COMMUNITY INVOLVEMENT
"OUR MEN IN VIETNAM"

Community involvement frequently means going out of the community. For this reason WCCO Television has sent the 1966 RTNDA Award-winning news team (Phil Jones and Les Solin) back to Vietnam to report on the boys from home.

This far-reaching Community Involvement is the Difference Between Good and Great in Twin City television.
YOUR FIRST STEP
into the profitable world of CATV

This fact-filled document tells you what CATV is all about, how it works, and why we can help you. Send for "The Jerrold CATV Story". There's no obligation of any kind.

Start on the profitable road by learning the ABC's of CATV with the facts straight from the leader—Jerrold. Join the ranks of prudent businessmen who utilize our know-how to build and operate more CATV systems than any other group in the industry.

When you're ready, we'll be pleased to show you where CATV is headed—and help you get there. Jerrold offers market selection studies, engineering advice, management guidance, system construction, financing and merchandising. Let Jerrold, the industry's most complete source, serve you with the facts, today. Send for "The Jerrold CATV Story". Phone 215-925-9870, or mail coupon.

Jerrold
The nation's largest, most experienced manufacturer/supplier of CATV equipment and services.
Only a short time ago, Dennis achieved his fabulous success on the CBS TV network. Well he’s back again scoring an even greater success in local markets throughout the country. Here’s the performance record for each of the six markets where Dennis was rated in the September, 1966, ARB reports.

1. In New York, Dennis reached 60% more homes, and 24% more young women 18-34 than his closest network rival, topping his time period competition in this 6 station market with a 38% share of homes and a 31% share of 18-34 year old women. WCBS-TV (N) Monday-Friday, 9:00-9:30 am.

2. In Philadelphia, Dennis reached 60% more homes. and 24% more young women 18-34 than his closest network rival, beating such formidable daytime network comedy series as Andy of Mayberry, McCoys and Dick Van Dyke, delivering more 18-34 year-old women than any program in his time period. WCAU-TV (N) Monday-Friday, 9:30-10:00 am.

3. In Los Angeles, Dennis is KTTV’s highest rated weekday show (9:00 am-7:00 pm), reaching more homes than such successful daytime programs as Andy of Mayberry, Beverly Hillbillies, Mike Douglas, Dick Van Dyke, and more. KTTV-TV (N*) Monday-Friday, 6:30-7:00 pm.

4. Dennis completed dominated his competition reaching 41% more homes than his closest time period competitor, more women than the competition and more young adult female viewers than both competitive programs combined. KMOX-TV (N) Monday-Friday, 12:00-12:30 pm.

5. In St. Louis, Dennis completely dominated his competition reaching 41% more homes than his closest time period competitor, more women than the competition and more young adult female viewers than both competitive programs combined. WTTG-TV (N) Monday-Friday, 6:30-7:00 pm.

6. In Boston, Mon-Fri., sign-on to 5:30 pm, Dennis delivered more homes than any other program from Monday-Friday, sign-on to 5:30 pm—delivering a modest 48% of homes in his time period. WNAC-TV (N) Monday-Friday, 5:00-5:30 pm.

Note: Dennis can claim leadership in only six of the markets in which he is currently appearing because these are the only six that were covered in the September, 1966, ARB survey. Join these stations with 146 half-hours available from Screen Gems.

The data used herein are estimates from the September 1966 and October 1965 ARB reports for New York, St. Louis, Philadelphia, Los Angeles, Washington, D.C. and Boston. All data cited are estimates or are based on estimates subject to qualifications published by the rating services.
For the
NIGHT PEOPLE

IT'S KRLD-TV

Again this fall KRLD-TV is the first choice among the prime time viewers in the nation's 12th ranked television market. In the 6:30 p.m. to 10:00 p.m. Sunday thru Saturday segment, Channel 4 has 8 of the top 10 programs, wins 34 out of 49 half hours, and delivers 27.2% more homes per average quarter-hour than the second station.*

Convinced? Then contact your ATS representative for choice prime time availabilities to reach the night people in the Dallas-Fort Worth market.

BROADCASTING, DECEMBER 5, 1966
30-second stir

New battle threatens over spot-TV pricing of piggybacks. Agency pressure is increasing against Blair Television's new pricing formula, currently being tested on group of stations (Broadcasting, Nov. 28). Under Blair's plan, advertisers buying 60-second spot will pay 30-second rate plus 40%, while advertiser purchasing 60-second piggyback (two 30's) will pay 30-second rate plus 60%. Agencies say plan thus places 13%-15% premium on piggybacks.

Some spot TV specialists already were predicting that in both network and spot 30-second announcement might replace one-minute commercial as advertisers' major vehicle in three to four years. Under Blair plan, which installs 30-second rate as base for pricing other spot lengths, they think 30's might become even more dominant but more expensive. They also feel that 20-second spot commercials, already in little demand, may become virtually extinct as piggybacks proliferate.

Deal cooking

Sale of ch. 8 WQAD-TV Moline, Ill., to ownership of WWJ-AM-FM-TV Detroit for $6.5 million reportedly was in negotiation last week. Transaction is with 23 stockholders of Moline TV Corp. Base price is $5.5 million with $1 million as covenant by present stockholders not to compete in area. Among WQAD owners are Francis J. Coyle, Frank P. Schreiber, former manager of WEN Inc., Chicago, David O. Parsons, attorney, and Arthur M. Swift, executive vice president-general manager of station. WQAD-TV began operation in 1963, is affiliated with ABC-TV and represented by Katz. It has $900 base hourly rate.

Money problems

FCC has run into White House-originated economy wave. It's understood that FCC's request for $23,143,711 for fiscal 1968, up from $17,338,000 in current fiscal year, met cold reception at Budget Bureau. Commission still hopes to sell bureau on need for more money to carry on its expanding activities, especially in CATV and spectrum management. There's talk of asking for $500,000 supplemental appropriation for current year, though some FCC staffers think there's little chance of getting that through Budget Bureau.

Second thoughts

Issuance of report by Carnegie Commission on Educational Television may be delayed by revisions ordered at meeting last week in Dedham, Mass. Commission reportedly decided to tone down criticism of commercial broadcasting contained in draft that was considered last week (Closed Circuit, Nov. 28). Before meeting there had been indications that commission hoped to complete report before end of this month.

Better ratings

Movement is afoot to set up full-time office of research to concentrate on improving broadcast measurement techniques, and it's due to face its first test this week. Subcommittee of National Association of Broadcasters' Research Committee meets Tuesday (Dec. 6) to consider (1) whether such office should be created and, if so (2) whether it should be done by NAB. Prime mover in project, Television Bureau of Advertising, hopes answer will be "yes" to first question, "no" to second.

Movement actually originated from two different sources. Group of reps and broadcasters petitioned both NAB and TVB some time ago in behalf of office of TV research. But TVB had maintained since before Broadcast Rating Council was created that this should be major undertaking under auspices of agencies and advertisers as well as broadcasters and, that, accordingly, it should be set up as division of BRC, whose primary function now is auditing rating services. Rating council is supported by American Association of Advertising Agencies as well as NAB, TVB and other TV-radio industry groups, and Association of National Advertisers participates as observer. Chairman is Donald H. McGannon of Westinghouse, who also heads NAB Research Committee.

Big kitty

Ford Foundation is said to be considering one of biggest grants ever made to noncommercial television—entirely apart from its spectacular satellite plan for national system of noncommercial TV. Purpose of windfall now under study is being kept under wraps, though presumably Fred Friendly, former president of CBS News and now consultant to Ford Foundation, has had hand in planning.

Call for help

Top officials of National Association of Educational Broadcasters have been quietly soliciting commercial broadcasters and TV equipment manufacturers for money to beef up NAEB staff. They've asked at least two networks to put up $25,000 each and have said they're after total of $100,000. With big-picture ETV proposals already in from Ford Foundation and due from Carnegie Commission on Educational Television (see above), NAEB staff wants to be ready to enter discussions with long-range plans of its own. Trouble is, it lacks manpower to do planning.

Next week NAEB officials will meet with representatives of National Association of Broadcasters in effort to find common interests between associations representing noncommercial and commercial broadcasting. Tone of meeting may determine whether NAEB will ask NAB for financial support.

FCC's giant-killer

Nicholas Johnson, FCC's neophyte member who navigated in hot water during his two-year stewardship as Federal maritime administrator, again is encountering rough seas. After five months at FCC, at least four of his six colleagues reportedly have just about convinced themselves that if 32-year-old Iowa Democrat should by some quirk become FCC chairman, they would resign.

When Rosel H. Hyde last June was named chairman by President Johnson for three-year rather than usual seven-year term, Nick Johnson simultaneously was appointed for Mr. Hyde's seven-year term. Inference was that if young Johnson kept on even keel, he would become chairman when Mr. Hyde's term expires in 1969.

Inflation note

News may become more expensive. Associated Press is reported to be considering average 9-9% boost in wire-service rates for all of its members, including stations. It's said board of directors has matter under advisement, wants to reach decision by Jan. 1.
Practically everybody calls us by our first name—WIBBAGE

Philadelphia’s top music men know their business. They’re in tune with contemporary taste... commercial from the word go-go. Daily or weekly, you reach more homes on WIBG than on any other Philadelphia radio station. Put your sales message in the wonderful world of Wibbage and be backed by promotion that’s legend in Philadelphia.

what is an influencible?

One of the lively ones. Intense, interested, keenly attuned. This vital market of young adults has tremendous buying power, and Storz radio reaches them. The influencibles are mostly Young Marrieds with children, so chances are they’re in the market for your product or service. Concentrate on this lively, responsible audience and get sales action fast. Influence the influencibles.©
CATV probe in N.Y. touches broadcasters

Community antenna television controversy in New York may explode into broadscale review of city's franchising power. Franchise bureau, investigating what it claims is unauthorized CATV operation in Manhattan, has raised question of whether any user of phone company lines for transmission, other than telephone, is subject to city authorization and possible franchise tax.

Such users, according to franchise director Morris Tarshis, would include television and radio stations, which make use of phone company circuits to get signals from studios to transmitters; computer service bureaus, telephoto services, Muzak and others.

City's Board of Estimate has already ordered corporation counsel to take action against Comtel, master antenna company whose subsidiary Bell Television (no corporate relation to phone company), is leasing phone company lines to carry TV signals across city streets to subscribers to CATV service (Broadcasting, Nov. 21).

General counsel of one of television networks said city is on shaky legal ground in claiming right to control and tax CATV company that would lease lines from phone company.

New York Telephone Co. spokesman said position taken by Mr. Tarshis was "wrong," that phone company's tariffs, on file with state Public Service Commission, cover this usage and others and that city's authority does not extend to regulation of these services.

CATV franchises in New York were awarded last year to Teleprompter Corp., Sterling Information Services and CATV Enterprises.

Drive for all-channel
MATV's is due from JFD

Campaign to force thousands of master antenna television systems feeding apartment houses and hotels to expand capacity so they can pick up UHF stations as well as VHF is expected to get underway this week.

JFD Electronics Inc., Brooklyn, N. Y., TV receiving antenna manufacturer, is planning to lead attack with development of all-channel MATV (master antenna TV) installation capable of carrying both V and U stations. It also is expected to ask FCC to assert jurisdiction over MATV's, forcing them to carry all TV signals, not just V's. FCC rules on CATV exempt apartment house antennas.

Many MATV systems were installed before recent UHF resurgence and thus have too few channels to accommodate big-city V's and U's. In New York, it's estimated that about 750,000 dwelling units receive TV from master antennas of which few carry UHF stations.

Drops 'Carson' segment

NBC-TV is dropping 11:15-11:30 p.m. EST feed of Johnny Carson Show effective Jan. 2. That segment is currently carried by 15 stations and features Ed McMahon and Milton Delugg. Star Carson appears on show starting at 11:30 p.m. and continuing to 1 a.m.

That feed to average 187-station lineup continues unaffected. NBC affiliates were notified of discontinuance last Friday (Dec. 2). NBC noted that clearance has dropped off over years for that particular 15 minutes because of increased number of stations using news in that hour.

WVUE(TV) not signed

Douglas J. Elleson, vice president and general manager, WVUE(TV) New Orleans, said Friday (Dec. 2) that station had not contracted with Overmyer Network for two-hour Las Vegas show that ON will begin programing April 3. ON earlier had listed WVUE, an ABC affiliate, as one of more than 120 stations committed to carry show (see page 42). Oliver Treyz, president of ON, reached in Miami, confirmed that WVUE had not contracted for Las Vegas variety show but indicated ON officials thought agreement had been reached when list was prepared.

United is first sponsor for 'Hawaii Calls' show

"Have sponsor plus good color program, let's negotiate" was word Friday (Dec. 2) from Field Communications Corp. in announcing United Air Lines will buy minute spot for 13 weeks in top 50 markets taking Field Communications syndicated Hawaii Calls show.

If United likes initial run it may renew, according to Field Communications president Sterling C. (Red) Quinlan who also explained deal is being placed direct, apart from and beyond hefty TV business United regularly is buying via Leo Burnett Co., Chicago.

Stations in 21 markets already have signed for series of 26 programs, Mr. Quinlan said, and United tie-in is only start of similar packages Field Communications soon will offer involving other shows and sponsors. Spot payment to stations is negotiated along with price of show itself, he explained, but in some cases it might even be above card rates and if prime availability merits it. Sales are being handled by syndication manager Edward Simmel, Los Angeles.

Watts to take command of RCA broadcast gear

Realignment in management organization of RCA is being announced today (Dec. 5) by Robert W. Sarnoff, president, who said changes reflect major growth in company's business. Changes take effect Jan. 1, 1967.

In operating area, W. Walter Watts, group executive vice president, assumes responsibility for broadcast and communications products, graphics systems divisions and defense electronics;
WEEK’S HEADLINERS

Eugene H. Kummel, senior VP of Interpub-lic Group of Co.’s, elected president of McCann-Erickson International. He succeeds Daniel Kinley, who was elected to Interpub presidency week earlier. Mr. Kummel, with Interpublic for past two years, was previously partner in Norman, Craig & Kummel. Thomas P. Lossee, senior VP of M-E International, elected executive VP.

James M. Seward, executive VP, CBS Radio division, retired Nov. 30 after almost 34 years with CBS, and George J. Arkedis, VP in charge of CBS Radio network sales and affiliate relations, was named to take over his network responsibilities under new title of VP and general manager, network. Under new alignment, heads of CBS Radio division’s two major operating units, Fred Ruegg as VP for station administration and Mr. Arkedis for network, report directly to Arthur Hull Hayes, president. Mr. Seward, who reached retirement age of 65 last month, had served CBS in number of key posts since 1933. He also was associated with late Edward R. Morrow for many years and is co-executor of his estate, and also has represented CBS in administration of Arthur Godfrey’s programs. Mr. Arkedis, with CBS 20 years, became VP for radio network sales in 1959 and added responsibility for affiliate relations last July.

Philip G. Lasky, West Coast VP for Westinghouse Broadcasting Co., named to newly created post of corporate VP on West Coast as part of promotions and reassignments at company-owned stations. Louis S. Simon, general manager, KPIX-TV San Francisco, succeeds Mr. Lasky as West Coast VP. In turn, Fred E. Walker, general manager of KYW-TV Philadelphia is promoted to Mr. Simon’s post at KPIX; Kenneth MacDonald, general manager of WJZ-TV Baltimore, advances to Mr. Walker’s position at KYW-TV and Dave Henderson, general sales manager of KYW-TV, becomes general manager of WJZ-TV. Mr. Lasky’s broadcasting career dates back to 1922 and he has held top posts at stations in Denver, Oakland, Calif., Salt Lake City and San Francisco. He was one co-founder of KPIX and one of its owners before station was sold to Westinghouse.

Martin S. Fliesler, director of special projects for RKO General Broadcasting, named VP and assistant to president of RKO Pictures Co., new entertainment division of RKO General Inc. He has served company in various executive capacities, including VP and general manager, KJJJ Los Angeles and as VP and director of advertising for company’s WOR New York.

Lin acquires WBBF; KULA sold to Slater

FCC approval of $2 million sale of Rochester, N. Y., radio stations to new owners and report of sale of Honolulu station for $300,000 were announced Friday (Dec. 2).

Lin Broadcasting is group owner which owns WAND-TV Decatur, Ill.; KAAY Little Rock, Ark., KEEL Shreveport, La.; WAKY Louisville, Ky., and WMAK Nashville.

WBBF, founded in 1947, operates fulltime on 950 kc with 1 kw. WABF-FM, which is five years old, is on 92.5 mc with 37 kw.

Sale of KULA Honolulu by A. J. Krisik and associates to Manning Slater and others for $300,000 was also announced today. Sale is subject to FCC approval. Mr. Slater and his associates own KRAK Sacramento, Calif. Sellers also own KEMS Sacramento, KAGO Klamath Falls, Ore., and control KFAX San Francisco.

KULA is fulltime on 690 kc with 10 kw. Broker: Twining & Co.

Among other FCC approvals, reported Friday: sale of WAUG-AM-FM Augusta, Ga., by Chester H. Jones and associates to Robert W. Hunter Jr. and family for $200,000 plus agreement not to compete. Mr. Hunter is in outdoor advertising business.

WAUG is 5 kw daytimer on 1050 kc. WAUG-FM is on 105.7 mc with 9 kw.

Meanwhile, citizen’s task force in Jacksonville, Fla., has recommended that city dispose of its owned radio station. WJAX was established by city in 1925 and operates fulltime on 930 kc with 5 kw. WJAX-FM, begun in 1949, is on 95.1 mc with 7.7 kw.

Barrere stricken

Claude Barrere, executive director of International Radio and Television Society, died suddenly Friday (Dec. 2) in his office in New York, apparently of heart attack. Mr. Barrere had been operating head of IRTS and its predecessor organizations since November 1956. Before that he had been with Broadcast Music Inc. and RCA Thesaurus Transcription Service. Survivors include his wife, Ruth.

Peaks in November

Jerrold Corp., Philadelphia, has reported record sales of $5 million for month of November. Figure of $5 million compares to sales of $4.6 million in October and to $3 million recorded in November 1965.
HEY, WHO PUT THIS UP?

WOW-TV, OMAHA!

WOW-TV, CBS Television for Eastern Nebraska and Western Iowa, is now televising from its new tall tower (over 1/4-mile high) and transmitter. WOW-TV's coverage is extended by nearly 20 miles to include an estimated 25 per cent more households and 25 per cent more viewers.

Being the most **colorful** station in Tulsa is important, but it's *not* everything.

That's why we pay such close attention to our programming. That's why we've invested in the finest movie packages available. And, that's why we strive so hard to keep our viewers happy (triple spotting is taboo). The fact that we're Tulsa's most colorful station is just a big *PLUS* for our buyers!
How your heart can be in expert hands
a thousand miles away—in seconds.

Your doctor suspects heart trouble—but perhaps he's not a cardiologist. He can take an electrocardiogram—but not interpret it. For that he needs an expert. But what if the nearest expert is hundreds of miles away—and a few hours could mean the difference between life and death?

Today there's an answer. A special Bell System Data-Phone® data set, made by Western Electric, enables a doctor to transmit an electrocardiogram over conventional telephone lines. Some of the Bell telephone companies, particularly those in the West where distances are vast, are already offering this service.

It is always pleasing to note how frequently the equipment we make for the Bell System contributes to the health and well-being of Bell telephone users. Western Electric is therefore particularly happy to be manufacturing something that contributes so directly to saving lives.

*Trademark and Service Mark of A.T.&T. Co.*
In his office in Iowa, Dr. Martin Deakins need only place his telephone handset in the special Data-Phone medical set. It, in turn, is attached to his own electrocardiograph. The data set translates the electric impulses produced by the human heart into a form that can travel over telephone lines. The medical set is only one of many data sets manufactured by Western Electric for the Bell System.

In his home in Omaha, Nebraska, Dr. Richard Booth receives an exact duplicate of Dr. Deakins’ electrocardiogram. He can give Dr. Deakins his expert diagnosis on the spot. Dr. Booth, director of the Creighton University Cardiac Laboratory, was of great help in developing this service.

JANUARY

Jan. 10 — Closing date for 1966 entries for George Foster Peabody Radio and Television Awards. National Committee will be considered in the following categories: news; entertainment; education; youth or children’s programs; promotion of international understanding; and public service. Entries should be sent to Dean John E. Drewry, Henry W. Grady School of Journalism, University of Georgia, Athens, Ga.

Jan. 14 — New deadline for comments on proposed FCC rulemaking to amend part 73 of the commission rules to specify, in lieu of the existing MEOV concept for AM stations, a standard method for calculating radiation for use in evaluating interference coverage and overlap of mutually prohibited contours. The MEOV method is used to measure radiation from directional antennas.

Jan. 15-17 — Annual winter meeting and election of officers of the Oklahoma Broadcasters Association. Skirvin hotel, Oklahoma City.

