COMPLETE INDEX PAGE 7
As the CATV industry grows, subscribers become more sophisticated and more demanding. To meet this demand, Jerrold has consistently maintained the industry’s largest staff of development engineers.

It is this engineering that led to such Jerrold firsts as the Channel Commander, which made 12-channel systems a reality. And this engineering is responsible for the industry's most advanced, most reliable solid-state CATV systems.

But Jerrold engineering is only part of the story. Modern production techniques, rigid quality control, and extensive field testing assure you that every Jerrold product you buy will function properly.

Jerrold solid-state equipment is being shipped at a record rate to small and large CATV systems throughout the country. It belongs in your system, too. GO FIRST-CLASS...GO JERROLD SOLID-STATE! Available for immediate delivery.

THE EXCITING NEW
Channel 2
ST. LOUIS

BROADCASTING, May 24, 1965
"The MERV GRIFFIN Show," highly acclaimed new "night-people" program, is now seen nightly on KRLD-TV, Monday through Friday, from 10:30 PM to Midnight.

The instant appeal of this new series fits perfectly into the picture of long-time dominance by KRLD-TV in the Dallas-Fort Worth Market. According to the latest NSI, Channel 4 is viewed by 36.5%* more homes per average quarter-hour, 9:00 AM to Midnight, Sunday through Saturday, than the second station in the market.

Whichever audience measurement you choose, the choice is KRLD-TV. See your ADVERTISING TIME SALES REPRESENTATIVE for availabilities in MERV GRIFFIN, too.

*NSI — March 25-April 21, 1965
CLOSED CIRCUIT

No echo

Response to call for formation of “advisory group” on establishment of “national television policy” continues to disappoint man who raised it—Representative Oren Harris (D-Ark.). Mr. Harris, chairman of House Commerce Committee, says so far “only Zenith and the FCC have expressed a favorable opinion. Even the educators TV people haven’t shown much enthusiasm. If the idea doesn’t get more support than this, we’ll have to continue looking at the major industry problems on a piece-by-piece basis.”

Advisory group, if formed, would represent all segments of TV industry and the general public, as Mr. Harris sees it. Members would be appointed by President, congressional leadership, FCC and industry.

Warm up

Members of House Interstate and Foreign Commerce Committee have been getting indoctrination, pro and con, on volatile community antenna issue in advance of hearings to begin May 28. Although Subcommittee on Communications, headed by Representative Walter Rogers (D-Tex.) officially will handle proceedings, prospects are that 33-man full committee will be amply represented.

Vying for congressional interest are representatives of National Association of Broadcasters, Association of Maximum Service Telecasters and Televison Accessory Manufacturers Institute, who oppose, from varying standpoints, Harris bill which is legislative vehicle before committee. National Community Television Association, representing CATV interests, is getting in its pre-hearing licks. At least one public relations organization, Newnay Associates, retained by AMST, also is actively pursuing its anti-Harris bill (and pro-FCC regulation) assignment.

Strained relations

There’s notion in administration quarters that broadcasters are doing themselves by quibbling about clearances for President Johnson’s public statements from White House. It’s pointed out that President never requests network time but simply announces through his news secretary that he will have statement available for broadcast. Because of immediacy of broadcast media, it’s said that broadcasters shoot down their own prime virtue when they argue about need for advance notice.

In defense of White House methods, it’s contended that networks can pick up President live or by video tape for delayed use. President Johnson, aides feel, should be free to make public pronouncements at will on matters he regards of importance. It’s up to networks and other media as to how they propose to cover these events.

Quick bursts

Short-time, short-notice timebuying, which moved from radio into TV in 1960, has now become so prevalent that many TV station managers are finding it difficult to anticipate income through programming which exceeds 13-week campaigns, placed well in advance, stations are now getting orders for four-week flights of spots, placed only two weeks before date they are to start on air.

Out of fund

Theodore C. Streibert, first director of U. S. Information Agency and widely known former broadcaster, is resigning as president of Radio Free Europe Fund, effective June 30. Radio Free Europe Committee, for which fund raises money, is scheduled to assume greater operational responsibility for fund, though latter is expected to retain separate corporate identity. Mr. Streibert was with New York and Mutual for many years before USIA service (1953-56), later was with Time-Life before going to fund, where he has been president since 1962.

More wire problems

FCC may have made big decision on community antenna television—to regulate all systems unless barred by Congress—but tough subsidiary question of whether to permit cross ownership of CATV and TV, particularly in same community, remains. And commission will tackle that at special meeting June 4. Commission has received flood of suggestions in response to its inquiry on subject, and must now move on to next step—probably rulemaking. Also to be decided is what interim policy should be while rulemaking is pending. Should TV licensees applications for microwaves to serve CATV’s be granted? Frozen? And what about number of TV license renewals already deferred because of ownership of local CATV? Number of other CATV questions may also be considered at June 4 meeting. Should limit be placed on number of channels of service CATV can provide. Also, does TV carry beyond service area by CATV acquire squatter’s rights? Commission is considering case in which TV station is protecting efforts of CATV to dislodge it in favor of out-of-state stations. CATV is outside Grade B’s of all outlets involved.

Rallying around

CBS-TV affiliates committee, formed to reinforce network in opposition to proposed FCC 50-50 ownership limitation on prime-time programming, is making preliminary plans to resist FCC proposal at strategy meeting in Washington last Monday (May 17). Six-man committee, assigned to its counsel, Ernest Jeness of Washington, task of getting answers to basic questions involved in opposing rule that would limit each network to ownership of only half of its prime-time programming. Committee tentatively decided that it could not become involved in network syndication issue. FCC has proposed to prohibit networks from engaging in any domestic syndication or in foreign syndication of any programs not wholly produced by network organization.

Committee, designated at CBS-TV affiliates convention in Los Angeles (Broadcasting, May 10), is headed by Frank P. Fogarty, Meredith Stations, and includes John S. Hayes, Post-Newsweek Stations; Thomas Murphy, Capital Cities; Carl Lee, Fetzer Stations; C. Howard Lane, KOIN-TV Portland, Ore., and Kenneth R. Giddens, WKG-TV Mobile, Ala.

Ruffled over rates

Consort officials do not take kindly to network protests against indicated rate of $6,700 for use of Early Bird to or from Europe (exclusive of ground station line charges). Notion seems to be that networks are in poor position to plead poverty or to seek what these officials construe as subsidy.

Consort board met Friday to consider tariffs to be filed with FCC, perhaps this week.
Over 1,000 distributors and wholesalers in Charlotte have made this action city the second largest distributing center in the Southeast. Sales now topping $2 billion a year! Extra business, extra profits, biggest 75-mile trading area in the Southeast! You can move goods in this Carolina market with WSOC-TV. Proven sales action.

Conn. pay-TV test gets another 3 years

FCC has granted extension of Hartford, Conn., pay-television test being conducted by RKO General Inc. on its owned station, WHCT-TV.

Extension is for three years or until commission terminates outstanding pay-TV rulemaking, which ever is sooner.

Action was taken Friday (May 21) by commission's subscription television committee, composed of Commissioners Lee Loevinger, Kenneth A. Cox and Robert E. Lee.

Hartford area theater owners had opposed extension of original three-year test period, which expires June 28 (Broadcasting, May 17).

But FCC committee said information to be obtained from further experimentation with programming and expansion by number of subscribers (present audience is 5,000 homes), as proposed by RKO, would be helpful in commission reaching decision on pay-TV questions.

Committee noted that pay-TV test was hampered in first two years by refusal of two moving picture producers to provide new films.

Radiomen are urged to get into CATV

Community antenna television was seen as both "threat" and "bonanza" for radio stations in two-hour discussion period winding up National Association of Broadcasters' radio program clinic in New York Friday (see page 69).

Sherrill Taylor, NAB vice president for radio, called CATV "a threat to a lot of stations," perhaps small-market stations especially. But extent of its effects are not known and NAB plans study "to find out the facts," he said.

In response to query, five of some 70 radiomen at wind-up session said they were aware of some CATV effects on their radio markets. Seven said they were in CATV themselves. "If you're not," Mr. Taylor advised, "you ought to be. It's certainly a bonanza."

Implications of FCC's "Civil Rights" decision in Jackson, Miss. case (see page 66) were also examined. John Hurlbut, WWMC Mount Carmel, Ill., touched off discussion by saying that, although he didn't think decision would limit program operations, he wondered whether it wasn't "segregationist" decision, calling for "separate but equal" programming for Negroes. Some participants seemed to think it would have limiting effect, but most did not. Elmo Ellis, WSB Atlanta, stressed that stations must consider their entire audiences, regardless of race, and said in his own programming he tried to be "color-blind."

Talk programming, promotions, audience-building generally, and need to attract and train better radio station personnel were among other subjects raised at final New York session. Some 110 broadcasters aside from NAB staff and speakers attended part or all of two-day meeting, second of six NAB radio program clinics being held over three-week period.

WNJU-TV hopes to triple revenues in first year

New York area's first commercial UHF-TV station, which began on-air operations on May 16 with almost $500,000 in advertising contracts, is aiming for $1.5 million business mark for its first year, Edwin Cooperstein, president of WNJU-TV Newark-Linden, N.J., reported Friday (May 21).

National advertisers which have signed for campaigns on WNJU-TV (ch. 47) include Philip Morris Inc.; P. Ballantine & Sons; Pan American World Airways; Armstrong Tire & Rubber Co.; American Home Products (Preparation H); MGM Records and Cudahy Packing Co. Sizable group of local advertisers also has placed contracts with station, according to Mr. Cooperstein.

NGC net up 57%

National General Corp., Los Angeles, owner-operator of theaters, CATV systems, closed-circuit theater television and allied activities, reported sharp rise in income and earnings for first half of fiscal 1965. Gross income was up 44% for 26-week period ended March 30. Net operating income was up 49% and net income per share up 57% from like period of 1964.

Big 10 game spots must come 'naturally'

Action of Big 10 conference athletic-directors in banning TV commercials that would interfere with flow of game was interpreted by conference spokesman last Friday (May 21) as way network could get all spots in even if producer miscalculates.

Athletic directors voted unanimously to allow spots only when clock would be legally stopped by referee and not at behest of advertisers or network.

Kay Schultz, director of conference service bureau, said there would be no problem in asking referee to extend ordinary breaks to accommodate 60-second spots.

NBC has agreement with National Collegiate Athletic Association to carry college football games this year as part of two-year, $13-million contract. NBC-TV fall schedule has Big 10 teams in seven games Mr. Schultz noted. NCAA TV committee sets up basic agreement but network must negotiate with each school to show its games and there is separate contract for each game.

He added that differences in game contracts are usually limited to production techniques: Number of cameras, placement and commercial inserts. New rule going into effect in fall will stop clock after all kicks and this, Mr. Schultz said, should provide extra inserts for commercials.

NBC-TV and NCAA committee will meet June 29-30 in White Sulphur Springs, W. Va., to discuss plans for telecasts in 1965. There has been no indication that any other conference is ready to take position of Big 10.

More Hope for code

Bob Hope, who cut sound track for film promoting TV code, is now doing series of radio code spots for National Association of Broadcasters. Series of 10 and 20-second spots are now in production and disk is expected to be sent to code stations in early summer. Before year is out code authority expects to have another cut by different personality, as yet unnamed.
Ward L. Quaal, executive VP and general manager of WGN Inc., Chicago, elected president (see page 92).

Carl Spielvogel, VP in charge of corporate personnel, The Interpublic Group of Companies Inc., New York, appointed senior VP with responsibility for newly created office of planning and development. He is succeeded as VP in charge of corporate personnel by Peter Chabris, recently VP for organizational development, Xerox Corp., Rochester.

Henry B. Owen, executive VP of King Broadcasting Co., elected vice chairman of board; Otto P. Brandt, VP broadcasting division, named executive VP, and Ancil H. Payne, VP business division, named VP and general manager of Portland operations. King operates KING-FM-TV Seattle; KGW-AM-TV Portland, Ore., and KEAM-FM-TV Spokane, Wash., as well as Seattle magazine. Company also made other changes: Eric Bremmer, assistant to VP, named personnel director; Lee Schulman, director of programming for KING-TV since 1948, promoted to general manager of station, and John Fearéy, operations manager for KING-TV, named director of programming, succeeding Mr. Schulman.

Ward D. Ingrim, VP of Cox Cablevision Corp. and former president of KTVU (tv) Oakland, San Francisco, has announced resignation May 31 from Cox organization to pursue and expand his personal community antenna television and other broadcast interests. He plans to open office in San Francisco. Mr. Ingrim was co-founder (with William D. Pabst) of KTVU, in 1958. He served as president of organization until November 1963, when station was purchased by Cox interests. He later shifted his position from KTVU to Cox Cablevision. Mr. Ingrim owns CATV systems in Pleasanton (Alameda County), Corte Madera, Larkspur, Marinwood, Santa Venta and Terra Linda (Marin County), all California, under names Tele-Vue Systems of Pleasanton Inc. and Tele-Vue Systems of Marin Inc., respectively.

Prior to founding KTVU, he was executive VP and general manager of The Don Lee Broadcasting System. Before that he was with John Blair and Co., station representative, New York and Chicago.

For other personnel changes of the week see FATES & FORTUNES

UPI says it seeks own news satellite

United Press International announced Friday (May 21) that it will seek to establish satellite communications system, either alone or in partnership with others, provided it gets necessary permission from governments concerned.

Mims Thompson, UPI president, said such system would be both economically and technically feasible, following consultation with Hughes Aircraft Co., makers of Early Bird and Syncoms.

Mr. Thompson praised Leonard H. Goldenson, president of American Broadcasting-Paramount Theaters Inc., for "step forward informing the FCC of his network's intention of applying for domestic TV satellite" (see page 87).

He said that UPI will follow government action on ABC's application with "greatest interest," noting that UPI's interests are not confined to domestic traffic.

Comsat officials acknowledged that interest in satellites for domestic use has grown since ABC's initial proposal two weeks ago (Broadcasting, May 17). Evincing interest recently have been Canada, Mexico and Brazil, and Comsat source says, it's obviously efficient method of handling all communications activity where population centers are far apart.

British boxing fans on swing shift or those who are insomniacs will get chance to see, on free TV, heavyweight championship fight between Cassius Clay and Sonny Liston tomorrow night (May 25).

Fight will be beamed to Europe via Early Bird satellite and will be telecast live on BBC-TV at 3 a.m. France, Italy, Sweden, Denmark and West Germany plan to tape fight and replay at later hour. Sportsvision Inc., promoter of fight, is understood to be charging each country $25,000 if fight goes less than three rounds and $30,000 if it goes more than that.

TV in U.S. is limited to closed-circuit theater variety. Mutual will carry bout on radio.

Negro leader critical of station renewals

Mississippi Negro leader expressed sharp disappointment Friday (May 21) at FCC decision to renew licenses of eight Mississippi stations that had been accused of anti-Negro bias in their programing (see page 66).

Charles Evers, field director of National Association for the Advancement of Colored People in Mississippi, called decision "a slap in the face" to Negroes who had filed complaints against stations.

Mr. Evers said, "The least we could have got was a hearing" on stations' license-renewal applications.

Instead, he said stations have been licensed "to continue pattern of discriminatory programing."

Commission, in issuing WLIB-TV Jackson and its sister stations, WJDX-AM-FM short-term renewals, directed them to cease such programing and to consult with community leaders, including Negroes, on programing needs of area.

Mr. Evers was skeptical about any of eight stations following those directives. "As long as they get a license, they'll continue to defy the FCC," he said.

Mr. Evers said he would consult with local attorney and with NAACP defense counsel in New York on whether to seek court action requiring FCC to order hearing.

'O.J.' ads set for CBS

Florida Citrus Commission, Lakeland, Fla., is running summer advertising campaign on CBS Radio's weekday Dimension and CBS Radio Network News as part of national "O. J. (orange juice) on the Rocks" campaign. Campaign, consisting of 273 commercials broadcast 21 times per week on 13 week split-week schedule ends Sept. 17. Agency is Campbell-Ewald, Detroit.

'Wendy and Me' to syndication

ABC Films has put Wendy and Me, current ABC-TV nighttime series (Mon., 9-11:30), into syndication for fall programming start. Series from Warner Bros. and Natwil Productions, with 34 half-hour segments, has already been bought by KNXT-TV Los Angeles.
“With inherent personal danger, the station’s reporters were objective, unemotional and courageous...”

With these words, Sigma Delta Chi, the professional journalism society, honored WNEW News and its outstanding coverage of New York’s Harlem riots by awarding the station the Distinguished Service Award for radio reporting.

Objectivity, courage and resourcefulness are a tradition with our news team. This tradition of excellence has earned every major award in broadcast journalism for WNEW News.

June 10—New FCC deadline for filing reply comments on the joint petition for rulemaking by Zenith Radio Corp. and Teco Inc. requesting the commission to authorize nationwide subscription television. The former deadline for replies was May 11.
June 10—Spring meeting of Indiana Broadcasters Association. Speakers include Robert R. L'Heureux, general counsel, National Association of Community Television, Indiana University, Bloomington.
June 12-15—Annual Georgia Association of Broadcasters summer convention in con-

NAB PROGRAM CLINIC SCHEDULE
In association with the National Association of Broadcasters spring radio program clinics:
May 24-25—Sheraton Charles, New Orleans.
May 27-28—Edgewater Beach, Chicago.
June 7-8—Denver Hilton, Denver.
June 10-11—Continental, Los Angeles.
If you write a personal letter to the Mayor of Houston, better mark it "personal!"

Mayor Louie Welch reads his mail on KHOU-TV's Morning Show. So do other city and county officials who regularly use the Morning Show to talk to the people of Houston. From 7 AM to 8 AM each weekday morning on KHOU-TV, Houstonians enjoy a potpourri of lively guests discussing every lively subject from outer-space to way-out fashions, high comedy to low-budget cooking, psychoanalysis to news analysis. With hosts Bob Hill and Al Bell adding their "stamp" of wit and wisdom. Typical of community-oriented programming on all Corinthian stations, KHOU-TV's Morning Show builds lasting loyalties with audiences, and advertisers, too.
Radio, one of the good things about America, activates

<table>
<thead>
<tr>
<th>WABC activates New York</th>
<th>WXYZ activates Detroit</th>
<th>KQV activates Pittsburgh</th>
</tr>
</thead>
<tbody>
<tr>
<td>Almost 3,000 new savings accounts in ten days—that's what WABC produced for a Bronx bank. The activator? Herb Oscar Anderson with just one commercial a day for ten days. Since no other media was used for this promotion, the happy people at this bank know how well WABC activates New Yorkers.</td>
<td>Seven WXYZ editorials urging more active community support for a better mental health program stimulated over 500 letters from Detroit listeners backing the station's campaign. This public response activated pledges of support for more mental health appropriations from the governor and members of the Michigan legislature. Because WXYZ activated the community Sigma Delta Chi commended the campaign as a &quot;distinguished example of an effective series of editorials.&quot;</td>
<td>&quot;Sales were tremendous&quot; claimed a Pittsburgh tire company as the result of a promotional campaign produced and broadcast by KQV. In fact, the response he had from fifteen newscasts on KQV wiped out his entire supply of wheels and he &quot;had to order another carload.&quot; Advertisers now know what to expect because they've seen how KQV activates Pittsburgh.</td>
</tr>
</tbody>
</table>
WLS activates Chicago

Minutes after WLS News aired an appeal for a rare type blood urgently needed by four patients in a suburban hospital, the station's switchboard was swamped with volunteers. The hospital reported it received over 500 calls and more than enough blood was donated to avert the emergency. Hospital officials called the response which WLS activated as "completely overwhelming."

KGO activates San Francisco

Ira Blue's late night conversational show on KGO vividly demonstrated its unique pulling power for one San Francisco advertiser. After offering the advertiser's booklet "How to get your husband to paint," KGO received 890 requests. That was more than any other station in San Francisco received advertising day or night. Just imagine how KGO activates its audience during the day!

KABC activates Los Angeles

When KABC broadcast the plight of three motherless Chinese children whose father desperately sought a Chinese foster home, fifty families from all parts of Southern California called with offers of help. Five of these were Chinese families one of which became home for these children. When a radio station can move people to love and compassion... that's really activating!

ABC Radio Stations

six of the best things about Radio
In the spring of 1965, more and more thoughts are turning to CATV... And when one thinks of CATV... one automatically thinks of the recognized leader, Ameco. CATV can make pleasant thinking once you have entered the field. So why not stir up the gray matter and start thinking along this line? If an Ameco representative can answer any of the questions all this thinking creates... just drop us a line, or give us a collect call.

**NAB CONFERENCE SCHEDULE**

**Dates and places for the National Association of Broadcasters fall regional meetings:**
- Oct. 18-19—Marriott motor hotel, Atlanta.
- Nov. 11-12—Sheraton-Chicago, Chicago.
- Nov. 15-18—Brown Palace, Denver.
- Nov. 18-19—Davenport hotel, Spokane, Wash.
- Nov. 22-29—Westward Ho hotel, Phoenix.

**Schachte, executive vice president and board member, J. Walter Thompson Co., New York. Statler Hilton, Boston.**

**June 27-29—30th Annual convention of Florida Broadcasters. Speakers include Tom Murray, vice president and copy director, Campbell-Ewald, Detroit. Jack Tar-Harrison hotel, Clearwater.**

**July**

**July 1** — New FCC deadline for comments relating to frequency allocations and technical standards of its proposed rules governing the licensing of microwave radio stations used to relay TV signals to community antenna TV systems. Former deadline was April 1.

**July 12**—New deadline for reply comments on the FCC's notice of inquiry and proposed rulemaking related to mutual funds and other investment houses that are in technical violation of the commission's multiple-ownership rules. Former deadline for reply comments was May 26.

**July 18-19** — Annual meeting of Idaho Broadcasters Association. Speakers include Vincent W. Wasilewski, president, National Association of Broadcasters, Boise.

**July 18-23**—Annual convention of the National Community Television Association. Denver Hilton hotel, Denver.

**July 19-20** — Annual summer meeting of New York State Broadcasters Association, The Otesaga, Cooperstown.

**July 21**—Deadline for reply comments on the FCC's proposed rulemaking to limit the three major television networks (ABC, CBS and NBC) to equity holdings in no more than 50% of all non-news programming between 6 and 11 p.m., or to two hours of non-news programming in the same period, whichever is greater. The proposed rule would also prohibit the three TV networks from deriving more than 50% of all non-news programming between 6 and 11 p.m., or to two hours of non-news programming in the same period, whichever is greater. The proposal would also prohibit the three TV networks from deriving more than 50% of all non-news programming between 6 and 11 p.m., or to two hours of non-news programming in the same period, whichever is greater.

**July 22-24**—Third annual Broadcast Editorial Conference sponsored by National Broadcasters Association and Northwestern University's Medill School of Journalism, Northwestern University and WBBM-TV, Chicago.

**July 25-28**—FCC deadline for filing reply comments on Part I and paragraph 50 of Part II of the commission's notice of inquiry and proposed rulemaking, issued April 23, looking toward asserting jurisdiction and regulating non-microwave community antenna TV systems.

**June 26-29** — Advertising Federation of America's 53rd annual convention. Speakers include Mary Gardner Jones, commissioner of Federal Trade Commission, and Henry
"Thank you WCCO Radio for saving the lives of our scout troop!"
6:32 P.M., MAY 6, 1965 . . . WCCO RADIO SOUNDED . . . the Emergency Broadcasting System “red alert” on the first official word of a tornado sighting near the Twin Cities. For four consecutive hours, the area was battered by nine separate tornado funnels—making 23 strikes. The toll: 14 persons dead . . . 450 injured . . . property damage of $51 million.

WCCO Radio was officially credited by the Minnesota Civil Defense Director for saving “hundreds” of lives. The six-hour, non-stop broadcast was highlighted by eye-witness accounts of tornado movements . . . emergency alerts . . . survival instructions . . . damage reports . . . and other life-saving information. The effectiveness of the job performed by WCCO Radio is told most eloquently in the words of grateful officials and listeners.

Among hundreds of messages — all expressing appreciation and praise — was one from A. L. Schnobrich, boy scoutmaster whose troop was meeting in one of the hardest hit areas. It said: “Thank you, WCCO Radio, for saving the lives of our scout troop.” Mr. Schnobrich later explained that all 40 youngsters escaped “without a scratch” because of the alert and instructions heard on WCCO Radio.

WCCO Radio...
From official report by ROY V. AUNE, MINNESOTA STATE CIVIL DEFENSE DIRECTOR.

The broadcast media must be credited with performing a tremendous public service in disseminating emergency information to the public. Doubtless, through their efforts, further loss of life was prevented.

Here it would be only proper to cite the contribution WCCO Radio and its staff made during this critical period. The station solicited and received eyewitness reports from citizens. Through careful questioning on the air, they sifted the reports on spotted storm clouds so that people in the paths were promptly warned. This fighting and tracking of tornadoes by this station proved tremendously reassuring to the listening public. Surely, without the tracking reports that were broadcast, hundreds might have been killed.

In our preliminary studies, we already have determined that scores of families heard the Civil Defense sirens, headed for their basements and lived to continue listening on their battery radios for official instructions and weather information.

Your constant efforts to provide the area residents with vital information are guides which other reporting media might well follow. This letter is in deep appreciation of the presence of an asset such as your station in this community.

Donald V. Tarnowski
820 Fifth Avenue North
Minneapolis

You brought to a chaotic scene sensible thinking and exercised your privilege and authority in the finest tradition of broadcasting. The community owes you a great debt.

Walter G. Robinson, President
Minneapolis Society of Fine Arts

...it was truly an outstanding piece of public service, and I guess this is another one of the reasons why WCCO continues to dominate the listenership surveys.

Arthur H. Lund
General Manager
WCCO - Radio

...credit must be given where credit is due and that is to the warnings given by WCCO Radio, the giant of the middle west. Had it not been for WCCO Radio and its warnings, we are certain the death toll would have been 100 times what it was.

