Guards look bad. Couple of months later Liggett & Myers withdrew as sponsor of show after Anthony (Tough Tony) Anastasia, boss of Brooklyn longshoremen, threatened to let L&M products rot on docks. Anastasia threat was made because Untouchables featured dramatizations of Italian gangstes in Chicago Prohibition era. General boycott of L&M products was threatened by Federation of Italian-American Democratic Organizations of New York whose principal spokesman in Washington was Representative Alfred E. Sartangelo (D-N.Y.) who was defeated for reelection in 1962. For ABC-TV irony in situation is now compounded by Valachi testimony about gangland killing of Albert Anastasia, brother of Tough Tony and, until his murder in New York hotel barbershop, key figure in Cosa Nostra.

Not all's fair
FCC Chairman William Henry finally has agreed with Douglas Anello, general counsel of National Association of Broadcasters, that there are new problems for broadcasters as result of FCC's July 26 statement on fairness doctrine. As climax to two rounds of correspondence (BROADCASTING, Sept. 30, 23) chairman has suggested meeting with NAB representatives to discuss clarification of statement. FCC maintains it merely clarified past policy while NAB contends July document places FCC in hurdle-jumping position.

Washington call
Top lawyers for Broadcast Music Inc. met last week with William H. Orrick Jr., antitrust chief of Department of Justice, in wake of reports that Justice is considering action against BMI (BROADCASTING, Sept. 30). After meeting, nobody would talk. Reports are that Justice is studying complaints by American Society of Composers, Authors and Publishers and by House Antitrust Subcommittee that ASCAP—BMI's principal rival in music licensing—is under tighter antitrust control than BMI.

Representing BMI at last week's meeting were Sydney M. Kaye, BMI board chairman and general counsel; Samuel I. Rosenman of Rosenman, Colin, Kaye, Pechek & Friend, BMI's New York law firm, and John Hooker, young Nashville attorney with his brother, Henry, has been retained by BMI. Hooker brothers were active Kennedy supporters in 1960.

Paramount package
Bullish market for post-1948 feature pictures is illustrated by this development. One major distributor recently offered $30 million for TV rights to library of 200-odd Paramount features, but motion picture company declined to consider proposal. Best bet is that Paramount, sole holdout of post-48 features among major studios, will distribute package itself, probably next year.

Channel jumping
Apparantly stimulated by FCC move to duplicate 13 of remaining 25 I-A clear channels in U.S. is substantial increase in number of stations south of border which have squatted on channels—some causing considerable nighttime interference. Latest government reports reveal that, since 1948, number of stations in Caribbean area on 25 I-A channels has increased from eight to 67 (as of March 1, 1963) in Central America from 40 to 119, and in South America from 86 to 260. Of total, 16 are using power of 50 kw or more. Analysis also shows that as against maximum AM power of 50 kw permitted in U.S., there are 86 stations outside U.S. operating in broadcast band using power in excess of 150 kw.

FCC has ordered but has not yet implemented plan to duplicate 13 I-A clear. Present status: Number of clear channel stations have appeared FCC duplication order in court. Commission is now weighing, meanwhile, processing 15 applications received for I-A stations on eight of channels involved, but action on them is not imminent.

Nearly on ice
New addition to "game-of-the-week" TV sports packages may soon be Major League Hockey if present discussions between Walter Schwimmer Inc. and several professional hockey clubs reach dotted line. Teams principally involved include Chicago Blackhawkas and Montreal Canadiens.

Throwing the net
As part of overall effort to increase spot radio billings, series of presentations are being prepared by CBS Radio Spot Sales for delivery before trade associations of industries that use spot radio rarely or sparingly. First such presentation was reported to have been made before gathering of hardbook publishers.
8 out of 10 Washington TV homes* will see your spots on shows like these in a 4 week period when you buy our major coverage plan.

WHAT IS THE MEASURE OF A BROADCASTING STATION?

How does a golf pro measure a putt?
How does an advertising pro measure a station?

- One measure of a broadcasting station—the events of signal local importance it brings to the air.
- One such—Hartford’s $40,000.00 Insurance City Open broadcast live by WTIC Television and Radio 1959, 1960, 1961, 1962, 1963.
- Staff—eight WTIC and WTIC-TV reporters—forty-eight technicians and production personnel.
- Equipment—six cameras—fourteen microphones—five walkie-talkies—one mile of television cable.
- Network radio—Fed to NBC's Monitor.

WTIC TV3/AM/FM
Broadcast House, 3 Constitution Plaza, Hartford, Connecticut 06115

WTIC-TV is represented by Harrington*, Righter* and Parsons*, Incorporated
WTIC AM-FM is represented by the Henry I. Christal† Company

*Handicaps—15, 18 and 6, respectively.

GAME CALLED ON ACCOUNT OF EUROPE

'Not enough time' for FCC decision on drop-in arguments

FCC decision on controversial drop-in case has been postponed until Chairman E. William Henry returns from Europe. Chairman, who was to leave Saturday (Oct. 5), for trip to Geneva and London, is due back Oct. 23.

Commission attempted to reach decision on case involving seven short-spaced VHF drop-ins following all-day oral argument Friday (Oct. 4).

But after commissioners had discussed matter privately for 45 minutes, chairman emerged from meeting room to tell reporters there was "not enough time" to reach decision. He said further consideration of case would be delayed until his return from Europe.

At issue are petitions that commission reconsider its order rejecting short-spaced drop-ins proposed for seven markets that now have two VHF stations.

Commissioner Lee Loevinger, now remains swing vote in issue. He replaced former Chairman Newton N. Minow, who had voted with majority.

There was no indication Friday night that any of other six commissioners had changed their minds on issue.

Failure of commission to reach decision came as surprise, in view of expressed desire of commissioners, including Commissioner Loevinger, to settle question before Chairman Henry's departure.

One question settled was that Commissioner Kenneth A. Cox will continue to participate in proceeding. Association of Maximum Service Telecasters had filed motion requesting that Commissioner Cox withdraw in view of his previous connection with case as chief of Broadcast Bureau. AMST opposes drop-ins, Commissioner Cox favors them.

At start of oral argument, Chairman Henry announced that commission concluded that Commissioner Cox was not disqualified and "may participate."

Hearing came as climax to drawn-out proceeding which had origin in 1961 proposed rulemaking to put drop-ins in Johnstown, Pa. (ch. 8); Baton Rouge (ch. 11); Dayton, Ohio (ch. 11); Jacksonville, Fla. (ch. 10); Birmingham, Ala. (ch. 3); Knoxville, Tenn. (ch. 8), and Charlotte, N. C. (ch. 6).

At oral argument, both sides—involving 19 counsel representing 23 parties—used arguments advanced many times previously in proceeding.

Opponents of drop-ins said they would block UHF development and cause extensive interference with existing VHF stations. They also said FCC reversal of its position would lead to demands for additional exceptions to rules to permit unending series of drop-ins.

Proponents maintained that drop-ins are needed to meet immediate need of service and wouldn't hurt UHF nationwide. They also said UHF could not meet needs in seven markets since they couldn't compete with existing VHF stations.

Major voices in proceeding were those of ABC, favoring drop-ins, and AMST. Network said it needs affiliations with stations on proposed drop-ins if it is to become truly competitive with CBS and NBC. AMST said ABC is already competitive.

Jack Parr to buy Mt. Washington TV

Acquisition by Jack Paar, NBC personality, of ch. 8 WMTW-TV Poland Spring Me., and its affiliate WMTW-FM, for nearly $4 million was under negotiation last week with prospect that contract would be signed in New York this week.

John W. Guider, president and general manager and former Washington communications attorney, was in New York for negotiations with Mr. Paar and his attorneys. It is understood no change in personnel or management would be made, with Mr. Guider continuing as president and general manager and presumably acquiring stock interest in new corporation to be headed by Mr. Paar.

Mr. Paar's proposal was one of three received for Mt. Washington facility, others having been from Eastern multiple owner and West Coast independent. It will be Mr. Paar's first venture in business. Transaction would be subject to customary FCC approval.

WMTW-TV began operation under present ownership in 1954 and is ABC-TV primary affiliate. In addition to Mr. Guider, who owns approximately 22 2/9% of stock, other principals, each with equivalent ownership, are former Maine Governor Horace A. Hildreth and Peter Anderson.

Mr. Paar several months ago had considered acquisition of West Palm Beach TV station. In acquiring Mt. Washington facilities, he will follow pattern established by Bob Hope, also NBC star, who owns 42 1/4% of KOA-AM-FM-TV Denver. WMTW-TV board authorized Mr. Guider to negotiate for station sale after unsolicited offers had been received.

Sales rumor scotched by Goodwill's Patt

John F. Patt, president of Goodwill Stations, denied Friday (Oct. 4) reports that Goodwill radio-TV properties were being sold to Capital Cities Broadcasting Co.

Capital Cities' offer—$30 per share for 692,000 shares (more than $20 million)—was turned down last July by Goodwill board, Mr. Patt said, for several reasons: (1) There's no disposition to sell (on contrary, Goodwill is seeking to expand both in broadcasting and community antenna systems). (2) Capital Cities already has four VHF's and addition of Goodwill's two V's would put buyer over multiple ownership limit (no more than five VHF's to single company). (3) Three-year rule would have applied since Goodwill bought WSAZ-AM-TW Charleston, W. Va., only two years ago.

In addition to Charleston stations, Goodwill owns WJRW-AM-FM Detroit and WJRT-TV Flint-Lansing-Saginaw-Bay City, Mich.

Capital Cities stations are WROW-AM-

AT DEADLINE

Loevinger top banana

Boys will be boys (FCC division):

When FCC commissioners were at Colorado Springs during recent cross country tour of military installations, they saw Air Force Academy's gymnasium with climbing ropes hanging from rafters. Commissioner Lee Loevinger, alumnus of Robert F. Kennedy's physical fitness program (he was assistant attorney general in charge of antitrust division), shed his jacket and went up, hand over hand, in jiffy.

Other commissioners, more settled physically among agile New Frontiersmen, expressed admiration—but it took Republican Commissioner Robert E. Lee to deliver accolade: a tray of bananas to Mr. Loevinger when commission returned to Washington.
WEEK'S HEADLINERS

Henry Schachte, former executive VP, director and member of executive committee, Lever Brothers, joins J. Walter Thompson Co. as member of management group and executive chairman of review boards. In 1962 Mr. Schachte moved to Unilever Ltd., London, as member of company's marketing division. He is past chairman of Association of National Advertisers and Advertising Research Foundation and former director of Advertising Council. He joined Lever Brothers in 1955 as advertising VP.

Richard J. Raburn Jr., elected VP and controller, and Rocco M. Laginestra, VP of financial planning and budgets at NBC-TV. They report to Aaron Rubin, executive VP (financial division). Mr. Raburn joined NBC in 1951 and became controller in 1960. Mr. Laginestra joined network last May as director, financial planning and budgets.

Raymond M. Smith, sales manager for National Advertising Company since 1960, named general sales manager of MBS—effective today (Oct. 7). Mr. Smith joined NAC, subsidiary of Minnesota Mining and Manufacturing Co., in 1949 as assistant director of operations. Mutual also is subsidiary of 3M.

For other personnel changes of the week see FATES & FORTUNES

Radio astronomy gets ch. 37 for 10 years

FCC announced Friday (Oct. 4) that channel 37 will be reserved for sole use of radio astronomy for 10 years. However, 19 stations now on channel will not be affected, agency said.

Original rulemaking would have given five-year reservation but research groups complained that they needed more time (Broadcasting, May 6). Broadcasters have not opposed reservation.

Commission said it will seek reservation of channel 37 in Mexico and Canada, and at international conference at Geneva this month.

Four applicants for channel 37 at Paterson, N.J. are: Spanish International TV Co.; Progress Broadcasting Corp.; Bartell Broadcasters Inc., and Trans-Tel Corp. Mel-Eau Broadcasting Corp. is seeking channel in Melbourne, Fla.

ABC, CBS, NBC share Thursday night trendex

ABC-TV took ratings lead Thursday (Oct. 3) up to 9 p.m. when its Jimmy Dean Show rested low on totem pole and Perry Mason (CBS-TV) and Dr. Kildare (NBC-TV) took over.

Trendex reports for Oct. 3 (covering 21 to 26 cities) are overnight and released by ABC-TV. As of Oct. 3 all new offerings of networks had seen their first appearances for season (for Trendex ratings before Thursday, see page 82). 7:30

Science fiction pilot set

NBC-TV is to announce today (Oct. 7) that it will produce, through NBC Productions, Hollywood, new pilot, I.S.D., as proposed one-hour science fiction series. Production will begin week of Oct. 21 on concept created by Robert Barbash. Show will be filmed at Paramount Studios.

RAB rating ‘deadline’ panned by McGannon

Radio Advertising Bureau’s “deadline” for action by National Association of Broadcasters on RAB’s radio audience methodology study plans (see page 72) drew sharp response Friday (Oct. 4) from Donald H. McGannon of Westinghouse Broadcasting, chairman of NAB research committee and NAB Rating Council.

Mr. McGannon said he’d been informed RAB President Edmund Bunker had put “some form of strict deadline on the NAB and its research committee.” He continued: “If Mr. Bunker wants to go forward, God speed him. If on the other hand he wants the cooperation of NAB and also its financial support, he will have to wait until such time as those of our members who are skilled in this field of statistical research can reach the conclusion that this is a sound plan and one that, when completed, will be likely for the basis of a measurement service that broadcasters, agencies and advertisers can economically sustain.”

Earlier, Mr. Bunker had asked LeRoy Collins, NAB president, to be ready with answer by Thursday Oct. 10, when meeting of RAB-NAB liaison committee is scheduled. RAB wants NAB to chip in $75,000 toward $200,000 study RAB plans.

Collins gets sympathetic ear of radio code board

Radio code board of National Association of Broadcasters promised Friday (Oct. 4) to be sympathetic audience for broad goals put forth by NAB President LeRoy Collins. Agreement with Governor Collins’s proposal by radio board was in direct contrast to views of TV code board members earlier in week (see page 68).

Radio board, under Chairman Cliff Gill of KEXY Anaheim, Calif., “agreed in principle with the general goals” for code of NAB president. Time standards subcommittee of board will meet Dec. 6 to consider definite proposals on amending controversial commercial provisions and report to next full board meeting Jan. 9, 1964.

Board praised retiring Code Authority Director Robert Swezey for his “highly competent and valuable service” the past two years and unanimously urged Governor Collins to name another practical broadcaster as new director.

Monitoring of radio code subscribers is at all time high with 46% of 1,800 members checked during past six months. During same period, 20 stations resigned from code for noncompliance with time standards or product acceptance rules.

BROADCASTING, October 7, 1963
Walter Reade/Sterling, Inc. presents a new concept in television programming

NEW because it extends to television the astonishing success that mature film entertainment has been achieving in the nation's theatres.

NEW because every Cinema 70 feature has been measured, proven and selected by the yardstick of top box office performance and international critical acclaim.

NEW because Cinema 70 is a consistent package of current film classics, undiluted by the inferior feature which, unsuccessful in theatrical release, often has been hastily sold to television.
If one were trying to draw comparisons between Cinema 70 and other feature packages offered to television, a striking point would be the tremendous critical acclaim granted virtually every feature in the Cinema 70 group. It can be said without exaggeration that many of the Cinema 70 features are among the most highly praised films ever made, anywhere, at any time. Here are just a few of these—and something about their reputations.
cinema 70
means great stars
great directors
great stories

Choose a director of extraordinary genius. For stars, give him the world’s most accomplished actors and actresses. Let him work from great scripts prepared by outstanding literary talent.

Such great directorial and literary talent as: J. Lee Thompson • Jack Clayton • Sidney Lumet • Rene Clement • Roberto Rossellini • Jean Renoir • Federico Fellini • Vittorio de Sica • Robert Bresson • Preston Sturges • Tony Richardson • Arthur Miller • James Thurber • John Osborne.

*Indicates first or revised listing

OCTOBER

Oct. 6-8—Annual convention of the Nebraska Broadcasters Association, Town Park hotel, Scottsbluff. Les Hilliard, president of KOLT Scottsbluff, is convention chairman.

Oct. 7—ASCAP symposium for young composers and lyricists, 8 p.m., Lyndon Center of Visual Arts, Hollywood. Henry Mancini and Johnny Mercer will discuss conducting and motion picture songs.

Oct. 7-8—Radio Advertising Bureau management conference at the Town House motor hotel, Omaha.

Oct. 7-9—Annual fall meeting of the Kentucky Broadcasters Association, Owensboro Downtown motel, Owensboro, Ky. The program begins at 9 a.m. Oct. 7 with a meeting of the board of directors.

Oct. 7-Nov. 8—International Radio Conference on Space Allocations, Geneva. The conference is sponsored by the International Telecommunications Union. Chairman of the U.S. delegation is Joseph H. McConnell, president of Reynolds Metal Co., Richmond, Va. Other members of the U.S. delegation include Jacob D. Bean, former ambassador to Poland; T. A. M. Craven, former FCC commissioner; Lt. Colonel Edward N. Wright, U.S. Air Force; Senators Norris Cotton (R-N.H.) and John O. Pastore (D-R.I.); Representative Orrin Harris (D-Ark.), and FCC Chairman E. William Henry.

Oct. 8—Ninth Wisconsin FM Station Clinic, Center Building, University of Wisconsin, Madison. Harold A. Engel, chairman.

Oct. 8-10—International Film Festival, Barbizon Plaza hotel, New York.

Oct. 10-12—Annual fall conference of Alabama Broadcasters Association, Hotel Stafford, Tuscaloosa. Registration begins 3 p.m. Oct. 10, followed by social hour and meetings of board of directors and past presidents. Part of the program on Oct. 11-12 will be held in the Union Building on campus of University of Alabama, with members attending the Alabama-Florida football game on afternoon of Oct. 12.

*Oct. 12—Annual fall meeting of UPI Broadcasters of Michigan, Ann Arbor.

Oct. 13-18—Second Advanced Advertising

Today, education in America faces a severe challenge. An accelerating world requires new and broader curriculums. An expanding population begs for more teachers, more classrooms.

Many communities have turned to Educational Television as an imaginative way to expand course subjects, to bring more effective teaching techniques into the classrooms without sacrificing personalized instruction.

Because of our long experience in the research and development of telephone, television, and defense communications networks, it was natural that the Bell System was called on to develop facilities for one of the first ETV networks in the country, in Hagerstown, Maryland.

We have since helped pioneer the first state-wide, closed circuit Educational Television system, in South Carolina.

In doing this, we have developed a transmission service that provides several channels of instruction. It is low in cost and makes use of the service and maintenance facilities of local Bell Telephone Companies in communities of any size.

Helping communities like yours find the answer to better learning through Educational Television is just one more way of putting Bell System research and skills to work serving you and your family.

Oct. 24—Fourth Armed Forces Television Conference, sponsored by U. S. Air Force, Lowry Air Force Base, Denver. The conference will deal primarily with educational and technical uses of television by the military services. A trip to the Air Force Academy's closed-circuit television installation is also planned.

"Oct. 29—Fall meeting of West Virginia AP Broadcast News Directors, Clarksburg, W. Va.

Oct. 28—ASCAP symposium for young composers and lyricists, 8 p.m., Lytton Center of Visual Arts, Hollywood. Irving Townsend will speak on recording of music and TV music; Larry Shaye on the publisher's function.

Oct. 28-31—Public hearing on S-1666, freedom of information bill, Senate Subcommittee on Administrative Practice and Procedure, room 2228, New House Office building, Washington, 10 a.m. each day.

Oct. 31-Nov. 1—Fall convention of the Ohio Association of Broadcasters, The Christopher Inn, Columbus. Speakers include Governor James A. Rhodes and Maurie Webster, vice president and general manager of CBS Radio Spot Sales.

Oct. 31-Nov. 1—Electron Devices Meeting of the Institute of Electrical and Electronics Engineers, Sheraton Park hotel, Washington.

November

Nov. 1-2—Oregon Association of Broadcasters convention, Hilton hotel, Portland. Featured speaker will be FCC Commissioner Lee LeEnvinger.

Nov. 1-2—WSM's Grand Ole Opry 38th anniversary celebration, Nashville.

Nov. 4-5—Central Canadian Broadcasters Association management and engineering convention, Royal York hotel, Toronto.

Nov. 6-7—American Association of Advertising Agencies (AAA) eastern annual meeting, Waldorf-Astoria, New York.

Nov. 8-9—National convention of Sigma Delta Chi, professional journalistic society, Golden Triangle Motel, Norfolk, Va. Keynote speaker will be Barry Bingham, editor and publisher of the Louisville Courier-Journal & Times. Other speakers include Dr. Glenn Seaborg, chairman of the Atomic Energy Commission; Turner Catledge, managing editor of the New York Times; Blair Clark, vice president and general manager of CBS News; Palmer Hoyt, publisher of the Denver Post; Walter Cronkite, CBS news correspondent; Gardner Cowles, publisher of the Des Moines Register & Tribune and Look Magazine; and Charles Ferguson, senior editor of Reader's Digest.

Nov. 7-8—College Majors Conference, series of seminars for college seniors majoring in broadcasting and advertising, sponsored by International Radio and Television Society, Hotel Roosevelt, New York.
Nov. 7-8—Annual fall meeting of the Washington State Association of Broadcasters, Ridpath hotel, Spokane.

Nov. 8-10—California Exposition of American Progress (acknowledging the Negro consumer) 12 noon to 10 p.m., Long Beach Sports Arena, Long Beach, Calif.

Nov. 10-12—ACRTF Convention, Quebec City, Canada.

Nov. 16—Annual meeting of UPI Broadcasters of Pennsylvania, Governor's Room, Penn-Harris hotel, Harrisburg.

Nov. 16—Second annual Wyoming Associated Press Broadcast News Clinic, Gladstone hotel, Casper, Wyo.

Nov. 19-21—Television Bureau of Advertising holds its annual membership meeting. Sheraton-Blackstone hotel, Chicago.

Nov. 20—American Association of Advertising Agencies (AAAA) east-central region meeting, Statler Hilton, Cleveland.

Nov. 22-23—Combined meeting of Wisconsin Associated Press newspaper and broadcasting members, Milwaukee.

*Nov. 28-Dec. 1—Annual convention of the National Association of Radio and TV Farm Directors, Chicago.

DECEMBER

Dec. 3-5—Winter conference of Electronic Industries Association, Statler-Hilton hotel, Los Angeles.

Dec. 4-6—Sixteenth conference of the Professional Technical Group on Vehicular Communications, Adolphus hotel, Dallas.

JANUARY 1964

Jan. 21-23—Nineteenth annual Georgia Broadcasters' workshop and sponsorship convention, University, of Georgia, Athens.

Jan. 24-26—Mid-winter convention of the Advertising Association of the West, Bakersfield, Calif.

FEBRUARY

*Feb. 3-5—Second annual Electronic Marketing Conference of the Electronic Sales-Marketing Association (ESMA), Barbiton Plaza hotel, New York.

Feb. 5-7—1964 Winter Convention on Military Electronics, Ambassador hotel, Los Angeles. C. D. Perrine, executive vice president of General Dynamics/Pomona, is conv.

Feb. 8-16—International TV and Equipment Market, Lyons, France.

MARCH

APRIL

April 5—Annual convention of the National Association of Broadcasters, Conrad Hilton hotel, Chicago.

April 30-May 3—Thirteenth annual convention of the American Women in Radio and Television, Mayo hotel, Tulsa, Okla.
This year there's a different look...a different feeling—an exciting new sight and sound of "network" on New York's Prestige Independent.

Seven nights of every week, viewers will see the kind of shows on WPIX/11 that they might expect only from a network. Caliber shows. Unusual shows. Powerful shows. Programming that provides advertisers with impressive support for their important messages.

If your "work-horse" is the 60-second commercial, put it to work where every exciting minute counts—in Prime Time Programming with the Network Look—on WPIX/11, the One Station Network.

'Hogwash'

EDITOR: This is an open letter to your MONDAY MEMO guest, Craig Moodie of Armstrong Cork Co. (BROADCASTING, Sept. 16).

In my estimation, this is hogwash.

Doesn't Mr. Moodie realize that most of his dealers carry a large variety of lines other than his Armstrong line? Doesn't he realize that most of these other manufacturers are also spending money on a national level? How can a dealer pick up the tab 100% for each ad he carries to follow up at a local level? As for the local station getting a group of dealers to split a co-op ad campaign locally, these men are competitors. Why get together to boost the other fellow's business?

If the local follow-up is as important as Mr. Moodie feels it is—and I agree with him that his national advertising dollar is being largely wasted without that local follow-up—then let Mr. Moodie's company do one of two things: increase its ad budget to allow local dealers some co-op money to add to their own on a local level, or sponsor a Danny Kaye only two-thirds of the time so dealers (can be given) some help.—Cy Newman, president, HD Productions, Bon Air, Va.

Subscriptions for Congress

EDITOR: The Missouri Broadcasters' Association appreciates the coverage given our delegation's trip to Washington (BROADCASTING, Sept. 16). Since your magazine is by far the industry leader..., we are wondering how many of the Missouri congressmen and senators subscribe to it. We want to purchase subscriptions for all those who do not take BROADCASTING.—Don C. Dailey, president, Missouri Broadcasters' Association.

The last word?

EDITOR: I regret that I was not explicit enough in my letter (BROADCASTING, Sept. 16) so as to obviate the necessity of the letter from Mr. Rosenblatt (BROADCASTING, Sept. 23).

To clarify my position, I was referring specifically to the material from Sears. And I was also referring in general to the proliferation of "news releases," "public service announcements" and "new product information" which radio stations get from commercial enterprises.

This commercial material, regardless of source, should not be broadcast unless it is paid for. We carry enough legitimate public service without using the commercial material for free.—Robert T. McVay, owner, KRSA Salinas, Calif.

