what does it take to be first in CATV
(and how do you stay there)?

Jerrold's answer is: "Customer satisfaction!" Our systems satisfy the CATV owner/operator because they're engineered for subscriber satisfaction. When you buy Jerrold, you get...

Reputation—15 years and 1,700 systems after we equipped the first commercially successful CATV system, more CATV operators depend upon Jerrold for subscriber satisfaction than upon any other single source. Jerrold is Number One in the CATV industry.

Know-how—Jerrold has consistently maintained the industry's largest staff of development engineers. A staff which has provided such "firsts" as the Channel Commander which made 12-Channel systems a reality. A staff which is justifiably proud of its latest "first": Starline—the new standard for solid-state CATV distribution system quality and performance.

Services—Jerrold has built more systems on a "turnkey" basis than any other manufacturer/contractor in CATV. Our nationwide organization can help you in any and every stage of providing a profitable CATV system—from marketing and engineering-surveys, through system engineering and construction, to turning over to you a complete, operating system.

Whatever your CATV requirement—consult Jerrold first. Call 215-925-9870 or write: CATV Systems Division, JERROLD ELECTRONICS CORPORATION, 401 Walnut St., Philadelphia, Pa. 19106

THE EXCITING NEW KTVI 2 ST. LOUIS abc HR
KRLD-TV continues to be the number one choice in the nation’s 12th ranked television market. In prime-time, channel 4 delivers 383,900 viewers per average quarter-hour, 6:30-10:00 pm, Monday thru Sunday — 29% more than the second station, 37.8% more than the third and 175.9% more than the fourth. An ATS representative will be happy to give you the additional information concerning the experienced and qualified leader in the Dallas-Ft. Worth market.

*March 1966 ARB, Television Audience Estimates, Station Audience Summary*
Committee.

TV networks, admittedly stimulated discount will come, when separation from AM programing and, they'd aim CBS to go. Meanwhile NBC -FM has wide enough. Meanwhile network news feeds have been heavier; several years, but station interest has spread enough. Meanwhile, stations, none proposed to carry regularly in one hour more than 20 minutes of commercial time, and only six proposed that much. Remainder proposed 18 minutes (National Association of Broadcasters code limit) or less. Staff, however, wants to question nine stations about policies for exceeding normal maximums. It also wants to probe into three stations concerning apparent discrepancies between promise and performance on commercials.

CATV workload mounts

FCC is beginning to groan under burden of workload resulting from regulation of CATV. Preliminary staff studies indicate 25 new employees, mostly professional level, are needed. Scores of petitions have been filed by CATV's seeking relief from top-100 market and carriage and nonduplication rules, all opposed by broadcasters. In addition, stations are seeking protection beyond that provided by rules, and there are pending 26 petitions for reconsideration of rules. Most of job has fallen on Broadcast Bureau, where six lawyers and one parttime engineer are assigned to CATV.

Acting Chairman Rosel H. Hyde is expected to tell Senate Appropriations Subcommittee in hearing today (Monday) that commission "might" have to ask for supplemental appropriation to provide additional staff. But at moment, commission is striving to get for 1967 fiscal year amount that President recommended — $17,520,000. House Appropriations Committee proposes cut of $181,500.

More in Batman orbit

Riding hot streak, with Batman, Green Hornet and Tammy Grimes Show all scheduled for ABC-TV in fall, Bill Dozier's Greenway Productions has Wonderwoman and two "more meaningful" — presumably dramas—series lined up for 1967-68 season. Unlike Green Hornet, but like Batman, Wonderwoman will be played tongue-in-cheek. Chances are, however, that humor will be more subtle. Sex will be accentuated, but it'll be sex to laugh with not to leer at.

Early returns

New program reporting form in use for radio is providing evidence that medium isn't as overloaded with commercials as some had supposed. Of 254 New Jersey and New York stations, none proposed to carry regularly in one hour more than 20 minutes of commercial time, and only six proposed that much. Remainder proposed 18 minutes (National Association of Broadcasters code limit) or less. Staff, however, wants to question nine stations about policies for exceeding normal maximums. It also wants to probe into three stations concerning apparent discrepancies between promise and performance on commercials.

Tough decision

Broadcasters in Montana may have to choose from among their own to fill seat in Congress this year. Rep. Arnold Olsen (D), who will seek fourth term, is strong proponent of bill to extend license terms to six years. Republican opponent probably will be broadcaster and veteran state legislator Richard Smiley, XXXL Bozman. He has led fight for relief from demands of music copyright groups for good while.
If you’re a trend follower, follow this.

The trend to WJW-TV in Cleveland’s Area is a dramatic feature of every ARB and Nielsen report for the past six months.* WJW-TV is scoring more homes, more market share, offering more for your buy month after month. Check it yourself. And follow the arrows.

*As compared to same NSI and ARB reports of the previous year, subject to qualifications described in said reports.
Radio finds it is once again eagerly wanted commodity by advertisers at national level. Spot sales averaging 19% higher than 1965 figures. Networks hint that new records are in wind. See . . .

Ruling due today on CATV copyright case

Decision will be read from bench today (May 23) in New York district court in United Artists-Fortnightly case dealing with CATV copyright issue, and it will raise new strategy problems for contestants. Issue was pared down to whether copyright law protected UA from unauthorized carriage of its films over Fortnightly systems. But this doesn’t insure clear-cut victory for either side because Fortnightly CATV’s carried number of stations under variety of conditions and judge could conceivably get into differentiation of distant-signal and local-signal pickups. United Artists has said it will appeal immediately to higher court so it receive adverse ruling.

One top CATV industry attorney says district court decision will have terrific precedential importance as influence on congressional legislation dealing with problem. District Judge William Herlands is aware of this, he said, and that’s why he took “unusual but not startling” measure of disclosing time of decision to contestants. Whether Fortnightly would appeal adverse ruling immediately is not certain. It might wish to litigate complete case with UA in district court. Its numerous defenses have included contentions that copyright notices on UA films were illegible or nonexistent and counter-charge of antitrust violations by UA in its film sales practices. It’s thought if all issues are tried, case could drag on for months or even years.

Fortnightly Corp., which publishes Reporter Magazine, sold two CATV’s in Clarksburg and Fairmont, W. Va., last year to John Kent Cooke’s American CableVision Co.

More markets scheduled for Colgate dance party

Wonder where Gretchen Wyler went? Colgate-Palmoive, co-producer with Triangle stations of Miss Wyler’s Step this Way, taped half-hour dance party series, will clear up question in mid-June with big splash for show, which has been off air because of Colgate’s manufacturing strike problem.

Colgate, which buys at least one minute of commercial time in show in each market placed, will expand its station lineup and go national via syndication route. Thirteen of 26 shows taped had played on limited number of stations when Colgate and series took eight-week hiatus at time of strike.

Initial buy had been in 16 test markets, now lineup has already expanded to 36 stations. In some markets, Colgate underwrites more than one announcement (remaining time in half-hour is open for sale to other advertisers). Norman, Craig, & Kummel, New York, is agency.

WLBT(TV) renewal order due this week

FCC order designating license-renewal application of WLBT(TV) Jackson, Miss., for hearing will be issued early this week.

Commission, acting on remand from U. S. Court of Appeals, is ordering hearing on charges station violated fairness doctrine and discriminated against Negroes in its programming.

In accordance with court decision—regarded as benchmark because of its holding that public should be given “standing” in renewal hearings—complainants who brought appeal will be designated as parties in WLBT hearing.

Complainants are United Church of Christ’s office of communications, United Church of Christ at Tougaloo, Miss., and Aaron Henry and Robert L. T. Smith, Mississippi civil rights leaders.

Commission order reportedly places on parties burden of supporting charges brought against station. But station will be required to carry ultimate burden of establishing that license renewal will be in public interest.

Commission vote was 5-1. Commissioner Kenneth A. Cox was lone dissenter, reportedly because of difference with colleagues on question of where burden of proof should be placed.

Hearing will not involve license-renewal applications of WLBT’s affiliated stations, WJDX-AM-FM, as commission staff had proposed (CLOSED CIRCUIT, May 2). Commission has reportedly voted to renew their licenses.

Commission originally granted one-year license renewals for all three stations (BROADCASTING, May 24, 1965).

Now it’s land mobile sharing on N.Y. VHF

Test of feasibility of land mobile radio sharing of vacant New York VHF channel is under consideration at FCC. Commission staff is expected to recommend within few weeks that FCC issue further notice of inquiry into limitations and procedures that should be observed in test of such venture.

FCC Commissioner Kenneth A. Cox disclosed staff work last week at same time spokesman for land mobile radio users was calling for reallocation of four lowest UHF channels to safety and special and common carrier services.

Jeremiah Courney, Washington attorney, urged those who use mobile radio to press vigorously need for more spectrum space in letters to, and contacts with, FCC members and their Congressmen.

Commissioner Cox and Mr. Courney spoke at meeting of Manufacturers Radio Service in Washington.

Still pending at commission is petition of National Association of Manufacturers for test of feasibility of sharing vacant channels 14 and 15 in Los Angeles with land mobile radio.

Taft earnings up 23% for year

Earnings per share for the fiscal year rose 23% at Taft Broadcasting Co., Cincinnati, according to company.

Taft operates radio and TV stations in Cincinnati and Columbus, Ohio; Birmingham, Ala.; Buffalo, N. Y.; Kansas City, Mo.; Lexington, Ky., and Scranton, Pa.

Fiscal year ended March 31:

Quinlan sees threat to FCC independence

Within decade FCC “will be hampered, hounded, locked in and made ineffectual by a Congress that is knee-deep in broadcasting investment,” Sterling C. (Red) Quinlan, WFLD(TV) Chicago, predicted Friday (May 20) in talk before Ohio State Broadcasters
WEEK'S HEADLINERS

Daniel T. Pecaro named VP and manager of programming for TV group stations of WGN Continental Broadcasting Co. Stations are WGN-TV Chicago, KDAL-TV Duluth and KWGN-TV Denver.

Paul E. J. Gerhold, VP and director of research, development and planning, J. Walter Thompson, elected chairman of Advertising Research Foundation, succeeding Dr. Peter Langhoff, who resigned from Young & Rubicam to accept presidency of American Research Bureau (Broadcasting, May 9). Mr. Gerhold joined JWT in 1964 after 13 years at Foote, Cone & Belding where he served as VP, media and research, and chairman of FC&B's New York plans board. He is former chairman of standing committee on market research of American Association of Advertising Agencies and former chairman of ARF's CIMA (committee on improving measurements of advertising) and technical committee.

Geoffrey Wade, formerly board chairman and major stockholder in Wade Advertising, Chicago, joins Interpublic Inc., New York, as VP and initially is assigned to Jack Tinker & Partners on vitamin products of Miles Laboratories Inc. Wade agency closed April 30 following loss of remaining Miles business to Tinker.

William G. White, director of media and TV programming for Cunningham & Walsh, New York, elected senior VP. Mr. White, secretary of operations committee for agency's internal administration, joined C&W in 1953 as assistant manager of timebuying department, was appointed associate media director and manager of media department in 1963 and elected VP last year.

For other personnel changes of the week see FATES & FORTUNES

Association meeting at Youngstown. He felt situation may become "major issue" in future presidential election.

Mr. Quinan also predicted liquor ads on air will be accepted in five years and that by 1973 government will start reclaiming VHF spectrum for other uses and will move all TV into UHF. He foresaw multiple ownership limit raised from present seven to at least 10. maybe 15.

Praise for radio and recommendation that broadcasters make self-promotion year-round project "not just one for radio month or certain seasons," came from Lionel Baxter, vice president, Storer Broadcasting's radio division.

Mr. Baxter pointed to radio's outstanding work during emergencies and urged all year campaign to sell importance of transistor radio in every home, private and public building. Campaign must be accompanied by drive to educate owners to be sure transistors are in working order, he added.

Radio moving to provide better research data

Radio is riding crest of four years of advertising gains and total volume of $889 million. Stephen B. Labunski, president, NBC Radio, told meeting of Iowa Broadcasters Association in Davenport Friday (May 20).

He stressed that radio is making rapid strides toward solving what advertisers consider to be medium's biggest problem: lack of meaningful research information.

Broadcasters were also told "good taste" should be controlling factor in broadcasting both cultural and commercial programs. Lloyd Griffin, president of Peters, Griffin, Woodward Television, New York, said national prosperity is television's first responsibility.

Although many feel commercial broadcasting poorly serves public interest, he said, "public interest is best served by money—spending money—the kind of money that keeps employment levels high in factories, offices, stores, mills, mines and farms—in all areas where people can be gainfully employed and so create individual family buying power."

Judge to view TV version

Having already viewed A Place in the Sun as it was shown theatrically (see page 62), Los Angeles Superior Court Judge Richard L. Wells decided Friday (May 20), to look at TV tape today (May 23) of March 12 telecast of movie on NBC-TV.

Decision was made in contempt of court case brought by producer-director George Stevens against network for violating court order banning commercial interruptions on TV that would destroy "artistic impact" of feature.

Broadcasting destroys bigotry

Receiving honor citation from Massachusetts Committee of Catholics, Protestants and Jews in Boston, Thomas F. O'Neil, RKO General board chairman, noted broadcasting's "unique opportunities to attenuate the ignorance and emotion that are prime ingredients of prejudice." RKO General Broadcasting's WNBC-TV Boston, and Yankee Network, are committed to public dialogue that will destroy ignorance and prejudice, Mr. O'Neil said.

He pointed out RKO General Broadcasting is pursuing plans for broadcast center in Boston, which he saw as further indication of community commitment.

See N.J. tavern ban lifted for beer, wine

New Jersey Broadcasters Association (NJBA) said Friday (May 20) that New Jersey Division of Alcoholic Beverage Control seems to have "looked benignly" on NJBA proposal to allow taverns and package stores to advertise beer and wine on radio and TV.

State body expects to issue formal statement in few weeks on proposed guideline for such non-liquor advertising, according to Arnold Zucker, NJBA executive secretary.

Although New Jersey allows wine and beer manufacturers to advertise on air, it forbids taverns and package stores to advertise same products, Mr. Zucker said. New Jersey does, however, allow taverns and package stores to use broadcast commercials for any restaurant or entertainment facilities they have.

Track dry—maybe

So what's new in TV? WnuX (tv) New York said Friday (May 20) it has rights to local diaper derby as part of package deal with Palisades Amusement Park. Station will tape "finalists" in baby-crawling contest on July 21 and play it at 8:30 that night as half-hour program. Babies begin "competing" on Memorial Day with weekly winners lined up for 50-foot crawl final in July. Borden's White Lamb Diapers, New York, will sponsor telecast. Needham, Harper & Steers, New York, is agency.
THE 18-49 SET

BIG SPENDERS FROM THE MIDDLEWEST

WHO-TV programming attracts the people who are in the best ages to be buyers.

If most of your dealers sell most of your product to consumers between 18 and 49 years old — WHO-TV is your best-bet television station in Central Iowa!

So if you're selling food, or drug-counter items, or automobiles, or anything else that's most heavily purchased by people in the 18-49 age bracket — please look us over.

Ask PGW for the whole story. It can help you substantially to increase your effective buying audience.

COLORFUL 13 • DES MOINES
Sixty million years of entertainment: one hour a week on Time Tunnel.
Miles beneath the surface of the great western desert is an amazing secret scientific installation: a tunnel that launches man in the great vortex of time itself. Beyond this electronic threshold lie all the adventure, drama, thrills and suspense of man's past and future. From prehistoric days to other civilizations in the limitless reaches of time. This is Time Tunnel. Created by Academy Award winner Irwin Allen, it stars James Darren and Robert Colbert as the daring young scientists who learn the incredible secrets hidden from the present. The starting time, four months into the future: Friday night, September 16, in color. Time Tunnel is one of the many exciting new and unusual ABC television shows now in preparation for Fall '66.

BUT . . . Sales Burgeon in the 39th Market with WKZO-TV!

The Grand Rapids-Kalamazoo and Greater Western Michigan area served by WKZO-TV is far from being a late bloomer: it's already the nation's 39th television market.

But it's getting even bigger —

WKZO-TV MARKET
COVERAGE AREA • ARB '65

and fast. In Kalamazoo alone, for instance, four new plants have created 7,200 industrial and service jobs, brought in over 18,000 new people, and added $25,000,000 to retail sales. And this sort of thing is happening all over our coverage area!

If you want your sales to blossom and flower in this rich and growing market, now's the time to be investing seed money on WKZO-TV. Your Avery-Knodel man can tell you how widely and well we cultivate consumers all over Western Michigan.

And if you want all the rest of the state Michigan worth having, add WWTV/WWUP-TV, Cadillac-Sault Ste. Marie, to your WKZO-TV schedule.

†The 40-lb. seed of the double coconut is the world's largest.
†ARB's 1964 Television Market Analysis.

DATEBOOK

A calendar of important meetings and events in the field of communications.

Indicates first or revised listing.

May 24—Special meeting of stockholders of Metro-Goldwyn-Mayer Inc. to consider a proposed amendment which would result in a 2-for-1 stock split. Hotel Astor, New York.

May 25—Deadline for comments on FCC's proposed amending of rules governing construction, marking and lighting of antenna structures. New rules would permit more expeditious handling of antenna tower applications and in particular would require applicants to file a statement certifying to the accuracy of the geographic coordinates.

NAB RADIO PROGRAM CLINICS

May 23-24—Fayfair Lennox Inn, St. Louis.
May 26-27—Radisson hotel, Minneapolis.
June 6-7—Hilton Inn, Tarrytown, N. Y.
June 9-10—Sheraton hotel, Fort Lauderdale, Fla.

May 31—Deadline for comments on the FCC's rulemaking proposal looking toward adopting new field strength (propagation) curves for the FM and TV broadcast services. The proposal would update the F (56,60) curves now in use to take advantage of additional measurements, especially in the VHF television band.

May 31—Eight annual dinner-awards telecast of Chicago chapter, Academy of Television Arts and Sciences. Emmy awards on WBBM-TV Chicago at 9 p.m. Martineque Restaurant and Drury Lane theater, Evergreen Park, Ill.

JUNE

June 1—New deadline for comments on FCC's proposed rulemaking which would authorize TV translator operators to use microwave relays to bring in TV signals.

June 1—New deadline for reply comments on FCC's proposed rulemaking to limit three major networks (ABC, CBS and NBC) to equity holdings in no more than 30% of all non-news programming between 6 and 11 p.m., or to two hours of non-news programming in same period, whichever is greater. Proposal would also prohibit three TV networks from domestic syndication and foreign sales of independently produced programs. Former deadline was May 16.

June 2—Luncheon of the Broadcasting Executives Club of New England. Theme is: "The critics meet the broadcasters." Bos- ton newspaper TV critics will address the luncheon. Sheraton-Plaza hotel, Boston.

June 2—Special meeting of stockholders of Doyle Dane Bernbach Inc. to consider and act upon a proposed two-for-one stock

BROADCASTING, May 23, 1966
New advances in telephone service promise to make your daily life easier, and give you still more command of your personal time and energy.

One advance is today's Touch-Tone service—the push-button means of placing calls that is now being introduced in many areas.

These buttons will not only let you call your bank, for example, but may someday put you "on line" into your bank's computer in order to pay bills, verify deposits, and use revolving credit. There are many such "input" uses for these ten little buttons.

Another big step forward is the Electronic Switching System, which in the years ahead will be handling almost all phone calls. The first ESS office went into operation last year and more are being added.

Spurred by what we have learned from Electronic Switching, we are now adapting existing equipment to test new optional services that...switch your calls to your host's home for the evening...add a third phone to a conversation...hold one call on your home phone while you answer another.

Picturephone service that lets you see while you talk will add visual enjoyment to your calls.

There is no end to telephone progress. As new service needs arise, new Bell System thinking will meet them.

For the Bell System is simply people at work for other people, to make communications serve better in many more personal ways.
Joe Pyne gets high ratings
KTTV proved it...ran 3 up to a 28

Yes—Joe Pyne against the most potent blockbuster features the opposition could program, zoomed from a 3 to a 28 and Joe Pyne will do it for you. Call before your competition does.

Call Mr. Joe Peeples, V. P. Hartwest Television, Inc.
65 West 54 St., New York 10019 Telephone: 212 JU 6-7272
June 23—Annual summer meeting of Alaska Broadcasters Association. Speakers include Vincent T. Wasielowski, president of National Association of Broadcasters, Cordova.

June 3—Annual spring meeting of North Dakota Broadcasters Association. Speakers include George W. Bartlett, vice president for engineering. National Association of Broadcasters, Edgewater Inn, Detroit Lakes, Minn.

June 4—Deadline for reply comments on FCC's proposed amendment of rules governing construction, marking and lighting of antenna structures. The 20-foot spacing rule would permit more expeditious handling of antenna tower applications and in particular would help address criticism of fine arts degree and will deliver the comment, will elude William E. Walker, consultant.

June 5—Commencement exercises at Washburn University. Robert W. Sarnoff, RCA president, will receive an honorary degree and will deliver the commencement address. Topeka, Kan.

June 9—Annual convention of the Armed Forces Communications and Electronics Association (AFCEA) in Washington, D.C. Speakers will be Dr. Hans K. Ziegler, chief scientist, U.S. Army Electronics Command; Leo Cherne, executive director, Research Institute of America; Dr. Edward C. Welsh, executive secretary, National Aeronautics and Space Council, Sheraton Park hotel, Washington.

June 6-8—Broadcasters' summer promotion convention sponsored by the Broadcasters Promotion Association in cooperation with the University of North Carolina, Chapel Hill. For information write H. Tallman Miles, 4100 City Line Avenue, Philadelphia.

June 10—Annual spring meeting of Vermont Broadcasters Association. Speakers include FCC Commissioner Robert E. Lee, Cupola motel, Burlington.

June 7-10—Broadcasters' European Symposium. Details are available from William J. Balli, director of television, University Center, Mich.

June 10—Deadline for reply comments on FCC's rulemaking proposal looking toward adaption of service strength (propagation) curves for the FM and TV broadcast services. The proposal would update the F (service strength) rule to take advantage of additional measurements, especially in the UHF television band.

June 12-14—Annual summer meeting of North Carolina Association of Broadcasters. Speakers include Howard Bell, codirector of National Association of Broadcasters; William Carlisle, NAB vice president for station services. Jack Tar hotel, Durham.

BEELINE® COUNTRY...
AWFULLY BIG IN AGRICULTURE

...and BEELINE RADIO KBEE is a proven way to meet this important market

Just about everything grows fast in Beeline Country... including sales. Find out for yourself. Put your sales message on Beeline Radio KBEE and take full advantage of the $378,746,000 2-county Modesto market. KBEE is just one of four Beeline stations and a key to California's rich Inland Valley.

"Fascinating...Remarkable...Revealing...Perfect"

Two Monday nights ago, NBC News presented "The Hill Country: Lyndon Johnson's Texas." The President himself, accompanied by NBC News correspondent Ray Scherer, conducted this informal tour of his home region.

The response of the nation's newspapers to this unprecedented special was extremely enthusiastic. A few representative comments:

"The sources of the rise of Lyndon B. Johnson to the Presidency were identified with remarkable clarity in the NBC televised program... Ray Scherer's quiet reportorial technique was perfectly adapted to the purpose of the program."

—ARTHUR KROCK, NEW YORK TIMES
"...Fascinating television documentary, and one—obviously—of historic importance. Never before have we had this kind of a leisurely, spontaneous record."  —CYNTHIA LOWRY, AP

"A pictorially superb NBC color documentary... A relaxed, pleasant, personally conducted tour... The overall effect of the interview was to give a more complete picture of the man."  —KAY GARDELLA, NEW YORK DAILY NEWS

"Its charm was in the projection of an image of the President few Americans have seen."  —ELEANOR ROBERTS, BOSTON TRAVELER

"An exceptional piece of genuine Americana... The natural, off-the-cuff approach, played off a veteran reporter [Ray Scherer] with whom he seemed distinctly at ease, was the perfect choice for Mr. Johnson."  —RICK DU BROW, UPI

"[The program] will have value to generations of history students and biographers. A warm, intimate, revealing portrait of the President."  —LARRY LAURENT, WASHINGTON POST

"Fascinating... The President never has shown to better advantage on TV... A delight."  —JAMES B. FLANAGAN, CLEVELAND PLAIN DEALER

"...An effective representation of the frontier environment in which the President said he felt comfortable."  —JACK GOULD, NEW YORK TIMES

"Television viewers... had an opportunity to get to know their President as never before."  —JOHN M. CUNO, CHRISTIAN SCIENCE MONITOR

"...An effective representation of the frontier environment in which the President said he felt comfortable."  —JACK GOULD, NEW YORK TIMES

"Television viewers... had an opportunity to get to know their President as never before."  —JOHN M. CUNO, CHRISTIAN SCIENCE MONITOR
Gets a belt out of Hix

Editor: Your May 9 editorial cartoon is the greatest!