Had it not been for WCCO Radio, Mercy Hospital might not have had the staff on hand when the patients began rolling in. Had it not been... well for a number of things.

And so we say to WCCO Radio, "Well done you good and faithful servant. You saw a job to be done and you did it. You cancelled your revenue bringing programs to give a continued alert to a fearful and apprehensive public. And the services given were far beyond the normal call of duty. Some others helped but it was WCCO Radio that many were able to evade the storm as it swept into Anoka county from Hennepin county...."

Editorial
Anoka County Union

Good Neighbor to the Northwest

Your broadcasts helped save many lives and prevented this disaster from being more serious than it could have been.

As a thoroughly frightened resident of the Navarre Minnesota area, I want to thank WCCO Radio and your entire staff for the warnings that sent us to shelter. As an ex-newspaper and radio guy and practitioner of communications, my Stetson is off to your gang for what I am sure is a new high in public service radio.

Herb Willis
Publishing and Sales Advertising
Minneapolis

We wish to thank you for the tornado warning given on your station. It saved minutes necessary to get down into the basement - the most important minutes in our lives!

Mr. and Mrs. Ed Butterfield
College wood, Deephaven

Sheriff's Office
MINNEAPOLIS, MINN.

Mr. Larry Kost
General Manager
WCCO Radio
625 Second Avenue South
Minneapolis, Minnesota 55402

May 11, 1965

Dear Larry:

On behalf of the Sheriff's Office I want to congratulate you... your staff for the excellent and complete coverage you gave the area during the tornadoes which struck this past evening, May 6th.

Many, many citizens of this community have told us that your station's warnings no doubt saved lives. It was a masterful job.

With kindest personal regards,

Yours sincerely,

Ed Ryan
Sheriff
On behalf of the Hennepin County Sheriff's Office, I want to congratulate you and your staff for the excellent and complete coverage you gave the area during the tornadoes which struck Thursday evening, May 6th. Many, many citizens of this community have told us that your station's warnings no doubt saved lives. It was a masterful job.

Ed Ryan, Sheriff
Hennepin County
Minneapolis

The prompt reply that your radio station made after receiving the alert is to be commended by all. Many lives, we are sure, were saved because in such a short time the proper personnel heard the alert and arrived at Mercy Hospital, many even before patients arrived.

Robert Van Hauer, Administrator
Mercy Hospital
Anoka, Minn.

We heard civil defense sirens, then hurried to tune in WCCO Radio and sure enough the storm was coming. We took a battery set downstairs and prepared for the worst. WCCO kept us well informed. We are thankful for all lives saved by WCCO warnings.

Mr. and Mrs. Charles Snyder
Kathy, Douglas, Daniel
Roseville, Minn.

When the siren sounded, I was in a local drug store. I guessed what was happening, but to make sure, I requested the store employees to turn on WCCO Radio. In this way, the entire store had full information and warning.

Church of the Sacred Heart
Rev. Quintin F. Kennedy
Robbinsdale, Minn.

I didn't realize how priceless a radio is — I do know now.

Margie Summers
1210 June
St. Paul

The most profound thanks of the entire area to your station and staff for the great and inestimable good and service performed in the warning broadcasting which saved countless lives.

Edwin P. Chapman, Judge
Minneapolis Municipal Court

We believe your coverage of the storm saved many fatalities in our area.

North St. Paul Business and Professional Men’s Assn.

Their alert reporting prevented both loss of life and property in our neighborhood as well as many other neighborhoods that I know of. As usual WCCO Radio lived up to its slogan "Good Neighbor to the Northwest."

Hillard Brown, Account Executive
Flachbein Advertising, Inc.
Minneapolis

We wish to thank you for the tornado warning given on your station. It gave us the minute necessary to get down into the basement — the most important minute in our lives!

Mr. and Mrs. Ed Butenhoff
Cottagewood, Deephaven, Minn.

I am a widow with a little girl of 11 and when I heard the siren my first thought was of WCCO Radio. I listened to you with my child and felt safe! For 5 hours we listened and kept saying, “Thank God for the wonderful folks at WCCO.”

Mrs. Dorothy Lindberg
3007 N.E. Fillmore
Minneapolis

I've found once again, for information first, WCCO is the best spot on the radio! Thank you for being a servant of your listeners, rather than just a business.

Mrs. Walter Ulrich
Winthrop, Minn.

If WCCO Radio never performs another public service, you have justified your existence for the next thousand years. Tremendous job!

W. A. Stewart
Kolorpress, Inc.
Minneapolis

Throughout our 40 years of broadcasting, WCCO Radio has been guided by one overriding philosophy: “Good Neighbor to the Northwest.” We are genuinely grateful and humble that at this moment of deep peril in our area, the community turned instantly and almost automatically to WCCO Radio. This included the general public as well as civil defense officials, relief agencies, law enforcement authorities, hospitals and so many others. It was their reliance and assistance which, in truth, enabled WCCO Radio to do the job we did.

OPEN MIKE®

Good news on all news

EDITOR: Thanks for the wonderful coverage for the all-news format in Chicago (Broadcasting, April 19). It was a top-notch job and extremely accurate. There are a couple of things that you had to omit because of space difficulty but, nonetheless, it represented all along a highly accurate interview, and I deeply appreciate . . . the fine story.—Gordon McLendon, president, The McLendon Stations, Dallas.

(The April 19 issue included a report on the all-news format plans of WINS New York and a story on the experiences of the McLendon WNUS-AM-FM Chicago with this type of programing.)

Congressional correction

EDITOR: The 1965 Broadcasting Yearbook lists wike [Newport, Vt.] as being affiliated with CBS Radio, however, on page 74 of the May 17 issue in the block designating congressmen in broadcasting you have erroneously listed us as an NBC affiliate. It's a minor point perhaps but we would like you to know we are very pleased and proud to be affiliated with CBS Radio.

We wouldn't have it any other way.—Lawrence Knight, general manager, Wike Newport, Vt.

Tribute to Murrow

EDITOR: Ed Murrow's death has left a void. He was both a friend and a force. We have lost our friend, but the force he exerted must be maintained. How we do this is a challenge.

That he was a trustee of this new institution said to us that we were kindred souls. He honored us by his interest; he counselled us wisely. In a tradition that has already begun when we speak...
of the spirit of Ed Murrow's life, we will be guided in using the gift you have made in a way that would have made him say: "Good luck."—Jonas Salk, The Salk Institute for Biological Studies, San Diego.

Wrong call letter

Editor: A story on pages 70 and 71 in your May 3, 1965, issue contains a typographical error we thought you would like to know about. The story deals with a survey showing how 35 television stations acted on program promises versus performance in their reports to the FCC.

The latter part of this article refers to KATV (TV) Little Rock, Ark., when it, no doubt, means KATU (TV) Portland, Ore.—Robert D. Dobbelday, vice president and general manager, KATV (TV) Little Rock, Ark.

(The error was made in the brief filed by attorneys for Fligelman & Co.; Mr. Brodey, George Darlington, Inc. and was picked up from that document. The station which should have been listed was KATU.)

Thanks for Easter Seal aid

Editor: The public response to your use of the Easter Seal ad in BROADCASTING has been enormous. It has been an important factor in making this year's appeal the most successful in our history and in making possible the anticipated expansion of our services.

We are deeply grateful to you for this generous gift to crippled children, and for the concern for their welfare of which it is evidence.—Catharine Bauer, director of public relations, National Society for Crippled Children & Adults, Chicago.

BOOK NOTE

One of the best of the long line of novels with big business as its subject and New York City as its scene, is this product of a Scotman with impressive advertising credentials.

Harvey Howells moved from the advertising department of Procter & Gamble to Standard Brands, and then to Lever Bros., where he was advertising manager. Since resigning in 1955 he has collected an imposing list of literary credits including a novel, "The Big Company Look," and a number of TV programs, including one network series, "Ichabod and Me.

All of this experience he uses to advantage in this story of business intrigue with just enough seasoning of bachelor girls and downtown apartments to insure a high rating on sales lists.
Going places WALA-TV, Mobile, Alabama, joins America's most dynamic television stations. H. Ray McGuire, Executive Vice President and General Manager, announces the appointment of Blair Television as exclusive national representative, effective immediately.
Flying A goes out to the ball game

Tidewater Oil Co.'s eastern division sales organization is learning a new set of A B Cs.

Axelrod and advertising head the list. As official Flying A "worry dog," Axelrod is a constant reminder to Flying A servicemen that extra worry about customers' cars is our business. This is the theme of our television commercials and also of our print advertisements.

Like A, the letter B also has a double meaning, broadcast and baseball.

And C, of course, is for the association of Flying A with the champions, the New York Yankees, who have symbolized the best in baseball for half a century.

Put them together to produce sales power for Flying A dealers and you have an effective media buy providing excitement, prestige, reach and frequency.

Actually, the Flying A alphabet could end there, but fortunately for those of us who seek to increase our brand share in the highly competitive gasoline market, it doesn't.

Television and radio sponsorship when associated with an outstanding baseball organization have much more to offer an advertiser. Uniquely, this broadcast franchise has opportunities for total involvement—customers and their families, dealers and distributors and the Flying A sales organization. These compose the rest of the alphabet, the D through Z's, the ways in which a basic broadcast buy can be expanded into an all-encompassing program of communications for greater effectiveness. Together they build interest and enthusiasm far beyond anything possible without them.

A 12-Month Schedule • Following its purchase of Yankee broadcasts in early January, Tidewater began to build this program of total sales involvement. The goal was to extend the impact of the baseball buy over the entire 12 months.

It started when former Yankee star Jerry Coleman, one of the team of broadcasters for the games, was signed to head the Flying A sports bureau. Through the winter months, Mr. Coleman spoke at major dealer meetings, baseball dinners and met with Grey Advertising executives. Joined by his fellow broadcasters, Phil Rizzuto, Joe Garagiola and Red Barber, they became fully familiar with every facet of the Flying A story.

By opening day, Flying A commercials were completely integrated with personal sales messages in which baseball and advertising were "married." Film and live presentations projected enthusiasm and interest through effective leading and lead-outs from the commercials.

Concurrent with spring training, Flying A launched a $250,000 Big League Sweepstakes featuring a $10,000 cash prize and trips to all the World Series games for the winner and five friends, with Mr. Coleman as host. As part of this promotion, there was also a Small Fry Sweepstakes with ball, bat and glove prizes for younger members of the family. The Flying A identification with baseball was beginning to take shape.

Promotions Increased • Once the Yankees came north, many other promotional activities related to baseball were developed for the stadium and hundreds of service stations throughout the Yankee area and the entire Northeast as well. These include:

- Prior to the regular baseball season opener, a special Flying A welcome home party held in Yankee Stadium for an invited list of sportswriters and broadcasters.
- Flying A caravan tours of service stations with Jerry Coleman visiting dealers and conducting autograph parties for youngsters.
- Flying A day at the stadium with hundreds of dealers attending to present a check for the benefit of the Mayor's Sandlot fund.
- Honorary Yankee bat boy contests with each winner receiving a trip to the stadium accompanied by a parent and his local Flying A dealer, a lunch, box seats, a Yankee uniform and other souvenirs of the occasion.
- Baseball clinics at which Mr. Coleman will demonstrate fielding and batting techniques and conduct chalk talks on "How the Yankees Do It."
- Ladies Day promotions to attract new customers to our service stations with tickets to Yankee ball games for the winners.

For Flying A dealers, there are, of course, the immediate rewards of increased traffic and more profit. But in addition, Flying A activities include dealer trips to Yankee games and the Hall of Fame game at Cooperstown, N. Y., special hospitality days at the stadium and other related activities to stimulate their interest in the total program.

After the regular season and World Series activity, there will be follow-up participation by the Flying A sports bureau director in post-season baseball events and meetings.

With no counterpart in any other major league city, the program of total involvement of media, promotion and merchandising through the Yankee broadcast sponsorship is a major proof of the intention of Flying A to implement its growth plan with action ingredients. It's our way of telling dealers and distributors that baseball, success and Flying A go together.

Joseph M. Jerome joined Tidewater Oil Co. in Boston in 1954 as a salesman and since that time has been retail sales manager and marketing manager in New England; assistant and district marketing manager in New York, and eastern division manager, which he was named in 1962. In 1964 Mr. Jerome was promoted to eastern division general sales manager in New York. Mr. Jerome is a native of Newport News, Va., and is a graduate of New York University's School of Commerce, New York, from which he received a BS in business administration.

Specials: now a $50-million plum

Networks expect $10-million increase in revenue from these programs next season; NBC-TV will again lead in number, CBS-TV and ABC-TV offer formidable lists

The three television networks, locked in with their regular prime-time schedules for 1965-66, are concentrating now on the approximately $50-million-a-year business of producing and selling their evening entertainment and news specials.

Though plans for 1965-66 specials are by no means definite, network officials last week were optimistic that specials would account for $10 million more revenues this year than last, when they edged close to the $40 million mark.

The bullish prospect is an outgrowth largely of several new advertisers ear-marking hefty budgets for groups of specials next season, rather than a significant jump in the number of such presentations. But officials appeared certain that there would be at least a modest increase in the volume of such shows for 1965-66.

On the basis of currently available information, NBC-TV can be expected to present at least 80 one-time and occasionally scheduled entertainment and news specials, while ABC-TV’s and CBS-TV’s output will be in the vicinity of 30 to 35 each, starting in the fall.

It’s in the Name • Though NBC-TV for several years has been in the forefront of the specials area, a partial reason for its pre-eminence is semantics. This network does not carry a regularly scheduled documentary series such as CBS’s specials, while ABC-TV’s and Scope on ABC-TV, and its frequent cultural-public affairs productions therefore qualify as specials. Even so, however, NBC-TV still would be regarded as the network with the most specials. (NBC-TV incidentally does not include the Gulf “instant specials” in its computations, according to a spokesman, because such telecasts depend on “fast-breaking, hard news” and their scheduling cannot be forecast with any accuracy.)

Special programs, network authorities agreed last week, enact a significant role in television for the contributions they can make to the advertiser, the network and the public.

It was stressed that some advertisers, such as Xerox, 3M and du Pont, for example, are interested in reaching a more specialized audience (businessmen, better educated and more affluent groups) and can use specials as an effective promotional-merchandising vehicle.

For the networks, specials increase the diversity in their schedules. In the case of entertainment presentations, they add a touch of glamour and excitement, since the personalities starred are often not ordinarily carried on TV. Public affairs-news offerings are prestige-getters, both among the viewing public and with the FCC.

Ratings Low • Networks acknowledge that only in rare instances can specials triumph in the ratings race (see below). But they emphasize that specials frequently lure the ordinarily "light" viewer...

Specials rank well when compared with regular programs

The largest audience-getter among the TV networks’ sponsored entertainment specials this past season was Cinderella, telecast Feb. 12 on CBS-TV, which rated 42.3 in the Nielsens, representing an estimated 22,250,000 TV households in the country.

A specially prepared list of the top 10 entertainment specials over the season, starting with the Sept. 12, 1964, telecast of the Miss America Pageant on CBS-TV, through April of this year, credits CBS-TV with five, NBC-TV with four and ABC-TV with one. The listing, based on A. C. Nielsen Co. data for the season, precludes actual events such as political telecasts or election coverage, sports (for example, the World Series or Rose Bowl coverage) and man-shoots.

Comparing these top 10 specials to regular series’ programs in the Nielsen rating periods: Three of the shows placed No. 1 in the two-week ratings reports period in which they appeared during the season: Cinderella, The Bob Hope Christmas Show and the Academy Awards Telecast. Two others were in the top five, Wizard of Oz and a Danny Thomas Special. In all, eight entertainment specials appeared in the Nielsen top-15 lists during the season.

The season’s top 10 entertainment specials, showing date and network, Nielsen rating and TV households the rating represents, as compiled by A. C. Nielsen Co.:
SPECIALS: NOW A $50-MILLION PLUM continued

viewer to the television set. Research undertaken by NBC-TV indicates that special programing scores exceptionally well with viewers who are better educated, have higher incomes and are represented in professional and managerial capacities.

For the 1965-66 season, networks are in the process of developing programs that they hope will have intensified appeal for advertisers and audiences. Two key ingredients for next season will be color and on-location shooting.

A sharp emphasis on color is planned. As in regularly scheduled series, program authorities said, presentations will be in color whenever feasible.

More than ever before, producers will be filming and taping programs on location throughout the world. In some instances, production crews already are busy on five continents filming sequences for public affairs, entertainment and cultural specials. Many of the programs for 1965-66 will blend history, travel, folkways and contemporary events.

Advertiser Lists • During the current season, NBC-TV presented more than 80 programs in the specials category and the figure is expected to rise slightly in 1965-66. A spokesman said that for 1964-65, approximately $21 million in sales resulted from specials and this total should rise to $30 million next season, attributable largely to expanded sponsorships.

The most active sponsors on NBC-TV, during the current season, were the Chrysler Corp. for the Bob Hope presentations; Gulf Oil on numerous news specials; Hallmark on Hallmark Hall of Fame; Consolidated Cigar and Timex on the Danny Thomas specials; and advertisers on a variety of shows, including Scott Paper Co., General Foods, Polaroid, Lorillard, S. C. Johnson, Goodyear, Goodrich, Institute of Life Insurance, Xerox, Smith-Corona, Quaker State Oil, General Electric Co., Mennen, U. S. Royal, Plymouth, Allied Chemical, Admiral Corp. and Miller Brewing.

CBS-TV carried approximately 30 special programs during the 1964-65 season and this total will be reached or exceeded next season. Billing on these presentations amounted to an estimated $10.5 million and should reach at least $11 million next season, it was said.

Advertisers participating in sponsorship of CBS-TV entertainment and news specials during the current season included American Motors, S. C. Johnson, Shell Oil, Standard Brands, Philip Morris, Bristol-Myers, General Foods, the Bell System, Mennen, Noxzema Chemical, American Tobacco, Institute of Life Insurance, Socony-Mobil Oil Co., Dr. Pepper Co., Procter & Gamble, Savings & Loan Foundation, Westinghouse, Alberto-Culver, and Miles Labs.

ABC-TV presented more than 30 special programs during the current season. Advertisers allocated almost $8 million in the specials area during 1964-65 and indications are that billing should top $9 million during 1965-66, resulting primarily from a solid investment by du Pont.

Companies represented this season on a wide range of entertainment and news-cultural programing on ABC-TV included Purex, Chemstrand, Independent Electric Light & Power Co., Aluminum Co. of America, the 3M Co., Xerox, Goodrich, Clairol, Institute of Life Insurance, Procter & Gamble, Timex, Autolite, Rayette and Liberty Mutual.

ABC-TV's Outlook • The expectations are that ABC-TV will carry 30 to 35 specials during the coming season, roughly the same or perhaps slightly below this year's figure. But a spokesman said that revenue from these shows is expected to be larger than for 1964-65 because of more expensive productions and increased advertiser support.

Probably the most ambitious undertaking in this field on ABC-TV next season is a series of six one-hour specials in color to be produced by Phil D'Antoni and Norman Baer and spon-

sored by du Pont. Still untitled, the series will spotlight six regions of America (history, landmarks, local customs) with Robert Preston as host. An ABC-TV official reported that du Pont will invest in the neighborhood of $3 million for sponsorship of the series.

In entertainment, ABC-TV has scheduled another color program for next season, Rex Harrison in Paris. Rayette has been signed as half-sponsor of this hour special. For next fall, the network also has set a one-hour animated color program, Alice in Wonderland, which will be produced by Hanna-Barbera. It probably will be telecast during the holiday season between Thanksgiving and Christmas.

ABC-TV probably will present three or four other entertainment specials before the end of next season, but officials preferred not to divulge details at this time.

The network intends to produce at least 16 hours of news and public affairs-cultural specials (exclusive of the regular half-hour Scope series). As now envisioned, Robert Drew will produce three programs; John Secondari four, and Stephen Fleischman three. In addition to this group, for which sponsorship has not been revealed, is a series of six one-hour specials to be sponsored by the 3M Co. and produced by David Wolper. The expectation is that a majority of these documentaries will be in color.

Details on subject matter of these

An ABC-TV special scheduled June 13, 7:30-8:30 p.m., is 'Phil Hill: Assault on Le Mans.' Here's the hero in the pits before the race.
projected specials could not be revealed, but on the basis of past performance, the Drew, Wolper and Fleischman programs probably will deal with contemporary issues while the Secondary projects will focus on historical-cultural topics.

**CBS-TV's Specials** - CBS-TV is expected to slot at least 30 special programs and perhaps as many as 35 during the coming TV year. Prospects are bright for a modest rise in sales this year, a spokesman said.

In the entertainment area, CBS-TV will present four one-hour programs of network expects to telescast the Miss U. S. A. Beauty Pageant and the Miss Universe Beauty Pageant, both 90-minute presentations, and the two-hour Miss America Pageant.

In the news specials area, CBS-TV plans to telescast a minimum of 17 one-hour programs (plus a planned 20 episodes of CBS Reports). Color will be used more prominently on news specials and in CBS Reports, according to a company spokesman.

In preparation by CBS News are various one-hour programs including The Search for Ulysses, tracing the legendary journey through the Mediterranean (in color); The Great Love Affair, reporting on Americans' affection for their automobiles; A Portrait of Stravinsky; The Travelling Americans: State of the Unions, an examination of labor unions in the U.S., and The Travels of Thomas Jefferson (through his letters). Among CBS Reports' programs will be "Henry Moore: Man of Form" and "The Volga" (in color).

**NBC-TV's Splurge** - For 1965-66, NBC-TV will reinforce its reputation as the specials network, with presentations in this category probably exceeding the 80 carried this year. A spokesman said that billing for specials should rise from $21 million to $30 million because of the new $2.5 million investment by American Gas Association; the addition of at least four prime-time entertainment presentations and increased sponsorship interest by old and new advertisers.

In entertainment, NBC-TV's schedule includes these one-hour specials: six Hallmark Hall of Fame entries (two repeats); six sponsored by American Gas Association (Julie Andrews, repeat of Julie Andrews, Michelangelo I. Michelangelo II, Peter Pan repeat, and Mary Martin at Radio City Music Hall); five Danny Thomas specials; two Jack Benny specials; a Johnny Carson special; Mr. Magoo's Christmas Carol; Ringling Brothers, Barnum and Bailey special; the Junior Miss Pageant; two sneak previews; several NBC Follies;

Julie Andrews and Gene Kelly try a few steps for a special scheduled for NBC-TV next year.

One of the scenes from "My Name is Barbra," starring Barbra Streisand, which will be repeated on CBS-TV.

the New York Philharmonic's Young People's Concerts series with Leonard Bernstein as host and with the Bell System as sponsor. Others on the agenda but generally without sponsorship information are The Strollin' Twenties, a one-hour, musical variety show with Harry Belafonte as host and featuring Sidney Poitier, Sammy Davis Jr. and Diahann Carroll; Ages of Man, two one-hour programs of dramatic readings by Sir John Gielgud; a one-hour Carol Channing special sponsored by General Foods; a one-hour program starring Andy Griffith, Don Knotts and Jim Nabors (in color) sponsored by American Motors; a new Barbra Streisand special slated for the spring of 1966.

CBS-TV also plans to repeat this fall the Barbra Streisand special it carried recently, and to telescast Cinderella and The Wizard of Oz. For the summer of 1966, as in previous years, the

Bob Hope-Chrysler specials; a special Thanksgiving program sponsored by Mohawk Carpets; Amahl and the Night Visitors and The Emmy Awards. In addition, there will be at least four children's specials in prime time.

In news, NBC-TV intends to telescast more than 40 planned specials as well as three-Project 20 specials ("The Law and the Prophets," "The American Indian" and "Immigrants All.") Among the planned news specials are one-hour programs on The Congo; Hungary: Ten Years Later; The Awakening Dragon: Red China; The Reformation (the effects of the Reformation on history); Defeat of the Armada; America, the Beautiful (on urban blight); Mississippi: the Self-Portrait; The Teen-Ager; Who Shall Live? (on a life-saving kidney machine) and For Our Time (remarks by George Bernard Shaw on life).

In addition, the Xerox Corp. has ex-
tensive plans in the specials area. The company will continue its sponsorship this fall of three dramatic specials produced by the Telsun Foundation, on activities of the United Nations. Previous UN programs have been carried either on ABC-TV or NBC-TV, and commitments for the fall now are being discussed.

Xerox also is sponsoring a group of six documentaries produced by David Wolper which will be telecast over the next 18 months. The first, Let My People Go, was unable to obtain a network slot and was carried on a lineup of 107 stations in April in prime time. A company spokesman said this special achieved a national Nielsen of 18.8, reaching an estimated 9.9 million families.

In preparation by Wolper for presentation either on a network or on a national spot basis are the following Xerox programs: The World Series (half-hour); The Making of the President, 1964 (60-90-minutes); Wall Street and Art Buchwald's Washington (both one-hour) and a sixth program still to be developed.

Senate cigarette bill modified

The final Senate Commerce Committee report on cigarette labeling differs only slightly from earlier drafts, but the difference is important to television.

As amended, S 559 (the Magnuson bill) requires a warning on the package front or back: "Caution: Cigarette smoking may be hazardous to your health"; prohibits any other package warning requirement; prohibits, for three years, the requirement of a warning in advertising; requires the Federal Trade Commission, with the cooperation of the Department of Health, Education and Welfare, to report to Congress in 18 months and annually thereafter on the question of smoking and health; provides a $100,000 fine for violations, enforced by the Department of Justice.

The committee had originally instructed its professional staff to include in the report the committee's wish that where packages are used in advertising, including TV advertising, the side shown must be the one bearing the warning statement (Broadcasting, May 10).

This requirement did not remain in the report. The committee decided to omit it in favor of a section condemning "as an unfair or deceptive act or practice... any advertising which tends to negate the warning which must be placed on the package in accordance with the bill." Such advertising would come under the authority of the Federal Trade Commission.