Jan. 18 — Deadline for reply comments on proposed FCC rulemaking to establish a table of assignments for the 20 educational FM channels (channels 201 through 220, 88.1 through 91.8 mc).

Jan. 24-26 — 22nd annual Georgia Radio and Television Institute sponsored by the Georgia Association of Broadcasters and the Henry W. Grady school of journalism of the University of Georgia. University of Georgia, Athens.

Jan. 27 — Annual awards dinner of the UPI Broadcasters Association of Massachusetts. Sheraton-Boston hotel, Boston.

Jan. 27-28 — Technical conference on color television broadcasting sponsored by the Detroit, Toronto, Rochester (N.Y.) and Chicago sections of the Society of Motion Picture & Television Engineers in cooperation with the University of Michigan. Rackham Memorial Building, Detroit. For further information contact Howard W. Town, NET Inc., 2715 Packard Road, Ann Arbor, Mich.

FEBRUARY

Feb. 1 — New deadline for reply comments to FCC on question of whether private entities should, or legally can, be authorized to operate their own private communications satellites.

Feb. 1 — Deadline for 1966 entries, including radio and TV, in the George Folk Memorial Awards sponsored by the department of journalism, Long Island University. Applicants can send letters containing background descriptions. Radio and TV program entries require disk, sound tape or film supplemented when possible with scripts. Material should be submitted to Professor Jacob R. Zucker, curator of the awards, Long Island University, Zuckendorf Campus, Brooklyn, N.Y. 11201.

Feb. 6-7 — Deadline for entries for the 35th annual Sigma Delta Chi Distinguished Service Awards. Entries may be submitted in the following categories: general reporting, editorial writing, Washington correspondence, foreign correspondence, news photography, editorial cartoon, magazine reporting, journalism research, radio and television reporting and editorializing, and public service by newspapers, magazines, radio stations or networks. Entry blanks may be obtained by writing to Sigma Delta Chi, 35 E. Wacker Dr., Chicago 60601.

Feb. 1 — Deadline for receipt of entries for 1966 Medical Journalism Awards sponsored by the American Medical Association. All entries must be sent to the Medical Journalism Awards Committee, American Medical Association, 535 North Dearborn St., Chicago 60610.

Feb. 6-7 — Seminar sponsored by the Canadian Radio Sales Bureau and Radio Advertising Bureau. Vancouver, B.C.

Feb. 6-8 — Meeting of National Community Television Association board of directors. Jack Tar hotel, Clearwater, Fla.

Feb. 15 — New deadline for reply comments on proposed FCC rulemaking to amend part 73 of the commission rules to specify, in lieu of the existing MEOV concept for AM stations, a standard method for calculating radiation for use in evaluating interference coverage and overlap of mutually prohibited contours. The MEOV method is used to measure radiation from directional antennas.

MARCH

"AN EPITAPH FOR A LADY" by WIOD—At sundown on November 12th, 1965, amid the gaiety accompanying a cruise to Nassau, the Yarmouth Castle sailed with 376 passengers. At 1:00 a.m. the next day, while passengers danced in the main ballroom, fire broke out causing one of the major ship tragedies of the Atlantic. 91 persons perished in a scene of horror.

WIOD WAS THERE...

As soon as the first word of the Yarmouth Castle fire was received in Miami a WIOD news team flew to the scene. WIOD kept everyone in the NOW by 180 special newscasts, including 15 hours of "on the scene" reports, reports from Nassau as the rescued arrived and reports from its own news room.

WIOD IS PROUD TO BE SO HONORED:

THE 19th ANNUAL AWARDS COMPETITION OF THE RADIO TELEVISION NEWS DIRECTORS ASSOCIATION
In recognition of distinguished achievement in broadcast journalism
HONORS

President R.T.N.D.A.
You couldn't do business with a better source!

MGM TELEVISION (THE TOTAL PROGRAMMING COMPANY)
If we get much taller, we'll be in giant trouble!

Pardon us, Mr. Giant.

We have no intention of incurring your wrath by invading your legendary domain. We remember what happened to Jack.

Although our new tall tower is 2,000-feet high—one of the tallest structures in the world—that still should leave you plenty of room to operate.

All we're interested in is bringing the best in quality television to the greatest number of people. Our new 2,000-foot tower assures us of doing just that. It extends our coverage area more than 20%, and brings thousands of new homes within our signal area.

If we get any bigger, we'll let you know.

Fair enough, Mr. Giant?

OPEN MIKE®

To the summit

EDITOR: You are to be commended on the outstanding editorial, "Back to reality," (Broadcasting, Nov. 14).

As chairman of the Joint Commission of the Advertising Federation of America—Advertising Association of the West, charged with coordinating the merger of those two organizations into a single unified federation, and as a past chairman of both groups, I feel that I am in a good position to be able to reflect the consensus for a good many knowledgeable and thoroughly dedicated advertising men and women in almost 190 ad clubs from coast to coast. (Membership of AFA and AAW is composed of individuals in all phases of advertising, including advertisers, agencies and media.) Further, as chairman of the CBS Radio Affiliates Association, and as immediate past chairman of the Radio Code Board of the National Association of Broadcasters, I have been fortunate in being intimately acquainted with the thinking of broadcasters throughout the nation. Finally, as a manager of a commercial radio station, I know from everyday experience the big part advertising plays in the economy of our nation.

From all of these points of view comes a sincere compliment to you for calling for the "summit conference" to bring order out of what certainly is impending chaos—where high officials in our national government appear to be tugging in opposite directions with regard to advertising and its role in our daily lives. I sincerely hope that such a meeting can be called and feel certain that it would have the backing of all segments of advertising. . . .—Lee Fondren, KLZ-AM-FM Denver

Free as the air . . .

EDITOR: I find myself fascinated by an item in the Closed Circuit, Nov. 21, that said in part: "None of [these FM] assignments in remote, mountainous area is occupied. Hence, no confiscation of property is involved."

Just when was the Communications Act amended to make broadcast channels "property"? (I recall seeing no such story in Broadcasting.)

The latest copy of the act still includes those numerous statements that nothing it contains shall be construed as granting any licensee proprietary rights in the channel he is licensed to occupy for a specified period of time; in fact, still demands that a licensee sign a statement indicating that he understands and accepts this as a condition of his being licensed.

Now granted the realities which cause
the broadcasters and even the FCC (The best friend the broadcasters ever had!) to ignore this rather explicit statement—but certainly Broadcasting, that epitome of trade-journal objectivity, should not find itself guilty of such lapses on its news (as opposed to its editorial) pages.—Dr. Dave Berkman, assistant professor and coordinator, communications media resources, Kingsborough Community College of The City University of New York.

(Where do property rights enter the calculus of broadcasting? In a scholarly manner, let us count the ways: towers, transmitters, studios, equipment . . .)

Watch the bouncing ball

EDITOR: An article appearing in your Oct. 31 issue under the heading “Commercials will stop nonstop soccer on TV” contains the statement: “The National Professional Soccer League is being contested by the North American Soccer League, which was formed earlier and with sanction of the sport’s international body. It, however, will not begin play until 1968.”

We desire to correct the last sentence. The North American Soccer League will begin playing operations in April of 1967 with a series of exhibition games between top-class, imported, foreign teams. Immediately following these matches in mid-May, 1967, we will conduct a competition consisting of 12 top-class teams from all over the world. A team will be located in each of our member cities and compete on a regular-schedule basis, thus providing a combined period of playing activity of 16 weeks in 1967.—John O. Best, secretary pro-temp, North American Soccer League.

(Preliminary exhibition games notwithstanding, competition between the regularly constituted teams of the North American Soccer League is still scheduled to start in 1968.)

Other reprints in demand

EDITOR: I would like to have 100 reprints from your Oct. 31 issue of the article “Advertising girds for battle.” As lieutenant governor and legislative chairman of the third district, Advertising Federation of America (Virginia, North and South Carolina) it is my job to sell our membership on the importance of going to Washington for AFA’s mid-winter legislative conference Feb. 6-8.

By putting copies of this article in the hands of those most likely to go, I believe we can go a long way toward convincing them of the importance of getting to know their congressmen and senators.—Victor B. Moore, regional sales manager, WTV(TV) Durham, N. C.

(Broadcasting will make available on special request reprints of any article published in the magazine provided a minimum quantity of 100 is ordered.)
April 22, Chicago. Policyholder Duane Nelson, of Mundelein, Illinois, pulls into Allstate's Drive-In Claim Center in Skokie. Mr. Nelson's car was damaged in a collision when another motorist turned suddenly into his path at an intersection.

11:10

Allstate Property Adjuster Dick Thorson, left, escorts Mr. Nelson into the claims office to get the details of the accident and file a written report. Dick then begins the appraisal.

11:13

An expert at work. Dick is one of the new breed of Claims Adjusters at Allstate, a graduate of a special insurance claim adjuster's school. Most of Allstate's property adjusters have had years of repair garage experience before joining Allstate.

11:19

Dick makes one final inspection, then reviews with Mr. Nelson a list of all damaged parts that need repair or replacement. Should the garage uncover further damage later on (which occasionally happens) a phone call will clear it up.

11:30

A pleased policyholder prepares to leave. Mr. Nelson's comment: "Fast and convenient service. And I was certainly treated well." No wonder more than half of Allstate’s claims are settled at Drive-In Claim Centers.

11:34

Mr. Nelson is on his way again, just 26 minutes after he pulled in! Last stop, a repair shop. Mr. Nelson can pick his own garage to repair the front end of his car.

11:36
The Allstate Minute Men and the Claim Service Revolution

The story of the Property Adjusters at Allstate's 464 Drive-In Claim Centers—and how they're meeting the industry's need for faster, more efficient claim service.

Last year, Allstate settled 52.7% of all its Field auto claims at 464 Drive-In Claim Centers, coast to coast. Today, other insurance companies have started adopting this new concept, too.

**Pivot man: the property adjuster**

—Success or failure depends, more than anything else, on the property adjuster.

Before they joined us, nearly all of Allstate’s property adjusters had years of experience as metal work specialists or supervising garage repair work.

Drive-In Claim Service couldn't work without these highly skilled, trustworthy men.

**It saves the garage time—and money**—The “old” way of settling claims requires several estimates from different garages. This takes up time—and costs the garages that don't get the work orders.

Consequently, most garagemen heartily endorse Drive-In Claim Service. It's a simple procedure for them to receive the Allstate draft and do the repair work.

And even if the garage finds damage that the Allstate adjuster missed—which doesn't happen often—a phone call is usually all it takes to get the go-ahead for that work, too.

Many garagemen actually recommend that their customers switch to Allstate to get the benefits of Drive-In Claim Service.

**Policyholders don't have to drive in—they choose to**—Drive-In Claim Service saves our customers time. The faster they can get a fair settlement, the happier they are.

Do our policyholders like this system? More than half of all our Field claims were settled at Drive-In Claim Centers last year. And whether they're aware of it or not, Drive-In Claim Service helps to save them money on Allstate Auto Insurance in almost all states. Allstate saves money every time it doesn't have to send an adjuster out on a call—and savings help keep rates low.

Will Drive-In Claim Service replace the “ordinary” kind?—No, never completely, simply because some cars are too badly damaged to drive in. And some people will prefer to have us come to them. But for less serious claims—the much more common kind—Drive-In Claim Service has proved it's here to stay.

Drive-In Claim Service is another reason why we can tell our customers, and mean it...

**You’re in good hands with Allstate®**

Opportunity knocks. Can radio answer?

Over the next four-year period we anticipate an almost incredible gain in total advertising investment. More than $13 billion dollars are expected to be spent in 1970 in the five major consumer media—almost half again as much as was spent in 1965.

This is important to all of us who make our living in the advertising business. It's a healthy situation. The rate of growth is considerably higher than the rate of growth of the population, personal consumption and even the gross national product. Indeed, it's healthy.

But let's take a closer look at where the advertising dollar will be going, just as we would look at any product that we might be selling—that is, from the share-of-market standpoint.

There are two media in which we predict no basic change. These are radio and magazines. We expect magazines to continue with a 13% share of market, and radio with a 10% share.

The other three media are expected to fluctuate a little—either up or down. Newspapers and outdoor down a point or two, TV up three points.

Now this would lead me to ask: Why can't radio pick up that extra 3% that we expect to go into television's coffers? Three per cent in 1970 will mean over $400 million dollars—or about half of what was spent in all of radio in 1965. That's a lot of money.

We think there may be something for radio broadcasters to consider before they make their next rate card adjustment, or make a decision as to what rating service to buy or use.

TV Preferred • We expect that both radio and newspapers will be deriving an even greater portion of their dollars locally. This is expected not because of increased advertiser confidence in these media, but will probably stem from a decreasing interest on the part of national advertisers in placing dollars in either spot radio or newspapers. They would rather spend it in television.

A major factor for these shifts is believed to be the rate structure in each medium, which allows one group of advertisers to pay a different price for the same delivered value. It is commonplace in newspapers to have both a local and a published national rate. The same situation often exists in radio. In a highly competitive radio-selling situation, a salesman's breast pocket sometimes bristles with rate cards—each calling for a different price—for the same schedule of spots.

Fortunately, this is not the case with the largest and most sought-after stations in town. It does happen, however, with regularity on the lower-rated stations when they are fighting for a piece of the business.

Don't get me wrong. I'm not against local rates. What I am against is the fact that my competitor or anyone else may be buying the same thing that I am, at an even lower price than I am paying.

Let's look at another area where we think radio could improve itself and increase its chances of picking up some of that elusive 3%. How long has it been since radio broadcasters made a concerted effort to sell radio as a medium? Rod MacDonald [director of sales, Radio Advertising Bureau—West] and the RAB are doing a good job of promoting the medium on a broad scale. But, for the most part, radio broadcaster efforts seem to be concentrated on selling their own station and to hell with the medium itself.

Specify • Often radio's method of selling takes the form of boasting that—"you've got to buy me, I'm number one." Well the time has finally come for us to ask: number one in what? Homes? Women? Men? Teen-agers? Beer drinkers? Cigarette smokers?

For radio to get its share of that elusive 3% of advertising dollars that we think will be going into TV, it's going to have to do a much better selling job on us on the values of the medium.

Formats are rapidly becoming a more critical factor in station selection. Radio has become a much more personal medium than all the others. In response to this, stations are aligning their formats to appeal to a specific group of listeners. Radio will have to show us why one type of programing will be more suitable than another for the type of product we're trying to sell.

After Jan. 1 of next year, with the new programing laws requiring more separate programing for AM and FM stations, this segmentation of radio audiences will become even more critical. Radio should follow the lead of other media in developing data that will clearly define the differences in the audience appeals of various formats.

Needed • In order to compete for the dollars that may go into other media, there is a need for proof that radio is capable of achieving the same reach to prime prospects as, for instance, a spot TV or a magazine schedule. This type of information is sorely needed.

After such data is properly developed it not only has to be interpreted but station management and salesmen will have to adjust their price structure and rate cards to fit more in line with values received, as defined by the new research. The days of paying a special price for a rating point are fast ending.

Over the next few years, more and more media selection and buying will be done with the aid of computers. Information—and lots of it, both qualitative and quantitative—will have to be supplied in order to assure proper consideration and positioning for radio.

New selling techniques will have to be developed. For years now, radio has been virtually giving away weekend spots. If radio could sell the value of a woman listening on Saturday or Sunday as being just as good as a woman reached during the week, the medium will have substantial increases in business and be well on its way to a share of that 3%.

So there it is. It's only 3%. But it's $400 million and it's still up for grabs.

Eugene J. Grealish has been director of media relations and planning for Young & Rubicam Inc., Los Angeles, since early 1965. He joined Y&R in New York in 1959 as a senior media buyer. Mr. Grealish began his media career with Bryan Houston Inc. Today's memo is adapted from a speech Mr. Grealish made before the Southern California Broadcasters Association Inc. A native New Yorker and a graduate of Queens College, Mr. Grealish once worked as an NBC page.
Eagle's wings

... Makes the "Big Difference" in your Color Film Pictures

Color film commercials and programs get their best showing with the Big Tube TK-27. It gives you three big improvements. It enhances the color picture, prevents deterioration of color quality, and automatically compensates for film and slide variations.

HOW THE BIG TUBE IMPROVES THE PICTURE
Like a larger photo negative the big tube adds "snap" to the color picture. It increases resolution and definition, making the picture "sharper". It eliminates more of the "noise" element, making the picture more pleasing.

PREVENTS DETERIORATION OF COLOR QUALITY
Advanced ultra-stable circuitry prevents drifting. Electrostatic focus vidicons maintain uniform focus—independent of high voltage variations. Sealed optics avoid problems of secondary reflections. NAM monitoring provides easy control of quality.

NEWEST, MOST ADVANCED COLOR FILM CAMERA
The TK-27 reflects latest developments, features, advantages of group design, employs plug-in circuit modules, exploits the total transistor concept, uses ultra-stable circuitry, and achieves the benefits of standardization. The TK-27 is easy to install, simple to operate, designed for speedy servicing, and assures dependable performance. It's part of the "new look" generation of broadcast equipment.

COMPLETELY INTEGRATED SYSTEM PACKAGE
The TK-27 is part of complete RCA film system, consisting of: Camera, multiplexer, slide projector, film projector. Each is designed to do the best job. For example, the Color Film Projector is designed for "hands off" operation, for creative handling of film, is fully transistorized and may be automated. All these equipments are an integrated part of a matched film system—to give you finest color film pictures.

For more information, see your RCA Broadcast Representative, or write RCA Broadcast and Television Equipment Department, Bldg. 15-5, Camden, N.J. 08102

The Most Trusted Name in Electronics
TALK ABOUT IDEAS

AGAIN, McLENDON “OUT-IDEA’D” ALL BROADCASTING WITH “ALL WANT-ADS” K-ADS IN LOS ANGELES

FIRST, ONLY ALL ADS RADIO ANYWHERE!

With the debut of K-Ads, the flood-gates swing open to the largest “open-air” market in the world. Want-ads, only want-ads, nothing but want-ads — 16 hours a day. Want-ads for jobs, for cars, for houses. Want-ads for anything, everything — from A (accordions) to Z (zipper repair). Want-ads beamed to a two-county area of more than 2,680,000 households and 8,000,000 ready and eager buyers and sellers. Another new, startling, heretofore uncharted direction for radio’s limitless horizon.
Agencies howl at color charges

Reaction to premium for color commercials seems unanimous among buyers contacted; reps are divided but most feel charge for color is necessary

The chance that spot television revenues might eventually spurt ahead through premium charges for color seemed slim last week, but not invisible.

Television's first color rate card was being denounced and ridiculed by advertising agencies and getting mixed reaction from national spot salesmen.

The proving ground for the new spot sales ammunition—a color-based card—is Syracuse, New York, where WHEN-TV is asking 5% increases for all commercials running in color (CLOSED CIRCUIT, Nov. 28).

While threats of commercial cancellation were reaching the station, the rate jump was being mulled on Madison Avenue where agency comment ran the short distance from "unjustified" to "foolhardy."

Rep Reaction Mixed • Station representation companies were divided in their opinions. Some thought the rate increase was worthy of study and backed the idea of a color premium in principle.

Others said they had no intention of advising their station to institute color rate cards, now or in the future. These thought the advantages of color should be gradually reflected in regular rate increases but never through increases in the name of color alone.

The Syracuse situation is considered significant because it has taken the color-rate controversy out of the theoretical stage and provided a market test case. And in that market WHEN-TV, a Meredith station, seems to be standing alone.

The sales manager of another Syracuse station, WSYR-TV, says he has no plans for a color rate card, and a third station in the market, WNYSY, has given no indication of considering such a rate plan either.

Whether WHEN-TV will be able to stick by its color plan without the support of its market competition was a question posed by several reps last week.

Television stations across the country, many of which have been pushed into color for competitive reasons and faster than they may have preferred to move, would now like to get a faster return on their color equipment investment, according to a number of advertising agencies.

William White, vice president and media director at Cunningham & Walsh, says C&W will take action against the new WHEN-TV rates and said no sophisticated agency is going to let its clients be charged a color premium.

WHEN-TV said it took the minimum color-set circulation figure—10%—from the last available report, then took half of this number to arrive at its 5% color premium. A representative of the station, asked if this meant that rates could be increased by 50% by the time color set circulation reached close to 100%, said this was conceivable.

WHEN's national sales representative, the Katz Agency, is known to support the idea that color exposure for an advertiser merits higher rates and that these should come in the form of color premiums, but what degree of color-set circulation has not been specified.

Some reps who favor color surcharges suggest that a 20% color-set penetration might be a good starting point for added charges in the name of color. If stations wait for 50% or 60% penetration, it's pointed out, they have almost admitted that new color advantages do not warrant color charges and at the same time have lost all the higher-rate opportunity that lies between zero and 50% circulation.

United Front • Agencies uniformly protest that color, no matter what its reach, is not going to justify higher charges to the advertiser.

Warren Bahr, senior vice president and director of media for Young & Rubicam, used such words as "nonsensical," "ridiculous" and "greedy" to describe WHEN-TV's action. He claimed it is a step toward inhibiting the progress of color TV.

