COMPLETE INDEX PAGE 7
WSB-TV is proud to be ONE of the three!

Forty of the nation’s finest television stations entered the 14th annual competition of the Radio Television News Directors Association. Three awards were made: WDSU-TV, New Orleans, for “On-the-Spot Reporting”; WNBC-TV, New York, for “Community Affairs”; and WSB-TV, Atlanta, for “Editorializing.” All three were recognized for distinguished achievement in broadcast journalism. The award made to WSB-TV was based on a program produced last year, “Desegregation: New Orleans.” This was one of a series of programs that, over a period of a year, helped pave the way to peaceful integration of public schools in Atlanta. This type of programming is traditional at WSB-TV.
ANOTHER IMPORTANT FACET IN THE QUALITY TOUCH

Weather is BIG in Texas, and with WFAA-TV it's big business. So big, in fact, WFAA-TV maintains a fulltime meteorologist, Dale Milford. He is also the only TV weatherman in the area meriting the seal of approval of the AMERICAN METEOROLOGICAL SOCIETY! Milford's vast array of equipment includes two long-line weather teletypes, and a continuous motion map-producing facsimile recorder directly connected to the U.S. Weather Bureau in Washington, D. C., a system which is the backbone of all official weather bureau forecasting. His home is also a fully equipped weather station, giving WFAA-TV viewers an accurate account of changing weather regardless of the hour.

Naturally, there is a long waiting list for sponsors. But WFAA-TV does have other equally strong time slots, and your PETRY-MAN is kept informed daily. Why not call him and put this “quality touch” to work for you?
Federal Communications Commissioners July 10, 1934 to May 8, 1961

Reprinted by request - WGAL-TV - Lancaster, Pennsylvania
Double whammy

Team-work between Federal Trade Commission and FCC takes on new aspect this week with scheduled release of notice to all licensees that advertising adjudged false or improper by FTC is taboo on air. With FCC notice will be first synopsis of FTC accounting of advertising in all media about which questions have been raised (CLOSED CIRCUIT, Oct. 30).

FCC will issue periodic reports listing questioned advertisements. FCC letter will urge stations to heed lists and re-evaluate policies. No threat of revocation is made, it's understood, but FCC underscores necessity of accounting at time of renewal.

Swing to half hours?

It's only "felt" and not pinpointed, but highly placed network and agency executives cite renewed interest of advertisers in identifying themselves with regular half-hour tv sponsorships. If swing develops next season, it's sure to knock props from under proponents of spot rotation ("magazine concept"). Several agency-produced pilots have been offered at NBC-TV looking toward 1962-63 placement.

Government control quiz

"Do you believe the federal government should have control of tv and radio programs?" That question is one of 19 covering wide range of topics included in questionnaire sent by Rep. Wm. H. Avery (R-Kan.) to some 100,000 constituents. While Rep. Avery, now member of powerful Rules Committee and former member of Commerce Committee, which handles broadcast regulations, has opposed undue government encroachment, fact that he would include direct question in survey is regarded as indicative of great concern in Congress over current regulatory efforts.

Another survey, undertaken by WTMJ-AM-TV Milwaukee inquires into tv's effect on youth. George Comte, general manager, has arranged with Dr. Wilbur Schramm, of Stanford U., for study in depth of findings of survey in Milwaukee area and results will be made available to broadcasters through NAB.

Another Georgia bellringer

Georgia, which has figured prominently in broadcast news by virtue of its recent "SERTS" conference on programming regulation (BROADCASTING, Sept. 18) will start off new year with another bellringer, 17th Annual Georgia Radio and Television Institute at Athens, Jan. 23-25, under auspices of U. of Georgia, will have list of headline participants that would do justice to national convention. Already booked are Pierre Salinger, Presidential news secretary; Roger Tubby, Asst. Secretary of State; Arthur L. Sylvester, Asst. Secretary of Defense; Clair McCollough, chairman NAB joint board of directors and J. Leonard Reinsch, executive director of Cox radio and television stations, communications advisor to President Kennedy and member of U.S. Advisory Commission on Information.

Institute, arranged under auspices of John E. Drewry, dean of Henry W. Grady School of Journalism of U. of Georgia, also combines its proceedings with those of Georgia Assn. of Broadcasters, which conducted "SERTS" conference. While main thrust of institute sessions will be in news and commentary areas, future of communications and global coverage through space satellites also on agenda.

NAB negotiations

Conversations have been underway between Peter Goelct, president, National Audience Board Inc., and President LeRoy Collins of the National Assn. of Broadcasters regarding recapture by association of rights to "NAB" insignia. Goelct enterprise has been using "NAB" on its Newsletter since association dropped it almost decade ago when it became NARTB. Subsequently, when association reverted to National Assn. of Broadcasters, it found "NAB" had been pre-empted and trademarked.

While there has been no formal comment, it is understood that Mr. Goelct felt his organization was entitled to remuneration, particularly since it would have to adopt new title for its Newsletter and other board promotion insignia and related documentation. Figure of $25,000-$50,000 has been mentioned but hasn't been confirmed.

More millions?

In face of presidential directive for agencies to cut down spending, FCC reportedly is seeking for fiscal 1963 20% increase over 1962 fiscal appropriation of $12.5 million. Commission's strongest argument is space communications and will stake 15-20 men for new unit. FCC hopes to effect housekeeping savings following management survey now underway.

Double reverse movies?

There may be even more mileage to old feature films than repeated exposure on tv. MCA-TV, as experiment, booked some of its pre-1948 Paramount features (Double Indemnity and It's A Gift, with W. C. Fields, and Horse Feathers and I'm No Angel) as double features in New York theatre. GROSSES topped average by more than 20%. MCA officials are considering extension of theatre-to-tv back-to-theatre concept to motion-picture houses throughout country.

Tricks and retreats

Members of FCC have rebelled because important and often controversial items have been added to meeting agenda very late on day before meeting. Commissioners have complained they do not have enough time for study, resulting in recent abstinence. Two recent examples: program incentive plan letter to CBS-TV (BROADCASTING, Oct. 30) and FCC letter on advertising. Scheme is designed to prevent premature disclosure of matters to be considered at commission meetings. Last summer, false agenda items were being circulated but this practice was stopped following public disclosure (CLOSED CIRCUIT, June 5).

Tower tussle

FCC and Federal Aviation Agency are at odds again over tower jurisdiction—often bone of contention between two regulatory agencies. FCC has sent recommended legislation to Bureau of Budget asking that it be given authority to order unused towers dismantled. FAA told budget that such legislation would be useless since FAA has jurisdiction, not FCC.

Unions unite

International Alliance of Theatrical Stage Employees and National Assn. of Broadcast Employees & Technicians have been holding series of meetings to attempt to work out areas of mutual interest in which two unions can cooperate. NABET represents large technicians at various networks and IATSE represents stagehands but also holds contracts for some technical workers. It is believed that unions want to strengthen areas in which they can cooperate, particularly because of trend toward automation at networks, which could displace some employees.
WMAReporters cover the Baltimore-Maryland scene!

Staffers prepare 35 weekly news programs plus bulletins!

The WMAR-TV news department has covered every newsworthy event in this area since October 27, 1947. Folks here look to WMAR-TV for the fastest, most authoritative local coverage plus CBS Network national and international news.

The fast-moving, experienced WMAR-TV news staff, working with a vast variety of equipment...film and sound cameras, printers, film processors, fully-equipped station wagon, remote equipment and wire services...prepare the daily "Early News," "Seven O'Clock Final," "Eleven O'Clock News" and "Sunday News Report." WMAR-TV—with the nation's oldest continuous newsreel—keeps the millions in the nation's 12th market well-informed. This is Viewmanship at its best!

Subscription prices: Annual subscription for 52 weekly issues $7.00. Annual subscription including Yearbook Number $11.00. Add $2.00 per year for Canada and $4.00 for all other countries. Subscriber's occupation required. Regular issues 35 cents per copy. Yearbook Number $4.00 per copy.
Subscription orders and address changes: Send to Broadcasting Circulation Dept., 1735 DeSales St., N.W., Washington 6, D. C. On changes, please include both old and new addresses plus address label from front of magazine.

BROADCASTING, November 6, 1961
The programming standards of a television station are always on view. All you need do is watch to see that WPIX-11, New York's Prestige Independent, has the "network look"—an array of network proven and network caliber programs night after night. Groucho Marx, Wyatt Earp, One Step Beyond, World of Giants, Troubleshooters, It's a Wonderful World, Wanted, Dead or Alive are some of the new fall shows joining the best looking and top-rated independent in New York—and the only one qualified to display the NAB Seal of Good Practice. Only WPIX gives you minutes in prime time in such a network atmosphere. A client list that is 98% national advertisers is the clincher. where are your 60 second commercials tonight?
Radio-tv usefulness assured, says Steers

AGENCY EXEC TELLS ANA MEDIA WON'T BE OUTMODED

Radio is pace setter for all major media, including television, in trends which eventually will make them primarily "personal" services, William Steers, president of Doherty, Clifford, Steers & Shenfield, said Friday at Assn. of National Advertisers' annual meeting (earlier stories pages 36-38).

He also predicted that television will extend its hold on people and become even more valuable advertising instrument—a prediction that seemed to give no support to fears expressed by number of advertisers that rising tv prices might in time imperil television's cost efficiency (see page 38).

Mr. Steers also thought that "in the next few years" all television may be consolidated in uhf. This would mean, he said, that "many small and middle-sized markets now being covered by metropolitan stations will have to get outlets of their own"; that advertisers' network lineups would have to number closer to 225 stations than today's 160; that "opportunities for regional and independent networks will spring up," and that "buying television time will become even more complex and exacting than it is today." He said existing vhf channels would be taken over by government, armed services and educators.

Fragmentation • Current trends toward "market fragmentation," also pointed out by Benton & Bowles President William Hesse (page 36), will be reflected in changes in all media and already apparent in radio, Mr. Steers predicted.

"Radio has become a uniquely personal medium," he said. "It is, in many ways, a bellwether medium. It shows...the direction in which media are trending and, in a curious way, it is ahead of the pack...an intensely personal medium...private and individual.

"Though radio sometimes offers very little in the way of controversy or depth of reporting, it has become a very satisfying medium for many people...in its programming radio has managed to capture many different areas of special interest—in music, in news, in sports..."

"Radio is very much 'with it'—in terms of satisfying the modern man. By becoming personal and individualized, it dramatizes the changes that must come about among magazines and newspapers. It also, I believe, dramatizes the trend of television."

He said tv is "the greatest man-entertainment invention in history—so far," and promises many electronic advances: "as a competitor for people's time, television's power is only beginning to be felt. Low-cost color television is not far off. We will also see mural, or wall television. These advances will make tv more enjoyable to watch and more valuable as a sales tool."

And as each family member gets his own tv set, he said, television like radio will become a more "personal medium," filling more "specialized needs and wants."

In another ANA session Friday, tv consultant Harry Wayne McMahah showed filmed presentation designed for wide distribution to help acquaint public with benefits they receive from advertising. In closed session Gilbert H. Weil, ANA general counsel, analyzed problems for advertisers in the temporary cease-and-desist power Federal Trade Commission is seeking from Congress.

Big Revlon accounts to move to NC&K

Details haven't been worked out but some of Revlon's billing (possibly as much as $5-7 million) reportedly is going to Norman, Craig & Kummer. Products hadn't been decided Friday (Nov. 3) but bulk is said to be com-
Richard M. Allerton, who for 10 years has headed research activities of NAB, retired Oct. 31. Mr. Allerton, 63, joined NAB as research director in February 1952. Before that he was marketing and research specialist with William Esty & Co. and Abbott Kimball & Co., in advertising field, and with Crosley Inc. and Free & Peters in broadcasting side of research. He spent 14 years on Wall St. as research statistician, economic and financial researcher and bond salesman. Mr. Allerton said last week he plans to be active in business and will announce his future plans shortly.

Stimson Bullitt, partner in law firm of Riddell, Williams, Voorhees, Ivie & Bullitt, Seattle, elected president and chief executive officer of King Broadcasting Co. (KING-AM-TV Seattle, KREM-AM-FM-TV Spokane, and KGW-AM-TV Portland, Ore.). He succeeds Mrs. A. Scott Bullitt, his mother, who will continue as chairman of board. Mr. Bullitt has been an officer and director of King Broadcasting Co. since it was founded in 1946 and president of Bullitt Co.

Charles R. Abry, Ernest Lee Jahncke Jr. and Angus Robinson become vps at NBC. Mr. Abry, eastern sales executive since 1958, joined NBC-TV as eastern sales manager in January 1957. Mr. Jahncke, director, standards and practices since October 1960, joined NBC Dec. 30, 1959, as director, standards. Mr. Robinson, director of central sales for NBC-TV, joined network in 1953.

Robert L. Werner, vp and general attorney of RCA and director of RCA Victor Distributing Corp. and RCA Communications Inc., elected executive vp and general attorney today (Nov. 6). Mr. Werner, formerly attorney with U.S., joined RCA in 1947 as attorney and was elected vp in 1951. Dr. Carroll V. Newsom, who leaves New York U. presidency at end of this year, elected to board of RCA. (Dr. Newsom also becomes director on RCA's board, as does Mrs. Everett Needham Case, who had been elected to RCA board last Sept. 1).

Ernest J. Hodges, vp and account service supervisor on Ralston Purina and Foremost Dairies accounts at Guild, Bascom & Bonfigli, San Francisco, elected senior vp of agency. Mr. Hodges joined GB&B in 1952 as vp and supervisor on Ralston account, and from 1948 to 1952 opened own public relations firm, Hodges-Pierce & Co., San Francisco.

Grant A. Tinker, vp and director of programming, Benton & Bowles, New York, since October 1959, appointed general program executive, NBC-TV. Before joining B&B, Mr. Tinker was with McCann-Erickson for five years as director of program development, and earlier was operations manager of NBC Radio for three-and-one-half years.

Storer Broadcasting Co. announces that two of its top executives, Bill Michaels and Terry H. Lee, have assumed additional duties and responsibilities of vp for tv and director of business planning and development, respectively. It was also announced that Robert M. Akin, partner of Dittmar & Co. Inc., San Antonio investment firm, joins Storer as director of finance (story page 94).

Asst. of National Advertisers elected John Veckly chairman and Max Banzhaf as vice chairman, at its annual meeting at The Homestead, Hot Springs, Va. Mr. Veckly, director of advertising, U.S. Steel, succeeds Roger Bolin, Westinghouse Electric Corp. (story page 31).

WPIXT says 1.8 million watched 'answer' program

WPIX (TV) New York reported Friday (Nov. 3) that approximately 1.8 million persons watched its three-hour “Hollywood's Answer to Communism” special program on Thursday (Nov. 2). Audience figure was based on American Research Bureau study. Station spokesman added program prompted 780 telephone calls and more than 100 telegrams from viewers.

No extra equal time, FCC tells Socialist

FCC gave short shrift in Friday wire to Socialist Labor Party which had complained its candidate for mayor of New York had been treated unfairly by WNTA-TV Newark-New York. Candidate Eric Hass said his appearance on station was only for time equal to that given Republican candidate, but that he'd been given no chance to answer Democrats.

Broadening Emmy?

There's talk of expanding annual Emmy awards to include some for outstanding service by individual television stations. Subject was explored last week at Washington meeting of high officials of Academy of Television Arts & Sciences, which gives out Emmys, and NAB. Proposal originated with academy officials, it was learned Friday, and is looked on with at least some favor by NAB.

WHAT DID HE SAY?

No one will ever know. As so often happens, the basic selling idea got lost in a gaggle of opticals, a covey of camera angles, a pride of takes and 4000 feet of film. It didn’t sell much of anything.

At N. W. Ayer, we have all the opticals, angles, takes and film that commercial production requires. But our best technique is never to leave a profitable selling idea on the cutting room floor.

The commercial is the payoff / N. W. AYER & SON, INC.
DATEBOOK
A calendar of important meetings and events in the field of communications.

*Indicates first or revised listing.

NOVEMBER

*Nov. 6—Broadcasters Promotion Assn., annual convention. James C. Hagerty, ABC news vp will be keynote speaker at joint BPA-Radio & Television Executives Society luncheon. Waldorf-Astoria Hotel, New York City.

SCBA, and Bob Crane, KNX morning disc
jockey.

*Nov. 13—Annual general membership
meeting of Screen Actors Guild, 8 p.m.
Beverly Hilton Hotel, Beverly Hills, Calif.

Nov. 13-16—Public Relations Society of
America, 14th national conference. Edward
R. Murrow, director of U.S.I.A., to deliver
keynote speech at opening session. Hotel
Shamrock-Hilton, Houston (first three days);
Mexico City (last day).

Nov. 14—Radio & Television Executives
Society, Time Buying and Selling Seminar,
fourth session. "Using the Network." In-
structors: Jules Barnathan, ABC-TV; Ben
Lochridge. CBS Radio, CBS Radio Studios,
49 E. 42nd St., New York City, 5:30-7 p.m.

Nov. 14-16—I.R.E., Mid-America Electronics
Conference, Kansas City, Mo.

Nov. 14-18—Associated Press Managing
Editors Assn., annual convention. Speakers
include Attorney General Robert F. Ken-
dedy, Dallas.

Nov. 15-16—American Assn. of Advertising
Agencies, eastern region meeting. Bilmtmore
Hotel, New York City.

Nov. 15-17—Television Bureau of Adver-
tising, annual meeting. Statler-Hilton Hotel
Detroit.

Nov. 15-17—Institute of Broadcasting Fi-
nancial Management, Sheraton-Chicago
Hotel, Chicago. Speakers include Hamilton
Shoe, chairman All-Industry Television Sta-
tion Music License Committee; and Hyman
H. Goldin, chief of the FCC's economic
division.

*Nov. 17—Chicago chapter, American Mar-
keting Assn., second annual conference.
Sheraton-Chicago Hotel, Chicago.

Nov. 17—Oral arguments before the FCC
en banc on network option time proposals
(rescheduled from Nov. 10). Program at:

Nov. 17—Maine Assn. of Broadcasters, an-
nual November meeting. Pilots Grill,
Bangor.

*Nov. 17-18—Oregon Assn. of Broadcasters,
fall meeting. Multnomah Hotel, Portland.
Kenneth Cox, FCC Broadcast Bureau
chief, will be principal speaker and will
answer questions after his talk. Other
speakers include prominent men from the
educational and business fields as well as
broadcasters.

Nov. 18—UPI Broadcasters of Wisconsin,
fall meeting. Lorraine Hotel, Madison.

*Nov. 18—Deadline for comments on FCC
proposed tv allocations in Wyoming.
Nebraska, Colorado and Kansas (Docket
No. 18060). Replies due Dec. 18.

Nov. 20-21—Nebraska Broadcasters Assn.,
convention. Grand Island.

Nov. 21—Radio & Television Executives
Society, Time Buying and Selling Seminar,
fifth session. "Using Research For Your
Decisions." Instructors: Mary McKenna,
Metromedia Inc.; William Murphy, Papert,
Koenig. Los Angeles. (Cable: G. 3.)

Nov. 21—Philadelphia chapter, American
Women In Radio and Television, dinner
meeting. Hotel Sheraton, Philadelphia.

Nov. 21—Florida Assn. of Broadcasters,
one-day seminar following NAB regional
meeting of the day before. Speakers in-
clude: James O. Juntilla, asst. to the FCC
Broadcast Bureau chief; Marcus Cohn,
Washington attorney practicing before the
FCC; Arthur Gilbert, FCC Florida engineer.
Robert Meyer Hotel, Jacksonville, Fla.

*Nov. 24—Deadline for answer from CBS-
TV and affiliates to FCC letter questioning
propriety of the network's sliding-scale
affiliate compensation plan.

*Nov. 24-26—National Assn. of Television
& Radio Farm Directors, annual convention.
Conrad Hilton Hotel, Chicago.

Nov. 24—25—Advertising Federation of
America, 8th district convention. Hotel St.
Paul, St. Paul, Minn.

Nov. 28—Radio & Television Executives
Society, Time Buying and Selling Seminar,
sixth session. "Buying the Schedule." In-
structors: Ann Janowicz, Ogilvy, Benson &
Mathe; Ruth Jones, J. Walter Thompson.
CBS Radio Studios, 49 E. 42nd St., New
York City. 5:30-7 p.m.

Nov. 30—Academy of Television Arts &
Sciences, New York chapter, fourth an-
ual "close-up" of tv personalities (David
Brinkley and Chet Huntley), Astor Hotel,
New York City.

DECEMBER

Dec. 1—Deadline for entries in Interna-
tional Broadcasting Awards contest. Sub-
mit to Hollywood Advertising Club, 6382
Hollywood Blvd.

*Dec. 1—Arizona Broadcasters Assn., an-
nual meeting. Apache Junction, Ariz.

Dec. 6—Deadline for comments on FCC's
proposal to add additional vhf channel at
below minimum mileage spacing to follow-
ing cities: Baton Rouge, La. (Doc. 14233):

BROADCASTING, November 6, 1961
Programming center for full or part-time automatic broadcasting

Plays up to 55 tape magazines and can be used to automatically start other broadcast equipment after any magazine.

The remarkable ATC 55 allows use of regular staff voices at all hours, with a minimum number of personnel on duty. Ideal for early morning and late evening hours, or to clear announcers for other duties during certain hours of the day. Lets you use your best talent during week ends or for separate FM operations. The ATC 55 will automatically play back up to 55 magazine-loaded taped spots, themes, and production aids; up to 165 full length musical selections, without resetting or reloading. It is also designed to operate in conjunction with other broadcast equipment. A special 3200 cycle auxiliary control tone may be inserted at any point in the sequence to start (1) material recorded on reel-to-reel tapes, (2) a Seeburg record changer, or (3) the standard ATC units. Used in multiples of two or more (4), the ATC 55 may be programmed to play in any desired sequence automatically. It delivers the highest quality broadcast reproduction. And, best of all, it is so easy to operate that any of your personnel can run it. Write, wire or phone collect for complete information and literature today.

The 1961-62 Yearbook

EDITOR: Congratulations for the excellent job your staff did on the latest Broadcasting Yearbook. The excellent presentation of a wealth of solid facts and figures has already been put to good use.—Harvey Chertok, director of advertising & publicity, Seven Arts Associated Corp., New York.

EDITOR: Your new Yearbook surpasses anything you or anyone has ever done. Congratulations on a fine job.—Larry Walker, Executive Vice President, WSOC-AM-FM-TV Charlotte

San Francisco story

EDITOR: Will you please send me 10 reprints of your fantastic article on the San Francisco Bay area published in your Sept. 25 issue.

The in-depth studies and future projections in population, economics and advertising penetration provide valuable tools for future planning in this area.

Every issue of Broadcasting provides invaluable material to those involved in media evaluation and analysis.

More Senators' signers

EDITOR: Your recent article (The Media, Oct. 23) brought 14 mail responses and three long-distance phone calls the following day, which gave us an additional 26 stations for the new Washington Senators' Baseball Network.

I take this opportunity to thank your staff for the fine article.—E. R. Quezada, president, Washington Senators.

In defense

EDITOR: I am writing this letter as an individual and not as a representative of WLIE.

It seems to me to be rather inconsistent for people nowadays to discuss the need for better standards of broadcasting and, in the next breath, to discuss the possible revocation of licenses held by Westinghouse and General Electric stations.

I grew up in the arms of the 50,000 watt transmitters of both a GE station and a Westinghouse station, back in the days when small town stations were few and far between and clear channel stations provided a vital service to rural America.

I cannot condone unethical conduct in any industry, but we are judging men in the broadcasting industry, not officials of an appliance manufacturing empire. In years gone by, Westing-
DRAG YOUR DRACHMS/ In ancient Greece a drachm delivered many things...a seat at a Sophocles play, a ride in a two horse chariot, a ticket to the Olympic games! Drachms, of course, aren't what they used to be...even the name has changed! But drachms, drachmas or dollars, they still go a long way in Baltimore at WBAL-Radio. WBAL-Radio takes the Greek out of station buying by translating these facts into sales: WBAL-Radio is powerful — dominating the entire metropolitan area plus 37 surrounding counties in Maryland and four adjacent states. WBAL-Radio is progressive — providing its listeners with a distinctive format of full range programming and music for mature minds. WBAL-Radio is productive — reaching more homes in a given week than any other Baltimore radio station, providing more unduplicated coverage in this market than any other station. If you want your advertising to deliver sales in Baltimore and Beyond, drag your drachmas to WBAL-Radio today...or call our reps and let them do your heavy work! WBAL-RADIO BALTIMORE Maryland's only 50,000 watt station Associated with WBAL FM & TV / Nationally represented by Daren F. McSavren Co., Inc.
This Fall, the CBS Television Network will again chalk up the biggest attendance record in football. The same go-go-go spirit that first brought professional football home to a nationwide audience (the late National Football League Commissioner Bert Bell attributed the game’s phenomenal rise to this network’s pioneering coverage) is also responsible for many other CBS Television Network sports firsts. First to give the nation a front row seat at international competitions through exclusive coverage of the 1960 Winter and Summer Olympics. First to use video tape in sports, making it possible to rerun thoroughbred races, crucial golf rounds and scoring football plays as soon as
they are over. First to televise the whole incredible range of sporting events from rugby to auto racing, from sky diving to figure skating—through the introduction of the weekly Sports Spectacular series. And throughout the year, this network continues to bring a hundred million television fans such major events of every season as the college bowl games, the Triple Crown, the UN Handicap, the PGA and Masters golf tournaments, and baseball's Major League Games of the Week. Sports play an exhilarating, exciting part in the powerful CBS Television Network line-up, which again this season has the balance, depth and quality to \textbf{dominate}. 
house and General Electric have shown a willingness to experiment with new and worthwhile forms of broadcasting that other stations would not have dared to touch. In some instances, these experiments have proved far from beneficial to ratings. In other instances, the latter has been true and other stations have been only too willing to jump on the bandwagon.

I do not always agree with the thinking of the programming men at GE and Westinghouse. I do not even feel that their stations, in many instances, are the best in their respective markets. But I commend these stations for their forward outlook.

Surely there are broadcasters who have not demonstrated this forward thinking and who have been far more negligent in their handling of the public trust than Westinghouse or General Electric.

If it is felt that these stations warrant investigation, by all means investigate; but let's not punish a person before his friends for what his parents have done. . . .—David E. Lyman, program director, WLEE Richmond.

