RADIO DIVISION
EDWARD PETRY & CO., INC.
THE ORIGINAL STATION REPRESENTATIVE

YORK • CHICAGO • ATLANTA • BOSTON • DALLAS
ROIT • LOS ANGELES • SAN FRANCISCO • ST. LOUIS
Radio to listen to radio by

WJR is the kind of radio people pay attention to.
WJR radio is foreground radio. With the kind of sports and fine arts and news and farm shows and homemaking tips and music that thrill, provoke, inform, amuse, excite, and charm.
In short, WJR radio does things to people. All day, all night, year in, year out.

This kind of radio does things for commercial messages, too. Namely, gets them heard and appreciated—in a 4-state 112-county market, 15,312,700 people strong.
In short, radio for you to make money by. Call your Henry I. Christal Representative soon.
KEY STATION
FOR THE ADULT RADIO AUDIENCE IN BALTIMORE

WCBM programs for adults . . . the young marrieds . . . the parents of growing families . . . the people with "spending" power. They need more of your product or service . . . and YOU need them. Reach them, and thousands of adults like them, and you reach the most important buying segment in the growing Baltimore metro market.

They prefer the adult-level programming WCBM offers . . . the music . . . the personalities . . . the programs . . . and the news, with 17 hours of local and regional coverage, gathered by Baltimore's largest radio news team, plus 15 hours of CBS news.

Unlock the door to the adult audience in Baltimore . . . the people who "buy"! Deliver your message to them through WCBM Radio . . . key station in your Baltimore radio schedule!

WCBM
A CBS RADIO AFFILIATE • 10,000 Watts on 68 KC & 106.5 FM • Baltimore 13, Maryland

National Sales Representative
Metro Radio Sales
A SERVICE OF METROPOLITAN BROADCASTING
Only single medium assuring full sales power in the entire region . . . a multi-city market including the metropolitan areas of Lancaster, Harrisburg, York, and many other communities. And, area-wide, the Channel 8 viewing audience is unequaled by all other stations combined. This is full sales power. Use it to build sales and increase profits.
Central rating bureau?

Detailed proposal for settling ratings crisis has been drafted by Television Bureau of Advertising management with its special practices committee and is expected to be submitted to TVB board at meeting this week. It envisions new corporation financed and supervised by advertisers, agencies and broadcasters (but with broadcasters paying biggest share of freight). It would be headed by man who has earned respect of all three groups, and would have two divisions: One, headed by accomplished “investigator,” would audit ratings services; other, under prominent researcher, would conduct studies for immediate changes in measurement standards and methodology, and also conduct long-range investigations looking toward new techniques, methods, even new systems.

TVB blueprint has been developed over long period but submission to board has awaited full in Washington hearing, now in recess. TVB top brass and members of special practices committee, headed by Martin Nieman of Edward Petry & Co., discussed it with A. C. Nielsen Jr. and James Selle, head of Nielsen and American Research Bureau respectively, at private meeting last Thursday. Their reaction: reportedly favorable. Nieman committee will submit report for TVB board’s consideration at meeting Wednesday and Thursday at Greenbrier, White Sulphur Springs, W. Va.

Nielsen footnote

Statement that A. C. Nielsen Jr. wanted House subcommittee probing ratings to accept, but which Chairman Oren Harris (D-Ark.) dismissed as unsound and “self-serving,” pleased that company loses money on five of its six services, which gross about $7 million annually. If firm improves its radio service and clients fail to support higher fees, Nielsen “will regretfully retire from the local radio rating business,” he said. Letter to Mr. Nielsen from Mr. Harris explained why unsound statements were not acceptable and reminded that opportunity to testify was given although Mr. Nielsen wasn’t around to accept. Fresh opportunity may be made in next hearing phase, chairman wrote, “should you still want to submit testimony.”

FCC sweepstakes

No indication yet as to front runners for upcoming Newton M. Minow vacancy on FCC either for commissioner or chairmanship. But new names cropped up last week including: Louis G. Cowan, former CBS-TV president, now director, Communication Research Center, Brandeis University, Waltham, Mass.; Herbert E. Evans, president of Peoples Broadcasting Co., Columbus, O., and National Association of Broadcasters delegate to Inter-American Association of Broadcasters, and Milton J. Shapp, chairman of board of Jerrold Corp., Philadelphia, among New Frontiers-man who participated in organization of Peace Corps. Since retirement of Commissioner T. A. M. Craven, there’s no engineer on FCC and Mr. Shapp’s supporters say he would fill void. Jerrold is prominent in community antenna systems.

On merit promotion from within government, Max D. Paglin, FCC general counsel, is mustering important support, as is David Parson, deputy general counsel of USIA (Broadcasting, Feb. 25, April 8).

Local live problem

Six New England TV stations whose license-renewal applications were deferred because of questions about local live programing in prime time (Broadcasting, April 1) still don’t know what information FCC wants. However, letter of inquiry has been drafted by FCC and it may come up for commission approval at meeting next week.

FCC hasn’t announced stations that, in policy-reversing decision, it deferred because of 6-11 p.m. issue. Those involved are WAGM-TV Presque Isle, WLZB-TV Bangor, and WCHS-TV Portland, all Maine; WNHC-TV New Haven, Conn.; WHYN-TV Springfield, Mass., and WJAR-TV Providence, R. I.

News management on AFN?

Is news management invading American Forces Network operations overseas? By presidential decree, commentaries prepared by USIA have been ordered on all AFN radio and TV stations, except where prohibited by agreements with host nations (France has already vetoed project). Service was to have begun over Germany’s extensive AFN networks last Wednesday, with two five-minute “commentaries” daily, supplementing regular on-the-hour AP-UPI newscasts. Official explanation is that USIA commentaries were begun to improve quality of news for U. S. forces overseas.

According to reports, some Department of Defense officials were opposed to use of USIA “news analyses” because of “propaganda” implications, particularly when “eavesdropping” audience of AFN outlets exceeds military audience. Powerful German medium-wave stations (using allocations to that country) are listened to regularly, not only in Germany but also in Denmark, Belgium, Holland and Switzerland. Use of USIA commentaries might invite new jamming from Soviet-oriented areas, easily accomplished on medium bands. Countering this is notion that news handling by military personnel is inefficient and of “rip and read” nature and therefore inadequate in current era of fast-breaking events when official viewpoints of U. S. government should be conveyed to troops to fill “gap” in that supplied by news services.

Collins to England?

LeRoy Collins, president of National Association of Broadcasters, has tentative plans to go to England this summer. He wants to observe British television at first-hand, is particularly interested in studying commercial system of clustering TV advertising during “natural” program breaks. Governor Collins has already said British system of keeping commercials out of programs has “great appeal to me” (Broadcasting, March 25).

Inside story

Sudden resignation of Dr. Irvin Stewart as director of telecommunications management at White House (story page 90) has given rise again to frustrations entailed in handling allocation of frequencies for government use. Dr. Stewart, on job for about year and with broad powers given him under executive order, simply advised President that he and his wife preferred academic life and that he’s returning to professorship at University of West Virginia. But notion is that he was unable to accomplish objectives because of difficulty in working with military in efficient use of scarce spectrum space.

Stewart resignation will have bearing on makeup of U. S. delegation at extraordinary conference on space communications to convene this October in Geneva and at which U. S. will be pitted against Soviet. Commander T. A. M. Craven, who retired from FCC March 25 but was retained as consultant on space communications, was chairman of 1959 delegation which agreed upon experimental space allocations, with upcoming October conference to implement allocations. It’s now surmised that Commander Craven, acknowledged expert in international negotiations, may again head U. S. delegation, picking up where he left off four years ago.
Who's next?

This is "TOP CAT," the star of 30 half-hour cartoons created by the world-famed HANNA-BARBERA STUDIOS. He's zany... he's fantastically funny... and he's a real operator. He's fixed it so that a leading national advertiser has agreed to buy at least one minute of commercial time per week for 52 weeks from stations telecasting "TOP CAT" in the top 75 Nielsen markets! It's quite a deal. If you want in—just call out... "I'm next!"

BROADCASTING, April 22, 1963
WHAT IS THE MEASURE OF A BROADCASTING STATION?

The pleasant folks* pictured here are part of a local Connecticut television show ... a show which, consistently, has bested nighttime network competition. Titled “What in the World,” the program is basically a quiz ... which insults neither intelligence nor credibility ... on the geography, history and architecture of the world's interesting places ... and the habits, customs and accomplishments of people. The prizes are modest ... and they don't go to people but to institutions which have need.

Funny thing about the show! It has only one commercial, three minutes long, smack dab in the middle of the program, ... and, usually, it is so interesting, it draws fan mail!

We'd like to take full credit for “What in the World” but must hasten to assert that it is the brainchild and production of Baker Advertising of Hartford. We do take credit, however, for recognizing its merit and charm a long time ago. In fact, “What in the World” has been on WTIC-TV as long as the station has been telecasting.

Sorry — but “What in the World” is not for sale. It is sponsored by the Electric Companies of Connecticut, as it has been since its very first broadcast.

*Left to right: John F. Schereschewsky, Director of the Runsey Hall School; Aline Saarinen, art critic; Charles C. Cunningham, Director of the Wadsworth Atheneum; James N. Egan, attorney; Ben Hawthorne, announcer; and Quizmaster John Dando, Associate Professor of English at Trinity College.
Nielsen's reaction to ratings hearing
CITES PROBLEMS AND EFFORTS MADE TO SOLVE THEM

A. C. Nielsen Co. was frankly optimistic before recent congressional probe of broadcast ratings in view of very favorable findings "on the validity of our methods" by committee's "three eminent statisticians." But during hearing "unfortunately, the calm reply cannot compete with the sensational charge."

This was how firm's president, A. C. Nielsen Jr., confided his reactions of Harris subcommittee probe last week to closed meeting of Chicago chapter of National Community TV Association and disclosed late Friday by Nielsen. Citing implications drawn from memo written by head of his firm's statistical control department referring to weaknesses, he said "what was not brought out was that in response to this memo another $300,000 was added to company's annual costs to correct the conditions and maintain standards—long before the hearing began."

Not Easy • Pointing out sampling isn't without its problems, he noted, "it isn't easy to measure the highly fractionated, changing character of radio listening—considering the economics of the situation." Pressing point he explained "you can accomplish anything in research if cost is no object."

Pilot work is going on now regarding local radio measurement, he said. "If we succeed," he continued, "the improved research will cost more. While we wouldn't raise prices without getting the views of the radio industry, we hope they would approve." If not, Nielsen "regretfully" will discontinue measuring local radio.

As for possible development of some kind of industry committee to evaluate standards of audience measurement, "we would gladly cooperate," he said. "Recent publicity to the contrary, our house is in order and the door to that house has always been open to responsible men who want to see what we do and how we do it."

Mr. Nielsen also recalled "a great stir arose in the hearing because one sample home consisted of two old ladies from Arkansas. Well, what's so terrible about two old ladies? Are we to gather that a sample is not to report old ladies, or that old ladies do not buy products or respond to advertising? I hardly think so."

Liz Taylor to make TV debut in October
Elizabeth Taylor will make her television debut in one-hour special program on Sunday, Oct. 6 (10-11 p.m.) under sponsorship of Chemstrand Inc., through Doyle Dane Bernbach, New York. Special had been offered to each of networks and CBS-TV agreed to sign contract for show on Friday afternoon (April 19).

Special, which will be produced in London during May and June, is tentatively titled Elizabeth Taylor's London, and will consist of tour of city's landmarks and institutions. Television Productions of America Inc., New York, which will produce show, said Miss Taylor will receive highest fee ever paid performer for single show in history of television. No figure was disclosed, but one source close to negotiations said reports fee would be $500,000 were "somewhat exaggerated."

Public witnesses praise WYNR's Negro programs
Several public witnesses who were complimentary of Negro format of McLeod Corp.'s WYNR Chicago testified Friday during FCC inquiry there (early story page 85). One FCC witness, Andrew L. Kondich, recalled that when McLeod cut foreign language programming he received many complaints from subscribers to his German-language newspapers there.

McLeod witnesses included Mrs. Gilbert H. Jones, sociologist with Illinois Youth Commission, who felt WYNR music is of better quality than usual Negro-type station yet still appeals to teenagers. Radio is good way to reach them, she indicated, because news and editorials can be slipped in easily and obtain their attention, thus helping fight juvenile delinquency.

Rev. Carl Fuqua, National Association for the Advancement of Colored People, testified ideal situation is non-segregated radio but "unfortunately now there is a need for an all-Negro station" same as church or lodge. He praised WYNR aid.

Senate floor fight brewing over Comsat
Senate floor fight looming over leadership effort to confirm 14 incorporators of Communications Satellite Corp. today (April 22) will involve 14 senators led by Senators Albert Gore and Estes Kefauver (both D-Tenn.).

Stressing their opposition is not on incorporators' individual qualifications, senators base their objections on constitutional grounds, mainly that President may not propose nor may Senate confirm directors of private corporation (BROADCASTING, March 25).

Emphasizing they intend no filibuster, opponents feel they may pick up support of other senators who backed satellite firm legislation last year in belief private industry could develop workable space communications system more efficiently than government. Several now are on record as disappointed at heavy federal involvement, plan for even more public spending in this area. Amendment which some believe could kill Comsat Corp.: require firm to reimburse government for all research spending benefiting company.

Radio-TV praised for helping reduce alcoholism
Radio and television were praised Friday for playing major role in reducing stigma attached to disease of alcoholism.

R. Brinkley Smithers, outgoing president of National Council on Alcoholism, said entertainment industry's "contribution to understanding and elimination of stigma has been nothing short of magnificent."

In television, he praised Circle Theater, Dr. Kildare, Ben Casey, Alfred Hitchcock Presents and Open End, as examples of industry's contribution to public understanding.

"Local radio and television stations

Unannounced meeting
FCC is holding special, unannounced meeting today (April 22) in connection with proposed CATV legislation. Commission staff members and representatives of National Community TV Association have been meeting over period of several weeks in effort to draft bill acceptable to both sides. It's understood staff will report to commission that considerable progress toward this goal has been made, but that one or two points remain. One such unresolved problem: amount of protection FCC could require CATV systems to provide stations in their areas.
WEEK'S HEADLINERS

Michael R. Santangelo, executive producer and assistant to VP in charge of programming for Westinghouse Broadcasting Co., joins Talent Associates-Paramount Ltd., New York, in newly created post of VP and executive assistant to TA-PL president, David Susskind. Jack Kuney, producer-director of 123 Go, NBC-TV children's series, succeeds Mr. Santangelo as executive producer at WBC. Mr. Kuney will specialize in producing public service and educational programs. Before joining Westinghouse seven years ago as public relations director, Mr. Santangelo served as account executive at Benton and Bowles, Robert Gray Associates, and Motion Pictures for Television.

For other personnel changes of the week see FATES & FORTUNES

and the great networks have donated millions of dollars in air time in the form of messages about alcoholism. I hope the management of these organizations will take justifiable pride from the knowledge that their efforts have been responsible for saving many, many lives," Mr. Smithers said.

Court asked to reverse FCC on Jackson grant

Because change in transmitter site of WYUA-TV New Orleans (ch. 12) is 30 miles short of standard 190-mile separation from co-channel WJTV (TV) Jackson, Miss., U. S. Court of Appeals in Washington was asked Friday to reverse FCC.

In appealing commission's action in New Orleans WJTV claimed its license has been modified without its consent or hearing.

Justifying its action, FCC said although mileage separation was short, it was protecting Jackson station by forcing New Orleans outlet to cut down on power. It also pointed out that New Orleans station must transmit 35 miles outside city in order to meet mileage separation standard.

Hearing argument were Circuit Judges George T. Washington, John A. Danaher and Walter M. Bastian.

Minow cites developments of past two years in TV

FCC Chairman Newton N. Minow says "the most important and encouraging development" of his two years at commission has been "a renewal of the concept that the public rather than the broadcaster is the proprietor of the airwaves."

Not all broadcasters agree with this concept, he said in broadcast over WOR-TV New York Thursday night, "but certainly many of them do."

Too many other broadcasters, he said, subscribe too seriously to H. Mencken's theory that "nobody ever went broke underestimating the intelligence of the American people."

"Quality programming and commercial success, he reiterated, "are certainly compatible."

Gary candidate files 2d petition with FCC

Candidate for Democratic nomination for mayor in Garty, Ind., has filed second petition with FCC in connection with his demand for equal time from WWCA Gary.

Thomas R. Faddell is seeking time equal to that afforded his opponent, Judge A. Martin Katz, who appears regularly on station's broadcasts of Gary County Court's proceedings (Broadcasting, April 15).

Mr. Faddell, it was learned Friday, based demand on fairness doctrine, which requires broadcaster to air "conflicting views" on important issues. Mr. Faddell alleges that Judge Katz uses program to advance his own candidacy.

Commission is expected to issue ruling early this week. Late Friday, it was awaiting reply of WWCA to Mr. Faddell's second complaint.

Commission denied Mr. Faddell's first complaint, which was based on equal-time section of Communications Act. But at some time, it said fairness doctrine might apply.

Buick buys TV golf show

Buick Motor Division of General Motors announced Friday it will sponsor for second consecutive year live pickup of conclusion of annual $52,000 Buick Open Golf Tournament on NBC-TV Sunday, June 9, 4:30-6 p.m. Agency: McCann-Erickson, Detroit.

Goodwill's first quarter up

Goodwill Stations Inc. reported net income for first quarter of 1963 of $201,177 (29 cents a share) on gross revenue of $2,069,726. This compares with $140,106 (20 cents a share) for net income on gross of $1,819,097 for same period in 1962.

Goodwill stations are: WJR Detroit; WJRT (TV) Flint, Mich., and WSAZ-AM-TV Huntington, W. Va.

WLAK sold for $200,000

WLAK Lakeland, Fla., has been sold by Howard W. Cann Jr. and Frank W. Nesbitt to Robert B. Brown and Roland B. Potter for $200,000 plus $25,000 for agreement not to compete. Mr. Brown owns WTLK Taylorsville, N. C. Mr. Potter has interests in WKBC North Wilkesboro and WATA Boone, both North Carolina. WLAK operates on 1430 kc with 5 kw day and 1 kw night. Sale is subject to FCC approval. Broker was Chapman Co.

He said that although he criticizes television, he also appreciates "the many extraordinary things it has done."

Mr. Minow was guest of Arnold Michaelis on WOR-TV's View from the Top program.
KRNT Radio has the largest audience in Des Moines and has had for a long, long time. The audience is predominantly adult. Central Surveys study confirms that KRNT is the most believable station here. Here's the way all this comes about:

1. We feature one of the great news outfits in the nation. Every newscast on KRNT outrates its competition by a country mile. We're rough, tough operators in the area of news. We have more reporters than some stations have total personnel! This is one of the great news stations in the nation.

2. We feature highly publicized, highly trained, highly accepted personalities. We have the advantage that all our people are seen on our television station; radio listeners really "know" the person that goes with the voice. This INTER-MEDIA MOTIVATION FACTOR is tremendously important to the effectiveness of advertising. There are more widely known personalities on KRNT than on all other local radio stations combined. With listeners, clients, and rating men, we're the station with the most popular, professional and persuasive personalities... again and again and again.

3. We feature music with melody. Old ones, new ones, golden records (million sellers), albums, pops, classical... all chosen with great care by a man who cares, programmed with care by people who care... introduced with understanding by people who care. In the area of music we've got a song in our heart.

4. We feature service to the community. Last year we broadcast some 20,450 announcements for eleemosynary organizations and 600 program hours. We spent countless hours meeting with committees, writing their copy, counseling them. We touch lots of lives this way. We're kind and gentle people in this area of operation.

5. We publicize and advertise our activities, our people, our aims and aspirations. In this area we make no little plans and we carry through what we start. People hereabouts know everything about all we do.

We honestly believe that it is a great opportunity to be able to advertise a good product on this station. We've been in business long enough (28 years) for any test of fire. We know now without doubt that advertisers don't test us... we test them. We test their product appeal, the copy they use, their prices, their merchandising setup.

If you have a good product, good copy, honest dealings, and fair prices, you can get rich advertising on this great station.
The Embassy of The Netherlands

His Excellency Dr. J. Herman van Roijen, Ambassador of the Netherlands to the United States, and Mrs. van Roijen, at the entrance to the dining room of the Embassy . . . another in the WTOP-TV series on the Washington diplomatic scene.
Amazing new telephone switching system is its own "doctor"

There are 6500 transistors and 45,500 diodes in the heart of a new Bell Telephone electronic switching system. Yet, if any components fail, finding them is easy. That's because Bell experts have given the system a mind which can tell what's wrong with itself. What's more, the system can indicate where the cure for the failure can be found in a 1295-page "medical dictionary" which it authored itself! The Bell System developed this new system for use in its first commercial Electronic Central Office which will begin operation in Succasunna, N. J., in 1965.

Bell engineers estimate that the system's mind and dictionary will locate 90% of all failures that might develop at Succasunna. This will assure the great reliability needed for new, super-fast electronic telephone switching.

Ingenuity to the nth degree is demanded for the extreme reliability needed in today's communications. It's a challenge we welcome in providing continually improving service for you.

Bell Telephone System
Owned by more than two million Americans
A calendar of important meetings and events in the field of communications

**APRIL**

April 21-26-63rd convention of Society of Motion Picture and TV Engineers (SMPTE) The Traymore hotel, Atlantic City, N. J.

April 22-23-Conference on broadcasting and mental health, under joint sponsorship of National Association of Broadcasters and National Association for Mental Health, U. S. Hotel Thayer, West Point, N. Y. The conference will open with a luncheon at the Harvard Club in New York City on April 22, and from there will move to West Point by chartered bus. Conference co-chairmen are Collins, NAM president, and Dr. William C. Menninger of the Menninger Foundation.

April 22-23-Sixth National Foreign Policy Conference for Editors and Broadcasters West Auditorium, Department of State, Washington. President Kennedy and other government officials will participate in briefing sessions.

April 23-Joint luncheon of Advertising Club of Boston and Broadcasting Executives Club of New England, Georgian Room, Hotel Statler-Hilton, 12:30 p.m. James C. Hagerty, vice president in charge of news, special events and public affairs, ABC-TV, is chief speaker.

April 25—Annual stockholders meeting, Trans-Lux Corp., 625 Madison Avenue, New York.

April 28—Michigan AP Broadcasters Association meeting, Lansing.

April 29-15th anniversary ball of Bedside Network of Veterans Hospital Radio & TV Guild, Plaza hotel, New York.

April 26-27—Ninth annual Oregon Broadcasting Conference, Oregon Association of Broadcasters, Village Green motor hotel, Cottage Grove, Ore.

April 26-27—Virginia AP Broadcasters meeting, Executive motor hotel, Richmond. Awards in the VAPB newscasting and telecasting contests and for public service will be presented on first night at the banquet.

April 27—UPI Broadcasters Association of Massachusetts, The Charterhouse, Waltham.

April 27-28—Spring meeting of Kansas AP Radio-TV Association, Baker hotel, Hutchinson.

April 28—Milline Club meeting at Masquers in Hollywood, Calif. Mel Blanc, president of Mel Blanc Associates, humorous advertising consultants, will talk on "How to Avoid Speaking Before Advertising Groups and Other Religious Cults."

April 28-30—Annual meeting, Chamber of Commerce of the U. S., National Chamber
Building and various hotels, Washington.

April 28-May 5—Meeting of Canadian radio and television station executives, Royal York hotel, Toronto, in conjunction with the annual convention of the Canadian Association of Broadcasters, May 1-3. Luncheon on May 2 will be addressed by NAB President LeRoy Collins.

April 29—AWRT board of directors meeting, Sheraton hotel, Philadelphia.

April 29-May 1—Association of Canadian Advertisers, Royal York hotel, Toronto.

April 29-May 4—“Rose d’Or” contest; May 20-35, 1963—Television Symposium and TV Equipment Exhibition. The two events are part of the Third International Television Festival announced by The City of Montreux, Switzerland. For further information write to Box 97, Montreux.

April 30—AWRT Educational Foundation board of trustees meeting, Sheraton hotel, Philadelphia.

April 30-May 1—Spring conference of Missouri Broadcasters Association, Columbia, Mo. April 30 session will be held at MFA Insurance Co.’s auditorium and May 1 all-day session in connection with University of Missouri Radio-TV Day of Journalism Week.

MAY

May 1—Comments are due on FCC proposal to serve for 600-mile radius operation of ch. 7 at University of Illinois radio astronomy observatory, Danville, Ill.

May 1—Stockholders meeting, Goodwill Stations Inc., 2800 Fisher Building, Detroit.

May 1—New deadline for comments on FCC proposed rulemaking to allow daytime stations to go on the air at 6 a.m. or sunrise, whichever is earlier.

May 1—AWRT advisory council meeting, Sheraton hotel, Philadelphia.

May 1-3—Canadian Association of Broadcasters annual convention, Royal York hotel, Toronto. CAB convention was formerly scheduled for April 1-3. Speakers include NAB President LeRoy Collins.

May 1-3—Illinois Broadcasters Association spring convention, Springfield.

May 2—Seminar on radio broadcasting and community leadership under joint auspices of Southern California Broadcasters Association and University of Southern California Department of Telecommunications, USC campus, Los Angeles.

May 2—Publicity Club of Los Angeles clinic-seminar to answer the question: “But will it sell?” Tyler McDonald, of Hixson & Jorgensen, will be keynote speaker, and Richard Astling, executive vice president of Interne Media, Inc., will deliver the luncheon address.

May 2-3—Illinois Institute of Technology conference on present and future communication satellites. Sponsored jointly by the Committee for Economic and Cultural Development of Chicago, the National Aeronautics and Space Administration, IIT and its Armour Research Institute, the meeting is part of the 3d National Conference on the Peaceful Uses of Space to be held in Chicago. Scientists and engineers are expected at the IIT conference, entitled “Technical Aspects of Communication Satellites,” in the institute’s Grover M. Herman Hall, 33d and Dearborn Sts. Keynote address by Dr. Leonard Jaffe, NASA.

May 2-4—Spring convention of Alabama Broadcasters’ Association, Holiday Inn, Florence. Prominent speakers include Alabama Gov. George Wallace and NAB President LeRoy Collins.

May 2-5—Twelfth annual convention of American Women in Radio and Television, Sheraton hotel, Philadelphia. Speakers include Mrs. Lyndon B. Johnson, wife of the Vice President of the United States, James T. Quirk, publisher of TV Guide, and Marvin Kalb, diplomatic correspondent for CBS.

May 3—Indiana University Radio and Television Department banquet, Bloomington, Ind. Julian Goodman, vice president for news, NBC, will be guest speaker.

May 3—Commonwealth Club of California meeting to be addressed by Stephen B. Labunski, vice president, Strauss Broadcasting Inc., and competition in communications. Sheraton Palace, San Francisco.

May 3-4—Annual spring meeting of West Virginia Broadcasters Association, Charleston Press Club, Charleston.

May 5-7—Television Programming Conference annual meeting (formerly SWAPPTD), Royal Orleans hotel, New Orleans. Speakers include: FCC Commissioner Kenneth Cox, Washington; Lynwood King, NBC, New York; Pamela Iott, CBS, New York; Walker Spence, Spangenberg Studios, Los Angeles; Robert Buchanan, Soundac Films, Miami. For further information contact Jerry Romig, WDSU-TV New Orleans.

May 6-7—Fifth annual meeting of Council on Medical Television of the Institute for Advancement of Medical Communication, National Institutes of Health, Bethesda, Md.

May 6-8—Spring meeting of Kentucky Broadcasters Association, Louisville Sheraton hotel. FCC Commissioner Robert T. Bartley will speak.

