, factual and institutional. A strong reputation has been built up in the service area by frequent announcements for Red Cross drives, United Fund and similar public services.

The association is ranked fifth in the city and has bought First Federal Savings of Englewood, renaming it First Federal Savings of Denver and adding another 8 or 10 million dollars to total assets. This is expected to raise the local ranking to third or fourth.

Through late 1959, 100% of the sponsor's budget went to KOA. Currently the radio share is between 90% and 95%. The account is KOA's largest in point of airtime.

A fortnight or so ago First Federal and KOA signed a contract extending through the 7,176th newscast. This occurred in connection with the association's 76th anniversary and its growth by news □ Contract extending the KOA Denver radio contract to the 7,176th newscast (up early in 1961) was signed as First Federal Savings & Loan Assn. of Denver celebrated its 76th anniversary. Seated (l to r): Lynn Reed, account executive for Duray Ranck Advertising; Malcolm E. Collier Sr., First Federal president; John Alden, KOA account executive. Standing, Gene Grubb, KOA general sales manager, and Glen Martin, KOA, newscaster.

A new addition in North Denver.

The story of First Federal dates back to April 25, 1885, when Denver was a frontier town. That day the Cooperative Savings & Loan Assn. opened its doors to receive money to be invested in home ownership. The association was successful through the 1893 and 1907 and the depression years of the 1930s. It has never failed to meet a withdrawal or to pay dividends.

Big Dividends □ In 1933 First Federal received a federal charter, and was one of the first to come under the Federal Savings & Loan Insurance Corp.'s insurance of accounts. This year's dividends will exceed $600,000, paid at a rate of 4% per year compounded semi-annually.

It was the first in its area to install a drive-in window. Mail customers are provided with postage-free deposit envelopes. A community room is available for civic meetings.

The nostalgic story of First Federal's founding in 1885 and bits of local history are woven into the advertising copy. Many of its pioneer founders took prominent roles in the opening of the West.

With its enlarged facilities, sound policies and radio-promoted prestige, First Federal is ready for continued growth through the mass-influence power of radio and an advertising budget that has been informally estimated around $50,000 yearly.

will launch a double-barreled campaign this month, using both network and New York local programs. Commercials for Downyflake's line of frozen food products will be directed to adults on a number of CBS-TV special programs during the 1960-61 season, while copy and "gimmicks" have been prepared by agency Smith/Greenland Co. for live presentation on five New York children's shows, including three on WNEW-TV and one each on WPIX (TV) and WOR-TV. New York commercials starting yesterday (Sept. 18) and will continue for 27 weeks on each station.

Network medicine □ CIBA Pharmaceutical Products Inc., Summit, N.J., via Stidler & Hennessey Inc., N.Y., will sponsor a 26-week Sunday quarter-hour series titled This Week in Medicine, on a yet-to-be-identified tv network beginning Oct. 30. Planned to reach the nationwide professional medical audience, the pre-taped series will include worldwide summary of medical news with filmed supplements on various aspects of research, clinical medicine or surgery. The program is said to be first use
The timebuyer's want: a louder voice

The timebuyer apparently is human after all. He feels—like most everyone else in a position to feel so—that he ought to be brought in on more decisions at the agency. This is what Trendex found in a survey for Broadcast Time Sales. The station rep ordered the study because it suspected this might be the case.

Questioned on media decisions and strategy were timebuyers, media supervisors, account and client executives. Obviously timebuyers themselves made up the largest group voting in favor of timebuyers having more say in marketing and copy approaches (though in this category an unusually high percentage of media directors and account executives were in the affirmative), and in having a greater voice in media selection, and against forcing timebuyers to buy ratings alone. There was hardly a dissenting timebuyer to a question asking if they thought their opinions would be respected more at an agency if they received higher pay.

of open circuit tv for reaching a national medical audience. It is produced by the editorial staff and medical consultants of Medical News, bi-weekly newspaper for physicians also sponsored by CIBA. Nonprescription drugs will not be included in product messages.

First-time network ~ Western Tablet & Stationery Corp. has purchased 13 quarter-hours over 14 weeks in ABC-TV's American Bandstand with Dick Clark (Mon.-Fri., 4:53 p.m.). Western Tablet claims to be the world's largest maker of school paper supplies and stationery. It's the advertiser's first use of network tv in which it will introduce two new school paper products. Agency is Bosell & Jacobs, Kansas City, which also is handling a tie-in point of purchase promotion featuring Dick Clark.

Frankly speaking ~ Campbell Soup Co., Camden, N.J., after two years of test marketing a new product—Campbell's Beans & Franks—in 13 cities, is ready to go national via network tv and print introduction. One-minute daytime commercials are scheduled during October, November and December along with a "heavy schedule" of animated commercials on Campbell's two network shows, Lastie on CBS-TV and Donna Reed on ABC-TV. Agency: Needham, Louis & Brorby, Chicago.

More football ~ American Oil Co., N.Y., which has had a 19-year radio-tv association with Washington Redskins pro football team, is renewing support for the coming season and is also adding sponsorship participation in broadcasts of three other teams' games. American signed half-sponsorship of the 13-game Redskins schedule on a tv network of 37 southern stations and 67-station radio network; one-quarter sponsorship of eight-game Baltimore Colts schedule on three tv stations; one-quarter sponsorship of St. Louis Cardinals for 13 games on eight tv stations, and one-third sponsorship on 33 radio stations for 13 New York Giants games. The advertiser's broadcast activities include five-minute local election news segments over 17 tv stations on election night, Nov. 8. Agency: Joseph Katz Co., N.Y.

Borge special ~ Pontiac Div., General Motors Corp., Detroit, will sponsor a Victor Borge comedy-with-music special on ABC-TV Oct. 6 (Thur., 9:30-10:30 p.m. EDT). Mr. Borge's star guests will be Izumi Yukimura, Japanese singer. Other guests include pianist Leonid Hambro and Kubuki dancers Shiko Yagi and Chushiro Sato. The program will be produced by White-Cates Inc. and directed by Joseph Cates. Agency: MacManus, John & Adams, Bloomfield Hills, Mich.

In the basket ~ Braun Packing Co., Troy, Ohio, has signed with WHJO-AM-TV Dayton, Ohio, to sponsor all Ohio State U. basketball games for the coming season. WHJO will feed a network of radio stations that includes WIMA Lima, WMRN Marion, WIZE Springfield and WFIN Findlay, all Ohio. Three of the games will be televised on WHJO-TV.

Yule start ~ Hartz Mountain Products (bird and pet foods), N.Y., has signed sponsorship of ABC-TV's The Paul Winchell Show, which will return to the network for a fourth consecutive season Dec. 25 (Sun. 4-4:30 p.m. EST). The weekly half-hour variety show stars ventriloquist Paul Winchell and his sidekick Jerry Mahoney and Knucklehead Smith. Agency: George H. Hartman Co., Chicago.

Assorted flavors ~ Beech-Nut Life Savers Inc., Canajoharie, N.Y., will be represented in eight NBC-TV nighttime shows during 1960-61. In addition to sponsorship in The Shirley Temple Show (Broadcasting, Aug. 29), Beech-Nut bought participation in Tall Man, Thriller, Laramie, Dan Raven, Outlaws, Westerner and Michael Shayne.

All but Laramie are new shows this season. Agency: Young & Rubicam, N.Y.

Western rider ~ R.J. Reynolds Tobacco Co., N.Y., has added to its network program sponsorship in 1960-61 with participation in NBC-TV's Laramie, which returns for a second season Sept. 20 (Tue. 7:30-8:30 p.m. EDT). Agency: William Esty Co., N.Y.

Harper's Ferry revisited ~ Purex Corp. via Edward H. Weiss & Co., Chicago, will sponsor John Brown's Raid, a dramatization of one of the explosive incidents leading to the Civil War, to be presented as an NBC-TV special Oct. 25 (Tue, 10-11 p.m. EDT). Producer Robert Alan Arthur will tape the program on location in Harper's Ferry, W. Va., which has been restored and is a national monument.

Also in advertising

Officers installed ~ The Assn. of Advertising Men & Women, New York, opened its 46th year of activity last Tuesday (Sept. 13) with the installation of new officers and the awarding of the club's "Australian Cup" to incoming AAMW president David Moger, president of David Moger & Co., who was selected for making the most notable contribution to the organization during the past year. Other officers, all of whom were installed by C. James Proud, president, Advertising Federation of America, are: Lynn Feldman, Enterprise Advertisers' Service, vice president; Stan Linden, D.L. Terwilliger Co., vice president; Dorothy Nixon, Lever Bros., secretary, and Fred Matase, Pronto Medical Addressing Service, treasurer.

NC&K special bonus ~ In celebration of its 20th anniversary on Oct. 1, Norman. Craig & Kummel Inc., New York, on that date will announce for the first time that it employs a special year-end bonus graded up to four weeks' extra salary. Executive employees are to receive similar bonuses. The bonus is in addition to NC&K's regular profit-sharing plan. The action, announced by Norman B. Norman, agency president, is a reflection of the organization's rise to a billing total of $35 million annually.

Pays tuition ~ Geyer, Morey, Madden & Ballard, N.Y., is initiating a tuition aid program for staff members wishing to further their careers through night school courses. Staffers apply for the agency aid by filing applications with the agency's personnel manager, listing the name of the school and course, the amount of tuition fee and why the student thinks the course will help him on the job. Under the aid plan all or part of the tuition fee will be refunded.
I'm sold on 7! *

ABC-TV sells him with aggressive programming... the wide range of entertainment that is the keynote of ABC's Flagship in the modern West. 7 million other Southern Californians are sold on 7 in America's first market. You can be sold on 7, too.

EIA proposes a second tv set for every home

Establishment of a fullscale public relations program— to put a second tv set into every home, as well as hike the multiple ownership of radios and phonographs—has been recommended to the Electronics Industries Assn. by its consumer products division.

The proposals were made last week at the annual fall meeting at French Lick, Ind.

Edward R. Taylor, Motorola executive vice president, who is chairman of the consumer products division, made the suggestions to the EIA board. He urged the appointment of a public relations committee to report on its plans at the board's Nov. 30 meeting in San Francisco.

The consumer products division also recommended that an advertising code be developed for the electronics industry, with proposals also to be submitted at the Nov. 30 meeting.

The EIA members heard a discussion of educational tv by Philip Lewis, Chicago Public School Systems. Mr. Lewis urged manufacturers to do more than sell tv equipment to schools; he suggested such improvements as more rugged sets, better and bigger audio components, better control knobs. He advocated greater integration of tv with other audio-visual equipment already being used in the schools.

It was made known that a training manual for teachers on the use of tv for education had been prepared by Mr. Lewis and will be published soon by EIA.

Other highlights of the EIA meeting were:

- Talk by John R. Heim, Federal Trade Commission, on FTC guides on advertising allowances and merchandising payments.
- Estimate that 50% of all transistorized personal radios sold in 1959 in the United States were manufactured in Japan. This was made by Mark Shepperd Jr., Texas Instruments vice president. Mr. Shepperd predicted that Japanese color tv and portable tv sets would soon be imported to this country.
- Plans made to oppose any lowering of the tariff on tubes and semiconductors.

Ampex in merger

Subject to stockholders' approval, Ampex Corp., Redwood City, Calif., and Telemeter Magnetics Inc., Culver City, Calif., will be merged, with Ampex the surviving concern. The proposal was recommended last Wednesday (Sept. 14) by the boards of both electronics companies. Merger terms call for the exchange of one share of Ampex for two shares of Telemeter. Ampex, which develops and makes precision magnetic recorders, had 7,270,000 common shares outstanding on July 31, while Telemeter, controlled by Paramount Pictures Corp. and producer of fundamental components in the data processing and computer industry, had 852,344 common shares outstanding last January.

Gotham acquires electronic firm

Gotham Broadcasting Corp., New York, last Thursday (Sept. 15) announced the acquisition of Tarc Electronics Corp., Westbury, Long Island, as an operating division of Gotham. Tarc manufactures products for tv and test equipment for the broadcasting industry and the military. A new line of transistorized modular components for broadcasting systems is in current production. Mario Conti is general manager of Tarc and George Gordon is sales manager. Allan Kronenberg, formerly with Telechrome Corp., has been appointed chief engineer.

Gotham Broadcasting, headed by J. Elroy McCaw, president, operates WINS New York, which is being sold to Storer Broadcasting Co.; KTVR (TV) Denver, and KTVW (TV) Tacoma, in addition to several wholly owned subsidiaries operating in various fields.

U.S. radio production nearing all-time high

Shipments of radios and radio-phonographs by U.S. factories reached a new high of 16,03 million units (valued at $424 million) in 1959 and an even greater high of 17 million units (at $460 million) is expected for this year, the Dept. of Commerce's business and defense services administration reported last week.

The 1959 figure was the biggest since 1950's 15.8 million units ($398 million), though the 1950 figure was nearly reached in 1955 and 1957. The greatest gain in 1959 was in automobile radios, which rose from 3.9 million in 1958 ($101.7 million) to 5.6 million ($132.6 million). The smallest gain was in portable radios, up 14% from 3.3 million ($82.3 million) to 4 million ($93.7 million). Foreign competition has made its greatest impact in this category.

Radio imports in 1959 totaled 5.8 million units ($70 million), some 14% of U.S. consumption, most (5.5 million units, $55 million) from Japan and some (265,000 units, $13.5 million) from West Germany. U.S. exports continued a decline (that began in 1950) to 289,000 units ($7.7 million) in 1959.

The continuing rise of U.S. radio production despite some adverse factors (import-export ratio and tv's impact), the report said, is due to increasing popularity of transistor portables, clock radios and fm, plus the auto radio market's firm stand in the face of foreign competition.

Increases this year (1960) will come largely from fm radios, auto radios and table model transistor sets.

Technical topics

Vtr developments A four-page illustrated brochure outlining new developments in video recording technique is available on request from GPl Div., General Precision Inc., 63 Bedford Road, Pleasantville, N.Y. It covers a new application, tape to film transfer, and two new features now available, spot wobble and the alternate synchronizing generator.

Chic mike Collins Radio Co., Cedar Rapids, Iowa, has turned out a new dynamic microphone model, the Collins M-30, pressure operated, with a frequency response from 50 to 15,000 cps, which assures a high-fidelity reproduction of voice and music. The microphone is essentially omni-directional and is recommended by the company for panel discussions, conventions, school programs and recordings in addition to broadcast use. With a selection of either 50-ohm or 200-ohm impedance, the M-30 may be used with any amplifier having a 35-80 ohm or 150-250 ohm input. With stand it weighs one pound. Net price is $48.50.

New reference manual A new 236-page catalog on broadcast-communication-electronic equipment has been announced by Gates Radio Co., subsidiary of Harris-Intertype Corp., Quincy, Ill. The 1960-61 catalog is designed primarily as a reference manual and may be obtained cost-free by a request with a company letterhead.

BROADCASTING, September 19, 1960
Political timebuying ran into money trouble last week, particularly on the Republican side.

While Democrats were lining up sponsored regional hookups in several areas, Sen. Thurston Morton (R-Ky), chairman of the Republican National Committee, said he was unable to put Vice President Nixon on tv nationally from California because of a money shortage.

Campaign Assoc., GOP campaign agency, confirmed Chairman Morton's gloomy explanation of delays in lining up station hookups for speeches (see timebuying roundup (Broadcasting, Sept. 12). The GOP hopes to raise money at a series of Sept. 29 dinners.

In the 1956 presidential campaign the two parties had about completed buying of time by mid-September. The major networks face the problem of informing sponsors in advance when they plan to cancel programs, providing time to cancel program advertising and promotion.

The GOP had indicated it wants Oct. 3 (8:30-9 p.m.) on CBS-TV but hadn't put it on the dotted line as of Sept. 15. The time is slated for debut of Buddy (Scott Paper through J. Walter Thompson Co.).

In addition the GOP has orders at CBS-TV for four five-minute segments at the end of night programs. Democrats have ordered seven such periods.

Both Republicans and Democrats have a half-dozen five-minute segments in CBS-TV daytime periods.

On the other hand, Democrats cancelled two NBC-TV half-hours (Sept. 20, 8:30-9 p.m., Alfred Hitchcock) and another (Oct. 27, 10-10:30 p.m., Groucho Marx). The party retained an Oct. 31 reservation (Alfred Hitchcock, 8:30-9 p.m.). Democrats have shifted their schedule of five-minute programs but the GOP buys on NBC-TV haven't been changed.

Debate Details - Final details of the first Nixon-Kennedy network appearance Sept. 26 were worked out Thursday (Sept. 15) at CBS-Chicago studios. Taking part in a morning conference, besides Secret Service agents and Chicago police, were J. Leonard Reinisch and Ted Rogers, representing Sen. Kennedy and Vice President Nixon, respectively; Clark George, vice president of CBS Stations Div. and general manager of the originating WBBM-TV; Henry Sheafer, business manager, Chuck Hynds, program director, and William Garry, news chief, all of WBBM-TV: Don Hewitt, CBS producer; Lou Shollenberger, CBS Washington, and others.

Security officers are checking over 200 CBS-Chicago staffers who will be on hand for the Sept. 26 four-network simulcast. Special badges are being issued.

In the studio Sept. 26 will be Dr. Frank Stanton, CBS Inc. president; James Aubrey, CBS-TV president; Robert W. Sarnoff, board chairman, and Robert Kintner, president, both NBC; and Leonard Goldenson, board chairman of American Broadcasting-Paramount Theatres. Sig Mickelson, CBS News president, will be "referee-time-keeper" and Howard K. Smith will be moderator.

Candidates and their aides will arrive at WBBM-TV shortly before 7:30 p.m. (CDT), going to Studio 1 on the first floor for still and newswile posing. At 7:45 they will go to private quarters while the stage is rearranged. A short warmup is scheduled at 8 p.m., with the hour program starting at 8:30 p.m.

