Political broadcasters

There'll be at least one practical broadcaster in White House if Democrats win Nov. 8. Myer (Mike) Feldman, administrative assistant to Sen. Kennedy for past three years, is co-owner of KLAD Klamath Falls, Ore. (acquired April 7, 1958) and WADK Newport, R. I. (acquired last June). Mr. Feldman, native of Philadelphia and attorney with wide experience in government, is regarded as sure bet for high-level White House administrative post under Mr. Kennedy.

Certain to be at high-policy level but not in formal assignment in event of Kennedy victory is J. Leonard Reinsch, executive director of Cox radio and tv stations, who has devoted practically full time to Democratic Party since last February when he assumed executive directorship of Democratic National convention. Since then he has been top tv-radio adviser to Democratic nominee and has handled all "Great Debate" negotiations. Mr. Reinsch will return to his Cox headquarters in Atlanta after elections despite speculation that he would wind up in government. Both Presidents Roosevelt and Truman offered him federal appointments (including FCC), but he declined, preferring station management.

In case of strike

Concern over outcome of pending talent union negotiations with networks, agencies and producers (see page 29) has advertisers—as well as those represented directly in bargaining—pondering alternatives in case worst happens. Aside from sentiment that spot tv spending would drop heavily if unions get their demands, there are at least two possibilities which one expert described this way: "There's still a lot of non-union production being done in this country, and there would be a lot more if these demands went through. In addition, a union contract based on these terms would force far more production abroad in order to keep costs down."

Secret fm report

Newly-prepared measurement of fm by Young & Rubicam has been kept so quiet that few outside agency are aware of report's existence. Study, begun six months ago, led to Chrysler Corp.'s $125,000 fm purchase last September for Imperial car. That purchase entailed sponsorship of five-minute newscasts across-board on 27 stations QXR network (Broadcasting, Sept. 26). Check of QXR principal in contract negotiation disclosed no knowledge of report.

Scouting trips

Interest in international expansion in tv by U. S. entities is mounting steadily. Among well-known officials now abroad are Brig. Gen. David Sar- noff, RCA chairman (in Orient); Merle Jones, president CBS Stations Division, who last week for five-week trip which includes Japan and Australia; and John Blair, president of John Blair & Co. and its subsidiaries, who is on his first European trip.

Although few countries allow "foreign" licensee ownership, partnerships or firms have already established widespread services abroad and even reps are now eyeing field. Blair Television has taken on U. S. representation of Associated Rediffusion, one of Great Britain's prime contractors in commercial operation.

International business

Another indication of international tv's future commercial growth: ABC International is expected soon to announce new multiple-buy by international advertisers for telecast over Latin American tv facilities in which ABC's parent, AB-PT, has interest.

More Yarborough trouble

Networks were unhappy last week because they weren't invited by NAB to take part in private huddle with Creekmore Fath, Senate election subcommittee's majority counsel. Terms of subcommittee's demand for complaints of election unfairness were discussed. But networks were seething over NAB's later statement because it accepted mandate from Sen. Yarborough, subcommittee chairman, that stations "must" send in complaints within 24 hours.

Legal position widely expressed in Washington is that senator has no authority to demand anything from stations. It's contended NAB abandoned industry's basic First Amendment rights by yielding to subcommittee. Advice of some lawyers to stations: Ignore Yarborough letter. Incidentally, many stations say they've never received letter.

Staying put

Word was circulating last week that Mutual would move headquarters from New York to Washington, but top officials said it wouldn't happen.

They said they were thinking (but had not finally decided) about transferring station relations headquarters, effective around first of year, because Washington had become mecca for broadcasters on government business. This would mean transfer of stations relations vp Charles Godwin. Even if he moved, they said, station relations director Charles King would continue to work out of New York—along with rest of network's headquarters.

Not enrolled

NAB's energetic effort at FCC hearing to oppose RKO General's pay tv project in Hartford involved no danger of strained relations with member stations. Reason is simple: None of RKO General's properties is member of industry association, nor do tv stations subscribe to television code.

Seemingly timed to break during FCC's consideration of Hartford pay tv proceedings are depth articles on subject in November issue of Peageant and upcoming December issue of Fortune. These are in addition to current breaking feature pieces in a number of newspapers.

Extended tour

Edgar G. Shelton Jr., who has been on leave since Oct. 15 from his vice presidency of ABC Washington at request of Vice Presidential Nominee Lyndon B. Johnson as consultant on special public relations projects, will continue on that assignment until after elections. Mr. Shelton was originally asked to serve only on Sen. Johnson's whistle-stop tour of South, but request was made for his assignment for "duration," to which ABC, through Washington Vice President Al Beckman, readily assented.

Amateurs in space, too?

Those "California kilowatts" whose electronic industry connections have given them tinkering luxuries that are the envy of ham radio world, now are working all possible sources to get active communication satellite of their own in space. They want to put regular 2 or 20 meter amateur bands into orbit by piggy-backing on some regularly scheduled NASA or Air Force firing, even considering making their own sphere out of spare hardware contributed by manufacturers. Core of enthusiasts reportedly is at Lockheed, but other big firms also are represented. For growing competition in satellites, see story page 80.
WIBG has clear leadership in adult audience quantity and lowest cost-per-thousand with more adult listeners in more time periods than any other Philadelphia radio station, Pulse 8-county area (August 1960)

Another Great Storer Station Represented by the Katz Agency, Inc.
WEEK IN BRIEF

A formidable threat to spot tv is developing. Demands of talent unions for increased pay scales bring adverse reaction from some of television's biggest customers who hint they'll slash or abandon spot tv. Talent asks 1,000% increase, and up. See . . .

TALENT'S THREAT TO SPOT TV . . . 29

Sooner than you think the world will have an operating television network based on sky-stationed satellites. Martin Co. is the latest to divulge its plans, hinting it may have an 'Advent' missile aloft some time next spring, if all goes well. AT&T and IT&T also are in the race. See . . .

THE RACE FOR SPACE RELAYS . . . 80

A perennial question is back again: Should stations merchandise and how much? NBC study shows that promotional aids by stations frequently are important factors in timebuyers' decisions, especially among smaller agencies. See . . .

AGENCY MERCHANDISING DEMANDS . . . 40

To pay or not to pay for tv? FCC holds a week-long hearing on proposal of RK0 General to conduct a three-year experimental pay tv service in Hartford, Conn. Theatre owners and NAB violently oppose the project. See . . .

HARTFORD PAY TV
FCC full-week hearing ends
with details on programs

Investment opportunity as well as fee is included in contract between Teco Inc., pay TV programming company, and Broadway-motion picture TV producer Leland Hayward.

Details were made public when his contract was put into record Friday at windup of 5-day subscription TV hearing before FCC en banc on RKO General application for permission to run three-year trial in Hartford, Conn. (earlier story page 70).

Hayward's contract, with dollar figures cut out of exhibit copy, provides he can buy into potential Teco subsidiary, Phonevision Programming Co., at par value and up to 121/2% total, or enter into Phonevision franchise for TV market (with limitation factor also cut out) or participate in other investment opportunity that comes to Teco's attention before Sept. 22, 1964.

Hayward's contract runs for one year. It also sets out he will, within six months, furnish recommendations for establishment of Phonevision program schedule for Hartford trial.

Background - Mr. Hayward also discussed his 1956 contract with CBS, which still has 18 months to run. He is obligated to provide one spectacular and one pilot film to network each year, he said. He saw no conflict between his duties to CBS and those to Teco, he declared.

Earlier Friday, Pieter van Beek, Teco president, stated that Teco board had authorized expenditure of $100,000 for options on program material for Hartford pay TV operations. These will be offered to RKO General—franchise holder in Hartford—he said, but it is under no obligation to take them.

Mr. van Beek said Teco will provide encoding equipment worth $50,000-$310,000 to RKO General's WHCT (TV) Hartford. Only return on this, he explained, is 121/2% royalties on Phonevision gross revenues.

These two points caused Marcus Cohn, attorney for Hartford movie interests, to charge that Teco stands to make two profits in its arrangements with RKO General—from sale of programs and also from royalties.

National Potential - It's possible, Mr. van Beek said, that Teco might sell program at loss to RKO General in hope of helping to establish pay TV on national basis.

Mr. van Beek acknowledged he is still employe of Zenith, as well as president of Teco. Teco is due to pay Zenith 33 1/3% of its profits.

Teco will, Mr. van Beek stated, make its product available to wired pay TV operations; it is not limited to over-air subscription TV. He also said Teco might sell programs for conventional TV broadcast, although there are no such plans now.

Joseph S. Wright, president of Zenith, was on stand Thursday night and early Friday. He related history of establishment of Teco, agreed that substantial ownership was vested in heirs of late Eugene F. MacDonald Jr.

Mr. Wright acknowledged he by-lined (but did not write) article appearing in Aug. 26 Hartford Times. This stated that WHCT would continue to operate mostly as regular station and to carry such programs as Open End, Piano Pops, etc. These programs, according to Thomas F. O'Neil, RKO General president, will be eliminated if Phonevision grant is made.

During last part of hearing, when lawyers were entering and objecting to exhibits, Mr. Cohn made charge that Zenith will make 25% profit on sale of each of its decoders to RKO General.

"Television' Purchased

Broadcasting Publications Inc., publisher of Broadcasting, has contracted to acquire Television magazine.

The agreement was announced Friday by Mrs. Frederick A. Kulgel, president of the company now owning Television, and Sol Taishoff, president of Broadcasting Publications. Mrs. Kulgel is the widow of the founder of Television. Mr. Kulgel died last month.

Mr. Taishoff said that Television will continue publication from its present headquarters in New York with no immediate changes in personnel or format.

After completion of the acquisition, an editorial expansion program for the magazine is contemplated.

Broadcasting and Television will have separate operating staffs, under the policy direction of present officers of Broadcasting Publications Inc.

Parties seek accord on fifth 'debate'

Party negotiators were still locked in conference over fifth campaign debate late Friday, with belief chances were bright for Kennedy-Nixon radio-TV meeting tonight (Oct. 31).

Origination in Washington at WMTP-AM-TV Broadcast House by CBS-TV is strongly indicated, CBS having won in draw with NBC (early debate coverage page 60).

J. Leonard Reinsch, communications consultant to Sen. Kennedy, and Fred C. Scribner Jr., for Vice President Nixon, exchanged sharp statements Friday in which they hinted bad faith and doubted if other party really wanted debate. Statements also raised question of vice presidential candidates' participation.

Sen. Kennedy got into act Friday by wiring Vice President Nixon he had been advised Mr. Scribner refused to make final commitment of time and place and stating "this reluctance is incomprehensible to me." He demanded GOP acceptance by night of Oct. 29 "or the American people will know where to place the blame."

Watchdog gets his 'bite'

Democratic candidate for Congress from First District in Kansas, Marshall T. Gardiner, wired protest to Senate watchdog subcommittee Friday about appearance of Thad Sandstrom, general manager, WIBW-TV Topeka, as unidentified announcer on paid political spots for incumbent Rep. William Avery (R.-Kan.). Wire charged Sec. 315 violation on ground appearance implied endorsement by "Sandstrom, WIBW-TV and the entire monopolistic Stauffer Publications," station owner. Mr. Sandstrom said station made spot film for both candidates and he would be willing to introduce either on spots or programs as no endorsement was intended. He said station newsmen Don Harrison announced Gardiner spot and also was unidentified. No endorsement was implied there either, he said, claiming Sec. 315 was not violated.

Metropolitan earnings

Metropolitan Broadcasting Corp., New York, made $30,305,176 in gross revenues first 39 weeks of this year, John W. Kluge, chairman and president, told stockholders in third-quarter report Friday (Oct. 28). Income from operations was $5,208,040 and net in-
WEEK'S HEADLINERS

Stuart D. Watson, chairman of McCann-Marschalk Co., N.Y., becomes president, succeeding William E. McKeachie who retires, effective end of 1960, after 31 years with McCann-Erickson Inc. (corporate parent). Ralph E. Koser, senior vp of McCann-Erickson Adv. (U.S.A.), Chicago, becomes executive vp of creative services, McCann-Marschalk, and executive since July, elected senior vp, Maj. Gen. Harlan C. Parks, (U.S. Air Force, Ret.), M-E general corporate administration, McCann-Marschalk. Mr. Watson joined M-E in 1956 as chairman of marketing plans board after having served in advertising-merchandising at Johnson's Wax. He later advanced to executive vp of Marschalk & Pratt, and chairman of newly formed McCann-Marschalk early this year. Mr. McKeachie joined H. K. McCann Co. in 1929, year before its merger with Erickson Co. He was creative director and in 1952 was named vp for agency's nine European offices and chairman of London office. Mr. Koser joined M-E in 1937 as creative director in Cleveland, later advancing to senior vp in Chicago.

Warren J. Boorom, vp and director of member service of Radio Advertising Bureau, N. Y., resigns to join Metropolitan Broadcasting Corp., as director of advertising and promotion (CLOSED CIRCUIT, Oct. 24). Mr. Boorom, who was with RAB for six years, became vp 18 months ago. Patrick Rheuma, manager of RAB member service department, succeeds Mr. Boorom. He joined RAB in Jan. 1958 as regional manager of member service, after affiliation with WCHN Norwich, N. Y.

For other personnel changes of the week see FATES & FORTUNES

AT DEADLINE continued

come after taxes, charges and amortization of goodwill was $1,035,247 (61¢ per share on 1,699,137 shares). Report cited "continued growth" but made no comparisons with previous earnings because of interim acquisitions and operational changes.

Figures for third quarter: $11,125,-281 gross revenue, $1,695,109 income from operations and $287,323 (17¢ per share) net income. Metropolitan properties are WNEW-AM-FM-TV New York; WTTG (TV) Washington; WHK-AM-FM Cleveland; WIP-AM-FM Philadelphia; WTVH (TV) Peoria, Ill.; WTPV (TV) Decatur, Ill.; KOVR (TV) Stockton, Calif., and shortwave WRUL New York. Corporation also owns Foster & Kleiser, outdoor advertising agency.

MCA asks FCC to reverse Cunningham's order

Music Corp. of America asked FCC Friday to revoke order of Hearing Examiner James D. Cunningham, issued during FCC's Hollywood hearings, requiring firm to furnish list of tv programs for which MCA acts as selling agent.
Taft Schreiber, MCA vice president, offered list provided it would be kept confidential; left hearing when no such promise was forthcoming (AT DEADLINE, Oct. 24).

Firm told commission Friday that information called for is beyond scope of hearing and jurisdiction of commission.

According to networks, MCA is selling agent for some 17 tv shows including Laramie, Leave it to Beaver, and The Ed Sullivan Show.

GE, Zenith give nod to fm stereo systems

FCC's proposal to permit fm stations to broadcast stereophonic programs on multiplex basis won support from both General Electric and Zenith Radio Corp. Friday, deadline day for comments.

Proposal, augmented by Electronic Industries Assn. Panel 5 study, included consideration of seven stereo systems analyzed by National Stereophonic Radio Committee plus one proposed by Philco Corp. Both GE and Zenith, in Friday's comments, favored NSRC system #4. Multiplex Development Corp., developer of a system tested, favored NSRC #2B.

Others filing in the rulemaking proposal were KRCW (FM) Santa Barbara, Calif., Moseley Assoc., manufacturer of remote control equipment, WCRB-AM-FM Waltham, Mass., and WHFS (FM) Bethesda, Md.

ELA submitted report of completed stereo system study to FCC without recommendations.

Capital Cities income up

Nine-month earnings of Capital Cities Broadcasting Corp., New York, increased to record net income after taxes of $566,508 as against $134,666 in same period of 1959. Net sales amounted to $5,311,362 compared with $3,478,251 in like period year ago; earnings per share were $49¢ compared with 12¢ for nine-month period in 1959.

Capital Cities reported net income before taxes in first nine months reached $1,106,102 compared with $142,504 in same period last year. To point up company's net gains over last year, it was announced, income taxes in first nine months of 1959 amounted to $7,838 while in 1960 income taxes for like period amounted to $539,594. Capital Cities operates in RROW-AM-FM and W9N-AM-FM and with WROW-AM-FM and WPXO-AM-FM Providence, R. I.

DuMont wants out of Boston ch. 5

Allen B. DuMont Labs., applicant for ch. 5 Boston, asked FCC Friday to dismiss its application for channel. If granted, move will leave only three applicants for facility.

Fairchild Camera & Instrument Corp., which now owns DuMont since merger last July, told commission it has no interest in pursuing application further. Massachusetts Bay Telecasters Inc., another ch. 5 applicant, asked FCC to dismiss DuMont's application in September (BROADCASTING, Oct. 3). Applicants, in addition to DuMont, still in contest for ch. 5 are Greater Boston TV Corp., Massachusetts Bay Telecasters and WHDH Inc.

FCC voided 1957 grant of ch. 5 to Boston Herald-Traveler on grounds of off-record representations and has reopened case.

Business Briefly . . .

Ocean Spray Cranberries Inc., Hanson Mass., starts revised tv spot campaign today (Oct. 31) in some 30 top markets with average of 30 spots weekly in each. Earlier plan was to enter 50 top markets this month with flight schedules (BROADCASTING, Sept. 5), but seasonal push now will run straight through to Christmas holidays. Agency: BBDO, N. Y.

Lever Bros., New York, appoints BBDO, N. Y., as agency to handle advertising for new product, Nifty, first liquid scouring cleanser to be introduced. BBDO already is working with Nifty in test markets, including spot tv, mainly Madison, Wis., and Wichita, Kan.

SOME UPCOMING PROGRAMS:

"Sick Minds in Sound Bodies"
"The Eve of the Atom"
"Will Cancer be Cured?"
"To the Moon and Back, Safely"
Prime example of the programming through which creative talent and community leadership are continually building new vision into Television on stations represented by **BLAIR-TV**

"WDSU-TV has established itself as an integral part of the area which it serves by voicing responsible editorial opinion on important local issues. We have never been content to be identified as merely an entertainment showcase, but have rather sought and won an identity as an influential public force in the community. The respect and integrity which have accrued to the station are certainly important to the advertisers whose messages we carry."

**A. Louis Read**
Executive Vice President
Station **WDSU-TV**
**MAKING TELEVISION A COMMUNITY FORCE**

Close study of programming is basic to our work as station representatives. Such study has deepened our admiration for the fine productions developed through creative talent, initiative and leadership of individual stations, from coast to coast. 

Prime examples of community leadership are the daily editorials on WDSU-TV—a Peabody Award-winning feature scheduled in evening time. 

Developed through intensive research by WDSU-TV's 12-man news department, these editorials provide an informed commentary on key events and issues affecting community problems and progress. They translate, into positive action, the profound desire of station management to be an influential public force in the community.

In New Orleans and throughout the station's entire area, Gulf Coast viewers look to WDSU-TV to give not only the news in pictures but also the full picture behind the news, through thoughtful interpretation and incisive informed opinion.

At Blair-TV, watching the impact of creative programming by great stations like WDSU-TV is a constant source of satisfaction. For more than a score of such stations, we are proud to serve as the national sales arm.

WPEN RADIO MAKES THINGS HAPPEN IN PHILADELPHIA

As Part of Our Continuing Efforts in Community Service

WPEN AWARDS FOUR COLLEGE SCHOLARSHIPS

WPEN awards four college scholarships each year to students throughout the Philadelphia area, selected in cooperation with WPEN, by the Mayor and Superintendents of the Public and Parochial School Systems. Education is our responsibility—and it is also good business. In Public Service . . . In Sales . . . And In Exciting Listening, WPEN Makes Things Happen In Philadelphia.

Richardson Dilworth, Mayor of Philadelphia (center) and a group of distinguished citizens comprised the Board of Judges.

A general view of the audience at the WPEN "Teenage Salute Award Dinner"
The Big Chief can always attract a big, attentive audience ... but nothing like WCCO Radio with more listeners than all other Minneapolis-St. Paul stations combined!

Besides, WCCO Radio has top acceptance with a tremendous tribe ... 1,022,610 radio families in a 114-county basic service area.

Watch your Big Chief smile when you add WCCO Radio's lowest cost per thousand ... less than one-third the average cost of all other Twin Cities stations. It's a powerful way to take command of a major market.
Newest among the leaders serving America's greatest radio market!

PLAYBACK®

QUOTES WORTH REPEATING

Students and faculty of Olivet College, Olivet, Mich., heard a professional broadcaster candidly evaluate the strengths and weaknesses of television earlier this month, and they learned just how much service they were receiving from the medium, too. Willard Schroeder, general manager of WOOD-AM-TV Grand Rapids, Mich., told them Oct. 6 in part:

I think those of us who have been in television the last 10 years did the jobs that were most pressing. We installed the physical plant, sold our services to an initially skeptical market. We put our businesses on a sound financial basis. I see absolutely no reason for not being proud of it in television.

But, now we come to the second decade of television, and it's going to be a lot tougher than the first. We've built this wonderful facility that pumps out sight and sound 17 or 18 hours a day, seven days a week, 52 weeks a year. It delivers this service to over 90% of the public—not just singly but offering 94% of all Americans the choice of three stations.

In plain language, we're stumped. We have an acute shortage of creative talent in the television industry. Our problem is only made tougher by the fact there are equal shortages of the same kind of talent in the theatre, in the movies, in radio, the newspaper, magazine and book publishing fields.

Compromise • The result, of course, has been compromise. I'm reasonably certain that the networks with which we are affiliated, or, we ourselves, have tried just about every kind of program form in the last 10 years. And, some of it, if I do say so myself, has been pretty good. Unfortunately, a television program isn't like a Broadway play. A successful Broadway show can run without alteration for years.

A return to live television is not the answer... Television's abundant troubles are caused by bad scripts, not by networks, agencies and sponsors taking beautiful scripts and reducing them to rubble. When a beautiful script appears—an occurrence almost as frequent as Halley's Comet—it not only gets produced, but the author is embraced and feted and signed for six more scripts—all of which will be bad... .

I don't agree at all... that our problems are hopeless. If we realize that effort, in any direction, is characterized by success and failure, we need only to exert more effort. The end result will, at least, be a parallel increase in success—in this case—in worthwhile...
"ALL THAT IS NECESSARY FOR THE FORCES OF EVIL TO WIN IN THE WORLD IS FOR ENOUGH GOOD MEN TO DO NOTHING"

—EDMUND BURKE—

VOTE TUESDAY NOV. 8

This message was created in our agency to remind our people that voting is not a right, not a privilege, but a responsibility of citizenship. It appears here in the belief that others will also find these words a timely reminder of a basic principle. YOUNG & RUBICAM, INC. Advertising, New York.
A few simple advertising truths, to answer the rantings of the critics

One thing that I learned a long time ago is that generalities are dangerous. Whereupon I will now proceed to state one. It appears to me that many of the more vocal critics of advertising and all its works are those who know the least about it.

Some of these pontificate from the cloistered halls of learning, from which privileged sanctuaries they berate the tawdry commercial processes which produce the grants for endowments and the taxes which support them. Others, having failed to reach the eminence in industry to which they feel they are entitled, take their limited experience and proceed to fashion a platform on which to do the same thing.

Neither of these types will stop their ranting just because I raise my voice in this forum of the electronic media. But a few constructive truths published here may reach some of those independent souls who like to hear both sides of a question.

What I say will be well known to most readers of Broadcasting, for most of them have learned, as I did, the hard way.

We all know that there are areas in advertising which can stand improvement, for in this business we have our quota of jerks, slick operators and incompetents. But one of the great things about advertising is the speed with which these phonies are found out. The economics of the business usually take care of that.

Challenge the Insults • Now, regarding these shallow criticisms of the business which allege that advertising is uneconomic; sells people things they don’t want; creates false-obsolescence and all the rest of that tiresome drivel that we all have heard so many times before.

I’m not going to dignify these rantings with a factual rebuttal because the readers of Broadcasting don’t need it, but I am going to appeal to those readers who get this far in the page not to let all these insults go unchallenged. Of late, Leo Burnett and (Fairfax) Cone [board chairman of Leo Burnett Co., and chairman of the executive committee of Foote, Cone & Belding, respectively] have taken the critics to task in devastating ways. I’m proud to be in the same business with these hard-working practitioners.

Marketing Facts • To what they have said I would add some self-evident truths.

1. Any company president who authorizes advertising expenditures knows that well-thought-out advertising can sell almost anything once. But he also knows that only the product can sell itself the second time. And if there is no repeat business there won’t be any company or any president.

2. Any pseudo-economists who maintain that advertising sells the American public things they don’t want (or need) obviously has never tried selling. Most of us know that it’s hard enough to sell people on things that they do want and need.

3. What is “false” obsolescence, anyway? Should we conspire to prohibit people from buying new and better motor cars with the better engineering and performance that have been developed since they bought their present cars? Must we say: “Drive the old ones until they fall apart like the one-horse shay”? Should the consumer not buy new foods, new medicines, new clothes, new houses, new appliances?

Well, this is ridiculous. I say that whenever a better product comes along, the old product is truly obsolete and there’s nothing false about it.

Voice of Progress • This attitude comes naturally to us in the Wade Agency. My grandfather’s biography relates that in 1902 (seven years before he founded the company) he wrote the first copy at N. W. Ayer on the revolutionary new packaged crackers, Uneeda Biscuits, that brought obsolescence to the cracker barrel pretty quickly. And some recriminations too, I suppose.

This is too old a lesson not to have been learned by now. If the critics want to display their lack of grasp by criticizing the voice that heralds the new and better things, then that’s the kind of criticism I would like to have directed my way, and often.

Every successful manufacturer recognizes that from the fires of obsolescence come the ashes which give birth to progress.

When the anvil chorus gets going on some of the examples of bad taste in our business, I’m with them. So are most of the thinking people in every segment of advertising. There is still a lot of work to be done on this, from inside the business, by people who know what they are talking about because they work at it.

I can say all this proudly, because in our agency we have something of a record for producing commercials that are in good taste; that don’t insult the intelligence of the public; that are economically successful because they sell merchandise. And when a better product comes along we try very hard to make old products obsolete.

While we’re doing this, and our firm has been at it for 51 years, we don’t imagine that we’re getting people to buy things they don’t need. Whoever thus underestimates the shrewdness and intelligence of the American public just doesn’t have the facts. That’s all.

Albert G. (Jeff) Wade II, board chairman of Wade Adv. Inc., Chicago, was literally born into the advertising business—the son of executive Walter Wade and grandson of the agency founder. Young Wade was born in Oak Park, Ill., in 1918. He became a writer-producer for shows in radio’s heyday and later agency president. He recently became board chairman. Major radio-tv advertisers serviced by Wade include Miles Labs and Toni Co.
These are the hands of a billiard champion. Hands that reflect the experience of the years... the dedication of the mind... the desire of the heart. These are the elements which produce that quality touch! You'll find them, too, in that which sets great television and radio stations apart from the rest!

*Combined automotive and filling station sales in the WWTV area ($239.8 million) exceeds those in Nev., S.D., N.D., N.H., R.I., Hawaiii, Del., Alaska, Wyo. and Vi. (Source: SRDS)

Susskind & Krushchev
EDITOR: Your editorial (page 116, Oct. 17 issue) concerning David Susskind’s interview of Premier Krushchev was an excellent commentary on the sad state of journalism in broadcasting today. We carried the program on WYSO and shared your dislike for the manner in which Mr. Susskind provoked the Russian leader. The end result was a shabby propaganda duel which shed little light on the basic problems that divide America and Russia.
—Jonathan Wallach, Assistant Director of Radio, WYSO (FM) Yellow Springs, Ohio.