BROADCASTING, October 7, 1963
Radio gives America news, music, sports entertainment, vital services...

and now America's history and heritage...
Americans want to know about their country's history. So the Storer Broadcasting Company has produced American History V, a stimulating, authoritative radio series that traces our nation's chronicle from Plymouth Rock to foreign aid in 65 fascinating five-minute programs. Dr. Russell Caldwell, Associate Professor of History, University of Southern California, is writer/narrator for American History V. It's available now for your station.

Your station also can feature series four of Voices of Freedom—15 new and inspiring one-minute messages on American ideals voiced by outstanding personalities and public figures. More than 500 stations have carried the first three series of these capsule talks, produced by Storer in cooperation with the Freedoms Foundation at Valley Forge.

Give freedom a share of your day's programming. For the 65-segment American History V, send $30.00 to cover mailing, tapes and dubbing. Write KGBS-Radio, 338 S. Western Avenue, Los Angeles 5, California.

For series four of Voices of Freedom send a $2.00 deposit to WIBG-Radio, Suburban Station Building, 1617 Pennsylvania Blvd., Philadelphia 3, Pennsylvania.
A program of general appeal for specialized audience

Since the Southern California plumbing industry promotion fund came into being on July 1, 1960, the Plumbing Industry Progress and Education fund (PIPE) campaigns have made effective use of broadcast communications media and one first-of-its-kind program has been created in the process.

The selected agency determined that the initial phase objectives were: (a) establishment of a recognition symbol; (b) educating the public to the advantages of calling in a PIPE contractor, plumber or pipefitter for needed work. The agency staff created the now-familiar PIPE trademark emblem, to identify participating members as craftsmen of higher skills for performing quality work. The emblem was translated into journeymen's badges, decals for contractor vehicles, stationery and jobsite displays.

TV to Start • Television, obviously, was the outstanding vehicle for establishing visual recognition of the PIPE trademark and promoting a coupling of the symbol with extra-quality craftsmanship in the public mind. Four television commercials were created in this first phase. The number one spot was devoted entirely to the emblem. The second put across the demanding training program for journeymen plumbers qualified to wear the PIPE badge. A third commercial showed specific examples of work performed by PIPE plumbers and pipefitters—from million-dollar research piping assemblies in missile plants to a simple leaky faucet repair. The fourth explained the formation of PIPE as a cooperative effort to improve quality standards in plumbing and by indirect establishment of confidence in the PIPE craftsmen. The initial PIPE campaign used news programs on five Southern California television stations on a five-times weekly basis.

Then Radio • When the PIPE emblem was "fixed" via the television programs in the first year, it was determined that the campaign could be supplemented by wide use of radio. Three radio spots were produced to sell home modernization jobs and industrial-commercial maintenance plans for the industry. These second-year radio spots expanded the PIPE "reach" and multiplied the effectiveness of the program. Throughout the first three years, television news programs were the foundation of the campaign, although billboards were keyed in to underline special themes.

A bright and breezy singing commercial, created experimentally for the PIPE radio programs, proved so effective that a new animated commercial was developed for television to exploit this singing spot. In this period, the commercials moved into "item" selling of specific appliance fixtures and services—water heaters, garbage disposers, bathroom remodeling and the like. The nine counties of Southern California within the PIPE jurisdiction were blanketed by the purchase of time on five TV stations.

Internal Selling Job • One of the age-old problems in the whole construction industry has been lack of standardized job specifications, which results in contract misunderstandings and losses estimated in the millions over the United States. As part of its industry promotion program, the PIPE technical division undertook the pioneering task of developing standard specifications for plumbing, heating, cooling and industrial process piping.

It was obvious that one of the client's main needs at this point was gaining acceptance of these standard specifications by other segments of the industry. The agency developed an all-out campaign of reaching the key elements in the building industry through personal contact by field representatives. Trade advertising was used extensively.

Radio, Again • But the need for a more effective job in creating industry acceptance of these standard specifications remained. The agency came up with the idea of a construction news program on radio, in such a format as to have general interest, but containing real "meat" news of bids, contract awards and similar information for the construction industry. No such program had ever been attempted, so far as could be determined, and the agency almost immediately ran into the "it can't be done" problem. But the idea survived.

In Southern California, Daily Construction Reports, is a prime source of news for construction people. The agency entered into a contract with its publishers for exclusive broadcast rights to highlight portions of the voluminous building report. (The paper receives a daily plug on the program.) One of the agency writers checks in at the paper while the reporters are preparing next day's edition. From their carbons, he prepares the nightly broadcast, relayed by teletype to the stations. To increase local impact in specified areas, the agency created localized weekly construction news programs, broadcast on Saturday mornings in 11 cities outside the Los Angeles metropolitan area.

Although based entirely on the day's building reports and aimed primarily at architects, contractors and executives in the trade, the program stresses the importance of the multi-million dollar construction industry to the general economy. Reports over the nine counties indicate it is having its hoped-for effect, in reaching the construction industry groups with PIPE's "intramural" messages such as standard specifications. The goodwill generated by the institutional character of the program among the general public is an unexpected public relations dividend.

A New Broadcast Theory • PIPE is extending its use of media in view of the record of effectiveness to date. The radio programing has lately been augmented by spot announcements on 40 radio stations, a campaign that began in midsummer. That radio-television is invaluable in a program like PIPE is not news at this late date, but that a program of general appeal can be designed for a specific audience may open up some possibilities for future brainstorming.

Gordon Gelfond, vice president of David Olen Advertising, Los Angeles, has been with the agency since April 1959. He has worked continuously on the PIPE account since its inception and has been responsible for most of the media buying. Prior to joining David Olen Advertising, he was with Nelson Advertising Agency and Gordon Gelfond Advertising, all of Los Angeles. Mr. Gelfond was graduated from UCLA in 1951. He is married and has two sons.

A PICTURE OF GOOD SELLING

Oil moves the finished products and raw materials that salesmen sell, and when trains, trucks, planes, ships and factories call for fuel—and more fuel—that is a sign of good business...a sign of good selling.

Good selling has never been so important to so many Americans as it is today...but America has never had a salesman quite like television...spot television.

The television stations represented by Peters, Griffin, Woodward are welcomed regularly into millions of American homes where they spend more than 5 hours each day entertaining, informing and selling...selling by demonstrating and displaying the goods and services that keep our economy rolling.

In SPOT TELEVISION the advertiser can specify the number, the timing and the type of his television salescalls in every market...and that is good selling!

John F. Dille, Jr., President
NETWORK RADIO SALES: $50 MILLION

Experts agree totals of four will be near that mark this year

Three networks expect profit, fourth near break-even point

Are spot sales suffering? Salesmen argue the question

Network radio, which less than a decade ago was held together more by fear than by hope, appeared last week to have a firm grip on what then seemed completely out of reach—not only survival, but profitability.

A canvass of the four national radio networks showed that gradually accelerating sales over the past three years, combined with complete overhauls of their respective operations, have brought them to the point where three expect to show a distinct profit this year.

The fourth, ABC Radio, reported business gains to match or exceed those of its rivals, and some sources—non-ABC—speculated that red ink, to the extent that it still exists, may stem as much from the caprices of bookkeeping as from strict operating imbalances.

Sales $50 Million • The consensus of authorities was that total radio network time sales this year may reach $50 million—not a lot when compared to the $134 million in sunlit 1948 and only a fraction of network television's $520.2 million last year, but still 25% above network radio's estimate for 1962.

Individually, some experts thought the total would fall short of $50 million, while others thought it would exceed that mark. The comparable figures for 1962 have not yet been made public by FCC, but they are expected by most observers to total about $40 million. Broadcasting estimated last February that they would come to $39.4 million, or almost 10% higher than the FCC figure for 1961 (Broadcasting, Feb. 18).

The four networks' estimates of their respective sales gains, 1963 over 1962, average about 30%.

ABC Radio officials say their sales in the first half of this year were up 24% from the same period a year ago and for the full year will run about 32% ahead. CBS Radio authorities say their first half was up 37% and that sales going into the final quarter are 47% ahead of the full year 1962. Mutual puts its current position 27% above this time a year ago and says the year ought to be up by 20 to 30%. NBC Radio says its first-half business was up 10%, its third quarter up 17% and its full year should exceed 1962 by about 15%.

Is Spot Suffering? • There are, as there always have been, complaints by spot radio salesmen that network's gains were acquired at the expense of spot radio. "We just can't compete with the cheap prices the networks offer," is a common protest by spot salesmen. "We're trying to sell time while the networks give it away" is another.

The number of spot accounts that have defected to network—wholly or partly—is long and tends to get longer, they assert. DuPont antifreeze and Fisher Body are two cited as having switched completely from spot to network.

The complaint is not unanimous among spot salesmen, however. At least some report—but ask that their names not be used—that dollar deflections have not figured significantly in network radio's recent climb.

The networks, of course, deny that they're sharpshooting spot accounts. The standard answer of William K. McDaniel, executive vice president in charge of NBC Radio, for instance, is that the spot salesmen's complaints are out of date. "If all four networks were completely sold out at card rates," he asserts, "this would amount to less than 5% of all the dollars that are spent in radio."

Business Booming • Wherever network radio's business comes from, nobody denies that it's been coming fast and heavy, at least by late-1950 stand-
Affiliates bask in good-business glow

CBS RADIO 80-90% SOLD OUT; PAYMENTS WILL DOUBLE ESTIMATE

In an atmosphere reminiscent of pre-television network radio conventions, the CBS Radio affiliates held their annual meeting last week and got glowing reports on the immediate past, the present and the future of their network and of their prospects as affiliates.

It was without doubt the happiest of the 10 annual conventions held thus far by the CBS Radio Affiliates Association. It was also the biggest turnout of CBS radio affiliates in history—296 representatives of 133 of the 222 affiliated stations.

- Arthur Hull Hayes, president of the CBS Radio division, got the meeting off on a pleasing note by advising the affiliates that, thanks to a strong sales surge, their total payments from the network this year will be more than double what was estimated when the new payment plan was announced a year ago.

- The stations were told that network time has been 80% sold out since March, on the average, and that in some weeks it has been more than 90% sold out. Officials said privately that sales—with three months to go—are 47% higher than total sales in 1962. The network, which has averaged on black ink for the last couple of years, will definitely operate at a profit for 1963 (see page 33).

- A new sales presentation, aimed at "dispelling outmoded concepts of radio as an advertising medium," was unveiled and appeared to generate unusually warm enthusiasm among the affiliates.

- The affiliates were given an economic analysis to warm the cockles of any advertising salesman's heart: that a $2 billion, or 15%, increase in advertising expenditures may be needed in 1964-65 to push living standards up to where they ought to be, and that the 1963 advertising level of $13 billion may need to reach $29 billion a year by 1974.

The convention, held Tuesday and Wednesday in New York, also was told by CBS President Frank Stanton that broadcasters must use—but not abuse—the right to editorialize (see page 84), and heard CBS News President Richard S. Salant attack "checkbook journalism," or what he called the growing practice of buying exclusive rights to hard-news stories (page 84).

"Today we look back on a year of unprecedented success and ahead to a future that seems very rosy," Mr. Hayes said in his keynote report. He attributed the gains in large measure to years of experimentation in the development of "a network product that does what network radio can do better than any other medium—move information to the public with unbeatable speed and accuracy and provide intimate, warm personality entertainiment for the housewife in the morning hours."

He said radio has been and still is underpriced, and that despite the CBS Radio network's recently announced general rate increase (Broadcasting, Sept. 9), "none of us are receiving a commensurate rate of return for what we offer."

Mr. Hayes cautioned, however, that although the recent increase won't be the last, "as we raise our rates we must give full value and continue to experiment with our programs, be open for new ideas." Stations, too, must continue to improve their local programming in order to continue expanding radio's values and its audiences, he asserted.

Sales Surge - In his address, according to reports from the closed meeting, Mr. Hayes also stressed the continuing surge of network sales by noting that payments to the affiliates in the second half of this year will be 137% higher than originally estimated for this period.

He anticipated questions about the effect that CBS Radio's increased lineup of affiliates might have on individual station payments. The network currently has 222 affiliates, as against 204 a year ago and 213 in 1960. Mr. Hayes assured the affiliates that the longer lineup would not impinge on payments, which are based on "CSUs"—commercial sponsor units—sold and carried.

He also anticipated another question that reportedly was discussed further by affiliates in their private session, when no network officials were present: whether overcommercialization is involved in the use of three commercials on 10-minute newscasts. Mr. Hayes reportedly told the affiliates that, in the opinion of authorities, the commercial pattern does not exceed code limits.

One network proposal that officials had hoped to bring to a decision by convention time was a suggestion that the affiliates clear an additional 95 minutes a week for network sale. The proposal, reportedly developed in cooperation with several affiliates, was submitted in a letter a few weeks ago.

Not Enough Answers - But, Mr. Hayes reported, according to participants in the meeting, that only half of the affiliates had replied, and that although almost 80% of these approved the plan and less than 5% specifically opposed it, the network did not propose to act without more complete returns. He urged the stations to submit their answers, one way or the other.

The plan would increase some five-minute newscasts to 10 minutes, add another 10 minutes of news Monday through Friday, add a review of the week's news on Saturday and reclassify the Alexander Kenrick news report as network time. The appeal to affiliates is that, if sold, the extra network time would increase their network compensation.

The general economic analysis, coupled with an admonition to "stop underestimating your sales potentials," was presented by Arno H. Johnson, vice president and senior economist of J. Walter Thompson Co., New York.

New Money - To utilize the increased productivity and growth of the labor force, Mr. Johnson said, "over $220 billion must be added to personal consumption in the United States in the next decade (from $370 billion in 1963 to over $590 billion by 1974, a 60% increase), and some $55 billion must be added to private investment for new plant and equip-
ment, construction and industrial goods.

This means that selling and advertising will be forced to play an increasingly important role.”

What the challenge amounts to, he said, is adding in the next 10 years “the equivalent of 35% more than the entire growth in consumption in the 320 years from the landing of the Mayflower at Plymouth in 1620 to the best prewar year of 1940.” The consumer, he said, is “the real key to economic growth,” and selling and advertising are “the educational and catalytic force to change latent needs into insistent desires.”

Mr. Johnson said the immediate problem is not lack of purchasing power but “lack of confidence and lack of insistent demand.”

**SRO Presentation • CBS Radio’s new presentation, “SRO-1964,” got a warm reception from the affiliates although officials made clear it is not in finished form. The “SRO” is an acronym for Standard Ritual Opposition—a group of “illusions” that the presentation answers. These illusions include the arguments that “television has replaced radio,” that “only teen-agers listen to radio,” that “old people listen to radio,” that “network radio’s on the rocks,” that radio is “too complicated to buy,” and that “you gotta have pictures to sell my product.”

The presentation, combining 16 mm film and a wide-screen film strip and with narration by CBS newsman Walter Cronkite, will be shown to advertisers and agencies in major markets including New York, Chicago, Los Angeles, San Francisco and Detroit. First showing is scheduled Oct. 16 in Detroit.

In another convention report W. Thomas Dawson, vice president for information services, said network promotion included 18 different ads in 84 insertions in Time, Look and the MacFadden woman’s group during 1963 and that the network will continue the campaign during the year ahead.

The affiliates wound up the convention by adopting a series of resolutions hailing CBS Radio and its executives for “expanding leadership” in programing and for “success in spearheading the economic resurgence of network radio;” commending CBS News; thanking and supporting Dr. Stanton’s “tireless efforts to advance freedom of editorial expression by broadcasters,” and expressing appreciation to E. K. (Joe) Hartenbower of Kansas City, Mo., for his work as retiring chairman of the affiliates association.

The networks arrived at different formats, but all have this characteristic: an emphasis on news and other programing having “immediacy.” Some still furnish almost continuous programing—mostly music—that affiliates are free to use or not use, but the essential network feed amounts to only a fraction of the 70 or 75 hours that used to be sent out over the network lines each week. In this basic programing the primary emphasis is on “service that only a network can provide—service that stations can’t perform for themselves.”

Behind the obviously growing advertiser acceptance of this “new” brand of network radio are several important factors, in the opinion of the men who oversee it. What they all add up to is CBS Radio President Arthur Hull Hayes said at an uncommonly enthusiastic con-
NETWORK RADIO SALES: $50 MILLION continued

vention of affiliates last week (see page 34), is that "we're back in vogue again." Or, as ABC Radio president Robert Pauley describes it, "there's been a swing-back to the recognition of radio's values."

Among the factors cited most often as contributing to the swing-back are the fact that audiences obviously go for the "new" brand of programming; the continually mounting sale of radio sets; the increasing mobility of the radio audience (which when in motion, as Mutual president Robert Hurleigh told approximately 100 agency representatives in a series of sales-presentation breakfasts last week, can be reached by practically no medium except radio); increased recognition of the magnitude of the out-of-home audience; some advertiser concern over TV prices and, probably most important of all, radio's repeated demonstration that it can get good sales results at low costs.

Here, network by network, is a summary of their respective comebacks—and how far they've come:

ABC RADIO

President Robert Pauley says this year's sales will exceed 1962's by 32%, calls 1963 business unexcelled in the last eight years and probably longer. "Our records up to 1955 are all in storage," he explains.

These gains, he says, could have been greater. In the current year, he told a regional meeting of affiliates a few weeks ago, ABC Radio has rejected more than $3 million in business because it didn't consider the programming proposed by the advertisers to be "top-flight."

Much of network radio's gains he attributes to Sindlinger & Co.'s efforts to measure the full scope of the radio audience. Mr. Pauley himself figured prominently in these efforts, retaining the Sindlinger organization to make radio audience measurements after protesting bitterly that A. C. Nielsen Co. was "shortchanging" radio by measuring only part of the audience.

He also feels that documentation, by ABC and some of the other networks, of a number of major radio sales successes contributed importantly in reawakening advertiser interest.

Like most of the other networks, ABC Radio undertook a number of changes before settling on its current program format.

Considered Quitting • At one point, in 1958, officials verged on a decision to close down in the face of losses running at a rate of about $4 million a year. They also considered briefly the possibility of cutting back to a press type syndicated news service.

Instead, they stripped back to Breakfast Club—then and now an institution on ABC—news and commercial religious programs, of which ABC then had several.

There were other changes, including a short-lived experiment in all-live entertainment programming, before the current pattern emerged. More than three years ago ABC Radio concluded that a network cannot survive on news alone, decided also to feed music programming only on a sustaining basis, settled on a policy of concentrating on programs that (1) have "immediacy" and (2) are beyond the reach of local-station production.

It introduced Flair, which affiliates could use either in segments or as a whole program, but subsequently decided that these were losing "immediacy" and also that the comedy portions were competing with comedy records—the Vaughan Meader, Shelley Ber- man, Bob Newhart and similar records—that stations could acquire locally.

Switch Format • Accordingly ABC Radio switched its emphasis to featur- ettes based on news of the day, 3½ minute Flair Reports programs that it feeds at the rate of six a day. In these and in its newscasts—which it retained, of course, along with Breakfast Club—a special effort is made to incorporate the voices of the newsmakers.

The network also carries running accounts of major news events, as in the case of the Joseph Valachi testimony in the Senate investigation of syndicated crime, and also provides "fill" programming for affiliates who want to use it.

Mr. Pauley anticipates a trend to program sponsorships, thinks radio drama is in for "a great resurgence," points out that ABC Radio is in the process of initiating a dramatic series that will be offered on a co-op basis this fall.

Mars returns to radio

Mars Inc. is going back into radio for the first time since it sponsored Dr. I.Q. (on NBC) back in the 1930's and early '40's. Using Stan Freberg minutes and 30's the candy company will be on NBC Radio, CBS Radio and Mutual as well as 60 independents for a total of 600 stations. Commercials will start Oct. 6. Needham, Louis & Broby is the agency.

FROM SOAP OPERAS TO SYMPHONIES

Fels buying Philadelphia Orchestra concerts on FM

Once upon a time, the main contribution of soap companies to American culture was their sponsorship of radio soap operas.

This past weekend, Fels & Co., soap and detergent maker, began sponsorship of broadcasts by the Philadelphia Orchestra on 22 radio stations. The tape network for the symphonic broadcasts is made up of three AM-FM stations and 19 FM-only operations. Half of them (11) will present the broadcasts in stereo-multiplex.

The last of the weekly-concert length symphony broadcasts on the radio networks ended this past spring when CBS Radio terminated its 33-year-old series of New York Philharmonic broadcasts. Sunday (Oct. 6), the Philharmonic started live broadcasts on its own network of 55 stations (Broadcasting, Sept. 16).

The Fels program is being packaged by the S. E. Zubrow Co., Philadelphia (the Fels agency), and is available for sale to stations not purchased by Fels. The 39-week series will present 28 concerts conducted by Eugene Ormandy, music director of the Philadelphia Orchestra. The remaining 11 weeks will have guest conductors. The programs will be recorded in Philadelphia's Academy of Music during the orchestra's Friday afternoon series. If Mr. Ormandy is not satisfied with the orchestra's performance, the Saturday concert will be recorded. Each concert will be broadcast two weeks later after recording.

A Zubrow spokesman said last week that recent surveys show there are about 15 million FM homes, most of which are above average in income and of large family size. Surveys, he continued, also show that FM commercials are more easily remembered than those in other media. It was these facts that led Fels to attempt to sell its products through the FM broadcasts, he added.

CBS RADIO

Arthur Hull Hayes, CBS Radio president, reports CBS Radio has already put 47% more billings on the books this year than it did in all of 1962, says there's no possible way it could fail to make "a solid profit" for 1963 (for more details, see CBS Radio affiliates convention story, page 34).

His network stresses news and informational programming, but with a block of name-star entertainment shows for housewives in the mornings. Mr. Hayes traces the evolution of the current pattern to late 1960, when the network decided to cut back and then lay off the soap operas that for years
Small in size, massive in potential... that's the area within seventy miles of routes 70 and 75 in Ohio. In it are seven metro areas... three and one-half million people... tenth largest consumer market in America!

People can spend up to seven billion dollars here every year. And a huge segment of this market is within the powerful signals of WHIO-TV, AM, FM.

Let George P. Hollingbery give you facts and figures on the fabulous potential in Megacity 70-75... and how much of it WHIO-TV, AM, and FM can deliver.
were network radio's daytime mainstay.

The format has been modified annually, now includes Arthur Godfrey, Art Linkletter, Garry Moore and Durward Kirby on weekday morning, 10-minute newscasts on the hour on weekdays, 63 Dimension news features a week, daily and weekend sportscasts and a number of regularly scheduled public affairs programs.

Product Diversification - CBS Radio detects no new trend to or from program sponsorships, does see a trend already afoot toward "wider and wider product diversification in our medium."

As a result of the program consolidation into about 25 hours a week of commercial time, plus about 25 weekly hours of sustaining programming, mostly public affairs, Mr. Hayes feels it has been possible to "consolidate our sales efforts around programming that network radio can do better than any other medium—fast, accurate news and timely information."

He notes that CBS Radio also has consistently developed major sales presentations and traveled them "to every major market from New York to San Francisco," and in addition has been "the only network, to our knowledge, to back up our programming with a million dollars of advertising a year, aimed not only at the listener but at the trade."

MBS

Mutual first detected business comeback signs in late 1959, saw them materialize into an upturn in 1960, according to President Robert F. Hurleigh. He says the network came close to turning a profit in 1961, "definitely" showed a profit in 1962 and ought to do even better this year.

Right now, he says, Mutual's sales are running 27% ahead of the comparable period of 1962, and billings for 1963 ought to be at least 20 to 30% higher than 1962's—20 to 25% higher if the current pace should slacken a little, but 27 to 30% higher if they maintain an accelerate momentum.

Like the other networks, Mutual tried to overcome the post-TV decline in a number of ways. One Mutual plan was a form of "guaranteed circulation" offered by the network in 1956.

But the principal instrument of recovery, in President Hurleigh's opinion, emerged from the decision to strip Mutual's network programming to news, sports, public affairs and special events.

This decision, reached after a year's planning, went into effect in June 1957 and involved the most far-reaching network changes inaugurated up to that time. The old concept of option time was replaced by one in which the stations agreed to clear a certain amount of network news programs in return for network-supplied music that they could use or sell as they wished.

Mutual Plan - It was—and is—a "swap time" or "barter" arrangement. The network makes its money by selling its five-minute newscasts (17 a day, on the half-hour) and the 25-minute daily World Today wrapups. The stations clear these programs in return for 55 minutes of free programming, mostly music, out of every hour from 6 a.m. to midnight, plus an hour a day of sports, stock market, farm and other news that can be recorded and inserted in local newscasts.

President Hurleigh feels that this operation was the first to apprehend and adjust to the changing radio patterns of the 1950's.

Mr. Hurleigh says that Mutual—which put new, higher rates into effect on July 1—currently has about 75 to 80% of its commercial positions sold, which means that few premium positions are going begging.

He credits the rejuvenated network radio situation to a variety of factors including a noticeably more enthusiastic attitude on the part of a number of agencies; a concern over the costs of television in the case of some advertisers; and growing awareness—through repeated demonstration—that radio can sell if it's given the chance.

No Picture Needed - Mr. Hurleigh feels agencies and advertisers are increasingly aware that "you don't need a picture to get the picture" of the sales points of most products. A new product or a new model of an old product might benefit from being pictured, he reasons, but otherwise words or a jingle can do just as well—and much less expensively.

Mr. Hurleigh can't see Mutual changing its mode of operation basically, but he does think it possible that in a few years networks will be doing more programming than now—though he doesn't know what form that programming may take. He does not, however, think it's apt to be drama.

NBC RADIO

William K. McDaniel, executive vice president in charge of the radio network, reports that an estimated 13% gain in sales this year will give NBC Radio its fourth straight year in the black—and its best year for as far back as the available records go, 1951.