Newsmen and photographers will be assigned to Studio 4. Monitoring and other facilities will be provided. No news conferences have yet been scheduled following the program. WBBM-TV will transcribe the dialogue and supple text to reporters on a running basis.

Regional Plans - Five separate regional hookups and a nationwide network are on the current Democratic timebuying schedule. A six-station Pennsylvania network was purchased Sept. 15, for a Kennedy speech originating in Harrisburg. Four stations (WJZ-TV, WMAR-TV Baltimore; WBOC-TV Salisbury, Md.; WTOP-TV Washington) carried a Sept. 16 broadcast from Baltimore.

A North Carolina hookup of 11 stations was to carry a Sept. 17 pickup from Raleigh. The day before the party sponsored a tv tape of a Sept. 12 Ministerial Alliance program originating in Houston. This was carried on six North Carolina tv stations.

Scheduled this week is a West Virginia free-time hookup of six tv stations keyed from WSAZ-TV Huntington (Sept. 19, 9-9:30 p.m.). Candidate Kennedy will speak on a nation-wide ABC-TV hookup Sept. 20 when he addresses a Democratic dinner in Washington on campaign issues. WMAL-TV Washington will feed the network.

In the works are plans for Democratic pickups all around the nation as the candidates appear on fast-moving schedules. Most of the plans aren't fixed, however.

Vice President Nixon plans a 5,000-mile itinerary covering 11 states during the week starting Sept. 26. Cities include Washington; Chicago; Memphis; West Memphis; Charleston, W. Va.; New York City and Queens, Nassau and Suffolk Counties, N.Y.; Burlington, Vt.; Manchester, N. H.; Boonton, N. J.; New York; Akron, Canton and Mansfield, Ohio, and Evansville, Ind. If money can be raised it appeared the GOP might set up broadcast facilities in many of these areas.

Charge and Countercharge - The religious issue gained new prominence last week as Chairman Henry M. Jackson of the Democratic committee called on news media, including radio and tv, to "pursue an immediate investigation of the true financing and true source of the large volume of anti-Catholic material now passing through the U.S. mails."

GOP Chairman Morton came back with the charge that Democrats were pumping the religious issue to new proportions by charging anti-Catholic propaganda was Republican-inspired. He declared this charge was false. The religious question may be reflected in additional use of broadcast media if the heat of party discussion is intensified.

NBC Radio has scheduled a series of five special NBC News programs assessing the effectiveness of the presi-
Adventures in Good Taste. When Mr. & Mrs. Metrodelphia crave a sure gustatory experience, they turn to Bookbinders. When they hunger for responsible newscasting, vital information, public affairs illumination, they choose from WIP's award-winning menu. Sigma Delta Chi gave WIP its annual Distinguished Journalism Award. WIP received 3 out of 5 first place awards from Pennsylvania's AP Broadcasters Association which cited us for "outstanding news operation" and "distinguished contribution to freedom of information." The public service philosophy so honored has differentiated WIP from its contemporaries for the past 38 years. Since Metropolitan began to season the best of traditional ingredients with new program concepts, larger audiences* are being attracted to WIP service . . . and your story . . . in Metrodelphia, Pa.
dential campaigns in the five major geographical areas of the U.S. Entitled Election Countdown, the series will start Thursday, Sept. 29 (8:05-8:30 p.m. NYT). Succeeding programs will be broadcast Oct. 6, 20 and 27 and Nov. 3. Oct. 13 was left open for the joint appearance that evening of Vice President Nixon and Sen. Kennedy on all tv and radio networks. James L. Holton of NBC News' New York staff is Countdown producer.

Some 500 tv stations and 3,000 radio stations have been supplied with films and transcriptions designed to stimulate public interest and participation in the Nov. 8 national election. In conjunction with The American Heritage Foundation and The Advertising Council, Bill Sturm Studios Inc., New York, created two one-minute voting films as a public service. Black and white versions have been sent to tv stations, transcriptions to radio stations and color films are being prepared for theatrical distribution. Titled I'm Goin' to Vote and Married, Moved or Come of Age, the films are set to music (supplied by Argosy Music Corp.) and feature the "Anti-Kin," a three-dimensional, stop motion puppet that is reported to be exclusive with Bill Sturm Studios.

In Chicago the three tv networks were confronted with a request by Rabbi Maurice N. Eisendrath, president of the Union of American Hebrew Congregations, for time to debate campaign religious issues with Dr. Norman Vincent Peale, prominent Protestant clergyman. Dr. Peale late in the week disclaimed any role in the National Conference of Citizens of Religious Freedom. The group had entered the anti-Catholic phase of the campaign, drawing Democratic charges that Dr. Peale was active in the group.

Political sidelights

- KABC Los Angeles is conducting its own daily presidential poll on the across-the-board Open Line, according to Ben Hoberman, general manager. The poll runs up to election day. Every person phoning Reed Browning, Open Line manager, is asked this question: "Who is your choice for President of the United States, Senator Kennedy or Vice President Nixon?" Daily, weekly and running tabulations will be kept.

- KCBS San Francisco editorialized over the Sept. 10 weekend on voter registration. Maurice Webster, KCBS general manager and CBS Radio vice president, took, "Before It's Too Late" as the editorial theme. He urged the non-registered 40% to register before the Sept. 15 deadline. Instructions were given voters and civic groups were urged to set up drives to bring them to the polls.

- WCAU-TV Philadelphia assigned John Facenda, newscaster, Jack Whitaker, weatherman, and Gene London, children's favorite, to appear on a special Sept. 13 program titled Make Your Mark. Famous sports and stage personalities took part in the special, designed to get out the registration.

- WWDC Washington solved the problem of "who's on first?" in its upcoming political debates between two congressional opponents by tossing a coin. The station offered free debating time to Rep. John Foley (D-Md.) and Charles Mathias Jr. (R), his opponent. Coin tosser was Ben Strouse, WWDC president.

- Herald-Tribune Radio Network (four stations) will carry two repeats of the Kennedy-Nixon debates, which start Sept. 26. Two repeats will be carried at 11 a.m. and 5 p.m. the next day. "We can perform a public service to many citizens who may miss the first appearance on the networks or who want to hear the debates a second time." Stations in the New York group are WFYI Garden City, L.I.; WVOX-AM-FM New Rochelle; WVIP Mt. Kisco and WGHQ Kingston.

- WSAZ-TV Huntington, W. Va., has started a half-hour political feature, Mr. Candidates, Sun., 6 p.m. Time is being apportioned equally among candidates for high state and congressional offices. The series is coordinated and directed by Bos Johnson, WSAZ-TV news director.

Liberals' complaint not FCC's concern

The FCC kept hands off a complaint filed last week by the Liberal Party of New York State which charged that some New York tv and radio stations were unfair because they did not carry Sen. John F. Kennedy's speech accepting its nomination for president.

In a Sept. 12 telegram signed by FCC Commissioner Rosel H. Hyde, as acting chairman, the commission said the fairness provision of Sec. 315 applies to issues not candidates.

Mr. Hyde also told the complainants that they had not "specified clearly what particular subject of controversial nature was discussed over the air, the date when the program was carried, the basis for the claim that the station presented only one side of the question, and whether the station afforded an opportunity for the presentation of different viewpoints."

The Liberal Party's telegram was sent Sept. 10 and was addressed to John C. Doerfer, former chairman of the commission.
It's a habit...

watching KMJ-TV in FRESNO (California)

Of the nearly 200,000 TV homes in the KMJ-TV viewing area (100,000 in Fresno's metropolitan area) the majority of dials are likely to be set on Channel 24 at any given time, as witness:

- the highest percentage of women viewers daytime and nighttime (Mon-Fri) are on KMJ-TV;
- KMJ-TV is FIRST in the daytime hours (Mon-Fri) in 95 quarterhour periods, the other two local stations trailing with 55 and 40;
- KMJ-TV is FIRST in Share of Audience, Sign-on to midnight (Mon-Fri).

THE KATZ AGENCY, NATIONAL REPRESENTATIVE

BROADCASTING, September 19, 1960
Pay television faces another head-to-head battle before the FCC.

A full-scale investigation of the cash-box medium was ordered Sept. 15 by the commission, promising a resumption of the feud between RKO General Inc. and Zenith Radio's Phonevision on the one side and Theatre Owners of America on the other.

Toll service, broadcast and wired, was in the news last week as theatre owners met in Los Angeles at their annual convention. FCC simultaneously was holding a meeting in Washington on the subject, coming up with the decision to hold a second round of pay tv hearings that may run a week. The full commission will sit.

The hearings have as their base RKO General's application to start toll tv broadcasting over its WHCT (TV) Hartford-New Britain, Conn., a uhf outlet (ch. 18) it bought earlier in the year for the purpose of pay tv service.

TOA charged in Los Angeles that the successful advent of toll video service, wired or broadcast, would mean the death of the motion picture theatre.

**Summer Test** - In Toronto, Ont., where wired pay service is in operation, a Broadcasting check showed the 6,000-subscriber service has felt a summer decline in tune-in, affecting the system's receipts (see survey, below)

TelePrompTer Corp., which some weeks ago announced it would test pay tv on its community antenna system in Liberal, Kan., disclosed last week it may not start the service until November.

The FCC's second pay tv investigation will be in the nature of an inquiry rather than an adversary hearing on the toll application itself. The outcome obviously will affect the fate of the RKO General application for paid service in the Connecticut market.

It will bring together on the one side Thomas F. O'Neil, chairman and president of RKO General, and W. Theodore Piersen, his Washington counsel. On the other side will be Mitchell Wolfson, president of WTVI (TV) Miami, WFGA-TV Jacksonville, and WLOS-AM-FM-TV Asheville, N.C., as well as president of the Wometco Florida theatre chain, and Marcus Cohn, his Washington counsel.

An order formally announcing the pay tv use case could first be drawn up by the FCC staff and then resubmitted for Commission approval. This is expected in a week or so. If finally adopted, the hearing itself should start by late October.

**Hill Influence Strong** - The commission was slapped down by Congress in 1958 when it proposed to allow pay tv tests. Most active in opposing the move was Rep. Oren Harris (D-Ark.), chairman of the House Commerce Committee.

With Congress' admonitions in mind, the FCC a year ago last March issued a Third Report which spelled out more stringent requirements for a pay tv test. This, it was reported, passed muster with Rep. Harris and his committee.

The Commission's move to hold an en banc hearing on the entire pay tv subject is apparently a compromise move in the skirmishing that has been going on between RKO General and the theatre-oriented Joint Committee Against Pay Tv and its adjunct, a Connecticut group of the same name.

RKO General asked that its application be given a hearing before the

---

**Etobicoke revisited: how Canada's toll tv is faring**

Toronto homes equipped with Telemeter pay tv service spent an average of $1 weekly for summer programs, according to a random telephone check conducted by Broadcasting.

This figure showed a marked drop from an average of nearly $2 during the spring months, shortly after Canadian wired service was opened in suburban Etobicoke.

Trans-Canada Telemeter, subsidiary of Famous Players Canadian Corp., had 5,500 homes connected as of mid-September, according to William O. Crampton, operations manager of the system. The figure is expected to reach the 6,000 goal originally set as the limit for a one-year test period.

TCT has released no figures on collections from subscribers and doesn’t plan to release such information until the pilot-system is completed next year. Service was started last Feb. 26. The company wants to study subscriber reaction for at least six months after the 6,000 peak has been reached. It then will decide when and where it will expand operations in the Dominion.

Summer viewing fell off in both pay and free television, according to the Broadcasting check. Typical comments: "There were too many outside things to do." "We were at our cottage." "We were traveling."

**No Cutoffs Indicated** - But those who did not have Telemeter service in their Etobicoke homes showed an interest in its availability on their streets. Most of the non-subscribers said they probably would take the service when it comes to their neighborhood.

Of listeners contacted, some said they did not like the programs offered. Others said the men of the family wanted more sports and hoped to get them this winter. None reported any intent to discontinue the service.

Subscribers said they carefully studied the program listings distributed by TCT not only for pictures they desired to watch but programs for children. Most viewed programs are feature motion pictures, which are changed at least twice weekly. Some parents reported instances of pictures shown during evening hours that they felt were unsuitable for teenagers.

A number stated they preferred pay tv to the theatre for economic reasons. "With four in the family," one housewife stated, "all of us can see a feature for $1 compared to $4 at the theatre." Some preferred the larger theatre screen but settled for pay tv because they could relax at home.

Homes contacted were picked at random in the Belmont I exchange, the area in which the Telemeter operation is located.

At TCT, Mr. Crampton said the most popular films to date have been "Ten Commandments" and "Please Don't Eat the Daisies." Box-office receipts from the coin-box collec-
full commission. This was in the hope such procedure would speed up a decision. The anti-pay TV groups have opposed this and have pleaded for a full "evidentiary" hearing meaning, it has been assumed, before a hearing examiner in the usual manner.

The application for the $10 million, three-year test of Phonevision system of fee-TV was filed in June by RKO General, in conjunction with Zenith. Zenith developed the Phonevision system. The RKO General-Zenith agreement was first announced last April.

In Los Angeles - The TOA convention speakers charged not only that pay TV would mean the death of motion picture theatres but that it would be a hoax on the American public. TOA plans to continue its fight to protect the public from paying to watch programs broadcast over publicly owned airwaves.

"Theme of the TOA session was "Pay-TV—Beating the Menace." Phil F. Harling, vice president of New York's Fabian theatres and chairman of the TOA Toll Tv committee, reviewed the campaign now in progress, having a goal of 30 million signatures from people from all walks of life, directed to every senator and congressman in the nation, telling him in simple, direct language that we don't want pay TV, that it is not in the public interest, that it should be banned in whatever form it takes, whether by wire or by air and that the airwaves are free and should remain free."

Collision course - These are leaders of the rival camps that are destined to clash in the forthcoming FCC hearings on subscription television. They are (left) Thomas F. O'Neil, head of RKO General which has applied to start a subscription service on WHCT (TV) Hartford; his attorney W. Theodore Pierson, who has also represented Zenith in its long fight for approval of subscription television; Marcus Cohn, attorney for the Theatre Owners of America which is waging a national campaign in opposition to pay TV, and Mitchell Wolfson, president of WTVJ (TV) Miami, president of the Wometo theatre chain and one of TOA's most influential voices.

The committee began by printing 100,000 petitions, but the demand by theatre owners was so great that an additional 75,000 more had to be printed. Already 16 million signatures are in Washington, he stated, predicting that before the next Congress convenes the 30-million mark will have been passed.

In Connecticut, theatre operators have assessed themselves 10 cents a seat to hire legal counsel to oppose the application for a pay TV test and to put on a public relations campaign to tell the public "the truth about pay TV." He urged theatre owners to contribute to the national committee fund, telling them, "Your money and your help will be used for the nationwide campaign pointing toward the adoption by Congress at its next session of a bill to bar pay TV."

Chance to Attack - The first chance to learn the truth about pay TV program plans will come when proponents of the Hartford, Conn., experiment testify at the public hearing ordered by FCC. Mr. Cohn, Washington counsel for both the national and Connecticut anti-pay TV committees, told the meeting.

"For 15 years we opponents of pay tions indicated 50% of boxes had registered viewing of "Ten Commandments." Analysis on the second film has not been completed but is expected to show over 50% penetration.

Coin boxes are collected every 60 days. They automatically record on tape which pictures have been paid for and viewed. Children's programs have been found most popular. Usually they include two features costing about 25 cents for a three-hour program.

Live musical programs on a weekly basis started Sept. 12, with a 50-cent charge for a performance. The first musical program featured Rachel Cavello, Toronto pianist, in Adventures in Music. A 90-minute program filed by Larry Henderson, former Canadian Broadcasting Co. commentator, in Russian Samarkand has been featured at 50 cents. Like the musical, it is classed as an educational feature.

Free high-fidelity music is fed into the pay TV system all day, with special concerts in the late afternoon. Free service also includes news, weather and sports obtained from the Toronto Daily Star and including mention of the paper by TCT's own newscaster.

Free service has included films supplied by organizations and corporations. Films supplied by Pan-American Airways, Canadian Red Cross, Canadian Cancer Society and conservation films furnished by breweries have been carried on the free channel. Pan-American supplied a series of 39 travelogues.

TCT has a crew of eight installing the last 500 units in Bobbie-home homes and apartments where Bell Telephone has brought in the Telemeter cable. Some areas show saturation; others have a waiting list. As of Sept. 12, TCT said 275 names were on the waiting list beyond those already contracted but not connected. The fee for installation of the coin box is $4. Only other cost to subscribers is the amount paid for each program.

Program listings are issued every two weeks and frequent announcements are carried on the announcement channel.

Some difficulty has been encountered in apartment installations where existing community antenna systems were found to be poorly installed. Where building owners have objected, cables have been matched to exterior colors.

Other Problems - Delays have been encountered in obtaining rights-of-way over property, clearance in apartment buildings and permits to dig up streets for underground cable. Possible interference with apartment antenna systems has been another problem.

TCT hopes its final studies of viewing habits will present a thorough audience analysis. Some research has been done on the basis of coin-box tapes showing, for example, that some homes watch for a few weeks and then fail to pay for a number of program periods.

By studying cost of maintenance, programming, operations and equipment, TCT hopes to have a complete picture of its wired pay TV operation for the guidance of companies wanting franchises in other areas.
television have attempted through every possible device to force the proponents to give us the specifics of how they intend to program pay tv," he said. "All we have received is pie in the sky. Of course, this is not to say that in the literature which has been distributed to the public the proponents have not promised every academy award winning picture and every Broadway smash hit. In addition, we have the words of the promoters of baseball and football that pay tv would afford them an opportunity to force the American people to pay to see all sporting events on television and multiply a hundred-fold their receipts from the boxoffice..."

