What public thinks

Most painstaking, penetrating study yet of public attitudes toward television has been secretly in process for more than year by top researchers of U. of Chicago’s National Opinion Research Center and Columbia U.’s Bureau of Applied Social Research, with CBS Inc. picking up tab that now runs to more than $100,000. Field work was done year ago. Results may be published next fall. CBS President Frank Stanton ordered absolutely unbiased job and neither he nor other CBS officials have even seen questionnaire.

Project was outgrowth of plan Dr. Stanton announced six years ago at NAB convention in Washington. Originally he proposed that committee of distinguished citizens establish areas to be investigated (BROADCASTING, May 30, 1955), but had to abandon that notion. Objective committee could not be assembled. As it wound up, project operated under general directive from CBS to investigate what people thought of television and what they wanted from it.

Trafficking turnover

If FCC doesn’t adopt its proposed rule to prevent sale of stations during regular three-year licensing period unless there are extinguating circumstances (death, bankruptcy, etc.), there’s possibility it may try to reverse process to accomplish same end. It’s been suggested that FCC could adopt alternative proposal permitting licensee to sell to anyone except another licensee who had acquired station within three-year period. In other words, seller then himself would be precluded from buying new facility for three years.

G-2 test case?

With FCC’s field investigation teams descending on station’s doorsteps and probing meticulously through files, technical gear and management’s mind, there’s speculation at grass roots about possible test case to challenge legality in court. Group of broadcasters is wondering what would happen if a number of them pooled resources for small station operation to blow whistle on demands and tactics of G-2 investigators. It’s purely conversation right now, however, akin to who will bell cat.

Countering spot carriers

What Edward Petry & Co. believes is first formal sales presentation on advantages of spot television over so-called “network spot carriers” has been prepared by Petry—at suggestion of several advertisers. Other station representative firms are said to be creating similar presentations. Petry is aiming specifically at advertisers considering use of network spot carriers, and presentation makes point that only spot tv offers flexibility in choice of markets, stations, and time periods, enabling advertiser to concentrate advertising in areas where it is required.

Play’s not the thing

Procter & Gamble agencies have standing order to withdraw P&G sponsorship from any station period in which NTA-syndicated tape show, The Play of the Week, is slotted (it’s now on some 70 stations). P&G won’t admit policy was in reaction to alleged “earthiness” in plays, initially produced for and shown first on WNTA-TV New York. Version from P&G: It’s “advertising decision.” Some viewer letters have been received but complaints few. P&G has moved spots to other periods on same stations where possible.

Minow’s bait

Is FCC Chairman Minow going to be television’s knight in shining armor in solution of allocations impasse? It was he, it’s understood, who raised question of unused government channels at meetings with White House aides on coordination of spectrum allocation (see page 54). And, idea of keeping eye on usage has apparently been accepted as item on agenda of conferences as they continue wrestling with problem.

If such policy firms up, it’s possible FCC’s long campaign to unblock extra uhf channels for tv, in return for mainly unused uhf frequencies, may yet bear fruit. In two efforts in last five years, FCC has been turned down on ground national defense would be imperiled.

Pittsburgh pickup

There’s been no announcement, but it’s known NAB will use morning segment of Westinghouse Broadcasting Co. public service clinic held last week in Pittsburgh as program feature for Monday afternoon, May 8, during NAB, Washington. (see page 42). NAB program originally had been based on panel program involving network presidents but they declined invitation. WBC panel will provide provocative discussion of changing America, titled “From Our Town to Megatown.”

Drop-in outlook

FCC is beginning to warm up on uhf drop-ins—some at less than standard mileage separations. Earmarked for action soon are new third assignments in Syracuse and Rochester which can be accommodated with normal separations under new agreement with Canada on border allocations. Also in preparation at staff level are less than standard separation drop-ins in following markets: Birmingham, Grand Rapids-Kalamazoo, Louisville, Providence, among others.

More deintermixtures

It’s open secret at FCC these days that there will be additional deintermixtures in predominantly uhf areas whenever as many as four votes can be mustered in keeping with recent FCC actions deintermixing Fresno and Bakersfield, Calif. Targets presumably will be markets or areas where it is concluded there would be no substantial loss of service if uhf is substituted and where there is no appreciable outside uhf penetration.

Broadway and pay tv

Telemeter’s wire pay tv system and RKO-Zenith’s on-air Phonocision are vying for rights to telecast Broadway productions. Telemeter now offers bigger carrot: 50% of pay-tv box office take as compared to 35% RKO-Zenith reportedly offers. Although characterizing Telemeter’s offer as “tempting,” theatrical producers are holding back. They see no advantage to live pay tv coverage of their productions, and insist, in any event, New York metropolitan area must be blacked out. Tape coverage of theatrical productions in studio setting at end of show’s run appears more profitable.

KOA-TV to Blair

KOA-TV Denver soon will appoint Blair-Tv as its national representative effective July 16. Move of station, now repped by NBC Spot Sales, is latest as outgrowth of FCC order that network spot sales organizations must leave general rep business. Station now at NBC Spot Sales on affiliates’ status (owned-and-operated not affected): 5 out of 10 have appointed new reps.
...for Northeastern Ohio TV Homes: Cleveland Indians games... Cleveland Browns games... all top CBS sports shows... two daily sportscasts... this is action sports programming that builds active buying audiences! And it's typical of the top-notch entertainment that WJW-TV schedules, day in, day out... to provide opportunities for advertisers to score big sales victories in Cleveland and Northeastern Ohio, the nation's 7th largest market.

ANA BLASTS ABC-TV BREAKS PLAN

Advertiser group joins growing list of rebellious agencies

Assn. of National Advertisers, which is holding its spring convention in Washington starting today (April 17), is loosening blast this morning against ABC-TV’s decision to expand station break time from 30 to 40 seconds next fall (see story, page 40).

In letter Friday to ABC-TV and its affiliates and being made public today, ANA joined swelling chorus of advertising agencies, which have protested ABC-TV move and CBS-TV’s intention to adopt similar policy if other networks do. Agencies who wrote ABC-TV opposing longer station breaks included McCann-Erickson, Compton Ad., Kenyon & Eckhardt and North Adv. Other agencies conceded privately they sent similar letters but asked to remain unidentified.

ANA’s letter said network’s move will work to “detriment of broadcasting” and resulting “over-commercialization” will jeopardize public’s trust and confidence in advertising. Copies were sent to CBS, NBC and National Assn. of Broadcasters.

Officials at agencies who acknowledged their organizations had objected to plan revealed that there is “divided opinion” on stand taken. Some media executives said networks have been “pressured” by some stations for additional break time, stations citing “network spot carriers” as one development which has reduced their income and insisting that other time be made available to them.

Oliver Treyz, ABC-TV president, sent second telegram to George M. Gribbin, Y&R president, last Friday, giving additional information on reasons ABC-TV decided to lengthen station break time from 30 to 40 seconds next fall. In wire Thursday, he had justified policy by stating ABC-TV gave sufficient prior notice of its intention to agencies and advertisers. On Friday, Mr. Treyz said additional funds accruing to stations would enable them to provide “improved television service” in public interest.

Dispute became public Thursday when Mr. Gribbin wired ABC-TV, CBS-TV and NBC-TV objecting to network plans to lengthen breaks next fall. Mr. Gribbin acted after CBS-TV revealed it also plans to lengthen station break time if other networks do. NBC-TV has made no move on subject to date.

Lever gets explanation of evening viewing drop

Broadcast researchers were beginning Friday to reply to Lever Bros.’ analysis, revealed earlier (see page 30), which claimed evening tv viewing has declined as much as 6% since 1957-58.

One of principal rebuttals was that Lever (or A. C. Nielsen Co., which prepared analysis) had picked abnormally high viewing season in selecting 1957-58 as base for comparison: that was year time-spent-with-tv hit highest average (because, according to explanations offered at time, widespread Asian flu epidemic increased viewing by keeping more people at home).

Moreover, broadcast sources maintained, Lever study omitted figures on viewing in 1960-61 winter season, which would show evening viewing down no more than 1% from preceding year, which they repeated was more typical than season Lever study used for comparison.

Europe sees Yuri

Moscow’s mammoth celebration Friday (April 14) honoring its cosmonaut hero, Maj. Yuri A. Gagarin, was seen loud and clear in London and in eastern and western Europe cities over crash-programmed tv relay. Direct telecast, via Leningrad and Scandinavian cities to London, had only two fadeouts.

Where L&M business landed

Liggett & Myers’ $18 million worth of business that left ABC-TV’s 1961-62 schedule (Broadcasting, March 20), now has come to rest, giving advertiser what it asserts is entry in more favorable time periods. Here’s full lineup (through McCann-Erickson): alternate two-thirds of 87th Precinct (NBC-TV, Mon., 9-10 p.m.), alternate hour of Checkmate (CBS-TV, Wed., 8:30-9:30 p.m.), alternate two-thirds of Dr. Kildare (NBC-TV, Thurs., 8:30-9:30 p.m.), alternate week of Twilight Zone (CBS-TV, Fri., 10-10:30 p.m.) and alternate week of Gunsmoke (CBS-TV, Sat., 10-10:30 p.m.).

RKO said buying control of Griffin media chain

RKO General Inc. was reported Friday (April 14) to have concluded negotiations for over-$4.5-million purchase of controlling interest in Video Independent Theatres Inc., Oklahoma City, which owns 15 catv systems, 128 theatres and microwave relay system in midwest and southwest and 12.5% of KWTV (TV) Oklahoma City.

Interest in KWTV (ch. 9) would bring RKO to limit in vhf ownership, since it owns tv stations in New York, Boston, Los Angeles and Memphis. With RKO’s contract with NBC to exchange its Boston outlet for network’s Philadelphia stations and to buy NBC’s Washington outlets, RKO would be over limit, but it’s believed RKO will offer to dispose of KWTV interest.

RKO General also has interest, which FCC has questioned, in CCLW-TV Windsor, Ont. (Detroit). Oklahoma City purchase is from estate of late Henry Griffin and others.

GE to make color sets

General Electric Co. will enter color tv set production this fall. Company said that “mass interest” in color prompted move. First reaction came from pathbreaker in field, RCA, which expressed delight that GE will join “seven other tv manufacturers in sale of color tv sets,” and predicted move “will provide further impetus to march of progress” in industry. Earlier, Zenith Radio Corp. said it would market color sets in fall (Broadcasting, Feb. 27).

AB-PT salaries

Proxy statement being circulated to American Broadcasting-Paramount Theatres Inc. in advance of annual meeting in New York on May 16 shows following salaries of top officials: Leonard Goldenson, president, $181,000 (including $25,000 expense allowance); Oliver E. Treyz, vice president, ABC Division, and tv network president, $98,000; Simon B. Siegel, financial vice president-treasurer, $84,951; James G. Riddell, vice president, ABC Division, $65,750.
Storer stations are WJBK-AM-TV Detroit; WJW-AM-TV Cleveland; WSPD-AM-TV Toledo; WAGA-TV Atlanta; WITI-TV Milwaukee; WIBG Philadelphia; KGBS Los Angeles; WGBS Miami; WWVA Wheeling, W. Va.

Curtis Berrien, vp and copy director, William Esty Co., New York, since 1958, appointed to newly-created post of senior vp and creative director of Lennen & Newell, N. Y., effective May 1. Mr. Berrien will coordinate and have over-all responsibility for all creative activities of Lennen & Newell, including radio-tv commercial production, copy and art. He started his career with BBDO in 1935 and later served as copy director of Chicago offices of Needham, Louis & Brorby and McCann-Erickson.

Starting with agency as copywriter in 1950, Mr. Bloede became group head shortly afterwards. His progression includes election as vp and copy supervisor in 1955, appointment as copy chief and member of agency's plans board two years later, and election to board in 1959.

Richard N. Goldstein, who joined NBC's legal department in February 1957, today (April 17) becomes director, labor relations, NBC, succeeding in that post George H. Fuchs, who now is vp, personnel. Previously with law firm of Proskauer, Rose, Goetz & Mendelsohn in N. Y., Mr. Goldstein is graduate of Industrial and Labor Relations School at Cornell U. and Yale U., where he received Bachelor of Laws degree in 1952.

James H. Cobb, vp and account executive at Fletcher Richards, Calkins & Holden, N. Y., since 1959, appointed vp and general manager of Miami, Fla., office of McCann-Marschalk Co. From 1957-59 he had been vp and general manager of N. Y. office of Burke Dowling Adams (now Adams & Keyes) and earlier he had been director of advertising for American Airlines, N. Y.

David B. McCall, vp and associate copy chief of Ogilvy, Benson & Math- er Inc., N. Y., appointed to succeed president David Ogilvy as copy chief of agency. Mr. McCall joined OBM in 1951 after brief writing stint with Young & Rubicam. From end of 1953 through 1955 he was vp and copy director of now defunct David J. Mahoney Inc. agency in New York, returning to OBM in January 1956 and becoming vp same year.

For other personnel changes of the week see FATES & FORTUNES
"Is this the one you want me to try, Mom?" Her mother in the background is one of the nation's adults, who receive and control 98% of the U.S. income. WBT, for over 39 years the Charlotte radio station with the biggest general audience, also has the highest percentage of adult listeners. They turn to WBT because of responsible programming, outstanding service and fine entertainment. In the WBT 48-county basic area, adults receive and control most of the $2,690,786,000 worth of spending money. If you want to make more sales for your clients, clearly the radio station to specify is the one that reaches more of the adult listeners... WBT RADIO CHARLOTTE. Represented nationally by CBS Radio Spot Sales.

**April 21—25—**AFRA 9th district conven- tion. Savvy Hotel, Des Moines, Iowa. May 27-31—AFRA 9th district conven- tion, Sheraton Park Hotel, Washing- ton, D. C.**
Hitch your star to a wagon

Good talent is a grand and glorious thing. Great talent is even grander. But no talent is worth a dime of any sponsor’s money unless the commercials measure up to the entertainment. Those vital minutes of commercial time bear a heavy load of responsibility. What counts on the balance sheet is their power to grip ... to sell ... to return a profit.

The commercial is the payoff .... N. W. AYER & SON, INC.
Flint-Bay City-Saginaw moves into the top 40 (in actual TV homes delivered)

You see, what were once two eastern Michigan markets—Flint and Bay City-Saginaw—are now listed and officially recognized as one. So this moves this heavily populated urban area way up among the 40 largest TV markets in the country.*

Right in the same neighborhood with Providence, Charlotte, Denver and New Orleans.
And that's in terms of homes actually delivered: people watching television, not just set owners.
It's a market with money, too. Even a little better
off than some of its new top-40 neighbors. SRDS reports, for example, nearly $200 more to spend per household than the national average. How do you reach it? The only way, really, is from within the market area.

For the very latest figures we have show that far-away Detroit stations no longer give you the eastern Michigan audience. It’s the stations within that deliver the viewers today and, we’re glad we can add, at a most appealing cost. That’s where we are, of course—within the market area. Our transmitter is only 20 miles from Flint, 12 from Saginaw and 25 from Bay City. With City-Grade service to all three. To reach us, and to get all the figures on the nation’s newest top-40 market, just call Harrington, Righter & Parsons, Inc. Offices in New York, Chicago, Detroit, Boston, Atlanta, Los Angeles and San Francisco.

*ARB—March, 1960 (Sun.-Sat., 6-10 p.m.)

WJRT

WJRT • CHANNEL 12 • FLINT—BAY CITY—SAGINAW / ABC PRIMARY AFFILIATE
The world’s most famous feline will go before the cameras soon for the 260th and final episode in the current series. Thus, TV stations will start moving schedules around to program FELIX as a full half-hour per day—causing an anticipated upheaval in local ratings.

FELIX Fan Clubs . . . FELIX Birthday Parties . . . FELIX merchandising aids are also creating major problems for opposition stations relying on ordinary cartoons to attract and hold the local children’s audience.

Don’t let this happen to you. If Felix has not picked a channel in your market area as yet . . . do the obvious . . . make certain he’s pushing your call letters . . . and make your move NOW, . . . while there’s still time!

Knocked over
EDITOR: I just wanted you to know how pleased and proud, and grateful, I am for the very nice profile you ran on me. (OUR RESPECTS, March 27). I was just knocked over and the appearance of this piece is a high point in my career.

I've had any number of good comments on it from friends and from acquaintances I have not heard from for years... Thank you very much and my respects to you, to Bruce Robertson of your Hollywood bureau and to your important publication.—Ken Snyder, Vice President, Needham, Louis & Brorby, Hollywood.

That dog cartoon
EDITOR: We are the advertising agency for the Ralph Wells Co., Monmouth, Ill., manufacturers of dry dog food made only under private label. They

“...think he's got it. Make the next one a take.”

have no product of their own. For them we edit and publish a house organ monthly called Paw Prints. We would like to use the cartoon on the editorial page of the March 13 BROADCASTING.

[Permission granted.]

Still helpful
EDITOR: In the March 21, 1960, issue of BROADCASTING you published a twopage article on programming entitled “Winter vs. summer viewing.” Our sales staff has found this article very helpful in selling summer radio—and still does, despite the year-old figures. I am wondering whether Nielsen has indicated to you that they plan a 1961 version of these facts, and if so, whether you plan to print them.

If not, could you at this late date order us 100 reprints of the 1960 article?—Marian E. Knight, Promotion and Merchandising Director, WSAI-AM-FM Cincinnati.

[BROADCASTING has not run a more recent story because A. C. Nielsen Co. reports there is little change in the figures. We do not have reprints, but could have 100 printed for you at a price of around $29.]

EVERYONE'S TALKING ABOUT

The BIG CHANGE in "BIG D"!

—and the biggest pace-setting change is on WFAA • 820 • RADIO

"SOUTHWEST CENTRAL"... a completely new format with the emphasis on electronic journalism is the key to the great new sound on WFAA-820 RADIO in Dallas! Backed by the biggest advertising campaign in WFAA's history, all North Texas is finding a radio "home" that's informative and delightfully entertaining day and night! Originating from our new multi-million dollar "Communications Center" with all new equipment, WFAA-820's powerful 50,000 watt clear channel voice beams "Southwest Central" to an area of over 5 million people!

NEWS

NBC News on the Hour followed by 5 minutes of State & Local News!

FEATURES

Brief cut-ins all day long from WFAA's staff meteorologist, woman's editor, sports director, farm editor, and other human interest stories.

GOOD MUSIC

with a special appeal to the young adult, comprising the best of the albums and the current top popular hits.

Your Petryman has an Audition Tape of the New "Southwest Central" from WFAA Radio... Call Him!
Sponsors and programs: association breeds responsibility

Good products should be known by the advertising company they keep. The great American companies whose brand names and corporate names are such intimate parts of our lives develop their products with great care. When a company like Campbell Soup says, as they do, "To make the best, begin with the best, then cook with extra care!" they describe the attitude (or a conscience) that is typical of most, if indeed not all of our great consumer-oriented companies. This illustrates how ardently these business firms take care not only of their own standards and reputation but the consumer as well.

Now, I submit that once we have taken such care where our products are concerned, we have an equal responsibility to ourselves and our consumers as to what we say and with what means we say it. If we say it with television, then our commercials should be helpful, tasteful, instructive, accurate. Remember, we are a guest in that living room.

It is the intimacy of television that makes it so powerful, such a great advertising medium. But that very intimacy places a heavy responsibility on the advertiser's shoulders that extends beyond the commercial and includes the very show itself.

Public Image = Like it or not, we are responsible for the program. All right —let the networks say they control it—they do, ultimately, since they control the mechanical forces, electronic equipment, station arrangements, actual transmission, etc. And they can keep a show off or force it on their network as they choose. But whom does the public hold responsible for a show they see and respect or dislike? To whom do they write in praise or protest? You all know it is the sponsor.

Thus, we cannot avoid the responsibility. I do not think we can, nor should, say to the public (or even insist on it in our contracts to networks, stations or packagers) that we have no responsibility, because, like it or not, we do.

Now, I am not saying we advertisers have to get into show business. We don't. That is, we do not have to involve ourselves with story lines, scripts, production factors, casting, directing, etc. In fact, we should not have to, except in matters of taste, good influences and consideration for the viewer and the viewer's family.

We have every right, and we should exercise it, to insist upon a respectable, clean, inoffensive treatment in connection with anything we sponsor. It is our money that pays the bill—or better yet, it is our customers' consumers' money, and we owe them this consideration.

Taking a Stand = We should be courageous enough to take whatever stand is appropriate in maintaining our standards and influence for what we feel represents good taste.

Today, as sponsors, our obligations and responsibilities are increasing rather than diminishing. We cannot escape the onus—and, in fact, we should reach for it—that stems from the conscience of an advertiser who will strive to uplift, who will set some standards and adhere to them.

It is heartening to see advertisers willing to experiment, willing to try new things. And they are. Public service programs are being considered carefully by companies and used effectively. For the future I think that we must all be willing to be patient and a little more dedicated to this medium. If it takes time to build something fine, let's take the time, when, with conviction, we see an opportunity to do it.

There is a great opportunity for people engaged in the advertising-marketing-promotional function today. There is the opportunity to help our local communities, educators, government people, the young people planning their careers—to help them understand this function and its role in our economy, to help them all understand that we consume our way to prosperity.

Today, we (and by "we" I mean the practicing marketing men) need perspective ourselves. Then we can help others with their own perspective. Let us keep our perspective on what advertising's true role is in the business environment. Too often, I fear, when advertising or the marketing function is attacked, our people respond by going to the other extreme. By trying to make it as a force in and of itself that is totally responsible for a flourishing economy, by claiming that it alone can pace our success. Advertising is but one of several vital factors, interdependently a part with other business forces which together mould a prosperous balance of production with consumption.

Proud Heritage = Let us keep our perspective—but let us be proud of our heritage, because there is much to be proud of!

Now is the time to grasp our jobs with vigor and elevate the quality of our craft by a watchfulness and dedication to better advertising. We don't need new rules, new laws, new regulations. The tools for improvement already exist, if we will but use them. Fairfax M. Cone has pointed out that "most agencies and their clients are honest. The thing we have to watch for is the exception, and whenever we find one we should refuse to appear in his company, either in print or on the air." This is a conscience.

So much of our advertising is so very good. So little is so very bad, really.

The 1960s are going to be about as great as they have been hailed to be. They will not be easy. But it is going to be a time of great building—building of the economy, building of our cultural, educational and social environments. And advertising can contribute much to this building by building itself.

Let's do it. We already have so much that is so good on which to build.

Douglas L. Smith worked in a wholesale house advertising department while attending the U. of Minnesota till 1938, was in sales for U. S. Gypsum Co., was an infantry major in WW II, then joined Malamed-Hobbs agency, Minneapolis. In 1949 he became a product manager at Swift & Co. He moved to BBDO, N. Y., as account executive in 1953 and came to Johnson & Son as advertising manager in 1955. He was named advertising and merchandising director in 1956.
United Press Movietone News supplies newsfilm to more television stations than all other services combined.
NOW AVAILABLE...A SPECIAL GROUP OF 50 HOUR-LONG POST-'48 COLUMBIA FEATURES THAT SPELL...

ION!

16 rousing JUNGLE JIM features starring Johnny Weissmuller plus 34 other top-grade action films (made as recently as 1958) that are bigger and better in every way than any of the made-for-television hour-long adventure programs being offered today. Bigger-name stars...better and more costly productions that offer the widest possible range of intriguing stories and colorful settings — each jam-packed with action and suspense.

ADVERTISING'S IMAGE A SHINY ONE

- Special survey shows public has high opinion of ad business
- Stature has improved despite criticisms of past few years
- People in advertising held in high esteem by average man

Despite the attacks against it, advertising continues to have a generally favorable public image, and what's more, as a business it is assuming a greater importance in the minds of most consumers.

The new, brighter shine to Madison Avenue's image comes through in the results of a special survey conducted for Broadcasting by The Pulse Inc. It's apparent, too, that the public in a mere three-year period got to know more about advertising and generally liked what it found.

That the public attitude is so favorably disposed toward Madison Avenue may come as an eyebrow lifter to many observers, both within and outside the advertising business. During this three-year span, the quiz scandals broke (fall of 1959) resulting in a tidal wave of criticism, some extreme and harsh, that sowed seeds of skepticism about the advertising business.

A similar study of the public's attitudes toward advertising appeared in a special Broadcasting Pulse report in the spring of 1958 (Broadcasting, April 28, 1958).

Major Change - Significantly, both studies follow a similar results pattern (see the complete findings detailed on page 28), with a few exceptions, of which the major difference appeared in answer to this question:

Did the person interviewed think that the business of advertising was "important"? A total of 965 out of 1,000 respondents thought it was, the 96.5% so disposed contrasting with a much lower, though substantial 79.2% answering in the affirmative three years ago.

In its study, covering the 1,000 personal interviews in 10 major markets, Pulse also found:

- To a substantial segment of the public (62.8%), the advertiser's importance shows up, for example, as the one who is believed to decide what program goes on TV (see Question J). The chief reason as expressed by most, appears

Does advertising exaggerate? Not at all, says B&B's Lusk

U.S. Undersecretary of State Chester Bowles, a Madison Avenue alumnus, took some pot-shots at the advertising business last week and got a quick challenge from the agency he helped to found.

Speaking on CBS-TV's Washington Conversation (April 9, 12-12:30 p.m., EST), Mr. Bowles said advertising and public life "are a million miles apart," that were he doing it over again, he would have gone into government service immediately after college and stayed away from advertising. Mr. Bowles was co-founder of Benton & Bowles, a successful, major-billing agency. He left it in 1941 and has retained no interest in B&B.

Among other charges hurled at Madison Avenue, Mr. Bowles said that "in advertising, things are exaggerated," that advertising people "try to appeal to people who have some money." He conceded that advertising sometimes stoops to reach persons on the $4,000-$5,000 income level, but rarely goes below that, "because this isn't a big enough market."

Quick to counterattack was Robert E. Lusk, president and chief executive of Benton & Bowles Inc., who intimated that Mr. Bowles' advertising concepts are 20 years behind the times and that Mr. Bowles himself is guilty of what advertising is charged with—"exaggeration."

Mr. Lusk said: "... Enormous changes have occurred in the market place and correspondingly in advertising, since [Mr. Bowles] left over 20 years ago. Advertising has vastly broadened its lines of communication and developed completely new techniques in many areas, including market research and the use of media."

Things Have Changed - Mr. Lusk said television "was still in its infancy" when Mr. Bowles left advertising and that he is "apparently unaware that there has been great democratization of the consuming public... and that most advertising today appeals to every consumer regardless of his or her income." He said that today there are "more buyers than there are voters," that "people at all levels buy automobiles, houses, clothing," etc.

The Benton & Bowles executive said he believes today's consumer is so much more sophisticated than his counterpart of 20 years ago that today "advertising without believability would fail." He maintained B&B has never used 'wild adjectives' in describing the products and services of its clients.

Before his present appointment as Undersecretary of State, Mr. Bowles served as Democratic representative from Connecticut, ambassador to India and governor of Connecticut. In partnership with William Benton, he founded Benton & Bowles Inc., in 1929, but both men subsequently left the agency to go into public service. Mr. Benton left in 1936 and eventually became a U.S. senator; Mr. Bowles departed five years later.
A. Where agencies hang out

Various streets in the U. S. have become associated with specific business. Can you name the business associated with:

<table>
<thead>
<tr>
<th>Street/Industry</th>
<th>1958</th>
<th>1961</th>

*Totals over 100% due to multiple responses.

The interviews were conducted in the last week of March. Once again, those interviewed could name only a few of the companies engaged in the advertising agency business, yet a high percentage had a clear idea of the specific functions of agencies. This is true despite the fact that advertising agencies have done little to explain their function to the public.

Only this week at the American Assn. of Advertising Agencies’ annual meeting at The Greenbrier, White Sulphur Springs, W. Va., the membership is scheduled in a closed session to hear details of a proposed public relations program (Broadcasting, April 3).

The new public relations project—recommended by the AA’s public relations counsel, Hill & Knowlton—came after a four-month "study and analysis
of public opinion toward advertising.”

In the past few years apparently there has been little happening to change the general impression and association the public has of advertising with Madison Avenue nor ability to name an agency.

Only 20.3% of the respondents could associate Madison Avenue with advertising, while 73.3% knew Wall St. and finance go together. While a few mentions of agencies were made, the huge majority (74.8%) could not name one advertising agency. Nevertheless, the function of the agency—irrespective of the respondent’s familiarity with Madison Avenue’s association—appeared to be understood.

Not So Negative • The Pulse survey, interestingly enough, might be interpreted as finding that the negative attitude among the public is not so widespread as one would be led to believe.

This appears despite the fact that some of the recent criticisms apparently are rubbing off on the public. For example, in reaction to the question on what, if anything, the respondent disliked about advertising, an increasing number cited “false, exaggerated, misleading claims,” a development which, superficially at least, would appear to be of direct result of recent Federal Trade Commission complaints.

Also of special interest: fewer compliants were received on commercials being played too frequently, but more people now think that there are too many commercials on the air, that they interrupt TV viewing; that they are silly or repetitious and redundant.

Ordinary Joe • It’s also interesting to speculate on the fact that in describing the advertising man, an almost negligible percentage feel that he is either “superficial” or “false.” Apparently the public feel that while advertising in general may attempt to hoodwink them, the person in advertising actually is an “ordinary Joe” who is only following orders.

More respondents thought the advertiser is the decision maker on programming for television. (Of respondents, 62.8% said the advertiser, 22.3% said the TV stations decided.) Aside from an

opinion expressed by a majority of respondents that advertisers decide on programs because they pay for them, another large segment (13.7%) felt the reason was that advertisers pick the show best suited for their product.

Of those who felt it was the TV station which decides the program, the highest percentages highlighted these reasons: because stations know more about programming, or what the public likes, or the best time spot, or (as did 9.9%) felt the station had “a right to do so” (as did 8.1%) thought the station knew “what’s best.”

More people (46.5%) thought the advertiser should decide what program goes on the air, fewer, though a substantial number (31.7%), felt the station should decide.

J. The say-so on TV programs

Television programs are sponsored by large and small firms; these companies pay the television stations in order to advertise their products on these television programs. Do you believe that these advertisers decide what programs are to be televised or do you believe that the television stations decide what programs are shown?

A big tv better asks why pot’s light
LEVER, NO. 3 NETWORK USER, WONDERS WHY EVENING VIEWING’S DOWN

Major tv advertiser Lever Bros. wants the networks to explain why there has been an apparent decline in the use of tv sets during prime time over the past three seasons.

A report prepared for Lever’s media department by A. C. Nielsen Co. covers the 1957-58, 1958-59, and 1959-60 seasons, showing set usage by half-hours. A decline in set usage ranging up to 6% over the three-season period highlights the report summary.

The Lever Bros. move in circulating the study among the three networks was disclosed last week. Reportedly the first mention of the Nielsen report was made by a Lever official during the Westinghouse Broadcasting Co. seminar held in Pittsburgh (see page 112).

The tv networks reported they are still “studying” or “analyzing” the Nielsen figures, copies of which were said to have been sent to the heads of the networks about three weeks ago.

This, in summary, is what was contained in the Nielsen report:

Evening usage is down across entire year (7:30-11 p.m.; S-S)

'So Interesting' - According to one Lever spokesman, the report was sent to the networks “because we found the results of the survey to be so interesting.”

Lever Bros. qualifies as a blue-chip advertiser on the networks. Last year, for example, Lever ranked No. 3 among all network advertisers, with gross time billing at more than $28.6 million. Only competitor Procter & Gamble (No. 1 in network) and American Home Products rank ahead of Lever.

Interestingly enough, the Lever move apparently was underway even while Television Bureau of Advertising was preparing to announce—also on the basis of A. C. Nielsen data—that a new all-time high in viewing was set in February of this year, surpassing the previous all-time peak viewing month of February 1958 (BROADCASTING, April 3).

The TVB disclosure of the record six hours and eight minutes viewing per day, however, was attributed mainly to the daytime when all time periods showed significant increases over February 1960.

Lever’s investments in network tv advertising have continued unabated and, for that matter, this summer alone the advertiser will be in at least nine nighttime tv network programs, an apparent record tv program summer total for the company.

Camels go more miles on tv, stockholders hear

If you’re spending more miles now but enjoying it less, do as Camel cigarettes, try tv.

R. J. Reynolds acknowledges it paid more for advertising in 1960, but the cost per sale was less than in 1959.

Bowman Gray, board chairman of the company, told stockholders about management’s media philosophy at Reynolds’ annual meeting last week, saying, “We regard television as a particularly effective medium because it not only reaches a vast audience but also is unique in affording personal salesmanship by combining sight and sound.”

Recognizing that audience interests are diversifying, Mr. Gray reported, R. J. Reynolds is de-emphasizing westerns and mystery-adventures next fall and adding Sing Along With Mitch (NBC), NBC's Saturday night movies, the Garry Moore show (CBS) and To Tell the Truth (CBS), continuing with The Flintstones (ABC), Wagon Train (NBC), Lawman (ABC) and 77 Sunset Strip (ABC). Reynolds also will sponsor more sports. Radio, magazines and newspapers round out coverage plans, stockholders were told. (The William Esty Co., New York, is the tobacco firm's advertising agency.)

Increased advertising costs last year were attributed primarily to higher media charges.

Camels, Winstons and Salesms, the company’s major cigarettes, are doing record first-quarter business this year, Mr. Gray told the meeting, held Wednesday (April 12) in Jersey City, N. J.

Schenley pours big wine budget into radio-tv

Schenley Import Co., New York, has completed plans for broadcast media's one-half share in a $1 million campaign in the New York market for its Dubonnet wines (April 17, 1961). Included is a 9-week sponsorship of a half-hour Saturday (10 p.m.) music program, Mantovani, which will be simulcast on WNTA-AM-FM-TV New York-Newark, N. J.

In addition, Schenley, through its
How WHO-ratio services aid food advertisers in America's 14th LARGEST radio market!

Feature merchandising services offered in high-traffic food stores!

WHO - Radio's Feature Merchandising Services provide unmatched in-store attention for the products of qualifying advertisers.

These outstanding services are performed in high-volume chain and independent supermarkets in every city and town of over 5,000 population, in 28 of Iowa's most heavily-populated counties. These counties account for 46% of all retail food sales in Iowa!

Experienced staff members make a minimum of 480 store calls for your products over any 13-week period. They work with grocers to assure that your products get maximum facings, better shelf positions, 50 one-week displays of suitable products, and 24-days of Bargain Bar participation.

50,000-watt WHO reaches 865,350 homes in 96 of Iowa's 99 counties plus a number of counties in neighboring states. Only 13 other stations in America offer you more audience or more buying power than WHO!

WHO-Radio is equipped and staffed to blend your advertising with professional, 'big market' programming. Talk to your PGW Colonel soon about WHO Radio and America's 14th Largest Radio Market!

Sources: NCS No. 2 and Pulse, March, 1960.
agency, Klepner Co., New York, has purchased radio-tv spot schedules which will continue for the next 13 weeks, stop for 13 weeks and then resume for 26 weeks. Some 80 radio spots on five stations and 40 tv spots on two stations will be aired weekly.

Wine advertising on radio and tv is permissible under the NAB code, but Dubonnet's new tv commercials were rejected by at least two New York stations—WCBS-TV and WNBC-TV, both code subscribers—when the stations' respective continuity acceptance departments declared that the storyboards showed them put emphasis on the name Schenley instead of Dubonnet. The repetitive reference to Schenley, the stations said, associated the commercials with Schenley's hard liquors and thus constituted a violation of the code. WNTA-TV and WOR-TV, which accepted the Dubonnet campaign, are non-code stations.

A Dubonnet spokesman said on Thursday that "the commercials do feature the Schenley 'Seal of Elegance' but this in no way violates the NAB code." Dubonnet wines, he continued, "have been known, sold and identified as a Schenley product since Repeal." In answer to news reports that a major portion of Dubonnet's budget had been allocated from other Schenley products, a company spokesman said: "The $1 million budget has been set up exclusively for Dubonnet and affects no other products' expenditures."

Agency appointments...

- The Greater Cleveland (Ohio) Rambler Dealers Assn., local tv user, appoints Geyer, Morey, Madden & Ballard Inc., N. Y., for an expanded advertising program.
- TreeSweet Products Co., Santa Ana, Calif., names Eisaman, Johns & Laws, L. A., as agency. Saturation radio campaign for frozen orange juice starts April 17 on KFWB, KMPC and KPOL Los Angeles; KABL, KEWB and KSFO San Francisco-Oakland; KCBQ and KSVO San Diego, all California.
- Coca-Cola Bottling Co. of Los Angeles, which left McCann-Erickson, L. A., a year ago to be handled by Murphy Asso., that city, returns to M-E June 1. At the same time, Joe Murphy, head of Murphy Asso., will become associated with M-E with primary responsibility for supervision of the L. A. Coca-Cola Bottling account. McCann-Erickson, N. Y., handles national advertising for Coca-Cola.

700 TO ATTEND AAAA MEET

This year's theme: "Growth Through Advertising";

Collins among speakers at three-day convention

"Growth Through Advertising" is the theme of the annual meeting of the American Assn. of Advertising Agencies this week at The Greenbrier Hotel in White Sulphur Springs, W. Va. More than 700 agency representatives and guests are expected at the three-day meeting, which will include an address by NAB President LeRoy Collins.