May 7—Annual RCA stockholders' meeting, 30 Rockefeller Plaza, New York City.

May 7-8—Electronic Components Conference, International Inn, Washington. The conference will be opened with a keynote address by Dr. James H. Gardner, deputy director of defense research and engineering, D. Brainerd Holmes, director of manned space flights, NASA, will be 8 p.m. banquet speaker.

May 8-11—Annual convention of the Montana Broadcasters Association, Bozeman.

May 9—Annual stockholders meeting, New Paveau Broadcasting & Development Corp., New York.

May 9—Meeting of the scientific section of Toilets Goods Association, Sert Room, Waldorf-Astoria hotel, New York City.

May 9-10—Chesapeake AP Broadcasters Association, Sheraton-Belvedere hotel, Baltimore.

May 9-11—Seminars in editorial, advertising and circulation, registration in the Wisconsin School of Journalism, Madison.

May 9-11—Second annual convention of North American Broadcasters Idea Bank, Holiday Inn, Danville, Ill. Speakers include: James E. Carnes, president of Kansas State University; Carle E. Bolte, National Purity Life Insurance Co., Kansas City; former District Judge Joseph M. McDonald of Denver, who presided at the John Gilbert Graham murder trial, and Lyle Fonden, general manager of KLZ Denver.

The lessons BMB taught

EDITOR: Never once in all the heated discussions about rating services [at the NAB convention in Chicago] did I ever hear any reference made to the former Broadcast Measurement Bureau.

I never saw more dedicated people than representatives of the AAAA and the ANA. Perhaps we didn’t have the most enlightened leadership. Perhaps the board members themselves were not capable. Perhaps even the idea was not sound.

But, it seems to me that this came the closest to a sensible measurement of audience that has ever been proposed or put into effect by the broadcasting industry. At least it was our own. At least it was supervised by the broadcasters, the agencies, and the advertisers.

I can’t understand why this concept has been entirely forgotten in the present furor over rating services.

I talked to agency, advertiser and network officials in Chicago and found a reluctant agreement that perhaps the concept could be given a new birth ... Perhaps the industry, with the assistance of the advertisers and agencies, could take a whole new look at this matter of audience measurement.

... I have full respect for Oren Harris, but it seems to me there are so many world-wide problems facing Congress that television and radio should be assigned to their proper share of importance.—ROBERT T. MASON, president, WMRN-AM-FM Marion, Ohio.

(The Broadcast Measurement Bureau was created in August 1944 by the NAB Executive Committee and later approved by the Association of Advertising Agencies and the Association of NationalAdvertisers. The plan entailed a one million dollar postcard survey biennially with the bill paid by the broadcasting industry. The BMB was dissolved in March 1950.)

EDITOR: It seems a tragic thing to see our industry so discredit by the actions of a very few misguided individuals. The need for reliable industry research is even greater now than it was before. We must rebuild confidence in our medium with a new approach.

... There is nothing wrong with the technicks that have been used—it is only in the way they have been used ... I think the immediate solution [to solve the problems] is in the proper administration of the methods we know and are familiar with. I believe that new research methods can and will be developed—but I do not think that we can afford to stand around and wait. We need something now to help our business carry on.

The most important step at this time is to find a way to restore acceptance and confidence in all—or most of—the methods that have been used. We learned some lessons at Broadcast

More advertisers are spending more dollars on WSUN... than at any time in this 35 year history
Can’t mistake his hat...

The Crosley salesman’s.

Because he wears only one.

That of WLW Radio or WLW Television.

The Crosley Broadcasting Corporation has its own sales force.
So when you call a WLW Radio or TV salesman, you get a WLW Radio or TV salesman. A man who is a vital member of Crosley Broadcasting ... who knows his station ... knows his market ... knows his facts and figures. In short, knows his stuff. His briefcase is an open and shut case for Crosley—containing complete information on the WLW Stations and markets—specific, detailed, important—which adds up to fast cooperation and results for you and your product.
Crosley’s sales division is constantly interested in the development of easier buying techniques, and is now working on experimental broadcast research with advertisers—an area unique to our industry. When Crosley started its own national sales organization over 20 years ago it was a revolutionary move, now widely acclaimed. Just another example of the outstanding leadership and spirit of the WLW Radio and TV Stations—which have made Crosley Broadcasting “prime time” in every category!
Measurement Bureau that might be helpful now.
1. A non-profit research corporation is too limited by law to be effective in broadcast research—especially to get in and clean up the present situation.
2. You can’t run a commercial research business successfully with voluntary unpaid committees.
3. The AAAA, ANA and NAB each appointed their most distinguished members and these people contributed their whole knowledge to the project. I believe that the present situation calls again for a joint effort of this kind.
4. Standardization and uniformity of procedures are essential to re-establish confidence... BMB staff procedures were constantly checked and supervised by the committees.
5. Validation was secured by comparing BMB results with tests conducted by other commercial research companies. The results of these tests were announced to the industry.
6. Acceptance by the advertisers, agencies and stations is the end result we are all seeking... BMB learned that we had to explain our reports and suggest how they could be used. If the data is reliable and is used successfully, acceptance is automatic.

All this leads me to suggest two ways to accomplish these goals.

The first would be to create a new company headed by a recognized research authority who has not been damaged by the investigation. This company would have on its board of directors competent advertisers, agencies, stations and networks—and the control of the company would be in their hands. They would be paid fees for their services. This company would equip itself to conduct any kind of research it could sell, and would use whatever method it decided was best for each job.

Financing the company should be no problem. The industry has certainly demonstrated that it will pay for research accepted by advertisers and agencies. It spent over $2.5 million on BMB.

The second—and perhaps more difficult way—is for each research company now in the business to adopt as many as possible of the above procedures and start rebuilding procedures.

I hope these ideas help bring out an early solution to the problem, because we all need reliable research in our business. — Hugh Felts, president, Felts [Dee] Cannon Inc., Tower Building, Seattle (former president, Broadcast Measurement Bureau).

Six feet higher

EDITOR: Re the 1,520-foot tower of WRDW-TV Augusta, Ga. . . . WIS-TV’s tower is 1,526 feet tall and was placed in operation on Jan. 31, 1959.—Don Barton, WIS-TV Columbia, S. C.

(In the April issue, BROADCASTING reported WRDW-TV’s claim to being the tallest tower in the Southeast without directly attributing the claim to the station.)

If radio-TV was struck

EDITOR: There are many people, both in and out of the communications media, who feel the newspapers and broadcasting are complementary to each other. Yet, even though the [New York] newspaper strike caused untold cultural and economic hardship, it seems to me the public would feel a greater loss if the television channels were dark and the radio bands were silent for 114 days.

Would the public stand for this sort of thing for as long as it did with the newspapers? I can’t recall any personal pleas from the widespread readership of the New York City newspapers to get them back on the stands.

I feel, though, that were the people faced with a total broadcasting blackout, there’d be more involvement on their part.

... I suppose quite a few newspapers are sold to persons merely interested in “what’s on TV tonight.”—Henry Lewis, newscaster, WTMF [FM] Lake Success, N. Y.

TV in the tropics

EDITOR: Our company finds it interesting when we read BROADCASTING articles on new stations commencing in the U. S. and overseas.

Our station is situated on Mount Stuart, 1,900 feet above sea level, six miles outside Townsville in North Queensland, and in the tropics. We commenced transmission Nov. 1, 1962, and we originate four hours each night. Approximately one hour of this is Australian film and live programs.

We operate with a staff of 22. Our potential viewers are over 100,000 people including some in Port Moresby, New Guinea, who receive us regularly.

We have provision for two studios but, at the moment, we are using one which is 15 feet by 18 feet. Our studio is equipped with Marconi cameras.—John O. Phillips, program-production supervisor, TNQ7, P. O. Box 716, Townsville, Queensland, Australia.

It’s Evansville

EDITOR: . . . In behalf of the Evansville, Ind., New Image Committee, a subsidiary of Evansville Future Inc., congratulations on your March 18 coverage of Evansville as part of the Ohio River industrial complex.

However, we call your attention to page 117 wherein Evansville is referred to as “Evanston.” —Norman C. Haagenson, general manager, WROV Evansville, Ind.

Direct aim at a prime advertising target — the heart of America — is provided through coordinated facilities of four progressive Kansas television stations. Local, regional, and CBS programs of the Kansas Broadcasting System penetrate an atmosphere of prosperity in 91 key counties of Kansas, Oklahoma, Colorado, and Texas. Diversified income of more than two and a half billion dollars from agriculture and manufacturing accentuates the potent buying potential of this 86,000-square-mile, expanding new market. Retail sales in 1962 totaled nearly two billion dollars. By interconnected stations your TV message simultaneously is welcomed by viewers in all 91 counties — an exclusive KBS accomplishment. Your product exposure is convincingly thorough — and surprisingly reasonable on Kansas Broadcasting System.

In a Class by Themselves

Mr. Novak is a high-school teacher.

Put the name in quotes, and it's a television drama series. Not just any drama series, but the medium's first to be set in the field of education.

This sort of departure typifies the freshness and broad appeal of NBC-TV's Fall schedule.

Yet, the full-hour "Mr. Novak" has more than the novelty of a metropolitan high-school background to recommend it. (That distinction, if you'll permit a small jest, could be fairly academic.)

Far more significantly, the series has a realistic, non-cornball approach to problems that might come up in such a setting:

A brilliant teen-ager suddenly finds he can't cope with classroom routine; a faculty member is suspected of being a professional propagandist; a teacher seeks the kindest way of dealing with the blind student who's fallen in love with him.

Bringing these situations to life for the viewer is a superlative cast—headed by young James Fran-
ciscus as Mr. Novak and Dean Jagger as Jefferson High's principal, Albert Vane.

Neither characterization comes within a hundred light years of being a stereotype. Our inexperienced teacher-hero is far more certain of his education ideals than his ability to put them into practice. And our principal is a convivial martinet who insists on rules being followed but who's secretly delighted when a teacher shows the initiative to step out of line for a good reason.

Viewers will be struck, too, by the absence of caricatures among the students. For, along with Mr. Novak himself, the program believes every teenager is as unique as a fingerprint.

Just as distinctive, may we add, are all the elements of NBC-TV's fall lineup. For they're part of a power-laden schedule that combines proven successes like "Bonanza" and "The Joey Bishop Show" with brand-new adventure series like "The Robert Taylor Show" and "The Lieutenant." Truly, we have never anticipated a brighter season.

Look to NBC for the best combination of news, information and entertainment.
I don't know who sat by the lady and counted, but reliable private eyes tell me the “average television viewer” sees and hears at least 900 commercials every single month. Good grief!

To the TV advertiser this, in turn, prompts the interesting question: “Who is my competition?” Other products in his category? Or could it all be 899 other advertisers competing for Mrs. Average’s full attention? Without a doubt it is both. This MONDAY MEMO concerns the latter.

Here is not a case of printed material flipping by with attention attracted by the most appealing ads. TV commercials move and make noise. Most people don’t feel like turning them off or running away from them. By the end of a long evening, and by the morning after, many a commercial is no longer registering. At the point of sale, where the package must compete, it is no longer echoing its expensive message.

Why? Because at the point of conception nobody worried about the 449 commercials that would precede it and the 450 that would follow it in a given month. Nobody saw the need of more than copy with a sound selling proposition. Nobody realized that regardless of how shrewdly copy is shaped, a good commercial must also contain a mating dance that catches the eye and draws interest toward the selling story. For until the advertiser commands attention for his commercial he is not going to get anybody to comprehend or remember anything about what he is trying to sell—let alone be persuaded.

What And How = Start with the basic copy story, expressed in a strong basic theme. That’s what to say. Then select a technique that’s going to express this basic idea in the most interesting way possible. That’s how to say it.

Using the term “technique” in this very broad application, which one offers the widest areas of opportunities for advertisers to explore? These are just a few:

(1) A “look.”

By creating his own look to accompany his basic copy story, the advertiser is saying, “This is my product and my story. You know it the moment you see it.”

Pepsi-Cola has a vigorous look—for those who think young. Doublemint gum has a double look with its twin warblers.

A look must be created, then established and perpetuated, and this means consistent use of the same series over a period of time. A look is a distinctive format that immediately identifies the advertiser and is not easily copied. It must be sufficiently flexible to accommodate, if necessary, changes of the basic copy within it.

(2) The “closeup.”

There has been quite a trend lately to move in and play the action in tight closeup. Why shouldn’t there be? Television, after all, is known as the medium of closeups. Here the rule is simplicity.

Extreme closeups help fight boredom, keep attention glued to relevant scenes, add drama by allowing for proportionately larger pictures. Best of all, otherwise dull products often come alive and attractive and exciting all by themselves when the camera dares to move in. One or two of the more interesting head-ache remedy commercials are using this technique to advantage.

(3) Ownership of a property.

“Property” is a rather cold word to describe a person, but the meaning here applies not to a straight pitchman, but to a type of personality who can actually direct interest to the copy story. A property, such as Herb Shriner for du Pont No. 7 products, can strengthen the commercial and offer side benefits as well by appearing at trade meetings and playing an active role in the total merchandising effort.

An animated version of this technique is the nearsighted Mister Magoo, now in his fourth big year for General Electric light bulbs. During these campaigns the myopic old bumbler is everywhere—in commercials, print ads, trade material, even in point-of-sale.

(4) Opticals.

Under this category come a variety of mechanical innovations that make some commercials more noticed and remembered than others. Squeeze motion was such an innovation three years ago, even though it was not new as a film technique, but so many copycats followed suit that it didn’t take long for squeeze to outwear its welcome.

A newer treatment of stills is well handled in a series of New York Times 20-second spots in which the scenes fly by almost faster than the eye can follow, adding up to an impression of interesting topics to be found in the pages of the Times. I counted 39 scenes in one 20-second spot.

Hertz “puts you in the driver’s seat” with a device that should be good for lots more mileage. Maxwell House coffee likewise applies a trick to illustrate its cup-and-a-half of flavor. Such touches make basic theme lines more memorable.

These are just a few of the techniques worth looking into when trying to make television advertising come alive and stand out.

Some of the best and worst commercials employ the notorious “slice of life” technique, calling for rare professionalism in writing, casting and directing. Why is it so few seem to come off as believable and convincing?

And whatever happened to demonstration in commercials? isn’t this where the medium shines? A new automobile, for example, was once considered interesting enough to expose itself to feature-by-feature demonstration. Now you’ll see one taking a full minute to cross a bridge with the camera circling above in a helicopter. Or driving on water and making you guess how they did it rather than why you should buy this modern miracle.

“With pen and pencil we’re learning to say nothing, more cleverly, every day.” This was written in 1884 and it applies to some advertising today.

Strong copy comes first. Technique second. Seldom is one good without the other.

Arthur J. Bellaire is vice president and associate creative director in charge of TV and radio production at BBDO, New York. He is also a member of the BBDO board of directors. Before joining the agency in 1943 as a print copywriter, he was a radio news writer for United Press. Mr. Bellaire transferred to BBDO’s radio copy group in 1945, began creating TV commercials in 1948 and was put in charge of the broadcast copy department three years later.
See me in Washington, D.C.?

Not even on a clear morning. All markets have characteristic structures. It takes monumental skill to adapt our own marketing strategy to their differences. That's where Spot TV shines.

Spot TV liberates you from oppressive advertising/marketing problems; helps in bolstering sagging sales; meeting the challenge of new competition; testing a program, a product; expanding into new markets; applying a limited advertising budget where it'll do the most good. No other media can hold a torch to Spot TV's versatility.

TvAR, representing a select list of major market TV stations, can show you how to get more out of your advertising dollars by buying on a spot-your-market basis. TvAR's "Television Spot Test" enables an advertiser to document the effectiveness of Spot TV. TvAR's "Brand Comparisons," give the exact status of over 500 leading brands in our eight represented markets.

Spot TV is the flexible advertising medium. TvAR is the personalized service. Why not take advantage of both?
CORINTHIAN viewpoints on broadcasting as expressed in a series of recent advertisements.

LICENSE..."Spectrum users have to be licensed for one obvious reason; two people in the same area cannot, without interference, use the same frequency at the same time . . . Does this also mean program supervision by the licensing authority? At CORINTHIAN we believe that the public interest is best served by permitting broadcasters competitively to respond to the PUBLIC'S choice."

RATINGS..."Maligned, misunderstood, misused, and perhaps occasionally mistaken, ratings are here to stay . . . Where the customer does not pay directly for the product, ratings afford the only practical way to find out what he wants . . . Responsible broadcasters will always want an accurate measure of audience response as one more factor in developing a varied and free program service."

SELF-REGULATION..."Like people, organizations need self-discipline. Individual standards differ. Cooperatively-set standards are 'convenient and necessary' to insure acceptable performance and to preserve the integrity of the whole. In broadcasting this is achieved by The Radio and Television Codes."

COMMERCIALS..."Advertising is public persuasion—an effort to get someone to do something—an extension of the face-to-face persuasion that is as old as Eve seeking Adam. In a complex society advertising is an indispensable substitute for this personal salesmanship. It helps create mass demand and in turn mass production, mass employment and a high standard of living."

PROFIT..."THE PURPOSE OF THE COMPETITIVE PROFIT SYSTEM IS NOT TO ENRICH THE FEW, BUT TO RESPONSIVELY SERVE THE MANY. Those who serve best profit most . . . At the heart of the profit system is a simple idea; most needs are best met by letting the people THEMSELVES make their own decisions . . . the free choice of those who use and the competitive response of those who produce."

"Faith in the discriminative premise of the First Amendment premise applies to both ball- tuations of freedom do not endure because they are free.
ood sense of the people is the
end of democracy itself. The
box and television set. The insti-
tence they are perfect. They

CALL ATB TODAY!
VARIETY SPICES SPOT BUYER'S LIFE

- Agencies get wide choice of many off-network shows available
- Stations, too, can pick and choose from all types of programs
- Though path is thorny, syndicators still find way to make profit

The waves of off-network programs now flooding the film-syndication market are making their force felt all across the spot television advertising business.

- Agency buyers are becoming more discriminating, selective—and demanding.
- Station reps are being given additional responsibilities as advisers to both stations and agencies.
- Stations are becoming more selective than ever in the films they buy.
- Despite all these evidences of a preponderantly buyer's market, the syndicators themselves are finding in off-network programs an element of profit, if not in some cases salvation, in a business that bears only the faintest resemblance to its structure of five years ago.

The off-network tide, which started in 1960, has reached overwhelming proportions. Such high-rated network attractions as Have Gun, Will Travel, The Untouchables, Naked City, Rifleman, Dick Powell Theater, Leave It to Beaver, Dobie Gillis and Bachelor Father—to mention a few—are among the 24 that have been offered to stations since the beginning of this year (list, see box). Some authorities predict that at least a dozen more, also with strong track records in sales and audiences, will be released before the year is out.

100 Series
- One expert estimated last week that as of now, almost 100 off-network series are in syndication. Those introduced thus far this year alone add up to 2,636 half-hours of programming, or 20 times the total of new half-hours specially produced for syndication in all of 1962.

What are the effects of this tidal wave?
- For the programs themselves—and for the syndicators selling them—the effect is obviously one of intensifying competition. The new off-network releases will be competing with the "old" ones for time slots and for sponsors. Generally, it is felt that the new ones, as a group, will have the edge because they are new—a significant factor in the thinking of stations and advertisers.
- But they will also be competing with older shows that have already obtained time periods and advertisers for two or more runs and that in many cases have proved themselves in syndication and are likely to be renewed.

Among advertising agencies the mounting volume of off-network programming has had a gradual but clearly discernible effect on buying practices. Media executives say it's impossible to generalize about such programs because of the wide differences in the shows themselves, but they make clear that buyers are examining the offerings more carefully and judging them on a wide range of criteria.

These observations stood out in a sampling collected by Broadcasting last week:
- Agencies select shows for specific markets on such factors as quality, general appeal, specific market appeal and price, plus such other considerations as the station carrying the series, the nature of competitive programing and adjacency programing.
- They say the decision to participate or not in an off-network show depends on the buyer's evaluation: Would it be better to buy a spot announcement on a station or a participation within a program?
- They are generally pleased that there is an abundance of off-network programs because they have a wide range of series to choose from and can vary their participations from market to market, depending on the popularity of the program in specific areas.
- They have resisted efforts on the part of syndicators to line up program sponsorships in large numbers of markets because they (1) cannot be assured that the stations can always schedule the series in an appropriate time period; (2) cannot be sure that a series popular in one market will gain similar audience approval in another, and (3) prefer not to incur the extra effort and expense

Off-network series offer wide choice

The 24 off-network series that have been released to stations to date in 1963 consist of 11 half-hour properties totaling 1,113 episodes, and 12 hour programs covering 731 segments. At least 12 other network programs are expected to be placed into syndication before the end of this year. The distributors and the series they represent are:

This compilation reflects the large number of hour programs that are in off-network release this year. In July 1961 a similar listing showed there were also 23 off-network series in release, but there were 1,528 half-hours and only 146 hours, as compared with 1,176 half-hours and 730 hours as of April 1963 (Broadcasting, July 17, 1961).
VARIETY SPICES SPOT BUYER'S LIFE continued

of lining up program time on stations.

The station rep has emerged as a more important factor in the TV syndication field. The large volume of programming available has prompted stations to seek an extra measure of guidance from their representatives—agencies call on them more frequently for additional information.

A check among leading reps turned up these observations:

- They consider prime time for such programs as 6-7:30 p.m. and after 11 p.m., although some series gain spots in the late afternoon.
- They keep close tabs on rating histories of off-networks through material supplied by syndicators and through their own research, and make data available to the stations on their lists.
- When purchased selectively, off-network shows can prove to be valuable to a station's programing schedule and can be sold to virtually all classifications of national advertisers.
- They can be purchased generally at "realistic" prices, though stations often grumble that the price is too high while the syndicator moans it's too low.

From the syndicator's viewpoint, off-network programs, despite the protestations of low prices and the rugged competitive climate, can be profitable for many, and, at the least, a source of additional revenue for all. The changed picture in the syndication industry is highlighted by these facts of life:

- The sales staffs at all companies have been trimmed sharply. The days of 60-man, 70-man and even 100-man staffs are gone; many companies operate with as few as five salesman throughout the country.
- The sales aim is to sell the top markets, preferably the top 50 or 60, in which as much as 75% of the potential sales volume is located.
- Prices are flexible. Distributors will insist on top dollar for their sought-after product but can be and are "bargained down" on a less popular show or one that may be slotted in the same time period as an off-network "blockbuster" in a particular market.

The development of the off-network pattern followed this chronology: in 1960, seven network series were released for syndication, followed by 35 in 1961; 35 in 1962, and 23 in 1963 as of this month. It is anticipated that at least 12 more series will be offered before the year is out.

Few First Runs • Off-network has replaced first-run syndication as the primary source of outside programing bought by stations (see box below). With the virtual death knell of first-run because of high production and distribution costs in the late 1950's, syndicators turned to network properties in the 1960's as the replacement item.

These programs had built-in advantages: At least part of the production costs had been recouped on network runs; invariably they had "star" names and a network track record. Though distributors don't like to mention price, off-network usually were and are offered at price tags that are slightly lower, and in some cases substantially lower, than comparable first-run series, depending on the popularity of the program, the competitive situation in the market where it is being offered and the need to make a sale in a specific city.

More Bargaining • Sales generally

Oh what is so rare as a first-run syndication?

First-run program syndication, which hit its high point of 29 series in 1956, is comparatively extinct today, primarily because of high production-distribution costs, unwillingness of stations to payresultantly high prices and the relative inactivity of the regional advertiser. But each year certain producers-distributors compete for time slots with first-run product, and in 1963 there will be a few prime-time shows of this caliber.

Storer Programs is producing on location throughout the world a half-hour adventure series, The Littlest Hobo, starring a German Shepherd. United Artists Television is producing in cities throughout the country an action-adventure series, The Lee Marvin Show. Independent Television Corp. is releasing a first-run series, The Saint, an hour adventure series which is being shown currently in the United Kingdom. Among other first-run series of a specialized appeal, Seven Arts Associated is offering En France, a program of French Instruction starring Dawn Adams and The Emmett Kelly Show, a cartoon series which will spotlight the well-known clown as host. Official Films is offering a second year cycle of Biography. Other producers are sure to make specialized, first-run product available.

"The Littlest Hobo"  "The Lee Marvin Show"  "The Saint"
were easy to achieve in 1960 and 1961 when off-networks were new and only a handful of series were in contention. But today station reps acknowledge privately that stations are in the "driver's seat" because the proliferation of available programing means outlets can bargainably pit one distributor against another and come up with a price they consider "equitable.”

On the record, syndicators are loath to admit that they often sell their series well below their initial offering figure in an effort to avoid being shut out of a market. They keep insisting that they "get a...good price," and blame their competitors for "giving stuff away."

Privately, they will concede that they frequently have to cut their prices to make a particular sale. But they contend that the quality series, which stations are eager to buy, bring in lucrative sums.

The track record of off-networks is uneven. A sampling by Broadcasting of 20 off-network shows released in 1962 showed that eight were sold in fewer than 40 markets; six were sold in 40 to 60 markets, and six in 60 markets or more.

The 1963 crop of off-network series appears to be the most formidable in terms of production quality and popularity on the networks. Their sales prowess in syndication is still to be proved.

The complex ratings jigsaw puzzle

INDUSTRY HOPES TO HAVE PIECES IN PLACE WHEN PROBE RESUMES

In the first week without a Capitol Hill quiz about why broadcast ratings can’t be trusted, the people who use and make them are trying to solve the complex puzzle Congress had spilled in their laps.

And they were hoping to finish before the lawmakers return to Washington and begin to ask searching questions about those solutions.

These were some of the developments during last week’s recess.

LeRoy Collins, president of the National Association of Broadcasters, wanted to go back before the House Subcommittee on Investigations and tell what the association had resolved to do.

The Advertising Research Foundation, a non-profit organization with long experience in media study, announced it would be a ratings watchdog if that’s what broadcasting and print media wanted.

The A. C. Nielsen Co., the biggest rater of them all, was calling its advertising agency subscribers in for hair-down conferences in Chicago and New York over the weekend.

The Television Bureau of Advertising met behind closed doors with top Nielsen and American Research Bureau executives in New York on Thursday (April 18).

CBS-owned TV stations in Chicago, Los Angeles, Philadelphia and St. Louis ended their agreements with the Nielsen company, but insisted costs were the reason (see page 36).

Print, Too • The Nielsen firm also fought to retain its print research business which may have been imperiled by the highly-publicized cancellation of Cowles Magazines and Broadcasting Inc. (see page 34 this issue and Deadline, April 15).

The Pulse Inc., publicly silent since its appearance before the subcommittee early last month (Broadcasting, March 18), said the industry should establish an auditing and standards committee (see page 34).

And Representative Oren Harris (D-Ark.), whose subcommittee’s revelations set the whole thing off, was far away in Missouri where he was saying that despite appearances, he really has broadcasters’ best interests at heart (see page 82).

There was little doubt the Easter pause in the Harris hearing was timed to give the industry a chance to come up with proposals to head off what could be rigid federal regulations.

Collins Makes the Move • Governor Collins has asked to appear again before the House subcommittee to explain what the association intends to do.

In an April 18 letter to Representative Harris, Governor Collins said that the NAB in 30 days will decide on a course of action to insure reliability in ratings.

The special NAB research committee is scheduled to meet in New York April 25 to make a final decision on a plan of action toward corrective measures in the ratings field.

At that time, it is understood, the committee will decide whether it will institute a "seal of good practice" for radio-television rating services. To gain the seal, rating firms would be required to accept flash audits of field work, sample, methodology and other aspects of their work. Proponents of this plan hope that some way could be cleared without violating the antitrust laws to persuade stations to use only measurement services earning the seal.