As Hickok made its first real venture into spot TV last fall with excellent sales results, Mr. Hix’s artwork is especially apropos to our situation. Would it be possible to obtain the original of this cartoon to hang in a place of honor in our advertising division?

I enjoy your publication very much.
—Richard J. Braun, advertising media coordinator, Hickok, Rochester, N. Y. (Original is enroute).

Doesn’t see a debt

Editor: Your May 16 editorial on the audience rating for Death of a Salesman gets to the nub of the problem, although it does miss the point.

While it is true that the 70% of the TV audience watching other programs should not be disenfranchised, too often the 30% which prefers something other than trash has no place on the dial to which to turn.

This 30% does not owe CBS-TV a debt of gratitude. Let us not forget that the airwaves belong to the public, and the stations operate under a franchise granted by the public. The networks have an obligation to see that a minority audience gets the type of programming it wants, and in prime time, as part of their cost in enjoying the privileges that go with the license.

Bible-reading station folks

Editor: On the basis of the tremendous comments I got on the May 9 article [40 years at NBC: A Special Report], Broadcasting certainly has a high level of readership.

I’ve done a lot of traveling to the stations recently and your magazine is certainly their bible. Their comments on your excellent coverage is a wonderful indication of how good your magazine is.—Nancy M. Saltkin, director, corporate color information, NBC, New York.

Manny’s pen pals

Dear Manny: I have just finished reading the “Week’s Profile” about you in the April 25 Broadcasting, and I must say that I think your hobby of letter writing to your friends around the world absolutely delights me.

I feel that unfortunately the art of letter writing is fast dying and am glad to think that, in this day and age, a man as busy as you would have the time to sit down and graciously communicate with his friends throughout the world. Inspired, I drop you this note.—Bruce Gyngell, general manager, Television Corp., Ltd., Box 27 P.O., Willoughby, Sydney, Australia.

Too good to miss

Editor: The May 9 (“Week’s Profile”) about Don Fedderson is an exceptionally fine piece. Would you be good enough please to send a dozen extra copies and, if possible, perhaps 50 reprints or tear-sheets?

This is just too good a story to let lay, and I’d like to make sure that a number of people who might have missed the story for one reason or another, will read it.—J. L. Kaufman, Don Fedderson Productions, Hollywood.

McGoff not with AWARE

Editor: Your May 16 profile on Panax President John P. McGoff was a complete and accurate summary with only one correction...

Mr. McGoff was a co-founder of AWARENESS INC., a nonprofit educational foundation which produced and sponsored radio programs which dealt with the arts and was entirely cultural by nature.

Your article mistakenly connected Mr. McGoff with AWARE which was politically oriented and with which he never had any association.—Clarence E. Rhodes, vice president, Panax Corp., East Lansing, Mich.
End of the Rainbow

Color banding is a thing of the past when you record color television with a Westel* Recorder. Banding is due to phase mismatching between the heads of any multi-head video recorder, and is virtually impossible to eliminate for long—even on specially-tweaked machines. The Westel System sidesteps the issue neatly by recording video signals with a single head so that the problem can never come up. A lot tidier than adding a rackful of compensating electronics, don’t you think?

How come everyone else is still doing it the hard way? Because Westel has invented the only method so far that makes possible a broadcast-quality single-head television recorder. It’s called the Coniscan* System. Instead of wrapping the tape around a cylindrical scanning drum, it is wrapped around a three-piece conical mandrel. Interesting what this lets you do. You can overlap the edges of the tape slightly without distorting it and achieve three things: minimal head drop-out time; elimination of edge effects; and, room for control and audio tracks without erasing any of the recorded video information. All possible with a single-head recorder for the first time. These and other advances that have made the Westel Recorder the first professional broadcast-quality single-head machine are clearly explained in our brand new 20-page illustrated brochure. Westel Company, 298 Fuller Street, Redwood City, California 94063
In radio, think FINK: Feed Imagination New Knowledge

Watching television is one of the world’s best ways to find out what’s good about radio. Watch the local news shows with on-the-spot interviews and see what happens to the average man when a TV camera is pointed at him.

You take a normal, everyday American, put him in front of a TV camera and he’s no longer himself. He freezes at the controls, becomes stiffled and unreal. But radio is the relaxed and human vehicle—flexible and unpretentious and uncomplicated.

Now, that may be the number one thing we must remember about radio if we are to use it more effectively. It’s simply: radio talks to people.

There is no surer, better, more intimate way to communicate with anyone than through their ears. My generation listened to Uncle Don, Jack Armstrong, The Fitch Bandwagon, Vic and Sade, Fred Allen and we didn’t just hear them. We saw them, in 3-D and glorious compatible color, in our minds.

The ENO Crime Club or Ellery Queen scared the hell out of us more than anything Alfred Hitchcock or Outer Limits or Twilight Zone can ever do on the big picture tube. Radio’s power to communicate was enormous and it still is. But there is now an entire generation of men and women working in advertising and marketing who never learned this about radio first hand. They never heard of Inner Sanctum or Let’s Pretend, or Armstrong’s Theater of Today. They never experienced at an early age radio’s incredible power to communicate pictures and emotions as well as words.

Forgotten Knowledge • The youngsters have something to learn about radio and the rest of us have something to relearn, which is why I think local radio creative workshops held jointly by ad clubs or agencies and stations, can be of great service.

For, imagination without knowledge is as dead as faith without good works. And if we are to make more creative use of radio we must learn more about the medium, find out more about the stations at our disposal, their programs, their audiences. The truth is there are account and media men at every one of our agencies, their heads crammed full of this knowledge, while the creative people sit around with nothing but the imagination necessary to do something with it. This is a shame.

Let me give you an example of what can happen when you feed imagination new knowledge. For years the knowledge of radio was kicking around the brewing industry and the marketing departments of its agencies that 20% of the customers drink 80% of the beer. When somebody finally fed this information to the right creative people the result was one of the most effective and certainly one of the best-known regional beer campaigns in history: Schaefer is the one beer to have when you’re having more than one.

Pepsi-Cola uses a lot of radio. There are 500-and-some Pepsi-Cola bottlers across the country. Every one of them is a local businessman. Some of them in certain seasons buy as many as 300-400 radio spots a week. They buy them like jellybeans and break the bag. Now these guys are hard-nosed businessmen. They spend so much of their money in radio only because it gives them so much in return.

Now they spend an awful lot of money in television. They put an awful lot of dough in newspapers. They’re on three-sheet posters and truck-backs, but they never leave radio and for one simple reason: It works. And it does one thing better than any other advertising medium ever devised. It talks to people.

And that in my mind is the whole secret of radio. All you have to do to use it wisely, whether you’re selling soup or cigarettes or soft drinks or you name it, whether you use music or sound or simple speech, is to talk to your audience. Talk to them by the millions until you’re talking to them one at a time because that’s the way they’re listening. Give them something in return for their attention, something that an adult human being will be willing to spend 70 irrevocable heartbeats to listen to, something they can see in 3-D, in color, in the theaters of their minds, something for them to think about.

If you’re an advertising writer, I commend radio to you as a medium that can offer you more creative freedom than any other, freedom from TV’s swarms of technical experts, freedom from new wave art directors—he’s the kind that just had his hair done—freedom from print’s static vulnerability. Radio doesn’t just stand there like a four-color proof begging to be nit-picked into appalling mediocrity.

An Appeal • Let me deliver a short commercial urging creative people to write commercials.

Attention playwrights, unfulfilled geniuses, humorists, composers: Come right to the theater, the greatest theater of them all, the theater of the mind. Write for radio, the land of the Free-burgs and the home of the rave reviews.

But before you start, do your homework first. Remember that creative people are problem-solvers. They arc somewhat like electronic data processing machines in that the work that comes out of them can be only as valid as the knowledge fed into them.

So, writers, get out and dig for facts. Pry knowledge from your clients and account men and media people and radio station salesmen about your product and your radio stations and your markets and your audiences. Cram your minds with information.

I want you to remember the word FINK so you won’t forget my message. It’s the only message I’ve come to give you. Any time you use radio and want to use it more creatively and more effectively as an advertising medium, think FINK—F-I-N-K. Feed Imagination New Knowledge. All it will do is work wonders.

Richard J. Mercer is vice president and associate creative director of Clyne Maxon Inc., New York. He’s responsible for the creative work on the Gillette Technichem razor and Lanvin-Charles of the Ritz accounts. Before joining Maxon last February, Mr. Mercer was VP and associate creative director of BBDO for 17 years. The accompanying is adapted from his appearance April 18 before a luncheon meeting of the San Francisco Radio Broadcasters Association.
When WRVA-RADIO aired “A Child is Waiting”... unwanted children became wanted.

Even a couple in Clarkston, Michigan, wanted to know how they could adopt a child through the Children's Home Society of Virginia. So well-presented was WRVA's special series on the Commonwealth's homeless children.

The number of “prospective parent” applicants at the Children's Home Society increased 50 to 60% per month after the series was aired in November, 1964. During the following year, a total of 726 inquiries were received, 239 applications filed, and 205 babies placed in homes throughout Virginia.

That's effective editorializing.

Nothing's beyond your reach on Mutual Radio

The fairest prize of all is within your grasp on Mutual. The home-maker! She's forever busy buying... and forever listening to radio!

Mutual reaches her by the millions! In 97 of the top 100 markets. In over 300 exclusively Mutual markets. In over 500 markets coast to coast.

If you want to woo and win fair ladies... start climbing—with Mutual!
National radio back in big time

Sales of spot and network increase briskly with spot up an estimated 19% and network definitely up, although the exact percentage is hard to determine.

National radio sales, spot and network, are gathering momentum at a rate substantially brisker than any that the business has experienced in recent years.

This conclusion appeared inescapable last week on the basis of a Broadcasting sampling of leading station representation firms, the four national radio networks and top advertising agencies.

The reps reported spot radio sales this year ranging from 4% to 35%—and averaging almost 19%—higher than those for comparable years ago.

The networks indicated they were on the verge of new records for recent years.

Agency officials were wary about figures but generally confirmed an increased commitment to—and a much increased interest in—the radio medium (see page 29).

Television costs, difficulty in finding choice TV availabilities in many cases and a mounting volume of demographic and related research on radio audiences were among the factors most frequently cited for the surge in spot radio.

They Made It Possible—Mounting radio investments by the bellwether soap companies, once the mainstay of radio but largely out of it in recent years, and by automotive and cigarette advertisers were also seen as important contributors to the rise—not only for the dollars they themselves represent but also for the examples they set for competitors and other advertisers.

Whatever the causes, they were said to be producing campaigns with longer flights, more 52-week business and greater use of radio for new-product introductions, as well as bigger lineups and heavier frequency.

The findings were not universally upbeat. Spot radio’s gains appeared to be concentrated largely in the bigger markets. Some reps said the top 40 or 50 markets were getting the bulk of the increase, others said not many below the top 30 were getting a full share of it.

Generally, however, it was felt that the resurgence was filtering down to smaller markets to some extent, and in any case it was emphasized that—as always—activity varies from market to market and sometimes among stations within the same market.

The 1966 spurt in spot activity follows a year in which, according to Radio Advertising Bureau figures being released today (May 23), spot radio sales moved ahead by about 5%, reaching a total of $255.7 million (see page 30).

RAB is Pleased—The 1965 report and 1966 outlook for spot prompted Miles David, president of RAB, to write thank you letters to leading advertisers, suggesting they “buy radio a year in advance, making a planned corporate buy.”

In the letters going out today, he says that “we are fast approaching the time when radio may not be able to accommodate completely all of the national and regional advertisers who want to use the medium.”

He called attention to Colgate’s $4 million expenditure in spot radio in 1965, almost tripling its 1964 investment, and increased activity by Procter & Gamble ($1.2 million in 1965) and, more recently, by Lever Brothers as signs that package goods giants are beginning to rediscover radio.

“As this re-entry gathers momentum,” he wrote, “effective radio buying will more and more require a long-range plan.”

Long-range buying would also give advertisers more time for better communication to their brokers, distributors and sales forces regarding radio advertising plans, he added, and would ease the agency’s administrative burden, perhaps stimulating “greater investment on the part of the agency in more creative buying and creative com-
NATIONAL RADIO BACK IN BIG TIME continued

mericals."

Year-ahead buying would not require 52-week advertising if an advertiser didn't need it, Mr. David said, noting that orders could be placed to include "blank weeks" and that extra frequency and depth could be added to meet "sudden marketing needs."

"We believe that the days of close-to-the-deadline buying are on the way out and that this would be a good time to start building a corporate buying plan for 1967, just as advertisers now plan use of TV corporate buys long in advance. We think the plan should include all types of radio time—morning, afternoons, evenings, weekends."

Shortage of Time • The RAB president also said that on a recent extensive tour of major markets he found "an unprecedented number of stations who were having difficulty in supplying time for the number of advertisers now ordering radio."

Broadcasting's canvass indicated that the four radio networks have more than recovered from the 1965 slowdown that produced, according to RAB figures gathered from the networks themselves, A 1% decline in their total business last year (Broadcasting, May 9).

President Robert R. Pauley predicted ABC Radio's 1966 sales would reach the highest point in eight years. Sales for the first four months of 1966, he said, are up 23.5% over the comparable 1965 period.

George Arkedis, sales vice president, said CBS Radio appears headed for its best sales year since 1958. He estimated that as of last week business was 28.4% ahead of the same time last year and that sales already on CBS Radio's books as of last Thursday represented 96% of the 1965 full-year total, with over six months of selling yet to go.

A spokesman for Mutual said his network expects to show a sales gain of about 20% for the first half of 1966 and that this would represent a continuation of a gain pattern that Mutual has experienced for several years.

President Stephen B. Labunski said NBC Radio's net time sales for the first six months are up and are with 1.2% of the best first half since the 1960 introduction of a new program format. NBC's weekend Monitor, service, he said, is 13% ahead of last year's first-half sales. Despite substantially higher costs, particularly in news, he said, NBC Radio's first-quarter profits were significantly greater than for the first quarter a year ago.

Representatives Report • Following are typical reports on this year's spot radio business as offered by leading station reps:

The radio vice president of a major independent rep organization predicted a handsome 30% for his combined station list and said that unquestionably there's an expansion of monies being allocated to spot radio industry-wide.

This official said that, as in the past, the bigger markets are getting bigger shares and that there appears to be a clear break after the top 35 markets, with areas below that getting little or none of the increase.

A spokesman for another of the largest independent rep firm said radio business for the first four months was up, in the aggregate, by 25 to 30% if billings of several stations new to the rep this year were included. Ruling out accruals from these new associations, the company was still up 20%, he said.

He thought some of the gain for the whole spot radio field had been at television's expense.

The president of a major group-station rep firm described a new agency-advertiser attitude toward spot radio. It has graduated, he said, from perfunctory polite treatment for the time salesman to an "I want to be shown what radio can do for me" approach.

This rep expects to be up overall by at least 15% in sales for the first six months. Firm four-month figures show his volume ahead of the same period last year by 15%.

Better Viewpoint • He spoke excitedly of an "upbeat" attitude for the medium and said the reasons are several. First, he said, a closer look is being taken by advertisers at their television expenditures. "They're beginning to find out where the bodies are buried," he said.

The agencies are now getting far more information about the efficiency of their buying, he went on, and they're processing data more efficiently with the aid of computers. The same rep official said some key pieces of radio business are coming from the older and more experienced media buyers, suggesting that a younger generation of buyers that has grown up with television doesn't share the same perspective on the broadcast media.

The executive vice president of another large firm said business has been "exploding" in the first four months of this year. Business has been particularly strong on automotive, cigarette and soap accounts, he reported, and an encouraging sign has been the use of spot radio for new-product introductions.

The reason for the upsurge? He expressed the view that the cost of television to advertisers and agencies is causing some of them to reexamine the use of other media. Radio, he continued, is gaining a portion, albeit a comparatively small chunk, of this media spread.

The volume of spot radio sales at another large representative was reported to be approximately 35% ahead during the first four months of 1966 as compared with 1965. He felt the basic factor was that advertisers and agencies are realizing that "spot radio makes too much sense to be ignored."

Contributing to this new attitude,
 Agencies support rep claim of radio's surge

Advertising agencies confirmed last week, albeit more softly, what representation companies had declared without question—that national spot radio is enjoying a new billing surge in 1966.

Agency media officials checked by Broadcasting generally cited the attractive price of radio relative to other media, especially spot and network television, as a principal cause for its good showing in the first half of this year. And they indicated no reasons to suggest the growth would not continue.

New-product introductions relying to a greater degree on radio, more extensive and sophisticated computations of comparative media values, a heavy influx of teen-age directed products and longer and bigger campaigns by radio's biggest users, were all mentioned by agencies as leading to the medium's current happy status.

The Buyer's View • Among agency comments on new advertiser interest in radio were the following:

Mort Keshin, vice president and media director of Lennen & Newell, said his agency is more involved with spot radio than it has been in years. L&N, he said, is pleased with radio's efficiency and frequency values for us as a supplement to television. He added that radio generally is staging a comeback, pointing out that network radio is also being used by L&N on a more substantial scale. Research generally has improved, he said, and with additional refinements, radio should be stronger in the years ahead.

A vice president in media at Sullivan, Stauffer, Colwell & Bayles said he had made a recent study of spot radio spending and that it is indeed showing new advertiser interest. He suggested more money is going into radio to reach teen-age audiences since there are more products coming on the market directed at that segment of the population. He also referred to "exorbitant prices" of television, both network and spot, and said he is seriously considering advising some clients to cut back TV spending. Some of this surplus, he noted, might be directed to radio. This hasn't happened yet at SSC&B but it very well could, he said.

Jack Caplan, vice president and associate media director of Kenyon & Eckhardt, said that K&E has developed a keener appreciation of spot radio's values over the past year and that it has been investing in the medium on what is considered a fairly substantial basis.

He noted that in some major market areas, where TV time is tight or the available TV period does not fit marketing situations the agency has used spot radio in combination with TV spot and achieved satisfactory results.

Mr. Caplan felt one factor contributing to increased recognition of spot radio is the research information now available. Emphasis on demographics is yielding new data on specialized audiences within radio markets, he reported, and information on the teen-age segment is particularly useful.

A spokesman for J. Walter Thompson thought spot radio should have a stronger year in 1966 than in 1965. According to this agency official radio remains attractive to advertisers as a flexible medium, accommodating rapid buying to meet needs of the moment.

The media director of one agency, less bullish about the medium's outlook, said spot radio billing from his organization should be "somewhat higher" than in 1965 and added that more consideration is being given to it than in the past. He believes spot radio can give good results but criticized what he considers radio's tendency to "too much negative selling, too much selling by one station against the other."

The View Across the Street • Radio representatives were asked by Broadcasting to name agencies that appeared to be stronger this year in spot radio orders. Among those mentioned most frequently were BBDO, Young & Rubicam; Sullivan, Stauffer, Colwell & Bayles; J. Walter Thompson; William Esty; D'Arcy and Grey.

Ford Motor Co., through JWT, reportedly has picked up significantly in radio buys this year. The tobacco industry was said to be making substantial new radio expenditures; including American Tobacco, through SSC&B, and R. J. Reynolds through Esty.

A Lever Brothers campaign for Sunshine Rinso, through JWT, was heavily supported in spot radio.

Colgate was singled out as an outstanding example of a heavy spot user for both new and old products. Procter & Gamble is moving back into the medium and is expected to reinforce its effort.

United Biscuit, through Young & Rubicam, was cited often as a substantial spot user. One rep noted it started to become active during the last quarter of 1965 and continued to spend heavily, using up to 50 markets on campaigns.

The apparel field was cited as one that is perking up for spot radio. Current and recent spot spenders in this area have been Burlington House, Russ Togs, HB Slacks, Wrangler Jeans, Hanes Corp. (hosiery) and DuPont Crestrene (nylon substitute).

Other spot spenders cited were Sylvania Electric, Tidewater Oil Co., American Express Co., and Equitable Life Assurance Society.

He said, are expanded and improved demographic information; quintile studies showing that TV does not reach everybody and the use of radio by such major advertisers as Procter & Gamble, Ford and Colgate.

Tops for Spot • Spot radio buys are largely concentrated in the top markets with campaigns centered in the leading 30, 40 or 50 areas of the country, he reported, but said some are filtering down to medium-sized sectors.

"We are having our best year in five years," according to the sales manager of a firm specializing in a comparatively short list of major-market stations. "We are well over the goals we have set for the first four months of the year, and May should be a record month for us."

Business on the whole is 12% ahead of last year at this time and March and April were particularly fine months, he reported. He offered this explanation: "The soaps are coming back; automotive, including accessories and tires and gasoline, are buying more than ever; there are more 52-week contracts in the house than in recent years."

He pointed out that some advertisers are using spot radio in combination with network TV, particularly in the top 20 and 30 markets, to provide frequency in support of their network buys.

Another leading radio rep estimated that his business on the average is about 33% over the figure for the first four months of 1965, with several major markets registering gains up to 50%.

He ventured that at least part of the increase came from expenditures that
normally would have gone to television and another part accrued from advertisers extending their radio schedules to 52 weeks a year.

Business has been particularly brisk from auto, cigarettes and oil companies, he said. He also noted an upward swing from companies in the apparel field.

Selling Brisk - Sales have been running exceptionally well at stations programming the top 40 format, he reported. The large proportion of dollars are going in the first 50 markets, he added.

Representatives specializing in medium-sized markets estimated that sales for the first four months of 1966 averaged 12% over the same period last year. He voiced the opinion that more and more package goods advertisers have become aware of the value of spot radio after years of selling and promotion.

This firm represents a substantial number of country-and-western music stations. The spokesman said advertisers are recognizing that the “new kind” of C & W music is well-orchestrated and sophisticated and can deliver all types of audiences at a reasonable dollar investment.

Another independent firm, representing close to 50 radio stations, said business for the first four months gained 17% over the same period last year. According to this firm, spot radio

Spot radio totals $255 million in 1965

Advertisers in 1965 spent an estimated $255.7 million (gross time costs) in spot radio, a 5% gain from 1964's level, the Radio Advertising Bureau is reporting today (May 23). Of that amount, $213,831,000 was spent by the top 100 advertisers in the medium (see following list).

The bureau's estimates were accompanied by compilations of expenditures by the 100 leading spot radio advertisers and by individual brands.

In releasing the listings, Miles David, president of RAB, noted sharp advertiser activity in automotives and soaps especially. The big-three auto companies—General Motors Corp., Chrysler Corp. and the Ford Motor Co.—spent a total $40.4 million in spot radio last year, a $5.5 million increase over the total investment of the three in 1964.

Although Procter & Gamble, he said, was “not even within the top 100 in our 1964 listing,” it was 49th last year by investing $1,218,000 in spot radio. Mr. David noted that Colgate-Palmolive, another major soap company, nearly tripled its spot radio spending by moving up from $1.7 million in 1964 to more than $4.3 million in 1965. Lever Brothers, which failed to make the top-100 list in spot radio last year, Mr. David said, should make the grade in 1966 based on its current activity.

Mr. David, who a year ago January had pointed out the surge developing with these three major soap companies in radio, said current data indicated “a number of important targets for further growth”—among them, appliances, apparel, package goods, and financial. These are areas, he said, where the bureau intends to increase its selling effort.

He noted that radio's stability hinges on gains that encompass "the widest variety of advertiser categories," adding that efforts must be continued to "encourage new accounts . . . and at the same time maintain and upgrade current advertisers."

Both network and spot radio data are compiled for RAB by the accounting firm of Peat, Marwick, Mitchell and Co. from reports of station, networks and station representatives.

BROADCASTING, May 23, 1966
Doesn’t scare us.

When you’ve been airing everything from the morning inspirational message to the station sign-off in full color for nine years, you get to know one end of a color camera from the other. And you get to know a few other things, too. Like the fact that a bunch of fancy equipment doesn’t make a great color station. WFGA-TV is a great color station because it has a fantastically competent, talented, and experienced staff to handle the fancy equipment. No, color doesn’t scare us, but our record as a color station might scare a few other broadcasters. Talk to your PGW “Colonel” about WFGA-TV.
RAB fall sessions set; Schneider in charge

"Professionalism in Radio Station Management" will be the theme of the Radio Advertising Bureau's 1966 fall series of management conferences, according to Miles David, RAB president.

Mr. David said the six-day sessions, set for September and October, will be coordinated by Sam B. Schneider, newly appointed RAB director of management services. Mr. Schneider has worked in sales management posts for such station rep firms as Crosley Broadcasting Corp. and its Broadcast Communications Group Inc.

For five years he served as corporate sales executive at KVOO Tulsa, Okla.