The convention opens with a members-only business session Thursday; media and advertiser guests are invited to join the Friday-Saturday sessions. The highlight of the closed session will be the election of new officers and directors, who will be introduced at the Friday morning session by Harry Hardig, executive vice president of Young & Rubicam and current chairman of the AAAA board of directors.

Other Friday events include talks by John Hay Whitney, publisher of the New York Herald Tribune and part owner of Corinthian Broadcasting Co., as well as the Herald-Tribune radio network in suburban New York, on "A Growing Nation"; Arno H. Johnson, vice president and senior economist of J. Walter Thompson Co., on "The Growing Importance of Advertising in Our Economy"; I. E. Purvis, president of Gallup & Robinson Inc., on "Increasing the Effectiveness of Advertisements—Case Studies in the Creative Application of Research"; and Dr. Samuel Stevens, president of Stevens, Throw & Assc., on "Encouraging Creativity Through Persuasive Techniques."

Friday evening will be devoted to the AAAA's 45th annual dinner which will be spiced by entertainment provided by Jimmy Durante, Dorothy Provine and Rudy Vallee.

Awards, Talks ■ Included on the Saturday agenda, besides Mr. Collins' speech, are presentation of the 1961 Arthur Kudner Award by George H. Gribbin, president of Young & Rubicam; and talks by E. G. Gerbic, vice president of Heublein Inc., and William Bernbach, president of Doyle Dane Bernbach Inc. The concluding address of the convention will be given by Harry Harding before he relinquishes his gavel to the incoming chairman.

Not on the program but slated for showing at various times during the convention will be a special selection of outstanding tv commercials and award winners from the 1960 Venice Film Festival.

Preceding the convention will be the annual region and council governors' meeting on Wednesday. Some 50 governors of the Eastern East Central, Central and Western AAAA regions are expected to attend along with representatives of 21 local councils. The purpose of the meeting is the exchange of information on regional and local activities.

The design of a print symbol for this year's "Growth Through Advertising" convention theme was created for AAAA by Boleslaw Czernysz of Young & Rubicam.

Gulf sponsors a third Of NBC-TV news specials

More than a third of the 21 major news specials on NBC-TV in the first three months of 1961 were sponsored by Gulf Oil Corp., through Young & Rubicam. Gulf Oil's eight "instant specials" plus 12 other NBC special news reports set a record, according to the first in a series of quarterly reports by NBC News.

The major sponsors of NBC programs during the period, besides Gulf, have been Texaco Co. (Cunningham & Walsh); Timex Corp. (W. B. Doner); Purex Corp. (Edward H. Weiss); General Mills Corp. (Knox Reeves), and Mutual of Omaha (Bozell & Jacobs).

The report shows 45 station clients for the NBC News Program Service, which uses network lines to transmit filmed news stories instantaneously to NBC-affiliated stations. Subscribing stations tape or kinescope as many as 10 stories daily for use on local news programs. Other first-quarter achievements: news bureaus opened in Rio de Janeiro and Buenos Aires.
Again, WSB-TV dominates the ratings for local, national and world news in this important three station market. ARB (Jan.-Feb. 1961) shows 6:30-7:00 p.m. news with an average rating of 43.0. Nielsen (Feb. 6-Mar. 5, 1961) shows average ratings of 39.9. Viewers in Atlanta and Georgia look first to WSB-TV for fast, accurate, unbiased news. News gathered, interpreted and reported—by experienced newsmen—8 times daily. To sell Atlanta's million plus other Georgians too, schedule WSB-TV!
Research firm is testing its own tests

FINDS THE BEST PRE-TESTING

The Center for Research in Marketing Inc., Peekskill, N.Y., a firm that tests television commercials and programs, has been testing its tests. The winning method for testing commercials, the company believes, is "CC/TV," which uses community-antenna homes for pre-testing.

William Capitman, president of the center, described CC/TV last Thursday (April 13) for the Copy Research Group of the American Marketing Assn.'s New York Chapter, commending it as a system that is as near as you can get to the actual circumstances of home viewing, short of buying air time.

Over the past year-and-a-half, CRM has used five eastern cavt samples to test commercials for a substantial group of advertisers and agencies. At the same time the company has used theatre-type testing (a network also is a client), which Mr. Capitman styles the "captive audience" technique, and the rear-screen system, which simulates receiver projection, so the company is in a good position to test the tests.

These are the varying results Mr. Capitman got, testing two commercials and a program with the three methods, using matched samples.

METHOD IS IN CATV HOMES

and advises the homes. While the show is on the air, blank questionnaires are delivered to homes. At show's end, an announcer tells respondents to get their questionnaires and quizzes them on the test commercial. In return for mailing in the questionnaire, the cooperating viewer receives a premium from the center.

Through background data the center develops on buying habits and other characteristics of its cavt audiences, the method lends itself to testing competitive commercials and other uses by means of matched samples. The system is used for testing copy as early as the storyboard stage.

Citing some of CC/TV's merits over rear-screen and audience testing, Mr. Capitman mentioned the disadvantage of an interviewer's presence when a test commercial is offered on a portable projector, and about theatre testing he said, "It is so totally different from the television viewing situation that I do not believe that the results can be validly predictable of response."

The Center for Research in Marketing was founded in 1957 and began by testing package design, using sociological and psychological techniques.

Three brewers sponsor 'Diamonds' in 33 markets

Three regional brewing companies have signed to sponsor Ziv-UA's newly released King of Diamonds, half-hour tv series, in a total of 33 markets, according to Len Firestone, vice president in charge of syndication sales. Jackson Brewing Co. (Jax Beer), New Orleans, will sponsor the series in 18 midwest and southwestern markets; Piel Bros., Brooklyn, has bought five major markets in the east (New York, Philadelphia, Hartford, New Haven and Syracuse), and Jacob Schmidt Division, Pfeiffer Brewing Co., Detroit, has bought 10 markets in the Midwest. The new series stars Broderick Crawford as chief of security and recovery for the diamond industry.

TvB says summer drop in tv viewing only slight

The small decline in tv viewing that occurs in the summer is not reason enough for tv advertisers to take a "vacation" in June, July and August, Television Bureau of Advertising claims in a brochure called "This Is Summer TV?" released last week.

TvB acknowledges a 3.4% fall off in television's full week accumulated audi-

ence in the summer. While weekly unduplicated homes reached is 95.6% in a "peak" March, the percentage for a full week in August is 92.4—"hardly a summer slump," the brochure asserts.

In the daytime, the TVB folder shows, the hourly average of homes using tv Monday through Friday, 9 a.m. to 5 p.m., is 17.5 in the months of April, May, September, October, November and December; in June, July and August the average is 18.5. In late night tv, there is no mid-winter bonus audience with the hourly average of homes using tv in the summer at 22.5, against the full-year average of 23.8.

TvB adds that "homes with the highest education, largest incomes and most members maintain their viewing levels all year long even more consistently than other homes." As for those "vacationing advertisers," the brochure points out: "That just leaves more prime availabilities for the advertiser who knows the numbers."

Atlanta award winners

Henderson Adv., Greenville, S. C., took top tv commercial honors at the third annual awards ceremonies of the Radio & Television Representatives Assn. of Atlanta. The contest was limited to southeastern agencies and accounts doing business through Atlanta station reps.

The winning commercial was for Sea Pak Frozen Foods. Certificates of merit were issued to Liller, Neal, Battle & Lindsey; C. Knox Massey & Assoc.; Henderson Adv.; and McCann-Marshalk. The outstanding radio honor was taken by Liller, Neal, Battle & Lindsey for its Life of Georgia commercials.

KSD-AM-TV moves to Katz

NBC affiliate KSD-AM-TV St. Louis announced last week that effective July 1, The Katz Agency Inc., would be its national sales representative. The move was the latest stemming from the FCC order that network spot sales organizations get out of the national sales representation business. Earlier this month another NBC affiliate, WAVE-AM-TV Louisville, appointed Katz as national sales representative (Broadcasting, April 3, 1961). Both stations were formerly represented by NBC Spot Sales.

Rep appointments...

- KCDA-TV Douglas, Ariz.: Spot Time Sales.
- WQXR New York and WHNC New Haven, Conn.: Foster & Creed, Boston.
- WDXB Chattanooga, Tenn., and WLAN Lancaster, Pa.: Weed Radio, N. Y.
All-new Cartridge Recorder Developed to Meet Broadcast Station Criteria... Schafer 3000

From basic design through each precision machined part of the finished product, all details of the new Schafer 3000 were planned to meet the most stringent broadcasting station criteria. Components for this all-new machine were developed from new concepts to meet this high standard. The result is jewel-like precision and an entirely new standard of dependability for the industry, yet the unit is operationally compatible with other cartridge recorders now being used. The 3000 is available in its case as a self contained unit or for rack mounted operations. It accommodates all sizes of the Fidelipac cartridge, from 30 seconds to 60 minutes.
SCHAFER 3000

Based on a group of entirely new concepts, the Model 3000 Cartridge Recorder will outlive other machines by many years, affording precise, one-hand operating ease in continuous use. Machined parts take the place of stampings to assure its exceptional capabilities. An extra-size, hysteretic synchronous motor with nylon belt drive, large machined brass fly wheel, an eliminates problems associated with the older concept. Separate record and playback heads maintain high fidelity. Machine has tone burst system of cueing on second track. Specifications are equal to those of the finest professional "reel to reel" recorders. A removable cartridge permits push button control to console or direct connection to Schafer Automation. Cartridge inserted in slot. The new concept brings the pinch roller into position vertically, a rather than pivoting it into place. Ease of maintenance is facilitated by having all circuitry transistORIZED and mounted on plug-in panel. Standard equipment includes boards for control, tone burst and reproduce amplifier. Mike preamp. are available as accessories.

SCHAFER 3000

**NETWORK TV CLIENTS: 376**

TvB's 1960 figures show number at all-time high topping 1956's 341 users; P&G tops spender list

An all-time record for the number of advertisers using network television was set in 1960. The Television Bureau of Advertising reports today (April 17) that the total last year hit 376, up from the previous high of 341 advertisers in 1956.

Gross time billing on the networks last year was at an all-time high of $682,371,069 (Broadcasting, March 6).

TvB's list of 376 advertisers also makes these points:

- Leading network advertisers in order of rank were Procter & Gamble, American Home Products, Lever Bros., General Motors, Colgate-Palmolive, General Foods, R. J. Reynolds Tobacco, Sterling Drug, General Mills, and Brown & Williamson Tobacco (see alphabetical listing for expenditures of each).
- A total of 53 companies in 1960 used the medium for the first time, and of this number 27 spent less than $100,000 while 15 had gross time billing between $100,000 and $200,000.
- The base of network tv advertising broadened in that 96 advertisers spent less than $100,000.

TOLEDO
STATION BREAK HASSLE

Second-saving situation seemingly serious;
Networks undaunted despite Y & R rebellion

A controversy was taking shape last week that is expected to thrust some advertising agencies into a heated dispute with the television networks over plans to expand evening station break time.

Young & Rubicam, New York, in a series of sharply-worded telegrams, last Thursday (April 13) became the first agency to come out openly with criticism of ABC-TV's declared policy to lengthen evening station breaks from 30 seconds to 40 seconds, and of CBS-TV's tentative proposal to expand the breaks from 30 to 40 seconds after half-hour newscasts and from 60 to 70 seconds after hour-long programs. The belief in advertising circles at week's end was that other agencies with heavy investments in network program sponsorship might follow Y&R's lead.

George H. Gribbin, Y&R president, sent telegrams to ABC, CBS and NBC in which he explained the agency's position on the matter, urging that station break time practices remain unchanged. When the telegram to ABC was most outspoken, since that network already has announced that the 40-second station break will go into effect with the start of the 1961-62 season. CBS-TV, which had announced its plans to agencies on April 7, was advised by Mr. Gribbin to reconsider its proposal, although the network had said it would not implement it unless other networks instituted expanded nighttime station breaks. Mr. Gribbin urged NBC-TV, which has made no announcements on the subject, to maintain a position of "no lengthening" of station break time. Mr. Gribbin sent copies of each of the telegrams to Leroi Collins, NAB president, for his information.

In his telegram to Oliver Treyz, ABC-TV president, Mr. Gribbin made these observations in "protesting" the pending expansion of station break time from 30 to 40 seconds:

- This move is a "direct infringement upon responsible use of the free airwaves granted to networks and stations by all the people."
- The pending change appears to be "in violation of the spirit, if not the letter, of the code of the NAB, subscribed to by stations and networks."
- If executed, the move could be "an another step toward a chaos of commercialism" extending from coast to coast.
- Such a reduction of program time is, in effect, an increase in network rate time since the time is being taken away from purchase of programs without compensation by a proportionate decrease in charges.
- Increased time placed in the hands of affiliates "will increase the difficulties in policing schedules."

Mr. Treyz replied by wire almost immediately. He advised Mr. Gribbin that ABC-TV had made known its policy on Feb. 1, "prior to the start of the 1961-62 selling season." He pointed out, too, that ABC-TV to date has accepted network business in the amount of approximately $200 million, including orders from Young & Rubicam, in accordance with the revised station break policy.

Mr. Treyz stated that the network "deliberately" had announced its policy "well in advance" of the normal buying season so that agencies and advertisers would know what they were buying. He added pointedly: "It would seem to us therefore that your controversy may be with other networks, who, we understand, in response to our leadership, are attempting retroactive changes by proposing to alter terms and conditions of business already placed and accepted by them."

It was estimated that Y&R places at least $6 million on ABC-TV's nighttime schedule and a substantial amount of daytime business.

Spokesmen for CBS-TV and NBC-TV declined to comment on Mr. Gribbin's telegram. Industry observers believed that since ABC-TV is emphatic in its decision to lengthen the station break time, CBS-TV undoubtedly will proceed with its contemplated changes and NBC-TV, for competitive reasons, may have to follow.

CBS-TV's letter to agencies, dated April 7, 1961, said the network is considering adoption of longer station breaks and said these plans may provide for either a 42-second break (in lieu of 30 seconds) at the end of each nighttime program or a 70-second station break at the end of certain programs which are sold on a participating basis. The letter, signed by William H. Hyland, vice president, sales administration, said these changes would not be implemented "unless it becomes necessary, competitively, to make such expanded nighttime station breaks available to our affiliates."

Business briefly...

Coca-Cola Ltd., Toronto, Ont., has signed a one-year contract for a weekly half-hour program on four Canadian FM stations, the first major national commercial program on such stations in Canada. Coca-Cola will use CHFI-FM Toronto, Ont.; CKVL-Verdun, Que.; CFRA-FM Ottawa, Ont.; and CJOB-FM Winnipeg, Man. Account was placed by McCann-Erickson Canada Ltd., Toronto, and stations are represented by Radio & Television Sales Inc., Toronto.

American Tobacco Co. (Lucky Strike cigarettes), N. Y., soon will be in 50- 60 markets with a 20-week spot radio campaign that's already started in a few markets. The current TV spot drive for Lucky Strike is slated to end May 20. Agency: BBDO, N. Y.

Minute Maid Corp. (Snow Crop new process frozen orange juice), Orlando, Fla., is launching a saturation TV spot campaign that will be fully underway in most major markets by May 1. The spot orders are planned on a 52-week basis. Agency: Kastor, Hilton, Chesley, Clifford & Atherton, N. Y.

Dow Chemical Co., Midland, Mich., will sponsor an hour-long TV special next season starring Judy Garland, but the network and date are unannounced. Format and production plans for the show, which will be pre-taped, are currently being developed. Miss Garland's first TV appearance was on CBS-TV on Sept. 24, 1955. Agency: MacManus, John & Adams, N. Y.

Procter & Gamble Co., Cincinnati, will sponsor The Dean Martin Show, a color special, on NBC-TV April 25 (Tue. 10-11 p.m. EST). Appearing with Mr. Martin will be Tony Martin, Tina Louise and Andy Griffith. The program will be produced by Alan Handley and directed by Greg Garrison. Agency: Benton & Bowles, N. Y.

JFK AT NAB CONVENTION

Will appear before joint opening session May 8; H E W Secretary Abraham Ribicoff also scheduled

NAB’s featured star will be President John F. Kennedy.
LeRoy Collins, association president, announced April 13 the Chief Executive will take part in the formal convention opening in Washington May 8.

Although President Kennedy had been invited some weeks ago, final details had not been worked out until April 8 when the White House notified Gov. Collins the invitation had been accepted.

The Chief Executive will be introduced to the NAB delegates by Gov. Collins, who presented then Sen. Kennedy to the Democratic convention in Los Angeles last summer while serving as permanent chairman of the nominating proceedings.

Dwight W. Martin, WAFB-TV Baton Rouge, La., co-chairman of the NAB convention committee, will preside at the formal opening. Merrill Lindsay, WSYY-AM-FM Decatur, Ill., the other co-chairman, will preside at the May 8 luncheon at which the keynote address will be given by Gov. Collins (convention program in April 10 BROADCASTING).

Judge Justin Miller, former NAB president and board chairman, will be awarded the NAB’s 1961 Distinguished Service Award at the formal opening.

Others participating will be the Most Rev. Philip M. Hannan, Vicar General of the Archdiocese of Washington, who will deliver the invocation, the U. S. Marine Band and a Joint Service Color Guard.

Minow’s Debut - FCC Chairman Newton N. Minow will be luncheon speaker May 9 at the ownership-management session. Concurrent meetings will be held during the May 7-10 convention period by the NAB Engineering Conference.

A second high administration figure will take part in the convention—Abraham Ribicoff, Secretary of Health, Education & Welfare. He will address the ownership-management luncheon May 10, the final day. Acceptance by Gov. Ribicoff completed the list of speakers for the industry’s annual meeting.

Several additions to the agenda of National Assn. of Fm Broadcasters were announced last week by Fred Rabell, KITT (FM) San Diego, president. The association will meet Saturday, May 6 and the next morning, joining in the NAB Fm program in the afternoon (see NAFMB story, page 44).

Among side meetings to be held during the convention are sessions of the Assn. of Maximum Service Telecasters. Lester W. Lindow, executive director, said the AMST board will meet May 6, 6:30 p.m., at the Broadcasters Club; May 7, 9:30 a.m., membership meeting, Palladium Room, Shoreham Hotel; May 8, 8:30 a.m., board meeting; May 8, dinner meeting of technical committee at the Mayflower Hotel.

A labor clinic in which contract negotiations and language will be emphasized is scheduled May 10. Program features include a talk by Frank O’Connell, labor counsel for Olin Mathieson Chemical Corp., according to James H. Hulbert, NAB economics-station personnel manager. Mr. Hulbert and his assistant, David L. Doughty, will discuss secondary boycotts.

Ward L. Quaal, WGN-AM-TV Chicago, chairman of the NAB Labor Advisory Committee, will report on efforts to improve contract negotiations between networks-advertisers and American Federation of Television & Radio Artists and Screen Actors Guild. Mr. Quaal will moderate a workshop session. Richard Freund, ABC vice president, will report on network agreements with National Assn. of Broadcast Employees & Technicians.

Meanwhile at the Shoreham - Engineering conference topics cover a wide range of technical developments, including remote control, color tv, power supplies and space satellites. President Collins will greet technical delegates May 8 at the first session. A. Prose Walker, NAB engineering manager, will preside and Warren L. Braun, WSVA-AM-FM-TV Harrisonburg, Va., will be session coordinator. Engineers will join owner-management delegates for the formal opening to be addressed by President Kennedy.

Raymond F. Guy, retired NBC senior staff engineer who is now a consultant, will be presented the 1961 NAB Engineering Achievement Award. Virgil Duncan, WRAL-TV Raleigh, N. C., heads the NAB arrangements committee for the conference’s five techni-
Take TAE and see

The Duquesne Incline, a unique holdover from the turn of the century. As you ride to the top, you get a dramatic view of Pittsburgh's renaissance.
WBBM-TV Chicago rarely gives an on-the-air editorial, but when it does, the CBS-owned station puts real sock into it. The station precedes the editorial presentation by a documentary report on the problem which will be the subject of discussion.

Vice President and General Manager Clark B. George voiced WBBM-TV's second editorial. Titled "Justice Denied," the short but pointed comment called for passage of state legislation that would increase the number of Cook County Superior Court judgeships. Why? To help break a logjam of court cases, especially suits involving personal damage, chiefly from auto accidents. Even a simple case today takes six years to come to trial, WBBM-TV said.

In the documentary preceding Mr. George's appearance, WBBM-TV showed scenes from a typical auto accident involving personal injury and property damage. Scenes from a mock jury trial followed, to emphasize the amounts of time, space and people involved in such a case. Interviews with judges and lawyers representing various groups both for and against the proposed legislation concluded the documentary giving equal time to all sides in the issue.

Film shot shows court clerk examining one of 65,000 cases now in log jam.

WBBM-TV precedes editorials with documentary

Eight regional directors have been elected by the National Assn. of Fm Broadcasters, according to vote results announced last week by President Fred Rabell KITT (FM) San Diego, Calif. Several additions to the NAFMB program (BROADCASTING, April 10) to be held May 6-7 prior to formal opening of the NAB Washington convention also were announced by Mr. Rabell.

Elected NAFMB regional directors were T. Mitchell Hastings Jr., Concert Network (re-elected); John Reynolds, WJBR(FM) Wilmington, Del.; William Baird, WFMB(FM) Nashville, Tenn.; Frank Knorr Jr., WPKM(FM) Tampa, Fla. (re-elected); Harold Tanner, WLDM(FM) Detroit; Bill Drenthe, WCLM(FM) Chicago; Lynn Christian, KHKM(FM) Houston, (re-elected); and Arthur Crawford, KCBH(FM) Los Angeles.

Taking part in a May 6 afternoon panel on production and aids, including automation, will be Mr. Hastings; Paul Schafer, Schafer Custom Engineering; John Esau, Programatic Broadcasting Service; David Bennett, Triangle Stations. Bill Tomberlin, KMLA(FM) Los Angeles, will be moderator. A sales seminar will feature Frank Gallagher, of Gallagher, Evans & Dill Adv. Agency, Wilmington; Shirl K. Evans Jr., WFBM-FM Indianapolis, and Mr. Tanner.

Added to the May 7 fm profile session were Mr. Hastings, Karl Kritz; WPFR(FM) Providence, R. I., John McGorrill, WMTW-FM Mt. Washington, N. H., Messrs. Baird, Tanner and Crawford, Garry Gielow, KPFN(FM) San Francisco, and David Green, KXTR(FM) Kansas City.

NAFMB elects directors; Adds to May meet agenda

of color field redundancy in simplifying color tv transmission; Richard H. Edmondson, RCA, automation at WRC-TV Washington; Ben Wolfe, WJZ-TV Baltimore, 20 millimicrosecond d.c. pulser and transistorized video distribution amplifier; A. C. Angus, General Electric Co., large station audio system; Kenneth LiDonnici, Fairchild Camera & Instrument Co., 8mm magnetic sound film in tv; L. W. Weiland, Ampex Corp., time base stability in video recording.

William S. Duttera, NBC, will preside at the final technical session Wednesday with Mr. Bartlett as coordinator. The speakers: Adrian B. Extlinger, CBS-TV, computer control of program switching; Gene Ellerman, WWTC Cadillac, Mich., fireproof buildings that burn; Bernard Nadler, Adler Electronics, vhf translators; Jean Felker, AT&T satellite communications; Ogden L. Prestholdt, CBS-TV, am remote control operations.

ARE CBS-TV AND NBC-TV COPYCATS?

Treyz says they imitate ABC-TV's successful programs

CBS-TV and NBC-TV were criticized last week by Oliver A. Treyz for "copying" ABC-TV programming concepts and thereby limiting the choice of the viewing public.

The ABC-TV president expressed his views in an address last Wednesday (April 12) before the Cincinnati Advertising Club. Though Mr. Treyz did not call CBS-TV and NBC-TV by name, he referred to them as the "old-line networks." He claimed that when ABC-TV began building up audiences and attracting advertisers with its emphasis on action-adventure and westerns, the other networks followed this approach instead of adopting a "counter-programming" policy.

As an example, Mr. Treyz cited the case of ABC-TV's 77 Sunset Strip, which gained audience superiority in its Friday night time slot, and resulted in another network scheduling a similar action-adventure show against it. He called this "precisely the competition in kind that of necessity cuts down tv's diversity and narrows its scope. . . . And in this case, as in most instances, the imitative show gets far less audience than the original."

'Mitch' Vs. 'Strip' = On the other hand, Mr. Treyz pointed to the successful move made by NBC-TV against 77 Sunset Strip with Sing Along With Mitch. He acknowledged: "We don't make it a habit to publicize the success of a rival network. But neither should we overlook a fresh approach on any network. In this instance, Sing Along dramatically emphasizes the case for imaginative counter-programming as a stimulus to increased viewer interests.

Television's law of audience magnetism is very close to the natural laws of magnetism; likes repel, and opposites attract."

Mr. Treyz asserted that a "balanced diet of contrasting program appeals" appears to be the logical prescription for maintaining "diversity and vitality" in television. ABC-TV, he said, is attempting to appeal to the diverse groups that comprise the tv audience and pointed to these developments:

* Children and teen-agers are exposed to such public-service-adventure programs as High Road, Bold Journey and Expedition on ABC-TV. The network is planning a late afternoon news program aimed at teen-agers and is scheduling the Winston Churchill series in a time period that will encourage viewing by youngsters.
* The senior citizens have available such programs as the Lawrence Welk telecasts and ABC-TV's extensive sports coverage, which also appeal to other age groups.
* The selective viewer has such tv fare as Bell & Howell's Close-Up and the Churchill series at his disposal.

Mr. Treyz said that ABC-TV constantly aims to counter-program, and in 1961-62, the network is reducing the number of its westerns; developing new forms of cartoon programs (Top Cat and Calvin and the Colonel will be added for next season, supplementing this year's The Flintstones), and is building a news staff with the emphasis on the working reporter, rather than the face before the camera.

He urged that each of the networks strike out on its own, developing "its own vitality, its own individuality, its own uniqueness and personality," and added: "When the country has three such networks, it will enjoy full, rich, diversified, total television service."

How to get air time

Thousands of radio and tv news editors and program directors owe a vote of gratitude to NAB. The association has issued a handbook for publicity chairmen, under the title, "If You Want Air Time." Twice it stresses the protocol of calling on broadcasters—that you don't just walk in unannounced. Make an appointment, the pamphlet says. People working in radio and tv are no different from people in other business, it says, "except that they probably are more pressed for time than most."

The 18-page booklet is for distribution by local radio and tv stations to civic clubs and other non-profit organizations which seek air time. The book points out specifically that broadcasters are under no obligation to grant free time to any group, but pride themselves on being alert to the public service needs of the community. The booklets are available to NAB members only, at 15 cents a copy; 12 cents each in lots of 100.

NBC-TV drops program unit

NBC-TV is eliminating its participating program unit and main administrative functions are being integrated into other network departments. As consequence, network reports, Jerry A. Danzig, participating programs vice president, is resigning. Also announced: election of Theodore H. Walworth Jr., newly-appointed general manager of WNBC-AM-FM-TV New York, to vice president (Week's Headliners, April 3).

KLRN (TV) asks advice

KLRN (TV) Austin, Tex., a new educational station on ch. 9 expected to go on the air in 1962, is currently conducting a program survey to determine the needs of its area.

Operated by the U. of Texas on contract with the Southwest Texas Educational Television Council, KLRN is seeking advice on programming by questionnaires to key citizens in the surrounding communities as to program ideas.  

BROADCASTING, April 17, 1961
In April, KDKA-TV received the duPont award for public service programming. The citation carried with it a cash award of One Thousand Dollars ($1,000.00), and the station was afforded the privilege of granting a scholarship for that amount. A year earlier, the station had won the Edison Award for service to youth. It, too, carried a cash award which KDKA-TV decided to turn into a scholarship fund. Only question: how do you choose from thousands of students the one most deserving? KDKA-TV officials turned the problem over to Pittsburgh educational leaders. Eddie Rohrer was selected. He began his studies and did exceptionally well. But throughout the year, Eddie pondered: how would he complete his college education? Luckily, the same question occurred to KDKA-TV officials upon receipt of the duPont award.
274 broadcasters win safety awards

180 RADIO, 67 TV STATIONS, 7 NETWORKS HONORED

The National Safety Council's 1960 public interest awards "for exceptional service to safety" were announced Thursday in Chicago. The noncompetitive honors went to 180 radio and 67 TV stations and 2 TV and 5 radio networks. Awards also went to other mass media, and advertisers.

Network winners included CBS Radio and CBS-TV, CBC Radio and CBC-TV, NBC Radio, Mutual and California Farm Network. The broadcaster and advertiser winners also will be considered for the Alfred P. Sloan Awards for Highway Safety to be made May 16 in New York. NSC's public interest awards recognize initiative and originality by the mass media in promoting accident prevention.

Tv station winners:

Armed Forces TV: Spangdahlem, Germany; CKSO-TV Sudbury, Ont.; KABC-TV Los Angeles; KARD-TV Wichita; KCMO-TV Kansas City; KDRA-TV Pittsburgh; KELO-TV Sioux Falls; KFRE-TV Fresno; KGW-TV Portland, Ore.; KIRO-TV Seattle; KTVN (TV) Omaha; KFYR (TV) Stockton, Calif.; KPIX (TV) San Francisco; KRLD-TV Dallas; KRON-TV San Francisco; KSJO-TV Sioux Falls.

KNTV-TV Tacoma; KTRK-TV Houston; KTVH (TV) Wichita; KTVJ (TV) Denver; KTVI (TV) Sioux City; KTVK (TV) Oklahoma City; KTVN-Salt Lake City; WAGA-TV Atlanta; WBTV (TV) Charlotte; WBTW (TV) Florence, S. C.; WCBS-TV New York; WCET (TV) Cincinnati; WCPO-TVCincinnati.

rati: WDAU-TV Scranton; WDSU-TV New Orleans; WFCB-TV Chicago; WGB-TV Buffalo; WJIO-TV Dayton; WJTV-Cleveland; WAGU-TV Fort Wayne; WLOS-TV Asheville, N. Macfadden buys into pay tv system

BarTELL to SEEK U.S. TV OUTLET for TEST

Macfadden Publications' purchase of a "substantial interest" in Teleglobe Pay-Tv System Inc., New York, was announced last week by Gerald A. Bartell, president of Macfadden and Bartell Broadcasting Corp., and Solomon Sagall, president of Teleglobe. The cost and the percentage of Macfadden's interest were not disclosed.

Macfadden and Teleglobe hope to form a separate company soon to make a commercial test of the Teleglobe system in a major area and they'll soon seek FCC approval. A company spokesman said Bartell seeks to buy a U.S. tv station to use for the pay television test.

Mr. Sagall said Teleglobe recently was granted patents in England and Italy, and has applied for U.S. patents. It differs from other pay tv systems in that only the sound is withheld and there are no decoding or unscrambling attachments at tv receiver. Mr. Sagall said. Subscribers are billed monthly by centralized metering.

Mr. Sagall, founder of Seaphony Ltd., a pioneer British tv firm, said "the efficiency of Teleglobe resides in its simplicity and relatively low cost." Mr. Sagall said there is "no tampering with, or modifications of, the home receiver and no costly or involved installations."

"Equally suitable for color and black-and-white programs, Teleglobe employs an audio network, using telephone lines, that withholds sound, but not picture, from all subscribers," Mr. Sagall said. "The system is compatible with both over-the-air and coaxial-cable transmission."

Macfadden Publications, of which Bartell Broadcasting became the largest single stockholder in February, entered into the pay tv agreement because "publishing and broadcasting have a common interest, especially in serving the mass audience," Mr. Bartell said.

Bartell owns and operates WOKY Milwaukee, WAKE Atlanta, KCBQ San Diego, WOV New York, WYDE Birmingham, Ala., and KYA San Francisco.

At present there are only two prospective pay tv operations in the U. S. In Hartford, Conn., RKO General has FCC approval to run a three-year test of off-the-air Phonevision, using its ch. 18 WHCT (TV) there. In Little Rock, Ark., a local group has petitioned the Arkansas Public Utilities Commission to order Southwestern Bell Telephone Co. to furnish wire lines for a Telephone coin-in-the-box system. This is the same system which has been operated for more than a year in Toronto, Ont.
To prove what we suspected (that provocative broadcasting builds audiences), we compared Pulse ratings in New York City. Month after month and for more than a year, Fulton Lewis, Jr. has been the number one program; number one at 7 o'clock and also number one in competition with all other news and commentary programs regardless of time.

Number one market too big to relate to your sales problem? Try Richmond, where Mr. Lewis also clearly dominates the field of news commentary. Or look at the results he's achieved for a Chevrolet dealer in Demopolis, Alabama.

Does controversy count for anything? Thumb through the endorsements Mr. Lewis has received from his co-op advertisers in the savings and loan field (and who could be more sensitive to public opinion?). A Southern California institution doubles its resources in a little more than two years. A Dallas sponsor points to a 20% increase in deposits in one year. And so forth and so forth. Want a convincing sales argument? We'll gladly send you copies of many such testimonials.

What are the extras worth to your client? Aside from cracking style and ability to command loyalty from listeners, add the value of personality promotion. Mr. Lewis will tape custom introductions for your client, record commercials, provide endorsements. Mr. Lewis is not content to sell himself; he sells for your advertiser.

Why not number Fulton Lewis, Jr. among the priority programs to sell in your market or region. Contact Mutual's Cooperative Programming Dept. for the complete story.

All the arithmetic to make the sale is on your side.
Changing hands

ANNOUNCED • The following sales of station interests were reported last week subject to FCC approval:

• WAVY-AM-TV Portsmouth (Norfolk), Va.: Sold by Tidewater Teleradio Inc. (J. Glen Taylor, president) to Gannett Co. Inc. for a net figure of about $4.5 million. Gannett board approved acquisition last week, Paul Miller, Gannett broadcasting chief announced. Sale must be approved by WAVY owners, although this is considered a formality. Gannett owns WHBC-AM-TV Rochester, N.Y., where it publishes Rochester Times-Union and Democrat & Chronicle; WHEC-TV, Binghamton and WINR-Dcasting in Illinois. WAVY also publishes newspapers in other New York cities, New Jersey, Connecticut and Illinois. WAVY is 5 kw on 1350 kc. WAVY-FM is 26 kw on 96.9 mc. WAVY-TV, established in 1957, is ch. 10 and NBC-TV affiliated. Broker was Blackburn & Co.

• KTRC Santa Fe, N. M.: Sold by Garfield C. Packard to Carl S. Goodwin for $100,000. Mr. Goodwin was co-owner for the past four years of KRIG-AM, Odessey, Tex., recently sold. KTRC is 250 w on 1400 kc. Broker was Hamilton-Landis & Assoc.

• KSLY San Luis Obispo, Calif.: Sold by Rex O. Stevenson to Berry Broad- casters Inc. for $50,000. Berry comprises Reginald D. Streeter, John W. Barba and Sylvain Lasalette. Messrs. Streeter and Barba were formerly employed at KWIP Merced, Calif.; Mr. Lasalette is an automobile dealer. KSLY is on 1400 kc with 250 w. Broker was Blackburn & Co.

• WGOE -FM Huntington, W. Va.: Sold by The Tierney Co. to George H. Clinton for $125,000. Mr. Clinton has a minority interest in WTM-A-AM-FM Charleston, S. C.

Record radio billing reported by Storer

The “greatest” March radio billing period in the 34-year-old history of Storer Broadcasting Co. is seen as an indicator of the end of the business recession, according to George B. Storer, chairman of the multiple broadcasting company.

Mr. Storer made his announcement at the annual Storer stockholders meeting in Miami last Wednesday.

He explained the reason for his “cautious” optimism by noting that radio reflects the broadcasting business and the overall economy more quickly than television because an advertiser can prepare a radio schedule, or increase an existing schedule, in a matter of hours.

Storer’s first quarter showed a decline, mainly attributed to a dip in television sales plus the lack of a tax loss carryover included in the 1960 figures.

Announced was the election of George B. Storer Jr. to the presidency of the company; Mr. Storer Sr. retaining the chairmanship. Other new elections were also announced (see WEEK’s Headliners, page 10).

Earnings dip • First 1961 quarter earnings of $1,055,418 (42.6 cents per share) compared to $1,423,079 (57.5 cents per share) in the same 1961 quarter were announced at the meeting. Both are net after taxes. The 1961 earnings were based on 2,474,950 shares outstanding; 1960 on 2,474,750 shares.

One reason for the decline, it was pointed out, was that the first quarter last year included a loss tax carry-forward at WITI-TV Milwaukee. No such carryover was applicable in 1961.

Storer owns WJIB-AM-TV Detroit, WJW-AM-TV Cleveland, WSPD-AMAM-TV Toledo, WITI-TV Milwaukee, WAGA-TV Atlanta, WIBG Philadelphia, WBBS Miami, WWVA Wheeling (W. Va.) and KGGB Los Angeles. It also owns the Miami Beach Sun and a majority interest in Standard Tube Co., Detroit.

Media reports...

Lower rates • WTCN-TV Minneapolis-St. Paul, which went independent yesterday (Sunday) as its ABC-TV affiliation switched to KMSP-TV there, has announced a new rate card with lower rates effective immediately. WTCN-TV has dropped its Class AA (7:30-10 p.m.) one time one-hour rate from the

previous $1,500 to $1,200. One time one minute spot rate drops from $340 to $250. Time Inc. acknowledged the financial impact of the affiliation loss to WTCN-TV in a footnote to its 1960 financial report (Broadcasting, April 10).