At the meeting two weeks ago, various members of the committee were assigned to study proposals advocated by individuals and groups. These include proposals by Radio Advertising Bureau; Television Bureau of Advertising; Needham, Louis & Brody; and Paul E. J. Gerhold of Foote Cone & Belding (Broadcasting, April 15).

In his letter to Representative Harris, Governor Collins stated:

"In my judgment, your subcommittee has performed a real service both to the public and to broadcasting by bringing to light basic problems which exist in this area..."
search organization willing to pay the costs and furnish the necessary information could get its work evaluated by an ARF committee. This facility, Mr. Lehman noted, has never been used.

"As our history shows," Mr. Lehman said, "we are prepared to undertake any form of auditing of audience measuring the advertising industry demands, provided we can obtain the consent and cooperation of the print and broadcast rating services involved. I have every confidence that all research organizations share our willingness to take whatever steps are required."

The ARF has been mentioned as a likely adviser or consultant in a number of informal discussions of possible actions to solve problems stemming from the congressional hearings. It was also mentioned in at least two specific plans that have been announced—those Television Bureau of Advertising and Radio Advertising Bureau.

Who should set standards for ratings?

PULSE'S ROSLOW WANTS 'INDUSTRY-WIDE' COMMITTEE

Dr. Sydney Roslow, director of The Pulse Inc. called last week for an industry-wide "standards and auditing committee" to "work with Pulse for the development of procedures and standards for our technique."

Speaking a week after a House subcommittee recessed its hearings which had raked Pulse and other ratings services over the coals, Dr. Roslow told the Portland (Ore.) Advertising Club last Wednesday (April 17):

"It seems to me that we should now call upon the users of research to cooperate with us in establishing standards. Let broadcasters, let advertisers, let advertising agencies, let station representatives create an all-industry committee. Let them make their stand on sample size, on weighting, on not-at-homes. Let them create a machine for auditing our work at any stage—announced or unannounced, to see if and how we are meeting those standards."

Dr. Roslow said that "we can correct problems which creep into an operation." Pulse, he said, has "already made many improvements and will continue to make others."

But, he added, "those problems which are inherent in the scope of what we must accomplish and in the size of the budget for accomplishment require the kind of all-industry cooperation I have just asked for."

Mailing List • Dr. Roslow's office said he had sent copies of his speech to a number of trade organizations—including the National Association of Broadcasters, the American Association of Advertising Agencies, the Association of National Advertisers and the Advertising Research Foundation—in hope of getting response to his proposal.

Dr. Roslow disclosed that Pulse plans by 1964 to reduce the frequency of reports in large markets from monthly and bi-monthly, as now, to four a year. These would be done seasonally. In the smaller markets, he said, there will be "fewer" reports each year.

He suggested that four studies a year for the larger markets would be worth considering as a "standard" by the industry.

He said Pulse expects to offer more qualitative data on audiences. But he also noted "a need for further study as to the requirement for a minimum sample size before audience breakdowns for qualitative factors should be produced." This question, he said, "will be turned over to external study."

No Bigger Sample • Pulse officials indicated they have no present plan to increase sample sizes. They noted that sample size was one of the factors on which Dr. Roslow called for industry guidance.

In his speech Dr. Roslow discussed at length steps taken by Pulse in an effort to insure the use of proper sampling techniques and quality control throughout the operation.

He reported that Pulse is "temporarily" discontinuing the use of "weighting" to account for the influence of unoccupied households and to equate coincidental average-minute measurements with the roster-recall total quarter-hour measurements. These weightings have been discontinued "pending further research, both internal and external," he said.

The only weighting now being done by Pulse, he said, is to "balance the sample for geographic and ethnic factors," and "when this occurs it is explicitly stated in the report."

Ratings dispute spreads to magazines

NIELSEN REVEALS NEW BUYERS AFTER COWLES CANCELS

The dispute over broadcast audience measurements appeared to be spreading farther into the magazine audience measurement field last week.

On the heels of Cowles Magazines and Broadcasting Inc.'s announcement that it was canceling all of its contracts with the A. C. Nielsen Co., Nielsen announced new support—in the form of contracts with two publishers and two agencies—for its Nielsen Media Service.

Three of the four contracts, Nielsen said, were received "within the last week"—after the congressional hearing developments that Cowles cited as triggering its cancellation. These three, according to Nielsen, were from Erwin Wasey, Ruthrauff & Ryan, Reader's Digest and McCalls. The fourth contract, from Doyle Dane Bernbach, was received "several weeks ago."

All four contracts are for two-year terms and represent a total commitment of more than $180,000 according to Nielsen.

Cowles said Nielsen's failure to answer its questions about alleged "cheating" by Nielsen interviewers led to its cancellation of its contracts for Look, Family Circle and KRGT-TV Des Moines. Nielsen countered that a recent study turned up figures that were disappointing to Look and that Cowles used the hearing as an "excuse" to cancel (AT DEADLINE, April 15).

Life magazine meanwhile entered the controversy with full-page newspaper ads reporting that an NMS study showed that Look's readership had fallen while Life's had gained.

"We at Life take this position on Nielsen," the ad said. "It provides the most useful information now available on magazine audiences."

Wants Supervision • Look scheduled full-page ads for late last week calling for industry-wide supervision of audience research through an organization similar to the Audit Bureau of Circulations.

Look spokesmen reported that the ads would say that the congressional hearing has "cast doubts—fairly or un-
What's Discretionary Income?

It's like this wrist watch — and it's not even my birthday.

More nice things happen where there's 27% (on the national average) more discretionary income. That's Ohio's Third Market where more people look at and listen to WHIO-TV, AM, FM than any other medium. Ask George P. Hollingbery.

Additional morsel for thought:

Dayton continues to lead the state's eight major cities with the highest weekly gross earnings. (Dayton Daily News—3/13/63).

AAA MEETS THIS WEEK

Agency people heading for West Virginia hills to talk business, ponder—and perhaps relax

Media relations, creativity and a study of consumer attitudes toward advertising messages share top billing in the program for this week's annual meeting of the American Association of Advertising Agencies.

More than 600 member-agency representatives and guests are expected to attend the meeting Thursday through Saturday at the Greenbrier, White Sulphur Springs, W. Va.

Guests, restricted to the Friday and Saturday sessions at previous meetings, have been invited this year to sit in also on a Thursday luncheon and Thursday-afternoon panel sessions on media relations and creativity.

Marlon Harper Jr., chairman of Interpublic Inc. and of the AAAA board of directors, will address the luncheon meeting on "The Contemporary Utility of Advertising."

Agencies And Media • C. Wrede Petersmeyer, president of Corinthian Broadcasting, will be one of the panelists in the Thursday-afternoon discussions of "problems and prospects" in the relationship between agencies and media. Thomas B. Adams, president of Campbell-Ewald, Detroit, will be moderator. Other participants will represent print and outdoor media.

William B. Lewis, chairman of Kenyon & Eckhardt, New York, will preside over the Thursday-afternoon panel on "Creative at the Top." Participants will be William Bernbach, president, Doyle Dane Bernbach; Charles H. Brower, president, BBDO; George H. Gribbin, chairman, Young & Rubicam, and Margaret Hocketay, chairman, Hocketay Associates.

Consumer Attitudes • Another feature of the Friday-morning session will be a report on "The AAAA Exploratory Study of Consumer Judgment of Advertising."

This deals with a little-advertised study of consumer attitudes toward advertisements specifically—including television and radio commercials—distinguished from advertising practices in general.

The findings will be presented and evaluated for the agency members and guests by Donald L. Kanter, vice president and director of creative research for Tatham-Laird, Chicago, who is chairman of the AAAA research committee; William M. Weilbacher, senior vice president of C. J. LaRoche and Co., New York, and Alfred J. Seaman, president of Sullivan, Stauffer, Colwell & Bayles, New York. Mr. Weilbacher is vice chairman of the AAAA research committee; Mr. Seaman is vice chairman of the AAAA committee on improving advertising.

Russell Lynes, managing editor of Harper's magazine, will discuss "How High Is the American Brow" at the Friday session.

Agency Climate • The Saturday meeting will deal with "The Climate of the Agency Business," with speakers including Henry Schachte, advertising consultant, and a former chairman of the Association of National Advertisers; Richard H. Holton, assistant secretary for economic affairs, U. S. Department of Commerce; the Rev. Thomas M. Garrett, S.J., of the University of Scranton (Pa.), and Robert W. Morse, Brown University.

A. Charles Buck, president of the Incorporated Society of British Advertisers, will discuss the climate of advertising in England and the work of the Advertising Standards Authority there.

Selected television commercials will be shown at various times during the three days. These will include "Pacemakers '63," described as a collection of fresh and offbeat commercials selected by Edward H. Mahoney of Fuller & Smith & Ross, New York, a member of the AAAA special broadcast policy committee. Entries in the 1963 American TV Film Festival, to be held in New York next month, also will be included in these showings.

The 14th annual meeting of AAAA region and council governors will be held Wednesday, and the AAAA's annual business meeting, for members only, will be held Thursday morning.

Auto radio group formed

Automotive Radio Group Inc., designed to provide package spot buys on medium market station groups of from 25 to 500 outlets for automotive product advertisers, has been formed in Detroit by Edwin R. Peterson Jr., former sales representative for Keystone Broadcasting System. ARG features single contract buy and uniform station affidavits of performance. Address: 2338 Dime Building, Detroit; phone: Woodward 1-3209.

ALBERTO-CULVER AD POLICY

Company takes the gamble out of advertising through extensive research on its TV commercials

How Alberto-Culver Co. exhaustively researches TV commercials, products and market potential to take the "gamble" out of its business was explained last week before the Stock Brokers Association of the Midwest Stock Exchange in Chicago.

The company so far has spent nearly all of its ad money in television with an annual budget topping $30 million. Alberto-Culver's annual average sales growth has been over 84%, compared to that of 20% for the rest of the industry. A test of radio still awaits top corporate approval (CLOSED CIRCUIT, March 18).

Robert L. De Pauw, controller of Alberto-Culver, told the brokers Monday (April 15) that "the more we invest in advertising, the less our advertising dollars go to waste." A million dollars in advertising buys added millions of dollars in gross sales and the ceiling still hasn't been reached, he indicated to the brokers.

Mr. De Pauw substituted in the talk for Alberto-Culver President Leonard H. Lavin who is in Europe. Mr. Lavin will address the 15th World Congress of the International Advertising Association in Stockholm which is being held May 27-29.

"Before we introduce a product, any product, we engage in a great deal of research," Mr. De Pauw explained. "It takes a long time before we find a field that is especially vulnerable to an innovator brand. Then we determine exactly why that vulnerability exists. If it is because of product inferiority, our laboratory is given the task of creating product superiority," he said.

Consumer Research - Next, Alberto-Culver researches consumers to see what is they want in the particular product, Mr. De Pauw said. Simultaneously one of the firm's three agencies—Compton, BBDO or J. Walter Thompson—is assigned the prospective product "and product claims are being created." These claims, he said, are fully tested before any advertising is created to see which claim "will bring the greatest consumer reaction." When the key claim is found, commercial creation begins, he said.

"Hundreds of commercial ideas are screened until we have narrowed the field down to a handful," Mr. De Pauw explained. These then are produced and tested.

"We have learned that a definite correlation exists between a high commercial test score and increased sales," he said, "so, unless our commercials receive such a score, they are junked. But enough experimentation finally results in a high-test commercial."

Thousands upon thousands of dollars are spent yearly on commercials never seen on the TV screen "even though they test higher than our competition," Mr. De Pauw said. "But it's how much higher that counts for us." The Alberto-Culver official added that "experience has taught us that the world's finest product and the world's finest commercial can prove a real dud unless backed with enough dollar bills. So we plan a generous budget."

Mr. De Pauw explained that by doing all this before a new product is marketed "we remove as many risks and gambles from marketing as possible. The element of chance is all but eliminated."

By removing risk, he said, "our sales figures for 1962 went up over those for 1961 for every product in our stable." In 1962, domestic sales exceeded $57.4 million, a 127% jump over 1961's $25.3 million plus. The first quarter this fiscal year topped the first quarter of 1962 by 50%, he said.

The firm this year is adding more products in the toiletries field and venturing into the proprietary field. Two new products this year, Command shave cream and Subdue dandruff shampoo, "are already moving at a remarkably good pace," Mr. De Pauw reported.

B&B re-arranges management setup

Benton and Bowles has arranged its operations into five areas of management, including the consolidation of several departments into one area, William R. Hesse, president of the agency, announced last Friday (April 19).

The areas and their supervisors are account management, under Edward E. Murfief, executive vice president; administration management, under Mr. Hesse; creative management, under Whit Hobbs and Alfred L. Goldman, both senior vice presidents; media management, under Lee Rich, senior vice president, and information management, under Richard F. Casey, senior vice president. The information management area is a new one, and will consist of account services, merchandising, advertising research, market research, market analysis, and mathematics and statistics.

AFA to present annual public service awards

A feature of the annual convention of the Advertising Federation of America in Atlanta, June 16-19, will be presentations of the fifth annual awards for Public Service to Advertising, according to AFA President Mark F. Cooper. Nominations for the awards must be sent to AFA headquarters, 655 Madison Avenue, New York 21, no later than May 24, he said.

Nine persons have been honored by AFA in the four-year history of the program. The purpose of the awards is to honor individuals in the industry who have rendered distinguished service to advertising or who have made outstanding contributions of a public service nature outside the advertising industry.
We still got a few availabilities!

THIS is just to remind you that even though WDAY-TV is possibly the most nearly-sold-out station in the Northwest, this situation changes back and forth almost constantly.

Even in our extremely popular “Party Line” (late afternoon) — even in our News, Weather and Sports (and at Noontime) — we can often come up with a real BANG for you!

NOW might be the very time to ask PGW. How 'bout it?
Commercials in production...

Listings include new commercials being made for national or large regional radio or television campaigns. Appearing in sequence are names of advertiser, product, number, length and type of commercial, production manager, agency with its account executive and production manager.

Films of California, 4001 Overland Avenue, Culver City, Calif.

Klein/Brazman. 706 La Cienega Boulevard, Los Angeles 69.
Metro-Goldwyn-Mayer ("The Wheeler Dealers"), two 60's, two 20's for TV/live on film; four 60's, two 30's for radio. Agency: direct.

Pams of Dallas, 4141 Office Parkway, Dallas 4.

Griffin Foods, one 60 jingle for radio and TV. Bob Farrar, production manager. Agency: Glenn Advertising. Stewart Bell, account executive and agency producer.

Texas Consumer Finance Corp., one 60, one 50 jingles for radio and TV. Bob Farrar, production manager. Agency: BBD. Bud Drutatou, account executive and agency producer.

Marketing group okays ethical committee

The American Marketing Association last week announced that its executive committee has authorized AMA President Donald R. Longman to appoint a committee of top marketing-advertising leaders to explore and make recommendations "on matters pertaining to proper professional and ethical conduct within the field of marketing." Possible results could be methods of discipline of AMA members who violate ethical standards in research or other marketing functions.

An AMA representative explained the action was precipitated by disclosures of the Washington inquiry into broadcast ratings. The move, however, actually is a further extension of AMA's action last year to adopt a code of research ethics for its members, it was explained.

For one thing, AMA said, the new move means the association's vigilance of ethical practices is being broadened beyond marketing research to the whole field of marketing. AMA said the committee's work will serve "to strengthen the steps already taken in connection with marketing research."

Aside from the code, these steps include publication of an AMA monograph, "Criteria to Assist Users of Marketing Research," which is designed to guide businessmen in recognizing ethical research proposals. AMA offers free copies of its code. Address: 27 East Monroe Street, Chicago 3.

Popsicles returning

Popsicle commercials are returning to network television after a six-year absence.

The Joe Lowe Corp., New York, makers of ice cream products, will sponsor Discovery '63 on ABC-TV beginning May 17. Agency is Gardner Advertising.

Popsicle safety awards program will be closely tied in with commercials.

WSAAA MEETING

Agency's main job: selling adverstion on bigger budget

The major responsibility of an advertising agency today is that of convincing its clients' top management of the importance of advertising and the need for increasing advertising appropriations, Jack O'Mara, Western Division vice president of the Television Bureau of Advertising, said Monday (April 15). Speaking at a dinner meeting of the Western States Advertising Agencies Association, the TVB executive told his advertising agency audience that the best approach to this goal is by pushing hard for strong advertising representation in management's top echelon.

Mr. O'Mara was one of six major executives of advertising associations to discuss the major trends now molding advertising's course in the months ahead at the WSAAA dinner meeting at the Sheraton-West hotel, Los Angeles. Ron Rose, president of the Magazine Representatives Association of Southern California, said that the trend toward specialization was already well along in magazine publishing, following an unsuccessful and sometimes disastrous attempt to compete with television in terms of space. Paul E. Mead, president, Advertising Agency Production Men, predicted a bright new world of color for newspaper advertisers, based on lithographic production that will make color space available to small-space, low-budget advertisers as well as to large-space users.

Len Pilley, president, Art Directors Club of Los Angeles, reported on the transition of the agency art director from artist to businessman, to the benefit of agency and client alike. James Parry, president, American Marketing Association's Southern California chapter, pointed to the necessity for a massive research and development program in consumer and industrial goods and services, comparable to that of the Department of Defense, if the economy is to be able to provide jobs for the na-

Tough talk about smoking and health

WILL COLLINS FORCE SHOWDOWN ON CIGARETTE ADVERTISING?

The controversy over the relationship of smoking and health reached a new pitch of acrimony last week. The outcome of the argument could affect more than $130 million of cigarette advertising on television and radio.

On Monday (April 15) the American Cancer Society issued a pamphlet citing statistics to buttress its contention that cigarette smoking is "the major cause" of lung cancer and at least a factor in other killer diseases.

At the same time George V. Allen, president of the Tobacco Institute, charged that the cancer society's pamphlet "omitted or over-simplified" opposing views of reputable scientists.

On Friday (April 19) the scientific directors of the Tobacco Industry Research Committee denounced reports of the type issued by the cancer society as "a disservice to true scientific research." As to the origins of cancer and heart diseases, he said, "it is a matter of scientific fact that, in our present state of knowledge, no one knows the answers."

The new outbursts over cigarettes came while a special committee of 10 scientists — commissioned last October by the U. S. government— was still deep in a study of the impact of smoking on health. The 10 scientists, supported by a staff from the U. S. Public Health Service and working as a special advisory committee to the U. S. surgeon general, were expected to complete their report this summer.

It became known last week, however, that the committee's report may not be delivered until late this year. An authoritative source in the surgeon general's office said the study had proved to be more complicated than originally anticipated.

Broadcasters' Problem: The delay in the issuance of the surgeon general's report is of special significance to broadcasters. In the expectation that it would be available soon, LeRoy Collins, president of the National Association of Broadcasters, had intended to make a major proposal on the question of cigarette advertising to the NAB radio and television boards at their meeting next June.

Last November, in speech at a regional NAB meeting in Portland, Ore., Governor Collins proposed that the radio and television codes be amended to exclude cigarette advertising appealing to the young. Later he agreed to defer a formal submission of his proposal until the surgeon general's report became available.

On March 31, during a news conference preceding the opening of the NAB convention in Chicago, he said he intended to propose action at next June's board meeting and that he hoped the surgeon general's report would be out before then. The implication was that he expected the report to find an association between cigarette smoking and the incidence of diseases.

Advised last week of the probability of a delay in the issuance of the surgeon general's report, Governor Collins said it would "not necessarily remove the problem" from consideration at the June meeting.

The Cancer Side: The 32-page pamphlet issued last week by the American Cancer Society said that...
more than 25 scientific studies in 10 countries have shown that the “risk of developing lung cancer is directly related to the number of cigarettes smoked.”

Statistics based on death certificates show that for men who smoke less than half a pack of cigarettes a day, the death rate from lung cancer is seven times higher than the death rate for nonsmokers and for smokers of two or more packs a day, more than 30 times higher. Statistics based on diagnoses of lung cancer confirmed by pathological examinations disclose even larger differences in the death rates of smokers and nonsmokers—15 times as high for half-a-pack-a-day smokers as for nonsmokers and 64 times for smokers of two or more packs a day.

“Although spokesmen for the tobacco industry and a few scientists state that all this evidence does not prove that cigarette smoking causes lung cancer,” the cancer society said “there is no other reasonable explanation for the consistent association between cigarette smoking and lung cancer.

“Responsible health agencies, therefore, have no alternative but to act on the assumption that the relationship is one of cause and effect. This is the conclusion of leading governmental and nongovernmental health organizations and scientific societies of the United States, Canada and Europe and is the basis of the American Cancer Society’s policies and programs.”

The pamphlet pointed out that the cancer society had been engaged in a major public relations effort directed to teen-agers. “It is to this age group,” the pamphlet said, “that much of the promotion and advertising of cigarettes seems to be directed.” In its campaign to educate youth to the dangers of smoking, the cancer society has distributed 25,000 copies of a film and 3.5 million copies of a supplementary information booklet. “It is estimated,” last week’s pamphlet said, “that half of the high school students of the country have seen this film strip.”

The new pamphlet that was issued last week will also be put in wide distribution.

The Smoking Side • The Tobacco Industry Research Committee issued its report—which was in sharp contrast to the cancer society’s pamphlet—five days after the latter was issued. It was in the form of an annual report from the committee’s scientific director, Dr. Clarence Cook Little.

The Tobacco Industry Research Committee was founded in 1954. It has appropriated more than $6 million since then to support research into the relationship of smoking and health.

During 1962, Dr. Little reported, “scientific work continued to support the view that the quest for a single, simple ‘magic bullet’ to explain the causes or provide the cure for cancer and heart disease is unrealistic and probably futile.”

He said that the continuing appearance of reports, based on statistical studies and containing no new or original data “amounts to a statement of opinion [and] is a disservice to true scientific research.”

Research has increased knowledge about lung cancer and heart disease, Dr. Little said, but it has also “continued to make clear and to emphasize the great and critical gaps in that knowledge.”

Smoking, he said, is only one of many subjects requiring study in the exploration of causes and cures of lung cancer.

Included in the Tobacco Industry Research Committee report were abstracts of 60 medical and scientific papers published in 1962 by scientists who received grants from the committee.

M’MANUS, JOHN & ADAMS IN CHICAGO

Hartman billings brings agency up to $60 million

The expansion of MacManus, John & Adams into Chicago through the purchase and absorption of George H. Hartman Co. there was announced last Wednesday by Ernest A. Jones, president and principal stockholder of MJA.

The merger, a stock transaction involving no cash, will become effective about May 1.

MacManus, which headquarters at Bloomfield Hills, Mich., also has branch offices in New York, Los Angeles, Minneapolis and Toronto.

Adding Hartman’s $6 million billings, MacManus this year will bill an estimated $60 million, Mr. Jones said. Last year his agency spent about 16% of its billings in TV and radio.

Fred J. Hatch, a senior vice president and member of the board of MacManus, has been named regional director of the agency and will move from Bloomfield Hills to Chicago. George H. Hartman become a vice president of MacManus and will manage the Chicago office at the same address of his former agency, 307 North Michigan Avenue.

MacManus was founded in 1934 with the Dow Chemical Co. account. Also included on its list are the Cadillac and Pontiac divisions of General Motors, Minnesota Mining and Manufacturing Co., Bendix, American Oil and Standard Oil (Indiana).

Hartman accounts which MacManus gains include United Biscuit Co. of America, Hartz Mountain products and Continental National Insurance Co.

McDonald Research expands

McDonald Research Ltd., Toronto, has become a subsidiary of Interpublic Inc. and plans to extend its broadcast measurement services into areas outside Canada where they do not exist, Clyde H. McDonald, founder of the firm, announced last week. He said details of the new range of services to be offered by McDonald Research will be announced shortly.
RCA SETS FIRST QUARTER RECORDS

Earnings rise to 95 cents; 35 cent dividend declared

Sales and earnings of RCA rose to record levels in the first quarter of 1963, Brigadier General David Sarnoff, board chairman, and Elmer W. Engstrom, president, announced last week.

Sales totaled $436 million, up 3% from the previous record of $425 million in the same three-month period of 1962. Profits before taxes totaled $173 million, a 19% gain over the previous high mark of $145 million in 1962’s first quarter. Earnings per share of common stock amounted to 95 cents for this year’s first quarter, as against 81 cents on a smaller number of shares outstanding in the same period a year ago.

The gains were attributed to record first-quarter sales and profits of NBC, a wholly owned subsidiary; to color television set sales, described as ‘moving at a pace reminiscent of the early growth period of black-and-white television a decade ago’; to unprecedentedly high sales of RCA TV sets generally; to increased shipments of electronic data-processing equipment, and to such other RCA activities as basic components industrial electronics, communications, international operations and electronic services.

General Sarnoff and Mr. Engstrom said RCA’s backlog of orders for computers is higher than ever before, and that they “feel good progress is being made toward our goal of crossing into a profit position in data processing by the end of next year.”

They said RCA’s strength “lies in its broad base in virtually all principal areas of electronics. . . . With this firm base we anticipate that RCA’s sales and earnings, subject to the continued vigor of the national economy, will maintain their upward movement in an environment of expansion for electronics as a whole.”

On the strength of the record performances in 1962 and early 1963, the quarterly cash dividend on common stock has been increased to 35 cents, from 25 cents. The higher dividend is payable April 29 to shareholders of record March 18.

Entron shows profit

Entron Inc., Silver Spring, Md. (manufacturer of community TV equipment with interests in CATV systems) last week reported a 97% increase in sales for the fiscal year ended Feb. 28, 1963 compared to 1962—from $1,359,887 to $2,679,490. Net earnings for 1963 totaled $137,317 (50 cents a share) compared to a loss of $373,792 in 1962.

Electected secretary-treasurer of Entron is W. T. Relyea, former controller.

Entron owns two microwave systems feeding TV station signals to CATV systems in Florida and Texas. It also has a part interest in a CATV system in Carlsbad, N.M.

First quarter tops all of 1962 for McFadden

Macfadden-Bartell Corp., owner of three radio stations, reports a consolidated net income of $483,651 for the first quarter of 1963. The sum is almost three times the profit realized by the corporation for all of 1962—$162,738. During the first quarter of 1962 the corporation lost $136,458.

The year ended in December 1962 was the first year of consolidated operations for Macfadden Publications and Bartell Broadcasting. During the first quarter of 1963, the corporation’s 12 publications showed a gain in revenue of 20% over the same quarter of last year, and the three broadcast stations reported a revenue for the first quarter of $600,500, a gain of 4.3% over the first quarter of 1962.

The company projects that combined billing for the radio stations for 1963 will be highest in their history. Macfadden-Bartell owns and operates WADO New York, KCBQ San Diego and WOXY Milwaukee. It is the second company in the U.S. to enter the field of over-the-air pay television, following approval by the FCC for a three-year test of its system in Denver, due to start next month. Macfadden-Bartell also owns an interest in the Telleglobe Pay-TV system of New York.

First quarter net up at Papert, Koenig, Lois

Papert, Koenig, Lois Inc., New York, last week announced its first-quarter net income after taxes was $50,913, produced by gross billings of $3,988,-600 for the fiscal quarter ended Feb. 28. This compares with a net of $28,-931 for the same period of 1962, based on billings of $2,668,291. Earnings per share for the first fiscal quarter of 1963 were 9.9 cents vs. 5.6 cents for the like period in 1962.

PKL, the first advertising agency to go public since 1929, issued stock on Sept. 20, 1962. Its annual report was published several weeks ago (Broadcasting, April 8).