Senator Maurine B. Neuberger (D-Ore.) attached supplementary views supporting the bill, but calling for strengthening amendments (which she will offer when it comes up for floor action, perhaps this week). She would like to reduce the moratorium on regulation of cigarette advertising to one year, applying it only to the federal government, require the listing on packages of carcinogenic agents found in cigarettes, and change the warning from "may be hazardous" to "is hazardous."

Senator Philip A. Hart (D-Mich.) also called for "quantitative information showing the content in the cigarette of those elements scientifically shown to be associated with cancer and other diseases."

The House Commerce Committee last week scheduled executive sessions on May 26-27 to consider its own version of a cigarette labeling act. Bills before the House group are similar to S 559, but the most prominent, introduced by Representative Walter Rogers (D-Tex.), flatly prohibits action to require health warnings in cigarette advertising, with no provision for a moratorium period (Broadcasting, April 19).

Imperial sugar uses TV to clear misconceptions

A two-purpose campaign to clear up misconceptions about calories in the minds of the diet-conscious and to straighten out uncertainties of consumers about synthetic sweetening substitutes is being conducted by Imperial Sugar Co., Sugar Land, Tex.

Imperial, through Tracy-Locke Co., Dallas, is in its 13th year of 52-week television schedules using 10-second spot announcements. The current spring "Energy" campaign involves 1,400 60-second spots in daytime and fringe nighttime periods.

A summer-fall campaign, relying on TV as the basic medium, will involve 14 stations in 11 markets. The one-minute commercial, filmed on a sugar cane plantation in Hawaii, illustrates the audio message that explains how sugar cane captures energy from the sun.
At ABC News, men like William H. Lawrence, John Scali, Edward P. Morgan, Jules Bergman, John Secondari, Jules Power and Bill Sheehan are satisfied to work quietly and do the job well.

Still, it's nice to hear some applause now and then.

**NBC-TV affiliates get 5 minutes**

More time for station sales follows recent CBS-TV move; ABC-TV now only one not offering extra minutes

ABC-TV last week was the only television network not committed to giving its affiliates extra nighttime minutes for local sale next fall—and ABC-TV officials didn’t rule out the possibility that they, too, would make the concession.

They said, however, that for the present they were “standing pat,” with “no plans now” to release additional minutes or expand station breaks.

They gave the report in answer to newsmen’s questions after NBC-TV notified its affiliates 10 days ago that, beginning this fall, they would get five additional minutes a week for sale to local or national spot advertisers.

Four of these will be in the Tuesday and Saturday movies (at approximately, 9:40 p.m. and 10:20 p.m.) and will be created by stretching current 32-second breaks to 62 seconds, starting the week of Sept. 13. The fifth, wholly new, will be 72 seconds in length and will follow the new Scherer-McNeil Report, which will be on Saturdays in the time period occupied Monday through Friday by Huntley-Brinkley Report.

The existing 72-second breaks following Huntley-Brinkley will continue. Like Huntley-Brinkley, the new Scherer-McNeil Report, which starts Oct. 23, may be carried by affiliates at either 6:30 or 7 p.m.

NBC-TV also told affiliates it would release up to eight prime-time minutes for station sale if they are not sold to network advertisers. These will be subject to payment of co-op fees by the stations and subject to recapture by the network on two weeks’ notice.

NBC-TV’s action followed CBS-TV’s offer of time to accommodate seven additional one-minute announcements for spot sale. CBS-TV affiliates rejected three, however, because they would have been created by shortening the midbreak in preceding programs from 32 seconds to 12 seconds (Broadcasting, May 10). CBS-TV then said it would substitute up to three one-minute positions in the nighttime schedule if those minutes are not bought by network advertisers, with the understanding that they would be pre-emptible by the network on two weeks’ notice.

**NBC Radio chalks up another big week**

More than $1.5 million in new business and renewals was recorded during May 10-14 by NBC Radio according to Stephen B. Labunski, executive vice president in charge of the NBC Radio division.

**Agency appointments**

- Merck Sharp & Dohme of Canada Ltd., Montreal, names Needham, Harper & Steers to handle advertising. Creative work will be done in agency’s New York office. Administrative activity will be handled in Toronto office.
- Autowest Inc., distributor for Renault and Peugeot cars in nine western states, names Tilds & Cantz, Los Angeles, as agency, a return to the role T & C had from 1957 to 1960. Media plans are not complete but the initial campaign will put heavy emphasis on television, the agency said.
- American Cablevision Co., Beverly Hills, Calif., owner and operator of 21 community antenna television systems serving some 67,000 subscribers, names Cooke & Leavitt, Los Angeles, as agency. American Cablevision is a subsidiary of Jack Kent Cooke Inc.
- The division of tourism, Indiana Department of Commerce and Industry, has named Bonsib Inc., Fort Wayne, Ind. as its agency. Thomas J. Blee, executive vice president, will supervise.
- NBC’s owned stations in Chicago have chosen new local advertising agencies. WMAQ-TV names Powell, Schoenbord & Hall and WMAQ names Lilienfeld & Co. Stations earlier were handled by Wade Advertising.

**BAR estimates for 20 markets**

Estimates of the dollar volume of nonnetwork television business on the air in 20 U.S. markets during the week ended April 30 are reported below as compiled by Broadcast Advertisers Reports.

The estimates are based on monitoring, using discounted-rate formulas developed with the assistance of leading advertising agencies. BAR monitors, and makes estimates for about 15 to 20 markets a week, covering the top 75 markets in the course of a month. These estimates appear weekly in Broadcasting.

In the list below, the numeral in parentheses immediately following the market name indicates the number of stations monitored. The dollar figures are BAR’s estimates of all national spot, regional and local business on the air in the respective markets during the week indicated.

**Week ended April 30:**

- Albany, N. Y. (3) $189,810
- Altona, Pa. (2) 135,302
- Atlanta (3) 184,988
- Baltimore (3) 288,648
- Birmingham, Ala. (2) 139,851
- Boston (3) 688,540
- Cedar Rapids, Mich. (3) 76,498
- Chicago (4) 1,573,698
- Dallas (4) 324,142
- Des Moines, Iowa (3) 101,097
- Greenville, S. C. (3) 76,110
- Harrisburg, Pa. (4) 105,151
- Houston (3) 251,150
- Jacksonville, Fla. (2) 106,147
- Phoenix (4) 140,825
- Portland, Ore. (4) 214,798
- Richmond, Va. (3) 82,260
- Roanoke, Va. (3) 52,480
- Sacramento, Calif. (3) 265,055
- Tulsa, Okla. (3) 105,052

**Chicago ad club awards**

Several national advertisers won top broadcast awards Thursday (May 20) at the annual banquet of the Chicago Federated Advertising Club. Arthur E. Tatham, who will be executive committee chairman of Tatham-Laird & Kudner, when current merger plans are completed, was selected ad man of the year.

Top award winners: Hallmark Cards (through Foote, Cone & Belding), for best live TV commercial; Kellogg Co. (Leo Burnett Co.), best film TV; General Mills (Needham, Harper & Steers), best campaign series in TV; Campbell Soup Co. (NH&S), best radio spot, and Kraft Foods (FCB), best radio campaign.

REPRESENTED NATIONALLY BY BLAIR TELEVISION
Eastman to acquire TV rep firm

Select Station Representatives, to be known as Eastman TV, will operate as separate TV-only outfit

Robert E. Eastman & Co., radio station representation company, plans to go into television next month through the purchase of Select Station Representatives, which it will operate as a separate, TV-only firm, Eastman TV Inc.

Robert E. Eastman, president of the radio company, said the executives, staff and offices of Select Station will remain in the new subsidiary. The only change, he said, is that he will become board chairman of Eastman TV Inc.

Albert B. Shepard, president and a stockholder of SSR, will be president of Eastman TV Inc. and a stockholder and board member of Robert E. Eastman & Co., which will own the stock of the new company.

The other owners of Select Station Representatives — Thomas G. Tinsley Jr., Irvin G. Abeloff and R. C. Embry — are selling their SSR stock to Robert E. Eastman & Co. The price was not disclosed. Mr. Tinsley is president of WXEX-TV Petersburg-Richmond, Va. and WLEE Richmond. Mr. Abeloff is vice president and managing director of WXEX-TV and senior vice president of WLEE. Mr. Embry is general manager of WTH Baltimore, formerly headed by Mr. Tinsley.

Both Mr. Eastman and Mr. Shepard stressed that the transaction is not final but said official closing has been set for June 1.

Separate Firms • They emphasized that Robert E. Eastman & Co. and Eastman TV Inc. would be completely separate and competitive, with no interchange or duplication of personnel except for Mr. Eastman's role as chairman of the new company.

Irwin W. Unger, vice president of SSR, will be a vice president of Eastman TV and will head its Chicago office, as he has done for SSR.

SSR now represents seven TV stations, whose representation will be taken over by Eastman TV: WXEX-TV; KTTV-TV Springfield, Mo.; KTEX-TV Ada, Okla.; WWSN-TV Charleston, S. C.; WHIS-TV Bluefield and WHNT-TV Huntington, both West Virginia, and WSWA-TV Harrisonburg, Va.

SSR also represents a number of radio stations and authorities said these are expected to transfer to the Eastman radio company's list. One, WTH, already has transferred, and another, WLEE, is slated to do so June 1.

Eastman TV Inc. will maintain SSR's New York headquarters at 551 Fifth Avenue, as well as its offices in Chicago, Detroit, St. Louis, Dallas, San Francisco and Hollywood and, through an association with James S. Ayers Co., in Atlanta and Charlotte, N. C.

Common Interests • Mr. Eastman described the transaction as "a merger of common interests in good representation."

Mr. Eastman said that in addition to Mr. Shepard other key executives of Eastman TV would be given an opportunity to acquire stock.

"Mr. Shepard saw the transaction as "an identification of leadership and responsibility in national spot TV selling," he said Eastman TV would remain "select," in that "we will represent broadcasting's best TV stations and accelerate the services that we have developed for the advertiser and his agencies — what we call "market-oriented sales concept."

Mr. Shepard said that "we will implement our computer programs that are in effect at the present time and we are also planning to get into an area that will be one of the major break-throughs, in our opinion, in spot TV representation." He described this as "product sales auditing" to show how an advertiser's sales relate to TV spot markets.

Six best regional radio spots picked

Humor, music and straight sell are represented in the six regional radio commercials judged most effective this year by the Radio Advertising Bureau.

RAB last week listed its annual awards — the agency and advertiser will receive golden-record plaques—for excellence in radio campaigns. They were selected by a cross-section of broadcast and agency executives.

Robert H. Alter, RAB vice president and director of national sales, noted "a tremendous renaissance of interest in radio creativity" nationwide, which he based on the "hundreds of spots" listened to by the judges.

The regional winners:

Culligan Inc. (soft water service), Northbrook, Ill., through Alex T. Franz Inc., Chicago; Filice & Perrelli Canning Co. (F & P canned foods), Richmond, Calif., via Botsford, Constantine & McCarty, San Francisco; Mother's Cake & Cookie Co. (Mother's cookies), Oakland, Calif., through Guild, Bascom & Bonfigli, San Francisco; Parks Sausage Co., Baltimore, via Leon Shaffer Golnick Advertising, also in Baltimore; The F. & M. Schaefer Brewing Co., New York, (Schaefer beer), through BBDO, same city; Vita Food Products Inc., New York, via The Wexton Co., also New York.

Claims for Sucrets are ruled deceptive

Claims made for Sucrets and Children's Sucrets on TV are false and deceptive despite being "literally" true, a Federal Trade Commission hearing examiner has ruled.

This is the reasoning behind Hearing Examiner Edgar A. Buttle's initial decision which would halt the representations of Merck & Co., its subsidiary, Quinton Co., Rahway, N. J., and its agency, Doherty, Clifford, Steers & Shenfield, New York, in advertising Sucrets and Children's Sucrets, throat lozenges. (DCSS merged with Needham, Louis & Bronby Jan. 1 to become Needham, Harper & Steers.)

The examiner found that while Merck's statement that "Sucrets contain hexylresorcinol which can kill even staphylococcal and streptococcal germs" is literally and technically true, the statement is deceptive because Sucrets is a lozenge for sore throat and may not touch the germs which are usually located within the flesh of the throat.

Merck has said that the FTC decision "vindicates the germ-kill and pain relief claims intended by the company."

Further, Merck says, Mr. Buttle rejected a much more restrictive order proposed by the FTC attorneys on the ground that the order was ambiguous and not supported by the evidence.

According to Dr. Harry J. Robinson, president of Quinton Co., subsidiary of Merck, which markets Sucrets and Children's Sucrets, "The order proposed
Double-Threat Newsman  
JIM CLARKE  
Scores on Radio and TV

Jim Clarke is a newsman of many talents, all of which are exploited by WMAL in providing complete news coverage for metropolitan Washington—the nation's fastest-growing urban market.

On WMAL-TV Clarke is editor and anchorman of "News 7," our early-evening, hour-long newscast. As editor, he plans the daily program and writes key portions of its contents. As anchorman, he integrates reports by other members of WMAL's wide-ranging news staff, action newsreel film, and live interviews with national and local leaders.

On WMAL Radio, Clarke does five minutes of news daily and a commentary on national and international events each Sunday.

A key member of our 25-man staff of news and public affairs specialists, Jim Clarke helps make WMAL Radio and WMAL-TV the news voice for the Nation's Capital.
What’s in back of our surge to the

Going all out for news. People make news and it takes people to cover and report the news.
In all, the News Departments of the ABC Owned Television Stations now have 83 more people than they had a couple of years ago. And every one of them works in a full-time, fully equipped news department.

Why bother? People want to see the news when they watch television, not just hear about it.
If you want people to watch the news on your channel, you’ve got to bring it back live (or on tape or on film). Sometimes this means going all the way to Viet Nam for a local news story.
WBKB’s Frank Reynolds did it recently. Or presenting the news in color, the way Detroit’s WXYZ-TV does. But it’s all worth it. Going to great lengths for news is one of the reasons in back of our surge to the front.

ABC OWNED TELEVISION STATIONS • WABC-TV, New York • WXYZ-TV, Detroit • ABC
WBKB, Chicago • KABC-TV, Los Angeles • KGO-TV, San Francisco
How a Wink enticed Southern California

Where is Horace Wink?
That's the question all Southern California was asking—and had been for many weeks—thanks to a saturation campaign of radio and TV spots, backed up by some newspaper space, sponsored by the Ford Dealers Advertising Association of Southern California.

The drive started March 22, with a 10-day teaser barrage. This included using over 8,700 radio spots on 60 stations and more than 800 TV spots on 12 stations. Each spot expressed concern about Horace Wink, unaccountably absent from his prime azaleas, his chamber music group, the poetry festival. Each concluded with the question: "Where's Horace Wink?" Some radio spots had an added line, spoken soto voce: "Ask your Ford dealer."

One radio spot opened with a woman's voice asking: "Martha, who has the book on Flemish Renaissance? It's long overdue." A second feminine voice replied: "The library says 'Horace Wink'." The first voice said: "Of course. Where is Horace Wink?"

A masculine whisper completed the spot with "Your Ford dealer knows."

The answer to Horace Wink's whereabouts was revealed on the same radio and TV stations during the month of April. In some 6,500 radio spots and 700 TV commercials, the anxious public was told: Horace Wink's gone Mustang. These revealing spots completed the situations opened in the teasers. The librarians, for example, reported that he brought back the book of Flemish Renaissance and paid the overcharges. "But it's what he took out—a book on scuba diving."

The situation was summed up in one explanatory radio spot, a rejoinder to a query to the missing person's bureau in a teaser. "Good evening," said a matter-of-fact masculine voice. "These are the facts in the case of Horace Wink. Horace Wink was a man who bred hybrid azaleas, played cello with the Santa Monica Wednesday-night string quartet and spent his vacations searching for fossils in the La Brea tar pits. But that was the Wink that was. Now he's the darling of the surf board set, does the wildest Watusi in the West and has taken up pole vaulting. What happened to Horace Wink? He joined the Mustangers at his Ford dealer's."

The Horace Wink campaign was designed to complement locally the national Mustang television advertising, whose full-color commercials feature the meek young man, the mousy secretary, who become bold, romantic figures after they discovered what a Mustang could do for them.

The Payoff • 'It's too soon yet for

Rep. appointments ...

Business briefly ...
Trans World Airlines, through Foote, Cone & Belding, both New York, will sponsor Seven Art's one-hour TV special, Gemini, in 10 markets. Markets are WOR-TV New York, KJH-TV Los Angeles, WNAV-TV Boston, KTVU(TV) Oakland-San Francisco, WTAI(TV) Pitts-
the complete sales report,” Keith Matzinger, account executive for the FDAASC at J. Walter Thompson Co., Los Angeles, said this month. “But early returns indicate it has been a big success. Sales for the period were up about 20% from the previous rate, and that was already a record-breaking pace.”

In its first year on the market, which ended in mid-April, Mustang had set a new national record for first-year sales of any new automobile, with coast-to-coast sales of over 418,000, Mr. Matzinger said. The earlier record of 417,000 cars sold the first year had been set by another Ford car, the Falcon. “Southern California Mustang sales for the year were more than 10% above the national average.”

Reaching from the Mexican border as far north as Santa Maria and from the Pacific Ocean as far as Las Vegas, the Ford Dealers Advertising Association of Southern California is made up of 144 dealer organizations. “It’s the biggest Ford dealer association in the nation,” Mr. Matzinger reported, “and it’s also the largest in sales volume and in advertising expenditures. But the association and we at the agency are proudest of its leadership in creating aggressive and effective advertising.” He mentioned the Ford shaggy dog, which began as an animated TV Ford salesman in Southern California in 1959 and later was put to work nationally, winning an appreciable array of awards en route, as just one example of the advertising creativity shown by the FDAASC.

“Everybody gets in on the act,” he commented, noting that more than 40 members of the J. Walter Thompson creative department were involved in getting Horace Wind started on the air, including people at the agency’s New York offices as well as in Los Angeles. Advertising of the Ford Division of Ford Motor Co. is handled by JWT’s Detroit office. The Ford dealers of Northern California have already adopted Horace Wink and it’s not impossible that he also may become a national salesman.

13-week spot campaign featuring Eddie Lawrence as the “old philosopher” to sell the Yellow Pages. Sponsor plans 19-weeks of TV spots to follow the summer radio drive.

Sealy Inc., Chicago, boosts its bedding promotion budget this year by 18% to $6.5 million. One-fourth will go into local TV and radio on co-op basis by affiliate firms through 27 regional agencies. Firm also is using broadcast in its expansion to foreign markets.

Mutual of Omaha Insurance Co., through Bozell & Jacobs Inc., both Omaha, will sponsor NBC-TV’s Wild Kingdom for the fourth consecutive season, beginning Sunday, Oct. 17 (5-5:30 p.m. EST).

Golden Grain Macaroni Co., San Leandro, Calif., through McCann-Erickson, New York, has purchased participations in ABC-TV daytime TV shows: Price Is Right, Trailmaster, The Young Marries, Father Knows Best, Donna Reed Show, Day in Court and The Rebus Game.

RCA will participate in NBC-TV’s National Collegiate Athletic Association 14-game football schedule. Agency is J. Walter Thompson, New York.

Midas Inc., Chicago, through Arnold & Co., Boston, is spending almost $250,000 on radio spots to promote its Midas auto mufflers in New England region. Nine 60-second commercials are rotated during rush hours and on weekends.

Mercedes-Benz of North America, Fort Lee, N. J., through Campbell-Mithun, Chicago, will place dealer-cooperative radio and TV spots for its 1965 diesel-powered sedan, beginning this week and continuing for an indefinite period.

Vick Chemical Co., through Morse International, both New York, will participate during the 1965-66 season in NBC-TV’s Laredo, The Virginian, and Dr. Kildare.

General Electric Co., through Maxon Inc., both New York, will sponsor Sportscaster’s Holiday, an 11-week color series beginning on NBC-TV June 26 (Saturdays, 5:45-6 p.m. EDT).

Armour Grocery Products Co., Chicago, through Foote, Cone & Belding, there, is starting a local test market campaign using TV spots and newspapers for new children’s snack products, Soaprize, which includes a plastic toy premium inside the bar.

Jerseymaid Milk Products Co., through Atherton-Privetti, Los Angeles, has started a TV campaign on six Los Angeles stations, using more than 30 10-second spots a week to deliver the message: “Jerseymaid Milk couldn’t be fresher if you owned a cow.”

Also in advertising . . .

Volunteer agency • Lennen & Newell Inc., New York, is the new volunteer advertising agency in the “Keep America Beautiful” campaign for the Advertising Council, Washington.

Minneapolis merger - Merger of Colle & McVoy Advertising and Pidgeon, Savage, Lewis Advertising, effective June 1, was announced last week by principals of both Minneapolis agencies who continue in the new venture as Colle & McVoy. New address: 1400 Park Avenue, Minneapolis.

Ayer, Corning split to eliminate conflict

N. W. Ayer & Son, Philadelphia, has terminated an eight-year relationship with Corning Glass Works, Corning, N. Y., because of what it termed a marketing conflict.

The agency said that Corning’s Corning Ware and Pyrex Ware products were in conflict with Teflon TFE non-stick coating for cooking utensils, marketed to cookware manufacturers by another Ayer client, E. I. duPont de Nemours and Co., Wilmington, Del.

A spokesman for Corning said that the company, which billed $323,000 in network television (net time and talent) during 1964, is expected to name a new agency some time this week.
Ruling revives pay-TV supporters

California court decision against Proposition 15 may be appealed but Weaver and other advocates of pay-as-you-see plan see eventual victory for principle

Subscription Television Inc. was weighing its future with renewed hope last week and considering the chance of restarting its pay-TV operation in California. Other wired pay television groups were also taking a fresh look at their prospects.

STV was hit with good news after a year of deep trouble which ended in a filing for protection from creditors under the bankruptcy act. The ban on pay TV in California approved by the voters of that state last November was ruled unconstitutional, paving the way for a home program service to their subscribers in Los Angeles and San Francisco.

The free television act (Proposition 15 on the California ballot) is unconstitutional because it burdens freedom of speech contrary to the guarantees of the constitutions of both the nation and the state, Judge Irving H. Perluss of the superior court in Sacramento, Calif., stated in a memorandum opinion handed down Wednesday (May 19).

"The great constitutional issue here presented involves freedom of speech," Judge Perluss said. "This basic right, guaranteed by the First Amendment, has long been held to be incorporated in the Fourteenth Amendment due process clause, thus protecting against state abuse.

"Since the right is worthless without an effective means of expression, the guarantee extends to both the content of the communication and the means employed for its dissemination," he continued.

The decision has reportedly already had a boosting effect on the plans of franchisees of the Telemeter wired pay-TV system in four southern cities.

On the news STV's stock, traded over the counter, moved from 2 bid to 5 3/4 bid.

Weaver Comments - Company President Sylvester L. (Pat) Weaver said reinstallation of STV operations in Los Angeles and San Francisco is a possibility but only if the case is not drawn out in lengthy appeals. The chain of appeal would be first to an appellate court, then to the state supreme court, with the further possibility of remanded appeals.

Mr. Weaver said if another year went by with the case hanging in the courts, STV would probably forget about pay TV in California for the foreseeable future.

He said the company was still considering the use of its basic grid systems in Los Angeles and San Francisco for community antenna systems. In the two Coast cities STV still has a grid system which passes 100,000 homes and has drops installed to 6,000 homes. This plant represents a $4 million investment.

Mr. Weaver said that after the superior court decision he contacted the office of the governor to state the STV position. This was to let the state know, he said, that most Californians consider the referendum vote "dis grace ful" and that it was fomented by "scurrilous advertising based on provable lies."

Any appeal, Mr. Weaver said, would have to be made by the state attorney general but he added he did not expect an appeal to be made. California, he stated, is "keenly aware of the injustice" done by the referendum.

Legal Steps - The legal action leading to Judge Perluss's decision began after STV had been unsuccessful in preventing the California secretary of state, Frank M. Jordan, from adopting the results of the vote on Proposition 15 and so letting it become a part of the state constitution. Mr. Weaver and two other executives of the company, D. E. O'Neil, and S. T. Greenhow, thereon filed a petition with Secretary Jordan for a license for a new corporation to engage in the business of pay TV.

Mr. Jordan refused to accept their petition as contrary to the act. They then filed an action for declaratory relief, contending that the act violates the constitutions of both state and the nation. In reply, the California secretary of state filed a motion for judgment on the pleadings and the plaintiffs filed a motion for summary judgment. Fox West Coast Theaters, which, with other theater interests, had opposed the introduction of pay TV into California, attempted to become a party to the suit but that petition was denied. They then requested and were granted permission to submit testimony as amicus curiae.

In his decision, Judge Perluss noted the "sanguine assertion" of the anti-pay-TV interests "that the act does not prohibit subscription television, it merely requires that no charge be made for it. This is comparable to asserting that no prohibition of expression would exist in the case of newspapers or motion pictures if a statute were adopted requiring their distribution or showing without charge.

"The act," Judge Perluss stated, does not "merely regulate a business in a reasonable, nondiscriminatory manner," which would be proper, but "establishes a prohibition" based on "the conjecture from certain viewpoints (some of which are not entirely unbiased) that subscription television may destroy free television operation."

Still Protected - Judge Perluss noted: "Nor does the fact that a majority of the voters cast their ballots in favor of Proposition 15 remove it from scrutiny in the light of constitutional protections." He cited a West Virginia case in which it was said: "One's right to life, liberty and property, to free speech,

a free press, freedom of worship and assembly, and other fundamental rights may not be submitted to vote; they depend on the outcome of no elections."

"In the final analysis, it would appear that the charges here made could have been made by the radio industry when television was made available for the home and by the producers of silent motion pictures on that memorable day when Al Jolson appeared on the motion picture screen and sang 'The Jazz Singer.' Invention and progress may not and should not be so restricted at least when they are cloaked with the immunity of the fundamental freedoms."