The application of Hartford Phone Vision Co. consists of 30 pages. Three-and-a-half of those pages are devoted to its programming proposals. Two-and-a-half of those 3 1/2 pages discuss and emphasize the fact that the applicant intends to rely primarily upon 'current releases' for its programming. No names of producers or distributors who will supply such film to the applicant are mentioned. No reference is made to any specific films." Mr. Cohn commented that he was looking forward eagerly to the opportunity to get some definite answers during the hearing.

Warning exhibitors not to be misled by arguments to the effect that radio didn't kill records, the movies didn't kill the theatre, and so on, so pay tv won't kill theatres, Sumner Redstone of the Continental Theatres, Inc., said that radio, television, recordings, the Broadway theatre and motion pictures are all various forms of entertainment and so are competitive.

"But," he declared, "they are essentially different forms of entertainment. Of critical importance is the fact that pay tv and motion picture theatre exhibition will involve the sale of the same product to the American public, namely, current motion pictures. And motion picture theatre exhibition will be subjected to impossible competitive conditions."

If theatres are finding the "buck a car" competition of drive-ins hard to meet, what will they do when faced with the "buck a household" competition of pay tv, he asked.

**Menace of Pay Tv** Exponents of toll television are after a rich prize, Mr. Wolfson stated. It is "a legal and licensed piracy of the free airwaves and a hi-jacking of the only merchandize we have to sell." After the first impact of pay tv has wiped out the theatres, giving the public no choice of picture entertainment except television, "there would be a charge of everything worthwhile that the people might choose to see on their own tv sets, which the people bought and which they must maintain," he said. "Not only would the cost to the public be enormously higher, but they would also be deprived of much good and some excellent entertainment which they now get free."

"This is the greatest menace of pay tv: The deprivation, the needless cost and even the hardship that it would put upon the American public. Certainly, we as exhibitors have an immediate and vested interest to protect, but the real import of our danger or our demise stands small against the monopolistic stranglehold this regressive device would have upon the public."

Pay tv would destroy the capital investment of more than $2.25 billion in theatres and would take the jobs of some 150,000 theatre employees. Mr. Wolfson declared. "Then," he continued, "While I'm not asking our hearts to bleed for the television industry, consider the economic upheaval and the personnel displacement there. The sales departments of each station would be decimated, or worse. The merchandising and sales promotion departments would be wiped out, or nearly so. The large programming departments and the production staffs would be cut to probably one person each."

"In short, instead of between 100 and 200 employees, a pay-tv station would operate with a staff consisting of little more than a film buyer (and what percentages he would have to pay!), a projectionist, an engineer to keep the station on the air and a few people to collect the ransom the public would have to pay for the return of the use of their own tv sets."

**Print Media Selfish** Mr. Wolfson warned exhibitors not to believe that the public is enthusiastic about the prospect of pay tv whenever they read favorable articles about it. "Newspapers and magazines have a vested interest, too," he commented, "and they would love to have the advertising dollars now going to television sponsoring their presses instead."

"To the contrary," he said, "whenever the public realizes that pay tv is really 'pay-or-you-don't-see tv', they have rejected it by almost unanimous majorities."

He cited several polls in which the public voted against pay tv by more than 95% and concluded: "This would seem to indicate that perhaps this case should not be decided in Washington at all, but that it might be a good idea to put it to the people themselves, not just in pre-worded petitions set out in theatre lobbies, but by a national vote by all the people who would be so immensely affected by such a change."

**Delay in Kansas** TelePrompTer Corp. has moved more slowly than the company had anticipated in the area of pay television. Last summer, with considerable fanfare, TelePrompTer disclosed it had devised the wired "participation tv" system, the heart of which was a "Key TV" control box, and announced the system would be tested in August over a cctv system the company owns in Liberal, Kan. (Broadcasting, June 27). But the test did not come off as scheduled, and it is now tentatively set for November.

A TelePrompTer spokesman said last week that a meeting of top company officials was scheduled in New York last Friday (Sept. 16), at which time the exact date and the type of test to be conducted were to be discussed. He reported that the reason for postponing the test was that TelePrompTer engineers had made improvements in the original methods of collecting data on program usage and the company decided not to experiment with a system that might prove obsolete.

He said that company officials were to determine if the test in Liberal would be merely "engineering" or whether it would include programming. If the latter course were accepted, subscribers would be asked to pay a fee. The Liberal, installation, he said, has 1,900 subscribers, but it is not known how many of the customers would be asked to participate in the tests.

SEVEN ARTS' PLANS
$11 million guarantee
given for WB package

Seven Arts Productions Ltd., Toron- 
to, revealed last week that 40 films of 
a package of 122 post-50 features pur- 
chased from Warner Bros. (BROAD- 
casting, Sept. 12) will be offered for 
sale to tv stations, starting this week.

David B. Stillman, president of Seven 
Arts Productions, said that Seven Arts' 
contract with Warner provides for a 
guarantee of $11 million for the 122 
films, plus payment to Warner of 50% 
of funds accruing beyond the guarantee 
and Seven Arts' distribution expenses.

He said Seven Arts is launching a sales 
and advertising-promotion campaign 
this week on behalf of the initial 40 
titles and indicated that other films 
in the package will be released at later 
dates, probably in groups of 40.

Mr. Stillman announced that Seven 
Arts will function in various areas of 
the entertainment field, including also 
the production of motion pictures and 
legitimate theater presentations. He 
said Seven Arts will produce or co- 
produce 15 feature films through 1961 
in which there will be a total 
investment of about $30 million.

Louis A. Chesler is board chairman 
of Seven Arts Productions Ltd., Toron- 
to. He has varied industrial interests, 
including General Development Corp. 
(building), Universal Controls Inc. and 
C. P. Clare Electronics. Elliot Hyman is 
vice president of Seven Arts Production 
and president of Seven Arts Associated 
Corp., New York, a division responsible 
for the tv distribution of the Warner 
titles. W. Robert Rich is vice presi- 
dent and general sales manager of 
Seven Arts Associated Corp. Donald 
Klauber is vice president and national 
sales manager of Seven Arts Assoc.

The initial package will be known 
as Films of the Fifties and includes 
such motion pictures as "The Prince 
and The Show Girl," with Marilyn 
Monroe and Sir Laurence Olivier; 
"Strangers On A Train," with Farley 
Granger and Robert Walker; "The 
High and the Mighty," with John 
Wayne, "Springfield Rifle," with Gary 
Cooper; "A Star Is Born," with Judy 
Garland and James Mason and "Hon- 
do," with John Wayne and Geraldine 
Paige. A complete list will be released 
by Seven Arts within a few weeks.

Mr. Stillman said the company also 
plans to engage in the production of 
tv film series, but will not initiate such 
activity until 1961 because of the pres- 
sure of other projects (motion picture 
production, theater production).

Hollywood musicians 
to get trust funds

Hollywood musicians who dropped 
their suits against the American Federa- 
tion of Musicians for a cash settlement 
of $3.5 million may get the money be- 
fore the end of the year. Los Angeles 
Superior Court Judge Burnett Wilson 
last week authorized necessary prelimi- 
nary procedures. Specifically, he per- 
mitted attorneys for the rebel musicians 
to go to the New York Supreme Court 
for an order for the Musicians Trust 
Funds to release money collected from 
recording, transcription and tv film 
companies. Last month Judge Harold 
W. Schweitzer of the same court au- 
thorized release of about $1 million 
to musicians employed at the major motion 
picture studios, covering fees for the 
release of theatrical films to television.

Attorneys for the plaintiff musicians, 
Harold A. Fendler and Daniel A. 
Weber, said that the distribution of 
the $3.5 million to the individual musicians 
may take several months. The order for 
the distribution ends four years of litiga- 
tion, which itself followed an intensive 
campaign within the AFM to upset the 
union's trust fund policies and have 
the increased and royalties paid to the 
individual musicians instead of into the 
trust funds. In recent months, AFM has 
revised its policies to permit payment 
of such fees to the musicians instead of 
to the trust funds.

Stock exchange plans 
daily radio-tv report

Upward of 110 radio stations and a 
handful of television stations are set to 
take a free, daily stock report from 
the New York Stock Exchange begin- 
ing Sept. 19. Tests are underway now, 
using a one-minute tape loop on spe- 
cial telephone lines. Reports are re- 
corded by members of the NYSE staff 
after the 3 p.m. closing, covering high- 
lights of the day's trading. The ex- 
change supplies each station with a 
special taped opening and closing in- 
corporating call letters, and tv stations 
get stock film footage of floor action 
to play with the audio.

With production eventually of new 
tape cartridges, the exchange plans to 
expand the report to include more busi- 
ness news and fill the three-minute min- 
imum on long-distance calls. The serv- 
ices is available to any station willing to 
pay for the line and to accept the NYSE 
no-opinion news policy. Some 50 radio 
stations are being accommodated indi- 
vidually by the exchange and around 60 
more through Radio Press Interna- 
tional. Inquiries about the daily re- 
port are handled by Robert E. Gurvitz, 
Stock Exchange, 11 Wall St., N.Y.
TV Sales Manager Neal Edwards returns home after a gratifying day at the office. His precocious little son, Kip, greets him at the door, then ushers him over to a large circular table that has been pushed into a corner so that it touches two walls. Kip points ominously at a spot on the table's edge.

"Here's a puzzle for you, Dad," says Kip. "That spot on the table is exactly eight inches from one wall and nine inches from the other. Can you tell me the diameter of the table without measuring it?"

Edwards' math is as sound as his preparation of spot-campaigns for WMAL-TV clients. He solves the problem forthwith. Can you?

Send us the solution and win a copy of Dudeney's "Amusements in Mathematics" — Dover Publications, Inc., N. Y. Repeat winners will receive other valuable (?) prizes.

NBC Radio affiliates praise network format

The NBC Radio Affiliates Executive Committee last week took another look at the operation of its network's new programming format—and said it found it every bit as satisfactory as it was the last time they looked.

The format—which since Jan. 1 has emphasized news and public affairs and omitted entertainment shows—"has exceeded our expectation," George W. Harvey of WFLA Tampa, chairman of the affiliates group, said in a statement issued after the meeting, held Thursday in New York. He said "there can be no doubt" that NBC Radio, headed by William K. McDaniel, is No. 1 in both sales and ratings. The committee unanimously endorsed the plan as a "workable format for the stations, the network and the advertisers."

The last time the committee had examined the new format's operation so thoroughly, according to participants, was last April, when the plan had been in effect for three months. The committee then called it "the industry's only forward-looking concept" (BROADCASTING, April 11).

Much of last Thursday's session reportedly was devoted to discussion of CBS Radio's proposed new format, which comes up for approval by CBS Radio affiliates at their convention in New York Sept. 28-29. Under this plan, CBS Radio proposes to eliminate daytime serials and cut back on other drama programs but continue its personality programming and expand its news coverage (BROADCASTING, Aug. 22).

NBC Chairman Robert W. Sarnoff, President Robert E. Kintner, Senior Executive Vice President David C. Adams and Mr. McDaniel, vice president in charge of the radio network, headed the NBC delegation at Thursday's meeting. Affiliates committee members participating, in addition to Chairman Harvey, were Douglas Manship WJBO Baton Rouge, La.; David M. Baltimore, WBBQ Wilkes-Barre, Pa.; Ralph Evans, WOC Davenport and WHO Des Moines; Frank Gaither, WSB Atlanta; William E. Goetze, KFSD San Diego; William Grant, KOA Denver, and Willard Schroeder, WOOD Grand Rapids.

20th's post-'48 sales

Initial sales on the post-'48 package of 20th Century-Fox feature films were announced last week by National Telefilm Assoc. The package of 61 features has been sold in a total of 17 markets, consisting of WNTA-TV Newark-New York, WRCV-TV Philadelphia, WRC-TV Washington, D.C., KTVI (TV) St. Louis, WCKT (TV) Miami, WOWT-TV Omaha, KPHO-TV Phoenix, WHNB-TV New Britain-Hartford, WJAR-TV Providence, KUTV (TV) Salt Lake City, KOB-TV Albuquerque, WHYN-TV Springfield, Mass., WKZO-TV Kalamazoo, Mich., KFSA-TV Fort Smith, Ark., KLIX-TV Twin Falls, Idaho, WHBF-TV Rock Island, Ill., and KLKJ-TV Las Vegas, Nev.

K won't be ignored

The tv-radio networks said last week they proceed with their plans to cover Premier Khrushchev's visit to the United Nations despite a number of written protests received from viewers. The question came up last Wednesday when John Daly, vice president of ABC's news, special events and public affairs department, issued a statement that said in part: "We've been inundated by letters from all over the nation, asking us to ignore Khrushchev's being here." He added that the network plans "full, regular news coverage," but also emphasized that the Russian leader has not been invited to appear on its news or panel programs. A check Thursday revealed this count of protest letters: ABC-TV, 75; CBS-TV, 25; NBC-TV, 41, and MBS, 14. An NBC spokesman cracked: "We get more letters than this when Jack Paar's tie is crooked.

'Doerfer plan' sales

A number of ABC-TV affiliates have bought Westminster Broadcasting's The American Civil War series to program in their local "Doerfer Plan" time, according to Trans-Lux Television Corp., distributor of the 13-episode series. It reported sales for that purpose to KWBW-TV Buffalo, N.Y.; WAST (TV) Albany, N.Y.; WSPD-TV Toledo, Ohio, and WUSN-TV St. Petersburg, Fla. Trans-Lux said the series also had been sold to ABC-TV affiliates WMAL-TV Washington, WTVN (TV) Columbus, Ohio, and WLOF-TV Orlando, Fla., but those stations had not decided on using it in "Doerfer Plan" segments.

The "Doerfer Plan" is a voluntary agreement among the three tv networks and former FCC Chairman John Doerfer. It provides that each network will program at least one hour a week of public service shows in prime time, with a half-hour every third week turned back to affiliates for local public service efforts. Beginning this fall ABC-TV will turn back every third week of its 7-7:30 p.m. Tuesday time period, in which it will program Expedition on the other two weeks.

IT'S MOVIES & NEWS AT KHJ-TV
New format makes Los Angeles station a motion picture theatre at home

Two weeks ago in San Francisco, pretty girls invaded the city's advertising agencies, presenting media directors and timebuyers with red buttons reading "MAYFE...anywhere." Later, in restaurants frequented by agency people, button wearers were approached by other pretty girls and asked what the letters stood for. Anyone giving the right answer: "Movies are your finest entertainment...anywhere...and especially on Channel 9, Los Angeles," received nine silver dollars.

Last week in Los Angeles, more pretty girls were making the rounds of agency offices there, again distributing MAYFE buttons. With them went lottery cards, enabling the agency personnel to win cash prizes, plus the grand prize of a "boat trip to Las Vegas" (a geographical impossibility made technically true through the double award of a weekend in the Nevada resort city plus a boat which the winner could take along or not as he chose).

This week, in New York, groups of key agency executives are being taken on luncheon or cocktail yachtling trips up the Hudson on a craft newly christened the S.S. MAYFE 9. Their host is Mal Klein, vice president and general manager of KHJ-TV Los Angeles, ch. 9 station which proclaims itself the movie station for Los Angeles.

"Many radio stations have based successful operations on a 'music and news' format," Mr. Klein commented the other day. "At KHJ-TV, we've adopted the formula of 'movies and news.' Motion pictures have always been our most popular programs. Now we're making them our only programs, except for news and sports. Our schedule still shows a few TV films, but as fast as our present commitments expire we'll drop them in favor of theatrical pictures."

Like A Movie Theatre • More than six years ago, KHJ-TV embarked on an experiment, the same theatrical movie was shown at the same time each night for a full week, theatre fashion. The Los Angeles viewers liked the plan and it's been in effect ever since. Subsequently, a second feature film, run across the board, was added. Then a daily matinee run. Then a weekly Sneak Preview. Last week, launched a new double-feature evening program format making it more movie theatrelke than ever.

At 7:30-9 p.m., Monday-through-Thursday, KHJ-TV now presents its Million Dollar Movie. At 9-10:30 p.m., Channel 9 Movie Theatre goes on. At 10:30 p.m.-12 midnight, Million Dollar Movie is repeated. "The viewer tunes in any time before 9, watches two complete feature films and tunes out when he reaches the point where he tuned in, just like going to a theatre," Mr. Klein commented.

The two-picture combination is also shown on Sunday evening (7-10 p.m.) and Saturday and Sunday afternoons (1-4 p.m.). Channel 9 Movie Theatre is also seen Monday-through-Friday at 5-6:30 p.m. In all, each Million Dollar Movie gets 11 showings during its week's run on KHJ-TV and the Channel 9 Movie Theatre feature is shown 12 times. Both are pictures which have not previously been shown in television in Los Angeles, Mr. Klein said. He adds that he has spent more than $1.3 million since January 1 to get first-run movie rights to top theatrical movies to keep KHJ-TV on top in this type of programming in the highly competitive seven-station Los Angeles market. KHJ-TV now has close to 400 films not yet telecast in the city, he said.

"Our multiple-showing policy means that we only want a viewer to watch us once a week in prime time," Mr. Klein stated. "And it means that we can offer advertisers unduplicated coverage. If they buy adjacencies to four westerns on the networks, they may well be reaching the same viewers four times. But if they buy any one of the MAYFE package plans, they're assured that there'll be a new audience for every spot."

The Plans • Only one-minute announcements are offered under these weekly package plans, which include: Million Dollar Movie 16-spot package (11 MSM plus five different Million Dollar Matinee [Mon.-Fri., 3-4:30 p.m.] films) for $2,500; eight spots for $1,350. Channel 9 Movie Theatre 12-spot package for $1,800, six spots for $1,000. Whipsaw Plan 14-spot package (in two weeks covers all MSM and Ch9MT showings) for $2,250, seven spots for $1,200. Other plans offer various combinations of MSM and Ch9MT ranging from as few as 10 (or five for the half-strip) to as many as 28 spots per week.