W-CAR's Pat Sheridan studies famous statue on recent visit to Sheridan Circle, Washington, D. C.

SHERIDAN'S RIDE
OCTOBER 19, 1864

Dark days of the Civil War. The Nation’s capital filled with gloom and foreboding . . . Washington was “a city of despair.”

The cavalry of feared and famed Confederate General Jubal A. Early penetrating the Shenandoah Valley to the west and north of Washington, threatened to “raid the Capital and seize Lincoln.”

Union General Sheridan—“Little Phil,” whose first command as a colonel had been the Second Michigan Cavalry . . . returning to his headquarters from reluctant attendance at a hastily-summoned War Office meeting and hearing heavy cannonading in the early morning . . . his “perfect battle sense” told him that pre-dawn surprise and catastrophe had befallen his troops . . . and “by his wonderful ride up the Shenandoah Valley from Winchester twenty miles away,” the General rallied the routed army, reorganized it, and “literally turned defeat into victory”—as many other great Americans have done—and will do again.

Washington was saved, its gloom turned to joy. President Lincoln sent General Sheridan his thanks and those of the Nation for “a great national disaster averted.”

Within a few weeks came Thomas B. Read’s famous poem “Sheridan’s Ride” which through following decades, millions of American schoolboys learned and recited by heart. General Sheridan’s famous horse Rienzi, (a gift from Captain Campbell of the Second Michigan Cavalry) was preserved after death in 1878 and today is in the Smithsonian Institution in Washington.

In 1908, sculptor Gutzon Borglum, fascinated by General Sheridan’s career, gained his first international recognition with the unveiling of the monument shown above—widely regarded as the finest equestrian statue in the world.

CIVIL WAR CENTENNIAL . . . 1961-65

As 1961 approaches, America prepares to commemorate throughout the following five years the Centennial of the Civil War. Centennial Commissions have been established in more than 40 states. On October 31 will be published a monumental Pictorial History of the Civil War.

To further heighten interest in the Centennial, W-CAR-Detroit is planning a special series of public service programs based upon outstanding events of the conflict termed by Winston Churchill, “the noblest and least avoidable war ever fought.” The interest and co-operation of citizens throughout this area is welcomed—address W-CAR, 500 Temple Avenue, Detroit, attention Civil War Series Director.

TODAY . . . OCTOBER 19, 1960

On this 96th Anniversary of Sheridan’s Ride, W-CAR’s Pat Sheridan is away from his accustomed W-CAR programs in Detroit, extending his Civil War research, gathering additional source material for W-CAR’s forthcoming program series.

He is in Virginia . . . paying homage to one of America’s greatest military leaders . . . leaving at 8:30 as did General Phil Sheridan exactly 96 years ago . . . re-travelling along the Valley Pike the route of the famous Ride to the battlefield at Cedar Creek.

Tomorrow, through the miracle of modern travel, Pat will be back on his regular W-CAR programs, bringing pleasant music, friendliness and his own special brand of good cheer to all in the listening area of W-CAR who “Ride With The General”!

fortunate enough to possess a television set.

In discussions with Mr. Soawokoya, 

principal of emergency science train- 

ing: E. S. J. Moses, chief officer of the 

Ministry of Education, and H. D. 

Omenia, under-secretary of the Minis- 

try of Finance, I observed their in-

tense interest in television as an induc- 

tive instrument for education. There 

was a common and penetrating percep- 
tion by these leaders that television for 

mass consumption had to provide 

mass-appeal programming, program- 

ming of universal appeal, so that the 

purchase of sets would be stimulated 

and the interlarding of entertainment 

with academic material would become 

an escalator for a higher common de- 
nominator of intellect, without the 

almost impossible approach through 

government operated facilities.

These leaders were deeply interested 

in the cost of radio and television 

broadcasting stations with particular 

reference to the campus facility found 

in the U.S. They also asked thought- 
ful questions concerning the construc-

tion and use of public halls for com- 

munity tv watching...

Televisio in Lagos, aired from 6 to 

10 p.m., has suggested to the Nigerian 

leaders the key to amalgamation of the 

200-odd languages spoken by the 40 

million people inhabiting 340,000 sq. 

mi. Public interest in education is 

robust, with books of any kind what-

soever going like hot cakes out of the 

libraries of Lagos. These people show 

a voracious appetite for information...

TALENT’S THREAT TO SPOT TV

- Union demands would blast costs up as much as 1,400%
- Big advertisers say they’d have to pull out of television

The prospect of paralyzing cutbacks in the $650 million spot television business hung like a wet cloud last week over talent union negotiations with networks, agencies and producers. The unions are the American Federation of Television & Radio Artists and the Screen Actors Guild.

Some of spot television’s oldest and steadiest customers were quoted as taking the position that they would have to slash ruthlessly—and perhaps abandon completely—their spot tv advertising if the unions’ demands were met.

At least 30 major tv advertisers were said to have indicated in a private poll that they were “ready to take a strike” rather than acquiesce in the union demands. This also was reported to be the attitude of virtually all other leading spot spenders who had expressed any position. Participants said that no advertiser had indicated a willingness to pay the unions’ price in order to avoid a strike.

“We couldn’t take these proposed prices,” one advertising executive said. “We would have to take a strike.”

The demands, according to sources close to the negotiations, would send talent costs soaring as much as 1,000 to 1,400% or more above those currently paid for typical spot campaigns. These sources said network commercial costs also would rise, but not so drastically. Thus they expected that retrenchments would fall principally on spot.

The increase in talent costs for scale performers on network television programs, it was estimated authoritatively, would vary between 91% and 227%.

Strike Effects - A strike presumably would knock out live network programming for the duration, limiting shows to those that are on film or tape and, if it lasted long enough, reducing network tv to re-runs. Commercials would be limited to those already in the can. Some step-up in commercial production has been noted among agencies as a hedge against the possibility of a strike.

There were almost constant sessions last week, either actual negotiations or separate meetings of the parties individually to review developments and plan strategy. They were conducted in tightest secrecy.

“I don’t think television stations have yet realized that the most critical effect of these negotiations could be on them,” one advertiser told Broadcasting between meetings. “I personally know a number of advertisers, and they are all

AFTRA puts its foot in a new door

The American Federation of Television & Radio Artists, heavily involved as it is in negotiations with tv-radio networks and producers, took time last week to make a contract with another medium—subscription television.

Donald F. Conway, AFTRA’s national executive secretary (seated left in photo above), signed an agreement with International Telemeter Co. covering performers in video tape programs produced for pay tv. Others present at the signing of the document—the first of its kind—were (fr in photo) Mortimer Beck er, AFTRA’s general counsel; Leslie Winik, vice president of International Telemeter, and Leonard Kaufman, Telemeter’s general counsel.

Under the contract, the scale performer will be paid one and one-half times the applicable basic minimum fee. Telemeter also will pay AFTRA 5% of the producer’s gross receipts for each showing on pay tv, with the additional one-half of the basic minimum serving as an advance against the 5% of the producer’s gross.

A taped version of Gian Carlo Menotti’s operetta, “The Consul,” was produced earlier this year with AFTRA performers and will be shown on Telemeter’s Toronto wired toll tv system in a few months. Telemeter officials said they planned to tape Broadway plays, original dramas and other productions, with AFTRA performers, later this year.

BROADCASTING, October 31, 1960
upset over the unions' proposals and think—as I do—that these prices could drive us out of television, especially spot television. Obviously it is the stations who would suffer most."

The reluctance and more often refusal of negotiators to discuss the negotiations kept the rate of progress—or lack of it—beclouded throughout last week.

Union Demands • The estimates of increases up to 1,400% or more in spot talent costs were based on the unions' original demands for a new re-use or residual payment formula and for establishment of a unit system that would weight talent payments according to size of markets used in spot campaigns (BROADCASTING, Oct. 3). There were reports that the unions had since modified these demands "somewhat," but these reports were not officially confirmed and there was nothing to indicate, even in speculation, that the union requests have been eased materially, if at all.

Similarly there was no official word on the proposals of the networks and producers. It was not certain even that they had officially submitted a counter-offer. The consensus among usually informed sources, however, was that they had at last made their general objectives known to the unions and that these were far short of what the unions wanted.

The soundest report from the conference table was that the networks, whatever their counter-offer might be, had made plain that although they were willing to talk about higher re-run or residual payments, they would fight to eliminate the proposed new unit system.

There also were indications that, as of last week, the two sides were nowhere near agreement on this question. They reportedly decided Thursday that they would let this issue rest for a while and turn first to the question of pay scales for local announcers. Negotiations on the national level resume Nov. 9.

One Slight Hope • Some sources, including advertisers, speculated that the eventual settlement might be "something on the order of a cost-of-living" raise for talent. This talk mentioned 10, 15 or 20% as indicative of the maximum increase that the network-agency-producer group might ultimately agree to give. But this speculation was entirely unofficial and came not from participants but from sources who readily acknowledged that it might not represent the negotiators' viewpoint.

Union sources acknowledged that the terms they had proposed would hike talent costs as much as 500% in at least some cases. Given a hypothetical spot campaign using four actors in a commercial to be shown in the nation's top 15 markets for a 13-week cycle, they said the talent cost would rise from $1,620 under the existing contract to $6,392 under the unions' terms.

From the other side came "examples" of even greater increases, comparing

---

**The history of the movement to residuals**

**AT FIRST A MINOR PROBLEM; NOW A TROUBLE SPOT**

The ordinary meaning of the word "residual" is "left-over." But today the connotation of hand-me-down would be challenged sharply by broadcast management that is locked in negotiations with the American Federation of Television & Radio Artists and the Screen Actors Guild over a new contract (see story beginning page 29).

Among actors, writers, musicians and directors, residual is a beloved word. It means millions of dollars in their pockets. The broadcasting industry, reluctantly at first, has accepted the concept but has resisted its expansion.

In broadcasting terms, residual means that a craftsman is paid not only for the original broadcast or telecast in which he participated, but also for the subsequent replay of the presentation or the commercial.

**Man vs. Machine** • The concept of the residual arose with the advent of mechanization in entertainment—phonograph records, electrical transcriptions, sound tape, video tape, film and kinescopes. The performer and talent unions were prompted to devise an approach that would enable them to cope, at least to some degree, with the so-called "technological unemployment."

In the early 1900's many performers became displeased with the use of recordings of their voices for which they were not reimbursed. The stars of that period, starting about 1910, insisted upon and, in many instances, received royalties, based on the sale of records. The singer, Alma Gluck, is reported to have earned about $200,000 a year between 1910 and 1920 from the sale of records alone.

The union that has railed perhaps the longest and loudest against "mechanical monsters," the American Federation of Musicians, appears to have been the first broadcast union to insist upon residuals. AFM officials last week recalled that as early as 1932, in their radio network contracts, there were provisions for rebroadcasts of radio programs, with initial pacts calling for 100% of the original fee, later scaled down to about 75%. A former official of the American Federation of Radio Artists (now AFTRA) remembers that the first radio network code in 1937 stipulated re-use fees and this arrangement was extended several years later to the early-day radio transcription companies.

Another version of the residual concept was also invented by the AFM: the collection of royalties from the recording and electrical transcription industries for distribution to unemployed musicians performing at free concerts. This approach was resisted fiercely by the record companies in the 1930's and early 1940's. The AFM's position was (and still is) that records played on radio and on jukeboxes put musicians out of work and that therefore some assistance to musicians was an obligation of the recording companies. A year-long strike started in 1942, but the record companies fell into line, and by 1944 the major manufacturers had agreed to the AFM approach. Later, producers who made films for tv and radio and tv jingles were included in the arrangement. The Music Performance Trust Funds, the organization that receives and disburses the royalties, reports that as of last June almost $41 million had been contributed, of which more than $7 million came from broadcasting sources.

**Film Precedent** • The big break-through in residuals is traceable to the growth of film on television, particularly programs and commercials made specifically for the medium. The Screen Actors Guild was in the forefront of the battle to adopt this principle and, in fact, waged two strikes—one against producers of filmed commercials in late 1952 and another against producers of tv film entertainment. The latter had devolved to set out from under a provision that had granted actors run rights in a five-year contract that expired in the summer of 1955.

SAG's gains in filmed commercials and programs led to similar
the unions' proposals with the existing contracts.

Cost Projections • A spot commercial using two on-camera performers and placed in about 155 markets, for instance, was said to involve a talent cost of $520 for each 13-week period now, whereas the proposed contract would hike this to $7,500 plus 5% for the union pension and welfare fund, making a total of $7,895—a 1,400% increase—for each 13-week period of use.

The talent cost for a commercial using two off-camera performers, one off-camera performer and five singers would rise from $940 (for 140 cities) to $11,143 including 5% for the pension and according to another example from users of commercials.

Another advertiser who said he had been paying between $70,000 and $80,000 a year in residuals to talent estimated that for the same campaign under the proposed contract he would pay $350,000 to $400,000.

Here are other examples, said to represent actual campaigns now on the air.

• A brand using spot tv only, employing four commercials in the course of a year, now pays $12,480 for talent but under the proposed terms would pay $141,620.

• Another brand, sponsoring three commercials in network shows each week, now pays $32,000 a year for commercial talent, but in the future would pay $55,692. Talent cost on spot tv commercials used to fill gaps in his network coverage would rise from $19,440 a year to $220,543.

• Another brand now pays $54,000 a year for talent in five network commercials a week and $16,000 for talent in spot commercials; under the proposed contract he would pay $92,820 on the same network commercials and $171,000 on the same tv spot messages.

The Unit System • Management spokesmen reportedly are voicing their strongest objection to AFTRA's proposal for a new approach to a formula in the spot commercial area and local tv programs.

This is called the unit system and attempts to arrive at the cost of talent fees on the basis of the population of the city in which the spot or program is being carried. An AFTRA official said: "It is like a station's time card. An advertiser pays more for time on a station in Cleveland than he does in Des Moines. He should pay talent more, too, when a commercial in which he is appearing is carried in a larger city."

This is a revolutionary departure from the formula in the current AFTRA and SAG pacts. Under those contracts, all cities except New York, Los Angeles and Chicago are weighted evenly. For instance, an advertiser would pay no more for a spot campaign in the 15 markets below the top three than for one in 15 other markets of a smaller size.

Under the proposed system, cities are given a certain unit, depending on their size. They range from 21 units in New York to 13 in Los Angeles, 12 in Chicago, 7 in Detroit, 5 in Pittsburgh, and down to one unit for a city under 500,000 population. To this unit a rate of $15.60 is applied. A spot campaign in five markets totaling 20 units would result in a fee to on-camera performers of $312 each for a 13-week cycle (the figure is computed by multiplying 20 by $15.60).

A similar formula is proposed by the union in the area of local tv programs, with $17.50 as the basic yardstick.

Management's obvious objection to the unit system is that spot campaigns in larger markets (outside of the top three) would rise tremendously, while no saving would be effected in smaller markets.

Double Barrel • This is the first time that AFTRA and the Screen Actors Guild have negotiated at the same table, and is the outgrowth of a policy agreed upon by the two performers' unions last summer. Their joint negotiation in television will be in the areas of commercials and local programs but does not extend to network programs, which is AFTRA's domain alone.

In radio, AFTRA is reported to have sought increases only in the area of sports announcers.

Participants in the negotiations for management include the three tv networks, the four radio networks, the Film Producers Assn. of New York and independent producers. The American Assn. of Advertising Agencies has official observers at all sessions. Member advertising agencies sign letters of adherence to contracts. An unofficial observer of the Assn. of National Advertisers also has attended the negotiating meetings.
A SPONSOR TAKES CONTROL
General Mills to back production of film series; Plan follows BBDO's like venture for Rexall

General Mills will finance the development of a film series, *Father of The Bride*, as an entry for the 1961-62 season. As explained last week by George Polk, BBDO's vice president in charge of programming, General Mills intends to make an estimated $75,000 initial investment.

The General Mills move follows earlier reports of advertising agencies and their clients giving consideration to future advertiser-financing of tv film series (CLOSED CIRCUIT, Oct. 24).

Adviser agitation on this front is significant in that financing is an obvious key to profit share arrangements and subsequent "controls" on a show. The trend in the past few seasons in tv film properties has been more toward network participation in profits through the avenue of financing pilot films (BROADCASTING, May 16).

Past Experience = BBDO is depicted as having been encouraged to pursue advertiser-financing of filmed series as a result of its experience with *National Velvet* now on NBC-TV Sunday, 8-8:30 p.m. Rexall Drug, a BBDO client, financed the pilot that was created and filmed at MGM-TV and then joined with General Mills in alternate week sponsorship.

*Father of the Bride* also will be created by MGM-TV. Robert Maxwell will be executive producer. Writers are the husband-wife team of Katherine and Dale Eunson, who worked on "GE Theatre, Rifleman, Leave It to Beaver, Ford Theatre and others, and wrote the pilots for Band of Gold and Angel. Leon Ames has been cast as the father.

In announcing the arrangement, Mr. Polk offered four arguments for advertiser-financing:

1. Only a handful of the 200 or more pilots made each year can be considered "plums," but with General Mill's financing a property "we would hope thereby to preempt one of the 'plums.'"

2. Such financing makes for "more intelligent and less chaotic" show buying, avoiding the "snap decision when pilots are thrown into the market." Instead, Mr. Polk asserted, "the advertiser becomes completely familiar with the background and all the elements of the property with which it will be involved."

3. The advertiser "figures much more strongly" in program control if "he has financed the creation of the series." Mr. Polk said this was a particularly important factor for an advertiser such as General Mills "where good taste is essential."

4. Advance planning gives the advertiser more flexibility in the choice of a co-sponsor, should he wish one, and in finding the best network time period for the show.

Mr. Polk said the agency's "creative unit" worked closely with Mr. Maxwell's production group at MGM-TV in preparing a presentation on the series to General Mills. The presentation included a statement on the premise of the series, a "writer's manual" to guide authors whose scripts will supplement those supplied by Mr. and Mrs. Eunson, "one-line story lines" for the first 26 installments, scenes from five other episodes, and a pilot script for episode No. 11 entitled "The Wedding."

*Father of the Bride* has a history of its own. It originally was a novel by Edward Streeter and a motion picture produced by Metro-Goldwyn-Mayer in 1950. About four years ago, General Foods had a working financial agreement (via Benton & Bowles) for a tv pilot. This initial pilot produced was unacceptable to Benton & Bowles and eventually (in the spring of 1959) the venture was dropped.

Dentyne switches agencies

Dentyne Chewing Gum, a $2 million tv account, has been switched from Dancer-Fitzgerald-Sample Inc. to join other American Chicle Co. products at Ted Bates & Co., New York. Ranked 40th among tv advertisers in 1959, according to LNA-BAR figures released by Television Bureau of Advertising, American Chicle's gross billing in tv totaled $2,496,540 in spot and $3,331,580 in network. Dentyne's share was $1,010,720 in spot and $1,152,961 in network. "Basic disagreement over marketing and advertising policies" was given as the reason for the Dentyne switch. The Bates agency also handles Rolaid, Clorets, Certs, Chiclets and Beeman's chewing gum.

Bulova to use television to introduce new watch

Long-time broadcast advertiser Bulova Watch Co. has a new timepiece product headed toward the tv medium. Described by its creators as a "micro-sonic timepiece, " Bulova last week unveiled 12 models of a transistorized electronic watch called "Accutron"—a name coined from the words accuracy and electronics. Although no advertising figures or media plans have been announced, tv will share in Accutron's pre-Christmas ad budget which is to be "more than all of our competitors combined will be spending on their established conventional products," said R. Harvey Whidden, Bulova's executive vice president of marketing, in a closed-circuit presentation beamed from New York to 13 major cities last Tuesday (Oct. 25). Accutron will have distribution in 32 markets by Christmas, with prices of the wrist models ranging from $175 to $395. McCann-Erickson Inc., New York, is the agency.

The development of the Accutron, which runs from a year to 18 months on a tiny, inexpensive ($1.50) power cell, will lead to advances in miniature timing devices for space age communications, Bulova said.

Joe E. Brown sells 'goof-proof' pens on tv

Paper Mate Co. has hired comic Joe E. Brown to promote its "goof-proof" gift pens in network and spot tv campaigns during the pre-Christmas season.

The commercials emphasize that Paper Mate pens can be selected as gifts without error in "size, color and practicality." They will appear in 20-40 key spot markets from Nov. 15 to Christmas, as well as on six network programs. The spot drive will run about two weeks. Agency: Foote, Cone & Belding, Chicago.

Paper Mate is also utilizing singer Nellie Lutcher and a jazz trio on a radio jingle backing a "big deal" price cut offer for its Capri Mark III pens. The jingle, based on her 1947 recording of "Hurry on Down," made its debut on the World Series broadcasts and is now being used on network radio.
75% of Iowa’s retail sales are made in areas covered by 50,000 watt WHO RADIO!

Des Moines is the heart of Iowa. It is the state’s largest city. But its Metropolitan Area accounts for only about 9% of Iowa’s retail sales.

In addition to Des Moines, there are seven other important metropolitan areas in the state. Together, these eight metropolitan areas account for approximately 38% of Iowa’s consumer spendable income.

This means approximately 62% of Iowa’s retail sales are made outside of any metropolitan area.

WHO Radio serves more than 800,000 radio homes in 96 of Iowa’s 99 counties (plus a number of counties in neighboring states). 75% of all retail spending in Iowa is done in the areas you reach with WHO Radio. This remarkable area is WHO’s “Iowa PLUS” . . . America’s 14th largest radio market!

WHO Radio is alert, alive, aggressive! It belongs on any list designed to cover as much as the 14 largest radio markets. Ask PGW for all the supporting data. (Source: SRDS—Oct. 1, 1960)

Focus on Hazel Bishop's tv advertising

IT'S PART OF SEC STOCK REGISTRATION CHARGES

Hazel Bishop Inc., New York cosmetic merchandising and distributing company, which in 1958 launched what was up to then the biggest tv spot campaign in history (BROADCASTING, Sept. 1, 1958), was slated last week for a hearing on the adequacy and accuracy of its registration statement by the Securities & Exchange Commission. From the SEC charges it is expected that its tv spot expenditures and the company's dealings with Television Industries Inc. (formerly C&C Television Corp.) will be brought to bear in the hearing. Television Industries' president is entrepreneur Matthew M. Fox, no stranger to SEC proceedings, who at one time held controlling interest in Hazel Bishop (BROADCASTING, May 19, 1958).

The commission's complaint against HB charges among other things that the registration statement is false and misleading: (1) for including among shares being registered some which had already been sold to the public in violation of the Securities Act for which the company may be liable to any buyers for any losses incurred (2) for the expenditures for advertising (mainly $1,110,619 in tv spot time acquired from Mr. Fox' company) should have been charged as an expense against the $102,258 net profit HB reported for fiscal 1959; (3) failure to disclose the identities of persons who own shares included in the statement, the number of shares held by each and the facts concerning their acquisition.

In 1958 Matthew Fox made an agreement with Raymond Spector, then board chairman of Hazel Bishop, to purchase 542,553 shares of the company's common stock (slightly over 50% of all shares outstanding) and all HB's outstanding 6% convertible debentures for about $3.8 million. In a separate deal, the company agreed to purchase over $1 million worth of tv spot time from Mr. Fox' company. At that time he stated the improved advertising expenditure ratio would "provide for substantial growth" for the company. Mr. Fox had acquired the spot time by bartering his library of RKO feature films to tv stations in exchange for the time.

During fiscal 1959, Hazel Bishop paid $100,000 on account for the time. When sales did not justify the expenditure, and company profits did not soar, a new management arrangement was undertaken in which 350,000 shares of common stock and options to buy additional stock were sold to a group of investors for approximately $1.4 million. In connection with this transaction, Hazel Bishop was released from payment of its obligation to Mr. Fox' company for the $1,110,619 in spot tv time. The statement says the company did not make any payment or give any consideration for the release. Mr. Fox' company returned the shares he had bought from Mr. Spector and was reimbursed for all payments it had made. When Hazel Bishop was released from its obligation to Mr. Fox' Television Industries, it gave that company 150,000 shares of common stock.

The SEC proceedings will determine whether a stop order should be issued voiding the effectiveness of the registration statement. The hearing does not halt trading of Hazel Bishop stock, which is listed on the American Stock Exchange. The hearing has been set for Nov. 1.

Station-break practices criticized by Matthews

William E. Matthews, vice president and director of media, Young & Rubicam, last week called for a revision of commercial periods between programs to avoid "a profusion of advertising presented by the viewers and disruptive of good programming." He spoke to the Texas Assn. of Broadcast Executives meeting in Dallas Oct. 26.

Mr. Matthews for some time has been associated with a position that additional time between programs (at station breaks) would permit advertisers time to get across their messages while counteracting charges of "over-commercialization" made against broadcasters. "Meeting the advertising demands . . . in television or providing enough announcement units to secure a profitable revenue base," he said, "invades the ingenuity of station owners beyond the restraints of conscience," he explained.

FCC rulings and industry codes governing the number of commercials in a broadcast segment are "evaded all too frequently," he charged, noting that "triple spotting at station breaks has become quadruple, and with closing and opening commercials a sequence of five or six announcements are fired at the audience without explanation or apology." He asked for a study of lengths and location of station breaks, finding the 10 and 20-second commercial proximity as confusing competition for attention and destroying the effect of advertising and programming.

Ayer president suggests 'truth' audit for print

The Audit Bureau of Circulations ought to consider auditing "truth" as well as newspaper and magazine circulations, the president of N. W. Ayer & Son, Philadelphia, has suggested. "Truth in the written and spoken word is the heart and soul of advertising," Warner Shelly told the Audit Bureau of Circulations meeting Oct. 20 in New York. The A.B.C. has "established methods for giving us assurance of truth," the agency president said, and "one of our industry's greatest needs today is for assurance of truth in advertising messages."

An A.B.C. spokesman said later there was little chance the bureau would go beyond its circulation auditing function, but that it could serve as a model for a truth-auditing organization.

AS FAST AS IT'S FACT...

It took weeks to find a time when this busy crew could be assembled for this picture. Shown are the eight men, the two news cars, and the remote truck—all in the news department of WHIO and WHIO-TV.

**Four and one-half hours of news** is the daily average of WHIO and WHIO-TV as these stations meet their obligations to keep listeners and viewers fully and factually informed about local, national, international, and space news. Shown are the men and equipment used daily—the men, highly trained and experienced—the equipment, the most modern obtainable. Together, they have accustomed the big Dayton market (3rd in Ohio) to tune to WHIO when they want to hear the news, and to turn to WHIO-TV when they want to see the news. All the news—skillfully, truthfully, and objectively reported.

For further news about these stations, and their stature in the rich market they cover—ask George P. Hollingbery.

Aloft at traffic-heavy morning and evening hours, the WHIO AIR SCOUT, manned by an off-duty police traffic sergeant, keeps motorists informed, and expedites the flow of traffic at these vital times.

Business briefly...

Montgomery Ward & Co., Chicago, has completed shooting 45-second live-action spot commercials at Fred A. Niles Productions, that city for placement in TV markets sometime next spring. The spots will be used initially at boat and motor shows during December and January, promoting Ward's Sea King boats and motors. Later, store managers throughout the country will buy time on local stations for the films, providing for 15-second local inserts. Business will be placed direct by dealers.

Revlon Inc., N.Y., will sponsor NBC-TV's two-hour colorcast of Peter Pan, starring Mary Martin, on Dec. 8 (Thur. 7:30-9:30 p.m. EST). The James M. Barrie classic was previously telecast by NBC-TV in 1955 and 1956. Most of Miss Martin's original Peter Pan company will be re-assembled for the third viewing, which will be taped. Cyril Ritchard stars as Captain Hook in the Richard Halliday-Edwin Lester production. Agency: Grey Adv., N.Y.