On talent agencies

EDITOR: It has been brought to my attention that the Oct. 21, 1957, issue of Broadcasting contained special articles on the subject of “The Ten-Percenters,” directed to the activities of theatrical agencies. I would appreciate it if you would send me a copy of the same, or if there has been a special supplement published, would you send me a copy of that supplement. . . .—Morton Galane, lawyer, Las Vegas.

Success story reproduction

EDITOR: From time to time there are articles appearing in Broadcasting which provide the basis for a good sales pitch or success story for our station.

About a year ago, I called and spoke to someone, whose name has escaped me, and asked for permission to reproduce some of these for distribution to our accounts and agencies as a success story when making station pitches. I was told that it was possible to do so as long as credit is given to Broadcasting, which we have done.

There are a good number of items in the recent issues and I am writing to inquire again if we can still do this and for the purpose of keeping the records clear, I feel that we probably should receive permission in a letter from you approving the same. . . .—Howard V. Wry, director of promotion, WHNB-TV New Britain, Conn.

THE KATZ AGENCY, National Representatives
Why WLOS-TV bought Seven Arts' Volumes I & II

Says Ted Eiland:

"When you're committed to heavy movie scheduling, you've got to deliver top product
to develop not only audience, but dollars.

"This calls for the best feature films available and Warners' 'Films of the 50's' qualify handsomely. When you tell TV buyers you've signed up for Seven Arts' features, they instantly connect the name with the most outstanding movies on TV today. Result, we entered Fall with a sold-out situation."

A natural ally, tv, helped put the 'show' back into auto show

In our office we call the campaign for the Los Angeles International Auto Show "the big sell with the soft sell." It's really a promotion of paradoxes. The auto show is created to sell cars—but not one order is taken at the show itself.

Yet, it's the job of Eisaman, Johns & Laws to sell the auto show big...to bring out ever bigger crowds...to draw them to a colorful, glamorous setting in which are displayed the new output of all auto manufacturers in all modes, designs, styles and prices...and then to move them to go to the display room of their favorite dealer for the car of their choice.

This spectacular, a demonstration of the American system of free competitive enterprise, was undertaken by our office at a challenging time—1959—when attendance had been declining. Auto shows in some parts of the country had lost the luster of the time when the home town auto show was an annual social event and the people jammed the local armory as they would for the opening of the theater season. Suburban living had produced more casual auto show visitors. Many shows themselves suffered from the bleakness of being held in a department store parking lot.

Show's the Thing * Our first step was to concentrate on putting the show back in auto show. But the addition of Ziegfeld Follies glamour entailed expense. That meant getting the money to cover the cost by charging admission.

We first decided to sell by utilizing a show business medium that was a natural ally—theater; and to sell and launch the auto show with the same kind of comprehensive promotion you use to launch a new TV series. We used TV particularly to sell the "non-car-buff" who might ordinarily prefer to spend a free afternoon or evening at the movies. To influence this market we prepared a series of television commercials a la Jackie Gleason—commercials reminiscent of an Ed Sullivan production, featuring beautiful auto show fashion models, experimental prototypes of the autos of the future, music, everything necessary glamor and excitement.

To promote this formula properly calls for costly use of a costly medium—television—which we first introduced for the 1959 auto show. Its sales value was proved by a 23% increase in attendance over the preceding year. Heavy emphasis was placed on special events usually preferred by prestige advertisers—for example, local co-sponsorship of the NCAA Football Game of the Week on NBC-TV, news sponsorship on network TV stations, musicals and all other one-time-only TV specials that were offered locally. If fresh, new programs were not available in sufficient quantity, we produced our own shows and publicized them in newspapers. Our objective was always the same: buy enough commercial time to sell the public on going to the auto show.

A Good Formula * The same formula worked again in 1960 when attendance held its own despite bad weather. And for the 1961 auto show which ends today, we repeated the format and continued our dedication to TV specials and Broadway show-type taped commercials.

Among the special events we sponsored to reach untapped audiences was a live three-hour telecast of the Los Angeles Lakers pro basketball game directly from the Sports Arena in prime evening time, as well as a day-long telecast of the International Air Show remote from nearby Chino, Calif.

The latter event offered us the rare opportunity of combining an International Air Show with an International Auto Show—both means of travel being the two most exciting ways to get about. Television cameras eyed a parade of antique cars circling a runway filled with World War I aircraft—on the heels of which came a fleet of unusual 1962 autos directly from our auto show. In short, we traced the history of aircraft and automobiles up to the present day—in a way that was as entertaining as it was commercial. In fact, few network advertisers have ever played their commercials on such a gigantic stage.

The other media were not neglected. We employed every medium of communication to sell the auto show as absorbing entertainment well worth the $1.50 admission price. Here under one roof was an exhibit of 400 U.S. and imported automobiles, spectacular engineering exhibits that required almost a year to design and assemble, elaborate decorations, fashion models, music and strolling minstrels, art exhibits and excitement galore. To reach vast and spread-out Southern California, the nation's biggest automobile market, we used a rare combination of advertising and publicity approaches.

The auto show campaign each year is anchored to a gala, socialite premiere sponsored by the prominent Assistance League. Its distinguished members and their friends give the show a prestige and distinction that enhances the auto show. It also reaps columns of news pictures for the cars (along with the society belles and dukes) and the auto shows in the newspapers, coverage of the event in the TV newsreels and in the radio news.

Razzle Dazzle * This glamorous, Hollywood searchlight event is backed up with razzle dazzle, such as this year's use of 194 Day-Glo billboards dramatizing the decorator's theme, "A Night in Paris;" consistent ads appearing in all metropolitan newspapers; all leading radio stations ballyhooing the auto show excitement; and a score of appearances on TV by the auto show queen and her court of princesses. In fact, a fired-up public relations wing of the agency made news of the queen's selection by the Los Angeles auto editors, an event covered by every TV news reel and metropolitan paper.

Efforts such as these place the Los Angeles International Auto Show far above "exhibits" and "shows" usually seen in the United States.

To us it is an example of creative advertising designed to meet the needs of a most unusual production—an auto show which sells cars but one where you can't place an order.

Joe Eisaman, a principal in Eisaman, Johns & Laws Advertising, opened the agency with Jess Johns in 1948. In the auto and allied lines the agency represents Los Angeles Motor Car Dealers Assn. (sponsor of the auto show), Southern California Motor Car Dealers Assn., Pennozil, Sure-Fit Stores nationwide, combined Southern California Chevrolet Dealers, Greater Seattle Chevrolet Dealer Assn. and National Automobile Dealer Assn. He is a graduate of Dartmouth College.

ABC TELEVISION
FRESH, NEW PROGRAMS FOR '62-'63

Networks, agencies, producers all promise vast improvement
One-hour program format is losing ground to half hours
More diversified production groups in prospect next season

The 1962-63 tv season holds promise of providing a maturing and changing audience with a noticeable helping of the "new and original."

There's evidence that network tv's first planned season since the beginning of pressures from government groups, opinion leaders and what is said to be a more sophisticated audience, will present some major changes in regularly scheduled tv program fare.

If program creators have their say, there will be a sharper accent on "more meaningful" drama programs, musical variety series and specials, family situation comedies, games and quiz programs and children's shows cutting across several formats.

Better Quality - As some buyers react: "There will be no program 'trends,' just better shows and with more quality."

Networks currently are busy blueprinting for next year—sifting through program ideas, reading scripts and projecting some pilot production ahead. The "plan ahead" season is in full force at the various programming sources, even though the current season scarcely has begun and the national ratings from Nielsen and Arbitron can provide only a preliminary "reading" of the status of this year's offerings.

Network, agency and production company executives talk about the "new," "different," and "fresh." Though they acknowledge these qualities are not easy to attain, they point out there need not be an overhauling of program classifications, but a conscious and directed effort toward upgrading the quality of existing formats through improved writing and direction.

Creativity Trust - This asserted thrust toward "creativity" presages a further decline in the number of westerns and private eyes on network prime-time schedules next season. The consensus appears to be that westerns and private eyes are inherently "copy-cat vehicles and tend to operate against "newness," "freshness," "originality of ideas."

These are some of the other highlights projected for 1962-63:
- The hour format seems to be losing favor because of the trend against westerns and private eyes but this length was cited by some programmers as appropriate for drama- anthology or the semi- anthology drama series (such as CBS-TV's The Defenders, which uses some regular actors in different situations each week). Conversely, there will be an expansion in the number of half-hour series.
- The number of documentary-public affairs series will remain about the same or increase slightly. Though this type does not often attain the rating the network or advertiser desires, a combination of government pressures and the present climate dictates that there be no decrease in the number of television "actualties."
- A more diversified group of outside production companies are expected to be represented on forthcoming network schedules. Producers of serious dramas, music-variety and game or quiz programs report they are receiving.

Veckly named ANA chairman, Banzhaf new vice chairman

John Veckly, director of advertising, United States Steel, was elected chairman of the Assn. of National Advertisers Thursday as ANA opened its annual meeting at the Homestead, Hot Springs, Va. He succeeds Roger Bolin, Westinghouse Electric Corp. Max Banzhaf, Armstrong Cork Co., was elected vice chairman.

Peter W. Allport, elected ANA president a year ago to succeed the late Paul B. West, was re-elected.

Five new directors were named and two whose terms expired were re-elected. New directors: Kenneth R. Baumbusch, American Home Products; John Burgard, Brown & Williamson Tobacco; Victor Elting, Quaker Oats; Michael F. Ryan, Allied Chemical, and Gail Smith, General Motors. Re-elected: Albert N. Halverstadt, Procter & Gamble, and Gene Wedereit, Chemetron Corp.

Mr. Veckly
Mr. Bolin
Mr. Banzhaf

Mr. Veckly, new ANA chairman, joined U.S. Steel in 1955 as assistant advertising director and became director in 1957. He formerly was with Saturday Evening Post. (For ANA story see page 36).
more encouragement from the networks.

- With the decline in the number of hour programs may come a slowing down of the strong trend toward minute sponsorship of network shows evidenced this season (Broadcasting, Aug. 21).
- There are now more half-hours in prime time on CBS-TV than on the other networks (NBC-TV has eight entertainment half-hour series, ABC-TV has 15 and CBS-TV has 24). A return emphasis next season on the half-hour format may very well open the way to an increase in advertiser-owned shows, though there's no such move visible at present. (Benton & Bowles, an agency noted for placing advertiser-controlled shows, reportedly is considering several programs for next season).
- There's no specific talk about replacement shows, though ABC-TV's first move against some apparent weakness in the lineup will be put into effect later this month (see box page 33).

The aim for "stronger plotting" in drama programs does not point necessarily to an upsurge in live or tape drama, though several executives indicated some increase in this area seems warranted. Many felt that "more serious, more provocative drama" would be included within the framework of drama- anthology programs and action-adventure series and an expansion in anthology series is envisioned.

Several new series are expected to be developed from existing anthology series now on the air such as The Dick Powell Show, General Electric Theatre and perhaps The Defenders.

There is a possibility that some one-hour comedy series, developed along the lines of CBS-TV's half-hour Jack Benny programs, stressing characterization and warmth, will find places on network schedules. This will be an increase in live programs of all types because of a belief that this form permits "experimentation, freshness, originality of ideas."

There will be a further de-emphasis of "violence for the sake of violence," not only to placate government and organizational groups but to appeal to an increasingly sophisticated audience (Broadcasting, Aug. 28).

The animated cartoon show for adults, widely represented this year, is not likely to return next fall on the same scale as at present. While scanning the 1962-63 horizon, programmers, of course, also are concerned with the current season.

The care they profess to be taking with their 1962-63 entries makes using these projected properties during midseason this year impractical. But network program planners of necessity must make decisions on replacement programs, though many can be deferred for several weeks.

**Network track record**

The apparently heavy turnover of new network tv programs is indicated in a special compilation provided by the A. C. Nielsen Co. Using the Nielsen television index as a source, the company reported that of the 43 new programs launched during the 1960-61 season, only 18 (42%) returned for 1961-62. In contrast, of the 71 established programs carried on 1960-61, 52 (73%) were back on the networks this season. The analysis is based on shows carried on the networks during November-December of each year.

**The Networks** At ABC-TV, it is felt there will be many changes ahead for the network, particularly more half-hours and some live shows, and most likely with fewer hour shows, there will be some decline in minute availabilities.

Thomas W. Moore, vice president in charge of programming, reports the network will make more use of Bing Crosby Enterprises, noting the success the network feels it has had with that company's new Ben Casey show (Monday, 10-11 p.m.).

ABC-TV, it's reported, next season will be characterized by less action-adventure, more situation comedy and a "higher quality" show.

There'll be at least one more dramatic entry to add to this season's Alcoa Premiere and Bus Stop (the latter reported to be weak in its ratings so far). Wagon Train, which shifts from NBC-TV to ABC next season, will be counted on to strengthen the same period (Wednesday, 7:30-8:30 p.m.).

It's admitted that Steve Allen Show, now in that period, has been something of a disappointment and if further format changes are not enough to lift it out of the doldrums, the program may shift to a new and perhaps more favorable time period.

Mr. Moore stated that the network already has a number of shows in pilot form. Aside from national program sources for ABC-TV, the network also is expected to buy properties from MGM-TV and from independent companies.

**New Creativeness** Oscar Katz, vice president, network programs, CBS-TV, emphasized that in 1962-63 television must "do new things with top-flight creative people." Among the network projects he cited for the next season, which he believes exemplify the new direction of television, are: A live one-hour variety show, titled TV Tonight, a Bob Banner production; a half-hour situation comedy, based on a book, Wake Up, Stupid, concerning the exploits of a non-conforming college professor; a half-hour situation comedy to be created by Max Shulman (possibly called Zelda); several half-hour drama series to be "spun off" the General Electric Theatre; a drama series, Star Witness, portraying each week a supercharged exchange between a prosecutor and a witness, and several program series to be produced by Herbert Brodkin, who is responsible for The Defenders, regarded as one of the more promising entries of this season.

Mr. Katz reported that CBS-TV has about 25 new programs in various stages of development but stressed they may wind up with "a lot less" from this group. He noted that plans call for both hour and half-hour shows and film and live programs. But he voiced the opinion that half hours will be stronger next season.

"It's not important if a series is film or live," Mr. Katz stressed. "The important consideration is that a program must be new or different or provocative."

NBC-TV is following the pattern toward more live programming. Jack Paar is slated to appear in prime-time with an hour live comedy-variety show. The network, according to Mort Werner, vice president, programs, is developing a live drama show, and has a color cartoon series working that will feature Laurel and Hardy figures and voices. The network has already announced such possible entries as Kings of Broadway, a half-hour program (pilot by Bob Banner Assoc.) about a two-a-day vaudeville circuit; and Stop The Camera (live game-show packaged by Harry Saltz). A new half-hour series that would feature Loretta Young as a mother of five daughters is under consideration.

**More Game Shows** Goodson-Todman Productions, New York, will undoubtedly be one of the sources of some of the live game shows which seem destined to return to nighttime tv next season. Bud Austin, East Coast executive vice president of G-T, said that preliminary work has started on "a couple of new game shows." He said the shows are nearly ready for presentation and discussions will start soon with agencies and networks.

Goodson-Todman's film activity also has been stepped up, with work on a half-dozen hour or half-hour series under way at the company's Hollywood office. Now being prepared for presentation, and aimed for 1962-63 network showing, are: Sky scraper, in association with CBS-TV, an hour anthology series that will portray dra-
matic stories of the business world; Roads Three, an hour series in association with NBC; an action-adventure series that will take place "all over the world"; Sun Valley, in association with NBC, an hour series located in Sun Valley, Idaho; Count Your Chickens, said to be an adult comedy series dealing with an urbane executive who moves his family to a farm; Days Ahead, a half-hour show described as a futuristic situation comedy, is being produced with Projects Unlimited.

Mr. Austin reports that scripts are being prepared for both new hour and half-hour versions of the Rebel series, again starring Nick Adams. (It would not seem unlikely for Rebel to be considered as a mid-season replacement on ABC-TV). And in another Goodson-Todman development, actor James Drury was signed to star in a series titled The Yank.

There is a possibility that Goodson-Todman’s latest daytime game show, Password, now on CBS-TV, will turn up in a nighttime spot this season to replace one of the potential program casualties. Mr. Austin said there have been some conversations on this subject.

Originality • John H. Mitchell, vice president and national sales manager, Screen Gems, reported that for the future the premium has to be on "originality of ideas." He agreed that criticism from the government and opinion leaders has accelerated the demand for creativity for the 1962-63 season.

This climate of thinking, he said, will result in a decline of private eyes and westerns and will contribute toward an expansion in the number of live drama and game shows, situation comedies and documentaries. He envisions fewer hour-long formats, claiming that these programs are sometimes unprofitable for the networks. He added, "an hour show that is failing tends to suffer more sharply than a failing half-hour show." Another factor working against the hour programs, he claimed, is that they tend to curtail opportunity for diversification of programming by using a longer time period.

Talent Assoc.-Paramount appears to be split into two program operations, one based in Hollywood under Al Levy, the other in New York with David Susskind at the head. Mr. Levy said last week he wanted to establish the west coast operation as the "United Artists of television" and hoped to build up a creative staff. Mr. Susskind is operating with a five-star producer staff (in addition to himself) of Robert Alan Aurthur, Robert Costello, Jacqueline Babbin and Audrey Gelan.

Shows under the Talent Assoc.-Paramount banner: In the East—a musical TV show based on academy award songs, a half-hour and on tape; a half-hour game show conceived by Carl Reiner and Mack David; a half-hour situation show centered about twin girls; a dramatic half-hour or hour-long series that would fall somewhere in between a Twilight Zone or Way Out, and Sutton Place South, a story about a man who owns a brownstone house in New York.

In the west—Crimes of the Century (one-hour, tape, using such cases as the Dreyfus story, the shooting of Abraham Lincoln and the dynamiting of the New York Times etc. as bases); dramatic and variety format specials;

ABC-TV plans to shuffle its Tuesday and Saturday line-ups

Immediate adjustment to what the network believes is a changing audience mood is being made this season—after only about six weeks—by ABC-TV in its Tuesday and Saturday schedules.

Effective Nov. 14, ABC-TV is expected to move The New Breed from its 9-10 p.m. slot on Tuesday to 8-9:30 p.m., transfer Calvin & The Colonel (cartoon show using Amos 'n' Andy voices) out of the 8:30-9 p.m. period and move a game show, Yours For A Song, into the 9:30-10 p.m. slot.

At a later date, Calvin will move into the 7:30-8 p.m. spot on Saturday, and Room For One More, a situation comedy produced by Warner Bros., goes in at 8:30 p.m. Roaring 20's, which is in the 7:30-8:30 period, will be discontinued (Broadcasting, Oct. 23). The latter move in particular indicates a new reluctance to tie up money and time periods with hour-long shows and the resurgence of the half hour as the predominate program length. It's easier to replace a half-hour than a one-hour show, when the half-hour show goes off, it takes two half-hour programs to re-fill the time period.
FRESH, NEW PROGRAMS FOR '62-'63 continued

Emergency—Dial O, an "actual" half-hour series that would use a mobile tape unit in following ambulances and the like around the city of New York; two half-hour series working respectively with the Bureau of Health and the Pentagon in Washington; and an hour-long taped dramatic show using an Old Vic repertory theatre type of permanent cast which would be made up of name stars with a different play presented each week.

Thomas McDermott, executive vice president, Four Star Productions, also predicts a decline in hour programs and an increase in half hours. The program classifications that will suffer, he says, are the western and the animated cartoon, while the situation comedy format is headed for wider representation on the networks. He envisions an upsurge in live drama and in the film drama-anthology classifications. Mr. McDermott's critique: "Television is less of a 'wasteland' today than it was last year. Next season, with the emphasis on 'something different,' it will improve even more."

A spokesman for Warner Bros., which produces many of the half-hour series, said it is "too early" to talk about 1962-63. He added that Warner is preparing eight pilots but it is "too premature" to discuss them.

From Hollywood • The major source of program supply for network tv programs continues to be the motion picture companies. A typical example is MGM-TV which has talked about, or considered, a dozen or more properties. Some are ideas held over from last year's plans for the 1961-62 season.

Holding true to anticipated trends, MGM-TV's current thinking leans slightly more to the half-hour than to the hour-long format. It could produce either.

Among the hour-long shows: Jeopardy, a mystery anthology series drawing from such authors as Sinclair Lewis, J. P. Marquand, Graham Greene, Ben Hecht, Agatha Christie and Alex Coppe, and one that's been on the drawing board for at least two years; All That Jazz, a situation comedy produced by Project III Enterprises for MGM; The House of 7, an adventure drama, Project III in association with Phil Silvers' Tran Productions.

Also, The Human Comedy, in which ABC-TV at one time was said to be interested. The latter title comes from the William Saroyan novel that was made into an MGM motion picture in 1943 (family type with small town setting). There's Washington Corre-

Programs on the doubtful list this season

According to those who "read" the ratings in the television business, there is a group of shows which already would appear to be "less than healthy." It's emphasized though, that track records are not yet complete and any one of the series might suddenly take an upward turn in popularity.

The shows: ABC-TV—Follow the Sun at 7:30 on Sunday, Surfside Six at 9 on Monday, New Breed and Calvin & the Colonel on Tuesday Steve Allen at 7:30 on Wednesday plus Top Cat at 8:30, Straightaway at 7:30 on Friday, and the Saturday changes (see age 33). There may be some soft spots with Margie and The Untouchables on Thursday but the climate is unsure.

CBS-TV—Pete & Gladys and Window on Main St. are a little shaky on Monday, Ichabod and Me on Tuesday at 9:30, Mrs. G. Goes to College on Wednesday at 9:30, Bob Cummings Show and Investigators at 8:30 and 9 respectively on Thursday, and Father of the Bride on Friday at 9:30.

NBC-TV—Surprisingly the "quality" Du Pont Show of the Week is said to be slipping in audience on Sunday at 10, Cain's Hundred on Tuesday at 10, Captain of Detectives on Friday at 8:30. In addition there are question marks—87th Precinct at 9 on Monday and possibly Bob Newhart at 10 on Wednesday. It's reported that NBC-TV already is changing the locale of the Joey Bishop Show, which appears at 8:30 that night. (It will change from "office" to "home," and become a "domestic comedy.")

While these shows are cited as needing a hypo, some certainly can be expected to be in a position to pick up audience as the season progresses. It's standard procedure to hear talk of Window on Main St. repeating the pattern of the first year of Father Knows Best on CBS-TV: to wit, a slow start and then an upward climb. Such talk is heard also at ABC-TV which suffered through the early weeks of the now very popular 77 Sunset Strip when first it went on the air.

BROADCASTING, November 6, 1961
Attention Radio-TV Station Controllers, Treasurers, Business Managers and Other Financial Executives Associated with Broadcasting:

Last chance to insure your attendance at the first annual meeting of the Institute of Broadcasting Financial Management

November 16 • Sheraton-Chicago Hotel • Chicago, Ill. • 9 a.m. to 5 p.m.

You'll find this full-day seminar helpful in keeping you informed and working at top efficiency.

Program

9:00 A.M. Welcome by WCCO's H. W. Dornseif, President, IBFM.

9:30 A.M. A REVIEW OF THE BACKGROUND RELATIVE TO PRESENT ASCAP NEGOTIATIONS—Mr. Hamilton Shea, President of Shenandoah Valley Broadcasting, Inc., and Chairman of the All-Industry Television Station Music License Committee.

11:00 A.M. A NEW APPROACH TO SALES TRAFFIC AND BILLING PAPER WORK—Mr. W. Richard Lyman, National Representative to the Broadcasting Industry for the Ozalid Division of General Aniline and Film Corporation.

12:30 P.M. Luncheon Speaker: Mr. Ralph Lewis, General Partner and National Director of Management Services, Arthur Young & Co.

2:30 P.M. SRDS'S CENTRAL MEDIA ACCOUNTING FACILITY AND ITS RELATION TO LOCAL STATION BILLING—Mr. George W. Schiele, Vice President of Sales of the Broadcast Billing Company.

(A question-and-answer period will follow each speaker, providing all in attendance with an opportunity to explore areas of special interest.)

Use coupon below to reserve your place. Please act at once so facilities may be reserved. You will find attendance rewarding solely for the topical information presented. However, you will also discover many plus values in meeting and associating with others whose background and problems are identical with yours. Total cost of seminar, including lunch, $15.

About the sponsoring organization. IBFM has been formed to promote association and exchange of information and ideas among men and women concerned with financial aspects of radio-tv station management. If you are not presently a member but would like more information about our organization, please check the appropriate section of coupon below. You do not have to be a member to attend the seminar. Members will also meet the morning of Nov. 17, when committees will be activated and chairmen appointed.

Institute of Broadcasting Financial Management • P.O. Box 4955 • Washington 8, D.C.

Count me in for the General Meeting of the Institute of Broadcasting Financial Management to be held Thursday, November 16, at the Sheraton-Chicago Hotel in Chicago, Illinois.

☐ My registration fee of $15.00 is enclosed. I understand this covers the cost of the all-day meeting, including lunch. If I need hotel reservations I'll make them myself.

Advertising: fine points to get finer?

ANA TOLD TO EXPECT SEGMENTATION TREND, MORE USE OF AUTOMATION

A revolution in both the concept and mechanics of "national" advertising—with overtones that seemed to carry special significance for spot broadcasting—was foreseen at the Assn. of National Advertisers' annual meeting last week (also see page 38).

Some 375 of the nation's biggest advertising spenders heard President William Hesse of Benton & Bowles predict Friday morning that the concept of "national marketing," of which advertising is a key ingredient, "is being shaken to its very foundations" and will yield more and more to the kind of planning that is done "from the bottom up rather than the top down."

In the same session Wallace T. Drew, marketing vice president of Coty Inc., stressed that spot radio and tv, newspapers and perhaps other media will "soon" be "bought and billed electronically," and warned that agencies had better acquire and start using modern data-processing equipment or run the risk that their clients will "succumb to the lures of setting up a house agency."

Mr. Hesse reviewed the nationwide "trend toward segmentation" of people, products and services and noted that, for example, "a food item that's popular in Dallas may wither on the supermarket shelf in Des Moines." He added that "the product today that makes an appeal right across the board is the exception rather than the rule."

Beneficiaries • Although he did not elaborate, this was construed as having special significance for spot radio and tv, newspapers and regional editions of magazines as opposed to national magazines and perhaps network tv and radio. Observers also thought it implied a growing need for more careful planning of spot broadcasting campaigns and those in other media more "local" than "national."

The importance of weighing many alternative plans before making a final campaign decision—and of having the equipment to make these comparisons quickly—was stressed by Mr. Drew. With modern computers available, he said, it is no longer necessary "for a tired media man to be laboring at an adding machine at midnight to check out pitifully inadequate numbers of alternatives."