The 16 1966 meetings will feature split sessions (where market size is oriented to executive needs and sales problems) and guest speakers (a station executive's specific views on topics related to management and sales).
HAVE YOU LOOKED AT CHARLOTTE LATELY? Cultural and sports center; industrial, distribution and retail sales leader of the Carolinas. Charlotte has highest family income of any metropolitan area in the Southeast—32% above U.S. average. With WSOCTV you sell not only Charlotte, but its entire market. Nearly 3 million consumers live within the influence of this great area station. Ask us or H-R to tell you about our news, sports, children’s and family-fare programming. For programs, participations, packages, we believe you will see that you’ll do better in the Carolinas with WSOCTV.

NBB/ABC — Represented by H-R
Agency appointments...

- Northern Laboratories, Manitowoc, Wis., names Sander Rodkin Advertising, Chicago, to handle national advertising for Charm and Capri lines of toiletries. Spot radio will be used.
- Ronson Corp., Woodbridge, N. J., names McCann-Erickson, New York, as agency for flame products including table lighters effective July 15. Account bills about $2 million and has been handled by Smith & Dorian, New York.
- The Edward W. Brooke for United States Senator Committee (Mass.) has appointed Hoag & Provan Inc., Boston, to handle its radio and television.
- Knoll Associates (subsidiary of Art Metal Inc.), New York, has named Chirurg & Cairns, New York, for trade and consumer national advertising of furniture and textiles.

Rep appointments...

- KLB-AM TV Lubbock, KPAR-AM Abilene, Sweetwater and KWAB-TV Big Spring, all Texas: National Television Sales, N. Y.
- WDEA Ellsworth, Me.: William A. Queen Inc., Boston.

Domino sugar to leave Bates

American Sugar Co., New York, is breaking off its 18-year relationship with Ted Bates & Co., New York, and will reassign an estimated $2 million Domino account to a new agency. The account bills close to 70% in broadcasting. Until a new appointment is announced, Bates will continue handling the advertising.
Have You Noticed How Summer the West Sounds Today

Here
Emerald Bay,
photographed with its own sound
of sea, the hot sun ringing silence
...like you remember when
you close your eyes.

and Hear
KRLA,
the sort of sound that
makes you want to
open the windows and
turn on Summer
all over the bloomin' world.

KRLA/Los Angeles' listened-to radio station.

Object of SRA's affection: Bahr, Millar

BLANC SERIOUS ABOUT FUNNY MATTERS AT LUNCHEON

Warren Bahr of Young & Rubicam and William H. Millar Jr. of Geyer, Morey, Ballard, both of New York, were presented the Station Representatives Association's top advertising awards at its ninth annual awards luncheon in New York last week.

Francine Goldfine of Arthur Meyerhoff Associates, Chicago, had earlier been named to receive SRA's Chicago Timebuyer of the Year Award.

Mr. Bahr, senior vice president of Y&R, received the Gold Key Award for leadership in advertising. The award is presented annually to an agency executive who formerly was a timebuyer. Mr. Bahr met that qualification starting in 1954, three years after he joined Y&R. He rose through the media department to become vice president in 1960 and senior vice president in 1964.

Mr. Millar received SRA's Silver Nail Timebuyer of the Year Award, created by SRA in 1958 to honor veteran buyer Frank Silvernail upon his retirement from BBDO. Mr. Millar started with W. A. Ayer & Son in New York in 1949, serving as a media buyer for four of his nine years there. He then was with Lambert & Feasley for about five years on the Phillips 66 account, moved to J. Walter Thompson Co. for a year and joined GMB in 1963.

HUMOR That Flops - The May 16 awards luncheon, heard Mel Blanc, the voice of countless commercials, movies and programs, who now heads his own commercial production company, warn against "humorous" commercials that aren't.

There is more humorous advertising now than ever before, he said, but there is also more bad humor.

"It is appalling to me to find that most radio advertisers use print and television concepts," Mr. Blanc asserted. "Humorous radio is at its best when it can create situations and atmospheres which are impossible with any other medium. In radio advertising, you don't want people talking about an event, you want to hear the events themselves, and especially when humor is used.

"If the advertising concept is strong, and the humor produced and written with taste, it will work and create impact for any kind of a product or service."

He cited his company's work for Bachman-Jack's, a moderate-sized maker of snack items, as evidence that creative commercials can create business for radio as well as its clients.

"The campaign called for four commercials and the radio budget allowed for time was $100,000," he said. "By the time we were through with the first series of commercials it had grown to eight and Bachman-Jack's was spending $400,000 to put them on the air."

Among other commercials he played for the luncheon audience was one for Hebrew National meat products in a campaign that lifted sales 28% within 13 weeks of our first spot hitting the air."

Lloyd Griffin of Peters, Griffin, Woodward, president of SRA, presided at the luncheon. The awards were presented by Edward P. Shurick of H-R Television, who with Robert E. Eastman of the Eastman company was co-chairman of the 1966 awards committee.

Business briefly . . .

Olympia Brewing Co., Olympia, Wash., through Botsford, Constantine & McCarty, Seattle, will sponsor Weekend West on ABC Radio's western network. The summer campaign consists of half sponsorship of all Saturday programs in the series of five-minute feature actualities through Aug. 20.

White House Foods Inc., Los Angeles, through Eisaman, Johns & Laws, Los Angeles, has started a concentrated California radio promotion for its Lady's Choice pickles and preserves. The campaign includes slightly more than 100 spots on nine stations in four markets: Los Angeles, Sacramento, San Diego and San Francisco. The spots will be aired in flights of from three to 30.

Helms Bakeries, Los Angeles, through Sachs, Finley & Kaye, Beverly Hills, Calif., began the biggest concentrated broadcast campaign in its history last week to promote seven of the bakery products it markets house-to-house. An average 50 spots per week will be shown for four weeks on five TV stations in four California markets: Bakersfield, Fresno, Los Angeles and San Diego. In addition, 125 to 150 radio spots will run weekly on five Los Angeles stations.

Eastern Air Lines, through Young & Rubicam, both New York, will sponsor ABC-TV's presentation of Samuel Goldwyn's film "Hans Christian Andersen." The Danny Kaye film will run Friday, Nov. 4 (7:30-10 p.m. EST) as the prime means of launching Eastern's winter resort selling season.

The Gillette Co., Boston, through Clyne Maxon, New York, will run a new TV campaign this spring and summer for its Lady Gillette Shaving Care Tote Bag. Spots will be on ABC-TV's American Bandstand, Where the Action Is and other programs for the under-24 age group.

American Tobacco Co.'s cigar division, through Gardner Advertising, both New York, has placed its largest-selling 10-cent cigar, Roi-Tan, in national network advertising for the first time. Roi-Tan will run spots in CBS-TV's Jackie Gleason, Thursday Night Movie, and What's My Line through June. The network campaign will be supported by spots in major markets.

Top Value Enterprises Inc. (Top Value stamps), Dayton, Ohio, will sponsor a color special, Clown Alley, featuring Red Skelton, on CBS-TV on Nov. 9 (10-11 p.m. EST), Agency: Campbell-Mithun, Minneapolis.

Quaker State Oil Refining Corp., Oil City, Pa., in its first buy on NBC Radio since 1957, has bought into the network's News on the Hour for 24 weeks. Agency: Kenyon & Eckhardt, New York.

National Dairy Products Corp. (Kraft marshmallows), Chicago, has bought

At the New York awards luncheon (l to r): SRA Managing Director Hastings Baker, Messrs. Shurick, Millar, Blanc, Bahr and Griffin.
ALMOST HALF OF ALL THE MUSIC PERFORMED ON RADIO IS LICENSED BY BMI

THIS PROUD RECORD OF ACHIEVEMENT

is a tribute to the ability of the writers and publishers affiliated with BMI to create the music the American public prefers.

In a little over a quarter-century BMI has developed an organization through which more than 10,000 writers and 7,000 publishers have chosen to license their music for public performance. And their number is increased every day.

As a result of the opportunity that BMI has continued to provide during the years since its birth there has been a continuing process of diversification, growth and democratization in American music. New talents have found an audience. New music has been able to gain a hearing. New vitality has been brought to traditional forms of music.

The result is today's many worlds of music to which both music users and the public have unlimited access, and from which they both draw in a manner without precedent in the history of American music.

BMI
ALL THE WORLDS OF MUSIC FOR ALL OF TODAY'S AUDIENCE.

BROADCAST MUSIC, INC.

Fotochrome Inc., Long Island City, N. Y., in a regional campaign for its no-negative color camera has started saturation buying of 100 one-minute spots on four New York stations: WABC, WHN, WINS and WNEW. Advertising will also extend to TV spots. Market-by-market plans will be switched to a national level when camera stocks are filled. Agency is Norman J. J. Berger Associates Inc., New York.

Commercials in production...

Listings include new commercials being made for national or large regional radio and television campaigns. Appearing in sequence are names of advertisers, product, number, length and type of commercials, production manager, agency with its account executive and producer.

Filmfair, 10920 Ventura Boulevard, Studio City, Calif. 91604.

S. C. Johnson & Son Inc., Racine, Wis. (Bravo floor wax); one 60, one 30, one 20 for TV, live on film. Tommy Thomas, director. Agency: Foote, Cone & Belding, Chicago. John Rundall, agency producer.

Pepper Sound Studios Inc., 51 South Florence, Memphis 38104.

Safeway Stores, Tulsa, Okla. (food); one 60 for radio, jingle. Hub Atwood, production manager. Placed direct.

Sealy Mattresses, Memphis (mattresses); one 60 for radio, jingle. Bud Smalley, production manager. Placed direct.

Gerald Schnitzer Productions, 6633 Sunset Boulevard, Hollywood 90026.

Frequency makes ads in color economical

Grey Advertising Inc., in a status report on color television last week, urged its clients to begin producing commercials in tint and using them on network color programs and in selected spot TV campaigns.

The report observed that the decision to use color or black and white and by a specific advertiser centers on media, marketing and creative considerations. But it added that, in general, color is a reasonable investment for advertisers because of the rapid growth of set circulation; the concentration of color receiver ownership in the larger markets and the negligible or nonexistent premium costs.

When commercial costs are amortized over a 10-times use basis, there is no premium in using color, according to Grey. The agency gave as an example: The cost-per-thousand of a color commercial on a nighttime program would be $5.04 on a one-time basis (compared to $4.94 for black-and-white) and on a 10-time basis, the cost would be $3.85 for color, actually less than for black-and-white which would amount to $3.96.

Grey estimated that the actual increase in the production costs of a program in color versus black-and-white runs approximately 10-12% higher. Advertisers using sponsored programs have in the past split the cost of color with the network and the packager.

"It is the general feeling that total color costs will be passed on to the advertisers in the fall of 1966," the report stated. "What will probably happen is that the networks will attempt to get as much as they can from the advertisers. In some cases they will get the entire color cost and in some cases they will not, depending on the demand for the particular program.

"Since color costs have not been paid entirely by the advertiser in the past, the networks apparently have taken steps to make up for the additional costs of color. All three networks have increased their daytime rates to get back color costs. The average increase is approximately 16%, which means an additional $30-$35 million per year in daytime revenue."

Also in advertising...

Agency buys TV time = Golub and Levine Advertising, Albany, N. Y., sponsored on May 8, 6:30-7:30 p.m., a color special starring the Chad Mitchell Trio on WRGB (TV) Schenectady, N. Y. The program, produced by the station, carried 10 minutes and 20 seconds of commercials promoting G&L and advertising in general.

New name = Smith, Henderson & Berey Inc., New York, has changed to Henderson & Roll Inc. The name change was brought about by the entry into the agency of I. C. (Win) Roll as president. Mr. Roll joined the agency in January after 12 years with Fuller & Smith & Ross.

Timex buys 11 NBC-TV specials

The largest single sponsorship purchase of special programs ever placed with NBC-TV was announced last week by Don Durgin, NBC-TV president, when he disclosed Timex watches (U. S. Time Corp.) has bought 11 color specials, totaling 101/2 hours of prime time. Timex revealed that the cost of the package is in excess of $5 million.

"Timex, through Warwick & Legler, both New York, is bolstering its fall and spring 1966-67 product line with the TV thrust and associated print advertising from September 1966 through May 1967."

Highlighted in the Timex TV package are four Danny Thomas specials, including an encore presentation of this past season's Road to Lebanon.

In addition to a half-hour variety special to be presented in early 1967, the package includes Class of '67 (a special with George Hamilton exploring what's happening with today's colleagues); Shipstads and Johnson Ice Follies (highlights of the annual ice follies, with Don Adams); It's a Dog's World (first in a series of specials on the world of nature); Mr. Magoo's Christmas Carol; Ringling Bros. and Barnum & Bailey Circus, and The Best on Record (winners of the industry's Grammy awards).

Philip Morris moves two from B&B

Philip Morris Inc. has announced that because of anticipated product conflicts, the advertising account of its American Safety Razor and Fleetia Vita Division, which bills about $3 million, will be reassigned from Benton & Bowles, New York. The new agency has not been selected.

The company also said that the Benson & Hedges cigarette account, which bills about $1 million and is primarily in the print media, has been moved out of B & B and assigned to Wells, Rich, Greene, New York.
"... a well-organized, lucid documentary. It makes no concessions to technique in its search for meaningful content. It presents controversy in context, without apology or self-consciousness. It doesn't over-exploit the drama of extreme retardation nor does it understate the potential for adjustment of the less severely retarded."

"... for providing a program that will remain current and can be used the world over to bring hope to parents and guide citizens to effective action. For making a permanent contribution to a better understanding of the problem of mental retardation, and for creating a program that will have tremendous impact in this field."

The 17th Annual Albert Lasker Medical Journalism Television Award was presented to WABC-TV.

"A poignant study of a major human problem—retarded children and their care—this documentary was a prime example of television's all too infrequent forays into the positions of less than popular appeal. In recognition of a first-rate production the New York Deadline Club Television Award jury cited WABC-TV for Honorable Mention.

Who Will Tie My Shoe?

Who Will Tie My Shoe? is one of a steadily increasing number of special programs being produced by the WABC-TV Department of News and Public Affairs. Prints of this program may be obtained from WABC-TV by television stations interested in presenting it in cooperation with their local chapter of the National Association for Retarded Children, Inc.

CATV bill nears House action

Commercial committee expected to report bill that will support authority sought by FCC to regulate cable television companies

Legislation empowering the FCC to regulate community antenna television may be forthcoming this week, and it is believed the bill to be reported out by the House Commerce Committee will in great part support the authority sought by the commission.

This seems to sum up the status of CATV legislation before Representatives Harley O. Staggers (D-W.Va.) and his committee. The group met twice last week in executive sessions on the CATV bills. Another meeting is scheduled for Tuesday (May 24).

The prediction that a bill may be reported out this week was made by Chairman Staggers following the committee's meeting last Wednesday...

Mr. Staggers said that although some amendments might be made to the "administration" bill (HR-13286, which he introduced at the FCC's request), the committee was moving ahead in its consideration.

"We are proceeding in an orderly fashion," the West Virginian said, "in good spirit. There is opposition, but no bitterness. Things are going along very well."

From other sources it was learned that the only opposition to authorizing the FCC to exercise jurisdiction over CATV came from Representatives Walter Rogers (D-Tex.) and J. Arthur Younger (R-Calif.). Mr. Rogers, who is chairman of the committee's Subcommittee on Communications, is the author of HR-12914, which would prohibit the FCC from regulating CATV.

Mr. Rogers contends that the FCC has no power to regulate reception of TV signals and should be barred from asserting this authority by congressional fiat. CATV, he maintains, "is an intrastate business not under federal regulatory jurisdiction."

In addition to the FCC and Rogers bills, the committee also has under consideration three others: HR-14201, proposed by the National Community Television Association and introduced by Representative James A. Mackay (D-Ga.); HR-14454, submitted by Representative John D. Dingell (D-Mich.), which would give the FCC greater power than it asks by requiring CATV systems to secure licenses from the commission, and HR-7715, the original CATV bill introduced in the first session of the 89th Congress by former Representative Oren Harris (D-Ark.), now a federal judge.

Chart Gazing - During the meetings last week committee members faced a large chart showing salient provisions of all the bills and the positions of the various parties who testified during the hearings last March and April—the FCC, NCTA, National Association of Broadcasters, the Association of Maximum Service Telecasters and others.

Although the committee did not get beyond the early sections of the bill, principally the definitions of CATV, it is understood that several suggestions were made on more substantive matters:

- One would revise the FCC's protection area for TV stations from grade B contours to a mileage factor. The NCTA's proposal suggests 30 miles from the main post office of a community, but there were hints that the mileage suggestion in the committee's executive sessions was greater than that.
- Another would impose a time element on the legislation, requiring the FCC to report back to the Congress after a number of years (three to five was the reported proposal) to permit Congress to reconsider the legislation in the light of experience.

The question of FCC authority to regulate CATV is one of three prime elements in the various bills under consideration by the committee, and the majority view apparently is that the commission should be given this authority.

The other key elements in the FCC proposals involve federal-state relationships in CATV and originations.

The FCC-supported bill would permit states and municipalities to grant CATV franchises, fix rates, and determine how much service must be performed by the cable companies. The FCC would not grant licenses or look at rates. The same bill would ban all program origi-
institutions by CATV operators except such services as time, weather, news which the FCC would be empowered to permit.

No Copyright ※ The committee has not discussed the copyright proposals that were relayed to it three weeks ago by Representative Robert W. Kastenmeier (D-Wis.) and his House Judiciary Subcommittee (BROADCASTING, May 16, 9). Mr. Staggers said that he expected this element would be discussed this week.

If the House should report out a bill this week, it is problematical whether the House itself would get around to voting on it for several weeks. If the bill passes the House the whole matter would have to be submitted to the Senate.

There, the CATV issue would come before Senator John O. Pastore, chairman of the Subcommittee on Communications of the Senate Commerce Committee.

Senator Pastore has said that he would not inaugurate hearings on CATV legislation until after the House has acted.

Stations plan use of IRTS ETV kit

The International Radio and Television Society's project to assist educational TV stations in promoting their facilities and encouraging community financial support is gaining widespread acceptance from the outlets and the local printed media.

More than 20 stations already have written to request mats and other materials and six newspapers have begun to use suggested advertising material created by the ETV committee of the IRTS. A spokesman noted that many of the stations have indicated they would start their campaigns in the fall to coincide with their annual drives for funds.

Last month a kit created by the ETV committee under John P. Cunningham, chairman of the executive committee of Cunningham & Walsh, was sent to approximately 115 educational stations. The kit consisted of advertisements for use in local newspapers as well as suggested-on-the-air copy intended to call attention to educational television station programing and to urge financial support of these outlets.

The mats will be distributed upon request to stations by the Educational TV Stations Division of the National Association of Educational Broadcasters in Washington.

NCTA backs FCC on tariffs

Says antitrust laws must be weighed if AT&T plea is considered

The National Community Television Association, which normally opposes FCC regulatory incursions into community antenna television, is supporting the commission's latest move in that area—its assertion of jurisdiction over tariffs covering intrastate common-carrier service to CATV's.

NCTA says it fears that telephone companies could, operating under state-approved tariffs, engage in anticompetitive practices. It wants tariffs filed with the commission so that the federal government can examine them for "antitrust and related public policy questions."

NCTA expressed its views to the commission in comments filed in opposition to AT&T's petition requesting reconsideration of the commission order requiring telephone companies to file their intrastate tariffs for the service with the FCC (BROADCASTING, May 9).

The FCC says that, because of the interstate nature of the broadcast signals involved, the tariffs must be filed in Washington, even if the service does not cross state lines. AT&T, in asking for reconsideration, called FCC reasoning "novel" and unprecedented.

NCTA, while continuing to challenge the commission's authority over CATV's, supported the position that CATV's are engaged in interstate commerce. And, if that view is correct, NCTA added, the facilities furnished by common carriers are in interstate commerce.

Net Catches All ※ NCTA said AT&T seems to propose that the commerce being transported can be "segmented" in order "to catch in the net of federal regulation the CATV operators and, at the same time, allow AT&T to escape."

NCTA urged the commission to go further than it has gone, saying it wants the commission to institute a rulemaking proceeding to determine whether the service that telephone companies offer CATV's are a common-carrier service or "a mere subterfuge" to engage directly in CATV service, "as several telephone companies are doing now through subsidiaries."

If the service is determined to be a common-carrier offering, NCTA said, the commission should lay down policies to prevent the undue acquisition of ownership of the capital investment of CATV systems by telephone companies and to prevent practices that could lead to monopoly control by the telephone companies.

NCTA also asked the commission to order the telephone companies to stop providing CATV tariff service until appropriate tariffs have been approved.

The association said the Bell System may be attempting to convert CATV's into a common-carrier activity in order to circumvent the antitrust laws and a consent decree, entered in a federal court in 1956, forbidding Bell to engage in business other than the furnishing of common-carrier service.

Tariff Provisions ※ NCTA said Bell tariffs being filed provide for telephone company ownership of a majority of the physical plant of the CATV system—up to 80% in cases of large systems using "many miles of cable."

If AT&T is permitted to take over all that its tariffs propose to take over, NCTA said, "then it is proposing to render service only to itself and not to a CATV establishment, because there may well then be no independent CATV industry left in being."

NCTA also expressed concern over the possibility that telephone companies operating under state tariffs might require CATV's to take tariff service and deny them the option they now have of merely renting space on poles for their cables. Most CATV's prefer to rent pole space, at an average of $2.50 per pole per year to take the services provided under the tariffs, according to NCTA sources.

AT&T and General Telephone and Electronics Corp. have instructed their subsidiaries to offer CATV's their choice, NCTA said. But "other telephone companies," it added, "have not been so prudent and are trespassing dangerously upon antitrust violation grounds."

State Jurisdiction Limited ※ NCTA said that when the consent decree issue or antitrust implications of proposed tariffs are raised before state regulatory groups, they "usually decide that their sole jurisdiction is to determine whether the tariff offered by telephone companies is reasonable or whether it will, in effect, constitute a charge upon telephone users."

The association said that the FCC must examine the tariffs to consider the application of the antitrust laws and that CATV operators and the public should be allowed to raise questions about the "pertinency of the antitrust laws."

BROADCASTING, May 23, 1966
Mediastat plans new TV ratings

A new television rating service, geared for fast reporting and limited to early fall-season and mid-season audience measurements, was announced last week by Media Statistics Inc., Silver Spring, Md.

The Mediastat TV audience measurement will cover about 30 of the nation's top markets and will be based on a single week's diary measurement covering the end of September, just after the new schedules begin, and mid-January, when mid-season changes are made.

James W. Seiler, president of Media Statistics Inc., said that the metro TV reports will be printed 10 days after the measured week. The diaries will cover an entire weekly schedule by quarter hours. Each report will contain the viewing reports of approximately 300 families.

In addition to the printed report, a confidential supplement will be delivered a few days later to clients only reporting on the likes and dislikes of viewers to the new evening programs and their intentions to view or not view these programs again.

The charge for the reports will be $1,500 for each survey or $2,750 for both. At least two station clients per market will be required before that market is included in the list of markets to be surveyed.

Media Statistics issues radio audience surveys covering 32 markets. Mr. Seiler is the former president and founder of American Research Bureau.

Storer seeks grant without hearing

Storer Broadcasting Co. has asked the FCC to grant without a hearing its application to purchase WJHS-TV Boston.

Under an interim commission policy aimed at blocking the spread of multiple owners into the top markets, a hearing is required where a sale would result in a broadcaster owning more than three TV stations, no more than two of them VHF's, in the top-50 markets.

Under the policy Storer already owns its limit in the top-50 markets. Storer owns VHF stations WJBK-TV Detroit; WSPD-TV Toledo, Ohio; WJW-TV Cleveland; WAGA-TV Atlanta and WITI-TV Milwaukee. Storer also has a permit for channel 23 in Miami that it has held since 1954.

The policy, however, provides exceptions to the hearing requirement when applicants make a "compelling affirmative showing" that the sale would be in the public interest.

Storer said that a grant of its application would permit the development of independent UHF television in the Boston market. The only hope of making WJHS-TV an effective competitor in a market with three well-established VHF's is to place its ownership in the hands of an experienced group owner, Storer argued. The commission recognized the problems facing independents in the top markets when it approved the sale of KCTO-TV (now KWGN-TV) Denver to WGN Continental Broadcasting Co., Storer stated.

The KWGN-TV grant was the first under the commission's interim policy (Broadcasting, March 7). The second grant without a hearing, also in March, involved the sale of WUHF-TV Milwaukee to WKY Television Systems Inc. (Broadcasting, March 28). The commission has yet to designate hearings under its interim policy, which was adopted almost a year ago (Broadcasting, June 28, 1965).

Storer said that a grant of its application would permit significant improvement in the station's service to the public, which should not be delayed by an unnecessary hearing.

WHS-TV is being sold by the Archdiocese of Boston, which owns 85.7% of the station, and Austin A. Harrison, who owns 14.3%. The archdiocese through the Boston Catholic Television Center used the station to transmit educational material to its schools, but now plans to meet its educational needs in the 2500 mc instructional fixed service recently established by the commission. Storer said that a grant of its application would allow the center to begin use of the new service without incurring further losses from the operation of the UHF.