Quarterly quarter • American Broadcasting-Paramount Theatres Inc., N. Y., last week declared a second-quarter dividend of 25 cents per share on common stock and the same on preferred, payable June 15 to holders of record May 19.

'Yanqui, yes!' • WRUL New York, international short-wave radio station, last week started to broadcast in Spanish a schedule of 81 home games of the New York Yankees to the Caribbean area, Mexico, Central America and Venezuela.

Networks get ready for directors’ strike

The deadline for contract negotiations between the Directors Guild of America and the radio-tv networks was set for midnight last Friday (April 14). Network officials were hopeful of a settlement but said they are prepared to maintain operations if DGA calls a strike.

The key issue is DGA’s demand for a change in the method for payment of directors on live or taped tv shows. Now they are paid $190 weekly minimum, plus commercial fees for working on sponsored shows. The Guild’s proposal would eliminate staff directors and place them under a free-lance contract, whereby they would be paid $630 a week and guaranteed 23 out of 26 weeks of employment. It was reported that under such a scale there would be no extra payment for overtime and no limit on the number of hours or days a director could work in a week. Approximately 900 guild members are covered by network contracts.

The networks have rejected the proposal, claiming it is “unworkable” in tv, a network source said. Their attitude is that the DGA plan would impose “A motion picture concept” on tv.

PAB host to congressmen

The Pennsylvania Assn. of Broadcasters will hold its second annual breakfast for members of the Pennsylvania congressional delegation tomorrow (April 18) at the Congressional Hotel in Washington. Milton Bergstein, WMAL State College, Pa., president of PAB, and John S. Booth, WCHA Chambersburg, chairman of the broadcast committee, will head a delegation of about 25 broadcasters. An equal number of members of the Senate and House from Pennsylvania have accepted.

Wherever a buying decision is made... a WEED man IS THERE!
A Solomon of the radio spectrum?

POSSIBILITY OF SUPER ALLOCATION AUTHORITY SEEN IN TALKS

An administrator to oversee the administrators of the radio spectrum may be the outcome of current informal meetings among the FCC, the Office of Civilian & Defense Mobilization and White House aids.

The meetings have been going on over the last few weeks, a White House source acknowledged last week, to work out a method of coordinating the apportionment of the spectrum between government and non-government users.

They're not only discussing the apparatus to handle the apportionment, but also considering some kind of supervision over usage.

As it was explained, this means that if a band of frequencies is allocated to a government user, but is not being used, there ought to be some way to revise the allocation and assign it to another claimant. And vice versa.

The existence of the preliminary discussions involving the future of radio spectrum management was indicated last Thursday in President Kennedy's message to Congress on the regulatory agencies.

Speaking of the need to coordinate the activities of various independent agencies, the President referred to the "coordinated effort...underway to provide a better method for the allocation among governmental and non-governmental users of the radio spectrum, and to improve the regulation over the method of their use...".

What May Happen - The current discussions may result in the establishment of a more formal spectrum administration, it was learned last week. This could lead to a request to Congress for legislation. Or, it was pointed out, the President might use the powers he has acquired under the Reorganization Act to put this into effect.

FCC Chairman Newton N. Minow has represented the FCC at the meetings. White House participants have been James M. Landis, the President's expert on regulatory agencies; Dr. Jerome B. Wiesner, science adviser to the President; and Myer (Mike) Feldman, deputy special counsel to the President.

The idea of establishing a more formal chain of command to handle the radio spectrum has had various proponents during the past 25 years. The latest was a special congressional hearing in 1959 under the chairmanship of Rep. Oren Harris (D-Ark.), who heads the House Commerce Committee. At that hearing a panel of government officials and communications and electronics experts testified on various proposals. There was a strong feeling that a frequency allocations board should be established to handle the overall division between government and non-government. Some urged the creation of a government czar or board to ride herd on government users, the FCC continuing to assign bands and issue licenses to non-government users (BROADCASTING, June 15, 1959).

At present, frequency allocations are handled on an informal basis by the Interdepartmental Radio Advisory Committee, representing government users, and the FCC, representing non-government users.

More Power - The President asked that more authority over administration and management be given the chairmen of the agencies. Recommendations to effect the plan will be submitted shortly, the President said, and it was learned they may be sent to Congress this week.

In a related statement, the President urged that the regulatory agencies be more responsible to the White House in the management of their affairs. Since he must enforce the laws Congress passes, Mr. Kennedy said, it's up to the White House to see that the independent agencies have a strong tie to the executive department.

The presidential message stressed that overall managerial oversight of the agencies should be in the executive's hands. This includes the power to coordinate the various agencies whose responsibilities cut across the same field, he said.

Although the President did not name the agencies, Mr. Landis previously has referred to a lack of coordination among three agencies, all concerned with transportation—the Interstate Commerce Commission (railroads, trucks and buses); the Civil Aeronautics Board (air commerce) and the Federal Maritime Board (water transportation). In the field of communications Mr. Landis has referred to the overlapping interests of the FCC and the Federal Trade Commission, and the FCC's relationship to the Dept. of Justice.

Hill and High Water - The President's ideas are believed bound to run into conflict with Congress, always touchy about its authority over the independent agencies.

One observer noted that Mr. Kennedy's ideas for making chairmen responsible to the White House are at odds with the House Oversight Committee's recommendation that the chairmanship of an administrative agency be rotated annually among its members.

In his special message, the President also urged that all agency decisions be written by individual commissioners, instead of as a blanket agency decision, the method now used at the FCC.

He also suggested more delegation of responsibilities and authority to panels of commissioners, or to the staff. He urged that standards and pay for hearing examiners be raised.

The President issued an Executive Order last week which set up an Administrative Conference on regulatory agencies. The conference will include representatives of government agencies, the bar, universities and other "practitioners," he said. Heading this conference, it is presumed, will be Circuit Judge E. Barrett Prettyman, of the District of Columbia U.S. Appeals court. Judge Prettyman last year headed an organizing committee for such a conference at the request of President Eisenhower.

No Czar, No Raises - Much of Mr. Kennedy's message was similar to proposals enunciated by Mr. Landis, one-
They live it up... and love it... in the fabulous KSLA market. Oil-rich, timber-rich, cattle-rich, and growing industrially... this tri-state area hardly knows recession. Its people play hard, work hard and have the money to buy. They look to KSLA-TV for news they believe... programs they enjoy.

Ask our reps (Harrington, Righter and Parsons) about the fabulous KSLA market!
IN THE CONGRESSIONAL HOPPER

Here, in capsule form, are bills introduced in Congress that are of interest to those in broadcasting and allied fields:

HR 6056. Rep. A. Sidney Herlong Jr. (D-Fla.)—would expand the purpose of determining manufacturers’ excise taxes, the exclusion of local advertising charges from the sales price of an article. Ways and Means Committee. March 29.

HR 6180. Rep. Charles S. Gubser (R-Calif.)—would create a permanent Commission on Organization of the Executive Branch to conduct studies and make recommendations to promote economy and improve efficiency in government.

S 1534. Sen. John J. Williams (R-Del.)—would provide criminal penalties for anyone attempting to bribe a government official and for officials accepting bribes. Judiciary Committee. April 12.

S 1535. Sen. John J. Williams (R-Del.)—would prohibit former government officials, including members of Congress, from representing, within two years of their separation from office, firms or individuals in matters which they had become aware of while in government service. Judiciary Committee. April 12.

The establishment of an office of regulatory oversight in the White House, however, has adherents on Capitol Hill. Last week a Senate Judiciary subcommittee issued a majority report recommending among other things that an Office of Administration and Reorganization be set up in the White House to investigate trouble spots in the administrative area, report their causes to the President, provide the agencies with management consultant services and prepare plans to increase agencies’ effectiveness.

Republican members of the committee balked at this suggestion, seeing in such a move a potential source of conflict between the administration and Congress.

Sens. John A. Carroll (D-Colo.), who is chairman of the subcommittee, and Philip A. Hart (D-Mich.) are the majority; Sen. Everett Dirksen (R-III.) is the minority.

A general code of ethics for all government personnel, particularly the executive departments and the independent agencies, is expected to be issued sometime in the near future.

The message made specific proposals for reorganizing the Federal Power time Harvard Law School dean and a former member of three government agencies (Federal Trade, Securities & Exchange and Civil Aeronautics), early this year (Broadcasting, Jan. 2, 9).

But the message made no mention of one of the stormiest of the Landis proposals: that an overseer of the regulatory agencies be established in the White House. Nor was any mention made of Mr. Landis’ recommendations involving the tenure of commissioners and their compensation.

Although President Kennedy made no mention of several other Landis ideas, it was learned that there may be some reorganization of agencies, including the FCC, and that the White House is still actively considering Mr. Landis’ suggestion that task forces be assigned to study individual agencies.

NBC says Justice erred in Philco plea

NBC told the U. S. Court of Appeals in Washington last week that the Dept. of Justice was way off the beam when it urged that the FCC ought to give Philco Corp. a hearing on its protest against the 1957 renewal of the network’s licenses for WRCV-AM-FM-TV Philadelphia.

The Justice Dept.’s memorandum, NBC said, has nothing to do with the case at hand. Both the antitrust consent decrees and the concurrent plea of no defense, cited by Justice, occurred after the protest by Philco was filed, and therefore, properly, could not be considered by the FCC, the network told the court. It also noted that in its 35 years it has never been adjudged guilty of any antitrust violation, either by the government or in a private suit. It also took a slap at the government agency’s statement that the FCC had not since 1931 reviewed NBC’s qualifications to hold a broadcast license. It pointed to the 1946 Washington, D.C., radio comparative hearing when NBC won ch. 4 there; and to various other FCC proceedings right up to 1956.

The network cited the terms of the consent decrees, holding that they do not imply a finding of violation. The antitrust suits, instituted both times by the government, referred to RCA’s patent licensing practices and NBC’s transaction with Westinghouse involving the Philadelphia stations.

Two weeks ago the FCC itself argued against the Justice Dept.’s viewpoint (Broadcasting, April 10.)

WROC-TV asks sale okay despite several protests

Transcontinent Television Corp. has asked the FCC to approve its sale of WROC-TV Rochester, N. Y., and to ignore union protests (At Deadline, March 20).

The company in a separate petition asked the FCC to ignore the opposition of WSAY Rochester to the sale. WSAY said the sale would concentrate monopolistic control in the hands of the Gannett newspaper chain (Broadcasting, April 3).

Unions (AFTRA and NABET) objected to a clause in the sale contract agreeing to abandon WROC-TV’s union pacts. Unions said this was contrary to their contract with WROC-TV. Transcontinent denied this, saying only preamble of union contract refers to Transcontinent’s successor companies, not the body of the contract.

Transcontinent also pointed out that FCC traditionally has never ruled out sales because of private contractual disagreements.

Transcontinent answered the WSAY plea by avering that allowing WHEC-TV to have ch. 10 fulltime would not violate antitrust procedure any more than does WHEC-TV’s sharing time as it currently does on that channel.

WVET-TV and WHEC-TV also petitioned that the sale be approved, stating that the case has been heard in the courts for the past 10 years and that Gannett has been found not to be monopolistic. The stations said that WSAY will have to contend with competition in any case, since ch. 13 may be dropped into Rochester under pending rulemaking. The fact that WSAY operates at a loss is not all the fault of monopoly, the stations ventured.
 THAT WCKY SURE 

cleans up 

CINCINNATI

When the dust settles after you've looked at this one's Pulse and that one's Hooper . . . This one's mail map and the other one's private study of adult behavior in radio listening, one fact emerges. In the bustling Cincinnati market, that big 50,000 watt WCKY is the answer to a buyer's prayer. It's got the coverage . . . reaching all of the new—exploding—Cincinnati area. It's got the circulation . . . you can name the stations in the nation, with bigger reach, on the fingers of one hand. And it's got the price . . . you can figure the pennies-per-thousand cost on just your two hands.

The moral is plain. If you want to take competitors to the cleaners in Cincinnati, mop up with WCKY.

AM Radio Sales will help you.

WCKY-RADIO IS SOME BUY

50,000 WATTS • CINCINNATI
The tab for political time last year

The FCC last week submitted its final report on the political broadcasting activities of radio and television stations throughout the country last fall.

The document, which gives the most complete picture of these activities ever attempted, generally supports the findings of an earlier report (Broadcasting, March 6) covering some of the same ground—namely, that broadcasters behaved reasonably well and fairly in covering the political campaigns.

However, it appeared last week that the FCC may be asked to substantiate its report with further information. Creekmore Fath, counsel for the Senate Watchdog Subcommittee, said he is interested in a station-by-station breakdown of certain questions covered on a state-by-state basis.

He said that, in some respects, the report did not jibe with information developed at the Watchdog hearings last month (Broadcasting, April 3).

He did not specify which areas he had in mind. However, he indicated skepticism about a finding in the report that the number of radio stations refusing to sell time for political broadcasts was negligible.

The massive FCC report provides, among other things, a state-by-state breakdown of how broadcasters handled coverage of contests for president, vice president, governor, senator and U. S. representative. It will figure importantly in the hearings the Senate Communications Subcommittee will resume on a bill ($204) to make permanent last year's suspension of the political broadcasting section of the Communications Act with respect to presidential and vice presidential candidates.

The accompanying tables have been selected from the 103 in the report as being of special interest to broadcasters:

NOW... 8mm SOUND-ON-FILM FOR TELEVISION NEWS! —ON CHANNEL 5 IN PHOENIX!

KPHO-TV, Channel 5 in Phoenix, the station with Look-Ahead, has produced another FIRST! This time, development of a process which permits use of 8mm sof for television news.

Yes, television history was made on February 14, 1961, when Channel 5 telecast the first 8mm sound-on-film news story ever presented to a television audience.

Using the Fairchild Cinephonic 8mm sof cameras, KPHO-TV now provides inexpensive, compact sof cameras for the use of all their news staffers. With the added aid of a table top fast-film processor, KPHO-TV news is as news should be... immediate, accurate, complete.

KPHO-TV, the leading independent TV station in the United States, leads again, in Look-Ahead.
THOSE POINTED QUESTIONS
FCC staff's renewal-time inquiries indicate extent of concern with wayward licensees

More and more stations are being asked to account for their programming as their turns come up for license renewal—an indication of the FCC's increasing interest in programming (Broadcasting, April 10).

A check last week of letters of inquiry to stations whose licenses have expired this year indicates the extent of FCC activity. Stations checked were in Alabama and Georgia, (where licenses expired April 1) and in Florida, (where licenses expired Feb. 1). The inquiries are from FCC staff people who study renewal applications, then recommend to commissioners whether the licenses should be renewed or set for hearing. Although many of the letters are on financial or technical matters, several are directed to programing.

The inquiries chide stations for the number of commercials run during a given period; for failure to deliver programming promised at last renewal; for not scheduling educational or discussion programs; for not providing an outlet for "local self-expression." The staff letters make it plain that licensees are expected to dot i's and cross t's in describing the length and number of all commercials, in accounting for 100% of programming time and in explaining why the station classifies a program as it does.

So far this year, the FCC has complained to over two dozen stations about claimed overcommercialization; to some 20 stations about alleged failure to carry out programming promises and over 10 stations on the quality and variety of their programs.

Although comments on the FCC's controversial revised programming forms are not due until May 1, the commission, through the staff letters, has already put some of its proposals into practice.

Spot Check. The FCC staff compares the program logs of the "composite week" submitted by applicants with the station's statement on the time it devotes to commercials. For example, a letter to a Florida station said 31 to 38 spots were scheduled in some hours, sometimes as many as 11 in a 14½-minute period. The inquiries wanted to know the length of each spot and said, "A question is raised as to whether the station's programming is interrupted by spot announcements in a manner and to a degree so as to cause a deterioration in program service."

A station in a major Alabama market was asked about its "special promotion days" when it schedules more than its usual number of spots. The inquiry wanted to know if these "special" days are designated each Tuesday and Thursday, for example.

The time in which the spots are clustered is also of interest. Another Alabama station was questioned about broadcasting an average 22 spots per hour from 8 a.m. to 6 p.m.

Several stations did not elaborate on their commercial policy beyond stating that they complied with NAB standards for radio. The answer did not satisfy the FCC letter writers, who pressed for greater details about the number and length.

Broken Promises. In several cases the FCC staff noted a "wide variance between representations made at the last renewal period and the actual program offerings." Stations were warned that misrepresentations may have been made that could cast a cloud upon the licensee's character qualifications.

One Georgia station was told: "The station's programming appears from the composite week's logs to consist entirely of music and news interspersed with spot announcements. The 2.9% of educational programming and the 1.6% to be devoted to discussion of subjects of public interest does not seem to have been broadcast. Please submit a statement explaining this discrepancy."

Another Georgia station was called on alleged difference between the live local programming it promised and its actual percentage of recorded music. The same station reduced its percentage of live local programming on its proposed program schedule to conform with the amount actually broadcast. The FCC letter suggested this station should explore local needs to find whether it is depriving its community of a chance for local self-expression. (It is the only station in that market.)

Why Not? The letters go beyond comparing promise and performance, however, to include stations that have not broadcast certain categories of programs in the past and have not indicated that they intend to broadcast them in the future. In these cases, the letters ask, "Why not?"

A major market Georgia station revised its schedule to include "religious programming." A description made it apparent the program would be devoted to gospel records. If the program is entirely recorded and entirely music, it doesn't qualify as "religious programming" by FCC standards, the staff inquiry said.

A station which claimed a certain amount of time as educational programming was informed that unless the program was produced by and in behalf of recognized educational groups, the fact it might be instructional does not make it educational by FCC criteria.

One station, reportedly worried for a lack of educational programming, responded that it invited members of the faculty of the local high school to use its facilities when they wished. No one accepted the offer and the FCC refused to certify the station having aired educational material.

A recurring comment in the letters of inquiry: "You are requested to explain how the local needs and interests have been and are being served by your operation." The request is similar to one of the requirements on the FCC programming form now set for rulemaking.

When a Birmingham, Ala., station was accused of not providing enough local news, it responded, "However, we do furnish local news." The three local newspapers are among its sources of information, the station said.

The FCC's concern with community service by radio stations is expressly set forth in a typical letter: "In view of your showing that less than 3% of your program offerings are on a 'live' basis, it cannot be determined how you are serving the local interests of the community and whether opportunity is provided for local self-expression. You are requested, therefore, to submit a statement to indicate how you are serving the particular needs and interests of the community, what efforts are being made to provide for local self-expression and what steps are being taken to make time available for the discussion of public issues. . . . It is requested that you submit a statement showing the time and dates that religious and educational types of programming were carried by your station together with brief descriptions of the programs allegedly broadcast."

KORD hearing delayed; more log samples asked

Hearing for license renewal of KORD Pasco, Wash., on charges of overcommercialization and failing to live up to programming promises has been set back from July 3 to July 17 (Broadcasting, April 3, 10).

The FCC Broadcast Bureau agreed to the postponement to allow the station time to plead for reconsideration of the commission's hearing order. July 5 has been set for exchange of exhibits between KORD and the bureau.

At a prehearing conference last week, the bureau asked KORD to give it a representative sample of the station's logs from the three-year period to be covered in the renewal hearing. 

Broadcasting, April 17, 1961.
ON THE GENTLE ART OF CELLING

Once there was a good, but stern, Media Director. One day a young timebuyer came to ask his opinion on an important matter. Believing that nothing should be handed out in a silver spoon*, the Media Director handed the young timebuyer a sterling answer, indeed, but it was scrambled in this honeycomb. The letters in the cells spell out his precise advice. See if you can trace it through, using the letters in every cell just once, and always passing from a cell to one that is touching it. Send us the correct sentence and win a copy of Dudeney's "Amusements in Mathematics"—Dover Publications, Inc., N. Y. If you've already won it, say so and we'll send you a different prize.

* He was not averse, however, to scheduling the stations that deliver the largest audience on a silver spoon. (In Washington, he bought WMAL-TV, first all week long, 6 PM to Midnight. ARB Jan-Feb '61.)

wmal-tv

Washington, D. C.

An Evening Star Station, represented by H-R Television, Inc.

Ten senators and 13 representatives in the 87th Congress have either a direct or family-connected interest in commercial or noncommercial educational broadcasting, according to FCC records.

The total number of congressmen with these interests is seven fewer than during the 86th Congress. Missings from this year's list is former Senator, now Vice President, Lyndon Johnson, whose wife and brother have extensive broadcasting holdings in Texas.

Also missing is former Representative, now Interior Secretary, Stewart Udall of Arizona, whose uncle has broadcasting interests in a noncommercial educational type, not listed this year either did not return to Congress or disposed of their radio-tv holdings.

While the interests of the congressmen listed range from token to controlling stockholdings, none of the senators or representatives owns a radio or tv station outright. However, several hold sole or controlling interests within their families.

Several of the congressional interests are not financial. For instance, one senator is a trustee of an educational station. Another senator's aunt is a member of a state board of education which is a licensee for two tv stations, one of them educational.

Of the commercial stations having some congressional tie-in, 24 are am, 13 are fms and 18 are tvs; of the noncommercial educational type, one is am, one an fm, and one a tv.

The congressional list, showing station network affiliations where they exist, follows:

Sen. Clinton P. Anderson (D-N.M.), Albuquerque—owns 250 of 4,513 shares common voting stock of KGGM-AM-TV Albuquerque and KV SF Santa Fe, both New Mexico. His son, Shrubourne, is director and owns 107 shares of the same stations.

KGGM: CBS; KGGM-TV: CBS; KVSF: CBS.

Sen. Roman L. Hruska (R-Neb.), Omaha—his brother, Victor, Ponte Vedra Beach, Fla., is a trustee of WJCT (TV) Jacksonville, Fla., educational station.

Sen. Olin D. Johnston (D-S.C.), Spartanburg—his wife is vice president-director and owns 125 of 500 shares of common voting stock of WFGN Gaffney, S.C.

WFGN: Keystone.

Sen. Robert S. Kerr (D-Okla.), Oklahoma City—vice president, director, and owns 327 of 2,500 shares of Class A common voting stock of KVNO-TV Tulsa, Okla.; is president, and director and owns 50,611 of 100,000 shares of common voting stock of WEEK-AM-TV Peoria and WEEQ-TV LaSalle, both Illinois. His wife owns 371 shares same type stock in KVNO-TV and 11,488 shares of Illinois stations. His brother, T. M. Kerr, owns 172 shares of KVNO-TV and 1 of 327 voting stock of IRO-O-MT-AM-FM TV Seattles.

IRO-O-MT: CBS; IRO-O-MT: TV.

IRO-O-MT: CBS; IRO-O-MT: TV.

Sen. Warren L. Prouty (R-Vt.), Newport—his cousin, John A. Prouty, Newport, owns 1 of 1,643 shares of common voting stock of WKEI Newport.

WSLS: NBC; WSLS-TV: NBC, ABC. Rep. John J. Spark user, Jr. (D-S. C.), Huntsville—he is a trustee, but not a stockholder, of WMU-FM Washington, an educational station. His wife is partner and owns 49% WAVU-AM-FM Albertville, Ala.

Sen. Herman A. Talmadge (D-Ga.), Lovejoy—his aunt, Mrs. Julius Y. Talmadge, Athens, Ga., is a member of the state board of education, licensee of WEGA-TV Savannah, an educational station, and WXGA-TV Waycross, Ga.

Rep. J. Floyd Breeding (D-Kan.), Rolla—is director and owns 1 of 2,000 shares of common voting stock of KTVC (TV), Ensign, Kan.

KTVC (TV): ABC.

Rep. Thomas B. Curtis (R-Mo.), Webster Groves—is trustee, but not a stockholder, of WDCR Hanover, N.H., commercial station licensed to Dartmouth College.

WPRO: CBS; WPRO-TV: CBS; WROW: CBS; WTEN (TV): CBS; WCDC (TV): CBS; WTVD (TV): CBS.

Rep. L. H. Fountain (D-N.C.), Tarboro—is secretary-treasurer and director and owns 86 of 300 shares of common voting stock of WCPS-AM-FM Tarboro. His brother, R. M. Fountain, Tarboro, is vice president and director, and owns 107 shares, and another brother, V. E. Fountain, is president and director and owns 107 shares of same stations.

Rep. Porter Hardy Jr. (D-Va.), Churchland — is director and voting trustee for 20,754 shares of Class B common voting stock and owns 300 of 18,204 shares Class A common non-voting and 232 of 8,006 shares Class C common non-voting stock in WAVY-AM-FM-TV Portsmouth, Va.

WAVY-TV: NBC.

Rep. Paul C. Jones Sr. (D-Mo.), Kennett—he is president, and owns 100 of 490 shares of common voting stock of KBOA-AM-FM Kennett. His wife owns 22 shares and his son, Paul C. Jr., 28 shares of same stations.

WROW: CBS; WTEN (TV): CBS; WCDC (TV): CBS; WTVD (TV): CBS; WPRO: CBS; WPRO-TV: CBS.

Rep. George H. Mahon (D-Tex.), Lubbock—his brother John B. and his nephew Eldon B. each own 50% of KVVC Colorado City, Tex.

KVVC: Keystone.

Rep. Albert M. Raines (D-Ala.), Gadsden—is first vice president and owns 45,150 shares of common voting stock of WAGD Gadsden. He is vice president and director and owns 36 of 120 shares of common voting stock of WGSV Guntersville, Ala.

WAGD: ABC; WGSV: KBS.

SAN FRANCISCO • OAKLAND One Jack London Square, Oakland 7, California

BROADCASTING, April 17, 1961
Government briefs...

Reorganization authority - President Kennedy signed into law last week the government reorganization bill. The measure permits him to submit to Congress reorganization proposals which will become effective in 60 days unless vetoed by either branch of Congress. The authority extends to June 1, 1963.

Payola case off? - A Federal Trade Commission examiner has issued recommended orders which would dismiss FTC complaints against three record companies charged with payola involving radio and tv disc jockeys. The complaints, all issued last year, are against Columbia Record Sales Corp. and affiliated Columbia Record Distributors Inc., New York; Capitol Records Distributing Corp. and Dot Records Inc., both of Hollywood. The examiner's initial decision was based on motions by FTC attorneys to drop the litigation since the Communications Act amendments passed by Congress last year outlaw the practice (Broadcasting, April 10).

Anti-gambling proposal - Anyone using wire or cable to transmit gambling information between states would be subject to a $10,000 fine or up to two years imprisonment under terms of legislation Attorney General Robert F. Kennedy recommended to Congress last week. Radio and television, however, would be excluded from the bill's provisions, and sports broadcasts would not be affected.

Payola consent - Federal Trade Commission last week announced acceptance of consent order against former Era Records, Hollywood, Calif., prohibiting one-time owners from using payola to get records played on broadcast stations. Order, for settlement purposes only and not an admission of violation, provides that payola to disc jockeys or others must be disclosed to public.

The FCC last week...

- Granted an extension of time to KFRE-TV Fresno, Calif., for dual operation on chs. 12 and 30, but only until June 1, instead of for the 90 days requested. The FCC stated "Such further limited use of ch. 12 should not have a significant adverse effect on deintermixture of Fresno or on the Fresno uhf stations, and should give [KFRE-TV] ample time to accomplish the purpose on which its original request was based." The station had asked for dual operation to serve people in areas that could not receive uhf signals during the changeover period.

- Was asked by WNEB Worcester, Mass., to approve the request of WWOR (TV) that city, to allocate ch. 13 to that city but to deny WWOR's request to institute show-case proceedings why WWOR should not operate on ch. 13 (Broadcasting, April 10). WNEB said the channel should be allocated and then set for comparative hearing.

- Awarded a contract to Melpar Inc. for the fabrication, installation and check-out of an antenna atop the Empire State Bldg. to be used in the FCC's uhf experiment in New York. The $248,000 contract, first let in the $2 million study of uhf, calls for installation by Nov. 10, 1961.

- Invited comments by May 17 on pro-
Yes...six announcers—or as many announcers and other program personnel as you have on your staff—all available from sign-on to sign-off with an absolute minimum of effort and expense. The secret is the AUTOMATIC TAPE CONTROL system shown at right. It gives you maximum use of staff voices with only one man on duty. ATC records spots, programs, special effects, music...anything up to 31 minutes in length...on pre-set tape magazines. Staff members record while on duty. Then your operator simply slips the magazine into the playback slot, pushes a button and the message is on the air instantly. When the message is completed, the tape winds automatically, ready for a repeat performance or storage. And, ATC gives you true fidelity in reproduction with a frequency response of ±2 db from 70 to 12,000 cps; ±4 db from 50 to 15,000 cps. Signal-to-noise ratio is 55 db, and wow and flutter under 0.2% rms.

NOW COMPLETE AUTOMATION AVAILABLE
ATC 55, our newest development, permits the automatic use of 55 consecutive magazines without reloading or resetting. Used in sets of two or more, ATC 55 allows completely automated broadcasting twenty-four hours a day.

ATC is made by the originator and largest manufacturer of automatic tape control equipment...in use in over 600 radio and TV stations
posed rulemaking to substitute ch. 32 for ch. 51 in Louisville. The change was requested by WLKY (TV) Louisville, which now holds a permit for ch. 51. The proposed reallocation also would involve substituting ch. 26 for 32 in Richmond, Ind.; ch. 83 for 26 in Anderson, Ind.; ch. 66 for 25 in Madison, Ind.; ch. 32 for 26 in Knoxville, Tenn., and ch. 26 for 32 in Oak Ridge, Tenn.

- Denied a request by KISD Sioux Falls, S. D., to make effective immediately an initial decision looking toward granting that station an increase in power from 250 w to 1 kw. The request to examine the initial decision at this time would be contrary to normal commission procedure since exceptions have been filed. Since KISD had not shown that public interest requires an immediate grant, the commission refused to deviate from its normal procedure.

**FCC seeks revision of interest-conflict ban**

The FCC has asked Congress to lift the Communication Act’s conflict-of-interest ban as it applies to those serving in the FCC units of the National Defense Executive Reserve.

The reserve was set up to create a supply of trained executives who could, in a national emergency, immediately step into government positions. The FCC unit trains individuals for jobs as commissioners or bureau chiefs.

In a letter to Congress last week, FCC Chairman Newton N. Minow said the ban affects those individuals most qualified for FCC reserve training — those now in the communications industry.

The FCC last week also asked Congress for authority to impose fines for violations of its rules by radio stations in the common carrier and safety and special interest fields. Chairman Minow said these violations are mounting and existing FCC sanctions are inadequate.

**Broadcast Bureau files stand on WDKD renewal**

The Broadcast Bureau last week outlined the extent to which it will willingly go along with requests by WDKD Kingstree, S. C., a station facing a license renewal hearing because of alleged off-color programs (Broadcasting, March 29 et seq.).

The station asked the FCC for (a) a bill of particulars and clarification of the charges; (b) a copy of the complaint filed by the FCC field office, information on the alleged offensive material and the names of parties who furnished the commission information; (c) enlargement of the issues to cover WDKD’s overall performance and programming instead of one alleged off-scene program.

The bureau cited as precedent the FCC’s decision not to give a bill of particulars to KWK St. Louis (facing license-revocation proceedings) in requesting denial of WDKD’s plea. As to clarification, the bureau said the scope of the hearing is patently the three-year period covered in license renewal; that the scope of the programming issue is clearly the Charlie Walker show in which the off-color remarks are claimed to have been made. The bureau said that WDKD’s lawyer has listened to the tapes of that show, which precipitated the hearing.

The bureau added it is willing to allow the licensee, E. G. Robinson Jr., to tape the pertinent portions of the Walker show.

On enlarging issues to include WDKD’s overall programming, the bureau cautioned the FCC that licensees in the past have furnished several isolated examples of commendable programming not typical of their regular operation. But, the bureau said it doesn’t object to inclusion of the station’s overall programming if WDKD is required to supply “representative” programming from periods selected at random by the FCC. This might set a desirable precedent for dealing with such situations, the bureau suggested.

Ford asks for FCC-industry entente
SAYS NEW RULES PROTECT THE HONEST BROADCASTER

Speaking before the Kansas Assn. of Broadcasters in Topeka last Saturday (April 15), FCC Commissioner Frederick W. Ford entered a new plea for the industry to support the commission's program policy statement of last summer and proposed new program reporting forms. (Broadcasting, April 10; also page 102).

"There has apparently been an attempt to obfuscate and confuse the purpose of the commission as it is proposed form by imagining all types of disastrous eventualities," he said. "I am sure you will not be confused by these efforts, but will accept the adopted policy of the commission as expressed in its July 29, 1960, report as the basis for this form."

The former FCC chairman characterized the policy statement "as a new chapter of freedom for broadcasters, but like all freedom it must be exercised judiciously and with self-discipline. If this is done and the industry cooperates fully in this major effort of the commission to bring about a climate for improved programming, I am sure that it will result in the satisfaction of knowing that you have served the public interest to the best of your abilities and in your highest profits for yourself."

Commissioner Ford said that he is convinced, from personal discussions with broadcasters, that the commission's policy embodies sound practice "as well as a guaranty of as complete freedom as possible for a broadcaster to serve the public interest as he, not the commission, finds it in his service area."

Agreeing with the views of FCC Chairman Newton N. Minow (Broadcasting, April 10), Commissioner Ford said that stations should notify the commission of important changes in its programming as reflected in past applications.

Cause for Concern * The speaker said that it appears some licensees are purchasing stations for the capital gains involved rather than with a view toward serving the public interest. He expressed concern over the high rate of turnover in station properties. "For my part," Commissioner Ford continued, "I would like to be sure that individuals who seek to become broadcast licensees are doing so with a primary purpose of serving the public. Generally speaking, if he does not expect to operate a station for at least three years, his motives for entering the public service area should be subjected to close scrutiny."

Referring to current rulemaking to require that licensees hold stations for a three-year minimum, he stated: "I am hopeful that in your own self-interest you will not listen to the blandishments of those who tell you that the commission wants you to remain a broadcaster and that you should be as free to buy and sell stations as cans of tomatoes. Dedicated broadcasters who know the public interest of their areas should support the efforts of those who would eliminate the fly-by-night from your number."

"How many of your broadcasting friends have told you of their experiences with competitors who literally bought an audience with prizes and giveaways only to unload on the inexperienced newcomer?"

He pointed out that the commission acted on 465 applications last year for changes in ownership of stations. Approximately 20% of these were held by the sellers for less than a year and more than half for less than three years. "Is it any wonder that the commission and congressional committees are concerned with such a high rate of quick turnover?" the commissioner asked his audience?

Appearing on the KABC program with Commissioner Ford was H. W. Bourell, FCC engineer in charge of the Kansas City field office. Mr. Bourell spoke on the commission's expanded program of field investigations of stations.

FCC STORM WARNINGS
Former bureau head alerts Illinois broadcaster group

An eight-point "get ready" warning for Illinois broadcasters— to prepare them for visits soon by FCC investigators under the commission's New Frontier staff policy— was sounded Wednesday by Harold G. Cowgill, former chief of the commission's Broadcast Bureau. He was succeeded Monday at the FCC by Seattle attorney Kenneth Cox (see story, page 00.).

Addressing the Illinois Broadcasters Assn. in Springfield, Mr. Cowgill confirmed reports of the FCC's intent to vigorously enforce its rules and regulations and to take action in cases of performance not matching promise, over-commercialization, careless technical maintenance and similar violations (Broadcasting, April 10). He even suggested that stations might be asked to justify such practices as excessive self-promotion in situations where promotion announcements or references are so numerous as to conflict with what might be considered a balanced on-air presentation of other program material. His check list for licensees:

1. Immediately obtain and read a copy of the Sept. 13, 1960, amended Communications Act. He said he is constantly amazed at the number of station owners and managers who have never seen a copy of the law they now operate under.
2. Read the current FCC rules and regulations and check in detail station compliance with each provision.
3. Hold staff meetings with programming, engineering and sales people so that all may be familiar with the requirements of the proposed new Section IV program report, on which comments are due May 1 (Broadcasting, April 10, Feb. 27, also page 102).
4. Study "very carefully" the station's prior promises to the FCC on programming and compare them with the present operation.
5. Either correct present performance to match with those promises or prepare to justify the differences.
6. Make a current study of the needs of the community served by the station.
7. Join the state broadcasters association if the station is not now a member. "I'm serious about this," Mr. Cowgill emphasized.
8. Urge the officers of the state broadcasters association to inaugurate a program of collecting and distributing information of general interest to all broadcasters in a manner similar to that followed recently by the Florida state association.

Mr. Cowgill said that in previous years the commission field investigators often have given stations the chance to mend their fences when a discrepancy was found and before a violation order was issued, but this forewarning policy now could be "pretty well out the window." The law doesn't require it, he observed.

The field audit "does not mean an examination of your books only," Mr. Cowgill explained. "It is a term adopted for lack of a better one to mean a complete and exhaustive examination of the licensee himself, his staff, his facilities, his relationship to the community to determine whether in the past and in the future the station will be operated in the public interest."

You Will Be Checked * Under the new commission policy, Mr. Cowgill indicated, there will be more field investigations of complaints as well as stepped-up technical inspection of facilities. Applications for license renewals, transfers, assignments and new or major changes in facilities will be given "in-depth" examination, as will the new Form 324 financial report and the Form 323 ownership report.

Stations also may expect close scrutiny and appraisal of their responses to the proposed new Part IV program section of broadcast applications, he said, particularly station statements describing the community served, its needs,
Florida: state of the decade-long boom

ORDERLY GROWTH CONTINUES AS INDUSTRY COMES TO BOLSTER TOURISM

A Florida utility executive looked up from his March kilowatt charts, peered out over the St. Petersburg horizon, and observed, “This is one of the finest recessions we ever had.”