He said Young & Rubicam has sent a letter to WHEN-TV protesting its color rate premium. He added that Y&R will use any way it can "to get around the color charge," including the use of black- and-white commercials. He emphasized that Y&R does not believe in sanctions and said if a particular marketing problem dictated the use of color and of WHEN-TV, the agency would
AGENCIES HOWL AT COLOR CHARGES continued

The agency has so advised its clients, Mr. Kanner said, noting that agencies produce and pay for commercials to be in color and stations “merely provide the facilities.” He said boosts in rates of color spots would “be taken into account on its efficiencies.”

There’s a Difference • Mr. Kanner said that a color differential may be argued on the network level where color adds to the producer’s cost of show production but that stations do not have comparable situations in spot charges. He discounted the cost of new color equipment purchased by stations because of their method of amortization over long periods. The agency’s letter was sent by Richard Gershon, vice president and manager of media.

Lloyd R. Harris, vice president and media director at Sullivan, Stauffer, Colwell & Bayles, thinks the increase is for programs but not for color.

Joseph Burbeck, head time buyer at Compton Advertising, said the agency had advised WHEN-TV that it “will take pains to use other stations in the market,” rather than WHEN-TV. The agency has notified its spot TV clients of WHEN-TV’s action, he reported. They have supported Compton’s position that the color premium is unjustifiable and that, when possible, other Syracuse TV outlets should be used or commercials be run in black and white, he stated.

Color a Service • Mr. Burbeck insisted that color transmission is “an operating expense, a service a station provides for its viewers. For example, Compton does not charge its clients extra fees if it puts in a computer, he continued. He noted there was a parallel some years ago when stations installed tape machines and sought to impose extra charges for tape transmission. Agencies held the line at that time, he said, and this charge was eliminated by stations. He declined to comment on what would happen if other Syracuse TV stations adopted the WHEN-TV color rates approach.

Paul Roth, vice president and media director of Kenyon & Eckhardt, criticized the WHEN-TV move as “completely unjustifiable,” and said he had written to the media officials at K&E branch offices throughout the country of the agency’s opposition. Mr. Roth said he has advised his media staff that his attitude is that “We should not spend a dime on either WHEN-TV or WHEN radio” and he has asked for a report on whether this attitude would create a problem for any regional station.

Mr. Roth said he intends to place K&E billing on other stations in Syracuse and, if necessary, bypass the mar-
mented. "There is a trend toward color and we've been asked many times by stations to think in terms of color for our commercials to blend in with color programming. This just doesn't make sense."

New Cycle? Foote, Cone & Belding expressed dismay lest the color-based rate card presage a new cycle of spot rate increases. Frank J. Gromer Jr., the agency's vice president and director of marketing services, noted network costs passed on to the advertiser for color integration have been recently increased.

FC&B, he said, sees no general issuance of color rate cards by stations, noting that some outlets would by this move place themselves at a competitive disadvantage against stations maintaining the status quo. Agencies have particular concern, Mr. Gromer said, over rate-hike action at a time when there's relatively low color set penetration. Such moves, he indicated, must affect advertiser evaluation of the availabilities on those stations that follow the WHEN-TV path—"we would make sure that we were aware of the increase when buying, taking extra care in consideration of availabilities, the cost-per-thousand and ranking. We would be careful that the cost efficiencies warrant purchases."

Mort Keshin, vice president and media director of Lennen & Newell, said he had "a most negative reaction" to the WHEN-TV move and called it "a horrible mistake." He pointed out the increasing availability of color in programs and commercials is providing the incentive for new advertisers to come into TV and said the extra charges may well cut off these additional investments. He insisted there are no cost factors that stations can cite to justify premium rates for color as there are in the printed media and, to some extent, in network TV. Mr. Keshin said that L&N has not advised clients on this development or adopted any policy to cope with the WHEN-TV premium rate, since the agency has not been officially notified by the station.

Rep View • Hearty endorsement of WHEN-TV's action was expressed by Jack White, vice president and national sales manager, H-R Television. He said H-R is preparing a memorandum for its stations advising them there is value in the notion of a color premium rate and he hopes to distribute the memo by the end of this week. He indicated H-R may make some modifications in the WHEN-TV formula, once stations approve the basic concept.

Mr. White justified the extra payment for color spots on the grounds that they are more effective than black and white.

An official of Peters, Griffin, Woodward said his organization had counseled its stations not to charge extra for color. Stations should and will get more for color, he said, but a color rate card isn't the way to get it. How, he asked, do you charge an advertiser for a color commercial that appears in a black-and-white movie? He went on to say that in most markets color TV set penetration isn't high enough to justify a color rate anyway.

A Blair television official said his company regards the WHEN-TV action as "interesting" and has discussed the concept on an informal basis with several stations it represents. He reported that Blair has come to no conclusions on the subject but intends to "take a long, long look" before deciding on the position it will adopt.

Martin L. Nierman, president of Edward Petry & Co., called the WHEN-TV move very interesting and worth watching. He reported that Petry thus far has taken no position or adopted a policy toward a premium rate on color but indicated the subject will be examined thoroughly. He voiced the view that color is an additional expense for a station and does provide added impact for a sponsor's message, but said Petry wants the opportunity to evaluate the implications of the development before it makes a recommendation to its stations.

More Money • Robert McGredy, president of Television Advertising Representatives, doubted that introduction of color cards would bring any more spot dollars to a market. The sponsor would just maintain his budget in the market even if this means fewer spots in his schedule, according to Mr. McGredy.

A vice president of another major spot sales organization asserted that color's benefits are already reflected in some stations' rate cards. Calling attention to costs-per-thousand for spot TV that have reached as high as $3.90 "in demand markets for demand positions," he said these efficiencies couldn't be sold without the advantage of color.

It's a little too early to push up a premium on color, according to J. J. Weed, president of Weed Radio & Television, New York. It might be better to wait for a 25% color set penetration, he said. Syracuse, he believed, will reach this figure in 1968. For now, Mr. Weed said, WHEN-TV may have to face some "unpleasant reaction" from advertisers. Since color production costs are going up, eventually the rates on color will also climb, he indicated.

Tom Judge, vice president of National Television Sales Inc., said he personally felt that "it's a mistake" to charge extra for color at this time. He
Look up in the sky, it's a tanked-up car

When Clark Oil & Refining Corp., Milwaukee, talks about maximum power in its new TV campaign, it goes to any height to make the point. In this spot, eight thin wires lift the car over a Clark service station. The new series of commercials uses a tongue-in-check approach to promote Clark's quick-starting, maximum-powered gas. Papert, Koenig, Lois, New York is the agency for the mid-western oil company.

contended that stations should be attempting to encourage the use of color on a more widespread scale, explaining this would bring in advertisers which have used spot TV sparingly (soft goods, autos) and enlarge expenditures from other categories, such as cosmetics. The more logical way to effect rate increases, he said, is to support the growth of color, which will make the medium more important to advertisers and thus pave the way for justifiable rises in the rate structure. He added that he was opposed to any proposal that could restrict the progress of color TV advertising, and he placed premium rates in that classification.

Olympia beer plans heavy spot use

With spot television playing a pivotal role, the Olympia Brewing Co. last week spelled out its 1967 advertising program before a combined meeting of the company's sales and distributor forces assembled in the Century Plaza hotel in Los Angeles. Some 600 salesmen, distributors and their wives listened as officials of the Tumwater, Wash., brewery (city population: 4,700) described how spot television will be the prime medium for "the strongest advertising campaign" in Olympia's 71-year history.

Barney Renderer, the brewer's director of advertising, explained that television use would be expanded next year at a pace that will thrust Olympia into the top three or four spot-TV advertisers in the West. Spot schedules will be bought on stations in all the country's 11 western states marketing areas. The aim will be to get spot schedules placed during prime viewing time adjacent to top-rated network programs.

Radio commercials, Mr. Renderer emphasized, will be closely tied-in with the TV effort, as will consumer and trade publications advertising, point-of-sale displays and outdoor posters. Media plans also call for the mood and style of the TV campaign to be carried over into four-color magazine schedules. Outdoor will be used in selected markets.

Olympia regards its advertising expenditures as privileged information and did not reveal budget figures at last week's meeting. Trade sources, however, estimate that the regional advertiser spent in excess of $2 million last year. Spot TV grabbed off about two-thirds of these expenditures, with spot radio accounting for about 20% of the overall budget. There seems little question that Olympia's spot-TV expenditures will rise sharply in 1967.

Last week's sales conference marked the first time in the history of the company that Olympia's advertising proposals were presented to the combined sales and distributor organization in a single showing. The entire presentation—an elaborate affair that included the use of a revolving stage, spotlights, 35- and 16-mm color film arcs, a 32-foot cinemascope screen and an especially built slide projector—was written, produced and directed by Botsford, Constantine & McCarty Inc., Seattle, the agency handling the Olympia account. The slogan, "It's the water that makes the difference," will continue as the dominant theme of the brewer's advertising campaign, but in the coming year the pitch will be more directly at the young adult.

William H. Barnett and Thomas L. Bloisl, both BC&M vice presidents, were scheduled to give a synopsized version of the marketing presentation to some 60 broadcast and magazine representatives in San Francisco later in the week.

Rep appointments...

- WKJG-TV Fort Wayne and WJSY-TV Elkhart-South Bend, both Indiana: Blair Television, New York.
- KZAT-TV Nogales, Ariz.: Eastman TV, New York.
- KNAK Salt Lake City: Avery-Knodel, New York.

Also in advertising...

Moving day • Don Kemper Co., Chicago agency, moves to new offices at 221 East Chicago Avenue; Phone 943-6020.

New home • Bronner & Haas, Chicago agency, moves to expanded quarters at 221 North Lasalle; phone 372-8411.

Appointed • ABC Radio has named Frank B. Sawdon Inc., New York, to handle all advertising for the network.

H-B expands • The commercial division of Hanna-Barbera Productions, Hollywood, which has produced 114 TV commercials so far this year, is undergoing a major expansion to keep pace with what's termed "accelerated" live-action activity. H-B is building a 15,000 square-foot addition to its 40,000 square feet of studio space to house the commercial division.
Atlanta is sold on WSB Radio

Atlanta... a major market on the move. Busy people going places, doing things and spending money. Almost $3 billion annually.* Right in the midst of it all is beaver-busy WSB Radio... meeting the needs, wants and desires of Atlanta's largest radio audience†... 93% adult... the audience with purchase power. Sell in company with America's top advertisers — put the WSBBeavers to work for you today!

† Mediastat, June-July, 1966
Why all the shouting?

Reduction of clutter in cultural shows expands past program practices

Grouping and timing of commercials to minimize interruptions of program content, undertaken from time to time in the past, is continuing this season on CBS-TV's special cultural and dramatic programs, CBS-TV spokesmen said last week.

The policy is more evident this season, they said, because CBS-TV is scheduling more dramatic and cultural specials. Its most widely publicized recent application was in the CBS-TV presentation of Death of a Salesman last week.

Putting the policy into effect obviously requires approval by the sponsors of the programs involved. Except for programs sold on a participating-sponsored basis, where the network presumably would have greater leeway in arranging commercial placements, the only sponsor involved thus far this season is the Xerox Corp.

Xerox, which also sponsored Salesman, has four specials currently scheduled on CBS, including a repeat of Salesman.

The policy will be apparent in two specials to be presented this week, S. Hurok Presents on Tuesday (Dec. 6, 9-11 p.m. EST), which has been sold on a participating basis, and The Glass Menagerie on Thursday (Dec. 8, 9-11 p.m.), one of the Xerox presentations.

Other programs on which the commercial grouping policy will be used, according to CBS, include The Crucible and Mark Twain Tonight, also under Xerox sponsorship, and the forthcoming CBS Playhouse series, "Ivanov" and "An Evening with Charles Dickens," which are as yet unsold.

Not in Movies • The policy does not apply to movies or other entertainment programs, according to CBS authorities. In response to questions, they said that since "program content is the motivating factor" it was "conceivable that an entertainment program could come up that would fit this pattern," but they appeared to regard it as remote.

Spokesmen for the network said that although the decision to apply the policy to specific dramatic and cultural specials would be made in consultation with the advertisers involved, they thought it unlikely that such sponsors would not agree that it was to their advantage to keep commercial interruptions to a minimum.

Many advertisers historically have argued, however, that commercials lose effectiveness when scheduled too close together and that two short ones are better than a single long. Others, especially in corporate advertising, take the position that fewer interruptions create an audience feeling of good will that works to the advertiser's advantage.

A spokesman for Xerox appeared to embrace both arguments last week. He said his company was "happy to make certain concessions" so that "the end product for which viewers tune in—the program—will play better." But he also noted that as one of the concessions Xerox agreed to have the two closing commercials in this week's Glass Menagerie run "rather closely together," separated only by the closing credits, and this, he said, "will probably reduce their impact."

He also acknowledged that CBS had given Xerox $100,000 to remake two 90-second commercials into two-minute spots as part of the effort to reduce the number of Menagerie interruptions. "However," he added, "we are giving up three commercial positions during the show to which we are entitled. The time and program value of these three advertising opportunities is $260,000."

In Menagerie, he said, Xerox will have seven commercials rather than the customary 12, and there will be only four interruptions of the play. Four of the seven will be 90 seconds in length, the others two minutes each. The final scene of the play reportedly will run 32 minutes without interruption.

Nothing New • The Xerox spokesman's observations were contained in a statement wondering "what all the shouting is about" after newspaper reports suggested that CBS-TV was adopting a new policy.

"Xerox," he said, "initiated this policy five years ago, when we first entered TV as a sponsor of CBS Reports. At that time, we decided to utilize 90-second commercials, rather than the customary one-minute variety, in this way reducing by one-third the number of interruptions for commercials during a program. We have done this. . . ."

"We initiated the same procedure at NBC for our sponsorship of their election-night coverage. By using 90-second commercials rather than the one-minute ones, we reduced the number of commercial interruptions during seven hours on the air from our allotted 21 to 14, or one-third fewer. . . ."

"We will be happy to cooperate with CBS the same way when we sponsor Mark Twain Tonight, The Crucible and our Death of a Salesman rerun next spring."

National TV Sales takes over Raymer

SALE WAS ARRANGED PRIOR TO PIONEER REP'S DEATH

The controlling interest in the Paul H. Raymer Co. has been acquired by National Television Sales Inc. for an undisclosed sum. It was announced last week that Raymer will function as a radio-only representative and as a separate entity with its own executive, sales and operating staffs.

The announcement follows the death on Nov. 20 of Paul H. Raymer, founder and president of the TV-radio sales organization (Broadcasting, Nov. 28). It was pointed out that Mr. Raymer had been in negotiation with NTS and had reached an agreement prior to his death to sell the controlling interest to have Raymer operate solely in radio.

The agreement for the sale proceeded on its scheduled date, Nov. 22, it was stated, and formal closing was set for last Friday (Dec. 2).

Under terms of the agreement, the Paul H. Raymer Co. name will be retained. A minority interest in the company will be held by Mr. Raymer's widow, Mrs. Melvina Raymer, and by Fred C. Brokaw, a former executive vice president of the firm, who had retained his stock interest following his retirement two years ago.

The Raymer company was founded by Mr. Raymer in 1933 and represents 28 radio stations. No information was available on the disposition of television properties in the Raymer lineup, but an announcement is expected to be made shortly, possibly this week. A new president will be sought by the Raymer organization.

National Television Sales was established in 1964 and began representation in the spring of 1965. It represents 18 TV stations. The firm's president is Paul Bancroft. The operating heads are Jack Mohler and Tom Judge, both vice presidents.

HoJo test market to be expanded

Howard Johnson Co., New York, reported last week that its test marketing for HoJo, a new soft drink line, will be expanded to other areas within the next few months.

HoJo, which was put on grocers' shelves last July in Massachusetts.
We’re tremendous frogs in an AMAZING pond!

SERIOUSLY and no joke — until you’ve really heard the story of our operations in the Red River Valley . . . well, you honestly can’t imagine what goes on out here. This area is RICH. Our almost bottomless topsoil is so productive that even the Encyclopedia Britannica raves about it.

Farmers drive in to Fargo from as much as 95 miles (often in cars even you would envy). They buy in shops and dine in restaurants so elegant as to open even your eyes. And when our people are home, they tune to — well, do we need say?

Sincerely — we ask you to let your PGW Colonel tell you our story. It explains some things you OUGHT to know! Will you?

WDAY-TV • WDAY-AM
WDAY-FM/Stereo

The Know-How Stations in
FARGO, N. D.

PETERS, GRIFFIN, WOODWARD, INC., Exclusive National Representatives
New York and later in Connecticut, is being backed with an advertising campaign that budgets more than 90% in spot radio-TV. The basic theme, created by Howard Johnson's agency, Ted Bates Co., New York, describes HoJo as a cola "for people under 21."

In TV, three one-minute color spots are being used: one with a young man (over 30 years) who "came clear across the state line to get HoJo," and two other spots featuring "Miss Johnson," a wealthy young blond who thinks HoJo is "not goopy," or that "it has a je ne sai quoi."

The radio portion of the campaign began in August, introducing "grandma," a sweet old lady who attempts difficult ruses to get some HoJo.

The campaign thus far has been in Springfield and Holyoke, both Massachusetts; Albany, Schenectady and Troy, all New York, and New Haven and Hartford, both Connecticut.

Brownell answers USDA Armour complaint

Another government agency—the Department of Agriculture—has entered the fray concerning the legitimacy of some of advertising's most hallowed promotional devices. The offer of a refund coupon to the housewife who purchases the promoted product has come under fire in a recommended decision of a hearing examiner for the U.S. Department of Agriculture.

And a former attorney general of the U.S., Herbert Brownell, has charged in behalf of Armour & Co., defendant in the case, that the USDA has never been given the right by Congress to outlaw in arbitrary manner a traditional marketing practice of advertising and promotion on the strange theory that certain advertising is economically wasteful and anti-social."

The case grew out of a 1959 Armour bacon promotion in five western states that was advertised on radio and television as well as in stores and newspapers. The amount of the refund offered, 50 cents on a two-pound bacon package, was deemed by USDA to be more than the profit in the transaction, resulting in a sale below cost.

The USDA has jurisdiction over meat packers' marketing practices under the Packers and Stockyards Act. Mr. Brownell contended in his statement for Armour that the company had violated no law in the bacon promotion and that a prohibition of such consumer refunds "represents an administrative attempt . . . to rewrite and extend the provisions of an existing law without prior approval of the Congress, therefore usurping the rights of the Congress."

Can FM hypo auto sales?

FM reaches prime prospects, NAFMB group tells Detroit; growing marketpower cited

A bid to get FM included in the advertising budgets of major automobile manufacturers was made directly to car makers and their agencies in Detroit last week by representatives of the National Association of FM Broadcasters.

Three NAFMB leaders, accompanied by seven other FM broadcasters, stressed the size and quality of the FM audience and especially its growing importance to advertisers as the time approaches when AM-FM operations will have to be separated, under FCC rules, in the top 222 markets.

The three were Abe Voron of WQL-WFM Philadelphia, president of NAFMB; David H. Polinger of WTN(FM) Lake Success, N.Y., a member of the NAFMB board, and Lynn Christian of WPIX(FM) New York, chairman of the "drive with FM" campaign. They were accompanied by Bob Adams (KUTB(FM) Glendale, Calif.; Gary Gielow, KPER(FM) San Francisco; Ed Walters, WEMF(FM) Chicago; Sid Roberts, WDR(FM) Chicago; Ralph Weinman, WBOS-FM Boston; Everett Dillard, WASH(FM) Washington, and Harold Tanner, WLM(FM) Detroit.

Lineup • The group met Wednesday morning with advertising and marketing executives of General Motors and their agencies, D. P. Brother Co., Campbell-Ewald and MacManus, John & Adams; Wednesday afternoon with Plymouth and Chrysler representatives, and Thursday morning with Ford Motor Co. and its Ford and Lincoln-Mercury divisions and executives of Grey Advertising, Kenyon & Eckhardt and J. Walter Thompson Co. Within the next two weeks the presentation will be made to officials of American Motors and its agency, Benton & Bowles, in New York.

The nub of the presentation was that FM audiences are quantitatively competitive with—and qualitatively superior to—AM audiences and represent prime prospects for auto purchases.

The NAFMB group also noted that the relatively limited number of commercials currently appearing on FM gives car makers an opportunity to "stand above the crowd," and, with the FCC's AM-FM nonduplication rule to go into effect shortly in more than 200 markets, that advertisers will no longer be able to buy two stations with the same appropriation.

The presentation quoted a 1964 study by the Pulse Inc. showing that 58% of all new cars and 68% of all medium-priced and luxury-priced cars were bought by people living in FM homes, while 57% of all people who said they planned to buy a car within 12 months were from FM homes.