Mr. Drew singled out Young & Rubicam as being well on the way to becoming one of the "agencies of the future." Y & R "leads among advertising agencies in data processing in order to effect more intelligent media buying," he said. Y & R has equipment which among other things "pre-scans the alternative media plans [and delivers] in a few minutes information it would take months to process by hand," he asserted.

He cited Needham, Louis & Brorby, Chicago, as another agency now using modern data processing equipment. But many others, he said, offer their clients "inadequate help" in this respect. He predicted that the role of the agency media man will "greatly expand."

Inducement • To encourage their agencies to offer help that is not strictly combinable—and to compensate them for doing so—Mr. Drew suggested more advertisers should consider installing the fee-system of agency compensation.

In another ANA session Paul E. J. Gerhold, vice president of Foote, Cone & Belding, offered an "outrageously simple" formula for measuring advertising's sales effect: the way to do it, he said, "is to stop advertising ... in a typical selected sample of markets and study the levels and trends in sales in these areas against those in which advertising had been sustained."

Other speakers of the three-day session, held Thursday through Saturday at the Homestead, Hot Springs, Va., included:

• Harry Schroeter of National Biscuit and Donald Armstrong of Communications Affiliates Inc. reviewed A. C. Nielsen Co.'s new Nielsen Media...
On the street where you live there's one favorite troubador. In Cleveland it's WHK. Our serenade now charms more fair ladies, and men, than ever before.*

As a matter of fact, WHK now out-troubs all other Cleveland troubadors in the morning as well! Before you plunk down your ad dollars in Cleveland, listen to Jack Thayer, Vice-President and General Manager,

Measuring advertising effectiveness subject of ANA book

The effectiveness of advertising can be measured—if the conditions are right. How to make sure the conditions are right is the subject of a book published by the Assn. of National Advertisers last week and explored at Saturday morning's session of the ANA annual meeting (also see page 36).

The 114-page book, Defining Advertising Goals for Measured Advertising Results, offers a "new approach" to the basic problem of making advertising more effective and its effectiveness more measurable. The first essential, it is emphasized, is to express the advertising campaign's goals in specific terms that will permit measurement in this process, it is important not to confuse advertising goals with marketing goals, the book points out. Increasing sales is a commendable objective, but it is "a total marketing goal," not an "advertising goal."

Sales results, the book continues, depend not only on advertising but also on such other factors as appearance and quality of the product, price, point-of-purchase display, package design, personal selling, promotion and publicity. The "advertising goal" must be more specific, related to the delivery of a sales message that will create an awareness of or attitude toward the product that is in keeping with the overall marketing strategy.

For example, does the manufacturer wish to show that because Brand X is a low-sudsing detergent it will clean clothes faster and whiter, or does he wish to show that its low-sudsing qualities will save costly repair bills and messy suds spillovers? Or does he wish to reach one group of prospects with the first message and another audience with the second?

Brand Awareness. Another of the book's guidelines emphasizes the need for "benchmarks" against which progress can be measured. Research on brand awareness, for example, will show the extent to which people are aware of the product before the advertising appears and thus will provide a basis against which to compare the results of similar research done after the campaign.

Roger Bolin, advertising director of Westinghouse Electric Corp. and retiring chairman of ANA, hailed the book as one that "will assist further in the development of productive and efficient advertising." In addition, he said, "beyond the scope of measurement, [it] will serve the creative forces in designing advertising which is aimed directly at marketing requirements. It should be of help to media executives, as well, in integrating their efforts with the advertisers' marketing needs."

A panel and several other speakers were to discuss the book and related subjects at the ANA Saturday meeting. The panel consisted of Ralph Winslow, Koppers Co.; Gene Wedereit, Chemetron Corp.; Douglas L. Smith, S. C. Johnson & Son, and Donald S. Frost, Bristol-Myers.

Other speakers: Paul E. J. Gerhold, Foote, Cone & Belding; Robert J. Fisher, Ford Motor Co., and R. E. Olson, Taylor Instruments Corp.

The book was edited by Russell H. Colley, management consultant and editor of ANA's seven-volume Advertising Management Guidebook series, under the supervision of the ANA committee on the corporate management approach to advertising investment, headed by Mr. Bolin.

Non-members of ANA may order copies at $7.50 each from ANA headquarters, 155 E. 44th St., New York 17. Quantity discounts are available.

Can TV network costs be kept in line?

ANA TOLD PRICES INCREASE WHILE AUDIENCE DOESN'T

Rising costs in the face of a levelling off in audience values are giving television advertisers serious concern about the future efficiency of the medium.

"They are afraid there will be no end to spiralling costs. The opportunities for further audience growth already are so limited that the sponsor's best remaining hope for continuing to improve his dollar's worth "now lies in the area of cost control" —understanding and using to greatest advantage the various discount structures available to the late ANA president and to the award annually by ANA for outstanding contributions to the advancement of advertising.

A selection of outstanding television commercials was presented in 20-minute showings immediately preceding the business sessions on each of the three days.

Samuel Thurm, Lever Bros. advertising vice president, headed the program committee for the annual meeting. Entertainment at the annual dinner last Friday night was arranged by CBS.
Brings Viewers Closer to Their Own Community

A community has a wealth of articulate citizens, thoroughly conversant with Traditions of yesterday, the Culture tomorrow or the Science of tomorrow... And when an inspired program staff has free rein in bringing the finest of talent before the camera...

Then the resultant telecasts are bound to be "highly rewarding"—a phrase often used to describe 'Dateline Boston.'

Every week-day since WHDH-TV went on the air in ’57, Dateline Boston has occupied the choice time from 6 to 6:30, P.M. Developed by the station in association with the Massachusetts Department of Education, the series presents the day-by-day drama of a great region.

It is spiced with infinite variety. One evening, it may breathe new life into New England history. The next program may trace the pulsing record of community progress—or take a searching look at the shape of things to come, especially as they relate to the homes and families of Massachusetts.

Having already passed the 1,000th telecast, Dateline Boston continues to maintain a high level in talent, and in community participation. Numbered by hundreds are the Bostonians and other celebrities, and the New England organizations that have helped make the series so successful. More than 100 cities and towns have taken active part. Long hours of preparation have been rewarded with intense audience-interest.

To Blair-TV, creative cultural programming by great stations like WHDH-TV is a constant source of inspiration. We are proud to serve more than a score of such stations in national sales.

agency experts at the Assn. of National Advertisers' annual meeting (also see pages 36, 38) as reported afterward at a news conference in which the panelists participated.

Still Big Results • For television men, perhaps the most heartening feature of the private panel session—which was held twice to accommodate more advertisers—was the report that in neither session did anyone suggest that television costs had led him to think of abandoning the medium. Moreover, it was emphasized that for the advertiser television's rewards "have been and still are great." They "just come a little bit harder now."

Howard Eaton, media director of Lever Bros., moderated the closed panel session and summed up the highlights for newsmen afterwards. The panelists were William H. Hylan, CBS-TV's sales administration vice-president; Richard Jones, vice president and media director of J. Walter Thompson Co., and John Mitchell, vice president of Screen Gems. They joined Mr. Eaton and supplemented his summary at the news conference.

"While the right show is still a mighty important ingredient," Mr. Jones said, "more emphasis today must be placed on the factor of cost control. It is not only what you buy but how you buy it. More sophisticated techniques are acquired and the man who knows how to be creative with a rate card is a very handy fellow to have around."

Mr. Jones presented figures developed by JWT or compiled from other sources to show:

- The potential tv audience has been levelling off since 1958. Tv saturation, with approximately 88% of all homes now equipped, is virtually complete. The leaps in ownership have shortened now to the point where another five million tv homes may be added by 1965, when saturation is expected to be 92%.

- Average daily viewing per tv home is also levelling off. Since 1956 there has been "a sharp increase" in daytime viewing but a 3% decline in the percentage of homes watching at night, according to JWT figures. Mr. Jones said the daytime increase results largely from the increase in daytime programming, and that the nighttime decrease primarily stems from the fact that a big part of the increase in set ownership in recent years has been among early-to-bed rural families and among former holdouts who could not be expected to be avid viewers.

- Because there are now more stations and a wider choice of programs and because the networks have counter-programmed so successfully, ratings have been tapering off. "The average evening program would have actually had a decline in number of viewing homes if advertisers had not increased their station lists to offset the diluting effects." This device for increasing coverage "has nearly been exhausted, however."

- Network time charges are up by about one-third since 1956, for "roughly the same rate as the growth in total tv homes." But in terms of delivered audience for the average half-hour nighttime program the cost has gone up 57% as against the 26% increase in actual homes reached.

- Talent costs too have increased—by about 30% over the last five years. Actually Mr. Jones said, the figure is higher than this, because the 30% figure is based on averaging the rerun costs with the much higher original costs.

Time Near Peak? • Mr. Hylan said that in his view, network time costs have themselves reached a levelling off point and are not apt to go up much more. He said CBS's tv rate had increased not more than 3% a year for the past three years. Figuring from an average audience base of 10 million homes, the network ratings would go up 80% for every 100% increase in average delivered audience.

Mr. Mitchell said that one of the "roadblocks" hindering stabilization of program production costs is the fact that producers must deal with 37 different unions. Another is that television production of programs is so great that "there is a wage premium" on good writers, producers, directors and other creative personnel. "Everybody wants the good ones," he observed.

Mr. Mitchell said there seems to be a general awareness that television is "facing some sort of inefficiency because of both time and program costs and levelling off in audience." Mr. Eaton said that although nobody at the session indicated any intention of leaving television "a thing that bothers advertisers most is that they don't see any end in sight for this cost spiral."

Homecoming

Cities Service Oil Co., New York, will return to network tv after an absence of 11 years with sponsorship of three special color programs, Cities Service Highways In Melody on NBC-TV on Dec. 3, 31 and April 22 (10-11 p.m.). The series will present Gordon McRae as host and will offer top artists from the popular, opera and folk-music fields. The agency for Cities Service is Lennen & Newell, New York.

(BROADCAST ADVERTISING) 41
RADIO REPS STILL WELCOME
Rep firms deny agencies give them short shift, but some say more aggressive selling needed

Some station representation firms last week came to the defense of agencies against charges that some buyers appear less interested in hearing spot radio presentations than they used to be.

The charges, made by several salesmen, were reported in a Broadcasting study of the radio attitudes of buyers as well as sellers, designed to sort out spot radio’s principal problems and put them into focus (Broadcasting, Oct. 30).

Station Representatives Assn., commenting the article, felt that “direct to the point” information of this kind is valuable and of a problem we have too often failed to recognize and ‘face up to.’

Similarly, Robert E. Eastman & Co. declared the agency attitude underscores a need for continuous selling of radio’s “intrinsic values.”

Officials of both Weed Radio Corp. and Venard, Rintoul & McConnell said it was their experience that buyers are ready and willing to hear—and pay attention to—spot radio sales presentations.

Lloyd George Venard, president of VR&M, said his firm had found all buyers are always anxious to get all the information in both radio and television. He also offered collateral views on other findings in the study, which he called “stimulating” but at variance with his conviction that selling—in both radio and tv—“certainly . . . is more aggressive on the national level than your article indicates.”

Marvin D. Melnikoff, Weed’s director of marketing and research, said a check of his firm’s seven New York salesmen showed they feel that time-buyers treat them fully as considerately as do tv salesmen—that radio salesmen are not treated as “stepchildren to tv salesmen, but are given as much time for their presentations as tv salesmen are.

Only One = Challenging the article’s report on agencies’ radio attitudes, Mr. Venard said in his letter that he knows of one large agency that is not now using radio but is planning on radio for 1962-63 budgets. He said “There is every indication that this agency . . . will be using spot radio in the season coming up.”

Mr. Venard also pointed out that the article “ignored the fact that many advertisers that were using national spot exclusively in radio for a large part of their budget are now buying participations on networks and, as one buyer remarked facetiously ‘The best way to buy radio network is to ask for sealed bids.’ The recognition of participations in radio network is also recognition for spot radio, and history shows that most advertisers either utilize both or alternate.

Mr. Venard thought it “unfair” to timetakers to say that agencies do not give time to radio reps. He said: “We have found that all buyers are always anxious to get all the information in both radio and television. The fact that agencies have not asked for spot availabilities and spot plans in three or four months does not mean that availabilities and plans have not been suggested to the agency.”

Mr. Venard’s letter also gave an example of the article’s reference to rates and deals, which he said is “undoubtedly correct.” He mentioned an account that spent $1.5 million for national spot this year and which is going to spend the same amount in the 1962 period for local radio—the same account, the same agency. “Naturally, national spot is going to be down a million and a half on the basis of this. Stations which hold out for the national rate lessen their chances and it seems that there is less national spot from that agency. Actually there isn’t, but the representatives are not getting the business.

“In checking with other representatives I find that most of them regard the radio departments and their television department salesmen as about the same age with perhaps the radio men being a little older because some of them were in business before television came into existence. In our own particular organization we try to keep the ages balanced.”

Approach for Agency Calls = Mr. Melnikoff explained the approach used by his firm in dealing with agency calls. He said Weed’s radio salesmen call on buyers only after radio has been chosen by clients and top echelon agency executives as the medium to be used. In short, a radio rep doesn’t try to sell a buyer radio as such—it is often not in the buyer’s domain to plan an advertising campaign.”

Lawrence Webb, managing director, Station Representatives Assn., pointed out in his reply that “radio is in the position of being continuously overly researched, rather than creatively considered.” He said the more statistics furnished agencies and advertisers “the more they want.” He maintains that radio “should be measured dollar for dollar, idea for idea along with any other major advertising vehicle. For this reason SRA in its efforts to further the use of spot radio has embarked upon a major pilot project which if it proves successful, will go a long way towards proving that radio advertising can be a dominant part of an advertiser’s media strategy.”

Robert E. Eastman, head of the New York station representative bearing his name, said that the agency attitudes on spot radio point up the need for continuous selling of the “intrinsic values” radio offers. “For the past three years there has been no sustained creative selling of the medium on the part of

Stirring words... important words in these times... have been dramatically recorded for presentation to all freedom-loving Americans. Storer Broadcasting Company, working with Freedoms Foundation at Valley Forge, has prepared a series of one-minute capsule programs. Each is an expression of great American ideals and patriotism. Each is voiced by an outstanding citizen... Among them, Bob Hope, Billy Graham, Barry Goldwater, General Curtis LeMay, James A. Farley. Storer Broadcasting Company is pleased — and proud — to make these tapes available to any interested radio station free of charge.

Personal interviews in a minimum of 2,000,000 different homes each year provide a wealth of data for informed broadcast-buying and product-marketing decisions.
representatives,” Mr. Eastman said. “This is the problem—the medium is not being sold.”

He said Robert E. Eastman & Co. prepared a spot radio presentation early this year which is being shown to agencies and advertisers on a continuing basis. Following the presentation, Eastman leaves the agency with a booklet further outlining the advantages of spot radio. Key ideas in the Eastman pitch include:

(A) Spot radio’s ability to reach busy people where no other medium can and while they are otherwise engaged; (B) radio receives one-third more hours of weekly attention than newspapers and magazines combined; (C) the “warmth and persuasion” of the human voice; (D) the ability to build and develop a personal sales touch through the use of personalities.

The Eastman presentation also points out that 84% of all people turn first to radio for news and 55% for weather. Continuous sales efforts “will gradually plant ideas which will take root, be verbally repeated by agency and client people and re-establish a greater appreciation of the medium and larger national advertiser investment in it,” Mr. Eastman said.

RAB expands activity with new department

The old member service department at Radio Advertising Bureau, New York, is sporting a new name and new functions. And, its old duties will be assumed by a newly formed member service department.

The changes are designed to handle a predicted 300% increase in RAB's activities “in the field.”

The member service department, which handled individual requests of the bureau's more than 1,100 members and maintained field contact with them, has been renamed the member development department. It will assist in local sales development, sales training and the use of sales promotion materials in local markets.

The newly formed member development department's former functions, which included answering more than 11,000 requests annually for help on individual problems, have been shifted to a new member service department. It will assume such additional functions as arrangements for sales clinics and management conferences and will merge the functions of the tape division and the department store radio advertising seminars.

Business briefly...

Lion Packaging Productions Inc., New York, has bought spot time on 17 tv stations and 18 radio outlets for a six-week drive on behalf of the company’s plastic snap-off bags. The business was placed direct.

Salada Tea, product of Salada-Shirreff-Horsey Inc., is now engaged in a 23-market spot radio campaign in the northeast. The seven-week drive, on 27 stations, uses between 25 and 50 spots per week, per station. Agency: Cunningham & Walsh Inc., New York.

Savings & Loan Foundation will sponsor Sentimental Journey, a special program to be broadcast in color on NBC-TV Thur., March 29, 1962 (7:30-8:30 p.m. EST). The foundation will also co-sponsor NBC-TV’s coverage of the

How radio and ‘Mabel’ made Carling beer

GARRETSON TELLS ABOUT 11-YEAR CLIMB IN OHIO TALK

How a brewing company used radio predominantly to move from 62nd place in the industry to fourth place in 11 years was described last week by R. C. Garretson, marketing vice president of the Carling Brewing Co.

And how a hair dressing company uses “perpetual motion” tv to move its product was also described last week by Charles A. Pratt, advertising director of Alberto-Culver Co.

Both were principal speakers at the fall convention of the Ohio Assn. of Broadcasters. OAB met Nov. 2-3 in Columbus, Ohio.

Radio offers the most flexible, the quickest and most effective medium at a reasonable cost “not possible in any other medium,” Mr. Garretson told the broadcasters. He traced the history of the Carling firm’s “Mabel, Black Label!” slogan from introduction in 1949 (when Carling was producing and selling only 360,000 barrels) to 1960 when its output was number four in the brewing industry (5 million barrels).

Throughout this 11-year climb, Carling used radio extensively to target its message in opening new distribution areas, promoting its new “handy” bottle, or directing its message to communities where it was opening new breweries. Mr. Garretson presented a number of tape recordings of Carling radio musical messages and observed that the brewer has even used music alone on radio, thus “delivering an almost subliminal message.”

In describing Alberto-Culver use of tv throughout the year, Mr. Pratt suggested that lower rates should apply in the summer because of the smaller tv audience. He also urged telecasters to hold down over-commercialization. He said he personally feels that much of the criticism levelled against tv today is unjustified. “People outside the industry can’t fully understand the super...

Foodtown has a good reason for putting new money into tv

A profitable 10-store supermarket chain and a constantly rising sales curve dispel any reservations Foodtown Stores Inc., Baton Rouge, La., may have had about television advertising.

Foodtown ventured into tv seven years ago when it purchased five 1-minute spots on WAFB-TV Baton Rouge. The buy represented some 2% of its advertising budget. Today, 34% of Foodtown's ad budget is in the tv medium.

The spots were replaced in 1955 by syndicated programs. Since that time, Foodtown has sponsored eight syndicated series on WAFB-TV. This season, it's back on the schedule with four more: Ripcord, Shannon, Everglades and King of Diamonds, all in prime time.

Foodtown's ads this year emphasize a merchandising program—low prices and why it pays to shop at Foodtown—as well as the corporate image.

"It's really a healthy balance of all three sales approaches," according to John P. Casey Jr., president of Foodtown's agency, Advertising-Promotion Assoc.

"These four shows that Foodtown will sponsor not only confirm its belief in television's ability to sell," Mr. Casey said, "but also show

In addition ... a series of minute spots [will serve] as a booster element."

AFA makes plans for D.C. conference

Three government leaders will headline the Fourth Annual Mid-Winter Washington Conference of the Advertising Federation of America on Feb. 7. Secretary of Commerce Luther C. Hodges will address the luncheon session. FCC Chairman Newton N. Minow and FTC Chairman Paul Rand Dixon will participate in panel discussions with a member of Congress and spokesmen from media, agencies and advertisers.

The one-day meeting will explore advertising's relationship with government, its contributions, content and cooperation, according to conference chairman Ralston H. Coffin, vice president in charge of advertising for RCA. Discussion topics were chosen from a poll of 1,800 AFA members.

Secondary boycott legal, NLRB says

DECISION IN WOGA-IBEW

Broadcasters who thought they and their advertisers were protected from secondary boycotts found Friday they aren't.

In a precedent-making ruling Nov. 3, the National Labor Relations Board held a union may appeal to its members and the public not to deal with a merchant who is advertising over a station with which the union is in dispute.

The case involved Local 662 Radio & Television Engineers, affiliated with the International Brotherhood of Electrical Workers (AFL-CIO), and WOGA Chattanooga. WOGA engineers struck Jan. 11, 1960, when they failed to get a contract from the new management of the facility (formerly WAGC).

The engineers picketed not only the station, but also its remote facilities at a local automobile agency. They also mailed and distributed handbills asking their own members and the general public not to patronize merchants continuing to advertise on WOGA.

The station charged that the union was engaging in unfair labor practices, citing the 1959 Landrum-Griffith Act which prohibits secondary boycotts in a labor dispute.

A trial examiner ruled that the picketing in front of the automobile firm and the distribution of the handbills violate the prohibition against secondary boycotts.

In holding that the distribution of the "Do Not Patronize" pamphlets by the union violated the secondary boycott prohibition, the examiner based his interpretation on the ground that radio stations deal in a service, not a product. The need for this distinction, he pointed out, is that the Landrum-Griffin Act expressly permits a union to "publicize" its dispute and to seek to persuade the public not to buy the products of an employer with whom it is in dispute.

Board Reverses • A majority of the five-man NLRB reversed the examiner on all points. The board held that the picketing at the automobile company was within the law because the station had set up remote facilities and these could be considered an extension of the main station. They also ruled that a radio station's services can be considered a product in the meaning of the labor law. This would bring to the union the right to "publicize" its dispute, they said.

The board's ruling on this point reads as follows:

"We disagree, however, with the trial examiner's finding that the proviso [right to "publicize" dispute] does not protect the leaflets, because in his opinion the primary employer does not 'produce a product' and the secondary employer does not 'distribute' such product within the meaning of the proviso. This finding rests on the trial examiner's concept that a primary employer which provides a service to a secondary employer, such as the radio station's advertising service here, does not 'produce a product' which is 'distributed' because such service is of an intangible rather than physical nature. This concept was recently rejected by the Board in Lohman Sales. As found in that case, labor is the prime requisite of one who 'produces,' and therefore an employer who applies his labor to a product, whether of an abstract or physical nature, or in the initial or intermediate stages of the marketing of the product, is one of the 'producers' of the product.

"Accordingly, the Board held in that case that a primary employer wholesaler, by adding his labor in the form of capital, enterprise, and service to a product manufactured by someone else, became one of the producers of that product. Similarly here, the primary employer radio station, by adding its labor in the form of capital, enterprise and service to the automobiles which it advertises for the secondary employer retailer-distributor of the automobiles, becomes one of the producers of the automobiles. Indeed, by adding such labor in the form of advertising in order to make the automobile saleable, the radio station becomes a very important producer in the intermediate stage leading toward the ultimate sale or consumption of the product.

"And of course the secondary employer retail distributor of the automobiles clearly 'distributes' such product within the meaning of the proviso. For the foregoing reasons, and the additional reasons fully explicated in Lohman Sales for not drawing any arbitrary distinction between different kinds of 'producers of products,' we find that the publicity proviso is applicable to the service-type situation present here. Accordingly, we find that Respondent's leaflet circulation and distribution was protected by the publicity proviso . . . and therefore was not violative.

"Board member Philip Ray Rodgers dissented on both points. He maintained that picketing of remote broadcasts is illegal, and also that the "publicity" proviso of the 1959 Act is limited to products, not services.

Landmark Decision • Gordon M. Freeman, international IBEW president, hailed the decision as one which will afford "the full scope to the protection of the right of labor unions in all industries to advise the public of labor disputes." He added:

"Also important is the holding that the picketing of remote broadcasts as

BROADCASTING, November 6, 1961
Wage & Hour unit interprets new law

The U. S. Dept. of Labor's Wage and Hour Division has issued its interpretation of the revised Fair Labor Standards Act exempting announcers, news editors and chief engineers of small market radio and tv stations from overtime payment requirements.

The bulletin, sent to all Wage and Hour Division offices, was published in the Nov. 2 Federal Register.

The exemption, passed by Congress earlier this year, applies to broadcasters whose major studios are located in a city of 100,000 or less, except where the city is part of a metropolitan area which has a population over 100,000, or in a city of 25,000 or less which is part of such a metropolitan area but which is at least 40 airline miles from the principal city.

The interpretation defines announcers, news editors and chief engineers and contains industry-backed provisions conceding that announcers perform related duties in addition to straight announcing. The bulletin (Part 793, Title 29) also tells how the distances from studio to principal city shall be measured. Copies are available at the Washington national headquarters of the Wage and Hour Division, as well as at regional and field offices.

Audience participated in this tv show-down

There were several wranglers at the showdown at the old city hall in Farmington, N. M. Catv was branded a sidewinding swindle by tv translator interests and catv lawyers reckoned town folks would fare poorly with non-cable reception. The local citizens were so riled up that over 300 of them packed the city hall for the FCC hearing. The second day it was moved to the roomier high school cafeteria. The audience even cheered its favorite witnesses and lawyers, it was reported.

San Juan Non-Profit T.V., a group of local citizens, had applied to the FCC to set up a translator system to bring in three channels. TelePrompter Transmission of New Mexico, which holds a catv franchise for Farmington, opposed the request and the matter was set for hearing before FCC Examiner Elizabeth C. Smith on whether the translator system would require a waiver of FCC rules and whether it would serve the public interest. The nonprofit group ran large, black ads in the local newspaper urging the citizens to attend the hearing and stating that it was being held "to determine if there is enough public interest to grant the permits."

Farmingtonians rallied. After the first day, over 200 attended each of the hearing sessions, which ran three days, including an evening session.

Skirts clean, says Allen, in plea for ch. 3 grant

Answering FCC Broadcast Bureau charges that he lacks the character qualifications to be a licensee, W. Gordon Allen, president of Willamette-Land TV Inc., sole remaining applicant for ch. 3 Salem, Ore., asked the FCC last week to grant him the channel without further hearing (BROADCASTING, Oct. 30).

Mr. Allen said he is sole owner of the company and for that reason deletion of John Truhan from the list of officers of his company should not affect his application. The Broadcast Bureau had said the change should not be allowed without a showing of good cause. Mr. Allen said the bureau relied for evidence on a fraud suit brought against Messrs. Allen and Truhan for making misrepresentations in the sale of KBAM Longview, Wash., to Paul Wickre. Mr. Allen said he wasn't implicated in the guilty verdict. He submitted an affidavit from the general manager of KBAM (before the sale) saying Mr. Allen and his wife had little knowledge of the day-to-day operation of the station and that incorrect financial data had been given to them inadvertently.