J. S. Gracy, senior vice president of Florida Power Corp., let his economic paradox sink in for a few seconds and continued, “Take the recession of 1960-61. It’s still going on, according to what we hear. But take a look around Florida and what do you find?”

Answering his own question, he said, “You won’t see a lot of down-hill curves on the Florida business charts. The last two recessions, 1958 and this one, have had the same effect—they’ve merely slowed down the rate of growth.”

Mr. Gracy in a few words described the solidity of Florida’s business and industrial structure after a decade of booming progress that usually has inspired such extravagant terms as sensational and fantastic, and now and then a gloomy forecast that it can’t last.

Florida is booming, as even a cursory glance at business indicators will show. But it’s a boom that has left relatively few of the financial scars that followed Florida’s scintillating real estate inflation of the ’20s.

Orderly Growth - Balm Florida, the rich man’s palm-draped playground of a past era, is shaping its decade-long boom into a surprisingly orderly transition. A steady industrial bottom has been placed under the unstable tourist and agricultural economy of the past and its dependence on the sensitive whims of the travel-minded and the follies of nature.

With this new versatility, Florida has joined the nation’s top markets—nearly 5¼-million people (April 1, 1961 estimate) whose rate of spending is above the national average.

This subtropical peninsula at the

WAREHOUSES for some products distributed in the Central Florida market are located in seaports of Jacksonville, and Tampa, but the CONSUMING Central Florida market is penetrated only by WESH-TV, WDBO-TV, and WLOF-TV.

Central Florida market covers 19 counties, one-fourth of Florida's TV homes. Coverage based on 1960 ARB report.

... PENETRATING OVER 8 OUT OF 10 HOMES IN THE BILLION DOLLAR CENTRAL FLORIDA MARKET.
southeastern tip of the United States is riding into the '60s on the impetus of an economic overhaul that is changing all marketing concepts—a change so rapid its significance has escaped those who haven't had a chance to study the modern influences in depth.

A close look up and down the peninsula from Jacksonville and Pensacola on the north to Miami and on to Key West will quickly show that: Florida's economic growth is double the national rate; its absolute gain in population is exceeded only by California; it ranks 10th in population.
- Consumers spend a higher than average share of their income for goods and services although its average personal income is just 93% of the present U. S. figure.
- Central and southeast Florida are packed with spectacular spots in the U. S. economy.
- Manufacturing income is increasing at four times the national pace.
- Florida shares with California the highest passenger auto saturation in the U. S.—one auto per 2.4 persons.
- Gasoline sales are double the figure a decade ago.
- Per family and per capita retail sales are 20% above the U. S. rate.
- Individual income has multiplied 7½ times in two decades.
- Supermarket sales average $1.6 million per store compared to $1.4 million on the national level.
- Home-purchase mortgages (under $20,000) totaled $1.6 billion in 1960, going up while the rest of the nation went down.
- Federal government payments totaled $1.25 billion in the last fiscal year, including $260 million in pay of military personnel and $490 million in prime contracts.

That's a quick look at the way things are happening in Florida, a state blessed by benevolent nature with mild climate and an incredible geography. No other state in continental U. S. can claim 1,000 miles of navigable inland waterways, 30,000 lakes (many interconnected), 13 deep water ports, a statewide rainfall of 50 inches a year, a statewide underlayer of stored water, three-score springs of major and second magnitude totaling 3 billion gallons a day, and fertile soil.

All the essays by economists and the seductive claims of those who extol Florida's charms boil down to two elemental facts:
- People like to visit Florida.
- They like to live in Florida.

And Florida welcomes both visitors and new citizens because its decade-long boom—a healthy growth despite its speed—is characterized by a sort of reverse economic cycle.

**People First**  
Dr. Reinhold P. Wolff, director of the U. of Miami business-economic research bureau, put it this way:

"Traditionally an area develops from its raw material through commerce and processing to consumers.

"In Florida this process moves in reverse. First come the people, then retailing and wholesaling, next manufacturing for the market and finally the related income generation."

Dr. Wolff added significantly, "If people are here, the jobs will come."

The jobs have been coming. Florida's economy is healthy and so are its residents, a majority of whom are migrants weary of northern winters.

Florida is a sort of ethnic and social anomaly. Its 600-mile northern strip forms the southern boundary of the Old South, an industrial, forest and farming area tied closely to southern Georgia and Alabama. Pensacola is just 60 road miles from Mobile, Ala.

Southern Florida, on the other hand, reflects the heavy northern migration, an impact shared by Central Florida and the West Coast.

The surf-lapped shoreline, longest in the continental U. S., and Florida's lakes bring 11 million tourists yearly to this land of 12-month outdoor living. They pour a cheery $1.8 billion into the state's economy (see tourism, page 82).

**Well Advertised**  
Florida's recreational charms are well-known and justly renowned. Not so well known is the full story of its phenomenal industrial growth—an increase of 1,000% in value added by manufacturing in two decades and 1,100% in manufacturing payrolls. New sophisticated industries of the jet and missile age have sprung up (see industry, page 74).

The end-of-the-line location once was a deterrent to industry. With the advent of light industry and air transport, the handicap of hauling expense is lessening and the state enjoys mounting importance as a takeoff point for the Caribbean and South America.

Sprawling up-to-date cities are spreading all over the Florida landscape. Payrolls have held up much better than the national average during the current recession.

**Income Leader**  
Dr. George B. Hurff, director of the Florida U. bureau of economic and business research at Gainesville, said the spending by affluent retired people helps keep per-capita buying in the state at a high point. Florida leads the entire Southeast in its personal income, he said, and the figure is rising faster than the U. S. pace.

Florida's business has been spotty in recent months. Actually the total amount of trade was above that a year ago but it was split up among more business firms. For new enterprises, like new houses and mills, are appearing so fast it's hard for federal and state agencies to keep count. The number of houses doubled in the last decade while population increased about 80%.

A fact-hunting observer setting out from northwestern Florida will discover the direct journey from Pensacola to Key West via Tampa is 878 miles—the longest distance between any two cities within any continental state and further than El Paso-Beaumont or Amarillo-Brownsville in Texas. But the trip is a rewarding experience which reveals an economic revolution.

**Homes Are New**  
Most of Florida's structures are new. The 5¾ million people are living it up. They have mortgages, gossiping neighbors, low property taxes because of a $5,000 homestead exemption, traffic jams and unpaid bills. But they also have swimming pools, patios, 600 varieties of fish, surf, about a million boats and almost 365 days of sunshine.

Last September Florida's Keys fought back from Hurricane Donna, first major catastrophe in a quarter-century. "We had four feet of water and lost most of our equipment and the cash register," said Tom Hanley, operating a higher-priced restaurant at Marathon. "But we were open for business in two months. Yes, we got the money out of the cash register." The Keys are jammed with fishermen and vacationers—many big spenders who park their yachts at boatels with private docks.

Gov. Farris Bryant and Wendell Jarrard, new chairman of the state development commission, exude optimism for the '60s. They recall the doubled factory employment in the '50s and note that Florida was the only one of the 12 southern states that showed a 1960 increase in manufacturing employment twice the national rate.

They also mention Florida's position as the fastest growing of all states, which makes it attractive to manufacturers oriented to consumer markets; stepped-up industrial promotion at local and state levels; continued expansion at Cape Canaveral, which attracts more electronics firms; and intensified water shortages in other parts of the nation that give Florida's abundance an even greater importance.

Economic sunshine has been pouring on Florida for years. There's no forecast of imminent trouble by those who have been watching the state improve its national position and local prosperity. A conservative guess would indicate about a 30% growth in the market during the next decade, below that of the '50s but likely to be well above the national average.

People keep coming to Florida, and that's what Florida wants most.
Some of Florida's best figures...

Some of Florida’s best figures are on television coverage studies: WJXT in Jacksonville puts you on the map in 65 bustling Northeast Florida and South Georgia counties vs. only 39 for the second-best station.

With run-away leads in ratings—and in homes delivered—according to Nielsen, WJXT consistently offers advertisers Florida’s most alluring sales figures!
Growth of industry sets national pace

MANUFACTURING GAINS IN IMPORTANCE AS BACKSTOP FOR TOURISM

A fun-hunting tourist, hellbent down U. S. 1 or 441 at 65 mph toward Florida's 30,000 lakes or 1,197 miles of beaches, will pass by billions of dollars in industrial and military plant investment without sensing the existence of the state's newest attractions.

Florida's landscape is dotted with large and small installations whose appearance within the last decade has made it the fastest-growing industrial economy between the Atlantic and the Pacific.

Fastest Growth • From 1954 to 1958 Florida led the U. S. in percentage growth of manufacturing, a growth that doubled that of Texas and California. Arizona, with only a tenth the population, tied Florida in the growth rate.

Dr. George B. Hurff, director of the U. of Florida economic-business research bureau, said that Florida manufacturing rose by 78% in value added, 80% in payrolls and 40% in number of employees compared to respective figures of 12%, 18% and minus 0.7% for the nation.

This industrial expansion is having an important influence in the state. It serves as a backstop for the basic tourism and agricultural income and helps make the economy depression-proof. The three leading industries are food and kindred products; chemicals, pulp, paper and paper products.

Yet this important industrial growth owes much to the newer products of the jet age—electronics, plastics, electrical products, light metal fabrication and the routine requirements of a boomish area.

A detailed story of Florida's industry is likely to be outdated by the time it appears on a printed page. The modern, one-story plants often are scarcely visible from traffic arteries though many add to the charm of the area in contrast to the unsightly stacks and multi-storied structures of earlier decades.

A lot of big plants can be seen only from a low-flying plane taking an uncharted, wandering course around the state. Some can't be seen even from the air due to stay-off mandates by the military—Cape Canaveral and its $700 million Patrick Air Base complex, for example.

Plants Are Many • On a here-and-there flight from Daytona Beach northwest to Gainesville, a huge new Hudson paper plant appears on the landscape. A few moments later, after a quick look at the little town of Spuds—it's a potato-growing center—the enormous Sperry-Rand plant appears at Gainesville. Southbound out of Gainesville are quarries and then the first orderly orange groves with the processing plants operated by the Minute Maid-Coca Cola combine. South of Orlando, where industries appear in bunches, looms the biggest of them all—Martin's missile plant.

The jet and missile-age installations are fed by hundreds of smaller component and assembly plants. These and the more prosaic plants making modern necessities are operating in Florida because there is a good supply of skilled labor; these employees and administrative personnel like to live in the cozy climate; there's minimum absenteeism due to weather or illness; the state has unlimited water supplies; it provides nearby markets for much of the production and it's easy to attract young technicians and engineers to the outdoorsy living—and they bring along their families.

All this has led to lively intramural competition among cities and smaller communities anxious to land money-bringing industrial plums. Miami, St. Petersburg, Tampa, Jacksonville, Fort Lauderdale, Orlando, Gainesville—these and dozens of others are scouring the nation in the search for new industries.

In the middle of the last decade the then governor, LeRoy Collins, set up the Florida Development Commission with an industrial services branch. Florida's charms were soon being extolled, supported by statistical services and a promotional budget.

Big Business • The new firms setting up major shops in Florida since 1955 comprise an all-star industrial rollcall...
Not only does WTVJ outshine the other two television stations, but it reaches more homes than Miami's two newspapers, too! 13.1% more South Florida homes view WTVJ daily than read the area's largest newspaper... 147% more than the second newspaper. And 40.5% more homes watch WTVJ daily than the average of the other two Miami TV stations. If you haven't yet seen Profile III, check with your PGW Colonel right away—it's revealing!
GROWTH OF INDUSTRY SETS NATIONAL PACE continued

Florida is deep in the atomic business with a $72 million government investment, including a $12 million GE project near St. Petersburg that has 1,500 employees. Florida leads the nation in producing nuclear-age metals.

Florida lacks its own oil and gas but gets it easily from Texas and other producing spots by water haul and by the Houston Texas Gas & Oil Corp. pipeline that distributes Texas gas over the state.

The industrial setup includes a $70 million phosphate industry that provides half of this nation's supply. Processing plants for commercial fish and citrus fruits are important, and the 22 million acres of commercial forest land support a $300 million pulp industry for paper and plastics.

Last decade 700,000 homes were built, using vast quantities of Florida-fabricated products, and another 900,000 will be built in the 60s.

Industrial executives are confident fast air transport will help the state, with its extensive airport and repair facilities and favorable location for shipment of light products to Latin America, the Caribbean, Africa and other markets.

An effective aid to industry is the big research facility at the U. of Florida in Gainesville. This engineering and industrial experimental station will soon be joined in major research and development work by a project to be set up at the U. of Miami. Industries are provided facilities that speed the development of orderly industrial progress.

Availability of these facilities attracts new plants to the state.

Impressive Statistics • The basic manufacturing figures compiled by the U. S. Census Bureau in 1958 show a 78.3% increase in value added by manufacture since the bureau's 1954 compilation. The electrical machinery group shows the highest gain, 719%; followed by miscellaneous, 589%; chemical, 191%; stone-clay-glass products, 181%; textiles, mill products, 171%; primary metals, 145%.

Total value added by manufacture in 1958 was $1.4 billion. Food was first, $331 million, followed by chemicals, $236 million; pulp-paper, $156 million; stone-clay-glass, $103 million and down to $4 million in leather goods.

With the high-paying jobs in its glamour industries—aviation, electronics, plastics, light metals, nuclear plants and pharmaceuticals—Florida points proudly to its growth and its claim to national leadership in new industry during the first half of 1960. And Florida is confident it can come up with the 18,500 new industrial jobs needed every year to meet the growth pace predicted by Arthur D. Little Inc., famed Boston research firm, in a study of the state's economy. These industrial jobs will provide the foundation for a total of 70,000 new jobs that will be needed every year.

Martin's Orlando plant, the state's largest (over 9,200 employees) and only 3½-years old, is located on a 7,000-acre site. Its Pershing, Bullpup and other missiles are loaded with gadgetry evolved from products of several thousand sub-contractors.

In the heavier industries, Florida Steel Corp., at Tampa, converts scrap metal into steel bars with modern electric furnaces. This provides a saving of $14 a ton freight for Birmingham steel, a big help to the construction industry.

Last year 30 new electronic plants were opened, bringing the state's total to 180 with a payroll of perhaps $100 million.

More will be opened every month. And that's how industry is growing in Florida.
Fine. Who sharpens your people?... The Advertising Federation of America works continually to sharpen the skills of those who sell this nation's products and services. All year round, nearly every business day, one or more of the 180 advertising clubs of the AFA and the Advertising Association of the West across the country participate in workshop sessions or in advertising and marketing clinics. From June 11-23, AFA will hold its annual Advanced Management Seminar in Advertising and Marketing, supervised by faculty members of the Harvard Graduate School of Business. At these seminars, advertising executives sharpen skills, gain scope, by working with management problems in which advertising is a vital element of the overall operation. For details, write AFA. Participation in these programs makes for more effective businesses and a more vigorous economy. You have a stake in this economy. To further your business interests, join AFA-AAW and lend this study program your leadership. You will profit from it.
A Polaris missile (left) is launched from the Patrick Air Force Base; an intermediate ballistics missile (second) tests ground support equipment; a Titan missile (third) is launched from the test center; the Convair-Lockheed Midas is off; and the U. S. Army Courier 1B communications satellite in flight.

Canaveral, free world's rocket center

ENTIRE STATE FEELS IMPACT OF SPRAWLING MILITARY BASE

Shortly after noon last March 15 a white vapor trail streaked upward in view of a reporter driving into Cape Canaveral, Fla.

The latest version of the Polaris missile, propelled by solid fuel, accomplished two missions as it sped down the Atlantic missile range:

- It achieved important scientific and military goals.
- Of more immediate importance to Florida, particularly the central part of the state, it demonstrated the economic impact of the largest missile proving ground in the free world.

This decade-old project is part of Patrick Air Force Base, a $700 million depot providing work for 17,300 service and civilian personnel, and one of 27 major defense establishments in Florida. Its payroll increased from $2 million to $130 million in a decade.

Brevard County, which houses this vast installation, received $115 million of this payroll in 1960. And the figure doesn't include another $14.3 million in contracts for construction or the $53.6 million in contracts for supplies and services. Moreover, all of these figures are increasing in 1961.

Swift Growth - Yet this is only part of the story of a once backward county that had only 23,000 population in 1950. The 1960 census gave Brevard County over 111,000 population, an increase of 370%.

"Brevard County is the fastest growing county in the United States," according to Lt. Col. Clifton A. McClelland, of the missile center's operations analysis office. "Last year 40,000 visitors were recorded at the base. This does not include uncounted thousands of friends and relatives."

The numerous tourist accommodations around Cocoa Beach, neighboring Cocoa on the mainland and adjacent communities can sleep 13,000 persons any night, Col. McClelland added.

Quoting U. of Florida figures, Col. McClelland said more than 75,693 persons migrated into Brevard County to...
The Northrop Snark takes off on a test flight from the Air Force Missile Test Center at Patrick Air Force Base.

live in the last decade, equal to the migration in New York State.

All these new residents required housing, schools, community services, supplies and the other accoutrements of modern society. The county's median family income (after income taxes) rose from $2,079 in 1949 to $5,100 currently. Total personal income increased 88.5%.

State Profits - The impact of the missile center is felt all over the state but the bulk of the economic benefits flow into Central Florida, with Orlando as the main beneficiary. Incidentally, some 500 Orlando residents drive 30 miles to the cape every day to work at the missile site or the administration center down the beach.

To house all the people who moved into Brevard County more than 21,000 dwelling units were constructed. In addition, 6,500 house trailers were added and a number of other buildings converted into dwellings.

About the future, Col. McClelland cited a projection showing an estimated 166,500 persons in Brevard County by 1964. This is based on increased employment at the missile center and other non-defense industrial growth. By 1970 the population may reach 200,000.

Missiles for the Air Force, Army and Navy are tested at Cape Canaveral and space vehicles are launched for the National Aeronautics & Space Administration as well as the Defense Dept.'s Advanced Research Projects Agency.

Growth of the missile center was an important factor in the recent order setting up new air routes to the Pacific Coast. Canaveral was recently designated a "port of entry" for discharge of foreign goods, providing another boost to Central Florida's economy.

A view from the air of the Atlas Missile 10D, with its mercury capsule installed, ready for launching at Cape Canaveral. Growth of this huge base, where missiles are tested for the Army, Navy and Air Force, has contributed substantially to the growth of Florida's economy.
Florida crops retail for $2 billion

FRUITS, WINTER VEGETABLES MOST IMPORTANT; BEEF INDUSTRY GROWS

The first A-bomb dropped on Japan in August 1945 had an unpublicized side effect on a small food-processing plant in Central Florida's lake country. Besides signaling the imminent end of World War II, the bomb blasted the hopes of struggling Florida Foods Inc. to start a new food industry based on—guess what?—dried orange juice.

Knowing heads had nodded in the land of orange groves when little FF landed a $750,000 order for orange powder from the Quartermaster Corps. Growers were sympathetic when the government contract was promptly canceled, but they nodded again when FF announced a few months later that it had come up with another idea—frozen concentrated orange juice.

By the spring of 1946, just as the citrus market was crashing, FF had accumulated 2,500 cases of concentrate and shipped them to the Washington, D. C., trade.

Out of that post-war struggle came the present Minute Maid-Coca Cola combine, world's largest grower and processor of citrus fruits.

A similar tale of industrial daring centers around the growth of Tropicana Products Inc., which sells half of all the chilled Florida orange juice. This is natural-strength juice. They thought Anthony T. Rossi, head of Tropicana Products Inc., was a bit balmy when he announced in 1956 the good ship SS Tropicana, a tanker, would sail to New York from Port Canaveral with an 8,000-ton cargo of fresh orange juice. Now the Tropicana makes the New York voyage every nine days.

*Saved the Industry* These two industries saved the struggling orange-growing country by creating new markets for their fruit. Nearly three-fourths of the crop now goes into juice. Florida's citrus crop, dominated by oranges, has an on-tree value well in excess of $200 million and retail value of $1 billion, according to the Florida Citrus Commission. Florida grows over 73% of the nation's citrus crop (23% of the world's). California is second.

Minute Maid owns 25,000 acres of groves and leases another 5,000. This acreage supplies about a third of the fruit. It headquarters in Orlando.

The 1960-61 citrus crop, which dominates the state's agriculture, is a good one, according to the citrus commission. Size of the crop is good, and prices are holding up.

A yearend report by Neill Rhodes, commissioner of the state's marketing bureau, gives these values for the 1959-

Soon Popular * Frozen orange juice, packed in a six-ounce can to which three cans of water are added, caught on quickly and sales zoomed to 500 cases a week. FF was caught short when Snow Crop Markets, its distributor, was bought by Clinton Foods. William A. Coolidge, head of National Research Corp., and John Hay (Jock) Whitney rescued FF by investing about $800,000 in the project. Another boost came from crooner Bing Crosby, whose radio plugs extolled the merits of frozen orange concentrate. Sales in 1948 totaled $3 million and in 1949 Minute Maid was adopted as the company name.

60 crop season: citrus, $275 million; truck crops, $170 million; other fruits, nuts, $2.8 million; field crops, $77 million; livestock, $98 million; dairy products, $90 million; poultry-eggs, $43.7 million; horticultural specialties, $37 million; forest products, $14 million.

*Crop Value High* In Florida they like to say that agriculture generates more income than tourism or manufacturing, using a figure of over $2 billion for the value of crops at retail, wherever sold.

The fertile soil, some of it black muck, yields enormous crops on a year-round basis. Florida has long supplied winter vegetables and fruits to the northern markets and this will continue at an accelerated rate in the 60s, it's generally believed.

Commercial flower growing is becoming more important and is the largest outside California. Around a million hampers of gladiolus and 400,000 of cut chrysanthemums are shipped out of Tampa, Fort Myers and other centers from December to June by air, truck and rail transport.

Florida's cattle graze in deep, rich pastures, green the year 'round. About 1.6 million beef cattle roam the pastures. The state eradicated the screwworm by an intense program that utilized radiation techniques.

There's tobacco, some shade-grown in the northern part of the state. The state's agricultural future looks good.

The lush soil around Lake Okeechobee could produce all the sugar cane and beet sugar the nation could use but neither is a major crop.

WHERE THE TOURIST IS KING

11 million visitors contribute $1.8 billion a year to Florida's continued economic well-being

The metropolis of Miami and its adjoining Miami Beach playground shuddered last month at the tart comments of a roving newsman who claimed he had been treated discourteously by a Miami cop.

Mayor Robert King High, of Miami, apologized to syndicated columnist Jim Bishop, who had been in the city during a break in the famed Judge Peck trial at Fort Pierce.

The mayor had good reason to be concerned over press and broadcast publicity given the event. After all, Miami and Miami Beach share a huge chunk of the $1.8 billion spent yearly by the 11 million tourists who visit Florida for fun, fishing and good health.

Tourism is Florida's No. 1 industry, a phenomenon that should continue so long as Americans like to loll in the sun, romp in the surf, go to the races and escape the rigors of northern winters.

Mayor High moaned in public over the publicity given the Jim Bishop incident. "It's more damaging to the city than anything that has taken place in years," he said. But Walter Headley, police chief, took a calmer view, resenting the mayor's indictment of the whole police force because of a single incident involving one officer who didn't give a polite answer to a request for directions.

Business Gains • This one incident quickly blew over as southeastern Florida counted the money that flowed in with tourist business enjoying a revival in March following the nationwide air strike.

It pointed up, however, a problem that has long concerned the state—the matter of courtesy to strangers who come bearing folding money and traveler's checks. "Keep Florida green—bring money," its residents like to say, obviously aware of the part tourism has played in the state's fantastic growth during the last decade.

The winter vacation season hit a high level before Christmas, tapered off after the holidays and then rose to a Feb. 15 peak. It fell off earlier than usual but the early March pickup was encouraging.

"Tourists are spending less money for fancy quarters," said Robert Riedel, director of the hotel and restaurant unit of the Florida Development Commission. He said one big vacation hotel reported it wasn't refusing as many people as a year ago—a sad state that shook its owners right down to their fifth mortgage.

Florida is overbuilt in some spots. Even at the Feb. 15 peak there were reasonably priced (depending on the location) hotel and motel rooms available for those who would look. Total tourist business this season has been at the 1960 level despite the national recession, but the money has been divided up among more rooms and restaurants. This is described as the reason for many of the complaints by businessmen.

Welcome For Tourists • Mr. Riedel said his office is emphasizing the need for courtesy to tourists. Taking a leading role in the statewide move is Florida Assn. of Broadcasters. Early this year FAB under President Lee Ruwitch, executive vice president and general manager of WTVJ (TV) Miami, started a politeness campaign to educate Floridians on the value of tourism. Stations are broadcasting spots pointing out the advantages of giving tourists a good welcome. James LeGate, former broadcaster, is president of the Miami-Dade County Tourist and Convention Council.

"Floridians were beginning to take tourists and tourism for granted," said Ed Keys, assistant director of the Miami-Dade County Chamber of Commerce. "Now they're becoming aware of the importance of this industry as well as the growing popularity of the Bahamas and Caribbean islands. The state's broadcasters were quick to take up the campaign to make tourists and their dollars welcome."

The rise of the motel has helped Florida's popularity, with around two-thirds of tourists staying in these facilities compared to the 10% who put up at hotels. Four out of five tourists come by automobile, 14% by plane, 3% by train and 3% by bus, according to the Florida Development Commission.

Of the $1.8 billion spent directly by tourists, 24% goes to lodging, 28% to food and drink, 12% to amusements, 12% to clothing and footwear, 8% to gasoline, 7% to souvenirs and gifts, 4% to drugs, cosmetics, tobacco and photo supplies, 2% to services and lesser percentages to assorted auto expenses, barbers, doctors and utilities.

Big Money • Florida residents received $223 million in salaries and wages out of tourist spending in service establishments and $115 million in retail stores. This tourist spending yielded $76 million in direct taxes, one-seventh of all taxes collected by the state. Direct advertising by the state was credited with producing $100 for each promotional dollar spent.

While August is the best tourist month in Florida from a numerical standpoint, summer tourists stay about half as long as those arriving in winter, living it up cheaply on the beaches and spending less than half as much per person. Mid-Atlantic and East North Central areas are the principal source of tourists.

The state hopes to attract more visitors from the Midwest and Far West and the March order providing National, Delta and Eastern airlines with new routes is expected to stimulate this source of tourism.

Though hotels and motels are described as overbuilt, the bed-hunting agonies of a wandering reporter during March didn't confirm the claims of those familiar with tourist housing.
More motels have been built in the last 30 months than during the previous seven years. Official figures show that one out of four tourists stay with friends and relatives.

Entertainment Sought • Florida visitors want to be entertained, and they get what they want. The state is dotted with attractions based on natural beauty—flora, fauna and feminine. The average family spends $60 on amusements, or a total of around $250 million last year. Cypress Gardens, Parrot Jungle, Silver Springs, Bok Singing Tower and many other attractions entice tourists to their gates.

Cypress Gardens and 22 other enterprises belong to Florida Attractions Assn., which has a code of ethics designed to see that tourists aren't gypped or advertising falsified. A quarter-century ago Dick Pope Sr., father of water skiing, started clearing a cypress swamp. The result was the world-famed water-skiing show. The attractive spot has provided a setting for five major movies, 1,000 newsreel features, 351 movie shorts, countless tv shows and skiing tournaments.

The dynamic Mr. Pope and his son, Dick Jr., operate the gardens, "where rare and exotic plants gathered from the ends of the earth form a paradise of beauty and a mecca for over a million visitors each year." They say few visitors have ever complained they didn't get their $2 worth.

Water Sports Abound • With 30,000 lakes, plus 17 large springs and 50 stream basins, Florida claims to be outstanding in its water attractions. The general coastline of 1,197 miles is the longest of any state. These provide year-round fishing (600 varieties), boating and swimming—a collection of water recreational facilities said to be unmatched anywhere in the nation.

The Keys area consists of a series of small islands surrounded by the Atlantic Ocean, Gulf of Mexico and some of the world's best fishing. Weather is tropical and no frost has even been detected. A scenic overseas highway, damaged by 1960's Hurricane Donna, was quickly repaired.

"Everyone benefits by Florida tourism," the development commission said. Many tourists return to become citizens, fleeing from northern snows.

Nearly three out of four who go to the race tracks are tourists. The tracks had 1,519,000 paid admissions in the 1959-60 season and the state got $14.5 million from the $170 million bet at mutuel windows. In the off-season, 500,000 visitors go to the Hialeah track in Miami, where the pink flamingoes are a tourist attraction.

Name your fun—Florida's got it, and hopes you'll come back for more, bringing more of the green stuff.

BROADCASTING, April 17, 1961
NORTH, AREA OF MANY FACES

Populous markets in three adjoining states tied into 400-mile Jacksonville-Pensacola strip

The statistical story of the 400-mile east-to-west strip often described as Northern Florida is enough to drive a marketer daffy—that is, until he throws away his geography and goes dollar-hunting.

This slice of Florida has many economic faces. It is anchored on the east by Jacksonville and on the west by Pensacola. Both are major metropolitan trading areas, throbbing with modern industry and important military bases.

In between is wooded country teeming with pine trees plus farming land and such communities as Tallahassee, the capital; Palatka, Daytona Beach; Orlando, St. Augustine, Jacksonville.

Important Borders • Northern Florida has two boundaries, both important. On the south are the Gulf of Mexico and the rest of the state of Florida. On the north are Alabama and Georgia. Not contiguous but of economic significance is southern Mississippi.

The commercial aspects of this unusual geography become apparent if the Jacksonville and Pensacola trading areas are each defined as the territory covered by a strong television signal.

Scorning artificial barriers of the mapmaker, a Jacksonville tv wave will reach northward to a score of Southern Georgia counties that include such markets as Brunswick and Waycross. To the marketer this means around 1½ million people who will spend at least $1½ billion this year.

And Pensacola, Jacksonville's opposite number, includes a dozen Alabama and a half-dozen Mississippi counties in its actual trading area. This embraces Mobile, Ala., which for years has counted Pensacola as a market rival. The Pensacola-Mobile combination adds up to close to a million people who will spend around a billion dollars in 1961.

A mathematician, groping for a fancy definition, might describe the complex this way: North Florida consists of the sum of its productive parts plus important parts of southern Georgia, Alabama and Mississippi.

The industrialization of Northern Florida started in a serious way after World War I when the duPonts began acquiring pine forests, feeling pine provided the best pulp for some types of paper and boxes. Reforestation techniques were set up to provide a continuous yield and avoid destruction of forest land.

A Kraft mill was opened in 1938 at Port St. Joe on the Gulf Coast by St. Joe Paper Co. It has grown and a chemical complex has developed, including Glidden Co. (fatty acids, and other chemicals for paint, ink, linoleum), Allied Chemical (supplying chemicals to the St. Joe and other pulp plants) and Michigan Chemical (extracting magnesium from sea water).

Long a Port Is Jacksonville, of course, had been an important seaport since colonial days but 20th century industrialization keyed its growth into major importance. Its eight miles of improved waterfront and 70-odd piers are supported by the largest naval stores yard, next-to-largest coffee and largest wholesale lumber market in the South Atlantic.

Distribution is a major Jacksonville business. The city boasts next-day delivery of cargo 400 miles in any direction except eastward (Jacksonville Beach is only 16 miles away). That includes Miami, Pensacola-Mobile and Charlotte, N. C. New expressways ($100 million worth) in the city will be joined in the future by high-speed roads to Miami and to Orlando and St. Petersburg. Recently the Walgreen and Rexall regional headquarters were moved from Atlanta to Jacksonville. Atlantic Coast Line moved its headquarters from Wilmington, N. C., to Jacksonville.

With its fine harbor, ship-repair facilities, rail and highway complex and air service, Jacksonville likes to be known as the distribution point for an area having 5½-million people. If a cross-Florida canal is built, Jacksonville's location on the wide St. John's River will give it a great circle water route up the East Coast to the St. Lawrence Seaway, through the Great Lakes and down the Mississippi to New Orleans and across the Gulf of Mexico to the canal entrance on the West Florida coast.

Retail trade for the first quarter of 1961 was running ahead of last year. Jacksonville is growing as an insurance center. Its shipyards have a big business in cleaning oil tankers, the ships arriving from the north all ready for housecleaning.

More Factories • Manufacturing doubled in the decade ended in 1959. That year metropolitan area plants showed $176 million value added by manufacture, with $70 million in manufacturing payrolls. A thousand wholesalers employed 13,500 persons with a $33 million payroll. Headquartered in Jacksonville is the 526-store southeastern chain (Kwik-Chek and Winn-Dixie) operated by Winn-Dixie Stores Inc. The chain has 225 stores in Florida, doing nearly half of the $721 million in annual sales. Sales this year are running above 1960, the chain reported. Jacksonville has one of the largest stores in the Sears Roebuck group.

The U. S. Naval Station at nearby Mayport is growing into a $30 million project, with the Navy spending $6.5 million in local markets. The naval payroll is $30 million yearly for 6,000 civilians and $142 million for 27,459...
WFGA-TV captures a big 51.0% share of audience in November ARB!

From 9 a.m. to midnight, 7 days a week, WFGA-TV corrals a 51% metro share of sets-in-use in Jacksonville. For the biggest return on your advertising dollar, see your PGW Colonel about WFGA-TV.
service personnel, according to local businessmen. They figure Jacksonville will be the main Atlantic Coast rival to the port of New York in a decade.

Jacksonville is dressing up its downtown as well as outlying areas. New facilities include a new $5 million six-story City Hall, new county courthouse, new 20-story Robert Meyer Hotel, new 22-story Prudential Insurance regional headquarters and $10 million 17-story Atlantic Coast Line headquarters.

This financial center has three of Florida's largest banks. Its paper and kraft mills, cigar plant, glass and cigar-making facilities are important employers. Duval County will soon reach a half-million population and hopes to hit the million mark in the mid-'70s.

Pensacola's broad-beamed economy is based on chemical and pulp industries, fishing, the military, tourism and distribution—and lots of each. The industrial rollcall features such names as Chemstrand, American Cyanamid and Escambia Chemical. The Navy's six flight bases have a $96 million annual payroll, including 6,500 civilian personnel; Eglin Air Force Base has a $60 million payroll, with 4,000 civilians.

The American Cyanamid plant, with an investment of $27 million, was located in Santa Rosa County after the company had scanned 200 sites in search of a spot with plenty of pure water. It's generally known that the local supply is what northwestern Floridians like to describe as 99.999% pure. In any case, American Cyanamid needed, and got, extremely pure water and found just what it wanted for its synthetic Creslan fibre.

Historic Spot ■ Pensacola was visited four centuries ago (1559) by the Spanish explorer Tristan de Luna and settled in 1698. It changed hands occasionally as Spain, France and England sensed its strategic value. For a brief time it was the capital of Florida and in the War Between the States the city surrendered to the federal troops.

The naval air station is home base for all naval aviation training and the Air Force has its enormous base, Eglin, 40 miles to the east. The city is spending $34.5 million to improve the port and expand foreign trade, being the closest shipping point for the world's largest integrated kraft paper plant, St. Regis, which processes from pine seed to finished product.

Chemstrand is working 24 hours daily turning out nylon, having 6,700 employees and planning to enlarge. It's convenient to southern textile mills. Escambia Chemical petrochemical plant produces polyvinyl chloride, the basis of plastics, and synthetic alcohol. Here again the pure water is important. Armstrong Cork makes acoustical tile.

Pensacola products include wallboard, chemicals, naval stores, steel drums, beer, seafood, fertilizers, cotton seed oil and boats. Farm products include soybeans, corn, potatoes, sugar cane, peanuts, fruit, cattle and vegetables. A commercial fishing specialty is the red snapper. Also the fleets bring in major quantities of shellfish.

Tourism has helped Pensacola business and picked up nicely to a March peak. The beach was once a pirate's playground. The sand is dazzling white and fishing flourishes.

Fishing Center ■ Panama City, a short drive eastward, has fine beaches and a colossal International Paper Co. plant at nearby Auburndale. It's also a famed sport fishing center along with oil, commercial fishing, chemical, textile and boat production. Tyndall Air Force Base is 10 miles to the east.

The deep-water port at Panama City takes ocean trade and there is a major barge port on the intracoastal waterway. The network of bays and coves offers miles of waterfront facilities for industry. Beaches support a $10 million-a-year tourist business and both lakes and streams are found to the north. Bay County is an important crop center, with slash pine harvested on a 12-month basis. Vegetables, poultry and livestock are important. Some of the pure silica sand contains valuable heavy minerals. Gulf Power Corp. will build a $20 million plant.

Tallahassee, the capital, teems with the tradition of the Old South. Its gardens are popular scenic attractions along with The Grove, a southern mansion built back in 1825 by Richard Keith Call, twice territorial governor. The Grove is now owned by ex-Gov. LeRoy Collins, NAB president, and his wife, Mary Call Collins. The mansion is open as a showplace. Tallahassee is the home of Florida State U.

Interwoven with Panama City and Tallahassee are such fast-expanding markets at Dothan, Ala., and Albany, Ga., plus Thomasville, Ga., cities of the Old South that symbolize the industrial transition of the postwar period.

Effective coverage

Over a hundred radio and a score of tv stations provide Florida's 5½ million people, plus those in areas adjacent to the state, with effective broadcast coverage.