The continuing comeback, he said, traces primarily to "pioneering in the development of a service which furnishes stations programs they could not attempt locally." Essentially, on NBC that is news, Monitor, sports and special news events. Returning to the affiliates' efforts to attract advertisers that had been developed by the network has also played a part, he feels, by giving the stations ample time to establish "a unique local sound."

Another factor, he feels, has been increased television costs which caused many multi-brand advertisers—as well as small advertisers who didn't feel they could afford TV—to turn to radio for additional (or full) support of each brand.

He points out that NBC Radio increased its rates in April 1961, says it may raise them again next year. "Network radio," he says, "is still the most underpriced medium."

May Expand - He also discloses that NBC Radio is considering expanding its lineup of affiliates. It now has 191 affiliates and is seriously studying approximately 30 additional markets with an eye to adding to those to be programmed by the network has also played a part, he feels, by giving the stations ample time to establish "a unique local sound."

NBC Radio's current program format evolved out of changes that started in the mid-1960's and included the week-end Monitor (and for a time a daily counterpart called Weekend), which subsequently was replaced by two hours of name-band programming called Bandstand until this, too, was dropped; the introduction of the five-minute news on the hour series in 1957 and a "hot line" system enabling the network to break into affiliates' local programming for major news reports.

A substantial part of NBC Radio's sales resurgence is attributed by Mr. McDaniel to aggressive promotion of frequency of advertising via hourly news, Emphasis and Monitor, plus "intensive research to show radio's ability to round out a media schedule—particularly its ability to complement TV."

Because NBC Radio has cut its commercial time by more than half—from about 72 hours a week before 1960 to about 28 weekly hours since then—Mr. McDaniel says it's difficult to compare current business with that of NBC Radio's "worst" year of 1956. But on an hour-for-hour basis he estimates it's about 35% higher now.

Commercial Preview: Princess Dial on the Desert

Last week's heat wave in Los Angeles was just a pleasant, cool memory to executives of Armour & Co., Foote, Cone & Belding (both Chicago) and Filmfair Inc. (Hollywood), who went on location to shoot parts of a Princess Dial soap commercial. The "safari" traveled onto the Mojave Desert where temperatures ranged up to 118 degrees. Two truckloads of equipment (left) were hauled 170 miles from Los Angeles to the shadeless desert for shooting that emphasized the drying forces of sun, wind and heat. And, since no breeze was stirring a fan was played on model Pat White for part of the sequence (right).

The commercial will be used later this month on 11 daytime shows on ABC-TV in Armour's schedule.

Loevinger Undecided on Commercial Rules

Regional RAB meetings hear Agency speakers, too

FCC Commissioner Lee Loevinger at the RAB management conference in Palo Alto Oct. 3 indicated to broadcasters that he has not yet made up his mind on the proposed rulemaking on commercial time limitations and said that published reports to the effect he's lined up with Chairman E. William Henry in favor of the proposed rulemaking were incorrect. He also said it was his opinion that any eventual rule adoption would at the very least differ from NAB code provisions and might be "substantially different."

Commissioner Loevinger said that he had a background in survey work, having obtained a degree in the field before he turned to law, and that long before revelations were made before the Harris subcommittee he had been "outraged over the years by the kind of nonsense being peddled by Nielsen." He said: "Nielsen comes in and gives a very pious defense in which he quotes recognized principles of research. The trouble is that the principles have nothing to do with the type of activity which this company happens to be engaged in. It's like a bank robber quoting the Ten Commandments."

New 'Magic' Needed • Walter Guild, president of Guild, Bascom & Bonfigli, San Francisco agency, told the conference that radio must find new "magic" if it is going to continue to be influential as an advertising force. He said radio should hire the "best research brains" to determine:

1. What elements of entertainment, communication and persuasion radio possesses that are unique to that medium.

2. How best these magic powers can be used.

"What a wonderful position radio would occupy if it had such information about itself," he said. Such a psycho-analysis of radio would not be too difficult, he felt.

At the RAB meeting in Chicago last week the story of how Wade Advertising, Chicago, decided to become a radio sponsor itself was told by the agency's president, Hal H. Thurber. Wade sponsors an evening market summary each weekday on WBBM Chicago called Business Day.

Mr. Thurber said that the agency in the past few years has increased its billings from about $11.5 million to a present total of $28.5 million. He told the RAB group that "most of that increase has come through the growth of our clients, and most of that growth has been due to the electronic media, television and radio."

Wade spends more than half of its billings in broadcast, he noted.

Sold on Broadcast • "So we started out practicing what we preached by deciding that there might be a way for us to publicize ourselves on the air," he recalled. Thus, last year Wade sponsored a weekly program on wgn-TV Chicago, Mid-America Marketing on the March, and this fall chose its radio series. The TV show featured as guests the top executives of a broad range of midwest companies. There are no commercials other than sponsor identification.

Mr. Thurber said that Wade's experience with the "soft sell" approach has paid off: the agency recently won Falstaff Brewing Corp.'s Pacific division account.

Don't Underrate Soft Sell • Mr. Thurber told the RAB meeting: "Making friends is the first step in making a sale." he said, "and you don't make friends by shouting at people."

puzzle:

Do We Speak Your Language?

Tucked away in a remote corner of Washington, inaccessible to everything except WMAL-TV's signal* and the CIA, is a language school for Peace Corps candidates. In this polyglot ivory tower, pandemonium reigns. Though each student knows two foreign languages, in the fine old tradition of government classification none has been assigned to a country whose language he speaks. Nor do any two speak the same two languages. The languages: French, Spanish, German, Dutch, Arabic, Turkish. We'll call each man by the name of the language he's studying. Mr. Spanish speaks Dutch and German. One of his colleagues speaks Dutch and Arabic. Mr. French and Mr. Dutch speak Arabic, German, Turkish and Spanish between them. Both the men studying the languages spoken by Mr. Dutch speak French. What were the two foreign languages spoken by the man studying Turkish? Talk turkey to us. Reward follows.

*WMAL-TV reaches Washington's remotest corners with balanced programming calculated to reach buyers for your clients' products. Fourteen great new ABC-TV shows, more than 28 hours of new local programming each week, spark our happy new TV viewing year. Acclaimed by young and old, firm and infirm, critic and claque alike. Inquiries invited by Harrington, Righter & Parsons, Inc.

Chicago meeting was Robert E. L. Richardson, who resigned last month as associate counsel to the house subcommittee on investigations. Mr. Richardson’s talk on how stations may use ratings safely without getting into trouble was patterned on his earlier presentation in the RAB meeting in Dallas (Broadcasting, Sept. 23). A copy is being sent RAB members.

Westinghouse expands its ABC-TV daytime schedule

The portable appliance division of Westinghouse Electric Corp. will expand its participating sponsorship of ABC-TV daytime programs this fall because of the success it has experienced this past spring and summer. W. H. Knorr, advertising manager of the division, reported last week.

Two ABC-TV daytime shows, The Price Is Right and Trailmaster are being added to Queen For a Day, The Tennessee Ernie Ford Show and Who Do You Trust. Mr. Knorr said a highlight of the new campaign will be commercials spotlighting the national introduction of the Westinghouse cordless electric toothbrush. The agency for the division is Grey Advertising, New York.

K&E to study use of code vs. noncode stations

Kenyon & Eckhardt is conducting a study to determine if it is economically feasible for its clients to restrict their spot radio-TV campaigns to stations that subscribe to the NAB code or have “equivalent” standards.

Starting last week, K&E began a study of the cost and efficiency of specific spot schedules if placed only on code or equivalent stations. Each of these analyses will cover such media considerations as cost, coverage, reach and frequency. When completed, each study will be sent to the client in question for its evaluation.

 Stephens Dietz, executive vice president of K&E, said the study is being undertaken because the agency believes in supporting self-regulation as the best alternative to government regulation in the area of “commercial excesses.” He indicated that if K&E analyses show that code or equivalent stations can deliver messages on an economic basis, the agency will recommend their usage to the client. Spot schedules for at least six important clients will be studied by Nov. 15, he said.

This basic policy shift, Mr. Dietz said, could become effective this fall and winter for some clients if the move proves to be practicable.

Pacific Gas buys ‘Battle Line’

A regional sale on the first-run Battle Line actuality series has been made by Official Films to Pacific Gas & Electric Co., San Francisco, for seven California markets, Seymour Reed, official president announced last week. The agency for the sponsor is BBDO, San Francisco.

The markets covered in the Pacific Gas purchase are San Francisco, Bakersfield, Chico-Redding, Eureka, Fresno, Salinas, and San Luis Obispo-Santa Barbara, and raises the number of markets in which Battle Line has been sold to 100, according to Mr. Reed.

Music goes round and wines pour out

Two wine makers are resorting to musical successes of yesteryears in their sales messages this fall.

CVA Co. (Cresta Blanca and Roma wines), Chicago, through Clinton E. Frank, that city, will launch a multimillion dollar saturation campaign this fall including radio, TV and newspaper supplements. TV spot buying will be in 25 major markets.

Featured in the air campaign will be the “C-R-E-S-T-A (pause) B-L-A-N-C-A” jingle, written by Morton Gould more than 20 years ago. Nelson Riddle provided the revised orchestration that will highlight the advertising program, scheduled to continue through spring.

The familiar tune, “That’s Amore,” is back on radio with a new set of lyrics in a two-state, 12-city saturation campaign for Paisano wine that started in September and will run through next June. E. & J. Gallo Winery purchased the commercial rights to the song from Paramount Music for a 10-year period and an undisclosed sum of money. The Gallo agency, Carson/Roberts, Los Angeles, handled the negotiations for the tune and bought the time on stations in Los Angeles, San Francisco, Fresno, Sacramento and Stockton in California, and in New York, Syracuse, Buffalo, Rochester and the Albany-Schenectady-Troy market, all New York. A number of stations are being used in each market, with 165 of the musical spots on the air each week in Los Angeles alone.

Warner Toub, C/R account supervisor, negotiated the deal. Larry Orenstein, C/R creative supervisor, wrote the new lyrics, Bob Emmenegger produced the spot.

'Magilla Gorilla and Friends’ to sell Ideal Toys

The Ideal Toy Corp., which will invest $30 million over the next five years to sponsor four animated series in more than 150 TV markets (Broadcasting, Aug. 26), has chosen a new Hanna-Barbera program, Magilla Gorilla and Friends, to start its campaign in January.

Abe Kent, Ideal vice president in charge of advertising, promotion and merchandising, explained last week that more than a dozen stations in key markets already have been signed by the agency, Grey Advertising, and said in some areas—New York and Los Angeles, for example—Ideal has the choice of several outlets to carry the program and advertising. With major markets cleared, Mr. Kent observed other areas will be lined up between now and January.

The Magilla program will be in three segments that total 30 minutes with commercials. One segment, spotlights “Magilla,” a lovable gorilla; another features “Mushmouse and Punkin’ Puss,” a cat and a mouse feuding in a hillbilly setting, and “Ricochet Rabbit and Droop-A-Long Coyote,” casting a rabbit and a coyote in the roles of a fast, tricky sheriff and his slow, bumbling deputy, respectively.

The fourth program in the Ideal line-up is one that is still in the developmental stage. It will be a half-hour cartoon series highlighting an “exploitable” character and will begin on stations in August 1964.

Mr. Kent said Grey has been concentrating on obtaining early evening spots (from 5-6:30 p.m.) to reach both the children and the adult audience.

Ideal selected the January start of its campaign, bypassing the Christmas 1963 activity, because it considers the toy industry to be moving into a “year-round” business approach, according to Mr. Kent. The investment of $30 million by Ideal over the next five years, he stressed, means the company is directing its entire consumer advertising budget into TV. Ideal will supplement its cartoon purchases with spot TV and perhaps network buys during the pre-Christmas season.

The purchase of the four series provides Ideal with the opportunity of merchandising the cartoon personalities involved.

Automotive Radio Group opens new offices

Automotive Radio Group Inc., Detroit, formed originally to offer a “package network” of stations to advertisers in the auto products field, has opened offices in other cities and will offer its station packages to advertisers in all categories, it was announced last week by ARG President Edwin R. Peterson Jr. ARG’s station list now totals about 600, he said, including outlets in most major markets and in all 50 states.

Mr. Peterson announced that John T. Hartigan, formerly media supervisor of Compton Advertising, Chicago, has joined ARG as partner and executive vice president, managing the firm’s new Chicago office at 230 North Michigan Avenue (phone 372-0038).

ARG also has named J. A. Forsyth vice president of West Coast operations, with headquarters in San Francisco’s Russ Building (phone Yukon 1-6038). Mr. Forsyth heads his own business investment firm there and has named an associate, Tom Lynch, to manage ARG’s new Los Angeles office at 3600 Wilshire Boulevard (phone 383-0757). Mr. Peterson said ARG’s New York office will be opened about Jan. 1.

Business briefly...

The Plymouth Valiant Dealers of the West, through N. W. Ayer & Son, Los Angeles, is sponsoring three five-minute weekday broadcasts and two five-minute shows on the weekend, covering the 1963 Sahara Invitational Golf Tournament direct from Las Vegas Oct. 14-20, on a special 18-station CBS sports network.

Shell Oil Co., New York, last week bought half sponsorship of A Man Called Mayr that was scheduled for NBC-TV, 10-11 p.m. yesterday (Sunday). Agency was Ogilvy, Benson & Mather, New York. United Vintners’ Inc. (Italian Swiss Colony) through Honig-Cooper and Harrington, that city, had purchased a minute in the show, with the remaining two minutes available to stations on a co-op basis.

American Safety Razor Co., subsidiary of Philip Morris, has begun the biggest television campaign in its history promoting Personna and Pal Stainless steel blades. Through Dec. 31, the razor company has schedules in CBS-TV shows, Jackie Gleason, Red Skelton, Perry Mason, Route 66, Alfred Hitchcock, Rawhide, East Side-West Side, Evening News and NFL Football in addition to spot buys in 32 major markets. Agency is Benton & Bowles.
Fresno is the nation’s #1 agricultural county

and BEELINE RADIO KMJ is the way to reach this prime California market

Pine Flat Dam is only one of the vast water sources that contributes to the agricultural fertility of the inland valley. Here many people live and work — people you want to reach because of their buying power. The way to do it? Beeline Radio KMJ. And KMJ is only one of four Beeline stations — the key to California’s rich inland valley and Western Nevada.

McCLATCHY BROADCASTING COMPANY

delivers more for the money in inland California and Western Nevada

PAUL H. RAYMER CO. - NATIONAL REPRESENTATIVE
What ARF wants to do about ratings

ON AGENDA: VALIDATION OF OTHERS’ WORK PLUS ORIGINAL RESEARCH

The Advertising Research Foundation last week clarified the extent to which it intends to get involved in analysis of the audience measurements. But reaction to the statement by research firm directors indicated a wide divergence of opinion as to just where and how far ARF should go.

Dr. Lyndon O. Brown, ARF chairman who delivered the policy statement at the foundation’s ninth annual conference, noted that “ARF does not intend to inject itself in areas which are primarily the responsibilities of broadcasters.” He presented three general fields where the foundation hopes to move in audience research analysis.

The first would be in continued availability of ARF facilities for analysis of established measurement techniques of independent services to be offered at the request and expense of the individual service.

Next, the foundation will “concentrate a large part of its activities . . . in methodological studies designed to improve techniques and advance the standards of audience measurement.” According to ARF, this would involve a series of limited projects each designed to resolve a specific methodological problem. Dr. Brown indicated that resources for these studies would have to come from advertiser, agency and media sources.

ARF also intends to originate experimental research projects of its own. Considering the current problems in broadcast audience measurements, the foundation proposes to research such areas as effect on viewing habits of meter installation or diary keeping, difference in viewing habits between homes which have meters or diaries and those which refuse them, specific differences between viewing by individuals and set tuning, and accuracy of the recall method in telephone and personal interview.

ARF is currently discussing with the Radio Advertising Bureau the latter’s projected $200,000 radio rating methodology study and is involved in an American Research Bureau rating study.

Varied Response * Initial reaction to the statement by research companies themselves fell far short of unanimous approval of its particulars. Five research firms presented their views on the ARF policy in a panel discussion immediately after Dr. Brown’s statement.

A. C. Nielsen Jr., president of A. C. Nielsen Co., referring to ARF’s proposed methodological research projects, urged cooperation in such work between ARF and the National Association of Broadcasters’ Ratings Council. He expressed concern on the possibility of having to choose between the projects of NAB and ARF and warned against duplicated effort of the two groups.

Mr. Nielsen said the four specific questions of broadcast research methods suggested in the ARF statement for ARF-initiated studies had already been answered by special studies made in the past at considerable expense. He suggested that before ARF embark on specific studies it should poll its membership to determine questions of greatest concern.

W. R. Simmons, president of the research firm bearing his name, said that his company would willingly change its research technique if it were proven faulty by a definitive study. Simmons now uses a 24-hour aided recall method.

The Simmons company already has a close association with ARF. It subjected its media studies to ARF review this year and has requested the same service for its TV and magazine studies in 1964, including observation of field work.

ARB Backing * James W. Seiler, director of the American Research Bureau, indicated full cooperation by his firm with the ARF proposals which he termed “excellent.” However, he had suggestions of his own as to where ARF might best begin to direct its efforts.

The advertising community, Mr. Seiler said, has never yet defined what it wants measured. “There’s no definition of what a TV viewer is,” he asserted. The first ARF consideration, he said, might be to clarify what is being measured. Outlining a first-things-first policy, Mr. Seiler suggested an ARF publication on how ratings can and ought to be used.

Alfred Politz, president of Alfred Politz, president, Alfred Politz Research; Phillip W. Wenig, president, SRDS Data; A. C. Nielsen Jr., president, A. C. Nielsen, and James W. Seiler, director, American Research Bureau.

The ARF message and its evaluation by the research firm heads were part of the Ninth Annual ARF Conference held last Tuesday in New York.
Politz Research, warned against "ARF's possible role in advising the advertising fraternity as to what kind of information they should have." He said "the further it steers away from such advice, the more it will contribute to the progress of media research." He advised the ARF to confine itself to investigations of "whether organizations do what they say, and say what they do."

ARF's function would best be a policing organization, Mr. Politz stated, checking the work of interviewers in the field and reviewing the actual questionnaires before the research company sees them.

SRDS Data Inc.'s opinion of the ARF statement as expressed by president Philip W. Wenig was one of "minor disappointment." Mr. Wenig said the foundation was falling short of its potential and that areas selected for study are "of a lower order" than they should be.

He stated that research in the area must be conducted with a view to computerized use of media data. He revealed that a forthcoming all-media SRDS Data project would be submitted to ARF for analysis.

Relation of computers to the audience research problem was also discussed by Stanley D. Canter, vice president and research director of Ogilvy, Benson & Mather, at a later session of the ARF conference.

Mr. Canter suggested that agencies pool their funds to gain full benefits that he feels computers promise in media selection. He added that he intends to discuss with ARF its possible role in such a project. He said his agency is "ready to contribute both money and talent to such a common endeavor."

The Pulse Inc., a major audience research firm, was not invited to participate on the ARF panel. Dr. Sydney Roslow, Pulse director, told Broadcasting last week that he could not yet comment on the foundation's policy statement.

NAB View Queried later, Donald H. McGannon of Westinghouse Broadcasting, chairman of the NAB research committee and of the NAB Ratings Council, said ARF's statement did not seem to indicate a policy greatly different from what he had thought ARF's policy already was, but that it appeared now to be on a somewhat higher level than before.

He said that he and his NAB groups—which have docketed broadcast audience research methodology as one of their basic concerns—welcomed ARF into this area. The more complete the partnership at work on this problem, he said, the more complete the solution is apt to be.

TWO SUPPORT RATINGS IN 'RANGES'

Washington investigator, TVB, join in urging change

Charles P. Howze Jr., chief counsel of the House Subcommittee on Investigations, and the Television Bureau of Advertising last week joined those who are urging the reporting of broadcast ratings in ranges rather than in precise figures.

Speaking before the Advertising Research Foundation conference in New York, Mr. Howze said that radio-TV time is bought on the basis of ratings that are "imbued with a degree of precision that not even the rating companies in their more candid moments claim for them."

The chief counsel of the subcommittee which conducted a two-year investigation of ratings, joined other government officials who earlier had warned the industry that it must cure ratings abuses. He reminded his ARF audience of the possibility of government control of the rating business and said that legislation in the field is being discussed. He placed part of the blame for alleged misuse of rating data on "laziness—an unwillingness to bother with statistical complexities and to evaluate the numbers in the context of other pertinent facts."

On reporting in ranges, Mr. Howze said it might be a good idea for researchers to change the format of rating reports "to dramatize the fact of statistical variance. There are quite a few sophisticated users of ratings who understand the fallibility of absolute numbers, but I fear they are hopelessly outnumbered by those who do not." He expressed amazement that broadcasters and advertisers have accepted audience measurement figures without criticism for so long.

Mr. Howze warned the broadcasting and advertising industries that it is time to discard practices of the past and adopt needed reform which, he said, will not be as painful as first appears.

TVB On Ranges In coming out for reporting, TVB's president, Norman E. Cash, suggested that the difficulty presented by the complexity of figures which such range statistics would represent to media decision makers was outweighed by the sounder decisions they would result.

Mr. Cash qualified the TVB position, noting that "our people say such 'ranges or error' could be just as misleading as the small differences to which they would be applied. But," he said, "this in no way reduces our need for such figures or our willingness to work with them once applicable ones can be determined."

TVB, along with the Radio Advertising Bureau and ARF, had previously been cited by Ruth Jones, of J. Walter Thompson, and head of the Broadcast Media Committee of the American Association of Advertising Agencies, as proponents of the range concept (CLOSED CIRCUIT, Sept. 23).

Vote Against Ranges James Seller, director of American Research Bureau, took an opposite view on range reporting. Mr. Seller said the principal objection is that inexperienced users would take range reports to imply that the true figure could just as easily be at any point within the reported range, rather than the median figure, presently published as a rating.

Statistical laws specify that in a majority of cases results would cluster around the center, with a rapid dropping-off toward the extremes, he said. There also is a technical problem in
range reporting, Mr. Seiler said, in that no audience measurement service has a pure probability sample.

"In our opinion, there are ranges to be used there would be a great tendency for many sellers of time to use only the high point of the range and buyers the low point as a demonstration of where the audience might be," Mr. Seiler concluded.

Richardson, Sparger back in news
BOTH ARE NOW WORKING IN MARKET RESEARCH

Two Oklahomans, who as investigators for a House subcommittee, turned the broadcast research business upside down last spring, talked about their new jobs in private enterprise last week. Each is related to market research.

Both denied suggestions that their work represents any conflict of interest, especially since they are no longer connected with the government.

Robert E. L. Richardson, former associate counsel for the House Special Subcommittee on Investigations, told the Radio Advertising Bureau's management conference in Chicago that his main interest is to prepare to run for Congress in Oklahoma. If he had been interested in concentrating on a career as a broadcast consultant, he said he would have opened an office in New York or Washington, not in Weatherford, Okla.

Presently a consultant for the McLendon stations, Mr. Richardson spoke at RAB meetings last month and urged broadcasters to check out research before using it in sales and promotion (Broadcasting, Sept. 23, 16).

Rex Sparger, like Mr. Richardson, a former member of the Oklahoma legislature and a co-investigator during their 18-month examination of the research field for the subcommittee (Broadcasting, Feb. 18, et seq.), is now employed as West Coast representative of the Albert E. Sindleiner Co. of Philadelphia, it was learned last week.

Mr. Sparger told Broadcasting that his work for Sindleiner will be exclusively in the sales field, primarily in research for the motion picture industry. He also will solicit clients for a planned local radio research service by Sindleiner, a major market research firm that has expanded in the broadcast field since the spring hearing.

Albert E. Sindleiner, president, was a principal witness in the rating hearing and won approval from its members and staff for his professional standards and for information about the A. C. Nielsen Co., largest in the field and a major competitor of Mr. Sindleiner's for several decades.

In his appearance before the RAB meeting in Chicago, Mr. Richardson defended his proposal that broadcasters check research before using it. He said that those who call the idea "impractical" because it might require research companies to hire additional employees, should know that at least two firms (American Research Bureau and C. E. Hooper) permit such inspections of their work.

His critics, Mr. Richardson said, "ought to be more concerned about the stations and the weight that has been rested upon them by the FCC and the Federal Trade Commission." Both agencies have told broadcasters that they will be held responsible for research reports they use, regardless of disclaimers of responsibility for accuracy (Broadcasting, June 17, et seq.).

Replies to Editorial • Mr. Richardson called attention at the RAB meeting to "a trade paper editorial" that first criticized him for seeking clients from among broadcasters and secondly for creating a problem in the ratings business. (The editorial appeared in Broadcasting Sept. 23.) His plans are to run for Congress, Mr. Richardson explained, his ambition for several years. This is why he opened a law office in Weatherford after leaving the subcommittee last month, he said. "My time is limited and I am not seeking more clients," he added.

Mr. Sparger, now living in Hollywood, pointed out last week that the subcommittee hearing did not involve California except for San Diego; therefore he felt no conflict of interest between his new job and his work for the subcommittee. He notified Representative Oren Harris (D-Ark.), chairman of the subcommittee and its parent, the House Commerce Committee, that he was leaving the staff because of poor health (Closed Circuit, April 8).

Agency appointments...

- The American Home Products Corp. has appointed Cunningham & Walsh of New York for Aero Shave, an account formerly handled by Tatham-Laird Inc., Chicago. C&W reports that approximately all of the estimated $1 million in yearly billings on the account will go into TV. Last year, an estimated $944,500 of Aero shave billing went into TV (gross time billings).

- Waring Products Co., New York, has appointed The Zakin Co., that city, as agency for the Waring Blender and other electrical appliances and for Waring's commercial products division. Waring is a division of Dynamics Corporation of America.