Audience Gains • Mediastat figures were cited to show that FM's weekly cumulative audiences between October-November 1965 and June-July 1966 had grown 145% in New York, 144% in Philadelphia, 71% in Chicago, 37% in Los Angeles, 69% in Detroit, 99% in Washington and 207% in St. Louis.

Between 1960-1965, the auto makers were told, FM set sales grew from fewer than 2 million a year to more than 8 million a year, while FM's weekly unduplicated cumulative audience passed the 27-million mark and is now approaching 30 million.

The presentation also noted that some 900 FM stations have pledged to support the "drive with FM campaign" by carrying four announcements daily for 52 weeks stressing the pleasures of new-car ownership and automobile FM, creating "an exceptional climate for automotive advertising."

More newspaper color

The quickening appetite of advertisers for color is reflected in their increased use of color in newspapers as well as in television.

Advertisers this year are expected to invest more than $19 million in newspaper preprint advertising, an increase of 80% over last year, according to Bruce H. Logan, vice president in charge of color sales for the Bureau of Advertising, American Newspaper Publishers Association.

Mr. Logan said that preliminary figures for run-of-paper color also indicate "sharp gains" for all forms of newspaper color advertising, that this advertising should be more than twice the volume of last year and that SpectaColor advertising volume had a 49% gain over 1965.

In preprint page impressions, the increase this year is to 1,440 million as compared with 825 million a year ago.
What are we doing to free the slaves in New York?

“Many public and private agencies in the New York area have programs for combatting dope addiction. But there is no unified attack on the narcotics menace. Various police departments have their own programs. Health departments have their own programs. Federal and state agencies have separate programs. The point is that no one co-ordinates them and these agencies have little inclination to work together to attack the most serious social and medical program in the New York area. We think Mayor Lindsay took a healthy step when he appointed Dr. Efren Ramirez to co-ordinate on anti-narcotics programs in New York City. Governor Rockefeller took a step forward in getting a bill through the legislature that would impose greater penalties on dope sellers and force addicts to undergo treatment. Yet this is not enough. The attack on addiction and the sale of drugs is not being co-ordinated on a regional basis. We believe the Mayor and the Governor should call a metropolitan area conference on new ways to combat this serious problem. What we need is a blueprint for a united attack by public and private agencies, research groups, law enforcement groups and so on. We already have more addicts in the New York area than any other place in the country. The longer we wait the more we’ll have.”
But, how many see the commercials?

A top agency media executive told magazines last week they need to brush up on the depth and detail of their advertising readership statistics but assured them that what they already are supplying is far better than current television data.

The speaker was Edward M. Stern, vice president and director of media, Foote, Cone & Belding, Chicago. His platform: a seminar in New York Tuesday (Nov. 29) given by the Magazine Advertising Bureau.

His principal dissatisfactions with TV audience data, he explained, are the focus on household coverage instead of people and the failure to differentiate between viewers of programs and those who actually see the commercials. The result, he indicated, is that programs with good ratings really may not be delivering the number of prospects presumed. Magazines, he noted, long ago admitted they didn't have 100% readership of the ad pages.

Mr. Stern noted that in television "all of us seem to be stuck at dead center by using a thing called 'cost per thousand per commercial minute,' which somehow assumes that all commercials are seen by all viewers of all programs. Since the television medium now enjoys such a highly successful seller's market for spot and network, they appear to have little interest in exploring the size of audience to commercials in addition to data on program audiences."

Business briefly...

Schick Safety Razor Co., Culver City, Calif., through Compton Advertising, Los Angeles, begins an all-out promotion campaign this week (Dec. 6) on behalf of two new foam-action shave lotions, Lime Wood and Bark Wood. Media plans, still being formulated, include use of spot radio and television.

BSR Ltd. (USA), Blauvelt, N. Y., through Kane, Light, Gladney Inc., New York, is considering a late-night TV spot campaign for its McDonald 500 automatic turntable. The spot campaign would begin in New York and then go national.

'LIFE' magazine, through Young & Rubicam, New York, has purchased 52-week sponsorship in NBC Radio's Chet Huntley's Perspective On the News.

Sperry Rand Corp., through Young & Rubicam, both New York, has purchased sponsorship in Run for Your Life, The Virginian, I Spy, Star Trek, and Saturday Night Movies.

Wynn Oil Co., Azusa, Calif., through Needham, Harper & Steer Inc., Los Angeles, will begin 52-week sponsorship of The World of Wheels, described as "a completely new automotive program series," on ABC. The radio buy, to start on Jan. 7, 1967, is for five-minute automotive reports four times each weekend.

Smith is RAB's new chairman

The board of directors of Radio Advertising Bureau last week elected Lester M. Smith, general manager, KJR Seattle, as RAB chairman of the board for 1967. He succeeds Harold Krelstein of Plough Stations, who had served in that capacity for two years.

The board elected Roger W. Clipp, Triangle Stations, to chairman of the executive committee, succeeding Mr. Smith, and Louis Read, wnsu New Orleans, to chairman of the finance committee, succeeding Mr. Clipp.

In a separate announcement, it was revealed that a joint Radio Advertising Bureau-Association of National Advertisers radio workshop will be held in New York on Feb. 16, 1967, at the St. Regis hotel. Its agenda will include a review of radio fundamentals for both operation and management personnel at agencies and advertisers; a profile of creative trends in use of radio today and a status report on radio research.

Papert, Koenig, Lois gets P&G's Dash

Papert, Koenig, Lois Inc., New York, is on a Procter & Gamble account acquisition splurge. P&G designated PKL last week as the agency for Dash detergent, which bills an estimated $5 million with about $4.5 million in TV-radio.

PKL will obtain Dash as of March 1, 1967. It is the second substantial P&G account flowing to the agency with PKL named to Cinch and Salvo in June 1965. These products also bill an approximate $5 million, overwhelmingly in TV.

No reason was given for moving Dash to PKL from Dancer-Fitzgerald-Sample. D-F-S continues to handle P&G's Drist, Oxydol, Thrill, White Cloud, Puffs, Bounty and Raider products.
Meet the fine executives behind United Broadcasting Company...

Successful men like Clifton D. Holland, Director of Special Programming.

Cliff Holland enjoys the distinction of having been the very first UBC employee when the company was formed some 21 years ago. Those same 21 years spent at UBC-owned WOOK Radio in Washington, D.C., have proved invaluable to Holland in his new job as Vice President in Charge of Special Programming.

Earlier this year, Holland inaugurated a series of unique community dialogues with the Washington Negro community he knows so well. For this series, leaders from the city’s Department of Health, Fair Housing Association, “Neighbors, Inc.”, and numerous other groups are called upon to air community projects and problems many times each day. Neither WOOK nor Holland expect such reportage will work wonders overnight. But Holland confidently expects that this rapport between Washington’s vast Negro community and city officials will result in solutions more compatible with the views of those involved.
ON claims 123 affiliates

That's number it has lined up for April 1967 premiere of its Las Vegas show

The Overmyer Network last week released a list of 123 television stations that it said have contracted for the late-night variety show that it will originate in Las Vegas, starting next April 3.

The Overmyer list includes 24 stations in the nation's top 25 markets, and of the total number, 104 are VHF stations. The ON contract list does not cover every major market in the U. S., though 44 of the top 50 are mentioned. A number of markets was missing in the middle area below the 50th and above the 100th ranked market.

Oliver Treyz, president of ON, said the 123 stations give his network a potential of more than 46 million homes and would reach markets with about 80% of the country's viewing audience. He said that he expected that by April, ON may have as many as 140 stations clearing the program.

NBC-TV's "Tonight Show," with which the Las Vegas stanzas would compete in many markets, has an average station clearance of 187.

ABC-TV estimates its late-night Joey Bishop entry, which will also start in April of next year, will have a live clearance of approximately 110 stations covering 85% of U. S. TV households. ABC's program will originate in Hollywood, will be in color and will be taped before it goes on the air (11:30 p.m.-1 a.m. N.Y.T.). It has a full sponsor lineup: Bristol-Myers, General Foods, International Latex and Pepsi-Cola, all through Young & Rubicam, and P. Lorillard, through Grey.

CBS-TV intends to begin late-night

Since this ad was written, WBEN-TV has won the first award given by the New York State Broadcasters Assn. for excellence in public service programming upstate.

babies ... blight ... schussboomers and booming vacationland

WBEN-TV public service cameras document the Western New York scene.

Buffalo’s nationally-famous Children’s Hospital, sub-standard housing conditions in Negro ghettos, Western New York’s thriving ski industry, and the Kinzua Dam that will soon change the geography of the state’s Southern Tier — all make timely subjects for WBEN-TV documentaries. And they make fine and informative television fare.

These are just some of the recent television documentaries that the WBEN-TV News Department has put together for the enlightenment and enjoyment of our viewers. Nothing of newsworthiness or importance is out of range of the experienced hands that guide the cameras or create the continuity.

Public Service programming of this kind has been a continuing policy of our station since sign-on in 1948. It makes for an informed citizenry and a loyal audience that recognizes and appreciates the scope, effort, and efficacy of WBEN-TV’s special television news features.

It also is one of the important reasons why Channel 4 consistently delivers the largest audience to its advertisers—an audience of quality, for quality products.
ETV's plan for network

Expect gradual interconnection to become nationwide

Noncommercial television may be about to break out into broadcasting on a national network basis. It has been working for nearly 15 years on interconnection, "our highest priority," according to Gerald L. Appy, field services director of National Educational Television.

Now Mr. Appy looks toward "occasional interconnection of 35 to 38 stations that could carry special programs to a total lineup of 70 to 75 stations early next year. For 1968, we are hoping for permanent interconnection on the minimum eight-hour basis."

"That's for futures, but already last summer four major market ETV stations (WBGR-TV Boston, WNDT-TV New York, WHYY-TV Philadelphia, and WETA-TV Washington) interconnected for a nine-week, jointly produced live public-affairs program.

The total lineup for that special effort was 11 stations in seven states. WOSH-TV is the feeder station, via the microwave facilities of the Maine State Educational Network, for the eight permanently interconnected stations of the emerging Eastern Educational Network (in Maine, New Hampshire, Connecticut and Syracuse, N. Y.).

This is an example of how state interconnection, a widespread development in ETV, has laid the basis for at least one emerging regional network, realistic plans for others, and eventual national networking.

The EEN station in Syracuse, WCYT-TV, will become important to ETV interconnection next November, when it will join four other stations in the New York State University Network. That network's 20 microwave relay towers, leased from AT&T for $278,000 a year, will make WNYT the southern-most interconnected station of the EEN. And from there, it's not so very far to Philadelphia and Washington.

The goal of EEN is interconnection over a 10-state area from the Ohio border to the Atlantic, Washington to the Canadian border and beyond to Montreal. It's undeniably ambitious, but within a year or two, it may not seem such a massive undertaking.

Weak Point - Maryland is the one weak link in EEN's projected network. It is not used by neighboring stations, as is New Jersey by New York and Philadelphia. And it will not have interconnected ETV stations on the air next year. But the Maryland general assembly this year passed a $5-million appropriation for the construction of seven interconnected stations, fed from Baltimore.

Dr. Frederick Breitenfeld Jr., a former associate director of the TV stations division of the National Association of Educational Broadcasters, is executive director of the Maryland Cultural-Educational Television Commission. This is how he describes the Maryland project:

"We'll be based in Baltimore with a 50,000-square-foot production center, feeding six relay and recording stations with limited production capability, but we'll also use facilities of Baltimore Junior College's new plant, and the Hagerstown project—that's a 10-year-old center for closed-circuit TV instruction, with 30 teachers working fulltime developing programs regularly incorporated into the Maryland public school curriculum. Of course, we'll include community service programing in the effort, and professional instruction and so on."

Bundy Bird - Dr. Breitenfeld emphasizes the cost of interconnection for an ETV with already limited resources. "One of the seven states I wrote up in a report at the NAEB spent a million dollars. But it's a prerequisite for real quality. That's what's so exciting about the Ford Foundation's 'Bundy Bird.'"

The reference is to the proposal by Ford Foundation President McGeorge Bundy envisioning free satellite interconnection and subsidy for noncommercial television. Hearings on the proposal before Senator John O. Pastore's (D-R.I.) Communications Subcommittee in August were carried on last summer's eastern ETV interconnection.

Another regional network, in the Midwest, is still in the planning stage. It would comprise already interconnected stations in Minnesota (2) and Nebraska (4) and stations in Iowa and North and South Dakota.

A third western network is in the talking stage, according to Mr. Appy. It probably would comprise California, where San Francisco is already connected with Sacramento and Redding and Los Angeles with San Bernardino and within nine months with San Diego; Nevada, where the Las Vegas station is planning to interconnect with Los Angeles; Oregon, where Portland is connected with Corvallis and will pick up Medford next year; and Washington, where Seattle and Yakima are already connected.

States at the level of connection within the state itself but with no present plans for interstate connection are Alabama, the first state network in the country (six stations), North and South Carolina, Georgia, Florida, Oklahoma and Hawaii. Illinois and Kentucky are planning interconnection within two years; Tennessee within three.

Relay for translators OK'd

The FCC last week amended its rules to enable licensees of TV translators to use frequencies in the 2000 mc microwave band for the relay of TV station signals to translators.

The use of these frequencies will permit the relay of TV signals to locations that cannot receive such signals directly because of terrain or distance factors, the commission said.

44 (THE MEDIA)

BROADCASTING, DECEMBER 5, 1966
Announcing...
for color and black and white, the new family of RCA image orthicons with a big difference here that shows up big here

Now RCA brings you the "BIALKALI PHOTOCATHODE" in the new RCA-8673 and -8674 Image Orthicons. This major engineering innovation has greatly improved compatibility with its non-stick target, maintaining resolution and sensitivity over an extended tube lifetime and improving performance of existing color or black-and-white cameras. A simple change in a resistor chain provides proper voltages for a trio of these new Bialkali Photocathode Tubes. Wide-range, the 8673 and 8674 fit spectral requirements of all three channels...eliminating the need for another tube type for the blue channel.

Another big difference: the re-designed image section provides reduced distortion and freedom from "ghosts." These new tubes are available singly or as matched sets—a trio of 8673/S or 8674/S types for color service...types 8673 and 8674 for black and white. Main construction difference is in the target-to-mesh spacing. The closer-spaced 8673 enhances S/N ratio for quality performance under sufficient illumination. The 8674 has greater sensitivity under limited illumination. For complete information about the new RCA Bialkali Photocathode Image Orthicons, ask your RCA Broadcast Tube Distributor.

RCA Electronic Components and Devices, Harrison, N.J.

CATV told to stop 3 systems

Black Mountain FCC move based on refusal to notify nearby stations

The FCC last Wednesday (Nov. 30) ordered a CATV to stop the operation of its three Pennsylvania systems within two days of the release of the order because of violations of the commission rule that requires notification of local stations of incipient CATV operations.

The commission told Back Mountain Telecable Inc., which operates systems in Dallas, Pennsylvania, all Pennsylvania, to stop carriage to the three communities until 30 days after the CATV notifies all TV stations within whose grade B contours its systems lie that it is beginning operations, as required by the rules.

Back Mountain was the object of a show-cause order last September because of its refusal to notify such stations of its operational plans (Broadcasting, Sept. 12).

The commission also said Back Mountain violated the CATV top-100 rule which requires systems to obtain FCC permission in a hearing before carrying signals beyond their grade B contour into any of the top markets.

Back Mountain was ordered to stop importing the distant signals of WNEW-TV, WOR-TV and WPIX-TV, all New York, and KTWO-TV and WPIL-TV, both Philadelphia. The three Pennsylvania communities served by Back Mountain and specified in the order are part of the WVIA-TV, WBEH-TV, WDAU-TV and WNEP-TV, all Scranton-Wilkes-Barre, Pa., TV market which ranks 70th. Back Mountain also carries WNEP-TV Binghamton, N. Y., on its systems.

The CATV was also told not to begin carrying the signals of WPIL-TV, WIBF-TV and WWSB-TV, all Philadelphia.

The order, as in past cease-and-desist orders affecting CATV’s, provides for an automatic 14-day stay of its effectiveness to permit Back Mountain to seek judicial review. The order would then be stayed for another 35 days or until the court action on the request for a stay, whichever comes first.

No Oral Arguments • One new twist the FCC faced in the Back Mountain case was the joint demand by the CATV and Kingston township for an oral argument before the commission en banc. The contestants claimed that due process of law requires such an argument on the constitutional questions raised by the issuance of a cease and desist order. The commission denied this request last week, however, stating that “no purpose would be served by oral argument.” Commissioner Lee Loewinger, in a dissenting statement in which Commissioner Nicholas Johnson joined, said that “to refuse to hear or consider constitutional objections to the action being taken seems to me to be arbitrary and unreasonable.”

The commission order, prepared under the direction of Commissioner Robert E. Lee, was adopted on a 4-2 vote, with Chairman Rosel H. Hyde and Commissioners Kenneth A. Cox and James J. Wadsworth forming the majority. Commissioner Robert T. Bartley was absent.

In other actions the commission:
• Granted request by Shelburne Falls Community Antenna Service Inc., operator of CATV’s at Shelburne Falls and Buckland, both Massachusetts, for time extension to Feb. 1, 1967, to enable it to finish expansion from five to 12 channel capacity.
• Denied petition filed by Cape Fear Telecasting Inc., licensee of WMYT-TV Wilmington, N. C., requesting 14-day nonduplication protection for its programming carried by CATV’s serving the Wilmington area.
• Denied petitions for waiver of the nonduplication rule filed by Ohio Cablevision Inc., CATV operator in Findlay, Ohio; Transwestern Video Inc., operator of CATV’s in Poteau and Heavener, both Oklahoma, and Mount Cities TV Cable Inc., CATV operator in Mount Pleasant, Tex.
• Denied request for waiver of the local station carriage requirement filed by Salina Cable TV Systems Inc., operator of a CATV in Salina, Kan.

Boston area UHF to resume this month

Silent since 1956, WXHR-TV (ch. 56) Cambridge-Boston will go back on the air later this month as WGBK-TV. (A request for those call letters is before the FCC.) The station, now owned by WGBK Inc. (Kaiser Broadcasting-Boston Globe), is aiming for a Dec. 19 target date. WGBK Inc. purchased WXHR-AM-FM-TV from Harvard Radio Laboratories for $1.75 million (Broadcasting, Oct. 24).

James T. Lynagh, formerly with Kaiser’s WKBG-TV Detroit and WKBG-TV Burlington, N. J.-Philadelphia, is manager of the Boston UHF, Broadcast Communications Group will rep the station and the top hourly rate will be $1,000.

Mr. Lynagh said he has had “good advertiser response” to planned programming, which will accent sports and films. WGBK-TV will carry 23 road games of the Boston Bruins hockey team and 22 road games of the Boston Celtics basketball team.

Operating from temporary studios on Brookline Avenue, the station is returning to the air with a $1.5 million RCA equipment package including a 55 kw transmitter, color-film chains and color video-tape recorders. It is expecting two live color cameras later this month, and three more cameras and a mobile unit next spring.

6 CATV’s backed for Philadelphia

Philadelphia, fourth largest of the top 100 markets, has officially opened its doors to CATV. Orders favorable out of the special city council committee on law and government, established in 1964 to study the CATV problem, have awarded six nonexclusive 10-year franchises to Philadelphia-based firms subject to final approval of the council.

Terms of the franchises permit not only CATV but closed circuit (local origination) and pay TV systems as well. In addition, companies must pay the city 5% of their gross receipts; must provide free CATV service to police stations, fire houses, city-owned hospitals, and all elementary and secondary schools for educational purposes; must not engage in TV repair services, and must not transmit to Philadelphia residents blacked-out local telecasts of sports events.

Wards Assigned • Under the provisions of the franchises the city’s 66 wards will be divided among the six companies as follows: Triangle Publications Inc.—wards 23, 33, 35, 53, 54, 56, 58, 63 (western portion of northern Pennsylvania on the west); Jerrold Corp.—wards 1, 2, 5, 7, 14, 18, 19, 20, 31, 37, 39, 43 (east of Broad Street and south of Huntingtown).
Radio code down 21, TV code loses one

The National Association of Broadcasters radio code had a net loss of 21 stations between Sept. 15 and Oct. 15, as 41 stations withdrew and 20 stations joined. In the same period, one station — KCFT-TV Concord, Calif. — withdrew from the TV code.

Radio withdrawals: WBIB Centreville, Ala.; KHER Santa Marta, KNEW Oakland and KFLY Crescent City, all California; WBAR Bartow and WWCF Orlando, both Florida; WBHH Fitzgerald, WBJL Dalton, WBWMK-AM-FM West Point, WFFM Fort Valley, WHEE Griffin, WISK Americus, WKEU-AM-FM Griffin, WLBH Cartollton, WLPJ Jesup, WSNE Cumming and WTRP La Grange, all Georgia; KNBY Marysville, Kan.; WMTL Leitchfield, Ky.; KLUV Haynesville, La.; KCMG Columbia, Mo.; KVHR Holdrege, Neb.; WMID Atlantic City; KSAT Roswell, N.M.; WWOK Charlotte and WISP Kinston, both North Carolina; KALA Alva, Okla.; KQIK Lakeview and KJMM Portland, both Oregon; WPAB Ponce, P.R.; WJSO Jonesboro, Tenn.; KCAD Abilene and KFPN Bonham, both Texas; KBCB Centerville, Utah; WHLF-AM-FM South Boston and WHPL-AM-FM Winchester, both Virginia; WVLR(FM) Sauk City, Wis.