New facet added to WCIU-TV case

Another layer of litigation has been added to the already complicated case involving the fight for control of WCIU-TV (ch. 26) Chicago. Jay J. G. Schatz, a major investor in the licensee corporation, has asked the FCC to deny the application for transfer of control of the station to John W. O'Connor and Howard Shapiro, two of its principal stockholders.

Mr. Schatz said a transfer of control to Messrs. O'Connor and Shapiro had already taken place without FCC approval and, he said, they lack the resources to make the station a financially viable operation. He also charged that the transfer application contained misrepresentations in its financial section.

Mr. Schatz's petition follows a suit brought in a Chicago federal court by WCIU-TV and Messrs. O'Connor and Shapiro in connection with broadcaster Gordon McLendon's efforts to acquire working control of the station. He says he has a valid contract to purchase 50,000 shares of new stock, or a one-third interest, for $5 a share.

But the suit asks for a ruling that the contract is invalid, and asks the court to order Mr. McLendon to pay $250,000 in damages for statements he made regarding the financial stability
circulation Pulse '67

A state-by-state, county-by-county study of radio station coverage for the entire U.S.

In the field: January-March, 1967. For publication: Early Fall, 1967.

The first measure of radio circulation in 6 years
THIS STUDY is designed to yield estimates of the number of households and persons reached by each radio station in all of the counties in which it has a measurable estimate. These audience estimates are not the same as ratings. Ratings are estimates of audience size generally in terms of an average 14-hour. The coverage estimates in this study indicate the number of households or persons using a radio to tune in, listen to, or hear the station at any time during the period under study and without regard to the duration or extent of the listening.

In this sense, it yields the maximum number of households and persons which a radio station reaches.

1. DATE OF COVERAGE STUDY
January-March, 1967. (Interviewing may be extended to complete field work.)

2. AREA
Continental U.S.—48 states.

3. METHOD
Personal interview, house to house (see reproduction of questionnaire). Interviews will be scheduled in each of 3,126 U.S. counties, accounting for each member of the family, with revisits to yield as many family members as possible. Ownership of (or telephone directory listing for) telephone will not be a factor. Willingness or capacity to keep a record or fill out a form will not be a factor.

In each county a minimum of 4 sampling points will be selected with a target number of 100 interviews. Interviewing will be scheduled for each county, but counties in which the number of completed interviews falls below 40 will be clustered with an adjacent county in order to achieve greater statistical stability.

4. BASIS FOR REPORTING STATIONS
5% on homes basis for total week.

5. STATION SUBSCRIPTION
(1) Station reports for subscribing stations and all other stations serving subscriber's metropolitan area or home-city (SRDS listing) included in #3 State/Station Report.
(2) State/County reports for all counties in which subscribing stations have reportable audience estimates.
(3) State/Station reports for all states in which subscribing station has reportable audience estimates.

6. ADVERTISING AGENCY SUBSCRIPTION
(1) State/Station reports
(2) State/County report
(1) Station Report:
Number of homes reached by the station in each county of each state, to be reported for daytime and nighttime on a daily and weekly basis and for total week.
Number of men (18 years of age and over) reached by the station per county, reported for total week.
Number of women (18 years of age and over) reached by the station per county, reported for total week.
Number of teenagers (12-17 years of age) reached by the station per county, reported for total week.
Number of total persons (4 years of age and over) reached by the station per county, reported for total week.

(2) State/County Report:
By states—a series of 48 reports. For each county (or county cluster) the number of homes and persons reached by individual stations. The data reported by homes and persons as in station reports.
(3) State/Station Report:
By states—for each station licensed to the state, the total number of homes and persons reached per county totaled for within the state and beyond the state. The data reported by homes and persons as in station reports.

(4) Other Reports:
On special order.
of the station (BROADCASTING, March 28).

Mr. Schatz, who has a $45,000 investment in the station, the largest by any single investor, is a long-time friend and associate of Mr. McLendon. He is a former broadcaster and one time Chicago night club owner who is now in the investment business.

Mr. Schatz said that an answer to the WCIU-TV suit would be filed soon alleging that Mr. McLendon had a valid contract to buy the station. Accordingly, he said, it would be "prudent" for the commission to delay a decision on the transfer application until the court case is decided.

Mr. Schatz said that even if the court decision favors Messrs. O'Connor and Shapiro their transfer application cannot be granted without a hearing on the "illegal transfer of control and the gross misrepresentations in the . . . application."

Mr. Schatz was one of a group of investors that had sought control of the station last June in return for $500,000 in loans to bolster the station's shaky financial position. The board of directors voted to request dismissal of the station last week (BROADCASTING, Feb. 21).

Mr. Schatz cites the results of the meeting, at which Messrs. O'Connor and Shapiro were elected directors, as one indication of the control he says they are now exercising. Messrs. O'Connor and Shapiro now jointly own or control 44% of 97,428 shares outstanding, and propose to acquire positive control by purchase of 9,950 shares now owned by minority stockholders, who have placed their holdings in escrow.

NAB urges reversal in Corinthian case

The National Association of Broadcasters last week urged the U. S. Supreme Court to review a lower-court decision that upheld a National Labor Relations Board ruling holding that radio stations produce "products" advertised over the station's facilities and therefore lose the protection against secondary boycotts in labor disputes.

The NAB friend-of-the-court brief is in support of the petition for a writ of certiorari filed earlier by Corinthian Broadcasting Co., whose KXTV(TV) Sacramento, Calif., lost a complaint to the NLRB that two labor unions had engaged in an illegal boycott when they attempted to force merchants to discontinue advertising on the station. This position was upheld by the Ninth Circuit Court of Appeals earlier this year (BROADCASTING, Feb. 28).

"The secondary boycott," the NAB said, "restrains and coerces broadcast stations through unfair economic pressure and seriously impairs their ability to pursue their legitimate business interests. Frequently, the economic injury suffered is far more lasting than the effects of a primary labor dispute. . . ."

Longer-license bill introduced

Rep. Nix's legislation would double license period for radio-TV

Broadcasters who have hoped for a change in the law to provide for a longer license period have legislation behind which they can rally.

Representative Robert N. C. Nix (D-Pa.) last week introduced a bill to double the life of the present three-year broadcast license, and prospects for hearing in this session appeared bright.

Identical bills were expected to be introduced early this week by Representatives Arnold Olsen (D-Mont.) and Paul J. Krebs (D-N.J.). All three congressmen are concerned with reducing the burden of paperwork carried by the government and the public. Representative Nix is chairman, and the other two are members, of the House Subcommittee on Commerce and Statistics, which is considering that problem.

The bill would specify six-year terms for licenses in both the broadcast and common-carrier services. Common carrier licenses now run five years.

Staggers' Assurances. • Representative Olsen, who had been expected to introduce the bill first, has received assurances from Chairman Harley Staggers (D-W.Va.) of the House Commerce Committee that the panel will hold hearings. Representative Staggers gave the assurances in a letter last week.

Representative Olsen said he expected to learn "in a couple of weeks" when the hearings will be held.

Representative Olsen, in a letter to Representatives Staggers, had said a longer license period would be an effective means of reducing the burden of paperwork carried by broadcasters and government.

The legislation is directly attributable to broadcasters. Representative Nix introduced his bill after conferring with broadcasters from his home town of Philadelphia. Representative Olsen said he decided to sponsor his bill after talks with the president and vice president, respectively, of the Montana Broadcasters Association, William A. Merrick, KBMW Bozeman, and Shag Miller, KBOW Butte, both Montana. Representative Olsen explained his case for a longer-license period in a speech before the Montana Broadcasters Association in Billings two weeks ago. He said then that the license-renewal process was largely "ritualistic paperwork."

He noted that "only 20 people" at the FCC handle the 2,100 renewal applications filed annually. That, he said, "is a contradiction to the conclusion, he said, "that many applications are in fact given short shift."

He also pointed out that few licensees have been subjected to "severe" penalties—45 out of a total of the 6,300 who filed renewal applications between 1962 and 1965.

FCC's Position. • The FCC, which in recent years has opposed legislation providing for longer license periods is in the process of changing its position, under prodding from the Budget Bureau. That department is putting pressure on all government agencies to reduce paperwork and save money.

Commissioner Kenneth A. Cox, in testimony before the Census and Statistics Subcommittee last month, said the commission expected to complete its review of the problem by June (BROADCASTING, May 2). However, he indicated the commission is considering supporting longer licenses for aural broadcasters, but not for television stations.

He said television is a newer service and needs closer scrutiny than is true of radio stations. He also said television stations, which generally have larger staffs than do radio stations, don't need the same relief.

But Representative Olsen, in his speech, said that the two services should be treated the same. Their problems are the same, "at least for the purpose making out renewal applications," he said.

And if TV broadcasters are not given relief now, he said "they might have to wait an awfully long time before any help is forthcoming in the future."

Consulting service formed

The establishment of the Ampli-Vision Corp., Los Angeles and New York, to perform management and consulting services in the community antenna television field was announced last week. Leslie Winik, president of the International Telemeter Corp., will be chairman; William C. Rubinstein, president and George Brownstein and Patrick R. J. Court, vice presidents. ITC is a subsidiary of Paramount Pictures Corp. Ampli-Vision is a subsidiary of ITC.
NBC follows suit on rate card

TV network leaves discounts for only individual program and alternate-week sponsors; tells of change at House small business hearing

More TV advertising discounts went down the drain last week as NBC-TV announced it was eliminating the fortnightly and comprehensive discounts, two of the four contained in its current prime-time rate card.

The announcement came, as had ABC-TV's a week earlier, before the House Subcommittee on Regulatory and Enforcement Agencies. And the subcommittee, as it had following the ABC-TV announcement (Broadcasting, May 16), issued an immediate congratulatory statement.

NBC-TV President Don Durgin said the network has been studying its prime-time rate card since CBS-TV announced its changed card earlier in the year. He added that NBC would examine the details of the new ABC-TV card when it is issued.

He said the network had not decided if it will make other changes in its card, which still includes the station line-up and annual discounts, or whether an entirely different type of rate card may be adopted.

Two weeks ago ABC said it was eliminating all discounts except for a "small continuity" one. In February, CBS announced its new card which establishes two sets of prices and has only one discount for continuity (Broadcasting, Feb. 7).

The NBC discounts are applicable only to "conventional" sponsorship; i.e., advertisers who place a certain level of business during each two-week period for 26 weeks (fortnightly) or a year (comprehensive). The fortnightly discount ranges from 2% to 10% depending on the aggregate percentage of hour rate per fortnight.

The networks have maintained that single or alternate-week sponsorships are on the wane and the increasing trend in the industry is towards single or alternate sponsorships with 33.3% sponsored by one network and 12.9% [rounded] of the hours were sponsored. Only CBS had a higher percentage and that was in the half-hour category with 71.4% single or alternate sponsorships. Neither ABC nor CBS had any single or alternate sponsors in the hour class.

Praise From Dingell — Mr. Durgin had barely finished his 31-page statement before Representative John D. Dingell (D-Mich.), subcommittee chairman, launched into his prepared commendation of the NBC-TV move.

He called it a "progressive step" and said the announcement to modernize the "rate structure is most gratifying." The network's decision "to eliminate discounts available only to the largest advertisers is a progressive step that will be of particular benefit to smaller national advertisers."

The previous week, Mr. Dingell had referred to the ABC-TV announcement as being beneficial "particularly for those smaller advertisers who were not in a position to earn maximum discounts under the previous rate card."

Mr. Durgin noted NBC’s attempt to make network programs "more widely available to the small stations" with the creation of the Program Extension Plan in 1955 and the Program Service Plan in 1954. Both plans came about when the predominant form of network sponsorship was whole program rather than participation.

He pointed to the success that small advertisers have had with the Today and Tonight shows. The programs, "large and risky ventures" on the network’s part, have been the means "by which advertisers who have never used network television can enter the medium economically, experiment with it, and expand their use if they find it effective for them." He said more than 90 sponsors bought time on the shows last year and 14 of them were new to net-

Testifying before the House Subcommittee on Regulatory and Enforcement Agencies last week were (l-r): Don Durgin, president, NBC-TV; Herbert Schlosser, vice president, talent and program administration, NBC-TV, and Thomas E. Ervin, vice president and general attorney, NBC.
work TV.

The NBC-TV president added that the network had its share of smaller national advertisers last year. In 1965, he said, there were almost 100 sponsors who spent less than $200,000 on NBC-TV. Of these, 32 spent less than $50,000 each during the year, and 20 others spent less than $100,000 each.

Acksing noted that the NBC rate card has a "fairly elaborate discount structure" for full or alternate-week sponsors, Mr. Durgin pointed out that this covers only a minority of his business.

Smaller Businesses and Participations = The smaller advertisers aren't hurt by participation buys, he said, and cited cost-per-thousand figures for a typical month in 1965. In that month the 10 largest advertisers on NBC-TV spent $8.9 million for 285 spot minutes. It averaged to $31,207 per commercial minute and a $2.79 c.p.m. During the same month the 10 smallest advertisers on the network spent $371,790 for 16 minutes, averaging to $22.37 c.p.m. and a c.p.m. of $2.34.

He maintained, "on both a cost-per-commercial and a cost-per-thousand basis, the smallest advertisers received even better bargains than the largest ones."

As it had for ABC and CBS previously, the subcommittee spent much of the morning session delving into NBC's thinking on the FCC's proposed 50-50 programming rule and the role played by independent producers in network actions.

Not all of the questions originated with the committee members or its staff counsel. Several times during the session questions were asked that had been brought by James Tierney, a member of the FCC network study office, who was an observer at the hearing. The proposed 50-50 rule was based in large measure on the report of that office.

Mr. Durgin said small advertisers would be "adversely affected" in their use of network television if the rule came into being. The assumptions the FCC based the rule on, he claimed, are invalid.

He said networks had not increased proprietary interests in programs to 93% of all prime-time programing, as claimed by the FCC. That figure, he charged, is built up by including independently produced shows in which the networks have no ownership interest.

Hurt Instead of Help = Currently, he said, NBC-TV only produces one entertainment series in the prime-time schedule with the rest supplied by independent producers.

Under the proposed rule, Mr. Durgin felt, these independent producers would be at "real disadvantages," since it would "remove the networks as customers for half of their nighttime entertainment and it would discourage networks from providing financing assistance toward independent program development, including the preparation of scripts and pilots."

He cited the "enormous financial risks" the networks take in underwriting independent program development and said NBC-TV's "involves some $70 million in advance commitments each season" for prime-time entertainment shows.

The assumption that a network would select a show because it had a piece of the action is false, he asserted. The judgment has to be one of the program's potential in attracting audience, otherwise a network would "violate its own economic self-interest."

Mr. Durgin denied that there is any type of network rule that would have a network say to one producer we'll take whatever you have and tell another that he has to show us a pilot first.

He was also critical of the comments made before the subcommittee by Don McGuire, producer of the Mona McCluskey series which had a 26-week run on NBC this season and was then cancelled.

Mr. McGuire had claimed that NBC wouldn't take the show until he agreed to give it a 25% interest even though he already had R. J. Reynolds set to buy the show for 26 weeks (BROADCASTING, March 7).

Mr. Durgin's version of that episode was that Wm. Esty Co., agency for Reynolds, came to NBC-TV with Mona, and said Reynolds was willing to be an alternate sponsor, if NBC would get sponsorship for the other half. As a result, Mr. Durgin said, NBC was committed to buy 26 episodes from United Artists with the network picking up the tab on 13 for sale to other advertisers, and Reynolds picking up the cost of the other 13. In addition, NBC paid $7,500 for each of the 26 shows to be cut in color.

The profit share NBC wound up with, Mr. Durgin claimed "was not 25% of the ownership of the show, as Mr. McGuire testified, but 15% of any net profits that might be obtained from nonnetwork use of the series... ."

By the time it was all over and Mona was cancelled after being 93d on the A. C. Nielsen Co. list of the top 99 shows, NBC had lost almost $250,000, Mr. Durgin said. As for income in syndication, he dismissed this as nil, since the program had had such a "lack of success."

Answers Montgomery = The NBC-TV president also gave his network's version of Robert Montgomery's testimony in April. Mr. Montgomery claimed the movement by networks to eliminate the independent producer began about 1957 when his show, Robert Montgomery Presents, was cancelled by NBC-TV (BROADCASTING, April 25).

Mr. Durgin claimed the demise of the show after seven years (1950-1957) on the air was "strictly a programming decision. . . . The series had lost its appeal and, in common with numerous other drama series on the air was experiencing difficulty in acquiring strong scripts to maintain quality."

He added that in the same year NBC dropped Alcoa/Goodyear Theater "and that series was produced by NBC, not by an independent producer, and had substantially higher ratings" than the Montgomery anthology series.

Scheduled to testify before the subcommittee Tuesday (May 24) are representatives of the National Association of Broadcasters and from Donald H. McGannon, president of Westinghouse Broadcasting Co.

Call for federal ETV authority

Rogers says TV has to face responsibility; suggests license fee to support ETV

Amendments to the Communications Act providing for a national educational and cultural television authority and a license fee on commercial broadcasters to provide the authority with its administrative expenses were seen last week by one broadcaster as being a way to give the "highly articulate minorities" what they want.

Lawrence H. Rogers II, president of Taft Broadcasting Co., Cincinnati, told the Alabama Association of Broadcasters meeting in Birmingham Friday (May 20) that such a plan would create the national educational TV service these minorities demand.

Guaranteed Freedom = The proposed educational-cultural authority, he said, would take the form akin to the British Broadcasting Corp. or Comsat. How-

That's part of Avco Broadcasting's FORWARD LOOK!

ever, it would not be a government service. It would be a government chartered service, guaranteed by law to be immune from government policy pressure.

Once the authority is established, he predicted, the money would be available for program development. He said it would come from the "dozens, if not hundreds, of cultural and educational foundations in the land whose tax-free status threatens to drown them in unexpended wealth."

Such organizations, he maintained, "all are dedicated to improving the nation's cultural denominator. All would welcome such recognition of the simple truth that money would support educational program development. He proposed to change the balance among station licensees, national and local; educational and commercial; among station licensees, national and local; commercial and educational."

"In the Future" Mr. Rogers warned the broadcasters that satellites and wired systems are getting closer. Although highly improbable, it is not inconceivable that an Orwellian society with one big-brother station could come to pass, he said.

Congress, he said, "will resist mightily any such wholesale change in our entire social and political structure. But I challenge the TV industry and its fat and happy licensees to recognize the potential threat that lies barely over the horizon—not just a threat to our own selfish corporate interests, but a threat to the very continuation of a free society."

He said it was foolish to expect Congress to understand the threat and solve the problem alone, and he called it "blind and foolish" to tell critics and educators to solve their own problems.

The Taft president charged that broadcasters "can't have it both ways anymore that the regulators and the educators. We cannot have all the business and none of the obligation."

Just once, he said, let broadcasters show their statesmanship by "improving the scope of the service we are licensed to provide. Just one time, I'd like to see us plant our banner on an uncharted shore, rather than be dragged by a press gang aboard a government galley to be chained to an oar."

Mr. Rogers suggested these amendments to the Communications Act:

- "Elimination of the FCC's efforts—however thinly disguised—at program and commercial control."
- "Establishment of a permanent license term until revoked for just cause, although a five-year term would be agreeable."
- "Relaxation of the multiple-ownership rules to permit a viable economic balance among station licensees, national networks and program production companies."

Changing hands

ANNOUNCED = The following station sales were reported last week subject to FCC approval:

- WENE Endicott-Binghamton, N. Y.: Sold by C. A. Bengston to TV personality Merv Griffin, for approximately $650,000. Mr. Griffin also owns WWCO Waterbury, Conn. Herbert Bloomberg, former owner of WWCO, is executive director of that station and will be of WENE when it is acquired. WENE operates fulltime on 1430 kc with 5 kw. Broker: Blackburn & Co.

- KPOL-TV Los Angeles: Sold by Hugh R. Murchison Sr. and others to Thomas S. Bunn, Harry E. Straub, Frederick D. Custer and Robertson C. Scott for $400,000. KPOL-TV is now owned by Coast Television Inc., which in turn is 90% owned by Coast Radio Corp. Mr. Murchison is 52.5% owner of Coast Radio Corp. whose KPOL-AM-FM Los Angeles is being sold to Capital Cities Broadcasting Corp. for $7.8 million (Broadcasting, March 7). Buyers of KPOL-TV are all minority owners of Coast Television, among them: Mr. Bunn, now owns 16.68%, would own 24.37%; Mr. Staub, now 12.5%, to 15.12% including family foundation holdings; Mr. Custer, general manager of KPOL-TV, 5% to 10%; Mr. Scott, program director, would retain his existing 5% ownership. KPOL-TV,
First Illinois to use Illinois Bell for CATV

First Illinois Cable TV Inc., Chicago, which has been granted a franchise and FCC approval to provide community antenna television service in the area of Springfield, Ill., is to sign an agreement today (May 23) with Illinois Bell Telephone Co. to provide and maintain the physical facilities involved. About one-third of the cable will be underground.

Earlier First Illinois planned to install and service its own cable and equipment. This reversal of plans is being described as significant to the entire CATV industry since the Springfield system is expected to be the largest of its kind in the country which has received approval under the new FCC regulations governing CATV in major markets.

The ultimate service potential is 30,000 CATV subscribers and will involve some 365 miles of urban distribution lines. The Springfield area has a population of more than 120,000. Illinois Bell, a subsidiary of AT&T, estimates its own investment in cable and facilities to serve First Illinois will be about $1.5 million.

The basic distribution line cost to First Illinois will be $16.50 per quarter mile a month. The cable will have 12 channels and is expected to include FM.

First Illinois also has CATV interests in Louisiana, Mo. It is a subsidiary of JFD Electronics Corp., a firm specializing in the TV signal reception field and which has developed antennas for use in CATV distribution systems.

Construction of the first segment of the Springfield system is expected to be completed seven months after final authorizations from the FCC and the Federal Aviation Agency. This initial segment will cover one-quarter of the area to be served.

Changes Its Mind • It was indicated that originally First Illinois planned to lease pole rights and install and service its own cable. But "Illinois Bell convinced us that their service was the most economical and effective way to provide CATV in the Springfield area," according to Ira Kamen, First Illinois's technical director. Since about 30% of the Springfield telephone system is underground, the usual rural methods of cable installation and service are not practical, he explained.

First Illinois expects to make similar agreements with Illinois Bell for its Waukegan CATV system and with Southwestern Bell Telephone Co. for the Louisiana system.

NAB hears report on survey of groups

The National Association of Broadcasters executive committee last week got a briefing on the research of the Council for Television Development. The CTD, formed last summer by group operators after the FCC announced its interim policy on ownership in the top 50 markets, had been after NAB for $50,000 to help underwrite its research project.

NAB had deferred action on the commitment, waiting to see how the research turned out before deciding whether to chip in. One of the major concerns was whether the study would be restricted to showing the good side of group operations or would be aimed at the industry as a whole.

It was to learn how the survey was coming along that the executive committee invited W. Theodore Pierson, CTD's Washington counsel, to give it a briefing. The indications were that the research, being conducted by United Research Inc., Cambridge, Mass., does indeed have value to the whole industry. However, NAB still has made no com-
mitment on funds for the project. Among other elements, the study project is looking into:

- Broadcasting in general including the relationship of the group owners to the industry as a whole.
- The effectiveness of FCC moves, past and present, on multiple ownership.
- What makes a station profitable, using factors such as group or individual ownership, size of market, network or independent, etc.

CTD will meet with the FCC on June 23 and report on the project at that time, although the study is not expected to be completed until August.

Columbia regroups TV, radio in arts program

An upgrading of the study of radio, TV and motion pictures as art forms is indicated in the establishment of a new School of the Arts at Columbia University in New York. Davidson Taylor, a network executive in the late 1950's, was to be appointed Saturday (May 21) as director of the school.

The school represents a regrouping of courses in three broad areas—movies, radio and TV; the theater, and painting and sculpture—formerly offered within the university's "program of the arts." In addition to offering study to undergraduate students, the new school program now will offer instruction leading to a master of fine arts degree in either of the three areas.

Mr. Taylor was a vice president at CBS in public affairs and in programming before joining NBC in 1951. He left NBC as public affairs vice president in early 1958. He then went to Columbia in 1959 as director of an Art Center Program and was appointed chairman of the Committee on the Arts there in 1963.

Friendly envisions gains from CATV, satellites

Technological developments such as the communication satellites and community antenna TV have laid foundations for a new era in communication. According to Fred Friendly, former CBS News president and now professor at Columbia's Graduate School of Journalism, Mr. Friendly, appearing May 19 before The American Society of Newspaper Editors in Montreal, said that new communications will bring a revolution in journalism and in education within the next 10 years.