As to a charge that Mr. Allen had not given "both sides of a public issue" in broadcasting editorials criticizing the Oregon State Police on his KGAY Salem, Mr. Allen said the only communication he received from the police officer was a letter of denial which Mr. Allen had read on KGAY five times daily in its entirety in the same time segments the editorials had been aired. He said he received no requests for free time or other redress.

Mr. Allen's petition included testimonials to his character and to the fairness of his news and editorial policies from Sen. Wayne Morse (D-Ore.) and from former Oregon officials. Included was a statement by a former Republican state senator, Warren Gill, who said Mr. Allen is a "controversial figure" and that he had felt the sting of Mr. Allen's criticism when he was in the state legislature. But, Mr. Gill said, Mr. Allen is "a man of truthfulness, integrity and high character."

RUNAWAY FILMS

It will be part of hearing to start Nov. 27 on Hill

A House Labor subcommittee, which for months has been considering an inquiry into runaway productions by American makers of television and theatrical films, decided last week to go ahead with it.

But the subcommittee—on the impact of imports and exports on American employment—will lump it with hearings on the foreign-competition problems of 15 other industries.

The hearings will begin Nov. 27 and run for seven days. Rep. John H. Dent (D-Pa.), subcommittee chairman, said the omnibus hearings are necessary because the subcommittee is scheduled to expire Jan. 31, 1962.

Although they won't have the spotlight all to themselves, actors, musicians and technicians will have an opportunity to express their concern about alleged runaway film making.

Announcement of the hearings followed a charge by the Screen Actors Guild that the Motion Picture Assn. was seeking to block the inquiry. SAG said the association feared bad publicity might result if it developed that some companies made films abroad to dodge U.S. taxes and to take advantage of cheaper labor and foreign subsidies.

MPA officials in Washington denied knowledge of any effort to block the hearings. MPA members say they make films abroad for artistic reasons, generally because of the need for foreign locales.

Although runaway productions at one time were the concern mainly of those in the theatrical film business, they have become an issue among those employed in making television films. During a preliminary meeting with union officials in Hollywood in September, Rep. Dent was told that in the last 10 years, 1,280 television film episodes were produced abroad for the American market (BROADCASTING, Oct. 2).

In addition, the American Federation of Musicians claims that 60% of American television films are scored abroad.

Among those expected to testify at the hearings are representatives of the MPA, SAG, Screen Extras Guild, Alliance of Television Film Producers, and the AFM.

52 (GOVERNMENT)
Politz study gives completely new look at radio listeners in Detroit - Great Lakes area

The 1961 WJR-Alfred Politz Study offers a completely new approach in radio research. It so well equips WJR sales representatives to pin-point customers for your products that you are likely to have a bit of a surprise. They're going to come up with some interesting information. But you'll find that as they apply this new kind of radio research to your advertising objectives, you'll be able to reach logical prospects. Prospects who buy soap and soup, new cars and used cars, pianos and grass seed. All kinds of people who buy all kinds of products.

This study is of radio listening in general and of WJR listening specifically. It comprehensively covers a 100-county four-state area, and gives an accurate up-to-date picture of the area, of its radio listening habits, of listener reaction to WJR programming. The study is of individuals, not households. All data refers to listeners aged 15 and over. This method makes it possible to reliably report break-downs by age, sex and socio-economic status. It defines extent of education and whether listeners are home owners or not.

The study compiles the total weekly cumulative audience of WJR and of 174 other radio stations mentioned. It breaks down overall radio listeners and WJR listeners by time of day, day of week, by age, by sex, by socio-economic status, and by where they listen to radio.

Equally important to advertisers, the 1961 WJR-Politz Study points up listeners' preference for WJR's news, sports, advertising and programming, traffic conditions, news reporting accuracy, homemaker programs, farm news and market reports, weather forecasts, all-around helpfulness, public spirit, and listeners' attitudes toward the kind of advertising WJR carries.

An unusual point covered by the WJR-Politz Study is a profile of the types of music listeners prefer according to their age and sex. The music categories rated by listeners include popular music with full orchestration, popular music with small orchestration, folk music, classical music, fine music, and rock 'n' roll.

You've been fairly warned that WJR sales representatives will not just cut the music, but aggressive—and with good reason. So hear them out for your own good and for that of your products. They will give you a revealing new look at the lucrative Detroit-Great Lakes area, served best by WJR.

We believe you'll find the WJR-Politz Study extremely helpful. So give us a call and hear the story out. You owe it to yourself—because WJR is continuing to help advertisers toward well-grounded radio research with this completely new look at radio listeners in the Detroit-Great Lakes area.

The measured area of the Alfred Politz media study released September, 1961. This area includes 6,801,000 people—age 15 and older.
GE, WBC TO FCC CARPET

They're asked to explain why licenses should be renewed, despite price-fixing convictions

After several weeks of executive consideration, the FCC made public last week its investigation of the renewal applications of Westinghouse Broadcasting Co. and General Electric.

In nearly identical letters to the broadcast station owners, the commission asked for information "in the most detailed form..." because of criminal antitrust convictions of GE and Westinghouse Electric Co. The commission pointed out that the "numerous violations" to which Westinghouse Electric Co. and GE officials pleaded guilty "were of recent vintage, flagrant and based on persistent unlawful acts over a period of time."

Earlier inquiries had been sent to WBC and GE but last week's letters were the first that have been made public (CLOSED CIRCUIT, July 31). The investigation has been under way since early this year, when Westinghouse Electric, GE and several other companies pleaded guilty to violating the Sherman Act since early this year.

The investigation has been made public, the FCC said, as to "as to whether the corporate policies, procedures and organization structure [of both companies] are such as to assure proper discharge of the responsibility of top management for the operation of the broadcast stations in the public interest." GE is the direct licensee of WGY, WRGB (TV) and WGFM (FM) Schenectady, N. Y., while WBC is a wholly-owned subsidiary of Westinghouse Electric. WBC owns WBZ-AM-FM-TV Boston, WBZA Springfield, Mass., KYW-AM-FM-TV Cleveland, KDKA-AM-FM-TV Pittsburgh, WJZ-TV Baltimore, KPIX (TV) San Francisco, WOWO Ft. Wayne, Ind., KEX-AM-FM Portland, Ore., and WIND Chicago.

In addition, WBC is seeking FCC approval for the $4.25 million purchase of KLAC Los Angeles. This transaction also is being held up by the renewal problem, the FCC told Westinghouse. Donald McGannnon, president of WBC, said Friday (Nov. 3) that negotiations are underway for extension of the KLAC contract, which expired earlier last week.

The FCC said that the top officials of the parent companies have the "ultimate responsibility" for operating the stations in the public interest and that officials of both Westinghouse and GE stated that they were unaware of the "flagrant and long continuing price-fixing..." The commission is concerned that such officials may also not be familiar with, or exercise proper supervision of, the operation of the broadcast stations."

Background Established - With this background, the FCC asked both licensees to state in detail and with dates of beginning the corporate policies and organizational structure designed to assure that top management exerts its proper responsibilities. Specifically, the licensees were asked to state:

(a) What broadcast policies are determined by the officers and board of the parent company; (b) procedures used to ensure that such policies are carried out; (c) methods for review of policy decisions made by lower authorities; (d) a full showing as to how policies and procedures are implemented in actual practice, and (e) any revisions of the above contemplated.

No deadline was placed on the submission of the required information but the commission requested that it be furnished "as soon as possible." Last week's letter was different from a normal public FCC inquiry for further information in that it did not include such language as "it appears a hearing is necessary to determine..." The commission made no mention of a possible hearing on either the GE or Westinghouse applications.

McConnaughey in WSPA-TV case

George C. McConnaughey, former chairman of the FCC, was subpoenaed by the commission last week to testify in the court-remanded WSPA-TV (ch. 13) Spartanburg, S. C., case. He is expected to appear Nov. 13.

The subpoena was signed by Chief Hearing Examiner James D. Cunningham at the request of Ben Cottone, attorney for WAIM-TV (ch. 40) Anderson, S. C. WAIM-TV has protested the major facility changes of the Spartanburg station through several FCC hearings and the courts.

Mr. McConnaughey, currently practicing law in Columbus, Ohio, was subpoenaed after testimony last week by WSPA-TV President Walter Brown about his conversation in September 1956 with Mr. McConnaughey, then FCC chairman. Mr. Brown said he spoke to Mr. McConnaughey in an effort to get the FCC to seek a U.S. Supreme Court review of a lower court remand of the case to the commission.

Mr. Brown said he was concerned because the lower court revoked the grant to WSPA-TV and accused the station's licensee, Spartan Radiocasting Co., of misrepresentation. He said a Supreme Court review was the only way this "stigma" could be removed and that "I talked to anybody that would listen to me about this decision."

Another person he talked to about the court remand, Mr. Brown said, was Sen. Strom Thurmond (D-S. C.). He denied, however, knowing of or motivating a letter the senator wrote Chairman McConnaghey shortly after it was

D. C. or St. Louis?

On its own motion, the FCC last week called a temporary halt in the license revocation proceedings against KWK St. Louis, and canceled hearings scheduled to resume today (Monday) in Washington (BROADCASTING, Oct. 30). The principle issue is, in fact, whether the hearing will be held in Washington, as ordered by Examiner Forrest L. McConnaughey, or in St. Louis, site of the FCC's presentation of its case against KWK (BROADCASTING, Sept. 18).

Pending is an appeal by the FCC's Broadcast Bureau from the examiner's ruling for a Washington hearing and a reply by KWK. The FCC also ordered that no depositions will be taken in the case until further order from the commission itself. KWK sought to take a series of depositions last week in St. Louis, Chicago and Milwaukee.
Politz Study gives completely new look at radio listeners in rich, rich Southern New England

The 1961 Alfred Politz survey which measured audience in southern New England has shown a tremendous rate of growth in radio listening . . . and an even greater rate of growth in the WTIC audience. Since 1955, when Politz last surveyed the same area, the number of radio broadcasting facilities serving southern New England has grown from 104 to 120 stations. Adult radio listenership to all stations in the area has grown from 87% to 98%. During the same period, the WTIC audience has grown from 36% to 44% of all adults in the area served by 120 stations.

In specific numbers, a total of 1,438,000 adults listens to all radio during an average week in southern New England . . . and 666,000 of these listen to WTIC.

And there's more! Politz tells us that more people are listening more consistently during every time period and on every day of the week, including Saturday and Sunday. But that's a detail you'll want to hear more about from your Henry I. Christal man. May we suggest that you call him soon for details of the big Politz survey. You'll learn first-hand how well radio, in general, and WTIC, in particular, are selling the great and wealthy southern New England market.

HARTFORD, CONNECTICUT
REPRESENTED BY HENRY I. CHRISTAL COMPANY
It has to be more than a copywriter's dream

Prove it! With this implicit attitude the Federal Trade Commission has begun a new campaign against an age-old advertising dodge—the "four of five doctors recommend . . ." or the "Two out of three housewives prefer . . ." All media are included in this attack.

This time the FTC is trying a new tack. It's writing to all companies using this copy formula and asking them to furnish proof that the claims are based on something more tangible than just a copywriter's inspiration.

The campaign was initiated by the FTC's Bureau of Deceptive Practices. It is under the direction of Charles A. Sweeney who heads the bureau staff which scans newspaper and magazine advertising and monitors radio and tv commercials.

If after analysis of the answers, Mr. Sweeney explained the other day, there seems to be little basis for the claim, the company is going to be asked to discontinue the copyline. It will all be on an informal basis, he explained, and it's expected that most advertisers will accept the suggestion when it applies to them. When an advertiser balks, Mr. Sweeney continued, the bureau will ask the commission for a formal complaint.

Key to the bureau's new approach, it's understood, is the belief that quicker action can be obtained on an informal, widespread basis than in the legalistic, time-consuming traditional method of first issuing a complaint and then holding hearings to determine if the statements are correct or not. A secondary purpose of the new system, it's presumed, is that the burden of proving a claim is placed on the advertiser; there is no need for the FTC to disprove the message.

Many of the products using the comparative, adjectival phrase are in the drug and food area, it was learned. The advertising appears in many media.

Engineer fired after Hill inquiry

Tuschman Broadcasting Corp., licensee of WABQ Cleveland, last week fired its chief engineer for invoking the protection of the Fifth Amendment in refusing to answer questions from a congressional subcommittee about alleged Communist affiliations.

Subpoenaed before a subcommittee of the House Un-American Activities Committee on Oct. 27, (BROADCASTING, Oct. 30) Rudolph Jones denied he belongs to the Communist Party. He also answered "No, absolutely not," when asked if he had been a Communist courier while serving as a shipboard radio operator during World War II.

But he invoked the constitutional guarantee against self-incrimination in refusing to answer questions about past membership in the Communist Party and other questions about alleged Communist Party activities.

In announcing the dismissal, the FCC on Oct. 30, Tuschman said it had learned, "with profound shock and amazement," that Mr. Jones "took refuge behind the Fifth Amendment rather than answer questions. . . ."

"It is not enough," the statement said, "to avoid wrong-doing; we must also be above the suspicion of wrong-doing. . . . The refusal of Mr. Jones to answer all questions of the committee fully and frankly does not measure up to the standards of this corporation or radio station WABQ."

Mr. Jones was one of five witnesses who invoked the Fifth Amendment during the subcommittee's hearings Oct. 26-27 on infiltration into communications industry technical positions by alleged Communists. Three of the others are radio or television engineers in New York. The fourth is secretary-treasurer of the American Communications Assn.

The subcommittee plans to resume its hearings later this month. It is considering legislation (HR 6) to empower the FCC to deny radio operator licenses to persons who refuse to answer questions from federal agencies about alleged Communist activity. The subcommittee indicated it might broaden the bill to include station licenses already granted.

Court modifies decision on pro grid packages

Package tv deals for professional football games, beginning next year, received approval last week when Federal Judge Allan K. Grim, Philadelphia, set aside the order he issued last summer prohibiting this practice.

Judge Grim modified his July 20 order after Congress passed and President Kennedy signed a bill to exempt professional football from the antitrust laws (BROADCASTING, Sept. 25).

In his ruling last summer, Judge Grim held the $9.3 million two-year package deal between National Football League and CBS to be illegal. He ruled that it violated the antitrust laws because it eliminated competition.

Under the new law professional football, baseball, basketball and hockey leagues are free to sell their television rights as a package without fear of prosecution under the antitrust laws. It also includes a provision prohibiting tv blackouts of professional football games unless the clubs and the network involved agree not to telescast another game into the home area of a team playing at home. The law also provides that the antitrust exemption will be denied in arrangements providing for telescasts of pro football games Friday nights and all day Saturdays into areas within 75 miles of a college game site.
Politz study gives completely new look at radio listeners in Wisconsin area

The recently completed Politz study pinpoints the listening habits of a huge Wisconsin-area populace . . . and verifies that WTMJ's listener-pulling popularity reaches far beyond its point of origin in Million-Market Milwaukee.

The Politz study involved a 45-county segment (38 in Wisconsin, 7 in Michigan) of WTMJ's vast broadcasting range. In the comprehensive poll of these counties, listeners mentioned 114 different radio stations . . . yet one out of every three stated that they listened to WTMJ at least once every week.

With many facts like this at your fingertips, you'll find it easy and profitable to "air" your sales messages in the lucrative Wisconsin area. For your copy of the Politz study, write Joe Killeen, WTMJ Sales Manager. Or the Henry I. Christal Co. in any of the cities below.

Shaded area of map indicates the 45-county segment of WTMJ's broadcasting range covered by the Politz study.
RUSH FOR VHF DROP-INS SWAMPS FCC

Interim operations threatened by number of applicants

The rush for vhf channels the FCC recently added in three markets creates a problem of boom proportions for the agency itself.

In its order adding the channels in Rochester and Syracuse, N.Y., and Grand Rapids, Mich., the FCC asked that applicants submit plans for an interim operation which would expedite a third service to the markets. But with 6 applicants in Grand Rapids, 10 in Syracuse and 11 in Rochester (as of Nov. 1, which the FCC indicated as a possible cut-off date), an interim solution to suit all applicants and the courts is difficult to reach.

An FCC spokesman indicated that cumulative hearing dates will be set as soon as the staff can process the applications. After this date is set further applications will not be accepted. An order setting the applicants in Syracuse for hearing was to be considered by the FCC last week but had to be withdrawn when two additional applications were received shortly before the meeting.

Almost all applicants have requested special temporary authority to operate on the channels. Choosing just one in each market for interim operation might be almost as complicated as making the final grant.

ABC-TV, the network with which most applicants expressed a desire to affiliate, in August suggested an interim plan, certain features of which the FCC is likely to adopt (BROADCASTING, Aug. 21). The network asked the FCC to specify criteria under which it would permit interim operation and suggested the applicants in the various cities meet and work out a trusteeship for the channel in which all interested applicants would have equal shares.

Compromise - Participants would have to settle upon a common transmitter site and antenna type for which the winning applicant would reimburse the trustee organization. Studios could be temporary and it is assumed that the station might not operate on a full schedule according to the ABC-TV proposal.

An FCC spokesman said broadcast experience or programming during the interim period would not be considered in the hearing for the channels. "We would not expect as much in the way of programming from this interim operator as we would from a regular licensee," he added. But, he said, engineering and technical details should be the same for the interim operation as they would be expected to be for the eventual grantee, if the temporary operation is to serve the public.

With such a diversity of applicants it may well be difficult to get agreement on an equitable interim plan. If one applicant should appeal the FCC-approved interim plan to the courts the final grant could be further delayed, or indeed the start of any operation whatsoever. Consent to an antenna site which the winning applicant would "inhere" might also be hard to come by.

Eleven applications were filed last week for the three vhf channels.

For Grand Rapids ch. 13: Major Television Co. (stockholders own WCAR Detroit); MKO Broadcasting Corp. and Peninsular Broadcasting Corp. (broadcaster and theater-owner H&B Balaban Corp. has 20% holdings). Earlier applicants include Broadcast Co., Grand Broadcasting Co. and West Michigan Telecasters Inc. (which submitted a plan for interim operation it estimated would enable it to start telecasting within four months).

For Rochester ch. 13: Ivy Broadcasting Co. (also Syracuse applicant and owner of six radio stations), Leon Halperin, Citizens Television Corp., Federal Broadcasting System (owns WSAY Rochester and WNIA Cheektowaga) and Heritage Radio & TV Broadcasting Inc. Earlier Rochester applicants: Community Broadcasting Inc. (which requested dual operation on ch. 15 Rochester, although similar requests have been denied by the FCC), Anthony R. Tyrone, Flower City Television Corp., Genesee Valley Tele Co. Inc., Star Television Inc. and Rochester Area Educational Television Assn. Inc.

The Joint Council on Educational Broadcasting has appealed to the court to reverse the FCC's decision not to reserve the Rochester channel for educational radio (BROADCASTING, Sept. 5), adding complications to that case.

West Michigan Telecasters last week asked the FCC to add to the comparative hearing a trafficking issue in relation to Grand Broadcasting Co.'s application. Both companies seek ch. 13 Grand Rapids.

West Michigan claimed that Leonard A. Versluis Sr. has become the "major principal" of Grand and that he is providing about $340,000 of Grand's $525,000 capital through direct investment and loans. West Michigan charged Mr. Versluis with holding all or part of WLAV-AM-TV Grand Rapids and WLOD Pompano Beach, Fla., for short periods of time and reselling his interests at considerable profit.

Small business group sets new hearing date

A Small Business Committee hearing on radio and television advertising opportunities for small businessmen, scheduled to get underway today (Monday), was postponed last week to Dec. 6-7. The delay, according to Rep. Dale Alford (D-Ark.), chairman of the subcommittee conducting the probe, is to permit staff investigators to develop newly uncovered evidence.

Rep. Alford last month had said the subcommittee had received complaints that radio and television stations and networks discriminate against small advertisers in the sale of prime time.

As of late last week, however, the subcommittee's witness list disclosed no one likely to make such a charge against broadcasters. The witnesses included representatives of the Television Bureau of Advertising, the Radio Advertising Bureau, and the FCC.

The commission had a prepared statement, and the two officials scheduled to speak for it, Kenneth Cox, Broadcast Bureau chief, and Hyman Goldin, head of the new research and education division, were reported ready to discuss the problem in general terms only.

Rep. Alford's announcement said that staff work, "including field investigations in various sections of the country," had uncovered new evidence and brought to light "new witnesses whose

Since the results of this authoritative study have been compiled, we have been spreading the word about this new dimension in radio audience research. At every meeting, a common denominator of basic questions are asked—

**QUESTION:** "How many people were called?"
**ANSWER:** They weren’t called. They were personally interviewed. 1,248 adults aged 15 and over. At the conclusion of the interview they were given a diary to record their listening habits. Of these, 80 per cent were returned.

**QUESTION:** "Did they know who was sponsoring the study?"
**ANSWER:** No. Nor did the interviewer. Result: 111 different radio stations’ call letters were mentioned.

**QUESTION:** "Does this study show your market’s competitive picture?"
**ANSWER:** No. The published results show the picture of radio listening in general in our market and specifically the kinds and numbers of WGY listeners, where they listen, the times of day they listen and their attitude toward WGY programs.

**QUESTION:** "All right then, when do they listen?"
**ANSWER:** The study effectively refutes the traditional theory of peak listening periods. Instead, it dramatically shows the consistent size and strength of the audience throughout the week. Of particular interest is the size of the audience during evening hours and on Saturday and Sunday.

**QUESTION:** "How about being more specific. For example, how many people does WGY reach between noon and 3:00 P.M.?"
**ANSWER:** There are an estimated 1,322,000 adults age 15 and over in the 25 county area measured by Politz. The weekly WGY cumulative audience for the noon to 3 P.M. period is 239,000. And remember—they have a choice of 111 radio stations.

There are many more questions and twenty-seven pages of data to provide the answers. For the complete Politz study of the WGY listening area, contact the nearest Henry I. Christal Company office.

Senate unit to air space committee plan

An FCC-created Ad Hoc Carrier Committee's plan for developing a privately owned and operated communications satellite system (Ad Hoc Carrier Committee) will get its first Capitol Hill going-over this week.

The Monopoly Subcommittee of the Senate Small Business Committee will hold a hearing on the plan Wednesday and Thursday, resuming an inquiry begun in August (BROADCASTING, Aug. 7). The subcommittee, headed by Sen. Russell Long (D-La.), held six days of hearings then on the public policy questions involved in the ownership and control of a satellite communications system.

Sen. Long at that time expressed apprehension that AT&T -- the largest company represented on the ad hoc committee -- would eventually dominate any private ownership system. Now that that committee's report has been submitted, Sen. Long said last week, his subcommittee wants to explore it and "the FCC's reaction to it."

The report, prepared by representatives of nine international common carriers, recommends the creation of a non-profit corporation to develop and operate the space communications system. The corporation in turn would be owned by the international common carriers, and controlled by directors representing the owners, non-owning users and the public.

FCC Chairman Newton N. Minow and the six other members of the commission and Lee Loevinger, the Justice Dept.'s antitrust chief, are among those scheduled to testify.

Mr. Loevinger will be the first witness on Wednesday, and will be followed by Dr. Edmund Welsh, executive director of the President's Space Council; Omar Crook, counsel for Hawaiian Telephone Co. and chairman of the Ad Hoc Carrier Committee; and S. M. Barr, vice president of Western Union, one of the members of that committee. The second day of the hearings will be devoted entirely to testimony by the FCC.

WOAI-TV not guilty of unfairness -- FCC

In a telegram to the campaign manager of a Texas congressional candidate who charged discrimination by a tv station, the FCC said it felt the station had not violated provisions of Sec. 315 of the Communications Act.

One of the complaints from the manager of Democrat Henry B. Gonzales' campaign for the House from Texas in a special election was that WOAI San Antonio allocated all five-minute spots before and after newscasts to Republican candidate John Goode Jr. He charged that comparable time periods had not been offered the Democratic candidate and that the station editorialized against his candidate.

The FCC responded that WOAI-TV had answered the charges at the agency's request; that in view of time segments offered to Mr. Gonzales and rejected by him and the station's possible obligation to candidates other than those of the major parties, the FCC felt WOAI-TV had acted acceptably.

The commission said the editorializing matter remains an "open question" and reminded the station of the FCC "fairness doctrine."

Fm station seeks rules to reduce interference

Rules aimed at reducing interference between fm stations were recommended to the FCC by WKFM (FM) Chicago.

The station suggested that when Class A fm channels are assigned immediately adjoining a Class B channel, the Class B station should be allowed to increase power sufficiently to equal the power now being produced in the intermediate area of the Class A station.

WKFM said stations engaged in stereocasting should be required to use an oscilloscope to read percentage of modulation to prevent "splatter" or overmodulation. The oscilloscopes would be read in conjunction with the station's regular modulation meter which should be calibrated daily.

The FCC should require stations providing background music services to restrict these transmissions to the band reserved for such service, WKFM said. It also asked the commission to prohibit fm stations from creating false effects by installing tone controls on the pre-amplifiers of their source material.

VOA power play set to tell news of bomb

The U.S. Information Agency was scheduled to turn up the volume of its Voice of America all the way yesterday (Sunday) in an unparalleled effort to break through Soviet jamming and spread the story of Russian nuclear testing behind the Iron Curtain.

USIA director Edward R. Murrow said every facility capable of carrying a signal to the Soviet Bloc would be pressed into service for eight hours of special programming. Plans called for as many as 52 VOA transmitters, totaling 433.1 kw, to carry the story over 80 frequencies, in a massive effort to smash through the Soviets' 2,000 interference transmitters.

The VOA has been broadcasting the story of the tests behind the Iron Curtain since they were begun on Sept. 1, and U.S. officials are confident that, despite jamming, many Soviet citizens first heard of the Russian nuclear explosions from the VOA. The Soviet government itself has not yet announced the tests.

But the broadcast barrage planned for Sunday -- which would be the equivalent in power output of more than 86 of the strongest U.S. broadcasting stations operating simultaneously -- has never been approached.

FCC allows more time for comments on uhf

The FCC last week went along partially with broadcaster pleas for more time to comment on its proposals to aid uhf expansion, but made it plain the Dec. 4 deadline holds for comments on its proposal to delete vhf channels in eight mixed markets and make short-spaced vhf drop-ins in eight others. The deadline in the overall policy docket was moved to Feb. 2.