All medium-sized and large cities have prime signals from tv stations. A number of community antenna systems serve outlying towns—Key West, for example, which is 160 road miles from Miami.

Florida has what is described as the largest educational TV network in the nation.

RIVALS SPARK WEST’S RISE

St. Petersburg-Tampa fight for leadership pushes Gulf Coast area to new heights of prosperity

The West Coast’s peninsular competitors, Tampa and St. Petersburg, have whirled away many a decade swapping dirty looks and snide commentaries.

This municipal sport was mostly harmless, since anywhere from four to a dozen miles of Tampa Bay separated the cities.

Tampa counted its cigar, industry and harbor money as St. Petersburg castigated it as a harbor surrounded by cigar factories and ugly industry.

St. Petersburg gently milked its elderly, well-heeled tourists of their northern dollars as Tampa unfriendly called its neighbor Shingleboard City, Green Bench Haven, Whiskers-by-the-Sea and other leering titles based on the aged visitors and retired residents.

Then things started happening, and in bunches. World War II swelled Tampa’s industry. New plants and homes appeared farther and farther away from old Ybor City, the Latin cigar center. The war brought young men to Tampa and St. Petersburg for military training; the post-war period brought many of them back as residents.

A decade ago Tampa’s industry and commerce were doing so well that St. Petersburg decided it would like to backstop extensive tourism and trade activities with industry. It decided, however, to be choosy about it and drew up plans to attract the cleaner types of growth industries such as electronics, research, precision and electrical plants.

Tampa, sensing what was going on, stepped up its industrial activity.

The result is a pair of peninsulas connected by numerous bridges and causeways, and over 800,000 people who do around a billion dollars worth of retail buying every year. Taking in Clearwater, Plant City and the rest of the region embraced by signals of the three commercial tv stations, the market area passed the $2 billion retail mark judging by local estimates.

Still Competing * There’s no letup in the search for new industries but the competition is making sense to both cities as they watch payrolls grow and business expand. Tampa’s bank debits doubled in the last decade; its customs receipts almost tripled; its electricity consumption more than tripled; its corporate-limit population more than doubled (Hillsborough County up 59%).

Across the bay in St. Petersburg the residential-resort complexion has been retained. The industrial lineup, scattered along the peninsula northward toward Clearwater, boasts such names as Sperry-Rand, microwave division; Minneapolis-Honeywell inertial guidance center; General Electric-Atomic Energy Commission project; Electronic Communications; Babcock & Wilcox and General Cable.

Tourist income keeps growing. St. Petersburg can swallow 135,000 visitors at a time without pushing anybody out of a bed. They’re solid, family-type visitors, not tin-can tourists, according to J. S. Gracy, senior vice president of Florida Power Corp., headquartered in St. Petersburg.

The population of Pinellas County jumped from 159,249 in 1950 to 372,000 in 1960, with St. Petersburg having 180,000 of the county figure and Clearwater-Belleair 38,000. The 1960 census showed Pinellas County only 20,000 behind Hillsborough (Tampa).

Bank deposits in St. Petersburg just about tripled in the 1950-60 decade; electric customers tripled; telephones the same.

St. Petersburg’s industry is spanning new and clean, but Tampa too has some of the prettiest plants to be found anywhere. The Tampa Industrial Park, once a military airfield, was designed by Arthur D. Little Inc., of Cambridge, Mass. Nine major industries with over $60 million capital investment have located there and the new U. of South Florida, which is about to complete its first school year, adjoins the park.

Free Beer * The Anheuser-Busch brewery in the park has free admission, free beer, 15 acres of luscious gardens and tropical birds, “the biggest free attraction in Florida.” The brewery is an outstanding example of decorative industrial architecture. An attractive and competitive Schlitz plant adjoins. Tampa’s breweries ship beer as far north as North Carolina and the long, costly haul from Milwaukee, St. Louis and New York is avoided. The number of Florida beer drinkers keeps pace with the population growth.

This park, one of 10 planned industrial areas around Tampa, includes Globe-Union, making auto batteries for Sears and other private labels; Thatcher Glass Mfg. Co., which uses the good mineral resources nearby, and a large Pepsi-Cola bottling plant.

Some decades ago American Can and Continental Can set up shop in Tampa to serve the citrus industry. The can companies now supply many industries, including the packing of bulk motor oil shipped from Texas.
Tampa is the closest American port to the Panama Canal. Frequent sailings are headed for South and Central America and the West Indies, which are becoming increasingly important import and export markets. The city has around 50,000 Latin Americans with close ties to these areas. This is a factor in the growth of Tampa International Airport (18 miles away St. Petersburg also has an international airport).

Over 4 million tons of phosphate from nearby quarries (world’s largest deposits) pass through the harbor in a year. A recent count, before the Castro regime in Cuba, showed 750 million Tampa cigars made in a year.

Agriculture Important - Hillsborough County has over half its land in cultivation, with farm income running $40 million. Plant City, 24 miles east of Tampa, wears the label, "Strawberry Capital of the World" and Ruston to the south is "Salad Bowl of the Nation."

MacDill Air Force base at Tampa has a $30 million payroll. There are over 700 wholesale houses. Here are other capsule growth symbols—harbor, one of world’s best, being deepened and is handling barges from the Mississippi; fast new air routes to West Coast will start soon; new beaches being developed and tourism encouraged; $130 million expressway system being built; migrants from the north keep coming so labor supply is good.

William C. McGinnis, president of Tampa Electric Co., said the metropolitan area (Pinellas and Hillsborough counties) had doubled in the last dozen years, with the number of customers of Tampa Electric increasing from 90,000 in 1950 to 154,000 in 1960. However he predicted future electricity load in its area (Hillsborough, part of Pasco and Polk counties, and a bit of Pinellas) would multiply four times while the population doubles because of air conditioning, heating and hot-water.

St. Petersburg businessmen are still sensitive about the old favorite—"You could shoot a cannon down the middle of Central Avenue between May and September and never hit a soul, not even on a green bench. And they bristle when it’s charged the income level is subnormal because of the number of older people, replying there are more children 18 and under than golden agers. A lot of the benches have been repainted in gorgeous tropical hues.

Solid Economy - Mr. Gracy said the golden-age group comprises a sound part of the economy, having a steady income. "St. Petersburg has one of the highest percentages of stockholders in the country," he said.

The city now has fewer retired people, figured on a per-capita basis, than New England, according to local sources. About one out of six in the county draw social security and their resources are boosted by liberal retirement funds. Per person buying income is $10 above the U. S. average.

Alfred L. Lino, head of Alfred L. Lino Associates, St. Petersburg agency, said the green benches are still a municipal label but the city is modern and aggressive, attracting modern industry and younger tourists. School facilities are being enlarged.

Beaches Plentiful - There are seven miles of beaches and more will be added. Treasure Island and other spots are famed for tourists. A new Bay Way bridge will open Port DeSoto Park and connect islands. Treasure Island is in line for a $3.25 million co-op apartment. All the new bridges across Tampa Bay and the 16-mile Sunshine Skyway opened in 1953 have spurred Tampa as well as St. Petersburg business.

St. Petersburg kicked off a booster campaign, Project 61, last March 7, with Suncoast Ad Club backing. Business is good at such super stores as Webb City, Doc Webb’s famed drug store that dispenses yard goods, washing machines, orange honey, tv sets, auto tires and pharmaceuticals—$25 million
The outlying cities in the Tampa-St. Petersburg market area include Plant City, with a new industrial park; Lakeland, which doubled population to 41,350 in a decade (Polk County now 195,000); Sarasota, 17 miles of attractive buildings, plants and homes (77,000 people in Sarasota County, almost triple the 1950 figure); Bradenton, (20,000 people).

Southward toward Fort Myers is the incredible Port Charlotte, a miles-long area that has sprung from fields in the last three years and now has several thousand people living in General Development Co. -Mackle homes ranging from modest to patio-swimming pool homes backing on canals accessible to the gulf. Some day it'll be a city of 200,000, its promoters promise.

Lush Scenery - Fort Myers has great rows of tall palm trees and other lush horticulture, water everywhere, commercial tourism, small industries and extensive recreational programs. The central city is going through a modernizing process, giving Fort Myers a combination of the old and the new. Lee County population is up 2½ times to 55,000. Naples in Collier County, grows from 4,500 to 10,000 in the winter. Many of the winter visitors own their own homes.

**MID-STATE COUNTIES BOOM**

Orange groves and lakes make Central Florida beautiful; tourists, industry make it rich

A score or so of mid-state counties, with Orlando as a throbbing hub, comprise Boomland, U.S.A.—or Central Florida.

This dreamy section of landscape, splattered with thousands and more thousands of lakes, orange groves and modern industrial plants, long ago threw the economic book into the deepest lake.

The mid-county counties can't be described by normal criteria. Take recessions, for example. Orlando and its adjacent markets simply refuse to take them.

"We haven't any recession around here," said William H. Dial, executive vice president of the First National Bank of Orlando, largest in Central Florida. "We just keep on going. Our momentum is so strong we can't be stopped, though we might have slowed up just a little.

"Remember that 1958 recession! We weren't hurt then, either; 1958 was the best year in Orlando's history, up to that time."

Unorthodox — Central Florida has written its own economic formula, unconcerned about any fixed theories of commercial growth.

This formula consists of orange juice, glamour and missile industries, stunning lakes, tourism, cattle, truck crops, 11/4 million people, a growing expressway network and some more orange juice.

With this wide foundation, Central Florida faces the future riding an upward tidal wave of booming business. As far as the region is concerned, the next decade can be described already as the Missile-Citrus Era (see Cape Canaveral and Agriculture, pages 78 and 80).

The heart of the nation's fastest-growing state has more than its share of everything a region needs.

There's the Free World's largest missile center at ocean-side Cape Canaveral, a breeder of big and little industries that have given the mid-state the manufacturing shove it needed to blossom into a well-rounded market (it doubled in the last decade).

Then there's the collection of natural blessings—fertile soil, gentle hills and the thousands and thousands of lakes that honeycomb the landscape, helping temper occasional winter chills and crop-damaging frosts. The lakes entice tourists and provide recreation for the citizens. They are constant reminders that the limestone underlayer controls surface water and surging underground springs.

Income Up — These resources, man-made and natural, have evolved into a unique, prosperous market. Orlando, the top city, had a metropolitan population of 320,000 last year (124% gain in the 1950-60 decade) and it will soon pass the 350,000 point. It has the highest personal income boost in the state, judging by preliminary 1960 data, and reaching out into the precision-rowed orange groves it has what is claimed to be the highest farm income per capita of any region. One-sevenths of the state citrus crop is produced in a three-county area.

Everything's upward in Orlando—nonagricultural employment over 2½ times in a decade; income soon to be double the 1950 level; bank debits; bank deposits; retail sales—name it and Orlando will show a chart with a trend line that kicks off the lid. It leads the state in new industrial jobs.

Orlando has 54 lakes within its city limits, nestled among buildings, ghostly piers popping up for elevated expressways, fine homes, oak trees draped with mossy whiskers, and extensive tourist facilities. It has mellow, old houses in woody Winter Park and stark new
What National Media Buyers Can Learn
From Men Who Sell Central Florida Every Day . . .

LOYALTY OF LOCAL TIME BUYERS PROVES WDBO RADIO IS THE SUREST ROUTE TO ADULT BUYING POWER!!

Advertisers in the Central Florida area, have long recognized the pulling power of WDBO Radio, Orlando. When they need to reach heads of household to influence family purchasing, they buy WDBO Radio for:

■ Greatest Listening Audience *
■ Greatest Believability **
■ Greatest Coverage, Day and Night
■ Exclusive CBS Radio for Central Florida

* Orlando Metropolitan Area Pulse Report, December 1960, gives WDBO a solid first in average listenership, 6 a.m. to midnight.

** Pulse qualitative study, also December 1960, shows listener performance for WDBO news and emergency information greater than that of all other metro Orlando stations combined.

Because of these factors, local advertisers consider WDBO Radio their "must" buy. The evidence:

■ 18 advertisers who have used WDBO Radio for 20 or more consecutive years!
■ 38 advertisers who have used WDBO Radio for at least 10 consecutive years!

If you need adult buying power, and if you need the kind of listener response that justifies advertiser loyalty like this, you need . . .

WDBO RADIO
ORLANDO, FLORIDA / 580 Kc, 5000 Watts / CBS Radio / Represented by BLAIR
housing developments whose verdure hasn't had time to hide the scars of bulldozers. And most important, Orlando has the Martin missile center, Florida's largest employer.

Daytona Beach, which claims to be the most gorgeous resort anywhere, is the principal city in Volusia, a coastal county that had a population jump of close to 70% in the 1950-60 decade.

Daytona Beach qualifies as part of Central Florida by its close ties with the Orlando market to the southwest, and with the adjacent, missile-inspired Brevard County to the south—fastest-growing county in the United States, according to federal figures.

Brevard's populace, which quintupled from 23,600 to 111,400 in the 1950-60 decade, houses the Canaveral-Patrick Air Force Base facilities (see Canaveral story). Symbolizing the rocketing growth is a sticky traffic jam weekday mornings and evenings as Canaveral-Patrick personnel take Route A1A from and to mainland Cocoa. Brevard has more school children now than it had people in 1950.

**Orange Groves** - Central Florida's influence takes in the citrus hills southwest to Lakeland, where the Tampa-St. Petersburg market starts to take over; to scenic Winter Haven and the Cypress Gardens country; to Ocala and on to Gainesville, Palatka and St. Augustine on the north.

All this beauty and business is spread over the score of counties (tv market area) whose enticing appeal can best be sensed by a fact-searching process that involves a motor trip all over the area; a zig-zagging inspection from a roving plane, and most important—dozens of interviews with businessmen who have shaped the events of the last decade into a surprisingly orderly scene.

Orlando's all-star industry and military cast includes within its immediate influence, besides Martin and Canaveral, many distinguished names—American Baking Co.'s new $2 million plant (overnight from any point in the state); Pepsi-Cola (new bottling plant); Minute Maid-Coca Cola's main office, groves and processing facilities; Radiation Inc.; Orlando, McCoy and Patrick Air Force bases; American Can; American Machinery and Sanford naval air station.

Tourism is important and increasing, but manufacturing is moving ahead of
Nearing completion at Orlando, Interstate Rt. 4 will be a key link in Florida's expanding highway system.

MORE THAN 1,143,600 CONSUMERS BUY IN THE PRIMARY COVERAGE AREA OF OUR CENTRAL FLORIDA MARKET

agriculture as a new job source. Several efficient industries are attracting new plants and the labor force has almost doubled since 1955.

Orlando's First National Bank started business in 1934, getting some Federal postal savings as a starter, Vice President Dial recalled. Resources now total $90 million and the bank is housed in its own $4 million 12-story building.

**Distribution Center** Mr. Dial figures Florida's developing network of expressways, tying Orlando and Central Florida to all major markets in the peninsula, will make distribution increasingly important. As to citrus and its billion-dollar retail impact, he said, "We haven't begun to tap the orange juice market." New groves are being developed to the southeast in the Fort Pierce region.

Five stories up in the bank building is another sample of Orlando's commercial pace, the Neals, Roether, Hickok advertising agency.

Three jobless advertising men decided in the spring of 1959 to find the most promising spot for a new agency. They cased the U. S. and settled on mid-Florida, figuring it had only begun to grow, though already the state's pace-setter.

The trio consisted of Walter C. Neals, 36, once promotion manager of WXKW Albany, N. Y., and four years with General Electric's advertising-sales promotion department; Clemens P. Roether, 30, former advertising manager of Armstrong Cork's building materials division, and Allan C. Hickok, 28, an account manager in GE's advertising-sales promotion unit.

They're two years older now and head what is called the biggest agency between Jacksonville and Miami. Major accounts include Martin's Orlando division, the Daytona Beach resort area, the First National Bank downstairs (Central Florida's largest), Masterbuilders Corp. (housing) and Sperry-Rand, Gainesville.

Billings in 1961 will exceed $1.2 million, according to Mr. Neals, the president. "A definite trend toward increased leisure time will bring more people to Florida and these people generally will have more money to spend," he said. And vice president Hickok added, "Around 1 1/4 million consumers live in Central Florida. Our top accounts have their home bases in Florida but they advertise nationally." The agency was an important factor in recruiting personnel for Martin, largest employer in the state (9,152 employees in mid-March).

Orlando is an educational center, having 20 colleges and universities within 80 miles. Rollins College in contiguous Winter Park has a space science institute in the planning stage. The market's agriculture has, besides citrus, important vegetable crops and cattle.

---

**Florida bank deposits jump in ten years**

Deposits in Florida banks increased nearly 2½ times from 1950 to 1960, according to a survey conducted by the Florida State Chamber of Commerce. The figures apply to deposits as of Dec. 31 each year, with the 1960 total an estimate.

Sources of the deposit figures are a special survey of Florida banks plus reports by the U. S. Comptroller of the Currency, according to Dena Snodgrass, of the state chamber.

Federal Reserve Bank of Atlanta figures show that bank debits increased in the basic six-city reporting area from $12.5 to $37.6 billion dollars in the 1950-60 period and nearly quadrupled in the period as the number of reporting cities increased from six to 12.

*Estimate

Federal Reserve Bank of Atlanta increased number of cities reporting debits from six to 12 during 1956-60 period. Data show debits for original cities and also for the total number of reporting cities.
Tourism at Daytona • Daytona Beach has developed tourism into a major and nicely profitable industry that bears no relation to the skyscraper clusters of Miami Beach. The bulk of the Daytona Beach accommodations (over 25,000 motel and hotel rooms) are in modest-sized but often plush buildings. Whereas Miami Beach hotels keep their beaches private, Daytona Beach has 23 continuous and wide-open miles of sand that serves as a smooth surf-edged highway and elongated swimming spot.

A moonlight drive up and down the beach (at a mandatory low speed) can’t be topped anywhere for sheer motoring bliss. The beach is 500 feet wide at low tide and 10 minutes away from the airport. Tour experts describe Daytona Beach as “the best organized seaside fun spot in the world.” The recreation program for a month is apt to be columns long. The fine 21/2-mile auto track is world-famed and brings money to the city—up to 65,000 pay up to $20 a seat for a big race.

The narrow strip of a city, actually a number of communities, often is described by its boosters as the coolest summer spot in the state. The summer temperature averages 79, the winter 69 degrees. The locality marks the northern limit of the subtropics. Hurricanes and heat prostration are practically unknown. Longtime weather records reveal the area’s uncanny fortune at dodging hurricanes, or vice versa. Right now Daytona Beach is working on an industrial development program.

Peering into the future, Daytona Beach figures its climate, beaches, waterways and ready-for-development acreage to the west will bring vast growth.

Ocala, 75 miles northwest of Orlando, is a winter resort and citrus processing center as well as a takeoff point for famed Silver Springs and other scenic charms. Cattle ranches and horse breeding are contributors to the market. A local stud farm bred Needles, a Kentucky Derby winner.

Gainesville and Alachua County have a 1961 population close to 80,000, supported by industry, U. of Florida, agriculture and retail-wholesale trade. The availability of extensive industrial research facilities at the university was a factor in bringing Sperry-Rand to the area with an electronic tube plant employing 700 people. The industrial and engineering facilities have 260 on the payroll, with a $3 million budget. The unit is active in the nuclear field. Some 13,000 students are enrolled at the university.

These cities and numerous others comprise a surprise market that figures on being even more of a surprise as the jet-missile-expressway-orange juice era matures.

**MIAMI, FLORIDA'S BIG MARKET**

Gold Coast continues to draw tourist dollars as more and more industry comes to area

Before another year passes Metropolitan Miami will be well on the way toward its second million.

Florida's most concentrated market—Miami, Hialeah, Miami Beach, Coral Gables, North Miami, South Miami, Homestead, Bal Harbour and about a dozen other bunched communities—had an estimated population of 972,266 as of April 1, 1961, compared with 935,000 when the 1960 census was taken.

The latest figure, which slid off a Dade County-Miami Development Board slide rule on March 31, is based on the addition of 103 persons every day to the city's population.

**Million for New Year's** At that rate, according to the board, Miami will reach the 1 million population mark next Dec. 31, just in time for a New Year's Eve celebration. And by April 1, 1962 it's estimated, Miami will have a population of 1,030,000.

Miami, southernmost major city in Florida and the U. S., too, bears little resemblance to the Old South. A majority of its prosperous residents were reared in the North and now lick their chops all winter over the horrendous newspaper headlines about bone-chilling blizzards.

Aside from the climate, flora and up-to-date architecture, Miami has distinctly northern traits. The business pace is brisk; industry flourishes; major retail chains sell as much and often more per store than the average northern counterparts; the airport is described as third busiest in the nation and it's brand new and modern.

Curiously, the second busiest airport in the U. S. is another local facility, Tamiami, with seconds-apart landings and takeoffs of private and industrial planes, according to the Dade development board.

Those who have moved in from the North usually say there's nothing missing but the snow and sleet. And Miami has charms available to no northern city: all-year flowers, sunshine almost every day (the airports are seldom socked in and have 97% contact flying records), 5 million tourists a year along the Gold Coast from the Keys north to Palm Beach, and a rate of growth seldom seen outside Florida and Southern California. Modern expressways and interchanges will help unsnarl the heavy traffic.

The Miami market has many facets of interest to advertisers:
- One million consumers within 15 miles of the downtown business section.
- One-third of Florida's 51/4 million people—over 1.6 million—within television range of Miami.
- Over 2,700 manufacturing plants employing 43,000 at peak and having an employment capacity of 55,000.
- A labor force of 400,000, living and working in Miami, with an unlimited reserve supply since many people who live there because of the climate are working at jobs beneath their skill levels.
- Retail sales in 1961 should pass $1.66 billion.
- Business indicators last year averaged a gain of around 5% despite the national recession.
- Area agriculture is a $45 million item.
- More big national industrial names will be among the estimated 200 new plants anticipated in 1961.

A new industrial research center at the U. of Miami will draw additional plants when it gets under way, stimulating industries in the electronics, plastics, synthetics, light metals, and scientific fields. First to sign up for a site was Texas Butadiene & Chemical Corp. The site was made available by Arthur Vining Davis, veteran aluminum pioneer whose influence has been important in the city's progress.

Despite its end-of-the-line geographical location, Miami is one of the nation's important transportation hubs. It is jump-off point for air and water services to the Latin countries, Africa and the Caribbean.

Air transport is especially important in the case of South America where surface facilities are limited. Many South American airlines, like U. S. carriers such as Eastern, have their service facilities in Miami where out-of-court repair work can be done the year 'round. Air traffic is getting so heavy that patterns of the future may involve use of Fort Lauderdale's fine airport 25 miles to the north and the Navy's Opa-locka airport in between. Eastern has a $14 million expansion program under way. An air business booster will be the fast new service to the West Coast recently authorized by the government.

**Refugee Problem** At the moment Miami is coping with a Cuban refugee problem but has the help of federal funds. There have been rumbles that Cubans are taking jobs away from Miamians by working for less money. In any event, it's a problem that will cause concern until the refugees are welcomed back home.

Miami's relations with Fort Lauderdale, which it prefers to think of as a suburb, have been slightly strained as a result of the U. S. Census. It's built up solidly more than 35 miles from South Miami to the northern edge of Fort Lauderdale but the cities are separate metropolitan areas, because of a Washington decision that Miami hints was accomplished with the aid of political stratagems.

Fort Lauderdale is located in Broward County. So is Hollywood, a largish community in between. The 1960 census gives Broward a population of 334,000, quadrupling from 84,000 in 1950. Fort Lauderdale rose from 36,000 to 84,000 during the period, Hollywood from 14,000 to 35,000. Broward currently has around 360,000 people, a juicy morsel that would brighten Miami's economic aspect.

**Share Water Commerce** Miami and Fort Lauderdale share an imposing block of water commerce, the ports getting good chunks of the U. S.-Latin American trade. Miami is spending big money on harbor development. A new $19 million facility is being built at Dodge Island, close to downtown Miami. With improvements at Fort Lauderdale...
BROADCASTING, April 17, 1961

dale (Port Everglades), Miami and projected harbor at Homestead to the south, the joint market is ready for the heavier traffic of the future—petroleum, cement, general cargo, barges and passenger traffic. Port Everglades had 100 major cruise sailings in the 1960-61 winter. The port adds a week's touring time to a New York-Caribbean cruise, Fort Lauderdale points out. One cruise ship, the Hanseatic, spends $5 million a year for supplies bought at Port Everglades.

In the agricultural field, Miami is shipping point for vast quantities of truck crops, giant avocados, mangoes, papaya, lichee nuts, most of the nation's limes and other crops warmed by Gulf Stream winds.

While Miami and its neighboring communities up the coast 65 miles to Palm Beach have felt the effect of a construction slowdown, other business influences keep the market on its upgrade. In Miami, for example, big conventions are coming to the area. Miami Beach hotel and auditorium facilities are unsurpassed. Bank deposits and debits, electricity consumption, telephones, gasoline sales, employment (except construction)—all are headed one main direction, upward.

Unified Role = Miami's relatively new government, known as Metro, has brought the Dade County communities under unified legislative and administrative control. Metro cuts across municipal lines. The experiment is being watched with interest by other cities.

The winter tourist season just ending will equal last year's high level despite the national recession though it started out slowly.

General Development Corp., headed by the Mackle brothers, has offices in Miami and sells Florida lots and homes all over the world. "We haven't even scratched the surface of Florida real estate," said Frank E. Mackie Jr., president. "Last year we sold 33,000 lots and we completed 48% more homes in 1960 than in 1959. In five years we will be selling 25,000 homes a year." The real estate firm is generally described as the world's largest. Its $10 down-$10-a-month lots are sold by hundreds of franchised agents outside Florida. Last year, Mr. Mackie said, 4,500 people moved into General Development communities—1,252 homes valued at $15.3 million.

Florida's Gold Coast development has been intense since tourists discovered the Gulf Stream is just offshore, tempering the trade winds and giving the coast a salubrious climate. North of Palm Beach, Florida bends in a northwesterly direction away from the Gulf Stream.

Canal-City = In Fort Lauderdale the residents keep telling each other it's the most beautiful city in the U. S. and they expect visitors to agree—which they generally do. The 265 miles of canals and waterways support nautical life whose servicing is in itself a big business. Vast marinas house uncounted boats—big yachts, deep-sea fishing boats, small outboard and every type of inboard craft. The city allows no hotels or commerce on the six miles of public beaches. Anyone can drive up, park and choose his own beach spot.

The lure of the attractive waterfront accounts for the annual Easter holiday influx of college students from all directions, a mecca-like pilgrimage that brings occasional municipal headaches when young pranksters get out of hand.

Supporting the tourist and commercial economy are nearly 450 manufacturing firms; nonagricultural employment is up 258% in the last decade. The city is unusually successful in attracting new industry—65 plants last year. A new Univis $2 million plant was described as making and selling 51% of the multi-focal lenses used for eye glasses. It employs 300 and a payroll of 1,000 is slated for 1963. Airpax Electronics employs 290 turning out components. Big co-op apartments are becoming popular.

Just north of Fort Lauderdale is spreading Pompano Beach. Its facilities
include a good baseball park at which the new Washington Senators trained. This was a business booster for the small city of 16,000, triple the 1950 population. Rich, irrigated loan produces important farm crops, some of which are marketed at "the world's largest produce market."

Resorts Line Coast • Northward up the Gold Coast are a number of major resorts, including Boca Raton, Delray Beach and Lake Worth Beach. Swankiest of all, Palm Beach has a fluctuating population of aristocrats—6,000 at a peak. They mingle with non-homeowners who put up at posh hotels and pay the fancy prices the beach commands. President John F. Kennedy's liking for Palm Beach has aroused interest in the playground of the rich.

Lake Worth separates Palm Beach's Rolls Royce-Bentley set from the normal city of West Palm Beach with its waterside beauty and industries. It's the principal city of Palm Beach County, which doubled from 114,000 to 228,000 in the 1950-60 decade. The 1960 census gave West Palm Beach 56,000 people. The county combines tourism, industry and a $100-million agricultural center based on the rich Everglades soil.

Industrial Center • Pratt & Whitney has a $42 million plant, employing

4,000, near West Palm Beach. The 7,000-acre land tract required legislative approval for transfer to P&W, a political maneuver that was accomplished by Gov. LeRoy Collins, then head of state, at a special legislative session. The personnel problem at the new plant wasn't really a problem at all. Advertising copy that tested Florida's appeal for technical experts against New England produced a 30-1 ratio in favor of Florida. Among plant projects are a jet engine designed for fantastic speeds and a liquid hydrogen rocket engine.

Other West Palm Beach plants include Minneapolis-Honeywell's research center at Riviera Beach and an RCA project. The Air Force Base has several thousand personnel and gives the area a $30 million lift.

Several towns in the Lake Okeechobee farming area ship to the West Palm Beach market. They include Clewiston, Belle Glade and Bryant.

Fort Pierce, 60 miles north, has been acclaimed mostly for its court house in recent months, with hordes of murdered-minded reporters failing to note: it is an outlet for a $30 million citrus crop, cattle and vegetables, with a deep passage to the ocean. The population almost doubled in a decade. The city is two-thirds of the way down the peninsula to Miami and is the northern limit of Sunshine State Parkway. Nearby is the Mackle's Port St. Lucie development, an owner-rental-vacation deal with fine golfing and water recreation.

There's still plenty of growing room in South Florida despite the fancy progress of the 50's. It will be interesting to watch the growth story unfold.
Steady, stable sales activity is typified by this Central Florida shopping center.

**AVERAGE HOUSEHOLD INCOME FOR CENTRAL FLORIDA'S MAJOR METROPOLITAN AREAS IS $5,450.**

**FINANCIAL RESOURCES** in excess of 3 billion dollars. Financial leaders predict continued steady climb.

**FOOD SALES** totalled more than $335,000,000 in 1960.

**AUTOMOBILE REGISTRATIONS** make up 21% of Florida total.

**BUILDING PERMITS** in Central Florida lead all Florida markets with a 36.5% increase according to U. S. Census figures.

**DRUG SALES** over $50,000,000 in 1960.

**EMPLOYMENT**—One out of two new employees staffing Florida's industrial and commercial expansion lives in the Central Florida Market.

**WORLD'S LARGEST** citrus industry is located in the Central Florida market.

Centra Florida's exclusive TV market covers 19 counties, one-fourth of Florida's TV homes. Viewer preference for WESH-TV, WDBO-TV, and WLOF-TV is dramatically proved with the latest ARB combined average Frequency Index of 10.6.

how the needs were ascertained, how
the needs will continue to be ascertained
and how such needs are to be served.

Although he expressed only his per-
sonal opinions and declined to discuss
proceedings pending within the com-
misssion, Mr. Cowgill said it is reason-
able to estimate that since Illinois sta-
tion renewals fall due on Dec. 1, these
outlets could expect the full implemen-
tation of the commission's new field in-
vestigation policy this fall.

"Now is the time to check the con-
tion of your operations, while there may
be still time to correct deficiencies."

The former chief of the Broadcast
Bureau will talk to Nebraska broad-
casters April 25 at Omaha and will
make similar talks in Pennsylvania and
later in Florida. Mr. Cowgill personally
headed the FCC's pilot run of the new
field investigation plan in Florida last
December.

After Mr. Cowgill's talk, the IBA
passed resolutions looking toward hiring
of a full-time legal representative at the
state legislature and filing comments on
the FCC's proposed new program form.
IBA is expected to oppose all provisions
except that part on meeting the "needs"
of the community, which are to be
distinguished from "wants," several
broadcasters observed.

Hyland speaks • Robert Hyland, CBS
Radio vice president and general man-
ger of KMOX St. Louis, told IBA of
the high audience, advertiser and agen-
cy acceptance of his station's 14-
month old policy of all-talk and no-
music format in the Monday-through-
Friday prime period of noon to 7 p.m.
titled At Your Service. The show dem-
strates the programming potential of
radio, he said. "Radio's horizons are far
broader than the confines of the top 40
list and a disc jockey's putter," he said.

Describing radio as the "only medium
capable of keeping pace with our grow-
ing, mobile population," Mr. Hyland
said he believes radio "can shed light on
the dark corners of public life as effec-

tively as any newspaper . . . educate
and interpret as interestingly as any
magazine . . . seize the imagination, com-
mand attention and entertain as
absorbingly as television."

IBA's membership also was alerted to
newly introduced legislation affecting
broadcasting and advertising. One bill
would call for an investigation of radio-
tv advertising of tobacco and liquor
products to determine possible harmful
effects upon minors by "inducing them
to use such products. Another bill
would prohibit private political adver-
sing for certain national (U.S. senator
and state offices and would substitute
token ads placed and paid for by the
Illinois Secretary of State.

Cox takes FCC post, to eschew WINS case

Kenneth A. Cox took over officially
last Monday (April 10) as chief of the
FCC's Broadcast Bureau and immedi-
ately disqualified himself from partici-
pating in one of the principal cases now
under study in his bureau.

In a letter to FCC Chairman Newton
N. Minow, attorney Cox said that he
has represented Seattle broadcaster J.
Elroy McCaw for over two years and
therefore asked to be "completely iso-
lated" from bureau activities regarding
Mr. McCaw's sale of WINS New York
to Storer Broadcasting Co. for $10 mil-
lion. Mr. Cox said that he has advised
Mr. McCaw on things concerned with
the WINS sale and on the station's re-
newal application.

"I have consulted with personnel of
the station and checked certain matters
in its files, and have discussed the issues
involved with other counsel for Mr.
McCaw and with others interested in
his behalf," Mr. Cox told the chairman.
"I wish, therefore, to make it perfectly
clear as I embark upon my duties here
that I shall have nothing whatsoever to
do with the processing of this matter
and will seek in every way to isolate
myself from it."

Chairman Minow directed that the
WINS case be handled by Joe Nelson,
chief of Renewal & Transfers, and John
Harrington, chief of the Complaints &
Compliance Division. "I have directed
both Mr. Nelson and Mr. Harrington to
report directly to the commission with
respect to this matter and not communi-
cate or consult with you about it in any
way," the chairman told Mr. Cox. "Ac-
ccordingly, it is understood that this
matter will in no way pass through your
office and you will have no responsi-
bility in connection with it."

The WINS transfer now is under
consideration by Mr. Harrington's divi-
sion. Both Messrs. Harrington and Nel-
son normally report directly to Mr. Cox
as bureau chief.
A license to hunt fly-by-nighters

THAT'S HOW ADHERENTS SEE NEW PROGRAM FORM

If any broadcasters are to be placed over an impossible barrel by the FCC's plans for new programming reporting forms (Broadcasting, April 10), they can only be the fly-by-night, in-and-out operators who are interested only in acquiring a station, hyoing its ratings and then selling for a huge profit.

Such is the feeling of advocates—including government officials, attorneys and licensees—of the commission's proposed new forms.

"The substantial station operation, and this includes a very high percentage of the total, will benefit tremendously by the commission's newly defined programming policy," a spokesman said last week. He pointed out that the fast-buck broadcaster, who is not interested in serving the public, should and can be weeded out of the industry. Comments on the FCC rulemaking are due May 1.

Advocates feel the new reporting procedures will give broadcasters a new and well-defined freedom to program their stations so as to serve the public interest, convenience and necessity—as determined by the licensees themselves. "All that is required is that they make a legitimate and prudent effort to determine these needs and explain steps taken to meet them."

The commission has placed much reliance on its July 1960 policy statement on programming, defined as a "very sound document as to what the obligations of a licensee are—financial and to the public." This statement and the subsequent reporting forms are the only alternative to restrictive legislation, many feel.

One thing the commission will expect and demand of applicants is that stations involved complete the forms themselves instead of furnishing stereotyped replies prepared by Washington counsel. The commission wants the broadcaster in Poudunk to do his own research and make personal contact with his audience and not depend on his attorney in Washington to answer the questions on the basis of letters, etc., from civic, religious and community groups.

Misrepresentation the Key

No licensee is going to lose his authority to operate tomorrow, next year or 10 years from now because of his programming format. But he will be in serious trouble if the commission finds misrepresentations have been made on his surveys of the needs of his locality. For example, if the applicant says he talked to John Doe and a commission investigation discloses that there is no John Doe or that John Doe was not contacted by the station, then the station will be in trouble.

In the long run, it will be the public, not the FCC, which decides if a station's format is in the public interest. A station which is not rendering a public service cannot stay economically healthy over a long period of time, advocates of the new form maintain. On the question of whether rock-and-roll and music-and-news stations are effectively using their licensed facilities, the same sources believe such stereotyped formats already are beginning to run their course and that the public will cause their complete demise in the future simply by not tuning to such stations.

The FCC will never tell a station it must program this or that subject but the commission will ask why a particular subject matter is not included in a licensee's program schedule. In fact, this already is being done by the agency in questioning renewal applications (see story, page 60).

A Costly Situation

Proponents of the new form conceded that the first time an applicant replies the procedure will be expensive. He must compile and evaluate information asked in the admittedly complicated questions.

Once he has filed his first application under the new form, however, subsequent filing will be fairly easy. He will have his own system for keeping in touch with the public. He will know better what the commission wants and expects from him.

Much criticism of the new form has been characterized as "nit-picking and arguments about the placing of commas." Such critics, advocates say, should instead offer the commission suggestions on how to improve the proposed questions to make them both easier and more digestible for broadcasters and satisfactory for FCC requirements.