Eventually, Mr. Friendly forecast, it will be possible to tune in events anywhere in the world, to reproduce out-of-town newspapers, to dial for library reference material and to make complete college courses (medical and scientific) available in each community. Television will be as different in the future as the silent films are in the present, he said.

WFTV (TV) opposes rival's interim proposal

Mid-Florida Television Corp., licensee of WFTV(TV) Orlando, Fla., last week asked the FCC to deny the application of Consolidated Nine Inc. for authority to operate the station on an interim basis.

The 10-year-old channel 9 case was sent back to the commission for the third time last year by the U.S. Court of Appeals for the District of Columbia for a new hearing with new applicants (BROADCASTING, March 8, 1965). The commission then vacated its 1957 grant to Mid-Florida but authorized mid-Florida to continue operating on an interim basis.

Mid-Florida said that it does not know of a single instance where the commission has deleted an existing service, where the operator was found fully qualified, in favor of an interim operation.

The commission has consistently held that a joint interim operation is basically inimical to the public interest and should be permitted only under the most compelling circumstances, according to Mid-Florida. It added that such circumstances do not exist in this case. Mid-Florida also said that Consolidated Nine is not legally qualified, is not financially qualified, has not submitted adequate information relating to program proposals and has given no evidence demonstrating that it could carry out its program proposals.

Consolidated Nine had argued that granting exclusive interim authority to one applicant would prejudice the cases of the other applicants. Mid-Florida, however, said that its case would be prejudiced if Consolidated were allowed to go ahead and construct a new $1.4-million facility for an interim operation.

The six applicants for permanent authority who are part of Consolidated Nine are Florida 9 Broadcasting Co., Orange Nine Inc., Howard Weiss, TV 9 Inc., Florida Heartland Television Inc. and Central Nine Corp. In addition, Comit Inc., another applicant for permanent authority, has filed independently for interim authority.

The Orlando case is one of the ex parte cases involving allegations of improper contacts with the late FCC Commissioner Richard A. Mack.

Spellman dedicates RCA ETV system in New York

The $2.5 million educational television system of the New York Roman Catholic Archdiocese was dedicated in Yonkers, N. Y., last week by Francis Cardinal Spellman, archbishop of New York. The system will link more than 400 parochial elementary and secondary schools in a 4,700-mile area.

The ceremonies took place at the system's broadcast center in St. Joseph's Seminary. Programs will originate at the center in the 2,500 mc educational band and be transmitted to six major receiving locations. Participating schools in 10 New York counties will receive and convert microwave signals for use on color-compatible, black-and-white receivers.

The system, which will serve 3,000 classrooms and some 225,000 students, was designed and built by RCA. RCA President Robert W. Sarnoff said at the dedication ceremonies: "With facilities for originating 'live,' film, tape and slide programs, this modern system should provide a new teaching tool of great versatility and flexibility."

One of the largest ETV systems in the nation, the facility is equipped to originate color programs from slides or motion pictures.

The FCC designated the 2,500 mc band for educational use three years ago. The service is sometimes called "on-the-air-closed-circuit" because its programs cannot be received by the ordinary home TV set. However, each of the receivers in the archdiocesan three channel system will have a converter for reception of the standard VHF and UHF channels.

NAFBRAT seeks funds to re-examine radio-TV

The National Association for Better Radio and Television is now searching for "a considerable amount of seed money" with which to launch a "national congress" next year to examine the public service performance and potential of American broadcasting.

The congress would meet in the summer of 1967 in Chicago, would function for some "extended period of time" and would draw thought leaders from all levels of society as well as the radio and television industries.

Such are the plans of NAFBRAT as disclosed in Chicago last week at a local awards dinner meeting held in cooperation with the Adult Education Council. The announcement was made by a NAFBRAT director, Henry H. Mamet, executive director of the Broad-
THE GABRIEL AWARD 1965
"THE FIRST CHRISTMAS"

The first independently produced program to be so honored.

"This program is truly an outstanding achievement in radio broadcasting. It is an artistic recreation of a historical event, ordering the facts of history to bring to the audience an aesthetic experience which entertains, enriches and inspires. It is a rare achievement in using the medium of radio with a technique which is uniquely appropriate to the medium. A truly original and creative achievement...this is one of the outstanding radio programs of the decade."

AND NOW...

THE GABRIEL AWARD 1966
"EASTER THE BEGINNING"

"This program uses the medium creatively and effectively to recreate a very important event with dramatic impact and deep insight. By its use of a continuing report of the events of Holy Week, it gives the audience an experience of living through the passion, death and resurrection of Jesus Christ. The research, the artistic recreation and the production are all of the highest quality."

BROADCASTING, May 23, 1966
 Members of the NAB Small Market Radio Committee attended their first meeting last week.

NAB committee looks at pay-TV position

The National Association of Broadcasters' long-standing position on pay television—that there shouldn't be any—remained unchanged last week. The NAB's Future of Broadcasting Committee agreed that the NAB stand should be reaffirmed.

The committee's recommendations will go to the TV board during the joint board meetings in Washington next month. It will be up to the board to stay with the old line or adopt a new position.

The Future of Broadcasting Committee spent much of its meeting Wednesday (May 18) discussing whether the NAB should take a stand on satellite ownership. The major problem area was whether the association should support private ownership by broadcasters or public ownership by Comsat, if any position is to be taken.

ABC has asked to be allowed to put up its own satellite, Comsat, as a publicly held firm, has felt it should control all communications satellites.

Also before the committee was a summary of the proposed copyright legislation on community antenna television proposed by a House subcommittee earlier this month (Broadcasting, May 9). The proposal would establish white, black and gray areas providing for full, none or limited copy-right payment, respectively, by CATV's.

Pay TV, which has been a thorn in the NAB's side for more than 10 years, has traditionally been opposed by the association on the ground that it is not in the public interest. Although in the past the NAB has been opposed to pay TV in any form, its main attack has always been against pay TV using the airwaves. Traditionally it has taken no position on the use of wired pay-TV systems. However in its comments on CATV regulation NAB has expressed fear that uncontrolled CATV could lead to pay TV via wire.

The reappraisal of the situation came after the FCC introduced its proposed rulemaking on authorizing regular pay-TV service by broadcasters.

Attending the meeting were: Dwight Martin, WDRU-TV New Orleans, chairman; Clair McCollough, Steinman Stations, Lancaster, Pa.; William Grove, KFBC-TV Cheyenne, Wyo.; C. Howard Lane, KOIN-TV Portland, Ore.; John Lemme, KLTF Little Falls, Minn., and Willard Walbridge, KTRK-TV Houston. Absent were: John Murphy, Avco Broadcasting, Cincinnati; Richard Shaf-to, Cosmos Broadcasting, Columbia, S. C., and George W. Armstrong, WJB Kansas City, Mo.

Staff recruiting problems explored

The lack of convenient license examination sites for operators was cited last week as a major handicap in recruiting personnel for small market stations. As a result, the Small Market Radio Committee of the National Association of Broadcasters is asking state associations and the NAB staff to help out.

In its initial meeting last Tuesday (May 17), the committee offered five recommendations to help solve the "serious problem" of recruitment.

It suggested state associations request FCC inspectors to attend their annual meetings and give third-class examinations for station personnel and answer questions on technical rules.

The committee also recommended that the American Association of Junior Colleges be encouraged to establish broadcasting courses at junior and community colleges, that the NAB prepare a manual on organizing broadcasting clubs at high schools and that educational groups and schools be encouraged to include broadcasting in high school career day programs.

Another item covered by the committee was to learn ways the NAB fall conferences would be more attractive to small-market radio broadcasters.
WMAQ-TV's "NBC NEWS NIGHT REPORT" shows the way.

To begin with, you assemble the finest possible staff of reporters. Men like "Night Report's" Floyd Kalber, Harry Volkman, Len O'Connor.

Next, you enlist the full support of broadcasting's foremost news organization—NBC News.

Given the best staff and the finest resources, you then expand coverage to thirty minutes, seven nights a week. ("NBC News Night Report" was the first news program to do this in Chicago.)

Finally, you present this nightly coverage in color.

Result: a program that is not only first with the news but first with the news audience.

Fact is, in its time period (10-10:30pm), WMAQ-TV's "NBC News Night Report" attracts as large an audience Monday through Friday as all the other Chicago stations combined—and ranks 5th among Chicago's programs in all time periods, prime time, anytime.

Your move.
FCC starts countdown on payola-plugola

Nonpublic hearings outside D.C. planned; 'names to be named' but with damper on sensationalism

The FCC's 17-month-old investigation of payola and plugola surfaced briefly last week. But it was long enough to indicate the inquiry is moving into a new and meaningful stage.

The commission announced that the chief hearing examiner, or an examiner designated by him, has been authorized to preside at “nonpublic” hearings dealing with the inquiry and to subpoena witnesses and records.

The commission on Nov. 25, 1964, announced that it had instructed staff investigators to begin checking into what was said to be a lengthening list of complaints that broadcast station personnel were taking under-the-table payments to plug products — usually records — on the air. (BROADCASTING, Nov. 30, 1964).

Commission sources said last week's order indicates that the investigation has reached the point where officials feel it would be "useful" to take testimony from witnesses before an examiner. Some individuals reportedly have indicated a willingness to testify — but only if subpoenaed.

The commission staff is said to be interested in pursuing specific allegations that have been made. Some individuals have claimed that they "paid off" to have records played, and have "named names." Staffers also say "they have reason to believe" that certain individuals could give testimony about "taking bribes," others about giving them.

Subpoena Power • The commission in its Nov. 25, 1964, order, delegated subpoena powers to the commission chairman. But the delegation did not specify that hearing examiners could subpoena testimony and documents for hearings.

In directing that the hearings not be public, the commission affirmed its decision, announced when the inquiry was begun, to proceed in a "nonpublic" manner. Public sessions may be ordered, but only after a commission finding that they would serve the public interest.

Sources say the inquiry is being kept completely confidential to prevent any "character assassinations." "We want corroboration of any charges that are made before they become public," said one commission official. "We are trying to conduct this inquiry in the least sensational manner possible."

The commission may ultimately issue a report based on the results of the inquiry. But it's possible that the commission may never make the findings public. Evidence turned up that indicates violations of the federal law barring payola and plugola would be turned over to the Justice Department for its use. However, the commission would take action if a licensee appeared to be involved in any illegal activity.

There was no indication last week

Shapp's use of radio-TV biggest election aid

"Radio proved to be a very potent means of getting our message across to the people," a close aide to Milton J. Shapp, chairman and founder of Jerrold Electronics Corp., Philadelphia, said last week after Mr. Shapp won the Democratic nomination for the governorship of Pennsylvania. He defeated State Senator Robert P. Casey of Scranton, the organization's candidate, by almost 50,000 votes. He faces Republican Raymond P. Shafer, now lieutenant governor of the state, in the gubernatorial election this fall.

It is estimated that Mr. Shapp spent from $800,000 to $1.2 million of his own money in his race for the nomination. The bulk of this, his public relations and advertising people acknowledge, was spent in radio and television advertising to be "the most flexible and efficient medium in terms of dollars spent." It is estimated that about $375,000 was spent in all media, with about 70% in broadcasting.

One of the most impressive uses of TV, these aides relate, was made by a 30-minute documentary depicting the life of Mr. Shapp, from humble beginnings to his present position. The program was shown at least once on every TV station in the state, they said, with the heaviest concentration coming the two weeks before the May 17 primary when it was shown on 16 TV stations in Pennsylvania a total of 45 times. "It was probably the most effective single thing we did," a Shapp worker stated.

In those last 14 days, according to informed sources, Mr. Shapp committed over 7,500 spots of varying lengths on 90 radio stations in 38 cities, and 550 TV spots of varying lengths on 16 TV stations. He also mailed out 1.5 million copies of a 16-page brochure and bought 200 billboards, as well as newspaper space.

It was, one of Mr. Shapp's colleagues said, a classic, modern "up-to-date" use of all media, with radio and TV the "critical" factor in the success of the campaign.

Senator Joseph S. Clark (D-Pa.), calling for party unity behind Mr. Shapp for the November elections, credited the upset over the organization candidate to "an extremely skilled use of radio and television." Jerrold Electronics Corp. is one of the major manufacturers of community antenna television equipment. It also makes the Harman-Kardon high fidelity, stereo home radio and phonograph equipment, TV antennas for the home and other electronic apparatus. Jerrold is also a group CATV system owner.
POWER UP
SPACE DOWN

with the Gates
all-new
20,000-watt
FM transmitter
Model FM-20G

Here's top power at lowest per hour operating cost in a compact space-saving cabinet arrangement. The new Gates FM-20G provides maximum installation flexibility. Power supply is 100% solid-state and only one 4CX-15,000A ceramic tetrode delivers 20,000-watts output. This brand-new Gates FM-20G Transmitter is another reason why the soundest sound in FM is the new sound of Gates. Send today for complete description and specifications.
For TV: some drum beating, some plain beating

ABC brass traveled to Washington last week to give the network's upcoming and already widely heralded series, *ABC Stage 67*, a promotional shot in the arm. The rest of television got the back of the hand.

Hubbell Robinson, executive in charge of production for the series, in an address at a National Press Club luncheon Wednesday (May 18), referred to television as a "wasteland" in need of watering. He spoke of an "erosion of the spirit of adventure by the compulsive tendency to hedge the bet by making new shows resemble existing winners."

He talked about "that particular kind of Madison Avenue mind which is uncomfortable in the presence of creative thrust and individuality."

And he commiserated with TV audiences that have been "underprivileged and undernourished" as a result of "a totally forgettable diet of trivia."

He acknowledged that, on occasion, as in the Julie Andrews and Barbra Streisand specials and CBS's production of Death of a Salesman, "the home screen lights up." The weekly series "sometimes" achieves a high degree of accomplishment, he said. But "sometimes," he said, isn't good enough.

*Stage 67*, which is to be composed of 26 weekly shows of drama, the dance, comedy, fantasy and documentary, and on which ABC is gambling $10 million, represents a departure, he said—a "totally conscious and thought-out effort" to organize a creative environment in which "major talents" can "work for genuine excellence in television."

Top-drawer writers and producers who have never worked in the medium or who have been away "too long" have been engaged for the series, he said. In all 25 production teams at work, only one of them is assigned to more than one show. They will have the money and time to do their best, he said, and they will be free from the bugaboos commonly affecting artists in television — restrictions on format, dictates on choice of talent, interference from clients, advertising agencies or corporate management.

He used an announcement to help make his point regarding the character of the series: Ingrid Bergman had been signed to appear on *Stage 67* in Jean Cocteau's one-character drama, "The Human Voice."

And since *Stage 67* was conceived and initiated by ABC management, he said, the series may herald "a new day dawning" in television, one in which management can be expected to recognize that "cost-per-thousand and head counting" have definite limits as measures of program worth.

The luncheon program, which was filmed in color for closed-circuit showing to ABC affiliates, was attended by a relatively small audience, as press club luncheons go. But it was a particularly interested one. Among those in attendance were members of the FCC and its staff, all of them guests of ABC, communications attorneys and press club members.

**Head Table Guests**
- Leonard Goldenson, president of American Broadcasting Companies Inc., who had disclosed plans for *Stage 67* in a speech at the National Association of Broadcasters convention in Washington in 1965, was seated at the head table, along with acting FCC Chairman Rosel H. Hyde, NAB President Vincent Wasilewski, Dr. Eric Goldman, cultural adviser to the White House, and Senator Jacob Javits (R.-N.Y.).

Backing up Mr. Robinson were two of the "major talents" who will produce two of the shows in the series, composer-lyricist-producer Richard Adler, and Jack Paar, who rose to fame as a late-night-show host on NBC, but who is better known in Washington these days as principal owner of WMJZ-TV in Polartner Springs, Me.

Mr. Paar had agreed to lend his When the hearings—which are to be held in cities outside Washington—will begin. A preliminary step still to be taken is establishing liaison with the Justice Department on the question of granting immunity to witnesses.

The Communications Act authorizes the commission to require testimony and documents from witnesses in hearings. But individuals required to give evidence after claiming their constitutional privilege against self-incrimination are automatically given immunity against prosecution.

The FCC will have to determine which witnesses Justice is willing to see granted that immunity.

**Late-day movies draw high ARB ratings**

The marked success of feature film strips in early evening time periods usually filled by children's and women-oriented programs is pointed up in a special American Research Bureau regional survey covering eight southwest states and a total of 25 markets.

The study, commissioned by Seven Arts Associated Corp., covers the period from 3 p.m. to 7 p.m. and shows there are now 22 locally programed movies carried on a Monday through Friday basis in the 25 markets.

Four of the 22 "early show" strips began during the past year. The most widely used time slot, the survey reports, was the 4:45-5 p.m. period (10), followed by 3:30-5 p.m. (six).

The popularity of these strip features is underscored by the average ratings of these time periods on a Monday through Friday basis, according to Donald Klauber, executive vice president of Seven Arts Associated. They are registering an average quarter-hour rating of 1.4 with a 35.1% share of the audience, based on March 1966 figures.

The eight states covered in the ARB regional study were Alabama, Arkansas, Florida, Georgia, Louisiana, Oklahoma, Tennessee and Texas.

**CBS-TV to air weekly public-affairs program**

A regularly scheduled, prime-time public-affairs series has been set by CBS-TV for the 1966-67 season. The informational program, which will be aired Tuesdays from 10 p.m. to 11 p.m., was announced last week by Bill Leonard, CBS News director of programming.

Because of the confusion in the public's mind and in published reports over the differences between *CBS News Specials* and *CBS News Special Reports*, Mr. Leonard said, these titles will be abolished with the new series start. The programing will generally take its title from the various topics covered, and much of the material designated by the former titles will be included in the Tuesday night hour.

*CBS Reports* will continue, many of which will appear under that title in the Tuesday night time period, Mr.
Hubbell Robinson (center), executive in charge of production for "ABC Stage 67" signs the guest book held by Wynn Booth of the National Geographic and president of the National Press Club, before Mr. Robinson's address Wednesday. Looking on are (l-r) Jack Paar and Richard Adler, each of whom will produce a show for the series, and, at right, Leonard H. Goldenson, president of ABC Inc.

attention-commanding name and person to the proceeding only on condition that he not be required to talk. However, several questions from the audience following Mr. Robinson's talk were addressed to him, and he responded with alacrity and at length.

It was Mr. Paar who, in his own fashion, defended television as it is. He said he had never met a producer "who said he wanted to produce shows for 12-year-old minds." Mr. Paar added: "But then, of course, some of the producers I've known have had 12-year-old minds."

Mr. Robinson also announced last week that James Mason and Hugh Griffith would star in a TV adaptation of John LeCarre's "Dare I Weep, Dare I Mourn," a filmed dramatic entry in the ABC Stage 67 series. Mr. LeCarre wrote "The Spy Who Came in from the Cold." The TV adaptation written by Stanley Mann is already being filmed in London and Germany by Associated Rediffusion Ltd.

Leonard said. The CBS Reports title will be reserved for investigative broadcasts of a controversial nature.

The new series will be supervised by four executive producers: Burton Benjamin, Don Hewitt, Leslie Midgley and Perry Wolff. Their broadcasts will include topical and cultural specials, audience-involvement tests and periodic transoceanic Town Meeting of the World origination.

CBS will continue its policy of relinquishing a half-hour of the Tuesday night public affairs series to local stations for their use once a month.

Warner Bros. new unit has TV products in plans

Warner Bros. Pictures Inc., which in recent months has added community antenna TV activities and a cosmetics-making subsidiary to its diversified portfolio, announced the start of still another operation last week. The motion picture and television film production company will establish a completely new animation division at its studios in Burbank. This will reanimate Warner Bros. operations in the production of its own cartoons at its own studio.

The production company shut down its cartoon operation more than three years ago and since that time has contracted for animation product on a freelance basis with David DePatie and I. Freleng, who have leased the studio space. Under a still existing contract, Messrs. DePatie and Freleng, who will make 26 half-hours of next season's Saturday morning series, Super Bwoing, for NBC-TV and Mirisch-Rich TV Productions have six more cartoons to deliver to Warner Bros.

The new operation will produce cartoons, documentaries, industrial and commercial films for both motion pictures and television. TV cartoon specials for possible network showings are also being planned together with the production of titles and TV commercials. Such established cartoon characters as Porky Pig, Bugs Bunny, the Road Runner and Speedy and Daffy will be continued, but new cartoon series and characters for presentation on television and in movies also will be developed. William L. Hendricks, director of corporate public relations for Warner Bros., will be in charge of all operations for the new animation division.

WGN Continental adds video-tape subsidiary

Mid-America Video Tape Productions, a division of won-tv Chicago, has been established as a new corporate subsidiary of WGN Continental Broadcasting Co., it was announced last week by President Ward L. Quaal.

The production firm's name is now WGN Continental Productions Co. It produces commercials and syndicates program series and specials.

Within the past five years the syndication arm has become an international program production entity, Mr. Quaal noted, and the production facilities now are operating on a 24-hour daily, seven days a week schedule to keep up with sales and orders. The subsidiary is based at wgn-tv.

Officers of the new production firm in addition to Mr. Quaal as president include Bradley A. Eidmann, vice president-general manager; Sheldon Cooper, vice president for program development; F. A. Nichols, treasurer, and F. J. Byington, secretary. Among the company's TV series are An Evening with Big Bands and Barn Dance.

Leonard in new program planning for NBC-TV

Producer Sheldon Leonard has been signed by NBC-TV to a long-term exclusive arrangement, it was announced last week by Don Durgin, president of NBC-TV.

The agreement calls for the exclusive services of Mr. Leonard as executive producer on all new projects and for all new program series produced by Sheldon Leonard Enterprises, beginning with the 1967-68 season.

Since 1953 Mr. Leonard has been associated with Danny Thomas on such series as The Andy Griffith Show, Gomer Pyle and the Dick Van Dyke Show, but this relationship will end before the start of the 1967-68 season. Sheldon Leonard Enterprises produces NBC-TV's I Spy series.
A sign of fairness

Kgee Bakersfield, Calif., has found a subtle way to lick some of the problems created for broadcasting interests by the FCC's fairness doctrine. In front of the studios in Bakersfield is a large neon sign and KGEE sells space on it at $15 a day. C. Dexter Haymond, station vice president, claims that, as far as he knows, the FCC cannot regulate the sales of advertising space on this sign to political candidates. Most important, implies Mr. Haymond, is the fact that "we don't have to fill out those damn political forms when we sell the sign either.... maybe that's why our sales department always sells out the sign first."

Stevens, NBC volley over 'Place in Sun'

Contempt-of-court charges against NBC and Paramount Pictures Corp. over alleged "distortion" of one of his movies shown on television were made last week by producer-director George Stevens. The contempt hearing began before Los Angeles Superior Court Judge Richard L. Wells. Answering the charge, the defendant companies argued that the TV presentation of "A Place In The Sun," shown on NBC-TV's "Saturday Night at the Movies March 12, was edited in good faith.

Mr. Stevens had obtained an injunction requiring that commercials accompanying the showing of the movie on TV should be inserted in an "artistic" manner. He contends this was not done and what was done detracted from the quality of the picture. NBC and Paramount Pictures maintained that the meaning of the injunction always was kept in mind.

Among other arguments, the network also insisted that the court was without jurisdiction in the case under the First Amendment to the Constitution guaranteeing freedom of speech and asked for dismissal of the contempt complaint. Although this motion was denied, Judge Wells ordered Paramount to drop from the contempt action because the film production company was not involved in the television editing of the movie.

After seeing the movie in a screening room at the Desilu-Culver studios, Judge Wells, who is trying the case without a jury, took direct testimony from Mr. Stevens. The producer-director spent an entire day on the stand analyzing the March 12 telecast and pointing out instances that he contended as showing how each commercial interruption disrupted the mood of the movie.

At week's end, NBC was expected to call in experts in an attempt to prove that the story and showing on TV were not in any way artistically harmed by the insertion of the commercials.

Harmon plans films, TV specials for Bozo

Larry Harmon Pictures Corp., New York and Hollywood, is broadening its base from the production and distribution of Bozo syndication programs to encompass network TV specials and feature films for theaters.

The company recently completed a one-hour color special at Marineland in California, starring Bozo, and is preparing similar programs to be produced in the U. S. and abroad.

Larry Harmon, president, reported that each of these specials will have a theme and storyline and will use the scenic background of each area visited. These specials, like the current Bozo's Big Top, half-hour TV series, are produced live-action in contrast with the original Bozo The Clown five-minute cartoons.

In addition, Mr. Harmon is preparing his first live-action feature based on Bozo and another based on the comedy team of Stan Laurel and Oliver Hardy. The latter production will center around the antics and adventures of supposed nephews of Laurel and Hardy. Each of the two features will be budgeted in the vicinity of $700,000 and Mr. Harmon hopes to have them in distribution by the spring of 1967.