- Claussen Bakeries Inc., Augusta, Ga., has appointed Cargill, Wilson and Acree Inc., Richmond, Va., to handle its advertising account. Claussen is owned by Fuqua Industries, which owns WJBF-TV Augusta. The new account will be serviced by C&W's Charlotte, N. C., office.

- Falstaff Brewing Corp. has appointed Wade Advertising, Los Angeles, to handle all advertising for the brewery's Pacific division, made up of California, Nevada and Hawaii. Dancer-Fitzgerald-

NBC-TV sells daytime

NBC-TV announced sales to advertisers in its daytime schedule which the network said represented nearly $7 million in time billings over a six-week period. Major purchases included Sterling Drug Inc., which through Dancer-Sample, renewed four programs; General Mills Inc., through Needham, Louis & Brody, buying into nine shows, and General Foods Corp., handled by Young & Rubicam expanding its schedule by placing orders in four daytime shows. NBC-TV said two daytime color shows, Missing Links and Merv Griffin's Word for Word, attracted 35 advertisers before their respective Sept. 9 and 30 starts. The latter show is near a sold-out position.
TV PRODUCTION FACILITIES
1. Four studio TK-60 black & white cameras; three remote cameras in mobile unit.
2. Two studios (60' x 70' and 45' x 45').
3. Eighteen-foot turntable in large studio.
4. Panorama and pedestal camera dollies.
5. Rear screen projection.
6. Special effects amplifiers, dual system.
7. Two full-color RCA TR-22 video tape recorders.
8. Full-color projection facilities.
9. One 3-V color projection camera; two monochrome film cameras; two synchronized 35 mm slide projectors; four 16 mm film projectors.
10. Cartridge RCA audio tape facilities.

BROADCAST CENTRE
to the QUAD-CITY Market

The WOC Stations climax 42 years of radio and 14 years of television service in the public interest — and in the service of their advertisers.

WOC AM-FM-TV
DAVENPORT, IOWA
Represented Nationally by Peters, Griffin, Woodward, Inc.
We have our walls, too. But the big difference is the purpose. And our kind of purpose keeps such walls standing, keeps Americans rallying to defend and strengthen our country. The Payroll Savings Plan for U.S. Savings Bonds is a good example of how Americans rally to a good cause. When you install a Plan in your company, you harness the power of your payroll in strengthening our country. You help encourage thrift that increases reserve buying power and individual independence. Keep our kind of wall standing forever. For help in installing and promoting a Payroll Savings Plan for U.S. Savings Bonds, call your State Savings Bonds Director. Or write Treasury Department, U.S. Savings Bonds Division, Washington 25, D.C.

Keep Freedom in Your Future… U.S. SAVINGS BONDS
Sample, New York, will continue as national agency on the account, serving the other 27 states of the firm's 30-state marketing area. The remainder of 1963 will be a "period of transition," George Holtmann, Falstaff advertising director, said, when Wade will prepare "a bold and innovational approach to an advertising campaign for the Pacific division," which will be started in 1964.

- Hilton Credit Corp. has named McCann-Erickson, Los Angeles, to handle advertising for Carte Blanche, whose budget is $750,000, including both media and direct mail advertising. Russ Jones will be account director.
- General Foods Inc., Puerto Rican Cement Company and Farmacias Moscoso Inc. have appointed Young and Rubicam, Puerto Rico, as agency.
- Sicks Rainier Brewing Co., Seattle, has appointed Doyle Dane Bernbach Inc., Los Angeles, to handle advertising of Rainier ale in addition to Rainier beer for which DDB has been the agency since 1961.

Rep appointments . . .

- KREM-AM-TV Spokane, Wash.: John Blair companies named exclusive national representatives.

ABC-TV showing interest in Thanksgiving special

A one-hour TV special for children, The Cowboy and The Tiger, is now fully sold to advertisers. Helitzer, Waring & Wayne, New York, the agency which commissioned the musical program is negotiating for a time period on Nov. 28 on ABC-TV.

The initial plan was to telescast the program on that day (Thanksgiving) and repeat it on Sunday, Dec. 8. As conceived, the program was to be in 25 markets on a spot basis but ABC-TV reportedly has shown its interest.

The new advertiser to sign is American Doll & Toy Co., which along with Transogram Co. and the Irwin Corp. are all clients of Helitzer, Waring & Wayne. Two other advertisers on the show are Nestle's, through McCann-Erickson, and Miles Labs, through Wade Advertising.

first every day

...and here's why:

- EXCITING, COLORFUL LOCAL PROGRAMMING
  Central New York's greatest news department; Upstate New York's only live musical variety show; celebrity-filled live women's show; outstanding documentaries that out-rate network programs.

- GREATEST TV PERSONALITIES
  Fred Hillegas, Joel Marcus, Jerry Barsha and experienced news staff of seven; Denny Sullivan and the WSYR Gang, musical variety show starring Eileen Wehner and Fred Krick; Bill O'Donnell, sports; Ed Murphy, movies and weather; Kay Russell, women; "Salty Sam," Popeye host. Central New York's greatest salesmen!

- BEST TECHNICAL FACILITIES
  In Central New York—first with color; first with video tape; first with a modern, completely-equipped TV center and the only channel with maximum power at maximum height.

- EXPERIENCE AND "KNOW-HOW"
  A top-flight veteran staff directed by executives averaging more than 20 years at WSYR-TV. No "Johnny-come-latelies," these.

- OVERWHELMING SUPERIORITY
  WSYR-TV delivers 38% more homes than the No. 2 station.

SPOT TV BILLINGS PER FAMILY

TvAR analysis shows national average reaching new high of $10.99 per family; markets range from $15.21 to $3.53.

Advertisers' spot television billings in 1962 varied, market by market, from a high of $15.21 per TV family to a low of $3.53, or an increase in a year's time of about $1.50 and 50 cents, respectively.

These extremes, and comparisons, are available in Television Advertising Representatives' fourth annual analysis of "Spot Television Expenditures Per Family," which is being released today (Oct. 7). The figures were derived by applying TELEVISION magazine's estimates of TV homes against the FCC's spot TV dollar figures, market by market. FCC placed total spot billings, for time only, in 1962 at $539 million (BROADCASTING, Sept. 23).

The national average shot up from $9.65 per TV family in 1961 and $10.03 in 1960 to a new high in 1962 of $10.99.

The $15.21 per family high point was reached in two markets—in Chicago (also the heaviest per-family spending market in 1961) and in Buffalo-Niagara Falls (second heaviest average in 1961). At the other end of the scale: the combined market of Evansville, Ind., and Henderson, Ky., averaged $3.53 per family.

Second highest per-family average—$14.07—was in the combined market of Houston-Galveston.

In announcing the new TVAR study, Robert Hoffman, the rep's marketing and research vice president, who supervised the study, noted that for the most part per-family outlays varied with the size of the market, and that in the top 20 TV markets, the expenditures on spot averaged $11.03 per family as compared to $8.92 in markets below No. 20 and on down to No. 40. Below No. 40 the average was $5.73.

Variations exist among markets even in the top 10 where the range went from the $15.21 average in Chicago to $9.84 in Boston. From the viewpoint of TV homes, Mr. Hoffman, noted a difference in spot TV per-family billing in two markets comparable in size in the count of TV homes. For example: $8.13 in Cincinnati compared to $11.43 in Baltimore.

Mr. Hoffman, in analyzing the report, also emphasized that his company made no comparisons between the 1961 and 1960 per-family figures for individual markets because changes in TELEVISION's market definitions made them unmeaningful.

The TVAR calculations cover markets for which FCC figures are available: those with three or more reporting stations. They exclude Detroit because FCC figures do not include billings for CKLW-TV Windsor-Detroit. Also, the Buffalo-Niagara Falls does not include Canadian viewers. For combination markets with varying set counts, TVAR has made separate computations which are presented in an appendix following the regular list.

The list and the appendix:

(a) Data for Detroit have been excluded inasmuch as the FCC total for that market does not include billings for stations-TV. Excluding CKLW-TV, billings per family came to $9.17 in 1962.

(1) Excludes TV areas where FCC billing figures represent a combination of 2 or more markets with varying set counts. (Overall figures for these areas are appended.)

As noted, the data shown in this report exclude those television areas where the FCC billing figures represent a
Broadcasters produce the spots, Lufthansa produces smiles

Last November Lufthansa German Airlines started a test campaign using 11 FM stations in Los Angeles. The goal was to secure leads—and only qualified leads—for a European tour priced at $1,029 per person. The stations broadcast three one-minute spots a day, using copy supplied by Lufthansa (there was no agency involved). At end of three months they had delivered only 64 leads.

The FM stations were even less satisfied than Lufthansa with this meager showing. They took their problem to the promotion committee of the FM Broadcasting Association of Southern California, which went to work on it, coming up with six new spots, 50-second transcriptions, plus 10-second live tags. These new spots glittered with glamour, where the old ones had been stodgily factual. “Did you ever dream it would be possible to fly to Europe and back via intercontinental jet, visit nine countries and 35 different cities, enjoy excellent hotel accommodations and motor tour through the Old World for little more than $1,000?”

The live tag asked the listener to “write or phone today for a complimentary dinner at one of Rome’s most luxurious restaurants plus your choice of a bottle of Chateau No. 5 or a complete styling from an internationally famous French hairdresser.”

The first week the new copy was used, Lufthansa got 125 leads and before the campaign ended the airline had received a total of 910 qualified leads, all requesting complete literature on the tour. In March, everyone who had written the FM stations for literature about the tour was invited to an evening meeting to see a fashion show of travel clothes, two 20-minute films of European scenes and a sales presentation on the tour. The FM stations received 1,373 additional requests for tickets for that affair, filling the grand ballroom of the Statler-Hilton with qualified prospects for the European air tour.

From B.J. Hamrick, FMBASC president, comes the final commercial: “Anyone knowing the difficulty of getting any sizable number of Los Angelenos out to an evening meeting downtown—let alone to a meeting where it was obvious they would get a sales talk—let alone persons who could afford a $1,000 European tour—knows what an astounding demonstration this was of the power FM has to reach and activate upper-middle income prospects.”

combination of two or more markets with varying counts (e.g., Hartford-New Haven-New Britain-Waterbury).

Since these “combinations” frequently include markets of varying size, the billings per TV family would not necessarily apply equally throughout each of these FCC-designated areas. For purposes of completeness, these areas are shown below with the spot television billings per family computed on the basis of the largest TV market in each group.

RADIO MARKING TIME WITHOUT IMAGE

Maneloveg says major status will come with ‘profile’

What is radio’s image as an advertising medium today? Its image is no image at all. Both question and abrupt answer were presented in New York last week by Herb Maneloveg, vice president and media director, BBDO, at a CBS Radio Spot Sales clinic.

Mr. Maneloveg challenged the radio industry to provide media planners with a “national radio profile.” When this is done, he said, radio will return as a major medium. If it’s not done, radio will slip from the plateau where it feels it is now marking time.

Radio people are directing the information in their sales pitch to media buyers rather than media planners, a serious mistake, he said and added that BBDO is “guessing” at radio’s value as an ad medium. He called the radio data which BBDO feeds to its computer for media selection “contrived.” He said: “We don’t perhaps, give radio a very good exposure score. We estimate that about 60% of radio’s audience is actually aware of a commercial message.”

Mr. Maneloveg outlined information his agency considers essential to an adequate radio study:

- Coverage of all major markets.
- Estimation of metropolitan and nonmetropolitan audience by station.
- Estimation of total audience.
- Coverage of all time periods showing homes and listeners per quarter hour and demographic data including breakdowns by sex, income, age.
- Record of in-home and out-of-home audience.

If stations will support such a national study Mr. Maneloveg said, BBDO will help to underline it. In the past, he noted, such studies have been neglected because of a combination of agency and station apathy, mainly to the cost of such a venture. He added that BBDO had supported Pulse last year in a Pulse LQR survey that yielded some demographic data but that other agencies had shied away from such research support (BBDO reportedly contributed about $2,000 to the Pulse study mentioned by Mr. Maneloveg).

He referred to radio measurement of one research firm as “a quick telephone popularity count,” and added that although Pulse does give some demographic breaks, this is not enough on
Sponsors buy 'Powell'

A poll conducted by Four Star Distribution Corp. shows that the Dick Powell Theater is fully sponsored in 75% of the markets carrying the series. Len Firestone, vice president and general manager, reported last week that he considers this sales achievement "a record" in the syndication field. The series is sold in 38 markets.

The poll resulted in 29 replies, Mr. Firestone said, and 19 stations report the show is sold out while five stations noted that it is partially sponsored and "moving towards SRO status."

which to base a sound media decision.

What About Programming? * Maury Webster, vice president and general manager of CBS Radio Spot Sales, took a different approach in discussing the key to radio's future at the clinic. That key, he averred is programming. He said that although radio will continue to be an entertainment medium, its great potential is as a medium of information and service. The proper editorial climate, he said, "is not only good for the listener, it's valuable to the advertiser."

John F. Shima, media group head at Kenyon & Eckhardt, who also addressed the clinic, expanded on the point saying: "There is little knowledge at advertising agencies of how to use programing values, little awareness of programing in radio at all."

He attributed this situation to four factors: buying ratings is too easy; the problem of understanding programing policies of 3,000 stations; lack of understanding on the part of agency people of how to use programing information and the too facile classification of stations into categories such as "rocker," "good music," or "formula."

The answer to these problems, Mr. Shima suggested, is to educate agency people to the importance of programing by such methods as station profile tapes, relation of programing to the demographic characteristics of the market and emphasis on the difference in listener attention level which specific programing produces.

Court rules 'truth' is a relative term

The eye of a television camera may be as deceiving as the human eye. What it sees may appear distorted and "reality" may need to be fabricated. However, material substitution should not be a tool for deceptive advertising.

This was the message contained in a decision handed down last week by the United States Court of Appeals, New Orleans, ordering the Federal Trade Commission to reframe its cease and desist order against Carter Products Inc., manufacturer of Rise shaving lather.

The FTC order was issued in May 1962, and ordered Carter to cease ad practices that disparaged competing products through the use of deceptive TV commercials. The commercials showed Rise as the lather "that stays moist and creamy" while showing, in action, a competing product that did not remain moist.

The competing cream was not really lather but "ultra-wet 60L," a foaming agent, and 90% water.

Judges John M. Wisdom, Walter P. Gewin and Orle L. Phillips presided over Carter's appeal, with Judge Wisdom writing the decision.

Judge Wisdom granted that technical shortcomings often require that substitutes be used for the real things in TV commercials. He noted, "On television truth is a relative term. Assuming that collisions between truth and salesmanship are avoidable, i.e., that mock-ups are not illegal per se, the basic problem this case presents is: what standard should the FTC and the courts work out for television commercials so that advertisers will appear to be telling the truth, consistently with Section 5 of the Federal Trade Commission Act prohibiting unfair advertising practices."

Tough Scraper * Judge Wisdom wrote that the findings of the Colgate-Palmolive "sandpaper" case apply to the Carter case. In the "sandpaper" case C-P used a mock-up of sandpaper to demonstrate the soaking action of shaving cream. The FTC called the commercial deceptive, to which the court agreed but set aside the FTC's order on the grounds that the commission's criteria in arriving at its decision were unacceptable. The FTC decided that although one would not purchase shaving lather to barber sandpaper, the promotion was nevertheless deceptive.

Carter's Rise demonstrations also were considered "false and misleading" by the court. Judge Wisdom said, "Although we uphold the commission on the merits, we have difficulty with the order."

Following the precedent set in the C-P "sandpaper" case the FTC was ordered to modify the cease and desist order issued to Carter. The court suggested the commission delete the word "genuine" and accept mock-ups that "compensate fairly for the technical limitations of television," however prohibit simulations that distort "the actual qualities" or products depicted.
Take a good look at this smart new model. Here's that "custom" appearance to satisfy the proudest management; "custom" quality and flexibility to please the most discriminating engineers... all in a production-model!

CUSTOM STYLING—Striking new lines in blue and silver bring a color accent to control rooms. Color-coded operating controls are engineered to avoid errors. Only 39" long, it is compact and self-contained... to satisfy new or existing arrangements.

CUSTOM QUALITY—The BC-7A is fully transistorized for long-term reliability. All amplifiers have input and output transformers... precise impedance matching for both program and monitoring circuits. You get quality stereo monitoring (10 watts output), quality gain controls, quality leaf-type key switches on all program circuits.

CUSTOM FLEXIBILITY—You have interchangeable plug-in modules... preamplifiers, isolation/balancing units, program amplifiers, monitoring amplifiers, cue amplifier and power supply—all in one self-contained unit. You get three-mode operation... selector switch to instantaneously convert from dual channel, parallel or stereo operation. We can't name them all here, but we believe you will agree that this is the kind of customized styling, quality, and flexibility you want. Let your Broadcast Representative show you all the features that make this console your best buy. Or write RCA, Broadcast and Television Equipment, Bldg. 15-5, Camden, N.J.

GOVERNMENT

More opposition to commercial limits

FCC PROPOSAL CALLED ILLEGAL AND AGAINST PUBLIC INTEREST

Everyone agreed last week—any government regulation of commercial time standards for broadcasters would not only be illegal but contrary to the best interest of the public.

The FCC last Monday (Sept. 30) received more than 100 filings opposing its proposed rulemaking to adopt the commercial time standards of the National Association of Broadcasters' radio and television codes. Leading the deadline rush of comments were the three major networks, the NAB, several multiple owners and state broadcasters associations.

The NAB, as did many other commenters, predicted the eventual end of broadcasting as a free enterprise if the commission moves into commercial time regulation. This destruction of broadcasting freedom would not be in the public interest, the association said.

The NAB said for the commission to limit commercial time "would be the assertion of power never expressly conferred or even intended through inference by the Congress." The association recited legislative history to support its view. It said that when Congress created the FCC in 1934 to replace the Federal Radio Commission the legislators were aware of the problems concerning advertising in broadcasting, but "the fact that it declined to legislate in this area . . . can mean only that the Congress did not intend for the commission to determine by regulation advertising policies of stations."

The association further noted that in 1955 and 1957 bills were introduced in Congress that would have provided the commission with authority to regulate commercial policies, but that in both instances no regulation was approved. ABC and CBS joined the opinion that the commission lacks legal power to promulgate such regulation.

In Truth A Preventive • The NAB pointed out that although Representative Walter Rogers (D-Tex.) has introduced a bill aimed at prohibiting the commission from adopting commercial policy regulations, this should not be interpreted, as some might, as meaning the commission presently does have the authority because if it didn't there would be no need for a preventive measure to be taken. This is not the case, the NAB said. "As we view it, Congressman Rogers' bill is a counter measure designed to resolve the matter of jurisdiction through legislative means rather than through lengthy and expensive court proceedings."

The association concluded that Congress in the past and recently has shown that it intends the responsibility to be placed on "the broadcasting licensee to select and control the advertising material which is broadcast."

NBC also told the commission that responsibility should be placed on the licensee. Rather than "promulgating a 'commission formula'" for commercial standards the commission should rely on the self-regulation of the licensee. The network said the commission's licensing procedure should emphasize self-regulation and self-development. Each licensee should, in applications for new stations and renewal applications, inform the commission "of his own conception of his public interest duties with regard to advertising material and what he does to fulfill that conception," NBC said. NBC felt this approach would take into account the varied situations that exist from community to community. Self-regulation is the answer.

Westinghouse Broadcasting Co. also suggested the commission adopt a policy similar to that described by NBC, as an efficient means for making public interest determinations.

Unlike Common Carrier • A much used argument against the proposed rules is that they constitute a common carrier or public utility concept of regulation. This view is based on the belief that regulating commercial time standards is in effect regulating the income of

Henry's pen pals no match for Minow's

FCC Chairman E. William Henry's "overcommercialization" speech before the International Radio & Television Society in New York two weeks ago appears to have attracted far more interest within the broadcasting industry than outside it.

The chairman's office as of Thursday (Oct. 3) had received 125 pieces of mail—all but four of them expressing approval of the speech declaring that the commission should spell out what it means by overcommercialization.

But if reaction to former Chairman Newton N. Minow's "vast wasteland" speech is any criterion, the response to Chairman Henry's address is less than overwhelming.

Within a week of the speech in which the former chairman, in an address before the National Association of Broadcasters in May 1961, caustically criticized TV programming, 2,500 letters, cards and telegrams were received (Broadcasting, May 22, 1961).

According to a breakdown made by Chairman Henry's office of the mail he received, some 80 correspondents complained about the frequency of commercials. The length and taste of commercials, as well as their volume or loudness also was criticized.

Howell Speaks • One of those opposing the chairman's address was Rex G. Howell, a 36-year broadcasting veteran and a member of the NAB radio board. Mr. Howell apparently stung by Mr. Henry's sweeping criticism of broadcasters' commercial practices, said all licensees shouldn't be condemned for the faults of a few.

He said that during the time of the nationwide TV quiz show scandal which was sparked "by less than a dozen culpable employees," there were cases of bankers embezzling funds, of lawyers being disbarred and of physicians being charged with malpractice.

But, he asked, "Did you read any headlines of blanket indictment against these professions? Was there any movement to require government enforcement of the Canons of Judicial Ethics or the Hippocratic Oath?"

Mr. Howell welcomed Chairman Henry's proposal for a government-industry conference on commercial time standards. He said many of broadcasting's problems, "particularly the economic ones," are not fully understood by the FCC or Congress.

Mr. Howell is president of KREX-AM-FM-TV Grand Junction, KREY-TV Montrose and KGFL Glenwood Springs, all Colorado.
Buying a pig in a poke is no way to live high on the hog.

In some parts of the country, you can buy the two biggest tv markets in sight, and you've got most of the tv homes in the bag. Do the same thing in North Carolina, and you may be buying a pig in a poke. Down here, the two largest markets overlap like crazy. This makes it tough to tell what kind of coverage you've really bought. The logical way to cover North Carolina with tv is by combining Charlotte with Raleigh. The Raleigh-Charlotte combination gives you unduplicated coverage of more people than any other two-station buy. And coverage of the counties that rack up 88% of all retail sales. Who to buy in Raleigh? We'd say WRAL-TV. But don't take our word for it. Call up that guy from H-R. He'll show you plenty of proof that WRAL-TV really brings home the bacon for advertisers.

WRAL-TV, RALEIGH-DURHAM, N.C.
WWDC Radio salutes Washington's finest

This young, hard-hitting executive is Sy Seleznow, dynamic Merchandising Vice President for the Washington Division of the Grand Union Company. He is responsible for many "firsts" in the brilliant direction of his division's merchandising. The current "Total Value" campaign created by Seleznow has produced quite a stir in supermarket circles. Better still, it is ringing the cash registers in 34 Grand Union supermarkets locally. This "sound of music" would not be possible without the role played by WWDC—"the station that keeps people in mind." Alvin Epstein, Inc. has been the agency for radio and TV for 12 years.

Represented nationally by John Blair & Company

WWDC RADIO WASHINGTON D. C.

a licensee, such as the rates charged by public utilities are controlled. CBS pointed out that this public utility concept is definitely prohibited by the Communications Act which states that broadcasters are not to be considered common carriers.

The West Virginia Broadcasters Association called the proposed rules "raw and unabashed public utility regulation" of the industry.

The NAB said the power to control commercial time is "the power to destroy.... We submit that as the First Amendment prohibits the exercise of such power over newspapers, it prohibits the exercise over broadcasters."

ABC told the commission that advertising is covered by the First Amendment just as editorial content is protected from censorship. ABC quoted the Supreme Court decision in Grosjean v. American Press Co., in 1936. This case decided that a 2% license tax levied in Louisiana on newspapers having a circulation greater than 20,000—for the privilege of "... selling, or making any charge for, advertising or advertisements"—violated the First Amendment.

The decision said by restraining revenue, circulation could also be directly restricted. Storer Broadcasting Co. and others joined this opinion. "If the commission today, no less than the legislature of Louisiana, can restrict the amount of advertising carried by broadcasting stations to a given figure, it can tomorrow prescribe a lower figure," ABC said.

The decision by the Supreme Court in 1949 held that the proposed exemption of stations that show they would not be able to economically survive under the rules has a current bearing on the number of code subscribers. However, the network said, the number of code subscribers has shown a steady increase over the years.

CBS noted that in January 1959, 60% of television stations subscribed and 15% of radio stations; today 70% of the former and 38% of the latter are subscribers. CBS predicts the number of subscribers will continue to grow.

Westinghouse told the commission that although the code subscription figures are what they are it found that 98.7% of all TV homes are within the coverage area of stations subscribing to the NAB code. (Westinghouse includes all counties in which TV station subscribers have 50% or better circulation (excluding Hawaii and Alaska.) The group owner also found 97% of the population within the 272 metropolitan areas of the U.S. served by radio stations subscribing to the code. (The company's figures don't include stations in nonmetropolitan areas or nonmetropolitan coverage of metropolitan stations.)

Westinghouse said the public therefore is in a position to tune in code or noncode stations.

CBS pointed out that FCC Chairman E. William Henry, when speaking to the International Radio and Television Society on Sept. 24 (Broadcasting, Sept. 30), said in reference to the 2,500 complaints the commission had received about commercials, that only 35% (875) were concerned with the length and frequency of commercials. CBS said that no doubt many of the 875 that complained would be against any commercials whatsoever.

The governor said that it is improper for the government to intrude where the public has traditionally made the decisions. He closed his talk by saying, "I am opposed to the arbitrary limitation by a Washington bureau of your advertising, your news coverage, the amount of music you can carry, or any other manifestation of the free enterprise system, and I will continue to be opposed to it."

Governor opposes FCC

Tennessee's Democratic Governor Frank G. Clement has reiterated his opposition to government control of commercial time standards.