Several vhf stations in markets facing deintermixture asked for more time to comment in their dockets. Assn. of Maximum Service Telecasters asked the FCC to postpone comments in all proceedings until at least April 4.

WISC-TV Madison, Wis., which has previously requested an evidentiary hearing and designation by the FCC of its deintermixture criteria, last week asked for a full field study and field hearing by the FCC on the agency's proposal to delete WISC-TV's ch. 3 from Madison making the market all uhf.
Gentlemen:

I wanted you to have a copy of the letter which I am now sending to Newton Minow at the F.C.C.,

Mr. Minow,

I want to take this opportunity to record my personal commendation of our local N.B.C. affiliate W.F.L.A. This is the most outstanding station I have ever had the privilege to watch. It is owned by the Tribune Co., who as in their T.V. policy, are the essence of fair play in their newspaper The Tampa Tribune. Their editorial is never biased and they give free access to their readers for expressions of all viewpoints.

W.F.L.A. carries the most informative public service program of any in South Florida. Their Battle Grounds of the Cold War has been an outstanding service to the community. The schools have participated in these shows and give prizes for the best essays on the different subjects. All children who turned in a report on these shows received extra report card credits. The series is now presenting Dr. Albert Burke, and his show, A Way of Thinking. I'm sure you don't need to be told of the growing popularity of this show and the appreciation we all feel for having access to it.

Besides the magnificent news coverage that W.F.L.A. has both nationally and locally, I want also to call attention to their special science editor Roger Early. Mr. Early, an exceptionally learned man, has put his talents to varied use as a tie in with the news coverage. He explained in the most minute detail the space shots of our astronauts. He also has explained fallout as well as many other otherwise puzzling aspects of the news. These shows are tremendously beneficial to adults and children alike. And might well be considered for the special children's shows that you have recommended to the national networks.

In line with your new policy of holding public hearings for stations license renewals, I would like this letter to go on record, as in full support of a fine, public-spirited station, W.F.L.A., of Tampa.

Sincerely,

Mrs. Robert Gammon
2180 29th Ave. N.
St. Petersburg

Thank you so much, Mrs. Gammon...
Crosley loses ch. 13 on diversification

FCC'S 1957 FINDINGS DIDN'T CHANGE—JUST ITS VIEWS

Diversification will be a word long remembered by Crosley Broadcasting Co. For it was an "additional discussion" of that term by the FCC which caused Crosley to lose its authority to operate ch. 13 WLWI (TV) Indianapolis.

The commission made public last week the text of its decision which reversed a 1957 grant of ch. 13 to Crosley and awarded the channel to WIBC Indianapolis (Broadcasting, Oct. 30). In reversing its field by 180 degrees, the FCC left intact all its 1957 conclusions with the following notation: "The different result flows from our different view of the weight to be accorded the factors . . ." where there is a cognizable difference between the applicants.

In addition to the diversification issue, WIBC was favored in local residence, civic participation, integration of ownership with management. The two applicants were equal in several other criteria while Crosley was preferred in past broadcast record and experience—upon which much weight was given in the 1957 grant.

The diversification issue against Crosley arose because of its ownership of WLW-WLWT (TV) Cincinnati, WLWC (TV) Columbus and WLWD (TV) Dayton, all Ohio. (Crosley also owns WLWA (TV) Atlanta which was not involved in the FCC reasoning.) "Illustrative of the concentration of broadcast interests resting in Crosley are those findings which disclose that the Grade B contours of each of the existing Crosley tv stations" overlap, the FCC stated.

WIBC and the Press—WIBC is wholly owned by Richard M. Fairbanks and members of his family, who also have a 30% interest in the Indianapolis Star and News. It should be noted, the FCC said, that the Fairbanks family has the newspaper interest, not WIBC itself. "Beyond its 30% stock interest, however, the Fairbanks family has no significant voice in the affairs . . ." of the Star and News, the commission said. As a practical matter, the owner of 70% of the papers (Eugene C. Pulliam—Central Newspapers Inc.) is in control, the FCC ruled. "In these circumstances, WIBC cannot be held fully assessable with the newspaper interest in the sense of concentration of media of mass communications."

On a purely local (Indianapolis) basis, WIBC would possess a greater degree of concentration than Crosley but "this conclusion is tempered by the degree of competitive media in Indianapolis," the FCC concluded. The agency said that it is well established that competition in the dissemination of news is a pertinent factor in comparative evaluation when an applicant owns a chain of stations "in the same general section of the country."

"Against this background," the commission said, "it is our judgment that diversity of news dissemination and of program and service viewpoints will be better enhanced by grant of the WIBC application. It is true that . . . Crosley experiences widespread competition, but this consideration does not offset the demonstrated concentration of broadcast interests by Crosley in Ohio-Indiana. . . . The conclusion is compelling, therefore, that Crosley's area concentration of broadcast interests outweighs the adverse comparative effect the local concentration of WIBC."

Personnel Changes—The grant to WIBC was made on a 4-2 commission vote. The majority consisted of Commissioners Newton N. Minow, Robert T. Bartley, Robert E. Lee and Frederick W. Ford, with Commissioners Rosel H. Hyde and John S. Cross favoring Crosley. Commissioner T. A. M. Craven, whose 1957 vote broke a 3-3 tie in favor of Crosley was the basis for a successful court appeal, did not participate.

Voting for Crosley in 1957 (in what then was a four-way contest; two other applicants have dropped out since then) in addition to Commissioner Craven were Commissioners Richard A. Mack, John C. Doerfer and George C. McConnaughey—none of whom are now on the FCC. Dissenting at that time were Commissioners Hyde, Bartley and Lee. Commissioner Craven voted only after the general counsel ruled he had an obligation to break the then existing 3-3 tie.

While in private practice as an engineer, Commissioner Craven had represented WIRE Indianapolis, one of the ch. 13 applicants since withdrawn. WIBC appealed the Craven vote to the U. S. Court of Appeals because he had not heard oral argument. The court then remanded the case to the FCC and said Commissioner Craven should not have participated.

In its order last week, the commission gave WLWI until Nov. 30 to cease operations. Crosley, however, already has announced plans to appeal.

The Dangling Comparative
Reaches Eastern Iowa

WMT-TV is a gasser in Eastern Iowa because it's a friendlier station, probably one of the watchingest in all hereabouts; it motivates Iowans up, from early A. to late P.M. It keeps them uppier into all hours of the dark night, brainwise. Its fatter signal is pushier down the antenna, and makes scruptiouser pictures. Anyone can get WMT-TV in Eastern Iowa, like Grandma used to make, untouched by human hands except all those enginees. It's the newsier station. It's the farmier station. It's musicier. It's dramaier. It's movier. It's footballier. It's basketballier. It's entertainmentier.

It's . . . resultier.

WMT-TVier
Cedar Rapids—Waterloo
CBS TV for Eastern Iowa
Represented by the Katz Agency

K-WMT, Fort Dodge; WEBC, Duluth
animals—has been dismissed by U. S. District Judge Alexander Holtzoff in Washington. Judge Holtzoff held, in granting the NBC’S motion to dismiss the complaint, that the court had no jurisdiction and that the complaint raised a question of censorship.

The Society attempted to enjoin the showing of the Feb. 19 program by claiming it violated the District of Columbia laws concerning the treatment of animals. No cruelty to animals was involved, NBC said, since the event was overseen by the Humane Society of America.

The FCC last week...

- Announced rulemaking which would substitute ch. 24 for ch. 66 in Erie, Pa. The proposed allocation shift would delete ch. 39 from Sharon, Pa., and ch. 28 from Flint, Mich., and would involve certain other changes. The FCC deferred action on a request by WEPA-TV Erie (ch. 66) that it be authorized to operate on ch. 24. WICU-TV (ch. 12) there asked that this request be deferred until the agency has reached a decision on whether it will deintermix the market. While deintermix is pending, low uhf channels should not be earmarked for individuals, WICU-TV argued.

- Instituted license revocation proceedings against WLW-FM (FM) Cranston, R. I. Charges against the licensee, Neighborly Broadcasting Inc., include misrepresentations of fact, remaining silent or operating at reduced power without authorization, “willful and repeated” violations of specific rules, failure to take corrective action upon being informed of such violations, and possible financial unfitness. The hearing will be held in Providence, R. I., at a time later to be specified.

- Postponed from this Thursday (Nov. 9) to Nov. 30 hearing on license renewal application of WREA East Palatka, Fla. The station was set for hearing on programming, unauthorized transfer of control, and other issues (Broadcasting, Aug. 14). The station has been off the air since February and its transmitter has been repossessed and its antenna dismantled, according to FCC records. WREA’S owners, Anthony, Peter and Concetta Corrado, asked for a delay in the hearing, to be held in East Palatka, because their attorney had withdrawn from the case.

- Was asked by Kahn Research Labs and KVOO Tulsa to reconsider its order denying a request for rulemaking to establish am stereo standards. Both said the FCC erred in ignoring its mandate from the Communications Act to study new uses of radio. Kahn termed the FCC refusal “an abuse of discretion.” It disagreed with the FCC that there is little public or industry interest in am stereo. KVOO said the FCC’S order denied stereo service to that portion of the public presently beyond reach of fm stations.

- Was asked by the Governor of South Carolina and federal, state and local officials from that state to deny the request of Wilton Hall, licensee of uhf WAIM-TV Anderson, S. C., to delete ch. 10 (VIS-TV) Columbia, S. C., and move it to Anderson (Broadcasting, Oct. 23). The officials claimed the operation in Anderson would be “substandard, ineffectual and limited by interference.” They further charged that the facility would not serve Spartanburg and Greenville, S. C., also as Mr. Hall had said, but only Anderson.

A QUESTION OF TOO MANY SPOTS

FCC raises point in giving WESY short-term renewal

An over-abundance of commercial spots, according to FCC reasoning, and unfilled programming commitments resulted in a license renewal of only one year for WESY Leeland, Miss., last week. In issuing WESY a short-term renewal, the commission charged that the station has failed to “exercise the degree of responsibility” required of licensees.

The commission noted that WESY proposed to broadcast 450 commercials weekly (86.5 hours air time) in its original application in 1957 but actually had aired 1,212 spots according to the composite week submitted in the instant application. Further, the commission said, the 1957 application proposed the following program format: entertainment, 71.5%; religious, 6%; agricultural, 2%; education, 1.5%; news, 10%; discussion, 1%; talks, 1.5%, and miscellaneous, 7.5%.

Actual performance of WESY listed in the renewal application gives the following, according to the FCC: entertainment, 63.98%; religious, 26.90%; agricultural, 0%; education, 0%; news, 9.12%; discussion, 0%; talks, 0%, and miscellaneous, 0%. Following an FCC inquiry, WESY amended its proposals to show additional programming categories and an average of 14 commercial spots per hour.

The FCC said the actual variance between past proposals and actual performance was not as "marked" as first indicated, it was of sufficient degree to negate against a three-year renewal. Furthermore, the FCC said, 14 commercial spots hourly still raise the question of excessive program interruptions contrary to the public interest.

Commissioners Rosel H. Hyde and T. A. M. Craven dissented to the one-year renewal for WESY, the 25th short-term authorization the FCC has issued in the past year.

COURT UPHOLDS CBS-TV

Decision goes against Amana in suit against CBS policy

Since the sale of a "privilege" is involved and not the sale of a "commodity," the volume discount on the sale of network television time does not violate the provisions of the Clayton Act, the U. S. Court of Appeals for the Seventh Circuit, Chicago, ruled unanimously last week.

Nor, for this reason, does the law forbid must-buys for certain owned-stations or affiliates, or the requirement that a sponsor use a specific program in which the network has financial interest, the court said.

The interpretation affirmed a lower court’s ruling that dismissed a treble-damage counterclaim suit brought by Amana Refrigeration Inc. against CBS-TV. The lower court earlier had upheld a suit by CBS-TV against Amana.

COLOR TV OWNERS
RATED A TOP-CLASS MARKET

A study by Market Facts, Inc. shows the median income of Color TV families is $13,123 as against a $5,417 national average. seeking settlement of payment claimed to be due from Amana for co-sponsorship of the Phil Silvers Show several years ago. Amana now can seek review by the U. S. Supreme Court if it chooses, although no decision had been made as of late last week.

The appeals court did not agree with Amana that the purchase of time and programs accurately constituted a "commodity" in the broad sense defined by the Clayton Act. Nor did the court feel the agreement was merely a "services" contract as claimed by CBS. "Although both services and time are involved," the court said, "we conclude that, in its essence, the contract alleged is a purchase by Amana of the privilege of having itself identified as sponsor of the program broadcast, and of making use of the permissible portion thereof for advertising its products."

The court explained it could not consider the sponsorship agreement in the same context as the sale or lease of a commodity, which it considered means goods, wares, merchandise, machinery and supplies under the definition of the

First foreign-language tv grant

If you don't understand Spanish, you'll be rather confused by the audio signal of a new tv station in Los Angeles granted by the FCC last week. Spanish International Broadcasting Co. received a construction permit for ch. 34 on its proposal to telecast only in the Spanish language.

This is the first commission grant for an all-foreign language tv station in the U.S. and the specialized authority was given over the dissent of Commissioner Frederick W. Ford. Spanish International plans to operate with 244 kw from 2,940 ft., Mt. Wilson.

Commissioner Ford dissented on the grounds the grant furnishes a precedent for authorizing miscellaneous specialized uses of uhf. He said it will impair the FCC in its current rulemaking designed to promote the use of uhf and that it may hurt educational tv plans to use uhf in highly-populated areas.

RKO purchases programs from CBC for U.S. showing

RKO General Inc. has acquired 21 one-hour drama programs from Canadian Broadcasting Corp. for distribution to stations throughout the country, it was announced jointly today (Nov. 6) by Hathaway Watson, vice president in charge of broadcast operations for RKO General, and A. K. Morrow, director of English Networks for the CBC.

The taped programs were carried on CBC-TV over the past two years. They will be shown on the five stations owned by RKO General after the first of the year, and are being offered for sale to other stations. RKO General has the distribution rights to the programs for five years.

New production facility

Producing Artists Inc., tv commercial production house, New York, has started construction of a $500,000 center for the production of commercials and feature length motion pictures.

Located on West 59th St., two blocks south of the new Lincoln Center for Performing Arts, the two full-size studios are being constructed in a former warehouse and garage, with editing rooms, a dubbing stage and the studios under one roof. Innovations include walls which may be moved hydraulically to convert the two stages into one unit representing the largest amount of midtown New York floor space available for film production.

Film sales...

9 Special Features (Seven Arts Associated): Sold to KHSL-TV Chico, Calif., and KICU-TV Visalia, Calif.

Films of the 50's Vol. II (Seven Arts Associated): Sold to WDAF-TV Kansas City, Mo.; WICU-TV Erie, Pa., and WIS-TV Columbia, S.C. Now in 59 markets.

Films of the 50's Vol. I (Seven Arts Associated): Sold to WKRC-TV Cincinnati; WICU-TV Erie, Pa., and WIS-TV Columbia, S.C. Now in 111 markets.

Benton series banned for use 6 a.m., Sundays

William Benton’s Encyclopaedia Britannica Inc., a million-dollar buyer of paid advertising space in magazines and newspapers to sell its various books, plans to distribute to television stations next spring a "free" series of 13 half-hour film programs based on its 54-volume series, “Great Books of The Western World.” The series is titled Great Voices From Great Books and stars Hans Conreid reading from the EBI volumes and discussing them with notable scholars and authorities in various fields.

The programs, while free of charge to stations, may not be sold for sponsorship, local or otherwise, and they must be scheduled in reasonably good periods. "Sunday morning at 6 a.m. won’t be acceptable," one EBI source explained.

EBI also is understood to be in search of and "will pay well" for a television executive to assist in the distribution work for the new program series and in the servicing of other EBI public service and educational materials for regular network programs and local station use.

Four pilots of the “Great Voices” series already have been aired as public service programs by WBKB (TV) Chicago, EBI said. Executive producer is Jim Stewart of Television Features Inc. Mr. Stewart and his wife are principal performers on three regular WBKB children’s programs. Series director is George Paul.

Tele-Sound to offer new jingle package

Tele-Sound Productions, Washington, plans to offer its best package of jingles to stations this week at Broadcast Promotion Assn.’s annual convention Nov. 6-8 in New York.

It is a package plan called Top Dog—a marketing blitz of 14 jingles, two contests, more than 1,000 personalized station prizes and numerous off-the-air promotions—which Tele-Sound says solves the problem of selling itself in an inexpensive and quick way.

The jingles run from 5-50 seconds and are custom-made for the individual station. Top Dog will be sold on an exclusive basis in each market. It has been tested for the past month at WTVN Columbus, Ohio, after seven months in the developing stage, according to Bill Devries, vice president in charge of sales for Tele-Sound.

In creating its jingles, Tele-Sound uses three basic ingredients: Music, rhythm and rhyme. "They apply to any subject," commented Mr. Devries.

"We’ve sold everything from corn mash to a strip-tease show (at the Chase Club in St. Louis)," he added.

Program notes...

Ullman Inc. appointed - Richard H. Ullman Inc., division of the Peter Frank Organization Inc., New York, has been appointed sales representative for Record Source Inc., New York, producer of phonograph record services for radio stations. The RHU-RSI agreement also provides that Record Source may continue selling its services to stations directly.

Country-western package - Country and Western Radio, a new program and production package produced by Stars International, has been placed in distribution by Richard Ullman Inc. The new package was introduced at the County Music Assn. convention in Nashville, Tenn., Nov. 2. C&W Radio provides stations with about 1,000 program and production aids, including special station identification themes, call letter announcements, public service announcements and many others.

Selling "Knowledge" - Trans-Lux Television Corp. has been named distributor of the half-hour Frontiers of Knowledge series, which is being produced by the radio-tv division of Triangle Publications in cooperation with Pennslyvania U. and other colleges and research laboratories. Five films in the series have been completed on such subjects as the atom, outer space and the universe, and seven others are planned. Each program is carried once a month on the six Triangle tv stations. Trans-Lux began selling the programs Nov. 1.

Commission broadcasts - WBCM Bay City, Mich., has started to broadcast live the formal meetings of the Bay City Commission as a public service to the community.

Before Christmas present - SESAC, New York, has released a special package to be opened before Christmas: Christmas Songs & Symbols, a series of 26 five-minute radio shows containing stories and carols for the holiday season.

Programming available - The Girl Scouts of the U.S.A. has available for radio and tv station programming a collection of spots, films, slides and program guests describing the organization’s activities. For information about this free material, contact the local Council office.

weather—broadcasting more about it. The station has signed for a 20-hour-per-day weather wire with direct connections to weather and radar stations throughout the South. The service went into effect Oct. 1.

More coverage • WROW Albany, N. Y., has initiated an enlarged news operation by setting up a newsroom in the city room of the Albany Times Union. The new operation combines the resources of CBS Radio News, the Associated Press radio wire and the newspaper’s local news department. Concurrent with the change, WROW has enlarged its news staff and increased its newscasts to 24 daily.

Talent show • KFMN (FM) Abilene, Tex., devoted an entire day of its programming schedule to present "Local Talent Spectacular," a show featuring amateur and professional entertainment in the area. It was the third such spectacle the station has presented in its six months on the air.

'Thin Man' overseas • MGM-TV's The Thin Man series, starring Peter Lawford and Phyllis Kirk, has been licensed in Italy and Spain, raising the total of foreign countries signed for the series to 11. RAI-TV Network will carry the series in Italy, Zuriguel Asociados C.A., in Spain. RAI-TV was also licensed for a total of 19 MGM cartoons.

Studio improvements • Gerald Productions Inc., New York, announces the modernization and expansion of its sound-stage facilities to improve the production of tv film commercials, programs and feature films. The modernization includes flooring the studio with Monoprene, a latex compound, which cuts down extraneous noises during shooting, and the construction of a permanent cyclorama to improve lighting effect.

Exclusive contract • Diana Trask, Australian-born singer, has been signed to an exclusive five-year contract with NBC.

MCA record earnings • MCA Inc. reports that unaudited figures for the first nine months of 1961 show earnings rose to a record high of $11,043,266 from $9,251,346 for the corresponding period of 1960. Net income after taxes amounted to $5,353,466, equal to $1.31 per share, as compared with $4,484,073, equal to $1.09 per share, for the 1960 period.

Sport shows back on CBS-TV • The Sunday Sports Spectacular and This Wonderful World of Golf—two-and-a-half consecutive hours of sports programming—return to CBS-TV for their third winter season on Sun., Jan. 7. The two series, featuring sports events
It's PENNSYLVANIA Avenue in Washington, D.C. . . .

It's MAIN STREET in Ohio's Third Market

The President may travel Pennsylvania Avenue during his inaugural drive, but if he is feted in Dayton he'll ride down Main Street. And nowhere in Ohio's Third Market do we make any bones about the fact that so many of our main streets are called just that. This doesn't suggest, we trust, that we are altogether provincial, but it does point up the fact that people are a little different here. Not better. Just different. And it explains why we take such pains to program precisely to those differences with a varied fare of facts and entertainment. With the result—and we have piles of statistics to prove it—that people on our Main Streets, and our side streets, and down our country lanes, consistently prefer our signals—on TV, on AM, on FM. And, by and large, they have more spending money in their pockets (sometimes nicknamed "discretionary income") than people in any other Ohio market. Ask George P. Hollingbery.

- Nov. 6-10, 13-15 (6:30-7 a.m.) Continental Classroom, American Government.
- Nov. 6-10, 13-15 (10:30-11 a.m.) Play Your Hunch, part.
- Nov. 6-10, 13-15 (11:11-30 a.m.) The Price Is Right, part.
- Nov. 6-10, 13-15 (12:30-12:55 p.m.) It Could Be You, part.
- Nov. 6-10, 13-15 (2:20-3 p.m.) Jan Murray Show, part.
- Nov. 6-10, 13 (11:15 p.m.-1 a.m.) The Jack Paar Show, part.
- Nov. 6, 13 (6:30-9 p.m.) The Price Is Right, part.
- Nov. 7, 8, 15 (11:15 p.m.-1 a.m.) The Bob Newhart Show, Sealtast through N. W. Ayer.
- Nov. 8, 15 (10:30-11 p.m.) David Brinkley's Journal, Douglas Fir Plywood through Cunningham & Walsh, Pittsburgh Plate Glass through BBDO.
- Nov. 9 (10-11 p.m.) Sing Along With Mitch, R. J. Reynolds and Ballantine through William Esty; Buick through McCann-Erickson.

**AWRT's Educational Foundation will be one of the beneficiaries.**

**Public-service spots**  - Petker's Personality Scope Co., Beverly Hills, Calif., which furnishes spots to 1,553 radio stations, announced it has put into production 30-second and 1-minute public affairs spots that are strictly non-commercial. They will be released to member stations at the rate of 80-120 spots per month.

**UCE produces films for local sponsor use**

Informational television programs, five and ten minutes in length, are being prepared by a new producer-distributor, Universal Entertainment Corp., New York. David Savage, UEC president, said he started the company with Alvin Sussman, executive vice president, believing that the local advertiser in tv is being "neglected."

UCE began operations with a five-minute film program on personal grooming, Ern Westmore's *Tips & Tricks,* and has started production on two taped series—*Arlene Calling,* a 10-minute woman's program, starring Arlene Francis, and *Your Seat on the Stock Exchange,* a five-minute show explaining facets of personal investment in lay language. Mr. Savage added that UEC is developing additional five-minute informational programs, one in sports instruction.

**THEY BUY!**

The more people who see your product, the more prospects for sales. And in the Johnstown-Altoona market, more people watch WJAC-TV than any other station. Both ARB and Nielsen back up this statistic fact. But more importantly, WJAC-TV turns these statistics into sales, a fact backed up by a host of happy advertisers from A (for automatic washers) to Z (for zoop). If you want people-purchasing people—pick WJAC-TV.

Rural Recovery
Rising Farm Incomes Help Bring an Upturn in Equipment Buying
Help for Trucks, Appliances

Farmers are so eager for new machinery that they're haggling less over prices than they did a year ago, dealers report. "Farmers aren't as price conscious as last year so we can get more money on a sale," says Jack Martin, who sells J. I. Case tractors and implements in Sioux City, Iowa. "This morning, we allowed a farmer $600 on the old picker he traded in on a new $2,700 model last year, we probably would have given him $750 for a comparable machine." Mr. Martin sold 21 tractors in August; in August of 1960, he sold seven.

The Sioux City Journal, on October 3rd, reported that department store sales in Sioux City increased a whopping 30% in August over the previous month. This was a greater increase than was made in any other city in Iowa. Another indication that business is good in Sioux City.

Tv code staff studies commercial cut

STATIONS CLAIM COMMERCIAL TIME REVISIONS IMPOSE "HARDSHIPS"

The NAB television code staff has begun a study of the new tightened commercial time limitations for prime evening hours. The study was ordered by the TV Code Review Board, meeting in Washington last week, and follows grumbling by some independent TV stations at the code commercial time revisions last June. At that time the code board cut down the allowable commercial announcement time in prime time from six minutes to four minutes per 30-minute program (Broadcasting, June 19).

Last week's move came after a number of non-affiliated TV stations claimed they cannot afford the restrictions. One such protest was lodged at the NAB conference in San Francisco last month, by Howard Stalnaker, KPHO-TV Phoenix, who said the reduction in prime time commercial lengths would cost his station $110,000 a year (Broadcasting, Oct. 30).

The official action of the Code Review Board was to instruct the staff to undertake a study with a view to asking for clarifying language if it's determined necessary.

The code board upheld the code staff in its interpretation of the ban on the advertising, even indirectly, of feminine hygiene products. The code staff position was taken on a plan by Mayfield Industries Inc., Fort Worth, whereby TV spots would call attention to newspaper advertisements relating to a feminine hygiene product (Broadcasting, Aug. 14). Neither the product nor its name was to be mentioned on the air.

At the request of Code Director Robert D. Swezey, the special code board subcommittee which had been studying the preparation of an operational code manual for station use, deferred its report to permit Mr. Swezey to study the matter. The subcommittee is headed by Joseph Herold, KBTV (TV) Denver.

This was the code board's first meeting with Mr. Swezey since he was appointed to his $40,000-a-year post last September by NAB President LeRoy Collins. Mr. Swezey took over as code director on Oct. 15. His contract, which includes expenses, is for two years and provides that negotiations for extension shall begin six months before expiration.