"We feel advertisers are entitled to the full attention of the audience and our plan lets them have it," Mr. Klein said. "At no time during either Channel 9 Movie Theatre or Million Dollar Movie will we put two one-minute spots back to back. When it's time for a commercial break—and that will come where it won't interrupt the picture objectionably and never less than 15 minutes away from the previous break—we will show a one-minute message, then a 10-second programette, then the second commercial and then back to the movie. The programettes will be made up of news headlines, information about the picture or its star or something else of interest to the viewer. They will never include any sell, not even for a charity drive or civic cause, such as a "Get Out the Vote" spot that fall. Nor will they ever be trailers for next week's movie. They'll be genuine news or information."

The KHJ-TV schedule calls for a five-minute newscast between the end of any movie and the start of the next one, or every 90 minutes, Mr. Klein said. There will also be at least three news bulletin-and-headline broadcasts during the showing of each movie.

To enable the station to broadcast every picture to the best advantage, KHJ-TV is installing RCA film and slide color equipment and as soon as the installation is complete all color films will be broadcast in color, he said.

KHJ-TV will actively promote movie-going to its viewers, Mr. Klein said. "With our format we can afford to say 'There's a great new picture in town, go see it tonight. You can watch us tomorrow.'" He expects that a policy like this will pay off by making it easy for KHJ-TV to get top movie stars as guests for special occasions and "it might even pay off financially through increased movie advertising."

Precision metals and precious jewels. But it also takes that "quality touch" of a master watchmaker to create such a perfect blending of balance and motion.

Similarly, it takes far more than facilities to achieve that quality atmosphere so vital to good broadcasting and telecasting practices.
A STERN DECISION ON CH. 7 MIAMI
Three applicants disqualified; WCKT (TV) grant held void

Disqualification of three of the four applicants for Miami's ch. 7—including the present grantee, WCKT (TV)—and the voiding of the 1956 grant were recommended last week by special FCC hearing examiner Horace Stern.

Judge Stern found that the three applicants had made behind-the-scenes approaches to former FCC Commissioner Richard A. Mack and thus tainted themselves to such an extent that—

- The grant made in January 1956 to Biscayne Television Corp. (WCKT) was void.
- Biscayne Television, East Coast Television Corp., and South Florida Television Corp. are disqualified to receive the grant.

The only applicant found by Judge Stern to be unbarred is Sunbeam Television Corp. Sunbeam is principally owned by Sidney D. Ansin, Miami businessman who has large real estate interests in the state.

The examiner's recommendations must be accepted by the FCC before they become final. Usually parties file exceptions and a hearing is held before the commission en banc before a final decision is handed down.

Charges that some of the Miami ch. 7 applicants attempted to influence Commissioner Mack outside the record were first made before the House Legislative Oversight Subcommittee in 1957. The case was remanded to the FCC at its own request by the U. S. Court of Appeals in 1959. Hearings were held in Philadelphia before Judge Stern last June.

WCKT, and its companion stations, WCKR-AM-FM, are owned by principals of the Miami Herald (Cox) and Miami News (Knight) and Niles Trammell, former president of NBC. Mr. Trammell holds 15%. The remainder is divided equally among the principals of the Miami newspapers.

The Findings — Judge Stern found that Biscayne principals enlisted the aid of Ben A. Fuqua, vice president of the Florida Light & Power Co.; and that Mr. Trammell, James M. Cox Jr., president of the Miami News (and principal owner of the Cox radio-tv stations), and John D. Pennekamp, associate editor of the Miami Herald (a Knight newspaper) spoke to Mr. Mack about the case at various times while it was pending before the FCC.

The examiner held that South Florida Television Corp. (which is headed by Jack Stein), used Perrine Palmer Jr. and Thurman Whiteside, both friends of Commissioner Mack, to intercede in its behalf. He found that East Coast Television Corp. (whose principal owner is Richard Mead), had engaged Miles H. Draper, a Tampa attorney and Republican political figure, who brought pressure on Commissioner Mack.

In reviewing these activities, Judge Stern stated:

"And so, viewing the entire case in retrospect, while no doubt there was merit in the applications of each of the three parties here under discussion, it is clear that they were not content to rest their respective claims on such merit, but, forgetting the wise adage that 'Striving to better, oft we mar what's well' [King Lear, Act. 1, Scene 4], they failed to realize that their ill-advised attempts improperly to influence Commissioner Mack merely imperiled the validity of any award they might be fortunate enough subsequently to gain by the final decision."

The Precedent — In considering the question of disqualification, Judge Stern leaned heavily on the FCC's final decision in the Miami ch. 10 case. This decision, issued July 14, voided the 1957 grant to National Airlines and found that three of the four applicants disqualified themselves by engaging in behind-the-scenes attempts to influence Commissioner Mack. The commission issued a new grant for Miami ch. 10 to L.B. Wilson Inc. This decision is now being contested in the courts.

In his conclusions, Judge Stern found that Mr. Mack should have disqualified himself in the final voting in the Miami ch. 7 case; that having failed to do so the grant was void, and that Biscayne, South Florida and East Coast Television "having been guilty of misconduct and improper activities of a type that revealed a lack of proper respect on their part for the integrity of the adjudicatory process, are disqualified to receive a grant of their applications for a construction permit for ch. 7, Miami."

The FCC also on July 14 voided the 1957 grant of ch. 5 in Boston to the Boston Herald-Traveler, but did not disqualify the permittee or any of the others in this case. This too is being contested in court.

Away from FCC, the decision is a final order on the St. Louis ch. 2 case. In this, Judge Stern found that KTVI (TV) St. Louis principals had engaged in off the record activities to influence the move of ch. 2 from Springfield, Ill., to St. Louis, but that no disqualification attached. He did recommend, however, that the move be vacated and the subject re-evaluated.

Designated for hearing on the ex parte issue are two additional cases: Jacksonville, Fla., ch. 12 and Orlando, Fla., ch. 9. These have not yet gone to hearing.

Grossmans proposed for Miami's ch. 6

South Florida Amusement Co., whose principals operate a Miami drive-in theatre, was recommended over two other applicants for grant of Miami ch. 6 in an initial decision issued last week by FCC Hearing Examiner Forest L. McClenning.

Mr. McClenning said South Florida excels in broadcast experience and integration of ownership and management over applicants Publix TV Corp. and Coral TV Corp. South Florida President Sherwin Grossman and his father, Harry J. Grossman, vice president and treasurer, operated WBUF-TV Buffalo N.Y. (ch. 17) from August 1953 until the uhf station was sold to NBC in December 1955. Mr. McClenning found the applicants equal in the factors of local residence, planning, policies, staffs, equipment and studios, with "moderate differences" in civic participation, diversity of business back-

Holtz resigns

Edgar W. Holtz, associate FCC general counsel who has been chief attorney for the commission in handling the ex parte cases, has resigned from the FCC effective Friday (Sept. 16). He is joining the Washington law firm of Hogan & Hartson.

Mr. Holtz joined the FCC in 1955 as assistant chief of the Office of Opinions & Review. In 1956 he was named associate general counsel and in 1958 he was assigned the job of prosecuting the sticky investigations of alleged influence in television grants. He was the senior commission attorney in four of these cases Miami ch. 10, Boston ch. 5, St. Louis ch. 2 and Miami ch. 7.
In Roanoke in '60 the Selling Signal is SEVEN...

Wig-wagging will get you nowhere, but your selling message on WDBJ-TV will go into over 400,000 homes in Virginia, N. Carolina and W. Va.... a rich and growing Television Market of nearly 2,000,000 people.

You can sell like sixty on seven.
In Roanoke, seven is WDBJ-TV... best in sight, day or night, for higher ratings at lower cost. Your only station in this area offering CBS network shows — plus superior local programming, plus hard-hitting merchandising assistance.

The FCC allocated ch. 6 to the Miami area April 24, 1957.

FCC refuses to delay Miami, Boston rulings

The FCC last week denied petitions by incumbent operators of ch. 10 in Miami (WPST-TV) and ch. 5 in Boston (WHDH-TV) asking for stays of the agency's orders of July 14 which vacated grants of the respective channels to the two.

The commission had issued instructions to this effect the week before which also authorized L.B. Wilson Inc. (WLBW-TV), only one of the four Miami applicants not disqualified, to construct a ch. 10 station with 316 kw visual power and an antenna height of 520 feet and gave WLBW-TV special temporary authority to operate for four months only after construction (Broadcasting, Sept. 12).

WPST-TV, owned by National Airlines, may continue on the air only until Sept. 30. WPST-TV had asked for the stay pending court action on its motion to vacate the July 14 FCC decision which had rescinded the Feb. 7, 1957, grant to that station. Other ch. 10 applicants were WKAT Miami and North Dade Video Inc.

WHDH-TV's petition had asked for a stay of the FCC's July 14 order pending the station's petition for rehearing. In the July 14 order vacating the April 24, 1957, grant to WHDH-TV, the FCC directed further comparative evaluation of WHDH-TV and the other three contestants for ch. 5, including filing of briefs and oral argument before the FCC, but allowed WHDH-TV to continue operating on ch. 5 under special temporary authority. Other Boston ch. 5 contestants are Greater Boston TV Corp., Massachusetts Bay Telecasters Inc. and Allen B. DuMont Labs.

Commissioner Robert E. Lee dissented from both of the FCC decisions last week. Commissioners T.A.M. Craven and Charles H. King did not participate.

Illiana plea backed in Terre Haute case

The Broadcast Bureau supported applicant Illiana Telecasting Corp. in asking during oral argument last week that the FCC overturn an examiner's initial decision favoring WTHI-TV Terre Haute for award of ch. 2 in that city. WTHI-TV presently occupies ch. 10, but has applied for ch. 2; meanwhile, it is in a license renewal proceeding for ch. 10 in which Livesay Broadcasting Co. (WLBH Mattoon, Ill.) has applied for ch. 10.

Illiana said WTHI-TV principals also

WAVE-TV Gives You 
28.8% MORE HEAVY EATERS!

(therefore 28.8% more food-selling opportunities!)

When more people see your commercials, you automatically make more sales. So it's important to you that, from sign-on to sign-off in any average week, at least 28.8% more families watch WAVE-TV than any other television station in Kentucky.

And you pay less per thousand for viewers on WAVE-TV than on any other station in this area. A lot less! NBC Spot Sales can PROVE it to you!
The law of the land

The President signed the payola bill (S 1898) into law (Public Law 86-752) last week and FCC staff people began analyzing the legislation so rulemaking can be issued to implement it.

All sections of the new law are effective as of the date of presidential signature (Tues., Sept. 13) except setting up a pre-grant procedure of "petitions to deny" a grant to replace the present protest procedure for grants made without hearing. The new pre-grant provisions become effective 90 days from enactment.

A commission spokesman said last week the FCC staff still is studying the bill and issuance of proposed rulemaking hasn't yet been taken up at FCC meetings. He said it's likely separate rulemaking will be issued for the different sections of the new law. For those sections effective immediately (forfeitures, payola, quiz rigging), he said the FCC will rely on the intent and cited instances in Senate and House committee reports to administer these provisions until the FCC rulemaking goes into effect.

One FCC spokesman said that to get the rules on pre-grant procedures into effect within the 90 days the FCC has the authority to call for comments within the minimum period of 45 days from its notice and, to make the deadline, dispense with the usual replies to such comments, which would take additional time.

FCC Chairman Frederick W. Ford said last week he has no comment on FCC rulemaking plans for the new law.

control a radio station in Terre Haute and the city's only two newspapers, adding the newspapers charge joint national advertising rates, which the FCC has considered in past cases. WTHI-TV is asking for ch. 2, even though it has not tried to improve its ch. 10 facilities by asking for increased antenna height, Illiana said, and now wants the FCC to assure that it keeps ch. 10 until it gets ch. 2.

Illiana and the Broadcast Bureau say a grant to Illiana will give Terre Haute two tv stations, while a grant to WTHI-TV will place things in an uncertain position.

WTHI-TV replied that Illiana is ignoring the fact that a court has vacated the allocation of ch. 2 to Terre Haute and that nobody can build until the related Sanganon Valley case involving a shift of ch. 2 from Springfield to St. Louis) is resolved. The station said Illiana, which has claimed ch. 10 to be just as good as the dropped in ch. 2, should have applied for ch. 10 along with Mr. Livesay, but, instead, lost in a "fair fight" for ch. 2 with WTHI-TV in the initial decision.

WTHI-TV charged the Broadcast Bureau with trying to "restate" the FCC's "anti-straddling" rule to preclude a station from trying to better itself. WTHI-TV, he said, feels ch. 2 is better than ch. 10 (six additional miles coverage). The station, by being in the position of trying to hold on to ch. 10 until it is awarded ch. 2, has been "placed in a box not of our own choosing," WTHI-TV said. The Terre Haute station said there is no evidence its principals have ever handled the newspaper and broadcast properties in a way contrary to the public interest.

'Cut' religious film spurs complications

WTIC-TV Hartford expressed surprise last week that its deletions in a religious film broadcast last January resulted in introduction of a bill in Congress.

Rep. Abraham Muler (D-N.Y.) introduced the bill (HR 13161) on Aug. 31, the day before Congress adjourned, which would prohibit a station from making deletions in material where there is a prior agreement with another person specifying the matter to be broadcast.

The bill, which died automatically as Congress adjourned, was introduced by Rep. Muler after a complaint was made to him by the Commission on Social Action of Reformed Judaism, New York, about WTIC-TV's deletions from a film furnished to the station by Rabbi Samuel E. Karff of West Hartford for a sustaining religious program. The film was furnished to Rabbi Karff's synagogue by the commission.

The complaint to Rep. Muler was that WTIC-TV deleted two portions of the film, "The Work of My Hands." The station said it deleted as unsuitable for Sunday audiences treatments on starvation abroad ("too cruel and stark") and on capital punishment ("too controversial").

Leonard J. Patricelli, vice president and program director of WTIC-TV, said the station's position on capital punishment is in line with the NAB TV Code which states that religious programs should emphasize "broad religious truths, excluding the presentation of controversial or partisan views not directly or necessarily related to religion or morality."

He said WTIC-TV carried the film last Jan. 24 and that Rabbi Karff knew about and agreed with the station's position on the deletions six days before the broadcast.

Rep. Muler said last week he will reintroduce the bill next year if he's reelected and if broadcasters do not give him sufficient reasons why the bill should not be reintroduced.

FCC actions favor five new daytimers

The FCC last week granted two new am stations and indicated intentions to grant a third, while commission hearing examiners recommended am grants to two other applicants. In all cases the stations would be the first local outlets in their respective communities.

Great Plains Broadcasting Inc. was granted 1310 kc, 500 w, daytime, at Fairbury, Neb.

KTM Broadcasting Co. was granted 910 kc, 500 w, daytime, at North Charleston, S.C.

The FCC directed preparation of orders for a grant to Macon County Broadcasting Co. of 1050 kc, 250 w, daytime, at Montezuma, Ga.

Examiner Annie Neal Huntting recommended Canandaigua Broadcasting Co. for grant of 1550 kc, 250 w, daytime, at Canandaigua, N.Y.

Examiner Charles J. Frederick recommended Herman Handloff for 1260 kc, 500 w, daytime, directional, at Newark, Del.

Radio and video tape aid 'Voice' expansion

The U.S. Information Agency's Voice of America expanded its radio broadcasts to Latin America and Africa and the agency's television service inaugurated a new video tape production studio during the first six months of 1960, USIA Director George V. Allen announces today (Monday) in his semiannual report to Congress.

The VOA in March started a one-hour daily Spanish-language shortwave broadcast which by the end of June was being relayed to local audiences by 75 regular (medium wave) broadcast stations in eight Latin American countries, Mr. Allen said, and more stations are being added to the list. Latin American stations also used around 80,000 hours of programs recorded by the VOA.

In the six-month period, the Voice added a half-hour French-language broadcast to West and Central Africa, where French is widely spoken, and also placed in operation a new antenna at its Munich, Germany, base to

BROADCASTING, September 19, 1960
improve its signal to West Africa. Mr. Allen said the USIA's programs prepared on video tape now can be seen on about four-fifths of the free world's tv sets, with tapes suitable for broadcast on all stations regardless of local tv transmission standards.

Despite resumption of Soviet jamming of VOA broadcasts after the collapse of the summit meeting in Paris, the Voice and other USIA services continued to give "straightforward accounts of the Summit conference and the U-2 incident" and President Eisenhower's trip to the Far East and Latin America, Mr. Allen said. Soviet jamming—which had been discontinued at the time of Russian Premier Nikita Khrushchev's tour of the U.S. in September 1959—is aimed chiefly at VOA broadcasts to Moscow and other heavily populated areas. The Voice's English-language broadcasts have never been jammed, Mr. Allen said.

**Government briefs**

**Channel changes**: By proposed rulemaking, the FCC has asked for comments on conflicting switches in the tv table of assignments affecting several California cities. The proposals: by KIEM-TV Eureka, Calif., substitute ch. 13 for ch. 9 in Alturas and add ch. 9 to Redding in addition to present ch. 7; by KSUE (TV) Susanville, Calif., and KVIP-TV Redding, Calif., substitute ch. 13 for ch. 9 in Alturas and move ch. 9 to Susanville.

**Comments sought**: The FCC has asked for comments on proposed rulemaking which would revise some of its fm and tv standards. These involve (1) specifications for frequency response in the vicinity of the color pass band, (2) direct measurements of operating power of aural transmitters; (3) relaxation of reporting requirements on operation with reduced power if for no longer then 10 days; (4) abolish reference to "standard black tv picture" in Sec. 3.689 (a) (1) which specifies transmitter modulation to be employed in determining visual operating power and substituting language which specifies the form and amplitude of the modulating signal.