‘Times’ lost $7 million in strike

The New York Times reported last week that the 114-day strike and shut-down of New York newspapers created for the Times a loss of more than $7 million, “before considering any tax offsets.”

The figure was contained in the paper’s annual report to stockholders and staff. Wage increases and other benefits covered in Times contracts with 10 unions will cost more than $3.5 million a year, the report continued, adding that “additional revenue must be obtained and productivity increased to meet this heavy expense and to make up for our losses.”

Circulation prices have been increased, with the weekday newspaper price going from 5 cents to 10 cents. Despite the strike, which closed the New York edition (but not the western and international editions) on Dec. 8, 1962, operating revenues in 1962 totaled $118,009,275 against $117,189,220 in non-strike 1961. Newspaper advertising revenues were placed at $90,266,703 for 1962 as compared to $89,591,567 for 1961. Circulation revenues (at the old rates) were $24,116,016 in 1962 and $24,266,120 in 1961.

Net income from operations in 1962 was $599,350, up slightly from the $597,986 reported in 1961. But the 1962 total would have exceeded $1.3 million if the strike hadn’t occurred, according to the report.

The company’s consolidated earnings for the year amounted to $1, $11,550, as compared to $2,221,709 in 1961. Biggest factor in earnings was net income from dividends received on the company’s investment in Spruce Falls Power & Paper Co. Ltd., a newsprint manufacturer. This amounted to $1,135,173 in 1962 and $1,127,723 in 1961. Net operating income was the second largest factor, with the rest coming from net gains on the sale of real estate, which totaled $77,027 in 1962 and $377,000 in 1961.

Until the strike occurred, the report said, advertising lineup was running at a record high and circulation also had set new records.

The report said that WOXR-AM-FM New York, owned by the Times, had “a successful year.” It gave no financial details.
NEW MILLION DOLLAR MOVIES rivet audience attention to high-caliber stars in swift-moving stories. Norman Mailer's THE NAKED AND THE DEAD illustrates the color and action lavished on these late releases from six major companies. Jules Verne’s FROM THE EARTH TO THE MOON, Bret Harte's TENNESSEE’S PARTNER, James M. Cain’s SLIGHTLY SCARLET and Zoe Akins’ STAGE STRUCK add their luster to the list.

**do you have these NEW MILLION DOLLAR MOVIES?**

CBS has them scheduled in New York, Chicago, Philadelphia and St. Louis. Time-Life's buy covers Minneapolis, Denver, San Diego and Grand Rapids. Westinghouse (Pittsburgh), Corinthian (Indianapolis), Trans-Continent (Buffalo), Meredith (Syracuse), Scripps-Howard (West Palm Beach) and Crown (Portland) are other families in the fold. Surely, the same facts that persuaded these group owners and dozens of independent buyers are also pertinent to your programming.
If you aim high...
capture big names...
add the best station line-up...
dig deep...
develop new ones...
make advertisers happy...
take some gambles...  watch developments...

for a blockbuster schedule...  with balance...  

win the nation’s applause...  then you’re the CBS TELEVISION NETWORK
CBS Inc. reports substantial increases

CBS Inc. sales and profits for the first quarter of 1962 were "substantially" higher than those for any corresponding quarter in the past, William S. Paley, chairman, told stockholders at the network's annual meeting in New York last Wednesday.

Mr. Paley said estimated earnings for the first quarter will be about 25% greater than that of the comparable period last year. He added that figures for the year are expected to exceed record sales and income of 1962.

In reviewing CBS' activities since the beginning of the year, Dr. Frank Stanton, president, said "sales are up in all major CBS profit centers" and "we expect this trend to prevail for the year as a whole."

Dr. Stanton pointed out that sales for CBS television stations division are 10% above sales for the corresponding 1962 quarter and CBS Radio "has more commitments for advertising revenue than it achieved during the whole of last year."

He attributed a drop in first quarter sales of CBS International to the "economic chaos in Argentina, from which the division received over $1 million in orders during the first quarter of 1962."

To compensate for this loss, Dr. Stanton said, the division is planning to expand sales in Europe and Asia and to U.S. military post exchanges around the world.

Increased News Output — He noted that CBS News' output of news and informational broadcasting last year represented a 34.5% increase over 1961. He added that the division accounted for 18.5% of the television network's schedule and 51% of the radio network's schedule during the first quarter of this year.

CBS News and WCB-S-AM-FM-TV were commended by Dr. Stanton for their "fine performance" during the newspaper strike in New York. He told stockholders regular news coverage was increased 75% by WCB-S-TV and 30% by WCB-S-AM-FM during the blackout.

"Both WCB and WCB-S-TV will retain some of the special news broadcasts added during the strike with emphasis on expanding regional coverage," he added.

In answer to a question from the floor, Dr. Stanton said CBS will continue to correlate A. C. Nielsen Co. national ratings in comparison with other services "and if they do not measure up we will take steps in getting a new service."

He pointed out that CBS depends partly on ratings for programming decisions but that ratings are not the only determining factor. He added, however, that "we have to have some device for measuring audience. We would be criticized if we did it ourselves."

ITC says annual profit will top $500,000

Independent Television Corp. anticipates that net profits for its fiscal year ending April 30 will amount to more than $500,000.

In releasing the estimated figure, Michael Nidorf, ITC president, said the syndication company will top $2 million in net profits for the three-year period ending April 30, with gross sales totaling better than $20 million.

"Next year," Mr. Nidorf said, "we expect to do even better . . . with this new product (The Saint) and with the large and varied library of programing already in distribution."

MGM reports $8 million loss in 28-week period

Metro-Goldwyn-Mayer reported a net loss of $8,716,000 for the 28-week period ended March 14 as compared to net income of $2,553,000 ($1 a share) in the same period a year ago.

Gross revenues during the period fell to $70,114,000 from $70,766,000 in the corresponding period last year.

Although gross fell only $650,000, the firm was in the red by $23.7 million in film production and distribution so that net loss before interest and taxes totaled $16.5 million.

In his letter to stockholders Robert H. O'Brien, president, said licensing to NBC-TV of 30 post 1948 MGM feature films will contribute substantially to profits in 1963-64 fiscal year.

Mr. O'Brien also noted that MGM-TV will offer five-and-one-half hours of weekly network shows next fall.

Metromedia reports big gain in net income

Metromedia Inc. reported last week that gross revenue for the 13 weeks ended March 31 amounted to $13,527,470, as compared with $12,270,314 in the corresponding 1962 quarter. Net income rose from $138,732 last year to $703,283 in the 1963 quarter.

Net income per share of stock increased from 7 cents in the 1962 quarter to 40 cents for the 1963 period. It was pointed out that results do not include capital gains from the sale of certain assets.

Stanton sells $1 million of CBS common stock

Frank Stanton, president of CBS, was reported last week to have sold 20,000 shares of his CBS common stock and to have given 500 shares to an unspecified charitable organization.

Spokesmen for CBS confirmed the dispositions, said the sale was made on the open market at various times during March "to retire certain personal obligations" and noted that he retains 145,890 shares.

Although the sales prices could not be ascertained, the CBS stock started and ended March at prices slightly above $52 a share. Assuming $52 as the price, the 20,000 shares would have yielded $1,040,000, the 500 shares in the gift would have been worth $26,000 and Dr. Stanton's remaining holdings would be worth more than $75 million.

There was speculation that the "personal obligations" being retired were obligations he had assumed in the past to exercise stock-purchase options.

Dr. Stanton's transaction followed by a few weeks a similar one by William S. Paley, CBS board chairman, who sold 75,000 shares "to provide more diversification" of his personal investments (BROADCASTING, March 18).

Paramount reports 1962 loss of $3.4 million

Paramount Pictures Corp. reported last week that gross income in 1962 declined to $106,286,000 from $115,514,000 in 1961, and the company had a net loss of $3,410,000 last year, as compared with a net income of $5,668,000 in 1961.

Paramount noted that the Internal Revenue Service is examining the company's tax returns for the years 1953 through 1960. Paramount said it is in "complete disagreement" with the IRS on certain adjustments proposed and will "contest such adjustments through all available avenues." It added that in the interests of prudent management, a provision was made in 1962, which set aside $5 million out of retained earnings for possible additional taxes of the prior years involved.

Paramount owns KTLA (TV) Los Angeles and International Telemeter Corp. wired pay TV system.
We're caught and rather proud of having one of the most versatile groups of people in radio. This is a favorite page from the family album of the area's foremost station, WGY.

From dawn 'til long after dark WGY's personalities pinpoint your sales message to specific buying groups. Full range programming makes WGY the most listenable station in the Northeastern New York and Western New England market.
TV camera to go along on next space shot

American television viewers will see live telecasts beamed from within the space capsule of astronaut Major L. Gordon Cooper during coverage planned by the TV networks for the next U. S. space shot in mid-May.

An eight-pound television camera, the size of a large flashlight, will be attached to a clamp inside the capsule and will be focused on the face of Major Cooper. The astronaut will also detach the camera and point it out the window for photographing his orbital surroundings and a view of earth from outer space.

Major Cooper's space flight is scheduled to last 34 hours 20 minutes over the planned 22 orbits. The personnel and facilities of four networks—ABC, CBS, MBS and NBC—will be pooled to supply the live-TV coverage from two locations—Cape Canaveral and Cocoa Beach—as well as aboard the two recovery ships, one downrange in the Atlantic and one downrange in the Pacific.

Major Cooper is scheduled to be launched from Cape Canaveral at 8 a.m. (EDT) and if on schedule, his Mercury Atlas-9 craft should land in the Pacific Ocean some 60 miles south of Midway Island at 6:20 p.m. (EDT) the following day.

A separate video line, allocated to each network on a rotating basis, will be available for broadcast on launch day. For the first half-hour (7:30 a.m.-8 a.m. EDT) the line allocation will be made on a five-minute basis to CBS, NBC and ABC in that order. For the remainder of the coverage, the allocated line will be available on a 10-minute basis on the same network allocation.

It is expected that after the early coverage, the networks will present the coverage every half-hour or every hour. At least one network, ABC, has said it will interrupt any show to present the first live telecasts from the space capsule.

Network television coverage of the flight will be suspended during the night hours allotted for Major Cooper's sleep (expected to begin around 11 p.m. and continue until early the next morning), but radio coverage of the flight will continue throughout.

Production of the pooled television and radio coverage of the flight will be supervised by ABC News, with Sid Darion as producer and Jack Sameth as director. ABC News, CBS News and NBC News rotate supervision of the all-network TV pool at Cape Canaveral. The networks have contributed four news correspondents to the pool coverage, in addition to almost 100 technicians, cameramen and production personnel assigned to the pool.

The eight-pound television camera inside Major Cooper's craft will provide slow-scan pictures to be made available either live or taped by the National Aeronautics and Space Administration at various times during the flight. Its 1,000-mile signal will be in range of Cape Canaveral during orbits one, two, three, four and five, and on orbits 15, 16, 17, 18, 19, and 20.

The TV unit for the space shot

ABC, Gillette named in fight film suit

Boxer Doug Jones has filed a $1.25 million suit against ABC and three other defendants on claims that they improperly presented the film of a closed-circuit fightcast on the ABC-TV network three nights later (March 16).

The fight was Jones's March 13 bout with Cassius Clay, carried that night by closed circuit to a theater-television audience. The New York boxer, who lost the bout on a split decision, claims that the film was shown without his consent on the Gillette-sponsored Saturday night boxing show on ABC-TV.

In his suit, filed through Lawrence Hammer of the New York law firm of Winnie & Matis, the boxer is seeking $500,000 on each of two claims against ABC, Madison Square Garden Boxing Inc., The Gillette Co. and the Gillette Safety Razor Co., and Maxon Inc., advertising agency for Gillette.

One claim charges the film was used without the boxer's written consent; the other, that "the defendants did wilfully and maliciously further damage the said plaintiff by adding a soundtrack and script that was wholly at variance with the true circumstances of the original bout."

In addition the suit seeks $250,000 from Madison Square Garden Boxing Inc. on grounds that "in complete violation of the aforesaid agreement, the said defendant, Madison Square Garden Boxing Inc., did make the said films available and did cause to have them shown on public television."

The suit further charges that the boxing company "has failed to divide monies derived from the exhibition of the aforesaid film on March 16, 1963, but on the contrary has kept for itself large sums of money derived from the uses of the aforesaid film without making any disclosure whatsoever of the receipt of the said sums to the plaintiff."

The film reportedly was substituted on ABC-TV when rain forced cancellation of outdoor bouts that had been scheduled to originate in Los Angeles on March 16.

ABC last week declined to comment on the Jones suit. The complaint was filed in the New York State Supreme Court on behalf of Jones and his manager, Alex Koskowitz, also of New York.
How to sell an empty jar:

Put something invisible into it. Yet something customers believe in. Something that gives your salesmen more to sell.

That's what the Kerr Glass people did. Last year, they put in Arthur Godfrey's special brand of something. It must have sold Kerr jars: they've just plunked down visible cash for more.

And what works for empty jars must also work for full jars. Bromo-Seltzer just reordered. So did Listerine.

And Goodyear just bought more Godfrey for Neolite. And Grolier Inc., for their Book of Knowledge. And Emery Industries, for Sanitone.

What exactly are they buying? If we knew we'd bottle it. It's Godfrey's personal formula. One sponsor—Kerr Glass—calls it "presence."

Here's what they say it does:

"Your presence makes our sales staff enthusiastic. We're sure it will result in even greater selling efforts on their part. It's made customers write us letters approving of our sponsorship and our products. And it's expected to increase the lead Kerr now holds in the home canning supplies field."

Pretty powerful something! If your product could use some, call your ad agency rep or account executive at

The CBS Radio Network
Ray Anthony syndicating own musical show

Music, traditionally the way to soothe the savage beast, may also be the method by which a TV series made for syndication can compete successfully for ratings with the network and off-network dramatic and comedy shows and do it at a price that makes sense to the average TV station and local advertisers.

One new musical series now in production for syndication this spring is The Ray Anthony Show, featuring the trumpet-playing band leader who in recent years has added acting and singing to his performing accomplishments. For this series, Mr. Anthony also serves as his own syndicator, as head of Ray Anthony Enterprises. The half-hour programs are being taped at KTLA (TV) Los Angeles (whose technical staff will transfer them to film for stations not equipped for video-tape operations). KTLA is also giving the shows an on-air tryout in the Saturday 10-10:30 p.m. period.

Ray Anthony has definite feelings about the syndication field and no hesitation about expressing them, on or off the record. The talk about off-network reruns monopolizing the syndication market is to him so much “hubbub” and if I’d listened to it I’d have been scared off. But it didn’t ring true, so I did a little research of my own and here I am.

“It’s really very simple: crowds around the band-stands and good sales for records show that people still enjoy good popular music played in a style they can comprehend. If that’s true—and my own experience shows that it is—it stands to reason that they’ll like it on TV, too.

“Another thing, my programs will be new programs, not shows that have been shown at least once before and maybe twice or more. Viewers are fed up with summer reruns all year long, which is exactly what they’ve been getting, and stations are beginning to find that their vaults full of old film can’t attract either an audience or sponsor.”

The Ray Anthony Show will have a timeless format, with no holiday shows that might be appropriate one week of the year but ridiculous the other 51. That’s another reason Mr. Anthony says he’s “avoiding reruns like the plague.”

Normally, each show features an Anthony trumpet number and a piano solo by Kellie Greene, with vocals by Vikki Carr, Lisa Marne and Ray Anthony. Jackie Curtiss, who announces the program and helps Lennie Weinrib write it, may sing a comedy song as well. Mort Bernstein directs for producer Fred Benson.

New company to produce film documentaries

A company devoted exclusively to film documentaries has been organized by Lee Mendelson, who had written and produced over 70 television programs for KPIX (TV) San Francisco.

Lee Mendelson Film Productions has five films under production including: “The Russ Columbo Story” with Johnny Desmond as host-narrator; “The Golden Spike,” the story of the Central Pacific railroad, with Lucius Beebe as host-narrator and “The World in Motion,” a collection of motion pictures taken from 1897 to 1920.

While at KPIX, Mr. Mendelson wrote and produced three historical films for the San Francisco Pageant series.

The new firm’s address is 211 Park Road, Burlingame, Calif. Phone: Diamond 3-5337.

WBT beams Russian to Cuba

Nightly Russian-language broadcasts which had been scheduled to be broadcast to Cuba on Feb. 25 (Broadcasting, Feb. 25), began on WBT Charlotte, last Monday (April 15). The programs had been canceled when Premier Khrushchev promised to remove Soviet personnel from the Carribbean.

Charles H. Crutchfield, president of Jefferson Standard Broadcasting Co., which owns and operates WBT, said that since “no significant number of these people have been removed...we now feel it to be in the best interests of the country to begin” the broadcasts.

SDIG board to ask for strike authority

The executive board of the Screen Directors International Guild will ask its members at a meeting tomorrow (April 23) to grant the board authorization to strike, if necessary, against the Film Producers Association of New York.

FPA and the guild have been negotiating for more than two months on a contract covering directors employed in the production of TV film commercials and motion pictures.

An SDIG official said that money is not a key issue in the dispute. The union, he said, is seeking to establish
...and it's great fun to be part of the fabulous Fiesta San Antonio every April, when frivolous gaiety builds to a spectacular climax with the torch-lighted Fiesta Flambeau Parade.

During Fiesta week, hundreds of thousands of San Antonians and tourists throng the parade route of the magnificent Battle of Flowers Parade and cheer the transformation of the San Antonio River into a "Venice River Pageant." A gallery of fans thrill to the masters in golfdom competing in the classic Texas Open Golf Tournament. There's exciting entertainment nightly under the stars, touched lightly with the flavor of old Spain and Mexico. Pageantry, street dancing, carnival midway, fireworks, band festivals, military parades... fun, fun, fun... to fit every preference in historic San Antonio during Fiesta, and all year, too.

It's Great to SELL San Antonio on KONO-TV ch.12

THE KATZ AGENCY, INC.  \n
BROADCASTING, April 22, 1963
"GEMINI"—is the name of this twin camera system, employing a TK-60 Studio Camera which shares its lens with a 16mm film camera adjacent mounted. The operator uses the viewfinder of the television camera just as if he were shooting with the TK-60 alone. Final product, a high quality television tape and a high quality 16mm film duplicate, eliminates the problem of the kinescope as a factor in spot use of taped commercials and programs. Exclusive rights to "Gemini" are held by MGM.

"STUDIO 60"—Food Photography Center, MGM Telestudios, New York, shown with RCA TK-60 Camera and MGM-designed modular sets and special lighting equipment. Specialized studio is for use of advertisers and agencies in producing food commercials with deluxe TK-60 4½" Image Orthicon Cameras and TR-22 Transistorized TV Tape Recorders. Tailored especially to bring the 4½" tube to its highest capability, the TK-60 assures the finest pictures with resolution and gray scale never before achieved. Automatically stabilized circuits assure uninterrupted production. A large bright viewfinder and provision for special effects are among built-in aids to production featured by the TK-60 Camera.

DELUXE "TR-22" TV Tape Recorder—These strikingly styled, compact tape units are teamed with TK-60 Cameras. The TR-22 is completely self-contained with recording, playback, monitoring and testing facilities all in one compact console. Rated technical performance is higher than any other video tape recorder. Record and playback functions are on opposite sides of the tape transport panel to avoid errors in operation. Tape transport is at a 45 degree angle for ease of loading and threading. RCA experience, creative engineering and highest quality components make the fully transistorized TR-22 the leader in producing fine tapes.
At MGM Telestudios...only the finest is acceptable...in production values...in equipment

That's why MGM Telestudios went "RCA, All The Way"—with the revolutionary new TK-60 cameras for the finest TV picture and the "new generation" TR-22 TV Tape Recorder for the finest tape fidelity. At MGM Telestudios, where some of the industry's top creative craftsmen turn out TV commercials for the nation's leading advertisers, the word "finest" is the day-to-day measure of performance.

As the production capability of television tape has increased, the limitations of original equipment have become more apparent. In the search for equipment compatible with current tape technology, MGM Telestudios decided on RCA's "new generation" TK-60 and TR-22. Four of these new TV cameras and six of these fully transistorized TV Tape Recorders have been ordered. "Made for each other," these two RCA equipments bring new pictorial perfection in TV production, bring increased sales impact to tape commercials. These advanced instruments are destined to become the standard of the industry for many years.

For further information write to RCA, Broadcast and Television Equipment, Bldg. 15-5, Camden, N. J. Or see your Broadcast Representative.

RCA The Most Trusted Name in Television
certain basic principles, including payment for preparation of a production; pay for premium time (working in excess of a normal working day or on Saturday, Sunday and holidays), and setting a clear definition of "staff director." Approximately 400 members belong to the SDIG on the East Coast.

Program notes...

New radio shows = Master Artists Corp., recently formed by Hollywood producer Robert Angus and his wife, actress Joyce Miller, is offering radio stations across-the-board series of five-minute and 10-minute programs featuring name stars. There is Liberace on Love (620 five-minute packages); Mel Torme's Words on Music (260 ten-minute talks on music both serious and popular); Jimmie Rodgers' Tales of a Balladeer (260 ten-minute programs); Peter Lorre's Treasury of Terror (260 ten-minute stories of suspense and horror). Master Artists is located at General Service Studios, 1040 North Las Palmas Avenue, Hollywood 38. Telephone is Hollywood 9-9011.

Show-stoppers = SESAC's new series of 10' LP's of 60-second instrumental themes has been sold in over 125 markets since its introduction at the National Association of Broadcasters convention. The show-stopper package is titled: "Just a Minute."

New NET program = Of Time, Work and Leisure, a one-hour TV program produced by National Educational Television, with the financial support of the Twentieth Century Fund, will be telecast on the NET network of more than 70 stations. The program, adapted from a book of the same title, is a combined documentary and symposium concerning the leisure habits of modern Americans.

Possible 1964-65 show = CBS-TV and Gilchrist Productions have reached a tentative agreement for co-production of a one-hour dramatic series, Ambassador at Large, for the 1964-65 network season. Franklin Schaffner, Gilchrist head, will prepare a pilot script.

Record company sold = The acquisition by Columbia Pictures-Screen Gems of the assets of Aldon Music-Dimension Records was announced last Friday (April 19) by A. Schneider, president of Columbia Pictures-Screen Gems. Dimension Records was said to have had approximately 300 songs on best-seller lists over the past four years.

Public interest producers = Union Broadcasting Co., New York, has been established by Hardy Burt, president, and Charles Taubman, vice president, to produce and syndicate "public interest" radio-TV programming. Headquarters are at 18 East 50th Street, New York 22. Telephone is Plaza 9-7979. Mr. Burt formerly produced various network radio and TV programs, including Facts Forum and Answers for Americans.

Sextant-Life' pact = Sextant Inc. and Life magazine have entered into an agreement for Sextant to develop TV entertainment shows based on forthcoming special issues and articles in Life. Programs will carry the credit, "produced in association with the editors of Life." Sextant, an independent production company formed by Robert Graft, Robert Emmett Ginna Jr. and Milton Fruchman, is preparing the FDR series for ABC-TV next season.

THE VIEWERS VOTE FOR NBC'S DIVERSIFIED PROGRAMMING

With six out of eight* TV Guide Awards, the public has confirmed that NBC is bringing the viewer the best and most varied television in America. Our thanks for that confirmation.

We're particularly proud that these honors cover the full range of television's news, entertainment and information. For no network believes so strongly in the principle of diversified, creative programming; and no network is as conscientious about putting that principle into practice.

May we express our congratulations and gratitude to these gifted people whose talents made the winning programs such notable presentations: producers, directors, writers, performers and composers.

The chief value of awards, however, is to set standards for future performance. And NBC's forthcoming schedule for the 1963-64 season shapes up as the very finest in our history.

There may never come a time when we win all the TV Guide Awards. But that won't keep us from trying.

*The other two Awards went to the CBS Television Network: Carol Burnett was voted Favorite Female Performer and "The Beverly Hillbillies" the Favorite New Series.
SMPTE CONVENTION GETS UNDERWAY

TV broadcasting equipment to be displayed

The Society of Motion Picture and Television Engineers opens its 93d semiannual convention today (April 22) at the Traymore hotel in Atlantic City. The convention, to continue through April 26, will include demonstrations of television broadcasting equipment as well as presentations of technical and scientific papers.

A series of papers on television and motion pictures in outer space will be read tomorrow. On Wednesday and Thursday three meetings will cover circuit development; color and monochrome television and automation, and motion pictures for television and video tape. Television and motion pictures for education will be covered on Thursday and Friday.

Television broadcasting equipment to be demonstrated by exhibitors at the convention includes:

CBS Laboratories: automatic level control (Audimax II RZ); video distribution amplifier (VA-1); a record (BTR 150) for adjustment of all audio equipment, and digital display units (DDU) of display system seen on CBS-TV during the 1962 elections.

Zoomar Corp.: Angenieux lens with zoom ranges of 1 to 10 for vidicon and 16 mm and 35 mm motion picture cameras; 40-inch remote-control reflector optic, and 2-in-1 tracking system.

Canon Camera Co. (Japan): Zoom lens with range of 55 mm to 2,000 mm (TV-154).

S.O.S. Photo-Cine-Optics: Tel-Ani-mastand II portable table-model animation stand featuring electrically operated self-adjusting platen and motor-driven vertical camera adjustment; television newsroom projectola editing timer outfit.

Elgeet Optical Co.: Zoom navitar lenses for vidicon television cameras.

New laser light control

RCA Laboratories has developed a new method for controlling light emitted by solid-state lasers, making possible their use in communications systems.

The new technique, which involves a magnetic method for turning, modulating or pulsing light inside the laser crystal before it is emitted, “promises to make practical new high capacity communications systems that can be tuned over the widest spectral range ever achieved,” according to Dr. James Hillier, vice president.

Technical topics...

Ampex guide • Ampex Corp. has released a special issue of its “Ampex Guide Lines” devoted to instructional television. The 16-page brochure, titled “The Videotape Recorder in Education,” contains a full account of the way the VTR equipment is being used for classroom instruction in this country and abroad at all levels from grade school to university, well illustrated with photographs of the equipment in use. Copies are available from Ampex Corp., 934 Charter Street, Redwood City, Calif.

Standardized heads • Michigan Magnetics, Vernmontville, Mich., has standardized three widely used types of tape recorder heads. The SQT17, record-playback quarter track stereo; 7B17, two-track stereo record-playback, and 9EQ3, quarter track stereo erase, will be mass produced and kept in constant inventory. The manufacturer anticipates savings up to 40%, resulting from the standardization.

Altec mikes • Two new microphones for use in recording, radio and television studios are being produced by Altec Lansing Corp., a subsidiary of Ling-Temco-Vought Inc., Anaheim, Calif. Altec Model 688, an omnidirectional mike, and Model 689, a cardioid type unit, are both moving-coil type microphones. Both use a mylar polymer “golden diaphragm” that features peak-free response.

Smithsonian gift • International Telephone & Telegraph Corp. has presented the Smithsonian Institute, Washington, with a replica of the 10-foot dish antenna, transmitter, power electron tubes and the original antenna dipole assembly which performed the first microwave communication over 30 years ago across the English Channel. The gift was presented by Andre G. Clavier, who directed the 1931 operation and is now with IT&T Federal Labs, a division of IT&T.

Portable intercom amplifier • A new transistorized portable intercommunications amplifier, in a 19-inch rack mount for radio and television use, has been designed by Cambridge Electronics, Little Falls, N. J. The unit can take four headset-microphone plug-ins and operates from integral battery.
Maintenance for Collins FM transmitters

Collins' performance record of less down time than any other make of transmitter is a fact we can demonstrate. So, what maintenance amounts to is mostly regular dusting...with a good dust cloth. Keeps your Collins FM transmitter clean. And gleaming, as befits modern station decor. Of course, you don't have to dust (although we recommend it). In which case, your Collins FM transmitter will just stand there, dustily transmitting a clean, strong signal. Makes for great reception...happy listeners. And you know what that means to advertisers! Get complete information on Collins' complete line of FM transmitters. They're available in models from 250 to 20,000 watts (5 kw shown above). Call your Collins Broadcast Sales Engineer today.