General Sportcraft Co., Bergenfield, N.J., "Orient" game, plans to enter six markets for pre-Christmas campaigns on radio with live commercials by radio personalities. WOR New York launched the drive Oct. 29. Other markets for "Orient," which is described as a combination of chess, checkers and tick-tack-toe ($4.95), are Chicago, Milwaukee, Los Angeles, San Francisco and Dallas. Orders are being placed by General Sportcraft.

Adam Hats Inc., N.Y., launches a pre-Christmas network television drive tonight (Oct. 31) on the Jack Paar Show over NBC-TV. Commercials, scheduled on a weekly basis were prepared by Mogul, Williams & Saylor, N.Y.

Monarch Wine Co., Brooklyn, N.Y., this week launches an 80-market broadcast campaign with emphasis on the visual. Copy sells product quality and wine sociability. The schedules run until Dec. 23, mostly minutes at a heavy rate, breaking on varying dates up to Nov. 15. All commercials feature a new "mellow-mood" jingle, "time for wine," ending on this year's ad theme, "the pleasure is all wine." Changing this year's emphasis from radio to TV, Manischewitz also is trying another new tack, supporting the broadcast campaign with four-color Sunday supplements in three markets. Agency: Grant Adv., N.Y.

Pabst Brewing Co., Milwaukee, has bought co-sponsorship of the "Triple Crown" series of horse racing events on CBS-TV in 1961. Anticipated dates are May 6 or 13 for the Kentucky Derby, May 20 for the Preakness and June 10 or 17 for the Belmont Stakes. Pabst currently co-sponsors American Football League telecasts on ABC-TV. The account is handled by Kenyon & Eckhardt, Chicago.

American Tobacco Co., N.Y., will sponsor Remember How Great on NBC-TV, Feb. 9, 8:30-9:30 p.m. (EST). The musical-variety revue will feature all-time hit songs, appearances of recording stars and Jack Benny as the host. Agency: BBDO, N.Y.

FSR International formed

International marketing and advertising services of Fuller & Smith & Ross Inc., New York, will be handled through a newly-formed unit of the agency effective Jan. 1, 1961. The formal establishment of FSR International, which will offer expanded services for the agency's clients via 71 affiliated agencies in 58 countries, was announced last week by Robert E. Allen, president of F&S&R. FSR International will be a service division responsible for supervision of and communication with the affiliates.

How tv turns on the heat for furnace sales

Stoking up sales to a new fever reading through use of local television, a dealer in furnaces and appliances in Traverse City, Mich., reports that if his advertising is off tv, even for a couple of weeks, he can see the dip in sales right away.

George LaRoche, sales manager of Harry's Service Center, dealer for Iron Fireman Mfg. Co., Cleveland, has concentrated on tv as the best means to demonstrate the Custom Mark II residential and commercial oil furnace. The center sponsors a half-hour weekly wrestling program on WPBN-TV Traverse City and WTOM-TV Cheboygan, both Michigan. The spots are written and delivered by Harry Domine, owner-operator of the dealership, who demonstrates the cleanliness of the furnace's operation (wiping the surfaces with a white glove which remains spotless), uses detailed charts to explain how the furnace works and then shows how easy it is to operate the furnace. Mr. Domine has had no professional announcing training, but discusses the product's qualities with a straightforward, folksy manner which, judging from the increased sales, must be highly effective.

Harry's Service Center uses other advertising media—print, fairs, home and flower shows and a five-minute newscast on local radio. But the big push for the Mark II is made on tv. Mr. LaRoche says customers from as far as 150 miles from Traverse City have requested further information and that contractors say people are demanding that Mark II furnaces be installed in their homes. Mr. LaRoche gives the credit to tv. Iron Fireman, the Mark II's manufacturer, said it also is much impressed with the accelerated sales in this local dealership.

**ABC TELEVISION**
Station merchandising is a valuable advertising support that frequently figures (and sometimes predominates) in a timebuyer's selection of stations for his client's campaigns. Smaller agencies look for it more often than the bigger ones, and they find it more often in radio than in television. Big or small, they think stations would be smart to put a full-time merchandising specialist on staff.

These views are not unanimously held, but they represent majority opinions in a timebuyer study being released today (Oct. 31) by NBC Spot Sales. The seventh in a continuing series of questionnaire surveys of the "NBC Spot Sales Timebuyer Opinion Panel," the study brought replies from 200 buyers in agencies throughout the U.S. Some 62% of the respondents are with agencies billing more than $1 million a year; 38% are with agencies billing less than that. Here are highlights:

- Three out of four buyers from smaller (under $1 million) agencies said they "always" or "frequently" consider merchandising when picking stations for a spot schedule. Among larger agencies, three out of five buyers do.

- Almost two out of five panelists said that at one time or another they have given merchandising priority over audience in buying radio time. One out of five said they had put merchandising ahead of audience in buying television.

- Almost three out of five thought stations would be justified in asking an advertiser to share the cost of an "exceptional" merchandising campaign. Half that number thought the advertiser should pay nothing.

- In-store displays were by far the merchandising form most favored by the panelists. Runners-up: Trade calls and trade mailings.

- Panelists agreed that radio stations offer "considerably more" merchandising assistance than tv stations do. The majority did not think that merchandising is increasing in television; almost half thought it is increasing in radio.

- Slightly more than half said radio stations do an adequate job of letting agencies know about their merchandising assistance; slightly less than half said television stations keep them adequately informed. The information that agencies do receive is passed along, nine times out of ten, to the agencies clients and/or account executives.

- Almost four out of five thought a station would gain by hiring a full-time merchandising specialist to make trade calls—but two out of five definitely would not want that specialist to contact their clients direct (about half would not object to direct contact).

"Dilemma" - In releasing the study, Richard H. Close, vice president in charge of NBC Spot Sales, called merchandising "a dilemma for both the broadcaster and the buyer." He said: "It is [a dilemma] for the broadcaster because he is in competition for ad-

Some comment from influential buyers

Next to a signed contract, there are few things that radio and television time salesmen like better than to know what influential agency people think about specific station projects and policies. Here is what some key figures in agencies across the country think about merchandising by stations, as quoted by NBC Spot Sales in its survey report on that subject (see story above):

- Paul G. Gumbinner, vp and radio-tv director, L. C. Gumbinner Adv., New York: "When the merchandising help winds up as ordinary, conventional mailings, or omnibus calls designed to sell the station rather than the campaign, it hasn't much value—though it's better than nothing. But even conventional approaches (postcards or bulletins) should be fresh and attractive. . . . Recipients of this merchandising are bombarded with a lot of it, and are impressed only by the outstanding stuff."

- Arthur S. Pardoll, associate media director, Foote, Cone & Belding, New York: "With few exceptions, broadcast merchandising does not involve strong support. Usually it consists of mailings and few calls upon local retail outlets.

- The function of media is to provide a channel of communication for an advertiser at the most reasonable cost and under the most favorable conditions. Many stations are prone to stress merchandising services at the expense of media value."

- Sam B. Vitt, vp and associate media director, Doherty, Clifford, Steers & Shenfield, New York: "It is our opinion that almost all broadcast merchandising support has some desirable effect upon a product's success. It would seem to be in a station's best interest to concentrate its efforts more sharply in the principal areas. The first and most important would be that of merchandising itself to its immediate market. The second area would be in concentrating in activities which advertisers have found to be of greatest value to them. This would mean, for example, more in-store displays as opposed to more jumbo postcards. It would also mean, let me quickly add, more problems for the station unless it was exceptionally careful in its handling of the program.

- Don Heller, timebuyer, N. W. Ayer & Son, Philadelphia: "This type of service falls into the category of a little effort going a long way. I know of specific cases where stations have endeared themselves to an account's advertising manager because they took the time to make personal dealer and/or broker contacts and reported their efforts. Certainly this costs very little in terms of out-of-pocket expense but it lets the client know that local media are really concerned with his advertising efforts. Some stations adopt the smug attitude that they are selling advertising and being paid only to deliver audience. This makes as much sense to me as an advertising agency insisting that it will only prepare an account's creative work and place the business."

- Jeremy D. Sprague, media supervisor, Cunningham & Walsh, New York: "The most effective merchandising is that which relates the consumer to the dealer. Next in value is that which convinces the dealer that he is getting strong advertising support. Much of what is called merchandising is merely station promotion in disguise. Although this can help build audiences for programs, it is of little help in a spot buy."

- David J. McDonald, account executive, Erwin Wasey, Ruthrauff & Ryan, San Francisco: "I do not believe that any advertising medium
vertising dollars with other media, all of whom use merchandising as one weapon to help create sales for advertisers. And merchandising, properly executed, can certainly help in this respect. The dilemma arises, I believe, in determining how much merchandising support a station can provide and still make a reasonable profit. On the other hand, the buyer is caught in a dilemma because he must equate merchandising support with advertising value—and these two factors change with each of his clients.

Mr. Close expressed hope that the study "will help both buyer and seller to better understand the problems common to both groups." He cautioned against construing the results as representative of the opinions of everybody engaged in buying time, but said they "do offer an interesting reflection of current opinions among a very important and articulate section of the time-buying fraternity."

**Opinions in Conflict**  •  Individually, panelists offered widely divergent views of station merchandising: It is helpful, it is not necessarily helpful, it is a form of rate cutting, it is useless to the station, it is more useful to the station than to the advertiser—and so on (see separate story across spread below).

Although smaller agencies showed greater interest in merchandising that larger ones, more merchandising success stories came from large-agency panelists (67%) than from small (60%). Some buyers reported product sales gains up to 30% with merchandising support. The importance of merchandising in terms of its impression on dealers and customers, also was noted.

The NBC report concluded that merchandising is "a far greater factor in radio than in television," judging from answers to the following question: 'In order to increase distribution (or for any reason) have you ever bought on the basis of merchandising first, audience second?" The answers:

*In this table and tables below "Big Agencies" are those billing more than $1 million and year and "Small Agencies" are those billing less.

—**Paul E. Morgan,** vp and general manager, Campbell-Mithun, Los Angeles: "We know from experience that the best merchandising assistance is obtained from a three-way meeting of client, station and agency in which the client explains his goals and problems in the market. It never fails that the station will create merchandising solutions, or tell us that they haven't the answer."

**Aubrey Williams,** president, Aubrey Williams Adv., New Orleans: "Just as agencies are doing more and more merchandising, stations will be forced into more and more of it. As a matter of fact, in markets where stations can trade spots for preferred display positions (and there are many such markets) I believe you'll find the stations in favor of merchandising. After all, it gets their call letters in front of extra thousands just as it gets the client's product there. The stations may even benefit more than the advertiser because just about everybody sees their displays, whereas not everybody buys the product displayed."

**Hilly Sandes,** vp, Honig-Cooper & Harrington, Los Angeles: "A well-planned merchandising program can mean additional business for the client which, in major markets, can sometimes assume carload proportions. In addition it may, under certain conditions, afford entrée to retailers which would not normally exist."

**E. Clay Scofield,** vp, Liller, Neal & Battle, Atlanta: "... Too many stations promise the moon and deliver only a small piece of cheese. We buy advertising on the ground of coverage, penetration and influence of the medium in the market. Merchandising is a plus. If stations are not going to follow through, they should not offer the extra merchandising in the first place. In most cases it would not affect our decision to buy."

**Larry Hoge,** media director, Doremus & Co., San Francisco: "Biggest problem is that merchandising is becoming a real expense to radio stations. Station managers, reps or such do not bring up merchandising in pitches; but later the timebuyer is in trouble if he finds a competitor was given a merchandising budget—especially if the competitor had a smaller budget. Stations could use a full-time merchandising man primarily for new ideas, investigating better ways to merchandise. Too much of it is done without thinking—sort of a 'me too' approach, or 'whatever the other station comes up with, we'll come up with the same."

---

**Costs**  •  Not many panelists thought advertisers should be asked to pay the full cost of station merchandising, but more than half thought the cost might be shared by the advertiser for "exceptional and costly" services:

**Radio vs. Tv**  •  Two-thirds of the panelists in both agency size groups agreed that radio stations offer considerably more merchandising aid than television stations—probably, the report pointed out, because there are many more radio stations in each market and thus much more competition in radio. NBC cited this comment by Edward Papasian, radio-tv media director of Gray & Rogers, Philadelphia, as expressing the panel's feeling on the relative merits of radio and television merchandising:

"On the whole, radio does a good job of merchandising. Also, I believe that radio stations are right in asking for contracts of 13 weeks or more in order to give the merchandising a chance to
Routing Reports • When stations do submit merchandising reports, at least nine times out of ten the reports reach the people that the stations presumably want to impress: 91% of the buyers said they turn the reports over to clients; 98% pass them on to account executives.

Minimum Requirements • Seven out of ten buyers reported that stations—both radio and tv—do make it clear to them “what the minimum expenditure or requirements are before they will offer merchandising support.” One out of four said stations do not. “This,” the report observed, “certainly is an area which can cause much grief for both buyer and seller.” The answers varied as between large and small agencies, as shown in the following table:

Staff Specialist • Despite divergent views on the benefits of merchandising generally, as revealed in individual comments, buyers voted heavily in favor of stations having merchandising specialists on staff. Almost eight out of ten (78%) checked “yes” to a question asking whether they would recommend that stations employ a full-time merchandising man (contacting brokers, distributors, dealers).” When asked whether they would “object if he [stational specialist] contacted your client with regard to a schedule,” only about five out of ten (55%) said they would not object. Four out of four (43%) definitely would object.

AT&T engineers foresee new instant rating plan

Instant ratings using existing telephone wires and the Bell System Data-Phone are a possibility envisioned by AT&T engineers as horizons of the data transmission system expand. The idea was mentioned by Robert F. Landry, assistant vice president of AT&T, at a conference announcing Data-Phone installation by the Hardware Mutual-Sentry Life insurance group in New York last week.

Equipment for Data-Phone rating doesn’t exist. It would require an adaptation of the device that transmits machine “talk” to telephone lines. The Data-Phone adaptation would be a meter attached to television or radio receivers in the home.

Since its introduction two years ago Data-Phone has been adapted to needs of several hundred different customers, Mr. Landry said, including airline traffic bookkeeping and “teleticketing,” bank branch reports and central computer service for factories. For the future, Mr. Landry sees, besides automatic ratings, possibilities of Data-Phone shopping, paying, billing, utility metering, alarm systems and other “blue-sky” possibilities offered by Bell in an effort to anticipate needs of industry and consumers.

The instantaneous systems employed in a few markets now by American Research Bureau and A. C. Nielsen Co. require special wiring in addition to the set meters and receiving machines.

AN ‘ADVERTISING YEAR’

AFA-AAW map plans for public relations push

They don’t have a name yet for “advertising year,” but there is a theme: “Advertising is a Growth Ingredient.” This will be central to what is shaping up as a major public relations project by the Advertising Federation of America and the Advertising Assn. of the West.

The slogan was picked last week by the AFA-AAW Advertising Week committee from recommendations by McCann-Erickson, task-force agency for both “week” and “year.” The symbol will be three arrows racing in a circle, labeled Advertising, Mass Demand and Mass Production.

In a separate announcement earlier in the week, the AFA said the annual mid-winter Washington conference would take a “bold, positive approach” to answer critics of advertising. Thus the Feb. 1 conference fits into the larger public relations picture as the opening of a one-two-three attack. Advertising Week follows Feb. 5-11 and the “year” then is inaugurated to drive the point home.

Arthur C. Fatt, president of Grey Advertising and chairman of the Washington conference, said the program would cover these areas:

- What are we up against? A study of the attackers of advertising and an analysis of why they are attacking.
- Advertising’s contributions to our society. The committee has suggested these subjects: “Is private initiative at war with public welfare? “The pace makers—America’s great new middle class.” “Needed—closer rapport between government and business”; “The American philosophy of growth,” and “How abundance promotes culture.”
- A call to action. Specific examples by AFA and other groups and a comprehensive new plan.

AFA President C. James Proud, commenting on the third Capital conference, referred to a subject high on

the adman's worry list when he said, "Never has it been more important to stress America's priceless opportunity for freedom of choice, a freedom which is epitomized by advertising itself. To tax or restrict such an indispensable tool as advertising would be sheer insanity on the part of our government officials—whichever party is in power after November—and the federation's mid-winter conference will leave no doubt in governmental minds as to where advertising stands on this issue."

What-You-Call-It • The Ad Week committee expects to have a name for its year-long effort by the end of this week. Meanwhile copy is being developed around the "growth" motif and exploitation is being worked out. In their determination to put the message over, planners are thinking of passing the hat around the trade in order to provide all copy materials free to media, who herebefore have had to defray production costs themselves in addition to giving time and space for Ad Week messages.

The continuing project will be aimed at schools, labor, business, general-consumer and all the "publics," including foreign-languages publics. The AFA-AAW will make use of all p.r. techniques.

Emerson Foote, president of McCann-Erickson Adv. (USA), is national plans chairman and George W. Head, advertising manager of National Cash Register Co., chairman of the Advertising Week committee. Author of the Slogan, "Advertising is a Growth Ingredient," is Alton H. Ketchum, McCann-Erickson vice president, who was active in the "Confidence in a Growing America" campaign for the Advertising Council with McCann and Grey Adv. as volunteer agencies.

Wade-Kastor merge; to bill $27 million

Broadcast-oriented Wade Adv. will combine shop with H. W. Kastor & Son in Chicago effective Dec. 1, boosting its overall billings to nearly $27 million.

Part or all of Kastor's accounts (International Milling Co., Campana Sales, Fannie May Candy, others) are expected to shift to Wade, along with about 26 employees. Wade currently handles Miles Labs, Toni's Deep Magic, Dot Records, Unexcelled Chemical Corp., Zurich-American Insurance, Mohawk Petroleum and other products. Kastor has been billing approximately $3 million.

As part of the consolidation, Marvin Harms, Kastor president, joins Wade as senior vp. Other shifts from Kastor include John T. Urice as vp, Ashley Belbin as vp and creative director, and James West, W. O. Yocum and Dean Snow as vps. Mr. West has been vp and radio-tv director at Kastor.

Advertising credited for Rambler success

An American Motors Corp. spokesman last week gave credit to advertising for its major role in raising the Rambler compact car to third place in new car sales—from 104,000 units sold to 1957 to 435,000 sales in 1960—and added that "the Rambler firm is spending a record amount in all media in 1961."

Rambler has also moved up from 21st place in 1958 to third place in 1960 in the rankings of all types of product names advertised in newspapers, Fred W. Adams, automotive sales manager of AMC, said at the second annual National Newspaper Advertising Seminar in New York Thursday (Oct. 27). "But we have not overlooked the importance of all media," Mr. Adams said, referring to American Motors' heavy use of magazines, network radio and television. He pointed out, for example, American Motors now is marking its fifth anniversary as a sponsor of NBC Radio's Monitor newscasts each weekend, and said that spot TV commercials are running on 125 stations in leading markets.

The seminar on newspaper advertising is held by the American Newspaper Publishers Assoc. in conjunction with the Assn. of National Advertisers and the American Assn. of Advertising Agencies.

Top 25 spent more on advertising in 1959
BUT THERE WAS DECLINE IN RATIO TO TOTAL REVENUE

Though the 25 top advertisers among companies listed on the New York Stock Exchange spent more to advertise in 1959 than in 1958, the relationship of ad outlays to total sales or revenues for the 25 firms shows a decline.

An analysis released last week by the stock exchange's official magazine found the budgets represented a smaller proportion of total sales or revenues than in the previous year (2.8% in 1959 against 2.9% in 1958). The ratio of advertising spending to net income was smaller for the 25 companies, 33.2% in 1959 compared to 40.2% the year before; to common dividend payments, the figures were 55.7% in 1959 and 56.3% in 1958.

In the aggregate, the 25 largest advertisers listed on the exchange boosted their national advertising budget by nearly 10%: from $1,216 million in 1958 to last year's $1,332 million.

Kellogg Co., which increased its national advertising budget nearly 23%, showed this increased proportion of sales or revenues spent on national advertising: 10.9% in 1958 to 12.2%. Bristol-Myers Co. also had a near 23% increase in advertising, its proportion of sales or revenues spent on national advertising showing a slight increase, from 27.2% in 1958 to 28.9% in 1959.

Procter & Gamble, television's No. 1 advertiser, spent 12.7% more in advertising. Its proportion of sales or revenues to national advertising remained equal, 8.5% in each year, but its ratio of national advertising spending to net income declined from 141.9% in 1958 to 125.4% in 1959.

Smallest "proportion" percentage was recorded by American Telephone & Telegraph (14.6% increase in advertising budget): a 0.4% proportion of sales or revenues to advertising in both years, and 2.5% ratio of ad spending to net income in both years.

The exchange's analysis was based on estimated total expenditures for national advertising in 1959 prepared and printed in Advertising Age. The study found Bristol-Myers to have the highest proportion of sales or revenues spent on national advertising. In the ratio of advertising spending to net income, E. I. duPont de Nemours, which increased 10.7% in its ad budgeting, had the highest percentage (418.7). DuPont, however, showed a 1.6% proportion of sales or revenues spent on national advertising in both years. Top advertiser General Motors (12.7% increase) had a 1.4% proportion of sales-revenues spent on national advertising with a ratio decrease from 21.7% in 1958 to 17.8% in 1959.

Also in advertising...

New ad agency • New Los Angeles advertising agency, Guerin, Johnstone, Gage Inc., has been formed by a merger of two former L.A. agencies—Gage/Booth & West and Guerin, Johnstone, Jeffries Inc. Paul Guerin is president of the new agency; Raymond B. Gage is vice president and Jack Johnstone is secretary and treasurer. The staff comprises all members of both prior agencies. Its headquarters are at 1900 Beverly Blvd., L.A., 57. Telephone is Dunkirk 7-5451.

Merger planned • The Condon Co., Tacoma, Wash., advertising agency, has announced it will become a division of Cole & Weber Inc., Portland, Seattle, Tacoma, effective Feb. 1, 1961. Until that time it will continue to service clients from headquarters in the Perkins Bldg. On the effective date of the merger, the combined organization will occupy enlarged offices in that building.

Combined forces • Hunter & Staples, Sacramento advertising agency, and Kae/Alger Adv., L. A., have joined in a reciprocal agreement where each agency will service the other's accounts in its respective region. Agency principals emphasized that each agency will remain autonomous with no change in personnel or policy.

700 volumes • The Advertising Federation of America-Advertising Club of New York Reference Library, located in AFA's new offices at 655 Madison Ave., N. Y., was dedicated Oct. 21. The library of more than 700 books on advertising and marketing will be maintained by the AFA's Bureau of Education and Research, with Miss Mae Keenan, assistant director of the bureau, as librarian.

JWT's 37th • J. Walter Thompson's 37th office outside the continental U. S. has been opened in Vienna. Manager is Jens von Leutzhendorf. Address is J. Walter Thompson, G. m. b. H., Niederlassung fur Osterreich, Borse, Wien 1, Austria.

Affiliation agreement • Brown & Rowland, N. Y., has signed an agreement with Parker Adv. & Public Relations Inc., Saginaw, Mich., under which the Michigan firm will be midwestern representative for the New York public relations agency. Parker personnel will work as liaison and handle regional publicity in Michigan and Ohio for B&R's national accounts.

On the move • Dunwoodie Assoc., N. Y., has moved to larger quarters at 292 Madison Ave., Suite 1202, according to Sy Richman, company vice president. New telephone is Oregon 9-2488.

Direct mail award • A direct mail advertising piece, reporting the results of a survey conducted for WRVA Richmond, Va., won a first-place award in the National Direct Mail Advertising Assn.'s contest for Richard Kline Co., that city. The piece featured blue chips and a poker motif and was sent to 1,000 agencies and national advertisers.

Parker Pen drops Tatham-Laird

Parker Pen Co., Janesville, Wis., has announced withdrawal of its $3 million account from Tatham-Laird, Chicago, effective Feb. 28, 1961, after five years. Separation was attributed by the company to "basic differences in philosophy."

Is beer overtaking the martini?

A beer advertiser and its agency doused the widely-held conception that admen are known by the martinis they consume. There's evidence now to prove otherwise. Beer drinking has topped a goodly share of the ad fraternity, according to a survey released by The Wexton Co., New York, in behalf of its Carlsberg beer account.

More than 45% of the admen answering the Carlsberg survey, covering presidents of over 50 top ad agencies and executives of some 200 U.S. agencies, "regularly drink beer with lunch." Better than 50% reported drinking beer with dinner, it goes on. Over one-fourth of the lunchtime beer drinkers consume the beverage three or more times weekly. There's hardly an hour of the day or any occasion when at least a few admen don't hoist the hops.

Cooking with beer is practiced by 16% of the admen or their wives (among the suggestions was "shrimp boiled in beer instead of water and add spices to suit"). A hefty 93% drink beer "sometimes" alone or in company, which ranks admen with the Master Quaffers throughout history, Wexton claims.

Physical exertion also results in heavier beer consumption, with a substantial 62% having a beer after an hour of their favorite sport—to which Wexton added a discreet "no comment."
"GOPHERS"
TIE IT UP!

WTCN-TV is rolling in "gopherland." Powering ahead. Gaining in the national rankings. Perhaps nothing points this up so eloquently as the recent RTNDA national award—shared equally by WTCN-TV with a local station that has been quite alone on its throne for years.

The odds are changing. Much of the smart money is going on the WTCN-TV "gophers" to win. Why? New team, new strategy, new impact in the Twin Cities market.

It's time to re-assess the relative strengths. Make sure you've got a winner in the important Twin Cities market. Get your money down on WTCN-TV while the odds are still in your favor.

Your Katz man will be glad to book you.

AND RADIO

ABC STATIONS FOR MINNEAPOLIS • ST. PAUL
Represented Nationally by the KATZ Agency
NBC Radio's case for the older listener

Advertisers' biggest band of prospects, with the most money to spend, is not the much-heralded "young household" group but the 35-to-49 age group. This contention—which runs counter to a favorite argument of ABC-TV—is the theme of a new sales presentation unveiled last Thursday (Oct. 27) by NBC Radio. The presentation contends not only that people in the 35-to-49 bracket are the "key group" for the purchase of "most products," but that NBC Radio is the way to reach them.

The presentation uses A. C. Nielsen Co. figures to show that with 60 million members the 35-49 age group is 50% larger than any other and is represented in 14,390,000 homes with $103.6 billion to spend each year, as against 8,753,000 homes with $52.5 billion for the 16-34 or so-called young-household group and 10,038,000 homes with $77.3 billion for the "working housewife" group. The fourth category, aged 50 and over, is represented in 16,269,000 homes with $84.6 billion to spend.

The presentation also reports that the 35-49 or "key" group accounts for 34 to 35% of sales of such products as coffee, facial tissues, margarine, cigarettes, desserts and puddings as against 23 to 28% bought by the next heaviest consumer of these products, the 50-plus group.

The study claims eight of the ten advertisers reaching the largest weekly audiences via network radio do so on NBC Radio.

The presentation was shown to newsmen by William K. McDaniel, vice president in charge of NBC Radio, who called it a study designed to promote the radio network industry generally as well as NBC Radio specifically; George A. Graham Jr., vice president and general manager of the network, and Howard Gardner, manager of sales development.

Lorillard plans to move two brands to Grey Adv.