**In the red**: Bankruptcy proceedings have been filed by KBLR-AM-TV Goodland, Kan. The courts have appointed Max Jones as trustee. KBLR-TV operates on ch. 10 while the am facility is a 1 kw daytimer on 730 kc. The stations are owned by a group headed by Leslie E. Whittemore, president. They were purchased in June 1959 from James F. Blair for $145,000.

**None left**: Two applications for am facilities on 730 kc in Central Michigan have been dismissed by the FCC. The application of Capitol Broadcasting Co. for an outlet in East Lansing was denied and a similar application by W.A. Pomeroy for a station in Tawas City-East Tawas was dismissed for failure to prosecute. An initial decision in May, 1959 called for this action. These were the only applications for 730 kc in that locality.

**Clarification**: A bill affirming the FCC's regulatory jurisdiction over the use by common carriers of wireless communications (such as microwave relays) was signed into law last week by the President. The bill (S-1740, now Public Law 86-751) actually clarified the FCC's jurisdiction in this area, since this has never been disputed by common carriers.

**Two consent**: Two record companies, both of the same Baltimore address, have signed a Federal Trade Commission consent order prohibiting them from engaging in payola practices. The FTC, in affirming an initial decision accepting the agreement, said Mangold Distributing Co. and Marshall Enterprises Inc. were charged last May 13 with making payments to tv and radio disc jockeys for exposure of the firms' records.

**Deceiving the public**: Three manufacturers of tv picture tubes last week were charged by the Federal Trade Commission with failing to reveal that tubes they make are reactivated, reconditioned or rebuilt with used parts. Ultravision Manufacturing Corp., Hawthorne, N.J., and American Standard Tube Corp., Jamaica, N.Y., do not make disclosure in any way, while the third firm, Wells Electronics Co., Cedarhurst, Long Island, N.Y., makes inadequate disclosure on cartons and none on the tubes themselves, the FCC said. The agency said this gives dealers the means to deceive the public.

**Tax deduction**: A bill to allow a manufacturer to deduct local (co-op) advertising costs from the price of his product in computing manufacturers' excise taxes was signed into law last week by the President. Up to 5% of the manufacturer's price may be deducted for local advertising on tv and radio in newspapers under the provisions of the bill (HR 12536), which provides for reimbursement through retailers for local advertising. The advertising must give the name of the article and the retail location where it may be purchased.

BROADCASTING, September 19, 1960
FAA CONTROL OF STATION TOWERS?

Air agency moves to action, issues proposed rulemaking

The Federal Aviation Agency on Friday threw down to the FCC the gauntlet of control over radio and television towers.

The FAA issued proposed rules which would require radio and television broadcasters to submit proposals for antenna heights and locations to the aviation agency for "determination" as to whether they constitute an air hazard or not.

The notice asks for comments by Oct. 31.

A spokesman for the FAA said last week that the agency feels its legislative statute gives it the authority to determine hazards to air commerce.

By the same token, he said, the Communications Act gives to the FCC the power to issue broadcast licenses in the "public convenience and necessity."

He expressed the hope that both agencies will accommodate their actions to each other in the best interest of both aviation and broadcasting.

An FAA official said that the criteria to be used in determining whether an antenna tower is an air navigation hazard or not is, in some instances, less stringent than the criteria used by the Airspace Panel of the Air Coordinating Committee.

ACC Folds Oct. 10. - The ACC goes out of existence Oct. 10, following a presidential executive order last month (BROADCASTING, Aug. 15). For the last decade, the Airspace Panel and its regional offices have made aeronautical studies of all broadcast towers over 500 ft. above ground. The results of these deliberations were forwarded to the FCC as recommendations.

The FCC was not bound to follow the recommendations, but in many instances found them so serious that it designated applications involving tall towers for hearings. Aviation interests, including the military services, could then become parties to the hearing and argue their objections before the FCC.

It is this procedure which, in principle, is being challenged by the FAA in its proposed regulations regarding tall structures. The proposals envisage, in the eyes of some broadcast attorneys, a separate and distinct proceeding before the FCC on the separate and distinct question of antenna heights and sites.

The FAA claimed that Secs. 1101, 313 (a) and 307 (a) of the Federal Aviation Act gives it the power to require notice and formulate policy on structures which might constitute hazards to air commerce.

To Establish "Farms." - It would also establish, in the rules, antenna farms for the entire United States. The specific locations of these farms, the FAA notice said, would come later.

"With the expansion of the aviation industry the problems presented by the construction or alteration of structures affecting safety in air commerce have become pressing and can no longer be satisfactorily resolved by presently established criteria and procedures," the notice stated. "This is particularly true in view of the fact that the present procedures for the evaluation of proposed construction with regard to possible hazards to air commerce utilize various criteria developed at different times and for different purposes, some of which are regulatory in nature and others are of a policy nature..."

In referring to the demise of the ACC, the FAA order stated: "It is to be noted at this point that no other forum exists for the consideration of the effect of other tall structures upon safety in air commerce; and further that the Federal Communication Commission's consideration of antenna structures is in connection with the issuance of a construction permit or broadcast permit for broadcast purposes."

The agency said that consideration will be given to "possible" adjustments of aviation requirements to accommodate tall structures, like raising minimum flight levels and realigning routes, airways and flight patterns. Then it added: "The studies would also provide for the consideration of possible adjustments to the location and height of proposed structures to eliminate or minimize non-conformance with the criteria."

In establishing "specific recognition" to the requirements of the broadcasting industry, the FAA stated, antenna proposals that meet established dimensions in antenna farm areas would be automatically excluded from the category of aviation hazards.

In the interim between the cessation of the ACC and the adoption of the new regulations, the FAA announced that the FAA administrator (General E.R. Quesada) would make judgments on all pending matters.

The proposed rules are divided into five subparts. Each of these relate to a

Broadcasters favor FCC authority

Two strong spokesmen for the broadcasting industry last week asserted complete and final FCC authority over the grant of broadcast permits—including the heights and locations of antenna towers. NAB said the jurisdiction claimed by the Federal Aviation Agency and aviation interests over towers was based on an erroneous interpretation of the FAA Act. It cited an FAA publication which reserved to the FCC the right to make a final decision on broadcast matters, even though the FAA may have an interest. It quoted FAA comments supporting an amendment to the Communications Act to give the FCC power over abandoned broadcast towers as indicating that the aviation agency acknowledged FCC jurisdiction over towers. Even Sec. 1101 of the Aviation Act is clear in this respect, NAB said; it gives to the FAA power only to require notice of construction.

The Asst. of Maximum Service Telecasters maintained also that the FCC retains the power of deciding the location and heights of broadcast towers. This not only has been performed properly over the past years, it stated, but aviation interests have acknowledged this primacy by participating in FCC hearings on this issue. FCC itself has conceded this position, it said, in publications, in its rules and in testimony before the Senate Aviation Subcommittee. AMST emphasized that had Congress intended the FAA to be given the jurisdiction it would have spelled it out in the 1958 act establishing the aeronautical authority.

Both comments were in the nature of replies to the FCC's rulemaking proposals issued last February which were intended to amend Part 17 of the FCC rules to refer to the FAA rather than the Air Coordinating Committee. Comments filed on June 7 from the FAA and aviation quarters challenged the FCC's jurisdiction (BROADCASTING, June 13). Deadline for replies is today (Sept. 19).

specific function—(a) introduction, (b) requirements for notice of construction or alteration, (c) procedures for aeronautical study, (d) rules of practice for hearings, (e) establishment of antenna farms.

Any person constructing or altering an existing structure which is 150 ft. above ground must notify the FAA.

If a structure is within 15,000 ft. of any airport and is one foot or more above ground for each 100 ft. it is distant from the airport boundary, notice must be filed.

Notice must also be filed for any structure that is within 5,000 ft. of any heliport three feet above ground for each 100 ft. distance from the heliport boundary.

In its criteria to determine an aeronautical hazard, the FAA proposed rules start with any structure which is 500 ft. above ground, or 170 ft. above ground within the geographical limits of any control zone or control area or within 5 miles either side of a visual flight flyway. Also considered a hazard is any structure which is 1,000 ft. below the established median enroute altitude of an off airway route.

Other highlights of the proposed regulations include:
- Definitions of airport approach obstructions planes.
- Notice is not required where a structure is screened by already existing tall structures or terrain.
- Notice must be filed not less than 30 days prior to the beginning of construction or alteration.
- The procedure to be followed after notice is that of (1) an informal conference, (2) a fact-finding by a regional FAA office, (3) a "determination" by the FAA. The rules also provide for a full hearing before an FAA presiding officer if a petition for such a move is allowed by the FAA administrator.

Fort Smith ch. 22

Fort Smith Telecasters Inc. was granted ch. 22 at Fort Smith, Ark., last week by the FCC. The firm, owned one-third each by James Roy Jordon (tire and auto supply store), Lloyd G. Hobbs (finance company and motel) and C.E. Laws (real estate) plans 8.51 kw power visual and 4.79 kw aural, with antenna 240 feet above ground. Presently operating at Fort Smith is ch. 5 KFSA-TV. FTC to take road with ad groundrules

The Federal Trade Commission has invited 2,000 business concerns in the Cincinnati area to attend a special "pilot" conference in that city Sept. 28 to promote truthful and non-deceptive advertising on a community-wide basis.

If the conference is successful, similar ones may be held in other metropolitan areas, according to FTC Chairman Earl W. Kintner. It begins at 10 a.m. in the Hotel Sheraton-Gibson.

The purpose of the conference, Mr. Kintner said, is to familiarize businessmen with their legal responsibility to advertise honestly and thus reduce the volume of false and misleading advertising.

The three-man FTC delegation will be headed by John R. Heim, director of the FTC's bureau of consultation, which is conducting the session. The morning session will see discussion of the FTC's guides against deceptive pricing and bait advertising and in the afternoon on its guides on deceptive advertising of guarantees and tire advertising. Mr. Heim and Victor H. Nyborg, president of the Assn. of Better Business Bureaus, will speak at lunch.

The FTC last December held a two-day conference in Washington on public deception, with representatives of consumer and media groups and others (Broadcasting, Dec. 28, 1959).

Kintner: report dishonest competitor

Advertising people were invited last week by Federal Trade Commission Chairman Earl W. Kintner to report to that agency "by mail or telephone" any dishonest advertising by their competitors.

Addressing the Advertising Men's Post No. 209 of the American Legion in New York last Monday, Mr. Kintner said the thought of being a "squealer" may be distasteful, but "it is your public duty" to call deceptive advertising to the FTC's attention, a course, he said, which is far more intelligent than acquiescing in "such activity which waste advertising dollars and discredit the entire industry."

He also urged advertising people to use ingenuity and inventiveness to "come up with bona fide advertisements which will outdraw the shady ones."

To discharge responsibilities to the public and avoid embarrassment and the FTC's restraints, advertisers, agencies and media representatives would "do well to screen draft ad copy in the light of the published decisions of the FTC," he said.
"JUSTICE SHINES BY HER OWN LIGHT"—Cicero. But amplification of her aims helps, too. That's why Philadelphia's WRCV presented the series, "Law in Action." "For contributing to the public understanding of justice..." WRCV received the American Bar Association's 1960 Gavel Award, thus becoming one of two radio stations in the United States ever to have been so honored. "Law in Action" is only one of WRCV's distinguished community affairs programs. It is representative of the quality programming for adult audiences which continues to be the prime objective of this station.
INTERNATIONAL

ON OCT. 1
Nigerian radio-tv goes semi-commercial

Semi-commercial television and radio will come to the Federation of Nigeria Oct. 1, the day Africa's most populous (40 million) country gains its independence from the British Commonwealth.

Eastern Nigerian Broadcasting Co., the new firm, in the Eastern of Nigeria's three federated regions, is equally owned by the government and a group of London financiers. It will take its place alongside the established federal-regional service of the Nigerian Broadcasting Co., which offers only non-commercial radio. Ten kw transmitters will broadcast from the regional capital, Enugu, on 48.25 mc visual-53.75 mc aural for television, with radio on 3.96 mc and 953 kc.

Advertising will be along lines of British independent tv. Television, all locally originated, will be on the air 7-10 p.m. daily from Enugu with expansion planned later to cover a heavily populated area around Aha, some 55 miles nearer the coast. Schedule emphasis will be on news information and service, with radio programmed independently on a longer broadcast day. Early remote assignments will be the tour of Princess Alexandra, Queen Elizabeth's representative for the independence ceremonies, and an appearance later in the month by Louis Armstrong under auspices of Pepsi-Cola Co., which has a plant in the Eastern Region. This region has launched an aggressive development program, exploiting natural resources and expanding its harbor, Port Harcourt, now served by direct shipping service from New York.

The eastern market is emerging to compete for an economic place beside the federal seat of Lagos on the coast, located in the Western Region, and the Western regional capital of Ibadan, where investors traditionally have settled first.

Ontario monitoring beer ads at border

Beer advertising by Canadian companies on U.S. tv stations close to the international border is being monitored by the Liquor Control Board of Ontario, to find out if Canadian breweries are violating the spirit of Ontario's new alcoholic beverage advertising code, which came into effect on Aug. 1. Ontario's Premier Leslie Frost announced the monitoring was taking place and stated that the province is looking for co-operation from Canadian brewers.

He said that the breweries had given the Ontario government assurances of improvement of their advertising "and we expect them to play ball with us. Already there are indications of betterment. We are satisfied that by the end of the year there will be a marked improvement all around."

Under the new Ontario advertising code for alcoholic beverages these can now be advertised for the first time in Ontario. But the arrangement provides that Canadian firms must abide by the spirit of the code even in advertising entering Ontario from outside the province such as from border radio and television stations. The Ontario Liquor Control Board has intimated it can take action against offending companies by cutting down or by stopping the buying of their products, which can only be sold through commission outlets.

Drinking scenes, bottles and glasses of beer or other alcoholic beverages may not be displayed in advertising under the new code, but bottle labels may be shown.

CBC in far north

The Canadian Broadcasting Corp has commenced operation of CHAK Inuvik, Northwest Territories, as the furthest north broadcasting station in Canada. Inuvik is located 200 miles north of the Arctic Circle at the mouth of the Mackenzie River, near the Alaska border. Predecessor station was operated parttime by the Canadian Army and Royal Canadian Navy for personnel stationed in the region. CHAK is the 10th CBC station to go into operation in Canada's far northland to provide broadcast service for the growing population which has only been able to receive Radio Moscow on a regular basis.

New tv film firm

All-Canada Radio & Television Ltd., Toronto, Ont., and Robert Lawrence Productions (Canada) Ltd., Toronto, have formed a financial association to produce and market Canadian television programs and commercials. The new association was necessitated by the increasing complexity of Canadian television programming, requiring a high percentage of Canadian content. All-Canada Radio & Television, which represents a large number of Canadian stations for sale of time, will also have video tape to give advertisers an audition of a station's programming.
All making a big impression on the same woman

She's the suburban woman — the most influential buyer in America. And who's making big impression on her? All four stations of THE HERALD TRIBUNE SUBURBAN RADIO NETWORK with their network staff, editorial knowledge and skill. Four stimulating, aware stations that have the power to reach the woman whose world is on power-steered wheels, whose life is in motion from super-

market, to cookout, to school meeting, to commuter express. Your commercials can put her finger on the starter button for immediate buying because THE HERALD TRIBUNE SUBURBAN RADIO NETWORK reflects her community in the type of entertainment and the advertising it carries. THE HERALD TRIBUNE SUBURBAN RADIO NETWORK offers unique powerful suburban coverage because it communicates directly and without waste to the land of the commuter family — and specifically to the woman who does 66⅔% of the buying. It's time you made a big impression on the suburban woman!
PLANS FOR FALL CONFERENCES

NAB draws up program for annual meetings

NAB’s annual series of eight Fall Conferences will be held in two segments—Oct. 13-28 and Nov. 14-29. Basic programming of the meetings was completed last week at the association’s Washington headquarters.

Two themes have been adopted for the 1960 meetings. They are “Broadcasters and Politics” and “People and Profits.” The themes reflect the growing importance of broadcasting in government and politics as well as the close attention given station personnel relations.

The first conference will be held Oct. 13-14 at the Biltmore Hotel, Atlanta (see complete conference schedule in DATEBOOK, page 16).

Each conference will feature an afternoon discussion based on the role played by broadcasting in national affairs. A long-range political science approach will be augmented by discussion of Presidential campaign problems.

“The political session will be a study in depth of the many facets of one of the toughest problems stations have ever faced—why, how and how deeply should stations participate in politics,” according to Everett E. Revercomb, NAB secretary-treasurer and acting administrator. The four association vice presidents are preparing conference programming.

The Government Outlook ■ The vice presidents will go into subjects ranging “far beyond the 1960 election campaign into the whole art and science of government,” Mr. Revercomb said. “They will discuss in detail the mechanics of government and the problems faced by the broadcaster. These will include the intermingling roles of both government and the industry, and what can be done about them.”

Taking part in the political discussion will be Vincent T. Wasilewski, vice president for government affairs; Howard H. Bell, vice president for industry affairs; Charles H. Tower, tv vice president, and John F. Meagher, radio vice president. Mr. Wasilewski will preside.

Mr. Bell will preside at the opening morning session at each conference. This will deal with radio and tv management problems and the importance of the human factor in station operation. NAB staff executives will discuss ways of finding capable personnel as well as training. Case histories will be cited to show how personnel errors show up in red ink on financial statements.

Speakers at the personnel roundtable will include James H. Hulbert, NAB broadcast personnel-economics manager; John M. Couric, public relations manager and William Carlisle, station relations manager. Mr. Couric will deal with the role employees take in creating a station image, including participation in civic affairs. Mr. Hulbert will discuss money and manpower. Mr. Carlisle will speak on the techniques of reaching station decisions, saving both time and money. Mr. Hulbert will conduct a sales management panel.