COLLINS RADIO COMPANY • Cedar Rapids, Iowa • Dallas, Texas • Los Angeles, California • New York, New York • International, Dallas

BROADCASTING, April 22, 1963
The $40 million Transcontinent Television Corp. stations sale is all but buttoned up, TTC and Midwest Television Inc. (August C. Meyer) have entered negotiations for TTC's San Diego and Bakersfield, Calif., properties.

TTC owns KFMB-AM-FM-TV San Diego and KERO-TV Bakersfield. These were the two properties not sought by Taft Broadcasting Co. which is buying TTC's Buffalo, Kansas City, Mo., and Scranton/Wilkes-Barre, Pa., stations (Broadcasting, April 15).

Although the TTC-Midwest announcement did not mention any price for the two California properties, they carry an estimated valuation of between $10.5 million and $11.5 million—$9.10 million for San Diego and $1.5 million for Bakersfield. KERO-TV is on a UHF channel.

Senator's Letter • The Friday announcement that Midwest and TTC had begun negotiating for the California stations came two days after Senator Clair Engle (D-Calif.) injected himself into the picture. By telegram on Tuesday, followed by a letter on Wednesday, both to Paul A. Schoellkopf Jr., chairman of TTC, Senator Engle urged that "full consideration" be given to a California group seeking to buy the San Diego stations.

This was taken to refer to California Television Inc., which is known to be seeking the KFMB stations in San Diego and purportedly offering $10 million.

Television California, headed by George Fleherty, prominent Fresno, KFEO TV Redding (which it is selling), and KVQ-TV Eureka.

"Because there is no San Diego television station owned by Californians at the present time," Senator Engle said, "I am hopeful that any and all California groups interested in purchasing a station located in the state and serving Californians will receive full consideration." San Diego is also served by KOGO-TV, owned by Time-Life, and by XETV (TV) Tijuana, Mexico, owned by Emilio Azcarraga.

On Friday, his office said all he had asked was consideration for the California group and that he had been assured this was the case, although unsuccessful. He intends doing nothing further, his office said.

Offers Pour In • The jockeying for the San Diego and Bakersfield stations began immediately after it became known that Taft and TTC had begun negotiating. Taft is offering $21.20 a share for TTC's 1.8 million shares, with 80 cents a share allocated to TTC's Cleveland stations (WOKK-AM-FM) purchased just last year but not included in the transaction.

TTC already owns WKRC-AM-FM-TV Cincinnati, WTVN-AM-FM-TV Columbus, both Ohio; WBRAM-AM-FM-TV Birmingham, Ala., and WXYZ-TV Lexington, Ky., a UHF station.

Due to the FCC's multiple ownership regulations, Taft is only eligible for two additional VHF outlets and one UHF.

At least a dozen offers for the California stations, together or separately, have been submitted to TTC, it is understood.

Midwest Television is 51% owned by August C. Meyer and wife. Other stockholders are Lindsay-Schaub Newspapers 20%, Helen M. Stevick and daughter (principal owners of the Champaign News-Gazette), 20%, and others.

Package Deal • In announcing that negotiations between TTC and Midwest have begun, it was made clear that the transfers of TTC's three properties to Taft and two to Midwest are intertwined. The disposition of TTC's California stations to Midwest, the announcement read, would be subject to the approval of the FCC "and would be expressly conditioned upon FCC approval and consummation of the sale of the other TTC stations to Taft."

In addition to the California stations, TTC owns WGR-AM-FM-TV Buffalo, WDAF-AM-FM-TV Kansas City, Mo., and WNEP-TV Scranton/Wilkes-Barre, Pa. The Pennsylvania station is UHF.

The station sales, and the manner

Salinger says news isn't 'managed'

Pierre Salinger, President Kennedy's news secretary, met the "managed news" issue last week by stating that he has too high an opinion of the Washington news corps to believe that a handful of federal employees can lead all of the correspondents down a blind alley.

Mr. Salinger spoke last Thursday (April 18) in Los Angeles at a meeting co-sponsored by the Los Angeles chapter of the Public Relations Society of America and the Los Angeles World Affairs Council.

Mr. Salinger also got into the matter of "news access" and the responsibility of government to make its top officials available to newsmen, so that they and through them the public who listens, views and reads may be informed of what is going on. He cited a recent survey of Washington newsmen which showed a strong majority opinion that it is easier for them to get to top news sources now than in any recent times.

"For many years the White House has been pretty much a closed province to reporters," he said. They had to go through the news secretary before they could get to see anyone. "It was hand-out journalism. Today, any reporter can go directly to any news source without consulting me."

Asked if he believes the government is ever justified in giving false information to the public, Mr. Salinger answered with an emphatic negative. However, he added, in a time of crisis the government has the right to withhold information, "but only for paramount reasons of national security."
WJAR-TV historically has been PROVIDENCE's leading television station, enjoying a substantial COVERAGE advantage in addition to dominance of metro area viewing.

The addition of the third station has not altered WJAR-TV's leadership. It has, rather, magnified it considerably.

The increases in total viewing to PROVIDENCE stations and, in particular, to WJAR-TV offers strong evidence that viewers who formerly tuned to outside stations, now view PROVIDENCE television.*

*For a detailed analysis of the January ARB report, pin-pointing the dynamic changes that have taken place in the PROVIDENCE television market, contact WJAR-TV or your Edward Petry Man.
When every emotion is exposed
When the laughs are close to the tears
When thrills come every minute...

you've got what P. T. Barnum called "The Greatest Show on Earth." The circus.

And you've also got a great new television series of hour-long dramas, in color, shot against the background of Ringling Bros. Barnum & Bailey Circus.

You've got stories that go beyond the spotlights. To the other side of the canvas wall where the make-up is removed and sweat...fear...laughter...and love paint the faces.

You've got award-winner Jack Palance as head ringmaster. Stuart Erwin as Treasurer. New guest stars—great guest stars. And Richard Rodgers' "March of the Clowns" as theme music.

In short, ladies and gentlemen, you've got "The Greatest Show on Earth," one of the more than a dozen new shows coming to ABC this Fall.

All different. Imaginative. And with one quality in common. Entertainment. Fresh programming that attracts the younger, larger families that we—and you—want to reach.

"The Greatest Show on Earth" Tuesdays 9PM
One of the big new shows on ABC this Fall abc
Northern Television Inc., the commission withdrew to buy FCC week's application noted at the National Association of Broadcasters drew criticism last week.

In a speech to another state association LeRoy Collins, NAB president, appealed for unity. He said the NAB performs duties "that no state association can adequately meet on its own; nor can such be done by any loose federation of state associations."

In Texas a meeting of directors of the state association was called for tomorrow (April 23) to consider the letter their president had written.

A Federation * The letter was sent by Jack Roth, KONO San Antonio, to the presidents of all state associations (BROADCASTING, April 15). In it Mr. Roth said he had been authorized by his association to obtain the reaction of other state groups to the proposed formation of a "state federation" of broadcasters, with an office in Washington.

Mr. Roth said the proposal was premised on the belief that the NAB lacks "the capacity or ability to handle the most important problems of the broadcast industry." He suggested that

Roth letter draws criticism of NAB

A letter from the president of the Texas Association of Broadcasters urging the formation of a new association to compensate for "lack of leadership" by the National Association of Broadcasters was accompanied by a plea from the Texas Association of Broadcasters urging the formation of a "state federation" of broadcasters, with an office in Washington.

Mr. Roth said the proposal was premised on the belief that the NAB lacks "the capacity or ability to handle the most important problems of the broadcast industry." He suggested that

an "outstanding" broadcaster be hired to head the Washington office of the federation.

Speaking last Friday at a meeting of the New Mexico Association of Broadcasters (see story page 70), Governor Collins said: "I believe in state associations—even the one in Texas."

Governor Collins said there was room for dissent among NAB members, but "I urge those who disagree with the policies of the NAB to work within the established framework to change those policies rather than attempt to weaken the whole fabric of industry unity."

If broadcasters do not "close ranks in a common effort to reach our goals," Governor Collins said, "there can be no recognizable voice of broadcasting, only a meaningless din of chaos and confusion."

The special meeting of the board of the Texas association was called after BLACKBURN reported the contents of the letter Mr. Roth had sent to the other state association presidents at the meeting, one board member said last week, the directors will either ratify Mr. Roth's action or rectify it.

ABC Radio announces 12 new affiliations

Signing of 12 new ABC Radio affiliates was announced last week by Earl Mullen, vice president in charge of station relations. They are:

wrkn-AM-FM Utica-Rome, N. Y. (1150 kc, 5 kw-day, 1 kw-night); karm-AM-FM Fresno, Calif. (1430 kc, 5 kw); wbbx Portsmouth, N. H. (1380 kc, 1 kw); wtat Tallahassee, Fla. (1450 kc, 1 kw-day, 250 kw-night); wokk Meridian, Miss. (1450 kc, 1 kw-day, 250 kw-night); wtsb Lumberton, N. C. (1340 kc, 1 kw-day, 250 kw-night); kase Austin, Tex. (970 kc, 1 kw-day); wmoj-AM-FM Berlin, N. H. (1230 kc, 1 kw-day, 250 kw-night); wabj Adrian, Mich. (1490 kc, 1 kw-day, 250 kw-night); wsbw Paintsville, Ky. (1490 kc, 1 kw-day, 250 kw-night); knbl Paradise-Chico, Calif. (930 kc, 500 kw-day); and wcbb Selma, Ala. (1490 kc, 250 kw).

IRTS told understanding is industry challenge

New York's Governor Nelson Rockefeller called on broadcasters last week "to accelerate the growth of understanding" between the U. S. and Latin American countries.

Speaking at a luncheon meeting of the International Radio and Television Society (IRTS), Governor Rockefeller cited the commercial interests of CBS, NBC and ABC in Central and South America as giving broadcasters "the capacity to re-establish understanding"
among nations of the Western Hemisphere. (ABC has interests in Central America, ABC and NBC in Venezuela, ABC and NBC in Argentina, ABC in Brazil, CBS and NBC in Mexico and ABC in Brazil.)

Governor Rockefeller traced his own role in establishing closer relations between Latin America and the U. S. prior to and during World War II, and referred to radio at that time "as a vital link in the development of understanding."

He said, however, that since the latter days of World War II Latin America has tended toward "disillusionment, disintegration and disinterest."

Generally sketching the economic, political and social conditions in Latin America since those days, Governor Rockefeller pointed out that there are 5.2 million television sets now in Central and South America. This total, he said, presented the American networks, with their growing ties in Latin America, the opportunity for laying the groundwork of better understanding. "This is the challenge of your industry," he said.

New appointment made to APBE board of directors

Henry H. Fletcher, KSEI Pocatello, Idaho, was appointed by NAB President LeRoy Collins to a three-year term on the board of the Association for Professional Broadcasting Education. He replaces Richard M. Brown, KPOJ Portland, Ore., who has served two consecutive terms on the APBE board and is not eligible for reappointment.

Reappointed to the APBE board was Roy E. Morgan, WLK Wilkes-Barre, Pa. Mr. Morgan was named last year to fill an unexpired one-year term.

Gov. Collins also designated Dr. Harold Niven, assistant to NAB Vice President Howard H. Bell, as executive secretary of the educational group. Dr. Niven, an immediate past president of APBE and formerly at the University of Washington, succeeds Mr. Bell in that position.

APBE’s board is comprised of five broadcaster members and five educators representing universities and colleges which are members of the association. NAB provides financial support to APBE.

KAGT declared bankrupt

KAGT Anacortes, Wash., has been declared a bankrupt and ordered to be sold. This was reported last week by Archie Baker, an Everett, Wash., attorney who has been named trustee with authority to negotiate the station’s sale. KAGT, a 250 w full time station on 1340 kc, is in a single station market.

NAB’s Future of TV in America group meets

**FIRST PROBLEMS DISCUSSED: PAY TV, CATV, SATELLITES**

The National Association of Broadcasters’ committee on the Future of Television in America met for the first time last week in Washington and surveyed the potential problems facing TV.

Among those to which it gave first consideration, it is understood, were community television, subscription television, satellite communications and basic technological advances.

The committee asked the NAB staff to draw up background reports on these subjects. They will be considered at a second meeting in late May or early June before the NAB boards meet in Washington June 24-28.

After study by the committee, the items will be submitted to the TV board for action and decision. It is not the function of the “future” unit to decide policy or make decisions, it was decided.

**CATV Views** For some time now NAB has favored federal regulation of CATV. In recent years, however, more and more broadcasters have entered the CATV field. This may make a difference in the association’s point of view regarding cable systems, it is thought.

Similarly, NAB and most broadcasters have felt that pay television must be kept off the air, although the association has never taken a stand on wired pay TV.

One on-the-air test, of the Phonevision system of pay TV, is already underway in Hartford, Conn., over WBTC (TV). Scheduled to start in 90 days is the Tele-Globe system in Denver, using KCTO (TV). And only last week a new system of pay TV, Melco, asked the FCC for permission to test over KVUE (TV) in Sacramento (see page 72).

The committee’s interest in communications satellites and basic technological activity stems from its belief that both of these fields may affect domestic broadcasting. Mentioned several times by engineers and others has been the possibility of using satellites to broadcast television to home receivers. Also referred to in several satellite studies has been the possibility of using space transmitters to relay network programs to stations. This could result in an all-industry system of interconnection in place of the present method of leasing “lines” from AT&T.

Among the scientific advances on the horizon with probable impact on tele-
vision are such developments as the use of coherent light via laser devices to transmit messages, including TV, and the several proposals for signal compression which could result in the establishment of many more TV stations in all areas of the United States.

The future of television in America committee was activated at the NAB convention in Chicago earlier this month. It was authorized by the NAB board last February. Members are: Dwight Martin, WDSU-TV New Orleans, chairman; Bill Grove, KFBC-TV Cheyenne, Wyo.; C. Howard Lane, KORN-TV Portland, Ore.; Claire McGollough, Steinman Stations; John Murphy, Crosley Broadcasting Corp.; G. Richard Shafto, WIS-TV Columbia, S. C., and Willard Walbridge, KTRK-TV Houston. All were present at last week's meeting except Mr. McGollough.

Radio-TV barred from two New York meetings

Frustrated attempts by broadcasters to gain access for live coverage of two public hearings in New York City brought strong protests last week from two of that city's stations and the New York Radio, Television and Newsreel Working Press Association.

wins, which had hoped to take its microphones into the New York City Council's hearing on a proposed sales tax increase last Thursday, was advised by Erich Treulich, the council's majority leader, that "absolutely no live coverage" would be allowed.

The council's stand was attacked by the working press association in a telegram sent to Mayor Robert Wagner which held that the arbitrary barring of microphones and cameras was "contrary to the guarantees of a free press as contained in the Bill of Rights."

Meanwhile WABC-TV was carrying on another fight for access to a board of education meeting in Levittown, L. I., scheduled for today (April 22).

In notes sent to Governor Nelson Rockefeller, the Levittown superintendent of schools, and the Levittown Board of Education, WABC-TV contested a decision by the board of education to prevent the station from camera coverage of the meeting. Included on the agenda of the meeting is a discussion of textbook censorship in Levittown schools.

Sports now part of NBC News

A reorganization at NBC last week placed the network's sports department under the responsibility of NBC News, headed by William R. McAndrew, executive vice president. The sports department formerly came under Mort Werner, vice president in charge of programs for the television network. The change became effective Friday.

Liberal party buys radio time on WCBS

The Liberal party of New York, trying since last January to purchase radio time in New York City, has succeeded in buying two 15-minute segments from WCBS.

The party's request for broadcast time for a planned series of alternate-week discussion programs had been refused by New York stations WMCA, WNBC and WQXR (BROADCASTING, Feb. 11). Refusal of these stations precipitated a complaint by the New York Liberal party to the FCC on Jan. 21, in which Ben Davidson, executive director of the party, expressed his concern for "the consequences for democracy if radio companies are to have the power to silence political parties through denying them even the right to purchase time on mass communications media . . . "

WNBC and WQXR spokesman explained that it is their stations' policy not to sell political time except during political campaigns. R. Peter Straus, president of WMCA, labeled the party's complaint "irresponsible," and noted that the request to his station was for a specific time period which has been reserved for public service time and sold only rarely on a single program basis.

The contract signed between WCBS and the Liberal party last week covers two programs only (7:45-8 p.m. on April 29 and May 13). However the party said it was "understood that the alternate Mondays at 7:45 p.m. would be made available to (it) on a continuing basis if no serious programming difficulties are encountered." A spokesman for WCBS confirmed this report, pending reaction to the first programs.

Speak up, we're taping

How unobtrusive can a tape recorder be? Jim Gordon, newsmen at WINS New York, provided an answer to that question last week when he walked into the New York City Council's public hearing on proposed tax increases with a recorder concealed in his clothing. The council was enforcing a strict ban against microphones and television cameras at the hearing. (See adjacent story this page.)

Mr. Gordon, whose recorder went unnoticed, managed to tape several segments of the proceedings. WINS, which has been editorializing against the coverage ban, said the "illegal" tape demonstrates that an electronic journalist can work very quietly indeed.
Capital Cities joins RAB on June 1

Radio Advertising Bureau announced last week the signing of Capital Cities Broadcasting Corp.

The company, whose new membership goes into effect June 1, is the second major broadcasting group to join RAB in the past two months. NBC and its owned-and-operated stations joined the organization on March 1.

Capital Cities radio stations are WPAT Paterson, N. J.; WPRO Providence, R. I.; WRROW Albany and WBWE Buffalo.

ASNE hears report on Canon 35's status

The decision of the American Bar Association to continue Canon 35 without substantial change was listed last week as one of the major situations of the past year which involved the Freedom of Information committee of the American Society of Newspaper Editors.

The committee report was made to the ASNE meeting in Washington.

At its February meeting in New Orleans, the ABA adopted a special study committee report which recommended retention of the controversial Canon 35 [Broadcasting, Feb. 11]. This prohibits use of TV cameras, radio microphones or news cameras during trials.

In its report the committee said "The press can take some satisfaction in that the bar association did not impose more stringent regulations favored by some members.

"...There were also private indications that if still photography could have been divorced from television and broadcasting, a committee report might have been favorable to permitting photographers with small, inconspicuous cameras to operate under certain courtroom conditions."

The report was also critical of a federal policy of news manipulation and deception which could "destroy the confidence of our own people in the integrity of our government."

Senator Kenneth B. Keating (R-N.Y.), speaker at the Thursday luncheon, attacked the State Department for "blocking Russian language broadcasts that Radio Liberty had originally proposed to beam to Soviet personnel in Cuba."

Stressing the need for nonmilitary measures, as a lesson learned from the Cuban situation, Senator Keating said "our government hesitates to expose Soviet military personnel to uncensored news and other reports, on the theory that such an act on our part might delay the Soviet troops withdrawal. If they were effective, such broadcasts could well have the exact opposite effect."
Self-regulation or government control

COLLINS SOUNDS CALL TO ARMS ON COMMERCIAL LIMITS

Unless broadcasters do an effective job of self-regulation, “the day is certain to come when someone from government will tell broadcasters more and more of what they can and cannot do” about commercials on the air.

This was the warning sounded by LeRoy Collins Friday night in a speech scheduled to be delivered to the New Mexico Association of Broadcasters meeting in Albuquerque.

Speaking of the FCC’s invitation for comments on proposals to limit the number and length of commercials, the president of the National Association of Broadcasters declared: “We will resist these efforts with all our might.”

But, he added, “Let us not kid ourselves. Unless broadcasters manage their own house, the government will move into this area.”

Governor Collins declared that the radio and tv codes are the “best defense” against government encroachment. But, he added, “we have thus far failed to get a majority of our radio broadcasters to cooperate in this highly essential industry-wide effort.”

After commending state associations for their activities, Governor Collins warned that “our job is not just to convince people in government that we want to be free, but rather that we deserve to be free, and therefore, have a right to be free.”

He continued: “. . . We must convince the men in government that the public interest is the broadcaster’s business, the broadcaster’s responsibility, and that he can and is discharging it. They must be made to understand that any course of government action which weakens broadcasting undermines the people’s greatest means for being free themselves; that one who, without just cause, shackles a broadcaster enchains not one licensee, not one businessman, not one citizen, but all licensees, all businessmen, all citizens.”

In the changing world of today, Governor Collins said, “There is a great challenge confronting all private business in America to devise sound means to act collectively and within the framework of open competition, better to advance the public interest. This is the way we can tell the government to stay out and make it stick. . .

“Broadcasters can give to the nation its strongest leadership in solidifying here on our shores a strong permanent free enterprise. This is a burning need which is squarely at our door.”

WNDT(TV) leader answers his critics

Those writing the obituary for New York’s educational TV station WNMT (TV) are a bit premature, according to Dr. Samuel B. Gould, station president and general manager.

In an interview late last week, Dr. Gould described his harried ETV enterprise as healthy, happy and optimistic.

Dr. Gould’s comments came after a week in which the station had been beset by extensive criticism for the dismissal of Richard D. Heffner, vice president and general manager, by the board of trustees 10 days ago (Broadcasting, April 15).

The removal of Mr. Heffner, in charge of programming for the station’s first year, was announced as being “in the interests of economy.” It was also announced that Dr. Gould would assume Mr. Heffner’s duties.

The Reaction - There ensued considerable reaction, most notably among academic participants on the station. A Columbia University professor resigned as a panel moderator and another Columbia professor said he was “disheartened” and “shocked” at Mr. Heffner’s dismissal.

President Kennedy’s special consultant on the arts, August Heckscher, said “it might not be possible” for him to continue conducting a weekly book discussion “without the confidence and full co-operation of the academic community.”

Seven eastern educators said they would abstain from appearing and five literary and theatrical figures wired their disapproval of the action to Dr. Gould.

Amid this flurry of activity, published reports during the week described WNMT as “floundering,” lacking “adequate popular cash support,” with its “morale riddled . . . torn by dissension” and aggravated by “staff rebellion.”

Howard C. Shepard, chairman of the board, gave Dr. Gould a vote of confidence by saying “the trustees have full and complete confidence in the determination of Dr. Gould to fulfill his trust and his announced obligation to the public.”

Dr. Gould’s Reply - Here are Dr. Gould’s comments on (1) alleged pro-
IMPETUS
IMAGE
IMPACT

IMPACT IS AN EXCITING WORD!

Webster says "a collision communicating force."

Impact happens all the time in WOC-TV’s coverage area . . . the meeting between 350,000 TV homes and WOC-TV helps jar loose $2 billion in buying income.

WOC-TV coverage area is the largest between Chicago and Omaha . . . St. Louis and Minneapolis. Effective Buying Income exceeds 2 billion dollars. There are almost 350,000 TV homes. Need more convincing? See your PGW Colonel today.
gram changes, (2) WNDT's financial position, and (3) staff morale.

"There has been an inference to the effect that my being general manager and president would bring about a change in programing policy. Let me say that the programing policies and philosophy of this station were laid out and effectuated by me back in February 1962. Under these policies we have operated for the last year, and there is no reason to believe we will change now.

"It has been said that I would try to get more classroom type of programing and less original programing. If anything, I hope to encourage more original programing."

About the station's financial condition, Dr. Gould referred to WNDT's most recent financial report which indicated that of a $3,191,000 budget, the station had received, as of April 8, $2,843,500, with a remainder of $347,500 to be raised and two-and-a-half months in which to raise it. "I consider this normal, and see no reason why we shouldn't be able to raise this money," said Dr. Gould, adding that "$800,000 in solid pledges have already been raised for next year."

About staff morale, Dr. Gould reported that not a single permanent employee has resigned from WNDT, and said that while there "was a flurry of excitement and some who were disturbed" over Mr. Heffner's dismissal, "there were also many who rallied to our side. One thing is certain, the board of trustees has been solidified" by the actions of the week.

GOVERNMENT

Three-year pay-TV test requested

KVUE(TV) ASKS COMMISSION APPROVAL FOR TRIAL IN SACRAMENTO

The FCC last week was asked to approve a three-year test of pay-TV over KVUE (TV) Sacramento, Calif. If approved, the test on the channel 40 station would be the third such experiment authorized by the commission.

The request was made by Capitol TV Co. Inc., licensee of KVUE, which has been dark for three years, and Melco Pay TV Co. Melvyn E. Lucas, developer of the system proposed for the test, heads both companies. Under the Melco system, the video portion of the program is broadcast normally, but special equipment is required to receive the sound, which is multiplexed on a subcarrier.

The petition requests approval of one or both variations of the system. Under one, the sound is sent via a subcarrier directly from the television transmitter. Under the other, the sound is carried by telephone line to an FM station, and then multiplexed.

Under both variations, background music (not related to the program) is broadcast on the main aural carrier. To receive the sound portion of a pay-TV program, a subscriber turns down the volume on his set, and switches on a Melco multiplex receiver.

Differs From Other Systems • The Melco proposal thus differs from the two pay-TV systems previously authorized by the FCC. The test underway over WHCT (TV) Hartford, Conn. (ch. 18), involves the transmission of a scrambled picture. The Teleglobe System, expected to start over KCTO (TV) Denver (ch. 2) in July, broadcasts a clear picture but sends the sound into homes by telephone lines.

Current feature films would constitute the major programing fare in the proposed test, at least initially. The petition states that sporting events would also be broadcast, along with dramas, operas, and ballet as they became avail-

Media reports...

Negro analysis • Radio has moved forward as the primary, daily communications force in the U.S. Negro community, according to an analysis released last week by Harry Novik, general manager of WLIR New York. Mr. Novik said that among the nation's top 10 metropolitan areas the Negro community in only one, Chicago, is serviced by a daily newspaper. In contrast, he said, at least one and as many as three radio stations program for Negro audiences in each of the 10 cities.

WGN memorial • WGN-AM-TV Chicago has founded the Pierre Andre memorial intern course in cooperation with Northwestern University to honor late announcer, Pierre Andre. Four students a year will be enrolled in a three-month course related to broadcasting.

Sept. 1 target date • WSYE-TV Elmira, N. Y., will extend its primary coverage by more than one-third when a new 843-foot tower is built at the station's transmitter. Construction of the new tower is expected to be complete by Sept. 1. WSYE-TV (ch. 18) is a satellite of WSYR-TV Syracuse, N. Y.

Network adds station • KBER San Antonio, Tex., will become an affiliate of MBS on April 28. The station, established in 1961, operates with 1 kw on 1150 kc.

Call letter change • KBIG Avalon, Calif., yesterday (April 21) changed its call to KGO and at the same time began using KBIG to identify its sister FM station which has been using the call KBIG. While KGO is the call approved by the FCC, the station's announcers will pronounce the name as K-gold, Kevin Sweeney, general manager, said.

BROADCASTING, April 22, 1963
The world's horizons are in full retreat—before communication advances by ITT

Towering structures are springing up on remote and distant sites around the globe. From one to the other, hurling the earth's curvature, microwave signals are sent and received. They scatter off the troposphere and evade obstructing horizons. In this way, direct communication links are established—many times as long as the average 30-mile conventional line-of-sight microwave span.

This sophisticated technique is today being used to transmit critical NATO, NORAD, Air Force and Army information and commands, as well as civilian communications. 'Over-the-horizon' networks developed by ITT form electronic "bridges" across Europe, North Africa, the Caribbean, the South Pacific and the Arctic. They transmit TV broadcasts, telephone and telegraph signals, or military intelligence, with a reliability ranging from 99.9 to 99.995 percent.