Speaking before the Tennessee Association of Broadcasters annual meeting, held Sept. 24 in Memphis, Governor Clement said, "I would like to say here that I feel a responsibility to use the influence of my office to reciprocate in helping you wherever we can."

The governor said that it is improper for the government to intrude where the public has traditionally made the decisions. He closed his talk by saying, "I am opposed to the arbitrary limitation by a Washington bureau of your advertising, your news coverage, the amount of music you can carry, or any other manifestation of the free enterprise system, and I will continue to be opposed to it.

Cohn & Marks, a Washington communications law firm, told the commission that there is no suggestion that if the codes become rules complaints will cease. "Quite the contrary," the firm said, "members of the public frequently complain of 'overcommercialization' when the codes are being adhered to." CBS agreed that government regulation could not change the public's view of advertising.

Viewers' View • Dow, Lohnes and Albertson, representing a group of 28 licensees, claimed that there is no wide-
We're burning all the old record books for business activity. Availability has been nearly SRO for first half of 1963. Reasons for our banner year: (1) audience knowledge that Channel 4 is WORTH WATCHING! (2) outstanding sales results for local and national advertisers (3) affiliation with CBS, a scorching good network. One more item: the Quad-Cities market. No cold potato, this one! Employment has just hit a new ten-year high, and business is terrific. Call Avery-Knodel, or Maurice Corken at WHBF-TV, Rock Island, Illinois.
spread evidence that the public is irritated by present commercial policies. In support of its point the firm quoted figures from a survey of 2,427 that appeared in Gary A. Steiner's book *The People Look at Television* (Broadcasting, Feb. 18). The survey quoted 75% of those interviewed as feeling commercials were a fair price for the entertainment they received; 58% termed them helpful and informational; 43% claimed them to be more entertaining than the programs, and 36% called them a welcome break.

The law firm concluded from the survey that the public thinks of commercials as being useful and as paying for the entertainment they receive.

Wilner & Bergson, another law firm, told the commission that the rules would place broadcasters at a competitive disadvantage with other media and jeopardize the industry's economic future. The firm said the rules would force advertising costs to rise, possibly helping individual stations, but the overall result would be to drive advertisers to other media. Many other commenters joined this view.

CBS pointed out that Commissioner Lee Loevinger has described broadcasters as being restrained in the amount of broadcast time they use for commercials. Commissioner Loevinger noted that newspapers use approximately 50% of their space for advertising to gain about two-thirds of their income while broadcasters spend 25% of their broadcast time for commercials to earn all of their income.

NBC described the public as a built-in safety "fuse" that inhibits the over-commercialization of a station. The network said each licensee should decide for himself the extent he will commercialize. NBC said adoption of the NAB codes would be detrimental to self-regulation—the codes by their very nature are voluntary undertakings, it said. NBC also said it was unaware of any definitive study of what the public response to noncode stations is.

Metromedia Inc. warned the commission not to set itself up as "a national arbiter of taste."

ABC told the commission that advertising is itself a service to the public. "Advertising is the life-blood of the mass production and free enterprise system." Although viewers may occasionally complain, ABC added, it should also be noted that taxpayers usually complain when taxes fall due.

Looking back over the many comments that have been filed with the commission over the past several weeks, dealing with commercial regulation, there has been only one voice supporting adoption. This comment came from the National Association for Better Radio and Television. NAFB/RAT charged that broadcasters have ignored the codes they subscribe to (Broadcasting, Sept. 23).

**AB-PT defendant in suit**

Paul D. Newey, former chief investigator for the Office of State's Attorney in Chicago, has filed a defamation suit for nearly $4.7 million in superior court there against American Broadcasting-Paramount Theaters Inc., operator of WKBW-TV (Chicago, and an attorney, Kevin Gillogly. Mr. Newey charges injury from a statement attributed to Mr. Gillogly during a news interview on WKBW in which Mr. Gillogly discussed Mr. Newey's appearance before a local grand jury that was investigating the financial affairs of a former state's attorney.

**Henry leaves for Geneva and London**

FCC Chairman E. William Henry was scheduled to depart by air Saturday (Oct. 5) for the international radio conference on space allocations in Geneva. The conference begins today (Oct. 7) and runs to Nov. 8.

Chairman Henry will serve as senior advisor to the U. S. delegation.

He will return by way of London, where he will spend two days conferring with officials of the BBC and the Independent Television Authority, which oversees commercial TV operations in Britain. He is scheduled to depart for home Oct. 23.

Commissioner Rosel Hyde will serve as acting FCC chairman in his absence.

A last-minute shuffle in the lineup of the U. S. delegation to the Geneva conference saw Kurt Borchardt, communications specialist on the staff of the House Commerce Committee, added to the U. S. team. He will attend the full conference. His bosses, Representatives Oren Harris (D-Ark.) and Abner W. Sibal (R-Conn.), are expected to attend part of the sessions.

The U. S. delegation is headed by Joseph H. McConnell, president of Reynolds Metals Co., and former FCC commissioner, and Jacob D. Beam, State Department foreign service officer.
Sell them dietary products? Fat chance!

When it comes to selling dietaries, the teen market offers pretty slim pickin's. Overweight is more an adult problem. And if you want to reach adults in Indianapolis, WFBM is your station. For we are openly partial to grownups in our music and other programming. Take our disc jockeys, for instance. They lean heavily—if you'll pardon the pun—to the great show tunes and popular classics of today and yesterday. It's their way of swinging your ad dollars our way... and Indianapolis sales dollars your way!

Put your advertising where the money is!

AIR EXPRESS DIVISION OF REA
Air Express gives fast, simultaneous delivery of highly secret promotion materials to 3,500 Pontiac dealers!

MacManus, John and Adams Advertising Agency has the problem of releasing new car news across the country, simultaneously... and at the last possible moment to insure secrecy. Air Express allows them to do both.

The agency gives Air Express the addresses of their suppliers. REA Express trucks pick up the promotion materials, rush them to nearby airports, and put them on the first outbound flights. (Air Express has official priority on all 38 scheduled airlines.) At destination airports, REA trucks speed them to the dealers. In most cases, the entire operation is done overnight!

You may not have a Big Secret to keep, but are you sure you don't need Air Express' speed, dependability and economy?

House unit readies action on FCC's budget

MINOW TESTIMONY AT MARCH HEARING RELEASED

The House Independent Offices Appropriation Subcommittee is to meet in closed session today (Oct. 7) to consider the FCC's $16.5 million budget request for fiscal 1964. The request reflected an increase of $1.5 million over the 1963 budget.

The subcommittee held a one-day hearing with FCC witnesses back in March, and that, too, was behind closed doors, as are all House appropriation sessions.

The record of the March session was made public Sunday (Oct. 6), and an examination of the transcript shows the commissioner had a considerably easier time behind the House's closed doors than did later in June in open session with the Senate's counterpart subcommittee (Broadcasting, June 24). The Senate unit may call the FCC back but is waiting for final House action.

There were other differences than simply open and closed hearings. The Senate session marked the first congressional hearing at which Chairman E. William Henry was the commission's spokesman. And, having been the man in charge at the FCC's controversial local program hearing held in Omaha, Chairman Henry had to face the wrath of a Nebraska senator of the opposite political party who lives in Omaha—Senator Roman L. Hruska (R-Neb.).

Teammed up with his colleague, Senator Gordon Allott (R-Colo.), Senator Hruska ripped into Chairman Henry with sharp criticism of the programing hearing. And Senator Allott added fire of his own for the commission's proposal to adopt commercial time standards similar to those in the commercial code of the National Association of Broadcasters. Senator Allott later filed formal comments with the FCC (Broadcasting, Sept. 30).

Sotto Session * The House session was handled for the FCC by then-Chairman Newton N. Minow. And, according to the printed record, the day seemed to have passed mildly for the commission, although there were some mysterious off-the-record discussions on some hot or hypothetical issues: possible ex parte contact among commissioners and elected federal officials, the history of broadcast ratings, program duplication by AM and FM stations and FCC engineering inspections.

(Off-the-record discussions that are held in open hearings may be reported by news media, but when they are conducted behind closed doors, only the participants may know of them because they are not recorded by official reporters of the committees.)

Milder in March * All in all, March in the House was milder than June in the Senate for the FCC.

The House subcommittee met on March 11, about the time that the House Commerce Committee was unveiling its investigation into broadcast ratings. Mr. Minow assured the appropriations unit that while some proposals for regulating ratings had been discussed, "We have made no such proposals." Later FCC testimony on ratings was consistent with this statement (Broadcasting, March 11, et seq.).

In a discussion of AM station earn-

McKinney to Harris: 'Fairness' isn't

A broadcaster from Representative Oren Harris' (D-Ark.) home town has advised the congressman that the FCC's holdings in fairness cases could result in broadcasters "informing ourselves right out of business."

Commenting on a recent decision on two Alabama radio stations (Broadcasting, Sept. 23), W. N. McKinney, general manager of KELD El Dorado, Ark., wrote that according to the FCC's interpretation, "a broadcaster would spend over 50% of his air time letting all the cracks pots express themselves. This, Oren, is not in the public interest."

Only last month Representative Harris, chairman of the House Commerce Committee, took the commission to task in a major speech before the Arkansas Broadcasters Association (Broadcasting, Sept. 9). Using texts of his letters to the FCC and to a mythical broadcaster friend, Representative Harris said that the FCC's July 26 public notice on fairness "gives to the public interest standard of the Communications Act an interpretation which is contrary to the basic pattern of the act."

In the case of the two Alabama stations the FCC held that licensees are obligated to keep the public informed, and if this means giving free time to answer commercial broadcasts, then this may be necessary. However, the commission left the door open for a review of a licensee's overall performance in fulfilling his obligation to serve the public interest and provide discussion of controversial issues.
Florida conservatives to monitor radio-TV stations

An organization to insure presentation of the conservative view in controversial matters has notified Florida broadcasters that it will monitor all state TV and radio stations.

The Organization for the Protection of Conservative Opinion in Broadcasting Inc., said it plans to "analyze the news, editorial opinions, any and all commentary, and the views of individuals and organizations broadcast on all mass media communication."

Formation of state organizations with that name was proposed on Sept. 16 by Dan Smoot, of Dallas, a conservative radio and television commentator, in his weekly newsletter The Dan Smoot Report. The Florida unit was chartered on Sept. 26, and its legal counsel, Ellis Rubin, said "we plan to set up similar groups in other states." Mr. Smoot is the group's consulting adviser, said Mr. Rubin.

In its letter the conservative group said the organization would answer any personal-attack broadcast involving any individual or organization espousing a conservative point of view.

In his newsletter, Mr. Smoot commented, "Every time a 'liberal' broadcast is made on a local station, touching on any subject of interest to the local Organization ... the organization could demand free and equal time to answer. Individuals who cannot form an organization can, and, should act as individuals."

Eugene Dodson, vice president and manager WTV(TV) Tampa-St. Petersburg, and president of the Florida Association of Broadcasters, said he had received the group's letter but noted "Each broadcaster has the responsibility to obtain a spokesman for the opposite point of view in controversial cases. No one has the right to become the spokesman for the other group on his own."

Mr. Smoot's newsletter offered "any responsible conservative" "my television film, free of charge, for rebuttal purpose" if the person gets equal time to answer a liberal broadcast "and then feels that he lacks time or facilities to prepare a proper presentation of his own views."

He said every issue of his Report since 1957 had been summarized for TV and radio broadcasters and the transcribed broadcasts which have been preserved "cover a wide range of subjects which liberals discuss in ways offensive to conservatives."

Mr. Smoot also suggested that the state organizations "could request transcripts of all proposed broadcasts ... in accordance with" the FCC's July 26 statement on fairness.

Mr. Smoot said his weekly 15-minute show is on 41 TV stations—and sponsored on 33 West Coast stations by Dr. Ross Pete Food Co.—and is sponsored on 71 radio stations in 20 states.

Government opposes KRLA in Supreme Court

The government last week told the U. S. Supreme Court that Donald Cooke received a fair hearing in FCC license renewal proceedings for KRLA, Pasadena, Calif., and that there is no need to review the case.

The solicitor general, acting for the FCC, filed his opposition brief to the petition for writ of certiorari filed by KRLA last August. KRLA is asking the Supreme Court to reverse the July decision of a federal court of appeals upholding the FCC's action in denying license renewal (BROADCASTING, July 15).

The FCC denied the renewal on the grounds that Mr. Cooke had not lived up to program proposals made when he bought the station in 1959, that KRLA had falsified program logs, and that it had engaged in fraudulent contests.

Senate okays Section 315 suspension

RESOLUTION VARIES A BIT FROM HOUSE VERSION

The Senate last week okayed a resolution to suspend Section 315 of the Communications Act for next year's presidential and vice presidential campaigns.

When HJ Res 247 was passed in about 90 seconds last Wednesday (Oct. 2), no voices were raised in opposition. But, Senator Norris Coston (R-N.H.), ranking Republican on the Senate Commerce Committee, pointed out that "there is a substantial body of evidence to indicate that Vice President Nixon may have lost the 1960 election" as a result of the joint TV appearances in that election. Nonetheless, Senator Coston said, he supported the 1964 suspension because the 1960 broadcasts made "a tremendous contribution to the general understanding of the issues and to the general welfare of our entire system of government."

The House, which passed its own version with minor differences in June, may be asked to approve the Senate legislation as is. But that decision depends partly on a determination to be made by the House Commerce Committee, probably this week.

Virtually assured of final passage and the signature of President Kennedy, who recommended the suspension (BROADCASTING, Feb. 25), HJ Res 247 would set up the same ground rules for political broadcasting in 1964 that allowed broadcasters to present the 1960 Great Debates.

The House and Senate commerce committees rejected legislative proposals that would have broadened the suspension or killed Section 315 altogether (BROADCASTING, Sept. 16, June 24).

The differences in the House and Senate versions involve the length of the suspension and reporting requirements. The Senate approved a 60-day suspension ending Nov. 3, 1964, the day before the election. The House, which okayed its bill before the Democrats had decided to hold their national convention late in August, passed a 75-day suspension.

BROADCASTING, October 7, 1963
GROUP W MEANS SPECIALS FOR CHILDREN...

"Romeos & Juliets"

Would you know four versions of "Romeo and Juliet"? Children do. Children in Boston, Baltimore, Cleveland, Pittsburgh, and San Francisco. They've just seen a new Group W Special, "Romeos and Juliets." A bit of Shakespeare, some Gounod, deux pas from an original ballet, and music from "West Side Story." Four variations in one hour-long show.

"Romeos and Juliets" is the kind of entertainment that does more than entertain. It awakens a child's mind. Introduces him to art and literature on his own terms. Over the past two years, Group W has been producing children's specials—thirteen in all. Programs of fun like "Magic, Magic, Magic" with Magician Milbourne Christopher, Julie Harris and Zero Mostel. Puppetry with Bil and Cora Baird and their marionettes.

Children present a special challenge to a broadcaster. A challenge to stimulate their curiosity; open doors to new worlds. Group W uses its creative, management and financial resources to make television for young people something very special through programs like "Romeos and Juliets."

PACIFICA DECISION MAY BE NEAR

Commission gets staff report on outstanding applications

The Pacifica Foundation case, which has been sidetracked in the recesses of the FCC for four years, appeared last week to be finally moving into a position where the commission could take action on it.

A staff report on Pacifica, licensee of four listener-supported FM stations whose cultural and sometimes unconventional programming has occasionally shocked listeners, has been submitted to the commission.

It's understood that the report, if approved, would lead to qualified grants of four outstanding Pacifica applications—three for renewal of licensees and one for a license to cover a construction permit.

Two sets of issues are involved. One concerns obscenities. The other, growing out of a Senate Internal Security Subcommittee hearing last winter, involves possible Communist infiltration of Pacifica's stations (Broadcasting, Jan. 14, et seq.).

The commission staff, reportedly, recommends "washing out" the complaints about obscenity. But it would make any grant to Pacifica "without prejudice" to any further action the commission might take regarding the Communist infiltration question.

Action Not Imminent * There was no indication last week how soon the commission would act on the Pacifica license applications. The report itself technically does not present them to the commission for a decision on whether to approve them to the commission or set them for hearing. Commission approval would be expected to swiftly follow acceptance of the staff recommendations. But some officials predicted that the commission would want all questions concerning Pacifica answered before deciding on the case.

But the report is believed to be the first one on Pacifica to be submitted to the commission since the case originated in 1959 after complaints were received about the programming of some of the foundation's stations.

Pacifica's applications for renewal of KPFA(FM) Berkeley and for a license to cover a construction permit for KPFF(FM) Los Angeles, both California, have been pending since 1959. Its applications for renewal of WBAI(FM) New York and KPFB(FM) Berkeley, have been on deferred status since 1960 and 1962, respectively.

The commission staff is said to have recommended wiping out the obscenity complaints after consulting with the Justice Department. That department is said to feel there are no grounds for action since the complaints involve language in poetry and other works of recognized literary merit that were read on the air.

The commission staff is also said to have noted that the material which gave rise to complaints was carried late at night and was not broadcast repeatedly.

Senate Inquiry * Although the Pacifica case has been hanging fire for four years, it didn't attract any attention until the Senate Internal Security Subcommittee hearing last winter. Senator Thomas J. Dodd (D-Conn.), who presided at the closed-door sessions, said the hearing was to determine whether Communists had infiltrated the Pacifica stations.

Pacifica officials acknowledged that Communist party members had appeared as commentators on their stations. But, they said, representatives of right-wing groups, including the John Birch Society, had also broadcast on the stations.

One Pacifica spokesman told the subcommittee that the foundation believes the public should have "access to the full spectrum" of political ideas.

The subcommittee two months ago made public the testimony taken during the hearing (Broadcasting, July 29). But it has neither issued any report, nor made any recommendations. This puts the commission in the position of resolving a delicate issue raised by a Senate subcommittee.

Senator Kenneth B. Keating (R-N.Y.) is the only member of the subcommittee to have commented on the hearing publicly. Shortly after the testimony was published, he said it wasn't the subcommittee's function "to judge or condemn any individual, but it is useful that certain facts were brought out".

Surgery for Murrow

Edward R. Murrow, director of the U. S. Information Agency, was scheduled to undergo major surgery Saturday (Oct. 5) at the Washington Hospital Center to free a blocked bronchial tube.

The former CBS vice president and CBS News correspondent noticed speech difficulty during engagements in Philadelphia a week earlier. Mr. Murrow contracted pneumonia during a Middle East inspection tour almost exactly a year ago. He was hospitalized then for several weeks.
to light so that the directors of the Pacifica Foundation and the public can approach the problem fully informed" (Broadcasting, Aug. 5).
At the time of the hearing, Trevor Thomas, acting president of Pacifica, said FCC officials told him that the inquiry had "some bearing" on the commission's delay in acting on the license applications. Actually, however, the hearing jarred the FCC into action on the case. Until then, one commission official frankly admitted, "we were spinning our wheels."

Denver pay-TV gets third extension

Denver's pay TV test station KCTO (TV), channel 2, last week was granted a one-month temporary extension of its deadline for commencing trials. The commission said the extension runs from Oct. 3.
KCTO asked for a six-month extension because Macfadden Teleglobe Denver Corp., which is arranging programing has had difficulty obtaining film. The lack of scheduled programs has kept MTD from getting more than 500 hundred subscribers, the company said. The commission requires that prospective subscribers be provided with a list of programs the pay TV system will carry.
MTD originally asked KCTO to request a nine-month extension.
The commission said the temporary extension was granted pending receipt of addition information from KCTO. This is the third extension that has been granted.

Vaseline agrees to FTC consent order

Cheseborough-Pond's Inc., New York, agreed last week to abide by an order of the Federal Trade Commission prohibiting it from making "misleading claims" for Vaseline petroleum jelly in radio, TV and other advertising. Vaseline's consent to abide by the order does not constitute an admission that misleading claims were made in the past.
The FTC complaint had challenged various Vaseline advertising claims and maintained that the Cheseborough-Pond's product will not afford substantial protection against infection or form a protective barrier for the skin; is of no benefit in the treatment of open wounds or burns except to the extent of temporarily relieving pain.
Under the order, Vaseline will not be permitted to claim that it is a substitute for a first aid kit or that it will soothe and soften the skin better than similar products.
TV code board still unsure of its path

SESSION WITH COLLINS LEAVES MEMBERS ‘CONFUSED, DISAPPOINTED’

There was no meeting of the minds in Washington last week on the future directions and policies of the television code of the National Association of Broadcasters. NAB President LeRoy Collins was expected to clarify policies as he appeared before a Monday (Sept. 30) meeting of the TV code board, but the nine members left town “confused” and “disappointed.”

In a 30-minute prepared talk, Governor Collins stressed that the code should be a “dynamic” instrument to serve as the “champion of the public interest”—with benefits for area broadcasters playing a secondary role. The NAB president was not specific in his thinking of the direction the codes should take in the years to come and, according to code board members, shed no further light on the subject during 90 minutes of questions by the code board.

This led to much criticism of the governor’s position by a majority of those present—most of whom felt the NAB president should have given the code board concrete proposals. “I was utterly confused on the governor’s position,” one said. “We don’t know what the president’s policy is,” he said. “You have seen his statement. Do you?”

Another member expressed “keen disappointment” that the governor did not come in with a program for the board to consider. He and others noted the “complete lack of liaison” between the governor and the board as well as the NAB president and the code authority staff. The board agreed that there must be improved and continuing liaison with the NAB president and plans to invite Governor Collins to sit in on all future meetings of the TV code board.

Governor Collins maintained that it was not incumbent upon him to be more specific at this time. “My area of concern is not with specifics,” he said two days after the meeting. The code board meeting was not the time or place for details, he said, in stressing that it would be up to the new code director to work out the specifics of future code activities.

“I would have been impinging upon his domain had I made concrete suggestions,” Governor Collins maintained. “My discussion [with the board] was limited to broad-gauge thinking.”

Robert D. Swezey, retiring director of the National Association of Broadcasters radio and TV codes, received the “gratitude and appreciation” of the TV Code Board in a formal resolution adopted at the board’s meeting last week. Mr. Swezey was praised for the “energetic and constructive direction he has given to the office which he has held.”

Signed to a $40,000-a-year contract for two years in 1961, Mr. Swezey announced his plans not to seek renewal several weeks ago (Broadcasting, Aug. 19). He has agreed to remain in the job until a new director is selected. The original contract expires Oct. 15, after which date his salary will be cut in half since he does not expect to devote full time to the job.

Swezey praised by board

Robert D. Swezey, retiring director of the National Association of Broadcasters radio and TV codes, received the “gratitude and appreciation” of the TV Code Board in a formal resolution adopted at the board’s meeting last week. Mr. Swezey was praised for the “energetic and constructive direction he has given to the office which he has held.”

Swezey pointed out that the NAB’s monitoring program is much improved, with all subscribers checked at least twice a year.

Mr. Pabst said that the staff has been instructed to make a detailed study of the experiences and policies in the application of the controversial time standard, with particular emphasis on the effect of the June change. Areas of difficulties in station interpretations will be pinpointed, he said. The chairman said that he contemplated the appointment of a code board subcommittee to make recommendations on the time standards and all approaches to TV advertising prior to the January code meeting.

Together Or Not • In his presentation to the code board, Governor Collins said that “we should know at least if our broad-gauge thinking is together, and if it is not, strive in good faith to close the gaps . . . . I deeply hope that we can be assured of a unity of purpose within your board as we face the future . . . . I trust you will agree that to get a superior code job done, your assignment calls for objectivity and courageous effort, recognizing that on rare occasions such may be in conflict with the viewpoints . . . .” of broadcasters.

If the industry had now the kind of codes it is capable of making, “no FCC chairman would dare speak as [E. William] Henry did in New York last week,” Governor Collins said (Broadcasting, Sept. 30). “The call to action is not merely the rumble of distant thunder portending greater government intervention. It is the roar of clear, present duty calling us all to better effort.”

The NAB president noted that very highly respected broadcasters have characterized the codes as something to be “feared and resisted. The most widely read and most generously supported of our trade journals continually demeans the code and, I expect, receives warm praise and few complaints for doing so,” he said.

Desired Course • In his prepared statement, Governor Collins said that
the code must move down a new course based on acceptance of the proposition that the prime purpose of the code is to serve the best interests of the public. This means, he said, that the broadcasters' private interests should be incidental and subordinate to service to the public.

"When an issue arises under the code, the first question to be resolved should be where does the public interest lie?" he said. This already is the present, clearly established policy of the NAB in administering the code, he said, "and it is a stronger allegiance to this concept that I say is the first need ahead."

To operate the code as the public's champion, the NAB must have more courage, more imagination and more idealism, Governor Collins said. "The code must be administered as a positive, affirmative, constructive force to improve television's service. . . . This means that the code should not wait for trouble, but should look for all signs of it and promptly get in motion preventive procedures. It should not be satis-
to taste," he told the code board members. "Mr. Henry and the FCC are worrying about commercials. So are advertising agencies. So are congress-
men. So are the people. So are some broadcasters — but not enough. We know there are serious troubles in this field, but we have not done enough about getting the facts and developing solutions."

The code must strive for qualitative commercial standards, Governor Collins stressed. "We have spoken of their virtue," he said, "but we have done little if anything to prove out any workable pattern of practical application. I am not sure we can, but we must at least try."

The NAB president said that his concern was not alone with "fires that need putting out. I am even more concerned with the fires we should kindle. . . . These are the fires of excitement and pride in the greatness of this industry."

No Czar, But . . . The new code authority director will have "vast powers to develop and initiate concepts far more procedure.

Some of those at the Monday meeting questioned whether the governor's presen-
tation was overly critical of Mr. Swezey and his administration. Not so, said the NAB president. "All of us will miss Bob Swezey, of course," he said. "At a very important time, and under many handicaps, he has rendered a highly competent and valuable service. He and I, in the candor that should go with mutual respect, agree that we do not view future code needs precisely eye-to-eye. . . ."