In the first split-up of its brands since 1957, P. Lorillard Co., New York, last week announced that Grey Adv., New York, has been named advertising agency for its Old Gold Spin Filter and Spring cigarettes, effective Jan. 1. For the past three years, Lennen & Newell, New York, has been agency for all Lorillard brands, and will continue to handle the advertising for Kent, Newport, and Old Gold Straights cigarette brands.

Lewis Gruber, Lorillard board chairman, said that the two products being moved are directly competitive with Kent and Newport.

BROADCASTING, October 31, 1960
An objection to FCC’s ‘fixed formula’
DENVER NAB CONFERENCE RESOLUTION QUESTIONS COMMISSION ACTION

Broadcasters in the Mountain States last week challenged the FCC’s right to use a “fixed formula” in judging a station’s service to the public.

This open demand for clarification of the FCC’s policy in areas of program control was made at the NAB Fall Conference held Oct. 24-25 in Denver, marking the first instance in the current conference series of an open stand by an NAB group.

The first leg of the autumn series was completed Oct. 28 as the NAB headquarters traveling troupe moved from Denver to Omaha. Conferences will be resumed Nov. 14-15 in Washington, moving Nov. 21-22 to Chicago and winding up Nov. 28-29 in New York. Attendance at the first five conferences ran nearly 20% ahead of the 1959 sessions.

Adoption of the Denver resolution dealing with FCC program control took place at a meeting called by George C. Hatch, KALL Salt Lake City, director of NAB’s 14th district (Mountain States). Fall conferences normally are not limited to specific areas, NAB members having the option of picking any conference on the schedule.

Back of the District 14 action, first of its kind during the 1960 conference series, was issuance by the FCC of a McFarland letter to a broadcaster indicating a hearing was necessary on his renewal application because of the excessive number of program interruptions on the station. There was fear also that the FCC might set up a numerical limit on weekly announcements as a factor in determining a licensee’s qualifications for renewal.

No Fixed Formula • District 14 went on record as unalterably opposed to the use of any fixed formula, whether by rule or otherwise, by which the FCC shall render judgment of a licensee’s performance in the public interest, convenience or necessity.

The resolution asked NAB “to institute immediate and positive action to challenge the validity of any such method and to seek a clarification from the FCC as to its policy in this and other related areas of programming control.”

District 14 adopted other resolutions asking the NAB Policy Committee to seek commitments for broadcast debates in the 1964 national elections; commending FCC Chairman Frederick W. Ford and NAB for advocating an extension of FCC authority over community antenna tv systems; recommended possible inclusion in the NAB Radio Code of commercial time standards providing “a realistic standard of good practice in the minutes of commercial content in each quarter-hour participating program, with appropriate exemption of public service information programs such as classified, auction and legal notice programs.”

Another highlight of the Denver conference was a forecast of communications miracles through space progress by Dr. William L. Whitson, vice president of the Martin Co., Denver (see details page 80).

Radio’s Problems • Radio must face three basic problems in the next decade, according to Thad M. Sandstrom, WIBW Topeka, Kan., who spoke at the Denver radio session. He listed the problems as rates and sales; programming depth, and government regulation.

Their solution, he said, will require broadcasters to rise to new heights.

Mr. Sandstrom said radio rates are generally too low and too flexible, leading to confusion among agency buyers. He cited rate-cutting, with regions in medium-sized cities “selling spots for 50 and 75 cents and even less” and urged adherence to rate cards.

Stations should dig up new clients in neglected areas and trades, he suggested. As to programming, he said, “Radio must do something more than program hot headlines and phonograph records.” He described “the rating craze” as one of the basic faults of radio, reminding quality is important.

He spoke critically of radio news based on “fender benders and AP orUPI headlines,” deprecating the shouting about trivia and crime. “We are not doing a good job of making our own community leaders conscious of what we are doing and how we are serving,” he said, urging stations to use more 15-minute and even 30-minute newscasts.

Mr. Sandstrom said he believed the good operator in the 60s will include a place for regular religious programs on his schedule. “If we do a good job of programming depth, I think we will have a lot less problems with government,” he said. He quoted Rep. Peter F. Mack Jr. (D-III.) as saying over-indulgence in escapist programming such as westerns, whodunits and rock ‘n’ roll does not meet the broad range of listener demands.

Promotion Points • He proposed these promotional steps to managers: Make up a monthly public service news bulletin; tell churches and charities how many announcements were given and what they would have cost; tell congressmen and senators when their material is broadcast; make news stories out of talk or panel programs; tell special interests about specific programs.

F. Ernest Lackey, WHOP Hopkinsville, Ky., said at Omaha that future radio research “will deal in terms of radio-equipped people rather than in the outmoded radio-homes base.” Research will be directed more to qualitative analysis than ratings, he added.

In his peek into radio during the next decade Mr. Lackey said, “A cross-section of opinion of leading broadcasters from across the nation leads me to believe that the technical improvements in both transmission and types of reception will open new avenues of communication currently unheard of. “It is my fond belief that the fast-
The prestige of your station never undergoes a more severe test than on election night when the returns begin to roll in.

Thousands of men and women, aided by the latest electronic equipment, make up the unmatched Associated Press election organization that will bring listeners the fastest returns.

And, as usual, AP returns will be the standard for accuracy. That's because AP NEVER guesses, NEVER estimates, NEVER projects.

A comfortable feeling, isn't it?
WHERE MASS MEDIA ARE FAILING

A distinguished editor says the press, including radio-tv, leaves big gaps in information—but there is no simple cure

Journalist Harry Ashmore, writing in the Oct. 25 issue of The Saturday Evening Post, finds that the press (he includes radio-tv in that definition) refuses to admit there is any need for internal reform in order to fulfill its "historic obligation to guard our democratic institutions." He suggests, that this inadequacy of the mass media becomes "an issue of great urgency for the public at large." Here are excerpts from his lengthy examination of this problem in an article titled "Has Our Free Press Failed Us?", a part of the Post's "Adventures of the Mind" series:

In February of 1815, reflecting upon the scars he had earned as second president of the United States, John Adams wrote: "If there is ever to be an amelioration of the condition of mankind, philosophers, theologians, legislators, politicians and moralists will find that the regulation of the press is the most difficult, dangerous and important problem they have to resolve. Mankind cannot now be governed without it, nor at present with it."

In February of 1960 Dr. Frank Stanton, of the Columbia Broadcasting System, told a committee of Congress that regulation of the press is not only difficult and dangerous, but unnecessary. So saying, he expressed the view held by virtually the whole of the communications industry.

There is a considerable distance in time and technology between the founding fathers and Charles Van Doren. I suspect, however, that in the end Doctor Stanton and his colleagues will be able to demonstrate to the satisfaction of the beleaguered FCC and the agitated congressmen that the First Amendment spans the gap between early journalism and tv...

Definition • The beginning fact is that after almost 200 years of cataclysmic change we still don't know what to do about the press. We don't, as a matter of fact, even know precisely what the press is. But this is more than a problem in semantics. We don't know, and haven't known for a long time, where journalism ends and entertainment begins. We never could figure out a way to draw a line between that part of the press which claims the rights and immunities of a public institution and that part which is a private, profit-making enterprise. We have simply rested on the proposition that we couldn't have one without the other—that to be free the press must be self-supporting. I do not myself dissent from the theory. Yet we cannot blink the fact that in practice the proposition has never been entirely satisfactory, and often has been downright alarming.

The odds against preparing a reasonably accurate and complete first draft of the day's history are long and are still mounting. The new technology has reduced one essential ingredient: time. Rising costs have compressed the other: space. The new electronic competition for the advertising dollar has forced competition for the maximum audience; dancing girls attract more television viewers than commentaries on world affairs, and horoscopes have a higher readership than editorials.

...I don't think any thoughtful person would argue that we are being adequately girded to survive in a perilous world when we are served up 16 columns on the trial for murder of a Carol Tregoff and four paragraphs on Khrushchev's visit to India. ... Millions of words have been devoted to what amount to cries for vengeance and counterfeits for mercy in the Chessman case—but how much rational discussion has there been of the real and compelling question that underlies this bizarre business: Did he get a fair trial?...

Out of Date • Most of the common complaints brought against the media are as out of date as the hand press. There is good enough reason for this. In a sense the proprietors of the press set the terms of the argument; placed on the defensive they still try to sound like Tom Paine; ... It derives from the great libertarian tradition that was the honored product of the eighteenth-century revolt against the authoritarian state, which sought to control the minds of men by regulating the means by which they communicated. ...

...But there has since been another revolution, and the end is not yet. It is the revolution in technology which has changed the face of America and the bounds of our daily lives ... old freedoms and immunities have vanished or have been seriously eroded; ... Only in the case of the press and the church has the doctrine of laissez faire remained firmly imbedded in the law of the land—and even here the pressures are mounting ...

... By every index the electronic tube is on the ascendancy, and movable type is on the decline. In theory this should make no difference. In practice it makes a great deal ...

Broadcasting has been a corporate entity since its recent birth, with a diffusion of responsibility so advanced it would be a physical impossibility for an outraged viewer to find anyone to horsewhip in the RCA Building. If the tradition is still there buck operators will find the going rougher in the decade ahead as good stations tend to expand their services to the listener, while the TNT—time, news, temperature—rock "n' rollers fade from the scene." He predicted the decade "should see many changes in the personalization of radio, with services to the listener being the principal aim of the better station operators."

Dr. Bruce A. Linton, chairman, radio-tv-film, U. of Kansas and president of Assn. for Professional Broadcasting Education, told the Denver conference how universities and NAB are cooperating in developing professional broadcast training courses. W. Earl Dougherty, KXEO Mexico, Mo., APBE vice president, covered the same subject at Omaha.

A report on NAB activities and current problems facing broadcasters was given at Denver and Omaha by Merrill Lindsay, WSOY Decatur, Ill., a member of the NAB Policy Committee. Joseph Herold, KBTV (TV) Denver, called for support of the NAB TV Code structure at the Denver meeting. He is a member of the code board. Chairman E. K. Hartenbower, KCMO-TV Kansas City, code board chairman, spoke on code enforcement at the Omaha meeting.

They stressed the need for adherence to code provisions and updated members on recent changes in the document.
at all it is, I suspect, largely because the broadcasters find it useful protective coloration. . . It is clearly subordinate to the other traditions which have shaped broadcasting—those that came over from advertising and show business.

The new condition, in my view, is more the product of technology and economics than of the absence of heroes. The libertarian tradition survives as a protection against the incursions of the state; but nothing in the new technology provides anything approximating the free marketplace of ideas which the fabricators of the tradition conceived as its concomitant.

. . . Competition in broadcasting has been arbitrarily and permanently limited by the boundaries of the frequency spectrum—a physical circumstance that, despite the First Amendment, has required a kind of public regulation from the inception of the medium.

Economic Limitations . . . But the real inhibition, economic . . . I can see no way that commercial broadcasting, operating on an economic base that makes it completely dependent on advertising revenue, rationally can be expected to provide a substantially greater proportion of the distinguished programming than now occasionally delights the eye but does nothing to enrich the coffers. The advertisers quite naturally want the biggest possible audience; the biggest possible audience wants the Dinah Shore Chevy Show; and those of us who want something else can always read a book. I agree . . . that this is not good enough, but I nevertheless hesitate at the edge of government control.

The reason is practical, not philosophical; I simply have little faith in the ability of the American people to set up a public agency that will not be more subject to pressures toward blandness and conformity than are the advertisers; if this is the only choice, I am inclined to take my chances with Madison Avenue rather than with the FCC—and besides, I had just as soon read a book . . .

Harry S. Ashmore won a Pulitzer prize in 1958 for his editorials during the integration crisis at Little Rock, Ark. He was executive editor of the "Arkansas Gazette" there. Now he is with the Center for the Study of Democratic Institutions, Santa Barbara, Calif., but soon will become an executive of the Encyclopaedia Britannica.

. . . Wilbur Schramm of Stanford University . . . sees emerging in (the place of old laissez-faire libertarianism) something he calls a doctrine of social responsibility—that is, the voluntary acceptance of certain obligations of public service by the proprietors of the press in return for their guaranty of freedom.

There is some evidence to sustain the view. Certainly, as newspapers have become fewer the survivors have displayed a more conscious effort to obtain objectivity . . .

But if there is less biased reporting than there used to be, there is also less effective advocacy—less shaking and moving of the kind we have always believed a healthy society required . . . as I survey the end product I am convinced that it is not good enough . . .

Most of the complaints about television are [uninformed, petulant, partisan]. I don't believe, for example, that television is leading our children astray . . . every set has a little switch, and if we spare it and spoil the child we have no right to abdicate parental authority and transfer responsibility to the fellow who sits behind the big switch at the station. . . .

The Cutting Edge . . . We have got to insist that, in addition to what they want, the people have got to get what they need . . . the free press was conceived not only as the protector of the verities but as the cutting edge of change.

Collectively, the press, may, as it has come close to doing, abdicate these functions and not only survive but prosper. But what of the republic? The rights and immunities conferred upon the press were not rewards for past probity, but a supposed guarantee of future service in the public interest . . . The press can be forgiven its sins of commission; . . . But its sins of omission are surely a matter of public concern.

It is evident by now, I think, that the press is not capable of reforming itself, for the good reason that it will not admit collectively that there is any need for reform. . . . I am not . . . so much concerned with what the press is doing as with what it is not doing. There is too little diversity, and there are too many total gaps of information and of advocacy. There is no single, simple way to effect a cure—not by law, or subsidy, or organized pressure, or by artificially induced competition. But I am convinced that we cannot any longer rely solely upon those within the press . . .

We must begin, I think, with recognition of a proposition the press rejects—that the inadequacy of mass communications in our threatened society is not a matter of internal concern for the press alone, but an issue of great urgency for the public at large.

Newspapers chided for stale research approach

Newspapers have developed "no fresh approaches" toward researching their own problems in the past 10 years, Leonard Kent, vice president and research director of Needham, Louis & Brborly, asserted last week.

What's more, this points up a "sharp contrast" to strides in audience analyses for TV through commercial researchers and the Television Bureau of Advertising and magazines, he told the National Newspaper Promotion Assn. in Chicago Monday.

Mr. Kent dwelt mainly on recommendations for raising research standards and making their results "even more acceptable and useful to advertisers and media buyers in advertising agencies." Newspapers should be concerned because they have a definite "problem," he claimed.

Available local market information, newspaper performance data and local audience characteristics represent the common failings of most papers in all but a few of the largest markets, Mr. Kent said.

Another drawback: estimates of newspaper advertising dollars are available only once a year, while network TV provides monthly and spot TV quarterly figures.
New fm’s: 3 start, fourth ready to go

New fm outlets in Houston, Barberton, Ohio, and Sarasota, Fla., have gone into operation this month. Another, in San Francisco, reports it will commence early next month.

KQUE (FM) Houston, signed on the air Oct. 4 on 102.9 mc. The station’s format features “radio personalities experienced in good music, professional production and up-to-the-minute news cast,” according to David H. Morris, general manager of KQUE and KNUZ (its am companion). Broadcasting with 64.24 kw from an antenna placed on the U. of Houston’s tv tower 595 feet above mean sea level, KQUE claims to be the most powerful fm station in Houston. The station operates daily 6 a.m. to midnight.

WDDBN (FM) Barberton, signed on the air Oct. 9 on 94.9 mc with 118 kw. The station reports a coverage area which includes Cleveland, Canton and Akron. Licensed to Independent Music Broadcasters Inc., WDDBN operates 17 hours per day. George B. Harna is president and Ted A. Niarhos is general manager. Station headquarters and executive offices are at R. D. #1, Seville, Ohio.

WYAK (FM) Sarasota, went on the air Oct. 15 on 102.5 mc with 2,730 w ERP. The new station is owned and operated by Multitone Music Inc. with studios and offices located at 1373 5th St., Sarasota. It is programming big band and top vocal music with some classical music scheduled for Sundays, operating from 6 a.m. to midnight seven days per week. The transmitter tower is 285 feet tall. WYAK announces that it will use one rate card for both local and national advertisers. WYAK is Sarasota’s first fm station.

Early November is the target date for KFRC-FM San Francisco to begin operations, according to General Manager Richard E. Nason. The station’s facilities, in a building housing the transmitter and offices, will be located on San Bruno Mountain. The transmitter will rise 1,430 feet above sea level. Effective radiated power will be 70 kw with all equipment remote-controlled from the main KFRC studios at 415 Bush St. KFRC, the new station’s am companion, has been operating since 1924.

Changing hands

ANNOUNCED • The following sale of station interests was reported last week, subject to FCC approval:
- KGUN-TV Tucson, Ariz.: Negotiations underway for sale by H. U. Garrett, Tom E. Foster, and others, to Edwin G. Richter Jr., Henry S. Hillberg, and others, for $1.4 million Mr. Richter and associates are owners of WEHT (TV) Evansville, Ind. KGUN-TV operates on ch. 9 with power of 63.1 kw visual and 31.6 kw aural.

WSPA studios near completion

Reconstruction of the radio center of WSPA Spartanburg, S. C., is nearing completion. Its plant was ravaged by fire May 16 and almost completely destroyed (BROADCASTING, May 23).

Hardly any air time was lost following the fire and since then the station has been broadcasting from studios at the transmitter near Interstate Highway 85. Radio news and business headquarters have been at 123 N. Converse St. in the new WSPA-TV building. Both facilities were severely damaged by fire at the old Main St. combined headquarters.

Walter J. Brown, president of WSPA-AM-FM-TV, estimates the cost of re-establishing the downtown quarters at $50,000. The new building is entirely air-conditioned with new studios and equipment. The facade consists of aluminum mesh and tile front covering both the first and second stories.

Target date for WSPA to operate from the new building is Nov. 28.

N.Y. quiz grand jury gets new lease on life

The life of the New York Grand Jury that has charged a group of one-time tv quiz winners with perjury was extended last week to Dec. 1. The jury’s sitting was to expire Oct. 28.

Action by District Attorney Frank Hogan in extending the jury’s life will permit further probing into charges of perjury, subornation of perjury and conspiracy to obstruct justice. It had been reported that names of prominent lawyers had been mentioned in the grand jury’s investigation of subornation of perjury—that is, urging a witness to testify falsely.

The 17th and 18th quiz participants to surrender to Mr. Hogan’s office were booked last week. Sixteen defendants had been arrested on charges of perjury a week before (BROADCASTING, Oct. 24.) The arrests last week: Mrs. Terry Curtis, 31, who identified herself as a film producer and winner of $2,800 on Tic Tac Dough and $78,000 on Hi-Lo, both former NBC-TV shows, and Neil Wolf, 22, student and winner of $13,400 on Tic Tac Dough. Both defendants were paroled. More than 20 indictments charging perjury were said to have been issued. Identification of Hi-Lo in connection with a quiz show contestant charged with perjury was believed the first made in the overall quiz investigation.

When you sell thru Blackburn, you are revealed only to serious, financially responsible buyers!

We do not send out lists. Every sale is handled on an individual basis. A deep knowledge of the market, combined with a strong feeling that our reputation is too valuable to risk for any commission, provide a professional service of the greatest reliability.

AB-PT NET PROFITS HIT NEW HIGH
Billing for tv network was up 40% in 1960's 3rd quarter

Net operating profits were the highest in company's history for American Broadcasting-Paramount Theatres Inc., the first nine months of this year, 44% above that period of 1959, President Leonard H. Goldenson told stockholders in his quarterly report last week. The third quarter exceeded last year's by 40% and gross billings of ABC-TV were up 43% for the quarter despite losses of political convention coverage in July (the tv coverage was about 80% sold, Broadcasting reported at the time). Highlights of the report:

Estimated net operating profit the first nine months of 1960 was $7,522,000 or $1.80 a share. Capital gains (after income tax) brought this to $8,873,000. Third quarter profit was $1,869,000 or 45 cents a share (plus $23,000 capital gains).

Mr. Goldenson recapitulated program developments in the broadcast division of AB-PT and said the company acquired interests in additional foreign tv properties last quarter. They include minority holdings in stations in Ecuador and Beirut and a network in Venezuela.

The theatre business this quarter was about equal to last year, he said. AB-PT during the nine months got rid of 22 theatres and added two. Am-Par Records has several discs among the "best sellers," the president reported, adding that the Command label accounted for more than 10% of all stereo sales since the first of the year.

Earnings were not listed for the separate AB-PT divisions.

1960
Net operating profit before federal income tax and capital gains below - $3,970,000
Less: Provision for federal income tax - 2,101,000
Net operating profit before capital gains (net) - $1,869,000
Add: Capital gains (net) after applicable income tax - 179,837
Consolidated earnings - $1,948,837
Preferred dividend requirement - $16,982
Common shares outstanding - 4,149,737
Earnings per share common - $45
Earnings per share common (excluding capital gains) - $45

1959
Net operating profit before federal income tax and capital gains below - $2,811,000
Less: Provision for federal income tax - 1,471,000
Net operating profit before capital gains (net) - $1,340,000
Add: Capital gains (net) after applicable income tax - 182,000
Consolidated earnings - $1,522,000
Preferred dividend requirement - $19,612
Common shares outstanding - 4,149,362
Earnings per share common - $45
Earnings per share common (excluding capital gains) - $45

Media reports...

Self criticism • Station owners and managers of the Florida Defense Network will hold a critique of the network's functions Nov. 9 at the DuPont Plaza Hotel in Miami. Expected to be on hand are: Gov. LeRoy Collins, NAB president-elect (official commitments permitting); FCC Commissioner Robert E. Lee; A. Prose Walker, NAB engineering chief; Robert Heald, attorney; Dr. F. W. Reichelderfer, chief of U.S. Weather Bureau. The FDN, established in 1958 under the auspices of the Florida Assn. of Broadcasters, is a pioneer in emergency communications.

Spot limitation • WRPM (FM) New York is initiating, effective immediately, a sales policy of limited commercial announcements, it was announced last week by Edith Dick, station manager. Under the new policy, WRPM will sell two one-minute spots at each quarter hour station break. The half-hour will carry one commercial break to be followed by a sponsored five-minute newscast. Between 8 p.m. and sign-off, one commercial spot will be available on the hour—at 8, 9, 10 and 11 p.m.

V.I. tv on CBS • WBNB (TV) Charlotte Amalie, St. Thomas, Virgin Islands, will join CBS-TV under the Extended Market Plan as a non-interconnected station when the ch. 10 outlet goes on the air or about Jan. 1, 1961. WBNB is owned by Island Tele Radio Service.

Triangle-WBC interchange • University of the Air, a prize-winning series produced by Triangle Stations in cooperation with more than 27 colleges and universities in Pennsylvania, New Jersey and Delaware, will be shown on Westhouse Broadcasting Co. tv stations. This amounts to "a cultural exchange program" between the two companies since Triangle is presently carrying WBC's tv science series Lab 30. WBC stations presenting University of the Air are WBZ-TV Boston; WJZ-TV Baltimore; KYW-TV Cleveland and KPIX (TV) San Francisco. The first subjects to be telecast by WBC will be...

American Civilization," presented by the U. of Pennsylvania, and "Contemporary Economics," presented by Rutgers U.

Meredith buy • Meredith Publishing Co., magazine publisher and multiple broadcaster, is acquiring the venerable Appleton-Century-Crofts Inc., New York publishing house which specializes in textbooks. Total consideration for the acquisition of 17,000 shares of common stock of the publishing company was estimated at $7 million. Meredith, which publishes Better Homes & Gardens and Successful Farming, owns KCMO-AM-FM-TV Kansas City, Mo.; WHEN-AM-TV Syracuse, N. Y.; KPHO-AM-TV Phoenix, Ariz.; WOW-AM-TV Omaha, Neb., and KRMG Tulsa, Okla.

Bar award • KGTV-TV Portland, Ore., was presented with a special award by the Oregon State Bar for World Court in Action, an hour-long telecast. It was the first such award given by that organization in its 26-year history. Produced by KGTV-TV in cooperation with the Oregon State Bar and presented on May 1—Law Day—the program dramatized a true story from the files of the World Court with bar members taking the various roles. Since then the American Bar Assn. has edited the program to nearly a half-hour and has made it available to legal organizations throughout the U. S.

Farmers' friend • WNCT (TV) Greenville, N. C, has been honored by an award from the North Carolina Agricultural Stabilization and Conservation State Committee for its "outstanding public service to farmers and the general public in eastern North Carolina." The station employs a fulltime farm director and schedules two farm programs daily. Presentation of the plaque from the agricultural organization was made to General Manager A. Hartwell Campbell on the noon farm news program. During the past year WNCT scheduled an 8-hour Farm-A-Thon, which included nine panels composed of over 60 farmers and farm experts with each panel devoted to a specific kind of crop, farming or service. The station has offered scholarships in "farm income" contests and maintains membership in many farm organizations.

New MBS news bureaus

Mutual Broadcasting System will open news bureaus in San Francisco and Los Angeles Jan. 1, Robert F. Hurleigh, president, announced last week. He said they will provide regional news broadcasts for MBS' 50-station six-state Pacific lineup, as well as originating material for the network's 36 daily, five-minute-newscasts.
Crazy, Man—No, Boy, don't be a square—it's true... Baton Rouge as a market ranks just below Ft. Worth-Dallas, Houston and New Orleans. It's the 4th largest market in the Gulf South—an area made up of the states of Louisiana, Texas and Mississippi. The Baton Rouge market, with a population of 1,561,000 and retail sales of $1,285,000,000.00, is served completely by television station WBRZ. Baton Rouge is truly too BIG a market to be overlooked on any list.

BROADCASTING, October 31, 1960
What about women in the broadcast industry

THEY'RE MAKING GAINS EVERY WHERE—EVEN MANAGEMENT

The Radio & Television Executives Society and New York Chapter of American Women in Radio & Television shared a roundtable lunch and came away with an idea of women's evolving place in broadcasting and broadcast advertising. Some highlights:

There has been a shift away from microphone and camera by women during the past five years, Jayne Shannon of J. Walter Thompson said. This talent is being assimilated behind the scenes and program credits are carrying more women's names as producers, directors and researchers.

Daytime programs are due to open up more opportunities, Miss Shannon thinks. "We have only to look at the wide editorial perspective that is being taken by the leading women's magazines to give us some clues as to what daytime television and radio will have to do to court the viewer and the listener." The broadcast media supervisor went on to commend the Purex specials for women on NBC-TV and to quote a prediction by Irving Gitlin, executive producer of NBC News and Public Affairs, that non-fiction shows, "more or less serious and direct in tone, will account for 50% of the daytime television schedule in about five years time."

Pauline Frederick, NBC United Nations correspondent, sees changes in "the face and figure of informational broadcasting" with increasing recognition that "news is not naturally segregated by sex."

The Agency Woman • The advertising agency woman is three to five years older than her male counterpart in any given job and paid $3,000-$5,000 less for it, Mary Harris, director of production services, M-E Productions Div. of McCann-Erickson, reported. The woman spends longer apprenticing in the mail room and at a secretary's desk, starting lower and working harder than the agency man, according to the agency producer.

Jayne Shannon gave a rundown on women in some of the departments at J. Walter Thompson:

1. Third of the media buyers are women.
2. In other areas of broadcast advertising, a casting director for commercials directs a group of six; a fashion expert and group of five consult with artists and tv producers; a tv contract specialist supervises union-talent bookkeeping; the women's copy group, with group heads—seven of them vice presidents—is active in the creation of tv commercials; women are represented among associate media directors, one a supervisor of media estimates, the other an expert on tv and radio ratings.

Air Talent • Virginia (Mama Perkins) Payne, president of the American Federation of Television & Radio Artists, said that about a third as many women as men are performers. From AFTRA's total membership, only about a third earn the $1,000 a year necessary to qualify for the union pension-welfare plan.