If the decision is appealed, that action can be taken only by the defendant, California Secretary of State Jordan, attorneys said. The theater owners, who presumably might be eager to challenge the validity of Judge Perluss's reasoning, lack that legal right since they were not parties to the action. Under the circumstances, it seems certain that they will do whatever they can to influence the state to make that step. Informed sources believe that, one way or another, the pay-TV issue in California will not be resolved short of a decision by the Supreme Court of the United States.

Proposition 15 was designed to outlaw any charges for home program service, whether delivered by wire or through the air, but its particular target was Subscription Television Inc., which had begun operating in Los Angeles in mid-July, in San Francisco a month later. Organized in 1963, with the Rueben H. Donnelley Corp., Lear Siegler, the Los Angeles Dodgers and the San Francisco Giants as principal stockholders (and the exclusive TV rights to the games of the Dodgers and Giants as prime program fare), STV met immediate opposition from the California Theater Owners, who raised a war chest and launched a Crusade for Free Television which circulated petitions and collected signatures to put the anti-pay TV measure on California ballots in the general election last November.

Weaver Campaign = All year long, STV's president, Mr. Weaver, one-time president and board chairman of NBC and a veteran advertising agency executive, stumped the state and the nation exhorting public support for the cultural and educational entertainment that STV would enable people to enjoy at home. All year long, another veteran advertising man, Don Belding, fought Mr. Weaver as head of the Citizens Committee for Free TV, group which conducted the crusade. Aided by the California Federation of Women's Clubs, with 80,000 members pledged to oppose pay TV, Mr. Belding's group won out in November, by a two-to-one margin.

STV, Mr. Weaver told a stockholders' meeting in Los Angeles a few days after their defeat at the polls, would be back in California, after it had won a court battle to reverse Proposition 15, which he declared was absolutely unconstitutional. While waiting for that happy day, STV shut down its headquarters in Santa Monica, its program centers in Los Angeles and San Francisco, collected the program selector boxes from the homes of its 6,000 subscribers (4,000 in Los Angeles, about half as many in San Francisco) and stored them away with the elaborate electronic equipment that recorded what STV programs the viewers watched and prepared the monthly bills for that service. Mr. Weaver moved into smaller offices in New York to see what could be salvaged from the past and what could be planned for the future.

Screen Actors Guild, which had ardently supported STV in opposing Proposition 15, applauded the decision of Judge Perllus as the first step toward restoration of the service to California. John L. Dales, national executive secretary of SAG, said: "We are confident that the supreme court will uphold the decision and that California viewers will have the opportunity of watching a new kind of television programing voluntarily supported by a boxoffice rather than the advertising dollar. This will be of great service to all citizens and should increase employment for thousands of artists and technicians."

Others Pleased = The report of Judge Perluss's decision was good news to another group, the former subscribers of STV. A telephone survey of a random sampling of people who had lived for weeks or months with STV programs available at the turn of a dial, conducted by Broadcasting at...

“...it sounds good but let’s see what they say at Blackburn”

In California and another suit against the state for $14 million. He said that last week’s decision could act in the company’s favor in these proceedings.

The California decision also brightened the picture for Skiatron Electronics & Television Corp. Skiatron licenses the pay system used by STV. It is also an applicant for a CATV franchise in the Queens borough of New York City. Its New York application had been temporarily set aside by the city on the grounds of insufficient financing. Skiatron President Arthur Levey said his company’s stock had moved up from 3/8 asked, to 2/3 asked, on first reports of the California ruling. Skiatron would now be sufficiently attractive to draw adequate financing for the New York system, he said.

The decision got an immediate reaction from West Coast investors. STV stock sold over the counter, had changed hands at about $2 a share since November. On Wednesday afternoon, after Judge Perluss’s ruling was made public, the price soared to a high of 61/4, dropping to 53/4 at the market’s close for the day. On Thursday, it was 4% bid, 5% asked, with only a little activity, according to a leading Los Angeles brokerage house.

Changing hands

ANNOUNCED • The following station sales were reported last week subject to FCC approval:

• WLIV Livingston, Tenn.: Sold by R. H. McCon to Richard Gillespie, for $130,000. WLIV is a 1-kw daytimer on 920 kc. Broker: Blackburn & Co.

• WMGO Canton, Miss.: Sold by Roth E. Hook and associates to R. James Loflin and associates, for $62,000. Mr. Loflin is manager of WMGO. The station is a 1-kw daytimer on 1370 kc. Broker: Chapman Inc.

APPROVED • The following transfer of station interest was approved by the FCC last week (For other commission activities see For The Record, page 95).

• KUBA Yuba City, Calif.: Sold by Roger R. Hunt and Chester V. Ullom to Sidney A. and Della G. Grayson, for $230,000 including covenant not to compete. KUBA is on 1600 kc with 6 kw day and 500 w night.

New TV stations

As of May 20 there were 108 television construction permits outstanding for stations not yet on the air. Of these 18 were commercial VHF's, 60 were commercial UHF's, 7 were educational VHF's and 23 were educational UHF's.
Negro-oriented station opposes WOL sale

The Atlantic Broadcasting Co., owner of Negro-oriented WUST Bethesda, Md. (Washington suburb), last week asked the FCC to hear its opposition to the sale of WOL-AM-FM Washington. Sonderling Stations Group is currently seeking commission approval of the purchase from Washington Broadcasting Co. for $1.5 million (Broadcasting, April 5).

Atlantic said it opposes the sale because Sonderling has made no attempt to determine the needs of the Washington Negro community which it intends to serve. Sonderling already owns WDIA Memphis; KDKA Oakland-San Francisco, and WWRL New York, which are programmed for the Negro population of their respective cities.

WUST also questioned whether the Mutual Broadcasting System would continue its affiliation with WOL under the proposed program plans.

Columbia CP first link in N.C. ETV network

The University of North Carolina, permittee of channel 2 in Columbia, N.C., said last week that the Columbia facility is the first in a proposed interstate network of eight educational TV stations. Other outlets will be sought in Concord, Linville, Asheville, Burgaw, Farmville, Winston-Salem and Bryson City, all North Carolina. Translators and low-power transmitters to fill gaps in coverage are also planned.

Target date for Columbia channel 2 is September of this year. The channel 2 station will use RCA transmitters at assigned powers of 100 kw visual and 15 kw aural with an RCA antenna 1,044 feet above ground. Program service of the university’s WUNC-TV Chapel Hill will be extended to the new station via the school’s own microwave system which is to be constructed as part of the plan.

Three UHF agreements approved by FCC

The FCC last week approved agreements that resolved two proceedings and brought another closer to conclusion.

In the Grand Rapids, Mich., channel 13 case the FCC averted possible appeals court proceedings as it approved an agreement in which winning applicant, West Michigan Telecasters Inc., would pay the other contestants $130,000 each for their interest in the interim operation and out-of-pocket expenses.

The court has deferred proceedings on appeals filed by Grand Broadcasting Co., MKO Broadcasting Corp. and Peninsula Broadcasting Co. pending possible out-of-court solution brought on by the West Michigan offer.

In the Paterson, N.J., channel 41 proceedings the FCC granted an agreement among Trans-Tel Corp., Bartell Broadcasters Inc. and Spanish International Television Inc. and awarded Trans-Tel permission to construct a new TV on the UHF channel.

Bartell Broadcasters’ application was dismissed without consideration as part of the agreement. SITI was given an opportunity to merge with the winning contestant for half interest.

Channel 37 was originally assigned to Paterson but that channel was later reserved for radio astronomy and channel 41 was substituted.

The Boston channel 25 case grew closer to conclusion as the review board granted United Artists’ withdrawal of its application following payment of out-of-pocket expenses by the remaining applicant, Integrated Communications Systems Inc. of Massachusetts.

WXEX-TV to become ABC's Richmond outlet

WXEX-TV Richmond, Va., currently an NBC affiliate, becomes an ABC outlet on Aug. 15, Thomas G. Tinsley Jr., president of the station, and Robert Co., ABC vice president in charge of TV station relations, announced last week.

The new affiliation represents a switch with NBC in the area. WRAV-TV Richmond, currently affiliated with ABC, becomes an NBC affiliate on Aug. 15 (Broadcasting, May 3).

WXEX-TV, on channel 8, is owned by Petersburg Television Corp.

Toledo grants CATV

The Toledo, Ohio, city council last week formally granted a CATV franchise to Buckeye Cablevision Inc. The move came a week after the council gave tentative approval for the CATV service (Broadcasting, May 17).

Buckeye is a cable company formed by Cox Cablevision Inc. (Cox Broadcasting Co.) and the Toledo Blade.
Blueprint for a more virile NAB

Schroeder suggests more strength in legal, government relations, public relations arms; wants study to define working areas; re-evaluation to eliminate waste motion

A six-point program to strengthen and study the staff organization and committee system of the National Association of Broadcasters was recommended last Tuesday (May 18) by Willard Schroeder, NAB board chairman. High among his recommendations were “more first-class manpower” in the legal and government affairs departments and a larger budget and staff for the public relations department.

He suggested:
- Upgrading of communications within staff, between staff and committees and between NAB and other industry associations.
- Instituting a time study of NAB staff to define its working areas.
- Making some assumption on the breakdown the second suggestion will produce; strengthen the government relations and legal staffs.
- Beefing up the public relations staff and budget.
- Establishing research procedures to constantly evaluate station services, including conventions and other meetings.
- Reaffirming the determination to strengthen and expand the codes.

The recommendations came in Mr. Schroeder’s third memo to the NAB board. He saw them as serving to maintain the NAB functions which he had spelled out in his second report to the board earlier in the month (Broadcasting, May 10). He had described those functions as:
- Maintaining and enlarging broadcasters’ opportunity to program and operate “without burdensome and unwarranted restrictions.”
- Providing leadership in broadcaster self-improvement through “inspiration, information and the establishment of goals or standards.”

The second memo from Mr. Schroeder, vice president and general manager of WOOD-AM-FM-TV Grand Rapids, Mich., had also called for reducing the size of the 44-man NAB joint board and clearly identifying the chairman as number-one man in the association’s hierarchy. The first memo to the board in April had urged a moderate approach to upgrading NAB and recommended four courses of action (Broadcasting, April 12).

Real Workers = In last week’s memo, said to be the last communiqué the chairman would send to the board prior to June’s semi-annual regular board meeting, Mr. Schroeder noted that the 90 fulltime staff members of NAB, “the pros who have to take their work seriously”, are the ones who do the “real work.”

He said that only slightly more than half of the 23 current NAB member committees are “active in any meaningful degree.” Of this number, he noted, seven are board committees giving “momentum and required detailed action to matters needing board action.”

Generally, the chairman felt, these committees perform “reasonably well” although “they may tend to persist beyond their usefulness on occasion, and now and then they create a camel when they’re supposed to design a horse.” However, he defended their existence as being a training ground for industry leaders of the future and they permit more members to take part in the association’s affairs.

Mr. Schroeder said the executive committee should periodically weigh the original purpose of the committees and match it against their current efforts and needs.

Communicate = The problem of communicating was also brought up by the chairman. He said a need exists to improve communications between NAB and other associations and a similar need seems to exist within the staff and at times between the staff and committees. However, he felt the practical level of communications comes with management expertise which will be employed in those areas “at the earliest possible opportunity.”

Mr. Schroeder pointed to government relations, “the single most important activity” as being “too light.” The government affairs unit, he said, employs three persons and gets about 5% of the payroll; the legal department with five persons gets about 5% of the payroll, and public relations, “another basic activity,” employs about five persons and gets about 5% of the payroll.

He said, however, that other staff members, “especially executives,” work in government and public relations much of the time, so it is unfair to conclude that only 15% of the payroll is spent in these areas. He suggested a time study might be made to see how the staff apportions its time and what share is devoted to government and public relations.

Worse Shape = As much as additional top-flight manpower is needed in the government affairs and legal departments, Mr. Schroeder said, the “understaffing and underbudgeting for needed expenditures is, if anything, even more severe” in public relations.

He said NAB’s annual $75,000 payment to the Television Information Office toward operating expenses and the delegation of certain responsibilities to TIO has “complicated” NAB’s TV public relations. “Because of the material shortcomings of NAB’s public relations effort and the complexity of

What the girls take home

A member survey reported by the Educational Foundation of the American Women in Radio & Television showed the average salary of AWRT executives to be $7,500. It also found 36% of AWRT members earning more than $10,000 a year.

The survey found nearly 33% of AWRT members have remained with their present employers for more than 10 years, and 10% with their company for more than 20 years.

The survey was based on a response of 952 women out of a total AWRT membership of 1,502.

According to Elizabeth Bain, assistant to the vice president, Columbia Television Stations Program Services and past president of AWRT, the survey proved “that women in the broadcasting industry are increasing their level of professional competence, moving into new areas of activity, and assuming greater responsibility.”

The full AWRT survey is expected to be issued within the next few months.

“It was CBS which forceably demonstrated the importance of our new link between nations...CBS’ ‘Town Meeting of the World’... An exciting and illuminating hour it was.” (AP 5/4)

“The versatility of Early Bird and electronic technicians the world over was demonstrated in last night’s satellite service to Walter Cronkite’s news show...CBS had...a thoroughly distinctive edge in crisp coverage of the news of the moment...” (THE NEW YORK TIMES 5/4)

“The commemoration of V-E Day arranged by CBS and the BBC, by means of the Early Bird satellite, was the most successful use to date of a communications satellite for the transmission of live television.” (NEW YORK HERALD TRIBUNE EDITORIAL 5/10)

“Perhaps the best-organized and most skillfully produced Early Bird program to date was the Saturday CBS special, ‘Victory in Europe—20 Years After’..” (NEW YORK POST 5/10)

“Of all the Early Bird satellite shows ‘live’ from Europe, we’d have to put CBS-TV’s ‘Town Meeting of the World’ and its... Gen. Eisenhower-Marshel Montgomery reminiscences of WW II ‘20 years later’at the top in interest and enlightened planning and execution...” (NEW YORK JOURNAL-AMERICAN 5/10)

“‘Finlandia’...in some ways the most impressive Early Bird demonstration so far...CBS News affords a welcome example of what could be the cultural advantage of international TV.” (THE NEW YORK TIMES 5/11)

“Certainly the potential of instantaneous worldwide coverage opens up vast new areas for ‘hard’ news. Of the three American networks, CBS showed how to use the satellite in that respect.” (NEWSWEEK 5/17)

CBS NEWS

CBS News continues to pioneer in the development of television via satellite. When Telstar brought the space age to television, CBS News produced the first live transatlantic broadcast. In 1963 the first “Town Meeting of the World” began an unprecedented series of international television forums. Now Early Bird affords new opportunities to promote an international exchange of ideas, and provide live coverage of major news events on both sides of the Atlantic.
the TIO relationship," Mr. Schroeder added, he has requested John Couric, NAB vice president for public relations, "to make a full-scale proposal for a new, much enlarged program." This plan will probably be submitted to the board at next month's meeting.

The chairman pointed to NAB's "station services" as its most direct way of helping members become better broadcasters. Since the worth of the services varies with the individual member's operation, he said, this area of NAB work should be constantly scrutinized to see if it keeps pace with changing conditions. He suggested:

* A continuing personal interview survey by field men of broadcasters' evaluations of the several services.
* An annual postcard survey of all members to get the same information.

Mr. Schroeder pointed to conventions, seminars, conferences and clinics as another form of member service.

Acknowledging that there have always been arguments for and against such affairs, he said they will be around since "they're popular and the theory of meeting to impart and gather knowledge is sound."

Study the Meetings • However, he said, the staff and board should be concerned with the content of the meetings. "A lot of it," the chairman charged, "is so much warmed-over hash—a waste of effort to put together and a waste of time to attend." He suggested an appraisal board, either appointed by the president or as part of the existing convention committee, to evaluate the content of meetings.

The chairman said the seven field men of station services department "are more than earning their keep" in their assignment of getting new NAB and code members. He said they might actively "encourage and instruct some broadcasters in closer governmental relations at the local and Washington level" and they might be able to continually question members "on the most useful forms of station services."

Mr. Schroeder pointed to the NAB code authority as a "most constructive force" in the association's self-improvement program.

He referred to Howard Bell, code director, as a "young and honestly dedicated person" and said the code is outstanding in contrast with self-regulation of other industries. Contrasted to self-regulation procedures of the professions, he added, it still has a way to go.

Speaking as a broadcaster, Mr. Schroeder, said the codes should be tougher and that the code authority should not be expected to be infallible if it is truly effective. He said it occasionally "might err on the side of overzealousness. Personally, I'd rather have it that way than too lax—providing its administrators have enough self-confidence to concede error when it is apparent."

Mr. Schroeder noted that the code has a financing problem which was brought before the board at its January meeting in Palm Springs, Calif. Current code dues aren't meeting operating expenses, he said, and the radio code will have exhausted existing surpluses sometime this year. The TV surplus will carry into the following year.

He said the finance committee had recommended no action be taken on a dues increase until the surpluses were depleted and that the executive committee has been encouraging economies. However, "the requirement for decision persists," he added.

Plans made for UHF network

Piano claims several stations may affiliate with new TV system

More than a dozen UHF stations have indicated a willingness to affiliate with a new network that plans to start operating in the fall, according to Vincent C. Piano, president of Vic Piano Associates, New York, whose projected "fourth network" was disclosed in New York last week. The network is being called The Unisphere Broadcasting System.

The attempt to assemble stations for a UHF network started early in May with letters sent to operators of existing and projected UHF's. Mr. Piano's firm specializes in the sales representation of UHF stations and currently has a list of five outlets, all in major markets, and expects to be in 11 more top markets by the end of the year.

Mr. Piano said he was confident that his firm would be networking a minimum two and one-half hours of sponsored programs nightly with origination at WBBM-TV in Philadelphia relayed by microwave to other stations.

He said all programing would be on tape and film with no ownership control exercised by his firm. Mr. Piano said only sponsored programs would be scheduled and the network would operate "only for the convenience of advertisers and program packagers." The aim would be to "deliver prime minutes in major markets to TV advertisers at a low cost-per-thousand, he said. Mr. Piano indicated several advertisers had expressed interest.

Talk, Talk, Talk • In his letter to stations, Mr. Piano said: "For several years now, many people have talked about setting up such a network—in fact, several groups are still meeting and discussing it.

"Rather than merely talk about it, we have done it and are gearing this network specifically for the needs of all-channel television."

His letter also indicated that phone lines might also be considered in the future; noting that the interconnected basis of feeds would be using "phone lines, microwave, station-to-station pick-up or a combination of all these possibilities."

Mr. Piano's letter said the UBS network would have rates "structured in the same manner as the other networks with sponsored programs being delivered to the stations at a negotiated percentage of published rates."

Though Mr. Piano did not identify the dozen UHF stations he said were committed to the proposed network service, it was indicated that the five stations he says would be among them. The five: WOOK-TV, Washington, wuHF (TV) Milwaukee, WBSA-TV Binghamton, N. Y., WTAF-TV Marion, Ind., and WIBF-TV.

Mr. Piano was a vice president of Peters, Griffin, Woodward Inc., New York, before he formed his own company in 1963. He also had been associated in 1953-1959 with the Meeker Co., New York, and before that with WSB-AM-FM-TV Atlanta in promotion and research. A brother, Claude E. Piano is executive vice president. A subsidiary of Vic Piano Associates called Mizlou Productions has assembled four radio program packages for affiliation to radio, and, Mr. Piano said, is putting together several TV shows, among them Dress Rehearsal which would consist of tapes of dress rehearsals of summer stock theater productions.

WTEN(TV) gets translator

The FCC last week granted Capital Cities Broadcasting Corp. permission to construct a new VHF-TV translator on channel 7 to rebroadcast programs of its WTEN(TV) Albany, N. Y. The translator will serve Schoharie and Middleburg, both New York.

Top bananas, all

And these top bananas offer top results because they exert top influence in their markets... tops in audience, tops in entertainment, tops in community service, tops in market research, tops in experience. Buy the Meredith Stations for top sales.
Broadcasters at odds over Michigan CATV

ONE HAS FRANCHISE, OTHER HAS PHONE COMPANY PACT

A battle over a community antenna TV system in Jackson, Mich., has erupted between two Michigan broadcasters.

The conflict involves Knorr Broadcasting Co., owner of a group of Michigan radio stations (including WYHY Jackson), and Time-Life Broadcast. It was initiated when Knorr received a franchise to install a CATV system in Jackson, and Time-Life signed a lease with Michigan Bell Telephone Co. to provide the same service. Time-Life was not an applicant for a franchise.

Reaction was so bitter that Knorr withdrew its stations from membership in the National Association of Broadcasters. This was because the Time-Life negotiations with Michigan Bell were handled by Willard Schroeder, chairman of the NAB joint boards. This is a conflict of interest, Walter Patterson, executive vice president of the Knorr group, charged. Mr. Schroeder is a Time-Life vice president and manages WOOU-AM-FM-TV Grand Rapids, Mich.

The Jackson franchise for CATV went to Knorr's Jacksonville Television Cable Co. following city council consideration of five applicants. The franchise, granted May 11, was announced last Monday (May 17). Also on Monday, Mr. Patterson says, he learned that Time-Life had agreed to use Michigan Bell facilities to provide CATV service to Jackson. Mr. Patterson says he was told by telephone company officials that since they were prepared to offer their facilities for CATV, they could not lease pole line rights to any CATV system. Mr. Patterson said the company officials suggested that he, too, lease cable facilities from them. He refused.

Mr. Patterson termed the Time-Life action a "calculated move to circumvent the franchising powers of the Jackson city commission." He explained that there were five applicants for CATV in Jackson, all of whom had applied to the city council beginning last December. Time-Life, he added, first evinced an interest in CATV for Jackson early this month when Mr. Schroeder offered to buy into the Knorr application. Mr. Patterson said he told him that Knorr was not interested in selling any part of its application. The next think he knew, Mr. Patterson said, was when Michigan Bell declined to rent space on its poles and informed him that Time-Life had signed an agreement to use Michigan Bell facilities to provide service in Jackson, without any franchise from the city.

Later in the week, an attorney for Time-Life told the city commission that no franchise is needed for CATV service in Jackson, since the telephone company is franchised to provide communications services. This position is standard in situations where telephone companies are providing, or planning to provide, CATV service (Broadcasting, May 10). Mr. Patterson said that his company will participate in any "pertinent" legal action to protect the franchising rights of the city commission.

Besides Knorr, other applicants for CATV in Jackson were Wright & Maltz Inc. (WTFM-AM-FM Tiffin, Ohio; WERB Garden City and WABW-AM-FM Mt. Clemens, both Michigan); Booth Broadcasting Co. (which owns WYHY Jackson as well as other radio stations in the state); Triad Stations Inc. (WALM Albia, Mich.), and Gross Telecasting Inc. (WJVM-AM-TV Lansing, Mich.).

**Time Version** Mr. Schroeder explained that Time-Life had been investigating potential CATV situations in Michigan and that after finding it could not file an application for Jackson because the city council had imposed a cutoff date, it offered to buy an interest in the Knorr application. When this was refused, Mr. Schroeder said, he approached Michigan Bell.

Earlier this month, it was announced that the Time-Life board had approved the purchase of a 20% interest in Sterling Information Services Inc. which has won initial approval of New York City's franchise bureau to operate a system there (Broadcasting, May 3).

Time-Life also has notified Lansing and Kalamazoo, both Michigan, that it intends to apply for CATV there. It is an applicant for Terre Haute, Ind., and a stockholder in an applicant for Marion, Ind.: It is also a 40% owner in an applicant for New London-Norwich, Conn.

NYC CATV's might drop installation fee

The two companies which have won tentative approval to operate community antenna TV systems in New York City last week were considering dropping a $37.50 installation fee which they could charge subscribers.

Charles Dolan, president of Sterling Information Services, one of the companies recommended by the New York franchise bureau for a CATV franchise, said his company might drop the fee to promote subscriptions.

He pointed out that installation costs were expected to exceed the arbitrary $37.50 figure anyway and that financing arrangements being negotiated with a bank might make such a charge unnecessary during the two-year interim period of the proposed franchise. However, he said Sterling did not want to lose the right to make the charge.

CATV Enterprises, the other applicant recommended for a franchise, said it also might drop the installation fee. Both Sterling and CATV Enterprises have proposed $5.50 monthly charges.

Texas Broadcasting adds outside holding

The Texas Broadcasting Corp. in a report to the FCC has disclosed the acquisition of Austin Management Corp., a nonbroadcast subsidiary engaged in the operation of business machines and having real estate holdings. Texas Broadcasting, owner of KTBC-FM-Austin, Texas, is controlled by a trust for President Johnson's family which owns about 85% of the broadcasting corporation.

In addition to its Austin broadcast holdings, Texas' Broadcasting has 29% interest in KWXT Broadcasting Inc., owner of KWTX-AM-TV Waco, Tex. KWXT Broadcasting also owns 50% of Brazos Broadcasting Co., owner of KBTX-TV Bryan, Tex., and 80% of Texoma Broadcasters Inc., owner of KXII-TV Ardmore, Okla.; KFLY-TV Lafayette, La., and 75% of Victoria Broadcasters Inc., licensee of KNAL Victoria, Tex. The TV ownerships in which the Johnson family participates add up to the FCC limit of five VHF stations.

Back in Austin TBC also is owner of the Muzak franchise in that city through its Music for Business Co. Community antenna television was not overlooked as TBC in addition to cattle and ranching interests has an option to purchase 50% of the stock in Capital Cable Co. which operates a CATV system.

The TBC balance sheet included in the request for renewal listed surplus and reserves at $3.7 million. Also reflected was a growth in retained earnings of $1 million. A large portion of this figure, $900,000, was for accounting purposes which resulted from the sale of KGVR-AM-TV Weslaco, Tex., in 1961. This sum was carried as deferred income in the 1962 report and as a capital gain in the current balance sheet.

In a recent ownership change within the kfrs organization the trust for Mrs. Johnson in March purchased the one share of stock held by the President's brother, Sam Houston Johnson.
“And the surprises, together with some ingenious little touches, made the 90 minutes positively delightful.”