Later, Governor Collins said that it is impossible to make recommendations on how better to do things in the future without implying that something has been lacking in the past. "My statement was given in that spirit and not to de-
mean Mr. Swezey," he said.

In speaking to the board, the NAB president said that a re-evaluation of code directions is needed and "made all the more necessary" by Mr. Swezey's resignation. "Up to this time I have made no overt effort to get a new direc-

broadcaster “Hippocratic Oath.” Secondly, he said, the code could continue on its present course of the minimum self-regulation necessary as a defense against the pressures of the public and the government.

The latter, he said, is almost wholly defensive—or to provide a very good-looking suit to dress up in for public appearances.” This is all to many broadcasters want, Governor Collins pointed out. “We must face this squarely: Many in our ranks, including some very good broadcasters, sincerely feel that the best code is the one that looks like the most but actually is the least; one that will provide the least possible impingement upon their rights to do whatever they please without hindrance from any source outside their own individual organization.”

Broadcasters must make their codes the “champion of the public interest,” Governor Collins said later. The “mantele” of protector of the public must be taken away from the government and placed with the broadcasters, who know how to meet the requirements of their audiences better than anyone, he said.

The public, he stressed, does not know or understand the dedication of most stations to serve and the codes should be used as a means of giving assurances both as to intentions and actual performances.

The NAB president planned to make essentially the same appeal last Friday to the radio code board.

No Agreement—Mr. Pabst said the TV code board had neither approved nor rejected the president’s statement. He said little was known about what defenses, if any, were in mind and that the board had hoped for a more well-defined plan for the future. “If you did not expect more, you were not disappointed,” he said.

Mr. Pabst said the board has not rejected any of the three code approaches presented by the president and is open to all other suggestions. A clear plan will have to wait for the January meeting, at which time he expressed the hope that a new director will be on the job. “Our next meeting will be a real working session,” he promised.

Notably missing from any detailed discussions at the TV code meeting was (1) the FCC’s rulemaking to set a limit on commercial time with comments due last week (see page 56) and (2) Governor Collins’ plans for a December meeting to discuss the problems of TV advertising. On the latter, Mr. Pabst said he did not feel this necessity comes under the subjects with which the TV code board is concerned.

The board last week heard a presentation by Gerald Corwin of Showbiz Inc., producer of a promoted TV program Your Daily Horoscope. Mr. Corwin is seeking code approval for the show on astrology and his attorney said that he had received permission from the code authority to submit additional information.

All members of the TV code board were present at last Monday’s meeting, as well as code authority executives from the Washington, New York and Hollywood offices. Board members, in addition to Mr. Pabst, are Roger W. Clipp, Triangle Stations; Robert W. Ferguson, WTRF-TV Wheeling, W. Va.; Ernest Lee Jahncke, NBC-TV; Douglas L. Manship, WBRZ(TV) Baton Rouge, La.; Joseph H. Ream, CBS-TV; Lawrence H. Rogers II, Taft Broadcasting Co.; Alfred R. Schneider, ABC-TV; and George B. Storer, Storer Broadcasting Co.

Defective towers will be replaced

The discovery of defects in a batch of steel used in three television towers has delayed the air dates of two of the stations and created the need for replacement of a third tower already in use.

The stations are WGBP(TV) High Point, N. C., and KEND-TV Fargo, N. D., both under construction, and WIBW-TV Topeka, Kan., which shifted to a new tower Aug. 30.

The steel was supplied by Bethlehem Steel Co. for fabrication and erection by Kline Iron & Steel Co., Columbia, S. C. A Kline worker discovered “internal deviations” in the steel when the Fargo tower, destined to be 2,063 feet high, was at the half-way point of assembly of its sections on the ground.

Kline conducted tests on the High Point tower, which was nearing completion, and on the Topeka tower, which was already in use, and found the same imperfections. All three towers had been fabricated from the same Bethlehem production lot.

Kline and Bethlehem have agreed to make good. The replacement tower at WGBP(TV) High Point has been topped out, and the channel 8 station expects to be on the air by Nov. 15. Its original target date was Oct. 15. As of last week the tower of KEND-TV Fargo was one-fourth of the way up, and the station hopes to be in business on channel 11 in December.

For WIBW-TV Topeka, Kline will construct another tower alongside the 1,249-foot structure from which the station has been operating since Aug. 30. The duplication of towers will avoid interruption in the station’s service.

Thad M. Sandstrom, general manager of WIBW-TV, said Kline, in acting promptly “to correct fully the problems arising through no fault of their own,” had confirmed “the confidence we expressed in this firm’s integrity when we originally placed the order for our tower.”

70 (THE MEDIA)
Widest Bridge in the World?

"Fella even packed his secretary off to the library. Couldn't believe it. Providence, he said... never! Widest bridge in the world? Names like Moshassuck and Woonasquatucket flowing beneath it?

Big job for the Providence folks of 1710. The Crawford Street bridge... 1147 feet wide... widest in the world... a part of us... Providence."

But then Providence is many things. It's change. A bridge from the old to the new. A market for new ideas... new products. A people busy at Fifth Avenue fashions, electronics, jewelry and the defense of a country. Providence is New London, Norwich and Mystic — all in Connecticut. Providence is Plymouth, Worcester and New Bedford — all in Massachusetts. Some people even say Providence is Rhode Island. People in television say Providence is WJAR-TV.
Ratings problems concern Missouri meeting

BROADCASTERS TOLD TO EMPHASIZE BASICS

The continuing dispute over broadcast ratings and growing regulation of radio and television by the federal government held much of the attention of the Missouri Broadcasters Association at its annual fall meeting Thursday and Friday in Jefferson City. Emphasis was placed upon the need for greater vigilance by the individual broadcaster in dealing with both problems.

Robert E. L. Richardson, former counsel to the House Subcommittee on Regulatory Agencies, said that the subcommittee when it resumes hearings on the ratings problem will call chairman of the boards of radio-TV sponsors and present them with the findings of the investigation. He said the advertisers will be asked to consider whether using such ratings as have been available has been a good way to decide what programs and periods to buy.

Programs Dropouts • Making a detailed critical review of virtually all the rating services on the grounds that they are “inaccurate” and use “too small a sample,” Mr. Richardson made a point of how ratings have caused the sudden demise of new programs already this fall. He singled out the cancellation of 100 Grand after only three weeks on the air (see page 80), and noted that the rating samples were based on the 1940 census. (During the congressional hearings, the subcommittee charged that the A. C. Nielsen Co.'s survey sample was still based mainly on a design built on census data from 1940 [BROADCASTING, March 25].)

Broadcasters have sacrificed accuracy, Mr. Richardson said, and have used ratings principally as a selling tool. He warned that station licensees probably will be held responsible for authenticating the accuracy of future ratings, particularly at license renewal time.

Selling Basics • John F. Hurlbut, president and general manager of WSYC Mount Carmel, Ill., pointed out that broadcasters have been so preoccupied with ratings that they have neglected to sell the basics of the broadcast media. He said the overuse of the cost-per-thousand comparison technique in competition with other media has been a disservice to radio and TV.

Pointing out that small-market radio stations have prospered without access to ratings figures, Mr. Hurlbut invited the RAB to establish an on-the-job training plan for big-market radio salesmen and key RAB personnel in the smaller markets where radio has to be sold on its merits.

Don E. Pailey, president KGBX Springfield, MBA president, said “it is clear that state associations working with the NAB must continually be ready to defend and preserve our right to do business. There are many in the present administration in Washington that do not believe broadcasting should have the freedom it now has.”

Rights Threatened • Mr. Dailey said that these government administrators seek to make us a public utility even though we have the greatest broadcasting system in the world built through freedom of enterprise and private ownership.” He also warned that broadcasters’ right to editorialize “is slowly being regulated to death.”

John L. McClay, operations vice president of Taft Broadcasting Co., observed that the formal pleadings in response to the FCC and other regulatory proceedings are not always completely adequate to present the most clear picture of industry feeling. “The individual broadcaster,” he said, “or the small group of broadcasters can step into the debate faster with a greater variety of argument and with a persuasive effect that will greatly reinforce [our] case.”

Mr. McClay proposed that every state broadcasters’ association form a committee for the specific purpose of considering and preparing replies to the public proposals of individual FCC commissioners. He said that such proposals should be studied very carefully on their merits. The committee can then submit practical reasons for rejection if necessary.

During Thursday’s meeting, the MBA members pointed out that part of their problem in Washington is the lack of knowledge about the broadcasting industry to be found among many congressmen and senators on Capitol Hill. To help meet this problem they voted to purchase subscriptions to BROADCASTING Magazine for each member of the Missouri delegation in Congress.

RAB waiting for NAB to pledge its troth—and cash

A decision is near in the six-month courtship of the National Association of Broadcasters by the Radio Advertising Bureau seeking a marriage of efforts and dollars for a study of radio research methodology. RAB President Edmund Bunker said last week that he has asked NAB President LeRoy Collins to say “yes” or “no” by Thursday (Oct. 10) when a meeting is scheduled in Washington of the RAB-NAB liaison committee. Governor Collins agreed that the RAB has been kept waiting at the altar long enough and is due an answer, but another NAB official said it will not be forthcoming this week.

A special subcommittee of the NAB research committee has been named to study the latest RAB proposal and recommend a course of action. The subcommittee, headed by the NAB vice president for research, Melvin Goldberg, has been given until Oct. 15 to report to the full committee, headed by Donald McGannon of Westinghouse Broadcasting Co.

The NAB position is that the methodology study is not on the agenda for Thursday’s meeting, but RAB’s Bunker said “you can bet that it’s our No. 1 item.” NAB officials point out that its representatives at the meeting will not be empowered to consider the RAB merger, with this function invested in the research committee alone.

Mr. Bunker said that RAB is being criticized by its members for delaying the start of the study—first announced at the NAB convention last April—for so long. At that time, the radio bureau asked NAB to participate and to contribute $75,000 of the proposed $200,000 cost.

RAB, Mr. Bunker said, is prepared to start on its own Friday if it gets a turnaround or no answer from the NAB the previous day. “As of Oct. 11 we are going,” he said.

Mr. Goldberg, it was learned, has written members of the NAB research committee that he will recommend a joint NAB-RAB study if he is placed in complete charge. Mr. Goldberg reportedly wants it understood that the RAB participates and contributes financially that he will outrank Al Watson, who has been retained by RAB for the study.

Members of the RAB-NAB liaison committee, formed to delve into mutual areas of interest, include Messrs. Collins and Bunker, John Box Jr., Wil St. Louis; Richard Chapin, KFOR Lincoln, Neb.; Arthur Hull Hayes, CBS Radio; Richard Hurlbut, Mutual; Ben Strouse, WWOC, AM-PM Washington (NAB radio board chairman), and Vic Diehm, WAZL Hazleton, Pa. (RAB board chairman).

589 FIFTH AVENUE, NEW YORK 17, NEW YORK

CHICAGO • LOS ANGELES • NASHVILLE • TORONTO • MONTREAL
SOLD: 3 TV AND 1 RADIO STATION

Total prices for properties reach $12.5 million

Sales of broadcast stations announced last week totaled almost $12.5 million in purchase price money and involved three television and one radio station.

The TV stations:
- KVOV(TV) Stockton-Sacramento, Calif., sold by Metromedia Inc. to McClatchy Newspapers for $7,650,000.
- KYTE(TV) El Dorado, Ark.—Monroe, La., sold by Veterans Broadcasting Co. and others to J. B. Fuqua for $1.5 million.
- KTVQ(TV) Kirkville, Mo. (Ottumwa, Iowa), sold by James J. Conroy and associate to the Appleton (Wis.) Post-Crescent for $1,255,000.

The radio station:
- WWRL New York, sold by William H. Reuman and group to Egmont Sonderling and associates for $2 million.

The group sales is one of the heaviest in recent months.

Negotiations for the kovv sale, long rumored on the block for the right buyer and at the right price, were conducted by John L. Kluge, Metromedia president, and Eleanor McClatchy, president of the newspaper-broadcast group bearing her name.

In announcing the successful conclusion of the negotiations, Mr. Kluge said: "I feel that the McClatchy organization, because of its long experience in broadcasting and a history of public service in California is particularly well equipped to continue superior television in Stockton and Sacramento."

Metromedia bought the ABC-affiliated channel 13 outlet in 1960 from the Gannett Co., Rochester, N. Y.-based newspaper-broadcast group, for $3.5 million including obligations. Gannett bought the station from Television Diablo Inc. in 1958 for $1.48 million.

McClatchy stations are KFBK-AM-FM Sacramento, KMJ-AM-FM-TV Fresno, KHEE-AM-FM Modesto, all California, and KKH, Reno, Nev.

The group also owns and publishes the Sacramento Bee, Fresno Bee and Modesto Bee.

Fuqua Buy = The El Dorado, Ark., station, was bought by J. B. Fuqua owner of WJSB-TV Augusta, Ga., for $650,000 and assumption of $850,000 in liabilities. Mr. Fuqua is in the insurance business, is Democratic state chairma...
"Which Miss Smith?"

Full names are important, with products as well as people. Johnson & Johnson makes a whole family of products under the BAND-AID Brand, from BAND-AID Brand Adhesive Bandages to BAND-AID Brand AIR-VENT Adhesive Tape to BAND-AID Brand Spray Antiseptic. We like to be talked about, but just as there's more than one woman named Smith, there's more than one product with the BAND-AID Brand. A whole family of products carry the BAND-AID Brand to indicate "made by Johnson & Johnson." So, always follow the "BAND-AID" Brand with the product name.

GOVERNMENT SPECTER SITS ON HIGH
NAB unveiling 1963 edition of road show in Hartford

Government regulation and more government regulation will be a prominent item on the agenda this year at the National Association of Broadcasters conventions. NAB members will be held in the series of eight fall conferences Oct. 14 in Hartford, Conn.

More than 200 New England broadcasters will gather in Hartford’s Hilton hotel, with the threat of federal intervention into their daily activities more prominent than ever before. And, as never before, the NAB will call on individual broadcasters as participants in the planned programs and will seek comments from the floor.

NAB President LeRoy Collins will make an informal address at each conference and will answer questions of NAB members. He also will hold news conferences in each of the cities to be visited by the NAB road show. Following the 1½-day conference in Hartford, the NAB will set up shop in Minneapolis’ Leamington Hotel Thursday-Friday (Oct. 17-18).

Lee Fondren, KLO Denver, will address an opening day luncheon at Hartford on “Advertising, 1980.” Mr. Fondren is a past president of the Advertising Association of the West and is current vice chairman of the Advertising Federation of America.

Carl Haverlin, president of Broadcast Music Inc., will be the featured speaker in Minneapolis. Each of the eight conferences will follow the same format, but with different broadcast panelists in each city.

Carlton Brown, WTOL Waterville, Maine, and member of the NAB radio board, will preside at the Hartford conference as host director. From Minneapolis, NAB stops are scheduled in Pittsburgh (Oct. 21-22), Miami (Oct. 24-25), Nashville (Nov. 14-15), Fort Worth (Nov. 18-19), Denver (Nov. 21-22), and San Francisco (Nov. 25-26).

The Hartford program follows:
Lunch, Mr. Fondren, speaker. Radio Session. 2:30 p.m. Jack Lee, WPRO-TV Providence.

Outstanding Values in Radio-TV Properties

Excellent facility covering large midwest market. $50,000 down and liberal terms.

Class IV with excellent real estate and physical facilities. Ideal for owner-operator. $50,000 down will handle on easy payout.

Excellent real estate. Easy terms for good qualified owner-operator. Low downpayment.

Changing hands

ANNOUNCED — The following sales of station interests were reported last week subject to FCC approval (for other commission activities see FOR THE RECORD, page 96).

- KQVR(TV) Stockton - Sacramento, Calif.: Sold by Metromedia Inc. to McClatchy Newspapers for $7,650,000 (see story, page 74).

- WWRL New York: Sold by William H. Reuman to Egmont Sonderling and associates for $2 million (see story, page 74).

- KTVQ(TV) El Dorado, Ark. (Monroe, La.): Sold by Veterans Broadcasting Co. and others to J. B. Fuqua (WJBF-TV Augusta, Ga.) for total of $1.5 million (see story, page 74).

- KTTO(TV) Kirksville, Mo. (Ottumwa, Iowa): Sold by James J. Conroy and associates to Appleton (Wis.) Post-Crescent for $1,255,000 (see story, page 74).

- WRFB Tallahassee, Fla.: Sold by Emerson Browne to Don Price for $120,000. Mr. Price has been a broadcast executive in Florida and Georgia for many years. Mr. Brown retains WCLB Camilla, Ga. WRFB is a daytimer on 1410 kc with 5 kw. Broker: Blackburn & Co.

- WTSB Brattleboro, Vt.: Sold by Theo-
dore Feinstein to Robert Price and group for $80,000. Mr. Price is a New York attorney. Other Feinstein stations are WLYN Lynn and WBPH Newburyport, both Massachusetts, and WOTW Nashua, N. H. WTSN is full time on 1450 kc with 1 kw daytime and 250 w nighttime. Broker: Chapman Co.

- WLYN Nashville, Tenn.: 10% interest sold by Second Thursday Corp. to Alfred Greenfield for $20,000. Mr. Greenfield, who was named vice president in charge of operations and station manager, was formerly sales manager of WHHM Memphis, Tenn. Station, principally owned by S. J. Simon, operates on 1560 kc with 10 kw daytime only.

CBS Radio adds five

CBS Radio has added five stations to its network lineup. Joining are WRTM Rumford, Me. (790 kc, 1 kw), Sept. 29; wavez Vincennes, Ind. (1450 kc, 1 kw-D, 250 w-N) which discontinues Mutual affiliation; KMFW Breckenridge, Minn. (1450 kc, 1 kw-D, 250 w-N) Oct. 27; WMOG Brunswick, Ga. (1490 kw, 250 w), Dec. 1 and WAYX Waycross, Ga. (1230 kc, 1 kw-D), Dec. 1. Both WMOG and WAYX will discontinue ABC Radio.

Media reports...

WCAG starts • WCAG West Chester, Pa., a 250 w daytimer on 1520 kc, was to begin operation Oct. 4. President of the new station is Edgar Shelton, former ABC vice president in Washington. Ed DeGray, former president of ABC Radio, is vice president.

ATAS workshops • The Chicago chapter of the National Academy of Television Arts & Sciences tomorrow (Tuesday) begins a series of professional television workshops in cooperation with Roosevelt University there. Eleven evening sessions are open to both industry members and public and include talks by local station and agency executives.

Fifth annual • Broadcast Music Inc. and the American Association for State and Local History are co-sponsors, for the fifth year, of a nationwide historical competition. Prizes of $500 each will be given to the radio and TV stations that produce the two best programs dealing with state or local history during 1963. Similar grants will be made to state and local agencies involved in the production of winning broadcasts. Announcement of winning programs will be made in the spring of 1964.

Advisory committee formed • The Colorado Broadcasters Association has established an advisory committee to consult with the radio-TV department of the University of Colorado on broad-

WLWC(TV) getting a new look

Walter E. Bartlett, vice president and general manager of WLWC(TV) Columbus, Ohio, displays architect's drawing of station as it will look following a $1 million construction-expansion program. Scheduled for completion by September 1964, the station's facilities will be more than doubled—from 14,500 square feet to 35,000 square feet—and a full line of color equipment added. Construction is to start by year end.

cast curriculum development and educational radio-TV programs. Chairman of the committee is Russel Shaffer, owner and general manager of KBOI Boeing, Colo. Other committee members are Dr. Richard H. Bell and James Dryden, of the university's radio-TV department.

WHAT IS YOUR STATION WORTH?

Over the years the firm of Hamilton-Landis and Associates, Inc. have formerly appraised many millions of dollars worth of broadcast properties.

These appraisals have been made for various reasons. Some were for the purpose of a station obtaining a bank loan. Others for insurance reasons. And many because the owners wanted to establish sale prices.

We will be happy to provide you with a realistic evaluation of your holdings documented in an attractively bound report.

Our services are thorough and the price reasonable.
H&B, RKO GENERAL FORM CATV FIRM
Will operate over 50 systems with 100,000 subscribers

A new, major entity in the community television field was in the making last week.

Involved are RKO General and H&B American Corp., both already substantial CATV owners.

After a stock transaction is consummated—and this must wait FCC approval for one element of it—H&B American will own and operate over 50 CATV systems, serving 100,000 subscribers, with RKO General owning about 56% of H&B through its wholly-owned subsidiary, Video Independent Theaters Inc., Oklahoma City.

The transaction, announced last Thursday, proposes to turn over to H&B the RKO General CATV subsidiary, Vumore Inc., and a microwave relay subsidiary, Mesa Microwave Inc. In return, RKO General, which already owns 576,000 shares (20%) of H&B plus debentures totaling $500,000, will receive 1,550,000 shares of H&B.

H&B's capitalization will be increased from its present 4 million shares to 5 million shares of common voting stock, with both remaining at 10 cents a share par value. Vumore Inc. will be liquidated.

Vote in December = H&B stockholders will vote on the deal at a stockholders meeting in December.

Details of the transaction were submitted to the FCC last week. FCC approval is necessary for the transfer of Mesa Microwave, a common carrier relay which serves Vumore cable systems in Arizona.

As part of the deal H&B can borrow up to $2 million from RKO General at 6% interest for expansion and modernization. In addition to its present 24 CATV systems with 70,000 customers, H&B is building four, and holds franchises for three more.

Eleven States = H&B systems are in California, Alabama, Arizona, Colorado, Idaho, Iowa, Maine, Montana, New Jersey, New Mexico, Washington and New Brunswick, Canada.

H&B also owns two microwave relay systems, H&B Microwave and H&B Communications Corp.

The company grossed $4.45 million in the fiscal year ended July 1, and earned $1.4 million before depreciation, David Bright, chairman and president, said. It has a tax credit of $3 million from previous years' losses, he said.

Last Thursday, following announcement of the RKO General-H&B American deal H&B American closed with a gain of 1.8 on the American Stock Exchange, closing at $3 3/4.

RKO General's Vumore operates 27 cable systems with 30,000 subscribers primarily in the Southwest. Vumore is a subsidiary of Video Independent Theaters Inc., Oklahoma City based chain of movie houses in the Southwest, which RKO General purchased in 1961 for over $4.5 million from the estate of the late Henry Griffin.

Vumore and Mesa Microwave, Mr. Bright said, had sales of $2.2 million and net operating profit before depreciation and taxes of $1.16 million for the fiscal year ended July 31.

Honorary alumnus

A helping hand from a commercial broadcaster has enabled the San Fernando Valley State College in Northridge, Calif., to have its own educational FM station, KEDC-FM. Saul R. Levine, owner of KBCA(FM) Los Angeles, learned that the educational institution had long wanted a station of its own, but was unable to get the necessary money from the state, so he donated a transmitter and antenna to the college and, in his professional status as an attorney, drew up the application papers filed with the FCC for the new station.

NAB 'Future' committee to hold 3d meeting

Pay television, community antenna TV and the FCC's UHF policy will be the major items of discussion Wednesday (Oct. 9) when the Future of TV in America Committee of the National Association of Broadcasters meets in Washington. The broad goal of the committee is to recommend to the NAB board new policies to be followed in all three of these areas.

This will be the third meeting of the committee, under Chairman Dwight Martin of WAFB-TV Baton Rouge, La., since it was formed last February. At its last session in June, the committee heard a detailed staff report on pay TV and directed the gathering of further material on the problem for consideration at this week's meeting.

The committee is considering if NAB should change its opposition to pay TV over the air, or if it should be expanded to include wired systems. Discussions have been held on whether the NAB should retain an outside consultant for a major study of pay TV or whether a staff position should be created for this purpose.

Two broadcast groups buy Coca-Cola franchises

Coca-Cola bottling franchises have been acquired by two broadcasting groups.

Wometco Enterprises, Miami, Fla., has announced an agreement to buy the Coca-Cola Bottling Works of Nashville, Tenn., in a multi-million transaction. The bottling company operates plants in Nashville, Lebanon and Springfield, Tenn., owns 50% interest in companies operating similar bottling works in Dickson and Columbia, Tenn., and has a royalty interest in a plant in

Commercial broadcaster pledges aid to ETV

Midcontinent Broadcasting Co. has pledged equipment and other support to South Dakota State College, Brookings, in the school's efforts to apply for and operate channel 8 in that city.

Midcontinent, licensee of KEL-O-AM-TV Sioux Falls, KDLQ-TV Florence and KPLO-AM-TV Reliance, all South Dakota, will donate $107,000 in TV equipment, including a 700-foot tower and antenna and two image orthicon cameras. The company also has offered to provide legal and engineering services. Midcontinent said its aid will enable the college to be eligible for Health Education and Welfare matching ETV funds.

Joe Floyd, president of Midcontinent, presents Dr. H. M. Briggs, president of the college, with the list of the donated equipment. Mr. Floyd is a member of the school's advisory council.

Murfreesboro, Tenn. Wometco already holds both a Pepsi-Cola and a Canada Dry franchise for the Bahamas.

And Black Hawk Broadcasting Co., Waterloo, Iowa, announced it has purchased the stock of the Coca-Cola Bottling Co. of Waterloo. The purchase price was not disclosed.

Stations included in Walker's libel suits

Libel suits totaling $26 million against newspapers and radio and TV stations have been filed by former Major General Edwin A. Walker because of news reports of his activities at the University of Mississippi last year when Negro James H. Meredith was enrolled.