These advanced 'tropo-scatter' systems are typical of the contributions ITT is making in every important area of modern electronics and communications—in telephony, telegraphy, telemetry and television...in space and missile systems...in navigation and air traffic control...in computing and automation, data processing and data communications...in electronic defense systems...in consumer products and industrial components. The total of this activity makes ITT the largest international supplier of electronics and telecommunications in the world.

able for pay-TV. Subscription programs would account for 15 to 40 hours a week of KVUE programming.

Subscribers would pay a flat monthly fee, but would not be required to purchase any receiving equipment and would not pay for individual programs. The petition says the rate proposed for home subscribers is $10 monthly; for others, such as taverns, cocktail lounges and hotels, a minimum of $20.

The petition says the system would be launched with at least 500 subscribers "and a possible 2,000 in the first 90 days of operation." After the first year, the petitioners say, "there would be a possible 9,000 [home] subscribers."

Financing Plans - Melco Pay TV plans to finance the test by issuing 200,000 shares of common stock at $1 par value, with an offering price of $2. With an underwriting discount of 15 cents a share, this would provide Melco with $379,000, the petition says.

Melco Pay TV, which holds copyrights on the systems proposed in the petition, will supply all equipment necessary for toll TV other than station operations and will handle programming, scheduling, equipment installation, sales, and all other business connected with the test.

Under the contract between KVUE and the pay-TV company, the station would be paid $6,000 a week for the first 90 days of the test. Melco would then pay the station's basic film rate published in Standard Rate and Data Service, $150 per hour Class A time. But it will also earn advertisers' discounts, as provided in the station's rates.

In addition to the hourly rate, KVUE, after the first six months of subscription TV, will receive 20% of the net subscription fees charged by Melco.

KVUE, which went on the air in September 1953, was purchased by Capitol TV in 1958. The station went dark on March 19, 1960. Mr. Lucas said he is hoping for prompt approval of the test to permit "early reactivation" of KVUE.

Reply comments received on FM allocations plan

The FCC last week received over 25 reply comments on its proposed table of FM allocations from prospective applicants and other parties concerned that particular communities would be left without sufficient FM outlets.

The allocations table which was proposed by the commission last December provides 80 commercial FM channels in the U. S., and would make 2,730 channels assignments to specific communities within the continental U. S.

FAA extends FM ban

The Federal Aviation Agency last week made permanent its ban on use of FM portables on civil aircraft. The rule prohibits FM radios being used at any time on commercial planes, and it also outlaws their use on other civil flights when VHF radio navigation equipment is being operated.

The rule was temporarily adopted in 1961 when it was suspected that FM interfered with the VHF equipment. Such interference has now been proven, the FAA said in making the ban permanent.

Onondaga opposes plea to reopen ch. 9 hearing

Onondaga Broadcasting Inc. and the FCC's Broadcast Bureau told the commission last week that a joint request by the eight other rival applicants for ch. 9 in Syracuse, N. Y., to reopen the hearing should be denied because it was not based on any new evidence. Onondaga also charged that the joint petition was grossly misleading.

The joint petition by the rival applicants questioned the character qualifications of Onondaga's president and 12% owner, Asher S. Markson, because of Mr. Markson's past business dealings (.Broadcasting, April 8).

Onondaga said that the decision made by the U. S. Court of Appeals on the bankruptcy of Markson Brothers Inc., a furniture firm, on which the competing applicants based their pleading, was not based on any evidence unknown to the hearing examiner at the time he issued his initial decision. Onondaga defended Mr. Markson by saying that the Markson Brothers' funds were withdrawn after Mr. Markson had sold the firm, and that at the time it was sold it was in solid financial condition. Mr. Markson didn't know of the weakened condition of his former company until a few months before the bankruptcy, Onondaga said, and "endeavored to repurchase the business... to set things right."

According to Onondaga the "joint

STORER BROADCASTING COMPANY

Atlanta Waga-TV
Files interlock solidly for stacking—can be safely stacked up to seven units high.

Easy-glide "follow block" keeps tape neatly in place. Slotted back for easy wall mounting.

Hang it, stack it, however you use it... the new Storette tape rack's a good deal!

Only $6.95 with Scotch Professional Recording Tapes!

The Storette is the first quality tape storage rack ever offered at this special price... only $6.95 ($12.95 value) with your order of 36 rolls of "Scotch" Brand Professional Recording Tapes in either 5" or 7" size!

The Storette was specially designed for storing tape—holds 36 boxes of either 5" or 7" reels, has a "follow block" for easy dividing. Sits on counter or shelf bookcase-style, lays on its back or hangs on wall. 9 3/4" high, 25" wide, 8" deep. All welded construction with smooth corners and edges. 2-coat gray baked enamel finish.

Completely assembled. Units interlock for stacking—up to seven shelves high.

The special offer on the Storette tape rack is available with assortments of all popular professional "Scotch" Recording Tapes including All Purpose, Extra Play, Double Length, High Output, Low Print... in fact a tape for every professional need. See your supplier.

(Please note that all tapes are offered by your supplier at regular industrial consumer maximum discount prices.) Larger storage cabinet holding up to 300 tapes also available. For information ask about CAB-1 unit.

Broadcasting, April 22, 1963
The FCC gets a 'gift' from VOA—Dr. McIntire

One of the stickiest problems confronting the FCC has nothing to do with the frequency or volume of commercials, or vhf drop-ins or network regulation. Rather, it involves the Rev. Dr. Carl McIntire of Col-lingswood, N. J., and the conservative views he broadcasts to an international audience over WINB Red Lion, Pa.

Dr. McIntire, who broadcasts a half-hour daily on WINB, has attacked "one-world government" and the State Department, accused the UN of "moral bankruptcy" for permitting Communist nations to belong, and denounced the attempts of "the ruling party of the administration to be the only voice of the American people."

He has also assailed the World Council of Churches, which, he says, is in league with the State Department, the National Council of Churches, with which he has been feuding for years, and the Russian Orthodox Church, which he says is Communist dominated.

**VOA to FCC** The McIntire issue was dropped into the FCC's lap by the Voice of America, some of whose officials feared the broadcasts would confuse foreign listeners about American policies. An official of the U. S. Information Agency, VOA's parent agency, said the government first became aware of the McIntire broadcasts several months ago after a ham operator in Sweden reported picking up one of them that attacked President Kennedy. Dr. McIntire claims a large audience in Europe, Africa, the Middle East, and South America.

**WINB** one of three private U. S. shortwave stations heard abroad, went on the air in November, is still operating on its construction permit. The permittee is the Rev. Mr. John M. Norris, who also operates WOCE-AM-FM Red Lion.

**FCC** staff members, who have been following Dr. McIntire's programs closely, say the commission is not concerned with him but whether WINB is carrying the diversified religious programming the Rev. Mr. Norris promised to provide when he applied for the station.

Dr. McIntire, however, who has accused the FCC in his broadcasts of attempting to "put an iron curtain around America," says a clear-cut question of freedom of speech is involved, "They are investigating my views," he said in an interview last week. "My defense is the First Amendment to the Constitution," which guarantees free speech.

Furthermore, he sees himself as defending the rights of all broadcasters. "If the program is eliminated [from WINB], the same thing can be done domestically," he said. "I regard this as a test case."

He also said that if the commission attempts to strip the Rev. Mr. Norris of his station, he would raise funds to fight the case in the courts.

**Fund Raising** And Dr. McIntire has demonstrated an ability to raise funds. His program, The 20th Century Reformation Hour, is heard on 457 stations as well as WINB. He pays commercial rates for the time out of money he raises by appeals.

He also is able to arouse his listeners. His requests that listeners protest the FCC's investigation of him resulted in a flood of complaints from his supporters saying the commission was attempting to deny Dr. McIntire free speech.

One FCC official estimated the number of letters at "more than a thousand," including many from members of Congress who had received complaints from their constituents.

Dr. McIntire, in addition to presenting his own views on the controversy, has broadcast those of commission officials, including Chairman Newton N. Minow and his legal assistant, Joel Rosenbloom. Their comments were contained in letters replying to the queries from Dr. McIntire's supporters.

Dr. McIntire, who was ousted from the United Presbyterian Church in the U. S. A. 27 years ago, has since established his own denomination. He has been a leading figure in the International Council of Christian Churches.

**No Official Stand** Although some VOA officials are concerned about the effect Dr. McIntire's broadcasts might have on their efforts in communicating with the rest of the world, the USIA official said the agency has no official position on the clergyman.

As a practical matter, he feels Dr. McIntire has little effect abroad. "He speaks in English, and his broadcasts are tailored for an American audience," he said. "What's an Arab going to make of him?"

This assessment hasn't made things easier for FCC staff members working on the problem. Because of the free-speech question and the storm of controversy that has developed, they are moving carefully.

One commission rule discussed in connection with the case requires international broadcasters to provide service "which will reflect the culture of this country and which will promote international goodwill, understanding and cooperation."

But some commission lawyers feel this is "too subjective" and would be difficult to enforce.

**Something, But What** One commission official working on the matter said "something" would be recommended to the commission "fairly soon." But, he added "I don't know what. It's difficult even for the staff to agree on something to submit."

The commission's action last week in freezing international broadcast station applications pending a review of the rules governing such stations might be the first step in a solution (see story page 81). Commission officials have denied any connection between the freeze and the McIntire case. But it seems likely that any revision will be made with Dr. McIntire in mind. There is also the possibility that international broadcasting by private individuals might be prohibited. This kind of broadcasting was a problem for the commission even before WINB went on the air. At present, there are only two other private international stations in the U. S.: WRUL Scituate, Mass., and KFBI Belmont, Calif. Both broadcast religious programs of a non-controversial nature.
"The legitimate object of government is to do for a community of people whatever they need to have done, but can't do at all or cannot do so well for themselves..."

LINCOLN WAS RIGHT. And rural electrification is a living example of his wisdom. When rural people could get electricity no other way, Congress created the Rural Electrification Administration to help them finance their own non-profit power systems. Today this combination of local ownership and REA financing brings electric power to 20 million rural people.

Following Lincoln's concept of helping people to help themselves, the rural electrification program is strengthening the nation's economy and fostering democracy in rural America. Based on the finest principles of the American private enterprise system, rural electric cooperatives are owned, operated, and controlled by the local people they serve. Although they serve the sparsely-settled, country areas, rural electrics manage carefully to make ends meet. Already they've repaid more than $1 1/2 billion in principal and interest on their REA loans.

Few programs in our nation's history have accomplished so much for so many Americans. Rural electrification does, indeed, prove the truth of Lincoln's idea.
Huddleston calls Birmingham VHF 'ill advised' AMST Opposes Proposal * This ABC suggestion, however, was opposed last week in comments filed by the Association of Maximum Service Telecasters, one of the leading opponents of short-spaced drop-in proposal.

AMST said arguments in the drop-in case have involved the short-term need to strengthen ABC by providing it with additional VHF affiliates and the long-term need to assist UHF. But, AMST added, the 'public interest' requires a denial of the drop-ins.

The second AMST proposal submitted in opposition to the ABC proposal—also said dual operation would not give UHF the boost the network says it would. AMST said the proposal is based on the theory that dual-operated UHF stations would reach twice as many viewers as short-spaced VHF channels and that this would help stimulate UHF.

But, AMST said, in one of the markets under consideration, Baton Rouge, the short-spaced VHF channel would cover an area larger than the dual UHF and that in the six other UHF coverage would not be as great as ABC estimates.

Court upholds FCC in Moline TV case

A federal court in Washington upheld the FCC's 1962 grant of ch. 8 in Moline, Ill., to Moline Television Corp.

Answering charges that the commission failed to require proof from Moline that it had surveyed the needs of the community, the appeals court last week in an unsigned opinion ruled that the FCC was correct in assuming that the needs of the community were obvious to Moline's stockholders since "so many officers and directors, representing 75% of the stock, are local residents ... the very community leaders among whom a survey as to community programing needs would be conducted."

It also upheld the FCC's point giving Moline a plus for broadcast experience because of the past experience of Frank P. Schreiber, president and 10% stockholder of Moline. Mr. Schreiber is a former executive of WGN-AM-TV Chicago and of MBS.

Applicants who argued against the grant were Community Television Corp., Midland Broadcasting Co., Iliway Television Inc. and Tele-Views News Co.
MEET MISS LEADING OF 1963

We'd like to see more of her. Sweet, young things like this young lady are good for America. But we'd like to see less of a well-known phony with a similar name. He's a crook known as misleading advertising.

He cheats broadcasters by undermining believability in advertising. He cheats the public.

And, when he masquerades as an automobile dealer, he blackens the reputation of ethical dealers everywhere. We're out to get him...

with your help. We urge all broadcasters to establish high standards of acceptability for automobile advertising. Let nothing on your station associate the fast-buck dealer with ethical, franchised new-car and truck dealers...who work with you to make your city a better place in which to live and do business. NADA pledges itself to fight dishonest advertising. We appreciate your co-operation.

Please write for a free copy of "Recommended Standards of Practice for Advertising and Selling Automobiles," prepared by NADA and the Association of Better Business Bureaus, Inc.

Official Organization of America's Franchised New Car and Truck Dealers
2000 "K" Street N.W., Washington 6, D.C.
McGee: Birch money, ideas behind some Wyoming programs

Senator Gale W. McGee (D-Wyo.) went on a state-wide radio hookup last week to warn listeners they should demand balanced political programming from Wyoming broadcasters to counter right-wing saturation heavily flavored with the extremist John Birch Society line.

The senator warned that the secret society was behind a bold effort to control the state at all levels of government.

"Approximately six" Wyoming radio stations are paid about $1,000 a month to carry programs directly linked to the society and about 15 stations of the 29 in Wyoming "are carrying similar right-wing materials," Senator McGee said.

"I am confident you will find our Wyoming broadcasters cooperative" in providing opportunities to air "the other side," said the senator, a member of the Senate Commerce Committee. "But if for any reason your broadcaster refuses to satisfy your request you are then entitled to write to the Federal Communications Commission . . . to register your complaint."

The unusual state-wide link was set up at Senator McGee's request by the Wyoming Broadcasters Association which had asked the senator to explain statements about the Birch Society's influence in Wyoming broadcasting which had been attributed to him in a syndicated newspaper column by Marquis Childs, which appeared the week before.

The senator's remarks were carried live out of Cheyenne on KFBC, which fed 16 other stations on the Wyoming leg of the Intermountain Network Thursday night (April 18). Other stations carried the broadcast on tapes supplied by the senator, and he appeared later on KFBC-TV Cheyenne and on KTWO-TV Casper.

The senator's remarks were "welcome" and "cleared the air," said Larry Birleff, president of the Wyoming association and station and commercial manager of KFBC.

Began With Childs • The board of the Wyoming group had wired Senator McGee April 13 seeking an explanation of Mr. Childs's statement that half the state's stations were on "monthly retainers" by Birch Society groups.

Mr. Childs was "technically and grammatically incorrect," the senator said. But it is true that an unnamed source pays $150 a month to put on programs of the Reverend Carl McIntire of New Jersey. "Other programs . . . are financed in rather devious ways," Senator McGee said. They are either sold for local sponsorship or played without charge as a public service, he said.

"The Wyoming broadcasters alone hold the secret as to how much time is actually being allocated to the extremists' broadcasts in our state," he continued. "Their programing is not always a matter of public record."

Senator McGee said the following programs offered in Wyoming and elsewhere echo the Birch Society line:

Manion Forum, featuring Clarence

What program authority does FCC have?

U.S. SUPREME COURT MAY DECIDE IN NEW MEXICO CASE

The extent of the FCC's authority over programing came into question before the U. S. Supreme Court last week — and the ruling of the court may very well become a legal milestone in the controversy surrounding the commission's power in this field.

The case, argued last Monday and Tuesday, involves the New Mexico Board of Optometry and KNEW Hobbs, N. M. The state board last year sought and received a state court order against KNEW, KHOB Hobbs and the local newspaper enjoining them from carrying price and discount advertisements of a Texas optometrist. New Mexico law forbids state optometrists from mentioning prices in their advertising.

In their appeal to the U. S. Supreme Court KNEW and the newspaper charged that the state's actions interfere with interstate commerce and also that the Communications Act and the FCC have pre-empted the field of radio programing and advertising.

Pre-Emption Case • The pre-emption argument was made principally by Solicitor General Archibal Cox, who maintained that the FCC's control over programing was extensive and of long standing (Broadcasting, March 11).

Detailing this contention, Mr. Cox pointed to the FCC's actions in (1) considering programing plans in applications for new stations, (2) comparing past, present and future programing at renewal time, (3) requiring stations to maintain program logs, (4) denying licenses to applicants who have engaged in "bait and switch" advertising, and (5) warning licensees against accepting deceptive advertising, birth control products, medical advice, quack medicines and double billing.

He also noted that in 1960 the FCC issued a policy statement on its interest and authority in programing.

The only limitation, Mr. Cox observed, is that the FCC is prohibited from censoring programs.

Although states are not prevented entirely from applying their laws to broadcasters (defamation, taxation, etc.), it would be "intolerable," Mr. Cox said, if each of the 50 states were allowed to apply special laws to broadcasters.

Earl E. Hartley, New Mexico attorney general, and Robert Pyatt, special assistant attorney general for the state, stressed that neither the Communications Act nor the FCC has any provision or regulation on price advertising. Therefore, they claimed, the federal government has not pre-empted the field and the state has a right to impose these standards on radio and newspapers.
Manion, a former law professor and a member "of the board of directors of the Birch Society."

\textit{Life Line}, financed by H. L. Hunt, and \textit{Dan Smoot Report}, featuring Dan Smoot, a former editor for Mr. Hunt. "The \textit{Dan Smoot Report} and \textit{Life Line} have both been adopted as the official literature of the John Birch Society," the senator said.

The \textit{Independent American}, which features Kent Courtney, who the senator said also is a director of the society.

Evidence that the society has already made long strides toward control of Wyoming, said the senator, is that the state legislature has adopted, despite disavowals of Birchism, these Birch goals: a right to work law and resolutions urging the U. S. get out of the United Nations, repeal of the income tax and the destruction of the nation's foreign aid programs.

"Believe me, my friends, the John Birchers are here and they are burrowed in deeply," Senator McGee said.

\section*{ANOTHER SERVICE CAUGHT IN THE ICE}

\textbf{FCC calls halt to action on international applications}

International broadcasting went into the FCC deep freeze last week pending a revision of the commission's rules governing such operations.

The freeze, adopted on a 4-1 vote, affects applications for new private international stations and requests by existing stations to expand their broadcast day. Commissioner Rosel H. Hyde, the lone dissenter, criticized the decision to impose a freeze without prior notice.

The commission said "mounting frequency congestion and resultant shortage of available frequency hours in the international broadcast bands for both private and governmental use" require a revision of its international broadcast rules. These were first adopted in 1939 and later modified in 1955.

No hint was given as to how long the freeze might last. The commission said only that proposed rules "will be issued as soon as possible."

\textbf{A Formality} • The commission action formalized a situation that has been in effect for about a year (CLOSED CIRCUIT, March 11). Commission officials said last month concern about the implications of international broadcasts by private individuals had caused the commission to defer action on new applications pending a review of the purposes of international broadcasting.

The commission announcement immediately raised speculation that the freeze was aimed at—or prompted by—the international station, WNBA Red Lion, Pa., because of the controversial broadcasts of the Rev. Dr. Carl McIntire (see story page 76).

Commission officials, however, said there was no connection. They pointed out that WNBA is already on the air. Furthermore, they said, the matter had been under study long before WNBA began operating last winter.

But some commissioners acknowledged that the McIntire issue was one of the factors considered in the decision-making process.

\textbf{Not Many Stations} • Most international broadcasting from the U. S. is done by the Voice of America over facilities leased or owned by its parent organization, the U. S. Information Agency. As a result, the latest freeze will have nothing like the effect of the commission's two other freezes—on AM radio (imposed May 10, 1962)

\section*{LOG FCC REQUIRED TRANSMITTER READINGS FOR ONLY $3.00 A MONTH!}

Buy a Bauer "Log Alarm"! The Bauer "Log Alarm" logs all required parameters — Transmitter Frequency, Power, Plate Voltage, Plate Current and Tower Lights for only $3.00 a month (operating cost). Parameters are logged continuously and readings correlated automatically because they are printed on a single, pressure sensitive, chart. Readings are made once a minute and system checks calibration every 26 minutes. Visual and audible alarms indicate out-of-tolerance conditions. Compact — only 10¾" of rack space. Reload chart paper only twice a month—daily readings may be torn off for filing in a convenient log book...You can start-saving money right now! Send for complete details today!

\textbf{BROADCASTING, April 22, 1963}
Harris: ‘Things could be a lot worse’

A congressman who holds more power and influence over broadcasting legislation than any other member of the House of Representatives warned broadcasters last week that if their problems with federal regulation look bad to them now, an examination of some of the alternatives would show that things could be a lot worse.

That "worse" might be government control of programing or the establishment of government stations, suggested Representative Oren Harris (D-Ark.), chairman of both the House Commerce Committee and the Special Subcommittee on Investigations, which has recessed for the time being its hearing on broadcast measurement services (BROADCASTING, April 15).

Representative Harris used a discussion of the ratings question to reiterate his opposition to pay-tv. He said programing by the numbers could lead to subscription television which, he said, would not be in the public interest.

But the picture for broadcasters doesn't have to be so gloomy, Representative Harris said. If broadcasters can walk on the tightrope between private and public interest, he said, they needn't fear the alternatives.

In a speech prepared for delivery before the Mississippi Broadcasters Association convention in Biloxi Saturday (April 20), Representative Harris reminded his audience that "Winston Churchill has stated that democracy is easily the worst form of government until you have considered the alternatives."

Similarly, said the congressman, "tightrope walking is easily the most uncomfortable and dangerous position" until one considers the other choices available.

With a sympathetic understanding of broadcaster problems, Representative Harris said Congress is mindful and concerned about the FCC's actions in the programing area. He revealed that the agency's Omaha hearing prompted him to seek an explanation of the FCC's authority in that area from its chairman.

On broadcast ratings, Representative Harris said he has seen a similarity in that problem to what an earlier subcommittee of his found in the payola and fixed quiz show scandals: that many persons connected with broadcasting and advertising "suspected something was amiss" before his hearings "but few persons, if any, seemed to have cared to learn the full truth about what was going on. Everybody seemed happy to share in the prosperity. Nobody was anxious to kill the goose that laid the golden eggs," he said.

(Chairman Harris has made it clear that broadcasters, advertising agencies and advertisers had better be prepared with some solutions to the ratings problem when his subcommittee resumes its hearing. See related stories on pages 33, 34 and 36.)

Some of the highlights of the prepared Mississippi speech:

* Programing - When FCC Commissioner E. William Henry said at the Omaha local programing hearing, "I don't think necessarily that the standard that the community might have is necessarily the one we would have," Representative Harris asked FCC Chairman Newton N. Minow whether Commissioner Henry's remarks correctly reflected commission policy. He also requested "an authoritative statement" on the commission's powers and policies in the programing area.

Revealing the chairman's reply to him, Representative Harris said he was told that the commission's July 29, 1960, en banc statement on programing contained the standards to which Commissioner Henry had referred. "He contemplated no change from those policies," Chairman Minow wrote, but pointed out that the "general public may not always be aware" that the broadcaster "has the responsibility to seek out and fulfill diligently the needs and interests of his area - as opposed to simply acting on a few inquiries and suggestions."

However, Representative Harris suggested that some discrepancies may be disclosed in comparing Commissioner Henry's remarks in Omaha and the 1960 FCC statement, "particularly . . . that the commission does not 'intend to guide the licenses along the path of programing' and that 'on the contrary the licensee must find his own path with the guidance of those whom his signal is to serve.'"

Concerned that Commissioner Henry, "who is relatively a novice on the commission and a newcomer to the field of broadcast law," may have been unsure in his footing on the tightrope "which stretches between the public interest provisions and the anti-censorship provisions of the Communications Act," Representative Harris said he was glad the commissioner "ap-
pears to have regained his balance and that he solidly subscribes to the commission's statement on programing policy.

"I also would like you to note that Chairman Minow's letter to me does not report any dissent on the part of any commissioner with regard to the 1960 statement on programing policy," Representative Harris said. (The congressman didn't state it, but Commissioner Rosel H. Hyde filed a vigorous dissent to the statement in 1960.)

Representative Harris said that a Federal Communications Bar Association proposal to amend the Communications Act and take the FCC out of programing functions "may seem extremely attractive to broadcasters—at least until they have thought about it more carefully." Not only would the proposal give broadcasters primary responsibility in programing, "but it would make it unnecessary for broadcasters to render a public accounting for their programing."

Such a substitution of private for public interest, the congressman warned, could lead to a public demand for "complete government control over radio and television programing" or short of that, to a demand for government-operated stations "which will meet public needs not met by privately operated stations."

**Must Test FCC Powers** = "Unless individual broadcasters have the courage to test by legal processes the limits of the commission's powers, we shall never gain the greater certainty which is required not only in the interest of broadcasters but in the public interest as well," Representative Harris said. He cited (though not by name), a 1960 Mississippi case in which the FCC "gave in to the commission" and sold time to candidates in a congressional race even though the station said it did not want to sell time at all.

(Representative Harris confronted Chairman Minow with this problem last month and told the chairman he didn't like the "real hammer" the agency was wielding over broadcasters at renewal time. He said then that the Congress "ought to look into . . . many . . . things that the commission takes into consideration with the renewal because this question of holding a real hammer over the head of somebody when they know it is held there seems to me a very, very serious problem" [Broadcasting, March 11].)

The station complied with an FCC letter sent in response to one of the candidate's complaint that he could not buy time on the station, but Representative Harris said "it is clear to me . . . that this particular situation might well have been pursued further by the television station . . . . It might well have requested a declaratory ruling by the commission and might well have tested that ruling in the courts," he said.

The congressman said, however, he understood "why the station preferred not to incur the possible wrath of the commission and thus place its license in jeopardy."

In other remarks on political broadcast-
ing, Representative Harris said broadcasters seeking complete repeal of Section 315 must come up with "specific answers to difficult and complex specific situations" which have arisen and probably will again.

Section 315 exemptions for bona fide news "will go a long way towards" remedying problems, he said.

**On Ratings** = "Most everybody in the industry has been anxious not to rock the boat," Representative Harris said in a reference to broadcaster and advertiser failure to do something about their suspicion of rating service inadequacy. "Most everybody has been doing well financially, though it certainly cannot be said that they have been doing good," he said.

"The question as to the use to which ratings may properly be put is first of all a question which broadcasters must answer, and secondly, it is a matter of concern for the FCC," he said. "I am not so sure that the Federal Trade Commission, which is one of the agencies which has jurisdiction [in ratings accuracy] in this respect has done all that can be done."

The lawmaker, who remarked during the ratings hearing that Congress has the power to fix weights and measures, reminded the Mississippi broadcasters: "Surely, ratings are used as a measure. We may want to explore whether the Congress should enact legislation with regard to rating standards.

"I can promise you this," he said. "We shall leave no stone unturned in exploring what can and should be done to improve the ugly rating picture which we have found to exist. "Absolute or excessive reliance [on ratings] constitute an abdication of broadcasters' responsibility no matter how accurate the ratings can be demonstrated to be," Representative Harris said. If that's what is going to be continued, "I should like to warn . . . [this action pleads] most effectively for the substitution of pay television for free television. In the question of pay television, the question of ratings would be answered with absolute certainty. But is that what is wanted? Would that be in the public interest? I submit to you most sincerely that it would not."