G. Richard Shafio, WIS-AM-TV Columbia, S.C., member of the NAB three-man policy committee, will address the opening luncheon in the spot normally taken by the late President Harold E. Fellows. A committee member will appear at each conference.

Clair R. McCollough, Steinman Stations, is policy chairman. Third member is Merrill Lindsay, WSOY-AM-TV Decatur, Ill. Committee members will review NAB internal developments under their guidance since death of Mr. Fellows.

Separate Sessions ■ The second morning at each conference will be devoted to separate radio and television sessions. Mr. Meagher will preside at the radio segment. This will include a review of engineering techniques and progress in stereo by A. Prose Walker, NAB engineering manager. At each conference a speaker will speak on “Radio of the Future.” Mr. Couric will speak on “Building Radio With Radio,” reviewing the association’s public relations plans for the future. Mr. Meagher will report on progress of the Radio Code Board’s campaign to expand station participation in the code structure, now on a paid basis and open to both member and non-member participation.

At the tv session with Mr. Tower presiding, Television Bureau of Advertising will review dollar growth of the television industry. This will include latest information on the Fort Wayne department store study. Television Code Review Board will report on progress of this industry ethical structure, including board actions and work of the new tv code office in New York. Television Information Office, headed by Louis Hausman, will report on local and public service programming.

Mr. Tower will review developments in pay tv (see pay tv roundup page 58) and go into television management problems.
In Buffalo and Western New York for product identification use the station most closely identified with the market

A minor point, perhaps, but even WBEN-TV station ID’s picture the Buffalo-Western New York market.

Never-ending is the WBEN-TV effort to be the station most closely identified with the likes and the loyalties of this important area. Since 1948, when Ch. 4 pioneered television on the Niagara Frontier, good public service programming and quality local programming were the standards set and followed to build loyal audiences.

Today, to best identify your product with the shopping habits of the more than 2,000,000 people in this metropolitan market, use the station they watch most often. Make your TV dollars count for more — on Ch. 4, the station identified with top coverage, penetration and sales in Western New York.

National Representatives:
Harrington, Righter and Parsons

BROADCASTING, September 19, 1960
SERVICE AS USUAL
Radio, tv help save lives in hurricane
For broadcasting stations along the East Coast, it was public service as usual during Donna's turbulent visit last week. The all-out broadcast effort was credited with saving countless lives and avoiding even greater property damage.

In the course of covering the big story, stations suffered their share of the bruises, too. Two damage reports to Broadcasting last week:

- Around-the-clock coverage by WTVT (TV) Tampa-St. Petersburg, Fla., was interrupted for 12 hours when Donna ripped off the roof of the station's transmitter house, smashing transformers and flooding equipment. Amount of damage was not immediately ascertained.

- A $15,000.00 loss was sustained by the new 50-kw WINQ Tampa, Fla., when the hurricane toppled all three towers of the station's three-element directional array for daytime operation on 1010 kc. The towers were blown down Sept. 11 as the eye of Donna passed within five miles of the Plant City site. The station had just completed equipment tests and had filed a request for program authority when the storm hit. The 265-ft.-high towers were sheared off at the concrete footings. Station management hopes to have new towers up in four to six weeks.

A success in the midst of disaster
The first radio defense network received its baptism of fire last week and came out of Hurricane Donna boasting success.

For three full days, operating on a 24-hour-a-day schedule, the Florida fm defense network fed hourly Weather Bureau advisories to all broadcast stations in the state of Florida.

The fm network, established in July of 1958, comprises eight key stations whose broadcasts are monitored by all radio stations in Florida except those in the Panhandle section in the northwest section of the state.

Weather Bureau advisories were fed by the Miami headquarters to WVGC-FM Coral Gables. These were broadcast immediately and were picked up off-the-air by other stations in the chain—WCKR-FM Miami, WFLA-FM Tampa, WQXT-FM Palm Beach, WHOO-FM Orlando, WNDB-FM Daytona Beach, WRUF-FM Gainesville and WJAX-FM Jacksonville. All immediately broadcast the information which was heard not only by their own listeners, but picked up and broadcast by the more than two-dozen am stations which monitored the fm network.

In addition 150 other bulletins were broadcast throughout each day in three different languages. The fm disaster network operated at top capacity until 6 a.m. Sunday when Donna left Florida on its way north. It is estimated that more than 25 men manned the network for the life-saving three days.

Power failures at some cities caused stations to throw in their standby generators. One of these occurred in Coral Gables, the site of the key station in the network.

John T. Rutledge, WVC-FM Coral Gables, chairman of the defense network, said Thursday that a meeting to evaluate the network's operations was scheduled to take place Friday in Orlando.

Along and adjacent to hurricane alley, stations started their storm coverage more than 10 days ago. Two Florida tv outlets, WLOF-TV Orlando and WFGA-TV Jacksonville, had news personnel aboard the Navy hurricane hunters that flew into the eye of Donna off the coast of Puerto Rico.

As the hurricane inched northward, local stations fed on-the-spot reports to other radio and tv outlets throughout the country while maintaining around-the-clock news and service to their respective communities. Many established "Hurricane Centers" to relay instructions from city and state authorities, to carry latest weather bulletins and to serve as clearing houses for whatever needs were required locally.

WFLA-AM-TV Tampa-St. Petersburg augmented its service with Spanish translations of its newscasts and on some of its telecasts, utilized an expert in the sign language to simultaneously convey reports to the 1,000 deaf persons in the area.

Donna also permitted three Jefferson Standard Broadcasting Co. stations (WBTW [TV] Florence, S.C., and WBT-WBT [TV] Charlotte, N.C.) to put their new hurricane watch into operation. Plan, devised just the week before, called for 15 of the stations' personnel to be on the alert to go to pre-designated points in the Carolinas for spot reporting.

In addition to the major radio and television networks, the following also reported their hurricane service to Broadcasting:

WKWF Key West, Fla.; WTVJ (TV) and WCKT (TV), both Miami; WPOM Pompano Beach, Fla.; WFMY-TV Greensboro, N.C.; W定向-AM-TV Norfolk, Va.; WDMV Pocomoke City, Md.; WPEN and WFLI Philadelphia; WERE Cleveland; WDRC Hartford, Conn.; WKNB West Hartford; WBJZ-9BZ Boston-Springfield and WBJZ-TV Boston.
Stability is why!

GATES FM-5B

largest selling
5KW FM Transmitter manufactured today!

Stability is what station engineers look for in FM transmitters, and stability was the engineering objective during research and design of the Gates FM-5B 5000 watt FM broadcast transmitter.

The left cabinet of the FM-5B is a complete 250 watt FM transmitter, including exciter, provision for multiplex. 250 watt amplifier, control circuits and power supplies. The 5000 watt power amplifier is totally isolated in the right cabinet, with separate power supplies, relay equipment and metering. From exciter output at 10 watts through 5000 watts, there are only 2 radio frequency stages. This is stability for ease in tune-up and then staying that way.

Provision for single or dual channel multiplex eliminates adaptor arrangements when multiplex is added. The new Gates multiplex system is widely acclaimed for its new approach in simplicity and effective operation.

RF harmonics are handled from within, and an external coaxial style notch filter is standard equipment to protect the TV band. And, the twin 6076 tubes in the 5 kilowatt PA have a big conservative factor, very important in operating cost consideration through long tube life.

Stability spells reliability... that's one reason why the Gates FM-5B is the largest selling 5000 watt FM transmitter manufactured today. Stability is what engineers demand and get when they specify the Gates FM-5B for 5000 watts.

For additional technical information, write for the Gates FM Fact File, which includes price lists and engineering bulletins on all Gates FM transmitters, from 10 watts to 10,000 watts. Yours for the asking.

GATES RADIO COMPANY
Subsidiary of Harris-Intertype Corporation.
QUINCY, ILLINOIS
Crosby has last word in feud with NBC

Columnist John Crosby tossed another spear last week in his joust with NBC.

"I said it and I'm glad," he wrote in his syndicated column Monday morning, answering NBC's answer to his charge that the network's profits and prestige had sunk since "visionary" President Sylvester L. (Pat) Weaver Jr. was replaced by "hard-headed practical men" like Board Chairman Robert Sarnoff and President Robert Kintner (Broadcasting, Sept. 12).

His charge that NBC's profits had shrunk from $18 million under Mr. Weaver to not more than $5 million under Messrs. Sarnoff and Kintner had brought from the Sarnoff-Kintner management a reply that NBC's profits were in fact at a near-record level in 1959, were at a record high the first half of this year and promised to set an all-time record for the full year 1960.

In last Monday's column Mr. Crosby retorted that NBC had neglected to add that "very little of this prosperity came from network television, which happens to be the only thing I was talking about." He was not writing about owned-and-operated stations, for example, he said, adding: "Owning a tv network affiliate in one of these cities [where NBC has o&o's] is like owning an oil well—and it takes about as much brains to run one. Push a button and the money rolls in.

"Nobody—not even Sarnoff and Kintner—can lose money running a network affiliate station. (Just to give you some idea, WCBS-TV in New York will gross roughly $15 million this year with a net profit of roughly $7 million.) However, in all the things that require judgment—like the buying of network programs instead of the pushing of buttons—the Sarnoff-Kintner regime has been to the viewer almost a total disaster."

To the assertion by Messrs. Sarnoff and Kintner that he was "not competent!" to deal with matters of operation and management Mr. Crosby replied that "they are hardly the ones to be bandying that word 'competent' around."

He denied he was "anti-NBC" any more than he had been "anti-CBS" when he accused CBS of being "the hallmark of mediocrity" some years ago. In fact, he said, "NBC has given me many wonderful moments. I love its news. I love Huntley-Brinkley. I love color television. I'm sure it will give me many wonderful moments again when this lunacy blows over."

NBC authorities indicated they probably would let his latest attack blow over, without further reply.

Changing hands

ANNOUNCED • The following sales of station interests were announced last week subject to FCC approval:

- WKST-AM-TV Youngstown, Ohio: 80% interest sold by Samuel Townsend to Ted Estabrook and John T. Valdes, co-owners of WCUE Akron, Ohio, for about $1 million. WKST-AM-TV operations will be integrated with those of WCUE in new company, Communications Industries Inc. Mr. Townsend will continue with stations under consultancy arrangement as well as retaining 20% interest in joint venture. WKST is Eve 1 kw on 1280 kc and is assigned to New Castle, Pa. WKST-TV in on ch. 33 and began operating in 1953. Both stations are affiliated with ABC. Broker was Blackburn & Co.

- KFOX-AM-FM Long Beach, Calif.: Sold by Kenyon Brown, Bing Crosby and Kevin Sweeney to Washington Homes of Washington, D.C. for $850,000. Washington Homes is headed by Robert Symonds as president and Max Reznick as vice president. KFOX operates on 1280 kc with 1 kw. KFOX-FM is on 102.3 mc with 1 kw. Broker was Blackburn & Co.

- KIVA (TV) Yuma, Ariz.: Sold by Harry C. Butcher and associates to Bruce Merrill, principal owner of Antennavision Inc., a group of community antenna systems in Arizona, for $550,000. Agreement provides that KIVA will withdraw its protest against use of microwave channels to bring Phoenix tv signals to cable company in Yuma. Ch. J1 KIVA is an NBC primary affiliate.

APPROVED • The following transfers of station interests were among those approved by the FCC last week (for other commission activities see For The Record, page 104):

- WQXI Atlanta, Ga.: Sold by Robert W. Rounsaville to Esquire Broadcasting

We stake our reputation on every sale. It is worth more than any single commission!

Buying or selling, one of your greatest protections is Blackburn's demonstrated willingness to lose a sale rather than a future client. Perhaps that is why so many people come back to us again and again.

Co. of Atlanta Inc. for $1.6 million. Esquire Broadcasting is subsidiary of Esquire Magazine.

- WAKE Atlanta, Ga., and WYDE Birmingham, Ala., sold by Bartell Broadcasters to former New York broadcasters Ira Herbert and Bernice Judis. Sales price for WAKE was $500,000; for WYDE, $525,000. Both included $80,000 for agreement not to compete for five years within 50 miles of stations. Commissioner Robert T. Bartley dissented.

- KKSN Grand Prairie, Tex.: Sold by John L. Buchanan to Robert W. Rounsaville for $301,000 and agreement not to compete within 50 miles for five years. Mr. Rounsaville is principal of Rounsaville stations which comprise WCIN-AM-TV Cincinnati, WLOU and WTAM-TV Louisville, WATL-TV Atlanta, WTMP Tampa, WMBM South Miami, WYLD New Orleans and WVOJ Berry Hill (Tenn.). Mr. Rounsaville sold WQXI Atlanta to Esquire (see above). Grant was conditioned on outcome of inquiry regarding sponsorship showing what individual stations accomplish when they editorialize. Commissioner Robert T. Bartley dissented.

- WJRD Tuscaloosa, Ala.: Sold by Wilhelmina Q. Echols to John C. Cooper Jr., manager of WJRD, for $205,000.

New consultant firm

Formation of new radio consultancy, Maurice Jackson Organization in Columbus, Ohio, was announced last week. Mr. Jackson has been in broadcasting for past 25 years in both performing and sales capacities, most recently with WTVN (TV) Columbus and before that with number of radio and tv stations in the Midwest and South. His firm will assist stations in designing both programs schedules and sales policies, with special emphasis in the area of service programming. Headquarters are at 3013 Edgefield Road, Columbus.

EDITORIAL SURVEY

More tv outlets are speaking their minds

Nearly a third (30%) of tv stations are editorializing, according to a survey conducted by NAB's Television Information Office. Results were submitted at a Sept. 14 meeting of the NAB Editorializing Committee in Washington.

Four projects designed to develop editorializing by stations were adopted by the committee. Co-chairmen are Joseph E. Baudino, Westinghouse Broadcasting Co., and Daniel W. Kops, WAVZ New Haven, Conn.

The committee projects include:

- Compilation of a file of case histories showing what individual stations accomplish when they editorialize.
- Updating and revision of the NAB publication, Editorializing on the Air, to reflect latest developments and to show techniques.
- Frequent mailing of editorializing aids to member stations.
- Compilation of a list of problems faced by editorializing stations.

The NAB staff was instructed to study plans for an industry seminar on broadcast editorializing. Richard M. Allerton, NAB research manager, submitted a radio editorializing survey conducted by his department in a study of radio news. The survey will be made available in October.

The committee adopted a resolution extending sympathy to the widow of Alex Keese, WFAA-AM-TV Dallas. Mr. Keese was co-chairman of NAB's first Editorializing Committee.

Attending the committee meeting,

Attending for NAB were Howard H. Bell, Vincent T. Wasilewski, John F. Meagher and Charles H. Tower, vice presidents; Everett Revercomb secretary-treasurer and acting administrator; Douglas A. Anello, chief counsel; John M. Couric, public relations manager, and Mr. Allerton.

THAT OTHER NAB
Sponsors like board's thorough tv test

When Astaire Time goes on NBC-TV Sept. 28 as an hour-long special colorcast sponsored by Chrysler Corp., the audience will include a group of civic and culturally minded individuals, mostly women, mostly leaders of women's clubs, PTA groups and similar organizations.

This group will be judging as well as watching. What members will be judging are the commercials created for the program by the sponsor's agency, Leo Burnett Co. They'll judge the commercials by checking a ballot distributed by the National Audience Board, an organization dedicated to the improvement of better programs and better commercials on radio and television.

The ballots contain eight statements about the commercials: (1) the commercials are in good taste, (2) their selling message is effective and informative, (3) they are imaginative, (4) the advertising copy is accurate, (5) the commercials have entertainment value, (6) they have eye-appeal, (7) increase my interest in the product, (8) they are believable.

Viewer-judges are asked to check each statement to indicate whether they "strongly disagree," "disagree," have "no opinion," "agree" or "strongly agree" with it. The ballots also contain several lines for comments, plus space for the judge's name, address, organizational affiliation and his office in that group. Finally the judge is asked for permission to quote his comments and use his name publicly. This usually means in the National Audience Board monthly news letter, which regularly reports on results of the audience opinion surveys conducted through its auspices.

Usually Programs Normally, these surveys seek to evaluate public reac-

Enjoys the change • Pleased about the switch in frequency from 1240 kc to 930 kc and the accompanying power increase from 250 w to 5 kw of WSOC Charlotte, N.C., are company principals. At the signing of the contracts closing the sale of the 930 dial slot are (L to R): G. Richard Shaffer, executive vice president of Broadcasting Co. of the South, former owner of the 930 facility in Charlotte; J. Leonard Reinsch (seated), president of Carolina Broadcasting Co. (owner of WSOC-AM-FM-TV) and executive director of the Cox stations; Larry Walker, executive vice president of Carolina Broadcasting Co.; and Henry Sullivan, general manager of WSOC.

The board also encourages viewers to write to stations and networks, sponsors and their agencies, when they see or hear something they like, when they enjoy a program and want to have it continued on the air or when they would like to have its content repeated.

Encore • After a survey of the first Evening with Fred Astaire broadcast, J.R. Barlow, manager of product advertising for Chrysler, wrote the board thanking "civic leaders for their recent successful efforts to crystallize public opinion in regard to the first Astaire show. The wonderful comments of viewers and press have necessitated our repeating this program. You, National Audience Board, effected not only a public service in your unbiased reviewing of this program, but also a service to us, the sponsor."

Other users of the National Audience Board survey services, in addition to Chrysler and Leo Burnett, are Henry Jaffe Enterprises, Desilu Productions, Julian Lesser Productions, Herts-Lion Productions and Hudson Co.

The producers discovered the Na-

**ABC-TV's optimistic outlook**

ABC-TV is continuing up its symbolic ladder with an accent on youth, affiliates and the nation's press were told in a taped closed-circuit presentation by officers and stars last week from the West Coast.