Claiming that false statement were made about him in the news reports of the riot at Oxford, General Walker asked damages of:

- $10 million against the Atlanta Journal and Constitution and Ralph McGill, Constitution publisher. The newspapers are affiliated in ownership with WSB-AM-FM-TV Atlanta, although the stations were not mentioned in the suit.
- $2 million against the Fort Worth Star-Telegram, Publisher Amon G. Carter Jr. and the newspapers' WBAP-AM-TV.
- $2 million against the Louisville Courier-Journal and Times and its radio station, WHAS.
- $2 million against the St. Louis Post-Dispatch and its KSDK-TV.
- $1 million against Newsweek Magazine. Newsweek is owned by the Washington Post Co. (Washington Post), which owns WTOP-AM-FM-TV Washington and WJXT-TV Jacksonville, Fla. Neither the Post nor the broadcast stations are mentioned in the suit.

Other suits ask for $2 million from the Associated Press of Mississippi, $1 million from the Denver Post, $3 million from the New Orleans Times-Picayune, and $3 million from the Delta, Greenville, Miss., Delta Democrat-Times and its editor, Hodding Carter, in connection with a speech Mr. Carter made on the Oxfro incident.

PROGRAMING

‘100 Grand’ dead after three weeks

LACK OF AUDIENCE RESPONSE KILLS ABC-TV'S BIG MONEY QUIZ SHOW

The first casualty of the new TV season came last week as ABC-TV dropped 100 Grand after its third week on the air.

The network planned to program a crime documentary, Cosa Nostra, on Oct. 6 in the Sunday, 10-10:30 p.m. period and was considering the F. D. R. half-hour series as the possible replacement, starting probably on Oct. 13.

ABC-TV's big-money quiz entry, the first since the rigging scandals of a few years ago, failed to receive audience attention in its first weeks and apparently had little possibility of picking up additional viewer interest in the weeks that lie ahead.

During its run, 100 Grand gave out $20,000 in cash and $5,500 in savings bonds. The show's executive producer, Robert Stivers, was quoted in agreement with the network decision but he indicated he'd develop two other quiz shows for ABC-TV.

ABC-TV, which had been riding high in the 26-city Trendex overnight reports of the new season on the basis of its first week splash of the season, showed continued slippage. It was a new ball game as CBS-TV and NBC-TV came in with additional new season entries.

According to Trendex overnights, ABC-TV still shows up strong on Monday, 10-11 p.m., where it has programmed the new Breaking Point series; on Tuesday, 8:30-9 p.m. with its Mchale's Navy (also a strong contender last season) and the network has made a presentable showing with the last half of Greatest Show on Earth (Tuesday, 9-10 p.m.) and with The Fugitive (Tuesday, 10-11 p.m.).

NBC-TV and ABC-TV also got most of the ratings pie Wednesday night, according to Trendex's overnight for Oct. 2. CBS-TV came out on top in only one half-hour (at 10 p.m. with the Danny Kaye Show though it was nased
1963 Ted V. Rodgers Awards
for publication writers and radio/TV producers

$8,000.00
IN AWARDS

for published or broadcast reporting on metropolitan transportation problems

Writers of published articles or editorials and producers of radio/television programs that contribute to public understanding of metropolitan transportation problems—and possible solutions—are eligible for the 1963 Ted V. Rodgers Awards.

The Awards are sponsored jointly by the ATA Foundation (American Trucking Industry) and Trailmobile (manufacturers of truck trailers). As leading members of the nation's transportation complex, the sponsors' purpose in offering these awards is to recognize outstanding contributions toward community understanding of the problems of transporting people and goods to and from, and within metropolitan areas.

Awards are offered for published articles in three media: Newspapers . . . magazines . . . and radio/TV public service programming on the subject (local or network). First Award in each category is $1,500; second award $700; third award $300. Entries from weekly newspapers will compete in the general newspaper category but are also eligible for a special $500 award reserved for weeklies only. Plaques will also be awarded to winners in all categories.

rules:

1. Entries will be judged on the basis of scope, thoroughness, writing and reportorial skills as they contribute to public understanding of the problems, planning and financing of transportation facilities responsive to the efficient movement of people and goods to and from and within metropolitan areas.

2. Entries in the 1963 Competition must have been published or broadcast on or between the dates of January 1, 1963, and December 31, 1963.

3. Articles, editorials and programs of any length are eligible. A series of articles or broadcasts will be considered a single entry.

4. There are three categories of participation: Magazines; daily/weekly newspapers; radio/television. Material printed in publications devoted primarily to the transportation industries is not eligible.

5. Awards will be the same in the three categories: First—$1,500; Second—$700; Third—$300. There is also a special $500 weekly newspaper award.

6. Entries will be accepted until December 31, 1963 (postmark). They should be mailed to:
Ted V. Rodgers Awards, The ATA Foundation, Inc.,
1616 P Street, N. W., Washington 36, D. C.

7. Material submitted will be returned only when specifically requested. Radio/TV stations may submit in addition to scripts other supporting material such as audio tapes, video tapes, film clips, etc. Decision of the judges will be final. In event of ties, duplicate prizes will be awarded. This awards program is subject to state and national regulations. Winners will be notified by special letter. A complete list of winners will be available to all entrants and those requesting it.
out by NBC-TV’s Eleventh Hour in the 10:30-11 p.m. period).

As of that night, all new network programming for the season had been seen. An exception was Perry Como who is now in a new time period on NBC-TV—Thursday, 10-11 p.m.—and who started his new season on Oct. 3.

On Wednesday, The Virginian in its 90-minute period dominated the Trendex reports up to 9 p.m. when ABC-TV’s Ben Casey took over for the hour, outrunning both Hillbillies and Dick Van Dyke on CBS-TV. NBC-TV’s new Espionage series that started that night at 9-10 trailed both Casey and the CBS-TV shows.

On the basis of the Sept. 27-Oct. 1 Trendex, CBS-TV would appear to be out front in most time periods Saturday through Tuesday nights but failing to come out on top in any period on Friday evening. NBC-TV was particularly strong on Friday night, leading in each time period.

**CBS-TV plans ahead**

CBS-TV appeared ready last week to begin top-level decision making for the 1964-65 TV season. Item: William S. Paley and Frank Stanton, board chairman and president, CBS Inc., were scheduled to be in Los Angeles last Thursday and Friday (Oct. 3-4).

The network’s announcement: “In addition to a review of programs currently in production the CBS executives’ trip to the West Coast will include a comprehensive survey of programming projects for the 1964-65 season.” James T. Aubrey, Jr., president of CBS-TV, and key program executives from both the East and West Coasts were expected to take part in the meetings.

As of last Monday (Sept. 30), all CBS-TV’s new season entries had made their start for the current season.

---

**Triangle adds two shows to syndication list**

The radio-TV division of Triangle Publications is stepping up its activities in radio syndication with the distribution of two new series, Keiter Contacts and Window on Washington with Ann Blair, Mike Roberts, manager of pro-
program sales for Triangle, reported last week.

Both programs are five-minute, five-times-a-week vignettes. One spotlights Triangle sportscaster Les Keiter in interviews with well-known sports personalities and the other Triangle Washington correspondent Ann Blair conducting interviews and offering commentary on the Washington scene. In addition, a 15-minute version of each show will be syndicated on a once-a-week basis. This is the third program placed in syndication by Triangle in recent weeks, following the release of the 15-minute, weekly Motor Racing Review.

Video Industries merges with Tele-Tape

Consolidation of Tele-Tape Productions Inc. and Video Industries Corp. of America, both Chicago, through an exchange of stock was announced Tuesday (Oct. 1) by W. J. Marshall Jr., board chairman of Tele-Tape, the surviving corporate entity. Voting by stockholders is set for Oct. 25.

Both firms have been in business about four years and both provide producers, advertisers and agencies with mobile video tape facilities for remote production assignments. Tele-Tape has operated chiefly in the East and Southeast while Video Industries has operated in the Midwest. Combined gear, valued at over $1 million, includes three mobile units with six Ampex VTR’s and a dozen Marconi 4½-inch cameras.

WHN gets New York Mets

WHN New York has signed a two-year contract with the New York Mets baseball club for broadcast of home and away games. The broadcasts, to start with pre-season exhibitions next year, will be sponsored by Liebmann Breweries for Rheingold beer and Brown and Williamson Tobacco Co.

The Mets are moving to WHN from WABC. WHN has also signed the New York football Jets.

Hartford pay-TV gets hockey

The RKO General Phonevision Co. announced last week that the home games of the New York Rangers and Boston Bruins hockey teams and of the New York Knickerbockers and Boston Celtics basketball teams again will be telecast over the company’s subscription TV station in Hartford this fall and winter.

John H. Pinto, vice president of RKO General Phonevision, said the hockey schedule will start Oct. 8 and the basketball coverage on Oct. 17. The Hartford pay TV system now has 3,400 subscribers, according to Mr. Pinto.

Superb quality...moderately priced ...the preferred choice on five continents

SPOTMASTER 500A

TAPE CARTRIDGE SYSTEMS

...NOW FEATURING DELAYED PROGRAMMING

The new SPOTMASTER 500A series of tape cartridge equipment is winning praise and acceptance throughout the world. These rugged, dependable machines provide snap-in cartridge loading, and split-second, one-hand operation...combined with high quality, wide range reproduction and all the time-tested, field-proven SPOTMASTER features.

And now something more has been added—the optional SPOTMASTER 500 A-DL Delayed Programmer. Designed to provide a 6-second to 15-minute delay in the broadcast of program material, the 500 A-DL makes possible "instant censoring"...lets you delete objectionable program material from interviews and other live origina-
tions while the program is on the air. The 500 A-DL may also be used to meet many other delayed programming requirements. With the DL function switched off, the unit operates as a standard 500A recorder/playback.

On five continents, more stations use more SPOTMASTERS than any other cartridge tape system. Write or phone for full information; learn about the SPOTMASTER lease/purchase plans...mono and stereo models...rack-mount or compact models...complete line of equipment and accessories...24-hour-a-day ruggedness and dependability...ironclad, full-year guarantee.

Right to editorialize must be used—Stanton
CHARACTER PRICELESS BROADCASTER ASSET, HE SAYS

Broadcasters must use their right to editorialize—or lose it. But they must not abuse it—or they will invite government regulation.

Dr. Frank Stanton, president of CBS Inc., offered this two-edged warning last Tuesday in the opening-day luncheon address at the CBS Radio affiliates convention in New York (see page 34).

"We ought to be more than a service in our communities," he said. "We ought to be a force. . . . The most priceless asset any broadcasting station can have is character, and we cannot have character by being faceless men, unresolved to arrive at an opinion and unwilling to express it."

But the "worst enemy broadcast editorializing has now is abuse," he continued. "Nothing is so suicidal and shortsighted as the conviction of a very few broadcasters that, because they hold a license to use the airwaves, their views alone should be entitled to a hearing on their frequencies."

The broadcaster who presents only his own views, Dr. Stanton said, defeats "the whole purpose of editorializing," which he described as "nothing more and nothing less than stimulating the formation of opinion by ourselves having an opinion, and by ourselves expressing it."

Interplay of Opinion • "How can we possibly be stimulating the free interplay of opinion unless—far from just permitting the airing of opposite views to our own on our microphones—we seek them out?" he continued. "It is, in my book, a complete negation of the whole idea, the whole reason and point, of editorializing, if the way we do it impedes or diminishes or warps this free interplay of opinion that gives our democracy its essence and its drive."

This, he noted, does not mean that broadcast editorialists themselves should be half-hearted, ambiguous, weasel-worded or otherwise lacking in force or conviction.

Dr. Stanton speculated that, in retrospect, broadcasters may have been "guilty of timidity and indecision, of indifference and opportunism," by failing to go into editorializing when the FCC first gave them the right by repealing the so-called Mayflower Decision in 1949.

He said he would not exclude the CBS-owned stations from that charge. But since 1958, he said, the company's seven radio stations have broadcast more than 1,500 editorials and the five TV stations about 350. In one city (St. Louis) the CBS radio and TV stations (KMOX-AM-TV) took opposing positions on a city charter question, Dr. Stanton noted.

One-Fourth Editorialize • He cited a National Association of Broadcasters study indicating that 1,476 radio and TV stations, or somewhat more than one out of every four, are editorializing. He said that "this must be an extremely impressive gain over a relatively short period," but that it still leaves "only a little over a quarter of the stations in the country filling this vital function."

Radio, Dr. Stanton concluded, "can achieve new levels of influence in this country" and reach "new plateaus of usefulness," The radio broadcaster, he said, "has it within his power to be one of the most respected and the most useful members of his community"—or "to become a cipher by abandoning, or a public nuisance by misusing, one of his highest responsibilities."

These alternatives, he said, are not government problems but individual problems, to be answered "in accord with our own concepts of our duties and our opportunities."

PADLOCK ON CHECKS
Salant hits out at practice of paying for news stories

The drift toward "checkbook" journalism—payment for exclusive rights to current, hard-news stories—was criticized last Wednesday (Oct. 2) by Richard S. Salant, president of CBS News, in a talk before the CBS Radio Affiliates Association convention in New York (see story page 34).

This problem was one of several raised and discussed by Mr. Salant, including the question of the balance between domestic and foreign coverage; the relationship between CBS News and affiliates' newsrooms in domestic news coverage; the problems inherent in making news judgments in advance of news events, and the issue of fairness and balance in the coverage of major news stories, particularly those in race relations.

Mr. Salant was particularly disturbed about what he called a growing tendency on the part of informational media to pay for exclusive rights to news stories. He asserted that CBS News would
refuse to become a part to bidding for such rights "for as long as we can stay out of it," and added:

"Sure, I'd love to give you interviews with Mrs. Fischer and the sound and the cries of the quintuplets. But I am going to hold out against it as long as I can if it means paying for the right to do this, paying on an exclusive basis so as to deprive everybody else of the right to cover legitimate news stories. I hope I have your support in this because there are some important principles involved."

**More Domestic Coverage** Mr. Salant advised affiliates that CBS News is desirous of bolstering its domestic coverage by making more extensive use of the affiliates' news-gathering facilities. He urged station officials to impress upon their news directors that CBS is receptive to calls from them on developments of national interest in their areas, and asked them to telephone either the bureau manager in a particular region; the editor-in-chief in New York and, if necessary, Mr. Salant himself.

He prefaced this call for cooperation by noting that in the last two years there has been an increase in domestic coverage of news on CBS Radio and a corresponding decrease in foreign and Washington coverage. He reported the foreign cut-ins declined from 48% in the first six months of 1960 to 43% for the same period this year; the Washington cut-ins decreased from 32% in the 1960 period to 29% this year, and the domestic cut-ins rose from 20% in 1960 to 28% this year.

Mr. Salant dealt at length with the problems inherent in making news judgments in advance of news events. He stressed that although it is desirable to "beat the competition" by publicizing and getting newspaper listings of the broadcasts of important news events, the network also wants to have the opportunity of exercising news judgment instead of publicity judgments.

Unlike newspapers and magazines which publish after an event, radio and TV don't have that luxury, Mr. Salant declared. A network must decide in advance whether to cover an event live, he observed, adding that CBS News makes every attempt to find the importance of an event before it makes a decision.

Another critical problem, he said, is related to the coverage of "delicate and complicated" events, particularly those in race relations.

It devolves upon the network, he said, to achieve "fairness and balance" in the presentation of such developments. This means that viewpoints with which news officials at CBS may disagree should be broadcast if they contribute toward rounding out the story, Mr. Salant emphasized.

**NAACP demands violate Calif. FEPC**

The demand of the National Association for the Advancement of Colored People that each technical crew engaged in producing films for television or theatrical exhibition in the Hollywood studios include at least one Negro is contrary to the California Fair Employment Practices Act, in the opinion of the state's legislative counsel.

Asked by Charles J. Conrad, state assemblyman from Sherman Oaks, "if a sponsor of a television program directs the producer of the program, to hire a Negro as a member of the production crew in order to have a Negro in the crew, has the sponsor violated that act?" The legislative counsel answered "yes."

Explaining that reply, the counsel's letter states:

"We think that the courts would conclude in the situation involved in your question that the sponsor of the television program who directs the producer to hire a Negro for the crew in order to have a Negro on the crew has attempted to 'incite' the producer to hire a Negro because he is a Negro and to refuse to hire a non-Negro applicant for a job because he is not a Negro."

The act "provides that it is an unlawful employment practice for an employer to refuse 'to hire or employ' a person 'because of his race . . . color or ancestry.' We think that if the producer in the situation described refuses to hire a non-Negro applicant for a job because he is not a Negro, the producer has committed an unlawful employment practice forbidden by the act. Thus it follows that a sponsor, who attempts to incite the producer to hire an applicant for a job because he is a Negro and to refuse to hire another applicant because he is not a Negro, has violated the act."

A second question asked by Mr. Conrad: "If the producer of a television program enlarges his production crew by one man and hires a Negro as the additional crewman and refuses to hire another equally qualified applicant for the job solely because he is not a Negro, has the producer violated the act?" also received an affirmative reply.

In making his correspondence with the legislative council's office public, Mr. Conrad commented that the basis of the Fair Employment Practices Act "is that all persons should be able to seek and hold employment without discrimination on account of race, religious creed, color, national origin or ancestry. This is the law and should be respected. If it is wrong it should be changed not disobeyed or evaded."
Ford Foundation gives $6 million to NET
EDUCATIONAL TV GROUP TO IMPROVE PROGRAM QUALITY

The Ford Foundation announced last week it is making a $6 million grant for 1964 to the National Educational Televisiion and Radio Center to bolster a “high-quality” informational and cultural program service for noncommercial TV stations throughout the country.

The grant raises to $86,4 million the amount the Ford Foundation has given for various educational TV projects since 1951. NETRC itself has received $28.2 million during that period.

The foundation also announced it is ending any large-scale grant-making activities in instructional activities. Henry T. Heald, president of the foundation, noted this phase of educational TV is sufficiently established and additional foundation funds on a large scale are unnecessary.

The NETC at the same time announced that the grant marks the beginning of a major new phase of its activities. Henceforth, it will discontinue radio, instructional-television and other related fields and concentrate its efforts in the areas of informational and cultural programming to TV stations. As of this week the organization will be known simply as National Educational Television.

More Ahead - The $6 million Ford grant will raise NET’s operating budget for 1964 to $7.7 million from $6 million in 1963. Mr. Heald indicated that the foundation would make additional grants in the vicinity of $6 million to NET for several more years, subject to review by the foundation’s board of directors.

John F. White, president of NET, reported that the grant will enable the center to produce programs of quality in the informational and cultural areas, but said there are no plans to increase the number of hours of programs the organization supplies to its affiliated stations. Affiliates now receive 10 hours a week of programming, of which five hours are new programs.

Mr. White said there are now 81 ETV stations in the country, of which 75 are affiliated with the center. By the end of 1964, he estimated there will be 95 NET-affiliated outlets.

The Ford grant, Mr. White said, will enable NET to produce more of its own programs and will also result in a new affiliation policy whereby noncommercial stations will receive NET programs for a nominal yearly fee.

Executives in the news and informational areas at the three TV networks asserted that NET’s move toward the production of higher quality public affairs shows would have no effect on their own plans. All of the networks, in fact, indicated they had plans to increase the number of public affairs and informational programs in 1964. Several news executives commented that they “welcomed the competition” from NET.

Film sales...

47 markets set for special

United Artists Television has reported sales of its six Wolper-UA-TV specials to eight additional sponsors bringing its market count for the series to 47.

UA realigns TV activities

United Artists Corp. announced last week that henceforth its television activities will be combined into one corporation, United Artists Television Inc. In the past, another corporation, United Artists Associated Inc., concentrated on the sale of theatrical films to TV, while United Artists Television produced and sold programs to networks and stations. It was said that present employees and officers will continue in their respective posts in the new corporation.

WOR-TV to increase color

WOR-TV the only independent TV station in New York scheduling color, has announced a new boost in colorcasts effective next spring. An estimated 54 hours each week will be in

BROADCASTING, October 7, 1963
color, representing about 48% of the station's weekly programing.

With the new color expansion, the station will be adding about $500,000 worth of new technical facilities, including six image orthicon color cameras. Its Broadway studios will be remodeled for live color.

The New York Mets (National League) home baseball games will be colorcast.

Program notes...

For next season: A half-hour situation comedy titled "Kibbee Hates Fitch" is being produced for the NBC-TV 1964-65 season by Ellen Enterprises Inc. and United Artists Television Inc. The comedy is the property of Neil (Doc) Simon, whose Ellen Co. is a co-producer. The series will be based upon life in a fire station.

Krebiozen show offered: WJZR Newark is offering to interested stations tapes of its program, "Krebiozen—the Doctor's Side of the Controversy." The hour program on the controversial drug is available on a cost basis from Wade T. Nixdorf, director of public relations, WJZ, 32 Green Street, Newark.

Post mortems: Second guessing is the keystone of a new sports show on WERE Cleveland following Cleveland Browns pro football games. Entitled "Second Guess," and created by Charles L. Getz Jr., partner in Wendell and Getz Advertising Agency, Cleveland, the program uses experts who argue, criticize and commend points in the just-completed game. Former Cleveland star Cliff Lewis, John Carroll University coach John Ray and Ken Hildebrand, of WERE, provide the post-mortems. "Second Guess" shifted from WQAR to WERE Oct. 6 on conclusion of the baseball season.

Cooperative council: WVMC Mount Carmel, Ill., not only has permission to broadcast live and direct the bi-weekly meetings of the town's city council, it got the local legislators to change the meeting time from evening to afternoon to accommodate the daytimer's scheduling problems. Noting that citizens have a right to know what goes on at the council meeting, the mayor of Mount Carmel said "radio is an excellent way to give them a front-row seat."

FINANCIAL REPORTS

PKL earnings up in nine-month period

Papert, Koenig, Lois, the first agency to issue stock to the public, last week presented a financial statement for the nine month period ending Aug. 31, showing a gain of $76,661 in net income over the same period in 1962.

PKL reported its application to the Quotations Committee of the National Association of Securities Dealers for daily listing of quotations in the "eastern list" of newspapers has been approved. The listing will reportedly begin this month.

Outlet Co. has drop in broadcast revenue

Total retail sales of the Outlet Co., Providence, R. I., were up, but revenues from broadcasting (less expenses), service charges and miscellaneous sources as well as net earnings were down in the first six months of the year compared with the same period in 1962.

The Outlet Co. is a department store which also owns WJAR-AM-TV Providence, and recently acquired WDBO-AM-

FM-TV Orlando, Fla. (Broadcasting, July 22). Six months ended July 27:

EQUIPMENT & ENGINEERING

COLOR WILL HIT $1 BILLION BY '65

Saxon notes continuing upswing in color sales

Raymond W. Saxon, president of RCA Sales Corp., last week told a luncheon meeting of the New York Sales Executive Club that the retail sales rate of color TV sets will surpass the $1 billion annual sales rate of black-and-white sets by 1965. Mr. Saxon predicted that the sales rate will pass the $450 million mark this year and reach at least $750 million next year.

He noted that RCA's distributor-to-dealer color set sales are running 67% above last year, and color dollar volume has surpassed that of black-and-white.

Two more enter color

Two more television manufacturers, Muntz TV Inc. and American Television Inc., both Chicago, announced last week they are making color sets available for immediate delivery. Both are using the 21-inch round RCA tube.

Muntz is stressing three-way combination units since its present sale of black-and-white sets falls into this category. Ranging in price from $425 to $800, the new Muntz color sets also include AM-FM radio and stereo phonograph.

American Television, which makes the deForest brand set, is featuring a color table model leader priced at $299. A step-up model is priced $400 with a combination unit at $750. The deForest set features a rectangular picture upon the round tube.

Mr. Saxon said there is now a high enough percentage of regular prime time program offerings in color, and that this area is no longer a "serious deterrent" in the purchase of receivers in a "mass market." He also said that the once-present problem of color reception quality is another area of doubt that has apparently been removed from the mind of the average consumer.

Mr. Saxon noted that price is still a source of hindrance in color sales, and he said, "We cannot foresee a drastic change in this pricing condition over the next few years."

Mr. Saxon said the total expenditure for RCA's development and introduction effort in the color TV field is estimated at $130 million. He also noted that color TV sales in general have grown to the point where approximately one color set is sold for every nine black-and-white receivers, and it's expected that next year one color set will be sold for every five black-and-white models.

FCC re-affirms date for all-channel sets

To allay rumors that the FCC really didn't mean to force the production of all-channel TV receivers beginning May 1 next year, apparently rife among manufacturers of television sets, the FCC has written an official communication to James D. Secrest, executive vice president of the Electronic Industries Association.

In the letter, the commission says: "We wish to advise you explicitly by this letter that the commission has no intention of deviating from its decision to encourage full utilization of the UHF channels for television broadcasting. We do not intend to initiate any general changes in the principles of the table of channel assignments, including mileage separation requirements for television stations, nor do we anticipate any change in the date (April 1, 1964), after which television broadcast receivers manufactured must be capable of receiving all television broadcast channels.

"We hope that this information will dispel any uncertainty as to the commission's intention to maintain its present television allocations policies."

New RCA beam power tube

RCA announces a new forced, air-cooled UHF beam power tube with a capability of 10 kw continuous wave output at 400 mc.

The new Ceramolx RCA-8437 tube is rated up to 500 mc as a radio frequency power amplifier and oscillator in Class C telegraphy, as an RF power amplifier in Class C FM telephony, and is well suited, RCA says, for use as a frequency multiplier, audio frequency power amplifier or modulator, AM or single-sideband linear RF power amplifier, television or other broadband amplifier.

ITA becomes Triangle division

ITA Electronics Corp., Lansdowne, Pa., manufacturer of transmitters and studio equipment for broadcasting, has become a division of Triangle Publications Inc., it was announced last week. Triangle bought a minority interest in ITA two years ago and acquired the balance of the company less than a year ago. Henry E. Rhea is operating head of Triangle's electronics division.
Red is Johnson's Skelton in the closet

10-YEAR ASSOCIATION HONORED BY ADMEN

The 10-year association of Red Skelton and Johnson's Wax, said to be the longest star-sponsor tieup in TV history, was honored Tuesday (Oct. 1) by the advertising fraternity of Los Angeles, which packed the ballroom of the Statler-Hilton for a luncheon meeting held under the joint auspices of the ad clubs of Los Angeles and Hollywood and the Advertising Women of Los Angeles.