Mr. Harmon, a long-time friend and associate of Stan Laurel, has the rights to the late comedian's properties and last year licensed Wolper Productions to make 156 five-minute cartoons.

'Driver's Test' tops Sloan awards list

The National Driver's Test, broadcast last year by CBS-TV, has garnered three of the 16 radio-TV awards for highway safety to be presented by the Alfred P. Sloan Foundation Tuesday night (May 24) in New York.

Secretary of Commerce John T. Connor and Everett Case, president of the Alfred P. Sloan Foundation, will present 12 bronze plaques to the winners in the commercial and sustaining categories, and four awards of $1,000 each to writers and producers.

The awards are administered by the Automotive Safety Foundation in recognition of superior public service among broadcasters and advertisers in support of highway safety.

CBS News was cited in the sustaining category of national television for the broadcast of the driver's test on May 24, 1965, and its rebroadcast Aug. 30, 1965. The Shell Oil Co. was singled out in the commercial category of national television for sponsoring the test which directly quizzed the national audience on driving safety techniques. Warren V. Bush, the program's writer and producer, will receive a $1,000 creative award.

NBC Radio was honored with a sustaining national radio award for its special traffic safety announcements on World News Roundup, Meet the Press, Business Trends, Emphasis and Monitor.

Other winners in the sustaining category are: radio-1 kw or less—WCUE Akron, Ohio; radio over 1 kw—WAB Atlanta; regional radio—Northeast Radio Network, upstate New York; television stations—WHNC-TV New Haven, Conn., and WJBK-TV Detroit, and educational television—KSKU-TV Utah State University, Logan.

Other winners in the commercial category are regional radio—Frish's Restaurants, Cincinnati; national radio—American Oil Co., and television—All State Insurance Co.'s.

Other winners of the creative awards: Elmo Ellis, general manager of WSB Atlanta, who wrote an editorial campaign to improve ramps on the Atlanta expressway system; Jim Hetherington, WBQM-TV Indianapolis, writer of a documentary on accident prevention titled A Cross by the Road and Leo Shields, KTVN (TV) Wichita, Kan., producer of a dramatic series for school children.

No awards were made in the sustaining categories of educational radio and regional TV; the commercial categories of radio—1 kw or less and radio—over 1 kw, and the creative category of radio producer.
Why did we shorten our name on our 100th anniversary?

For one thing, there wasn't enough room on the cake.
For another thing, people haven't called us "Socony Mobil" for years. "Mobil" alone did the job just fine.
So it seemed logical enough to make the change on our 100th anniversary.
You like "Mobil." We like "Mobil."
And, after all, who else is there?

Socony Mobil Oil Corporation
Africa captures ABC-TV's eye

Network plans exhaustive study of continent in new documentary style

ABC is unlimbering a new project that it believes will pioneer a new documentary form in TV journalism. Next spring, probably in April, the TV network will fill three-and-a-half hours of prime time with a study of Africa. Next spring, probably in April, the TV network will fill three-and-a-half hours of prime time with a study of Africa.

Last year programed three-and-a-half hours in a single evening on U.S. foreign policy, and in prior years devoted a three-hour prime-time period to a study of racial tensions.

But Thomas W. Moore, ABC-TV network president, said ABC wanted to move beyond the presentation of "a white paper or reportorial report. We want to turn loose the best talents in entertainment, sports, news and public affairs, all of which, for the first time, will concentrate on one subject." Though the plans are broad and sweeping, the available details are sketchy. But some shape of the concept, and what it entails, were disclosed last week in an announcement and in subsequent explanations by various ABC officials.

The telecast on Africa will be available for sponsorship, Mr. Moore said. It's estimated that net time and talent will come to some $3 million to $3.5 million.

According to ABC, the television view of Africa will be treated "in conjunction with related activities by radio, records, publishing organizations and educational and civic groups." Just how these tie-ins will be translated into specifics has not been determined.

The various possibilities open for, say, the radio network were seen by ABC officials as being almost limitless. One said: "We might use the audio track of the TV program for ABC Radio. We possibly would want to edit portions for a series on radio, the radio network may be a contributor to the telecast, or we may see fit to produce an entirely independent show on Africa based on information provided by the TV study."

New Ground • Elmer Lower, president of ABC News said ABC hoped to break new ground in TV journalism with the show. Both he and Mr. Moore stressed that in addition to providing entertainment and information, the network hoped to deliver a product that would help foster international understanding.

ABC officials emphasized that the project will receive "intensive research" and encompass a search through several "authoritative sources" on Africa. As now conceived, the project would begin with the broad areas of the continent (the geography and natural resources) then move into a study of the people, their lives and degree of sophistication or deprivation and later in the evening, examining the continent's culture and art, significance of its geographical position as well as the role of its emerging countries.

South America Next? • Mr. Moore said ABC has projected a second such evening to be programed for a study of South America, but that current thinking is to schedule South America in 1968. The latter effort, as well as subsequent explorations of other world regions, would depend on the success of Africa. "We would do a different continent each year," Mr. Moore said.

Mr. Moore said the project would be supervised by ABC News with the ABC-TV programing and ABC sports departments providing major contributions. A special production unit has been formed. James Fleming, veteran TV producer, has been named executive producer of this unit, and Blaine Littell has been appointed African coordinator and producer for special projects.

Hollywood Without Makeup (Cardinal Productions Inc.): KBTX(TV) Denver; KFTV-TV Concord and KICU-TV Visalia, both California.

Philippine Adventure (Cardinal Productions Inc.): KTLA(TV) Los Angeles; KICU-TV Visalia and KICF-TV Concord, all California.

Rifle group seeks larger fairness base

The National Rifle Association has asked the FCC to broaden its proposed rule on fairness to include broadcast reports that present “unfavorably” the positions of persons or groups on issues of public importance.

The NRA also wants networks to be required to make facilities available for reply to personal attacks. However, since the commission lacks direct jurisdiction over networks, it’s not clear how that part of the proposed amendment could be enforced.

The commission has proposed incorporating in its rules those portions of the fairness doctrine dealing with personal attacks and station editorials for or against political candidates (Broadcasting, April 11).

The NRA, composed of 12,500 gun clubs throughout the country, endorsed the proposal, but suggested a change to “strengthen” the doctrine and “protect persons attacked” as well as the licensees whose facilities are used.

The association suggested language to cover situations in which out-of-context quotations are used or statements attributable to a person or group are presented “unfavorably as the specific attitude or response of that group.”

In such cases, as in the case of a personal attack, the station would be required to present the person or group with a script tape or summary of the program and to offer time for reply.

The NRA proposal also provides that, when the attack is carried by network affiliates, the obligation for conforming with the requirement to make time available would rest with the individual licensees. The person or group attacked, the proposed rule says, “shall be entitled to adversary access to the same network facilities as were employed in the initial personal attack.”

A similar comment was filed by an individual, Joseph H. Chislow, an NRA member from Iowa, N. J., who cited a program carried by CBS-TV in 1964 last year as an example of the kind of program he felt presented positions unfairly. It was entitled Murder and the Right to Bear Arms, which he said was an attempt to discredit opponents of strict gun legislation.

Details revealed for CBS’s FM package

CBS Radio’s new syndicated FM program service, called “The Young Sound” (Broadcasting, April 25), will be music aimed primarily at the 20-to-35-year-old audience and will be offered to stations at prices ranging from $400 to $1,000 a month, depending on market size.

William D. Greene, CBS Radio’s director of administrative operations, who developed the new service, said subscribers would get a library of 180 hours of programing and that this would be “refreshed” with 20 hours of new material each month. It will be enough to program a station up to 24 hours a day, he said.

Mr. Greene explained that the new service is intended for an audience that, he feels, is not being served by current radio programming. While the teen-age audience has plenty of rock ‘n’ roll available and other stations cater to the over-35 group’s preference for music of the 1930’s and 40’s, he said, the 20-to-35 audience has been neglected.

The Young Sound, then, will concentrate on what he calls “music of the last 10 years, but done in a less frenetic, less frantic kind of way.” It’ll be “music with a beat, but quieter—contemporary music with a good-music sound.”

For instance, Mr. Greene said, the programing will include music that Elvis Presley, the Beatles and the Everly Brothers made popular, but it will not include their performances of it. Instead, the music will be performed by such groups as the Holliday Strings, Kai Winding the Hollywood Brass or the Tijuana Brass.

For example — A sample quarter hour cited by Mr. Greene included “I Know a Place,” with Tony Hatch; “Ask Me,” with the Holliday Strings; “Baby It’s You,” with the Shirelles; “Hush, Hush, Sweet Charlotte,” with Billy Strange, and “Spanish Flea,” with the Hollywood Brass.

A one-minute commercial break will be programed every quarter-hour, along with a recap of the selections played during that period.

Mr. Greene said that seven months had been spent in combing albums for the right music, and that the selections are being put together “with careful attention to the keys, the segues, the overall listener effect” by John De Witt, former music director of WKBW (FM) New York, a classical-music station, and before that with WBAI (FM) New York, who recently joined CBS Radio as producer for FM operations.

The service, to be supplied on com-
UHF owner plans teen slant to programing

Detroit real estate investor Aben E. Johnson Jr. is a three-UHF man. Mr. Johnson is sole owner of WXON-(TV) (ch. 62) Detroit, permittee of channel 62 in Hammond, Ind., and applicant for channel 67 in Akron, Ohio. A very nice trio for an individual owner, but, by his own admission, certainly located in areas of murderous metropolitan VHF competition. And, as he points out, UHF conversion has not been spreading like wildfire.

What makes Mr. Johnson so daring against such odds? Is he planning ethnic programing? Could that swing such a competitive market? No. Ethnic is not exactly what he has in mind.

It's teen-age television programing. Mr. Johnson feels that teen-age appeal is the one item that could ebow a way into the adult market controlled by VHF. Newsweek, in its March 21 issue, pointed out that American teen-agers are scheduled to spend a beautiful $12 billion in the next year, primarily for luxuries and recreation, and this takes no account of their effort on adult buying.

But Mr. Johnson emphasizes that his stations will not be visual rock 'n' roll experiences. He thinks that teen-agers “are looking for something a little better than what they've had —plays, local activity programing, instructional sessions and sports.” Programing outlines include a series of “great moments” in history and in sports, community conferences, phone discussions, automotive mechanics instruction and a weekly foreign film.

Mr. Johnson admits a lack of previous broadcast experience, but speaks as a man with experience in his chosen market. He is a father of four children.

patible stereo tape, will be offered to stations for $1,000 a month in markets of more than one-million population; $750 a month in markets of 750,000 or more, $500 in markets of 500,000 and $400 in markets below 500,000.

The service is slated to begin Sept. 1. It was prompted by the FCC's move to require at least 50% nonduplication of programing by AM-FM combinations in top markets. CBS-owned FM stations plan to use it at night (6 p.m. to midnight) and on weekends, and to duplicate the programing of their associated AM stations during weekday daytime hours.

Searching services offered

The Entertainment Title and Copyright Research Co. has been formed to provide an information service to the entertainment industry. The company has set up reference files, which cover the domestic and international spheres of all the creative arts. The copyright service provided by the company includes a search for the origin of the basic work, dramatizations, picturizations, and radio and television presentations based on the original material as well as possible U. S. copyright registration, renewal, recorded assignments of instruments, and foreign copyright. Entertainment Title and Copyright Research is at 225 West 57th Street, New York.

Editorial conference set for July in N.Y.

The fourth annual National Broadcast Editorial Conference will be held in New York July 28-30 and will include a talk by Fred W. Friendly and various presentations and discussions on issues related to TV-radio news coverage.

Announcement of the conference was released jointly by the Radio and Television News Directors Association and the Columbia Graduate School of Journalism, which are the co-hosts of the meeting. Co-chairmen of the planning committee are John Corpron, news director of WDSU-TV New Orleans, and Professor William A. Wood of the Columbia School of Journalism.

Mr. Friendly, former CBS News president and now professor of journalism at Columbia and television advisor to the Ford Foundation, is expected to discuss the potential role of broadcast news and editorials during a July 29 session.

The conference agenda includes a new report on the current state of editorializing throughout the country, based on research by the National Association of Broadcasters; film and tape presentations and critiques of editorials broadcast by various stations, and discussions on the philosophy of broadcast editorializing, government regulation, the FCC's fairness doctrine and equal-time requirements.

Program notes . . .

Kings tour . . . NBC has contracted with the British Broadcasting Corp. and Independent Television Authority for U. S. rights to a one-hour color telecast on the history of the British monarchy as illustrated through tours to six royal palaces (Broadcasting, May 2). The show will be scheduled late in the year with scenes from Buckingham, St. James's, Kensington, Hampton Court and Windsor palaces in England and Holyrood House in Edinburgh.

Ortiz-Bizzarro bout . . . Sports Network Inc., New York, has scheduled live TV coverage of the 15-round fight between lightweight champion Carlos Ortiz and challenger Johnny Bizzarro on June 20.

ESP special . . . ABC-TV has set June 16 (10-11 p.m. EDT) for its special, The Bafling World of ESP. B. F. Goodrich Co., Akron, Ohio, through BBDO, New York, and Griswold-Eshelman Co., Cleveland, will sponsor it.

Second series . . . RKO General Productions, New York, has renewed its new TV syndicated series Firing Line with William F. Buckley Jr. for a second 13-week period. The debate program, featuring Mr. Buckley, editor of the National Review, has scheduled tapings with Pierre Salinger, Clare Booth Luce, Stoughton Lynd and Harry Golden.

Rodgers' score . . . Richard Rodgers will compose a score for an NBC-TV color special to be televised during 1967. The show, Saturday Night, will deal with peoples in different lands celebrating Saturday night. It will be a Talent Associates production with Irving Gitlin as producer and Daniel Melnick and David Suskind as executive producers.

TV fairy tales . . . RKO General Productions, in association with Henry Jaffe Enterprises, is syndicating 13 one-hour fairy tales, Shirley Temple's Storybook. The series, which ran several years ago on ABC-TV, includes “Mother Goose,” “Hiawatha,” “Rip Van Winkle” and “Sleeping Beauty.”

Left and right . . . NBC-TV will explore extremist organizations on an NBC News color special on June 12 (6:30-7:30 p.m. EDT), Politics: the Outer

66 (PROGRAMING)
**Fringe** will be narrated by Chet Huntley. Chet Hagan is producer.

**Money traffic** = *Wall Street: Where the Money Is*, a one-hour documentary set for June 14 (10-11 p.m. EDT) on CBS-TV, will study the stock exchange, the commodity exchange, over-the-counter markets and wherever else the money traffic flows or stops and starts on Wall Street. The Xerox Corp., through Papert, Koenig, Lois, is sponsoring the broadcast, which was produced by Wolper Productions in cooperation with CBS News.

**Vietnam Hotline** = Hotline Productions, Chicago, which has been syndicating a series of Vietnam interview radio programs throughout the U. S., announces a new program package, *The Best of Hotline*. It comprises about 30 of the most dramatic shows to date.

**Honey in the East** = Initial local sales of the *Honey West* series, which is completing its run on ABC-TV, have been made to WPIX(TV) New York and KCOP(TV) Los Angeles, it was announced last week by Four Star International. Thirty half-hour episodes of the series are available for syndication.

**Jersey derby** = Sports Network Inc., New York, will carry live to 150 TV stations the $100,000-added Jersey Derby at Garden State Park on May 30 (5:30-6 p.m. EDT).

**UHF added** = Television Affiliates Corp. (TAC), which serves as an exchange for locally produced documentary programs, announced last week it has expanded its advisory committee to include representation by UHF stations. It has named to the committee Sterling C. (Red) Quinlan, president and general manager of Field Communications Corp., operator of WFLD(TV) Chicago, and Richard C. Block, vice president and general manager of Kaiser Broadcasting Corp., which operates WKBD (TV) Detroit and WKBS(TV) Burlington, N. J.-Philadelphia.

**Shakespearean coup** = WBAL-TV Baltimore, recently (May 2) pre-empted all NBC shows scheduled for an entire evening in order to present the British Broadcasting Corp.’s production of *Hamlet* at Elsinore. Starring Christopher Plummer as Hamlet, the three and one-half hour telecast was sponsored by the *Baltimore News American*. According to a survey conducted by the W. B. Donor Co., Baltimore, advertising agency for both WBAL-TV and the News American, approximately 40% of Baltimore’s available TV audience watched the performance.

**Cultural dirge** = Educational station WDNT(TV) Newark, N. J.-New York, has scheduled a *Finnegan’s Wake* beginning May 23, based on James Joyce’s “Finnegan’s Wake.” Schedule will include “A Viewers’ Guide to the Coach with the Six Insiders” (dance created and choreographed by Jean Erdman) and interview by Stanley Kauffmann, *The New York Times* drama critic, with Mary Ellen Bute, producer-director of the film “Finnegan’s Wake.”

**Hollywood film lab** = As a reflection of broadcast advertising’s ever increasing demands for more, better and quicker film processing, a new major television and motion picture film laboratory is opening in Hollywood. To be called American Color Laboratories Inc., the new company is scheduled to begin operation by early June. It will provide both additive and subtractive printing in both 35 mm and 16 mm. Harvey G. Gordon, film technician with Deluxe Laboratories Inc., will become American Color Labs’ plant director. The company will be located 1040 North McCadden Place.

**What’s in a name?** = Because of increased involvement in color videotape syndication and dubbing and tape-to-film transfers, Acme Film Labora-

---

**Two good men, by George!**

That’s George in the middle—Director of all WIBW farm programming. He’s always in the middle of the Kansas farm picture.

These three—Don Edson, George Logan and Larry McChee—give the “Voice of Kansas” the most active farm department in the land. They sell Kansas agriculture in a big way. AND they sell products and services to Kansas farmers with the kind of personalized salesmanship that is available only through WIBW.

WIBW’s college-trained farm broadcasters need no introduction to Kansas farmers. Twenty hours on Radio and 3½ hours on TV every week, plus 80,000 road miles annually calling on farm organizations and dealer groups, have taken care of that! It takes BIG farm programming to serve Kansas agri-business—a billion and a half dollars gross annual income BIG . . . and WIBW delivers it!

You just can’t sell Kansas farmers (or their suppliers) effectively without these three astute fellows working for you. Ask Avery-Knodel. Or call 913 CR 2-3456, by George.

---

*Broadcasting*, May 23, 1966
Western adwomen get their Lulu awards

Thirty-two gold Lulus, symbolic figures of excellence in the field of communications, were presented last week at a banquet in the international ballroom of the Beverly-Hilton hotel. The winners received their Lulu statuettes from the Los Angeles Advertising Women's organization, which sponsored this annual achievement awards competition for 20 years. They were chosen from among hundreds of entries submitted by women in advertising and public relations from 13 western states. The judging was done by an all-male jury of prominent men in advertising, public relations, research, marketing and education.

Competition covered eight categories — copy writing, art, sales promotion and merchandising, research, television and films, radio, public relations and complete campaigns. Radio and TV winners were Janet Boden of Doyle Dane Bernbach Inc. for a humorous radio commercial for Lawry's beef stroganoff mix, Bea Shaw of Bea Shaw Productions for a humorous radio commercial for Plymouth dealer's Barracuda car, Barbara Neswald of Klosterman Inc. for a national TV commercial for Cole of California and Betty Pierce of Grey Advertising Inc. for a local TV commercial for Knudsen buttermilk.

Race relation spots set by Ad Council

The Advertising Council Inc., New York, has announced it will conduct a national campaign for the U.S. Community Relations Service, Washington, a government agency. Purpose will be to elicit community awareness and response for better racial relations. This summer the council plans to extend its campaign into network radio and television.

As a public service, the "Better Community Relations" campaign was first test-marketed in Boston, San Francisco, Baton Rouge and Tallahassee, Fla. The council used local radio and TV spots along with print advertising, and found better than 50% acceptance of the messages. Its decision then was to broaden the campaign's scope to national media. The council's voluntary agency on the campaign is Grey Advertising Inc. TV messages of one-minute, 30- and 10-seconds length are being worked out with the three networks. The Advertising Council also has a single and talk message prepared for radio broadcast in 60-, 30- and 20-second messages.
NOVACOR AMPLIFIERS

SUPPLY THE MISSING PIECES IN YOUR CATV SYSTEM

BRIDGING AMPLIFIERS
NOVACOR Bridger's modular design, incorporates new circuitry, and supplies 10 db more output than any other CATV amplifier. The case can become a permanent part of the plant; the electronic chassis unplugs. Bridgers, available in 12 different models, feature direct feed and directional coupler feed configurations. The direct feed is designed to feed from a "bridger out" of the Trunk Amplifier, an external splitter or directional coupler. The coupler feed is designed for insertion in the trunk without external coupler or splitters.

LINE EXTENDERS
NOVACOR Line Extenders utilize solid state circuit design for high output-low noise capabilities. Equipped with both fixed and variable attenuation for flexibility in system design, these line extenders are to be cable-powered with power feed thru or power "link” disconnect for feeding either end.

TEST PROBE
A NOVACOR Test Probe, TP-30, is supplied with each amplifier. It is designed with 30 db of attenuation ± 1 db with 3' of RG-59U cable. It can be utilized for measurements either at the input or output test points.

TRUNK AMPLIFIERS
NOVACOR Trunk Amplifiers supply 10 db more output than any other CATV Amplifiers. They are available in three basic models, which differ in gain and tilt capability to provide optimum spacing in systems of varying length and customer density.

TAP UNITS
NOVACOR Tap Units, a hybrid design for flatest response, are housed in epoxy sealed, aluminum cases, and come with pedestal mountings (TU) or messenger mountings (TM). These units feature true impedance match on service drops.

SPLITTERS
All NOVACOR Splitters are weather sealed with epoxy for long lasting, trouble-free performance. They feature a universal mounting for messenger or surface by use of a throw-away stud and messenger clamp assembly.

POWER SUPPLY
The PS-30 Power Supply is housed in a weather-proof aluminum case. Power feed and distribution is made through the connectors on the bottom of the case.

KTTV (TV) billboards promote Dreier news coast to coast

How competitive is local television news? Nothing conveys the red-hot intensity of the internecine battle better than the background and details of one of television's most extensive local station promotional campaigns now at its zenith.

Earlier this year KTAL (TV), the Golden West Broadcasters-owned station in Los Angeles, wooed newscaster George Putnam away from KTTV (TV), the Metromedia-owned station in the same market. It was a coup for Gene Autry and a blow to John Kluge because George Putnam is the Maury Wills of broadcast news in Los Angeles. He does things with a flourish, in a highly dramatic style, and the people of Los Angeles surely love their histrionics.

Not to be outdone, KTTV, via a reported six-figure salary, lured veteran newscaster Alex Dreier away from WBBK-TV Chicago to take over where George Putnam left off. But Mr. Dreier, a man who never plays second fiddle when there's a sonorous sound to be delivered, was virtually unknown in Los Angeles and his acceptance was questionable.

Yet in this deal KTTV had an ace in the hole that even Golden West Broadcasters, with its widespread empire, may have trouble matching. For Metromedia owns Foster & Kleiser purportedly the world's biggest outdoor advertising operation, and KTTV has put the billboards to work to sell Alex Dreier.

Using 30-sheet outdoor boards in major cities from coast to coast, KTTV has called attention to Mr. Dreier throughout the nation even though the news program being publicized is not seen in any market outside of Los Angeles. The flamboyant, three-color boards are obviously aimed at agency executives and advertisers in key cities across the country. Boards located at busy intersections and major routes traveled by agency personnel and either on or near each city's advertising row, were posted by Foster & Kleiser in such cities as New York; Cleveland; Chicago; Cincinnati; Toledo, Ohio; Seattle; San Francisco; Oakland, Sacramento; San Jose, all California; Salem and Portland, both Oregon; Olympia; Wash., and of course, Los Angeles.

In the greater Los Angeles area, KTTV's saturation campaign is aimed at both advertiser and viewer, with more than 750 boards being posted. This is claimed to be the biggest outdoor campaign ever for a Southern California television program.

The station also is using king-size cards on more than 250 transit buses, featuring "Dreier and the KTTV news" slogans in color; large color posters on the rear of more than 225 Sparkletts drinking water delivery trucks and extensive newspaper advertising.

KTTV's campaign for Mr. Dreier and his 10 p.m. week night newscasts is being topped off with more than 450 radio spot announcements; video-tape, color-film and color-slide promotions on the TV station's own channel 11 and miscellaneous other properties.

Seattle stations play
King of the hill

The promotion department at King Broadcasting Co. in Seattle apparently is ready to climb even the highest mountain to produce promotional copy. In the process the promo boys figure to come up with a pretty good news story.

There's nothing figurative about the situation, because King Broadcasting literally is sponsoring a six-man expedition to climb an unconquered 10,185-foot mountain. Part of the St. Elias mountain range of Alaska and the Yukon, Mount Seattle, is considered by many to be foremost among the unclimbed peaks in this hemisphere.