Albert B. Shepaut, sales manager of Select Station Representatives and moderator of the roundtable, said there were 1,448 members of AWRT and cited their contributions to the business, important, not because they were by women but by qualified persons.

Quality Radio Group to meet tomorrow

Stockholders of Quality Radio Group will meet in Chicago tomorrow (Nov. 1) to elect new directors and officers and reappraise the progress made by the organization during the past year.

Ward L. Quaal, vice president of WGN-AM-TV Chicago, will preside over the one-day meeting at the Drake Hotel, to include breakfast, luncheon and election sessions. Mr. Quaal is expected to step down as QRG president.

Quality currently claims about 20 member stations and has received several expressions of interest from other stations desiring to join, according to Mr. Quaal. QRG activity this past year has been highlighted by two New York programming promotion clinics, designed to help regenerate the group as an industry entity (BROADCASTING, Oct. 17, June 13). Similar clinics are anticipated in 1961.

New rep firm to handle southwest radio sales

A new radio rep firm, The Stuart Co., has been established in Dallas, to serve the Mid-South and Southwest. It will represent the following stations:

KUNO Corpus Christi, KEX Nuevo Laredo, KTOO Corpus Christi, KASE Austin, KJIM Fort Worth, KFTS Texarkana, KFSA Nacogdoches, KALT Atlanta, KCAR Clarksville, KCLE Cleburne, KADO Marshall, KSPF Lufkin-Diboll, KVLG La Grange, KBUD Athens, KWFK San Angelo, KEPS Eagle Pass, KVOU Uvalde, KINE Kingsville, KOYL Odessa, KBEN Carizo Springs, all Texas. KBCL Shreveport, WWOM New Orleans, KPEL Lafayette, all Louisiana. KFFA Helena, KAMD Camden, KBHS Hot Springs, all Arkansas. KJEM Oklahoma City, Okla. and KBIM Roswell, N. M.

Temporary offices are at 1135 Ferndale, Dallas.

No place to go but up

In this era of superlatives—"the greatest," "spectacular" and "number one"—WICC-TV Bridgeport is relatively modest. The station reported last week that it has completed its first month as a daytime only tv station—"the first and only daytime tv station in the country"—and is "the only commercial television station without commercials." The station has a staff of one. It is the only uhf station in a nine station tv market (signals come in from New Haven, New Hartford and New York). But Kenneth Cooper, president of Connecticut-New York Broadcasters Inc., owner of WICC-TV, is optimistic: "However, we are hopeful of selling one commercial in the very near future."

WKAT takes CBS in Miami

CBS Radio's basic network affiliate in Miami, Fla., will be WKAT Miami as of Nov. 28, the date when the network's present affiliate, WGBS that city, goes independent (AT DEADLINE, Oct. 17). WGBS decided to disaffiliate when it found CBS Radio's modified Program Consolidation Plan, which also goes into effect Nov. 28, "not compatible with WGBS' program objectives." WKAT, owned and operated by Mrs. A. Frank Katzenstein, president of WKAT Inc., operates on 1360 kc with 5 kw-day and 1 kw-night. Sidney Levin is general manager. The affiliation contract was signed in Miami by Mrs. Katzenstein and William A. Schutt Jr., vice president in charge of affiliate relations for CBS Radio.

'Life Line' winner announced

Grocery Manufacturers of America named Helen Delich Bentley of WMAR-TV Baltimore as top award winner of the GMA Life Line of America trophy competition for 1960. The presentation of a sterling silver Tiffany bowl to Mrs. Bentley, who was honored for her tv series entitled The Port That Built a City, was a highlight of the Life Line Luncheon last Wednesday (Oct. 26) during the 52nd annual meeting of the GMA in New York.

In addition to the top tv award, certificates of honor were presented to Josephine McCarthy, WNBC-TV New York; Rozell Fair Fabiani, WRBL-TV Columbus, Ga., and Mildred Alexander, WTRI-TV Norfolk, Va. Since 1948, Life Line of America awards have saluted the women of press and broadcasting who do the most outstanding job of reporting and interpreting the Life Line story.
America's modern way of doing business

Men and machines of AIR EXPRESS deliver vital missile component with jet speed to Convair test site

Priority service makes Air Express today's best way to ship

At Convair's big Sycamore Canyon Test Facility in California, an Atlas missile stands ready for a static test firing. An eleventh-hour engineering refinement brings AIR EXPRESS service into the picture. AIR EXPRESS is constantly called on to speed new parts. It's all in the day's (or night's) work for this skilled shipping team. Here's what you get when you call AIR EXPRESS: Priority service—first on, first off —on all 35 scheduled U. S. airlines • Kid-glove handling every mile of the way • Door-to-door pickup and delivery via 13,000 trucks (many radio-dispatched for maximum speed) • Teletype confirmation of receipt on request • Service to 20,000 American communities coast to coast • It pays to think fast . . . think AIR EXPRESS first!

CALL AIR EXPRESS DIVISION OF RAILWAY EXPRESS AGENCY • GETS THERE FIRST VIA U. S. SCHEDULED AIRLINES

BROADCASTING, October 31, 1960
Broadcast coverage of the national campaigns spurted to new heights over the weekend as the two major parties started pouring new money into intensive spot purchases.

This upswing in paid political time developed as the two parties were working on final plans for a fifth "Great Debate," a free public service feature that might draw the largest audience since the first of the Kennedy-Nixon debates, due to the heat of the final campaign days.

Both Democrats and Republicans were completing their spot buying plans at the weekend, leading up to their pre-midnight paid network features on Nov. 7, campaign eve.

The date most mentioned for the fifth debate was Monday, Oct. 31. Meetings were held during the week by J. Leonard Reinsch, communications adviser to Sen. Kennedy, and Fred Scribner, Undersecretary of the Treasury and adviser to Vice President Nixon.

Networks Annoyed • Major networks became restive last week as the party advisers failed to reach an agreement. A statement to the parties, Oct. 25, signed by all national networks, showed the three TV and four radio groups were annoyed at public complaints charging them with responsibility for the strict rules limiting time and using panels to question the candidates (see text of statement below).

The Reinsch-Scribner talks ran all day Thursday and then into the night. In all they held five sessions as the networks maintained watches at party headquarters, hoping to utilize every possible minute in juggling schedules and setting up facilities. The party planning dealt with program formats, length of the debate and similar important details. Time discussions ranged from one hour to one-and-a-half and two hours. It was anticipated networks and party spokesmen could wrap up the package Oct. 28.

The prospect of no fifth debate was present during the Reinsch-Scribner discussions and at one point it appeared the whole thing was off.

Networks had found party political buying curtailed during the autumn because of the appeal of the free debates. They had faced the loss of revenue from expropriated sponsors' time as well as the cost of producing the debates and setting up facilities.

Debate Costs High • At the weekend the networks said they had little idea of the final debate bills and won't have definite figures for another three or four weeks. One estimate, conceded a guess, placed the total network bill for production alone between $400,000 and $500,000. Costs are split among the four radio and three TV networks on a 2-2-2-1 basis, Mutual paying a seventh and the others two-sevenths each. Some costs, such as expense accounts of debate personnel, will not be lumped into production costs since each network is likely to pay these bills and charge them off to hospitality.

Chance of a sixth debate featuring the vice presidential candidates was discussed frequently last week.

The parties' spot strategy had a side feature last week as Republicans claimed the Democrats were outspending them 3 to 1 and the Democrats claimed the GOP was outspending them in many major areas by 2 to 1. There was no way to find out which party was right, if either, since official information was sporadic and hard to obtain in the last-minute pressure at party headquarters.

In any case, the GOP was doing its heavy spot TV spending during the last week of the campaign, with placement by Campaign Associates, the GOP special campaign agency.

Spots for 200 Stations • Basic plans for network coverage were substantially those outlined in the Oct. 24 BROADCASTING. Democrats, for example, will have half-hour CBS-TV broadcasts Nov. 2 (CBS-TV 3-3:30 p.m.); Nov. 5 (9:30-10 p.m.) and Nov. 7, election eve (11-11:30 p.m.). The party will use 16 five-minute segments on the TV networks in the Nov. 1-7 period.

Well over 200 TV stations, maybe more, will be included in the final spot campaign sponsored by Citizens for Kennedy, wing of the Democratic organization. Spots will range from 20 seconds to a minute, with placement by Reggie Schuebel, vice president of Guild, Bascom & Bonfigli.

Spot purchases by the Democratic committee and Citizens for Kennedy had not been heavy earlier in the campaign but picked up with a rush as the flow of money into party coffers speeded up with what were called signs of a Kennedy victory.

Similarly some GOP spokesmen reported an increase in contributions as the end of the campaign approached. The GOP placed a five-minute spot TV announcement around the country in which President Eisenhower lauded the record of Vice President Nixon and endorsed the Nixon-Lodge ticket. The President was scheduled on a paid ABC-TV telecast Oct. 28 (10-10:30 p.m.).

CBS-TV had planned to carry Vice President Nixon on its Oct. 30 Face the Nation but when he was unavailable the network substituted Sen. Barry Goldwater (R-Ariz.).

Election Eve Buys • On election eve the GOP has purchased the 11 p.m. - midnight period on NBC-TV for a last-minute appeal to voters. Democrats have 11-11:30 p.m. on CBS-TV. Sen. Kennedy declined an offer to appear as a guest on the Jack Paar Show. Vice President Nixon was a Paar guest in late August.

A number of regional hookup have been booked. NBC-TV will carry a GOP paid telecast Nov. 3 on a New York state hookup, with Gov. Thomas E. Dewey featured. Similarly Sen. Kennedy was heard Oct. 27 from the New York City garment center on a state hookup, 11:15-11:30 p.m. Other NBC-TV regions include an Illinois-St. Louis telecast preceding the 9:30-10 p.m. paid Kennedy telecast from Chicago Stadium Nov. 4.

Philip Morris Commander cigarettes sponsored Oct. 27 the second program in the CBS Reports series, "Money and the Next President" (CBS-TV, 8:30-9:30 p.m.). The first CBS Reports pro-

Dewey on debates

Thomas E. Dewey, ex-GOP presidential candidate, believes broadcast debates provide the most logical way for a candidate to present a true picture of himself to the public.

Appearing on the Paul Coates' syndicated show on KTTV (TV) Los Angeles Oct. 25, he suggested a two-hour format with only candidates and moderator appearing would provide better debates. He recalled the whistle-stop drives and their exhausting speeches and strategy sessions, explaining they left the candidate exhausted and unable to think clearly.

Asked by Mr. Coates if he felt the networks were obligated to provide the candidates with more time, he said, "Not at all. The networks are not obligated to do anything for us. What they have done has been more than fair."
"IF THE RCA TV TAPE RECORDER COST $5000 MORE, WE WOULD STILL BUY RCA"

—says Stanley E. Hubbard of KSTP-TV

Says Stanley Hubbard, "After a careful study for over a year, our Engineering Staff decided that the RCA Television Tape Recorder was the best on the market. It was obvious to us that RCA advantages make all the difference in picture clarity and realism.

"Since that time, we have purchased three TV Tape Recorders—one color and one monochrome for KSTP, and a monochrome for KOB-TV Albuquerque. Today's increased sales are keeping our facilities humming. Our advertisers are sold on the consistently high quality of our taped commercials."

The value of installing RCA TV Tape Equipment is being proved at more and more stations where nothing less than the best will satisfy. Superb pictures, outstanding convenience in operation and unequalled service during and after the sale are advantages that only RCA with its years of television experience can promise and produce.

Discover for yourself all the values of owning the RCA TV Tape Recorder. Check Stanley Hubbard and other enthusiastic users . . . see your RCA representative. He can give many reasons why this advanced Tape Equipment is the best buy for you.

MOST EXTENSIVE ELECTION REPORTS EVER PLANNED BY BROADCASTERS

Radio and tv stations and networks are planning the most extensive coverage ever given a national election. An estimated 500 election contests will be covered the night of Nov. 8 by networks, with several thousand staffers and newsmen gathering and narrating the returns with the help of electronic computers.

The network effort climaxes months of preparation. Pre-election political reporting has been more thorough than in any past election. Similarly radio and tv stations all over the nation have provided intensive coverage of campaign developments through news reports, forums, debates and other special features.

Election night returns have proved popular with sponsors, both on a national and local basis. Consumer goods, banks and public utilities are among the advertisers signed for coverage of returns from the polls.

**ABC-TV • Election Night Report** is to get underway at 9 p.m. and will continue until the outcomes of the major races are known. More than 1,000 people will participate in the overall production, which will be fully sponsored by Continental Oil through Benton & Bowles in the Mountain Time Zone and in much of the Central Time Zone, in addition to one-sixth sponsorship by Union Carbide Consumer Products through William Esty. The network said last week that more orders are expected. ABC Radio’s coverage will not duplicate the tv coverage.

ABC-TV will use a Remington Rand UNIVAC computer, which has predicted the outcome of all major elections since 1952. An ABC remote unit will pick up UNIVAC’s forecast from the UNIVAC Service Center in New York about every half-hour on a special typewriter. The network’s staff of 300 in New York will be located with the team of commentators headed by anchor man John Daly at Studio TV-1 at 7 W. 66th St. ABC-TV affiliated stations will present state and local election returns at five minutes before and twenty-five minutes after each hour.

On the equipment side, ABC-TV will use 30 cameras—eight in election headquarters, three at UNIVAC, three at Hyannisport and eight each in Washington and Los Angeles. Twenty-four teletypes and 30 telephones will bring returns to headquarters from staffers in 50 states. Special tv circuits have been ordered to key cities for special reports. Tallies on the special election total boards will be in large size figures on speedometer-like counters, which will be scanned directly by a tv camera.

Donald Coe is producer of ABC News’ Election Night Report.

A special ABC News Election Aftermath, featuring discussion by a group of ABC commentators and comments from political leaders, will be telecast Nov. 13 (Sun. 10:30-11 p.m.). A second ABC News post-election look at the next president and the action he can be expected to take in foreign and domestic affairs will be presented the following Sunday (Nov. 20) in the same 10:30-11 period. Entitled Man and the Mandate, the special report will originate in Washington and New York.

**CBS-TV • From CBS News Election Headquarters at Studio 65 in New York, CBS-TV will go on the air with its Election Night 1960 at 9 p.m. Programming will revolve around anchor man Walter Cronkite. Directly behind him, viewers will be able to see latest presidential vote totals continually posted by the RAMAC 305 on an electronic tally board.**

To speed up the flow of returns to the network, CBS News has constructed a “network” consisting of a telephonic system that ties individual CBS News election headquarters in every state capital to a battery of field phones at Studio 65.

Each state headquarters will have its own sub-network in key population centers, and every change will be telephoned directly to Studio 65. Returns also will be received by teletype over such conventional channels as the leased wires of AP andUPI. Instead of using copy boys, as in the past, to carry the returns across the studio, a conveyor belt will deliver returns to keypunch operators who will type returns directly into the IBM RAMAC 305 computer.

A special “Six Key States” electronic board will be presided over by Douglas Edwards. A bank of some 200 individual tally boards will be divided into four regional groupings of states, from which periodic reports will be handled by correspondents Charles Collingwood (East); Stuart Novins (Midwest); Grant Holcomb (Far West), and Charles Kuralt (South).

Other special coverage areas include: “Composition of Congress” board, with George Herman reporting; the analysis section, with Edward R. Murrow, Eric Severid and Elmo Roper, advisor; live remote unit to report projections and analysis of the new 7090 computer at IBM headquarters in New York, handled by Howard K. Smith, and reports from a half dozen remote units stationed with the major candidates and at Democratic and Republican headquarters in Washington. A group of CBS News correspondents will form a round-table discussion of prospects when the presidential outcome is finally clear.

Presiding over the Central News Desk in Studio 65 will be an executive team headed by Sig Mickelson, president of CBS News, and John Day, vice president-news, CBS News. There will be 170 people in Studio 65 and more than 500 in the field. Westinghouse Electric Corp. through Ketchum, MacLeod & Grove will sponsor the election night broadcast, which will be produced and insisted on panel procedure.

**Audience for Fourth •** A total of 65.5 million people in 25.7 million homes tuned the fourth tv-radio debate, according to American Research Bureau’s overnight National Arbitron. ARB put the three-network tv rating at 57.6. Relatively similar figures were reported by Trendex on the basis of its 27-city report: 62.5 million people, 25 million homes, 54.0 rating.

A. C. Nielsen Co. meanwhile reported its national rating for the first debate, held Sept. 26, showed a total audience of 30,013,000 homes and an average-minute audience of 26,894,000 homes.

An Evening Star Station, represented by H-R Television, Inc.

by Paul Levitan and directed by Vern Diamond.

**NBC-TV** Coverage will be bolstered with predictions from the new RCA 501 electronic data processing system, which will be used for the first time on television and in politics. Network coverage will switch periodically to the RCA Electronic Systems Center at 45 Wall St., New York, for forecasts of the popular and electoral vote. TV coverage will begin with *The Texaco Huntley-Brinkley Report* (6:45-7 p.m.) and will continue after 7 p.m. as developments warrant until 8:30 p.m., when continuous coverage will start.

William R. McAndrew, vice president, NBC News, will supervise the entire coverage from NBC Election Central, which is being set up in Studio 8H in Radio City. Mr. McAndrew will be assisted by Julian Goodman, director, news and public affairs. Elmer W. Lower is operations manager in charge of NBC's own election news service. Reuven Frank is producer of election night coverage. Significance of the returns will be explained by NBC News correspondents Sander Vanocur (East); Frank McGee (South); John Chancellor (Midwest) and Merrill Mueller (West). Anchormen are Chet Huntley and David Brinkley. Richard Harkness will be stationed with the RCA 501, which will be fed returns from NBC Election Central via RCA's DaSpan, the first digital communications system designed to integrate electronic data processing with remote operations. Coverage also will include trend analysis by Samuel Lubell and reports from correspondents stationed with the leading candidates.

NBC-TV's sponsor lineup include one-sixth purchases by Thomas J. Lip- ton (Sullivan, Stauffer, Colwell & Bay- les); Brown & Williamson (Ted Bates); B. F. Goodrich Co. and its dealers (BBDO); Sandura Co. (Hicks & Greist) and Cowles Magazines (McCann-Erickson) and a one-half purchase by Field Enterprises (Keyes, Madden & Jones). Approximately 1/12 of the coverage remained available last week.

The exclusive NBC-BBC trans-Atlantic cable film system will provide Britishers with their first look at the U.S. president-elect sometime between 6 and 9 a.m. (London time) Nov. 9. A two-minute segment of NBC news film, which will take about 200 minutes to transmit, will be televised by the BBC.

**ABC Radio** Election Night Report, with anchorman Bill Shadel heading a staff of analysts and correspondents reporting exclusively on the network, will begin at 8 p.m. Coverage will be sponsored by The Mennen Co. through Warwick & Legler Inc., and Philco Corp. through Maxwell Assoc. Inc. Twice every hour (at 25 and 55 minutes after) affiliated stations will offer up-to-the-minute returns of state and local elections.

John Daly, ABC News chief, and commentator Quincy Howe will be heard on both ABC Radio and ABC-TV with reports and analyses of the

---

**It'll be a field day for the electronic computers**

Television networks will rely on electronic computers for help in toting the millions of ballots voters will cast on Nov. 8. ABC-TV (right, top) will use the Remington-Rand UNIVAC, which Dause L. Bibby (1) Remington-Rand president is explaining to Oliver Treyz, ABC-TV president, to predict the election's outcome. CBS-TV (below, left) will furnish an up-to-the-minute picture of returns with the aid of an IBM RAMAC 305, which Dr. G. Truman Hunter (1) of IBM discusses with Sig Mickelson, president CBS News (r) and Paul Levitan, producer. NBC-TV (below, right) expects to know the results of the election early in the evening with the aid of the RCA 501 data processor. Shown with the unit are (1 to r): Dr. John Mauchly, president, Mauchly Assoc.; Dr. Jack Moshman, vice-president, C-E-I-R Inc.; Arthur A. Katz, RCA manager of the project, and (seated) Carol Guthrie, who will operate the 501 for NBC.
When a man buys shares in a company, he is investing his money to work for him, to earn an income.

When an employee works for a company, he invests his mind and his muscle to earn an income. This he agrees to do: so much investment of his skills for so much money.

The man who invests his money invests his whole dollar—he cannot hold back part of it. The man who invests his skills has a natural instinct to deliver a full day's work for a full day's wages. However, conditions have been developing in many industries that virtually encourage an employee to hold back part of what he has agreed to deliver.

These conditions are weakening the age-old American tradition of a pound for a pound. Correcting them can go a long way toward strengthening the moral fiber of the whole national character.

It is the responsibility of management to use both invested dollars and invested man-hours to the most rewarding advantage of shareholders and employees.

One way to do this is through the manufacture of dependable products for which there is a wide public need. One of Republic Steel's most widely used products is Electro Paintlok® Steel Sheets for such things as garage doors, vending machines, mobile homes, and exterior panels for scores of appliances and cabinets. This electro-galvanized steel is given a special chemical treatment to make paint stick through bumps and scrapes and to keep these products new-looking longer.

These rigid steel sheets—strong as only steel is strong—resist corrosion even when painted surfaces are scratched through.
returns. Don Goddard will report UNIVAC's evaluations and projections of the changing vote totals. Statistician Louis Bean and correspondent Julian Anthony will report trends and features. Other assignments include: Edward P. Morgan (with Sen. Kennedy at Hyannisport, Mass.); Virgil Pinkley (with Vice President Nixon in Whitter, Calif.); Al Mann (with Sen. Lyndon Johnson in Texas); Charles Ashley (with Ambassador Henry Cabot Lodge in Washington); Ed Silverman (Democratic headquarters, Washington), and John Edwards (GOP headquarters, Washington). The entire radio-television program will be coordinated from ABC News Election Headquarters control unit in New York, where more than 300 persons will tabulate and summarize returns. More than 700 other ABC personnel will be on duty in ABC News bureaus in Washington, Chicago, Detroit, Los Angeles, San Francisco and at key affiliated stations.

**CBS Radio** • Lead-off man for the team of newsmen reporting the election returns on CBS Radio will be Eric Severud, whose News Analysis program will be broadcast Nov. 8 at 7 p.m. EST, the time when polls close in some parts of the East. Robert Trout, anchor man for the team, will take up the all-night vigil at 7:05 p.m. and work until the conclusion of the contest. Others on the team include Blair Clark, Bill Downs, George Herman, Allan Jackson, Bill Leonard, Edward R. Murrow, Howard K. Smith, Robert Trout and Dallas Townsend. CBS Radio's Election Night 1960, produced under the over-all supervision of CBS News' Robert A. Skeddell, assistant director of news, radio, will be sponsored by Westinghouse Electric Corporation.

**NBC Radio** • Coverage begins with the broadcast of returns on hourly newscasts throughout the day and a complete summary of latest returns on News of the World from 7:30 to 7:45 p.m. Later developments will be reported on the hourly newscast from 8 to 8:05 p.m., when continuous coverage will start. Radio anchormen will be Morgan Beatty and Robert McCormick. Russ Tornabene is radio coverage producer. Correspondents and their assignments include: Frank Bourgholtzer (East); Peter Hackes (South); Martin Agronsky (Midwest); Elmer Peterson (West); Roy Neal (San Francisco); Louis Lyons (Boston); Leif Eidsvik (Democratic headquarters, Washington), and Ned Brooks (Republican headquarters, Washington).

Sponsors of NBC Radio's election night coverage will be the same as during the network's political conventions coverage. The Mennen Co. and S. C. Johnson Co. each bought one-quarter, while the remaining half goes to the affiliates for local sale.

**Mutual** • More than 140 persons have been assigned to handle various tasks on Election Day. Mutual's programming, timed to begin at 8:50 p.m., is to be presented by the Liggett & Myers Tobacco Co. (Oasis cigarettes) and is part of the conventions-elections news and special programming package sponsored since mid-July by the tobacco firm. Stephen J. McCormick, Mutual news vice president, will be in charge of the coverage operations, which will be on the air until the election pattern is clearly established.

Mutual's own staff of newsmen will be complemented by 43 members of the Mutual Affiliates Correspondents Corps, Newsweek magazine byliners and the network's overseas correspondents. Each is assigned to a specific area of the nation. The network's Washington headquarters will be the central control point for the Nov. 8 broadcast, with MBS commentator Taylor Grant assigned as anchorman. Earliest returns are expected to be broadcast at 6 a.m. during Claude Mahoney's first newscast. These would be scattered reports from rural areas which open the polls after midnight and announce results in pre-dawn hours. Throughout the day results will be carried on Mutual's twice-hourly Operation Newshost newscasts.

The Associated Press announced its election coverage will include some 70,000 election workers who will collect and compile results for the news service's 2,042 radio and tv stations and 1,778 newspapers. Sixty extra wires and hundreds of extra teletype printers, installed in stations and newspapers around the nation, will report the White House race and the battles for 34 Senate seats, 437 House seats and 27 state governorships.

**WATCHDOG STALKS STATIONS**

**NAB interprets Yarborough letter as being interested mainly in equal time complaints**

The Senate watchdog subcommittee spent last week investigating complaints charging campaign prejudice by broadcasters but did not find any examples of unfair treatment of candidates. Hundreds of stations sent files of complaints they had received to the subcommittee, headed by Sen. Ralph W. Yarborough (D-Tex.), according to Creekmore Fath, majority counsel.

They responded in an atmosphere of confusion as NAB, networks, stations and attorneys tried to interpret a letter sent to all broadcasters by Sen. Yarborough (D-Tex., Oct. 24).

This letter was widely construed as a sweeping subcommittee demand for all campaign complaints received from candidates or the public. The letter called for transmission of complaints within 24 hours.

NAB announced, after conferring with Mr. Fath, an interpretation of the Yarborough letter. Tone of the NAB statement indicated the subcommittee's demands bore little relation to the construction placed on the letter by attorneys and networks.

But Mr. Fath made this observation after reading the NAB statement. "Our letter speaks for itself and needed no clarification in the first place." Hundreds of stations "found no difficulty in understanding the letter and in complying with its request for information," Mr. Fath said.

"In every case, with one exception, the station and complainant were able to get together and resolve the difficulty. We've investigated a slew of complaints. After hearing from stations, we contacted them by telephone or telegraph." Chairman Warren G. Magnuson (D-Wash.) of the Senate Commerce Committee described the Yarborough letter as an irritant and minimized importance of the request for complaints. He made his remarks Oct. 25 in a panel session sponsored by the Seattle Chapter, Academy of Television Arts & Sciences (story on page 76).

**Equal Time Issue** • Clair R. McCollough, Steinman Stations, chairman of the NAB Policy Committee, announced after an Oct. 24 conference with Mr. Fath that the watchdog subcommittee was exercising its equal time complaints based on requests of candidates for equal time (see text of McCollough letter below).

This was construed by some industry sources as a major backing away from the demands of the original Yarborough letter, which appeared to make sweeping demands to tell the subcommittee about all complaints dealing with time requests and discrimination in handling of political news, opinion and candidates.

But Mr. Fath, it was felt, made another important concession by requiring records of phone complaints only if a station already is using a system of logging calls.

Accompanying Mr. McCollough at the conference were Douglas A. Anello, NAB chief counsel, and Hollis Seavey, assistant to the vice president.

While this conference was described as clearing up a number of points of confusion, the watchdog subcommittee's original letter was described by one attorney as going beyond the scope of its authority. The subcommittee is em-
powered to examine, investigate and make a complete study of election handling by broadcasters. However, the subcommittee letter to all stations contained this phrase, "...to better assurance fulfillment of the national policy of fairness and impartiality in... these last three crucial weeks prior to our national election." This was construed as subcommittee assumption of punitive powers never intended when it was created. Mr. Fath said the subcommittee merely intends to investigate complaints.