More support for ETV bird

Science and arts groups hit TV programming while supporting satellite plan

Two government-financed foundations devoted to science and the arts urged the FCC last week to authorize the use of domestic communications satellites to meet the nation's needs in education, cultural programs and public information. In the process, they leveled a sharp blast at the commercial networks.

The National Science Foundation and the National Foundation on the Arts and Humanities expressed their views in response to the commission's inquiry into the question of whether nongovernmental entities should, or legally can, be authorized to own and operate private communications satellites.

The foundations, both independent government agencies funded by Con-

Skills Bank orientation meetings begin

Broadcasters, civic leaders and government officials met in Washington last week in an orientation session that is being repeated in 11 other cities. The session was designed to acquaint the industry with the Broadcast Skills Bank program.

Created in August 1964, the program is a cooperative venture of ABC, CBS, NBC, Westinghouse Broadcasting Co. and the Urban League to help members of minority groups—primarily Negroes—get into broadcasting. Its four main areas of concentration and development are inventory and employment, parttime employment, additional training and scholarships.

At the Washington session, the plan was lauded by Vice President Hubert Humphrey, who commended the broadcasters for their "cooperative initiative and creative ingenuity in providing more job opportunities for Negroes and other minorities . . . [you] have set an outstanding example of businessmen developing imaginative new approaches and using your own resources in meeting our nation's problems. I am hopeful the resourceful leadership of the radio-television industry will be followed by other industries . . .

Taking part in the Washington meeting were (l-r): Joseph Goodfellow, vice president and general manager of WRC-AM-FM-TV Washington, chairman of the Washington program; Sterling Tucker, executive director of the Urban League, Washington; Donald McGannon, president of Westinghouse Broadcasting, chairman of the bank's advisory committee; Vincent Wasilewski, president of the National Association of Broadcasters, and FCC Chairman Rosel Hyde.
gess to support research and education in science and the arts and humanities, confined their position to endorsing the idea of a domestic satellite system that would distribute programs in those fields at economical rates to all areas of the country.

They didn't endorse any pending proposals, including that of the Ford Foundation for a corporation to service the commercial networks and turn its profits over to educational television. And they took no position on whether nongovernmental agencies should be permitted to build and operate a domestic satellite for private purposes.

Not for Themselves • The foundations made clear they are not interested in establishing a system of their own. And they expressed no views on what kind of organization should be created to provide the type of service they feel is necessary—or on how it would be financed.

Their concern is in seeing the establishment of a system that would "distribute high quality programs in arts, humanities and sciences at economical rates to remote areas of the nation, where educational and cultural opportunities are minimal."

Commercial programing, they said, doesn't satisfy the nation's needs in the educational and cultural fields. "The commercial networks schedule few educational and public information programs in relation to available broadcast time, and these few are almost never shown during the evening from seven to midnight," they said.

"The frequent commercials are often tasteless and always distracting. Programs with scientific, historical and cultural content are often bland or over-simplified. Complex subjects are either not covered at all or are given such cursory or superficial treatment as to deprive them of educational value or cultural merit."

The foundations conceded that educational television often suffered from "dullness and awkwardness." But they said this resulted at least in part from a bottleneck in the distribution of ETV programming. A communications-satellite system, they said, could break the bottleneck, and open up a "wide panorama of high quality subject matter to the nation at large."

---

**Did n't say it, Hyde says**

FCC Chairman Rosel H. Hyde last week denied a published report indicating he had made up his mind—and in the negative—about the Ford Foundation proposal in the commission's proceeding concerning the establishment of domestic communications satellite systems.

The report, apparently based on an interview with the chairman, said he is opposed to the idea of a nonprofit satellite system that would serve the commercial networks and make its profits available to aid educational television.

"I did not make such a statement," he said. "It would be inappropriate for me to form an opinion on any ideas being submitted in the inquiry."

---

**Changing hands . . .**

**ANNOUNCED** • The following station sales were reported last week subject to FCC approval:

- **WLKW Providence, R. I.:** Sold by Harry Pinkerson and group to Alexander M. Tanger for $530,000. Mr. Tanger is former vice president and director of WGBM, Boston. Mowry Lowe, general manager of the station, will continue in that capacity. The five-year-old 50 kw WLKW operates daytime only on 990 kc. Broker: Edwin Tornberg & Co.

- **KTAN Tucson, Ariz.:** Sold by Harry B. Chambers to John B. Walton for $300,000. Mr. Walton, a group owner, owns 50 kw daytimer KFIF (on 1550 kc) in Tucson, which he is donating to the University of Arizona. Mr. Chambers is remaining as a consultant. KTAN began operating in 1947, is full-time on 580 kc with 5 kw. Broker: R. C. Crisler & Co.

- **KFFS Texarkana, Tex.:** Sold by William R. McDaniel and associates to Hugh D. Frizzell and group for $155,000. Mr. Frizzell was formerly associated with WHBQ Memphis. KFFS, founded 20 years ago, operates full-time on 1400 kc with 250 w. Broker: Hamilton-Lands & Associates.

- **WWCT(AM) Philadelphia:** Construction permit sold by Bernard Rappaport to Seven Arts Broadcasting Co. for out-of-pocket expenditures totaling about $12,000. Mr. Rappaport was granted a CP for channel 23 in 1961. Earlier this year he asked the FCC for permission to sell it to Edwin Cooperstein and others, owners of WTVY-Lindenhurst, N. J. (ch. 47) but this was dismissed at the request of the applicant early last month. Seven Arts Broadcasting is a wholly owned subsidiary of Seven Arts Associates, New York, TV film syndicator. Seven Arts Associates is owned by Seven Arts Associates Ltd., Toronto, which recently acquired a one-third interest in Warner Brothers Pictures Corp., from
Jack L. Warner (Broadcasting, Nov. 21). This is Seven Arts' first move into station ownership. It plans to acquire other stations.

APPROVED • The following transfers of station interests were approved by the FCC last week (For other commission activities see For The Record, p. 82).

- WWL-AM-FM Fort Lauderdale, Fla.: Sold by William A. Roberts and family to Lorin E. Miller and Van George Patrick for $350,000 with agreement not to compete. Mr. Miller is former 25% owner of WTAL Flint, Mich., and also had 25% interest in KSO Des Moines. Mr. Patrick is director of sports for MBS. Both also hold minority interests in WYNR-AM-FM Dearborn, Mich, WWIL, 11 years old, operates on 1590 kc with 10 kw day, 5 kw night. WWIL-FM is seven years old, operates on 103.5 mc with 33 kw.

KCII wasn't sold; or was it?

KCII Washington, Iowa, has not been sold, George J. Volger, president and majority stockholder, said last week. He said the sale announcement (Broadcasting, Nov. 14) was in error. "KCII has not changed hands," he stated.

The sale report was furnished to Broadcasting by Blackburn & Co., station brokers. James W. Blackburn, president of the brokerage firm, said last week that he has a signed contract for the sale of the 500 w daytimer (on 1380 kc) to Dick Jones for $95,000.

Half of CATV system sold

The sale of a 50% interest in Consolidated Cable Systems Inc., owned by Spencer-Kennedy Laboratories Inc., Boston, to Boston Capital Corp., that city, for over $500,000, subject to adjustments, was announced last week.

Consolidated Cable Systems operates CATV systems in Lafayette, Danville, Alamo, Moraga and Rheem, all California, and Blackwell and Tonkawa, both Oklahoma, serving 7,100 subscribers. The various systems have a potential of 25,000 subscribers, the announcement said.

Boston Capital, with net assets of more than $20 million, is a small-business investment company. This marks its fifth investment in the CATV field. Present CATV interests: half-owner, with Time-Life Broadcasters Inc., in Newburgh and Poughkeepsie, N. Y.; minority in Beacon, N. Y.; minority in Continental Cablevision Inc. (Tiffin and Fostoria, Ohio; Quincy, Ill., and Keokuk, Iowa).

Malarkey, Taylor & Associates, Washington, acted as consultants in arranging the transaction and have been retained to manage the systems, it was also announced.

Nelson gets back into ABC-ITT act

Senator Gaylord Nelson (D-Wis.), the leading congressional objector to immediate FCC approval of the proposed ABC-International Telephone & Telegraph merger, last week took issue with ITT's assurance that it would not disturb the editorial integrity of ABC's news operation if the union is approved.

In a letter to FCC Chairman Rosel H. Hyde, Senator Nelson said "such promises, even though offered with the best intentions, offer no protection whatever to the public interest . . . there is no basis for believing that such a voluntary policy would be everlasting."

ITT recently sought to reassure the commission that ABC's news policy would not be affected by the network's acquisition by the large diversified firm. Congressional critics of the merger have challenged the marriage on these grounds, citing the fact that ITT is in a sensitive position because of its large overseas dealings and extensive operations with the U. S. government.

Admits It • Senator Nelson wrote Chairman Hyde that by offering these assurances ITT confirmed the validity of the original argument. "While admitting that it would have this power, ITT seeks to dispose of this concern merely by promising that it will never use this power," he continued. "It is unrealistic to assume that news department employees of ABC would be so reckless as to plunge into public controversies with the knowledge that they would be damaging the economic interests of their parent corporation—and risking their jobs—by doing so."

He used the example of General Motors efforts to stifle criticism of the auto industry by author Ralph Nader to illustrate the possible restriction that might confront a news agency owned by an industrial giant embroiled in a controversy. If General Motors had owned a TV network, Senator Nelson inquired, "do you think General Motors would put Ralph Nader on television at the same time that it was..."
trying to silence him?

"We are about to make a crucial decision for the future of independent broadcasting in America," he cautioned the FCC. If the commission rules in favor of the merger without the assurance the public interest in independent broadcasting will be preserved, then it would be possible for large industrial complexes to acquire American radio and television networks. "We will then be in a position where three giant corporations, with worldwide economic entanglements, will control the most important source of news."

**Court dismisses CATV franchise suit**

A Macon county, Ill., judge last week dismissed a suit contesting the legality of these CATV franchising ordinances. In rendering a "no equity" decision, Judge Frederick Green ruled that Illinois Broadcasting's WSOY-AM-FM has no complaint unless the city of Decatur, Ill., either requires the stations to be licensed or charges them with violating the ordinance.

According to Merrill Lindsay, president of Illinois Broadcasting, the judge has directed the city to clarify the CATV ordinances with a decree.

The legal problem arose in September 1965, when the city passed ordinances that prohibited CATV operations without a license and stated exacting terms for the granting of licenses for the right to string cable over the city streets. Illinois Broadcasting at times runs cable to connect its mobile unit with the station while covering local events. The radio stations' suit maintained that the city's ordinances were unclear and could be interpreted to apply to their activities.

**WDXI-TV switches to fulltime ABC-TV**

WDXI-TV Jackson, Tenn., a CBS-TV basic affiliate, will change affiliations to become an ABC-TV primary next month. CBS acknowledged last week its contract with WDXI-TV has been terminated by mutual agreement and noted that WREC-TV Memphis would continue as its basic affiliate in the general area. ABC said the new affiliation with WDXI-TV, which had been associated with CBS since March 1965 (though also carrying some ABC programing as a secondary), will open the Jackson area for the first time to the full ABC schedule of news, public affairs, entertainment and sports programing. WDXI-TV operates on channel 7. Cy N. Bahakel is president and owner.

At the signing were: Thomas W. Moore, group vice president and president of ABC-TV (seated); and (l to r) John O. Gilbert, vice president for affiliate relations; Carmine F. Patti, director of TV station relations; and Cy N. Bahakel, president and owner of WDXI-TV.

**Commercial AM to finance educational FM**

A St. Louis educational organization, blessed with unusual financial and promotional support from a local commercial broadcaster, has asked the FCC for approval to construct and operate an educational FM outlet in that city.

In its application for FM channel 271 on 88.1 mc, the St. Louis Educational Assistance Fund last week referred to KATZ, a Negro-oriented St. Louis station, as the "catalyst" for the project.

In a statement filed with the application KATZ said it would take the "unusual" steps of building the station and also providing staff and clerical help until the fund receives sufficient financial support from other sources. SLEAF is a nonprofit corporation formed in 1961 to provide assistance to underprivileged people in the St. Louis area.

KATZ also said that the proposed FM outlet could use its studios and offices to keep initial costs at a minimum. "KATZ will use its own AM facilities and its advertising schedules in other media to publicize and promote the work of the educational FM station," the broadcaster said.

The major goal of the FM's proposed educational programing, which would be directed primarily to the Negro population of St. Louis, is "to provide help at the level where help is needed most," SLEAF said.

**New rules for auxiliary ID's**

The FCC rules governing station identification for television auxiliary stations (TV pickups, studio transmitter links and intercity relays) were amended last week, the commission announced.

The FCC stated that such stations may now identify themselves by using the call signs of either the TV auxiliary, the TV station to which they are licensed or the TV station whose signals they are relaying.
Now there is . . .

- A measure of modern radio’s full advertising value, and only ARB provides it!

Significant advertising advantages of modern radio have been lost to media planners by the lack of valid methods of measuring some of the medium’s most important characteristics—its undeniable mobility, its personal identification with its listeners, and its ability to penetrate audience perception even though that audience may also be involved in other activity.

Today’s ARB radio audience measurement has been designed with these characteristics in mind to provide media planners with the full dimension of radio’s advertising activities.

Our personal radio diary allows ARB to follow one person throughout the survey period to provide important measures of individual listening activity, wherever and whenever it occurs. And, the totality of involvement is limited only by the diary-keeper’s judgment of his own radio exposure deemed significant enough to record.

These ARB advantages coupled with the finest technology available to obtain the greatest possible sampling precision, truly reflect radio as it is today . . . now in 30 U.S. markets and soon nationwide.

AMERICAN RESEARCH BUREAU
SUBSIDIARY OF C-E-I-R INC.
NOW THERE IS . . .

... AN INFORMATION SYSTEM GEARED TO THE UNIQUE BUYING PROBLEMS OF RADIO ... AND ONLY ARB PROVIDES IT.

BUYING RADIO ON LITTLE MORE THAN AN ESTIMATE OF METRO AREA AVERAGE IN-HOME AUDIENCE SIZE IS NO LONGER PRACTICAL OR NECESSARY. TODAY'S RADIO BUYER DEMANDS, AND NOW RECEIVES, MORE DEFINITIVE ANSWERS TO QUESTIONS SUCH AS THESE:

1. WHAT STATIONS DURING WHICH TIME PERIODS OFFER THE GREATEST AVERAGE AUDIENCE AMONG MY SPECIFIC TARGET GROUP?
2. WHAT STATIONS DURING WHICH TIME PERIODS OFFER THE GREATEST CUMULATIVE AUDIENCE AMONG THIS TARGET GROUP?
3. WHAT NEW AUDIENCE WILL I ADD WITH THE ADDITION OF ANOTHER STATION THAT I AM NOT ALREADY REACHING WITH MY BASIC BUY ON A GIVEN STATION?
4. WHAT NEW AUDIENCE WILL I ADD WITH THE ADDITION OF ANOTHER DAY-PART THAT I AM NOT ALREADY REACHING WITH MY BASIC BUY ON A GIVEN STATION?

THE NEW ARB RADIO AUDIENCE REPORTS ANSWER THESE QUESTIONS AND MANY MORE—WITH METRO AND TOTAL MARKET AREA DATA FOR BOTH AM AND FM STATIONS BY TWELVE DIFFERENT LISTENER CATEGORIES AND EIGHTEEN DAY-PARTS, INCLUDING DRIVE-TIMES, SEPARATE AND COMBINED. AVERAGE AUDIENCE ESTIMATES, CUMULATIVE ESTIMATES AND THREE NEW SECTIONS, NEVER REGULARLY REPORTED BY ANYONE, MAKE UP THE COMPLETE ARB REPORT. THE NEW EXCLUSIVE CUME SECTIONS SHOW YOU HOW MUCH NEW AUDIENCE YOU ADD BY THE ADDITION OF ANOTHER STATION OR ANOTHER DAY-PART.

WE COULD GO ON TO INCLUDE OUR ESTIMATES OF AWAY-FROM-HOME LISTENING DURING DRIVE-TIMES, AND MORE. BUT, PERHAPS WE HAVE MADE OUR POINT. NOT ENOUGH INFORMATION? NOW THERE IS!
A RADIO AUDIENCE MEASUREMENT SERVICE SO COMPLETE THAT ONLY ARB COMPUTER FACILITIES CAN PROVIDE IT!

ONE LOOK AT THE NEW ARB RADIO AUDIENCE REPORTS WILL CONVINCE YOU THAT THIS IS NO SLIDE RULE AND ABACUS PRODUCT. IN FACT, IT TOOK MONTHS OF COMPUTER PROGRAMMING AND NUMEROUS TRIAL RUNS ON OUR BIG 7090/1401 COMPLEX TO WORK OUT SUCH THINGS AS THE EXCLUSIVE CUME COMBINATIONS BY STATION AND DAY-PART FOR TWELVE DIFFERENT DEMOGRAPHIC GROUPS YOU NOW FIND IN EVERY ARB RADIO AUDIENCE REPORT. BUT, WITH SOME OF THE BEST COMPUTER KNOW-HOW IN THE WORLD ON OUR ARB/CEIR TEAM, WE KNEW WE COULD DO IT. AND, WE DID.

WE RELY HEAVILY ON OUR COMPUTERS. THEY ASSURE US OF A DEGREE OF ACCURACY AND SPEED THAT HAND TABULATION COULD NEVER PROVIDE. THIS IS WHY WE USE COMPUTERS FOR NEARLY EVERY PHASE OF OUR OPERATION, NOT JUST IN THE TABULATION OF ARB REPORTS.

THE ARB SAMPLE IS SELECTED BY COMPUTER. AN INTRICATE SERIES OF QUALITY CONTROLS THAT INCLUDES 41 DIFFERENT LOGIC CHECKS IS BUILT INTO OUR COMPUTER PROCESSING SYSTEM. AND SPECIAL TABS? YOU SHOULD SEE HOW THOSE WE HAVE STANDARDIZED ARE TURNED OUT WITH LIGHTNING-FAST SPEED AND RELIABILITY.

NOW, AS GOOD AS THEY ARE, OUR COMPUTERS WILL NEVER BE MORE IMPORTANT THAN THE KNOWLEDGEABLE ARB PEOPLE WHO WORK WITH THEM. BUT, WHEN YOU'RE THINKING ABOUT RADIO AND ALL THE INFORMATION YOU NEED TO DO AN ADEQUATE JOB OF PLANNING IT, AND BUYING IT, OR SELLING IT, DON'T YOU WISH THERE HAD ALWAYS BEEN A FIRM LIKE ARB WITH THE CAPABILITY TO PROVIDE IT? NOW THERE IS!
... A RADIO AUDIENCE COVERAGE STUDY USING THE SAME MEASUREMENT TECHNIQUE AS THAT USED IN MARKET SURVEYS OF LISTENING ... AND ONLY ARB IS DOING IT.

WHY IS IT SOME FEEL THAT A LESSER MEASUREMENT TECHNIQUE CAN BE USED FOR ESTIMATING STATION CIRCULATION THAN THAT WHICH IS USED FOR LISTENING ESTIMATES IN A MARKET REPORT?

NOT ARB! WE THINK RADIO COVERAGE IS MIGHTY IMPORTANT ... IMPORTANT ENOUGH TO BUILD OUR BIG NATIONWIDE COUNTY-BY-COUNTY STUDY SCHEDULED FOR NEXT SPRING ON THE SAME MEASUREMENT VEHICLE WE USE FOR OUR RADIO MARKET REPORTS—THE INDIVIDUAL RADIO DIARY.

YOU SHOULD BE LOOKING INTO ARB'S RADIO COVERAGE/67. YOU'LL FIND WE'RE MEASURING EVERY COUNTY IN THE COUNTRY INDIVIDUALLY, WITHOUT CLUSTERS, TO MAKE SURE EVERY STATION RECEIVES PROPER CREDIT. WITHIN EACH COUNTY OUR BLANKET SAMPLING WILL PROVIDE A GREATER OPPORTUNITY FOR MEASUREMENT OF THOSE STATIONS WHICH COVER ONLY PORTIONS OF A COUNTY. AND, THE INFORMATION TO BE PROVIDED IS A COMPLETE STORY IN ITSELF.