The tv code currently has 391 stations and the three TV networks as subscribers. It also has 22 film producers as affiliate subscribers. Present with Mr. Herold at last week's meeting were E. K. Hartenbower, KCMO-TV Kansas City, chairman; Mrs. A. Scott Bullitt, KING-TV Seattle; Robert W. Ferguson, WTRF-TV Wheeling and George Whitney, KFMB-TV San Diego. Absent from the meeting were James M. Gaines, WHO-TV San Antonio, and Lawrence H. Rogers II, Taft Broadcasting Co., Cincinnati. Chairman Hartenbower and some members of the board called on FCC Chairman Minow during the meeting. Mr. Minow pledged his aid in helping the board with its work.

New movie approach in pay-tv fight

An unusual approach was taken by an opponent of pay television last week. Philip F. Harling, chairman of the Joint Committee Against Pay TV and of the Anti-Pay TV Committee of the Theatre Owners of America, urged RKO General board chairman Tom O'Neil to abandon plans for a toll-tv undertaking in Hartford, Conn., and suggested that he return to the business of making motion pictures.

Mr. Harling's remarks constituted a highly personalized plea to Mr. O'Neil to give up the Hartford project, which he called "hazardous," and, instead, to "make pictures and we will buy them for our theatres." Mr. Harling became ill shortly before a state-wide meeting of Connecticut motion picture exhibitors in New Haven last Tuesday (Oct. 31), and his speech was read by Bernard Menschell of the Connecticut Committee Against Pay TV.

Mr. Harling pointed to reports of the experience of Paramount Pictures' International Telemeter operation in Canada (Broadcasting, Oct. 16) as bolstering his contention that pay tv is a "hazardous undertaking." He advised Mr. O'Neil, whom he called "a learned, aggressive, smart business man," to abandon the test plans of RKO Phonevision-Zenith Radio Corp. Mr. Harling ap-
INTEGRITY

...broadcast standards that are higher than the NAB code have been the policy of San Francisco’s KTVU since its first telecast in March of 1958. Sponsors are assured that there will be no over-commercialization, no triple spotting, no product conflicts and the same rate card for everyone. These standards have earned for KTVU a reputation for integrity and enabled advertisers to obtain greater effectiveness and impact for their commercial messages on this station. Call H-R Television for the complete story of San Francisco’s KTVU and availabilities.

The Nation’s LEADING Independent TV Station

KTVU
CHANNEL 2
SAN FRANCISCO • OAKLAND
pealed to Mr. O'Neil, one-time board chairman of RKO Radio Pictures, to return to the motion picture field, in these words:

"Think it over, Tom O'Neil. Join us again. Make your pictures and we will buy them for our theatres. You won't have to fight to get customers. We are ready, able and willing to back you, when you forget this pay-tv foolishness and get back into picture making."

He advised the meeting that on Nov. 9 TOA's counsel, Marcus Cohn, will appear before the U. S. District Court of Appeals to argue against authorization of the RKO Phonevision-Zenith Radio three-year test of pay tv in the Hartford area.

50-kw WGAR going from CBS to NBC

WGAR Cleveland, a 50-kw station and a CBS Radio affiliate for the past 25 years, is switching to NBC Radio at a date to be announced. The change was made known last week in New York in a joint statement by Herbert E. Evans, president of Peoples Broadcasting Corp., owner of WGAR, and NBC's Tom Knodle, vice president for station relations.

CBS Radio — through William A. Shudt Jr., vice president, affiliate relations — said the network regrets the termination of a "long-standing" network and station relationship that was termed as "pleasant," and added that the network has "every confidence that within the near future we will be able to announce a new affiliation in the area."

Mr. Evans said the station always thought "highly of CBS, but we feel that NBC Radio today provides a service better geared to our concept of community service." He cited NBC's news and coverage of world events. Carl E. George is WGAR's general manager.

It's reported that WJW Cleveland, the Storer station with which NBC Radio will terminate its affiliation, plans to operate as an independent station in the future.

A reunion for KHJ and Mutual

KHJ-AM-FM Los Angeles, which had been Mutual affiliates for 23 years when the stations decided to become independent outlets in 1959, is heading back into the Mutual lineup. Arrangements were completed last week by Hathaway Watson (r.), vice president in charge of broadcast operations for RKO General Inc., owner of the stations, and Charles W. Godwin (l.), MBS stations vice president. The stations will re-affiliate with Mutual, effective Jan. 29, 1962. Interested onlooker is Frank W. Erwin, assistant to MBS President Robert F. Hurleigh. Mr. Watson said the re-affiliation is the result of the stations' plans to implement an expansion of news and public-affairs programming.

Fulltime paid staff planned by Missourians

The Missouri Broadcasters Assn. concluded its annual Fall meeting in Jefferson City by raising its monthly dues and increasing its membership fee to $50 for the purposes of hiring a full-time staff.

Concurrently, the MBA unanimously passed a resolution voicing opposition to the proposed FCC license renewal program forms as "tending to lead to program control and inevitably to censorship."

The group adopted a resolution calling for increased efforts on its part to win equal access for broadcasting in the city, county and state whenever possible.

In addition to electing Robert Hyland, KMOX St. Louis, president (Broadcasting, Oct. 30), the MBA also adopted two other resolutions: (1) made it mandatory for each member station to include broadcast editorials within its program schedule; and (2) went on record as supporting the movement to secure the National Research & Training Division of the NAB to be located at the U. of Missouri.

KFMB-TV, KOGO-TV sign

KFMB-TV and KOGO-TV San Diego have signed new contracts with the American Federation of TV & Radio Artists, giving $15 weekly increases to more than 25 staff and freelance announcers over a three-year period. The pacts also call for a 20% increase in program fees for announcers.
Here's the cartridge tape system with something new—trip cue! This unique feature allows you to record a special trip-cue tone that, during playback, can be used to start the next device in an automatic or semi-automatic system, with split-second timing. (In TV operations it may be used to advance slide projectors.)

Delayed broadcast, spot announcement campaigns, production aids, themes, station breaks can be handled by the RT-7A with a minimum of effort. Cartridge is selected, placed in a playback unit, forgotten until "Air" time, then instantly played at the flick of a button. Cueing and threading are eliminated.

Check this handsomely-styled equipment against any other for compactness and design... Provides transistor circuitry, low power consumption, simplicity of operation! It's one more in a growing line of value-packed new products for radio and television stations from the pioneer in broadcasting. See your RCA Broadcast Representative. Or write to RCA Broadcast and Television Equipment, Dept. B-22, Building 15-5, Camden, N. J.

Typical packaging is this attractive four-unit console with single BA-7 Cartridge Tape Record and Playback Amplifier and three Cartridge Tape Decks, as illustrated.

Separate units of this system available are the Record and Playback Amplifier, and the Cartridge Tape Deck. A Cartridge Storage Rack is also available.
AB-PT's nine month profit hits new high

American Broadcasting - Paramount Theatres set a new record for operating profits in the first nine months of 1961. Estimated net operating profits were $7,580,000 or $1.78 a share, compared with $7,522,000 or $1.76 a share for the same period of 1960, according to Leonard H. Goldenson, AB-PT president.

Net profits, including capital gains, climbed to $13,758,000 ($3.24 a share) from $8,873,000 ($2.08 a share) for the first nine months.

Third-quarter estimated net operating profits were $1,866,000 (44 cents a share) against $1,892,000 (45 cents a share) for 1960's third quarter.

Mr. Goldenson noted that third-quarter results for the ABC broadcasting division were ahead of 1960 figures, despite the cost of setting up ABC-TV National Station Sales Inc., tv station sales subsidiary which services the company's five owned tv stations (Broadcasting, July 24). In the same period, AB-PT expanded its foreign tv holdings by acquiring minority interests in two Japanese tv stations, and in a station in Manila.

In a related development, Stephen C. Riddleberger, ABC vice president for owned and operated stations, reported record fourth-quarter sales for the five ABC-owned stations in the two-month period since the establishment of the tv station sales arm. He said more fourth-quarter business was booked by Oct. 15 than during the complete fourth quarter in 1960.

He predicted sales for the quarter will exceed 1960 figures by 20%.

Smith leaves CBS over news policy

"A difference in interpretation of CBS news policy"—as it was termed by CBS last week—caused a parting between news commentator Howard K. Smith and the network. Mr. Smith was chief Washington correspondent and general manager of the CBS news bureau in that city.

Mr. Smith joined CBS in 1941 as a Berlin correspondent, covered World War II in Europe and the Nuremberg Trials. He was chief correspondent in Europe for CBS until 1957, when he was moved to Washington.

It was learned last week that Mr. Smith will wind up his duties with CBS quite quickly but will remain with outstanding commitments he has on the network's CBS Reports (he is to appear on three specials).

For some time, questions of news policy have provided a bone of contention between Mr. Smith and network officials. The network has reportedly become increasingly concerned over what it considers his tendency to editorialize too strongly on the air.

On the Oct. 29 radio news broadcast at 8:15 p.m., Mr. Smith failed to appear in his usual commenting role, and another CBS newsman took his place. Tom C. Stix of the Stix & Gude agency, the commentator's business representative, refused to confirm or deny reports that Mr. Smith had offers from other networks, nor would he comment on what plans the newsmen may have for the future. Mr. Smith's contract with CBS still has several years to run.

Changing hands

ANNOUNCED: The following sales of station interests were reported last week subject to FCC approval:

- WNTA-AM-FM Newark, N. J.: Sold by NTA to Bergen Broadcasting Corp. for $2.5 million (Closed Circuit, Oct. 30). Bergen Broadcasting is a subsidiary of Communications Industries Corp., owner of WEOK Poughkeepsie, N. Y.; WACE Chicopee, Mass.; WKST New Castle, Pa., and WKST-TV Youngstown, Ohio. CIC is headed by Lazar Emanuel, and includes Blair Walliser, Paul Smallen and Charles P. LeMieux Jr. WNTA operates fulltime with 5 kw day, 1 kw night on 970 kc; WNTA-FM is on 94.7 mc with 15 kw. Broker was Edwin Torrberg & Co.

- KSON San Diego, Calif.: Sold by the estate of Kenyon Brown to Dan and Mike McKinnon for an aggregate sum exceeding $350,000. The Messrs. McKinnon are the sons of Clinton D. McKinnon (KOAT-TV Albuquerque and KVOA-TV Tucson, both Arizona). Terms of the purchase include payment of $100 for the stock of KSON and include notes due the Brown estate. In addition they are assuming $185,000 in obligations and guaranteeing $250,000 in notes. KSON operates fulltime on 1240 kc with 250 w.

- KFDM-AM-TV Beaumont, Tex.: 33% interest sold by D. A. Cannan, C. B. Locke and associates to W. P. Hobby for $232,901. Mr. Hobby (Houston Post-KPRC-AM-TV) is exercising his option to purchase this interest. In 1954 he loaned Beaumont Broadcasting $55,000 and in return received this option. The loan and the option were the subject of litigation before the grant of
Transcontinental reports
nine-month gross rise

Transcontinental Television Corp. last week declared a dividend of 10 cents per share on outstanding common stock payable Nov. 17 to stockholders of record Nov. 8.

In an interim financial report released to stockholders, TTC President David C. Moore reported that gross revenues for the first nine months of 1961 totaled $12,694,683, compared with $9,752,383 for the same period in 1960. Net income increased by 16%, to $798,341 (45 cents per share), compared to $690,967 (39 cents per share) for the corresponding 1960 period. Mr. Moore noted that the full nine-month revenues of WDAF-AM-FM-TV Kansas City were included in the 1961 figures, but only those from Aug. 18, 1960 in the nine-month 1960 figures. TTC acquired WDAF stations on the August date last year. Mr. Moore stated he anticipated earnings for the calendar year 1961 in the range of 70-75 cents per share. TTC stations, in addition to the Kansas City outlets are WGR-AM-FM-TV Buffalo, KFMB-AM-FM-TV San Diego, KERO-TV Bakersfield and 60% of WNEP-TV Scranton, Pa.

Financial group sets
Chicago meet Nov. 16

The annual meeting of the Institute of Broadcasting Financial Management will be held Nov. 16 at the Sheraton-Chicago Hotel in Chicago.

The one-day session features key addresses by broadcasters and allied field personnel. Among them: Hamilton Shea, president of Shenandoah Valley Broadcasting and chairman of the All-Independent Television Station Music License Committee, speaking on present ASCAP relations; Hyman H. Goldin, chief of the Economics Division, FCC's Broadcast Bureau, discussing the annual report of FCC form 324 for 1961 and its changes; George W. Schiele, vice president of sales, Broadcast Billing Co., discussing Standard Rate & Data's central media accounting facility and its relation to local station billing.

**WUHF programming to begin on schedule**

WUHF ('TV) New York, the city's (and the FCC's) new experimental uhf outlet on ch. 31, was scheduled to start programming on a regular basis at 11:30 a.m. yesterday (Sunday), even though a fire last Tuesday in a power supply transformer atop the Empire State Building threatened a postponement.

Seymour N. Siegel, director for the Municipal Broadcasting System which is operating the station for the FCC, expected repairs to be finished in time for tests to resume late Thursday last week. Earlier in the week, he released the program schedule for the first week of regular operation.

Some of the WUHF programs will be simulcasts of programs originating on existing vhf channels (2, 5, 7, 9 and 11) in New York. Other programs will be produced for and by various official and semi-official agencies offering services to the public. Still others are being produced for experimental purposes by professionals associated with commercial tv operations. These producers have volunteered their services without charge, and their programs will be aimed at an "intellectual" audience.

Jerome B. Agel, president of his own advertising agency in New York, is the producer of the station's first regular series. His first program last night (7:30-8 p.m.) was to be a shortened film version of etv's first spectacular by Mr. Agel in Chicago in 1957. It featured Alistaire Cook, Frank Lloyd Wright and Carl Sandburg. Mr. Agel's subsequent programs in the Sunday time slot will be two series presented live on alternate weeks. One will be a visual arts quiz, with "no answers, but many opinions," titled "Point of View." The second series, "The Contemporary Scene," will have two participants and a moderator.

**TelePrompTer to carry fights**

TelePrompTer Corp., New York, last week announced plans to carry its closed-circuit telecast of the "Double-Header" boxing card on Dec. 4 to 170 theatre locations and 100 catv systems. TelePrompTer hopes to reach an audience of 250,000 persons. The telecast will consist of two bouts on that night—the Floyd Patterson-Tom McNeeley heavyweight championship contest from Toronto and the Sonny Liston-Albert Westphal match from Philadelphia.
Western Without Stagecoach

In the Sacramento area, where stagecoaches rolled and gold once rushed, many people need look no further than their family trees for action stories of the Old West. Finding modern, live dramatic fare, however, is another matter. Like so many areas west of Broadway, Sacramento has very little live theater.

Corinthian station KXTV is doing its part to remedy this. "The Ties Have It," a drama locally written and acted, was produced and aired by KXTV. Finalist in the Corinthian Stations Public Service Award competition, the show is one of several being presented to encourage local writing, local little-theater groups, local talent, and local dramatic schools.

In a computer world of machine decisions and hot pursuit of numbers, KXTV's action is hardly calculated to make Sacramento's Broadway replace its eastern namesake. It is, however, typical of the Corinthian viewpoint: A station's ties to a community, like all friendships, need to be kept in good repair. We believe that this kind of originality is not only good citizenship but a sales virtue as well.

Responsibility in Broadcasting

THE CORINTHIAN
BPA conventioneers face challenging format

The annual convention of the Broadcasters Promotion Assn. gets underway today (Nov. 6) at New York’s Waldorf-Astoria Hotel, where some 350 members are expected to attend the opening session at 9:30 a.m. By Wednesday evening, convention delegates will have participated in 17 workshops, and will have heard top experts in the business discuss ways to improve station promotion activities. To give delegates the opportunity to attend every session that interests them, most of the sessions will be held twice—in successive hours.

Following is a list in chronological sequence of events in the three-day schedule:

Monday—9:30 a.m., Official Seminar Opening Session (see above); 10-11 a.m., station image panel, Theodore Grunewald, Hicks & Greist, Frank Kemp, Compton, and Herb Zeltner, Lennen & Newell; 11-12 noon, Television in the USA; 11-12 noon, Does Radio Need a Radio Information Office?

Tuesday—8-9 a.m., Regional Continental Breakfasts; 9-10 a.m., On Air Radio Promo Panel; 9-10 a.m., On Air Television Promo Panel; 9-10 a.m., Contests—One Time Only Promotion Contest Panel; 10-11 a.m., Trade Paper Relationships; 10-11 a.m., Budget Sessions; 10-11 a.m., Rating Panel, Julie Brown, Compton; Robert Boulware, Fletcher Richards, Calkins & Holden, and Frank Grover, Foote, Cone & Belding.

Tuesday (continued)—12:15 p.m., Combined RTES-BPA Awards Luncheon; 3:30-5:30 p.m., General Business Session; 7 p.m., Publications Cocktail Party; 8 p.m., Banquet.

Wednesday—9-10 a.m., Merchandizing Panel, Bern Kanner, Benton & Bowles; Bill Raidt, D’Arcy, and Helen Davis, J. Walter Thompson; 9-10 a.m., Critics Panel; 9-10 a.m., Trade Paper Advertising, Bob Lidell, Compton; Roger Burnstead, MacManus, John & Adams, and Robert Kowalski, Young & Rubican; 11-11:30 a.m., Closing Session.

News coverage tips given at Ill. meeting

It’s time for radio stations to return to straight news that stands or falls on its own merit, Lee White, news director of KROS Clinton, Iowa, told the fall meeting of the Illinois News Broadcasters Assn. at Galesburg, Ill., Oct. 28-29. He said in many cases today the news is so interrupted by sirens, whistles and echo chambers that the listener gets a completely distorted picture of the true story.

Judge Gale A. Mathers of the Ninth Circuit Court District of Illinois at Knoxville, Ill., related his experiences of satisfactory news coverage in the courtroom without disruption of the legal proceeding. Judge Mathers said he allows TV and still photography under strict conditions which assure due process to the litigants and cited instances of photography so completely unobtrusive that no one knew pictures were being made.

Richard K. Hance, newsreel supervisor, WGN-TV Chicago, described techniques of TV newsreel film stories that tell a complete story without narration. He said such assignments require the best skills of the photojournalist.
Datatrol firm offers instant TV spot availabilities

Succor for the harassed traffic departments of TV stations—and their equally immured spot representatives—may be on the way. Station management and station representatives may be out of their paper-work prison soon.

A team of Washington, D. C., data processing specialists is almost ready to present to the TV industry a proposal for the establishment of a central, fully-automated spot availabilities clearing house—capable of reporting virtually instantaneously all day long a station's list of availabilities. The proposal will be made next month to the Stations Representatives Assn. by Datatrol Corp., a two-year-old Silver Spring, Md., firm of automation and data processing consultants.

The study, underway for the past two months, was made by Hugh P. Donaghue, Datatrol president, and top executives Dr. Arthur Kirsch and William Hammond. It was initiated at the suggestion of Dr. Kirsch, who until last August was research director of American Research Bureau. ARB is one of the leading TV rating services in the country.

"All signs point to the need for the service," Mr. Donaghue said last week. "We are now drawing up our presentation. This will be submitted to several friends in the station, spot rep and advertising agency field, and if they approve, we'll make a firm offer to the industry."

Datatrol acts only in a consulting and advisory capacity; it is not involved in selling equipment.

Sea of Paper. The focus of the clearing house idea, Mr. Donaghue explained, is to overcome the mass of paper-work which is overwhelming both stations and spot reps in their attempts to keep current on time availabilities.

The time has come, the automation expert emphasized, to put computers to work on this subject—or see stations and their reps sink under the paper sea.

Mr. Donaghue thought the result would be to make available many opportunities, heretofore lost, for the sale of spots. At the present, he noted, availabilities aren't known to rep salesmen and advertising agencies for two or three days after they open. And, he added, in many instances spot rep salesmen will sell a time segment during the day only to discover it also has been sold by another salesman from his office to another client.

End to All That. It is all of this that the processing center is tailored to overcome, Mr. Donaghue stated. Basically, he concluded, it is similar to the automated reservation system used by airlines.

Present calculations indicate on a rough scale, that the system could be inaugurated for about $3 million-$4 million. General estimates indicate that it could be undertaken with 40% of the existing operating TV stations as clients. Charges would run $500 to $1,000 a month for each station. If the equipment is leased, the initial capital requirement can be reduced substantially.

Under present plans, stations would continuously supply availabilities, adjacencies and ratings. These would appear in the offices of their spot representatives. Orders for time segments would be forwarded to stations by their reps, also on a continuous basis.

Lead Time. If the project is approved, Datatrol is prepared to get a pilot operation going within six months and have the complete system in full operation within a year. Datatrol estimates it has already invested $10,000 in the study.

The 30-man Datatrol Corp. was founded in 1959. It serves as data processing and information storage and retrieval consultant to such firms as Remington-Rand, AT&T, Dun & Bradstreet and the U. S. Army. Its business is now at $750,000 a year. Last July it issued 60,000 shares of stock to the public.

WBC donates FM outlet to Portland educators

Westinghouse Broadcasting Co. last week gave away one of its FM stations. WBC's KEX-FM Portland, Ore., was offered as a gift, subject to FCC approval, to the Oregon State System of Higher Education. Governor Mark Hatfield of Oregon accepted the station from Donald H. McGannon, WBC president, at a public dinner in Portland. Speaking in behalf of assembled board members, Gov. Hatfield accepted with "great gratitude" and emphasized the past need for "a radio outlet in the state's most populous city to complement the Portland educational TV channel."

In making the presentation, Mr. McGannon noted "WBC's long association with educational radio and television systems, as well as with the National Educational Assn."

He added: "the opportunity to reach both the school audience and the adult audience after graduation is one of the great and unique challenges of the future. We hope that this grant of FM facilities will contribute to these circumstances in the educational system of Oregon."

The gift includes equipment and studio facilities, as well as the license. KEX-FM, which duplicates KEX programs, operates with 55 kw on 92.3 mc. Upon FCC approval the station will operate under the general extension division of the OSSHE.

WBC's remaining FM outlets are WBBZ-FM Boston, KDKA-FM Pittsburgh and KYW-FM Cleveland.

DAYTIME COLOR TELECASTS ALMOST TRIPLED

Daytime Color programming has mushroomed from 306 hours in 1959 to 815 in 1961. No wonder the big switch is to Color TV. Are you with it? Get the full Color picture today from: W. E. Boss, Director, Color Television Coordination, RCA, 30 Rockefeller Plaza, New York 20, N. Y., Tel: CO 5-5900

PRUDENTIAL SQUARE • LOS ANGELES
Radio's own ten commandments

Some common sense principles for the station manager seeking to develop a sound, long-range operation were suggested by Elmo I. Ellis, WSB Atlanta, at the Alabama Broadcasters Assn. meeting in Tuscaloosa. A portion of his talk, entitled "Radio's Ten Commandments and The Promised Land," follows:

1. Thou shalt operate at a profit.
   That means running your business in such a professional and skillful manner that you are financially sound and immune from the danger or temptation of the quick-buck, the fly-by-night advertiser, the shady per inquiry deal, or the cut-rate, cut-throat competition that cheapens the air waves in so many communities.

2. Thou shalt broadcast the needs, desires and interests of the community.
   This implies integrating your radio station into the community so that it reflects the thinking of your citizens—their problems and how to solve them—what people are doing, and saying, and how they feel on matters of general interest.
   This also means undertaking to make your community a better place to live by promoting good schools, modern hospitals, sound churches, clean and spacious parks, fine health and welfare organizations, adequate transportation facilities, a good police force and fire department, an efficient city administration.

3. Thou shalt report the news of the world with truth and honor.
   Our history as a communications medium is relatively such a brief one that many broadcasters have not yet realized the full extent of our responsibility—and the potential power we command—as reporters of the news.
   Otherwise, we would not hear so many examples of bad journalism on the air. There is no substitute for a trained newsmen. And there is no satisfactory substitute for accurate, authoritative, reliable radio news reporting. A teletype sound-effect won't cover up a hack reporter... and rip-and-read techniques do nothing to localize news for your own community.

4. Thou shalt be original.
   This is a commandment that too few broadcasters obey. And unhappily the airwaves are filled with a sameness of sound.
   If you think your staff is too small—and your time too limited—for developing new ideas, let me show you how simple it can be.
   Take a magazine or a newspaper and see what's on people's minds. There are oodles of subjects but suppose you decide on a simple subject such as "The Secrets of a Successful Marriage."
   Now with this idea, you're only a step away from one or more new broadcast creations. You can call

State governors group accepts offer by NAB

The Council of State Governments has accepted a broadcasting industry offer of nationwide radio and tv cooperation in publicizing the problem of juvenile delinquency and efforts to combat it.

The acceptance of the offer, made to the nation's governors by NAB President LeRoy Collins, was taken during the governors' conference on delinquency and youth crime held Oct. 20-21 in Denver. The group, headed by Colorado Gov. Steve McNichols, voted to submit recommendations to the next meeting of the National Governors' Conference, to be held in Hershey, Pa., next spring. Mr. Collins is a former governor of Florida and a past chairman of both the National and the Southern Governors' Conferences.

The Collins proposal was outlined to the Denver meeting by Howard H. Bell, NAB vice president for industry affairs.

He suggested a "broadcast-scale informational program, organized by this committee and including other interested groups, to bring all the facts to the American people." The committee agreed to invite other informational media to join in the effort.

The basis of Mr. Bell's talk was that no correlation has been shown to exist between juvenile delinquency and radio-tv, newspapers, magazines or paperback books. He also emphasized that both radio and tv have their own codes which are aimed at combatting programs which might have an injurious effect on young people. What is needed, Mr. Bell suggested, is basic research to determine the causes of crimes by youths.

Taft net income up

Taft Broadcasting Co. had net revenues of $4,894,030 and net income of $744,188 (48 cents per share) for the six months ending Sept. 30, 1961, Hul-
wives and husbands and talk with them on the phone about their “Sec-

crets For a Successful Marriage.” . . . You may invite guests into your

studios or go out with a tape record-
er. . . . Do an editorial on the sub-
ject. The possibilities go on and on.

5. Thou shalt Not covet another broad-
caster’s programs or personali-
ties.

Radio is the one medium where

stations sell harder against one an-
other than they sell against news-
papers, magazines, television and

other competitive media. It’s a sense-
less type of warfare and it’s harmful
to our profession—but still we do it.