Notes & Angles • ABC networks last week supplied Mr. Fath with copies of a number of complaints received from viewers. They dealt mainly with such matters as broadcast camera angles on a candidate and the use of notes by Sen. Kennedy in a debate with Vice President Nixon.

NBC and CBS had not yet responded to the Yarborough letter as the weekend approached, according to subcommittee sources.

Among complaints being investigated by the subcommittee was one from Roger Kent, Democratic chairman, who charged unfair allocation of time. He specified television stations KPIX (TV), KRON (TV), and KGO-TV and educational KQED (TV) and radio stations KGO and KCBS. All are in San Francisco. Mr. Kent, who sent his complaint to the FCC as well, demanded free time for a Democratic reply to an Oct. 20 address by President Eisenhower, charging it was partisan, an attack on the Democratic presidential nominee and endorsement of the Republican nominee. KQED offered equal time for a reply, specifying either Adlai Stevenson or ex-President Truman as speaker.

Mr. Fath said the subcommittee had asked Mr. Kent for documentary support and the stations for their answers to the complaint.

Around the industry the opinion was expressed by several attorneys that stations were not required to comply with the Yarborough demands, contending the letter went far beyond the subcommittee's study powers.

After the conference with Mr. Fath, Mr. McCollough issued this statement: "Members of the NAB staff and I met this morning with Creekmore Fath, counsel for the Subcommittee on Freedom of Communications. The meeting was held as requested in a wire sent to Sen. Yarborough last week, for the purpose of securing clarification of some of the items contained in his letter of Oct. 14 to all broadcast licensees. Mr. Fath indicated at the outset that the interests of the subcommittee center primarily upon requests for equal time on behalf of candidates and requests for availability of time for political spokesmen and parties. All oral and written complaints regarding the availability of time on the air made since the receipt of Sen. Yarborough's letter that fall within these two categories must be reported to the subcommittee within 24 hours. While some of this information comes within the scope of the FCC questionnaire issued last August, Mr. Fath said that he is interested in receiving this information now so that any irregularities can be corrected before election day. "With respect to telephone calls—anonymous or otherwise—raising questions of discrimination, if no record is kept there is no obligation upon the licensee to set up a method of logging calls and forwarding them to the subcommittee. However, if a record of these calls is presently being kept, the subcommittee expects this information to be forwarded to it.

"We assured Mr. Fath that the industry was most anxious to cooperate and that he would find little, if any, evidence of industry discrimination."

**STRAUS FOR KENNEDY**

**Endorses Democratic slate in broadcast editorials**

What is believed to be a precedent in broadcast editorializing was set last week by the Straus broadcasting group stations (WMCA New York, WBNY Buffalo), which declared their advocacy of Sen. John F. Kennedy for president.

Although a number of stations have taken stands on local candidates and issues in recent years, it was difficult to recall an instance of broadcast editorial support in a presidential campaign.

The stations offered equal time to Vice President Richard Nixon or his running mate, Henry Cabot Lodge, for "any commentary they might care to make at any time or any place that most suits their convenience." There had been neither reaction nor acceptance from them by last Thursday.

The editorials, broadcast Wednesday and Thursday nights at 10:35 p.m., were presented by Nathan Straus, chairman of the Straus group. He preceded his stand for Sen. Kennedy with a description of the FCC's earlier positions on editorializing and the efforts broadcasters had made to earn the privilege of airing opinions. Mr. Straus noted the "Mayflower decision" held that stations could not editorialize without jeopardizing their licenses. "This is an editorial which would have been illegal a decade ago," Mr. Straus said during the broadcast, adding that "the edict seemed unreasonable and unjust. Thus, WMCA determined to broadcast editorials—even though it might risk their license. The problem seemed sufficiently crucial to make an issue of it." WMCA began editorializing in 1954.

The 1941 Mayflower decision was directed against WAAB Boston, owned...
They've been at it eight months

An eight-month series of election year coverage by WNHC-TV New Haven, Conn., Triangle station, has been sponsored by The Union & New Haven Trust Co. By election day, the station will have carried more than 30 specially produced programs. The series is entitled Election '60 Spotlight.

The idea of a wide-range election series was evolved last April by Howard W. Maschmeier, WNHC-TV general manager, with emphasis on what the average man feels about the issues and candidates. Contracts were signed in late April by John Cundiff, WNHC-TV sales manager, and Edward M. Gaillard and Ogden Ross, respectively president and assistant vice president of the bank.

Programs have included debates, quizzing of politicians, man-in-street interviews, news conferences, historical background, pre-convention features, special reports from the national conventions and coverage of state conventions. A 10-man Triangle Station group fed film and audio reports during the national conventions. Over 1,200 service information promos were scheduled.

The bank prepared counter cards for its branch banks. The cards have changeable sections for weekly inserts. Thousands of presidential handbooks were distributed at bank offices. Special commercials were written by Dan Hodges, of Merrell Anderson Co., the bank's agency. They were produced by WNHC-TV.

Election night returns will continue until a President is deemed elected, winding up the bank's series. WNHC-TV will operate two election headquarters to report on state and national returns. They will be located at the station and at the Statler Hilton hotel in Hartford. Each will be completely staffed and two cameras will be sent to Hartford.
the Roosevelt administration and chairman of the Mayor’s advisory committee in New York under Democratic Mayor Robert Wagner. He has been a delegate to every Democratic convention from the 20’s through 1956. Peter Straus, his son, was a Democratic delegate this year.

Political sidelights . . .

Setting record straight - Warten (TV) Albany, N. Y., and WROW, its radio affiliate, were asked by Vincent O’Brien, Henry Cabot Lodge’s news secretary, to submit Mr. Lodge’s actual remarks dealing with possible appointment of a Negro as cabinet officer. The stations supplied an audio transcript which was said to have revealed that Mr. Lodge was misquoted by a wire service. Feeds were given CBS and other stations. The New York Times asked for a transcript, and both AP and UPI heard playbacks of the tape. The audio recording showed Mr. Lodge used the word “predicted” rather than “promised” in connection with the cabinet statement.

‘Vote-Cade Day’ - WBZ-AM-TV Boston will hold a day-long get-out-and-vote promotion Nov. 5. Three separate Voter-Cades will travel a total of 220 miles, visiting 22 communities. Each Voter-Cade will have a police escort, WBZ news wagon, sound truck, fleet of convertibles with station personalities, Dixieland band on a float and a bevy of models who will distribute stickers and balloons. A live telecast is scheduled 4:43 p.m., with the public invited to the studio, and a radio program is planned 6:15-7 p.m. Mayor John Collins of Boston is to sign a proclamation designating Nov. 5 as WBZ-AM-TV Voter-Cade Day. He will present the city’s symbolic key (a bean pot) and scroll to Donald H. McGannon, president of Wistenhouse Broadcasting Co. A grand finale will consist of a torchlight rally in downtown Boston.

CBS scoop - CBS Radio’s World News Roundup program Oct. 24 revealed information contained in an unreleased U.S. report on America’s prestige abroad. CBS News said it learned from unimpeachable sources in Europe that secret American government reports show overwhelming belief that Russia will be militarily stronger than the U.S. in 1970. The network said this is the U.S. Information Agency report which Sen. J. W. Fulbright (D-Ark.) contended the government was suppressing. The CBS broadcast was picked up by the wire services and was mentioned frequently in the press and on other newscasts last week.

Even dozen - Presentation of the six Democratic incumbents and their Republican opponents for the six congressional districts in Philadelphia County began on WIBG Philadelphia yesterday (Oct. 30) and also will be heard Nov. 6, from 1-2 p.m. Newsmen of the Storer station are contacting constituents in Pennsylvania Districts 1 through 6 to obtain questions which they’ll ask the candidates on the program, Philadelphia Speaks Out: The Election, according to John C. Moler, WIBG managing director. WIBG is offering the programs for rebroadcast to other area stations.

Across the board - Debates between Democratic and GOP candidates for several public offices are being carried Sundays by WHEC-TV Rochester via video-tape, with audio portions carried on WHEC later in the day. Formal debates are carrying candidates for Districts 1 through 4 of state assembly and Districts 51 and 52 of state senate.

Over the line - Two half-hour debates by GOP challenger Charles Mathias Jr. and incumbent Democrat John Foley for 6th congressional district in nearby Maryland are being carried by WWDC Washington, D.C. First meeting was Oct. 10, second is today (Oct. 31).

Corinthian seeks views of its political news

A survey conducted by Corinthian Broadcasting Corp. among approximately 1,000 opinion leaders in Texas, Oklahoma and Indiana points up the value of local television coverage of national political conventions and the need for expanded local TV programming on a variety of state and local issues.

Corinthian’s survey was conducted early this month to gauge the impact of its local coverage of the political conventions last July. The major findings of the project were: opinion leaders want to see local TV coverage of national events from their state viewpoint; the localized convention story not only heightened a feeling of personal political participation but also influenced the views of many about the role of their state delegates and about national issues relating to their community; an overwhelming majority of the respondents favored additional local TV programming on state and local issues, ranging from housing to schools to old-age problems.

The results of the study were announced last week by C. Wrede Petersmeyer, Corinthian president, during a news conference in New York. An evaluation of Corinthian’s coverage, which was favorable, was presented by a panel of speakers including Leo Cherne, executive director of the Research Institute of America, New York; Gilbert Seldes, head of the Annenberg School of the U. of Pennsylvania, and Bruce Felkner, executive director, the Fair Campaign Practices Committee.
The sumptuous chamber of the Interstate Commerce Commission was borrowed last week for the FCC's hearing on the first application for pay TV—RKO General's for Hartford, Conn. RKO General counsel W. Theodore Pier- son is at the lectern; on the bench are all commissioners except Commissioner Rosel H. Hyde who is in Mexico on official business. From 1 to 5 are Commissioners John C. Cross, Robert E. Lee, Chairman Frederick W. Ford, Robert T. Bartley, T. A. M. Craven and Charles H. King.

SHOULD HARTFORD PAY FOR TV?

Yes, says RKO General, at FCC hearing on its proposed three-year fee trial; theatre owners and NAB are opposed

The battle of pay TV over the air was joined last week in Washington. The contestants were RKO General, seeking FCC permission to conduct a three-year trial in Hartford, Conn., and Connecticut theatre owners backed by fellow exhibitors throughout the country, opposing this request.

The broadcast industry was barely permitted to express its views in opposition due to the technical legal limitations set on the hearing.

The five-day hearing—which included two night sessions, one Thursday night and one scheduled for Friday—was highlighted by the merciless, two-day grilling of Thomas F. O'Neil, president of RKO General, by Marcus Cohn, counsel for the Connecticut Committee Against Pay TV and five Hartford theatre owners.

In an aggressive, slashing attack, Mr. Cohn charged:
- Pay TV would spell the death of free TV.
- The public would be forced to pay for programs it now gets free over the air.
- Prices to be charged for toll TV are "outrageous."
- If RKO General goes into Phonevision it may be violating the Paramount Pictures consent decree.

The testimony, including stormy squabbling between W. Theodore Pearson, counsel for RKO General, and Mr. Cohn, took place before the full FCC. Commissioner Rosel H. Hyde was absent. He is in Mexico City on commission business. Louis C. Stephens acted as commission counsel.

Three-year Plan • RKO General is asking the commission to approve a three-year trial of the Phonevision system of subscription TV over its ch. 18 WHCT (TV) in Hartford. RKO General bought WHCT earlier this year.

The FCC last year agreed to accept pay TV applications on a trial basis. RKO General is the first and, so far, only such applicant.

Allied with RKO General in the proposed Hartford test is Zenith Radio Corp., developer of Phonevision, and Teco Inc., the company holding the license to promote Phonevision. Zenith began plumping for pay TV in 1948.

Teco only recently announced the employment of Broadway motion picture-tv producer Leland Hayward to produce Phonevision productions.

Hanging in the wings is Congress. There were intimations throughout the last few years when the FCC was considering pay TV that Congress would oppose any sanction of subscription TV. This happened in 1958 when Rep. Oren Harris (D-Ark.), chairman of the powerful House Commerce Committee, caused the commission to back down from its first tentative decision to permit tests. There have been public statements by other congressmen and senators opposing fee TV.

Last week, Rep. Emanuel Celler (D-N.Y.), chairman of the House Judiciary Committee and of its antitrust subcommittee, bluntly told the FCC it should not authorize the Hartford test. Let Congress handle this, he said (see page 75).

Authorize Phonevision or We Give Up • The principal witness for RKO General was Thomas F. O'Neil, president of the company. He was on the witness stand three days, including two days of cross-examination by Mr. Cohn.

Mr. O'Neil made two major points at the outset of his testimony:
- RKO General will have to surrender its license for WHCT unless it can engage in pay TV. The station has lost, or will lose on a projected basis to Sept. 30, 1961, a total of $679,479. This includes losses of $338,037 from Jan. 1, 1959 to June 30, 1960 under its
Mr. O'Neil testified, this three-year subscription TV test will result in a loss of $1 million—even though an estimated $15 million in revenue is projected.

The estimate is based on 50,000 Phonevision subscribers, with each subscriber spending at least $2.50 per week.

About $2.6 million will be spent on procuring programs; the remainder on operating and other expenses.

The pay TV operation, Mr. O'Neil explained, will run from 7 p.m. to 11 p.m. every night of the week. From 5 p.m. to 6 p.m., Mondays through Fridays, educational programs for a fee will be presented.

Also reserved for Phonevision operation will be a three-hour period, from 2 p.m. to 5 p.m. on Saturdays and Sundays, and a 30-minute segment, from 5 p.m. to 5:30 p.m., on Sundays.

This adds up to 40 hours of subscription TV weekly, Mr. O'Neil said. He emphasizes that only 17 of these hours are what he called "un-duplicated." The other time, he explained, was allocated for duplication of programs.

WHCT will continue to operate as a conventional TV station for 30 hours a week, he said.

Films at Night • The basic program fare for the 7-11 p.m. period each night, Mr. O'Neil testified, will be motion picture feature film. Also to be presented in these hours will be legitimate stage plays, opera, ballet and symphony orchestras.

The motion picture segment will be operated like a conventional theatre, he said, with three changes of the bill each week. Each attraction will have two showings an evening.

Sports events will mostly be carried on Saturday afternoons or Friday evenings. Children's programs will be presented on Saturday afternoons and "art" films on Sunday afternoons.

Among educational programs, Mr. O'Neil suggested, might be a medical presentation beamed for physicians and surgeons but closed to the general public.

$10 Installation Fee • A maximum fee of $10 will be charged for the installation of each decoder, Mr. O'Neil declared. Each subscriber will be required to pay up to $75 a week as a rental or maintenance charge. The installation will be cancellable virtually at the will of the subscriber, Mr. O'Neil stated, but if there is no rental fee there may be a minimum of $75 a week required of the customer.

The per program charge will run from 25¢ (for a children's show) to $3.50 (for a legitimate Broadway play), Mr. O'Neil disclosed.

Movie prices will run from 75¢ to $1.50, he said.

Hartford viewers spend 1.5 billion hours yearly watching TV, Mr. O'Neil stated in submitting a study of that market. If all 50,000 subscription customers watched all Phonevision unduplicated programs, he explained, this would mean that subscribers would watch 44.2 million hours a year. This, he said, is a ratio of 2.85%—less than the usual statistical error published for many rating services.

Impact Explained • Excluding WHCT, there are 29,675 hours of telecasting in Hartford per year, Mr. O'Neil pointed out. If the maximum number of hours of pay TV telecasting is 2,080, he said, the ratio would be 7%.

This would mean, he stressed by implication, that there should be no discernable difference in regular TV viewing in Hartford even with a pay TV operation underway.

Only three present WHCT programs would disappear from the Hartford TV scene, he pointed out. These are Open End, Harness Racing and Piano Tops.

Programs comparable to those blacked out on WHCT are carried by other Hartford TV stations, he explained. The bulk of these are feature films, he said.

The basic premise determining whether a program will be acquired for pay TV, Mr. O'Neil stated, is whether it is a "box office" attraction.

This means, he said, that it must be the kind of an attraction which is not carried on conventional TV broadcast stations and for which an admission price is charged.

This refers, he said, to such programs....
as current, first-run movies, concerts or sporting events.

Won't Buy Programs From TV • RKO General will not negotiate for any program or sporting event generally on conventional tv, Mr. O'Neil pledged.

Nor will it take a program ordinarily available for tv, but withheld in the Hartford market because its entrepreneurs hope to sell it to Phonevision, he added.

"It is not our intention," the RKO president said, "to deprive the area of regular, normal tv programs by outbidding conventional tv for the rights. We do not intend to deprive the Hartford viewer of what he can see ordinarily on advertising tv."

Mr. O'Neil offered this point later in his testimony. He said:

"We are not going into competition with conventional tv broadcasters for program material. We will be in competition with movie theatres, legitimate stage theatres and sports arenas."

Mr. O'Neil made it clear RKO General has entered no commitments for programs but said there have been discussions with program suppliers.

After a sharp controversy among the lawyers, FCC Chairman Frederick W. Ford ruled that Mr. Cohn had the right to delve into this subject to a limited extent. Mr. Pierson then entered in the record a list of contacts made by, or in behalf of, RKO General with motion picture producers and other program suppliers. These explorations began June 23, when Mr. Pierson contacted a number of officials of MGM, Columbia Pictures and Warner Bros. in New York.

There were 28 such meetings from that time to the present, the list disclosed. Many were made by Joseph S. Wright, president of Zenith; or by Pieter van Beek, president of Teco. What did these educational institutions (Yale U., Harvard U., MIT, among others) were made by Paul Mowrey, tv consultant hired by RKO General. In addition Mr. Mowrey contacted such other organizations as the New York Philharmonic Society, the Metropolitan Opera Assn., the Theatre Guild, David O. Selznick Organization.

No Commercials • There will be no commercials on Phonevision, Mr. O'Neil declared. Programs may be interrupted, however, for special news bulletins or for special public service announcements, he added during questioning by counsel.

Mr. O'Neil agreed to survey the Hartford audience both before and during his Phonevision operation.

He stated unequivocally he would give other Hartford tv stations permission to engage in Phonevision operation "on fair terms."

He said RKO General would prohibit the resale of programs by customers. There are no plans for color subscription tv at present, he said, although he understands there is a decoder for this. He expressed the hope that WHCT could start operating its pay tv service within six months after the FCC granted the application.

Operations would begin, he noted, when the system had 2,000 subscribers.

Attack On Application • The attack by Mr. Cohn centered on two targets:

• Publicity about the nature and programs to be presented on Phonevision.

• The possible violation of the 1948 Paramount Pictures consent decree which forbids movie producers from owning exhibition theatres.

Mr. Cohn introduced an advertisement in the April 4 Hartford Times that referred to the charge for installation of the decoders as "a few dollars."

Mr. O'Neil and the RKO General application indicated that the charge for decoder installations might run as high as $10.

The same advertisement, Mr. Cohn pointed out, stated that subscription tv programs on WHCT "will occupy only a few hours of the broadcast day." How, he asked, can this be reconciled with testimony that WHCT would turn to pay tv 7 p.m. to 11 p.m. daily?

A brochure issued by WHCT and sent to Hartford viewers, Mr. Cohn noted, speaks of feature films on pay tv such as Ben Hur and other current first run movies. How, he asked, can this be true when Mr. O'Neil has said no commitments have been made for programs and the application specifically refrains from naming any picture or titles?

Mr. O'Neil answered this by stating RKO General intended to provide motion pictures of the caliber of those mentioned in the brochure. Therefore, he said, this was not misrepresentation.

In his questioning Mr. Cohn implied that WHCT had promised the Hartford public that Open End, Harness Racing and Piano Tops would be continued. Mr. O'Neil said he knew nothing of this.

Mr. O'Neil testified that these three programs would be the only ones on WHCT which the public would not receive from other stations in the market.

 Paramount Case • Mr. Cohn elicited from Mr. O'Neil that RKO General still had some interests and income from motion pictures made by the now defunct RKO Pictures Corp. RKO Pictures was owned by RKO General from 1955 to 1957.

At one time RKO had 1,000 pictures under license, Mr. O'Neil said. It now has interests in about 50, he added, of which only 12 or 14 are good for Hartford.

This line of questioning caused Mr. Pierson to object. Mr. Cohn stated he was inquiring into the subject because there seemed a possibility RKO General's entry into pay tv might violate the 1948 Paramount consent decree. He also stressed that because of RKO General's interest in some of the old RKO Pictures features, this would give RKO General a monopoly position in Hartford vis-a-vis local theatres.

Mr. Pierson, attacking the admissibility of the Hartford Times advertisement, remarked that these representations must be weighed against the "climate" in Hartford at the time. He implied that motion picture exhibitors were sowing misrepresentations about
WHCT and Phonevision around Hartford.

Mr. Cohn asked whether Mr. O'Neil was acquainted with the activities of Ted Leitzell in Hartford. Mr. O'Neil said he was not. Mr. Leitzell is public relations director for Zenith.

Cost of Decoders • Terming "outrageous" the charge that is proposed to be made for decoders—up to $10 for installation and 75¢ per week for maintenance—Mr. Cohn claimed that five years ago Zenith told the FCC that the decoder could be manufactured for $50. Mr. O'Neil previously had said the decoder cost could run about $125 each.

If RKO General is now planning to charge 75¢ a week for rental of the decoder, Mr. Cohn stated, this means the decoder cost will be amortized within 18 months. Because of this, Mr. Cohn charged, the cost of the decoder was doubled to "sustain the reasonableness" of the weekly charge.

Mr. Pierson challenged Mr. Cohn's reference to the 1955 Zenith statement. In 1955, Mr. Pierson said, Zenith stated that decoders produced on a mass basis would cost about $50. The 50,000 decoders for the Hartford test, he said, could not be called mass production.

Mr. Pierson called attention, also to Zenith's proposal in 1955 to sell the decoders at $1 per week.

RKO General, he said, has based its arrangement with Zenith on a 50,000-decoder formula. Mr. O'Neil amplified this by stating the cost of decoders to RKO General would be at cost plus 12.5%. Thus, he added, the unit cost could be less than $125, "maybe even $50."

Sex Is A Four-Letter Word • No motion picture without the seal of approval will be considered for Phonevision, Mr. O'Neil stated categorically. "I assume that any picture without a seal would be of such questionable nature," he said. "that we wouldn't want to look at it."

This observation was prompted by questions from Mr. Cohn dealing with sex and offensive scenes in many of today's top box-office motion pictures as well as the common use of "four letter words" in many popular stage productions.

Current films referred to were "On the Terrace," "Suddenly Last Summer," "The Apartment," and others.

At one point Mr. Cohn asked Mr. O'Neil whether there was a correlation between sex and box office attractions. "I'm not an expert on that!" the RKO president snapped.

Motion pictures would be edited to eliminate such improprieties, Mr. O'Neil promised.

The language of stage plays could be overcome in two ways, Mr. O'Neil said. The plays could be taped, and edited, or the play could be "cleaned up" for the performance that was being telecast.

In any event, Mr. O'Neil stated, "the criterion is our obligation as a broadcast licensee . . . ."

Both Sides • Quizzed about policy respecting the showing of controversial movies or plays, Mr. O'Neil expressed momentary surprise that there might be need to consider presenting an opposing viewpoint. He recovered quickly, however, and stated that WHCT Phonevision would follow FCC regulations and policy.

There was much discussion about the relationship of RKO General and Teco.

Zenith will manufacture the decoders and other equipment for the Phonevision test, Mr. O'Neil explained. Teco will help with planning, promotion and programs, he said.

Mr. O'Neil agreed that RKO General's contracts with Zenith provide that that company will receive one-third of RKO General's net profits from Phonevision under certain conditions.

He also identified that the arrangements with Teco call for 12½% of gross revenues to go to Teco.

He emphasized that contracts with program suppliers will be made directly by RKO General and stressed it retains the right to accept or reject any program offered, or time scheduled, by Teco.

At one point, Mr. O'Neil agreed there might be some merit in offering volume discounts to subscribers. At another period of the hearing, he discussed the question of rebates where the TV set goes bad during a Phonevision program. Although he did not want to make a blanket promise, he said, refunds might be in order but this would have to be determined on a case by case basis.

NAB Limited • Heavily constricted in what he could say, Charles H. Tower, NAB vice president for television, told the FCC the Phonevision trial in Hartford would be directly in competition with regular TV broadcasting for programs and for audience.

Competition for product, Mr. Tower stated, will certainly have an effect on what services are available to the public over free TV.

If regular TV broadcasters lose their audiences to pay TV, he said, this will mean a reduction in revenue which in turn will mean a reduction of service to the public.

Mr. Tower's testimony came after vigorous protest by Mr. Pierson against his appearance and the reading of a prepared statement. Mr. Pierson argued...
that Mr. Tower was not an expert on the impact of subscription tv on regular broadcast tv because there had been no real test of pay tv over the air.

He also charged that the NAB executive's statement was argumentative, conclusionary and not relevant to the issues in the hearing. In this he was joined by Mr. Stephens.

Chairman Ford permitted Mr. Tower to take the stand, but denied him the right to read his statement. Mr. Tower was questioned about Hartford programs by Douglas A. Anello, NAB chief attorney. He was cross-examined by Mr. Pierson and Mr. Stephens.

Phonevision, Mr. Tower said, seems to be aimed at the largest audience. Thus, he stated, to the extent it will take audience from free tv and inflict economic injury on broadcasting tv.

The NAB television vice president read a list of high-quality dramatic programs that had been telecast in Hartford over the last year, including such tv hits as What Makes Sammy Run? Turn of the Screw and Moon and Sixpence. He also listed a group of sports events carried by Hartford tv stations in a typical September weekend.

RKO General is not a member of NAB, or of the Tv Code.

CANADIAN TESTS
Now comes a plan for toll tv on credit

With Trans-Canada Telemeter's experimental pay tv in Etobicoke planned for half of the homes in the area (Broadcasting, Sept. 19), a second wired subscription television company has entered the field in Canada.

General Instrument-F. W. Sickles Canada Ltd., Waterloo, Ont., plans to have its new "See Now, Pay Later" system in operation by Christmas, the company reports. A pilot installation of the system in about 2,000 homes on the Canadian side of the border, at Sault Ste Marie, Ont., is being set up in conjunction with Superior Community Television System. A city-wide survey was held in selecting the site. The system will use a Canadian-developed unit which can be connected to any tv set, which is distributed by Charge-A-Vision International Ltd., Toronto. The unit will have three metered channels, one for $1 per hour, another for 50 cents per hour and the third free for special programs and sports events.

C. Ray Harnett, president of Charge-A-Vision, explains that subscribers will pay drop charges customary with community antenna systems and will pay for programs every two months as recorded on their unit's meter. He said his organization will license cctv system operators to use units.

In the early stages the company plans to book post-1948 and second-run films at a flat or block-booking rate for all license installations. Film companies have promised an ample supply of material, according to Mr. Harnett.

The company also plans installations next year at Guelph, Kitchener and Waterloo, all served by community antenna systems and adjacent to General Instrument factory producing units.

Mr. Harnett returned from England Wednesday morning. Under discussion were plans for installations by Redfusion Ltd., London. John McLean is vice president of Charge-A-Vision and general manager of General Instrument operations in Canada. He reported that the parent company, General Instrument Corp. of New Jersey, is interested in Charge-A-Vision for the U. S.