FORTY-EIGHT STATE REPORTS WILL HOUSE RADIO CIRCULATION DATA ON EVERY COUNTY WITHIN EACH STATE (EXCEPTING ALASKA AND HAWAII). A SECOND SET OF STATE REPORTS WILL PROVIDE CIRCULATION BY STATION DELINEATED BY COUNTY. IN ADDITION TO NET WEEKLY CIRCULATION, STATION SHARES OF TOTAL COUNTY LISTENING HOURS AND COUNTY SHARES OF STATION LISTENING HOURS WILL BE REPORTED BY SEVEN DAY-PARTS AND FOUR AGE/SEX BREAKDOWNS FOR EVERY AM & FM STATION MEETING THE MINIMUM REPORTING STANDARD. SEE YOUR ARB REPRESENTATIVE FOR FURTHER DETAILS.

THERE NEVER WAS A RADIO COVERAGE STUDY SO COMPLETE — SO USEFUL. BUT, NOW THERE IS!
Land-mobile jam eased slightly

FCC reduces some channel widths in 450-470 mc region, starts rulemakings for splits that could affect remotes

The FCC, under increasing pressure from land-mobile radio users and their allies on Capitol Hill, continued last week its effort to find ways of easing the radio-spectrum shortage plaguing land-mobile radio. Inevitably, broadcast frequencies were involved in commission discussions and actions.

The commission issued two notices of proposed rulemaking, one of them affecting frequency space now available for aural broadcasts by remote pickup stations, the other reducing channel width in a common-carrier band. It also adopted an order splitting channel assignments in the 450-470 mc band for land-mobile services.

But these steps are only partial solutions at best. And the commission instructed the staff to continue studying the host of ideas that have been collected since May, when Chairman Rosel H. Hyde ordered an intensive effort to solve the spectrum problem.

Commission thinking on the proposals has not jelled, and until it does officials are reluctant to discuss any plans for fear of calling attention to any proposal that may be out of proportion to its worth. "We're considering all kinds of ideas, including obviously kooky ones," said one official. Consideration, he said, doesn't mean endorsement.

It's known, however, that two proposals in the pot involve land-mobile radio use of frequency space now allocated to UHF television.

Channel-Splitting * The rulemaking of particular interest to broadcasters that was issued last week proposes the allocation of two half-megacycle segments of spectrum space to land-mobile radio services. This would be accomplished by splitting the frequencies (from 100 kc to 50 kc) in both the 450-451 mc and 455-456 mc bands which are now used for radio broadcasts and the voice portion of telecasts, by remote pickup units.

The channel splitting would leave the same number of channels—20—available for broadcast purposes, while 20 new channels would be made available for land-mobile radio. But the commission has invited comment on whether the splitting would impair the present quality of service.

The two proposals said to be under consideration that would affect the UHF-TV portion of the spectrum are more sweeping than that involved in the rulemaking. One suggests the reallocation of UHF's top 14 channels—70 through 83—to land mobile for limited use within certain metropolitan areas. Commission engineers feel this might be accomplished without undue disruption of TV service. (The channels now are used primarily for translators.)

However, they say that more research is needed before recommendation can be made.

The other proposal—frequently advanced by land-mobile radio representatives—looks to a sharing of the seven lowest UHF channels with land-mobile services. Here, again, additional studies are said to be needed before the commission could decide whether to institute a formal rulemaking proceeding or consider setting up a test.

Commission members were said to be cool to that proposal, on the ground it would disrupt a large number of existing assignments. Some staffers, however, favor it, contending the equipment costs for land-mobile radio users on the lower UHF channels would be less than on the higher ones. The commission has asked for a study of comparative equipment costs.

More Likely Prospect * However, one proposal said to have more support among key staffers than those affecting the UHF channels is one which would look to commission abandonment—or modification—of its policy of allocating frequencies to various land-mobile services in blocks. Under the proposal, a pool arrangement would be established, under which land-mobile frequencies could be shared among various groups of users.

This idea was advanced by a government-industry Advisory Committee for the Land Mobile Radio Services, which is headed by Commissioner Kenneth A. Cox and which is expected to have a considerable impact on commission policy in the area.

The committee, which has been studying means of squeezing additional use out of the spectrum space allocated to land-mobile radio, is scheduled to file its report in the spring. If the committee concludes that available space is simply inadequate to meet the demand,
the pressure on the commission for turning to other portions of the spectrum, including those assigned to broadcasting, will be intensified considerably.

Representatives of land-mobile radio users, in appearances at National Association of Broadcasters regional meetings in the past several months, have trumpeted their desire for spectrum space now used by broadcasters. And members of Congress, notably Representatives John D. Dingell (D-Mich.), chairman of a House Small Business subcommittee, have prodded the commission to provide relief for land-mobile radio users.

Lunch with NAM - The commissioners on Wednesday lunched with one of the most influential groups in the land-mobile field—the Telecommunications Committee of the National Association of Manufacturers. The committee was raised last week from an ad hoc to a full policy-making panel. The luncheon, a periodic event, provided an appropriate forum for Chairman Hyde to announce the actions the commission took that day to ease the spectrum shortage.

The order splitting channel assignments in the 450-470 mc band—from 50 kc to 25 kc—affects public safety, industrial and land transportation radio services and Class A stations in the citizens radio services.

The rulemaking that doesn't affect the broadcast services proposes reducing channel widths from 50 kc to 25 kc in the 450 mc bands allocated for common carrier radio services.

The commission votes on the actions were unanimous. But Commissioner Nicholas Johnson objected to a statement in the order providing for the splitting of channels in the 450-470 mc band that there is "merit" in a request for making frequencies available for land-mobile facilities for the industrial protection industry and for the airline industry.

He said that in view of the "hundreds of other unfulfilled or inadequately served uses for land mobile radio" throughout the country there is no basis for giving the two proposals "special consideration apart from competing national needs for the same resource."

He said he dissents "to the commission's expression regarding the establishment of new services in the absence of a clearly articulated explanation of the implications of such action for overall spectrum utilization in the national interest."

GE intros video-tape line

General Electric's consumer electronics division, Syracuse, N. Y., has introduced a new video-tape recorder system designed primarily for educational, business training and industrial markets. The unit, comprising a recorder, closed-circuit TV camera and 12-inch monitor, is available either as a portable, three-piece unit ($1,695) or as a mobile console ($1,995). GE first announced it would produce video-tape systems last summer (BROADCASTING, July 11).

FCC wants in too

Opposes creation of new research outfit to study the spectrum

The FCC appears less than enthusiastic about a Commerce Department-created science panel's recommendation that a high-level research organization be created within the department to study the most effective means of allocating radio spectrum space.

If any study is to be made, the commission feels it and other interested agencies should be part of it. The commission also has doubts about the wisdom of establishing an entirely new government organization.

The commission's position, expressed in a letter Chairman Rosel H. Hyde sent to Commerce Secretary John T. Connor, was not unexpected in view of statements commission members made at the time they received copies of the panel's report in October (BROADCASTING, Oct. 24).

The panel, which was assembled by Commerce in the face of growing government concern over spectrum congestion, proposed creation of a group to develop the research tools that would be used by government agencies in seeking to make the most effective use of the spectrum. The research organization would operate on an annual budget ranging from $10 million initially up to $50 million.

The panel, headed by Dr. James Hillier, RCA Laboratories, warned that serious economic consequences for the nation will result if the spectrum problem is not solved.

Chairman Hyde, in his letter, expressed commission concurrence in the need for additional study of spectrum allocation. But, it's understood, he indicated that the commission feels that the proposed research organization would lead to an unnecessary new layer of government and to needless expense. (Commissioner Nicholas Johnson is reported to have expressed some reservation concerning the commission's view of the proposed research group).

Chairman Hyde also pointed to the commission's statutory responsibility and experience in the area, and said that any spectrum-allocation study project should be designed in a manner to permit the commission to participate in its direction. He said other interested agencies, including the Office of Telecommunications Management and Defense Department, also should participate.

Spectrum Managers - Between them, OTM and the FCC are responsible for allocating the spectrum in the U. S.—the OTM for the government portion, the FCC for the rest. OTM's director, James D. O'Connell, who is also the President's adviser on communications matters, has drafted a plan for a spectrum-allocations study that would be conducted jointly by his office and the commission. Mr. O'Connell is reported to have expressed misgivings about the science panel's report also.

Commission officials privately have labeled the Commerce recommendation as unrealistic. Some are surprised that a study group could be proposed that didn't include the agencies already involved in the spectrum-management business. Others say that the estimated cost of the proposed study ($10 million in the first year) is enough to kill the project in view of the administration's continuing pressure on government agencies to hold down costs.

Commission members say they see no particular conflict between the proposed study and the commission's own plans to put additional emphasis on spectrum-allocations work. Chairman Hyde has said the commission would need additional funds for spectrum-study work it is requesting for fiscal 1968 even if the science-panel's recommendations were adopted (BROADCASTING, Nov. 14).

"We're not trying to kill off any study," said one commission spokesman. "We want to put it on an orderly basis. We want to provide some input for the study and give it direction."

Technical topics...

Remote control - Rust Corp., Cambridge, Mass., presents a new remote control system, the RC-2400, with 48 control functions plus 24 metering positions for use in remote operation of TV, AM and FM transmitters. The system contains illuminated indication of parameter selection and a two-meter system containing five scales.

Super pick-up - Electro-Voice Inc., Buchanan, Mich., has introduced a cardioid microphone, the RE15, with frequency response of 60 to 15,000 Hz, and output level at minus 55 db. Net price is $153.
ALL NEW—solid state
only 4 tubes!
GATES BC-5H, 5,000-watt
AM transmitter

It’s brand new. All new.
The Gates BC-5H offers you the lowest tube cost for any
5,000-watt AM broadcast transmitter in the industry.
Extra-low power consumption.
Engineered for easy field conversion to 10 KW.
And a design that is completely self-contained in one handsome cabinet
to conserve floor space... make installation easier and less costly.
But the best news of all, you can hear only from the transmitter
itself: a richer, fuller sound.
The all-new Gates BC-5H. Write for complete information.

A subsidiary of Harris-Intertype Corporation
Lani Bird goes commercial

Pacific relay edged into better, but still nonsynchronous orbit; week's overseas TV traffic heavy in both directions

Lani Bird, the Pacific communications satellite that just didn’t make synchronous orbit but still is usable for TV and telephone-teletype circuits from the United States to the Far East and vice versa, was to become the second commercial sky relay Saturday (Dec. 3). The first is Early Bird over the Atlantic.

The FCC last week approved the plans of the Communications Satellite Corp. to begin charging for use of the trans-Pacific spacecraft on that day.

Last Thursday (Dec. 1) Comsat engineers commanded Lani Bird to move into a better orbit for Pacific communications. The maneuver was successfully accomplished, and Lani Bird is now guaranteed to provide communications links between the U.S. and Hawaii, Japan and Australia for a maximum of eight hours a day. These hours will change from month to month, because of the difference between the earth's rotation and Lani Birds orbit (Broadcasting, Nov. 30).

Same Rates • The rates filed by Comsat for Lani Bird were the same as those filed before the launch when Lani Bird was expected to achieve synchronous orbit. Deleted from the new tariff, however, are the monthly, full-time rates that the moving spacecraft cannot provide. The charges for black-and-white TV, effective from tomorrow until Feb. 2, 1967, when Comsat presumably expects to have a synchronous Pacific satellite operating, run as follows:

Between the states of Washington and Hawaii—$1,500 for the first 10 minutes; $42 for each additional minute.

Between Comsat's ground station at Brewster Flat, Wash., and Japan, for half the circuit (U.S. to Lani Bird only)—$1,200 for the first 10 minutes; $36 for each additional minute. The rate from the satellite to the Japanese ground station is to be fixed by Japan.

Between Hawaii and Japan (for half the circuit)—$1,100 for the first 10 minutes; $30 for each additional minute.

For color TV, the charge will be 25% more.

Busy Week • Last week the three TV networks tested the wings of Lani Bird and found them strong. Millions of viewers in Japan and Okinawa saw for the first time live telescasts from the United States, and other millions in the U.S. saw live pickups from Japan.

And during the same period, millions of TV viewers in Europe saw live TV via Early Bird over the Atlantic from the United Nations in New York during the Assembly's debate on the admittance of Red China to that international body.

In the Pacific communications satellite's initial series of live TV transmissions between this country and Asia, first ABC-TV and then CBS-TV were involved in special programs beamed to Japan. NBC-TV, meanwhile, presented the first live telecast the other way, from Japan to the U.S.

Sponsored • The ABC-TV broadcast was particularly significant because Max Factor & Co. sponsored the half-hour program in Japan and Okinawa. The Los Angeles-based cosmetics manufacturer, long established in international markets, finding that it could not buy commercial time on the communications satellite, hastily filmed a three-minute institutional-type spot in Hollywood and flew it by jet airplane to Japan in time for insertion in the live telecast from the U.S. via Lani Bird. It marked the first time an American advertiser sponsored an inaugural telecast of a communications satellite. Cost to Factor for the production, transportation and time on the Japanese network was estimated at $35,000.

The Lani Bird tests involving CBS were produced under the auspices of the Tokyo Broadcasting System, which used the U.S. network's Television City facilities in Hollywood to feed two experimental programs live to 21 stations throughout Japan. The first of the programs, entitled Salute to Japan, featured special messages from such television personalities as Walter Cronkite, Miyoshi Umeki, Vic Morrow, Agnes Moorehead, Frank Sutton and June Lockhart, and included helicopter shots of Hollywood, Disneyland, the Los An-
morning which day (Nov. 27), 2:25 p.m. to 2:55 p.m., PCT, and was received at 7:25 a.m. Monday (Nov. 28) in Japan.

The second program, aired on Monday (Nov. 28) at 3:05 p.m. PST, which was then 8:05 a.m. the following morning in Tokyo, was highlighted by a television reunion between an American soldier who had stopped over in Japan en route home from Vietnam and his wife in California. Both programs, arranged by CBS Films Inc., were hosted by Michi Kawamura, the chief correspondent for the Tokyo Broadcasting System in the U.S. Miyoshi Umeki acted as co-host on the first program and performed on the second telecast.

Picture Path • Both transmissions went via land lines to the Communications Satellite Corp. facility at Brewster Flat, Wash., where they were beamed to the Lani Bird satellite in orbit over the Pacific. The satellite then relayed its signal to a receiving station outside Tokyo, which transmitted the signal by land lines to the Tokyo Broadcasting System. The second telecast was used as a live cut-in on Ohayo Nippon, a Japanese early-morning program.

The first live telecast from Asia to the U.S. via Lani Bird was shown on NBC-TV's Frank McGee Report on Sunday (Nov. 27). Welles Henagen and John Rich, NBC News correspondents, reported live from Tokyo on the program. Mr. Henagen narrated a film showing militia training of young people in Red China, while Mr. Rich reported on anti-American demonstrations in Japan. The Pacific satellite also carried two more live reports from NBC correspondents in Japan the next day. These were seen on The Huntley-Brinkley Report.

NBC-TV helped in a half-hour relay, produced by NHK (Japan Broadcasting Corp.) for its Nippon TV network, and on video tape for Fuji TV (another Japanese network). Tadamasa Hashimoto, NHK's bureau chief in New York, opened the program with a report on UN activities, film shots of New York, reports of the quintuplet birth in Pittsburgh and various scenes of Washington. A brief live segment was introduced on an American Football League game in progress from Miami. In the NBC studios, Mr. Hashimoto briefly interviewed Columbia University professor Donald Keene, who teaches Japanese literature and culture.

Sound by Cable • The video feed was linked by satellite from Brewster Flat, Wash., to Ibaraki, Japan (90 miles northeast of Tokyo). Because Ibaraki was not equipped to receive audio signals from Lani Bird, the sound portion had to be relayed by undersea cable via Hawaii, Wake Island and Guam. This complicated connection led to a 12-minute feed of wrong video signals for the cabled audio relays. By coincidence, five minutes of this video error matched with audio, resulting in seven minutes of incorrect transmission.

Tokyo received the live relay starting at 7:16 a.m. Tuesday (Nov. 29), Tokyo time.

The ABC trans-Pacific telecast was originated by KGO-TV, the TV network's owned-and-operated station in San Francisco. The program, called New Bridge to Japan, was produced for ABC International Worldvision. A half-hour, it featured a panorama of San Francisco views. It was hosted by Norie Kijima, popular Japanese personality. Also appearing on the show was Japanese singing star Izumi Yukimura, who sang "I Left My Heart in San Francisco." KGO-TV cameras and microwave equipment were placed on the roof of San Francisco's Golden Gate Yacht Club for the telecast.

Greetings • A second segment of the ABC show originated from New York's Times Square and consisted of man-on-the-street interviews conducted by Mitsuo Uda, a Japanese television correspondent in this country. The news reader that runs around what used to be the New York Times Building was shown flashing greetings to viewers in Japan.

The broadcast, not seen at all in this country, was shown live in Japan and Okinawa at 6:30 a.m. Monday (Nov. 28). It was carried by a five station network comprised of NET-TV Tokyo, Mainichi Broadcasting and stations in Osaka, Nagoya, Fukuoka and Sapporo. NET-TV and Mainichi are affiliates and members of the ABC Worldvision Network. Naha in Okinawa received the telecast via a microwave link with Japan.

Max Factor's sponsorship of the

It wasn't New Year's Eve, but Mitsuo Uda sent this view by Lani Bird to Japan from New York City's Times Square. The ABC-TV program was sponsored in Japan by Max Factor. Commercials were inserted in Tokyo.

It was a busy day for United Nations TV, as it sent two telecasts to Europe and one to Japan. Ambassador Akira Matsui, permanent Japanese representative at the UN (Il), was interviewed by T. Hashimoto of NHK.
NASA launching companion for Lani

A possible rival to the Lani Bird communications satellite looms for trans-Pacific TV traffic. It's the National Aeronautics and Space Administration's ATS-B (for applied technology satellite), scheduled for launch Tuesday (Dec. 6) by an Atlas-Agena rocket.

ATS-B, the first of five in the ATS series planned by NASA, will be capable of handling both black-and-white and color TV as well as regular communications traffic with four ground stations: Rosman, N.C.; Mojave, Calif.; Kashima, Japan, and Toodooomba, Australia. It is planned for synchronous orbit (22,300 miles above earth).

Although no specific TV experiments are planned, NASA officials said that policy permits use of the satellite by commercial companies at no cost only if there are no commercial satellite systems available.

Since Lani Bird is expected to have an eight-hour period over the Pacific during its less-than-synchronous orbit around the earth, it is possible that ATS-B might be available for special TV use during those hours when Lani Bird cannot be used for Pacific coverage.

Lani Bird was launched Oct. 26 but failed to achieve its planned synchronous orbit. It is owned and operated by the Communications Satellite Corp. for a 54-nation consortium.

The spin-stabilized, 1,550-pound ATS-B spacecraft (it'll weigh 790 pounds) will be placed into synchronous orbit over the equator at long 151 degrees west, somewhat east of Christmas Island. Because it has a 25 mc bandwidth capacity and 200 w effective radiated power, ATS-B will be able to handle both black and white and color television, as well as digital and facsimile data.

Among experiments planned for the satellite: VHJ voice communications between ground stations and airborne aircraft, photographic pictures of earth's cloud cover, relaying of weather data from the U. S. Weather Bureau to ATS-B for retransmission to automatic picture transmission (APT) stations in the U. S., Japan and Australia, and testing of an experimental electronically despun antenna using microwaves.

The spacecraft was designed and built by Hughes Aircraft Co.

broadcast came about through some fast footwork by the ABC International staff in both New York and Los Angeles. Learning on Tuesday (Nov. 22) that Lani Bird would be available for TV use, ABC International account executive Bill Hillinick in Los Angeles called Bob Bard, advertising manager of Max Factor's international division, and suggested that the cosmetics manufacturer sponsor a program of remotes. The belief at first was that Lani Bird would be available for commercial use. Told, however, by Comsat that the satellite could not be used for tests, ABC International decided that an experimental program still could be sponsored in Japan.

Sudden Commercial • Max Factor officials in Los Angeles, after talking with company representatives in Tokyo, agreed on Wednesday to sponsor the intercontinental telecast. By Friday morning, with working script in hand and Japanese talent hired, a film crew in Hollywood started shooting the Max Factor commercial. The three-minute spot featured Max Factor, president of the cosmetics company, extending greetings from his office to "all of the beautiful women of Japan." George Takei, a regular on the Star Trek series, narrated the rest of the commercial, which included exterior views of Grauman's Chinese theater and the Max Factor make-up salon.

By 6 p.m. on Friday the commercial was edited and in the can. A Japanese translation was made of Mr. Factor's message to be used as a voice over when the spot would be inserted in the live satellite telecast. Script and film print of the commercial was put on a Japan Airlines jet at 10 a.m. on Saturday. A second print—for backup purposes—was put on a Pan American plane leaving an hour later. The Japanese Airlines flight arrived in Tokyo at 6:20 p.m. Sunday, Far East Time. Network technicians in Tokyo worked on the film all that night and had it ready for insertion during the last four minutes of the Lani Bird telecast at about 7 the next morning.