6. Thou shalt protect and defend
the Radio Industry.

I think membership in an associa-
tion is one indication of a broad-
caster’s concern for his profession. Membership in NAB, and sub-
scribing to the Radio Code are other
ways to show interest and coopera-
tion. Every broadcaster should be
eloquent and evangelical in explain-
ing, defending if necessary, and pro-
moting broadcasting and the broad-
caster’s rights to the audience, to
advertisers, and to government offi-
cials.

7. Thou shalt cherish the right to
be wrong.

This one sounds a bit tricky. It
isn’t intended to be. We all make
mistakes. From them we learn and
profit. But in order to make mis-
takes we must be willing to experi-
ment. Maintain a creative climate
among your staff members. Preach
to them that no idea is ridiculous or
silly. Respect listeners’ opinions too.

8. Thou shalt make radio a part-
nership with the public.

This seems so obvious, doesn’t it?
But think how many radio stations
are blasting out their news-and-
music, hour after hour, down a one-
way street. Allow listeners to partici-

date actively in the planning, pro-
gramming and production of your
broadcasts, so they will be involved
in every moment of your air-time.

9. Thou shalt love thy audience
as thyself.

Practice the Golden Rule. Do
unto the listener what you would
have the listener do unto you.

I believe if we sincerely try to live
up to this precept—if we make our-
selves sit down and listen to the pro-
grams we expect our listeners to ac-
tend—then we will remove from the
airwaves the cheap, the suggestive,
the inferior specimens of music,
news, commercials, and other pro-
gram material.

10. Thou shalt broadcast with
pride.

It’s time we lifted our heads and
walked side-by-side with the other
sparkplugs of the town. Our news-
men should demand and deserve the
same respect as newspaper men. Our
announcers should be civic, church
and school leaders. Our stations
should be spokesmen for enlightened
thought and progressive movements.
Our industry should insist on the
same rights and privileges and free-
doms enjoyed by other media.

bent Taft, president, reported to stock-
holders. This compares with net re-
venues of $5,350,221 and net incomes of
$705,834 (46 cents per share) for the
same six months in 1960. The 1961
figures reflect operations of Cincinnati
BowI Inc., acquired June 22; the 1960
figures reflect operations of WBR-AM-
FM-TV Knoxville, sold on Jan. 3. Earn-
ings per share are based on 1,539,162
The board of directors, meeting Oct. 17,
voted a quarterly dividend of 10 cents
a share, payable Dec. 14 to stockholders
of record on Nov. 15.

WHDH-TV aids WGBH-TV

WHDH-TV Boston is assisting
WGBH-TV, the etv station there, raven-
ged by a $1 million fire Oct. 14, by
letting the educational station use
WHDH-TV studios and equipment dur-
ing repairs.

WHDH-TV gave air time (15 of 32
spots in Class A time) to solicit funds
for WGBH-TV. Other area stations

and organizations also lent support to
the fire-damaged station (Broadcast-
ing, Oct. 23).

Kansas group opposes liquor ads on radio

Hard liquor advertising should not
be accepted by Kansas stations, accord-
ing to a resolution passed Oct. 31 by the
board of the Kansas Assn. of Radio
Broadcasters. KARB reminded its
membership that radio traditionally has
refused liquor ads, the acceptance of
which violates the NAB radio code.

The KARB board also voted to spon-
or a statewide teletype network to pro-
vide more weather and highway infor-
mation for member stations. A project
for a demonstration of unobtrusive cov-
erage of a court proceeding was ap-
proved. KARB also voted two full
scholarships for radio majors at state
schools to encourage training of quali-
fied students interested in broadcasting
careers.

BROADCASTING, November 6, 1961
Record payment is upheld in treaty

An international treaty which contains a provision that record companies be paid when their records are used on radio or tv stations was adopted by a 20 to 8 vote at a 38-nation conference in Rome Oct. 25. The conference approved an international agreement protecting the rights of performers, record makers and broadcasters (Broadcasting, Sept. 25).

In the vote on the crucial Article 12 requiring broadcasters to pay record makers, nine countries abstained, including the United States.

The agreement, which must be ratified by at least six countries before it becomes effective, does provide, however, that each country may reserve honoring any section of the document with which it disagrees. This can be done by filing the exception with the United Nations. In this case, other countries are not required to honor the particular provision with respect to the nationals of the country which has exempted itself.

The convention gives performers the right to prohibit use of their work without their consent, and the producers of recordings the right to prevent reproduction of their work without consent. This right is also given to broadcasters.

The conference began Oct. 10 and finished Oct. 26. It was held under the auspices of three international organizations: International Labor Office, United Nations Educational, Scientific & Cultural Organization and International Union for the Protection of Literary & Artistic Works. A draft convention was drawn up at a meeting in The Hague last year, and was circulated among all nations prior to the Rome meeting.

Representing the broadcasting industry at last month's Rome meeting were Robert V. Evans, CBS, and Harry R. Olsson Jr., NBC. Sydney M. Kaye, BMI, and Herman Finkelstein, ASCAP, were also among the advisers to the official U. S. delegation which was led by Abraham I. Kaminstein, U. S. Register of Copyrights.

Third German tv network to start in October 1962

Oct. 1, 1962 has been set as the starting date for West Germany's third television network. The network will televise from 30 transmitters throughout Germany in the uhf bands. Like its two predecessors, one uhf, one vhf, it will be operated on a generally non-commercial, public-institution basis.

Ultimate responsibility for the new network rests with the television committee of the German Laender (federal states), under whose auspices a 66-man board will be set up to administer the network. The board will be made up of members of the Laender, the Bonn government, religious groups, and labor and management associations. A contract has already been concluded between the television committee and the firm Freies Fernsehen GmbH., by which the company will provide recording and technical equipment for the network, and also make available to it the firm's large film and tape library. A production staff for the network has been set up in provisional headquarters in Mainz, and it is expected that all personnel appointments will be made soon.

Commercial spots have made only a small dent in the largely non-profit operation of German tv, which is controlled regionally by semi-official groups. But West German advertisers spent about 110 million deutschemarks ($27,500-500) during the first half of this year for television spots, a rise of 64.4% over the same period last year. The increase in spot sales has been sparked by the textile manufacturers, whose tv budget for 1961 is 50% more than it was last year. Though neither local programs nor local commercial tv is yet available for sponsorship, German retailers plan to associate to buy time on regional and national hookups for a general promotional campaign.

Despite the over-all increase in commercial revenue, the third network will not be supported directly by it. Rather, the network will be financed mainly from monthly set-license fees, now averaging about $1.25.

News of the third network has added greatly to the already established trend toward uhf sets. Tuners for uhf are now standard with all German models, and
vhf-only sets are selling at greatly reduced prices in a temporarily fallen market.

Television receiver sales have fallen off drastically from last year because of momentary saturation. During the first eight months of this year, West German set production was cut back by some 130,000 units from the corresponding 1960 level. Manufacturers expect business to return to normal as soon as last year's over-production has been absorbed. This, they estimate, will be by early 1962.

$114 million billed by Canada radio-tv

Last year sponsors spent $58 million on Canadian television advertising and $56 million on radio advertising, according to the report by the Dominion Bureau of Statistics, Ottawa. After deducting agency commission and production costs, stations received $36,014,000 from tv advertisers, $47,510,000 from radio advertisers.

Of the tv income $23,405,000 went to independently owned stations, $12,609,000 to Canadian Broadcasting Corp. owned stations. On radio, independent stations took in $46,000,000, CBC stations $1,510,000.

Canadian group airs sales tax problems

Sales, surveys, personnel training, the sales taxes on tapes, the future of color television and frequency modulation were discussed at the annual meeting of the Central Canada Broadcasters Assn. at Hamilton, Ontario, Oct. 29-31. Advertising agency executives from Toronto attended a panel session Monday on "Meet the Buyers," in which broadcasters aired problems with sponsor representatives.

The regional Assn. of English Lan-

The method is to use crystal-controlled radio receivers that are built to a standard set, so that all receivers will be of the Conelrad type. This method is based on the use of a 1,000 cps tone actuating a similar tone-actuating device. This can be plugged into a regular power line, and it can be attached to a broadcast receiver.

The Philco device is called "Silent Sentinel." It is a small circuit that can be incorporated into all battery-operated transistor radios at a cost of less than $10. Philco officials said: Broadcasters would have to add to transmitters a circuit that will cost less than $100, it was explained. This is for generating the 37 cps tone, using 10% modulation of the full broadcast signal.

The 37 cps tone triggers battery-operated receivers into an "off" condition, alerting the radio set owner to the fact that a Conelrad or other emergency alert has been ordered. Use of this system would require a change in PCC standards to permit the use of the 37
cps tone in broadcast signals.

Philco proposes this system for transistorized battery-operated sets, because the conventionally powered receiver is not built to be in an operative condition 24 hours a day over long periods of time. In the "Silent Sentinel" method, the rf stage of the receiver is continuously on and monitoring a broadcast, even though the rest of the set is "off." For pocket transistor radios, Philco showed a stand which incorporates the alarm device. This can be plugged into a regular power line, it was explained, so that the penlight batteries in the picket receiver can be recharged during the non-use periods. Batteries in pocket transistor radios could then remain usable for a minimum of six months, it was predicted.

Radio Alarm • The Moore device is a transistorized circuit which would, upon receipt of the 1,000 cps Conelrad tone, turn on any radio to full volume and also switch it to the Conelrad frequencies. Mr. Moore said the system can be built into both am and fm radios at the factory, or adapted to all present sets. It could also be attached to a tv set, he said.

The device, Mr. Moore estimated, could be sold for less than $10, with an installation charge of about $3. Production could begin in 90 days, he said.

The Philco and Moore devices are the latest in a series of proposals to use radio as part of the public warning service. A similar tone-actuating system over power lines is the heart of the National Emergency Alert Receiver (NEAR). This is a device plugged in-

EQUIPMENT & ENGINEERING

TWO RADIO ALERTING DEVICES READY

Philco, Moore attachments automatically warn of attacks

Philco Corp. last week demonstrated a robot alerting device which causes a battery-operated radio receiver—even turned "off"—to sound a siren-like warning when activated by a 37-cps tone over regular broadcasts.

A. N. Moore, a Richmond, Va., inventor, announced that a patent has been issued for his device which would permit any radio receiver to be triggered to full volume when activated by the official 1,000 cps Conelrad tone and tuned automatically to one of the Conelrad am frequencies, 640 kc or 1240 kc. The method by which this would be done was not explained.

The Philco device is called "Silent Sentinel." It is a small circuit that can be incorporated into all battery-operated transistor radios at a cost of less than $10, Philco officials said. Broadcasters would have to add to transmitters a circuit that will cost less than $100, it was explained. This is for generating the 37 cps tone, using 10% modulation of the full broadcast signal.

The 37 cps tone triggers battery-operated receivers into an "on" condition, alerting the radio set owner to the fact that a Conelrad or other emergency alert has been ordered. Use of this system would require a change in PCC standards to permit the use of the 37
cps tone in broadcast signals.
Ampex’s ‘Electronic Editor’ eases vtr use

Two major criticisms of video tape have been that you can’t edit it without cutting and splicing, and you can’t produce animation on tape. To meet these criticisms, Ampex has introduced its Electronic Editor, a box of electronic gear that fits into the vtr rack within easy reach of the operator, who can now electronically insert or add new material to a previously recorded tape by pushing a button, without any physical cutting or splicing. Moreover, the Electronic Editor enables the assembly of a number of short items into a sequential program with no restriction as to the time or location of the assembly process. The material to be inserted in or added to the tape can come from any video signal source: live, film, tape or slide. It can come from a station studio, a network, a remote location or a mobile unit.

Many broadcast engineers have achieved a high degree of perfection in cutting and splicing, producing tapes whose splices are speedily made and can be played without a trace of rollover. But there are numerous vtr operators who are reluctant to cut into a tape if there is any alternative.

Now there is. Ampex spokesmen assert that the Electronic Editor can make splices electronically at intervals as short as a quarter-second with no chance of picture breakup or disturbance. An experimental four-minute tape presentation substantiates their claim. The tape contained more than 60 electronic splices and gave every appearance of being a multi-camera production with cuts from scene to scene precisely timed to follow action and narration.

The Ampex Electronic Editor is priced at $3,300. It can be installed on any Ampex VR-1000 series recorder-eqipped with full-track erase and “Inter-Sync” (equipment that sync-locks signals from various sources so that they may be combined without rollover or other picture disturbance). To a power line which would sound a large buzz when triggered by a special tone transmitted by utility companies into homes, offices and factories.

Various methods of alerting radio and tv stations to Conelrad commands are in use; one is a special type Sig-Alert receiver tuned to key Conelrad stations. This operates generally on the same principle as that of the Philco and Moore devices. Conelrad also uses the news services teletypewriter circuits for Conelrad and other stations.

**Technical topics...**

Jamming analyzer - The Electronics Group of General Mills, Minneapolis, has developed a broadband spectrum analyzer to measure the power and coverage of radio transmitter signals. In measuring average power, the total time-average power output of a broadband radio frequency signal source is determined by averaging the power over the entire frequency band of generation. Power distribution measurements are made by sampling a portion of the jammer signal being fed to the antenna, and passing this signal through a motor-driven tuned circuit of wide tuning range. Further information may be obtained from company: 1620 Central Ave., Minneapolis, Minn.

Diversification - MPO Videotronics Inc., New York, producer of tv commercials and industrial films, takes its first step into the field of motion picture equipment this fall with the introduction of a new 8mm sound continuous projector for use in sales and training. MPO, which currently produces about $8 million annually in non-theatrical film footage, says it will offer clients a film package from production through to leasing or sale of the projector.

Motorola reports - Third quarter sales of Motorola Inc., Chicago, hit a record high of $78,989 million with earnings $3.35 million or 88 cents per share. This compared with sales of $78,75 million and earnings of nearly $3.3 million or 81 cents per share for the same period last year.

**SURVEY FINDS**

**COLOR TV COMMERCIALS HAVE 3½ TIMES MORE IMPACT**

A 1960 survey by Burke Marketing Research reveals the impact of Color TV commercials is such that 1000 Color homes are equal to 3,589 black-and-white homes. No wonder more and more sponsors are moving up to Color. What about you? Get the full Color picture today from: W. E. Boss, Director, Color Television Coordination, RCA, 30 Rockefeller Plaza, N. Y. 20, N. Y., Tel: CO 5-5900
Calorie Counting Grows Into A National Pastime

Millions Of Americans Have A Strong Desire To Shed Excess Pounds, But Too Few Have The Will Power

Calories Aren't Necessarily Bad

The calorie is a unit by which heat is measured, and it is also the unit used to express the amount of heat or energy produced by foods. Thus, for example, when we say that an 8-ounce glass of milk contains 165 calories, we are talking about the energy production required to ride a bicycle at a moderate speed for about an hour (175 calories required), or slightly less than the amount of calories needed to dance the fox-trot for one hour (210 calories).

Oftentimes foods are promoted as being “low calorie” items, but all too frequently there is little or no basis for comparison to determine what the promoter is using as a base. In many minds, the word, calorie, unfortunately, has a very nasty connotation. The mere suggestion that a food product contains calories is enough to mislead many people completely about that food product.

One of the greatest areas of confusion these days is in the relationship between calories and other nutrients present in foods. The terms “empty calories” and “armored calories” have been used in an effort to distinguish between those foods that provide essential nutrients along with their calories (armored) and those foods which provide little more than calories for energy production (empty).

Quacks And Faddists Ride The Bandwagon

There are some societies throughout the world today, as there once were groups within the United States in the not too distant past, who look upon obesity as a sign of affluence. The man whose wife and children are fat is considered to be a successful provider.

Today there is little question among health authorities that obesity is a major health hazard affecting many millions of Americans. And those who determine styles and fashions have also decreed that fatness is undesirable, that it is, in fact, evidence of slovenliness. It is probably this cosmetic influence, even more than the health influence, which has produced a generation of calorie counters in this country.

Knowing how difficult it is for many people to achieve and maintain proper body weight, the food faddists and quacks have entered into this field and have reaped a harvest of dollars at the expense of disillusioned and oftentimes seriously injured people. Pills and potions and machines of many kinds have been sold, often at ridiculously high prices, but the buyers very likely have not had much success in weight control.

Mass Media Are Main Source Of Information

Market research studies done recently for the American Dairy Association confirm again quite clearly that the mass media are the chief source of public information about dieting for weight control. This confidence in the media on the part of the public as a source of information on this subject makes it imperative, of course, that the kind of information provided is sane and sensible and in the best interests of the readers, viewers, and listeners.

There is never anything to be gained by suggesting to people that weight control is easy or anything other than a lifetime project for those who are having difficulties. Efforts to take off weight fast through fad diets or pills or with machines are seldom successful, for they do nothing to accomplish changes in basic eating habits and attitudes which led to the excess weight in the first place.

Anyone who needs rapid weight loss for any reason at all should accomplish this strictly under the close supervision of a physician. As a matter of fact, anyone with weight control problems should discuss these with his physician in order to get at the basic problems and to work out a weight reduction and weight control plan that will best suit the individual. There may be some serious psychological adjustments to be made before the weight control problem can be tackled with any hope for success.

Weight Control Deserves Very Serious Attention

Because obesity more often contributes to shortening the life span by being a complicating factor in other diseases, the public has not become as shocked about weight control as we have about such diseases as cancer and atherosclerosis. But it is a certainty that millions of man-hours are lost annually as a result of the effects of obesity. Of much more importance, perhaps, is the heartache that many millions of people, especially many of our teenagers, go through in trying to control their weight to meet their ideals of how they should look. These people need help, and all of us, including the mass media, ought to work toward the goal of providing sane and sensible advice about weight control.

We do know that sound weight reduction and weight control programs must be based on consuming a well balanced diet, a diet balanced in terms of providing essential food nutrients as well as the correct amounts of calories to meet energy requirements. Weight control based on a well balanced diet, rather than relying upon faddist diets or special food preparations, is likely to be much more successful because such an approach does not require drastic changes in food consumption patterns and also provides the basic diet that can be continued not only while losing weight but also after the desired weight level is achieved.

A well balanced diet, adequate physical activity, and the solution of any serious psychological problems which may result in overeating are certainly among the key elements in solving the weight control problems in this country. Encouraging any other kind of approach is misleading and could very well be dangerous to the future health of people who may follow any of the faddist or quack suggestions.
Challenge: promoting Gladiola flour
RADIO TURNS VENTURE INTO EXCITING SUCCESS

To many people, a chance to promote a flour company's product might seem unexciting; but to Clay Stephen-
son Assoc., Houston, and to 121 radio stations throughout the Southwest, it was a zestful challenge.

It all began as a promotional campaign for Gladiola flour. Convinced that radio is the best medium for reaching
rural markets, Stephenson Assoc. contacted 125 radio stations, asking each to join in an unusual recipe con-
test. In the contest, a recipe was provided in every package of Gladiola flour, and consumer contestants were
asked to name their finished product. In turn, the stations were asked to publicize the contest, handle the entries,
and set up judging panels in their areas.

The "Mystery Recipe Contest" was divided into semifinals, winners of which won aluminum cooking sets and
grocery stores, contributing daily prizes that added a semi-final to the consumer contest, and generally going out
of their way to create a snowballing promotion campaign.

The top prizes for radio station ingenuity and effectiveness went to KCOR San Antonio, KTBC Austin, and
KDET Center, all Texas.

Duluth druggists join to promote their industry

To offset the unfavorable publicity received in recent months by the drug industry, KDAL-AM-FM-TV Duluth,
Minn., has instituted a public relations-product merchandising plan with the local druggists.

To counteract the negative image of the drug industry, area druggists formed the Lakehead Area Associated Pharma-
cists to promote institutional advertising exploiting the druggists' integrity and community service rendered them.

The campaign is on a continuing basis on KDAL-AM-FM-TV, which sends the druggists counter displays which are promoted on the air for four-week periods. The products are usually displayed in a prominent place, a plan that has created strong advertiser interest, and has increased timebuying on the station.

Ga. broadcasters put radio-tv on the map

The Georgia Assn. of Broadcasters has just produced both a membership roster and a highway map of the state, and combined the two in one succinct presentation. Upon a light, olive-dab map of Georgia, call letter listings for member stations of the association are super-imposed in white boxes. The boxes pinpoint actual station location, and besides giving the call letters, also detail the frequencies of am and fm stations, and the channel designation of tv outlets.

Called "Radio-Tv on the Road," the map is being distributed to approximately 1,000 agency, rep, travel and
auto-oriented organizations in the country. It was unveiled at the Georgia Governor's Conference on Tourism as part of the association's presentation of radio and tv stations in the state.

GAB makes no bones about the fact that the map includes only those stations belonging to the organization.

"We're trying to make it mean something to belong to our association," says Jack Williams, executive secretary. The maps may be obtained at cost.

Public affairs series draws honors for CBS

CBS Radio has received commendation from five U. S. mayors for a public affairs series produced by the net-
work's seven-owned radio stations. The series of seven 50-minute broadcasts is titled How Serious The Challenge? It sparked favorable comments from the mayors of Chicago, San Francisco, Bos-
ton, New York and Los Angeles.

The broadcast, dealing with economic issues of national scope, were the result of a joint effort in which each of the seven stations: WCBS New York; WCAU Philadelphia; KCBS San Francisco; KNX Los Angeles; KMOX St. Louis; WEEI Boston, and WBBM Chicago, made use of its own news, public affairs and technical fa-
cilities to produce one program of the seven-show series.
Bear (Yogi) helps cheer Gophers over Wolverines

Tv star Yogi Bear (who admits to being "better than the average football player") and his cohorts Huckleberry Hound and Quick Draw McGraw ambled over to the U of Minnesota from WCCO-TV Minneapolis where each has a weekly show to stir up enthusiasm for the college's homecoming football game.

Yogi not only served as cheerleader and participant in halftime festivities but also "guaranteed" the Minnesota Gophers a win over the Michigan Wolverines. Indeed with the backing of the Prophet of Jellystone Park, the Gophers denied the Wolverines by a score of 23-20.

Drumbeats...

Tv week • November 13 to 17 has been proclaimed "Television Week" in the city of Detroit by Mayor Louis C. Miriani, to mark the annual meeting there of the Television Bureau of Advertising. For the occasion, special on-the-air promotion material will be presented by TVB's Detroit station members, WWJ-TV, WJBK-TV and WXYZ-TV.

Skydving event • Sixteen skydiving teams leapt through the air Oct. 28, at the first annual WNBC-TV New York Ripcord Cup Parachute Meet, Adams Air Park, Flemington, N.J. The meet, held to promote Ziv-UA's Ripcord series now playing on the station, was open to members of the Parachute Club of America.

Hunger strike • Bob Burnett, KALL Salt Lake City, today (Monday) begins a hunger strike as part of a giant promotion by the station for the United Fund in that city. KALL listeners are asked to name the amount of hours and minutes Mr. Burnett will last. It will be worth $100 to the person who is closest in his guess. A contribution must accompany each guess. Any number of guesses can be made.

Help • KBUZ Phoenix, Ariz., in conjunction with major super market chains in the area, has established a plan to feed needy families during the coming holiday season. Each time a sale of $4 or more is made at a super market, the receipt is sent to the station which sends out a free turkey to a family. KBUZ is supporting the drive with a four-week saturation spot campaign.

Ghost guess • WSAI Cincinnati made one of its more interesting free offers last week in conjunction with Halloween. The station offered to send a free ghost to any listener who wrote in asking for one. Then WSAI held a contest, seeking from the entrants the correct number of ghosts that were sent out. WSAI will announce the winner this month.

Friday fatigue cured

There's something medicinal about a medicine show that always attracts the people, and KTUL-TV Tulsa's exhibit at the 1961 Tulsa State Fair was certainly no exception. The ch. 8 outlet set up a 40x120 foot tent on the fair grounds, and named its presentation "Dr. 8's miracle medicine show." The good doctor's patent medicine pills came wrapped in a cellophane package attached to a dosage instruction booklet, and was called "a seven day plan for you to get better looking."

Dosages were prescribed to cure such maladies as "Sunday psychosis, Tuesday twitch, or Friday fatigue," and usually involved taking one or more of the little pills, and remaining sedentarily inactive for two or three hours before a tv tuned to ch. 8.

* KLZ radio a FORMULA STATION?

SURE...especially in the news department. We baby our listeners with a formula composed of the balanced blend of local, national, and area news they cry for. Bob Butz newscasts at 6:45 am, 7:30 am, 8:00 am, 8:40 am, and 12:45 pm. Plus CBS reports on the hour throughout the day give blanket coverage of news around the world... around the clock.

Sponsors thrive on this kind of news reporting...it delivers a buying audience for everything from diapers to dynamos. Rack your competition with a selling campaign on KLZ Radio.

EXCITING NEWS FOR FM OWNERS — exclusive new Zenith development makes use of your present FM radio to bring you the deep beauty of STEREO FM RADIO!

Not an adapter, not a converter, no connections between sets—also operates as a Zenith quality FM radio by itself. Now, without a large investment, you can have a complete Stereo FM system, thanks to an ingenious new development by Zenith. It’s Zenith’s exclusive new MH910 Stereo FM Multiplexer Unit—especially designed to be used with your present FM radio, anywhere in the house! Together, they bring you the deep beauty of radio’s newest miracle—Stereo FM! Positioning for proper separation is not limited by cords or connections between sets. Visit your Zenith dealer now and hear the newest miracle in radio—Stereo FM! The MH910, only $99.95*.

ZENITH. The quality goes in before the name goes on
Storer announces top echelon changes

Bill Michaels and Terry H. Lee, board members and vps of Storer Broadcasting Co., named vp for television and director of business planning and development, respectively. Robert M. Akin, for past 12 years, partner and manager of corporate finance department of Dittmar & Co., San Antonio investment firm, joins Storer as director of finance.

Mr. Michaels, filling position formerly held by George B. Storer Jr., who was elected president of company in April 1961, will establish new offices in Birmingham, Mich., Detroit suburb and convenient liaison point among five TV stations under his direction. He joined Storer in 1953, when company purchased KABC San Antonio, of which he was manager. In 1954, Mr. Michaels was appointed manager of WJBK-TV Detroit. He became vp in 1956.

Mr. Lee, as business planning and development director, will supervise company's program production and releasing firm, Storer Programs Inc., which he helped organize. He joined Storer in April 1958 as general manager of former WVUE (TV) Philadelphia, then owned by Storer, and successively served as manager of WITI-TV Milwaukee and WAGA-TV Atlanta before being promoted to regional vp in January 1961.

Storer Stations are WGBS-AM-FM Miami, WJBK-AM-FM-TV Detroit, WSPD-AM-FM-TV Toledo, WAGA-TV Atlanta, WJW-AM-FM-TV Cleveland, KGBS Los Angeles, WWVA-AM-FM Wheeling, WIBG-AM-FM Philadelphia and WITI-TV Milwaukee.