Vince Leonard, Pittsburgh Press

“Merv in his first week has conclusively proved he has what it takes to conduct a show starting at 11:30 and hold the viewers’ attention for 90 minutes. In a word, he is terrific.”

Arthur E. Petridge, Boston Herald

“. . . the affable Griffin is able to evoke a generous response from his guests. He keeps the conversation moving without being obtrusive, which is essential for the success of this type of show.”

Walt Dutton, Los Angeles Times

“But the show doesn’t lean entirely on the desk-and-chairs layout, but on the personality of its star and his handling of guests and the fairly consistently improvised happenings during its 90 minutes.”

Jack O’Brian, N. Y. Journal American

“That self-assurance, perhaps, is the most important item; it conveys to the audience a feeling the host is confident the show will be entertaining, so relax and enjoy it. And it seems to me Griffin communicates this assurance—he’s confident his program will be entertaining, as indeed it has.”

Dick Shippey, Akron Beacon Journal

“He has the kind of personality that comes on easily in the late evening and ought to wear well.”

Tom Mackin, Newark Evening News

“Merv Griffin scores very big.”

Bob Foster, San Mateo Times

“His local beachhead is the Little Theatre off Times Square on 44th St., a location with its own built-in excitement. Outside shots of the busy theatrical neighborhood—an attraction that should go over big with out-of-towners—added an important dimension to the program. So, too, did his announcer, Arthur Treacher, a booking gesture that suggested originality in the choice of guests and program regulars may be expected. Besides the ability to communicate a sense of the immediate and unexpected, the trick of being a winning late-night TV host is to be a good listener. And Griffin listens, believe me.”

Kay Gardella, New York Daily News

“Griffin gives the distinct impression that he enjoys his work and that is half the battle. He is an ideal host because he doesn’t allow his intellectual experience to get in the way of any wisdom his guests offer. The other half of the battle is the individual quality of the program’s guests. Griffin is fortunate to have one of the best talent men in the business . . . and the opening two programs were overflowing with people who were interesting as human beings as well as capable performers.”

Terrence O’Flaherty, San Francisco Chronicle

“Anyone who found the daytime Merv Griffin of two years ago a winning personality, a pleasant, decent non-show-business type, and a sympathetic listener to interesting guests—as this viewer did—will find the late-night Merv Griffin no different.”

John Horn, New York Herald Tribune

“It was also a fine debut thanks to Merv’s easy manner with star guests.”

Jerrie Atkin, Gary Indiana Post Tribune

“As for the star himself, Griffin is pleasant and unassuming, handles his guests with ease.”

Hank Grant, Hollywood Reporter

“Whatever a ten strike is, the Westinghouse Broadcasting Company scored precisely that with its extremely well advised acquisition of Merv Griffin. It took the personably quick-witted Griffin exactly 90 minutes to prove this happy point. . . . Merv moved into TV’s late evening arena with a sparkling Channel 4 premiere which was far more enjoyable than many a prime time program.”

The word is in—from Coast to Coast
Will Senate restore cut?

FCC officials appear before appropriations group to get more money

Whether the Senate will restore House cuts in the FCC budget remains to be seen after hearings before the Senate Appropriations Subcommittee on Independent Offices last week. But one thing was crystal clear: The commission's "open records" rule is very unpopular.

Subcommittee members expressed a lively interest in community antenna television and the financial difficulties of educational television, as FCC Chairman E. William Henry, Commissioner Kenneth A. Cox, and members of the staff pleaded for restoration of $594,000 the House trimmed from the $174,000,000 requested by President Johnson (Broadcasting, May 10).

Mr. Henry called communications "probably the most dynamic regulated industry there is" as he attempted to justify an FCC request for 52 new staff positions. He cited the need to regulate CATV; the growth of UHF TV, AM and FM radio, and expansion by the common carriers as pressures to expand his agency. He added that the new data-processing computer had already helped to reduce the agency backlog, chiefly in the safety and special radio service, but would not be in full service until the end of a 10-year phasing-in period.

There are 182 applications pending for CATV systems, and about 1,300 systems of both microwave and wire types now in service, he said, and "I think there is a consensus in the industry and in government, including Congress and the commission, that some form of regulation for the entire CATV industry is both necessary and desirable."

Other Fields • Besides the need to regulate CATV, he continued, Zenith has petitioned for a pay-TV system, raising regulatory questions in another new field, UHF TV has continued to grow (to 135 operating stations and 105 pending applications as of March), and AM and FM radio "continues to grow at a much faster rate than we had expected" (in fiscal 1965, the commission received 400 applications for new AM's; had expected to receive 225).

Because of these factors, Mr. Henry said, "perhaps our greatest need, and we think our best justification for the very small amount of increased personnel that we are asking for, lies in the broadcasting area." The Broadcast Bureau would get 13 new people—four of them in the research and education division and the rest mostly clerical positions for processing applications.

"Present backlogs," he said, "are probably the lowest that we have had . . . in a good many years," but more people are needed to prevent them from building up, even though the institution of license fees has tended to deter "frivolous" applications.

Senator Warren G. Magnuson (D-Wash.), subcommittee chairman, and Gordon Allott (R-Colo.) expressed some constituent dissatisfaction with the "open records" rule (in effect May 14), which requires broadcasters to keep available for public inspection local duplicates of information required by the commission.

Mr. Henry implied that the measure was necessary to make the broadcaster connected with it, but simply because in 1926, I believe, or '27, these stations were opening up all over the country and we were entering a national fiasco.

"I cannot see how this is either in conformity with the original spirit of your act, and I cannot see how it serves any useful purpose."

Mr. Henry explained that broadcasters were only being required to keep locally that which is on file in Washington. "It does not allow the public to go into the books and records of the station with a blank check," he said. He compared the local records to local record-keeping at a county courthouse.

Senator Allott urged the FCC to "look into this matter, and review it. . . . To me you are placing upon the local stations an obligation that is not rightfully theirs."

Mr. Henry said that while the rule had been made final a petition to reconsider it was pending.

Senators Magnuson and Allott wondered why CATV systems were being proposed for large cities like Philadelphia.

"We are not sure that we know the answer," Mr. Henry replied. He said it was probably to bring in additional program services from independents in other cities. He added that the commission was afraid that under such circumstances a CATV system would kill off some of the weaker local stations (especially UHF's), leaving those unable to pay for the cable with diminished service. Everyone agreed the problem was not so great in sparsely populated areas.

CATV Growth • Senator Magnuson suggested that CATV absentee ownership bears investigation. He said the trend toward multiple CATV ownership could create a "monopoly field."

Turning to AM radio, Senator Magnuson inquired if every section of the country was "pretty well blanketed" by now. Mr. Henry said such was the case in the daytime, but millions were still without service in the "white" areas at night.

"I don't suppose you will ever reach a saturation point," said Senator Magnuson. "We don't seem to," Mr. Henry replied. "The rules themselves were tightened up in probably the biggest [go] slow signal the industry has received in a good many years."

Subcommittee members asked about the growth and health of educational television. Mr. Henry said a new UHF allocations table, with even more ETV frequencies, was forthcoming. Senator Magnuson said it was his hope that once ETV's had been on the air for a while, their communities would not allow them to "go down the drain" if they experienced financial difficulties. Mr. Henry said some stations had re-
Jim W. Cooper, Director of Engineering at WFAA-TV, Dallas-Fort Worth, came to the recent NAB Convention in Washington to make a decision.

WFAA-TV wanted the finest 4-V color film camera available. Jim had carefully compared all the available data on the two competing cameras. The final, deciding item on his check list was to be his own personal evaluation of picture quality.

He had his own resolution chart slide put up first in the competing unit, then in the General Electric 4-V. Immediately he saw the difference. G-E 4-V picture quality won Jim Cooper's unqualified vote — and the WFAA-TV order.

Two G-E 4-V's will be installed at WFAA-TV this summer. This is the kind of customer acceptance that will put more than 100 G-E 4-V's on the air by autumn. No other manufacturer can even approach this record of field-proven performance and market approval. For details on broadcasting's most-accepted 4-V color film camera — the G-E PE-24 — contact your G-E Broadcast Equipment Representative, or: General Electric Company, Visual Communications Products, #7-315, Electronics Park, Syracuse, N.Y. 13201. (Phone AC 315, 456-2105).

mained on the air that way, but that "nickles and dimes" from the community could not support programing equal to what people have become used to on the commercial stations. He feared for the survival of the educational stations when the Ford Foundation stops supporting National Educational Television, ETV's prime program source.

The commission presently has 1,565 authorized staff. The increases it requests would bring the number to 1,650.

Another CATV to revise financial projection

New Haven TV Cable Co., second of 22 applicants for community antenna TV franchises to be cross-examined during hearings conducted by the Connecticut Public Utilities Commission, became the second to decide to file a revised financial projection as hearings resumed last Monday (May 17) in Hartford.

Under questioning, Charles Andrews, controller of Triangle Publications, which owns New Haven TV Cable, acknowledged that figures in the original financial statement indicated a 100% return on investment after seven years.

Two years ago, one of the PUC members interpreted a similar statement filed by Waterbury Community (controlled by Jerrold Electronics), as reflecting a 400% return after eight years.

The intention to file a revised statement was made after PUC counsel asked Mr. Andrews if his company was willing to rest its case on the figures submitted.

Howard W. Maschmeier, general manager of Triangle's WNKC-TV New Haven and an official of the TV cable company, stated that his company is entering the CATV field "to provide a needed service and, hopefully, to make money" but not to protect WNHC-TV from competition brought about by CATV bringing other TV signals into the area.

Hearings will resume with more testimony from Triangle witnesses today (May 24).

The Connecticut House of Representatives meanwhile, passed two bills strengthening PUC control over CATV.

House bill 3860, which amends the general statute to define CATV as a public service company, was approved Wednesday (May 19). The next day house bill 4849, which would impose a 6% gross earnings tax on CATV, similar to that imposed on public utilities, was passed. Both actions were by voice vote without debate.

The state senate is slated to consider both measures this week.

Sale of translators to CATV approved

The FCC authorized the common ownership of television translators and a community antenna television system in the same area last week. But it made clear the action, involving a sale, does not set a precedent for approval of all such sales.

At issue was an application to assign the licenses of five UHF translator stations in Billerica from Ray R. and Donald R. Wygal to TV Pix Inc., which operates a CATV in the same area.

The commission, in a letter to TV Pix, said it was approving the application because of special circumstances. The Wygals reported they were unable to maintain dependable service and, because of lack of funds, might have to cease operation.

The commission also noted that TV Pix had recognized the "urgency" of maintaining translator service to provide area residents with multiple-TV service and promised to keep the translators in good repair.

The commission said it placed reliance on TV Pix's promise to operate the translators as a separate operating division and to continue the same service the Wygals had provided.

The purchase price of the translators was $49,895 plus $5,000 a year for 6 years to the Wygals for not competing in the area and the employment of Donald R. and Kenneth E. Wygal as consultants for two years at $3,000 a year.

More objections to local file rule

Broadcaster objections to the FCC's new local-inspection rule continue to accumulate at the FCC.

The Missouri Broadcasters Association filed a resolution urging reconsideration of the rule, which requires stations to keep a local file of most of the reports and applications submitted to the commission in Washington.

The rule "serves as an open invitation to crank, crackpots, competitors and curiosity seekers," the resolution said.

Five stations expressed their opposition, then proposed a six-month suspension of the rule, which went into effect May 14, to permit a pilot study in various size markets to determine how "burdensome" it is.

At a minimum, they said, the commission should modify the rule in two respects: Excuse existing stations from making public the financial portion of license-renewal applications and permit stations to limit days during which records can be inspected to one-a-week.

Stations making the proposals were WCUE Cuyahoga Falls and WCUF(FM) Akron, both Ohio; KWKW Pasadena, Calif.; WCAT Orange, Mass., and WSJF-FM Winston-Salem, N. C.

Opposition was also expressed by three Texas stations, KSEA Nacogdoches, KFDD Amarillo and KHYF-FM-AM-FM-TV Austin.

Pa. meeting discusses everything under sun

A series of panels on radio sales ideas, the future of television, audience promotion, AM-FM programing and news access, and presentation of an award to Lowell Thomas highlighted the annual meeting of the Pennsylvania Association of Broadcasters at State College, last week.

Mr. Thomas was given the Keystone award for his "long-time contributions to the broadcast profession" by outgoing PAB president, Cary Simpson.

Ted Pierce, west Easton, won the best sales idea trophy for his Auction Money plan which drew 10,000 people to an auction using station-provided money to bid. The presentation was made at the radio sales idea panel which was a "how to do it" session offered by seven broadcasters.

The future of television panel touched on community antenna television, color and the need for more local programing. CATV was seen as a part of the broadcasting industry that means more competition for TV stations. Frank X. Totty, WPX(TV) New York, noted his station is carried on many northeastern CATV's but that it has had little effect on the station and wex isn't selling CATV as additional coverage.

Speaking on audience promotion, Casey Cohlma, WFAA-AM-FM-TV Dallas, urged broadcasters to plan a consistent campaign and stick with it. He said management should not get tired of a print campaign and stop before the readers have a chance to see it. Using the broadcaster's own medium and using it effectively was urged by Gene Goldt, KYW-TV Cleveland.

Hearing set on FCC bills

The Senate Commerce Committee will hold hearings June 23-24 on a package of six bills designed to fulfill legislative requests made by the FCC. The bills deal with: painting, illumination and dismantlement of radio towers; devices which may cause harm-
WFGA-TV won 10 important television news awards this spring.

1. **Sigma Delta Chi Distinguished Service Award** for Television Reporting.
2. **National Headliners Medal** for Consistently Outstanding Local TV Coverage of News Events.
3. **Green Eyeshade Award** for Outstanding Performance in News, Editorial, and Pictorial Journalism (Southeastern Region) Presented by Atlanta Chapter, Sigma Delta Chi (Bob Henry, recipient).
4. **Florida Sportscaster of the Year** (Walt Dunbar, recipient) selected by Sportswriters and Sportscasters Association.
7. **First Place, Sports Category**, selected by Florida Associated Press Broadcasters Association.
8. **First Place, Editorials Category**, selected by Florida Associated Press Broadcasters Association.
9. **First Place, Documentaries Category**, selected by Florida Associated Press Broadcasters Association.
10. **First Place, Features Category**, selected by Florida Associated Press Broadcasters Association.

If there was an award for giving away color, we’d win that, too.

We’re mighty proud to have won these awards. And we’re proud of the fact that we’re the Southeast’s most colorful station! A great combination! See your Peters, Griffin, Woodward “Colonel” for details.
FCC sets policy for criteria in comparative hearings

The FCC has given tentative approval to a policy statement designed to clarify and provide for consistency in the commission's decision-making process in comparative hearings.

The statement, which contains a review of the criteria to be used in deciding cases and the weight to be accorded each, places major stress on diversification of control of mass media and station operation by owners. Program proposals are downgraded (CLOSED CIRCUIT, May 17). It is intended as a guide for hearing examiners and the review board which has the responsibility for initial review of examiner's decisions.

The commission expressed approval of the document by a 5 to 1 vote Wednesday (May 19), with Commissioner Rosel H. Hyde dissenting and Commissioner Robert E. Lee participating. A final vote was held up pending editorial changes in the statement and the filing of the dissent by Commissioner Hyde and a concurring statement by Commissioner Robert E. Lee.

In according major weight to diversification of control of mass media, the statement reportedly notes that such diversity of ownership is "always a public good in a free society" and necessary in a system of government-licensed media.

Among the factors to be weighed, the statement says, are the extent of control of media, their location and size, and extent of their coverage.

The statement says integration of ownership and management is important to assure sensitivity to an area's needs and the programing to meet those needs.

The value of the integration factor is enhanced, the statement notes, if the owners are local residents. It adds that past participation in civic affairs will be regarded as important but that simple diversity of business interests won't be considered.

The statement minimizes the importance of program proposals—and though it reiterates the commission view that programing is the essence of the service provided—because such proposals are generally similar and often are changed once a grant is made.

As a result, the statement says, programing will not be included as an issue. Applicants who believe they can demonstrate major differences in programing can ask to have an issue added. However, the statement reiterates the commission's adherence to its 1960 program policy statement requiring licensees to seek out and meet community needs.

The statement also provides that: A past broadcast record will be disregarded unless it is extraordinarily good or bad and will provide some clue of unusual performance in the future.

Efficient use of frequency will be considered important. For instance, an applicant proposing to serve an area having no other service would be preferred over one seeking a frequency to add a 10th service to a community.

Character qualifications will not be considered unless added as an issue on petition of an applicant. The aim is not only to avoid stretching out a hearing but to avoid situations in which applicants seek out their opponents' "minor blemishes."

The statement says that issues covering other matters can be added on petition, but only when applicants can demonstrate their importance to the ultimate decision.

ful interference to radio reception; filing of schedules of charges by connecting carriers; notice to the secretary of defense of the filing of certain applications in the common-carrier service; conflict-of-interest (BROADCASTING, May 17), and the International Convention for the Safety of Life at Sea.

NAEB shaping plan to link U. S. schools

A plan to interconnect the nation's colleges and universities for a variety of purposes, including the establishment of educational broadcasting networks, is in the design stage.

The plan, Educational Communications System, is being undertaken within the National Association of Educational Broadcasters under a contract with the U. S. Office of Education.

The first phase was an examination of the state of institutional cooperation and interconnection, while the second phase was an interview with representatives of about 50 colleges and universities to learn views on the project.

The third phase which consists of the design of three model systems is currently underway with the aid of a $145,000 grant from the Office of Education which also financed the first two phases. This segment consists of the selection of design systems emphasizing intra-state and regional cooperation, and the use of such resources as cultural and research institutions.

The ECS network would be used for such purposes as educational broadcasting, cooperative library activities, administrative data processing, mutual computer use and course development in university extension work making use of radio and TV techniques.

Rogers says CATV is legitimate—but

Community antenna television is a "legitimate and in many areas a necessary extension of American broadcasting service," Lawrence H. (Bud) Rogers II, president of Taft Broadcasting Co., told the Broadcast Advertising Club of Chicago.

But he warned that failure to control CATV as proposed by the FCC will "endanger the continued existence of a truly nationwide, competitive system of local radio and television stations as contemplated and prescribed by Congress for more than a generation."

He felt CATV, using free broadcast program product without restriction or remuneration for broadcasters, would result in a pay-as-you-see system. He said both Congress and the FCC have power to regulate CATV.

Media reports . . .

Vacation time • The FCC last week said it will not schedule hearings or oral arguments during its so-called vacation month of August. It added that the required monthly meeting will be held Aug. 1. Different commissioners will be on hand during the FCC vacation month to handle emergency matters and expedite routine business, the commission said.

New studios • L. B. Wilson Inc. (licensee of WBBW-TV, Miami) has signed an option to purchase one- and-one-half acres of property for its new studios. The two-story building, with 30,000 square feet of floor space, will house more than $750,000 worth of TV equipment.
GOOD NEIGHBOR

Community leader. Independent merchant. This General Motors dealer is both.

He's a good neighbor in many ways. Such as providing automobiles for driver training classes or making his facilities available for civic meetings. He's active in community affairs, youth activities and other worthwhile projects. More than likely, he's a church member, club member, participant—the kind of man you'd like to have living next door.

His business is service . . . and he knows his business. He wins customers by selling good products. He keeps customers by servicing those products. Customer good will is his primary asset. He earns it by his continuing efforts to make owning a General Motors car a truly satisfying experience.

He's a good man to know.

General Motors Is People...

making better things for you
Short renewals in Mississippi

WLBT-TV and WJDX-AM-FM get one-year licenses
for violating FCC's fairness doctrine and
ignoring programing needs of Negro audience

The FCC's fairness doctrine and programing policies intersected with the civil rights issue last week. The result was FCC-imposed sanctions in the form of one-year license renewals, for three Jackson, Miss., stations.

Warnings, along with full three-year license renewals, were issued to five other outlets in the state.

The short-term renewals were given WLBT-TV and its affiliated station, WJDX-AM-FM. They had been accused of violating the fairness doctrine in connection with the civil rights issue and of ignoring the programing needs of the large Negro audience in the Jackson area.

The renewals, in turn, were conditioned on the stations' ceasing "discriminatory programing patterns," abiding by the fairness doctrine and conferring with community leaders, including Negroes, on whether the programing is meeting the area's needs.

The television station is owned by Lamar Life Broadcasting Co., the radio outlets by Lamar Life Insurance Co., but there is an interlocking ownership and management.

The same charges leveled at the Lamar stations had been directed at WJTV(TV) Jackson. But that station and its affiliate WSLI, were granted full-term renewals on the ground that the licensee, Capitol Broadcasting Co., had already taken steps to meet the complaints. The commission stressed that it was relying on Capitol's assurance that the programing constitutes a continuing pattern of operation designed to meet the area's needs.

The commission said it is renewing the licenses of WCRBAM-TV Columbus and WRCB Jackson on the basis of their assurances regarding adherence to the fairness doctrine in the future.

The case, the most delicate the commission has faced in the civil rights field, was described by officials as the first in which the commission had imposed sanctions for violations of the 16-year-old fairness doctrine.

The vote was 4 to 2, with Commissioners Rosel H. Hyde, Lee Loevinger, Robert T. Bartley and Robert E. Lee in the majority, and Chairman E. William Henry and Commissioner Kenneth A. Cox dissenting. They urged a hearing on the renewal application of WLBT-TV. Commissioner James J. Wadsworth did not participate.

The operations of all eight stations were originally looked into following the riots that attended the desegregation of the University of Mississippi by Negro James Meredith in the fall of 1962. The stations were accused then of presenting only the pro-segregationist point of view.

Later the United Church of Christ petitioned the commission to set the license renewal applications of WLBT-TV and WJTV for hearing.

The Mississippi AFL-CIO also asked the commission for a hearing on the WLBT-TV license renewal application. The union claimed the station's programing was unfairly and heavily weighted in opposition to organized labor. The commission, however, held it raised no substantial questions of fact.

Dr. Everett C. Parker, director of the office of communication of the United Church of Christ, said he was gratified that the commission has "acted to stop the practices of WJTV and WLBT of discriminating against the Negro population . . . ."

He expressed disappointment, however, that the commission decided against a hearing "even though the commission seems to have accepted the validity of our evidence . . . ."

The commission staff had recommended that the Lamar stations' applications be set for hearing on a number of issues, including fairness, but that the license renewals of the other stations be granted (Broadcasting, Feb. 22).

WLBT-TV was regarded as the most serious violator of the fairness doctrine, with complaints about the station dating back to 1955. The station was granted a license renewal in 1958 after assuring the commission that all points of view would be presented on local programs dealing with controversial issues.

Chairman Henry, in a dissent in which Commissioner Cox joined, said that a hearing should be held on the "serious allegations" contained in the petitions and that the commission's refusal to order one constitutes "a clear abuse of discretion."

He said the case represents "the first commission consideration of a possible long continuing pattern, over two or more license periods, of failure to comply with the fairness doctrine."

He also said the case "is important because it involves the integrity of the public interest standard and the commission's renewal processes." He said the Communications Act enjoins the
The WWJ Stations have earned the esteem of their community. For many reasons: Special emphasis on local affairs and news. A knowledgeable approach to total programming. A sincere devotion to community service. An affiliation with NBC dating back 39 years. And home ownership by The Detroit News.

Because of this esteem, the WWJ Stations provide advertisers with a more receptive atmosphere for their sales messages. Consistent results through the years have proved that the way to squeeze the most out of a Detroit Minute is to spend it on the WWJ Stations. Whether you sell polish or peaches.
Ambidextrous Dr. McIntire blasts FCC

The Rev. Dr. Carl McIntire moved into Washington last week with one hand clenched in a fist and the other extended palm upward.

The clenched fist was shaken at the FCC, whose fairness doctrine, Dr. McIntire says, is a tool being used by those who would suppress the conservative viewpoint and pave the way for a socialist takeover.

The extended hand was for funds he is seeking to acquire time on a total of 1,000 radio stations for his daily half-hour program Twenty-fifth Century Reformation Hour, which is now on some 600 outlets.

The fundamentalist preacher of Collingswood, N. J., spoke before an audience estimated by police at 1,200 to 1,500 in Washington's Constitution Hall. The rally was originally scheduled as part of Dr. McIntire's campaign to raise $1 million. Later, it was decided to use the rally as a forum for denouncing the FCC and its fairness doctrine.

**Two Functions** - It served both purposes. Dr. McIntire collected $4,230 after he mixed spiritual uplift and political passion into a rhetorical brew that delighted his listeners. At one point he said the fairness doctrine violates the broadcasters' freedom of speech and restricts the broadcast remarks of clergymen.

The fairness doctrine, he indicated, is a hindrance in the fight to preserve freedom. Since it requires broadcasters who present one side of a controversy to air all sides, it discourages them from engaging in controversy at all, he said. They prefer to give the FCC a "wide berth," he said.

But the main effect, said Dr. McIntire, who feels most complaints are filed by liberals, is to keep "right wingers" off the air.

**Point Is Obvious** - "Could anything be more transparent?" he asked, adding that there are those "who are trying to take over the country for socialism—who want to sweep the people off their feet...before we can get to them with an understanding of what they're doing."

That, he said, is why he's interested in 1,000 radio stations. "There is still enough money in the hands of people to change things," he said. "We've got to stop the businessmen from supporting socialist preachers."

Dr. McIntire presented what he regarded as proof of his thesis in the person of the Rev. Mr. Ronald Hoeltz, of Aberdeen, Md., who said his two Sunday programs on WAMD Aberdeen had been dropped by the station because of a complaint filed by the National Association for the Advancement of Colored People.

The complaint, submitted to the FCC, was directed at a program on which Mr. Hoeltz read from the Congressional Record the remarks of Representative William L. Dickinson (R-Ala.) concerning alleged immorality on the part of the civil rights workers during the Selma to Montgomery march.

John Allen, owner of WAMD, refused to comment on Mr. Hoeltz's statement.