The half-hour sponsorship will be billed through Dentsu Advertising Ltd., Tokyo, the agency handling the Max Factor account in Japan.

Goes Global • United Nations originations, including portions of the General Assembly debate on admission of Communist China, were relayed in two brief takes by the United Nations Television section via Early Bird satellite over the Atlantic to Europe, and by Lani Bird over the Pacific in a 41-min-

ute feed to Japan. Both European relays met with slight delays; the Japanese transmission was snagged 12 minutes in a mixup of video and sound.

Prior to this multi-use of satellite relays and its first use of Lani Bird, United Nations Television had used satellite service 17 times: 10 on Early Bird, four on Telstar and three on Relay II and Syncom II.

The first service to Europe last Monday, ordered by the European Broadcasting Union (Eurovision), featured live excerpts of the afternoon session and portions of the morning talks on tape (edited by Sports Network Inc.). The Atlantic relay (3:46-3:58 p.m., EST) went by land lines to The Communications Satellite Corp.'s earth station in Andover, Me., and was linked by satellite. A seven-minute delay at an earth station in Reisting, West Germany, was caused by a technical difficulty there. Reisting retransmitted signals to Eurovision headquarters in Brussels where they were distributed to eight countries: England, Belgium (two networks), Holland, Germany (two networks), Switzerland, Italy, Yugoslavia, and through Eastern European Network (Intervention) to Czechoslovakia.

The second Early Bird relay was transmitted to the British Broadcasting Corp. for its Panorama TV program. Signals, after a false cue at 4:02 p.m., were beamed to London, 4:04 to 4:15 p.m., EST (9:04-9:15 p.m. there). This transmission included a live interview by BBC correspondent Richard Ker- shaw with Chief Adebo, permanent representative to the UN for Nigeria, at the UN TV studios. BBC taped the relay for insertion in the program shown in England at its regularly scheduled time that night.

BBC buys film on Kennedy death

A two-hour film, "Rush to Judgment," based on Mark Lane's controversival bestseller attacking the Warren Commission's methods and findings on the assassination of President Kennedy, has been purchased by BBC-TV's second service for $40,000. According to co-producer Emile de Antonio, that is "the most money ever paid for a single transmission by anybody in the United Kindom."

Mr. de Antonio is currently negotiating for the film's theatrical release in the U. S. He was of the opinion no U. S. television network would be interested in the film, which he described as "a brief for Lee Harvey Oswald's defense," and extremely critical of the Warren Commission.
British silence
Thames estuary pirate

Britain's Radio 390, which has been broadcasting "sweet music to housewives" for just over a year, went off the air Nov. 25. It was the postal authorities' first victory against the pirates.

A magistrates court ruled that the transmitters on Red Sands Tower, a war-time fort in the Thames estuary, were within territorial waters according to the 1958 Geneva Convention on the Sea. A fine of $280 was imposed, the maximum for using a transmitter without a license. The station's managing director, Ted Allbeury, said that Radio 390 would stop broadcasting "to comply with the spirit of what has been said" but promised that he would appeal. "I cannot believe this is the end," he added.

Another of Radio 390's directors, David Lye, said that if they lost the appeal they would put their equipment on a ship outside territorial waters, or move to a foreign country, continuing broadcasting to Britain and taking British advertising.

Meanwhile, the case of Radio Essex, another pirate station operating from the estuary forts, was set for examination last week. Roy Bates, Radio Essex's owner, said he does not feel himself bound by the Radio 390 decision. "I will elect to go for trial. I do not consider local justices competent to deal with a case of such national importance," he said.

UHF TV for Canada

The Canadian Board of Broadcast Governors has paved the way for UHF television with an announcement that the public interest can best be served by the early use of UHF channels in a number of locations.

A recommendation that applications be received for UHF stations was sent to the cabinet along with several suggestions made at the board's UHF hearings several weeks ago. Various proposals urged legislation to compel TV set manufacturers to install UHF receivers on all sets.

ETV task force set for less developed nations

President Johnson appointed Leonard H. Marks, director of the United States Information Agency and former communications lawyer, to head a U. S. task force to study how communications satellites may be used effectively to transmit educational TV programs for primary and secondary schools in underdeveloped countries.

"I believe that educational television can play a vital role in assisting less-developed countries in their educational effort," the President said in announcing the appointment. "These stations can be used for adult education and information programs during evening hours."

Other members of the task force are expected to be named this week.

Canadian commercial made the hit parade

The Canadian Broadcast Executives Society last week awarded one of its top two awards for radio commercials for a beer commercial that eventually became a hit-parade record.

Two of the top awards for French-language commercials were also awarded to a pair of independent radio stations at the society's fourth annual Canadian radio commercial festival in Toronto last week.

The beer commercial prize went to F. H. Hayhurst advertising agency for a production recorded in the Abbey Tavern in Ireland. The commercial became popular with listeners and was listed for several weeks on the top 10 of Toronto's hit parade after it was released as a record last summer.

Agence Canadienne Publicitee won the French-language award for an agency-produced commercial. Also in the French category, Charles Couture of CKTR Trois Rivieres, Que., (second from l) and Gaston Saulnier (second from r) of CKVL Verdun-Montreal were given the awards for radio markets in population centers up to 100,000 and above 100,000 respectively, from Dennis Whittaker, president of the society (r) while S. Spencer Skelton (l) chairman of the festival, looks on.

CKWC Moncton, N. B., received the English award for stations under 100,000 and CHUM Toronto received the prize for stations above 100,000.

CKWs Kingston, Ont., won the English public service award while CILK Quebec won the French public service award.

CBC threatened with budget slash to $1

The Canadian Broadcasting Corp. encountered possible appropriation limitations when Jack McIntosh, member of the House of Commons broadcasting committee, moved to reduce the CBC's $110,643,000 parliamentary appropriation to $1. Charging the CBC with a violation of Parliament's intent, Mr. McIntosh contended the publicly owned corporation had not successfully extended its radio-TV coverage to remote Canadian provinces where people were being taxed for a non-existent service. In response Alphonse Ouimet, president of CBC, noted that network radio now reaches 98% of the population with TV capturing 95% of available homes. One hundred percent coverage would have to wait until a satellite relay system becomes a reality.

Mr. McIntosh also suggested the CBC provide private broadcasters with funds for extension of service to remote areas that otherwise would be unprofitable to the smaller stations and called on the CBC for a definite commitment on the extension of TV service to all areas not now covered. Mr. Ouimet answered before the committee, "There is no end to this sort of arrangement once you start it." Present CBC policy does not provide for capital aid to private stations. Currently, the CBC extends its services through new stations and rebroadcasting units, Mr. Ouimet told committee members, with 31 radio and 38 TV extension projects under way and with 15 radio and 10 or 12 TV projects scheduled for next year. However, the CBC could not guarantee TV service extension because the corporation does not know what funds will be available in future years.

Australians cut TV advertising limits

Australia's Broadcasting Control Board has announced it will allow a maximum of 11 minutes of commercials during the weeknight prime viewing hours, a cut of two minutes per hour in most instances, beginning Jan. 29, 1967.

The action was the first such review in commercial standards since 1956, the first year of TV transmission in that country. A limit of 13 minutes per hour will apply outside weekend viewing, except on Sunday, when there is a limit of nine minutes after 6 p.m. and six minutes before 6 p.m.

Under present regulations, advertising content of seven minutes per hour in sponsored programs and 13 minutes of spot advertising in unsponsored programs is permitted.

3d TV's sought for two Canadian cities

The Canadian Board of Broadcast Governors has invited applications for new television stations in the lucrative Toronto and Montreal markets.

The action was the first breach in its long-standing policy of banning third TV stations in large cities in order to encourage the development of second station service throughout the country. The move follows the board's rejection of an application by a nearby station to move its transmitter closer to Toronto, thus introducing its signal into that city. The fact that U.S. stations near the border are carrying Canadian advertising was seen as a possible factor in the change.

At the same time the board said it would be willing to reserve certain channels for educational television but did not resolve the demands of ETV backers, who sought the two remaining best channels in each major city, and private broadcasters who seek to limit ETV to the still-unopened UHF television field.
If these buses served your city, too, air pollution would be less of a problem

Because these buses are powered by LP-gas. It's clean burning. Odorless. Reduces objectionable fumes and residue that contaminate the air. Some 1600 Chicago Transit Authority buses run on LP-gas.

This remarkable fuel is found in homes, too, like natural gas. LP-gas is used to cook food, dry clothes, heat water. To farmers and ranchers, LP-gas is a vital working tool. It powers their tractors, dries their crops, brands their cattle.

Industry? There, too, thawing rail switches, heating workers, superheating metals.

Just what is this gas called LP? A close cousin of natural gas. But compressed into liquid form for ease of transport and storage.

Its remarkable versatility has made it America's fastest growing fuel. The consumption of LP-gas for home, farm, commercial and industrial use has doubled in 10 years...tripled in 14.

Butane, propane, bottled gas—it has many names. But they’re all really LP-gas.

Of America’s great sources of energy, only LP-gas serves you in so many ways.
A government antitrust civil lawsuit aimed at forcing Broadcast Music Inc. to divest itself of its broadcaster stockholders has failed. Last week, almost two years to the month after the suit was filed, BMI and the Department of Justice signed a consent judgment that said not a word about divestiture.

The order was filed Nov. 29 in the U. S. District Court in New York. It becomes effective 30 days later. A consent order indicates that no adjudication of the charges has been made and that the defendant, in this case BMI, acknowledges in no way the truth of the charges.

Sour Pleased • Robert B. Sour, president of BMI, expressed his satisfaction with the move. He said in a statement: "The willingness of the Department of Justice, after long investigation, to dismiss its lawsuit against BMI on the basis of a consent judgment is a source of great satisfaction to BMI. The decree does not involve any admission of wrongdoing by BMI, any change in BMI's basic structure or any diminuation of BMI's ability to continue its effective competition in the field of performing rights.

"Many of the provisions of the proposed judgment are identical in substance with provisions of a consent decree under which BMI has been operating ever since 1941. Compliance with other provisions of the judgment will not hamper BMI in any way in the rendition of the services which have proved so useful to writers, publishers and the field of music in general.

"While BMI remains confident that it would prevail in a trial of the suit, it does not feel, under these circumstances, that it should make the expenditures of time and money that would be required for the successful defense."

The order bars BMI from:

- Commercial publication or recording of music and the commercial distribution of sheet music or recordings.
- Entering into any contract with a writer or publisher for a period in excess of five years.
- Prohibiting writers and publishers affiliated with BMI from issuing non-exclusive licenses for specified performances of their musical compositions.
- Entering into any contract that would require a publisher to refrain from doing business with another performing rights organization.
- Forcing other parties to record or perform any stated percentage of music to which BMI has the licensing rights.

Advance Payments • One of the few changes of any consequence was understood to be a provision prohibiting BMI from offering advance payments to writers or publishers for future performing rights where the writer or publisher is a member of, or under contract to, another performing-rights licensing organization, unless the other licensing group offers the same advances to writers and publishers who are under contract to BMI.

In a bow to modern-day radio, the consent judgment requires BMI to offer licenses to broadcasters either on a per program or per programing period basis. Programing period means, the order says, "a 15-minute period of broadcast commencing on the hour and 15, 30 and 45 minutes past the hour with-out regard to whether such period contains one or more programs or announcements."

Named as a defendant in the suit when it was filed in 1964 was RKO General Inc., New York, as representative of the 517 broadcasters who own stock in BMI. The suit against RKO General was dismissed last week without prejudice.

Charges • In its suit, the Department of Justice contended that BMI's broadcaster stockholders "and other broadcasters unknown" promote BMI music to the exclusion of other music, depress license rates charged by other music-licensing organizations, depress royalties paid to writers and publishers and "in general tend to create a monopoly in both the acquisition and the licensing of music performance rights."

In the complaint filed by the government, it was said that in 1948, 90% of the top songs performed on radio were licensed to ASCAP. By 1958, it said, only 43% of the top songs were licensed by ASCAP and 57% by BMI. And by 1962, the document contended, BMI licensed from 70% to 84% of the top songs in various categories.

The complaint charged that BMI and its stockholders "together with other broadcasters unknown, constitute a combination to restrain and to monopolize and are engaged in an attempt to monopolize . . . interstate trade and commerce in the business of acquiring from authors, composer and publishers the right to license the performance rights of their copyrighted musical compositions used by the broadcasting industry, and of licensing performance rights of copyrighted music to commercial broadcasters, in violation of Sections 1 and 2 of the Sherman Act."

517 Stockholders • BMI had 624 broadcaster stockholders when it stopped issuing stock in January 1942. The 517 charged in the complaint of 1964 reflects a decline of 107 stockholders, among them the national networks, which turned in their stock several years before.

The government's charges were similar in great measure to those alleged for many years by the American Society
Will the Democrats demand equal time?

The television and recording industries may soon have an unlikely new star in their galaxies. He has an overnight hit with his first recording, a magnetic delivery style, is already easily recognized as the costar of a popular team and is about to get the publicity buildup afforded only to hot properties.

Like many popular entertainment personalities of today he possesses an impressive mane of hair, but there the similarity with his new show-business colleagues ends. He is no longer in the springtime of life and hobbled by recent injuries, he cannot gyrate to the music of his record. And he is hoping to reverse a trend of show people going into politics.

The new success is none other than Senate Minority Leader Everett M. Dirksen (R-Ill.) whose previous TV appearances have been limited to political oratory and as part of the weekly “Ev and Charlie Show” with his former counterpart Representative Charles Halleck (R-Ind.), and more recently with new House Minority Leader Gerald Ford (R-Mich.) on the “Ev and Jerry Show.”

Last week, however, the sprightly septuagenarian embarked on a new career with a new record and a scheduled appearance on NBC’s “Tonight Show” with Johnny Carson, and his recording company announced it was negotiating for a television special.

The company, Capitol Records, said it had earmarked the senator’s record, “Gallant Men,” for its major promotional effort for the entire month of December. It added an all-out promotional effort at the radio-station level is already underway with copies of the single record in the hands of station managers throughout the country with an expanded album soon to get the same treatment.

“Gallant Men” is a patriotic composition with a musical background. The album version will also contain recitations of such historic pieces as Lincoln’s Gettysburg address, The Pledge of Allegiance, the Mayflower Compact and others. Another Dirksen album, now tentatively planned for release next April, will feature readings from the Bible.

The producer of the record, Arch Lustberg, is a television producer-director active in ABC-TV special projects. John Cavacas, composer of the background music, has been with CBS as an arranger-conductor, and H. Paul Jeffers, author of all continuity material on the album, is a network newswriter and producer.

At a party at the Capitol last week with Senator Dirksen and Alan Livingston, president of Capitol Records, the only obstacle foreseen to the record’s success was the possibility that the Democrats would launch an opposition recording star who would demand equal time from stations that play Senator Dirksen’s hit.

of Composers, Authors and Publishers. They were much the same as those made in a suit against BMI, filed by a group of ASCAP songwriters 13 years ago and still in litigation but never brought to trial.

BMI was established in 1939 and began operating in 1940 after broadcasters rebelled against a demand by ASCAP, then the only major source of music, that fees be almost doubled upon expiration of broadcast licenses in 1940. This also triggered a seven-month hiatus in the use of ASCAP music by radio broadcasters when only music in the public domain was broadcast. This was settled in the fall of 1941.

In that year, the Department of Justice brought an antitrust suit against BMI, but this was also settled by a consent judgment.

ABC election team to speak

The top officers in charge of ABC News’ election coverage will brief a meeting of the National Democratic Club in Washington Tuesday (Dec. 6) on the scope of the network’s election-night operation.

Addressing the Democratic group will be Elmer W. Lower, president of ABC News; Arnold Schneider, manager of the election coverage for ABC, and Daryl Griffin, producer of the election operation. The team is scheduled to explain its handling of the election returns, vote predictions, and their effect on voting patterns, and will show a kinescope recording of part of that evening’s broadcast.

Wisconsin bill would ban early predictions

As a member of the Senate Communications Subcommittee was poised to call for a congressional investigation of network election-night predictions, a pair of Wisconsin state legislators announced plans to try to ban such practices before the polls close in their state.

Senator Vance Hartke (D-Ind.), who has privately expressed a desire to have the subcommittee of which he is a member probe computer projections by the TV networks, last week was reportedly drafting a formal statement for such action. In the meantime Wisconsin state Senators Taylor Benson and Jerris Leonard said they would introduce legislation in Madison to prohibit such predictions on the outcome of state and local campaigns.

The ban would exclude comments on the balloting for U. S. President, dissemination of information based on public-opinion surveys and the reporting of complete results from precincts that have already closed.

State Senator Benson said that the action was prompted by the national networks’ declaration of winners in Wisconsin elections hours before the polls closed in certain areas. Computers should keep their “electronic mouths shut until everyone has had a chance to vote,” he added. “Once the polls are closed the computer can pick that man if it wants to, but we have enough of a problem stimulating our citizens to vote. . . .”
Paley for modernized elections

Says today's TV coverage is not too fast, but election procedures are behind the times

The trouble with present-day election coverage is not that broadcast journalism's techniques are too modern but that election procedures are too antiquated.

William S. Paley, chairman of CBS Inc., stressed this view last Wednesday (Nov. 30) in defending radio-TV journalism against criticism of its election coverage and against charges that it tends generally to influence events it covers.

Mr. Paley spoke at a luncheon following the designation of the CBS News Broadcast Center in New York as a "historic site in journalism" by Sigma Delta Chi, professional journalistic society.

A plaque unveiled at the center cited the achievements of CBS News, pioneer-founder of broadcasting's first independent news system, and distinguished chronicler of domestic and international developments. It also named the late Edward R. Murrow and H. V. Kaltenborn as "symbols of CBS News" who "helped set the organization's high standards for continuing excellence."

Speaking afterward at an award luncheon of the Deadline Club, New York chapter of Sigma Delta Chi, Mr. Paley traced the growth of radio-TV news from 1933 when CBS started setting up its own news organization rather than accept newspaper-imposed limitations on the broadcasting of news bulletins.

The Problems: The war in Vietnam, he said, is the same sort of "crucible" of maturity for television news that World War II was for radio news. "When there are round-the-clock, round-the-world satellite communications, this test will become even more crucial and the problems unprecedented," Mr. Paley added.

"The fast pace at which electronic communications have progressed in the last decade has also posed new problems in reporting the news at home."

"Ever since election day, we have been listening to the Monday-morning quarterbacks telling us what broadcast journalism did wrong. By trying to be as prompt as possible in making reports as to the election results, we have been accused of such contradictory offenses as not too fast, more accurately or more efficiently. What we should be seeking is constantly to narrow the gap between what we are capable of today and the old habits of yesterday. That is how all forms of journalism can change, and we will break through old limitations and achieve new levels of promise as individuals and as a people."

By-Gone Era: Mr. Paley said today's voting procedures "are products of a by-gone age" and called attention to the advocacy by Frank Stanton, CBS president, that they be modernized through establishment of, among other things, a uniform election day with polls opened and closed simultaneously throughout the nation. Mr. Paley said he was "pleased to note that ABC News has recently seconded Dr. Stanton's proposals."

The plaque at the CBS News Broadcast Center was unveiled by Robert M. White III, editor and publisher of the Mexico (Mo.) Ledger and international president of Sigma Delta Chi. In paying tribute to CBS News and Messrs. Murrow and Kaltenborn at the luncheon, Mr. White said the plaque thus "is also dedicated to one man—a man of vision, courage, leadership and genius," Mr. Paley.

Mr. Kaltenborn was described by Mr. Paley as the commentator who "first made radio a widely popular instrument for the analysis as well as the transmission of news," while Mr. Murrow was described both as one of the "great architects" of broadcast journalism and as a man who also "was—and remains—one of its chief inspirations."

A reminiscent tribute to Messrs. Murrow and Kaltenborn was presented by Boyd Lewis, president and editor of Newspaper Enterprise Association (NEA), at the luncheon. Wes Gallagher, general manager of the Associated Press, was chairman of the honorary committee for the dedication.

Sigma Delta Chi's program of marking historic sites and honoring leaders of American journalism was launched in 1942. Nominations are screened by a committee whose recommendations are then submitted to the society's board of directors and finally voted on by the society at its national convention.

"goof proof"

You can't make a mistake with a system that doesn't make mistakes. Schafer Automated Systems for radio stations are not only goof-proof in terms of reliability and workmanship, but also reduce the chance of human errors because they are so easy to operate and maintain. Schafer systems are designed to simplify your operation, retain your station's personality and keep it running smoothly 24 hours a day. For a goof-proof operation look to Schafer.

Public can improve TV, says Cox

But commissioner warns better-broadcasting groups

that basic system is sound and changes won't come easy

Those who would work toward development of a public voice in broadcasting were praised for their initiative and warned of the hard road ahead last week. FCC Commissioner Kenneth Cox said the purpose was noble but it would require unity, a staff, time, money and research, and a will not to destroy the present system.