Progress in Etobicoke • Trans-Canada Telemeter last week announced it will have 6,000 sample installations completed in the suburban Toronto community by mid-November. William O. Crampton, operations manager, said installations have been purposely slowed up during the past month because, most of them are now going into apartment blocks where people are moving. TCT aspires to have subscribers representative of all income groups in the Etobicoke area in proper sample proportions. The apartment dwellers will round out the distribution. Mr. Crampton says the 6,000 installations will represent just over half the homes in the area, covering all facets of the middle-income group.

Mr. Crampton explained that certain sections of the area could become heavily saturated but that this would not provide the steady sample needed to show the viewing habits for pay television development. There is a waiting list of Etobicoke residents who want the service, he said.

What Tower couldn't say

"Pay tv promoters are after the nickels, the dimes and the dollars of the many."

"Pious references to 'motion picture film, legitimate theatre plays, operatic performances, educational programs and sports events' are extremely misleading."

". . . if pay tv comes the public is likely to have less choice and will pay a substantial premium to get it."

"Pay tv will be mass, not class entertainment."

Pay tv promoters and performers who want to appear are "so eager . . . to get their hands directly into the public's pocketbook that they may refuse to deal with free tv in order to encourage the development of pay tv. A temporary economic sacrifice may seem to them to be worth what they believe will be the long-term personal gain. . . ."

These, and other equally strong sentiments opposing the Hartford subscription tv trial, would have been expressed to the FCC last week had NAB's television vice president Charles H. Tower been permitted to read his statement.

Challenged by counsel for RKO General, and in some respects by the Broadcast Bureau, Mr. Tower was permitted finally only to testify as a public witness and then only with respect to facts about the Hartford television situation (see main story, page 70). Although NAB chief counsel Douglas A. Anello strove mightily to get Mr. Tower's opinions into the testimony, repeated objections by RKO counsel were sustained.

Supreme Court refuses to review Guterma case

An appeal for review of his conviction, filed by Alexander L. Guterma, was turned down by the U.S. Supreme Court last week.

Mr. Guterma, former president of the Mutual Broadcasting System, was convicted of conspiring to defraud the U.S. government and of failing to file financial reports of the F. L. Jacobs Co. with the Securities & Exchange Commission.

Brooding at the pay tv drama was Leland Hayward, famed theatrical producer who has been named Phonevision director of programs. Mr. Hayward was hired by Tec Inc. to produce plays for pay. He attended several of last week's sessions on the RKO General pay tv application.
Celler: toll tv will obliterate free tv

If pay tv is authorized, free tv will disappear. This is the view of Rep. Emanuel Celler (D-N.Y.), who last week asked the FCC to refrain from approving the Hartford trial.

Mr. Celler, who is chairman of the House Antitrust Committee, suggested that the commission refer the whole matter to the Congress. There are many congressmen, he said, who oppose the introduction of pay tv but have been unable to submit their views because they are busy in the election.

The New Yorker's position was contained in an Oct. 26 letter to FCC Chairman Frederick W. Ford. "... the profit potential of these new techniques," Mr. Celler said, "is such that their introduction may result in the total disappearance of advertising-supported, free-to-the-viewer programming. Indeed, mere experimentation in these techniques is likely to start a trend that will be impossible to control."

Pursuing a favorite theme, Mr. Celler predicted that under toll tv the networks would secure greater and greater control of broadcasting. Mr. Celler has for several years led a fight for tighter network control by the FCC, and for the abolition of option-time practices on the ground they violated the antitrust laws.

He estimated that under pay tv the cost to the average television family for receiving "traditional" program fare would be increased by "at least" $130.

Commission.

He was sentenced to four years and 11 months in prison. He was also fined $160,000, but the U.S. Court of Appeals in New York in July reduced the fine to $40,000.

Mr. Guterma was convicted along with Robert J. Everleigh, a business associate, in January (BROADCASTING, Feb. 1). An appeal filed with the Court of Appeals upheld the original conviction while reducing Mr. Guterma's fine.

MBS is no longer under the ownership of the Guterma interests; it is now principally owned by Minnesota Mining & Manufacturing Corp.

The Supreme Court handed down no opinion in denying Mr. Guterma's plea for review.

Another approach in the catv battle

The battle between tv stations and community tv systems took another new turn last week. This time, a station has charged that a microwave firm is not a "common carrier" at all, as its application stated.

The current battle raging before the FCC in the form of hearings (BROADCASTING, Oct. 24) involves applications for microwave relays to carry tv signals from big cities to catv systems in small communities. Microwave relay firms apply for such construction permits as common carriers.

The latest move by tv station executives, along with a charge of "piracy," was made to the FCC last week by WIBW-TV Topeka, Kan. It was made against the commission's grant of cps to Mid-Kansas Inc. to carry tv signals to Manhattan, Junction City, Salina and other Kansas communities. Mid-Kansas Inc. is owned by Ralph L. Weir Jr. and Robert K. Weary who, WIBW claims, control a franchise for a catv system at Manhattan, Kan.

WIBW's protest to the commission included the usual issue of economic impact. The station also said that the term "common carrier" denotes a lawful, as well as a legal, status and that this status cannot be accorded to a carrier engaged in dealing in converted, or misappropriated, or "pirated" property. For this reason, it is submitted that the commission cannot recognize as a common carrier any enterprise which is known to be engaged in dealing, or proposing to deal in, purloined property." WIBW contended that Mid-Kansas proposes to transmit programs which are not legally owned by the firm.

The station further stated that the term "common carrier," in the sense of point-to-point communications, is relatively modern and its use in the Communication Act is "unique and still in a state of development and interpretation. ..." The commission, WIBW averred, should consider the end use of the microwave system and determine that the proposed operation of Mid-Kansas would not serve the public interest. It must realize that it is dealing with a "unique situation" for the reason that the end use of the "intelligence transmitted affects the public interest. ..."

Mid-Kansas has been granted cps to transmit the signals of Kansas City, Mo., tv stations to the Kansas towns.

Aviation agency outside its balliwick, NAB says

The National Assn. of Broadcasters told the Federal Aviation Agency last week that its claimed jurisdiction over antenna towers is based on an erroneous interpretation of the FAA Act. NAB made this statement in comments filed in the FAA's rulemaking which would require radio and tv broadcasters to submit proposals for antenna heights

Broadcasting, October 31, 1960

First-place in 310 quarter hours ...out of a possible 360 (6 a.m.—midnite, Monday thru Friday).

Share of audience
—mornings, 20;
—afternoons, 19;
—evenings, 23.

According to the July, 1960, Phoenix metropolitan Pulse ...the hottest buy in the Valley of the Sun...
Outlook for an even busier Capitol Hill

The Federal Communications Act will be facing a "lot of amendments" during the next session of Congress. And the administration of the federal regulatory agencies will be the object of a "thorough" congressional inquiry.

These were two of the predictions made by Sen. Warren G. Magnuson (D-Wash) in a talk to 60 broadcasting executives Tuesday (Oct. 25). The chairman of the Senate Interstate and Foreign Commerce Committee was the keynote speaker and the target of comments by seven panelists at a two-hour session sponsored by the Seattle chapter of the Academy of Television Arts & Sciences.

The official question of the evening was: "Is governmental control destroying the American broadcasting industry?" In direct answer to this question, Sen. Magnuson gave the broadcasters a "no . . . but" answer when he said, "I don't think public regulation has gone so far yet as to hamper the industry . . . but I think I speak for every member of my committee when I say the real responsibility rests with the holder of the license."

No Love for FCC • He also said that he is very critical of the FCC and cited the commission's delays and avoidance of the problem of allocations. He observed that the pattern of allocations is now pretty well set, "at least until the military see fit to release part of the spectrum." He said that the next session of Congress would see an inquiry (and he repeatedly emphasized the word "thorough") of the regulatory agencies and predicted a number of changes in the Communications Act.

Referring to the Harris hearings in Congress, Sen. Magnuson said they became a "public spectacle." The American people, he said, gained the impression that the abuses cited were widespread, although such was not the case. However, he added, "I think the industry has come out of it with grace and dignity."

During the panel discussion following his speech, Sen. Magnuson was asked questions concerning the Oct. 14 letter from Sen. Ralph W. Yarborough (D-Tex) to all tv and radio stations (Broadcasting, Oct. 24).

The Witch Hunt • Specifically, Lincoln W. Miller, vice president of KIRO-AM-TV Seattle, asked, "Do you think the witch hunt will subside after the election?" Sen. Magnuson, in answer, minimized the significance of the Yarborough request for prompt reports of complaints, but agreed that the letter was an "irritant." When Mr. Miller asked whether the request was not "walking into the province of the FCC," Sen. Magnuson replied, "We created them. The FCC is an arm of Congress."

Then he observed, "I've never known the FCC to stand up yet to a politically controversial issue."

Members of the panel, in addition to Mr. Miller, included Frank Rosenquist, broadcast counsel for KOMO-TV Seattle; Andrew G. Haley, Washington attorney for KING-AM-TV Seattle; Kenneth Cox, Seattle attorney and special counsel to the Senate Commerce Committee in charge of tv inquiry; Max Bice, manager of KTNT-TV Tacoma; Otto Brandt, vice president of KING-AM-TV, and Nick Zapple, counsel to the Senator's congressional committee.

and locations to the aviation agency for "determination" as to whether they constitute an air hazard or not.

Deadline for comments in the rulemaking is today (Monday).

NAB reiterated its earlier comments to the FCC concerning this same subject (Broadcasting, Sept. 19). It added that the possibility of a broadcaster facing both an FCC hearing and an FAA hearing on an application was exhorbitant in both time and money. The FAA has, in the past, indicated that the FCC has the right to make a final decision on broadcast matters and has even acknowledged FCC jurisdiction over towers, NAB commented.

Comments filed by aviation interests all reported in favor of the FAA rulemaking. The National Business Aircraft Assn. said that it supported the petition submitted by the Air Transport Assn., which petition is sometimes credited. The FCC had already told the aviation agency that the commission alone holds the responsibility to decide whether or not a broadcast station is built (Broadcasting, Oct. 24). with the present rulemaking.

Appeals court backs clear channel edict

The U. S. Court of Appeals last week affirmed a 1959 FCC order designed to protect clear channel stations from excessive interference during the hours immediately following sunrise and preceding sunset.

A request for review and a petition to set aside the FCC's order was made to the court by the Clear Channel Broadcasting Service and WSM Inc., licensee of WSM Nashville, Tenn.

WSM and the Clear Channel Service contended that the commission's order tended to increase "skywave" interference rather than reduce it. Such interference is that produced when radio waves radiated into space are refracted back to the earth by the ionosphere. The commission's 1959 order established the maximum interference that less powerful radio stations, operating on a clear channel frequency, may accord to a Class I station.

In the appeal, the commission denied that its order increased such interference. Instead, the FCC claimed that the order gave Class I stations a measure of protection they had not previously enjoyed. A unanimous opinion by a three judge panel of the appellate court in Washington agreed.

Clear Channel Service stations which carried the case to court were, in addition to WSM, KFI Los Angeles; WFAA Dallas; WHAS Louisville, Ky.; WHAM Rochester, N. Y.; WJR Detroit; WOAI San Antonio; WBAP Fort Worth; WHO Des Moines; WSB Atlanta; WGN Chicago and WLW Cincinnati.
L. A. hearing ends with balky witnesses
MCA VP and Plugola Specialists Refuse to Talk

The FCC California hearing on network programs and who controls them ground to a slow halt last week. Final witnesses, acting on advice of counsel, refused to answer the commission's questions or to produce documents demanded by FCC subpoenas.

For nearly two weeks, the hearing had gone swimmingly. Witnesses had testified freely, or relatively so,swelling the FCC record with detailed descriptions of the manner in which the producers of filmed programs for TV network exposure operate. (Broadcasting, Oct. 17).

Then, on Friday, Oct. 21, came an abrupt change. Taft Schreiber, vice president of another top talent agency, MCA, refused to answer the FCC's questions and to produce a list of the TV network programs for which MCA has acted as selling agent since Sept. 1, 1958. His attorney, Allen Susman, repeatedly attempted to speak for the record in direct contradiction to the rules laid down for the hearing by its presiding officer, FCC Chief Hearing Examiner James D. Cunningham. Mr. Schreiber declared that these rules deprived him of "the effective and knowledgeable assistance of counsel" and left the witness stand and the hearing room (At Deadline, Oct. 24).

For Monday (Oct. 24), the FCC had issued subpoenas for a group of persons whose business involves getting radio and television exposure for products and services of companies other than those sponsoring the programs including free plugs. Some of the subpoenas the U.S. marshals had been unable to serve.

Contrast • The three witnesses who did appear in response to the subpoenas (Dick Fishell of Dick Fishell & Assoc., Mary Rothschild of Promotions Unlimited and Betty Langley) were accompanied by an attorney Oliver B. Schwab, who asked that the subpoenas be quashed.

Mr. Schwab argued that his clients are public relations practitioners, engaged neither in programming nor advertising, and so are outside the scope of the FCC inquiry. He said that to put on the record the information asked by the FCC would reveal competitive information and violate the confidential relationship of these public relations people and their clients, and that the ground rules of the hearing procedure (and of all such administrative hearings) are unfair and perhaps illegal.

On the last point, Mr. Schwab stated that under the administrative procedures act a witness is entitled "to be accompanied, represented and advised by counsel," whereas the rules of the FCC hearing limit the witness to being "ac-

panied and advised, but not represented, and that's not enough." He suggested that this is a matter to be settled by the courts, perhaps the Supreme Court, and offered to prepare a written brief for the FCC to consider before insisting on calling his clients to the witness stand.

Mr. Cunningham rejected that proposal and stated that he would not have even commenced the present hearing if he had had the slightest doubt as to the propriety of the ground rules.

Ashbrook P. Bryant, chief counsel of the FCC broadcast bureau, replied to Mr. Schwab's other arguments, stating that no witness had at any time during the proceedings been asked to reveal any information which "he might legitimately claim to be confidential or competitive."

Broad Vista • As to the relevance of this information to the hearing, Mr. Bryant asserted that the scope of the FCC inquiry was broad enough to cover any and all types of broadcast material.

Mr. Cunningham reserved decision on Mr. Schwab's motion to quash the subpoenas until the following day. On Tuesday morning he denied the motion and ordered the hearing to proceed.

Mr. Schwab said he has the right to appeal to the full FCC within five days, adding that "I feel the appeal should be made and I intend to make it." After a discussion with Mr. Bryant as to the proper procedure, he permitted Mr. Fishell, Miss Langley and Miss Rothschild to be sworn in and then to decline to testify on advice of counsel.

One witness who did appear to testify on the matter of free air plugs was Adolphe Wenland, at one time known as "king of the giveaways." Mr. Wenland was subpoenaed for Monday. But because he was to be out of Los Angeles that day he was permitted to testify at a special session on Saturday (Oct. 22). He gave his present business as Fairfax Productions, producer of TV commercials. This company was formed in August 1959, Mr. Wenland said. For the preceding 12 or 14 years he had been engaged, as Wenland Enterprises and Adolphe Wenland Assoc., in public relations, chiefly in providing prizes and props for radio and TV shows. Before that, he had his own advertising agency, he stated.

Publicity • Beginning by providing prizes for radio audience participation shows like Bride & Groom, Queen for a Day and Stop the Music and subsequently moving into television, Mr. Wenland said his activities were largely confined to providing things that would get publicity for his clients, who paid him for his work. Usually, those things

Broadcasting, October 31, 1960
were products manufactured by his clients, he said, but not always. Once he gave away Abbott and Costello (to make a benefit appearance for a charity selected by a Stop the Music contest winner) to publicize their new motion picture at that time. For another movie he gave away a trip to the North Pole.

Asked if he hadn’t attempted to get oral plugs for his accounts inserted into scripts of radio shows, he replied, “We welcomed any opportunity to get exposure and if there was a chance in a script to get favorable mention for a product we naturally grabbed it.” In television, he furnished props of merchandise as well as prizes, he said, with the manufacturers paying the cost to get the exposure of their products. He generally was engaged on a retainer basis, although sometimes for a particular program.

Much of his business came from advertising agencies who came to him to get this type of publicity for their accounts, Mr. Wenland testified. He also let his many motion picture set decorator and art director acquaintances know that he could supply props at no expense to them, so he had a flow of demands for this service from a number of independent producers operating on low budgets and glad to save on prop costs. As television developed the rerun pattern, he noted, the demand for recognizable articles of merchandise declined, because of possible sponsor conflict.

Asked about the practice of paying to get a product mention into a broadcast, Mr. Wenland said he knew of the practice which was called by “various names such as ‘payola’ or ‘plugola,’” but he did not say whether he had ever engaged in it himself.

Thank you • At the conclusion of the Los Angeles hearing on Tuesday, Mr. Bryant thanked all of the witnesses who had voluntarily testified and provided exhibits which will aid the FCC and Congress in their efforts “to create a pattern of regulation of the broadcast industry which is fair and equitable all around and in the public interest.”

Examiner Cunningham said that on his return to Washington, he will prepare a memorandum proposing “that the FCC forthwith start court proceedings to compel Mr. Schreiber to testify.” He added that it will also mention the other witnesses who had declined to answer the commission’s questions and that those who had not been served to appear would be, either in Los Angeles or Washington.

The next phase of the hearing is expected to be held in New York, where the producers of live programs, such as David Susskind and Hubbell Robinson and Robert Saudek, will be questioned about their operations and their relations to networks, advertising agencies, talent agencies and others. Following this, the networks will be invited to testify in Washington at what is expected to be the final session of the FCC’s investigation into network broadcasting.

Court upholds NLRB decision

Review of a National Labor Relations Board decision that found Wichita (Kan.) Television Corp. (KARD-TV) had committed unfair labor practices was denied Oct. 24 by the U. S. Supreme Court. The board had held KARD-TV threatened and questioned employees about activities on behalf of International Alliance of Theatrical Stage Employees & Moving Picture Machine Operators, Local 414. KARD-TV contended in its appeal to the court that NLRB prevented it from asking striking employees if they had participated in admittedly serious acts of misconduct. The Supreme Court issued no opinion in refusing to review the NLRB ruling.

A period of ‘reasonable leniency’

The FCC is going to be “reasonably lenient” in enforcing new laws governing sponsorship identification. That is, the commission is going to be “reasonably lenient” until it can adopt rules implementing the recent amendments to Sec. 317 of the Communications Act.

Chairman Frederick W. Ford told a Federal Communications Bar Assn. luncheon in Washington Tuesday (Oct. 25) that until such rules are adopted, the commission’s best guide in dealing with specific situations affected by the law will be a “common sense” application of the law’s underlying principles.

He told the FCBA he anticipates that the basic rules ultimately adopt-

PHOENIX, ARIZONA
PHOTOJOURNALISM

Candid statement of a national magazine editor about the recent use of pictures in magazines: “We must be dull, safe and non-controversial in a profound way.”

Nothing is further from dulness in the field of photojournalism than television. TV news is cogent, unsalted and dramatic; the eyewitness’ impressions are valid! Whereas, the editor of printed circulations may omit pictures offensive to various subscriber groups, the TV camera tells all that it sees.

On-the-spot telecasting is imbued with the significance and truth of situations which otherwise would be vapid. The eyewitness is the interpreter before TV’s photojournalists, unswayed by any editor’s partisan opinion or ineptitude.

The older an incident, the less it is news! Only immediacy can give validity to news. No ink ever dries on television news. The 1960 political conventions were household experiences before the first stick of type came off the linotype machines. No misinterpretation or typographical errors distort the telecast. The competence of the paid subscriber to assess the significance of events may be unseated by ‘‘editorial policy”, but the lens of the TV camera heeds no one’s whim or fancy.

Turn to KOOL-TV, CBS CHANNEL 10 at 6 P.M. tonight for DOUGLAS EDWARDS NEWS, and First National News at 6:15 P.M.

EQUIPMENT & ENGINEERING

Tv space satellites: months or years?

NEW NASA POLICY WHETS COMPETITION; PREDICTIONS, CAUTION CLASH

The race for space with experimental intercontinental television relay satellites appears to be turning into a typically-American free enterprise scramble. Cooperation among private industry, government and military now seems well spiced with competition.

The race now is being discussed in terms of months instead of years, but predictions of actual operational orbiting are highly speculative and subjected to sharp criticism by others who profess inside sources too.

The door to competitive private industry entry into the space communication field was opened by the National Aeronautical and Space Agency in a new policy Oct. 12. NASA said it will cooperate in such projects and provide launching components at cost (Broadcasting, Oct. 17).

Promptly, American Telephone and Telegraph Co. said it is going into space and asked FCC to permit actual commercial tv relay testing (AT DEADLINE, Oct. 24). International Telephone and Telegraph Co. also is known to be interested in such space systems and British experts on the subject now are touring the U.S.

How optimistic are the predictions running? Here's one example:

Dr. William L. Whitson, vice president of Martin Co., maker of the new Titan intercontinental rocket that becomes operational for the military in 1961 as a nuclear warhead missile, predicted last week that an economical, "sophisticated" active communication satellite would be in orbit "not too many months from now." It would circle 22,000 miles above the equator in a relative fixed position and would be capable of handling two television channels between the U. S. and other parts of the world.

Speaking before the Denver regional conference of the NAB (see story page 50), Dr. Whitson said Martin's Titan rocket undoubtedly would be the booster vehicle to put the new satellite into orbit. But he didn't disclose the name of the satellite, who is producing it, or who would order its launching and pay the bill.

Which Way Up • Conversely, AT&T, which on Oct. 21 announced plans for its own communication satellite system to provide regular commercial tv and telephone space relay, did not disclose how it planned to get its satellites up there. It's leaving that part to the National Aeronautics and Space Agency which last week didn't know either. It's too early, NASA said, but there are rockets that will do it.

There's no connection between the Martin project and that of AT&T, however, and Martin points out it is not going into the communication satellite field in competition with AT&T. Its business is rockets, it said, not satellites.

Although Dr. Whitson did not give more specific details about the Martin timetable or the new satellite involved, another company source placed the date possibly as early as next spring and identified the satellite component as the Advent, a communication satellite now under development by the U. S. Army. But a few weeks ago, when the Army's storage-repeater communication satellite Courier (manufactured by Philco) went into orbit, it was reported that the Advent project was based on a four-year timetable (Broadcasting, Oct. 10). Other sources also claim the Martin estimate is "exaggerated."

If the Martin estimate proves accurate, it would pre-date the initial experimental satellite planned by AT&T. The telephone company has asked FCC approval for its new "mobile" space station and has petitioned the commission to allocate frequencies for regular commercial relay service to England and Europe.

Networks Prepare • Are the tv networks ready for the big transoceanic leap? They are planning, but their outlook is cautious, a check of network representatives disclosed last week. By the time such satellite systems become operative, the networks probably will use them for some spot news or special events programming.

This tiny traveling-wave tube is heart of AT&T satellite that late next year will get boost into orbit by NASA-supplied rocket (at cost). Tube will amplify very broad band (100 mc) signals as much as 10,000 times. Tube's output is 2 w. For reversible one-way tv service, the terrestrial terminal will transmit to the satellite in the 6775-6875 mc band. Satellite repeater will shift incoming signal by 350 mc and transmit back to earth on 6425-6525 mc band. Horn-reflector antennas and low-noise maser amplifiers at earth stations will make it possible to pick up faint signals from the satellite.
There are hurdles in language and time differentials however, but video tape storage will help meet the problem. There is little expectation at present that entertainment shows would go intercontinental via the satellite relay. Film and jets serve too well just now.

The significance of communication satellites for intercontinental tv has been emphasized by leading authorities for some time. "The tv satellite is mightier than the ICBM," according to Arthur C. Clarke, English scientist. He predicted the impact of tv-in-the-sky upon the illiterate masses of Africa and Asia "may well determine whether Russian or English is the main language of the future" (BROADCASTING, Feb. 9, 1959).

"Satellites are of almost immediate commercial utility," predicted Dr. Lloyd V. Berkner, president of Associated Universities Inc., the organization of major universities which are involved in top scientific projects.

Martin's Titan • Dr. Whitson pointed out that the Thor rocket that placed NASA's Echo (10-story aluminum balloon, passive reflector satellite) and Army's Courier into orbit, "a most excellent one of its type, uses a single engine with 150,000 lbs. of thrust plus an upper stage. Titan produces 300,000 lbs. of thrust in its first stage engine, plus 80,000 lbs. in the second stage." He envisioned "the tremendously greater satellites" that will be placed into orbit by the Titan, which also will have a guidance system "more accurate" (completely internal) even than the Atlas. "which is now the nation's heaviest space booster."

Dr. Whitson said the Titan soon will be in the space program (it made its 18th successful test launching at Cape Canaveral Oct. 24) and "one of Titan's tasks probably will be that of placing large, sophisticated communica-
tion satellites in geosynchronous orbit. This is certain-
ty because Titan I and Titan II are simpler and more reliable than any large rocket systems so far devised."

Noting how crowded the two U. S., Europe ocean telephone cables and radio frequencies (5-20 mc band) have become, Dr. Whitson observed it will be imperative soon to transmit more and more information throughout the world. He said "intercontinental television is a pleasant dream, but 19 television channels would be necessary to provide two television channels, not to mention complex signal separation and synthesizing equipment at the cable terminals."

"Now here is what can be accomplished with one sophisticated satellite placed in orbit 22,000 miles over the equator. This can be done with the Titan booster and the Lockheed Agena B third stage which would carry the satellite," he continued. "At this altitude, the speed of the satellite would match the rotation of the earth, so that from the ground the satellite would appear motionless, hovering over one selected region of the earth.

Three such satellites would cover the entire earth's surface, observers note.

Cost Factors • "This satellite would provide the relay of two channels of tv, or one tv channel and 600 or more voice channels between the U. S. and Europe. This plan is assured of an immediate commercial market, it is comparatively simple and inexpensive and it could be placed in operation within a short time," he said.

Dr. Whitson pointed out that the AT&T system encompasses 50 satellites and 26 ground stations, to cost about $170 million, but the single 22,000 mile high satellite "would cost only $37 million, including operation costs for two years." Ocean cables cost $500 million, he said.

The Martin official concluded, "We are on the threshold of reliable, swift, almost limitless and distortion-free communication . . . the techniques exist now for putting that satellite into orbit. I predict such a system will be up there revolving around the earth not too many months from now."

AT&T's Satellite • AT&T hopes to get its first of many satellites into orbit sometime late next year. The project would be financed and operated by AT&T in coordination with telephone administrations abroad in the same manner that cable and radio facilities have been handled for many years. Once under way, the AT&T satellites would cost about $1 million each to construct and launch.

The AT&T satellites each would weigh about 175 lbs. and would be 4 ft. in diameter. About 60% of the surface would be covered by solar cells to power the internal gear. The initial ground station will be at Bell Telephone Labs' Holmdel, N. J., installation.

AT&T said the satellites will help answer the growing demand for overseas circuits. Overseas phone calls this year alone will total some five million, double the number handled five years ago. AT&T estimates the overseas traffic will hit 100 million calls 20 years from now.

The satellites will orbit at about 2,200 miles. Each satellite would be capable of transmitting for periods up to about 35 minutes three to four times a day. Each could handle one tv service (one-way) or 25-100 telephone circuits.

FCC Petition • AT&T in its petition to FCC said that its research has "reached a point where commercial service trials of space communication between the United States and the United Kingdom and western Europe should be initiated." Space in the 6425-6925 mc band is sought. AT&T predicted that requirements for overseas services by the year 1980 "justify provision of a minimum of four blocks of frequencies each 500 mc wide, or alternately, 16 bands of about 125 mc." AT&T said it probably would petition for additional frequency assignments later.