King Broadcasting, which comprises KING-AM-FM-TV and Seattle magazine, will provide radio coverage of the climb, with transmissions from the climbers on the mountain being tapped on the scene and then fed to the company's radio outlets in Seattle for immediate broadcast. KING AM-FM will broadcast periodic reports from base camps, the advance camps and, possibly, from the summit of Mount Seattle. At later intervals, KING-TV will feature exclusive filmed reports from the scene.

Drumbeats
CARE thanks radio-TV • On its 20th anniversary CARE has taken note of the broadcast industry's continued cooperation in helping enlist American public support for the relief organization. Vice President Humphrey (r)

presents an award of appreciation to the National Association of Broadcasters, for the industry. Accepting is Jack W. Lee, wszt Huntington, W. Va., chairman of the NAB's radio board.

Frustrated on fifth • KMUZ-FM Santa Barbara, Calif., is offering membership
cards in the new K MUZ-FM Fifth Friday Club, to former, present and potential station advertisers and to "other great people." The membership consists of "very busy people who are frustrated by the thought of facing any day of any week without a committee meeting." The association enables all members to enjoy a "very important meeting" sans speeches in every month that has a fifth Friday.

D. C. briefing • Dick Harris, general manager of KYW, Philadelphia conducted a news briefing with local agency executives. The agency personnel were taken to Washington's National Press Club for the briefing as well as a tour of the Nation's Capital.

Station reports • WSJS-AM-FM-TV Winston-Salem, N. C. is distributing the annual report of its public services in 1965.

Human relations award • NBC reporter and commentator Ben Grauer has been given a human relations award by the Anti-Defamation League of B'nai B'rith for his outstanding contribution to the front-line defense of democracy—letting the people know the facts and emphasizing the courage and creativeness of the human spirit.

Medical award • WABC-TV New York last week received a $2,500 Albert Lasker medical journalism award for its one-hour documentary on mental retardation, Who Will Tie My Shoe? The program was cited for its "powerful, sensitive, yet factual and moving story." WABC-TV will donate the honorarium sum to the mental retardation clinic of Flower Fifth Avenue hospital.

No room at the top • KWK St. Louis took a look at the number of stations proclaiming themselves as number one and decided a number two station could be as much in demand as a good nickel cigar. This tongue-in-cheek dig at the number ones, as shown in this billboard, is now used throughout KWK's promotions.

Flying high • Arthur Godfrey and three other prominent pilots will attempt to set 14 international speed records during the first around-the-world flight to be made in a twin-engine business jet. Mr. Godfrey and Dick Merrill, Fred Austin and Major Karl Keller will leave LaGuardia Airport in New York at 4 p.m. Wednesday (May 25) on a trip that is to take them 23,000 miles.

CBS-TV plans big blow-out for fall

The new television season should be so spectacular:

A luxury liner, a dirigible, a chartered Boeing 707, several helicopters, fixed-wing aircraft, fire boats, Coast Guard cutters, harbor escort vessels, a fleet of millionaires' yachts, a string of chartered buses, four cable cars, four rickshaws and a convoy of trucks all will rev into action this week (May 25-28) geared for the single purpose of promotion. It's not a re-creation of the Normandy invasion (although before all the fanfare clears the West Coast may be completely overwhelmed) but rather the CBS Golden Gate press voyage to the 1966-67 season.

More than 400 television editors,
TV performers and network executives will be aboard when the CBS-TV's publicity and promotion departments open the 1966-67 season with a roar that's louder than Hollywood standards. As an example, appearing as mere spear-carriers in the network's Diamond Jim Brady-style promotion will be the Los Angeles Symphony Orchestra and five other musical groups, an aquacade in San Francisco Bay, an air-sea rescue demonstration at Los Angeles harbor, a skywriting welcome to San Francisco, a Chinese new year's parade, two luxury hotels and a cast of thousands of helium-filled balloons.

The new season extravaganza opens with poolside news interviews at the Beverly Wilshire hotel with the stars of new and returning shows on CBS-TV next season. The mad TV world proceedings then move on to San Francisco via the S. S. Lurline steamship and a chartered Boeing 707 jet. In the Bay City, as an added flourish, the promotion will be climaxcd with a specially-staged Chinese new year's parade and a dinner at a celebrated Chinese restaurant, with that equally celebrated gourmet, Danny Kaye, the presiding chef.

Crowding into the act, to grab a piece of the promotion for themselves, will be 21 corporations and organizations with varying business pursuits. They include the City of Los Angeles, the Port of Los Angeles, the Beverly Wilshire hotel, the Gene Autry Hotel Corp., the U. S. Coast Guard, the Matson Steamship Co., the Port of San Francisco, the San Francisco Visitor's Bureau, the Goodyear Tire & Rubber Co., the elders of San Francisco's Chinatown and San Pedro's Port o' Call village.

Commercial producer Stan Freberg was overheard to remark: "If you loved D-Day, you'll be crazy about CBS's Golden Gate press voyage."

**FINANCIAL REPORTS**

**Seven Arts, Filmways scrap merger plan**

The projected merger of Seven Arts Productions Ltd. and Filmways Inc. came to a halt last week.

A brief joint announcement last Wednesday (May 18) from Eliot Hyman, president of Seven Arts, and Martin Ransohoff, chairman of Filmways, said that "because of operating and contractual problems which had proven more difficult than previously anticipated, Seven Arts and Filmways have mutually agreed to terminate all further merger negotiations."

Officials declined to elaborate on the reasons for the abandonment of the proposal.

Some observers voiced the view that Seven Arts, after examining the proposal carefully, decided that it would not be advantageous because of distributions commitments Filmways has for both its theatrical and TV film properties. They noted that some of its features are tied up by various major distributors, while its TV properties that have come off the network recently, such as *The Addams Family* and *Mr. Ed* have been assigned to Len Firestone and MCA-TV, respectively.

In addition, international distribution rights to Filmways series still on the network (Beverly Hillbillies, Petticoat Junction and Green Acres) are held by CBS Films.

The proposed merger was announced on March 31 (Broadcasting, April 4).

Stocks of both companies are traded on the American Stock Exchange.

Filmways announced last week that it has increased its quarterly dividend to 15 cents a share from 10 cents and also declared a 2% stock dividend.

**Singer Co. to buy Packard-Bell**

In a deal that unites a stereo radio and phonograph-maker with a producer of color TV sets, Packard-Bell Electronics Corp., Los Angeles, will sell its business and net assets for cash to Singer Co., New York according to a joint announcement released last week. Singer will pay $28.125 per share, Monday's closing price on the New York Stock Exchange, for the 998,000 Packard-Bell shares currently outstanding, or slightly more than $28 million in aggregate. This agreement would supersede an earlier one between Singer and Marathon Securities Corp., calling for Singer to purchase a $5-million Packard-Bell convertible note held by Marathon (Broadcasting, May 2).

Packard-Bell currently is believed to be the biggest television, color television and stereophonic equipment manufacturer in the West. Singer manufactures stereo-phonographs, radios and power tools, in addition to its major product, sewing machines.

**RCA-Random House merge**

Completion of RCA's acquisition of Random House Inc. was announced last week. The publishing company is now a wholly owned subsidiary of the electronics complex.

The plan had been approved by Random House stockholders at a special meeting May 10. The agreement called for an exchange of stock with 0.62 share of RCA common being offered for each of Random House's 1,309,692 outstanding common shares.

With RCA stock trading at approximately 50 last week the transfer had a market value of about $40.6 million.

**TV helps set record at 20th Century-Fox**

Darryl F. Zanuck, president of 20th Century-Fox Film Corp., told stockholders at the annual meeting in New York last week that film revenue, including television film, for the first quarter of 1966 topped all Fox company records.

First quarter film rentals totaled $51,967,000, compared with 1965's first quarter of $28,289,000, a gain of 83.7%. Rentals from films produced specifically for television rose from $6,614,000 to $13,277,000, more than...
Does your company need $1,000,000...or $250,000,000?

You should talk to Reynolds & Co., the firm that arranged for over a half billion dollars of growth capital in the first quarter of 1966.

Acting as manager or co-manager, Reynolds & Co. raised well over half a billion dollars during the first three months of this year. Some of it came from public offering of securities; some from direct placements with institutional purchasers. The smallest financing was $1,000,000; the largest, $286,000,000—in excess of half a billion dollars.

Whatever the size of your capital requirements, you will find it advantageous to discuss the matter with us. If a public offering seems in order, we can achieve broad distribution through our nationwide network of branch offices and our close relationship with correspondent firms. If circumstances dictate, we can effect direct placements under terms and conditions that fit your requirements.

Your inquiries are invited.

Reynolds & Co.

MEMBERS NEW YORK STOCK EXCHANGE

Head office: 120 BROADWAY, NEW YORK, N.Y. 10005
Mr. Zanuck reported that Fox's net earnings after taxes for the first 1966 quarter amounted to $3,048,000, equal to $1.06 a share. In comparison, there was a net of $2,899,000, equal to $1.01 a share in the first 1965 quarter.

Earnings before taxes in this year's first quarter climbed to $5,570,000 from last year's $3,358,000, a gain of 65.9%.

Richard D. Zanuck, Mr. Zanuck's son and vice president in charge of production, spotlighted Fox's extremely active television subsidiary. Along with William Self, executive vice president of 20th Century-Fox Television, the young Mr. Zanuck has taken Fox from a position three years ago when it had no regular programs on network television to this year's 10 prime-time programs.

Grey Advertising registers new stock

Grey Advertising Inc., New York, has filed a registration statement with the Securities and Exchange Commission covering an offering of 21,460 shares of common stock. Of this number, 18,623 shares will be offered to the public from time to time in the over-the-counter market. The company intends to issue the remaining 2,837 shares as a bonus to some of its employees.

Net proceeds of the sale are to be added to working capital. In addition to indebtedness, Grey Advertising has outstanding 1,207,119 common shares, of which management and members of their immediate families own 50.78%.

Grey's first report shows 5-year progress

The first annual report of Grey Advertising Inc. released last week shows gross billing and net income in 1965 rose substantially over 1964.

A five-year chart of Grey’s progress reveals that billing moved upward from an approximately $60.5 million in 1961 to more than $119.4 million in 1965. Profit growth as gauged by income per share increased from 37 cents in 1961 to $1.36 in 1965.

Grey went public in 1965.

For the year ended Dec. 31:

Reade/Sterling selling to all three networks

Officials of Walter Reade/Sterling Inc., Oakhurst, Ill., told a stockholders meeting that a $2.5 million investment was recently made in motion picture acquisition for direct sale to TV. Walter Reade Jr., chairman of the board and president, said for the first time WR/S is selling “successfully” to all three TV networks. Additional UHF stations slated for operation are helping the film industry by providing new markets for products; he indicated. A 33% earnings profit was recorded for 1965 (Broadcasting, April 25).

Video Pictures plans merger

Video Pictures Inc., New York, and Electrographic Corp., listed on the American Stock Exchange, have announced their intention to merge subject to approval within their respective organizations. VPI now is privately owned. Electrographic would acquire VPI in exchange for a large block of its stock. George Tompkins, who will continue to head VPI, said the merger would not alter VPI in any other respect.
Art Mayer—self-taught mechanic
now teaches at a GM Training Center

He was the happiest boy in town when he landed a part-time job at the corner gas station. He wanted to be a mechanic for as long as he could remember. He wanted to learn all he could about cars and engines. And this was his big chance. He turned his part-time job into a full-time ambition. He never lost the desire to work on engines... or to learn more.

During the war, Art joined one of the General Motors car divisions as a mechanic and soon worked his way up to Master Mechanic. Today, Arthur E. Mayer, Jr., is an instructor at one of 30 GM Training Centers across the nation, with a total annual enrollment of some 125,000 automotive mechanics drawn from GM retail dealerships. The “refresher” courses taught at these centers keep local dealer mechanics constantly abreast of new advances in technology and service methods.

Art Mayer is happy working with his students, helping to advance their knowledge and skills. He's a fine example of the kind of people that make GM go.

General Motors is People... making better things for you
SEC’s April report of transactions

The Securities and Exchange Commission has reported the following stock transactions of officers and directors of other stockholders owning more than 10% of broadcasting or allied companies in its Official Summary for April (all common stock unless otherwise indicated):

- Capital Cities Broadcasting Corp.—Curt T. Hogan sold 600 shares, leaving 4,800. F. Sidney Moore acquired 2,000 shares plus 5,600 shares through a stock split, giving total of 11,300.
- CBS Inc.—William A. M. Burden, holding 3,000 shares personally, sold 9,768 shares on beneficial account of W.A.M. Burden & Co., leaving none, and sold 6,388 shares on beneficially held trusts, leaving none, Michael Burke sold 80 shares, leaving 7,006. Leon Levy sold 59,000 shares, leaving 301,638 plus 2,496 in beneficially held trust account. Richard H. Salant sold 600 shares, leaving 14,819.
- Cox Broadcasting Corp.—Frank Gaither sold 300 shares, leaving 8,023.
- Filmways Inc.—Al Simon acquired 5,000 shares, giving total of 8,082.
- Gross Telecasting—Raymond W. Motez, holding 100 shares personally, acquired 1,072 shares and sold 910 shares, giving total of 672 on beneficially held Paine Webster Jackson & Curtis account.
- Jerald Corp.—Jerald P. Johnson sold 800 shares, leaving 2,000.
- RCA Inc.—Million H. Macklin, holding 12,138 shares personally, sold 900 shares on beneficial account as trustee, leaving 9,209, and sold 400 shares on beneficial account as co-trustee, leaving 600. National General Corp.—Lloyd Drexler sold 10,836 shares, leaving 1,000.
- A. G. Nielsen Co.—Arthur C. Nielsen sold 81,100 class A shares, leaving 694, 475, plus 89,460 on beneficial account as trustee (sales of 163,906 shares made from Nielsen trusts on Feb. 1) and 1,290 on beneficial account with wife. Arthur C. Nielsen Jr. sold 3,000 class A shares, leaving 14,387, and sold 3,000 shares on beneficially held trust, leaving 3,000, plus 2,000 on beneficially held account for minor children. Philip R. Nielsen sold 20,000 class A shares on beneficially held trust account, leaving 20,000, plus 2,000 on beneficially held account for minor children.
- RCA—Arthur L. Malcarney exercised option on 8,228 shares, giving total of 2,675.
- Reeves Broadcasting—Hazard E. Reeves sold 5,500 shares, leaving 560,822. Following disposed of 6% convertible subordinated debentures; Hazard E. Reeves, $18,000, leaving $7,000; Morris Schechter, $3,000, leaving none.
- Seven Arts Productions—Eliot Hyman sold 30,000 shares (with him Storer Broadcasting Co.—John J. Kelly exercised option on 3,000 shares, giving total of 7,000.

Reeves backlog hits record high

H. W. Clapper, president of Reeves Industries Inc., New York, told a recent shareholders meeting that he expected the company’s sales to reach at least $10 million in the current year. The firm had record sales of $9,004,422 in 1965. Mr. Clapper pointed out also that the company achieved its first million dollar sales month in its 20-year history. Mr. Clapper said that the backlog of orders for Reeves products was at the highest level in the company’s history. He said the orders provided a basis for his estimate of the increase in sales for 1966.

Reeves Industries supplies magnetic tape for the broadcasting industry through its Soundcraft division, and is also involved in the home recording market and the data processing field.

Carney reviews year at FC&B’s annual meeting

There were few surprises at the Foote, Cone & Belding Inc. annual meeting held in Los Angeles last week. The company, enjoying a fine year in 1965, had client losses amounting to less than 5% of its overall billings but made up for this by snaring 11 new clients whose billings exceed $20 million a year. What’s more, most of this new business was not reflected in the agency’s 1965 billings total. As already announced, the company’s gross billings increased to $59 million, up from $49 million in the 1965 first quarter and earnings amounted to 21 cents a share up from the previous 18 cents a share (BROADCASTING, May 2).

These were the highlights of what
Robert F. Carney, chairman of the board, told barely 50 shareholders, most of them company employees, gathered in the Statler Hilton hotel.

During the 40-minute session, management's entire slate of 16 nominees for the board of directors was approved, as was a proposal to make 23,500 shares of common stock from the treasury available to present and future employees of the company at less than market price.

Last week marked the first time in FC&B's three-year history as a publicly owned company that its annual meeting was held in Los Angeles.

Seven Arts earnings up sharply for 9 months

Gross and net income of Seven Arts Production Ltd., Toronto and New York, rose substantially in the nine months ended March 31, the company reported last week.

Gilbert losses keep Wrather out of profit

It would have been a very good year for Wrather Corp. stockholders if the Beverly Hills-based company had not played with toys. For Wrather reported last week a consolidated net loss in 1965 of $1,848,584, compared with a net loss of $85,155 in 1964. But Wrather's 1965 net loss included A. C. Gilbert Co.'s 1965 net loss of $2,910,598. Wrather owns 49.5% of Gilbert and its just released profit-and-loss statement had been held up pending clarification of the toy company's earnings.

If Wrather was not involved with A. C. Gilbert, it would have shown a tidy increased profit of about $160,000 for fiscal 1965. A. C. Gilbert had a net loss of $1,855,026 in 1965 but it was reported that the minority shareholders' equity in the net assets of the toymaker was exhausted that year and all of Gilbert's 1965 loss had to be included in Wrather's current financial statements. In comparison, only 54% of Gilbert's loss in 1964 was absorbed by Wrather, amounting to about five cents a share.

Gilbert's disappointing showing in 1965 was said to be caused by a number of problems among which were the tooling and production problems on one of its major new products. Wrather's other holdings all were claimed to be prospering, with the Disneyland hotel undergoing a $5.5 million expansion program, a new animated Lone Ranger series starting on CBS-TV on Saturday mornings in the fall, the Lassie series readying for its 13th network season and the Muzak operation experiencing a 24% increase in gross income and 56% jump in pre-tax profits over 1964.

Committee studies  
CBC technical standards  

The Canadian Board of Broadcast Governors has announced the establishment of a special commission which will determine a system of technical standards to be used for distribution of Canadian Broadcasting Corp. radio programming across Canada. Representatives of the CBC, the Department of Transport and network affiliates will form the committee, which is scheduled to submit a report to the BBG in September.

The main problem to be considered by the committee was highlighted last month when CHYM Kitchener, Ont., requested BBG permission to sever its affiliation with the CBC radio network. CHYM maintained that there was no need for it to carry CBC programming because adequate coverage was being provided by a CBC-owned station in Toronto.

The BBG has deferred any recommendation on the CHYM request.

International film sales . . .  

Blue Light (20th Century-Fox TV): WKAO-TV San Juan, P. R.; Radio Television de Guatemala, S. A., Guatemala; Telesistema Mexicano, S. A., Mexico; Corporacion Venezolana, S. A., Venezuela; Dicon, S. A., Argentina, and Televisora Nacional, S. A., Panama.

The Green Hornet (20th Century-Fox TV International): Canadian Broadcasting Corp.

The Big Valley (Four Star International): German television. Now in 20 foreign countries.

Waters buying CFRA,  
CFMO (FM) in Ottawa  

Mrs. Frank Ryan, president of CFRA Broadcasting Ltd., announced last Monday (May 16) the sale of CFRA and CFMO (FM) Ottawa, to Allan Waters of Toronto. The two stations were formerly operated by CFRA Broadcasting Ltd. and the Kilreen Co. Mr. Waters owns CHUM Toronto.

A spokesman for the Canadian Board of Broadcast Governors stated that the board has not yet received an application for the transfer of shares. The transaction is subject to approval by the BBG, which is to hold its next meetings in June and September.

Mrs. Ryan, widow of the late Frank Ryan who founded CFRA in 1947, declined to disclose the sales price. Mrs. Ryan has been president of CFRA Broadcasting Ltd. since her husband died in March 1965, and she will continue to be active as a board member of the new company.

CFRA started May 3, 1947, and operates on 580 kc with 50 kw day and 10 kw night. CFMO went on the air in 1948 as CFRA-FM, and is on 93.9 mc.

Are FM translators  
next on planning board?  

The FCC has advanced the possibility of authorizing FM translators to serve remote areas unable to receive FM signals directly.

The commission last week authorized China Lake Community Council, China Lake, Calif., to test the suitability of a low-power FM translator. A transmitter will be located on Laurel Mountain, near Ridgecrest, Calif., and will serve China Lake, Ridgecrest and Inyokern, all California.

The commission also announced that it has received a petition for rulemaking from the Red River Valley Translator Association, Childress, Tex., to authorize FM translators on a regular basis. The developmental translator will operate on not more than one watt of power on channel 296 (107.1 mc), the commission stated. China Lake Community must, however, obtain the prior approval of any station whose programs are rebroadcast, the commission said last week.

KGO-TV wins round  
in fight for Mt. Sutro  

A 10-year struggle between two San Francisco VHF's as to whether or not a new tall-tower antenna was going to be placed on top of Mount Sutro took a turn into the home stretch last week. The San Francisco board of supervisors sustained the previous decision of the city planning commission in naming Mount Sutro as the central location for all local TV station transmitters.

KGO-TV, the ABC-TV-owned station in San Francisco, has been spearheading the fight to make Mount Sutro the site for its new transmitter. KRON-TV opposed the site. Still pending is an appeal by the Chronicle Publishing Co., owner of KRON-TV, in the U. S. district court of appeals asking that the court set aside the grant to KGO-TV to build on Mount Sutro.

Though awaiting the court's decision, KGO-TV nevertheless is readying final blueprints and details to begin construction of 981-foot tower that is to be erected on top of Mount Sutro later this year.
Who says you're too small for automated broadcasting?

Maybe you've said it yourself. But you might be wrong.

You see, some folks have a mistaken idea about automating a radio station. They think it means throwing a switch, locking the front door, and going home.

The real purpose of station automation is to help you attain greater operating efficiency and save money on operating costs.

Now, how much would you be willing to pay to attain both goals?

$65.00 a week?

Well, you might be interested to know that for the price of a few extra spots per week you can fully automate your station. It might be less. It might be more. It depends entirely on what you want to accomplish.

You may want to automate only certain segments of the day. Or an entire weekend. Or FM totally.

Whatever the goal, ATC has the answer. And that answer will relieve valuable, creative air personnel from purely mechanical control room operations and make them available for more productive pursuits. Better programs, better newscasts, sharper commercials, more sales.

You can buy ATC equipment outright. Or finance it. Or lease it.

So, maybe it's time to find out once and for all whether you're big enough for automation. We're willing to bet you are.
Tactics questioned in
III. Repairman Expose

Television as an industry suffered another black eye in Midwest newspaper headlines last week as the Illinois attorney general announced that a three-month probe of television repair practices disclosed 21 out of the 25 shops investigated in the state were cheating their customers. Identity of the shops was not disclosed.

Attorney General William G. Clark said his office planted perfectly good color and monochrome sets with the shops in the study. However, he explained, the sets were "marked" with specific bad tubes or parts for the probe.

Charges of up to nearly $30 were made for repairs and parts costing pennies in some cases, he said. In other situations the repairmen further tampered with the set so that additional repair work would be needed later, he alleged.

Frank L. Moch, director of the National Alliance of Television and Electronic Service Associations, said that his group has been working with the attorney general for a long time in an effort to put out of business known offenders who are a very small fraction of the majority. He felt, however, that Mr. Clark "stacked the deck" when he picked only those shops known to be bad from large files of complaints.

Mr. Moch said NATESA for 10 years has been trying to get repairman licensing legislation through the Illinois legislature. He said his group favors licensing even stronger than that now used in California.

Broadcasting, May 23, 1966
by 1970 volume could reach 850,000 units.

Not long after Telcan made its first splash there were reports that Fairchild Camera & Instrument Corp., Syosset, N. Y., was getting close to presentation of a consumer-priced video recorder, and in April 1964 it demonstrated a prototype $500 model with stationary head and 120 i.p.s. tape speed. Since then numerous reports that Fairchild was close to a licensing agreement with equipment makers proved premature.

Last week, however, Fairchild chairman John Carter, under questioning by a stockholder, said the company had brought its home video tape equipment to the color stage in cooperation with TV set manufacturers and still intends to license the design rather than produce the equipment itself. Bayard Hand, director of product and market planning for Fairchild, says the company hopes to demonstrate the color version in several months.

Fairchild thinking seems to match RCA's in respect to color. "With the whole industry riding the color TV boom, we think the only thing that will interest a domestic manufacturer is a color unit," says Mr. Hand. A marketable instrument for consumers will have to sell for under $1,000, probably closer to $500, he adds.

Plug For Black and White • Not all companies interested in the home recorders show the same color insistence. A spokesman for 3M, which recently introduced a $1,495 unit for the "training and educational" market and which is working on a consumer model, says a popularly priced ($500 or under) black and white recorder could be a hot item right now.

The Sony Corp. of Japan, which has a black-and-white video tape recorder currently selling in the U. S. for $995, has demonstrated a color model that it hopes to have available in this country next year.