Advocates say they are not wedded to the precise language of the proposed rulemaking, as issued for comments. Many changes in the wording and meaning undoubtedly will be made and the commission is begging for constructive criticisms and suggestions, they add.

One proponent said, in summation: "If this thing is worked out thoroughly and correctly, the question of the licensee-commission relationship in programming will be laid to rest once and for all. The broadcaster will clearly understand what is expected of him. All the FCC really wants to do is protect the broadcaster who is serving the public interest from the operator who is not."

Barry-Enright sale
snagged by hearing

Daniel Enright and Jack Barry, former TV quiz figures who own WGMA Hollywood, Fla., were ordered to a hearing by the FCC last week on their application for license renewal. The commission's action, taken on a 4-3 vote, forestalls efforts to sell the station to Kinsey, Murphy Jr. and Carroll E. Crawford for $265,000.

The hearing was ordered because of Mr. Enright's involvement in the rigging of TV quiz programs Twenty-One and Tic Tac Dough, produced by Barry & Enright. Mr. Barry was quiz master of Twenty-One but was not involved in testimony before the House Legislative Oversight Subcommittee which brought out that contestants were given the answers in advance of their appearance.

Among the issues designated by the commission were (1) the extent of Mr. Enright's involvement in the fixed quiz programs, (2) whether, in light of the above, "Licensee Melody Music Inc. (Messrs. Barry and Enright each own 50%) is qualified to be a licensee and (3) whether renewal of WGMA's license would serve the public interest.

Barry & Enright asked for approval to sell the station to Messrs. Murphy and Crawford (who own KOTE Fergus Falls, Minn.) after the commission had questioned Mr. Enright's qualifications as a licensee (Broadcasting, Dec. 7, 1959). In the sale application, Melody Music Inc. said that it recognized the commission many orders "a long, expensive and time-consuming hearing" before renewing WGMA's license (Broadcasting, Sept. 5, 1960).

Voting for the hearing were Chairman Newton N. Minow and Commissioners Frederick W. Ford, Robert T. Barkley and John S. Cross.
Beeline stations cover the most agriculturally productive land in the world. In grape production, for example, Fresno county is first in the nation and five other Beeline counties rank in the top ten. This is an area which produces big and spends big.

In Inland California and Western Nevada Beeline Radio delivers more radio homes than any other combination of stations, at the lowest cost per thousand (Nielsen, SR&D).
Theriot lied, charges FCC's Broadcast Bureau

Already in trouble with the FCC, Leo Joseph Theriot, licensee of KLFT Golden Meadow, La., last week was charged by the Broadcast Bureau with lying.

The bureau asked the commission to enlarge the license-revocation proceeding against KLFT to include Mr. Theriot's character qualifications (Broadcasting, March 20).

Mr. Theriot had claimed in a sworn statement that he corrected the technical deficiencies that led the FCC to institute proceedings; specifically, that he hired a fulltime radiotelephone operator, George L. Roundtree Jr.

The bureau offered what it said is a statement from Mr. Roundtree that he has been employed at a radio maintenance company the past four years; that in December 1960 he "put his license" at KLFT in exchange for $50 from Mr. Theriot, but all his regular salary has come from the maintenance company; that he hasn't been to KLFT since March 12.

WMPP permit threatened by commission

The FCC began steps last week to revoke the construction permit of WMPP Chicago Heights, Ill., because of alleged false statements made to the agency on character and in an effort to conceal an unauthorized transfer.

EQUIPMENT & ENGINEERING

AT&T TALKS SPACE COMMUNICATION

Prepared to spend $25 million for satellite tests

Hopes for a worldwide satellite communications system took another step toward realization last week when the American Telephone & Telegraph Co. announced it was prepared to spend between $20-25 million in the next year to test the sending of telephone calls, data transmission and television signals around the world.

AT&T has already bought a 1,000-acre tract near Rumford, Me., and expects to start work on a $7 million experimental space communications ground station by next month with a completion date targeted for early next year. At the same time, the firm emphatically denied that it was interested in obtaining a space communications monopoly although admitting that it did not see any advantages to a system of space ownership that would comprise an amalgamation of common carriers.

The space disclosures were made at a news briefing held in New York on the Bell System's space communications plans. AT&T's Vice President and Chief Engineer James E. Dingman said the Bell System will install a giant (250 ton) highly sensitive antenna that will beam signals to a satellite. This "horn," described as the world's largest, will also serve as a monstrous ear trumpet amplifying faint signals on a relay from Europe via the satellite. The horn will be protected by the largest inflated structure ever made, a 210 feet wide, 161 feet high, radome, which will be supported by air pressure.

Low Level Orbit - Mr. Dingman said that the proposed system would use from 30 to 50 low level, active satellites (5,700 miles from earth) and that AT&T has asked the national aeronautics and space administration to provide a suitable rocket to send an experimental communications satellite aloft. The company executive said that AT&T has offered to pay for the cost of the experimental satellites and their launching.

Several times during the briefing Mr. Dingman stressed that the Bell System does not seek a space communications monopoly. Earlier this month Rep. Chet Holifield (D-Calif.) had attacked the company for what he claimed were attempts to gain a monopoly of the space communications field (Broadcasting, April 10).

Mr. Dingman said that he saw "no advantages" to a single integrated system of space communications ownership involving "an amalgamation of car-

TAPE-EQUIPPED
TV STATIONS
BUY
AMPEX
TELEVISION
RECORDERS

1 "It opened up new territories for us in sales and production. Not only the obvious ones, such as increasing the number of spots, but we find that it becomes much more advantageous for the small agency at the local level to buy (taped) spots on a plan basis because these spots can be repeated with little extra charge. I cannot single out the most important function of our Videotape* Television Recorders — all their functions are important. We have made better use of our personnel and facilities. And we have cut down the cost of spot announcement production. We have been able to sell the machine and its capabilities along with our own programming and production standards. We certainly need the recorders and they, in turn, need us. Now tape places at our fingertips — and pocketbooks — another tool for creative broadcasting. Why bought Ampex? Ampex invented Videotape and it's proved itself to the entire industry. You can't ask for more than that." — Lawrence M. Carino, General Manager, WWL-TV, New Orleans, Louisiana.

2 "We've used the Ampex VTR to make money and increase business... very definitely. We'll go on record as we have in the past. We know that the Ampex Television Recorder used properly, and sold aggressively, will pay for itself very easily. It's increased our business by virtue of the volume that we couldn't have obtained without the machine. It's so successful that we frequently go out to the used car lots, for example, or the furniture stores, or even the banks, and do their commercials on location on tape. There are so many ways we've used the Ampex Television Recorder to make money, that it's hard to pick out the ones to talk about... We wouldn't have the VTR's if they didn't make money. We think so highly of ours we're about to spend another $50 thousand dollars on Ampex equipment. I guess that lets you know how we feel about Ampex. Videotape is their baby all the way. Always has been." — George W. Harvey, Vice President and General Manager, WFLA-TV, Tampa-St. Petersburg, Florida.

3 "It's a great selling tool. I don't see how anybody stays in business without it... This market does more dollar volume of local business than a great many of the three-station markets in the country. A great percentage of that business is on Videotape... It gets local business because it absolutely takes the risk out of it. For example, it's awfully hard for an advertiser to visualize from a piece of copy paper with a video column and an audio column just what his commercial is going to look like on TV. But if the salesman can say, 'I've got a spot all recorded for you on your fall coat sale, and I want you to see it,' then he's sold. What do we think of Ampex? They're the leaders in tape. They put tape on the map, and as far as we're concerned, it's the Ampex VTR that's keeping it there." — John Tyler, General Manager, KFDA-TV, Amarillo, Texas.

4 "More than $3,000 a week in billing — both announcement and program entry — dependent on one Ampex tape machine. That's a typical week here at Channel 5. We've been in business with Videotape for slightly over two years and our one machine shows 3,272 hours of use and service... Ninety percent of our political business last fall was on tape. I don't see why we wouldn't have gotten it on a live basis, but it was easier, less costly, and much more convenient to candidates, having the busy grass roots schedules they do... Sure, we see every reason for getting a second machine — and we shall eventually, but we've done a phenomenal job with one for two years. There's no question about our choice of Ampex. They are TV tape recording, no doubt about it." — Fred Fletcher, Executive Vice President, WRAL-TV, Raleigh, North Carolina.

5 "We've increased our income with the Ampex Television Recorder by not having to spend so much time and money in getting and keeping business. What we produce on our VTR is keeping clients sold. We're putting our efforts where they'll do us the most good and our billing is increasing all the time. An end effect has been that our production, because of the Ampex Television Recorder, now puts us — a secondary market station — on a par with the quality of metropolitan market stations... Frankly, I can't see how any of these secondary market stations can afford to operate without a Television Recorder. We're sold on TV tape recording — sold on our Ampex equipment, too. Ampex has been the leader for five years now." — Bill Hoover, President, KTXN-TV, Ada, Oklahoma.

6 "We do more jobs... better with Videotape Recording. Business is better than it's ever been and we have a smoother, more efficient operation. For us, Ampex VTR is a basic piece of equipment that fits into our operation right from the start. It's no 'sacred cow' to us; everyone here operates it. And essentially, it gives us a whole crew of operators plus announcers... a real problem-solver when it comes to scheduling personnel. From an operating standpoint, it's tremendous. Today, for instance, the boys are knocking out 15 1-minute commercials. And we have scheduled as many as 63 recordings in one operating day. I wouldn't want to go back to operating without an Ampex." — Al Beck, Chief Engineer, KGBT-TV, Harlingen, Texas.

BROADCASTING, April 17, 1961
Women Are Wonderful.

Ann Colone’s a Woman.

Ann Colone’s Wonderful.

If there’s a misogynist in the house, our authority for the major premise, Women Are Wonderful, is *TV Radio Mirror*, which made the comment while giving WANE-TV’s Ann Colone its gold medal award for “Best TV Women’s Interest Show—Midwest States.”

The minor premise (minor only in formal logic terms) is axiomatic. Ann’s a most attractive, vivacious, witty and entertaining lady.

The conclusion, shared by viewers, visitors and vendors alike, is inescapable. She’s wonderful in providing everything from exercise gymnastics to festive cooking hints, from parakeet keepers to parachute jumpers, from the Dukes of Dixieland (in person) to the Chief of the Congolese Lunda tribe (in person). And there’s always time to discuss and help community activities.

The Ann Colone Show is one-o’clock watching five days a week for large numbers of the ladies of Fort Wayne and vicinity, reaching about 60% and 100% more homes, respectively, than competing network programs; adult ladies comprise 74% of its audience.

All Corinthian stations create programs which, like the Ann Colone Show, meet local and regional tastes. This encourages local talent, builds viewer respect and helps make friendly prospects for advertisers.
riers" as proposed by the Lockheed Aircraft Co. earlier this year. But, he maintained, AT&T is "willing to share space communications on an ownership basis, rental basis or any other equitable basis."

**Technical agenda mapped by AMST**

An extensive program of activities in the forthcoming year was planned last week by the technical committee of the Assn. of Maximum Service Telecasters. Under the chairmanship of Henry Rea, WFIL-TV Philadelphia, the committee made these plans at a meeting in Washington:

- Prepared a report and recommendations to be submitted to the board for AMST's technical program for the past year and for the coming year;
- Set up one of the largest budgets for activities to be undertaken in the coming year.
- Analyzed and reported on the FCC's rule-making looking toward short separations for vhf channel assignments; the U.S.-Canadian ch. 8 agreement made public recently; and the FCC's uhf study in New York.
- Recommended future sites for field studies of vhf and uhf transmissions.

The technical committee will meet May 8 at a dinner meeting at the Mayflower Hotel, Washington, during the NAB convention.

This will take place following a May 6 AMST board meeting in the Broadcaster's Club; a day-long membership meeting at the Shoreham Hotel on May 7, and a board breakfast meeting on May 8, all in Washington.

**Visual Electronics gets loan from AB-PT**

American Broadcasting - Paramount Theatres Inc., has agreed to provide a loan to Visual Electronics Corp., New York. The loan, amount not disclosed, is understood to run for 10 years, and includes an option to purchase up to 40% of Visual's common stock.

Visual, founded in 1955 by a group of former DuMont engineers, has engaged both domestically and internationally in a sales and service business. Among its primary activities in recent years is television station automation. Principal owners are James B. Tharpe, president; Pat Gallagher and Cecil Grace. In recent months it has installed and serviced tv stations in Haiti, Bermuda, Mexico and Argentina.

The company, which did over $2 million worth of business last year, will use the new funds to manufacture automation equipment.

Leonard H. Goldenson, AB-PT president, noted that the association with Visual will provide "technical resources of its sales and engineering departments in the expected development of automation in the television industry and to our expanding activities in the foreign television field. AB-PT has interests in tv stations in 10 countries outside the United States. It also has minority interests in several electronics companies, including Microwave Assn., Technical Operations and Dynametrics Corp.

**MVT buys Econ-O-List**

Mobile Video Tapes has acquired Econ-O-List and established it as a new MVT division specializing in a new high speed camera technique for preparation of directories, catalogs and listings requiring minimal periodic revisions.

The device is said to have a high retention factor, allowing unusual economies in list preparation. Jules Fielding, president of Jules Fielding & Assoc., technical publishing house which owned Econ-O-List, has joined Mobile Video Tapes as executive vice president. Curtis L. Willmott, general manager of the Econ-O-List operation, becomes general manager of MVT. L. E. Huston, MVT president, in announcing the Econ-O-List acquisition, predicted the new division will add more than $400,000 to MVT's sales total in the coming year.

**General Electronics purchase**

General Electronic Laboratories Inc., Cambridge, Mass., has bought the Rust Remote Control Systems for Broadcasting line from Rust Industrial Co., Manchester, N. H.

General Electronic makes broadcast transmitters, fm multiplex systems, and physics teaching devices. The last were added to the product group by recent purchase of Lincoln Manufacturing Co.

**Technical topics ...**

- New playback unit = Foley Electronics Co., College Park, Md., has announced a new automatic cartridge playback unit, its "Select-a-Tape model 211," for audible processing. The unit is fully transistorized and permits automatic high-speed access to any number of sections of pre-recorded information. Price $275.
- New vidicon tube = English Electric Valve Co., Ltd., Chelmsford, England, has introduced a new vidicon tv pickup tube which can be used in film scanning, studio broadcasting and can replace several specialized tubes in industrial applications. It is smaller and less complicated than many similar tubes now made.
Why the rush to hour-long shows?

THEY'RE BETTER COST-WISE, AND THEY DO WELL IN THE RATINGS

The trend toward hour-long programs is due primarily to the high cost of today's tv programming, according to Howard Barnes, director of programs, CBS-TV, Hollywood.

"Television is so expensive that few advertisers feel they can afford to follow the traditional network broadcast pattern of sponsoring their own shows exclusively," Mr. Barnes said. "The risk of sponsoring a program that fails to make the grade, at those prices, is too great. So the advertiser prefers to play it safe by spreading his tv appropriation over a number of different shows just as the prudent investor spreads his investment capital among a number of stocks rather than plunging it all on a single company.

"True," he added, "The advertiser who spreads his budget foregoes the advantage of the strong program-product identification that comes with full-program sponsorship, but in most cases the cost rules that out. Look at today's tv network schedule and you'll find only about a half-dozen programs with single sponsorship."

Competition - There are other reasons for the push toward hour-long tv programming than the financial one, although that is basic, Mr. Barnes stated. "Hour shows have done well audience-wise," he said. "People don't like to turn the dial and if they like the show they're watching they're apt to leave it on for its full length." This makes the hour-long program useful in inter-network competition, he commented, pointing out that an hour show scheduled to start a half-hour earlier than other strong network offerings can get a firm grip on the audience and prevent many viewers from tuning away. ABC-TV's slotting Maverick in the 7:30-8:30 p.m. Sunday position, giving it a 30-minute headstart on Steve Allen and Ed Sullivan, who were then battling for 8-9 p.m. supremacy on the comedy-variety front, is a good example of how well this strategy can work.

The hour-long program has advantages for the producer as well as the network, Richard Lewis, executive producer, Revue Productions, noted. "The hour is a more satisfactory length to work with," he said. "It allows for fuller development of both plot and character. There's time to develop audience involvement. The half-hour is the short story of television; there's just time to present one situation, to solve one problem. It still seems like the best length for a situation comedy. Each week the hero or heroine or couple gets into a different mess and gets out of it in typical fashion and the audience tunes in to see what their predicament is this week.

"But in the dramatic field, there's the need to develop the story, to explain the characters and why they act as they do. All the creative people connected with programming prefer the hour as giving them a better opportunity to express themselves. With hour-long shows we can attract better writers, directors, actors."

Mr. Lewis has worked with hour programming as well as the half-hour variety for about five years. He is credited with the idea of working anthology type stories and guest stars into series with continuing characters, a concept first used on Wagon Train and currently on Checkmate.

Writers Happy - "The writers are especially happy with an hour-long series," he said, "as it virtually demands original scripts. The short story that fits the half-hour format is too short for an hour; the novel is too long. The novella is the right length but the supply of novellas is short and we're forced to go after original material, which means more work for the tv writer."

The idea that the hour-long format offers definite advantages to the tv producer is heartily endorsed by Robert Weitman, vice president in charge of production at MGM-TV. One 60-minute MGM series, Asphalt Jungle, started April 3 on ABC-TV. Two others, Dr. Kildare and Cain's Hundred, are being readied for NBC-TV starting this fall. Citing Cain's Hundred as an example, Mr. Weitman noted that the story of society's fight against crime today needs a full hour to allow the strength of drama and of character to develop out of each situation. "To do it in a half-hour would be to de-gut it," he stated.

But both producers agree that the hour format exacts a premium price for the advantages it offers. And not just in money, although that too is important. The production cost of the average MGM-TV 60-minute program is $115,000 per episode, Mr. Weitman said. A weekly tv series, whether hour or half-hour, has to have a program ready for airing every week. The half-hour program can be filmed in a week. The hour program cannot. Filming takes six to seven days including rehearsal and since union rules prohibit weekend work that means a production schedule of two programs every three weeks, provided everything goes along without mishap, which is a lot to hope for.

Careful Planning - This calls for good writing, good acting, good direction and a lot of careful pre-planning, the producers agreed. Scripts must be ready well in advance of camera dates; casting must be completed and the shoot-

Program notes...

Busy year - Screen Gems has 12 series set for tv broadcast during 1961-62, with a possibility of adding another couple before the season actually starts this fall, William Dozier, vice president in charge of West Coast activities, announced last week. New series sold to date include Top Cat and The Hataways, both scheduled for ABC-TV; Hazel and Daring Deeds of Donny Dray, both to run on NBC-TV. Returning for another season are: Dennis the Menace, The Donna Reed Show, Flintstones, Route 66, Naked City and the three-Kellogg-sponsored national spot Hanna-Barbera cartoon series, Yogi Bear, Huckleberry Hound and Quick Draw McGraw. CBS-TV has also scheduled repeats of the Father Knows Best series.

Santa's Village - Production has started on a new children's series. Santa's Village, to be offered as a half hour weekly program on a 52 week basis. The series is being shot in color by Moulin Studios, San Francisco, at Santa's Village, Santa Cruz, Calif. Production staff includes Dan Norton, producer; Mark Connelly, technical director; George Rickman, director; Bruce Arias, art director. Santa's Village is an amusement park, presumably modeled after a child's concept of Santa Claus' home. Other parks are located in Skyforest, Calif., and Dundee, Ill.

Three new ones - Jim Ameche Productions has added three five-minute programs to its radio syndication service: Let's Talk, with Grace Leonard carrying on a conversation of a little girl with a next-door neighbor; Male vs. Female, Gene Parker and Marilyn Hare.
ing schedule planned, so that once the cameras start rolling nothing need stop them until the episode is safely in the can. And this takes time. In fact, Mr. Weitman noted that "Cain's Hundred" will have been in work nearly a year by the time the first program hits the air this fall.

The idea of a retired criminal lawyer who once represented the "big crime" syndicate but now has agreed to help top level government officials stop crime before it happens was developed at MGM-TV and presented to David Levy, NBC-TV's program vice president, and later to the NBC's president Robert Kintner. "They liked it, so we got Paul Monash, who wrote the original two-part Untouchables script, to do a first script for us and when he had a rough draft we sent it to NBC and they said go ahead and polish it. When they got the finished script, they said go ahead and shoot it. That was Dec. 15. I set March 1 as a deadline and went to work."

Stages were set, the director brought in, the lead discussed, interviewed and hired, the secondary parts cast and on Jan. 19 filming of the pilot began. It took eight days. By Feb. 15 rough cut was ready for viewing and on Feb. 28 Mr. Weitman boarded a plane for New York, a completed answer print under his arm. NBC liked it, and scheduled it for Tuesday, 10-11 p.m. A producer, Charles Russell, was engaged to work with Mr. Monash as executive producer. Several writers were enlisted and four or five directors are now being chosen to rotate on these hour-long shows, which will go into production May 7.

The trio was unanimous regarding advertiser interference: there isn't any, except for an occasional rare exception. The magazine concept prevents integration of commercials into the program format and weakens program-product identification, so that the advertiser and his agency now concentrate on making the best commercials they can and don't worry too much about the individual programs, once they have decided to go along with the basic theme of the series. Once in a while, a client will feel that something in a script will evoke an audience reaction unfavorable to his product. But such complaints are few and the trouble is usually easily ironed out, Mr. Barnes said. The producers commented that they deal with the networks, follow the precepts of the NAB TV Code and their own good judgment and seldom hear from the advertiser or agency except when some executives from back east are going to be in Hollywood and would like to have lunch with the star of the series.

No General Rule = Changing the length of an established series from a half-hour to an hour may or may not be a good idea, the experts agreed. Naked City has done well in its longer version; Lineup fell flat on its rating. MGM-TV made a half-hour pilot of Dr. Kildare several years ago and failed to sell it, while the hour pilot was sold without delay. Mr. Barnes and Mr. Lewis have high hopes for Gunsmoke, when it doubles its length this fall.

If 60 minutes is good, would 90 minutes be better? Yes, for top flight dramatic programs, Mr. Lewis declared. He anticipates that a general move to 90-minute dramas may come in the next two or three years. Mr. Barnes is more skeptical. The magazine advertising format utilized in the longer programs with their multiple sponsorship works well with the 60-minute programs, he notes, but when it was tried on Playhouse 90 there were too many interruptions and the viewer became annoyed and distracted. Mr. Weitman refuses to guess what might happen in the future but observes the networks decide matters like that and the producer tries to deliver, in the best form he can, whatever the networks want.

expressing masculine and feminine viewpoints on topics of general interest such as women drivers; and Pamela Mason, five minutes of chatter about anything and everything.

It's 'Amigo Rocky' now = Producers Assoc. of Television, N. Y., reports that 78 half-hour episodes of Rocky and His Friends, now carried on ABC-TV, will be offered for sale in South America through the company's newly-appointed distributor there, Magnum Television International, S.A. The latter firm will dub the cartoon programs into Spanish and Portuguese. Magnum is a new company organized by John H. Manson 3d, formerly head of Latin America operations for Screen Gems Inc. Peter M. Piech, president of Producers Assoc. of Television, announces that 52 new Rocky cartoons now are being produced in color and are scheduled for network presentation in the fall, possibly on NBC-TV, which is negotiating with a sponsor.

Countdown 21 = KING-TV Seattle, Wash., this Friday (7:30-8:30 p.m. PST) will present Countdown 21, an hour-long documentary dealing with the Century 21 Exposition (space age world's fair which will open there in 1962). The program will also be telecast over KREM-TV Spokane, Wash., and KGW-TV Portland, Ore. (KING-TV's sister stations); KIMA-TV Yakima, KEPR-TV Pasco, and KBAS-TV Ephrata, all Washington, and KLEW-TV Lewiston, Idaho. National Bank of Commerce, Seattle, will sponsor the program on all seven stations as a public service. Production staff for Countdown 21: Bob Schultman, special features director, KING-TV (writer-re-
First aid course • WTMJ-TV Milwaukee has been gratified by an almost overwhelming response—1,700 persons—for its television first aid course in conjunction with the Milwaukee-Waukesha County Red Cross chapter. The course, 10 weeks in duration, will be given each Wednesday on The Women's World. Cost: 75 cents for the textbook. Homework assignments and examinations will be given. Those successfully completing the course will receive a first aid certificate.

Anti-commie federation • Representatives of entertainment unions from North, South and Central America will meet in Costa Rica in May to lay plans for the formation of an anti-communist federation of labor organizations to combat efforts of communist-dominated European unions to invade the Western Hemisphere. Herman Kenin, president of the American Federation of Musicians, is chairman of the AFL-CIO steering committee for the conference. Other U. S. unions whose representatives will attend the meeting are Actors Equity, AFTRA, Screen Actors Guild, Screen Extras Guild, American Guild of Musical Artists, IATSE, IBEW and NABET.

Distribution launched • Two programs produced by CBS News and presented on CBS-TV will be distributed by Carousel Films Inc., N. Y. The films, The Great Holiday Massacre and Our Election Day Illusions: The Beat Majority, will be made available to schools, government agencies, discussion groups and public libraries.

Taylor to NBC-TV • Four Star Television will expand its Robert Taylor's Detectives, from a half-hour to a full hour and move it from ABC-TV to NBC-TV, starting in the fall. The switch was negotiated by Four Star executive vice president Tom McDermott with NBC-TV, which has scheduled the series at 8:30-9:30 p.m. Fridays. This is the third Four Star 60-minute series to be sold for fall. The others are The Dick Powell Show, action/suspense series featuring Four Star's president, which has also been sold to NBC-TV, and The Corruptors, scheduled for ABC-TV.

Russian documentary • The Westinghouse Broadcasting Co. through its WBZ Boston outlet last week presented "The Challenge—Soviet Science," a documentary dealing with Russia's successful venture in outer space. Key figures in the documentary were Dr. Leonid Sedov, chairman of the space committee, Soviet Academy of Sciences; Alexander Nesmianov, president of the Academy of Sciences, USSR; James Killian, board chairman, Massachusetts Institute of Technology; Allan Waterman, director of The National Science Foundation; Bruno D. Rosi, MIT; Fred Whipple, director of the Smithsonian Astrophysical Observatory, Harvard.

Story book show • Television Talent Assoc. will start filming Story Book Village, starring Marcia Drake, in May. Exteriors will be shot in the Fresno, Calif., area; interiors at the Skelton Studios in Hollywood. TTA is also developing a tv series dealing with the history of California's San Joaquin Valley.

Edwardes yanked off 'Circle' • CBS News yanked last week that it has directed newsmen Douglas Edwards to relinquish his role as host and narrator of Circle Theatre, sponsored by Armstrong Cork Co. and carried on CBS-TV on alternate Wednesdays (10-11 p.m.). A network spokesman said it has been a general policy that its newsmen should not appear on entertainment programs but acknowledged this practice has been relaxed in the past. Mr. Edwards, who presents a nightly newscast on the network, said he would not protest the decision of CBS News. An official of Armstrong Cork said another person would succeed Mr. Edwards on the program next fall on CBS-TV.

MGM-TV's net up half million • MGM-TV's net income before taxes amounts to $5,911,000 on gross revenues of $10,124,000 for the first two quarters ending March 16, it was announced last week. This represents a jump of more than $500,000 in net income before taxes and of close to $3 million in gross revenues over a like period in 1960.

Total earnings for MGM Inc. for the two quarters amounted to $2.65 per share on $6,684,000, a gain of $1.18 per share and almost $3 million over a similar period the last fiscal year.
Boost SPOT income with RCA TV Tape—
Get peak quality ... production savings

Advertisers are prone to “buy on sight” and stay sold once they view the excellence of spots made on RCA equipment. Picture quality is virtually “built in.” RCA's multiple monitoring checks assure the highest quality production. You can check through the entire system ... and be confident you are getting the best results at all times. Moreover, you can obtain a perfectly aligned picture in seconds thanks to RCA electronic quadrature adjustment for both record and playback.

RCA's “convenience features” save time and money in production. A central control panel puts the entire operation at the user's fingertips. A continuously variable speed control enables you instantly to cue-up any spot on tape. Speed can be slowed until audio becomes intelligible for cueing. And precision headwheel inter-
changeability—for color, too—means you can playback any tape on any machine, regardless of where made.

Special RCA safeguards protect your production against loss. Simultaneous control track monitoring assures you of a control track as you record. (A tape without a control track is worthless.) And you get simultaneous audio playback as well. You save lost production time, re-dos, talent costs. Only RCA provides these multiple means of protection.

Advertisers will appreciate the difference an RCA TV Tape Recorder will make in your spot production. You'll find a satisfaction in operation without parallel. And service after the sale is the type that only RCA with its broad background in television can perform.

Find out how the RCA TV Tape Recorder can help you produce the most saleable commercials and programs. See your RCA representative. Or write to RCA, Dept. TC-22, Building 15-1, Camden, N.J.
How to improve radio-tv public affairs

THE EXPERTS AT WESTINGHOUSE CONFERENCE TELL WHAT'S LACKING

The role of informational programming in a time of urgency came under the critical gaze of industry and non-industry executives last week at Westinghouse Broadcasting Co.'s fourth public service clinic.

After three days of analysis, synthesis, debate and creative joint thinking, several hundred broadcasters from the U. S. and foreign countries left Pittsburgh, cradle of broadcasting, with new ideas and new convictions.

Panels, workshops and intimate discussions dealt bluntly with the industry's public affairs responsibilities and the way they are being met. Newscasts, panels, public affairs programs and other types of broadcasting were taken apart with a single purpose—the improvement of radio-tv service to the public.

From Dr. Frank Baxter, U. of Southern California, to Sam Leveson, co-mediator, the guest speakers spoke their minds on the cultural, educational and entertainment roles of the industry. They agreed in general with Donald H. McGannon, WBC president, that Americans must accept the challenge of becoming the first people in history to attempt education of all adults in view of the inability of the school system "to cope with the increased educational responsibilities of our times."

Anti-Gimmick • Some of the most caustic criticism concerned news broadcasting at the final panel discussion, particularly newscasts using dramatic gimmicks and attention-getters. Erwin D. Canham, editor of the Christian Science Monitor, said gimmicks do not contribute news impact. The main job, he said, is to get enough into the peoples' minds and to hold their interest.

He emphasized the need for background information.

Julian Goodman, NBC news-public affairs vice president, said broadcasters must develop "a national fund of people who can cover, write and report on current events." And William Monroe, WDSU-TV New Orleans and president of Radio Television News Directors Assn., said stations need professional newsmen who can research the news. He opposed "tricking up the news." Sandy Jackson, president of the Star Stations (Don Burden), demonstrated fast-moving headline newscasts "with a lot of zest." This method was criticized by the panel but drew some audience support. Dr. Wilbur Schramm, director of the Stanford U. communications research institute, said background explanation contributes greatly to the way people remember the news.

Richard M. Pack, WBC program vice president, presided at the three-day clinic. WBC underwrote the bill for a professionally-produced program that included leading spokesmen from government, education, journalism and the broadcasting industry. The first WBC public affairs conference was held in 1957; others have been at Baltimore and San Francisco, the last-named in September 1959.

The Washington contingent included Pierre Salinger, news secretary to President Kennedy, and FCC Commissioner Robert T. Bartley.

The WBC staged an original musical revue "Improper Channels," with words and staging by Robert Bernstein, of WBC public relations, and music by Nicholas Schachter. It included 16 skits satirizing the industry. A concert by the Pittsburgh Pops followed. Both were held at Carnegie Institute.

Mr. Salinger assumed the role of media counselor in warning broadcasters they must "weigh carefully the value of keeping these press conferences on the air intact and in full." He said he noticed after the seventh or eighth presidential conference that "we are beginning to get letters from areas where people say their local stations are no longer carrying them."

He added this opinion, "I consider that somewhat of a disturbing trend this early in the history of the press conference. And it's the kind of trend that the other media are looking for to point out that they were right in the first place about this." Print media had bitterly opposed live coverage when the idea was first proposed several months ago.

Re-examine • And Mr. Salinger took a shot at networks for their adoption of rules covering conference feeds to independent stations. "We do not question their right to do this," he said, "I think that they should re-examine their position in this subject and the reason I say it is this: I was talking to a network official in Washington several weeks ago and I pointed out to him I had a complaint from a tv station in Detroit which was an independent station unable to get a feed from a network station. He said, 'Well, if I gave them this feed, what would be the advantage of having a network affiliation?'

"Well, I was somewhat puzzled by this because I thought perhaps he was revealing a concept about the press conference I hadn't thought about. And that is that he was treating the press conference as some kind of commercial show that had been put together by his own network. I think that is the thing that we have to bear in mind, that the press conference is not a network show. It is a news event. I think as many people around the country should see it as possible. It would be to everybody's advantage, and the networks included, if they would review their thinking on this matter and go
back to the system they had in the first few weeks and make this press conference available to everybody."

Mr. Salinger felt there is no danger of "over-exposing" the President on media because the public is interested in everything he says during this critical period. "I have a feeling the people who talk about overexposure of the President are falling back into show business terms," he said. "They're talking maybe about overexposing a juggler, or a comic."

He chided media for "wasting" a lot of air and tv time as well as white space on trivia such as what soap the White House uses and similar personal items.

He lauded shows showing the President in action, mentioning the NBC-TV JFK Report, the CBS showing the President in his office and ABC-TV's Adventures on the New Frontier. As to the future, he said, "We are thinking in terms of different ways in which the President might communicate with the people on given, specific issues," (CLOSED CIRCUIT, April 3).

He doubted if live radio-tv pickups destroy interest in later coverage of a conference.

Progress - Through several panels ran the belief tv has made important progress in the news-documentary-public affairs field. The medium's role in keeping the public informed and in raising the cultural level was examined closely.

Dr. William G. Cole, president of Lake Forest (Ill.) College, contended the business of broadcasters, like that of educators, is "not to provide ready-made answers but to present the problems, drive people out of their complacency and stir them up to think intelligently." He added they should "overestimate rather than underestimate the intelligence of the audience" and explained the Kennedy-Nixon tv debates had "opened the door to a technique of exposing people to discussions of significant issues."

Dr. Baxter warned broadcasters and educators they would fail if their gauge is ratings. "We are surely back in Roman times if all we give man is mass enjoyment, mass entertainment," he said.

Garry Moore, entertainer, said "there's very little culture and no democracy in my end of the business." He charged programs are being produced solely by the programming boards of the three networks, recalling how ABC-TV under President Oliver Treyz "came rushing up" to NBC-TV and CBS-TV on a diet of westerns, whodunits and violence.

Oscar Katz, CBS program vice president, argued that programs "must appeal to most of the people most of the time" and also serve minority tastes. He conceded there is "enormous room

And they bought WSBT-TV schedules and lived happily ever after!"

Advertising people learn early that WSBT-TV produces happy-like results in the South Bend market. The latest Nielsen Survey* shows why: in this 3-station market WSBT-TV has an average of 42.7% share of sets in use, sign-on to sign-off ... carries 20 of the areas 25 most popular shows! It's accomplished with a full schedule of CBS programs and popular local shows.

WSBT-TV also covers the rich 15-county area of northern Indiana and southern Michigan that has a population of 915,000 and a buying income of $1.7 billion! And right in the midst of it is the South Bend Metro Area with a per household income of $7553 ... highest in Indiana! Get complete market and coverage details from your Raymer man or from this station.

ONE OF CBS' HIGHEST-RATED STATIONS

Paul H. Ryamer, Inc., National Representative
AROUND THE CLOCK, everything from thumbtacks and tiny transistors to switchboards and telephone booths flows into Western Electric's supply channels for the Bell Telephone System. Shown on a shipping platform are just a few of the many thousands of items that W.E.'s 33 distribution centers keep constantly on hand for the local Bell telephone companies.
Western Electric, as manufacturing and supply unit of the Bell System, is organized to provide whatever the Bell telephone companies request, on a daily basis or a long-range basis, to fulfill the communications requirements of their subscribers.

This is a logistics task that requires the closest integration of Western Electric's plants, distribution centers, transportation companies and nearly 40,000 suppliers located throughout the country. By its nature, it is a large and complex operation encompassing almost every item used in the vast nation-wide telephone network.

To manufacture or obtain this equipment and transport it wherever it is needed, exactly when it is needed, calls for an organization fluidly adjusted to the ever-changing needs of the Bell telephone companies, who are constantly at work finding ways to improve their service.

As examples of the scope of its logistic role, Western Electric will in an average year:

- Manufacture miles of wire and cable, countless switching units, electron tubes, and thousands of other items, each varying in number from one to many millions.
- Purchase over $1 1/4 billion worth of materials and services from nearly 40,000 different suppliers — 90% of whom are classified as "small businesses."
- Distribute to the 23 Bell telephone companies nearly 25 million items a year through our 33 strategically-located distribution centers.
- Install central telephone office switching equipment at 67,000 separate jobs in 7,200 cities and towns throughout the country.
- Ship products and supplies via 400 railroads, 3,600 truck lines, 60 air lines and 30 water shipping companies.

This extensive logistics experience, coupled with our close association with the other members of the Bell System — Bell Telephone Laboratories and the Bell telephone companies — has also made Western Electric uniquely fitted to head-up communications-oriented defense tasks for the U. S. Government. These have included responsibility as prime contractor for DEW Line, SAGE, White Alice, and the communications aspects of BMEWS.
for improvement."

Henry Schachte, executive vice president of Lever Bros., explained how advertisers can deliver interesting and effective messages, citing Smoky the Bear forest fire warnings as an example of imaginative communicating. He described some public affairs projects as "just talk in front of a camera."