Larry Rood, copywriter, BBDO, joins Nides & Cini Adv., Los Angeles, as copy chief.

THE MEDIA

Stoddard P. Johnson, former officer and sales executive, San Francisco-Oakland Television Inc. (licensee of KTVU (TV) San Francisco-Oakland), named president and general manager, KRGV-AM-TV Weslaco, Tex. Kenco Enterprises Inc. purchased station Nov. 1 from LBJ Co.

C. L. Doty, station director and national sales manager, WSAI Cincinnati, joins WONE Dayton, assisting president to plan station's future tv facilities, and to assist in development of WONE Inc. (WONE and WIFE-FM Dayton). John E. Hall joins station as chief transmitter engineer.

Dave Maxwell appointed station manager, KLYD-TV Bakersfield, Calif., and assistant general manager of Kern County Broadcasting Co. (licensee of KLYD-AM -FM -TV). Bill Walker, commercial manager, KLYD, named station manager.

Edd Rottt, former vp and general manager, KNOE Monroe, La., and recently administrative assistant to Giles E. Miller (KBUX Amarillo, KKE Austin and 5% of KINT El Paso, all Texas), returns to KNOE, in similar capacity.

David O'Shea, former general manager, WMUR-TV Manchester, N. H., and earlier manager of station relations department, WJZ Television Corp., repp firm, New York, appointed general manager, WING Tampa, Fla.

Joe Cahill, sales manager, KDEO El Cajon, Calif., and earlier account executive with Potts-Woodbury Adv., Kansas City, appointed general manager.
Kenneth W. Pierce, formerly with sales staff of Metropolitan Broadcasting, Chicago, joins The Katz Agency, that city, as member of tv sales staff.

William J. Schmitt, director of busi-
ness affairs for NBC Enterprises Div., named to newly created position of gen-
eral manager of division. Major oper-
ing concern of division is syndication of tv programs through NBC films.

Glenn Williams, WSEN Baldwins-
ville, and past vp of New York State AP Broadcasters Assn., succeeds Al Cole, WRUN Utica, as president of group. Don Decker, WTRY Troy, elected vp, and Morris Paxton, AP’s chief of Albany bureau, re-elected sec-
tetary-treasurer. Elected to board of
directors were Warren Doremus, WHEC-AM-TV Rochester; Floyd J. Keese, WMBO Auburn, and Frank Dobisky, WSLB Ogdenburg.

Thomas Viscardi, media buyer and
analyst, Young & Rubicam, New York, appointed director of sales development, WADO New York. Earlier he had been in media and research posts with Marschalk & Pratt (now McCann-
Marschalk), Kenyon & Eckhardt, CBS, and Crossley Inc., market research or-
ganization.

Jack Petrik, KETV (TV) Omaha, was named chairman of committee for plan to broadcast engineering conference to be held as part of NAB’s annual convention in Chicago, April 1-4, 1962. Others on planning group: Glenn G. Boundy, Storer Broadcasting Co.; Virgil Duncan, WRAL-TV Raleigh, N. C.; William S. Duttera, NBC; William B. Honeycutt, KRLD-AM-FM-TV Dallas; Leslie S. Learned, MBS; Frank Marx, ABC; George L. McClanathan, KPHO-
AM-TV Phoenix, Ariz.; James D. Parker, CBS; and Orrin W. Towner, WHAS-AM-TV Louisville, Ky.

Charles R. Sanders appointed man-
ger, WSPA Spartanburg, S. C., suc-
ceding Ross Holmes, who resigned to join WLOS-TV Asheville, N. C.

Howard A. Jorgensen, sales manager, KCPX Salt Lake City, named manager. Previously, Mr. Jorgensen was account executive at KWIC, that city.

Harold Gann, former producer of sports and special events shows for KGEF, KMAP and KLYD-TV, all Bakersfield, named general manager, KDKS (TV) Hanford, both California.

Hal O’Donnell, formerly with KFRE-
TV Fresno, Calif., to KAIL (TV), that city, as director of operations.

John Rohrbach Jr., account execu-
tive, NBC-TV Spot Sales, Chicago, suc-
cedes James King, in similar capacity, for Television Advertising Representa-
tives, that city. Mr. King transfers to TyAR’s sales staff in New York.

Franklin G. Sisson, manager, WWJ De-
troit, named station manager, WWJ-TV.

Donman F. Jacobson appointed WWJ man-
ger succeeding Mr. Sisson and Nestor A. Sibbold to sales manager of WWJ. Earlier Mr. Sisson served successively as an-
nouncer, program manager and sales manager of WOOD-AM-TV Grand Rap-
ids, Mich. Mr. Jacobson joined WWJ as local sales manager and was later promoted to national, regional and local sales manager. Previously he was account executive with Detroit office of CBS. Mr. Sibbold, member of WWJ-
TV sales staff since 1956, was former divisional sales manager of Closure Sales Corp.

Farris E. Rahall, vp and director, Rahall Broadcasting Co. (WKAP Allen-
town, WNAV Norristown, both Penn-
sylvania; WWNR Beckley, W. Va.; WLCY St. Petersburg and WQTY Jacksonville, both Florida), elected president and director of Globe Capital Corp., industrial and electronic finan-
ciers, St. Petersburg.

Boyd W. Lawlor, general manager, WAIT Chicago, joins Plough Broadcasting Co., as vp and gen-
eral manager of WJJD-AM-FM, that city. Plough Stations are: WMPS-AM-FM Mem-
phis; WCOP-
AM-FM Boston; WCAO-AM-FM Balti-
more; WPLO-AM-FM Atlanta and WJJD.

Bill Miller, WTAG Springfield, Ill., elected president of Illinois News Broadcasters Assn., effective Jan. 1, succeeding Bill Spangler, who becomes member of board. Other officers: Don Newberg, WJBC Bloomington, Ill., vp; Don McMullen, WCIA Champaign, Ill., treasurer; Donald E. Brown, U. of Illi-
nois, Urbana, executive secretary. Di-
rectors: Lee White, KROS Clinton, Iowa; Jim Kock, WHBF-TV Rock Is-
land, Ill.; Dick McGee, WMIX Mt. Ver-
non, Ill., and Mr. Spangler.

Mr. Sisson
Mr. Sibbold

Mr. Jacobson

Mr. Lawlor

BROADCASTING, November 6, 1961
Harry E. Travis, general manager, WPBN-TV Traverse City, Mich., joins Fetzer Television Inc. (KWKO-AM-TV Kalamazoo, WWTM-FM-TV Cadillac, WJEF-AM-FM Grand Rapids, all Michigan, KOIN-TV Lincoln and KGTV-TV Grand Island, both Nebraska), as public service director. Jim Kelly, news director, KCUE Red Wing, Minn., to news staff of WWTM-FM-TV.

Ellie Abel, Washington bureau chief for Detroit News, succeeds Frank Bourgholzer as NBC News State Department correspondent. Mr. Bourgholzer will head NBC News bureau in Moscow.

Al Dressner, attorney and owner of WWHG-AM-FM Hornell, N. Y., and WBNR Beacon, N. Y., appointed national deputy judge advocate of Jewish War Veterans of the United States.

W. V. Hutt, commercial manager, KTHV (TV) Little Rock, and Robert M. Riley, commercial manager, KTHS, that city; appointed assistant general managers, respectively. Both stations are owned by Radio Broadcasting Inc.

Don Edlund, director of advertising and pr for Volkswagen, San Francisco, joins KAVR Apple Valley, Calif., as sales manager.

John M. Bobicz named chief engineer and news director, WKID Urbana, Ill.

Ernest T. Robarge, chief engineer, WKNE Keene, N. H., resigns to join Technop Division, Philco Corp.

Wayne Barrington, formerly with A. Earl Cullum Jr., engineering consultant firm, Dallas, joins WISN-AM-FM-TV Milwaukee, as assistant chief engineer.

Richard W. Fatherley, staff director, WABC New York, joins WICC Bridgeport, Conn.

Daniel O. Stengel, program and sports director, WAMV East St. Louis, Ill., joins announcing staff of KSD-AM-TV St. Louis.

Jim Casey appointed executive news editor, WPTR Albany, N. Y. Don LaVine, formerly with WOLF Syracuse news department, to WPTR, in similar capacity.

John Bowles returns to news staff of WNEM-TV Saginaw-Bay City, Mich., following illness of several months.

Russel Jones, CBS News, joins NBC News as roving European correspondent, based in Vienna. Mr. Jones won Pulitzer Prize for UPI coverage of 1956 Hungarian uprising.

Bob Taylor and Don Wright named news director and assistant news director, respectively, KOLN-TV Lincoln and KOIN-TV Grand Island, both Nebraska.

Harold Soldinger, program manager, WTAR-TV Norfolk, Va., promoted to director of programming and operations.

Thomas Holmquist, news director and sales rep, KBUR Burlington, Iowa, appointed sales promotion director. Richard Scott, newsman, succeeds Mr. Holmquist as news director.

O. W. Myers, general manager, WHTN-TV Huntington, W. Va., appointed assistant secretary of parent organization, Reeves Broadcasting & Development Corp. (KBAK-TV Bakersfield, Calif., WUSN-TV Charleston, S. C., and WHTN-TV), and promoted to vp of broadcast division.

Norman Paul, former general manager, KSJO-FM San Jose, and recently promotion director, Merchants Assn. of San Jose, joins KNTV (TV), that city, as local sales manager.

Jim Hansen, farm and garden editor, KOMO-AM-TV Seattle, re-elected president of Northwest Region of National Assn. of TV & Radio Farm Directors.

DEATHS

Dr. Franklin Dunham, 69, chief of radio and television services, U.S. Office of Education, Dept. of Health, Education and Welfare, Washington since 1945, and pioneer in educational radio, died Oct. 27 of heart attack. During 1930's Dr. Dunham was educational director, NBC Radio Network, where he produced The Catholic Hour. He left NBC in 1940 and became director of National Catholic Community Services. During World War II, Dr. Dunham was named special adviser to Secretary of War with responsibility of establishing Star-Spangled Network, Armed Forces radio.

Alton F. Baker, president of KERG Eugene, Ore., and chairman and former editor and publisher of The Register-Guard, that city, died in Yakima, Wash., Oct. 27.

Peter L. Jensen, 75, co-inventor of radio loudspeaker with Edwin S. Pridham and founder of Magnavox Co., died at his home in Western Springs, Ill., Oct. 25. He later sold interests in company and formed Jensen Industries, manufacturers of phonograph needles, cartridges, and accessories. In his native Denmark, before coming to U.S. in 1909, Mr. Jensen demonstrated "wireless telephone" that he used primarily to broadcast music to ships at sea.

Margaret McClain Ludden, 43, wife of Allen Ludden, moderator and host of CBS-TV's GE College Bowl and Password, died Oct. 31 in Roosevelt hospital, New York, following a short illness.

Relda Garrett Klug, 48, for many years secretary to Joseph E. Baudino, Washington vp, Westinghouse Broadcasting Co., died of heart attack at her home in Munhall, Pa., Oct. 26. She had been on extended leave since early summer.

BROADCASTING, November 6, 1961
RI CHARACTERISTICS

To: A Prospective Station-Buyer

If you have a well-rounded background in broadcasting and a recent history of progressive and profitable operation, with evidence of broadcasting in the public interest, you may have personal interest in the services offered by Communications Fund, Inc., a licensed Small Business Investment Company.

We are prepared to advance substantial financing toward the purchase of fairly priced radio and TV properties, with a portion of the investment convertible into a minority stock interest and the balance on long-term note payable over a period of not less than five years. Complete operational control of the corporation would remain in your hands with our company becoming the senior secured investor.

Whether or not you have a property in mind, your inquiry will be welcomed. Tell us all about yourself and your record. Do not forward financial statements on your present operation unless you are clearly privileged to do so. If you have a station purchase in mind, you may disclose its identity and be assured it will be kept in confidence. Until such time as you authorize us to contact references we will confine our study to the information you provide.

If you feel you have the experience and initiative to move into station ownership, you have access to reasonable equity capital, and have the qualifying track record, we would like to discuss it with you.

P.S. To successful station owners: Our funds are available for expansion into additional markets and improvement of existing facilities. We specialize exclusively in broadcast financing.

BROADCASTING, November 6, 1961
include determination whether public service programming needs of Covington, Ky., are presently being satisfied by adjacent standard broadcast stations; dismissed a suit of Motion to strike Missoula, Mont., petition. (Massillon's petition was unilaterally filed, failed to make threshold showing that such evidence would be of decisional significance, and did not support with factual allegations its assertion that existing stations meet programming needs of Covington.) Action Nov. 1.

By memorandum opinion and order, commission granted petition by Storer Bestg., Co., (WSPD) Toledo, Ohio, to extend of modifying construction permit granted Telegraph Herald increased daytime power of KDTH Dubuque, Iowa, from 1 kw to 2 kw, continued operation on 1370 kc, 1 kw. D to add condition precluding pre-sunrise operations under provisions of Sec. 3.87 of rules. Action Nov. 1.

By memorandum opinion and order, commission granted petition by Storer Bestg., Co., (WSBE) Toledo, Ohio, to extend of modifying construction permit granted Telegraph Herald increased daytime power of KDTH Dubuque, Iowa, from 1 kw to 2 kw, continued operation on 1370 kc, 1 kw. D to add condition precluding pre-sunrise operations under provisions of Sec. 3.87 of rules. Action Nov. 1.

By memorandum opinion and order, commission denied petition by Tropical Telecasting Corp. for review of examiner's ruling permitting Texas Tele- casting Inc. (KVDO-TV) to amend its application to modify its financing proposal in Corpus Christi, Texas, by ch. 3 proceeding for renewal of com- mission's further consideration. Craven did not partici- pate. Action Nov. 1.

By order, commission, on its own mo- tion, directed proceeding not be taken in proceeding on revocation of license of WKBW Buffalo, N.Y., by ch. 66. Judge should find that action, if taken, is only of decisional significance, and did not support with factual allegations its assertion that existing stations meet programming needs of Covington.) Action Nov. 1.

The sad part about push-button cir- culation figures is that the advertiser pays for them—and pays handsomely. And the cost of tickets to Number the game, already pretty high, goes up every time a publisher pushes a button and says: "Add another 3,000 names, George."

In ABP businesspapers, on the other hand, no amount of button pushing is going to produce 3,000 circulation —this circulation has to be paid for . . . and new subscribers just don't jump in line when a pub- lisher pushes a button. Advertising rates that go up at a publisher's de- cision are somehow harder to swallow than those that rise in response to reader demand.

We have nothing against numbers, understand—when they have dollar signs attached. But we feel that numbers per se are not the be-all and end-all in judging publication values. And we go so far as to say that a man who pays $x to sub- scribe to a publication is more mean- ingful, even as a sheer number, than one who pays nothing. He wants the publication more than he wants $x.

If you feel, as an advertiser, that the reader should meet you half way by paying for a publication, you can be sure you're putting your money on the right numbers when you put it in publications bearing this symbol:
serve for rebuttal portion of time granted for oral argument. Action Nov. 1.

- Commission granted motion by Broadcast Bureau and extended to Nov. 6 for filing responses to petition of Mixon et al., and extended to Nov. 10, time for filing responses to petition of Mixon et al., to amend notice of proposed rule making in matter of deintermixture of Columbia, S. a report on public health and extension nutrition materials

An educational consultant examined 206 Public Health nutrition education materials from 22 states and found that breakfast cereals were included in the majority of them. In the same study, 350 Agricultural Extension Service nutrition education materials from 34 states were also examined and it was found that 115 of them included breakfast cereals. That cereal is a basic breakfast item is demonstrated by its inclusion in the above nutrition materials, whose aim is to improve the health and well-being of the people.

CEREALS ARE LOW IN FAT
OUR RESPECTS to Ruth Montez Tjaden, president, AWRT

Broadcasting isn't strictly a man's world

If any woman in broadcasting ever could follow an act, as the old show-business saying goes, like Esther Van Wagoner Tufty, it has to be Ruth Montez Tjaden, the new president of the American Women in Radio & Television and director of promotion, publicity and public relations for KWTW (TV) Oklahoma City.

In fact, following Montez Tjaden (pronounced Jaden) might even be a tougher assignment. The drawing, statuesque (she's a shade under six feet tall) leader of AWRT has cut quite a caper in a broadcasting career spanning some 20 years.

The former actress-newspaperwoman-advertising copywriter-press agent-promo-Navy Commander has done almost everything in her time except break Babe Ruth's homerun record—mainly because she didn't have time.

Like Mrs. Tufty, Montez also has color, a boisterous personality and a strong conviction that this isn't strictly a man's world—particularly in broadcasting.

Actually, Montez Tjaden (she hasn't used Ruth since childhood except for a tenure in the Navy when "... that bear of a C.O. in San Francisco wouldn't believe Montez was my real name." ) is dynamic as lady presidents go. With all her versatility and aggressiveness she is as refined as a typical socialite, and has a modern art and sculpture collection to prove it.

But the lady is tough. She is big enough and has a voice loud enough to command respect from her male counterparts—and she does.

"The James Arness of AWRT" * She is appropriately described by a phrase overheard at a broadcaster-legislative reception last May at the National Press Club in Washington:

"She'd be great in the James Arness role in Gunsmoke."

Whether in jest or not, the tag fits. She grew up on a cattle ranch and is an able rider as well as a good shot, a talent retained from her youth when she hunted rabbits with her brothers.

Montez broke into broadcasting in the early 1940s as a continuity writer, assistant producer and part time actress (when the occasion demanded) at KFB1 Wichita, Kan. Eighteen months later, Montez was head of the continuity and traffic department in addition to her chores as a newscaster.

Still not satisfied (and she wouldn't be for many years hence, as it came to pass), she switched her allegiance to KOME Tulsa. The opening of the armed services to women accounted for many news stories during 1942, and she got the idea to try for a commission in the Navy. "I was an ensign before I knew what was happening," Montez says. Today she is a full commander in the Naval Reserve.

Introduction to her present boss, Edgar T. Bell, executive vice president and general manager of KWTW, came while Montez was on a public relations mission for the Navy. She and Mr. Bell combined their efforts in promoting the war bond drive in Oklahoma City. It was a little more than coincidence that she went to him for a job when her Navy tour ended.

Learns Promotion * Montez told Mr. Bell she wanted to learn the promotion business, a wish he promptly fulfilled, putting her to work in the promotion department of the Oklahoma Publishing Co. writing trade and direct mail advertising for WKY Oklahoma City and KLZ Denver.

When WEEK Peoria, Ill., was built in 1947, Montez packed her bags and became the station's first promotion manager. In 1949 she transferred back to familiar soil when KRMG Tulsa began operations.

She sailed a radical tack from broadcasting at this point, taking a year's time out to be a press agent. As Montez explains it "It sounded like fun, it was good pay and it offered practical experience in promotion." She became publicity director for the LeBlanc Corp., Lafayette, La., handling advance press for the first Hadacol Goodwill Caravan, a 20th Century Medicine Show.

A 90-day tour of duty with the Navy during the Korean conflict stretched into a two-year hitch, and it was 1953 before Montez and Edgar Bell renewed their association to promote a tall television tower, which became KWTW.

She has been there ever since, running her department efficiently and effectively. And it has not gone unnoticed as Mr. Bell himself will testify: "As promotion manager of KWTW, Miss Tjaden has won many awards and high professional recognition—but we are most proud of the leading part she has played in developing 'KWTW-Big 9' image—one that is second to none in the Southwest."

A Whale of a Lander • Today, the chief concern of Montez Tjaden is AWRT—its growth, its prosperity and its role in the broadcasting industry. But AWRT is not a new concern for Montez. She has been a member for the past nine years, active nationally the past six as a director, vice president, president-elect and currently the group's chief executive.

During her administration AWRT's Educational Foundation (a sort of NAB Harvard seminar for women) has flowered into bloom with a successful venture this past summer at Syracuse U. The 1962 seminar at the U. of Washington in Seattle will be even greater, she says.

For years, Montez has believed that there is a relationship between how well informed the individual station executive is and the contribution that his (or her) station will be able to make to the industry. Every station official must be fully up-to-date on the problems and difficulties that face broadcasting, she argues, if individual stations are to be as productive as they potentially can be. The vital importance of this relationship, she maintains, cannot be overstressed.

The 48-year-old (she's not squeamish about her age) lady president doesn't confine her leadership strictly to the 1,600-member AWRT. She was a founder vice president of the Broadcast Promotion Assn. (predominantly male) during its first two years in addition to holding memberships in the Oklahoma Public Relations Assn., the Navy League, and Theta Sigma Phi (national honorary journalism group).

Her hobbies are art and fishing—and she's fairly proficient with the hook, line and sinker, though she says she'd have to land a whale to out-do her father and three brothers during their fishing trips in the Colorado Rockies every summer.
Radio and the Fifth

Unless there are mitigating facts that have not come to light, we must agree with the action of WABQ-AM-FM Cleveland in firing its chief engineer for refusing to answer questions about past membership in the Communist Party.

Yet we do not think that the WABQ action provides the ultimate solution to the problem of protecting stations from the possibility of sabotage or seizure by enemy agents in an international emergency. The problem is intricate, it is real, and, in the light of present relations between East and West, it is acute.

The WABQ engineer was fired after he refused to answer questions put to him by the House Un-American Activities Subcommittee. Several other engineers currently employed in tv and radio were equally uncommunicative. Are they to be fired, and if so can American radio and television be considered safe from infiltration?

Should there be a thorough screening of all radio and television employees who have access to transmitting equipment and the knowledge to operate or sabotage it? By whom would the screening be done?

These questions, it seems to us, deserve consideration by responsible agencies of government and by broadcasters themselves. No matter what kind of emergency may happen to confront the nation, radio and television will be the paramount means of distributing information to the public. They ought to be protected by some kind of security system that would minimize the chance of their being turned against the public they are intended to serve.

Ethics, morality and good faith

The FCC majority’s calculated campaign to force licensee conformity with its own ideas raises new questions of ethics, morality and even good faith. These wholly aside from the legal and constitutional right to insinuate itself into the programming and business operations of broadcasters.

The program reform routine is the only portion of the crusade visible to the public. Newspapers and consumer magazines have exploited this for competitive reasons.

Little known, except to broadcasters with their licenses on the line, are the on-the-scene investigations of the FCC’s own cloak-and-dagger boys (Complaints and Compliance Division) and the recently intensified letter-writing campaign to stations seeking explanations for purported programming and other infractions.

The good faith question emerges from the commission’s move to deintermixture to all uhf status eight cities having a single uhf outlet. The FCC, which voted 4-3 for these changes last July, now would not be averse to calling off this whole deintermixture rulemaking if legislation to require the manufacture of all-channel receivers is passed by Congress.

This is shocking disregard of the FCC’s sworn duty. To use the rulemaking process as a lobbying device is indefensible. It would constitute gross misrepresentation.

If the FCC knows there must be a dual allocation of uhf and uhf channels (as several commissioners unequivocally have stated), it should say so. It should have said so before its deintermixture ruling which threw the affected public and stations into tailspins. Commissioners are sworn to vote their conscience. They cannot trifle with the regulatory processes to coerce licensees or to mislead Congress and the public.

We happen to be for all-channel receivers because we believe that the only answer to the allocations problem is a dual uhf-vhf system. Six years ago we espoused legisla-

tion to eliminate the 10% tax on all-band receivers, while retaining it on vhf-band only sets.

Congress hasn't seen fit to enact legislation to make all-channel receivers mandatory, presumably because it isn’t sure about its legality.

Hearings on deintermixture are committed early next session before the House Commerce Committee. The committee, we assume, will not overlook the motivation for the FCC’s 4-3 vote or the calculated effort to disguise the New York City $2 million uhf experiment as one to test the feasibility of uhf service in New York only.

These and other manifestations of the FCC’s considered intent to crack down on licensees by imposition of censorship, threats and intimidation persuade us that an entirely new law to replace the current 34-year old statute is essential. This isn’t easily accomplished. It might take years. The time to start is now if broadcasters want to reclaim the freedom they thought was guaranteed them under the First Amendment.

JFK’s news switch

There is reason for concern to the general public, well as to broadcasters that President Kennedy is increasing the frequency of his news conferences.

The concern may be amplified by his newest method of meeting the press in private luncheons attended by editors and publishers. Five such luncheons have been held with newspapermen from Kentucky, Missouri, New Jersey, Washington and Texas. (Is it oversight that similar luncheons for broadcasters have not been held?)

In these circumstances—the decrease in the number of open news conferences and the introduction of the private affairs—the American public is losing an element of intimacy in its contacts with the President.

We suggest that President may be losing something too. Franklin Roosevelt said that he found news conferences useful because he could learn, from the questions that were asked, what was on the public’s mind.

In the give-and-take of open news conferences of the kind that were held with reasonable regularity during the earlier part of Mr. Kennedy’s administration there were benefits for all. The live radio and television broadcasts were especially informative.

Certainly the subjects that are on the public’s and the President’s minds right now are as deserving of discussion as those with which early conferences dealt.

Drawn for BROADCASTING by Sid Hix

"They've found that the Huntley-Brinkley format is quite popular in these parts, too!"
A NEW SERVICE FROM KSTP FEATURE FOODS

End-of-aisle store displays for KSTP Radio-TV advertisers

Now available to food-store-product advertisers who qualify for KSTP Radio and Television FEATURE FOODS MERCHANDISING Service, are these end-of-aisle displays in top-volume supermarkets in the Twin City area.

Gondolas — such as the one illustrated here — dump bins or carts, each topped by an eye-catching, red banner reading "KSTP FEATURE OF THE WEEK" are all available, depending on which is most suitable for display of your product.

During each 13-week cycle of participation in KSTP FEATURE FOODS MERCHANDISING, the advertiser will receive a guaranteed six weeks (36 days) of end-of-aisle displays in Twin City area supermarkets.

KSTP personnel will place the displays and remove them, thereby guaranteeing advertisers that their displays are actually on the floor for the specified time. Advertisers will be notified in advance of the location of each display. These end-of-aisle displays are very desirable and their availability disappears fast. Plan now to take advantage of this new KSTP plan in conjunction with the highly-successful FEATURE FOODS MERCHANDISING Service to give sales-building end-of-aisle display space to your product.

Petry offices and KSTP Radio and TV representatives have the details.

The familiar KSTP BARGAIN BAR combines with FEATURE OF THE WEEK display to command key traffic area in Minneapolis supermarkets.