Ampex has had an educational and industrial VTR (VR-6000) out since December with a price tag of $3,150, intends to hit the consumer market with a $1,095 unit next month in New York. An accompanying camera would cost $550.

Many observers of home taping developments feel that availability of a camera for home-made tapes is a must for mass appeal of the equipment, that the ability to tape programs off the air or rent tapes won't be enough. An Ampex official says success is certainly partially dependent on a camera.

Popularity Depends on Price • When will a home video tape recorder become a mass-market commodity and when, if ever, could it upset the equilibrium of the entertainment industry? Certainly not before it carries a price tag of $500 or less, according to most involved, and not even then, according to many.

One Wall Street analyst of the entertainment industry, questioned by Broadcasting, doubted a color unit priced at $500 could ever have a significant effect on national viewing habits.

Most seem to think the introduction of home tape recorders will come about in an evolutionary, not revolutionary way. What effect it may eventually have on the way the average televivewer will spend his entertainment time is open to question; few care to gamble a guess in the face of so many variables.

One theory is the home video tape recorder could have a more immediate effect on the advance of pay television than on conventional broadcasting. The same group with so-called discretionary income and time to devote to pay television might be diverted by the attraction of a miniature home TV studio allowing home-made video tapes and the rental of taped programing tailored to its tastes.

New RCA development for color-TV tubes

RCA announced last Friday (May 20) that for the first time optimum color reception will be achieved quickly through a new development in rectangular color-TV picture tubes.

The company has developed a temperature-compensated shadow-mask assembly that, it said, overcomes the problems of heat expansion during the period in which the picture tube is warming up.

Color tubes employing the new development will be marketed as RCA "Perma-Chrome" tubes and will be incorporated in all RCA 25-, 19- and 15-inch rectangular color tubes.

Andrew enlarges factory

Andrew Corp., Chicago, plans to almost double the size of its suburban Orland Park manufacturing plant this year to keep up with the demand for its antenna and coaxial cable products. The expansion will entail over $2 million and is the third enlargement of facilities there in the past decade. Andrew also has factories in California and Canada.

Technical topics . . .

Booth wants Entron system • Entron Inc., Silver Spring, Md., CATV equipment manufacturer and construction firm, announces a $250,000 contract to build a complete 65-mile CATV system in Summit township, Mich., for Michi-
gan Bell Telephone Co. Completion date is mid-August. Summit township encompasses a suburban area adjacent to Jackson, Mich. The franchise for Summit township is held by Booth Broadcasting Co. (group CATV owner).

Faster color • Spurred on mostly by the demand for more, better and faster color work, Pathe Laboratories Inc. is increasing the amount of negative and positive footage its Hollywood plant can process daily with installation of improved equipment. Advanced types of processing tanks and printers will handle the increased daily color and black-and-white footage coming in from stepped up television and feature production in the U. S. and overseas. With its new equipment, Pathe says it can process dailies and return them to location sites anywhere in the world accessible by air within 48 hours.

‘High-hat’ spotlight • Lighting Services Inc., New York, has available a new mounting system for incandescent accent lights that converts recessed “high-hat” fixtures into adjustable surface-mounted spotlights. Average price of units is $28.

Rohn expands • Rohn Manufacturing Co., Peoria, Ill., is adding two new buildings to its manufacturing complex. One building will house Rohn’s new angle tower manufacturing equipment, punch presses, and automatic saws, while the other expansion will be an extension to the galvanizing plant and the influx area.

Now on the market

Hancock Telecontrol Corp., Old Greenwich, Conn., has begun marketing a modified version of its $55,900 Unicon II automatic television program controller, first displayed at the National Association of Broadcasters convention in Chicago (BROADCASTING, April 11). The automatic Unicon controller is used in master-control-room operations, and is said to provide continuity for all programming steps and effects controlling up to 100 video sources.

Up is where the cost of everything has gone.

No, not everything.

Trend of retail prices, 1957-1959=100.

Not prescription drugs.
Prescription drug prices are down 9% from the 1957-1959 base period.

With many other prices climbing, the drug industry is proud it has been able to keep the prices of today's lifesaving drugs down.

The trend of prescription drug prices is definitely down. And they are down in the face of a continued rise in total medical costs.

The Council of Economic Advisers recognized this when they reported: "In the most recent 5 years, medical costs have risen less rapidly than in the 1950's. This has been due primarily to the fact that prices of prescription drugs have been declining."

The italics are ours.

The benefits are yours and everyone's.

If you would like more information—brief and to the point—write for a free copy of the latest issue of "Key Facts on the U.S. Prescription Drug Industry."

DEATHS

Gordon L. Barnhart, 37, sales manager of WHLO Akron, Ohio, died May 16 of apparent heart attack at his home.
The March 31 strike of railroad firemen to gain negotiations ended April 3, on the promising note that, as compulsory working conditions ended, collective bargaining would follow.

President Lyndon B. Johnson's published statement, appealing for an end to the walkout, said in part, "...Whatever issue or issues may be in dispute should be resolved under procedures of the Railway Labor Act. The procedures of this Act can and should operate promptly and effectively and will as soon as work is resumed."

At no time since the strike's end has railroad management shown any willingness to come to the bargaining table. Instead, there has been a stepped up program in federal court to obstruct and frustrate the Railway Labor Act procedures.

Despite the President's statement, railroad management arrogantly went to court to stop the National (Railway) Mediation Board from furthering the bargaining process. Any objective view of these tactics must pinpoint rail management's refusal to bargain as a basic reason for the recent strike.

President Johnson had the answer, when he said the Railway Labor Act procedures can, should and will operate promptly to resolve the issues.

In the national interest, isn't it time the railroads paid heed to the President? Isn't it time they got off the legal merry-go-round and got on with collective bargaining?
STATION AUTHORIZATIONS, APPLICATIONS

As compiled by Broadcasting, May 12 through May 18 and based on filings, authorizations and other FCC actions.

New TV stations

This is a news desk?

Yes, but this “editor’s” concern for the who, what, when, where and how is not to write a news story, but to make sure of delivery of a life-saving drug. The “editor” shown above is a security guard at Lederle Laboratories in Pearl River, New York. When the phone rings at two o’clock in the morning, he answers it. This time a hospital in Wyoming needs an emergency shipment of gas gangrene antitoxin, and there’s no other place to get it. Just as your deskman knows how to handle the news story, this “editor” is trained to respond to the most difficult situations.

Once the call is received, Lederle’s emergency product shipment procedure goes into effect. It requires close and fast cooperation among Lederle physicians and people responsible for plant security, packing, routing and shipping the goods. Soon the life-saving antitoxin is aboard a plane headed west.

Routine procedure? Seems like it, but, just as in meeting any deadline, it takes preparation and practice to make it so.

Hearing cases

INITIAL DECISION

Hearing examiner H. Gifford Iron issues initial decision on granting application of Tri-City Broadcasting Co. for new FM to operate on channel 21, 3 kw, in Eufaula, Okla. Action May 18.

FINAL ACTIONS

By memorandum opinion and order, commission denied petition by Cape Cod Broadcasting Corp. for reconsideration of March 10, 1811 action in denying its request for waiver of sec. 73.10 of unfair practices and regulations in unaccepted inapplicable fee on application for new daytime AM to operate on 1530 kC. 1 kw, in Hyannis, Mass. Action May 18.

Commission gives notice that March 25 initial decision which denied toward (1) granting applications of Jersey Cape Broadcasting Co. for new FM translator station on channel 9 in Wildwood, N. J. on 1250 kC, U. F. translator station on channel 2 in Wildwood, N. J. on 250 kw; conditions became effective May 18 pursuant to sec. 1176 of rules. Action May 17.

Commission gives notice that March 22 initial decision which denied toward (1) granting applications of Tri-State Television Translators Inc. for five new TV-B Station translators on channels 2, 4, 5, 8 and 12 to serve Columbia, Md. by re- broadcasting programs of WJAC-TV Johnstown, Pa., WMAL-TV Washington, WJAC-TV Pittsburgh, and WTTQ, both Washington, and (2) granting Tri-State Television Translators Inc. for five new TV-B Station translator applications for operation on channel 5 in West Virginia. Applications for reconsideration of the denials for failure to prosecute, became effective May 11 pursuant to sec. 1176 of rules. Action May 17.

In proceeding on order to Mission Cable System of Poway, Calif., to show cause why they should not be ordered to accept full system retransmission of CATV system in Poway, Calif., in violation of sec. 14.1017 of CATV rules, commission denied their request of May 9 action by review board denying their request of May 16 after reconsideration. Action May 13.

By decision, commission (1) revoked license of Edwin H. Estes for WPPA Pensacola, Fla. and (2) denied application of WMZO Inc. for renewal of WMPN Mobile, Ala. It provided, however, that if bonafide application is made within 90 days

BROADCASTING, May 23, 1966
for assignment of WPFFA's license to entity having no connection with Ext's entity and revocation will be stayed pending commission's decision. Action May 12.

HEALTH CENTER GOING UP... IF YOU HELP

Mental health centers are needed to fight mental illness. They are needed to prevent the tragic suffering of men, women and children who need care now... before it is too late. One person in every 10 in need of psychiatric help is a school age child. These children have emotional problems requiring treatment. ½ million children are seriously mentally ill. Help build mental health centers to provide treatment to all in need of it.

Support Your Local Chapter of the National Association for Mental Health

**Help Wanted—Production Programming & Others**

**Exciting opportunity with a view!**

**KFOG**, San Francisco’s top rated FM stereo station and part of Kaiser Broadcasting, is looking for a special kind of man. We need a Production Manager versatile enough to handle almost any job at the station, and he must be a career radioman to boot. As such, he should be a college graduate with a solid radio background. That means excellence references, a third class FCC ticket, familiarity with an FM stereo operation, and an understanding of what “good music” means to the mature and educated listener. Our man will have a good radio voice. So be sure to accompany your application with a voice tape. Now, if you’ve survived our requirements this far, and if you can add to the list a sense of humor, more than a dash of creativity, along with no aversion to an honest day’s work, you might be our “special kind of man.”

In that case, here’s what’s in it for you (besides the San Francisco view).

You will have landed a professionally rewarding and possible position within the nationwide family that’s number one in the growth media today...Kaiser Broadcasting. And at that point, your opportunities will be bounded only by your ambition.

Address your applications to:
Robert Somerville
KFOG
900 North Point
San Francisco

Aside from the required voice tape, your résumé should consist of whatever you believe outlines your singular qualifications best.

**Kaiser Broadcasting**
An equal opportunity employer.
OPERATIONS MANAGER

PACIFIC NORTHWEST REGIONAL
Single market (City) fulltime facility
located in a lovely community of nearly
10,000, ideal suburban living within easy
commuting distance of major city. Located
on five acres of valuable land, the
combination studios, offices and transmitter building is a showcase
of 2,500 square feet. All new equipment
within last two years. Grossing $80,000
and needs sales oriented owner-manag-
er to develop full potential. Priced at
$150,000 with $75,000 down required.
Balance over six years.
Box E-325, Broadcasting.

FOR SALE—Stations

SOUTHWEST $76,000 FP
Profitable AM $40,000 down $500
per month on balance - No interest.
SO. CALIF. FM $150,000 terms, No.
CALIF. FM $75,000 terms.
Principals only.

PETITIONS FOR RULEMAKING FILED
American Broadcasting Companies, sta-
tions in New York, Pittsburgh, Chicago,
Los Angeles and San Francisco—Re-
quests commission to institute rulemak-
looking toward amendment of its AM, FM
and TV rules relating to indicating instru-
ments so as to permit use of digital meters,
printers, or other numerical readout devices
in metering of broadcast transmitters.
Received April 27.
JEL Co Radio Inc., M. Carmel, Ill.—Re-
quests that table of FM assignments in sec.
73.202 of commission's rules be amended
to include classes of AM, FM and TV chan-
els in M. Carmel, Ill. as follows: present channel 355; prop-
osed channel 357, 272A. Received April
Clifford L. Hedberg, Morris. Minn.—Re-
quests institute of rulemaking proceed-
ings to allocate two more to Morris, Minn.
channel 294 or 298 instead of channel 232A.
Received May 3.
George Nims Raybin, Bronx, N. Y.—Re-
quests that sec. 85.41(d) (1) be amended
as follows, by adding italicized words: "(1) The
following frequencies, commonly known as
channels 1 through 53, may be used for
communications between units of the same
station, or units for different stations
for the sole purpose of speeding such units
to change to a frequency listed in sub-
section (2)." Received April 27.
Rough River Broadcasting Co., Leitchfield,
Ky.—Requests institute of rule making
proceedings toward allocation of

COMPUTER ANTENNA ACTIVITIES

The following are activities in community antenna television reported to Broadcasting through May 15. Reports include applications for permission to install and operate CATV's, grants of CATV franchises and sales of existing installations.

*Indicates franchise has been granted.

Conway, Ark. — Total Communication Transmitters Inc. has canceled its franchise. The firm told the city council: "In view of the uncertain status of CATV pending congressional hearings" it believed that the franchise previously granted by the council should be voided.

West Memphis, Ark. — Ark-Cable Inc. has been granted a franchise. The firm will have a ten year contract with payments to the city of 9% of gross revenue for the first five years and 7½% the next five. A $10 installation fee and a $5 monthly fee will be charged.

If you ever climbed a pole you'd know!

But we'll tell you anyhow, if you write, wire or phone collect for more details.

Kaiser-Cox CORPORATION
P. O. Box 9788, Phoenix, Ariz. 85020
Phone (602) 944-4411

When you install Kaiser-Cox equipment, you never wonder what's new in CATV — you know!

Fortuna, Calif.—Dale A. Owens, Requests KFTY Channel 32, Fortuna.

Rochelle, Ill.—Tilton Publications Inc. Requests WBOC Channel 12, Rochelle.

Jacksonville, Fla.—B.P.J. Timm, Requests WBOC Channel 12, Jacksonville.

Middlebury, Vt.—Voice of Middlebury. Requests WVMX.

WIKI Chatham, Va.—WIKI Radio Inc. Requests WKEK.

Springfield, Mass.—WCRB Inc. Requests WCRX (FM).

FORCING ORDERS

After considering responses to notices of apparent liability, the Commission, by memorandum opinion and orders, ordered following broadcast licensees to forfeit amounts specified in notices of apparent liability as noted:

Executive Broadcasting Corp. $1,000, for operator, maintenance log and technical inspections by WTVN-TV, Columbus, Ohio. Motion May 2.

WJRT Radio $650, for broadcasting lottery information over KTOK Oklahoma City. Motion May 2.

FORFEITURE NOTICES

Commission notified following broadcast stations that they have incurred apparent forfeiture liabilities as noted:

WBOM—A franchise for 11 violations by KCMK (FM) Kansas City, Mo., involving operator, remote control, maintaining the required antenna, and other violations. Licensees have 30 days to contest or pay forfeiture. Ann. May 2.
When you sail new waters, as every mariner knows, the biggest surprises may be just below the surface. So it often is with people.

Consider Hill Blackett Jr., board chairman of Clinton E. Frank Inc., Chicago. His unassuming demeanor belies a diversity of talents and experience both in broadcast advertising and out of it. And his frankness when the occasion demands has sometimes startled a client or visitor but usually won their respect, his associates attest.

When you enter Mr. Blackett's modest yet adequate office in Chicago's Merchandise Mart, you will at once spot the wall of sailing photographs, obviously, the dead giveaway of a weekend sailor.

The lifesize bust of a small child nearer the doorway, however, looks very much like some fine art reproduction you might pick up at a reasonable price off the shelf at Kroch's & Bren-tano's. But look again.

On closer inspection you learn it is an original sculpture by Mr. Blackett of his daughter at an early age. Its classical detail again is quite different from the many impressionistic works in metal he has done, including a powerful larger-than-life piece he created that depicts Abraham offering up Isaac in the Biblical test of the prophet's faith. It stands on the lawn of the Blackett home in suburban Winnetka.

But these reflect only one phase of the creative capacity of Mr. Blackett. For a dozen years now he has been responsible for the Toni Co. account at the Frank agency and during this time he often has been the principal writer of some of Toni's most successful television commercials. Toni consistently puts most of its $10 million in television.

Other Clients • Since becoming board chairman, Mr. Blackett also has assumed top responsibility for three other accounts there, Curtiss Candy Division of Standard Brands, Formica Division of American Cyanamid and Northern Trust Bank. His portfolio of duties includes general finance and administration too, as well as the supervision of the agency's creative departments.

Since its inception in 1954 the Frank agency has grown from virtually no billings to some $30 million today. They come from a full spectrum of consumer, industrial and service accounts and one dollar out of every two is made to work as effectively as possible in the broadcast media. Mr. Blackett notes that since most sponsors can't afford quantity in TV today, the commercial's "quality of impact" becomes a prime consideration.

Other Frank accounts that are active in radio and/or television advertising include Continental Oil Co., Dean Foods, Elanco Products, Hamilton

A skipper who values esprit de corps

Beach, Kemper Insurance, Kohler Co., Kraft Foods, O'Brien Paints and Reynolds Metals. The new United Airlines freight account may soon experiment in broadcast, Mr. Blackett says, marking a departure for what usually is a print-oriented account.

Mr. Blackett likes to point out how an agency's creative capacity can be put to work in the buying of media as well as in the creation of the advertising message itself. "Take Elanco, the agricultural products division of Eli Lilly & Co.," he explains, "for which we buy television to sell certain chemical products for particular crops. We buy the television on the basis of the acreage coverage rather than people coverage."

A Well-Known Name = Yes, Mr. Blackett is the son of the man who made radio advertising history in Chicago in the rough-and-tumble competition of the pre-war depression years, Hill Blackett Sr. But it is both his blessing and cross for he strives to be measured by his own accomplishments. His dad was perhaps best known for the radio successes of Ovaltine, Oxydol, Wheaties and similar well-known products.

"Hill Jr. has the drive of his father and the gentleness of his mother," is the way close friends describe him. "A perfectionist," another cites, "one of those creative birds who insist on keeping things buttoned up. His air of quiet competence is unusual, in contrast with the frantic activity generally associated with advertising writers."

Last year Mr. Blackett acted to try and button up one of the weak lines too often found in the creative process in the making of broadcast commercials, the separation of the creators from the finished product. Instead he sought to have all contributors involved with the commercial all throughout the process.

This was achieved by taking the radio-TV production section out of the broadcast department and putting it into the creative department. In some cases artists and writers have been able to develop into producers as well.

"You can attract and hold better people" if they can get more personal recognition and a chance to grow, Mr. Blackett believes, pointing to this as a strength of a smaller-size agency. "It results in a better end-product too," he feels. "We back them up with highly technical people as part of our staff," he points out, "such as editors, producers, music arrangers and composers."

Mr. Blackett very early in his career was well versed in television and radio. For a few months after college in 1949 he worked for his father's firm and then he joined Grant Advertising. In making many TV buys there he quickly learned of TV's ability to demonstrate product benefits and score with its selling impact before the viewer has a chance to "turn the page" to another channel even if so inclined.

Tenacity Pays Off = He joined Frank in 1954 and became account executive on Toni, subsequently writing commercials for White Rain, Tame and other products. He particularly praises Toni for sticking with a good copy theme long enough to get the best use from it and for the way the company includes the agency in product development.

Mr. Blackett sees bright futures for both AM and FM radio, especially in the development of specialized audiences, and Frank uses both aural media. He presently sees too much imitation in radio and wishes stations would develop greater differentiation in programs.

When Mr. Blackett finds something he likes he digs in with determination. Like sailing. In just a few short years he has moved up from a Sailerfish to an Alberg 35, the Tahara, which he races on Lake Michigan. "The name is Tahitian for 'gentle wind' but that's all there is of it on that lake," he says.

WEEK'S PROFILE

EDITORIALS

Upbeat

Radio got a coast-to-coast shot in the arm a few days ago—a series of booster shots, to be exact.

In New York, the people behind some of the selligest commercials in recent radio history told the International Radio and Television Society's annual radio commercials workshop how the messages were developed and what they accomplished.

In Portland, Ore., and later in Houston, the first two of this year's National Association of Broadcasters radio program clinics found station executives turning a critical spotlight on themselves, their weaknesses and their strengths, in an effort to improve the programming that makes radio advertising a bargain in the first place.

It is unfortunate that all the advertisers and agencies that aren't using radio, or are using it only dabblingly, could not sit in on these meetings. By all accounts, the enthusiasm among the creators of commercials and the lively candor with which the station men tackled the problems of program improvement would have converted skeptics into believers—and users.

There is evidence, meanwhile, that converts are being won in the market place, which after all is where the most effective missionary work can be done. The Radio Advertising Bureau's compilation of spot radio's top 100 advertisers of 1965, reported elsewhere in this issue, shows they substantially outspent 1964's top 100, and for spot radio as a whole RAB places the year's gain at 5%.

Five percent is nowhere near as big as it ought to be, of course, but it maintains the pace that has been par for the past several years, and over several years it all begins to add up. Moreover, there are indications that the gains are continuing in 1966.

Advertisers who use radio wisely find that it pays, and they use more. Then their competitors try it, and if they use it wisely, they too use more. Radio thus grows on what amounts to word-of-mouth testimonials.

Word-of-mouth won't move radio as fast as radio can move anybody else's goods and services, of course. But it does represent a solid base of satisfied customers. And its influence can be speeded and expanded if the forces behind both of radio's prime functions, programing and advertising, will approach their jobs as enthusiastically as those did, for example, a few days ago in New York, Portland and Houston.

Now is the time

Some members of Congress finally have come to realize that the three-year broadcast license and all that it entails at renewal is archaic, inequitable, unjust and wasteful. Thus, for the first time in a decade there is a real opportunity to amend the law to extend the tenure—possibly even to get a perpetual license subject to revocation for cause.

Legislation now in the draft stage would double the license period to six years. The National Association of Broadcasters endorses a seven-year term (perhaps because FCC members are appointed for seven-year tenures). And, as far as we are aware, all incumbent commissioners except Lonesome Kenneth Cox, a one-man holdout, are for longer license periods.

The timing is right. The Johnson administration espouses economy in government and reduction of paper work. The longer license tenure would sharply curtail the FCC's biggest made-work load. It would be manna to harried smaller stations which can't afford the preparation of endless forms for license renewal.

Under the indefensible three-year rule, broadcasters who have invested hundreds of thousands, even millions, must go to the FCC, hat in hand, for renewals. The burden of proof is on them, permitting the FCC to exercise indirect censorship—but censorship nonetheless—of programing, since the FCC demands a showing of program categories, extent of commercialization and proof of performance versus their promises.

The burden of proof should be where Congress intended it to be—on the FCC, not the station. Under existing law the commission can call in a licensee for revocation whenever it finds that the station isn't serving the public interest. Moreover, anyone can appy for any existing facility if he feels he can make a better showing for it "in the public interest."

Nearly 10 years ago Senator John O. Pastore (D-R.I.), now chairman of the Subcommittee on Communications, proposed five-year licenses and suggested that network affiliation contracts now limited to two years, should run concurrently with the license tenure. (The senator's suggestion expired for want of station support.)

While there is the momentum, broadcasters should join the FCC majority in pressing for license extensions. The strongest possible case should be for perpetual licenses even if the compromise, as a first step, must be that seven-year tenure the NAB espouses.

Copyright mousetrap

From the television broadcasters' point of view, about the worst piece of CATV legislation that the Congress could pass is the copyright measure proposed by Representative Robert W. Kastenmeier (D-Wis.), chairman of a House subcommittee that has been working on general revisions of the copyright law.

Mr. Kastenmeier's draft is so confusingly written that some of the best lawyers in Washington admit they do not fully understand its implications. But one thing about it does seem to be clear: The measure would for all practical purposes eliminate the broadcaster as a party to negotiations between CATV systems and their program sources. It would legalize CATV pickups of all local broadcasts at no cost whatever to the cable systems and would establish the machinery for direct dealings between CATV's and the holders of copyrights on programs imported from distant points. No wonder the National Community Television Association thinks Mr. Kastenmeier is on the right track.

Sportsman—Texas style

This husky fellow wraps up the sports world tonight. He likes football, baseball, basketball, karate, drag racing, archery, golf or you-name-it. In the ikonogenic tradition he looks the part. His name is Pete Talmadge.
Maintenance for Collins FM transmitters

Collins' performance record of less down time than any other make of transmitter is a fact we can demonstrate. So, what maintenance amounts to is mostly regular dusting... with a good dust cloth. Keeps your Collins FM transmitter clean. And gleaming, as befits modern station decor. Of course, you don't have to dust (although we recommend it). In which case, your Collins FM transmitter will just stand there, dustily transmitting a clean, strong signal. Makes for great reception... happy listeners. And you know what that means to advertisers! Get complete information on Collins' complete line of FM transmitters. They're available in models from 250 to 20,000 watts (5 kw shown above). Call your Collins Broadcast Sales Engineer today.