Billed as a “celebration, not a testimonial,” the program nonetheless had its full share of tributes to Red Skelton, Howard Packard, president of S. C. Johnson & Son Inc., prior to the Los Angeles Ad Club luncheon.

Oct. 1 "Red Skelton Day") and from many members of the production staff of the weekly program.

Sherman J. McQueen, vice president of Foote, Cone & Belding, Los Angeles, chairman of the day, noted that FC&B, agency for Johnson’s Wax, had been associated with the star as long as the sponsor had.

Drumbeats . . .

Helping hand • WOAI-TV San Antonio, Tex., has helped bolster the programing of KLKN-TV, the city’s educational outlet. Documentaries on local problems, generally too costly for ETV’s to produce, have been offered to KLKN by the commercial station. WOAI-TV shows already repeated over KLKN outlet include programs on school dropouts, the population explosion, the state prison system, urban renewal and the city police department.

For the hands • A 15-page picture story of CBS Evening News with Walter Cronkite made up Dr. Frank Stanton’s newsletter to CBS employes last week. The story covers the first day of the series’ telecast on CBS-TV Labor Day.

Silver anniversary • WDRJ Roanoke, Va., last week was given a 25-year plaque by Peters, Griffin & Woodward, Inc., the station’s representative since 1938. It was the 11th such plaque presented by PGW.

Sunday salute • A special 4-page section in the Sunday Nashville Tennessean was used to announce the opening of WSM-TV’s new studios. The supplement utilizing maximum amounts of process color was devoted to the sta-
tion's history, personalities, new fall programs and new studio and office facilities.

**BROADCAST ADVERTISING**

John F. Bresnehan, William P. Gordon, William M. LaCava and John L. Owen elected VP's at Foote, Cone & Belding. Mr. Bresnehan and Mr. Gordon are account supervisors on Kool-Aid account; Mr. LaCava is senior producer and head of TV commercial production and Mr. Owen is director of broadcast for New York office.

Paul B. Blustain joins J. M. Mathes, New York, as broadcast production supervisor. He was formerly with McCann-Marchalk as producer of TV commercials.

W. Paul Tippett Jr., previously in advertising department of Procter & Gamble, Cincinnati, named advertising manager of Autolite Division of Ford Motor Co.

John W. Murphy, formerly VP and director of commercial production, Kenyon & Eckhardt, New York, and also executive producer with Filmarket Inc., Los Angeles, joins Needham, Louis & Brobr, Chicago, as TV-radio producer.

W. P. Brown, product manager in General Foods' Post Division, named advertising manager of GF's Birds Eye Division, White Plains, N. Y.

E. L. Timberman, associate general product manager, Colgate-Palmolive Co., has rejoined Kenyon & Eckhardt, New York, as a management supervisor and VP.

Hamilton P. Dendel, administrative manager of American Oil Co.'s eight-state New York sales region, named director of public relations in firm's general office at Chicago. He succeeds James M. Patterson who has transferred to American Oil's marketing department on special assignment.

Jerome V. Svec, senior market analyst with Motorola Inc. since 1956, joins research department of Clinton E. Frank Inc., Chicago.

Bruce R. Kelly and Theodore R. Marston join copy staff of Clinton E. Frank Inc., Chicago. Mr. Kelly was with Walde & Briggs there and Mr. Marston was with Leo Burnett Co.

George Beyer Jr. and Robert E. Anderson promoted to merchandising managers in Lever Bros. Personal Products Division and Household Products Division, respectively. Mr. Beyer was formerly new products manager of Personal Products Division. Mr. Anderson was special projects manager-consumer relations.

Charles M. (Chick) Green joins Sara Inc. as director. Mr. Green has recently been a freelance TV spot director.

Herman E. Bakken Jr. rejoins Pittsburgh office of Fuller & Smith & Ross as account executive.

**THE MEDIA**

John Scoupp, manager of promotion at NBC, named director, promotion for TV network. Mr. Scoupp will supervise network's national promotion activities in West Coast and New York promotion departments. Gerald E. Rowe, formerly manager of audience advertising and promotion at NBC, becomes director. He joined network in 1960 as manager, creative services for on-the-air promotion.

Bob Price, formerly with San Francisco office of CBS Television Stations National Sales, appointed sales manager of KCBS, CBS-owned radio station in that city, where he started his broadcasting career as a local salesman eight years ago. He succeeds Ken Stratton, who has returned to Chicago office of CBS Radio Spot Sales.

Frank Crane has resigned from Broadcast Clearing House to devote full time to developing new business venture to be announced shortly. Mr. Crane was head of Los Angeles office of Torbet, Allen & Crane before joining BSH.

Allen V. Martini, since last May coordinator of sales and operations of Theatre-Vision Color Corp., National General Corp. subsidiary to develop a closed circuit color TV network for theatres, promoted to VP. Before joining Theatre-Vision, he was a sales executive for Ziv-UA Television.

Sergeant Major Bill Mansfield, who retires from Army Oct. 31, will join public relations office of National Association of Broadcasters as audio-visual.
Reynolds, Hill quit

Two well known WBBM Chicago newscasters, Frank Reynolds and Hugh Hill, have resigned because of philosophical differences with their immediate superior. The two newsmen were employed by Bill Garry during his term as news director of the CBS O&O station. When he left to join WBB (TV) Chicago he was replaced by John Madigan, present immediate superior of Mr. Reynolds and Mr. Hill. Mr. Reynolds said he expected to transfer to another CBS station while Mr. Hill said he plans to go to another network.

Daniel C. Park, formerly media director for Results Inc., Tucson, Ariz., advertising agency, appointed national/regional sales and promotional director of KEVT Tucson. Mr. Park started in radio at KYW Philadelphia in 1936 and was general sales manager of WRK Indianapolis for 12 years. Henry O. Vilegas, air personality on KEVT as well as KGUN-TV same city, named local sales and promotional director of KEVT.

Robert Brewer, director of marketing at KHOL-TV Kearney-Holdrege and KHFL-TV Hayes Center, both Nebraska, named station manager of both outlets. Marilyn Milliken, formerly program director, appointed assistant station manager.

John Prince, formerly of WTMA Charleston, S. C., appointed program director of WBBQ Augusta, Ga. and Paul Collins, previously with WQXI Atlanta, join WBBQ announcing staff to do "twin" show.

Ron Montgomery, formerly with WBYE Roanoke, Va., named program and music director of WLL Lynchburg, Va., new permittee.

Lou House, program director at KRBC Abilene, Tex., join KXST Santa Barbara, Calif., in same capacity.

Dale Kelly, WOLF Syracuse, N. Y., program director, resigns to enter army.

Chuck Raymond, formerly of KROP Brawley, Calif., and WUSD Trenton, N. J., joins WLAN Lancaster, Pa., as music director-air personality. Tony Montgomery, WLAN air personality, joins with Baltimore. WLAN Music Director Jim Hatzel resigns to enter army.

Don Schwartz, formerly with KABC Los Angeles, joins sales-service staff of KBLA same city.

Lee Desilet, assistant sports director of KOMO-AM-TV Seattle and play-by-play announcer of Seattle Rainiers Pacific Coast League baseball club, assumes additional duties on KOMO sales staff.

Jerry Gordon, with WINF Hartford, Conn., joins WPRO same city as air personality.

Larry Dean, in Nashville, Detroit and Baltimore radio for 12 years, joins WWIN Baltimore as disc jockey.

Gene Miller, WDBO-TV Orlando copy chief, appointed promotion director at WDBO-AM-TV.

Floyd A. Timberlake appointed manager of engineering for Crowell-Collier Broadcasting Corp., with offices at CCBC's Los Angeles headquarters. Mr. Timberlake previously was chief engineer at WBKB-TV Buffalo. He started in broadcasting in early 1930's at WCAZ Carthage, Ill. and past affiliations include ABC and CBS. CCBC stations are KFWB Los Angeles, KWBK San Francisco-Oakland and KDWB St. Paul, Minn.

William P. Marselles and Dale Stevens have been elected to board of

**Here's the Answer To Libel Suits:**

One slip of the lip, however accidental, can bring about court action—with you as the defendant in a libel suit. It can be costly enough to be disastrous. Now you can hold your loss on any claim to an agreed amount you carry yourself, and let Employers Reinsurance handle the excess. This specially designed policy provides economical protection against losses due to libel, slander, invasion of privacy, piracy, violation of copyright. For details and rates, contact:

Craig Fisher, producer of NBC-TV's Exploring, named producer of Sunday which begins on network Oct. 27 (4-5 p.m. EST).

**NEWS**

Harry Reasoner, CBS News correspondent, given newly created assignment as roving correspondent. His reports will appear primarily on CBS Evening News With Walter Cronkite. He will also cover major stories for other network broadcasts and retains post of anchor man on CBS Sunday News.

**Hill's term extended**

Great Britain's postmaster-general has announced that Lord Hill's chairmanship of Independent Television Authority has been extended. When Lord Hill was first appointed the term of office was from July 1, 1963 to July 29, 1964. The postmaster-general said at that time that the appointment would be extended to the full period of five years when the television bill became law. Now that the Television Act, 1963, has come into force, Lord Hill's chairmanship will be extended from July 30, 1964, to June 30, 1968.

Russell G. Van Arsdale, recently with WJAR-TV Providence, R. I., named news director of KTTV(TV) Los Angeles.

Peter vanBuren, WLAN Lancaster, Pa., news reporter, joins WQAL same city. Fred Klein, WGAL news director, to WLAN news staff. Larry Randall, from WWFM Lancaster, to WLAN news department.

Claire Beach, formerly weather reporter on WRC-AM-TV Washington, joins WTOP-TV Washington as TV reporter. Previously, she had been with WJZ-TV Baltimore.

George Ray, formerly with WTVH (TV) Peoria and WREK-TV Rockford, both Illinois, appointed news director of KCHU-TV San Bernardino, Calif.

**EQUIPMENT & ENGINEERING**

David J. Melamed promoted to secretary of Communications Satellite Corp. He joined Comsat last November as assistant counsel to chairman of incorporators, and subsequently was appointed assistant secretary and assistant treasurer. Previously he was associated with New York law firm of Cravath, Swaine & Moore.

Donald MacGregor, VP in charge of manufacturing for Zenith Radio Corp. and with Zenith since 1946, retired Oct. 1 but continues as consultant.

William E. Boss, formerly coordinator of color TV activities for RCA and with that firm 15 years, joins Admiral Corp., Chicago, in newly created position of sales manager for black-and-white TV.

Leonard G. West, formerly with ITA Electronics and RCA, appointed chief project engineer of CCA Electronics Corp., Yeadon, Pa. Mr. West will report to Juan C. Chiabrando, director of engineering, and be responsible for design of high power broadcast and communication transmitters.

Rulemakings

PETITION FOR RULEMAKING DISMISSED

- Tampa, Fla.—Tampa Bay Television Co. Petition for institution proceeding to assign channel 32 to Tampa-St. Petersburg. Letter requesting dismissal filed Sept. 12.

PETITIONS FOR RULEMAKING FILED

- WIFN-FM Franklin, Ind.—Requests amendment of rules to permit WIFN-FM to change frequencies and increase power to maximum of 3 kw ERP and to present alternate. Received Aug. 21.

- WXYZ Jamestown, N. Y.—Requests amendment of rules to change table of assignment to channel 26A to Jamestown. Received Sept. 24.

KULD Fairway, Kan.—Requests institution of rulemaking to add FM channel 221A to Fairway. Received Sept. 24.

Huntsville, Ala.—Alabama Educational Television Commission. Requests amendment of rules to change table of assignment to channel 23 from commercial to noncommercial. Received Sept. 25.

Processing line

- Notice is hereby given, pursuant to Sec. 1.354(c) of commission rules, that on Oct. 28, 1963, standard broadcast applications listed in appendix below will be considered as ready and available for processing. Pursuant to Sec. 1.108(b) (1) and Sec. 1.361(c) of commission's rules, application, in order to be considered with any application appearing on list or with any other application on file by close of business on Oct. 28, 1963, which involves conflict necessitating hearing with application, must comply with interim criteria governing acceptance of standard broadcast applications. In note to Sec. 1.354 of commission rules and be substantially complete and tendered for filing at offices of commission in Washington by whichever date is earlier: (a) the date of business on Oct. 28, 1963, or (b) earlier effective cut-off date which listed application or any other conflicting application may have by virtue of conflicts necessitating hearing with applications appearing on previous lists. Attached list contains less than usual number of 50 applications in order that action can be taken on all applications presently in "processing line—awaiting action" category without any unnecessary delay which might otherwise occur.

Attention of any party in interest desiring to file pleadings concerning any pending standard broadcast applications pursuant to Sec. 309(d) of Communications Act of 1934, as amended, is directed to Sec. 1.359 of commission rules. The time for filing of pleadings is governed by the time for filing of any other related applications or pleadings. Appendix follows:

-WBOL Knoxville, Tenn.—WBOL Inc. From 1490 kc, 250 w, 5 kw-LS, unil. (Fountain City); to 1480 kc, 250 w, 1 kw-LS, unil. (Knoxville) (BP-15095).

-KDAY Santa Monica, Calif.—Continental Broadcasting of California Inc. From 1380 kc, 50 kw-D, DA: to 1580 kc, 1 kw, 50 kw-Ls, DA-2, unil. (BP-15096).

-KEYY Provo, Utah—Mid-Utah Broadcasting Co. From 1450 kc, 250 w, unil. to 1650 kc, 250 w, 1 kw-LS, unil. (BP-15097).

-KVOP Plainview, Tex.—KVOP Inc. From 1490 kc, 250 w, 1 kw-LS, unil. to 1460 kc, 250 w, 1 kw-LS, unil. (BP-15102).

..
The REA Controversy

You might not even know what the REA is, or that it's controversial. But a controversy exists, and it involves you as a taxpayer, as a customer of an investor-owned electric light and power company (perhaps as a shareholder, too), or as a member of a rural electric cooperative.

To begin with, REA stands for the Rural Electrification Administration, a bureau of the Federal Government in Washington. It was established in 1936 to make loans to local agencies who would help get electricity to rural America. The local agencies were called rural electric cooperatives (now sometimes “rural electric systems”). These systems borrow money from the Federal Government at 2% interest. As cooperatives, they pay no Federal income tax.

Because investor-owned electric companies and rural electric co-ops worked as good neighbors, electricity now flows in plentiful supply throughout our nation’s farmlands. Yet the REA recently asked the treasury for more loan appropriations than ever before ($425 million in the last budget, compared with only $175 million back in 1952).

Many people—magazine and newspaper writers and editors, congressmen, senators, business leaders, farm leaders—have asked for an explanation of the REA’s ever-growing budget. General maintenance and the “heavying up” of existing lines account for part of the huge expenditure. But the heaviest portion is requested for building generating plants and high-voltage lines.

Considering this, thoughtful people are asking whether the REA in Washington is encouraging some rural electric co-ops to build power plants and transmission lines where they are not needed. Many people are wondering whether the REA is loaning money to some co-ops to help build a Federal power system not authorized by Congress.

Many other questions have been asked about REA loans: Are they being used by REA in Washington to urge local rural electric co-ops to expand into urban and industrial service, in contradiction to the purpose for which they were established? Is it proper for the REA to lend public funds while keeping the basis for the loan a secret? Is the REA in Washington injuring its once-honored image, and also the honored images of the local rural electric cooperatives?

Naturally, we in the electric light and power companies also ask these questions. But our voice is only one among many. Perhaps your voice should join in, too, for the question of how you want your tax dollars to be used has great bearing on this nationwide controversy.
**OUR RESPECTS to Goodman Ace**

**Articulation difficulty led to writing**

Groucho Marx was once introduced on a radio variety show by a master of ceremonies who said, "Well, if it isn't Groucho Marx." Groucho replied, "Well, if it isn't Groucho Marx, then who is it?" The answer could have been, "Well, if it isn't Groucho Marx, it's Goodman Ace."

That's because so many of the words which have poured from the mouths of such as Marx, Kaye, Berle and Talullah originated in the mind of Goodman Ace.

Today he's creating material to fit the rapid pace of Sid Caesar, after spending seven years supplying low pressure material to fit in between Perry Como's songs. If this seems terribly contrasting, it is not surprising for this man who once undertook to write material for a radio variety show which featured such extremes as Jerry Lewis and George Sanders. He was Tallulah Bankhead's *Big Show* on NBC and Mr. Ace still rates it as one of his greatest achievements, and most gratifying accomplishments.

**His Mark** • But if he has shaped his material to fit the particular medium or personality, there remains the indelible mark of his artistry—the reverence for the humor of the spoken word, the outrageous pun, the creation of the absurd situation. Goodman Ace's humor belongs in the coffee houses with Addison and Steele and Swift, around the round table with Benchley and Kaufman, and not in the sideshow with the clown making pratfalls. It was this trait which converted Berle from a variety format to a situation-type role, and has made Sid Caesar accept what he at first called "walky-talky" type material. Mr. Caesar, long known for his expressive face and flair for pantomime and mimicry, actually showed surprise at the rehearsal of his first Ace-written show to find a script entirely written out.

This is the latest challenge undertaken by a man who 46 years ago entered the writing business at the drop of a hat—that is, he forsook a $40-per-week hat-selling job to enter newspaper drama reviewing at $25 a week in Kansas City.

Born Jan. 15, 1899, in Kansas City, Mr. Ace cut short a college education at the age of 18 upon the death of his father so that he could support his mother and two sisters. Even under those circumstances, his mother urged him to take the lesser-paying newspaper job with the *Kansas City Post*, because it was the kind of work he enjoyed. Even today he still insists, "I am a writer, I could never be anything else."

For 16 years, however, he was some-thing else—namely a leading radio personality with his wife, Jane, on a show called *Easy Aces*. The program had its beginning on KMBC Kansas City. By 1931 it had moved to Chicago, and in 1933 it went to New York and network radio, where it stayed until 1948.

Since that time, Goodman Ace has been putting words into other people's mouths, handling the writing for such productions as Danny Kaye's radio show, and the previously-mentioned Tallulah Bankhead *Big Show*, which ran an hour-and-a-half on Sunday nights for two years (1950-51). In 1952, he came to television with the *Mitlton Berle Show*, and for the past seven years he has written for Perry Como. Also during that time, he has contributed articles to *Saturday Review*, written a book entitled *The Book of Little Knowledge*, and he says one of these days he'll get around to writing his memoirs, which he has tentatively titled, *How To Try In Television Without Really Succeeding*.

Today at 64 (he claims he's actually closer to 185), Mr. Ace talks with enthusiasm about the Caesar show, his immediate project, and with philosophy about himself and his trade. "I first got into writing when I was young because I had difficulty articulating," he explained wryly. "Now things have reversed themselves, and you can't stop me from talking. Trouble is, I have the feeling I'm saying the same things over and over again." Goodman Ace hasn't run out of things to say, though, as a New York critic attested in a review of the first Caesar show a few weeks ago: "The influence of Mr. Ace was noticeable in a number of the sketches. There were topical quips, unexpected twists with ideas and basically funny thinking."

Mr. Ace himself feels that a comedy writer should go beyond simply trying to make people laugh, and should "say something" in his humor. He admits, however, that topical humor can become too heavy if not balanced by the less-serious types of skits and situations.

As one wag once put it, "Comedians come and go, but Goody Ace just keeps rolling along." It is true, but not by accident. Mr. Ace's longevity in the business has been accompanied by a stream of half-jesting philosophy. "I used to get all worked up arguing with a comedian and trying to convince him about using a particular routine or gag. Even if he agreed to use it, it would be a half-hearted effort, and better not used at all. So I've just adopted the attitude that it may take 10 minutes to sell a gag to a comedian, and it only takes five minutes to write another one."

An *Old Saw* • It might be expected that a veteran of humor might go along with the old saw that there "are no good comedians coming along to replace the Bennys, Hopes and Skeltons." Mr. Ace, however, sees it differently. "Today's comedian attempts to be more of a character actor, instead of a straight standup comedian. He has many more pressures determining his success than did the older comedians. For instance, Dick Van Dyke, whom I consider to be one of the best young comedians, was almost put off the air two years ago by ratings. If our show, the *Easy Aces*, had been judged by ratings, it wouldn't have lasted a year." Goodman Ace and the ratings have both survived through the years, though hardly on a basis of "peaceful coexistence." Mr. Ace is an avowed ratings critic, and says he has plans to resume writing articles on the subject soon.

Mr. Ace has theories and philosophies about his business. But the one solution to the age-old question, "What is humor?" escapes him still and mystifies him. "Humor is strictly a personal thing, and for that very reason, very elusive."

"Just the other day I was in a very crowded elevator, and a woman was stepping into the elevator. She made some inane comment, and everybody on the elevator broke up laughing. I didn't even think it was funny. Sometimes I wonder if people's idea of humor is so different, how can I ever make them laugh?"

If Mr. Ace questions his ability to make people laugh, few other people do.
EDITORIALS

Fourth network?

A new program force for noncommercial television stations came into being last week. It has an initial grant of $6 million and the promise of more from the enormous resources of the Ford Foundation. It is a force to be reckoned with in future television program planning.

The new force is the National Educational Television and Radio Center which, now that it has the Ford grant, has elected to change its ways. The NETRC has been producing educational radio and television programs for distribution to educational stations. It has now decided to go out of the radio business entirely and drop the production of instructional programs for television. From now on it will devote itself exclusively to the production of “high-quality informational and cultural” shows.

The implications are obvious: The leaders of the educational television movement have chosen to move far beyond the orbit of their original interest. The clear intention is to create programs that will draw larger audiences to the non-commercial stations than the purely instructional programs have drawn. It is not at all inconceivable that NET (for “National Educational Television”) the shorter name by which the old NETRC will now be known) could become a fourth network.

This may prove to be all to the good of the U.S. television system and the American public. Certainly the diversity of responsible program sources is to be encouraged. Yet there will always be the danger that the noncommercial service will be given unfair advantages in its competition with commercial TV. Already that danger is real.

A good many programs now broadcast on the noncommercial stations are supplied by commercial enterprises in exchange for a credit on the air. It is a short step from a simple credit line to a short advertising message, and once that step is taken the noncommercial stations will be competing with commercial stations for advertising support.

Still more commercial enterprises will be tempted to put up money for noncommercial programs if those programs begin to attract substantial audiences. We have no doubt that an NET, if it succeeds in producing attractive programs and clearing them on noncommercial stations throughout the country, will have little trouble raising money from businesses if those businesses and perhaps their products are mentioned on the air.

That will be the time to require the noncommercial stations to abide by their franchises. All those stations were granted in the first place, without competition from rival applicants, on the clear understanding they would never sell advertising.

Who’s boss?

We make the flat charge that the Federal Communications Commission is not serving the public interest, convenience and necessity. These are the counts:

It is overcommercializing its regulation of broadcasting, to grab headlines and eucrhe bigger appropriations.

It is neglecting regulation of telephone, telegraph and other common carrier services which are more important to the consumer economically but which lack the glamor of broadcasting.

It is squandering taxpayers’ funds through “made work,” such as the inane hearings in Chicago and Omaha on local programming, the harrassment of stations on license renewals, unnecessarily prolonged freezes and other contrived devices to force stations to bow to its will.

It is defying congressional intent by seeking to arrogate control over broadcast advertising (which is really rate-making that would transform broadcasting into common carrier status) and by seeking to impose filing fees without legislative authority.

It is spending so much time—an estimated 80%—on its broadcast crusades which it thinks have publicity value that many policy determinations are being relegated to the staff.

It is violating its own fairness doctrine (which is of doubtful legality) by demanding on the one hand that licensees determine their public’s programing needs and, on the other, ignoring the views of elected representatives of the public, to wit, members of Congress.

Since Chairman E. William Henry’s “huckster” barrage in New York two weeks ago, three influential legislators have spoken. Chairman Oren Harris (D-Ark.) of the House Commerce Committee, Chairman Walter Rogers (D-Tex.) of the House Communications Subcommittee, and Senator Gordon Allott (R-Colo.) of the Senate Appropriations Committee have challenged the FCC’s authority to place limitations on advertising, and threaten to interfere with to control over programing and business management of stations.

The commercial time issue is one on which all stations, large and small, and the networks, see eye to eye. This has stimulated more activity through state associations and by individual broadcasters with Congress than any other regulatory issue in recent memory.

Two bills, introduced by Representative Rogers—to prohibit the FCC from making rules on broadcast advertising and to prohibit it from assessing filing fees—are in the hopper. Mr. Rogers wants hearings “as soon as practicable.”

We suggest that, in the absence of immediate action by the FCC withdrawing the commercial time rulemaking and postponing indefinitely from the Jan. 1 effective date the filing fee rules, broadcasters encourage Mr. Rogers and his committee to convene hearings forthwith.

Meanwhile, it would seem prudent for Mr. Henry and his like-minded “give-em-hell” colleagues to take a new look at the law and the congressional intent and not accept as gospel that which the staff masterminds serve up to them.

Congress created the FCC nearly 30 years ago. It can, if it wishes, abolish the seven-man commission and create a new one of three, five or nine men. Unless the present FCC sees the light glaring red from Capitol Hill, we predict the Congress will take strong measures to bring the FCC back under control.

How to relieve television congestion all day long

Just watch KPRC-TV, channel two in Houston. That's all. Then you can forget about peeves, gripes and television congestion all day long. Or most of the night, as the case may be. Because the tiny "sales pills" (around 250) in each KPRC-TV day don't forget. They work fast--and they work continuously, to provide sales relief. Get KPRC-TV at your agency.