**Asks Repeal** - Dr. McIntire, as he has in the past, called for repeal of the fairness doctrine, and recommended permanent licenses for broadcasters to free them from government harassment. He urged his listeners to petition Congress and the President for an investigation of "unauthorized or unconstitutional" practices of the FCC.

Dr. McIntire's views on the fairness doctrine, as well as his long-standing opposition to the National Council of Churches and civil rights groups sparked considerable opposition when the Faith Theological Seminary, which he heads, sought to acquire WXUR-AM-FM Media, Pa. The FCC, however, approved the transfer in March (Broadcasting, March 22).

Despite his opposition to the fairness doctrine, Dr. McIntire frequently invites those whom he attacks to appear on his program with him. But his invitations are always ignored. "The problem is," he told his audience last week, "we can't get people to debate."

FCC Chairman E. William Henry declined an invitation to attend the rally. And although all members of Congress were notified of it, only Senator Strom Thurmond (R-S.C.), the former Democrat who switched parties to support Barry Goldwater in 1964, appeared. He was given a standing ovation.

commission from granting renewal without showing the public interest will be served.

But in the WLBT-TV case, he said, the commission has decided to renew a license without answering a number of questions bearing on the public interest judgment.

One factor weighing against a hearing, in the minds of some commissioners, was the feeling that such a proceeding, which would be held in Jackson, would inflame the racial issue there and make progress in civil rights all the more difficult.

There was a hint of this in the commission order, which said: "This particular area is entering a critical period in race relations, and...the broadcast stations, such as here involved, can make a most worthwhile contribution to the resolutions of the problems arising in this respect."

The commission inquiry probed a number of the station's programs, including editorials dealing with James Meredith's enrollment at the University of Mississippi, a series of spot announcements declaring that "Communists are behind the racial agitation" and a broadcast accusing a nearby Negro college of being Communist-infiltrated. These programs, the commission concluded, raised a "serious question concerning the station's compliance with the fairness doctrine."

The United Church of Christ petition, the commission said, raised a serious question as to whether the station had abided by the commission's 1960 policy statement calling on licensees to consult with community leaders and to meet the programming needs of the station's community.

The commission laid down four conditions for WLBT-TV to meet in connection with the one-year renewal grant: Comply strictly with the fairness doctrine, observe its representations to the commission—namely that it will present all sides of a controversial issue in local programming, confer with community leaders (including Negro civil rights leaders) on whether the station's programming is meeting the area's needs,
New radio, how to improve it

Frank discussions at first of NAB program clinics
give broadcasters ideas on improving their formats

They came. They listened. They learned. They were satisfied.

That was the general reaction after the first of the National Association of Broadcasters' radio program clinics in Atlanta, Monday and Tuesday (May 17-18).

At the outset, Sherril Taylor, NAB vice president for radio, said: "Radio is flexing its muscles as never before. There is an upbeat feeling all over the country." This feeling about radio permeated the day-and-a-half session as broadcasters from 13 states heard other radio men talk about successful programing.

None of the 103 owners, managers and program directors at the session seemed concerned about his particular format. What all were interested in learning was how to use new concepts in making their station the community leader. This theme was expressed by Elmo Ellis, general manager of WSB Atlanta, in his talk on programing a middle-of-the-road station. He said he wanted to discuss "the station that is not mediocre nor predictably in the middle, but out in front, exercising and dominating the local broadcasting community."

Continually heard from the delegates to the clinic was the view that the Atlanta session was a vast improvement over any of the pilot clinics NAB held last year.

Whether they programed hard rock, good music, middle-of-the-road or talk, the audience seemed to be interested in three main areas: How can talk programs be applied to their markets and formats? What is the best kind of on-air promotion and how can contests be used to best advantage? What is the best plan for music control?

The Questions • These were the questions that were repeatedly asked.

The general consensus in music control is that it should rest in management's hands. In some cases there was feeling that the disk jockeys could set up their own shows based on a master playlist, but it was felt even this could change the image management wanted to set. Basically it came to management setting the image for the station rather than building up a DJ.

Grady Edney, vice president of radio programing, Storer Broadcasting Co., Miami, led off the Atlanta speaker list with "How to Program a Modern Music Station." He called modern music programing a "tough game" and a "moment-by-moment battle" when two or three stations are involved in it.

However, he said, success, "number one or very close number two," can be achieved. He cited four major ingredients needed for success: music, personality, production and promotion.

Mr. Edney said the general manager, if he has a good knowledge and feel for music, should be the backstop of the music playlist. He said it is important that old records be pulled to keep the playlist current, but it is equally important to be wary of the hot list that puts new records on and takes them off before the audience really has a chance to hear them. He listed as the top station priority the playing of as many records as possible. He also felt a tight list, about 50 tunes, is more effective than an expanded playlist of about 100.

Mr. Edney stressed the importance of good disk jockeys since "the audience can tell the good from the bad." The DJ's, he said, should be a part of station policy, and if they are creative they should be given some freedom on the air with their music, production and personalities.

Fickle Audience • Production is vital, Mr. Edney pointed out, because "the audience is fickle." While a record is on, he said, stations are the same. But when the record ends, then production and disk jockeys "spell the difference" of which station gets the listeners.

He said good jingles can help a station's production and that almost any station can afford a good jingle package today.

Promotion and programing, the Storer executive said, "are inseparable in a modern music station." He said contests were made for radio and the DJ's should be included in contest idea sessions. He reminded his audience to look at their cities for promotion ideas. "There is usually something about a city that lends itself to your logo. You can't go wrong in tying the station to the community."

 Asked the promotion news plays in a music's music format, Mr. Edney said good news should be on every good modern music station, but he didn't consider it a factor in the ratings. "You can do it with whistles or bells, or hit it serious," he said, "but it's still not a factor."

The Secret • The secret of being "All

and to cease discriminatory programing.

Lamar Life, in a pleading filed with the commission last month, asked approval of an exercise of an option it has to acquire all of the common stock of the insurance company. The insurance company said that with direct control it would see that all commission policies and directives are obeyed.

The commission said it could not consider a transfer until an application was filed. But it noted that it might "look with favor" upon the exercise of the option.

The insurance company, which originally created Lamar Life Broadcasting as a subsidiary in 1953, could buy the stock under the option agreement for $10,000. (Broadcasting, Feb. 22).
Participants in the National Association of Broadcasters radio program clinics at the first clinic in Atlanta last week. (L-r): Sherrill Taylor, NAB; Elmo Ellis, WSB Atlanta; Grady Edney, Storer Broadcasting Co., Miami; Ross Charles, Hartwest Productions, New York; John Hurlbut, WWM Mount Carmel, Ill.; Frank Stewart, KTRH Houston, and Alvin King, NAB.

Things to All People in a Small Market is to “sell yourself and sell your station before you sell any time,” John Hurlbut, president of WWM Mount Carmel, Ill., told the broadcasters.

Mr. Hurlbut, in his live-slide-tape presentation, cited the role of WWM plays in community affairs as being its chief asset. Although eight or nine stations come into the city, he said, “we feel if we keep the station attuned to what folks are gossiping about, we'll be OK.”

Speaking on tape, the mayor of Mount Carmel told the clinic that live coverage of the city council sessions had been highly beneficial. The sessions are “more orderly . . . the public gets less information via the rumor mill . . . it cuts down on silly questions . . . we operate in the open and hide nothing. . . . The broadcasts have kept the administration close to the people.”

In his speech, Mr. Ellis noted that there is nothing conventional about radio broadcasting and said it is:
- A day-to-day public relations commitment.
- A sharing of ideas and emotions.
- A way for listeners and advertisers to communicate with each other in a satisfying manner.
- A considerable anticipation of help needed and a continuous sound of courteous help provided.

A station must establish and maintain a service that clearly tells the role it plays in its listener’s lives, Mr. Ellis said. This “must be a type of service that is wanted and needed,” he added.

In reply to questions on contests and promotions, Mr. Ellis said stations need “a certain amount of sensitivity about contests.” If they’re not being promoted enough to get proper exposure, they should be pushed. The proper point, he maintained is to make them “effective without being obnoxious.”

The talk program concept was covered by Frank Stewart, general manager of KTRH Houston, in “How to Program an Information Station.” He advised any broadcaster deciding to go to talk or news programing to “learn first from the pros who've already made the mistakes.”

He said there is a compulsion to be first and this is “suicidal.” Mr. Stewart pointed to total community involvement and finding customer benefits as the two goals a talk-information station should seek.

Of prime importance, he said, “is to learn to say no, from the beginning, to listeners, sponsors and agencies. crackpots, bores and repeaters, who try to monopolize some of the call-in shows.” The best types to handle panel or call-in type programs, he continued, are newsmen, sports directors or play-by-play announcers. The last thing a station needs, he remarked, are “Will Rogers types.”

Talk Advocate Speaking on “Information, Inspiration and Profits,” Ross Charles, Hartwest Productions, New York, said that talk programing which eventually will be “all-time prime time,” could only succeed on radio. Radio offers “the forum for this type of programing,” he said. “You don’t have to fill a column or a screen, only a mind.”

Mr. Charles said to produce talk programs successfully it is necessary to find how to program within station budgets and then get the personalities to do the shows. He maintained it takes a virtuoso to handle properly most talk programs and that such men are hard to find. As a result, he added, syndicated talk programing permits the small station to do the same job the major-market outlet does.

In New York, where the second clinic was held Thursday and Friday (May 20-21), John Barrett, station manager, KRLA Pasadena, Calif., said the success of a modern radio station hinges on its ability to reflect the community it serves through its music, news and area-oriented features and services. Mr. Barrett was the only new speaker at the New York sessions.

Two characteristics that typify the successful modern radio station, he said, are consistency and quality. He asserted that “consistency is the mystique the top 40 is and is achieved through a day-in, day-out format of regular programs, feature and jingle material.

To serve its listeners, Mr. Barrett continued, the music carried on the station is picked by them through four-day surveys each week of retail record outlets in the area. KRLA uses station personalities, who are promoted extensively on the station, and are encouraged to become involved in community activities, including participation in local sports events.

At each of the clinics, Alvin M. King, director of NAB state association liaison, is presenting live-slide-tape capsules of seven successful programing ideas.

The themes range from a bird-watchers club on WBB Baltimore to a satirical advice to the lovelorn-type program on WWM; from a dramatized American Heritage series on KFWB Los Angeles to a round-robin high school band...
AMPEX ANNOUNCES THE REVOLUTIONARY ANSWER:

NOW FOR THE CONTROVERSIAL QUESTION:

How do you solve playback quality problems caused by the transfer of electrical transcriptions to other media, particularly tape cartridge recording systems?
AN ENTIRELY NEW CONCEPT IN RECORDING/REPRODUCING

Ampex took a fresh look at one of the industry's most serious problems. Result: an entirely new solution, the CUE-MATIC. Now you can get first-play quality, absolute reliability and handling ease in a compact recording/reproducing unit. And the CUE-MATIC system offers extraordinary economy.

The CUE-MATIC has been thoroughly field tested by advertising agencies, recording studios, networks and independent broadcasters. After months of vigorous use, all acclaimed the performance of the CUE-MATIC. Here's how CUE-MATIC works:

The CUE-MATIC system uses an 11¾-inch magnetic mat called a CUE-MAT* instead of tape cartridges for recording and reproducing sound. The CUE-MAT is easily inserted into a slot in the front of the machine. It is automatically centered and cued for recording or playback. The record/reproduce head is mounted on a carrier which moves in a straight line across the rotating CUE-MAT from the outer edge toward the center. Maximum playing time is 3 minutes and 45 seconds. This provides sufficient time for individual spot announcements, complete 45 rpm records, or excerpts from LP albums. Full stable speed is achieved in 0.1 second after start button is pushed. Indicator lights give visual confirmation of status. Another important feature is the automatic addition of an inaudible 30-cycle tone to the end of recording which releases the CUE-MAT on subsequent plays. It may also be used to start a second CUE-MATIC, or other equipment, or re-cue the same CUE-MAT. A final note: the new CUE-MATIC features all solid state electronics.

Why you need CUE-MATIC:
The CUE-MATIC system guarantees first-play quality broadcast reproduction for your advertisers. The ten-thousandth play is as good as the first. There is absolutely no loss of quality from electrical transcription to CUE-MAT. The CUE-MATIC is reliable. This reliability created tremendous enthusiasm among the many people who field-tested the system. There
are no worries about missed cues or other malfunctions which have triggered industry complaints about the cartridge system. The CUE-MATIC is very easy to operate. Cueing is completely automatic and the unit is push-button operated. The CUE-MATIC offers economy. The mats cost less than $\frac{3}{4}$ the price of cartridges and are erasable and re-usable. They require less than $\frac{1}{10}$ the storage space too. This alone can save you up to 90% in storage and related costs. The CUE-MATIC system is in production now. To arrange a demonstration, or for an illustrated brochure, just send us the coupon. Term leasing and financing are available.
competition in stereo on WKBB(FM) Richmond, Ind.; from the use of girl traffic spotters in the WWOC Washington helicopter to trophies given to bowlers in South Bend, Ind., by a brewery sponsoring sports scores on WNDU, and to the three-hour nightly news block heard on WCAU Philadelphia.

The next sessions will be in New Orleans today and tomorrow (May 24-25), and Chicago Thursday and Friday (May 27-28).

McCue: NAB wants challenges to unions

A charge that the National Association of Broadcasters is urging member stations to "challenge the unions whenever they can," has been made by Claude McCue, executive secretary of the Los Angeles local of the American Federation of Television and Radio Artists.

The union executive made his allegation at a news conference called to explore what he termed a lack of coverage by Los Angeles newspapers and broadcast stations of the current strike against KPOL-AM-FM-TV Los Angeles. At the conference were representatives of the city's two metropolitan dailies and three of its radio stations, but there was no TV coverage. Commenting on the scarcity of broadcast reporters at the meeting, Mr. McCue said: "It is a further indication to me of an obvious move on the part of radio and television stations to suppress news vitally important to the general public.

"The fact that three strikes have occurred, all in the past four years, during the 25-year existence of AFTRA in Los Angeles, is an indication that this dispute could well have been inspired by the NAB, of which KPOL is a member, by urging its affiliates to challenge unions wherever and whenever possible.

Whether or not this was the prime incentive for Custer's (Fred Custer, president of KPOL) absurd demands, it is very apparent that he is trying to create precedents as a union buster in this area."

AFTRA's current strike is now in its eighth week, against KPOL-AM-FM-TV, a locally owned operation with no other broadcast interests. KPOL's radio operation was off the air for about an hour at the outset of the strike, largely because the station's technical employees walked out at the same time as the staff announcers in a joint strike action of the Los Angeles local of the International Brotherhood of Electrical Workers and AFTRA. Since then it has, operated without interruption and KPOL-TV, which was only a week old when the strike began, is now back in operation after a four-week hiatus.

Mr. McCue accused the KPOL management of attempting to force its employees to accept an open shop in place of the union shop on which AFTRA insists and to throw out the AFTRA welfare-and-pension plan and replace it with a company profit-sharing arrangement which has never been specifically defined.

AFTRA has been picketing several companies advertising on the stations. Mr. McCue said. Pickets have distributed leaflets outside the places of business of some 25 of the 200 advertisers using KPOL, he said, with the result that the station has lost 17 or 18 advertisers. (A KPOL spokesman called the figure "a considerable exaggeration.")

Last week the AFTRA local voted a 25% increase in dues for its 6,500 members to help defray strike costs. Mr. McCue said that the increase will enable the union to continue its strike activities for an indefinite period. Estimating the cost at $1,000 a day, Mr. McCue said that the amount to be raised will exceed $50,000 annually.

A lengthy meeting was held Wednesday evening between KPOL management, AFTRA and IBEW representatives. The meeting was described as not entirely fruitless and another meeting will be held shortly. A KPOL proposal that both the station and AFTRA drop their protests and allow all ballots in the recent National Labor Relations Board election to be counted was rejected by the union. A total of 14 ballots was cast, of which four were challenged by AFTRA and four by KPOL.

Stanton criticizes Comsat's Bird rules

Dr. Frank Stanton, CBS Inc. president, spanked the Communications Satellite Corp., for refusing to furnish the Early Bird satellite so CBS could bring the Kennedy dedication ceremonies at Runnymede, England, two weeks ago to American TV viewers.

The CBS president made his accusation in a speech in Washington last week to the annual awards dinner of the National Civil Service League, where he was introduced by former FCC Chairman Newton N. Minow.

CBS News, Dr. Stanton said, asked Comsat for the use of Early Bird to broadcast the ceremonies from England live. "But the decision was made by Comsat that Early Bird could not be made available to bring these dramatic events at Runnymede to the American people unless all three television networks requested it. As a result, you and I had to watch fragmentary film and tape reports on our television screens eight or more hours after the event and could not see the entire event for 13 hours. . . ." NBC, it was indicated, had declined to participate.

Comsat officials, who asked not to be identified, quickly retorted that Dr. Stanton's position is unfair. During this experimental period, it was decided that television would have unrestricted use of Early Bird on Mondays. Telephone and other services must use the satellite for testing and alignment purposes the other days of the week, they pointed out. Also, they noted, when Early Bird goes commercial each network will then make its own arrangements for circuits.

The substance of Dr. Stanton's speech was a warning against permitting Early Bird and space communications satellites generally to be placed under the control of self-serving governments.

When CBS broadcast its first Town Meeting of the World via Telstar II in 1963 the French government denied the use of its ground station to pick up Jean Monnet, father of the European Common Market, speaking from
Thank you **Mal Thompson** for letting us produce the Armstrong Excelon Tile "Journeyman" commercial which won the Clio for Best Videotape Production at the American Television Commercials Festival.

Thank you **Sy Frolick** for letting us produce the A-I Sauce "Pork Roast" commercial which was named the World's Best Videotape Commercial at this year's International Broadcasting Awards in Hollywood.

Thank you **Tom Ford** for letting us produce the Sweeta "Cookbook" commercial which won a Clio for Best Premium Offer at the American Television Commercials Festival.

Thank you **Lou Florence** for letting us produce the Top Brass "Tiger" commercial which was named a Finalist at the International Broadcasting Awards in Hollywood, and won Recognition at the American Television Commercials Festival.

Thank you **Bob Warner** for letting us produce the Prince Gardner "Registrar" commercial which won Recognition in two categories at the American Television Commercials Festival.

Thank you **Gerry Kreeger** for letting us produce the Thom McAn "Giant Shoe" commercial which won Recognition in two categories at the American Television Commercials Festival.

Thank you **Aaron Ehrlich** for letting us produce the Democratic National Committee "Convention" commercial which won Recognition at the American Television Commercials Festival.

Thank you **Brooks Clift** for letting us produce the 3M Oven Cleaner "Oven Liner" commercial which was named a Finalist at the International Broadcasting Awards in Hollywood.

Thank you **Murray Firestone** for letting us edit the Stella D'Oro "Rome" commercial which won Recognition at the American Television Commercials Festival.

Thanks again, **Mal Thompson** for letting us produce the Armstrong Ceiling Tile "Fred Gwynne" commercial which won Recognition at the American Television Commercials Festival.

Thanks again, **Sy Frolick** for letting us produce the A-I Sauce "Surprise Hamburger" commercial which won Recognition at the American Television Commercials Festival.

Thanks again, **Gerry Kreeger** for letting us produce the Thom McAn "Walkie Talkie" commercial which was named a Finalist at the International Broadcasting Awards in Hollywood.

And... thanks to the hundreds of creative agency people and advertisers who helped us make 1964 our busiest and best year ever.*
The press looks at FCC's plan

Many express misgivings about proposed reduction of network program control

Editorial reaction to the FCC's proposed limits on prime-time network TV programming is unfavorable by a 4-to-1 ratio, a cross-check of the press reveals.

Objections are divided roughly into two categories—the practical and the philosophical. Many writers condemned the quality of advertiser-controlled programs, which they foresaw as an inevitable result of lessened network control. This group also questioned the quality and availability of local programming to fill the gaps, and pointed to the number of excellent shows now possible only because of large network subsidies.

A smaller, but still sizeable, number maintained that government in general and the FCC in particular does not and should not have authority to meddle with TV programming.

Nobody seemed to have a kind word for the sponsor, who at best was damned with faint praise and at worst, just damned.

Representative of this viewpoint: "Giving more say to sponsors will only help lower the level of quality ..." Louis R. Cedrone, Baltimore Sun; "Comparable to setting the fox to watch over the chicken coop ...." Harriet Van Horne, New York World Telegram; "Shifting the responsibility to independent firms does not guarantee the programs will get any better ...." Washington Star; Sponsors "have consistently sacrificed program quality for sales impact ...." Louisville (Ky.) Courier Journal: "Will force revival of more locally produced, low budget, little-talent programs ...." St. Paul Dispatch; "We doubt that there are enough rich sponsors ...." Detroit News.

TELEVISION MAGAZINE said the FCC showed "an inability to foresee the secondary consequences that will inevitably follow ...." The Wall Street Journal called the proposal "another of those regulatory palliatives incapable of affecting underlying economic and cultural causes of the problem it tries to attack." Clearly an assumption of powers not intended for the FCC," commented the St. Louis Globe-Democrat.

Some Support • On the other side of the fence: "The half-and-half system might stir up some exciting competition among the program boys," Will Jones, Minneapolis Tribune; "One of the great dangers to the U. S. system of democracy is the growing and disproportionate power of two or three television networks ...." Middletown (Pa.) Press and Journal; "The individual station is under the network's thumb, and so are nearly all the creative people in television .... this in one time we think a government agency is right," Tulsa World.

Last March 22 the FCC published its proposal to limit networks to equity holdings in no more than 50% of non-news programming between 6 p.m and 11 p.m., or a weekly total of 14 hours. The networks would also be prohibited from engaging in domestic syndication and barred from foreign distribution of independently produced programs (BROADCASTING, March 29, et seq.).

Program notes ...

Comedy series • Bob Banner Associates and Felix Jackson, former NBC-TV vice president in charge of network production, will produce a pilot film for a projected half-hour comedy series, Marie. The series will be based on an original story by Mr. Jackson, and represents his first independent project since leaving NBC.

Ahoy! • The Department of the Navy has produced a half-hour program of patriotic music, covering the period from the Revolutionary War to World War II, for TV distribution. Entitled Red, White and Navy Blue, it is recommended for holiday use. Music is provided by the U. S. Navy Band Seanchants and the WAVES Chorus of Washington.

Governor & panel • KDKA-TV Pittsburgh and the Pennsylvania Association of Broadcasters have begun a series of programs featuring Governor William Scranton answering newsmen's questions. Conversation with the Governor, a 30-minute show began Sunday (May 23) and will be carried by seven TV stations the last Sunday of each month. The show is produced at KDKA-TV.

Kangaroo back • Bob Keeshan continues as Captain Kangaroo next season on CBS-TV, it was announced last week after an agreed settlement of a suit filed two months ago by Mitchell J. Hamilburg Agency against Mr. Keeshan and the network. As a result, Mr. Keeshan drops his role as Mister Mayor on Saturday mornings, and resumes a Monday through Saturday schedule as the veteran Captain Kangaroo (8-9 a.m.) series in the fall.

TV show flies

In what is believed to be the first sale of TV programming for in-flight showing on an airline, Triangle Program Sales reported last Thursday (May 20) that Continental Airlines, Los Angeles, has bought the This is America half-hour color series on U. S. fairs and festivals. Continental plans to show each episode of the series for two weeks, starting later this week. The series has been in syndication by Triangle for a year.

To the Sherman Brothers, Robert and Richard, winners of the Academy Award for the Best Musical Score and Best Song, “Chim Chim Cher-ee,” of 1964, composed for “Mary Poppins,” and to Wonderland Music Co., Inc., the publisher, supercalifragilistic applause from BMI and our affiliated writers, composers, and publishers.
Why Western Electric's level of prices

For more than 30 years, Western Electric has conducted a formalized program of engineering cost reduction. As many as 5,000 projects may be studied each year in a search for ways to contribute to the overall efficiency of the Bell System. To reduce costs, W.E. engineers have re-evaluated and redesigned products, changed manufacturing processes, and improved production techniques.

On these pages are shown highlights of one such study. It resulted in the saving of just two cents per telephone. But that meant a total saving of $100,000 a year.

And what has been the over-all result of efforts like this? Today the price level of the products Western Electric manufactures for the Bell telephone companies is 16% below the level of 15 years ago. This was accomplished despite a 36% boost in the cost of our raw materials and an 88% increase in wages.

The constant, intensive engineering efforts of Western Electric people to reduce the cost of products sold to the nationwide Bell telephone network exemplifies the goal of the Bell System. That is: to bring you the world's most dependable telephone service at a reasonable cost.

1. **Object: cost reduction.** In the typical case shown here the problem was to develop a new process for manufacturing plastic
is now 16% lower than in 1950

plungers used in telephone handset cradles. Cost had to be reduced without loss of product quality.

2. New process? Plungers had always been machined from plastic dowel stock. Could they be produced for less by injection molding? W.E. Engineers John Koh and Keith Weston were responsible for initial studies of rod stock.

3. Intensive research. Detailed evaluation of the proposed production techniques was first necessary. After the research study for the injection molding process was formulated, W.E. engineers gained management approval by presenting details of development cost and expected savings.

4. Prototype. Tool shop production of a prototype injection molding machine went into full gear once drawing board plans were accepted. Toolmaker Gilbert Carter and Engineer Koh developed early model of the machine.

5. Trial production. First runs of the new manufacturing process proved successful. The injection molding process was put into operation and another cost reduction effort bore fruit.

Western Electric
Mutual funds huddle with FCC

Henry tells them that less investment money in broadcasting might be a desirable effect.

The mutual funds and their holdings

The list submitted to the FCC of mutual funds in technical violation of the 1% rule, and the broadcast companies involved, follow. The compilation is as of Dec. 31, 1964.