**And the Daytime Stations** = The congressman said he was aware that House-passed but Senate-defeated legislation to extend pre-sunrise operations, and a proposed FCC rule change now under consideration, do not go "as far as many daytime stations would have liked to see us go."

But the standard of public interest is vital in deciding this and other broadcast problems, he said.

Hearings conducted by his committee showed clearly "that the post-sunset operations by daytime stations were likely to lead to insufferable interference with the signals of other radio stations." An "urgent public need" shown for pre-sunrise operations was not shown during post-sunset hours, he said.

of a free society."

He also said the commission might consider whether the U. S. should conserve international frequencies "while engaged in a world competition with other countries [the USSR and Communist China]" which outstrip it in the use of international radio.

Springfield ch. 2 move argued in appeals court

A five-year-old action of the FCC, moving channel 2 from Springfield, Ill., to St. Louis and Terre Haute, Ind., was reviewed by the U. S. Appeals Court in Washington last week.

Again objecting to the move was Sangamon Valley Television Corp., one of the original applicants for the VHF facility. Also before the court were 220 Television Inc., an applicant for channel 21 in St. Louis, and Fort Harrison Corp., seeking channel 2 in Terre Haute.

Both 220 Television and Fort Harrison claim that since the commission has had to review its 1957 order, new applications should be accepted for the VHF channel. This the FCC has refused to do. The Terre Haute channel has been in hearing since 1959, with an initial decision issued in December of that year favoring WTHI-TV already on channel 10 in Terre Haute. Seeking channel 10 if vacated is Livesay Broadcasting Co. (WLGH Mattoon and WROW Clinton, both Illinois). Other applicant seeking channel 2 in Terre Haute is Iliana Telecasting Corp., which includes principals of Truth Publishing Co. (WSJW TV Elkhart and WKJG-TV Fort
PUCINSKI IN SPOTLIGHT AT HEARING

WYNR probe centers on congressman's letters and attitudes

A crossfire of allegations concerning political pressure and attempted intimidation of Representative Roman C. Pucinski (D-Ill.) punctuated a sizable portion of the record during the second week of the FCC's informal hearing involving WYNR Chicago.

The commission is investigating whether McLendon Corp. was candid in representations about program plans when it acquired WYNR (formerly WGES) last year. The public probe is unusual in that no sanction against McLendon is involved at this stage (BROADCASTING, April 15). The case is being heard in Chicago by Chief Examiner James D. Cunningham.

Representative Pucinski, a surprise FCC witness Wednesday, disclosed that earlier this year a WYNR employee wrote Representative Adam Clayton Powell (D-N.Y.) threatening to "embarrass" the Illinois congressional member of Mr. Powell's House committee should Mr. Powell fail to influence Mr. Pucinski to modify his protest against McLendon. Mr. Powell sent the letter to Mr. Pucinski for comment.

Representative Pucinski said the incident made him more determined than ever to press his efforts for an FCC hearing. He said he replied to Mr. Powell that the evidence would make it hard for McLendon to keep its license for WYNR.

Congressman Pucinski also repeatedly and strongly denied any personal motive in his protests to the FCC about McLendon's sudden change of WYNR programming from 80% to 100% Negro late last August. The format change included the cancellation of all foreign language and time brokerage programs on WYNR, including that of foreign languages for much smaller segments of the minority population. Negro population has boomed in recent years, he noted.

Mr. McLendon denied that this activity came after a mid-August date when Congressman Pucinski first protested the format change. To one question pressing him as to the initial date of advertising arrangements to support the new format, Mr. McLendon explained in part, "I like to do things as fast as possible."

McLendon witnesses also have explained during the hearing that the sudden decision to drop all foreign language shows came upon their discovery of time brokerage after assuming operation of WYNR.

Besides WYNR, the McLendon stations include KLIF Dallas, KTSZ San Antonio, KABL Oakland-San Francisco and WYSL Buffalo plus sales representation of Mexican station XTRA Tijuana (Los Angeles).

The WYNR probe is to continue this week. When completed the record will be certified without recommendation or report by the examiner to the full FCC for review as an agenda item at one of its regular meetings. The FCC counsel will give his recommendation to the commission then. At that time the commission will decide if some formal type proceeding is desired.

Rely on good faith, broadcasters told

The FCC last week expressed its views on bipartisan promotions for campaign contributions. The commission said that broadcasters must rely on judgments made in good faith.

The commission's latest views came in answer to an inquiry by Lawrence M. C. Smith of Philadelphia on how the political equal-time and fairness doctrine requirements would apply to bipartisan campaign promotions through use of spot announcements.

Mr. Smith was told that the equal-time provision of Section 315 would not apply to bipartisan announcements since it refers only to the political candidates and not to those speaking in their behalf.

However, the commission said, the fairness doctrine does apply "where a licensee allows its facilities to be used for the expression of an opinion on a controversial issue of public importance." The broadcaster then has "an obligation" to provide for the presentation of opposing views, the commission said.

The commission said that it would not give an opinion as to the applicability of the fairness doctrine to specific future situations since it did not have the necessary facts, but could give "general principles" as guide lights.

"Good Faith " The FCC said that it
could not develop an all embracing formula to insure fair and balanced broadcasting of public issues. "The license will in each instance be called upon to exercise his best judgment and good sense in determining what subjects should be considered, the particular format of the programs . . . , the different shades of opinion . . . , and the spokesmen for each point of view." The commission quoted from its "Editorializing Report." The commission also said that the broadcaster will be faced by questions of value and the amount of time it is necessary to extend to a requesting party.

The commission said that as far as two candidates from opposing, major political parties are concerned they should be afforded "roughly" the same amount of emphasis in calls for contributions to campaign funds, such as were described by Mrs. Smith.

The FCC added that "it does not follow that if there were, in addition, so-called minority party candidates . . . , these candidates also would have to be afforded a roughly equivalent number of announcements." In such cases, the commission said, it would be up to the broadcaster to make "good faith judgment" as to the need in a community to provide for announcement time to minority parties.

The commission concluded that in short it is the broadcaster's responsibility to afford "a reasonable opportunity for the presentation of opposing views" according to each situation. This is also true for party spokesmen, but not candidates, who may appear, the commission added.

Presidential Support • The FCC said that announcements for campaign contributions, such as Mr. Smith described, have been given the support of President Kennedy. The commission pointed out the President's proposed legislation in May 1962 to free political campaigns from reliance on large contributions from special interest groups. "To accomplish this, improvement of public understanding of campaign finance, coupled with a system of incentives for solicitation and giving, is necessary," the proposal said.

The commission agreed that bipartisan requests for campaign funds is a "worthwhile and commendable goal of broadening the base of political contributions." The commission added that such efforts are in keeping with the objective of the fairness doctrine policy, that is the right of the public to be informed on controversial issues affecting it, including those of political parties and candidates.

As to whether such campaign fund requests will cause conflict with the many other public announcements which may be requested, is for the broadcaster to answer, the FCC said. The commission said it did not wish to give an opinion as to how a station's time should be allocated, but that a broadcaster should not reject requests on the grounds that he "would have to be fair in their presentation."

INTERNATIONAL

2ND FRENCH TV NETWORK FOR CANADA

Present plans call for three stations on hook-up

A second Canadian French-language television network, in addition to that of the Canadian Broadcasting Corp., is to be formed by CFTM-TV Montreal and Societe de Televison du Canada Francaise. The group of broadcasting executives was given one year in which to form the network by the Board of Broadcast Governors at Ottawa, following its March meeting.

BBG announced its decision on April 11 regarding the new French TV network. It will be composed at first of CFTM-TV Montreal, CHFM-TV Chicoutimi, Que., and CFCC-TV Quebec City, Que. The BBG will have to be requested for permission for the network to start operations. Present authority is only for setting up the network.

Other BBG recommendations following the March public hearing were:

Sale of CHC-AM-FM Brampton, Ont., by Spencer Caldwell and Gordon Keeble, both of CTV Television Network Ltd., Toronto, to Leslie A. Allen, Toronto film distributor. CHC is authorized to increase power from 250 w to 1 kw and move from 1050 kc to 790 kc for full 24-hour service.

Royce Frith, Toronto lawyer and TV commentator, is authorized to start a 500 w AM station on 580 kc at Windsor, Ont.

Jack Shapiro, secretary of the Winnipeg Musicians Union, has been recommended for a new 5 kw AM station on 1470 kc at Winnipeg, Man., and an FM station on 94.3 mc with 6.5 kw at Winnipeg.

CFCP Courtenay, B. C., is recommended for a new 250 w AM station on 1490 kc at Campbell River, B. C., to be fed programs part-time from CFCP.

CKGM Montreal, Que., authorized for an FM station at Montreal with 14 kw power on 98.5 mc, to be programmed separately from CKGM.

CFCB Corner Brook, Nfld., authorized to build a satellite AM station at Stephenville, Nfd., with 500 w on 910 kc.

Canadian Broadcasting Corp., Ottawa, Ont., authorized to build a low power 40 w unattended satellite AM station on 1190 kc at Stephenville, Nfd., to carry CBC network programs.

CBC also was recommended for satellite TV stations at Atikokan, Ont., on ch. 7 with 544 video and 272 w audio power to rebroadcast programs from Winnipeg satellite station CBWAT Keora, Ont.; and at Castlegar, B. C. on ch. 3 with 5 w power to rebroadcast programs of Vancouver satellite CBUNT Trail, B. C.

CHYC Niagara Falls, Ont., recommended to form a network with WKMH Dearborn, Mich., to carry regular games of the Detroit Tigers baseball team from April 9 to Sept. 30. A change was recommended in BBG regulations to permit AM stations to broadcast programs in another language than English for up to 20% of total broadcast time. This is an increase of 5% in this allowance.

CCKV Ottawa has been authorized to increase power from 5 kw day and 1
DATELINE: network TV in Ireland by Michael O'Reilly

One year and 700 sponsors later, Telefis Eireann claims success

The Irish national television network has recently celebrated its first birthday. From a stormy beginning, including the resignation of several top executives, the new system, Telefis Eireann, has established itself as one of the most modern and competent in Europe.

While the ancient BBC and British commercial television continue to transmit a 405-line picture, the infant in Ireland uses 625 lines in rural areas and works on both simultaneously in places where many old receivers are in operation. Ex-NBC man Edward J. Roth was the first director-general, a place now filled by an Irishman, Kevin McCourt. Mr. Roth is with commercial television in Britain.

Although shows in Ireland cannot be sponsored by commercial firms, there are plenty of advertising breaks and heavy advertising between shows. Being a government-controlled service, the network also collects the $12 annual license fee.

The advertising agencies get a 15% commission from the TV Authority and the table of rates makes interesting reading:

<table>
<thead>
<tr>
<th>Time</th>
<th>15 Sec</th>
<th>30 Sec</th>
<th>45 Sec</th>
<th>60 Sec</th>
</tr>
</thead>
<tbody>
<tr>
<td>A 7:30-10:30 p.m.</td>
<td>$120</td>
<td>$180</td>
<td>$260</td>
<td>$330</td>
</tr>
<tr>
<td>B 5:55-7:30 p.m.</td>
<td>$80</td>
<td>$130</td>
<td>$180</td>
<td>$230</td>
</tr>
<tr>
<td>C Before 5:55 p.m. after 10:35 p.m.</td>
<td>55</td>
<td>85</td>
<td>120</td>
<td>150</td>
</tr>
</tbody>
</table>

A slide with station announcer’s voice costs $30 for five seconds; second-second films $45.

It costs 10% more to have an advertisement in a fixed position within a chosen break in a particular show.

An order for $45,000 worth of TV advertising gets a volume discount of 2½%; $150,000, 5%; $300,000, 10%. All discounts are allowed on the total gross expenditure over a 52-week period, provided it is arranged in advance with the station. An unusual feature is the special discount of 25% which applies to Irish-language advertisements. In spite of this advertising in the native Irish language does not make up more than 1% of the total advertising time.

The population of the Republic of Ireland is slightly less than 3 million and the present estimated number of TV sets, is 160,000 with a great sales boom at present as the service completes the national coverage.

A strict code for advertisers is laid down by the Irish TV Authority. Eight cardinal points include:

1. No advertisement which encourages children to enter strange places or to converse with strangers.
2. No advertisement which suggests that children who do not own a certain product are inferior in any way to children who do.
3. Unacceptable products and services include: money-lenders, matrimonial agencies, correspondence clubs, fortune tellers, undertakers, betting in sports or unlicensed employment bureaus, products for bust development, contraceptives, smoking cures, products for treatment of alcoholism, contact or corneal lenses.
4. In the advertisement of medicines, statements are not allowed that give the impression of professional medical advice.
5. Mail order advertisements are accepted only if the advertiser has sufficient stocks on hand and gives assurance that goods may be returned and money refunded if not satisfied.
6. No advertisement should be calculated to induce fear on the part of the viewer that he is suffering from any ailment.
7. No advertisement of products or medicines should contain any expressions like "female pills"; "never known to fail"; etc.
8. No advertisement can claim that the product will promote sexual virility or offer a cure for loss of virility. No advertisements relating to sexual intercourse or sexual diseases are allowed.

Many more "don'ts" are listed and some advertisements shown on British TV have been rejected by the Irish system. Several TV film studios have set up in Dublin to provide locally made advertising films. A preferential advertising rate reduction, maybe $15 off the rates shown for a 60-second commercial is allowed if the product or service advertised is wholly Irish.

Modern Ireland in the few short years since it gained its freedom from the British has made remarkable progress. A productivity increase of almost 5% per annum in recent years has raised the standard of living. In the past few years, Irish exports to Britain and the U. S. A. were able to balance the value of imports. The average weekly wage for a skilled man is $40 but in Ireland one can live in reasonable comfort on that amount.

Television illustrates the progress in Ireland. Five transmitting stations, in Dublin, Cork, Galway, Sligo and Killkenny, make up the network and give national coverage. The central studio at Montrose, Dublin, is one of Europe's kw night to 50 kw day and night on 1310 kc, to provide improved service for listeners.

CJBN North Battleford, Sask., is recommended for a change in frequency from 1460 kc to 1050 kc with 10 kw.

BBG asks for review of Broadcasting Act

A thorough review by the Canadian government of broadcasting policy and the Canada Broadcasting Act has been

requested by the government-appointed Board of Broadcast Governors. In a note to the office of the Canadian prime minister, BBG chairman, Dr. Andrew Stewart, has asked that broadcasting policy be more clearly defined so that the BBG can properly administer the legislation and government policy.

He said that the 1958 Canada Broadcasting Act brought difficulties of interpretation. Dr. Stewart mentioned specific problems of the definition of broadcasting and the growth of cable systems, political broadcasting, licensing of new Canadian Broadcasting Corporation television stations, affiliations of stations to the government-owned CBC, and conflicts between the CBC and independent television networks.

He reported receiving complaints about alleged irregularities concerning political broadcasting during the recent federal election campaign, and felt that the clause in the Broadcasting Act prohibiting political broadcasting 48 hours preceding an election was badly draft-
most modern. The unique self-supporting marble staircase bids visitors welcome to this home of the latest technical equipment. It is worth mentioning that the BBC asked for (and received) the loan of Irish Television's converter for the first Telstar broadcast in order to convert from U. S. to European standards.

In Dublin, all programs are originated and transmitted on the new 625-line standard while, simultaneously, another feed is converted to 405 and routed to the 405-line transmitter. Viewers can receive perfect pictures with either type of television set.

The Irish Television Service operates its own Programme Guide, published weekly, and the advertisement rates for this are $4 per single column inch. A hundred TV homes have been selected to report on their viewing habits; favorite programs; and a Recordimeter has been attached to each set to measure the time the set is on.

In the past year, over 30,000 commercials for more than 700 advertisers were shown on Irish TV and many sales success stories have been reported. Drama, variety, sport, all play a big part in the day's programs and local productions always draw a big viewing public. American shows like Checkmate, Have Gun-Will Travel, Boris Karloff's Thriller, all have their regular Irish viewers. Here is a comparison of American and Irish program tastes for a three-month period. From a total of 652 hours of programs:

- Home produced: news, 67 hours; public affairs, 62 hrs.; sports, 37 hrs.; light entertainment, 36 hrs.; children's shows, 34 hrs.; women's shows, 11 hrs.; drama, 6 hrs.
- Imported programs: (mostly American and British): detective and adventure series, 89 hours; comedy and cartoons, 58 hrs.; children's features, 34 hrs.; dramas, 22 hrs.; westerns, 20 hrs.; documentaries, 17 hrs.; public affairs special, 16 hrs.; medical dramas, 12 hrs.; sports, 12 hrs.; variety, 6 hrs.

The remainder of the time under review was taken up with station announcements, road safety, religious broadcasts, etc.

Americans, remembering the famous Abbey Theatre and Joyce, O'Casey and many others, will no doubt wonder at the six hours of home-produced drama in three months. This has been one of the great disappointments of the new TV service to date, but a shortage of funds is the principal reason. An analysis of the advertisements that appear on Irish TV follows:

Food and drink 32%, household stores and services 12%, tobacco and cigarettes 9%, cosmetics 9%, house-

Sports programing has universal appeal and in Ireland its the national pasttime of hurling that provides the best action for the TV cameras.

At the moment of writing, journalists and newscasters have been on strike for several weeks and there are no news programs on Irish TV. The trade union is demanding that TV journalists be paid the same as British TV journalists, more than $100 a week, while TV chiefs say they should only get the same as Dublin journalists, about $60 a week.

Unlike television, radio in Ireland (there is only one station—also govern-

ed. He also felt there should be a parliamentary policy on granting CBC their own TV stations in cities where they now have affiliates.

Abroad in brief...

Small growth - In Switzerland, there were 283,006 television sets in operation on Feb. 1, this year, representing a gain of only 9,112 units over the Jan. 1 figure. Disappointing slow TV growth in Switzerland is laid by observers mostly to programing of the (non-commercial) national TV network. Other reasons offered are serious financial problems of existing stations which claim that there is still not enough money for high-quality programs. Finally, lagging construction of additional small transmitters (boosters and relays) is cited as influencing the slow television growth rate.

Australia adds two - New commercial TV stations were granted for Sydney and Melbourne, according to the Australian News and Information Bureau. United Telecasters Sydney Ltd. was granted the Sydney license and Austarama Television Pty. Ltd. received the license in Melbourne. The new stations make a total of three commercial TV stations in each city in addition to the national, non-commercial television network.

3d TV channel - Moscow will get its third TV station in 1963, Tass, the
Soviet news agency, reported last week. The Soviet Union has 123 TV stations and nearly 250 relay stations serving an area with more than 90 million persons. The 3rd channel is now being operated experimentally several hours each day.

Huge TV profit drop if British tax goes through

If the British government enforces its new tax proposals for commercial television, gross profits of the industry would slump drastically from an estimated $61.6 million for 1962-63 to about $17.5 million. After ITA charges and ordinary taxes, only $8.1 million would be available to shareholders, of which $5.3 million would be for the four largest companies.

This claim is made in a memorandum submitted to members of Parliament on behalf of the four major companies: Associated Rediffusion, Associated Television, BBC Television and Granada TV Network.

Main point of issue between the companies and the authorities is the proposed new Clause 7 of the Television Bill, now in the hands of a select committee of the House of Commons. The effect of the new clause is to substitute a tax on turnover for a tax on profits. Though the memorandum does not specify the impact on particular companies, most of the decline would fall on ABC-TV and ATV. The memorandum also implies that adoption of the new tax might involve big dividend cuts made by the majors.

In 1961-62, for example, ATV earned $6.7 million after tax and distributed $4.7 million to shareholders—almost as much as the combined net earnings of the big four companies, if the new tax were introduced.

British commercial television companies claim that for the first three months of this year 57% of the national viewing time was devoted to their programs against 43% to BBC-TV.

These figures are given in a report drawn up by Television Audience Measurement Ltd., which bases its findings on the number of hours sets are turned on.

FATES & FORTUNES

BROADCAST ADVERTISING

Georg Olden, former senior art director at BBDO, New York, joins McCann-Erickson, that city, as vice president and senior art director. Mr. Olden has also served as director of graphic arts for CBS-TV.

Joan Chamberlain, VP and copy group head at Lennen & Newell, New York, joins Dancer-Fitzgerald-Sample, that city, as VP and copy supervisor.

Robert C. Blumer, copy chief at Fuller & Smith & Ross, elected VP of Cleveland office.

David Nutt, account executive at Ketchum, MacLeod & Grove, New York, named account supervisor. Agency also added three new account executives: William Green, formerly with Young & Rubicam; Henry W. Taylor Jr., from G. M. Basford; and Donald H. Cady, from Fletcher Richards, Calkins & Holden. Marvin Raeburn, previously with Young & Rubicam as copy writer, joins agency in similar capacity. Edward Hauser and Eugene Walter also join agency as writers in TV-radio department.

Stephen P. Bell, account supervisor in New York office of Needham, Louis & Brorby, joins Advertising Federation of America (AFA), New York, as VP in charge of member services.

Thomas Viscardi, director of sales development for WADO New York, appointed to newly created position of media manager of General Cigar Co., that city, effective April 29. He will work closely with General Cigar's advertising agency, Young & Rubicam, in analyzing media buys and in merchandising General Cigar advertising. Prior to joining WADO 18 months ago, Mr. Viscardi was with Young & Rubicam for five years.

John Lorick, account supervisor at Sullivan, Stauffer, Colwell & Bayles, New York, elected vice president.

Art Keeney, co-owner and general manager of Six Twenty Nine Productions, producers of taped radio programs and commercials, elected VP of Ovitt & Cunningham, Pensacola, Fla., advertising agency.

Kenneth C. Podalsky, with BBDO, Chicago, since 1952, joins Earle Ludgin & Co., that city, as account executive.

Donald H. Price, account executive with BBDO, joins McCann-Erickson, San Francisco, in similar capacity.

Samuel L. Rosenfeld, assistant to marketing director and brand manager at Helena Rubinstein since 1960, joins Lehn & Fink Products Corp., New York, as new products coordinator. His responsibilities will primarily be on introduction of new cosmetic products for Dorothy Gray and Tussy divisions. Prior to joining Helena Rubinstein, Mr. Rosenfeld was assistant to merchandising VP at Revlon.

Stan Holmes, member of Eastman Kodak Co.'s editorial service. Bureau
since 1956, appointed account representative in public relations division of The Rumrill Co., Rochester, N. Y.

Elaine Whalen, former chief time-buyer at Mogul, Williams & Saylor, joins Altman, Stoller, Chalk Adv., New York, as director of broadcast media.

John W. Herdegen, VP of Geyer, Morey, Ballard, New York, appointed director of creative services for western division offices. He will move his new headquarters in Chicago. Prior to joining GMB, Mr. Herdegen served as VP and copy group supervisor at Lennen & Newell.

Ted Nelson, former American correspondent for TV International, London, joins Diener & Dorskind, New York, as director of radio-TV department. Mr. Nelson has served as radio-TV consultant to advertising agencies and stations during past 15 years.

Daniel C. Park, onetime general sales manager of WABK Indianapolis and president of Indiana Broadcasters Association, named media director of Results Inc., Tucson advertising and pr firm.

Ron Brown, formerly with Warner-Lambert Inc., New York, joins Street & Finney, that city, as executive on Colgate-Palmolive account.

Mort Yanow, director of radio-TV for Bayuk Cigars Inc., Philadelphia, for past four years, appointed director of advertising, succeeding Magnus Hendell, recently named director of marketing. Prior to joining Bayuk in 1959, Mr. Yanow spent 6 years in advertising agency and broadcasting fields.

George Kern, former media coordinator at Revlon Inc., New York, joins Fletcher Richards, Calkins & Holden, that city, as associate media director.

Tully Plesser, VP and director of research at Fuller & Smith & Ross, New York, named VP and director of marketing services. Mr. Plesser, also member of agency’s plans board, will be responsible for coordination of marketing and research functions. He joined FSR in 1960 as director of research and was elected VP year ago.

Edward Gori and Donald L. Lauve join copy department of N. W. Ayer & Son, Philadelphia. Mr. Gori formerly served with Jules Rabin Associates. Mr. Lauve moves to Ayer from media department of Wernem & Shorr.

Jean Simpson, VP-copv group head at J. Walter Thompson Co., Chicago, named "advertising woman of year" in annual ballooting of Women's Advertising Club of Chicago. Mrs. Simpson has been with JWT since 1956. She previously was with Leo Burnett and Knox Reeves.

Tom Pringle joins copy staff of Guild, Bascom & Bonfigli, San Francisco. He was formerly with Dancer-Fitzgerald-Sample and Young & Rubicam.

George Svestske, formerly with Post, Keyes & Gardner, and M. G. Schultz, previously advertising manager of Chicago Show Printing Co., join George H. Hartman Co., Chicago, as art director and production assistant, respective-ly. Marianne Morgan, with Shaw, Hague Inc., and Anne Keleher, J. Walter Thompson, join Hartman as assistant space buyer and broadcast estimator. Gay Gelb and Joanne Corwin join agency's broadcast department as assistant supervisor and traffic manager.

G. Lloyd Bunting, president of Noxzema Chemical Co., Baltimore, elected board chairman, replacing Raymond F. Sullivan, founder, board chairman and chairman of executive committee of Sullivan, Stauffer, Colwell & Bayles, New York. Mr. Sullivan will remain as board member. Mr. Bunting will continue as chief executive officer. Norbert A. Witt, executive vice president, elected president, succeeding Mr. Bunting.

Harry W. Daniels joins MacManus, John & Adams, New York, as director of research, replacing Wallace Lepkin, who joins Foote, Cone & Belding there.

THE MEDIA

Tom Johnson, manager of KTOK Oklahoma City for past 10 years, retires from active management of station to become consultant to Wendell Mayes Stations: KTOK and KOWN Austin, KBWD Brownwood, KXXL-AM-FM Fort Worth, KCKS Midland, KSIN Snyder, and WACO-
Stewart resigns Telecommunications post

Dr. Irvin Stewart, director of Telecommunications Planning at the White House, resigns as of April 30 to return to his teaching post at the University of West Virginia. President Kennedy announced Dr. Stewart's resignation April 12.

One of the original FCC commissioners, Dr. Stewart was appointed by President Kennedy to the telecommunications post in February 1962 and confirmed in March of that year.

Dr. Stewart said he plans to do research at the Brookings Institution in Washington and some traveling before returning to Morgantown for the fall semester. He is professor of American government at the university. He served as president of the West Virginia institution from 1946 until 1958.

After serving on the FCC from 1934 to 1937, Dr. Stewart was director of the Commission on Scientific Research. In 1950-51, he was chairman of President Truman's Communications Policy Board; in 1958 he was a member of the Special Advisory Committee on Telecommunications.

AM-FM Waco, all Texas. George Collisson, KTOK commercial manager, named acting general manager.

William E. Nichols, former manager of Finnaus Inc., makers of bath heating equipment, joins KPAT-AM-FM San Francisco as sales manager. Mr. Nichols previously served in managerial posts at KXA-AM-FM and KBFC-AM-FM, both San Francisco, and KROY Sacramento.

Paul Hughes, group media buyer for Henry Cabot Co., Boston, joins WPRO-TV Providence as account executive.

Bruce Buchholzer joins WCUE-AM-FM Akron, Ohio, as account executive.

Joni Ruby, account executive at Venard, Torbet & McConnell, joins The Katz Agency, Chicago, on radio staff.

Elmer F. Smith, resident manager of WNAX Yankton, S. D., elected resident VP of Peoples Broadcasting Corp. and WNAX general manager. Mr. Smith joined station in 1957 and has served as resident manager since 1959. Peoples Broadcasting Stations are WNAX; WRFD-AM-FM Columbus - Worthington, Ohio; WMMN Fairmont, W. Va.; WGAR-AM-FM Cleveland; KVTV (TV) Sioux City, Iowa; and WTTM-AM-FM Trenton, N. J. (sold to Scott Broadcasting Co., pending FCC approval).