Conscience and Bankbooks * Of five popular programs sponsored by his company, Mr. Schachte said, two are violence and three others are not. He hoped stations will "look at their consciences as well as their bankbooks."

Mr. Katz said CBS will gamble $3 million on a new program titled The Defenders, using quality writing and production. It will be a fixed-character series touching serious subjects. The first will deal with religious freedom. He recalled the effort to elevate programming by an unsuccessful series, The Witness.

Marya Mannes, of Reporter magazine, complained that "writing talent has fled TV because it had no freedom."

Fred Coe, producer, felt TV "has taken the 'show' out of 'show business.'" Lou Hausman, director of Television Information Office, emphasized the importance of entertainment programs which he described as "the reason the public buys sets."

Dr. Bernard Berelson, director of the Columbia U. Bureau of Applied Social Research, said it is the responsibility of broadcasters "to out-reach the audience." And Bergen Evans, of the Northwestern U. English department, said they "must give the public what they want."

Sam Levenson criticized broadcasting program censors whom he called "intellectuals with heavy black pencils," describing a rejected continuity dealing with the subject of sex. He suggested broadcasters prepare the audience for educational material such as Shakespeare. An example of inadequate preparation, he said, was "The Tempest."

Douglas Manship, president-general manager of WJBO and WBRZ (TV) Baton Rouge, La., drew heavy applause when he described his editorializing campaign against segregation. "We know this is wrong," he said, and explained how entry into this "area of horror" brought threats of violence to his family. "It was one of the most rewarding experiences we ever had," he said, adding this note of caution, "Always offer equal time to the other viewpoint."

'Defend and Improve' * Alan Newcomb, commentator of WBT Charlotte, N. C., originator of the station's Radio Moscow program, said "totalitarian radio has declared war on private radio." He added, "If we broadcasters are going to do our share in preserving the things we hold dear, we must defend and improve the free enterprise system in every way we can." The WBT series features excerpts from the Russian news broadcasts, with commentary rebutting half-truths and distortions.

Americans will have global TV, including programs beamed from Australia, within a decade, according to John Wentworth, RCA manager, educational electronics. He described the Echo balloon launched in the fall of 1960 as the first major breakthrough and said active satellites for bouncing TV are due next. He predicted several developments in color TV apparatus that will make it as easy to operate as black-and-white. He cited trends toward transistors, miniature equipment and automatic operation. He regretted "the decline of the chief engineer."

Lee Hall, of Robert Drew Associates, described documentaries which employ two-man camera-reporter teams with creative ability. He explained documentaries based on Swiss or German tape recorders and film-transistorized oricon with an "acutron."

Stephen F. Temmer, president of Radio Moscow newsmen ousted from WBC meet

International intrigue developed unexpectedly at last week's public service programming conference held in Pittsburgh by Westinghouse Broadcasting Co.

It was caused by the appearance of Oleg Kalugin, Radio Moscow correspondent in the U. S., who left the conference on the opening day at the State Dept.'s suggestion.

WBC pulled its experimental Project Restore exhibit out of the conference just before it started, apparently in line with an FBI request. The project is part of the Conelrad program (BROADCASTING, April 10). Project Restore includes a classified device that permits transmission of several narrow-band twx messages on the KDKA Pittsburgh and KYW Cleveland channels without disturbing broadcast reception. Both are WBC stations.

Mr. Kalugin appeared on a conference panel program April 10, answering questions from several college students. Shortly after the program he left for New York, saying he had applied April 1 or 2 for permission to take the Pittsburgh trip. But the State Dept. asked him to return to New York, explaining the Soviet embassy had not applied for a travel permit.
Gotham Audio Development Corp., said broadcast standards haven't kept pace with high-fidelity recording equipment.

Jo Mielziner, theatrical designer, demonstrated tv lighting techniques based on a simple background. He criticized overlit sets.

Albert McCleery, CBS-TV producer, said "no industry has gotten old-fashioned so fast," cramped by don'ts. He felt networks have created "a sleek, slick Hollywood grayness," and urged, "Rise affiliates, you have nothing to lose but your networks. He called for a "wedding" between universities and stations.

Suggestions • Some of the suggestions or ideas left with broadcasters:
- Mark Olds, program director, WNEW New York—Rely more on professional judgment, less on ratings and isolated complaints.
- Jules Dundes, vice president-general manager, KCBS San Francisco—Use short takes or interest-filling vignettes for radio station deejays.
- Arnold Hartley, Key Broadcast Management, New York—Stations catering to racial or language groups are popular because of their desire to upgrade the groups. He denied they tend to "reinforce a ghetto mentality."
- W. Edward Cramer, assistant director of public affairs, WCBS-TV New York—Put spice and partisanship into discussion programs to get away from "squirrel-cage panels."
- Irwin Rosten, producer-writer, KTLA-TV Los Angeles—Attack boredom in television, get out of the rut and meet new problems.
- Larry Beaucamp, WANE-TV Fort Wayne, Ind.—"Don't let networks scare you off local cultural programs because they do them."
- James Kovach, program manager, WNHC-TV New Haven, Conn.—Use experts to present religious features, with a basic live local religious format of over 2½-hours a week.
- Bruce Attridge, national supervisor of children's programs, Canadian Broadcasting Corp.—Widen the range of informational and emotional experience in programs for children in the 8-12 age group.

19 stations get awards from Virginia AP group

A total of 48 awards went to 19 Virginia Associated Press Broadcasters stations at the group's annual spring meeting in Washington last week. Awards were presented for news, special events, sports and farm broadcasting categories.

Three special awards were made: to Walter Crockett, president of VAPB and news director of WCYB-AM-TV Bristol, for best protection to the AP (the WDBJ Roanoke cup); to Fred

Et tu, Frankie?

Frank Sinatra has joined the ranks of active protesters against the portrayal of Italian-type characters as hoods and gangsters on The Untouchables. Seeking out Desi Arnaz, president of Desilu Studios, where the tv series is produced, in his Palm Springs, Calif., hotel, Mr. Sinatra exchanged heated words with Mr. Arnaz and, when the pair parted, announced that Essex Productions, owned by Mr. Sinatra, is moving the motion pictures it had planned to produce at Desilu to the Sam Goldwyn Studios. Boycott of L & M cigarettes by an Italian-American organization was followed by withdrawal of L & M sponsorship of the series (Broadcasting, March 20, 27). Williams, formerly of WYTI Rocky Mount (now news director of WBAX Wilkes-Barre, Pa.), for placing in all seven newscasting contest categories; to John Columbus, WPVU Pulaski, for covering the story of a fugitive who barricaded a house and held off police 30 hours.

Ford Foundation plans $483,700 grants for tv

The Ford Foundation, New York, is earmarking $483,700 for television in a $3.7 million series of appropriations for experiments in teacher preparation. Most of the tv money, $450,000, goes to the foundation's national program for public schools, which has made grants to selected systems since 1958.

Other television funds: $4,000 to the Dallas Independent School District; $26,000 to the U. of Florida; $1,400 to the U. of Kentucky; and $2,300 to Queens College.

Program for the public, Bartley tells networks

Networks have capitulated to General Foods and Procter & Gamble, FCC Comm. Robert T. Bartley said April 10 at the Westinghouse public service broadcast conference in Pittsburgh. (see story page 112).

Commissioner Bartley tagged the network bills of these sponsors at "$90 million for Procter & Gamble and $60 million for General Foods."

Recalling the soap-opera era in radio, he said the application had now come to

'GRAMMY' AWARDS
Charles top record artist, Victor leads record firms

Singer Ray Charles walked away with top personal honors among recording artists for 1960. Wednesday (April 12) when he received four "Grammy" statuettes from the National Academy of Recording Arts and Sciences.

Two of the "Grammies" went for his ABC Paramount recording of "Georgia on My Mind," adjudged both the best male vocal performance on a single record and the best performance by a pop single artist. His Atlantic recording of "Let the Good Times Roll" was picked as the year's best rhythm and blues performance and his Atlantic album, "Genius of Ray Charles," as the best male vocal album.

Among the recording companies, RCA Victor ranked first with 11 recordings among the 38 receiving "Grammies" for 1960. Columbia and Capitol tied for second place with six winners apiece, while Warner Bros., ABC Paramount and Verve shared the third plateau with three winners each.

Among the performers, Henry Mancini and Bob Newhart each won three "Grammies." The Victor recording of Mr. Mancini's "Mr. Lucky" was honored as the best arrangement and the best performance by an orchestra other than for dancing; his "Blues and the Beat," also on Victor, was voted the best jazz performance by a large group.

Bob Newhart's "Button Down Mind" was named "album of the year," "Button Down Mind Strikes Back" was judged the best comedy performance (both were recorded by Warner Bros.), and Mr. Newhart was also named the best new artist of 1960.

Two for Ella - Ella Fitzgerald got a "Grammy" for the best female vocal performance on a single record for "Mack the Knife" on Verve and another for the best female vocal album, Verve's "Ella in Berlin." Miss Fitzgerald's "Gershwin Song Book" (also Verve) won a "Grammy" for "Luis P. Valentin" for the best engineering contribution to a popular recording.

Hugh Davies won the engineering award in the classical field for Capitol's "Spanish Guitars of Laurindo Almeida," which also got top honors as the best classical instrumental performance without orchestral accompaniment. Mr. Almeida's "Conversations With Terri, Ruderman, Lurie" (Capitol) won as the best chamber music recording. In the novelty field, John Kraus got engineering honors for Capitol's recording of Stan Freberg's "Payola Blues."

Percy Faith's "Theme From a Summer Place" (Columbia) was named the "record of the year" and the theme from "Exodus" (the only non-recording award) the "song of the year." RCA Victor's recording of the Exodus theme won as best record of a score from movies or tv.

Other "Grammy" winners were: Count Basie—"Dance With Basie" (Roulette); Eydie Gorme-Steve Lawrence—"We Got Us" (ABC Paramount); Norman Luboff Choir—"Songs of the Cowboy" (Columbia); Andre Previn—"West Side Story" (Contemporary); "Can Can" by Frank Sinatra and the original cast (Capitol); "Sound of Music" by the original cast (Columbia); Jonathan and Darlene Edwards—"Jonathan and Darlene Edwards in Paris" (Columbia); Marty Robbins—"El Paso" (Columbia); Harry Belafonte—"Wing Dat Hammer" (RCA Victor); "Let's All Sing With the Chipmunks" (Liberty); Miles Davis-Gil Evans—"Sketches of Spain" (Columbia).

Classical recording award winners included: Rainer—Chicago Symphony—"Bartok: Music for Strings, Percussion and Celesta" (RCA Victor); Leontyne Price—reital (RCA Victor); "Turandot"—Tebaldi, Nilsson, Bjoelning, Tozzi, Leinsdorf (RCA Victor); Sir Thomas Beecham—"The Messiah" (RCA Victor); Copland—"The Tender Land Suite" (RCA Victor). The Washington recording of the late President Roosevelt —"FDR Speaks" won as the best non-comic vocal record. The best album was that of Capitol's "Latin a la Lee" for which Marvin Schwartz was art director.

Leo's NAB roar
Details of MGM-TV's previously announced plans to release some of its post-'48 feature films to television will be revealed at the NAB Convention in Washington, May 7-10. Plans were made at a three-day conference of MGM-TV sales managers held in New York last week. The motion pictures involved have never been shown on tv.
NT&T FIGHT HANGS
Complex voting system delays election outcome

The annual stockholders meeting of National Theatres & Television, held Tuesday (April 11) in Beverly Hills, Calif., came and went with no immediate determination of the major issue, a fight by a pair of dissident minority stockholders, Leonard Davis and Philip Handsman, for seats on the NT&T board of directors (Broadcasting, March 27, April 3).

A cumulative voting system—whereby each stockholder has 12 votes for each share and may vote all for one director or may divide any way he chooses among not more than 12 of the 15 nominees—made a count of the ballots impossible at the time, so the meeting was adjourned until Friday afternoon (April 14).

Balloting followed a stormy session of more than two hours when Mr. Davis and other dissatisfied shareholders called for a change in management and especially for the removal of B. Gerald Cantor as board chairman.

Mr. Davis challenged Mr. Cantor, who resigned as NT&T president only a few weeks ago, to answer questions about NT&T activities in recent years, particularly about the company's costly acquisition of National Telefilm Assoc. Mr. Cantor declined the challenge, explaining he will present his answers in court when stockholders' suits against him and other directors come to trial.

Proxy Fight • Messrs. Davis and Handsman have been waging a proxy battle among NT&T stockholders for some weeks.

A third candidate for a seat on the board, Samuel Kurland, Los Angeles attorney, was nominated from the floor. The official NT&T slate included 12 candidates, one for each of the 12 directors, who serve one year. Among the official nominees were Mr. Cantor, Eugene V. Klein, who succeeded him as NT&T president, and Graham L. Sterling, a partner in the Los Angeles law firm, O'Melveny & Myers. Mr. Sterling served as chairman of the meeting.

In his president's report, Mr. Klein noted that last year's action, which largely separated NT&T from NTA (NT&T still holds 38% of the NTA stock but distributed its other NTA holdings to individual NT&T shareholders), removes the possibility "that NTA would continue to drain your company's earnings." Now "free to concentrate on its basic business: the operation of a chain of motion picture theatres," NT&T in the second quarter of its current fiscal year "moved firmly back into the profit side after a slow first quarter," Mr. Klein reported. Final figures are not yet available, he said, but he estimated that NT&T net earnings will approximate $700,000 for the three months ending March 28, or 25 cents a share, contrasted with the net loss of $1,237,000, or 45 cents a share, for the second quarter a year ago.

CATV PURCHASES • The acquisition of three community antenna systems was announced at the meeting.

Included in the $2 million transaction were the Bluefield TV Cable Co., serving Bluefield, Va., and Bluefield, W. Va.; Durfee's Inc., representing six individual principals in Man and Logan, W. Va., and Perfect Video Inc., serving Hattiesburg, Miss., and Ferriday, La. The systems serve approximately 14,000 tv homes. Broker was Daniels & Assoc., Denver.

Expedition Local' winners announced

KABC-TV Los Angeles and KBTX (TV) Denver took First Awards in the "Expedition: Local" contest among ABC affiliates for the best local program supplementing the network's Expedition (Tue. 7-7:30 p.m.) under the "Doerfler Plan" (Broadcasting, March 21).

With eight runners-up, the two stations were scheduled for honors at a Washington luncheon Saturday (April 15) given by the National Council for Social Studies and the Div. of Travel Service of the National Education Assn. Citations were for "distinguished public service to the schools and community."

The winning shows go onto the network June 20 under the title, Focus on America, as the Expedition summer replacement, running in the two-out-of-three-week pattern.

The NEA and Ralston-Purina Co. sponsored the contest which drew from 611 informational and educational documentary programs produced locally during the season and tying in classwork of more than 8 million students. The local programs were shown every third Tuesday at the Expedition hour.

In addition to Expedition: Los Angeles and Expedition: Colorado, a 17-member jury of educators singled out for honorable mention shows submitted by WABC-TV New York, WBBK (TV) Chicago, KOMO-TV Seattle, WSIX-TV Nashville and KOCO-TV Oklahoma City. Awards of honor went to KGO-TV San Francisco, KTVK (TV) Phoenix and KTVI (TV) St. Louis.

Awards to ABC affiliate managers were presented by Alfred Schneider, vice president for administration of the tv network, and to network-owned station chiefs by Stephen Riddleberger, ABC vice president for owned-and-operated stations.

Film sales

The Adventures of the Sea Hawk, a new series of 26 half-hour films, was offered for local sale last week by Tv Marketeers Inc., New York, which acquired distribution rights from Wemser Inc. Filmed in the Caribbean and starring John Howard, Sea Hawk marks Tv Marketeers' entry into first-run syndication, according to Wynn Nathan, the company's president. Tv Marketeers, which has a New York office at 41 E. 42nd St., has opened offices at 650 N. Bronson, Hollywood (Hollywood 6-3111), under the direction of Ed Simmel, and in Chicago at 612 N. Michigan Ave. (Michigan 2-7727), with John Rohrs in charge.

Sterling finds the gold in old film

CUTTING ROOM EDITORS TURN EXTENSIVE LIBRARY INTO TV SHOWS

Saul J. Turell is a man moving uptown, proving one not only can stay alive but prosper in TV on "old film." The president of Sterling Television Co., New York, has added new lines and is getting the uptown fee of $250,000 for a film special. This is in contrast to 10 years ago when Sterling pioneered the "standby film" market with packages of pay-as-you-go shorts for hungry young stations.

Now Sterling has warehoused the shorts and is putting out more spectacular merchandise: Silents Please, which checked back into ABC-TV last week (Thur., 10:30-11 p.m. EST) with three sponsors, a group of big-tag TV specials co-produced with David (Race for Space) Wolper, a theatre feature, a lucrative educational film division and a string of bread-and-butter TV series.

Six new Wolper-Sterling productions are rolling off the line now. Tidewater Oil (through BBDO) has bought Race for Space, Parts I and II to run on around 50 stations beginning in May. Part I will be the same hour sponsored last year by Shulton on some 100 stations and the new sequel hour is Man Into Space. Schaefer Beer (also through BBDO) has bought two that are still in production, the Rafer Johnson Story and Story of a Baseball Rookie (Willie Davis of the Dodgers), both hours, for network showing in May and June. Hollywood, the Golden Years, an ambitious two-part documentary, is being considered by a network sponsor, but it has not signed yet.

Sterling's Turell
Prosperity with old film

Part I of this runs 60 minutes and Part II 90. The Legend of Rudolph Valentino, 60-minute documentary, goes on for Peter Pan Foundations (through Ben Sackheim Inc.) in 25 markets the week of May 21.

Splices • On his way up, Mr. Turell has become a film cutter and writer. He has also developed an instinct for teaming with individuals like Mr. Wolper and Paul Killiam, co-writer of Silents Please, who has spent his life with old film. Another of the key men is Saul Turell's brother, Norman, who handles a profitable monthly school service, "Screen News Digest," supplying Hearst-Metrotone current events and historical background footage, with businesses underwriting the cost, to boards of education. Another is Broadway producer Jay ("Hatful of Rain") Julian, co-enterpriser with Sterling of a feature, "The Great Chase," being readied now for theatres with shots of silent stars, onrushing locomotives, alligators and other classic shots of the era, now set to music by Larry Adler. This idea was brought in by an ex-CBS producer, Harvey Cort.

Still another satellite in the Sterling system, Brian Decas, alumnus of Goar Mestre's exiled Cuban Broadcast organization, is at work in the Argentine on a television anthology. Mr. Turell started with home distribution in 1946 and worked out in the cutting room in succeeding years when the company moved into television and education. His cutting has produced best-selling educational films, festival prizes and a good many TV series and documentaries. Adventure Theatre, A new package of half-hours, is doing well in this country and Canada, and is a sample of what a cutter can do with good footage from the Library shelf.

Cutting Barrymore, Chaney, Fairbanks and Valentino has been the crowning point for Mr. Turell. He gladly puts in late hours editing them to compete with Gunsmoke and others in the newer screen generation.

Sterling and its partners own thous-

A trend to silent films on television?

The old-time silent films will be sounding louder on TV this spring and summer. In addition to the widely-publicized Silents Please (see story, above), a new series that blends old-time silent footage with newly-produced sequences, Funny Manns, is being syndicated to TV stations by California National Productions Inc., NBC subsidiary. Initial sales on the new "silent" entry are expected to be announced shortly by CNP.

Each episode in Funny Manns runs about eight minutes. The introduction of about one and one-half minutes spotlights actor Cliff Norton as m.c. and star. Mr. Norton will play a different character in each episode, such as Ice Mann, Rich Mann, Repair Mann, Law Mann, Milk Mann, Super Mann (and many more). These characterizations lead in to the silent footage, consisting of old-time films starring such actors as Ben Turpin, Charlie Chase, Oliver Hardy, Andy Clyde, Louise Fazenda, Snub Pollard and a very young Mickey Rooney.

The series is being produced by New Merritt Enterprises in association with California National Productions. New footage is shot at a studio in Greenwich, Conn., and the editing is performed at New Merritt's facilities at 500 Fifth Ave., New York, N. Y. A total of 130 eight-minute episodes are planned, of which 90 already have been produced.

Tv Debut • The series represents New Merritt's initial TV production. The company is headed by E. Roger Muir and Robert (Nick) Nicholson, who serve as producer-director and co-producer of Funny Manns, respectively. Both Mr. Muir and Mr. Nicholson were associated with NBC-TV for many years. Mr. Muir, a 15-year veteran of the network, was executive director of children's programming for NBC-TV when he resigned last October. Mr. Nicholson was a composer-arranger, producer and actor for that network for eight years. He composes original live music for each episode of Funny Manns.

Messrs. Muir and Nicholson point out that Funny Manns is built around a novel concept: the introductory story by Cliff Norton, who is dressed in his occupational uniform or costume of a particular "Mann," creates the atmosphere for the silent footage; it is not the footage that "wags" the introduction.
ands of old movies from the collections of Edison, Biograph, deMille, Griffith and other producers of the era.

Counter Wares - On the syndication side, Sterling some years ago spun off its big free-film distribution arm, Sterling Movies U.S.A., and has since consigned a lot of “downtown” tv packages to the shelves, adding a group of higher mark-up staples. These include 52 Abbott & Costello half-hours (They grossed $480,000 after MCA fees), 150 Chatter the Chimp 3½-minute cartoons (which did $380,000 worth of business in 11 weeks), the American Machine & Foundry bowling shows, 200 Captain Sailor Bird color cartoons of 3½-minutes each (also hot), 78 Adventure Theatre half-hours (sold to CBS in Canada and beginning to move in this country), Time Out For Sports, Crusade in the Pacific, and Movie Museum.

Sterling has been building modestly over the years, as many in the field spiralled from boom to bust. Sterling stock went public in June 1959, offered over the counter at $1. It is hitting around 2 now and creating some interest among investors because of current activity and a potentially favorable profit situation following upon a depreciation record. Earnings in the fiscal year that ends this week are expected to triple those shown in the last annual report.

Still, the president prefers to talk about the cutting and writing side of the business. He thought he had a good chance back when he was invited to speak at a 16 mm seminar in the Midwest. The cinema lost out, however, when they got around to telling Mr. Turell his assigned topic: “How to make Money in Television.”

The writers on Funny Manns are Willie Gilbert and Jack Weinstock, whose credits include Howdy Doody, Dough Re Mi and Space Cadets in tv, and Bob Hope, Jackie Gleason and Jack Carter in comedy.

New Merritt believes Funny Manns is “something different,” and will fit into a station’s schedule as part of an existing children’s program or can be tied together to create a half-hour show. It has been made available for showing in Japan, Italy, France and Germany.

New Merritt hopes to encourage creative talent in all facets of television. Messrs. Nicholson and Muir, as one voice, exclaimed: “There is room for good ideas on television. We promise to listen to everyone. And we promise that everyone will get a fair shake from us.”

Families in the Northern Lower Michigan area covered by WWTV, Cadillac- Traverse City, compose a greater retail sales market than you’ll find in 5 entire states.*

WWTV is the only medium covering this 36-county area. You’d have to use 13 daily newspapers or 16 radio stations to duplicate WWTV’s coverage. WWTV is by all odds the great favorite in this area as proved by its No. 1 position in 433 of 450 quarter hours surveyed, Sunday through Saturday, 8 a.m.-Midnight (NSI, Cadillac- Traverse City—June 6-July 3, 1960).

Add WWTV to your WKZO-TV (Kalamazoo-Grand Rapids) schedule and get all the rest of outstate Michigan worth having. If you want it all, give us a call! *Retail sales in the WWTV area are $809.8 million—more than in N.H., Alaska, Hawaii, Del. or Nev. (Source: SRDS, October 15, 1960)
Court refuses to drop tv quiz perjury cases

A move to dismiss perjury action against 19 tv quiz show contestants was denied last Monday (April 10) by General Sessions Judge Gerald P. Culkin in New York. Criminal informations had been voted against the 19, charging they lied to a grand jury when they denied they received help prior to their appearances on such quiz programs as Twenty-One and Tic Tac Dough.

Judge Culkin claimed the evidence in the grand jury minutes is sufficient for convictions "if presented to the tryers of the facts, unexplained and uncontradicted." The judge said the grand jury's criminal informations were "constituted for a lawful purpose" derived from the Code of Criminal Procedure. The claim that the grand jury had no basis for questioning a contestant is unsubstantiated, he said.

The trials of Charles Van Doren and several others were scheduled in Special Sessions Court last Monday, but were adjourned to May 8. The charges involve misdemeanors, punishable on conviction by a year in jail and a $500 fine.

Another case, the trial of Peter Tripp, WMGM New York personality charged with accepting payola, is scheduled to be heard today (April 17) in New York Special Sessions Court.

North West German tv network splits

North West German Television network (NWRV), split up on April 1. The two broadcasting organizations which had established NWRV, Westdeutscher Rundfunk, Cologne, and Norddeutscher Rundfunk, Hamburg, will continue operations separately. NWRV was originally set up to meet a critical finance and program situation during the first years of tv in Germany. The two organizations now have vast program resources of their own and financing is no longer a problem. Norddeutscher Rundfunk as well as Westdeutscher Rundfunk are continuing to contribute programs to daily hookups by all West German stations. The hookups are often joined by Swiss and Austrian broadcasting services and are sometimes joined by Eurovision member stations in other European countries.

In 1958 NWRV registered an annual income of 30 million deutschmarks (DM), according to a report published recently. Within twelve months the sum increased by about 70% to a record high of 53 million DM (about $13 million). Income is derived from set license fees of 5 DM monthly for tv sets and 2 DM for radios.

Regional programs produced by the NWRV member stations in the 1958-1959 fiscal year cost some 7.5 million DM. Other programs are listed with some 12 million DM, during the same period. Investments in equipment, buildings, etc., amounted to some 3.6 million DM, during the fiscal year. The network had a large cash account not committed. Much of the cash and a large share of current income is invested in additional production and transmitting facilities for broadcasting which is expected to start this summer. According to German reports, there is a considerable lack of program material for coming uhf stations. North and West German broadcasting organizations may combine uhf operations in order to fight the shortage. Westdeutscher Rundfunk is so badly in need of new program ideas that there will be a general competition with prizes for new ideas. The competition will be open to everyone, not just professionals. The method is being attacked from some quarters in Germany but it is generally admitted that some new way must be found for an increased supply of programs.

WRUL offers equipment for UN Latin network

WRUL Scituate, Mass., an international shortwave broadcasting station owned by Metropolitan Broadcasting Co., has offered its transmitters to the UN from 9 a.m. to noon daily for an inter-American tele-communications network.

The offer was made to the United Nations Educational, Scientific & Cultural Organization earlier this month by UNESCO is considering it, Ralf Brent, WRUL president, said last week.

The Latin American UN service would be produced by the UN or the Organization of American States personnel, he said.

Mr. Brent asked the UN to renew its efforts to abolish jamming of international broadcasts as practiced in the Soviet bloc countries. This would establish freedom of the air, and assure freedom of information among peoples, he said. International broadcasting can be used to achieve worldwide literacy and knowledge, he added.

WRUL operates five transmitters and beams daily commercially-sponsored programs to Latin America, western Europe and western Africa from 1:30 p.m. to midnight. Metropolitan bought WRUL from Walter Lemon and associates last year for $1 million.

German advertisers want more commercial tv time

Existing West German broadcasting organizations should combine efforts and set up a jointly operated uhf television network, according to a commentary published by Markenverband e.V., organization of West German brand-name advertisers. The network should be non-profit and public-institution but it should set aside part of its program time for commercial operations. This is, in essence, the type of operation now used by existing stations in West Germany. Funds derived from commercial time sales are being spent for "cultural purposes" outside the broadcast field.

Financing for the uhf network should come, during the first years, from set license fees collected by the stations. Additional funds should be derived from advertising income of future uhf stations. Markenverband says that the demand for commercial tv time has, up
Canadian ad revenue
National advertising on Canadian broadcasting stations totalled over $28 million during the July-December 1960 period. The figures were reported by Elliott-Haynes Ltd., Toronto, Ont., in the Canadian weekly, Marketing. Radio advertising was $9,131,771. TV advertising hit $19,376,039.

Largest national advertising budgets were food and food product companies with $2.6 million in radio and $4.9 million in tv. Drug and toilet good companies were next with $1.4 million in radio and $4.3 million in tv.

to now, been met only at a very low level. More commercial time is needed. Therefore, the coming German uhf network should, right from its start, introduce commercial time segments. If operators of the coming West German uhf network should be unable to handle time sales through its own organization this could be done by companies already active in the field. There are now several contractors in Germany handling time sales for commercial radio and vhf tv time segments. As there are only few minutes of commercial time per day to sell they could easily handle additional accounts in the uhf field.

Abroad in brief...
Far-out East = Grant Adv., which has international headquarters at Chicago, has established "the first and only American-owned advertising office in Kuala Lumpur, Federation of Malaya." Will C. Grant, chairman of the board, said the three-year old nation of Malaya is at the center of an upsurge in Far East business. Accounts of the Kuala Lumpur office are Colgate-Palmolive, British-American Tobacco, Nestles, Standard-Vacuum, Vernet Eastern Agencies, Sissons Paints and other national and local advertisers. Dennis Gore is office manager and H. T. Glaze, manager of Grant's Singapore office, heads operations in Malaya.

New office = Paul, Phelan & Perry Ltd., Toronto, Ont., and Montreal, Que., advertising agency, has opened an office in the Paris Bldg., Winnipeg, Man., with Ken E. McCaskill as manager.

Tv ad requirements = The New Zealand Broadcasting Service, Wellington, N. Z., has issued "Requirements for New Zealand Television," a 15 page brochure which describes in detail all aspects of television requirements in that country. Further information can be obtained by writing to New Zealand Broadcasting Service, Windsor Building, Wellington, N. Z.
FATES & FORTUNES

**BROADCAST ADVERTISING**

Clint On Clark Jr., formerly assistant to president and account executive, Compton Adv., N. Y., joins American Assn. of Advertising Agencies, that city, as senior staff executive. Mr. Clark, who once served with Ewell & Thurber, Toledo, Ohio, will assist Richard L. Scheider, senior vp, in association's membership, region and council and ethical activities.

Edward J. Schulte, vp for sales, Abitibi Corp., Detroit, American subsidiary of Canadian Abitibi Power & Paper Co. Ltd., and board member of parent company, to Wentzel & Fuge, Chicago advertising agency, as executive vp and general manager.

Anthony Azato, formerly assistant to chairman of board of National Telefilm Assoc., appointed vp of Swan & Mason, New York advertising agency.

Richard R. Routh Jr., formerly of Airtemp Div., Chrysler Corp., joins Grant Adv., N. Y., as vp and account supervisor on Airtemp Div.

Storrs J. Case, formerly advertising manager of Sun Oil Co., Philadelphia, has joined Martin R. Kliten Co., Los Angeles agency, as account executive.

Bert Landon, formerly director of pr, International Latex Corp., N. Y., joins Ben Sackheim, that city, heading new pr division.

Cliff Blackburn joins Tracy-Locke Adv., Dallas, as copywriter.

THE MEDIA

Richard C. Shepard named station manager of WGR Buffalo. He replaces William P. Dix, resigned. Mr. Shepard had been general manager of WHAM Rochester, N. Y., and previous to that was director of radio and tv for the Rumrill Co., upper New York State advertising agency.

Maynard R. Ashworth, publisher of Columbus (Ga.) Ledger-Enquirer, elected president, R. W. Page Corp. (parent organization of WRBL-AM-FM-TV, that city). Mr. Ashworth is also secretary and treasurer of Columbus Broadcasting Co., operator of outlet, which is 51% owned by Page Corp.

Henry S. Hovland named vp and general manager of WBEZ Pittsfield, Mass. Mr. Hovland has been New York associate of Paul H. Chapman Co. media brokers, and prior to that was affiliated with WTBO Cumberland, Md.; WKSY Keeney, W. Va.; and WHO-AM-TV Des Moines, Iowa.

William W. Firman, former Eastern sales manager, CBS Radio, named assistant general sales manager, effective May 15. Cornelius V. S. (Neil) Knox, who has been sales manager, CBS Radio, Detroit, succeeds Mr. Firman in eastern division.

Wayne Wilcox, account executive, Detroit, becomes sales manager of that bureau. In other changes, George H. Gallup, New York account executive, moves to Los Angeles as Pacific coast sales manager, and Craig Rogers, who was head of Los Angeles office, assumes similar post on New York staff.

Frank V. Dellett, treasurer for west coast operations, NBC, has resigned.

Robert Keefe, vp of NBC Spot Sales, elected president of Assn. of Broadcasting Executives of Texas. Others elected: vp—Jack Rogers, WBAP-TV Fort Worth; secretary—Dean Hulse, Dallas office of Grant Adv.; treasurer—Cliff Blackmon, advertising manager, First National Bank of Dallas. New board of directors: John Butts, KIXL Dallas; W. C. Woody, WFBA Dallas; Curly Broyles, WBAP-TV; Al Levine, WFAA-TV; Lew Ground, Coachman Adv.; Sheldon Kaplan, Rogers & Smith; Jess Green, Sessions Co.; John Simmons, Dr. Pepper; Dave Rutledge, The Katz Agency; Andy Peranelli, Clarke-Brown; Tim Carroll, TV Guide.

James A. Jordan, formerly commercial manager of KYA San Francisco, to WIND Chicago as account executive. Jerry Udwin, formerly with WRRR Rockford, and WAAP Peoria, both Illinois, to WIND as news reporter.

Franklin H. Small appointed assistant general manager of WAVI Dayton, Ohio. He had been sales manager of WIL St. Louis.

Burke W. Ombsby, program director of KOGO-TV (formerly KSDF-TV) San Diego, Calif., also assumes duties of promotion manager. Tom Battista, floorman in production department, has been promoted to director, with Norman Berg assuming floorman post.
Amvets winners receiving helmets

Winners of top achievement awards of AMVETS seen at 4th annual awards luncheon, held in Washington April 8, 1961, where they received replicas of WW II GI helmets, symbolic of their achievement. From l to r LeRoy Collins, president of NAB who won Americanism award; Leo A. Hoegh, former director of civilian defense who received Defense award; Bob Hope who won Special Silver Helmet for entertaining troops abroad; Sen. Ed Muskie (D) of Maine, the toastmaster; and National Commander Harold Russell of AMVETS. Seated is Dwight Guilfoil of Chicago who won Rehabilitation award. Not pictured is Henry Cabot Lodge who won World Peace award.

George B. Faulder appointed commercial manager of KCUL Fort Worth, Tex.

Lee E. Franks, program director, WUFT (TV) (etv station) Gainesville, Fla., joins National Educational Television & Radio Center, N. Y., as assistant director of station relations. Mr. Franks, who has been program director at WUFT (TV) since 1957, also holds academic rank of assistant professor of communications, School of Journalism Communications, U. of Florida, Gainesville.

Kenneth E. Thomas rejoins Kansas State U. staff as head of department of extension radio and tv, and director of KSAC Manhattan, Kan. Mr. Thomas had been on leave since September 1959, for advanced study at U. of Wisconsin.

Maxwell S. Roth, production director for WSAZ-TV Huntington, W. Va., appointed program director.

Hugh Brown named program director of WDXB Chattanooga, Tenn. Mr. Brown had been previously in similar capacity with WMPS Memphis.

Dick Ward, former air personality, producer and account executive of WNH C New Haven, Conn., named program and production director of WATS Sayre, Pa.

Howard A. (Humpy) Wheeler Jr. appointed publicity director of WBT TV (TV) Charlotte, N. C. He had been serving as promotion copy editor.

Art Knight and Harry West named assistant program directors of WARM Scranton, Pa. Mr. Knight will head production department, while Mr. West will direct news department.

J. Weddell Kerr, advertising manager of WFRO Fremont, Ohio., resigns.

J. Bronson Ross, formerly of Universal Publicizers of Chicago, joins sales staff of WGR Buffalo.

Bob Allard joins news staff of KMSP TV Minneapolis-St. Paul. Paul Sevareid, former newscaster, resigns to devote more time to his pr activities.

Bob Miller, former staff announcer with WBVP Beaver Falls, Pa., to WOHI East Liverpool, Ohio, news staff.

Reed Pellock named to news department of KIDD Monterey, Calif.

John H. Carmon joins news staff of WMAK Nashville.

BROADCASTING, April 17, 1961

Crosley Broadcasting elects three new vps

Crosley Broadcasting Corp. has announced following changes at board of directors meeting held March 30. John B. Babcock, vp-general manager of WLWI (TV) Indianapolis; Walter Bartlett, vp-general manager of WLWC (TV) Columbus; and George J. Gray, vp-general manager WLWD (TV) Dayton, elected vps. Mr. Babcock joined Crosley Broadcasting in 1949 as assistant farm program director of WLW Cincinnati, and was named farm program director in 1952. He served in that position and sales capacities with Avco's new division in 1951 and 1953-54, and in 1955 was appointed director of Crosley's town and country division. He was named assistant general program manager for Crosley in 1956, and appointed general manager of WLWI (TV) Indianapolis, in 1957. Mr. Bartlett was appointed general manager of WLWC (TV) in July 1960 following death of James Leonard. He had returned to station as sales manager in 1958 from Indianapolis Times, where he had been since 1955. He also had been sales executive of station from 1953 to 1955. Mr. Gray became national sales representative of WLWD (TV) in 1954 and following year was named general sales manager of that station. He was named general sales manager of WLW Cincinnati, in 1956 and on May 1, 1957 became general manager of WLWD (TV) Dayton.