Fidelity Management & Research Co.: Avco Corp., 1.15%; CBS Inc., 1.15; Metromedia Inc., 2.97; Stanley Warner Corp., 6.94; Storer Broadcasting Co., 1.69; Taft Broadcasting Co., 1.88.

Investors Diversified Services Inc.: Avco, 3.84; CBS, 3.44.

Keystone Co. of Boston: AB-PT, 2.5; Avco, 1.13; Capital Cities Broadcasting Corp., 5.9; Metromedia, 7.09; Taft, 3.32; Time Inc., 1.65.

North American Securities Co.: Scripps-Howard Broadcasting Co., 1.16; Storer, 1.58.

Putnam Management Co.: Capital Cities, 7.75; CBS, 1.57; Storer, 2.31.

Scudder, Stevens & Clark Co.: AB-PT, 1.17; Boston Herald Traveler Corp., 2.54.

Supervised Investors Services: AB-PT, 2.19; Capital Cities, 1.85, Taft, 2.14.

Waddell & Reed Inc.: AB-PT, 2.42; Avco, 3.21; CBS, 3.89; Crowell-Collier Publishing Co., 2.29; General Tire & Rubber Co., 2.08.

Seven broadcasting companies in which more than one mutual fund owns stock are:

CBS (6 funds) 16.23%; Capital Cities (3) 15.5%; Metromedia (2) 10.06%; AB-PT (5) 9.53%; Avco (4) 9.33%; Taft (3) 7.34%, and Storer (3) 5.58%.

As a result, the commission says that mutual funds and other investment companies owning 1% or more of two or more multiple owners are in violation of the ownership rules. These limit ownership to seven AM's, seven FM's, and seven TV's, provided no more than five are VHF's. The licensees involved are also in violation. And many of the companies are in violation also of the duopoly policy which prohibits one owner from having two stations in the same service in the same community.

Investment company representatives say all this is unfair and unrealistic since such companies do not attempt to exercise control. They contend they are "institutional" or "passive" investors.

Complicating the picture is the practice of banks and brokerage houses holding stock for clients who are the actual beneficial owners.

The conferees submitted data showing that 10 mutual funds and six trust companies and brokerage houses own or hold more than 1% of stock in two or more group owners. The largest violator of the 1% standard is the Merrill, Lynch, Pierce, Fenner & Smith brokerage house, which holds technical control of companies owning 94 AM's, 69 FM's and 95 TV's.

Proposed Solution = The commission's inquiry seeks information on how to deal with problems raised by the increasing flow of investment capital into broadcasting, and it has proposed a rule that would enable it to move — through cease and desist orders — against the stockholder who violates the 1% multiple-ownership rule. At present only the licensee is subject to commission action.

A question as to whether the stockholder is actually in violation and whether the commission would have authority to move against one was raised by Washington communications attorney J. Roger Wollenberg. He suggested as a "practical matter," that the commission seek additional authority from Congress.

But the conferees made a number of suggestions for dealing with the questions raised by the commission. The principal one was to create a new category of stockholder that would not be affected by the multiple-ownership rule until it acquired 10% of a widely held broadcasting company's stock. This group would include mutual funds and other investment companies that do not seek to exercise control over the companies in which they invest.

The conferees suggested coupling with this a requirement that licensees...
determine, and report to the commission, when a so-called passive investor shows signs of seeking to assert control. Such a stockholder could then be required to abide by the 1% standard.

Other Suggestions - They also suggested that licensees, rather than the financial companies holding stock, be required to inform the commission of all 1% or more owners. In cases where a brokerage house is forbidden by law to disclose the name of a client-owner of broadcast stock, they said, the commission should be empowered to require disclosure.

In addition, they said that an investor should not be considered "a significant person" under the multiple-ownership rule unless he has ultimate legal power to vote the stock. This would exempt brokerage houses, for example.

Commissioner Lee Loewinger expressed doubt about the proposed 10% ceilings noting that 10 mutual funds could own a broadcasting company and yet not be responsible for its operation. "Do you think that the commission should operate on the premise that ownership and control in modern economic life are... untransferable qualities?"

Washington communications attorney W. Theodore Pierson said the concept that ownership of a share of stock affords some control no longer applies. If the commission is concerned about avoiding a concentration of control over the communications media, he said, it should "go to the reality of the situation" and not "accept fictions about who controls."

Mr. Pierson arranged the conference as a means of informing the commission on how the money market works and on how stock is voted by investment companies (BROADCASTING, Feb. 1).

Appeals court reverses WRVA-TV tax decision

WRVA-TV Richmond, Va., was told last week by a federal appeals court that money it spent in training personnel before it got its grant from the FCC cannot be charged to expenses. A Fourth Circuit Court of Appeals panel said the company couldn't claim the expenses since they were expended before the company was legally formed.

WRVA-TV is suing to recover $53,000 it claims was spent in training about 30 prospective employees before it received its grant in 1955. After the Internal Revenue Service disallowed this deduction, WRVA-TV sued to recover in U. S. District Court in Richmond. It won a jury verdict last year. The appeal was taken by the government.

All was smiles at AB-PT meet

Stockholders support management proposals; Moore, Clark join board

Stockholders gave American Broadcasting-Paramount Theaters a clapping vote of confidence last week and overwhelmingly supported all of management's proposals, including one to change the name of the corporation to American Broadcasting Companies Inc. The name change becomes effective July 2.

President Leonard Goldenson predicted "another record year in 1965" on the heels of record profits achieved in 1964.

Mr. Goldenson said ABC firmly believes its proposed "domestic satellite" plan (BROADCASTING, May 17) using a vehicle similar to Early Bird, is entirely practical from a technical standpoint. He indicated that in its first year of operation alone, such a system could save the network close to $6 million.

This figure is the difference between the $15 million per year which ABC currently pays for network land lines, and approximately $9 million which it would cost to launch the satellite. This would not include the expense of ground station transmitting facilities, he explained, whose operating control the FCC has put in the hands of the Communications Satellite Corp. Mr. Goldenson said he did not think ABC could operate the system without Comsat's cooperation. ABC officials met with Comsat representatives in New York last week to discuss the project (see page 87).

One shareholder, voicing approval of ABC's management in the past year and specifically commending the domestic satellite plan as a move "to snap the silver cord" of AT&T, received strong applause from the some 600 stockholders present at the meeting.

The meeting bore small resemblance to last year's stockholder gathering, a noisy affair at which over 500,000 of the corporation's 4.5 million outstanding shares were voted against management's motion to abolish the cumulative voting procedure for directors. Management's purpose then was to keep divisive elements from gaining seats on the board. Under cumulative voting a shareholder can multiply his shares by the number of directors to be elected and cast that total for a single nominee.

At that time financier Norton Simon was seeking representation on the board for the holdings of Hunt Foods & Industries, of which he was then president and chief executive officer, and for those of McCall Corp. (35.5% owned...
ABC Films' domestic sales were said to have increased and its sales to foreign outlets were at record levels.

Elected to board membership for the first time at the annual meeting were Thomas W. Moore, ABC-TV president, and Samuel H. Clark, vice president in charge of theater operations.

Shareholders also approved a qualified stock option plan under which key employees may purchase up to an aggregate of 250,000 shares of the company's common stock. In addition they voted to amend the key employees incentive compensation plan so that incentive payments could be made in shares of common stock or cash.

CBS Inc. stock sales by officials explained

In response to inquiries about sales of CBS Inc. stock by company executives reported in the Security Exchange Commission March report (see below) a spokesman said the sales were made before March 1, the date of CBS-TV network president James T. Aubrey Jr.'s dismissal which was followed by lower prices for CBS stock. They said the sales were made to pay off commitments they made in arranging to exercise stock options granted in 1959.

**SEC's report of transactions**

The Securities and Exchange Commission has reported the following stock transactions by officers, directors and stockholders owning more than 10% of broadcasting or allied companies in its **Official Summary** (all common stock unless otherwise indicated):

**American Broadcasting-Paramount Theaters** — Franklin Feinstein acquired 127 shares, now holds 446; David F. Wallenstein disposed of 2,000 shares, now holds 1,123.

**Capital Cities Broadcasting Corp.** — Joseph P. McGrath disposed of 3,300 shares, now holds 36,051; Joseph B. Somerset acquired 1,000 shares, now holds 1,140.

**Columbia Broadcasting System Inc.** — James T. Aubrey Jr. disposed of 5,000 shares, now holds 22,449; Julius F. Brauner disposed of 1,000 shares, now holds 3,776; Ralph O. Briscoe disposed of 700 shares, now holds 33; Michael Burke disposed of 2,200 shares, now holds 3,883; Richard A. Forsling disposed of 1,000 shares, now holds 1,000; Arthur Hull Hayes disposed of 5,000 shares, now holds 5,131; Clarence H. Hopper disposed of 5,500, now holds 9,208 himself and jointly with Mrs. Hopper 1,014; Theodore F. Koop acquired 1,083, now holds 3,085; Goddard L. Anderson disposed of 4,000, now holds 15,550; E. K. Meade Jr. disposed of 4,550, now holds 4,523; Bennett L. Newman disposed of 169 shares, now holds none; Bennett L. Newman jointly with Mrs. Newman disposed of 24 shares, now holds none; Walter R. Rozett disposed of 1,700 shares, now holds 38; Richard S. Salant disposed of 4,400, now holds 5,436; Norman E. Wait Jr. disposed of 1,000, now holds 81; Geraldine B. Zorbaugh acquired 119 shares, now holds 2,061.

**Crowell-Collier Publishing Co.** — Sumner Blossom disposed of 500 shares, now holds 1,020.

**Curtis Publishing Co.** — L. Philip Ewald III disposed of 1,000, now holds none; Milton S. Gould disposed of 1,000, now holds 400.

**H & B American Corp.** — George E. Yousling acquired 1,000, now holds 1,000.

**MCA Inc.** — Milton R. Recknoll (holds 12,238 himself) as co-trustee disposed of 157, now holds 3,166.

**National General Corp.** — Nathan Bates acquired 1,000, now holds 2,524; Irving H. Levine acquired 200 shares, now holds 54,337 (holds 49,494 in partnerships, 12,361 in corporations and 110 as trustee); Seymour F. Simon acquired 100, now holds 204 (with L & S Associated holds 2,521 and with Mrs. Simon holds 104); Nathan Bates exercised warrants held at $15 each and acquired 5,458 shares.

**Papert, Koenig, Loits Inc.** — John Collins acquired 450 shares, now holds 450; Frederick Papert sold 4,590 shares to key employees, now holds 39,319.

**Plough Inc.** — John C. Dillon disposed of 100 shares, now holds 13,650.

**RCA-Chicago** — Denny disposed of 3,900 shares, now holds 6,000; Theodore A. Smith disposed of 7,742 shares, now holds 36,528; H. R. Wege disposed of 3,243 shares, now holds 4,725; Josephine Young Case trust disposed of 400 shares of $3.50 first preferred, now holds none.

**Rollins Inc.** — David Edell disposed of 500 shares, now holds 500; Earl F. Geiger acquired 500 shares, now holds 500; Albert R. Lefebvre acquired 4,050, now holds 12,150; John W. Rollins disposed of 5,600 shares, now holds 510,000; O. Wayne Rollins disposed of 7,600, now holds 1,552,350 (as guardian holds 23,940); R. Randall Rollins disposed of 1,200 shares, now holds 5,445 (as custodian holds 1,500); Jarvis J. Slade disposed of 300 shares, now holds 1,822 (all holdings listed reflect 3 for 1 stock split effective Feb. 16, 1965).

**Teleprompter Corp.** — Herbert Kranow acquired 500 shares, now holds 500; Western Union Telegraph disposed of 91,026 shares, now holds none.

**Time Inc.** — Edgar R. Baker disposed of 600 shares, now holds 15,770; David W. Brumbaugh disposed of 1,300 shares, now holds 20,489; Clay Buckhout disposed of 400 shares, now holds 5,080; Roland M. Buckley disposed of 5,000 shares, now holds 9,920; John L. Hallenbeck disposed of 1,000, now holds 4,000; Henry Luce III acquired 600 shares, now holds 125,623 (now holds 75,588 in trusts); Ralph D. Paine Jr. disposed of 1,000 shares, now holds 9,236.

**Trans-Lux Corp.** — Harry Brandt acquired 1,500 shares, now holds 155,547 (Mrs. Brandt holds 18,265, 50% owned companies hold 10,312, wholly owned companies hold 440 shares, disposed of 10 and now hold 23,826, foundations acquired 900 shares, now holds 55,620.

**United Artists Corp.** — Robert W. Dowling acquired 500 shares, now holds 500 (Dowling Realty Inc. holds 117).
MEET MISS LEADING OF 1965

We'd like to see more of her. Sweet, young things like this young lady are good for America. But we'd like to see less of a well-known phony with a similar name. He's a crook known as misleading advertising. He cheats broadcasters by undermining believability in advertising. He cheats the public. And, when he masquerades as an automobile dealer, he blackens the reputation of ethical dealers everywhere. We're out to get him... with your help. We urge all broadcasters to establish high standards of acceptability for automobile advertising. Let nothing on your station associate the fast-buck dealer with ethical, franchised new-car and truck dealers... who work with you to make your city a better place in which to live and do business. NADA pledges itself to fight dishonest advertising. We appreciate your co-operation.

---

Please write for a free copy of "Recommended Standards of Practice for Advertising and Selling Automobiles," prepared by NADA and the Association of Better Business Bureaus, Inc.

THE NATIONAL AUTOMOBILE DEALERS ASSOCIATION

Official Organization of America's Franchised New-Car and Truck Dealers

2000 "K" Street N.W., Washington 6, D.C.
Setmakers happy over tax cut

LBJ's bill would remove 10% excise levy from TV sets, radios and phonographs effective July 1

Manufacturers of television and radio receivers hailed President Johnson's tax message last week amid signs that TV and radio sales would receive a significant boost from the repeal of the 10% excise tax.

Although most comment from the set makers was guarded (they are anxious to see what Congress does to the measure) some retailers moved to anticipate the relief by announcing price cuts with the explanation that they will absorb the difference between now and July 1 when the repeal is supposed to go into effect.

The excise tax, which is placed on the manufacturer's price, amounts to about 7.9% of the retail price, according to industry estimates.

The President's proposal, which repeals or reduces excise taxes on several score of consumer items (from automobiles to xylophones), was under study last week by the House Ways & Means Committee. The committee is expected to report the measure out and the House to approve pretty much as recommended by the White House. It will then go to the Senate for consideration where, it is hoped, it will be passed without major alterations by early June.

The tax measure calls for repeal or reduction in four major phases: the first, effective July 1, removes the 10% tax on a host of articles (including TV sets, radios and phonographs), and reduces the tax on a number of articles and services (automobiles from 10% to 7%, etc.). Subsequent phases, beginning July 1, 1966 and extending into 1967, repeal or reduce taxes still further.

The President called for authorization to make refunds for floor stock which has not been sold before the tax cut goes into effect. He said that provision should be made for refunds to automobile and air conditioning customers on purchases made after May 14 and before the repeal or reduction goes into effect. He said other business groups aren't interested in refund protection because of the large amount of paper work involved. Other manufacturers, including TV and radio set makers, have indicated, however, that they will ask for this protection too.

Lauds Johnson • The Electronic Industries Association saw a spur to consumer buying in the second half of this year as a result of the removal of the excise tax from their consumer products.

Executive Vice President James D. Secrest expressed EIA's "delight" at the move, and added:

"EIA has always maintained that repeal of the excise tax will stimulate set sales and thereby contribute to the growth of the national economy. The radio-TV-phono industry has consistently led all industries in passing along what it means in dollars

At its simplest, the excise tax on the manufacturer's price for a TV set, for example, is estimated to pyramid up so that it is about 9% of the retail price. This is how it's figured:

Manufacturer's price, $100. Tax is $10. Price to distributors, $110. Distributors normally get 12% markup; this equals $13.20, making price to retailers $123.20. Retailers ordinarily get a 25% markup; this amounts to $30.80, making price to customer $154.

Without the excise tax, the retail price of the set now sold at $154 would be $140.
cost reductions to the consumer. Lower prices should be particularly effective in spurring the rising demand for color television receivers."

Jack GoWayman, director of EIA's consumer products, who has been working for the last six months to persuade the White House and Treasury Department as well as Congress to reduce or remove the 10% tax on TV and radio sets, expressed his pleasure at the move. He said he hopes that the House will move the bill through quickly.

The tax on television brought into the Treasury $135 million in 1964: radios and phonographs, $90 million.

**ABC, Comsat discuss network's satellite plan**

Representatives of ABC and the Communications Satellite Corp. cautiously probed each other last week in a three-hour closed meeting on ABC's plan to distribute network TV programming to affiliates through its own communications satellite (Broadcasting, May 17).

Whether such a satellite would actually belong to ABC or be operated and leased by Comsat was not openly negotiated, but the question lies behind the exploratory discussion.

It was understood that Comsat did not declare at this session that satellite ownership is its exclusive right under the Communications Satellite Act, but it's believed that it would argue this exclusivity if it came to a test.

The ABC-Comsat meeting was described as friendly. ABC made clear that it wishes to become involved in a satellite system that is exclusively TV, not a system where it might have to share circuits with other communications services. ABC did agree, however, that it would not object to sharing a satellite system with other TV services.

At a stockholder meeting last week (see page 83), ABC President Leonard H. Goldenson said the company spends $15 million a year for land lines. He also said that preliminary discussions indicate that a domestic satellite with a life of five to 10 years could be launched for less than $9 million.

At the ABC-Comsat meeting, besides Mr. Goldenson were the following American Broadcasting - Paramount Theaters executives: Simon B. Siegel, executive vice president; Everett H. Erlick, vice president and general counsel; Frank Marx, who was president of ABC Engineers and is now vice president in charge of construction and real estate. Comsat was represented by George Sampson, operations vice president; John M. Barstow, chief, transmission facilities, and Dr. Spencer Spaulding, manager, system analysis.

**GE has 11-inch color-TV set**

**Portable will sell for $249.95 and be out in time for Christmas**

Color TV for the mass market loomed last week when General Electric Co., after months of speculation, announced it was coming out with an 11-inch portable set at a recommended retail price of $249.95.

The color set—the first well under the $400 level at which color receivers have been priced generally—will be introduced in time for the Christmas market this year, GE officials said, in announcing the company's 1966 line of TV receivers.

Also announced last week was RCA's new line—led by a 20-pound, 12-inch portable, transistorized black-and-white set (at $124.50) and including 37 color-TV models, the largest number in the company's history.

GE's new color portable, unveiled at a news conference in New York, uses an 11-inch, rectangular picture tube manufactured by GE. The set weighs 24 pounds. William Davidson, general manager of GE's television receiver department, said total production would be limited "by tube supply alone."

At the company's annual meeting last month, Fred Borch, president and chief executive of GE, announced pilot production of a new color picture tube (Broadcasting, May 3). Last week company officials confirmed that the tube used in the new 11-inch set is "the improved version of the shadow mask type . . . of simpler design" referred to by Mr. Borch. The set is portable by reason of its weight alone; it must be plugged into a standard electrical outlet to operate. It has no transistors.

The face of the picture tube is coated with rare-earth phosphor, said to produce brighter pictures than tubes using standard phosphors.

Cost Reductions: Mr. Davidson attributed product development to "a number of mechanical and electronic design improvements" that permit major reductions in the cost and physical size of the color receiver. He would not elaborate "for competitive reasons."

The receiver operates with its own dipole antenna, but during the display, all receivers were connected to a central antenna. Reception of a color film, especially telecast, appeared satisfactory to observers.

All of GE's other TV color receivers are of the 21-inch and 25-inch size.

RCA officials said the 12-inch, solid-state portable was a first in the TV set-making industry, emphasizing longer life expectancy, reduced maintenance and extended reliability compared with tube TV sets. It uses a line cord, and is designed according to Bryce S. Durant, president or RCA Sales Corp., for personal use. Color TV, he noted, is "fast" becoming the "living room set" in the home.

Also introduced to RCA distributors at the sales meeting in Las Vegas last week were 21 new black-and-white receivers, bringing to 31 the full 1966 monochrome line.

Lowest priced color TV in the RCA line is $379.95. A 19-inch rectangular color receiver, previewed at Las Vegas, is priced at $430. Beginning at the $700 level are RCA's 25-inch rectangular models. Color, Mr. Durant said, now accounts for more than 55% of RCA's home entertainment sales total.

RCA's conventional portable black-and-white set, weighing 44 pounds, has a 21-inch picture tube and sells for $179.95.

**Brake on Boom** The only drag on the booming color business is the limited availability of color picture tubes, S. R. Herkes, president of Motorola Consumer Products Inc., told...
a meeting of the National Industrial Conference Board in New York last week.

Color tube production, he predicted, will not catch up with demand until 1967.

He estimated that 1965 sales of color TV sets will possibly total 2.2 million, up from last year's 1.4 million. Total TV sales, with an estimated 8 million black and white, will top 10 million units for the first time, he noted.

Black-and-white sales are tending more and more to portables and table models, he reported, with profit margins getting slimmer. Smaller TV sets now account for 78% of total sales, he said.

Daytimers on clears asked to update bids

Ten daytime stations operating on clear channels were given a sign last week that applications for higher power they filed with the FCC years ago may finally be granted.

The sign came in an order granting seven of them 90 days to bring their applications up to date. Some were originally filed as far back as 1947. But the filings became enmeshed in the clear channel proceeding, which lasted 16 years, ending in 1961 with the duplication of 13 of the 25 clears.

The commission last week said it feels the pending applications would not “materially affect consideration of possible future assignments of unlimited time class II-A stations on the 12 unduplicated clears,” or the possible use of power up to 750 kw by class I-A stations now assigned the I-A channels.

The seven are kwh Omaha, Neb., 660 kc, from 500 w to 1 kw; wnad Norman, Okla., 640 kc, from 1 kw to 5 kw; wkar East Lansing, Mich., 870 kc, from 5 kw to 10 kw; wlbw Carrollton, Ga., 1100 kc, from 250 w to 1 kw; wreo Peoria, Ill., 1020 kc, from 1 kw to 10 kw; ksks Dallas, 660 kc, 1 kw to 50 kw; and wesc Greenville, S. C., 660 kc, 10 kw, to change from directional antenna to directional antenna only during critical hours.

The three other stations involved are wcwu Ithaca, N. Y., kiev Glendale, Calif., and wust Bethesda, Md. The applications of wcwu and kiev have already been revised. However, kiev's application may pose a conflict with a Mexican station, and officials say that conflict involving wust's application must be "straightened out" before action can be taken on it.

Technical topics . . .

Remote control lens • Zoomar Inc., Glen Cove, N. Y., and Hollywood, has developed the remote control Mark XX lens for vidicon TV cameras. Adapted to cameras by a mounting rail, the system incorporates the F/6 Angenieux lens with zoom ratio 20:1 in focal lengths from 15 to 300 mm and field angles from 55 to 3 degrees.

RCA purchase • Ktbs-TV Shreveport, La., is purchasing new color television equipment costing more than $250,000 from RCA. Included in the purchase is a transmitter, a microwave system between studios and transmitter, a color film and slide transmission system and a TK-60 RCA color studio camera.

Tape cartridge • The Tape-Top, a new concept in continuous loop cartridges, is available from Casco Music Systems Inc., Hyde Park, Mass. The cartridge is a complete tape transport and does not require a special mechanism for operation. Any phonograph or turntable will provide the drive for the unit. It is available with 3200 feet of 1/4" tape and can be supplied with one to eight track heads. Up to 88 hours of program material may be recorded.

Price list • Gates Radio Co., Quincy, Ill., has issued a hard-cover catalogue of broadcast and communications equipment. Included in the book is a price list pocket on the inside back cover. Gates is a subsidiary of Harris-Intertype Corp.

UHF book • Hayden Book Co., New York, has published a new book detailing the steps involved in setting up a UHF station, entitled Planning the Local UHF Station by Patrick S. Finnegan. Mr. Finnegan is vice president and chief engineer of wbci-AM-TV and WWMUM(FM), Muncie, Ind., and is also the designer of the Automatic Time Injector used by many stations for time announcements.

More color • Meredith Broadcasting Co., and RKO General Broadcasting have each ordered 4-V color film camera chains from General Electric Co. The chains will go to Meredith's wmv-tv Omaha, kpho-tv Phoenix and kcmo-tv Kansas City, Mo., and to RKO's wbro-tv Memphis and two to wnnac-tv Boston. A 4-V system has also been ordered by Triangle Stations for wlyh-tv Lancaster-Lebanon, Pa.

Expansion • Mark Armstead Television Inc., Hollywood, has ordered two of RCA's newest model electronic film recorders, at a cost of $117,000, as a first step in an $8-million expansion program. Armstead has supplied electronic equipment, much of it developed by the company's own engineers, to TV and motion picture producers, for taping and filming.

New plant • Ampex Corp., Redwood City, Calif., has dedicated its new 85,500 square foot plant in Colorado Springs. The plant, part of the Ampex Video and Instrumentation Division, manufactures professional audio recorders.
Worldwide status of radio-TV

UNESCO report finds 400 million radios and 130 million TV sets, with about half of them in the United States

The United States has about half the world’s TV and radio sets. The total receivers in the world: Some 400 million radios as of the early 1960’s and about 130 million television sets in 1963.

These estimates are published last week by the United Nations Education, Scientific and Cultural Organization (UNESCO) in its World Radio and Television handbook.

The publication estimates the U. S. has 33 TV sets and 100 radios for every 100 people in the country. (The highest TV-set concentration was reported in the tiny principality of Monaco: 52 receivers per 100 people).

Similar surveys released last week by the U. S. Information Agency reveal substantially higher figures for 1964—162 million TV sets and over 500 million radios, with the U. S. having 67,100,000 of the TV’s and 228 million radios.

UNESCO’s report described broadcast facilities in nearly 200 countries, but cautioned that its data was based on most recent information available to it—1963 back to 1960, and in a few cases, to 1959.