Gust J. Theodore, with Adam Young Inc., Chicago, joins BTA Division of Blair Television, that city, as account executive. Robert F. Carney Jr., formerly with Compton Adv., New York, and Richard C. Coveny, recent graduate of University of California at Berkeley, join Blair Television's sales service department. Richard Coveny is son of Charleton E. Coveny, who had been with John Blair & Co. for last 26 years and was in charge of Blair Radio's Los Angeles office until his retirement last month.

Dan Shannon, operations manager of KING-FM Seattle, re-elected president of Greater Seattle FM Broadcasters Association. Mr. Shannon was first elected president when association was organized last year.

Earle H. Rast Jr., sales manager of KOGO-TV San Diego, Calif., named station manager of KBZU-AM-FM Mesa, Ariz., succeeding Raymond D. Bluestein. Prior to joining KOGO-TV, Mr. Rast was commercial manager and program director of KANG-TV Waco, Tex.

Frank P. Fogarty, executive VP of Meredith Broadcasting Co. (KCMO-AM-FM-TV Kansas City, KPHO-AM-TV Phoenix, WOWM-AM-FM Omaha, and WHEN-AM-TV Syracuse, N. Y.), re-elected to board of directors of Chamber of Commerce of the United States.

Gene Redburn, air personality at WMYR Fort Myers, Fla., to program director of WCCP Punta Gorda, Fla.

Richard G. Cruise, account executive at Edward Petry & Co., Los Angeles, joins ABC Television Spot Sales, that city, in similar capacity. Mr. Cruise served with KHJ-TV Los Angeles and CBS Radio Sales in New York and Detroit prior to joining Petry organization.

Alvin Jeweler, former chief audio engineer for Koster Film Facilities, Washington, named program director of WHFS (FM) Bethesda, Md.

Clete Roberts, veteran Los Angeles newscaster, has joined RKO General as correspondent - at - large for all its TV and radio stations, to which he will contribute special news reports from all parts of world. His new assignment begins today (April 22) in Washington, where he is covering State Department's national foreign policy conference. On May 1 he will give a comprehensive report in half-hour TV news special, filmed, edited and narrated by Mr. Roberts and including appearances by President Kennedy and Secretary of State Dean Rusk. This will be first of weekly series, Clete Roberts' World Reports. Mr. Roberts last month resigned as top newsmen of KTLA (TV) Los Angeles, post he had
held for several years. In his new post at RKO General, he will serve as roving correspondent for WOR-AM-FM-TV New York, WNAC-AM-TV and WRKO (FM) Boston; KHJ-AM-FM-TV Los Angeles; KFRC-AM-FM San Francisco; WHBQ-AM-TV Memphis, and WGMS-AM-FM Washington.

Robert P. Rimes, publicity manager of WWJ-AM-FM-TV Detroit, appointed public relations manager of KDKA-AM-FM Pittsburgh, effective today (April 22), succeeding Owen Simon, recently named advertising and sales promotion manager. Before joining WWJ in 1957, Mr. Rimes was assistant director of promotion and research at WKAR-TV (now WMSB [TV]) Onondaga, Mich.

Graham Wallace, director of research at KPIX (TV) San Francisco, named research director of KGO-TV, that city. Before moving to San Francisco a year ago, Mr. Wallace was with Bureau of Broadcast Measurement in Toronto.

Theodore M. Wrobel, former assistant sales manager of WBZ-TV Boston, joins Metro TV Sales, Philadelphia, as manager. Mr. Wrobel will service Philadelphia, Baltimore and Washington, D.C., agencies. He has also held posts at Weed Television and WTTG (TV) Washington.

Charles W. Maxwell, formerly operations manager of KBAA Kansas City, appointed program director of KBIG Avalon (Catalina), Calif. He succeeds Robert Gage, who resigned to devote himself to his Avalon business interests. Mr. Maxwell will have his offices in Hollywood instead of at Avalon, where station's program operations have been located for past year. He will be immediately active in new format which Kevin Sweeney, 40% owner of KBIG, is instituting later this month.

Brenda Fischer, former reservations manager for Dunes Hotel of Las Vegas in Beverly Hills, joins promotion department of KGO-TV San Francisco.

Bob Gilbert appointed producer-director of public service programs for WTVT (TV) Tampa, Fla.

GOVERNMENT

William F. Jibb, head of his own public relations firm in Florida, joins Federal Trade Commission in Washington as director of information, replacing Seymour F. (Sam) Stowe, who retired recently on medical disability.

EQUIPMENT & ENGINEERING

Joseph J. Kontuly, market sales promotion manager for Minneapolis - Honeywell, Philadelphia, appointed assistant advertising and sales promotion manager for Jerrold Electronics Corp., that city. Daniel Aaron resigns as manager of Jerrold Electronics' CATV operations division to join Philadelphia-based business brokerage and management consulting firm to be known as Garfield, Musser and Aaron Inc. The firm, formed six months ago, specializes in CATV systems industry.

John R. North, northeastern regional manager for Ampex Corp., named to new post of computer products sales manager, with headquarters at Ampex Computer Products Co., Culver City, Calif. George S. Shoaf, Ampex midwestern regional manager, succeeds Mr. North as northeastern manager and is himself succeeded by Thomas W. Harleman, who has been district sales manager in Dayton, Ohio.

Raymond P. Rivoli, sales promotion representative for private brand renewal sales of Sylvania Electric Products, Seneca Falls, N.Y., appointed manager of private brand renewal sales for electronic tube division.

Curtis W. Symonds, controller for Sylvania Electric Products' semiconduc-
Robert W. Sarnoff, board chairman of NBC, last Monday accepted a citation from the National Council of Catholic Men in Washington for NBC's 33 years of creative leadership and cooperation in religious broadcasting. The Most Rev. Patrick A. O'Boyle (right), archbishop of Washington and chairman of the National Catholic Welfare Conference, noted the association of the council and NBC date back to the first radio presentation of The Catholic Hour in 1930. Occasion for the presentation was the world premiere of NBC-TV's four-part series, I Am With You, a religious-historical documentary on the history of the Catholic Church and its 21 Ecumenical Councils. The series will be shown on the four Sundays of May, 1:30-2 p.m., EDT.

PROGRAMING

Charles F. Simonelli, former general VP of Entertainment Corp. of America, named corporate VP of Technicolor Inc., in charge of Technicolor activities in New York, where he will make his headquarters.

Robert J. Enders, producer of TV series Best of the Post and more recently of theatrical motion picture "A Thunder of Drums," signed by Warner Brothers Television as producer to develop several new projects for 1963-64 season. One project assigned to Mr. Enders is to develop series, The Adventures of Phileas Fogg, based on stories by James Warner Bellah.

Jack Laird, associate producer of Ben Casey for past two seasons, named producer of Channing, Revue's new college series for ABC-TV. Mr. Laird will take over assignment June 1, when Stanley Rubin leaves on prearranged six-month European vacation.

Jerry C. Karpf, former TV commercial producer at Norman, Craig & Kimmel, New York, joins Videotape Productions, that city, as account executive.

Barry Shear obtains release from six-year contract with NBC-TV running through 1956, as of May 8, to devote himself to his own firm, Briwen Production Co. Agenda calls for three TV series: The Five Fingers of Jazz, Anatomy of Hate (two-hour clinical studies of such groups as Ku Klux Klan, American Nazi party and Muslims) and Like La Ronde, musical variety series. Briwen's plans also include theatrical pictures and stage productions.

John Kalas, formerly with Stanford Kohlberg Drive-In theatres, joins advertising staff of Filmack Studios, Chicago.

Robert M. Walters, formerly on United Press International staff, Harrisburg, Pa., named manager of UPI's Cincinnati bureau.

Arthur Gross, recently resigned as program director of WABC-TV New York (Week's Headliners, March 25), appointed to newly created post of sales director for United Artists Associated's western and southwestern divisions, with headquarters in Los Angeles. Mr. Gross' appointment is in line with UAA's policy of closer supervision of its territorial divisions and stronger emphasis on programming needs of stations. He had been WABC-TV program director since April 1962.

Julio Di Benedetto, producer-director of Candid Camera, appointed by Bob Banner Associates as producer of Jimmy Dean variety series which starts on ABC-TV next fall.

Michael J. Marlow, director and executive producer of Norwood Television, Washington, named production manager for special TV productions for Washington area general campaign of National Cultural Center.

Lou Bunin, puppeteer and creator of film effects, named special effects director and producer at ATU Productions, New York, maker of TV commercials and feature films.

James McAdams, for past three years associated with Revue Studios' story department, appointed assistant to Frank P. Rosenberg, executive producer of Revue's new 90-minute series for ABC-TV, Arrest And Trial.

Ralph Bellamy, veteran actor of Broadway, motion pictures and TV, signed to star in MGM-TV's The Eleventh Hour series in its second season on NBC-TV beginning next fall. Mr. Bellamy will introduce new character, Dr. Simon Berke, psychiatrist, with Jack Ging continuing in his present starring role of clinical psychologist.

Michael Burns, 14-year-old actor featured in late It's a Man's World series, signed as permanent star of Wagon Train. Like It's a Man's World, Wagon Train is produced at Revue Studios, with Howard Christie as executive producer.

Carl Fick, former president of Carl Fick Productions, New York, joins Gerald Productions, that city, as director of scenario department.

Joe Manduke, freelance producer-director, joins New York staff of Fred Niles Communication Centers Inc.

Marilyn Granas, former casting director for MPO-TV, joins Jack Wormser Agency, Hollywood talent representative, as an associate. She will be head of "on camera" department, specializing chiefly in commercials.

Arnost Horlik, formerly associated with law firm of Gang, Tyre, Rudin & Brown, joins legal staff of Screen Gems, Hollywood, and becomes staff member of Arthur Frankel, resident counsel.

INTERNATIONAL

J. Ray Peters, general manager and managing director of CHAN-TV Vancouver, B. C., elected president of Vanel Broadcasting Co. Ltd., owner of station. Before joining CHAN-TV in 1960, Mr. Peters was commercial manager of CHCH-TV Hamilton, Ont., and prior to that with CJOR Vancouver.

Edgar H. Griffiths, treasurer of RCA Service Co., named to newly created post of division VP, international finance, international division.
Carl R. Fallettan, former advertising manager for Latin American and Pacific operations of Quaker Oats Co., joins Borden Foods Co., New York, as international advertising manager.

John Chancellor named head of new NBC News bureau in Brussels to cover activities of European Common Market Bureau, which will open July 1, according to announcement made last week by William R. McAndrew, executive VP of NBC News. Mr. Chancellor joined NBC news division in 1950 as midwestern correspondent and has since served in Vienna, London and Moscow bureaus. He was Moscow bureau chief before one-year assignment in U.S. as host of Today show. Most recently, Mr. Chancellor has been general assignment correspondent, working out of New York.

John C. Hierlihy, former sales coordinator for United Artists Television, New York, joins Four Star Television International, that city, as sales manager. Robin C. Armstrong, former member of executive sales staff of All-Canada Radio and Television Ltd., joins Four Star Television of Canada, Toronto, as general sales manager.

DEATHS

Walter C. Johnson, 59, VP and general manager of Travelers Broadcasting Service Corp. (WTTC-AM-FM), Hartford, Conn., died April 16 at Hartford Hospital of cerebral hemorrhage. Mr. Johnson joined WTTC's parent firm, Travelers Insurance Co., in 1922 as chief clerk and was transferred in 1925 to WTTC as station's first announcer. He was named sales manager in 1939 and assistant general manager in 1942. Mr. Johnson was elected secretary in 1953, director in 1955, and VP and general manager in 1957.

Robert D. Houck, 52, owner of KTNM, Tucumcari, N. M., died April 9.

Frank Austin Heywood Jr., 39, manager of advertising, promotion and publicity for KTLA (TV) Los Angeles, died April 12 of diabetes. Before joining KTLA last year, Mr. Heywood had been with KNXT (TV) Los Angeles for eight years, last four as head of station's promotion-publicity department. He started his advertising career with Sylvania Electric Co. in New York in 1945. Moving to Los Angeles, he was associated with number of organizations, including Rexall Drug and Los Angeles Area Community Chest, before entering TV in 1954.

Howard Snyder, 33, comedy writer for Jack Benny for 30 years, died April 13 in automobile accident in West Hollywood, Calif. Mr. Snyder also wrote radio material for Jack Oakie, Edgar Bergen, and Fibber McGee and Molly, and worked on Bob Newhart TV show. At time of his death he was writing for TV series, My Three Sons.

The "three band system" makes it much easier to tune in adjacent shortwave stations on the Mitsubishi Electric 9X-900S. The "band spread" of the smartlooking 9X-900S is twice that of ordinary models since shortwave frequencies have been divided into upper and lower bands (Band 1: 1.4 MC-9 MC, Band 2: 9 MC-18.5 MC) so that "clustered" stations are much further apart on the dial. The fine-tuning adjustment, 9-transistor circuit and "three band system of the 9X-900S make its receptivity something spectacular. Ask your nearest dealer for a demonstration.
It was ‘smile time’ at the Polo Grounds

WABC HOLDS FINAL JUDGING OF MONA LISA CONTEST

When Leonardo da Vinci painted the “Mona Lisa” back in the 15th century, there probably weren’t more than 31 assorted Indians living on and around Manhatenn Island, and it’s a safe bet that none of them cared a good war whoop about the painting, either.

But about 500 years later, there were 31,630 persons on and around the same island who cared enough about the mystical lady to try their hand at reproducing the Renaissance classic.

It all came about as response to a promotion by WABC-AM-FM New York to publicize the appearance of the Mona Lisa at New York’s Metropolitan Museum of Art.

The station asked its listeners to submit their versions of the painting, and offered nominal cash prizes for the largest, smallest, most artistic, and most humorous reproductions. The biggest entries were so big that the Polo Grounds had to be used for their display, (see picture above) the smallest were so small a 1,000-power microscope had to be employed, and the best were so good that a midtown department store displayed some of them for a month. Salvatore Dali was called in to judge the winners in each division.

Customized hints for amateur photographers

Radio stations desiring to inform listeners of picture-making opportunities at local events, can get custom-tailored scripts on the subject.

Frank R. Knight, P.O. Box 38, Onchiota, N. Y., wrote a few one-minute and three-minute scripts for WNBZ Saranac Lake, N. Y., during that city’s winter carnival. The non-commercial scripts were designed to aid the thousands of amateur photographers who were missing their cameras during the daytime events and not using their cameras at night, because they didn’t know how.

Mr. Rogers, who has written books, articles and columns on amateur picture making for Eastman Kodak Co., is now offering this “how-to” service free.

To receive localized scripts, tailored to local stations’ needs, a listing and description of impending events representing popular picture-making opportunities should be sent to Mr. Rogers.

Bird’s eye view of market for agencymen

Providence, R.I., agency account executives last week got a birds-eye view of their market as part of a two-day open house sponsored by WTEV (TV) New Bedford, Mass.

The station, which went on the air Jan. 1, played host to about 75 agency men and also personnel of H-R Televisi

Coca-Cola plans bigger ‘Sweepstakes’ promotion

The Coca-Cola Co. is following its successful “Tour the World Sweepstakes” of last summer with a “Go America Sweepstakes” this year. Last year’s promotion drew over 9 million entries and more are expected this summer as the contest and its advertising and promotion support have been expanded.

Value of prizes in this year’s competition is $250,000, with 55 prizes set as a special incentive for Coca-Cola dealers.

Local and national television spots will support the promotion as well as advertising in other media.

This year, contestants will enter with a special removable liner in Coke bottle tops. Last year, the mailing of actual bottle caps caused difficulties with cancelling equipment of the Post Office Department.

60 TV columnists interview NBC stars

NBC-TV is giving some 60 television editors from newspapers around the country a chance for face-to-face interviews with some of the network’s top stars.

Starting last week, the network is playing host to the writers in weekly sessions in New York for four weeks. A group of 15-18 writers will be received each week, and interviews with network performers, producers and executives, as well as personalities from NBC-TV’s new shows will be arranged.

By breaking the editors into smaller groups instead of the mass interviews held in previous ventures, NBC hopes to give each editor an exclusive story, with more than 1,000 interviews resulting.

The groups are received at Sunday night cocktail parties where Johnny Carson of the Tonight show is host. Mondays, Tuesdays and Wednesdays are occupied with interviews, each editor having 15 interviews.

The second half of the week, the same NBC personalities will be interviewed by the New York syndicate and wire service press. The operation was developed by two NBC-TV vice presidents, Sydney H. Eiges and Ellis O. Moore. Some 75% of the 80 invited editors accepted.

Drumbeats . . .

Three weeks’ mail = WBBM-TV Chicago received 31,000 requests in three weeks for a game and puzzle book offered on its morning children’s program, Breakfast House. John Coughlin, the show’s host, had offered to mail the book to viewers sending their names and addresses to the station.

Major Gray = Barry Gray, host of the Barry Gray Show on WMCA New York, is originating his shows from Washington in the last two weeks in April during which time he is interviewing prominent Washington officials. The long-distance broadcast is to accommodate the active Pentagon duty of Mr. Gray, who is a U. S. Army reserve major.

Auto ad standards = The National Automobile Dealers Association has published a guide for all advertising media, “Recommended Standards of Practice for Selling and Advertising Automobiles.” It is part of the group’s cam-
WFAA blinks news warning to motorists

WFAA Dallas now signals motorists when it is broadcasting news. Billboards flash the station's frequency from quotation marks. Since the station broadcasts on two different frequencies (alternating with WFAF Fort Worth), one quotation mark flashes "570" (see picture) and the other flashes "820," indicating the frequency WFAA is on at the time.

OUR RESPECTS to Hathaway Watson

He started at the top of the broadcast ladder

Hathaway Watson might be considered an anomaly in the broadcasting field. He didn’t “work his way up the ladder,” as many have in this comparatively young industry. He started virtually at the top rung four short years ago. Today, he is president of RKO General Broadcasting.

It would be inaccurate to deduce, however, that Mr. Watson is a “whiz kid” (he is 46). His status and progress at RKO General are indications, perhaps, that broadcasting is maturing and realizes, as have the old-line businesses, that an “outsider” of broad experience can make important contributions to an enterprise.

While his contemporaries were acquiring background in radio-tv sales, programing and operations, Mr. Watson was accumulating and sharpening administrative skills, initially with the U. S. government and later with the management consultant firm of Booz, Allen & Hamilton. His primary objective when he joined RKO General as vice president in charge of broadcast operations in 1959 was to improve the efficiency of the complement of stations owned by the company and, consequently, to increase their profitability.

Overall Responsibility — Obviously, Mr. Watson has accomplished his mission. Last December when RKO General Broadcasting was established as a newly created subsidiary of RKO General Inc., he was elected president. In this capacity, he has overall responsibility for the Washington operation, the Eastern Broadcasting Corporation, San Francisco and New York; WNAC-AM-TV and WRKO (FM) Boston and the Yankee Network; CKLW-AM-TV Windsor-Detroit; WHBQ-AM-TV Memphis; KFRC-AM-FM San Francisco; WGMS-AM-FM Washington; the RKO General National Sales Division (station representation) and the Eastern Broadcasting Corp., Boston, a background music firm.

Mr. Watson is a tall, well-built man who exudes an air of quiet assurance. He is an even-tempered, low-keyed individual but, associates point out, he can be firm and outspoken when the occasion demands (“he has opinions but is not opinionated,” one close co-worker observed).

Mr. Watson’s management skill is said to be pre-eminent in two areas particularly—personnel relations and profitability. He is praised by his colleagues for his knack in handling people and “getting the most out of them,” whether they be highly-placed executives or lowly clerks. He is highly regarded for his ability to relate sales to expenses and produce a profit.

Though Mr. Watson is too modest to claim all or even a portion of the credit for the financial success of his operation, a recent six-month report on RKO General Inc. shows that for the first half of fiscal 1963, consolidated sales of the broadcast division were up 17% over the 1962 period and net profits after taxes for the 1963 period had increased by 30% over the first six months of the 1962 fiscal year (Broadcasting, April 8). RKO General Broadcasting accounts for approximately 75% of the overall sales of RKO General Inc.

Hathaway Watson was born in Chicago on June 26, 1916, but was educated mostly in the East, initially at St. Mark’s School in Southboro, Mass., and later at Harvard College and the Harvard Business School. His undergraduate degree in 1938 was in economics, his graduate work, in accounting.

World War II in D. C. — Out of the Harvard Business School in 1941, Mr. Watson headed for Washington for an initial five-year tenure in various government posts associated with mobilization and the war effort. He served during 1941-46 with the War Production Board, and Lend-Lease Administration, the State Department and the U. S. Mission to the United Nations.

From 1943-1946, he served under Edward Stettinius, one-time secretary of state. In 1946 Mr. Watson joined Mr. Stettinius in various private international business enterprises.

In 1948 Mr. Watson returned to government service as a member of the staff of the National Security Resources Board and remained there until 1951 when he joined Booz, Allen & Hamilton in Washington. In 1955, he was made a partner of the firm.

In 1957 Booz, Allen & Hamilton was retained by Thomas F. O'Neil, chairman of RKO General, to undertake a study of RKO Pictures. Mr. Watson was selected to conduct the survey which was designed to reduce costs and improve the efficiency of the motion picture company. The project continued into 1958. Mr. O'Neil then asked Mr. Watson to analyze the company’s broadcasting activities.

Mr. Watson recalls today that this introduction to broadcasting whetted his desire to become a part of the communications field. He resigned from Booz, Allen & Hamilton in December 1958 and on March 1, 1959, joined RKO General as vice president in charge of broadcast operations.

Radio-TV Vitality — “I might have gone into older-established, more conservative businesses,” Mr. Watson concedes. “But I decided on broadcasting, I believe, because of its vitality.

“I like the pace, the creativity involved, the variety of situations and problems that arise, the challenge of programming for masses of people.”

Mr. Watson’s role is that of the general policymaker, who sets up broad objectives for each unit under his direction. With some guidance and control from headquarters, he says, the executives of the various stations and organizations belonging to RKO General Broadcasting are given latitude in interpreting policy and objectives.

His associates say that under Mr. Watson’s direction, the caliber of management in the broadcast operation has been improved; a degree of integration has been achieved with exchange of information among stations speeded up, and a deeper awareness between sales and costs has been developed.

“I know that our managers, on both the sales and programing levels, pay closer attention today to the relationship between sales and costs,” Mr. Watson points out. “Even our programing people are sales conscious and think in terms of profitability.”

Mr. Watson was married in 1941 to the former Frances Renshaw Maguire of Pensacola, Fla. They have one son, Hathaway Jr. The Watsons reside in Greenwich, Conn.

Mr. Watson belongs to the Racquet and Tennis Club in New York and the Chevy Chase Country Club in Washington. He taught himself to play five musical instruments but confesses that the piano “is the only one that I’ve stayed with and can still handle.”
Harris: a tribute

A FEW years ago mere mention of Representative Oren Harris (D-Ark.) struck fear in the hearts of broadcasters. As chairman of the House Commerce Committee and its Legislative Oversight Subcommittee in 1958-60 his record of accomplishments covered such screaming headliners as Sherman Adams, Bernard Goldfine, quiz-ripping, payola and the *ex parte* broadcast license cases.

Today Mr. Harris no longer causes broadcasters to cringe. It isn't that he's gone soft. Far from it. He is still the resourceful and tenacious inquisitor. Proof of this may be found in the recently concluded hearing on ratings before his committee. Some of his ideas certainly do not coincide with those of the majority of broadcasters or with our own.

Mr. Harris, by virtue of his closer scrutiny of broadcasters, has found that most of them are not malevolent or instinctive dollar-grabbers. He has emerged as a strong advocate of free enterprise broadcasting. He has taken after the FCC because of its license renewal and letter-writing onslaughts and has manifested interest otherwise to the degree that he is now regarded as the best informed man in Congress on broadcast matters.

This week in New York, Chairman Harris will receive a plaque from Broadcast Pioneers in recognition of his contributions to broadcasting. He is deserving of this tribute for the efficient and effective way in which he has acquainted himself in assuming leadership in communications legislation. It could have been worse if he hadn't been around.

Just a little bit commercial

S INCE it was first conceived, educational television has been a noble goal. Who is to argue against the reservation of facilities to instruct, to challenge, to elevate taste and expand the capacity of understanding?

The nobility of purpose has, however, run up against the practicality of achievement. To build or buy an educational station is as costly as the acquisition of a station for commercial use. Those who work for educational stations must eat, have lodging, marry, produce children, wear clothes and abide in a society that imposes no fewer demands upon them than upon their fellows who work for a commercial system that commands as much as $10,000 in advertising revenue from a single hour of a single station's time. Who is to pick up the tab for educational television? The difficulty of answering that question is now being illustrated at the biggest educational station of them all—WNDT (TV) New York.

No other educational station cost as much in capital outlay and is costing as much in operating expense. WNDT was bought for $6.2 million (the facility had been a commercial outlet, WNTA-TV) a year ago. Its budget had been pegged at nearly $3 million a year, although as an emergency measure the budget for the next fiscal year has been reduced to $2.7 million. Right now the station is in financial trouble. It still owes $1.8 million on its original purchase price, and it is $350,000 behind in its obligations for its fiscal year that ends two months from now.

To a considerable extent WNDT has been made possible by the contributions of owners of commercial television stations in New York. Together these owners have chipped in $1,562,000 toward the purchase and operation of WNDT, and it tarnishes their social consciousness only slightly if at all to point out that the elimination of the seventh station from commercial use enlarged the slices of the advertising pie that would accrue to the surviving stations.

The rest of WNDT's support has come from foundations and public contributions. All told, these sources of income have proved inadequate. A desperate search for other sources is now being made. We must hope it will not lead to ends that we have feared since the FCC first made reservations for educational channels with the stipulation that they refrain from taking advertising revenue.

On educational stations in many parts of the country commercial enterprises are already furnishing programs in exchange for credit lines. The advertising values to be gained from that kind of sponsor identification are questionable. But it is only a short step from a simple credit line to a short commercial in the literal meaning of the word. The evolution could occur almost imperceptibly: from "this program came to you through the courtesy of the Jones bank" to "this program came to you through the courtesy of the friendly Jones bank at First and Elm with drive-in services for your convenience." Add a little production, and it becomes a spot worthy of presentation at regular rates on a commercial station.

The donation of free programs is at least as valuable to an educational station as the donation of money. As the audience of educational stations is enlarged advertisers will inevitably be attracted to the possibilities of providing shows in exchange for commercial credit. We doubt that they will be rebuffed by the hard-pressed educators—despite the prohibition against advertising in the stations' charters.

Moore the merrier

T OM MOORE's elevation to the presidency of ABC-TV obviously means that he has proved to top management that he is the man for the title, as well as for the job. He has had the latter, without the former, as vice president in charge since Oliver Treyz left the presidency 13 months ago.

Tom Moore is both a programing and a sales man, having served ABC-TV as vice president in charge of both of these wheel-horse departments. Under his program vice presidency some of ABC-TV's most successful seasons have been contested. So, too, it must be added, was the current schedule, which by comparison has been disappointing.

The 1963-64 schedule, however, will be the first composed and orchestrated entirely under his direction as the network's operating head. Here the plans encompass innovations, experimentation and an overall air of freshness that have excited advertising agencies as well as the ABC-TV affiliates.

Their congratulations on his imaginative planning may now be extended to include his promotion to the presidency—a formality, perhaps, but clearly earned.