Leonard Goldenson, president of American Broadcasting-Paramount Theaters, cited progress in program-audience competition over the past four years and pointed to ABC-TV President Oliver Treyz and Programming-Talent Vice President Thomas W. Moore, who, he said, "have the talent and youth to make it go." AB-PT and its network are planning five years ahead and looking forward to a world television exchange within that period, Mr. Goldenson said. Meanwhile, in the U.S. he and his network chiefs agree that ABC-TV has overtaken its goals in programing and audience and is now entering phase three of its development.

**National Audience Board early in its history.** Walt Disney, with a habit of being first in many things, invited his civic leader members to a special showing of *Davey Crockett* in the spring of 1955. The reviewers, led by the state television chairman of the California Federation of Women's Clubs and the California branch of the American Assn. of University Women, rated the series "excellent for the family, historically instructive."

ABC-TV San Francisco followed suit, inviting Bay Area leaders to a similar preview. Then Screen Gems asked for a preview of *Rin Tin Tin.* Questionnaires were developed for balloting and policies set for giving results and interpretations of the surveys to the industry hosts.

**Century Note** The cost of an Audience Board survey is $100 per showing per city. If a preview is held in New York and Los Angeles, the cost would be $200. For a minimum nation-wide survey, the cost is about $800. Regional surveys, like that made of the Hudson Co. Thanksgiving Day parade telecast in Detroit, cost proportionately less. The fees go toward paying the cost of sending out invitations to TV chairmen, printing the ballots, the professional psychological supervision, the computations, clerical, communications, transportation and other incidental expenses, not to exclude the publishing of the results, comments and interpretations. As a non-profit, public service organization, national Audience Board itself contributes some of the financing of this operation.

In addition to reporting on results to the survey, sponsors and the National Audience Board membership, the organization also keeps the broadcasting industry informed about public reaction to its offerings. Four years ago, Peter Goel, president of the National Audience Board, wrote to the late Harold Fellows, president of the better-known NAB, the National Assn. of Broadcasters: "My general opinion is that the public is very receptive to programs containing instructive content. However, it feels that the effectiveness of commercials with respect to the primary job of moving merchandise must be equated with factors of irritation."

BEST WAY TO EMBRACE THE NEW YORK NEGRO COMMUNITY...

"LIB" it up!

DeLIBerate a moment on the enormous Negro community in the greater Metropolitan New York area and you'll see how much good sense it makes to re-examine your radio schedule and "LIB" IT UP.

This vital community, at latest count, encompasses over 1,494,000 people with a spendable income up in the billions. And it's growing larger every day. To this alert and growing audience WLIB offers more Negro programming than all other radio stations in New York combined! More local Negro news—more national Negro news—more Negro public service as well. In turn it produces by far the greatest Negro listening audience in town.

With top Negro personalities and a variety of proven merchandising aids to help sell your products, WLIB is a must buy in the greater New York market. So—if you want to embrace the Negro community—"LIB IT UP!"

Hotel Theresa, 125th Street & 7th Avenue, New York 27, N. Y.

EMBRACES THE ENTIRE NEGRO MARKET IN GREATER NEW YORK

KFAC delivers
two top radio audiences
at one rate...

Good Music rings
up Sales in
Southern California
over KFAC AM-FM

every time you buy KFAC-AM you also get
Southern California's largest FM audience*

Most combination AM and FM stations offer simultaneous coverage on a limited basis. For the past twelve years we have been duplicating our entire broadcasting schedule 24 hours a day. This is one reason why we are among the four Los Angeles stations that reach over a million different homes in an average week*. 

Our renewals tell the story. 44 current advertisers are in their 2nd to 20th continuous year of successful KFAC selling. We invite you to join them.

Chuck Phillips, air personality at WEMP Milwaukee, assumes additional duties as program director. John Michaels, formerly with WKHM Dearborn, Mich., joins WEMP as disc jockey.

NAB names three committees

Three standing committees for 1960-61 were announced last week by the NAB Policy Committee:

Television Music Advisory—

Neville Miller, Washington communications attorney, was sworn in Sept. 12 as member of District of Columbia Redevelopment Land Agency. Formerly mayor of Louisville, Ky., Mr. Miller has always been interested in rehabilitation of slum areas. His new post is parttime civic activity. He con- tinues his practice as partner in law firm of Miller & Schroeder. He is for- mer NAB president.

David E. Lyman, program director at WLW Richmond, Va., promoted to newly created post of director of program development. Other changes: Stewart Yarbo, program director; Arthur Lane, continuity director; Rich- ard Via, assistant sales manager; Gene Loving, assistant director of music; and Roland Sisking, director of sales promotion.

Harold F. Stone, formerly with WNEW-AM-AM-Saginaw, Mich., to WLOF-AM Orlando, Fla., as program director.

Johnny Gunn, formerly operations director at KOMY Watsonville, to KCV-AM-FM Lodi, both California, as program director.

Rick Kraushaar and Jack Van Nostrand join KTLA (TV) Los Angeles as account executives.

Fred Ruegg, CBS Radio vp and general manager of KNX Los Angeles, re- appointed to board of directors of Southern California Broadcasters Assn., filling vacancy created by transfer of Howard Gray from KGIL San Bern- dino to KWZ Santa Ana. Only one area representative is permitted from member stations with that office being held by KWZ'S Ernest Spencer, association treasurer.

John H. Rawitzer, salesman at KRAK Sacramento, Calif., joins sales staff of KCBS San Francisco, succeeding Dick Godfrey, who moves to KXTV (TV) Sacramento.

Bill Unger, with radio-television department of Grant Adv., L.A., joins sales staff of KGO San Francisco.

Jim Dodd, formerly on sales staff of WLWI (TV) Indianapolis, named announcer-salesman for The House De- tective, tv real estate program, at WLWA (TV) Atlanta, Ga.

Arthur J. Beaudin named merchandising liaison man for WFEA Man-
MICROPHONES – a type for every requirement

Check your microphone requirements, today. Do you have one for each purpose — remotes, announce, interviews, boom, general purpose? Use the handy order coupon to order any microphones you need.

PERSONAL MICROPHONE
Ideal for Remotes
Wherever a small inconspicuous microphone is needed the BK-6B can be used. This 2.3 ounce unit offers excellent reproduction for every speech application both in the studio and in the field. $82.50

HIGH-FIDELITY UTILITY MICROPHONES
General purpose BK-11A microphone is the modern version of the very famous 44-BX. It is ideal for every studio use, especially live music pickup. The BK-11A is an economical high performance unit designed for years of rugged service. $125.00

COMMENTATOR MICROPHONE
The BK-1A is a fine microphone for interviews, panel shows, and all general announce work. Its rugged construction and insensitivity to wind and mechanical vibration make the BK-1A ideal for outdoor remotes. $75.00

NOISE-REDUCING BOOM MICROPHONE
Here is the highly directional BK-5A microphone for TV boom use. Its pickup pattern effectively reduces noise while offering full range highest quality pickup of the desired source. The BK-5A is also an excellent choice for control room use. $165.00

ORDER NOW BY MAIL!
Order any of these five microphones for prompt delivery. Send check or money order with your order and microphones will be shipped prepaid. If remittance is not enclosed your microphones will be shipped C.O.D. Mail your order to RCA, Audio Sales, Broadcast and Television Equipment Division, Building 15-6, Camden, N.J. Use coupon below.

chester, N.H. He will work with sales personnel in coordinating sales promotion activities.

Richard F. Schaller, formerly with sales department of WBEN Buffalo, to WGR-TV, that city, as member of local sales staff.

Rudy Perea and Dick Amundson join KELP El Paso, Tex., as members of sales staff. Gene Rohling becomes member of news department. Johnny Fairchild and Morton Downey Jr. to KELP as disc jockeys.

Mrs. Pat Barton promoted from news staff to assistant to special events director at WBBM Chicago. She originally joined station's news staff in 1942, moving to CBS Radio News in New York as night editor in 1949 and returning to WBBM in September 1959.

Jim Peyton appointed director of newly created department of public affairs of WDSM-AM-TV Duluth, Minn. He joined WDSM when it first went on air in 1939, serving as first program director. He left WDSM in 1940 to become program director of WLOL Minneapolis before rejoining WDSM in 1946.

Jack White and John MacMillan join expanded news staff of KUTV (TV) Salt Lake City. Mr. White is editor-photographer and Mr. MacMillan is news and sports reporter.

Tom Carnegie, account executive at WFBM-TV Indianapolis, named director of sports for WFBM-AM-FM-TV.

William (Rip) Rowan, formerly news editor at WCSS Amsterdam, to WTRV Albany-Schenectady-Troy, both New York, as member of news staff.

Orion Samelson, farm service director at WBAF-AM-TV Green Bay, Wis., to WGN-AM-TV Chicago in similar capacity.

Robert D. Fuzy, formerly tv producer of Columbus, Ohio, public schools, named supervisor of instructional tv programming for WOSU-TV, Ohio State U. Telecommunications Center, that city.

Art McDonald joins news staff of KOMO-TV Seattle, Wash. He formerly was news director of KREM-TV Spokane, Wash.

Tim Lockhart joins WBAB Babylon, N.Y., succeeding George Sima who becomes editor on news staff.

Nick Gearhart, formerly head of news department of WWL-TV New Orleans, joins news staff of KFMB-TV San Diego, Calif., as night news editor.

William Miller, formerly on sales staff of Armstrong Cork Co., St. Louis, appointed sales planning assistant at NBC Central Div. Network TV Sales, Chicago.

Bruce Handshu, formerly with WLW Cincinnati, to WCKY Cincinnati as publicity promotion director, succeeding Bob Fleming who retired.

William K. McClure, cameraman and correspondent for CBS News, named director of European operations for CBS Reports.

Robert H. Poller, formerly sales and station promoter at WROV Roanoke, Va., to sales staff of WALT Tampa, Fla.

Bill Page joins WSOO Charlotte as member of sales staff. Cooper William wins named to promotion staff.

J. B. (Johnny) Martin, formerly account executive at KOMA Oklahoma City to sales staff of KOCO-TV, that city.

Norman Kraeft, farm service director of WGN-AM-TV Chicago since 1950, and his wife and assistant, Christine, resign to become agricultural pr director and farm women affairs director, respectively, for Kennedy-Johnson campaign.

Wayne Coy Jr., summertime em- tate of Time Inc. radio-tv stations, member of Time-Life Washington bureau and son of late FCC Chairman A. Wayne Coy, to WTCN-TV Minneapolis-St. Paul as sales service assistant.

Robert Hawkins, announcer-direct or at KERO-TV Bakersfield, Calif., promoted to production manager.

Dick Guthrie, newsman at KING Seattle, elected chairman of Western Washington Associated Press Broadcasters Assn., succeeding Shirley Bartholomew of KRKO Everett.

Pat Wilkins, on news staff of KEX Portland, Ore., promoted to news director.

Hart Jenks, formerly with WOW Omaha, Neb., to KXRR San Jose, Calif., as news director.

**Programming**

Alfred R. Stern, vp of NBC Enterprises, elected board chairman of California National Productions, N.Y. (WEEKS HEADLINER, Aug. 22). In ad-

---

Visiting new properties - Ward L. Quaal (e), vice president and general manager of WGN-AM-TV Chicago, addressed luncheon of station and civic leaders in Duluth-Superior Aug. 25 in the wake of WGN Inc.'s purchase of KDAL-AM-TV there (CLOSED CIRCUIT, Aug. 15; CHANGING HANDS, Aug. 22). Shown (l to r) are Robert A. Dettman, KDAL-TV chief engineer; Clifford Mork, Duluth mayor; Mr. Quaal; Lawrence Hagen, Superior mayor; and Odin S. Ramsland, KDAL-AM-TV general manager. WGN Inc. bought the properties from Red River Broadcasting Co. (owned and operated by the Dalton LeMusier estate) for over $3 million.
WHY SHOULD A BUSINESSMAN BE TAXED TO SUPPORT GOVERNMENT COMPETITION AGAINST HIMSELF?

Some strange paradoxes crop up, at times, in the American scene.

We are scrupulous, as a nation, to safeguard the rights of the individual in court...his right to worship without interference...his right to speak freely and openly on any issue.

We have federal laws and regulations to protect him against unfair competition in his efforts to make a living...unfair competition, that is, except that from the federal government itself.

Take, for example, the matter of the government's producing and selling electric power in the open market. Because federal power systems pay no federal income taxes, and little or no taxes to state and local governments, they can undersell the independent electric companies which do produce taxes. In fact, the very taxes provided by the independent electric companies and their customers are used in part to help finance this unfair competition.

Now the proponents of federal "public power" are pressing for billions more to build additional federal power plants, although the independent electric companies are ready and able to supply all the power the nation can conceivably need. And this on top of more than $5,000,000,000 of taxpayers' money already spent on such government installations.

How can this go on? Simply because the public doesn't know about it.

A NEW BOOKLET TELLS THE STORY
You can get interesting, little-known facts, figures and quotes by mailing the coupon below for the new free booklet, "How Federal Government Electricity Affects the Businessman." It discusses how "public power" spending can affect your costs, prices and profits, what happens when the government goes into business with taxpayers' money, and the anti-business implications of federal power spending.

BROADCASTING, September 19, 1960
dition, Mr. Stern continues as director of NBC International Operations and as chairman of NBC International, Ltd.

Harold Goldman, formerly executive vp of National Telefilm Assoc., is developing an expansion program for Famous Artists Corp. in all phases of entertainment with major emphasis on creation and development of tv packages and possibilities of active participation by FA in pay tv.

Norman A. Adler named executive vp of Columbia Records, N.Y. He will be responsible for entire marketing operation and supervision of company's market research activities.

Arthur Gross, formerly director of tv sales at King Features Syndicate, joins United Artists Assoc., N.Y., as assistant general sales manager.

Peter Cooper, producer at Robert Lawrence Animation, N.Y. and Hollywood, named executive producer of Robert Lawrence Productions, those cities. He will supervise all company's live action and animated commercial production.

George W. Linn, formerly partner and account executive of White & Shuford Adv., El Paso, Tex., to Canyon Films, Phoenix, as general sales manager.

Oscar Rudolph signs with Screen Gems to direct pilot for Telegraph Hill, new series that begins production in San Francisco next month.

Cloyton E. Bond, formerly account supervisor at California National Productions, joins CBS Films, Chicago, as account executive.

Jack Kuhlman, John Dolan, Henry DeMond, Ted Chapman, Larry Watkins and Shirley Citroen join Jerry Fairbanks Productions, Los Angeles, as film editors.

Equipment & Eng’ring

Harry Hill Jr. and F. Gene Abrams named district managers in Philadelphia and St. Louis, respectively, for General Electric Co.'s tv receiver department.

Thomas T. Witkowski and John T. Underhill appointed director of long range planning and operations manager, respectively, for Cubic Corp., San Diego, Calif.

Arthur S. Kester promoted from chief division engineer in charge of developing audio frequency communication-sound equipment to manufacturing manager at Rauland-Borg Corp., Chicago. Richard J. Medal succeeds Mr. Kester.

International

Ken W. Davis named executive vp of Interprovincial Broadcast Sales Ltd. He will headquarter in Toronto.

R.A. Cauley has joined Grant Adv. of Canada Ltd., Toronto, as vp.

Ian Grant, news editor of Canadian Broadcaster for past four years, named promotion manager of CHCT-TV Calgary, Alta.

Mengie Shulman, for many years manager of VOMC St. John's, Nfld., and recently general sales manager of CKRM Regina, Sask., to sales manager of NTA Telefilm (Canada) Ltd., Toronto.

Andy McClelland, formerly tv consultant with CFMC-TV and CKMI-TV Quebec City, and CJSS-TV Cornwall, Ont., named production manager of CFTO-TV Toronto.

Franklin Armstrong joins news staff of CHUM Toronto.

Allied Fields

Randall S. Jessee, executive director of Metropolitan Area Planning Council of Kansas City, leaves position to open own pr and radio-production firm in alliance with Fox & Reshkin Adv., that city. Mr. Jessee previously was new director of WDAF-AM-TV, that city. Address of new firm: Postal Life Building, 612 West 47th, Kansas City.

Paul Purdom becomes partner in new Rubin & Purdom Co., San Francisco pr and sales promotion firm. Address: Columbus Tower, 916 Kearny St., San Francisco. Phone: Yukon 6-1296.

Deaths

Hil F. Best, owner of Detroit rep firm bearing his name, died early this month. He had been in semi-retirement since suffering stroke in 1956. Hil F. Best Co. represents many small U.S. radio stations.

Herbert A. Carlson, 51, founder-president of Carlson & Co. Indianapolis, died there Sept. 2. He started advertising career with Bozell & Jacobs as account executive and later vp and subsequently was associated with following agencies: Henri, Hurst & McDonald; Leo Burnett Co.; Grant Adv Inc.; Christiansen Adv., and Applegate Adv.

James E. Sweet, 51, account executive at CBS Radio Network Sales, Chicago, since 1952 and one-time co-owner of KIHO Sioux Falls, S. D., died of heart attack at Westmoreland Country Club in Wilmette (IlL.) Sept. 10. He previously was with WRC Washington, D.C.

Sterling C. Williams, 63, member of NBC-Chicago communications department and 30-year veteran of network, died Sept. 10.

Calvin D. Harper, 37, associate director of Linkletter Show was found dead in friend's swimming pool in Los Angeles Sept. 10.

D.B. McKay, 92, broadcast pioneer and former owner of Tampa Daily Times, died Sept. 7, following long illness. Mr. McKay was founder in 1922 of WDAE Tampa, Fla., that city's first station and one of first in Florida.
He flew 5,000,000 miles to get into this picture!