Some of the report’s highlights:

- The U. S. is far ahead in the number of TV receivers (60 million given) and Japan is in second place with 13 million. Japan also has TV viewers about equal with radio listeners who own 17,608,000 radio receivers.

- Radio broadcasting globally increased 60% in the 10 years after 1950, but in terms of TV sets, worldwide figures show a mushrooming from 11 million in 1950 to 130 million in 1963. In radio, the 400 million sets over the world represent 13 receivers for every 100 people. To cover every family in the world with a radio set, it would take another 400 million sets, a development which UNESCO anticipates.

- The Soviet Union is shown with about 44 million radios of which 30 million receive only wired programs, and with an estimated 7 million TV sets, 18% of which are in Moscow. In 1950 there were two TV transmitters in the USSR. Now there are 173.

- West Germany (broadcasting is part commercial) has more than 16 million radio receivers in use, and an estimated 7.8 million TV sets; France (noncommercial and directed by a government-sponsored monopoly) has 12.9 million radios and 3.3 million TV sets; Italy (indirectly controlled by the state, some advertising on TV) has more than 8.5 million radios and over 3.8 million TV receivers; United Kingdom (noncommercial in radio, part commercial and noncommercial in TV) has 14.2 million radio sets and another 1 million wired radios, and 12.5 million TV receivers.

Communist China has only 20,000 TV receivers but has five “television universities” serving more than 30,000 students with eight hours of courses weekly in mathematics, physics, chemistry and Chinese literature. Mainland China has similar projects in radio, and reports nearly 7 million radio sets.

The 159-page handbook can be obtained for $3.50 from the UNESCO Publications Center, 317 East 34th Street, New York 10016.

Canadian CATV girds for fight

The booming Canadian community antenna television industry is bracing itself for a battle against more government regulation. To aid in the fight, it is developing new services to improve its image. This was the theme of the ninth annual meeting of the National Community Antenna Television Association of Canada held in Toronto, May 11-14.

Panel discussions dealt with improving public services, methods for making all channels available for emergency announcements, sales, and originating local programs. At closed sessions debate on how to combat probable government regulation was the major subject.

There was a record registration of 194, while membership was reported as 125 active operators, nine trade members and three associate members. Twelve new members were added during the year. The board of directors was increased by one to 15, the additional member making four representing western Canada. The majority of CATV operators are in Ontario, Quebec and British Columbia (in that order), with a scattering of operators in the prairie provinces and the Atlantic coast provinces.

President F. T. Metcalf of Guelph, Ont., who is also general manager of CKJY Guelph, reported that additional regulation by the Department of Transport has been stopped. This, he thought, is due to the expected June report on all phases of broadcasting from a special committee headed by Montreal industrialist R. M. Fowler.

Mr. Metcalf warned the CATV operators that the next big fight will be on the copyright question. The association, he said, is prepared to fight any copyright fees.

To prevent drastic government regulation, he urged the CATV industry to take a long look at customer service, to regulate its own operations and to cooperate with a survey soon to be made by the industry of all phases of CATV operations to obtain facts with which to battle regulatory moves.

Bell Contracts * Also discussed were new contracts being negotiated with the Bell telephone systems, the new Quebec 6% telecommunications tax, the growing value of CATV for educational TV.
in conjunction with provincial departments of education and universities, and reporting of local events where there are no local TV stations. Such local community services must be free of commercials, it was stressed.

The Canadian association recommended that the limited VHF channels should not be used for TV rebroadcasting stations of any power. It has presented to the Board of Broadcast Governors and the Department of Transport its view that translators should be on UHF channels, and CATV operators could supply service in such areas because of the scarcity of UHF receivers in Canada. VHF channels should be reserved for originating TV stations, it said.

Rowan says USIA needs bigger budget

To perform its global functions adequately, the U. S. Information Agency would need a half-billion dollar budget according to Carl T. Rowan, director. Answering questions of newsmen at a dinner meeting of Sigma Delta Chi, national journalistic society, in Washington last Wednesday (May 19), Mr. Rowan said that in the current situation, USIA should have a budget three times its present appropriation of $140,254,000. He did not advocate a half-billion dollar appropriation now because the organizational structure is not geared to that tempo.

Mr. Rowan said USIA is “getting through” effectively both in the Vietnam war and in Santo Domingo. In Vietnam, he said, there is adequate evidence of the effect of Voice of America broadcasts in spite of attempts at jamming.

Increased funds, he said, are needed to expand TV operations of VOA and to enlarge broadcast coverage. Three 50 kw medium band transmitters are broadcasting in both Vietnamese and English on expanded schedules from installations in the Philippines. Santo Domingo is being covered through expanded Spanish language schedules as well as over stations on the island.

FATES & FORTUNES

BROADCAST ADVERTISING

John L. Van Dagens, copy chief of Detroit office of BBDO, elected VP-creative director. A. James Hanna Jr., art director, promoted to executive art director and manager of the agency’s Detroit art department.

Rockford, Cold Springs, Little Falls, Willmar, Benson and Montevideo. Grants are subject to interim non-duplication conditions set forth in notice of proposed rulemaking in Doc. 15233 and to further conditions that sale of Bremerland CATV system from Cable Inc. to Cooke is consummated so that CATV customer for common carrier service at Bremerland is independent subscriber to CATV service with unaffiliated service to such and in such community. Minnesota Microwave and, in event CATV systems at Marshall and Montevideo, whether alternative common carrier microwave services from Minnesota Microwave are contemplated to serve such CATV systems, CATV customers be independent subscribers not affiliated with such CATV systems.

Commission denied for lack of standing petition of residents of Marshall, Benson and Montevideo for leave to submit official resolutions. Commissioner Bartley concurred in result but dissented to imposition of conditions; Commissioner Cox dissented and issued statement. Action May 12.

By memorandum opinion and order, commission reopened record in Rochester, N. Y., channel 13 proceeding and remanded proceeding to examiner for further hearing to determine whether alternative means are available for broadcast of type of educational programming which Rochester Area Educational Television Association Inc. proposes, and whether alternative outlet for such educational programming, such as Rochester Telecasters Inc., has in fact effectively committed itself as viable outlet for third network service, including question whether American Broadcasting-Paramount Theatres Inc., was in fact committed to carry educational programming to Rochester area by virtue of agreement with such applicant. Commissioner Bartley dissented to remand. Examiner Dorsey Eugene Kraushaar, proceeding ex parte for period of 90 days to up-date applications for new AM and FM stations, set forth background of any replacements so that comparative qualifications of applicants may be more appropriately evaluated, and new AM and FM stations can be included in initial and supplemental initial applications.

In proceeding on applications of Chapman Radio & Television Co. and Anniston Broadcasting Co. for new TV on channel 70 in Anniston, Ala., in Doc. 15565-7, granted motion by Anniston to extend time to May 28 to proceed with Broadcast Bureau motions by Gros and Putrebus on behalf of number of broadcast applicants, setting hearing on order to adjourn hearing, setting forth time for reconsideration of issues in light of developments in Doc. 14694 which amended broadcast rules to provide for maintenance of local public file references in FCC records, including may file pursuant to order and in case of certain applicants and related information contained in open reference files at subsequent evidentiary hearing.

In proceeding on applications of American Homes Stations Inc., Orange County Broadcasters and Orlando Television Broadcasting Corp., for new FM in Orlando, Fla., in Doc. 15836-2, dismissed motion by American Homes to enlarge issues as to Orange County, Member Nelson not participating. Action May 18.

By memorandum opinion and order in proceeding on applications of Central Broadcasting Co., Inc. and Orlando Broadcast Co. for new FM's in Ware and Springfield, Mass., respectively, and in proceeding on applications of Central Broadcast Co. to applicants' motion to approve contract between applicants and Member Roberts to allow applicant to work with market facilities, set for oral argument for June 25, 1965.

In proceeding on applications of American Broadcasting-Paramount Theatres Inc., for new TV on channel 25 in Boston, grant

COMMUNITY ANTENNA FRANCHISE ACTIVITIES

The following are activities in community antenna television reported to Broadcasting through May 19. Reports include applications for permission to install and operate CATV's and for expansion of existing CATV's into new areas as well as grants for CATV franchises and sales of existing installations. Receipts and Antennas Act are ordered by states. * Indicates a franchise has been granted.

Eufaula, Ala.—After considering several applications the city council has narrowed the field to two. They are Ed Aldag and Douglas Smith, both Eufaula. Other applicants included TV Distribution Center Inc., Huntsville, Ala.; Video Cable Systems Inc., Payetteville, Tenn.; WULA-Eufaula; Ed Adams, Columbus, Ohio; and Hugh Morrow, Birmingham, Ala. *

*Homewood, Ala.—Jefferson Cablevision Corp. (Ben McKinnon, general manager, 6814 6th Ave., Birmingham, Ala., president) has been granted a 12-year nonexclusive franchise. The monthly franchise fee will pay 5% of the annual gross receipts to the city (with a $40 minimum). The percentage will depend on the number of Homewood residents who subscribe to the service. The monthly franchise fee charges will be nonexclusive. Free service will be provided to schools, city employees, orphanages, hospitals, and nursing homes.

*Escondido, Calif.—Escondido Community Cable Inc. (Alan Skuba, president) has been granted a franchise. There will be no franchise fee for installation and the monthly charge will be $3.50. The city will receive 25% of the annual gross receipts. Applicants who were turned down were Escondido Community Cable Inc. (David Calaf, and Jack Kent Cook), Beverly Hills, Calif., and Kern county, Calif.—The county board of supervisors has approved rules and regulations and applications must follow in seeking franchise. A general manager has been appointed by each community in unincorporated areas of the county. The franchises will be for 25 years and nonexclusive. A system must carry the three Bakersfield stations plus eight others, one of which must be an educational station. Applications must be submitted by May 20. Successful applicants will have four months to install and will pay the county 2% of the annual gross receipts.

*Manterca, Calif.—Applications have been received from Home Vue Community Television Corp. (Robert E. Willey, chairman, William F. Hoke, Jr., Addie Stover, Home Vue would provide CATV signals and Pacific II 11 TV signals. Both would provide a wireless FM music service. Home Vue would pay the city 2% of the monthly charges. Other costs would be $22.50 for installation and $5.50 monthly for residences. Commercial charges would be $25 and $6.

Sacramento, Calif.—California Antenna TV Inc. (Kelly Broadcasting Co. [KBRA Sacramento]) and the McClatchy Station Group (KOVR-TV[1]) has applied for a franchise. A previous applicant is Perfect Picture TV, Sacramento.

San Bernardino, Calif.—Applications have been received from Empire Cable Television Co. (represented by attorney Robert P. Coleman), G. Krumm and Storer Cable Television Co. (S. Gold Elec. Corp. [represented attorney Kenneth E. Skousen]). Another company, Red Circle Community Antenna System, is now serving the city under a franchise awarded in 1961.

Tracy, Calif.—Applications are now pending in Tracy (in Tracy, Calif., and Tracy, Calif., City). City councilmen have delayed action until action is taken by other San Joaquin County communities.

*Vacaville, Calif.—Tele Vue Systems (C. M. Kirkeeng, general manager) has been awarded a franchise. The city council voted to pay $25 for installation and $5.50 monthly. The estimated cost of the system is between $300,000 and $325,000.

Polk county, Fla.—Applications to serve the unincorporated areas of the county are pending in Leesburg, Eustis, Mount Dora, Orlando, Winter Haven, and Lake Wales. The city council of Leesburg is to take action within 90 days. Universal Cablevision, Cocoa Beach, Fla.; and Florida Telephone Co., subsidiary of Ameco Inc., Phoenix, and Superior Cablevision, are the applicants.

Augusta, Ga.—Applications are pending from A. D. Willard Jr. (president and general manager), WAGA Augusta; Fuqua Industries Inc., WRMW-TV Augusta (licensee, Rust Craft Broadcasting); and Perfect Picture Antenna Fuqua.

Boise, Idaho—Boise Valley Broadcasters Inc. (KEOT-TV Boise) and KTVB Inc. (KTVB-TV Boise) have applied jointly for a franchise.

Macomb, Ill.—Arthur Carnahan has been awarded a franchise. He has agreed to remit 3% of his annual income to the city. Western Illinois Video Inc. (Elton Snowdon, president) was denied the franchise.

Frankfort, Ind.—An application by Frankfort TV Cable Co., a subsidiary of Alliance Amusements Inc., has been filed with the Universal Electronics Corp., Philadelphia, has passed a first reading with no opposition. Frankfort TV is requesting a 25-year agreement with the proposed fee of $3.50 and $5 monthly. A remittance of 2% of gross receipts would go to the city. Spiro J. Pappas, president of Alliance Amusements Corp., represents Frankfort TV.

Rockford, Me.—The city council voted to deny the franchise to a previous applicant. Preliminary plans and Sidney Cable TV applicants. Applications were on file from Kent Real Telecasting (WRKD Rockland), Fieldgate Tele, Madison, Mass., and Young's Community Television Corp., which operates CATV in Springfield, Vt.

Worthington, Minn.—The city council turned down all three proposals for a franchise. The proposals came from KSTU-TV Sioux Falls, S. D., an Alexandria, Minn. attorney, and a Brookings, S. D. attorney. The council noted that several proposals were fairly good and that if interest is shown among the public, it will change its mind.

Canastota, N. Y.—Newhouse Broadcasting Corp. has applied for an exclusive franchise. The firm has proposed $85 installation fee with a $5 monthly charge. A remittance of 2% of gross income would go to the city. Previous applicants are Unicable Inc., Utica, N. Y., and WKTV( TV) Utica, N. Y.

East Hampton, N. Y.—Closed Circuit Corporation of America and Long Island Community Antenna Television Corp. have entered separate franchises for the community. East Hampton has previously awarded a franchise, plans initiation of service in June.

Ellicott, N. Y.—Jamestown Cablevision Inc. (Simon Goldman, president) has been awarded an exclusive franchise. A remittance to the city of 2% of gross receipts will begin at the second operation. Booth Broadcasting Co., Detroit, was denied the franchise.

Hampton Bays, N. Y.—Long Island CATV Inc. has submitted an application.

Jamestown, N. Y.—Booth Broadcasting Co., Detroit, has been denied a franchise. Jamestown Cablevision Inc. (Simon Goldman, president) was previously awarded a franchise. The firm proposes an installation fee and a $45 monthly charge. A remittance of 2% of gross annual receipts will go to the city. Previous applicants are Unicable Inc., Utica, N. Y., and WKTV( TV) Utica, N. Y., respectively.

Moline, Ill.—The Ilion Times-Herald Inc. (94.7 FM) has applied for a franchise. A previous applicant is Independent Cable TV Inc.

Johnstown, N. Y.—A franchise has been granted to the city. The city council has taken action to change in ownership and failure to restrict company leasing and renting of TV receivers. After alterations to the ordinance, the franchise is expected to pass.

Patchogue, N. Y.—Patchogue Broadcasting Corp. (WPPAC Patchogue) has been denied a franchise. The village board stated that it was unusual that a proposal should ultimately become an exclusive franchise. The village will negotiate with only one company for right to operate. It is believed that present reception was adequate and did not warrant the introduction of CATV.

Skaneateles, N. Y.—New Channel Corp., Skaneateles, N. Y., a subsidiary of Rainbow Broadcasting Corp., has submitted an application for a franchise. WSYR-AM-FM-TV Syracuse (a Newhouse franchise) and other General Electric Cablevision Corp. and Onondaga Video Co., both of Syracuse.

Warwick, N. Y.—TV Cable of Wayne- boro, Warwick is represented by Barry Calhoun. Beacon, N. Y. has submitted an application.

Elyria, Ohio—A 25-year franchise has been awarded to Elyria Electronics Inc. (WYAM-FM-TV Cleveland). Westinghouse proposes a remittance to the city of 3.1% of annual gross receipts with rates of $14.85 for installation and $5.75 monthly. A city council meeting will be held in the first year and $5,000 each year thereafter is estimated. Previous applicants are Altona CATV Inc., Altona, Pa., and Telereama Inc., Cleveland.

Sidney, Ohio—Sidney Cable TV Corp. has submitted an application for a franchise. The firm is owned by Plains Television Inc. (WPHL-TV Springfield and WCHTV Champaign, Ill., both franchises). Previous applicants are Sidney Cable TV Co. and Multi-Channel Cable Co., Portsmouth, Ohio.

Brentwood, Pa.—Cateil Inc. has submitted an application in a community supported by a community.
LAST month, Ted H. Factor gave a talk to the San Francisco Advertising Club. His title was "The Most Important Four-Letter Word in Advertising" and he started off by saying that the word is not "sell" because "sell is not a word in advertising, it is advertising. Selling goods and services is what advertising is all about."

The word he had in mind as the most important four-letter word in advertising today, Mr. Factor told his audience, was "guts." He continued: "Guts is what it takes today to create high impact, fresh, imaginative and effective advertising.... Guts means taking some risks, opening the door marked 'No Admittance' and finding something nobody ever looked for before.... The risks involved are generally not catastrophic and often they lead to fresh new ground in sales."

"Take a chance," he urged, "It won't kill you. It might make you famous."

No Ulcers • Ted Factor spoke from experience. As western division vice president of Doyle Dane Bernbach he has jurisdiction over the agency's three West Coast offices—in Los Angeles, San Francisco and Seattle. The last two are service branches; the creative work is done in Los Angeles under Mr. Factor's supervision. Broadcast accounts include Crown Zellerbach tissues, Laura Scudder's ("the noisiest chips in the world"), Rainier, Lawry's Foods, Leslie Salt ("Flat without Leslie's"), Bekins, Blue Seal Bread, Holly Sugar and Forest Lawn.

"Taking chances is built into Ted's job," an associate observed. "It's part of his daily routine and in a spot like that a man either has guts or ulcers. Ted doesn't have ulcers."

Sometimes, as Mr. Factor said, it pays off. He could have been thinking of a fall day in 1963, when he and his cohorts at DDB, Los Angeles, left the awards banquet of the Advertising Association of the West carrying 16 plaques, four scrolls and a massive silver bowl, the Golden West trophy for the "Best in the West" television commercial, presented to DDB for a live action spot for Laura Scudder's.

Radio Is Not TV • Nationally, more than 30% of DDB's billings go into the broadcast media and in the West the percentage is even higher. But Ted Factor dislikes lumping radio and television together. "To me, they are separate media, as distinct and different as outdoor and magazines. Each has its own functions and applications that call for a particular creative approach.

"Television, with its combination of audio and video dimensions, has a vitality and a scope that radio does not possess. TV grabs you; radio surrounds you. Radio works more slowly than TV; it doesn't get the same fixed atten-

If you have guts, you won't have ulcers

tion; the radio listener today is usually doing something else while he (or she) is listening—washing dishes, driving an automobile. But I have great respect for radio as an advertising medium.

And the way DDB makes use of radio has won the respect of the western advertising fraternity as well as the ears of the West Coast citizenry. The raucous songs Pearl Bailey belts out for Rainier Ale, Blue Seal's invitation to shoppers to go ahead and squeeze the bread, Bekins' singing moving men—

are just three radio commercials that are entertaining people and selling products in the spring of 1965.

Radio is no new discovery for Mr. Factor. "I've been using radio all my life," he says, and the statement is not much of an exaggeration. He had just turned 21 when he wrote his first radio commercial, hard-sell spots for Le Roy's Jewelers, the nation's largest credit jewelry firm. That was 1935.

Thirteen years later, when television began its invasion of the western advertising scene, Mr. Factor was producing TV spots for Le Roy's and Tea Time Candies, one of the original sponsors of the Time for Beauty series.

A Fast Mover • Moving ahead without waiting is nothing new either. He made his first appearance on earth two months ahead of schedule and in his grandparents' farmhouse, where his mother was visiting, instead of in a St. Louis hospital.

Ted Factor's family moved to California before he was out of knee pants. He finished grade school in Berkeley and went on to University High School in Oakland, where he edited the daily newspaper, U-N-I ("as far as I know, the only high school daily then in the country"), and wrote a daily column "Ted Bits." It was then he got the desire for a career in advertising, "which offers one the opportunity to be in both business and the basic arts."

Graduated from high school in 1931, he entered the University of Southern California. But times were tough and after six months he switched to the University of California at Los Angeles, a state university with no tuition. Then his main extracurricular activity was a job with Curtis Publishing Co. as manager of a crew of boys who sold the Saturday Evening Post, Ladies Home Journal and Country Gentleman house to house.

In his senior year he went back to USC for some business administration courses he wanted to take. He also took a parttime job in the foreign advertising department of his uncle's cosmetic firm. Then the head of the department was fired and Ted Factor, at 20, left school for good to become foreign advertising manager of the Max Factor Co.

But nepotism was not his dish and in less than a year he was a copywriter at S. L. Kay Inc., an agency no longer in existence. Another year and at age 22, he opened his own agency, the Ted H. Factor Agency. In 1951 he and Don Bredt, who had worked for him, incorporated the agency as Factor-Bredt Inc. In 1954, it was merged with Doyle Dane Bernbach. At the time F-B's annual billings were about $1.5 million, DDB's about $5.5 million. Today, DDB bills some $125 million a year.
Tax windfall

EVERYBODY—public, manufacturers, broadcasters and advertisers—benefits from President Johnson's proposal to eliminate the 10% excise tax on television and radio sets.

But the greatest beneficiary will be the harried UHF broadcaster who, effective July 1, reap the extra dividend of all-channel set prices at perhaps no more than the old single-band receiver costs. The Johnson proposal, which seems certain of speedy enactment, is bound to stimulate reactivation of many dormant UHF construction permits and encourage new applicants in the upper band.

Broadcasters and manufacturers have fought for more than a decade for the removal of the "luxury" excise on TV sets. The all-channel set legislation, which became effective last year, was reluctantly supported by broadcasters only because of the Congress's refusal to enact a tax "equalizer" for such sets.

There are other bonuses for the broadcast media. Elimination of the excise also will be reflected in the prices of radio sets. Color television gets another shot in the arm through what should be a corresponding 10% reduction (at wholesale) for these premium items. With more spendable income the consumer will flock to color with new fervor.

There are other benefits too. More TV set sales (and they're all all-channel) mean more stations and greater circulation. More stations will provide a wider choice of programs and the opportunity for both economic and cultural progress.

The President's $4 billion tax cut wasn't conceived by broadcasters or set manufacturers. It couldn't have been more appealing if it had been.

Is this customer right?

HARRISON F. DUNNING, president of Scott Paper, had some strong words to say about television programing and television regulation in his speech to the Association of National Advertisers (Broadcasting, May 17).

He called television "the magic advertising medium" for many products, but he thought too much programing is cheap—and quality, that is—and of it disgraceful. "The ironic thing," he said, "is that television programing has made itself a prime target [for government intervention] by its own acts."

Government intervention he most certainly did not want. The FCC's network program control proposals, he contended, are a "first move" toward government regulation of program content. Aside from opposing government intervention as bad in itself, he saw little chance that the FCC plan would improve programing and thought it "may only complicate the problem even further," with the extra disadvantage of raising the advertisers' costs to boot.

If we read him correctly, what Mr. Dunning is saying in essence is that television must raise its own program standards, that the networks must become more receptive in at least considering advertiser-offered programs, and that advertisers and agencies can contribute to the former—and perhaps, indirectly, to the latter—by refusing to buy "questionable" shows.

Mr. Dunning has the credentials to offer advice. His company spent about $2.6 million on some 20 network shows last year and invested another $1.2 million in about a dozen in the first quarter of 1965. The diversity of these programs indicates that Scott has given considerable thought to the use of television to reach different audiences, mixing occasional election campaign reports and entertainment spe-

erals with variety programs and a wide selection of the mass-directed shows, both daytime and prime time.

It is not necessary to agree with Mr. Dunning on all points (although it is not easy to disagree with him completely on any of these). What he says, however, should not be treated lightly. A man with his investment in television's past and his stake in its future is entitled not only to speak but to be heard and to be taken seriously, whether he is talking to advertisers, networks, agencies, the FCC or, as in this case, to all four groups at once.

One way in

BROADCAST journalists are making little headway in their professed desire to gain access to legislative and judicial proceedings. It is just possible that broadcasting is kept outside the door for want of effective argument on behalf of its admission.

Take, for example, the exclusion of cameras and microphones from the floors of the U.S. House and Senate. At every session in recent memory members of both chambers have introduced proposals to permit broadcast coverage. Senator Jacob K. Javits (R-N.Y.) has been especially active in this enterprise. As he reminded delegates to the National Association of Television Program Executives' conference in New York two weeks ago, he has for the past eight years argued, to no avail, for the right of television and radio to cover major debates in the Senate.

Yet despite the assistance of respected allies like Senator Javits, broadcasting is persistently rejected from the halls where the public's business is taking place and the public's laws are being fashioned. Obviously Senator Javits and his colleagues who are similarly disposed need some kind of help they aren't getting. The help should come from broadcasters, and it should be in the form of a campaign to advise the public that it is being cheated of the chance to see and hear its elected representatives in action.

Broadcasters, in short, ought to take their case to the people. When reporting at second hand what has been said in a congressional debate, the broadcast newsman would be adding an interesting fact if he pointed out that the debate could not be recorded or broadcast live as it occurred because of the disinclination of legislators to be witnessed as they shape the public destiny.

A consistent editorial campaign by broadcasters throughout the country just might arouse the support that Senator Javits and his fellows need.
...are buying color television sets and enjoying color programming for more than 60 hours weekly on WBAP-TV. The new WBAP-TV tower delivers 75,000 more Texas families making a terrific 800,000 TV home total...and that means a total population of over 3,000,000. Nope, they are not all on the golf course. A lot of them don’t even play golf...WBAP-TV families do live in city apartments, suburban homes, medium size towns, small towns and ranch houses in rural areas...they don’t all own color sets, but 60,000 do. And these color set owners “zero in” on Channel 5 like lining up a birdie putt. More Texas families are buying color sets every day, and more Texas families should enjoy your commercials in color...tape, film or slides, we’ll schedule at no extra charge. Ask any PGW Colonel.