International experts at the three tv networks are optimistic on the technological progress indicated in proposed tv satellite operations but are cautious as to the practical application over these facilities.

Intercontinental television ought to be in the experimental stage within two years, according to Don Coyle, vice president in charge of ABC International, while William Lodge, CBS-TV vice president in charge of affiliate relations and engineering, noted that predictions of international live tv considered "absurd a year or two ago" appear at a state where now "reasonable people are looking at this as a real
possibility." Mr. Lodge has been in contact with AT&T which he said appeared to be making "tremendous progress."

Both men, along with Clifford Slaybaugh, director of international enterprises at NBC, find the greatest drawback for international TV use—so far as networks are concerned—is in the time differential and the differences in tv standards (along with the language barrier).

No Space Cowboys • While these limitations might be mitigated in cases of major news and/or a special presidential speech, an Olympic game telecast, an inauguration or coronation etc., they are nearly prohibitive in entertainment programming. Simply stated: there's no point in telecasting an entertainment program instantaneously overseas or reciprocally from overseas points to this country when fast jets can get film or tape to a foreign country in nearly the same time lag. (The lag period is necessary because it is assumed an entertainment show would be "stored" and then played back—Europeans would receive prime-time U.S. telecasts in early morning hours if beamed direct).

ABC, Mr. Coyle explained, has been concentrating in Latin America for this reason (there is no serious time differential and thus no major "storage" problems).

He does envision the possibility that in time to come the networks might find it feasible to lease satellite-feed facilities in order to guarantee coverage to certain countries for specialized international advertising firms. (For example, all English-speaking countries.) But this, he admitted, is far in the future.

Technical topics...

Center under construction • Emporium, Pa., is the site of a lavish new plant being built to house the electron tube research and development center of Sylvania Electric Products Inc., a subsidiary of General Telephone & Electronics Corp. Included will be a 42,000-square-foot facility to accommodate research activities on Sarion cathode-coating and various types of "stacked-tubes."

A portion of the new building will be made available to the division's chemical research branch, which is currently in three separated buildings there. Occupancy is planned for mid-1961. The plant was designed by Sylvania's Facilities Planning Office, Williamsport, Pa. John H. Eisele Co., N. Y., is constructing the first stage. Additional buildings, still in the planning stage, are scheduled for completion in 1963.

Sales picture • Foto-Video Electronics Inc., Cedar Grove, N. J., tv operational and test equipment and related electronic equipment, reports a new sales record for the fiscal year ending Sept. 30, with net sales reaching $364,000 compared to $339,000 for the like period in 1959. The month of September was the company's best single month, with net sales of $75,000. Foto-Video's backlog of unfilled orders as of Sept. 30 totaled $500,000, contrasted to approximately $100,000 on the same date in 1959. A sales volume of $700,000 is predicted in 1961.

New plant • Adler Electronics Inc., New Rochelle, N. Y., has constructed a new plant at Pelham, N. Y., which will more than double the company's production capacity. The 55,000-square-foot facility will open Nov. 1 with a pilot force of 150 employees. It will house a major portion of Adler's manufacturing operations. The company is a leading supplier of transportable communications systems, low power tv transmitters and repeaters and missile ground support systems.

Zenith breaks ground • Zenith Radio Corp. will break ground in November for a new manufacturing plant in Paris, Ill., for production of radio receivers and electronic components. The one-story structure will be built by Central Electronics Inc., Zenith subsidiary, for completion by June 1, 1961. Zenith Sales Corp. also announced the company's entry into the miniature radio field, with an all-transistor, shirt-pocket model, the Royal 50.

Emerson Dividend • The board of directors of Emerson Radio & Phonograph Corp., Jersey City, N. J., has voted a 3% stock dividend payable on Dec. 15, 1960 to stockholders of record on Nov. 14. Cash will be paid in lieu of fractional shares.

‘Orbiting’ the U.S.

Team of United Kingdom communication experts currently is touring the U. S. to discuss communication satellite problems with government agencies and private firms. They met at FCC Tuesday, NASA Wednesday. Other stops will include AT&T, IT&T, RCA, MIT and Stanford.

Canada's BBG has political problems

Political interference has been charged against the Canadian Board of Broadcast Governors by members of the Liberal Party at Peterborough, Ont. The charge was lodged on Oct. 21, following the use of filmed commercials for an Oct. 31 federal by-election at Peterborough.

Liberal candidate C. Donald Munro has demanded the resignation of Dr. Andrew Stewart, BBG chairman, on the basis that his conduct "can only be construed as an admission that the board has lost its independence due to clearcut political pressure." The charges were backed by the National Liberal Federation, which demanded an investigation following the showing on Oct. 20 of the first of 19 dramatized commercials on behalf of Progressive Conservative candidate Harold Matthews.

Mr. Munro claims that he asked CHEX-TV Peterborough, if films could be shown of his meeting with workers at different factories in the area. This was turned down by the station as being a dramatized program, not permitted under BBG regulations for political candidates.

The Conservative candidate was also turned down for a similar film commercial. A ruling was obtained by CHEX-TV from the BBG, and BBG counsel William G. Pearson rejected both applications.

Then, it is charged, CHEX-TV salesmen Sam Lee, a member of the Conservative campaign committee, approached Allister Grossart, Progressive Conservative national organizer at Ottawa, and he took the matter up with the BBG. He received a letter from Dr. Stewart approving the film commercial as outlined by Mr. Grossart, and this letter was forwarded to CHEX-TV.

The result of the airing of the film commercial, besides the charges of political interference by the BBG, is a notification by the BBG to all Canadian TV stations that they are free to use the same kind of films in future political campaigns without fear of breaking the non-dramatized and non-theatrical regulations of the BBG regarding political broadcasts.

Canadians can expect higher license fees

Canadian independent radio and television stations are expected to begin paying higher transmitter license fees to the Canadian government in the coming fiscal year, starting April 1. The increase is expected to be substantial as no change in fees has been made for a number of years. The increase will be based on gross revenue.

Canadian stations have been paying transmitter license fees to in part defray expenses of the Dept. of Transport licensing organization, at one time the fees helped pay for the operations of the Canadian Broadcasting Corp. Now the government is understood to have decided the fee increase to help pay for the operations of the independent regulatory body, the Board of Broadcast Governors, and part of the operations of the telecommunications section of the Dept. of Transport.

Fees are not paid by the government-owned CBC; but by the 58 TV stations, 201 radio stations and 29 FM stations owned by independent operators.

The increase is expected to be 1 1/2% of gross revenue, as recommended by the last Royal Commission on Broadcasting, which made its report three years ago. It will most affect major city stations, who have been paying a maximum of $6,000 annually on gross revenue of $400,000 and up. Minimum present fee is $100 for stations grossing $25,000 or less a year.

SECOND TV NETWORK
BBG announces how it will regulate its operations

Applications for a second Canadian television network in competition to the Canadian Broadcasting Corp., will be heard at Ottawa by the Board of Broadcast Governors on Nov. 29. The BBG has announced that it favors a wholly Canadian-owned company and that non-Canadian interests are limited to 25 percent interest under the Canada Broadcasting Act.

The BBG has ruled that the CBC, being designated in legislation to carry on a national service with its own stations and affiliated independently-owned stations, needs no permission from the BBG to operate a network. But all others desiring to operate a television network require BBG permission.

BBG regulations define a network as any two or more stations with agreement to broadcast a minimum of eight hours weekly on the network in reserved time. In practical application the BBG has announced that it will give preference to a company which is prepared to assure some microwave or coaxial cable connection between affiliated stations, which has the largest number of affiliates and plans to seek additional affiliates, and uses a minimum of 10 hours weekly in network broadcasting with provision for further growth.

BBG will give preference to a com-
pany which provides the opportunity for participation, without control, by affiliated stations. The BBG has stated at various times it does not want stations to own and control a network, but that station affiliates could own up to 49% of the network company's stock.

The BBG has pointed out that there is no provision in the Broadcasting Act which gives the BBG authority to require licensees to operate as part of a network other than a network of the CBC. The BBG states it has no authority to intrude into the negotiations between a private network and licensees. A private network can thus be formed only through the voluntary affiliation of licensees on terms acceptable to them and consistent with the Broadcasting Act and its regulations. The BBG is prepared to adjudicate disputes between network operators and affiliates during the terms of the affiliation agreements. The network operator is responsible for the programs carried on the network.

To permit temporary networks the BBG will grant permission for such networks for periods not exceeding 30 days. Applications for video network company license must be received, with a minimum of 20 copies, by Nov. 14 at BBG head-office at 48 Rideau Street, Ottawa, Ont.

CHAN-TV begins operations

CHAN-TV Vancouver, B. C., ch. 8 station, is scheduled to become the second newly licensed tv station to go on the air as a second station in a Canadian city today (Oct. 31). The station has eight newscasts scheduled from sign-on at 4:30 p.m. until it closes at 12:30 a.m. Besides the newscasts CHAN-TV will have a number of daily live local programs for children, people behind the headlines, a show about happenings in the Vancouver area, and a variety show.

Today's opening is 18 days ahead of schedule. The station is not affiliated with any network, but will be part of the second Canadian tv network when it begins operation.

Montreal tv plans announced

CFCF-TV and CFTM-TV Montreal, Que., English and French-language stations, will go on the air in January as second stations in those languages in Canada's largest city. CFCF-TV on ch. 12, will feature local news, weather and sports programs up to 15% of program content. Station anticipates supplying close to 55% Canadian content programs from the start, with some programs to come from other Canadian stations.

CFTM-TV on ch. 10, is expected to start with 60% live programming. Canadian content is expected to be 70% of total programming.

Canadian billing outlook

Advertisers this year will spend $90 million on Canadian television and $72 million on Canadian radio, according to an independent forecast made by Maclean-Hunter Pub. Co.'s research department at Toronto. The survey shows total to be spent in advertising in Canada for 1960 to be $278 million, with daily newspapers accounting for $156 million, or slightly less than radio and television combined.

The survey, covering advertising expenditures in all media in the post-war period, shows both radio and television climbing at more rapid rate than other media. Last year the survey estimates the total was $270 million, with radio accounting for $67.3 million and television $80 million.

BROADCAST ADVERTISING

Harry P. Somerville, 71, retired vp of Broadcast Music Inc., N. Y., died Oct. 25 from effects of fall suffered last month.

in dreams, i run...

It's only in dreams that this little girl is able to run. In life, she's confined to her wheel chair, as are the thousands upon thousands of other young children stricken by muscular dystrophy. There is, at present, no effective treatment for this progressively crippling and ultimately fatal disease.

But there is hope. It lies in the massive research program sponsored by MUSCULAR DYSTROPHY ASSOCIATIONS OF AMERICA, Inc. Please back medical science in its race against time. Support the MARCH FOR MUSCULAR DYSTROPHY

MUSCULAR DYSTROPHY ASSOCIATIONS OF AMERICA, INC.

1790 Broadway, New York 19, N. Y.
WAGA-TV polls audience on favorite TV programs

Viewers of WAGA-TV Atlanta have been invited to compete for $13,555 in prizes by picking the shows on that channel each night that they think will be most popular (those the majority of other contestants will pick). Entries in the copyrighted contest will be transferred to Remington Rand Univac cards and judged electronically. Each contestant picks his choice for the most popular new show and gives his reason in 50 or less words in case of ties.

Entry blanks were distributed by cooperating merchants, in buses and included as a four-page insert in the Georgia edition of TV Guide. Exploitation includes a group of nine college students garbed as CBS stars roaming shopping centers and downtown streets to distribute the blanks. WAGA-TV personalities have taped spots in front of billboards displaying the prizes.

Newspaper and magazine ads are also used.

Prizes include a 1961 Ford Falcon (first prize), 10-day vacation trips to Hollywood and New York, 10 Philco portable tv sets, $2,000 worth of Bell & Howell camera equipment and $5,000 worth of Universal appliances. Advertisers and agency executives can get into a special contest matching their choices against the viewers’ to win a prize. The station has arranged to send all agency people who enter a summary of results plotted against rating service results for the same time periods.

Take your pick

Some took the bus and some took the train, as WNDU-TV and WSBT-AM-TV conducted rival football excursions for Chicago agency representatives Oct. 15.

WNDU-TV, highlighted its fifth anniversary by playing host to about 70 midwestern timebuyers at the Notre Dame-Michigan State football game on the Irish campus.

Buyers from 25 Chicago, Detroit and Indianapolis agencies and some clients were transported by bus from the Windy City and entertained as part of the stations’ annual football party. Buyers saw a short video-tape market presentation, lunched in Notre Dame’s faculty dining room, saw the game, and attended a reception and buffet dinner during the 14-hour day.

Special guest at the luncheon was FCC Commissioner Robert E. Lee, who reiterated his position on uhf. Commissioner Lee also addressed students of the WNDU-TV Notre Dame telecommunications classes. He discussed the commission’s plans for expanding the New York uhf test (Broadcasting, Oct. 10).

The buyers gathered at Chicago’s Prudential Bldg. at 8 a.m., with Howard B. (Howdee) Meyers, vice president in charge of Venard, Rintoul & McCon nell’s Chicago office, WNDU-TV’s sales representative, and various station executives as hosts. They were greeted on the ND campus by W. Thomas Hamilton, general manager of WNDU-AM-TV, and other station personnel.

In terms of longevity, WSBT’s parent South Bend Tribune probably claims the record, with the station hosting such parties for 25 years. But in this instance, the buyers took the South Shore Lines, were met at WSBT-AM-TV by chartered busses and taken to the WSBT-TV Broadcast Center for cocktails and lunch, with Neal Welch, general manager, in charge.

In both cases the score came out the same—Michigan State 21-0 over Notre Dame. This year, WNDU radio inherited the radio rights to Notre Dame football coverage. WNDU-TV enjoys the local and syndicated (by video tape recording on the following day) rights. WSBT lost radio rights following the recent death of its sports director Joe Boland.

What the ladies think

WGBF Evansville, Ind., drew 25,693 responses from women in its listening area in a survey polling their taste in radio. The questionnaires were part of buyers’ guides distributed to women participating in the station’s Community Club Awards campaign. Incentive was $100 in CCA credit for their organizations to each lady answering each questionnaire on the specified date.

The profile of the Evansville distaff market revealed: that 68.5% dial specific programs at specific times; that 51.4% listen to the radio primarily for music; that the kitchen is the most popular spot to listen (59.9%); that if the ladies could keep only one they would choose television (42.7%), radio (38.9%) and newspapers (18.3%); that over 30% spend more than four hours per day listening to radio.

The survey findings have been issued
Nebraska corn pickers

A crowd estimated at 9,000 attended the ninth annual Nebraska State Mechanic Corn Picking Contest, sponsored by WOW-AM-TV Omaha. Spectators came from five states to view the contest between man and machine, standing for five hours while 24 contestants reaped the corn harvest.

'Joe sent me'

The Roaring 20's were revived by WHNB-TV New Britain, Conn., at a party thrown for some 150 guests Oct. 13 to promote the ABC-TV show, The Roaring 20's. Antique autos were parked in front of the studio and a gas light burned outside. The 30 hostesses were dressed as flappers; no one was admitted who did not know the password—'Joe sent me.' The studios had been transformed into a speakeasy with appropriate props and decorations. As guests left they were given program information sheets and promotion kits.

'Miami Undercover': new adventure in sales

A retail action promotion plan designed to strengthen sponsor-show ties in connection with Miami Undercover, Ziv-United Artists' new adventure series, is being hailed as an industry first by its originators. The plan, a twin-pronged affair, features (1) a contest, "Two-for-the-Sea-shore" which offers a trip to Miami for two and (2) a retail action kit featuring various display and advertising aids including signs, price cards, tags, stickers and large lapel pins. Michael Kievan (in photo), division sales manager for Ziv-UA, points out some of the material.

FM Transmitter for Full Fidelity Operation

Only a single PA stage is used beyond the exciter to assure true high fidelity performance while keeping operating costs low. Distortion and noise are extremely low even when the transmitter is multiplexed. When combined with the RCA broadband FM antenna the BTF-1D is capable of producing ERP's up to 12 kW. This new 1 kW transmitter can easily be expanded to 5, 10, or 20 kW by adding higher power amplifiers.

RADIO CORPORATION of AMERICA

Newest in the Line of RCA FM Transmitters

More Than

Good Reasons Why the GATES 1KWM is Your Best Buy!

Nothing speaks so authoritatively as the fact that there are more than 70 Gates 1 KWM transmitters now in use giving total dependable service to broadcasters in the United States and Canada.

"It does what you claim", users report, and that means stability, extended frequency response to 15,000 cycles, economical operation and reliability.

Your installation time will be speeded up because Gates 1KWM transmitters are always factory tested on your frequency.

For the complete FM package it's GATES.

BROADCASTING, October 31, 1960

(For the record) 101
In recent national elections in some free countries, the following percentage of eligible persons cast their votes:

<table>
<thead>
<tr>
<th>Country</th>
<th>Percentage</th>
<th>Year</th>
</tr>
</thead>
<tbody>
<tr>
<td>Australia</td>
<td>95.48%</td>
<td>voted (1958)</td>
</tr>
<tr>
<td>West Germany</td>
<td>88.2%</td>
<td>voted (1957)</td>
</tr>
<tr>
<td>Israel</td>
<td>82.8%</td>
<td>voted (1959)</td>
</tr>
<tr>
<td>Canada</td>
<td>80%</td>
<td>voted (1958)</td>
</tr>
<tr>
<td>Great Britain</td>
<td>78.7%</td>
<td>voted (1959)</td>
</tr>
<tr>
<td>Sweden</td>
<td>77.4%</td>
<td>voted (1958)</td>
</tr>
<tr>
<td>UNITED STATES</td>
<td>60.4%</td>
<td>voted (1956)</td>
</tr>
</tbody>
</table>

It is no credit to our democracy when four out of every ten persons forfeit the privilege of expressing their convictions about the candidates and the issues of a national election.

Your vote counts! Victories in many elections are often determined by the barest of margins. For example, one Senator won the post he now occupies by a margin of only 87 votes, with 988,295 cast.

To vote is a right and a privilege. To cast your vote intelligently is a duty.

See to it that you and every eligible member of your family vote on November 8th.
OUR RESPECTS to Alfred Leo Hollender, vp, Grey Adv., New York

'They've taken unfair slams at television too long'

Nothing is more irritating to Al Hollender than critics who constantly carp about the "mediocrity of television." And he has an idea: let television fight back!

Mr. Hollender, executive vice president in charge of broadcast activities for Grey Adv., New York, is a slender, soft-spoken individual who peels off his characteristic mildness when he sails into television's critics.

"They've taken unfair slams at television too long," he asserts. "Why can't the tv industry do something about it? My idea is that each of the three networks, probably on a rotating basis, run programs in which new tv shows would be reviewed and developments in the industry evaluated and criticized—but fairly.

"I think a panel of critics could be found—well-known persons of considerable stature who are not tied down to any medium—television or otherwise. This method would not mean that tv would never receive brickbats. But it would mean that bouquets would be tossed at tv when the medium deserved it."

Dedication • Mr. Hollender grew up in the broadcast media, having spent his entire business career in various phases of radio and television, including station management, production and agency supervision. This may explain his dedication.

Alfred Leo Hollender was born in Chicago Sept. 29, 1912. His early ambition was to become a newspaperman. He studied journalism at the U. of Illinois, where he received a B.S. degree in journalism and served as editor of the daily Illini.

After graduation, young Hollender made the rounds of Chicago news organizations and was offered a job as a cub reporter with the City News Bureau at $15 per week. He accepted. But on his way out, he started a conversation with one of the older newspapermen in the office. Disenchantment set in—he discovered that this veteran, who had been in the profession for more than 30 years, was earning $35 per week.

Big Decision • That evening Mr. Hollender decided newspaper work did not offer much opportunity for growth. He notified the City News Bureau he would not accept the job. He decided instead to look for work in radio which he heard was a growing medium.

Mr. Hollender was to learn that broadcasting did offer promising opportunities, although the start-at-the-bottom was rock-bottom indeed. He obtained a job with the Atlass stations in Chicago—WIND and WJJD—as a typist in the continuity department at a salary of $12.50 per week.

His rise at the Atlass stations was rapid. Mr. Hollender became a continuity writer, sports announcer, news editor, salesman, program director and, finally, assistant to the president.

In 1943 he left the stations to join the overseas branch of the radio outpost division of the Office of War Information. Later he served on Gen. Dwight D. Eisenhower's psychological warfare staff in Europe and subsequently became chief of radio communications for the American zone in Germany under Gen. Omar Bradley.

On to New York • Mr. Hollender elected to go to New York after the war where he joined Louis G. Cowan Inc., package producer of radio-television programs, as a partner. In the early days of television, Mr. Hollender recalls proudly that the company had as many as 13 hours of programming on the air, including such shows as Cosmopolitan Theater, Stop the Music, Bert Parks, What's My Name? and Quiz Kids.

A high point of Mr. Hollender's career occurred in 1951 when he was appointed head of radio and television activities for the Eisenhower campaign. He remained with the General from his return from Paris through the Chicago Republican Convention and his first nomination and election. Among the many conversations with Mr. Eisenhower, Mr. Hollender's favorite is one during which the General told him: "Al, you talk just like a Democrat." Mr. Hollender remembers that he answered: "General, you do too." (Mr. Hollender says today: "And he did!")

Following the 1952 presidential election, Mr. Hollender joined Grey Adv., New York, as vice president and director of radio and television. At that time Grey's radio-television billing was about $750,000. Mr. Hollender's area of responsibility included broadcast media, programming, research, copy and production.

"It's a far cry today from those days," Mr. Hollender notes. "Today our radio-television billing is more than $26 million and represents slightly more than 50% of our billing."

Progress • Grey's growing involvement with the broadcast media between 1952 and the present helped raise Mr. Hollender's stature at the agency. In August 1959 he was elected executive vice president. He also serves as a member of the executive committee and of the board of directors.

Mr. Hollender's primary preoccupation today is to select and develop for Grey's list of clients the suitable programming to carry the advertising messages. The most active broadcast accounts are Block Drug, General Electric, Procter & Gamble and Revlon.

Mr. Hollender married the former Lucille Marsh of Chicago, an actress, on Nov. 5, 1952—the day after election day. He recalls fondly that Mr. Eisenhower, a few days before the Hollender nuptials, took Miss Marsh aside and talked to her for more than a half hour about "life and marriage." The Hollenders live with their two children, Jeffrey 6 and Peter 4, in an apartment on Park Ave. They also have a home in Westhampton, L. I.

Active Club Man • Mr. Hollender is a member of the Radio & Television Executives Society, the standing committee on television and radio administration for the American Assn. of Advertising Agencies and the Friars Club. He also is a member of the executive committee of the U. S. Committee for the United Nations.

For relaxation, Mr. Hollender enjoys oil painting, water skiing and theatre-going. His work, of course, keeps him on the hop between New York and Hollywood for weeks at a time, but he looks forward to more leisurely traveling with his wife and the children.

Grey Adv.'s Hollender

Broadcasting offered a future
EDITORIALS

Globecasting

WITHIN a year, it now seems probable, facilities for international television will be available, with satellites orbiting in space as way stations.

At that point the scientists will have given television the last technological dimension it needs to become a communications force superior to all others. That is as much as the scientists can do. From then on the communicators must take over.

What is to be programmed on international television? That is not an easy question to answer. Its difficulty may be gauged by the observation that coast-to-coast networking has been in operation in America for nine years, and there is still considerable doubt about what should be programmed on domestic television.

Yet plans for international programming must be drawn—and soon—if the marvelous equipment that scientists devise is not to be wasted by thoughtless users. Whose responsibility is it to draw the plans?

We would be surprised if the government did not try to assume it. Certainly the State Dept. will be sensitive to the projection of America's image abroad, and other elements of government, for other reasons, will wish to exert at least a measure of control over the export of American programming.

The natural inclination of government to assume authority over the content of international transmissions must be resisted. With government in command, television would inevitably be perverted into an instrument of propaganda.

The burden of international programming must fall where the burden of domestic television now reposes. It will be up to the television broadcasters of America to give meaning to the instruments whirling through space.

This assignment is the most complicated American broadcasters have faced. It is infinitely more complicated than the business of fashioning a domestic network schedule.

If we seem premature in suggesting that the planning for international TV programming begin at once, we must point out that the planning for the 1961-62 domestic network season—which will not begin for another year—was started last July.

Lee tide

VHF Move to UHF?

Does it sound familiar? That headline appeared in Broadcasting more than 10 years ago—on April 10, 1950. The suggestion came from the late Wayne Coy, then the FCC's chairman, in the middle of the freeze of 1948-52.

Today another member of the FCC is doing the bongo-beating. Commissioner Robert E. Lee has enunciated an 11-point plan for transition to all uhf operation. It would impose a couple of new freezes—one on new and improved vhf stations and the other on new uhf stations (Broadcasting, Oct. 24).

In 1950, Chairman Coy's proposal got nowhere because there were 108 vhf stations on the air. The tv receiver count was around 11,000,000 sets sold up to that time, having a value of about $4 billion at retail. The outcry from Congress, from broadcasters and from the manufacturers was that the tremendous investment in facilities by both public and broadcasters was too great to be disrupted.

Today there are 592 vhf stations on the air, plus 95 uhfs. There are an estimated 55,000,000 tv receivers in use. The overall public and industry investment in vhf alone is probably in the area of $20 billion.

Congress has authorized a rigid test of uhf service in New York City and has appropriated $2 million for it. Commissioner Lee was largely instrumental in marshalling this project through the Bureau of the Budget and Congress.

This New York test is a necessary prelude to future consideration of a full-scale move to uhf. Uhf seems to function effectively in low, flat areas. The New York test is for the distinct purpose of evaluating its efficiency technically in the canyons of our largest city, on the assumption that if it works there it will anywhere. The test will take two years.

For his Oct. 19 address in San Francisco, at which he laid down his 11-point plan to shift all tv to uhf, Mr. Lee chose the title: "Put the Show on the Road." In the light of the circumstances, we think a more appropriate slug would have been "Jumping the Gun."

Robust radio

LOOKING at the radio financial report put out by the FCC (Broadcasting, Oct. 24), we are reminded of the performer who found it amusing when critics constantly poked fun at him. He found it so funny, in fact, that he laughed every day as he lugger another sack of money to the bank.

Radio's balance sheet may not justify hilarity, but it certainly shows who is entitled to the last laugh. Broadcasters who kept selling radio even when they could scarcely be heard above the noise of critics calling it dead—and the advertisers and agencies who stayed with it through those difficult times a few years back—must be excused if they smile a little as they study the FCC's 1959 report.

The figures are encouraging because, for one thing, they show a dramatic reversal in the profit trend. In 1958 radio's profits plummeted a sharp 31.7%. During the past year they did not regain the pre-1958 level, but they stopped sliding and started back up with a 11% gain. Equally important, revenues rose 7.1%, indicating that advertisers' faith in radio is also on the rise. Moreover, there were signs that broadcasters may be getting their costs of operation under better control.

The one pessimistic column in the report dealt with networks. As a group they continued to lose money. They did not lose quite as much as they did the year before, but it is obvious that, as of 1959, they had not found all the answers to their problems. Changes most of them have made since then may help turn the tide by both reducing expenses and attracting more advertisers. They obviously hope so. They may also hope that some of the progress made by radio as a whole—which is even more impressive in view of the network lag—may rub off on them, too.
What will he want to see next Tuesday?