It took a lot of time. It took a lot of skill. Flying all kinds of planes... from 1-engine trainers to 4-engine jets. Mastering the flight regulations of many different countries. It took years of training and experience. And something else. The remarkable gift of all great professionals... who can land a plane with incredible precision... command powerful jet engines with unqualified authority. All Air France jet pilots are experienced enough to be in this picture. But to stay in the picture, Air France requires each and every one of them to take refresher courses every 3 months and pass stiff flight exams every 6 months. These are the men you always find on Air France... world's first International airline... world's only airline with 41 years experience in international flight. And you find them everywhere. Flying from all four Air France gateways at New York, Chicago, Los Angeles and Montreal. Flying Boeing 707 Intercontinental Jets and Caravelle Jets over major Air France routes in all parts of the world. Good reasons why you fly in confidence when you fly Air France... the world's largest airline.
INFORMALITY BREAKS THE ICE

Picnic for teachers brings results

A tree-shaded picnic table in a park; a meal fit for the most discriminating gourmets; a balmy summer day. Sounds like a setting for a romantic interlude. Actually, however, it was Allen & Reynolds' (Omaha, Neb., agency) novel way of creating a favorable advertising image to a group from the city's public and parochial schools on the annual Business-Industry-Education Day (BIE) there.

The idea was the brainchild of A&R President Milt Reynolds, who decided that advertising might need more "selling," particularly in an election year. The fact remained, too, that in the past teachers had regarded advertising with an icy reserve.

So while other companies hustled their visitors off to lunch at hotels, restaurants and company cafeterias, Allen & Reynolds gambled on the informality of an outdoor barbecue prepared by an expert. Details:

The chef: a logical choice was Lyle DeMoss, an agency vp who stars on his own weekday outdoor cookery show, Lyle's Patio, on WOW-TV, that city. The location: a small city park directly across the street from the agency. The weather: sunny and clear. The meal: Cornish Game Hens stuffed with almond dressing, Shrimp Vesuvius, sweet potatoes tropical, cottage cheese pecan, marinated country-style tomatoes and ice cream. The results: overwhelming, according to agency officials, and by far the most successful BIE Day the agency has ever held. The novelty drew local television and newspaper coverage and created a relaxed, friendly afternoon session for those involved.

Sales push for Clark

A round of meetings with midwest clients and their agencies has been set by ABC-TV for personality Dick Clark this week and teenagers will naturally be on hand. Mr. Clark will confer with advertising representatives in Chicago Sept. 19-20 and in Minneapolis Sept. 21 with James Beach vice president in charge of the network's Central Div., serving as host. Highlight of the Chicago junket will be a party in the Ambassador East Hotel for the teenage children of agency and client representatives. ABC Central Div. also will fete Mr. Clark at a studio press party.

Phone for a year

Approximately 150 girls, aged 11 to 16, stepped up to the microphone to chirp a Peter Pan brassiere commercial and introduce a record in a promotion run by WINN Louisville, Ky. The station had been selected to run the promotion by Kaufman's of Kentucky, Louisville department store. Although WINN is a good music station and bars rock 'n' roll and Top 40 music, Kaufman's felt that it could appeal to teenagers as well as adults, the station reports.

A teaser campaign—"Keep watching the Big K ... you may be the Big K DJ."—ran for a few days prior to the auditioning campaign. Girls were then instructed to enter the competition at Kaufman's, tape the bra commercial and lead-in and return to the store on the next Saturday for announcement of the winners. The winning teenager won a phone of her own for a year; radios and Kaufman's merchandise certificates were other prizes. The winning commercials are being used in a current campaign on WINN.

An eye for a dollar

Len Goorian, air personality and exploitation manager of WKRC-TV Cincinnati, did his best to make the local citizenry resemble a mass shirt advertisement. But the eye patches he tried to cajole people into wearing were actually boosting the station. The eye patches were similar to the CBS-eye symbol but with the figure 12 in the center. (WKRC-TV is a CBS-TV affiliate operating on ch. 12.) Cashiers, waitresses, doormen, mailmen, bell-tellers, newspaper boys, shoe shine boys and others were given the eye patches with a silver dollar and were told that if the station's "Mystery Man" saw them wearing the patch, they would be given 12 more silver dollars. The one-eyed effect the promotion achieved is attested to by the fact that WKRC-TV gave away $320 during the one-week campaign.

KABC-TV's fall drive

"For thrills, excitement, stimulation Call Surfside 6-5025" say the enticing, slightly lurid ads in Los Angeles metropolitan and community newspapers. Those who phone that number hear a recorded voice boosting Surfside 6, a new ABC-TV series on KABC-TV, that city. (The phone prefix is the same as one already in use.) The station reports that the telephone company has installed 10 special trunk lines to handle the surge of calls resulting from this promotion. Other media are also used to herald KABC-TV's fall schedule: print, pro football programs, king-size bus banners and 7- and 24-sheet billboards all featuring the campaign's theme, "I'm sold on 7" (the channel number). Direct mail and press parties are also part of the campaign. J.F. Brenbeck.
New portable audio amplifier—only 19½ lbs!

Completely transistorized—not a tube in the circuit.

The first time you lift it you'll be thankful for transistors—because it is 100% transistorization that makes this lightweight reliable design possible.

General Electric's new Type BA-26-A has built-in studio quality. Designed for AM-FM-TV and recording use, this portable amplifier provides console quality for remote broadcasts such as sports events, concerts and spot news. Besides the customary microphone inputs, this portable amplifier features a high-level input for tape or transcription. Here is the first portable audio amplifier containing its own regulated self-contained power supply with a range of 95 to 135 volts a-c. Provision for battery operation is also included. A laminated plastic front panel preserves permanent markings and allows space for other information to be added and erased without damaging the surface.

Carrying handle functions as base to position unit for most convenient operating angle.

For complete specifications on the latest in General Electric's new line of Transistorized Audio equipment, write Technical Products Operation, Communication Products Department, Section 4890-19, General Electric Company, Lynchburg, Virginia.
KABC-TV’s promotion-publicity director, says it is the largest promotion drive in the station’s history.

Drumbeats
Fine music tour ■ KPAM-KPFM (FM) Portland, Ore., classical music stations, will sponsor a six-week opera and concert tour of Europe Jan. 28 to March 31, 1961. Jim McGuire, the station’s classical music commentator, will be tour host. Among the cities to be visited are Vienna, Berlin, Munich, Milan, Florence, Rome, Paris, London and Amsterdam. Admissions to 26 European musical events are included in the tour price. Churchill Tours of Portland is organizing the tour which will go to Europe by Scandinavian polar jet.

Voice of a goddess ■ KTYW Cleveland is running an on-the-air search for a woman with a voice suitable for Juno. Juno is the name of the life-size transparent plastic model of a woman on display at the Cleveland Health Museum. She has animated internal organs, blood vessels and a visible skeleton. But she has lost a voice—a taped sound track which has been used so much for educational purposes it has worn out. KTYW is cooperating with the museum to cure Juno’s laryngitis.

FOR THE RECORD

Station Authorizations, Applications
As Compiled by Broadcasting

Sept. 8 through Sept. 14. Includes data on new stations, changes in existing stations, ownership changes, hearing cases, rules & standards changes and routine roundup.

Equipment a Radio Station?

This RCA Miniature Dynamic Microphone is as inconspicuous as modern microphone design can make it! Just 2¼" long, it weighs only 2.3 ounces. And, in spite of its compactness, the BK-6B is a durable, high-quality microphone. Try it for remotes! You'll find it excellent for interviews, panel shows and sports. It's a great value at $82.50!

Order your BK-6B now! Write to R.A., Dept. 1C-32, Building 15.1., Camden, N. J. Whatever your broadcast equipment needs, see RCA FIRST!

SALES-MAKING FACTS? WESTERN UNION SURVEY SERVICE LINES 'EM UP FOR YOU!

Trained Western Union personnel in over 1,625 cities are ready to spot-check TV or radio audience reaction, make traffic counts, or conduct detailed surveys. Western Union Survey Service gets the selling and marketing facts you need . . . when you need them. Whether it's counting noses or "nuts and bolts," if you've got the questions, we'll get the answers!

Wire us collect for the complete story. Address: Western Union Special Service Division, Dept. 9-B, New York, N. Y.

WESTERN UNION
SPECIAL SERVICES
Elton Hoerl Rule

"Television is beyond doubt the most exciting profession any one could be exposed to," Elton Rule, general manager of KABC-TV Los Angeles, stated last week. "I can't imagine any happier lot than to go on working in tv from now on and I certainly hope that's what lies ahead for me."

Whatever the future may hold, the fact sheets show that Mr. Rule has been in West Coast television for quite a long time. He was a time salesman ("account executive" was the way my business card put it) at KLAC Los Angeles at the time tv station was added to the operation, so he began selling tv time as well. Then the management separated radio and tv and Mr. Rule moved full time to KLAC-TV (now KCOP).

Ten Years of Tv ★ That was in 1950 and for the past decade he has been selling tv station time in Los Angeles. In 1952, he left KLAC-TV to join KECA-TV (now KABC-TV), ABC-owned Los Angeles tv station, as assistant sales manager. Since then his title has shortened with each move up the executive ladder: general sales manager in 1953, and on Sept. 1, 1960, to general manager. ("I hope I've come to the end of that line," he commented, "as the only other word that could be dropped would be 'manager' and I've no wish to go back into uniform, even as a general.")

Mr. Rule has good reason for feeling he's had his fill of soldiering. In 1940 he was working as a salesman-announcer for KROY Sacramento, Calif. One of his duties was covering California legislative happenings (Sacramento is the state capital) and one of his contacts was Gen. Middlesteadt, then state adjutant general.

"I was persuaded to sign up for some Army extension courses and on March 3, 1941, when the National Guard became part of the Army, I was commissioned a second lieutenant in the Army. It seemed like a good idea to do my year's service then and get it over with, so I went," Mr. Rule said wryly.

Five years and 11 days later, Major Rule received his honorable discharge. In between he'd been a platoon leader, a battalion adjutant, a company commander who took a machine gun company into Kwailean and Leyte in the Philippines, and after an Okinawa battlefield promotion to major, a battalion commander in charge of one-third of the city of Seoul, where he helped receive the surrender of the Japanese forces on Korea. "The Japanese were well armed," he recalled, "and no one knew whether they were going to fight or surrender, so the Army sent in three infantry battalions just in case."

Native Son ★ A third-generation Californian, Elton Hoerl Rule was born June 13, 1917, in Stockton (where his maternal grandfather, Joseph F. Hoerl, will celebrate his 102nd birthday this fall). After grammar school, Elton moved to Sacramento, where he went to high school and to Sacramento College, going to class mornings and working afternoons in a local clothing store. He had majored in journalism and had planned on an editorial career until the post of business manager of the college weekly newspaper and yearbook indicated that selling might be more remunerative than writing.

After his graduation from the junior college in 1938, Elton had expected to go on with his journalistic studies at the U. of California. But a summer job at KROY soon convinced him that broadcasting, not newspaperdom, was his world and that working at a radio station was more educational and enjoyable than going back to school could possibly be, so there he stayed until March 3, 1941.

Home Again ★ Back from the Pacific war theatre, young Rule returned to Sacramento and to radio as a salesman for KFBK. He left to become sales manager for Goodyear Wingfoot Homes, portable dwellings used chiefly by construction companies and government agencies to provide temporary housing for groups of men on locations remote from cities. "It was a good job," he said, "but it wasn't in broadcasting and it didn't take long for me to realize that's where I belonged." So he said goodbye to Goodyear and went south to Los Angeles where he went to work for KLAC.

In 1942, he married Betty Louise Bender, a Detroit girl. They and their three children—Cindy 13, Christie 5, and Jimmy 4—live in Van Nuys, in the San Fernando Valley, a half-hour's drive from his office in East Hollywood. His hobbies are tennis and swimming and "just enjoying the youngsters whenever I get a chance, chiefly weekends, as the nature of this business gets me out of the house too early and home too late to spend much time with them during the week."

Tv Grows Up ★ Despite the demanding "nature of the business," Mr. Rule is completely enthusiastic about tv as it is today and as he expects it to be in the years ahead. "Television is just coming of age," he declared. "By the calendar, tv is just entering its teens but the dollar figures show that it's already achieved adult stature in the tremendously competitive race for the advertising dollar. The FCC report for 1959, just issued, shows the total tv revenue for the year as more than a billion dollars for the second consecutive year. And 1960 promises to be even better.

"Look at the way money and creative effort is being spent for programming. This season, television has the most exciting programming ever offered to the public at any price, at any place and at any time in history."

"Finally, look at the new technical developments. Video tape, which has already revolutionized tv production practices, is only an elementary step. Pictures of dogs traveling in a satellite in outer space transmitted back to earth via tv are also only rudimentary signs of what lies ahead for television in science and inter-continental communications as well as in entertainment. The old timers, who got into radio in its infancy, may sigh for the good old days of broadcasting, but to the second generation broadcasters, the best is still to come."

Mr. Rule is a director of the Hollywood Ad Club and of the Los Angeles County Welfare Board, and a member of the Los Angeles Ad Club, the Academy of Television Arts & Sciences and the Broadcast Pioneers.

The great uninformed

THE 1960-61 television season is just beginning to get started and already the critics are beginning to bury it. The tragedy of tv that has been going on behind the scenes this summer is beginning to unfold in public," one of the most widely read newspaper critics wrote last week in a review that otherwise was devoted to a single program. The reviewer didn't attempt to explain how one program could foredoom an entire season to tragedy, but his comments don't show that the ground rules for criticism didn't improve much during the summer, either.

Despite such outbursts of uninformed omniscience, we do not hesitate to say that the 1960-61 season will be marked by a maturity and responsibility far beyond anything that television has undertaken before. To be sure, we are not talking about the weekly "entertainment" schedule, which, as a schedule, promises to be amply "entertaining" but does not seem to offer any startling innovations to excite us; but we are not forgetting, as so many critics do, that "entertainment" is what most of the people want most of the time, and without it there wouldn't be any money for more stimulating fare.

When we speak of mature and responsible programming in unmatched dimensions we are thinking of the information programs scheduled for this fall and winter. As reported in this journal a week ago, there will be considerably more than twice as many as there were last year (BROADCASTING, Sept. 12), a statistic that becomes even more meaningful when the actual figures are examined. 190 hours of prime network time—worth $22 million for the time alone—against 84 such hours in the year just past. We are not talking about the "Sunday afternoon intellectual ghetto," but about prime evening time; not about politics, but about other national and international issues and problems and subjects which need the widest possible public awareness and understanding.

There will be much of politics on the air this fall, both free and bought, both partisan speeches and non-partisan efforts to explore and clarify the issues, and it is entirely possible that when it is over the next President of the U. S. will have been elected because of exposure on television. But forget the campaign and there remains a lineup of major information shows that is impressive by any measure; add what used to be "the ghetto" and the other programs in important but non-prime time and "impressive" becomes "formidable." No matter what the critics say, this promises to be television's most informative year.

A matter of standards

AS REPORTED in this publication two weeks ago, KYA San Francisco, a Bartell station, has volunteered as a laboratory to test whether it can adhere to high commercial standards and still make money. The station announced a trial of a 16-point policy including, among other features, prohibitions against barter, per inquiry advertising, time brokerage and multiple-spotting.

Several stations have protested that the 16 practices are already in wide application and have been ever since radio became an important medium. This, of course, is true.

But it is equally true that in the intense competition among the growing number of radio stations in recent years some stations have favored expediency over principle. They have explained that they would have gone broke by doing otherwise.

Maybe so.

Yet some of the most successful stations we know of are also the most highly-principled. In their dealings with advertisers they have adhered to standards that are at least equal to those that KYA has begun to test. For them, the test has already been conducted in the years of their own operation. It has proved that adherence to standards can have its rewards in both money and respect.

But if KYA is serious in its intentions, its application of commercial standards could well lead to an upgrading of practices among other stations that heretofore have felt they could not afford the risk of standing on principle. If that happens, all radio will benefit, including the stations that have stuck to standards when some competitors were selling almost any kind of time under almost any kind of conditions to almost any kind of advertiser.

What it might have been

THE nation was stunned by the havoc wrought last week by what the Weather Bureau called the most destructive hurricane in history. From Florida to Maine there was death and devastation.

Ghastly as it was, Donna's toll in lives and property could have been infinitely worse. Radio was there, around the clock.

No other direct contact was available to the public in the areas in Donna's path. Newspapers couldn't do it because of power failures and no means of delivery. Many telephone lines were out.

It was in Florida, which bore the brunt of the storm, that emergency radio planning paid off. There was minimal loss of lives. All had been forewarned by radio and television through the operations of the new Fm Defense Network which actually had been set up as a by-product of Conelrad to alert the populace against attempted air attack.

Fm stations in the Defense Network carried some 150 bulletins each day for relay to the am (and tv) stations of the state. Stations devoted some 25% to 30% of their time to bulletins on the approach and progress of the storm, and to essential information after it struck.

Thus the Fm Defense Network, which had been on a test-study basis for a year proved its value in the saving of lives and in minimizing property damage. Stations remained on the air through use of auxiliary power supplies needed for the Conelrad installations made at their own expense.

There are Fm Defense Networks established in 30 states. They are primed to go into action in any emergency, whether caused by nature or by the enemy attack we hope will never come. Donna proved the effectiveness and the indispensability of this service. The saving of a single life would have made it worthwhile.

And they talk about a dearth of public service.
These are the numbers that really count: advertisers who invest in the sales ability of a radio station.

On the left is a list of advertisers using DAF RADIO when the new sound from Signal Hill started two years ago. On the right are the current accounts.

We think this growth is a result of our radio-to-be-listened-to policy... programming that delivers active listeners to our advertisers.
Stations individual in operation, cumulative in experience — this is the unique approach of Transcontinent Television Corporation. Each TTC station is a recognized leader in its market; all serve their advertisers with quality programming tailored to meet the requirements of the individual community.

Each station draws upon the individual successes of the entire group and constantly improves through the intimacy of this association.