Ronald R. Wren appointed manager of advertising and promotion of KGO San Francisco. He previously served as publicist of KGO-AM-TV.

Bobbie Morris, formerly with Videotape Productions, New York, and McCann-Erickson, joins KTTV (TV) Los Angeles in commercial tape productions department as productions assistant.

Jerry Leshner and Irene Kreachbaum to WBBS-TV Columbus, Ohio, as promotion assistant and sales traffic manager, respectively. Mrs. Leshner was previously associated with TV Guide magazine in Cincinnati and Los Angeles, serving as west coast network contact in latter city. Mrs. Kreachbaum, served as traffic manager for WTRF-TV Wheeling, W. Va.

Herbert Mendelsohn, formerly account executive, WINS New York, joins WABC, that city, as sales manager. Mr. Mendelsohn, who was with WINS for five years, also served as sales manager for Hart Publishing Co.

Don Hedges named sales manager of KISN Portland, Ore.

Bob Cox joins KDWB St. Paul, sales department, after almost four years as account executive and air personality with WDGY Minneapolis, both Minnesota.

Marty Hull and Roger Nelson join sales staff of WCAR Detroit.

John W. Almnburg, former market reporter on WGN Chicago, named assistant farm service director for WGN-AM-TV, that city.

William Zollman joins KDSL Perry, Iowa, as farm director.

Bill Jorgensen, formerly KSN San Diego, news director, joins KFWB Los Angeles, news staff.

Wayne Vann, formerly sales manager of KTTP Tucson, to KKIV Phoenix, both Arizona, as news director.

John Paul Huddleston, formerly KSON San Diego, news director, joins KFWB Los Angeles, news staff.

Darla Wood named weather forecaster for KEYC-TV Mankato, Minn.

Buck Matthews, weatherman with WILX-TV Onondaga, to WOOD-TV Grand Rapids, both Michigan, in similar capacity.

Jim Leaming, veteran sportscaster, joins WRCV-TV Philadelphia. He had previously served with WIP, that city.

Robert G. Smith, sports director of WRVA Richmond, Va. resigns to become assistant editor in charge of radio and tv for Florida State Agricultural Extension Service at U. of Florida in Gainesville. Frank Messer, who joined station last December, has been named to replace Mr. Smith. John S. Harmon Jr. joins sports staff.

Video's space authority

Martin Caidin, author of 26 books and more than 1,000 articles on aviation and astronautics, joins WNEW-TV New York, as station's "space age authority." Mr. Caidin will cover space development reports and give daily interpretative commentary on space activities.
Eight newsmen appointed CBS Foundation News Fellows for 1961-62, according to Ralph F. Cofin, president, CBS Foundation Inc., N. Y. Fellowships, which provide year of discussion and study at Columbia U. and average about $8,000 apiece, are designed to increase "understanding of the potentialities of radio and television as media for news pro-

gramming." The winners are Stephen Banker, news writer, WCBS New York; Thomas W. Dorsey, news reporter and editor, WBNS Columbus, Ohio; Morris K. Hepler, as news reporter, editor and producer, WWL-TV New Orleans; Peter M. Herford, news director, KTVA-FM-TV Anchorage, Alaska; David G. Nellis, assistant professor, radio-TV-film department, U. of Miami, Fl.; Thomas B. Petry, production manager, writer, producer, WQED (TV) Pittsburgh; William Seaman, news editor, CBS-TV News, N. Y., and Sanford Socolow, news writer and assistant to executive producer of Eyewitness to History, CBS News, N. Y. Appointments were made last week.

Matt Cooney, formerly staff announcer of WKRE Newport, Vt., to WFGA-TV Jacksonville, Fla., sports staff replacing Warren Croke, who has transferred to news department, that station, as news reporter.

Mike Boyd, formerly of KOMO-TV Seattle, joins WMTW-TV Poland Spring, Me., announcing staff.

Ken Knight named air personality for WMAK Nashville, Tenn. He was previously with WGGH Marion, Ill.

Dan Daniel, air personality on WDGY Minneapolis, resigned April 10 to join Olson/National Importing & Distributing Corp., that city.

John Gee, formerly air personality at WJUD St. Johns, and WJIM Lansing, both Michigan, to staff announcer at WKFM (FM) Chicago.

PROGRAMMING

William F. Wallace, executive vp of International Video Tape Recording & Production, has been elected president, succeeding Robert Brandt, who is also president of Brandt & Co., Los Angeles brokerage firm. Richard M. Rosen- bloom, director of program production for ITV, has been elected vp. Don Pat- ton, sales service manager of CBS-TV productions sales, has joined ITV as coordinator of production sales.

Murray Oken, former western division manager, Trans-Lux Television Corp., transfers to N. Y. as eastern division manager.

Charles Russell named producer on MGM-TV’s new Cain’s Hundred series. Paul Monash, creator of dramatic series is executive producer. David Victor ap- pointed associate producer on new Dr. Kildare series. He will begin imme-

diately, working with executive producer Norman Felton and producer Herbert Hirschman.

wood, as director of tv cartoon series.

Ed Edell, tv actor, has joined Wolper- Sterling Productions, N. Y., and Holly-

wood, as unit manager for Biography of a Rookie and Project: Man in Space. Art Swerdloff, tv director, has been named film editor for Rookie. Mel Shapiro will be in charge of sound effects and special editing on Man in Space.

Howard Browne, veteran writer for magazines and tv, named executive story consultant to 20th Century-Fox Television.

David Bloom, director of Republic Corp’s Hollywood tv service division’s, syndicated sales operations, promoted to general sales manager, that division.

Donald A. Benjamin, formerly as-

sistant to advertising, sales promotion manager, WBZ-TV Boston, joins As-

sociation Films, N. Y., as assistant ad-

vertising and promotion director.

EQUIPMENT & ENGINEERING

Grayson Merrill elected to new corporate post of vp-electronics of Harris-In-

tertainty, Cleveland. Mr. Merrill, who will have corporate re-

sponsibility for company’s two electronics divisions, PDR Elec-

tronics, Brooklyn, and Gates Radio, Quincy, III., producers of microwave and broadcasting equipment respective-

ly, resigned as general manager of Ast-

tronics (space electronics) Division of Fairchild Engine & Airplane Corp., N. Y.

Arthur J. Seiler, president, Alloy Sur-

faces Co., Wilmington, Del., elected vp and director of Reeves Soundcraft Corp., Danbury, Conn., which recently acquired Alloy Surfaces.

Herbert J. Hannam named to newly

MUSIC THAT MAKES MONEY

It’s taped “motivational” background music by Magne-Tronics—for station transmission to restaurants . . . supermarkets . . . hotels . . . industrial plants . . . offices . . . etc.

This valuable, income-producing asset fits ideally into station operations—in markets large and small. Perfected for FM Multiplexing and/or wired line transmission.

Exclusive franchises still available. Send for details.

Magne-Tronics, inc.
created post of manager of indicator and pick-up device engineering, General Electric Co., Syracuse, N. Y.

John A. Larson, advertising manager of consumer products division of Ampex Audio Co., to Vega Electronics Corp., Cupertino, Calif., in similar capacity.

George B. Voorhis Jr. appointed general sales manager of Prodelin Inc., Kearny, N. J., leading designers and manufacturers of antennas and transmission line systems. Mr. Voorhis was promoted to new position from that of New York-New England area district sales manager.

George F. Hourroyd, formerly plant manager of Photo-Video Electronics, Cedar Grove, N. J., elected vp-manufacturing.

ALLIED FIELDS

James G. Paltridge, founder-manager of KFAX San Francisco, appointed statewide coordinator of educational TV for U. of California. He succeeds E. G. Sherburne Jr., who joined staff of American Assn. for Advancement of Science in Washington, D. C.

William S. Green appointed junior partner in Pierson, Ball & Dowd, Washington communications law firm. Mr. Green, who joined firm in 1953, is graduate of Yale law school. Ralph L. Walker retires from active practice of law, and Peter D. O'Connell, John McD. Corn and Robert A. Levetown join firm. Messrs. O'Connell and Corn are graduates of U. of Georgetown law school, while Mr. Levetown graduated from Yale. Mr. Corn was in private practice in Columbus, Ohio, for five years before joining Washington firm.

Leo Kover, publicist at KTLA (TV) Los Angeles and reporter for Broadcasting and other trade papers, joins public information staff of Tuberculosis & Health Assn. of Los Angeles County as radio-tv associate.

INTERNATIONAL

Lloyd Wright appointed creative commercial supervisor of CFPL London, Ont.

Mel Watson, formerly of KVOS-TV Bellingham, Wash., to senior sales representative of English TV network of CBC at Toronto.

Richard A. Cutler, Canadian representative of Romper Room Inc., and before that with CKKB and CKVR-TV Barrie, Ont., to Ontario and Atlantic provinces sales representative of Screen Gems (Canada) Ltd., Toronto.

William Lowry named sales manager of CBLT (TV) Toronto. George Sprachlin, formerly of CHCH Hamilton, Ont., to sales representative of CBLT (TV) Toronto.

DEATHS

Paul Walker Long Sr., 64, former owner of WSAZ-AM-TV Huntington, W. Va., and former president and board chairman of Huntington Publishing Co., died April 9, in Huntington.

John E. O'Neil, founder-president of KJEO (TV) Fresno, Calif., died of heart attack April 10 in Palm Springs. Sale of KJEO to Shasta Telecasting Corp., Redding, Calif., for $3 million is highest price ever paid for uhf station. Sale has been pending FCC approval for two months. Mr. O'Neill also held permit for KTRB-TV Westwood, Calif., which never went on air.

William S. Cherry Jr., 56, chairman of board of Cherry Broadcasting Co. (WDBO-AM-FM-TV) Orlando, died April 13, at Miami Beach. Mr. Cherry was president and principal stockholder of WNEW New York from February, 1950 to April, 1954. He formed Cherry & Webb Broadcasting Co. in Providence, R. I., in 1931. Company owned and operated WPRO-AM-FM-TV, that city, before selling to Capital Cities Broadcasting Corp. in April, 1959. He also was principal in Cherry & Webb Co. operating retail stores in five New England states.

Bertram O. Wissman, 50, one-time chief clerk of Senate Commerce Committee and acknowledged author of 1956 report by Sen. John W. Bricker (R-Ohio) on "The Network Monopoly," died of lung cancer last week in Washington. Mr. Wissman, former newspaper reporter and pr specialist, served as chief clerk of Senate committee from 1953 to 1955, and as assistant clerk from 1955 to 1959. He also was member of professional staff of Senate Republican Policy Committee.
ABC-TV stars and cherry blossoms in D.C.

Washington, D.C., had almost as many ABC-TV stars as cherry blossoms during its annual Cherry Blossom Festival. On hand, through efforts of WMAL-TV, were six stars from five ABC-TV shows. Dick Clark of American Bandstand was grand marshal of the festival's parade. Also in the parade were Horace McMahon and Paul Burke of Naked City; Connie Stevens of Hawaiian Eye; Louis Quinn of 77 Sunset Strip; and Gardner McKay of Adventures in Paradise (shown above with the festival's queen during her coronation).

RAB's furniture kit

Radio Advertising Bureau, New York, has prepared new selling tools for member stations to help move more of the nation's 29,000 furniture dealers into local radio advertising. The $5 billion retail furniture industry is already ranked by RAB as a leading product category in radio spending, but a drive is underway to swell the amount.

The new RAB effort includes advice on how to write "exciting, hard-selling" radio commercial copy for a visual product—furniture. RAB's station kits also contain a new service called "Radio Copy Calendar for Furniture," which offers a running month-by-month analysis of selling and marketing trends in the furniture industry.

KEWB to the rescue

When a San Francisco night club was raided because it permitted minors to sit in a roped-off area and listen to jazz, KEWB, that city, came to the rescue. The station, in cooperation with a local hi-fi show, arranged for Dixieland classicist Muggsy Spanier to play a free concert at the Cow Palace, and offered free tickets in a two-day promotion. Over 2,200 requests were filled. Result: many new teenage friends for KEWB.

WQXR's silver anniversary

WQXR-AM-FM New York is inviting listeners to participate in its 25th anniversary celebration via a write-in contest offering $281 prizes valued at $12,185. Contestants are asked to tell, in 50 words or less, why they enjoy listening to the station which features classical music. First prize is an all-expense-paid three-week trip by air for two to four European music centers—London, Vienna, Paris and Milan. Other prizes include stereophonic and high fidelity equipment, season tickets to the New York Philharmonic concerts and the Metropolitan Opera, radios, and record albums. The New York Times owned and operated station is promoting the contest with large-size ads in three New York newspapers and with daily on-the-air announcements. The contest began last week and runs through May 25.

Texas-style April Fool

KONO San Antonio staged an April Fool's promotion causing much furor and many-a-Texan to reach for his six gun. Quite simply, KONO used the shock treatment—on-the-air firing of seven personalities by Jack Roth, KONO's general manager.

Almost every hour during the broadcast day, a KONO personality got the axe, to the wrath of countless listeners who wrote, called and threatened Mr. Roth with everything imaginable—even lynching. To add to the confusion, similar chaos was taking place at KNUI Houston. Needless to say, the two stations had pre-arranged an exchange of personnel which added to the confusion.

When the wild weekend had passed and normalcy was restored, KONO reported that all was well and good; and strangely enough that the promotion had been a success.

KEWB's bill paying service

Los Angeles citizens with unpaid gas, water, electric, telephone or other household bills are finding a chance for partial relief. All they have to do is send a postcard to Bill Ballance, KEWB Hollywood, with their name, address and phone number, plus the kind and amount of the bill they want paid. Each morning, starting May 1 on his 6-9 a.m. show, Mr. Ballance will dip into his hat and pull out a number of cards from people who "prefer to bill Ballance." According to KEWB, "He will pay those bills." The new gimmick was announced at a news conference held in the vault of the Bank of America's Hollywood branch, where newsmen received boutonnieres whose cores were dollar bills and participated in a demonstration in which a few lucky ones had their own bills paid.

Put radio on the map

KFBB Great Falls, Montana, literally is trying to put radio on the map in that state. Feeling that the importance of radio to the motorist virtually is limitless, KFBB thinks that call letters and location of each of the state's radio stations should be included on all future highway maps and road signs. And it has made the pitch editorially.

So far, nothing has resulted but KFBB is making many friends in Mon-
Fred Flintstone’s personal appearance tour

WBKB (TV) Chicago viewers can be excused for any hallucinations suffered last week by the sight of a life-sized version of Fred Flintstone. He really was there.

A promotional gimmick devised by Screen Gems for its popular The Flintstones (ABC-TV, 8:30-9:00 p.m., NYT), the life-sized Fred Flintstone made his television premiere on the Marty Faye Show where he was interviewed. Later he visited other WBKB kiddie shows.

Technical details: Fred weighs 300 pounds, stands five-feet high, wears a genuine synthetic bearskin jacket, moves his arms and mouth and is internally equipped with motors and a tape recorder. Now he’s off on a personal appearance tour—rather he’s being shipped in his crate to another ABC affiliate.

tana’s broadcast industry and is even getting some to join its bandwagon.

Miami’s ‘Heartbeat Hop’

Four radio and three television stations in Miami last month joined hands to promote their second annual “Heartbeat Hop.” A number of recording artists joined in the affair which produced $2,700 for the greater Miami Heart Assn. Stations participating were WQAM, WCKR, WINZ, WAME, WTVJ (TV), WCKT (TV) and WPST-TV.

Drumbeats...

KGO-TV sales pitch • KGO-TV San Francisco is making what it describes as an unusual sales pitch to east coast agencies. Russ Coughlan, the station’s sales manager, is passing out “San Franciscos—My Enchanted City,” long playing record albums in hopes of winning new advertisers for KGO-TV and new friends for the city. The records were made possible by the San Francisco Chamber of Commerce which usually presents them to visiting dignitaries.

Egg hunt • Nearly 3,000 Manchester, N. H., residents spent their Easter Sunday morning searching the streets, parks and alleys of the city for WKBR Easter Eggs in the station’s third annual hunt. Equipped with portable radio’s, they tracked down clues broadcast by WKBR, indicating the location of 21 plastic Easter Eggs the station had hidden. Prizes provided by station sponsors included clothing, shoes, free dry cleaning, a transistor radio and $50 donated by WKBR. In addition, each egg contained a silver dollar.

Fm campaign • Blazing yellow-and-black bumper strips shouting “Vote YES on FM”—30,000 of them—were given to visitors at the Los Angeles Hi-Fi Show (April 9) to kick off a major promotion campaign sponsored by the Fm Broadcasting Assn. of Southern California, which calls for the distribution of hundreds of thousands of the bumper banners, offered free via announcements by all fm stations in the area, and the awarding of $10,000 worth of prizes (fm and hi-fi sets and equipment) to motorists selected at random. The only requirement is that the winner have an fm banner on his rear bumper.

Redhead promotion • KABC Los Angeles has a weak spot for redheads—thus SCAPR (Society for the Care and Preservation of Redheads). In announcing the founding of the organization, Red (naturally) McIlvaine, its president, a d.j. on KABC, said membership cards will be issued to all redheads who write in. There are no dues or fees. A drive is on to bolster the roster with such renowned redheads as Red Skelton, Red Buttons, Red Grange, Red Barbour and others.

Big pitch • Arcade Adv. Agency Chattanooga, bought a movie show on WTVC (TV) Chattanooga earlier this month to tell about advertising and itself. The agency used seven commercials to introduce clients and show operations at home and in two Florida branches. Gaines P. Campbell Jr., president of Arcade, explained, “We don’t expect to be bombarded with business immediately but know that recall factors of such a performance will greatly aid in future presentations and client proposals.” Pat Bradley, Arcade vice president, appeared live and on film, showing a typical agency day in scenes shot at slow speed and projected at normal. Arcade has some 30 clients, including oil, bread, clothes, boat, insurance and cola companies.

Caption kit • ABC-TV’s sales development department has included in its presentation for Silents Please a do-it-yourself caption kit consisting of stills from the dramas and comedies represented in the series. Extra promotional mileage is expected to be gained from individuals who post on office walls their own interpretations of the movie scenes. The series of specially edited half-hour films of silent screen classics returned to the network on March 23 (Thur., 10:30-11 p.m. EST).

Good reviews • WNTA-TV New York-Newark, N. J., sited more than 500 reviews of The Play of the Week production of “The Iceman Cometh” done! parts last November. The winner, a graduate student at Columbia U., New York, competed with other
college students to write "the most interesting review" of the televised play for a $500 prize. A second prize of $100 was awarded and three other contestants got original Play of the Week cartoon art. Judges were Ted Cott, executive vice president of WNTA-TV; Joe Liss, script editor for the Play, and Henry S. White, vice president of WNTA-TV.

D.j. spins at walkout - Unaware of a plot to keep him on the air until listeners pledged $1,000 to the Easter Seal campaign, Ron Roberts, d.j. at WOLF Syracuse, N.Y., started his regular announcing shift at 6 p.m., April 3. His relief man did not appear as scheduled at 7 p.m., nor did other personalities show up for assigned duty at midnight and at 6 a.m. the following day. Finally, at 7:15 a.m., one of the d.j.'s called to inform Mr. Roberts that he would not be released from duty until listeners had put up $1,000 “bail.” Continuing without sleep, Mr. Roberts won his "parole" at 7:21 p.m., April 4, and the Easter Seal fund was $1,052 richer.

Big sweepstakes - WNDU-TV South Bend, Ind., conducted a sweepstakes contest from which 53,000 entries were received, described by the station as overwhelming. So great was the promotion that WNDU-TV was short-staffed—and of all things couldn’t find a barrel large enough to hold all the entries. But in the end happiness prevailed. The winner, a South Bend woman, received an all-expenses paid trip to Europe while 50 others received smaller prizes.

Mad money - Portland, Me., citizens recently spent mad money like mad at the WGAM Mad Money KARNIVAL and AUCtion. During February and March the station distributed over $2 million in play money to its listeners through Portland merchants, and on April 5, 15,000 people won stuffed animals, canes, dolls and Hawaiian leis at the KARNIVAL—all without spending a cent of real money.

Pirate of the week - KDKA Pittsburgh, which broadcasts the games of the World Champion Pirates, has engaged a number of the ball players in a Pirate of the Week promotion. Listeners are asked to identify the Pirate (from short rhymes actually spoken by the player) and write a 25-word statement why they would like to spend a weekend at the Pittsburgh-Hilton Hotel—the prize (along with four Pirate ball game tickets).

from 1310 kc, 1 kw, D, to 860 kc, 1 kw, D, but that application and Cosmopolitan ap-
lications were dismissed at applicant's re-
quest, on request held in default, in default, and, Belen application would cause no interference to KOA. Action April 12.

By memorandum opinion and order, commission on Jan. 27 petition by Frederick County Beers, for review of hearing on initial application under section 311 (b) of its petition to amend application for new station in Martinsburg, Va., to 1690 kc, D, to reduce requested power from 1 kw to 500 kw, filed Feb. 24, 1961, dismissed Frederick's Feb. 25 petition for review of ex-
aminer's denial of its conditional request for increase daytime power from 350 w to 1 kw, continued operation on 1490 kc, 250 w-N, each conditioned to accepting such inter-
fERENCE may be imposed by another exist-
ing class IV stations in event they are subsequently authorized to increase power to 1 kw. Action April 7.

OTHER ACTIONS

By memorandum opinion and order, commission granted extension of authority to Triangle Publications Inc. to continue temporary operation of station XFRP-TV Fresno, Calif., simultaneously on chs. 30 and 30-1 on June 1, but denied its request for 90-day extension; granted related petition by KEMI-TV (ch. 26) Phoenix to extend li-
dicated. Conn. Craven not participating. Commission stated that "such further lim-
ited use of ch. 12 should not have a sig-
nificant adverse effect on delinterference of Fresno or on the Fresno lift stations, and should give Triangle ample time to accom-
plish the purposes upon which its original request was based." Action April 12.

WGMN Hollywood, Fla.—Designated for hearing application for renewal of license upon issues to determine (1) extent to which DA; KDST, St. Louis, Mo., was involved in preparation or production of programming and whether applicant, Melody Music Inc. possesses requisite qualifications to be licensee; and (3) whether present conditions serve public interest, convenience and necessity. Conn. Craven and Craven disdissed. Action April 12.

WGRY Gary, Ind.: KSUM Fairmont, Minn., and WGRY Dubuque, Iowa, Grant petitions in part of Ch. Lincoln, I11.; WCNM Nellisville, Wis.—Designated for consolidated hearing applications for change of operation on 1370 kc—WGRY and WGRY-TV, increase power from 600 kw, D, to 3 kw, D; KSUM to increase daytime power from 1 kw to 5 kw, continued operation with 1 kw-N. April 6; KSUM to increase daytime power from 1 kw to 5 kw, con-
minated by KMJ-TV (ch. 12) increase power from 1 kw to 5 kw, continued operation with 1 kw-N, plus "January 1, 1961, McConnell, Conn. Craven and Craven disdissed. Action April 12.

WGRY Gary, Ind.: KSUM Fairmont, Minn., and WGRY Dubuque, Iowa, Grant petitions in part of Ch. Lincoln, I11.; WCNM Nellisville, Wis.—Designated for consolidated hearing applications for change of operation on 1370 kc—WGRY and WGRY-TV, increase power from 600 kw, D, to 3 kw, D; KSUM to increase daytime power from 1 kw to 5 kw, continued operation with 1 kw-N. April 6; KSUM to increase daytime power from 1 kw to 5 kw, con-
minated by KMJ-TV (ch. 12) increase power from 1 kw to 5 kw, continued operation with 1 kw-N, plus "January 1, 1961, McConnell, Conn. Craven and Craven disdissed. Action April 12.

138 (FOR THE RECORD)

BROADCASTING, April 17, 1961

1 There are, in addition, 10 tv stations which are no longer on the air, but retain their licenses.
large and modify issues in proceeding on its application for renewal of license and for reconsideration. Action April 11.

- Granted petition by First Presbyterian Church of Seattle, Wash., and extended to May 22 for reconsideration of application in proceeding on its application for renewal of license for KQWC and KQWG, both of Washington State U., for renewal of license for KQWG, and for revocation of license of KWSC Pullman, Wash. Action April 11.

- Granted petition by Broadcast Bureau and extended to April 30 time to respond to petition by KWW Radio Inc. for reconsideration of revised agenda of order released Feb. 27 which denied request for delay of prehearing conference in proceeding on revocation of license for KWW St. Louis, Mo. Action April 2.

- Granted petition by Broadcast Bureau and extended to April 30 time to respond to joint petition of WGC Bakersfield, Calif. and Sapulpa Bestg. Corp., Sapulpa, Okla. for review of order refusing to open record; petition by M. W. Cooper, Midwest City, Okla., for review of hearing examiner's order and petition to accept late filing; and exceptions to initial decision in proceeding on their am applications. Action April 11.

By Chief Hearing Examiner
James D. Cunningham

- Continued April 8 prehearing conference on new dates to be specified by presiding hearing examiner in matter of mod. of license of KERO-TV (ch. 10), Bakersfield, Calif. Action April 3.

- Granted joint petition by Radio and WAKP Inc. for approval of agreement wherein the latter would pay Radio $3,000 for partial reimbursement of expenses for connection with latter's application for new am station to operate on 1360 kHz in DM, D.A., in Hamptomton, N. J., in return for its withdrawal; dismissed Radio application with prejudice; granted application of WAKP Inc. to increase daytime power of WAKP Allenport, Pa., from 1 kw to 5 kw, with D.A.-2, continued operation on 1320 kc, 1 kw-N, and terminated proceeding. Action April 1.

- Granted joint petition by Four States Bestg. Co. and Regional Bestg. Co. applicants for new am stations to operate on 1410 kc, in Halfway, Mo. to waive of sec. 1318 (a) of rules and for amendment to modify their interests so that Regional would continue prosecution of its application and Four States would acquire 17.78% stock interest of Regional; dismissed application of Four States with prejudice, but permitted execution of merger agreement and amended Regional application accordingly; retained in hearing status Regional application. Action April 4.

- Granted petition by High-Fidelity Disc Bros. for dismissal of its application for new am station to operate on 1400 kc, 100 w. U., in Royston, Pa., heretofore dismissed application with prejudice and terminated proceeding. Action April 7.

- Granted petition by Wireline Radio Inc. and applicants to withdraw filed appeal in proceeding on its application for renewal of license of WITT Lewisburg, Pa. Action April 7.

- Continued April 12 prehearing conference on new date to be specified by presiding hearing examiner in proceeding on am stations for Col. and Ku. Action April 12.

- By Hearing Examiner Elizabeth C. Smith

(FOR THE RECORD) 145
How to fly 625 miles an hour at 30,000 feet... (without leaving the ground!)

You're looking at an Air France Boeing 707 flight simulator—an electronic "plane" which never leaves the ground. This amazing device is invaluable in training Air France jet crews to meet the precise, exacting demands of actual flights...and it's also a required test in the refresher courses taken every 6 months by even our 6,000,000-mile jet pilots!

During a simulator "flight," every imaginable flying condition can be reproduced—and the entire operation, including crew reactions, registered on tape for study and criticism. This is another part of the uncompromising continuous training program that makes Air France jet pilots and crews master airmen...and keeps them that way. It underlines the progressive Air France standards that have made it the world's largest airline, with a forty-two year record of flying experience and service. Write to Air France, P.O. Box 113, New York 10, New York, for a 50-page illustrated booklet, "Air France, World's Largest Airline."
OUR RESPECTS to Peter Ward Allport, president, ANA

A gradual but steady climb to the top

Peter W. Allport is a young “old hand” at functions of the Assn. of National Advertisers. But the ANA spring meeting that opened in Washington yesterday (April 16) holds special significance for him. It is the first full-scale meeting at which he is functioning as ANA president.

Though only 40, Mr. Allport has spent more than 15 years with ANA in a series of progressively more important posts. He was elected president of the association last November. He is optimistic that the advertising business can work out approaches that can ameliorate—if not solve—the problems that beset it.

Mr. Allport is a tall, youthful-looking man who speaks slowly and deliberately in a deep voice. He is not at all the stereotype of the association executive, who is a “back-slapper” and a “half-fellow-well-met.” To the casual visitor in fact, he seems retiring.

This impression was confirmed by an advertising executive, who has worked with Mr. Allport for a long time in connection with ANA activities. He offered this evaluation:

“You know, Pete is kind of shy, but this is part of his attractive personality. I think the reason he has been successful is that he is most thorough and most diligent. He’s extremely intelligent and articulate. What we need at ANA is a person who can get things done—not the ‘back-slapper.’ And what’s important about Pete, too, is that he has flexibility. He’s able to get along well with people in the many different facets of the advertising business.”

GETS JOB DONE = His associates at ANA have high regard for his skills, too. He selects his aides carefully and, with a minimum of supervision, permits them “to get the job done,” a colleague commented.

Peter Ward Allport was born in Vienna on July 28, 1920. He comes from a family of career diplomats. His late father, F. W. Allport, served abroad for many years with the State Dept., and later was European representative for the American motion picture industry. His mother, Mrs. Mildred Allport, returned recently from a tour of duty in Germany and Switzerland, and is now working for the government in Washington.

Mr. Allport received his early education on the continent but came to the U. S. in 1937 for college. He attended Brown U., where he received his B.A. degree in English in 1941.

Young Allport had set his sights on a publishing career. But since he had been a member of the Navy ROTC at Brown and there was a war on in Europe, he accepted a commission as an ensign. He served aboard an aircraft carrier in the Pacific and was released from service in 1944.

“I was undecided about where to start in publishing, thinking about either the editorial or advertising side,” Mr. Allport recalls. “I talked to Howard Williams, president of the then Erwin Wasey advertising agency in New York, and he offered me a job in the agency’s traffic department.”

He accepted the post and remained there for about a year. In 1945, he moved on to ANA, starting as editor of the association’s newsletter.

At ANA his climb was gradual but steady. In 1949, he was promoted to director of press relations and in 1951 he was elected secretary of ANA. His administrative skill and his capacity for hard and earnest work caught the eye of Paul West, then ANA president.

Mr. West, who was known as an executive who liked to delegate responsibility and authority, kept expanding Mr. Allport’s business “reach.” In 1955, he was designated assistant to the president and in 1958 was named vice president with administrative responsibilities for many phases of the association’s operations, including public relations and government relations. Mr. Allport was named executive vice president on May 18, 1960, following Mr. West’s death.

Last November he was elected president, assuming the post that Mr. West had held for more than 25 years.

In addition to these duties, Mr. Allport, as a member of the ANA staff, has served at various times as secretary of the association’s standing committees—public relations, business-sponsored films and broadcast advertising. He also has been secretary of the joint ANA-AAAAA committee on “Public Understanding of our Economic System.”

REPRESENTS MOST BILLING = As the chief executive officer of ANA, Mr. Allport administers an operation that has a headquarters personnel of 38 and a budget that is upwards of $500,000 annually. ANA is 50 years old and was originally called the Assn. of Advertising Managers. Today it represents more than 675 companies that use advertising. ANA members probably account for more than three-fourths of all U.S. billing for national advertising.

As an industry-wide organization, ANA is involved in various projects that affect advertising generally. But one effort of particular importance to broadcasters is the joint ANA-AAA’s “Interchange Program,” designed to upgrade taste in both radio-tv commercials and advertisements in the print media.

A group of 20 executives, divided evenly between the two groups, evaluate commercials or advertisements sent to them. If the committee deems any one of them in “poor taste,” a copy of the group’s report is sent to the offending advertiser.

Mr. Allport believes that this effort is a step in the “right direction,” and reports “excellent cooperation from advertisers.” He points out: “We think this program is an effective demonstration of self-regulation. We don’t try to police. We know that advertisers do not deliberately try to offend.”

Mr. Allport is on the board of directors of the Advertising Council, the Brand Names Foundation and the Advertising Research Foundation and is a member of the Advertising Club of New York. On the social side, he belongs to the American Yacht Club in Rye, N.Y.

In 1947 Mr. Allport married the former Margaret Hahn Nichols. They live in Bronxville, N.Y., with their eight-year-old son, George.

When he was a boy in Europe, Mr. Allport used to enjoy horseback riding, golf and tennis. But today the demands of his job have forced him to give up these pastimes. He relaxes with his family by “sailing” and “keeping my boat in condition.”

ANA’s Allport A young ‘old-hand’

BROADCASTING, April 17, 1961

147
Product protection

THE three-day program conference held under auspices of the Westinghouse Broadcasting Co. last week pointed out a serious weakness in broadcasting’s internal affairs—the lack of a regular exchange of ideas, goals and methods in radio and television programming.

Except for the annual conferences that Westinghouse has conducted in recent years, there have been few chances for the people who turn out broadcasting’s basic product to meet under laboratory conditions and communicate with one another with the help of specialists in many areas of world affairs.

We are opposed to the proliferation of meetings in a profession already wasting a good deal of its time in a welter of them. But the type of meeting that Westinghouse conducted last week is a type that needs expansion and wider participation than a single broadcasting company can arrange. It is the sort of project that needs the sponsorship of an industry-wide association.

The new president of the NAB has expressed a vigorous interest in programming. We suggest he could do worse than look to the Westinghouse type of laboratory as a model for a project of NAB’s own.

Nightmare

THERE is no longer any doubt about the regulatory concepts of the FCC under the New Frontier. Chairman Newton N. Minow and his majority of one or two intend to throw thebook atwayward broadcasters.

The book can be all things to any FCC majority. It incorporates not only the basic Communications Act but the volumes of regulations and court decisions that have been amassed after 34 years of regulation beginning in 1927 with the Federal Radio Commission.

The FCC, it seems obvious, is determined to set up a few horrible examples, perhaps one in each main category of controversy. Then it would expect all other licensees, thus having been coerced, to hew to whatever lines it might establish as proper. Perish the thought that it would deign to censor. There are other ways of accomplishing the same result. Promise versus performance, for example. The station does not exist that could live up to the precise mathematical breakdown of its programming promised three years earlier.

Now we doubtless will be charged with gross exaggeration. We will be set upon as hidebound and desirous of freezing the status quo. There will be the allegation that we are the apologists for the fat-cats.

We do admit to the belief that the public interest means in the interest of the public. We know of no overwhelming complaint from the public about the programming service provided by the vast majority of stations, whether radio or tv. The contrary is true.

This is not to exculpate those in broadcasting who have been taking the top dollar out of their operations or who have speculated in station properties by weaving in and out of the station ownerships. The high price of stations in the marketplace, rather than purported low quality of programming, has been the root of the present regulatory troubles. The FCC sees the balance sheets of all stations. It knows the ratio of profits to investments and overheads. But the annual financial statements do not reflect what given stations might have done if they had not been prudently managed or programmed.

On Wednesday, May 9, the FCC, en banc, will appear at the NAB convention in Washington for the traditional annual panel discussion. On the preceding day, Chairman Minow will make his first full dress appearance before a broadcasters’ group. A few days earlier—on May 1—final comments are due on the FCC’s proposed new program report forms, the most direct threat of program control since the infamous Blue Book venture of 1946.

Broadcasters then will have the opportunity to learn, at first hand, just where the FCC, and each individual member of it stands. They have only to ask the questions that will elicit the answers. And by their questions, they will also afford the FCC the opportunity to appraise their licensees and learn that the vast majority are highly intelligent, public-spirited businessmen and not rug merchants or erstwhile cloak-and-suiters interested solely in a fast buck.

Florida: from boom to boom

FOR 20 years Floridians have been industriously disproving the gloomy prophecies of an inevitable “bust” to follow the state’s perpetual “boom.”

And at no time in that period have things looked more favorable for Florida’s future than today, as the extensive story in this issue plainly shows. A solid bottom of growing industries has added dollars to the always-substantial totals contributed to the state’s economy by tourists and citrus/truck growers.

The story is the same everywhere. In the north new industry, military bases and agricultural development work hand in hand to enrich the area. The west has profited by the intense competition between Tampa and St. Petersburg, with factories building in both metropolitan areas. Central Florida is getting wealthy from its groves, its many tourist attractions and the military emplacements headed by Canaveral. Miami, the state’s biggest market, centers the rich area circled by ever-increasing golden rings which now reach to Ft. Lauderdale and beyond.

Critics say the state is too hot in summer, is hurricane-prone and suffers from bad roads. Boosters answer effectively with statistics on increasing bank deposits, personal income and percentage gains in retail sales.

Yes, Florida is continuing to prove its importance among national markets, and advertisers, attracted by per-capita spending and high population gains, don’t have to look far for their best promotion medium. Both radio and television offer blanket coverage of every market at a fraction of the cost of any competitor.
Good sight on a dark night
Well, we decided one thing, anyhow:
we include Huntington-Charleston and WSAZ-TV.

MORE AND MORE sales and advertising managers are putting the HUNTINGTON-CHARLESTON market on their must-buy lists. Reasoning: This Dynamic Circle pulls together 72 counties in 4 states, an area of concentrated industrial might in the heart of the "American Ruhr" region of the great Ohio Valley. The two million industrious people who live here earn $4 billion in annual payrolls. WSAZ-TV is the only single advertising medium that covers the nearly 500,000 TV homes in the area. For this market was created by WSAZ-TV's power and programming. Your Katz Agency man will be glad to tell you more.