Commissioner Cox was speaking to about 40 organization representatives who were meeting in Washington last Thursday and Friday (Dec. 1-2) with the aim of planning a "national congress on the rights and responsibilities of the public in commercial broadcasting." Key figures in creating the congress were James V. Bennett, president, and Frank Orme, executive vice president, of the National Association for Better Broadcasting.

Broadcasting is far from being all bad, Mr. Cox said, and he advised the organization representatives to accept broadcasting as "a commercial medium which must make comfortable profits. Accept its basic concern for the mass audience. But assert and reassert the claims of those who want something else—a something which alone justifies the broadcasters' claim to professional status and holds promise of realizing the great potential which so many have seen in these media."

Cooperation among the organizations is the key to success, he explained, noting that civic, religious, social and ethnic groups were represented at the session. He also cautioned them against expecting "easy victories." By combining efforts into one organization that can represent the joint concern of all, he went on, "you can become a force for good."

But it will take "adequate funds, a competent staff, agreement on major goals, a significant amount of research, a planned and carefully meshed campaign," he added.

Commissioner Cox offered six "assorted bits of advice" on what the groups will face and how they might act.

* "Be realistic. We have a good broadcasting system with some very basic strengths. Try to improve it rather than to change it completely."
* "Praise broadcasters when they do a good job. Broadcasters get even fewer commendations for good programming than complaints about bad programming. If you and your members want to keep what is good and encourage broadcasters to do more things of this character, write to the station and to the advertiser."
* "Emphasize both rights and responsibilities of the public." You will have to educate your members as to "their right and duty to complain and exhort."
* Although some programing may be harmful to children, "much more of it is a waste of time—which inflicts damage of another sort." Professional research is needed because "broadcasters defend their practices by saying there is no conclusive evidence that their programs hurt anyone."
* "I don't want to see TV made bland and meaningless. I not only want discussion of the real and serious issues of the day, but serious adult entertainment in which there is a place for violence and for situations which children can't understand. This requires careful scheduling by broadcasters, and education of parents so that they will exercise better control over their children's viewing."
* Be concerned with the handling of news since more people are looking to TV and radio as their principal news source. "This would be fine if it were merely supplemental to the print media, but I think it may displace them."

If this is so, then the broadcast media have a truly enormous responsibility to see that the public is fully and accurately informed. It would mean news in greater depth and more commentary and documentaries."

The commissioner also suggested that broadcasters be included in the studies, not just the "best broadcasters—they may surprise and disarm you with some of the very good things they do, but those which are not typical. Get some average broadcasters and some indifferent broadcasters and ask them pointed questions." In any event, he added, "don't let them run the show."

Twenty-one organizations took part in the opening day meeting. Mr. Orme said he hoped that before the Washington session ended some action could be taken toward an organizational congress in late 1967 or early 1968.

The organizations participating at the meeting last week were: American Civil Liberties Union; AFL-CIO; American Library Association; American Psychiatric Association; General Federation of Women's Clubs; National Association for Better Broadcasting; National Audience Board; National Association of Auditors; National Catholic Education Association; Unitarian Universalist Association; National Congress of Parents and Teachers; National Council of Catholic Women; National Council of Churches Broadcasting and Film Commission; President's Committee on Consumer Interests; American Council for Better Broadcasting with Television Action Committee for Today and Tomorrow; Adult Education Association of U.S.A.; American Association of University Women; Anti-Defamation League of B'nai B'rith; National Council of Jewish Women; National Education Association, and United Church of Christ.

Message from McLuhan

An examination of Marshall McLuhan and his work in communications will be presented by NBC-TV on a date to be announced, the network reported last week. Titled "Communications: Hot and Cold," the program will be produced and directed by Ernest Pintoff and will be carried on the new NBC Experiment in Television series. The first offering on Experiment will be a play "Losers Weepers," which is being produced in the Watts area of Los Angeles and will be carried on Feb. 19 (4:50).
This is a news desk?

Yes, but this “editor’s” concern for the who, what, when, where and how is not to write a news story, but to make sure of delivery of a life-saving drug. The “editor” shown above is a security guard at Lederle Laboratories in Pearl River, New York. When the phone rings at two o’clock in the morning, he answers it. This time a hospital in Wyoming needs an emergency shipment of gas gangrene antitoxin, and there’s no other place to get it. Just as your deskman knows how to handle the news story, this “editor” is trained to respond to the most difficult situations.

Once the call is received, Lederle’s emergency product shipment procedure goes into effect. It requires close and fast cooperation among Lederle physicians and people responsible for plant security, packing, routing and shipping the goods. Soon the life-saving antitoxin is aboard a plane headed west.

Routine procedure? Seems like it, but, just as in meeting any deadline, it takes preparation and practice to make it so.
FCC to seek rehearing on Red Lion appeal

COURT’S ACTION HELD PART OF RULES ‘NULL AND VOID’

The FCC is moving toward a request for a rehearing by the U. S. Court of Appeals on its decision two weeks ago that commission letters to broadcasters do not constitute orders which can be reviewable in court (Broadcasting, Nov. 28).

The 2-to-1 decision, issued in a case in which a broadcaster was attempting to test the legality of the commission’s fairness doctrine, also held a section of the commission rules to be “null and void.”

The final decision on whether a request for rehearing will be filed will be made by the Department of Justice, but commission attorneys have been authorized by the commission to seek Justice’s concurrence.

Commission officials would hope to win a reversal of the court’s decision. But clarification of the decision, even if it is upheld, would be helpful to officials who say they don’t know what impact the decision would have on commission procedures.

The case stems from a broadcast carried by WOCA Red Lion, Pa., dealing with Fred J. Cook, a writer. He claimed to have been attacked in the broadcast, and the commission said the station was obligated under the fairness doctrine to give him free time to reply.

At issue in the court’s decision was a commission letter directing the station to advise the commission of your plans to comply” with the ruling. The commission invariably follows the procedure in fairness-doctrine and equal-time cases.

Not Appealable – But the court said the commission hadn’t ordered the station “to do anything” and that the commission’s letters are not appealable orders. On that basis, the court dismissed WOCA’s appeal from the commission’s action.

The court also held Section 1.2 of the FCC rules, which the commission cited as the basis for its action, as “null and void” on the ground that it does not jibe with the Administrative Procedure Act. The rules say the commission may issue a “declaratory ruling.” The statute refers to “declaratory order.”

Officials say that if all that is meant is that the commission must issue an order instead of writing a letter in fairness-doctrine and equal-time cases the effect would be minimal. However, it would be more serious if it meant that the commission couldn’t take any kind of action in advance of a station’s license-renewal filing.

The commission three years ago in a letter to former Representative Oren Harris (D-Ark.), then chairman of the House Commerce Committee, expressed its view of the importance of moving swiftly in obtaining compliance.

The commission said then it isn’t fair to the licensee to await renewal before resolving a complaint against him. He might feel ambushed, the commission said, by having to defend himself against an old complaint.

Stations asked to help CATV’s provide local origination

A leader in the CATV business has invited broadcasters to pick up the burden of providing local origination on CATV systems. He is Robert H. Beisswenger, president of the Jerrold Corp., Philadelphia, a major CATV equipment manufacturer and systems owner and operator. He expressed the idea at a graduate class conference at the University of Pennsylvania’s Annenberg School of Communications, Philadelphia, last Monday (Nov. 28).

Mr. Beisswenger pointed out that 88% of New York viewers normally watch network stations in prime time, with the remaining 12% split among the four independent VHF stations. This is true also, he said, for Los Angeles, the only other seven-station market in the United States.

No matter how many additional program choices are available on CATV, he observed, the majority of viewers will watch network programs. And this, he added, confines a television station to serving a mass audience, since it is limited to one program at a time during the day.

By making additional channels available, CATV can open the door, he said, to local origination and specialized programming neither technically nor economically feasible for broadcasters.

“The people best trained and equipped to produce this type of programming,” he told the conference, “are those already in the business—broadcasters. CATV makes it possible, for the first time, for them to provide special programming on an economical basis. When broadcasters broaden their horizons and take a realistic look at the potentials of CATV, they will realize that they can utilize our extra channels for community-based programs, thus better serving their own local markets . . . “

Own Programs – Ever since the annual convention of the National Community Television Association last June, when NCTA President Frederick W. Ford urged cable operators to begin originating local programming, the CATV industry has been in the early stages of gearing itself to become originators. Mr. Beisswenger’s remarks, however, are the first addressed to broadcasters to cooperate with the cablenmen in producing and directing such local originations. Although Mr. Beisswenger did not say so directly, it is understood that he feels one way that this may be accomplished is through a leasing arrangement whereby the broadcaster would pay for use of a CATV channel.
Haitian hotels sue
CBS on news report

CBS last week was sued by a Haitian hotel corporation for $2,575,000 on grounds that the network’s false report of an invasion led to a major drop in tourism during the Thanksgiving weekend. CBS’s Miami affiliates, WTVJ (TV) and Wkat were also listed as defendants.

In a suit filed in Dade county circuit court, Miami, the Hostellerie du Roi Christophe Inc. claimed Haiti was quiet and peaceful at the time of the CBS invasion report on Nov. 19. The public, the suit said, had a right to expect “a standard of care” in news presentation and it alleged that the invasion report was a figment of “the imagination of the defendants.”

The hotel corporation operates the King Christophe Damballah hotel in Port au Prince and the Hostellerie du Roi Christophe in Cap Haitien. It said the hotels had been modernized and much money had gone into advertising to tell potential U. S. tourists that Haiti is hospitable.

The suit alleged that CBS entered into a conspiracy six months ago with a Cuban exile leader and others to prepare a story that would deprive the country of tourists and give the network a major story.

A week earlier Richard S. Salant, CBS News president, said the network had covered developments in the story for five or six months, but said it was in the manner CBS would cover “any news story. There’s nothing unusual about it” (BROADCASTING, Nov. 28).

Newsman’s silence OK’d in Maryland law test

A Maryland judge has held that a broadcast newsman does not have to testify before a grand jury if the information he possesses was given to him in confidence.

State Circuit Judge Walter H. Moor- man, Rockville, Md., ruled last week that NBC correspondent Walter J. Sheridan could not be forced to divulge his sources. The grand jury is inquiring into the activities of the Montgomery county council on zoning matters.

The ruling was based on an 1896 state statute that forbids compelling a newsman to disclose the source of any news or information.

Mr. Sheridan, one-time staff member of the Senate antiracketeering committee, is employed by NBC News in Washington as an investigative reporter. He became involved when he picked up some information in the course of covering the zoning controversy.
Quality down on the farm

Agricultural broadcasters told they're now covering big business

Expansion of farm broadcasting as a quality market even though the number of farms may be decreasing, plus the evolution of farming as big business rather than just a family venture, were among subjects discussed at the annual convention of the National Association of Farm Broadcasters in Chicago Nov. 25-27.

Two agency speakers, John Livingston of Colle & McVoy, Minneapolis, and Hal Mayfield of Geyer, Morey & Ballard, Chicago, described farm radio as still the workhorse medium for agricultural advertisers even though there is increasing use of television, including color, which is especially well suited to favorably displaying farm products. Both said their agencies have been active in producing farm color-TV commercials since the late 1950's.

Jack Burke, Radio Advertising Bureau, told the NAFB that his organization is receiving more requests for information on the reach and composition of farm audiences than ever before. He noted the flexibility of farm radio as a major strength and cited importance of keeping commercials dramatically up-to-date to assure their effectiveness.

Vincent T. Wasilewski, president of the National Association of Broadcasters, urged the members of the NAFB to work hard to keep up their leadership and professionalism individually and as an organization. Agriculture is as old as man and broadcasting is but age 40, he noted; however both are undergoing great evolution and drastic change so the farm broadcaster will have to be alert to keep up with these trends.

Satellites commonly are thought of in association with expansion of communication services or weather study but they also soon will have broad economic impact, according to Louis F. Stoe, RCA astro-electronics division. He explained how future satellites will help planning, forestry, fishing, mining and other fields through special global survey work.

At its business sessions NAFB approved a major new research project into the reach and quality of the farm audience and named Jack Timmons, KWKH Shreveport, La., to head a research project committee. The NAFB also approved publication of a new loose-leaf directory devoting a full page to each member station, including coverage map and pertinent farm marketing data, which will be circulated among agencies and advertisers.

Bob Nance of WMT-AM-TV Cedar Rapids, Iowa, was elected president of NAFB for 1967 succeeding George Stephens of KCMO-AM-TV Kansas City (for other officers see page 79).

The distinguished service award was presented to Stan Torgerson, formerly manager of WMC Memphis and now at WQAM Miami, for his sales promotion presentation "The Name of the Game is Sales." It is being made available to member stations for their own local use.

Live syndication was widespread for fight

Madison Square Garden-RKO General Sports Presentations, New York, reports its world lightweight title fight held last Monday (Nov. 28) in New York was syndicated live to Mexico and to 45 TV stations in this country, and on film to 12 foreign countries.

MSG-RKO, a division of RKO Pictures Co., said its worldwide sales representative, Four Star International, had sold live radio-TV rights to Mexico; live radio to Puerto Rico and the Philippines; and TV films to Ireland, Dominican Republic, Argentina, Venezuela, Puerto Rico, Panama, Curacao, Surinam, France, Singapore, the Philippines and Hong Kong.

Midwest MBS outlets like program plans

The Mutual Broadcasting System's program-expansion plan received the endorsement of Midwest affiliates Thursday (Dec. 1) at the second meeting of network executives with stations, part of a series of national sessions that will resume after the Christmas holidays.

The plan initially had been approved by the Mutual affiliates advisory committee several weeks ago.

To date, counting stations represented at the Chicago meeting as well as the New York area affiliates meeting a fortnight ago (Broadcasting, Nov. 21), all 125 Mutual affiliates that have been exposed to the network's program-expansion concept have given it "their unanimous approval," it was reported late Thursday by Matthew J. Culligan, MBS president and chief executive officer. The network presently has 523 affiliates.

Mutual's plan is to strengthen its

A prisoner has no right to privacy

Ruling that a prisoner is a public figure and therefore has no right to privacy, a federal judge in Hartford, Conn., found that station WTRC-TV Hartford did not violate the convict's right to privacy when it filmed his appearance before a parole board.

The judge last week dismissed the former prisoner's $50,000 damage suit against the station and parole and prison officials. The plaintiff alleged that his privacy was invaded and constitutional rights violated when the station filmed a documentary report in 1964 on the state prison-and-parole system. The prisoner's appearance was filmed without revealing his name or showing his face.

The judge noted the plaintiff could hardly claim his reputation had been damaged. He had been serving a term for a series of truck robberies. The court also cited previous rulings establishing that prisoners, because of their crime and trial, do not enjoy the same rights to privacy as a nonconvict does.

Evening Star Broadcast sets up D.C. bureau

The Evening Star Broadcasting Co. (WMAL-AM-FM-TV), Washington, has created a Washington news bureau to service the licensee's stations in Virginia and South Carolina. The service will later be offered to other stations.

Paul Young, on the WMAL news staff since 1964, will manage the news bureau. It will be geared primarily to feed processed color filmed reports to the Star's WCIV-TV in Charleston, S.C., and WLVA-TV in Lynchburg, Va., for same-day showing on evening newscasts. Audio feeds will go to WLVA-AM-FM.

In announcing formation of the news bureau, Ted McDowell, news and public affairs manager for the WMAL stations, also named Len Deibert, news director for the WMAL stations, to be manager of news for WMAL-AM-FM, and Vince Clephas, managing editor of WMAL-AM-FM's nightly newscasts, was named manager of news for WMAL-TV.

Smooth meeting for Screen Gems

The annual stockholders meeting of Screen Gems Inc. in New York last Tuesday (Nov. 29) was marked by optimism and serenity and there was scarcely a reference to the recent rumblings at Columbia Pictures, parent company of SG and owner of about 88% of the shares outstanding.

A. Schneider, who is president of SG and of Columbia Pictures, sidestepped the sole question from one stockholder about the present status of the motion-picture studio, pointing out that “this is a Screen Gems meeting and Columbia is going to have its own meeting.” He declined to give the questioner the date of the Columbia annual meeting, although it had been announced earlier as Dec. 21, but it later developed there was a reason behind his refusal.

Following the SG annual meeting, in response to a newsman’s question on the date, Mr. Schneider disclosed that the Columbia annual meeting will be postponed until “some time in January.” He indicated that the postponement resulted from a request from the FCC for information pertaining to the recent agreement worked out by the Columbia management with the Banque de Paris et des Pays Bas, which owns about 20% of Columbia stock. Mr. Schneider said it will take time to prepare this material and subsequently another date will be set for the Columbia meeting.

The agreement with the Banque de Paris, calling for support of the present Columbia management, appears to have blocked a proxy fight for control of Columbia by several groups of dissident stockholders (Broadcasting, Oct. 30, et seq.).

Mr. Schneider told newsmen that the Columbia board would be enlarged from the present nine members to 11 to give minority representation to the

Revenue estimates made in Chicago

Estimates of revenues for Chicago radio and television stations have been published in the past week by local newspaper columnists there. They report WBBM-TV as first in TV sales while WGN is the radio leader.

George Lazarus of the Chicago Daily News estimated the WBBM-TV gross this year as $23 million, up from last year’s $22.5 million. The other station estimates for 1966: WMAQ-TV, $21.5 million; WGN-TV, $19.5 million; WBKB-TV, $13.25 million; WFLD-TV, $700,000, and WCiu-TV, $325,000.

Mr. Lazarus and John McDonough of the News estimated local radio revenues for 1966 as follows: WGN, $7 million (up from last year’s top of $6.5 million); WIND, $5.5 million; WLS, $4.5 million; WBBM, $3.25 million; WCL, $2 million; WGN, $1.8 million; WMAQ, $1.75 million; WJJD, $1.4 million; W41, $1.35 million; WBBN, $830,000; WFMT (FM), $650,000, and WAAF, $600,000.

Hearing on Comsat rates may be unneeded

The Communications Satellite Corp. appeared last week to be gaining ground in its effort to settle the dispute over its rates without the hearing ordered by the FCC.

Counsel for Comsat, for its common-carrier customers and for the broadcasting networks that are served by the carriers met informally on Wednesday to determine whether additional information Comsat supplied last month (Broadcasting, Nov. 21) provides a basis for eliminating the hearing.

No decision was reached. But the
parties agreed to continue meeting informally among themselves, indicating they feel there is reason to believe the hearing can be avoided.

In the informal meetings, counsel for the carriers and the networks will attempt to get from Comsat attorneys answers to questions raised by the new data supplied by Comsat. The material constitutes a revision of the costs, traffic and other estimates on which Comsat based its rates.

The parties also agreed to another prehearing conference on Jan. 16. A final decision is expected then on whether or not the hearing will be necessary.

Hefty net increase for Filmways Inc.

Filmways Inc., New York, has shown a 58% rise in earnings for fiscal 1966. Contributing to the record earnings was Filmways TV Productions Inc., under Al Simon, which produces the highly rated Beverly Hillbillies and Green Acres series. The subsidiary also has Petticoat Junction and The Pruitts of Southampton on network television.

Lee Moselle, president, said that the company plans to have a new comedy series created by Jay Sommers on CBS-TV next fall. Series is called Doc. Two pilot programs will also be produced under an arrangement with CBS: Dundee and the Culhane, a one-hour western to be produced by Sam Rolfe, who created The Man from U.N.C.L.E.; and Lassiter, a one-hour program which deals with a muckraking journalist to be produced by Richard Alan, who produced The Trials of O'Brien for Filmways last year. The sale and development of new programs are under the direction of H. M. (Bud) Austin, the firm's executive vice president.

Warner Bros. net up 80% in fiscal year

Net income of Warner Bros. Pictures Inc. rose sharply in the fiscal year ended Aug. 31. The company's financial statement released last week showed that after-tax profits soared more than 80% over last year. While Warner Bros. does not reveal total corporate gross, indications are that consolidated revenues jumped more than 40% over the last fiscal year's gross. Breakdown of WB's income shows television sales (for series productions and movie distribution) up to $31.1 million from $20.5 million, film sales to theaters up to $76.3 million from $56.3 million and record, music and other income up to $30.4 million from $20.3 million.

NAB panel sets public-relations themes

TWIN PUSHES OUTLINED FOR PORTABLE RADIOS

Two 13-week campaigns to promote ownership of portable radios and selection of the 1967 radio-month theme were announced last week by the National Association of Broadcasters public-relations committee.

Meeting in Washington on Thursday (Dec. 1), the committee approved spring and summer campaigns urging all families to have battery-operated AM-FM radios. For the annual radio-month promotion in May, it approved the slogan: "Radio—the People's Choice." The radio-month material is for use May 1 through July 31.

The committee also recommended a budget of $40,000 for on-air projects in the next fiscal year. The figure, which will go to the finance committee, and then to the NAB board, is an increase of $5,000 over this year's budget.

"Swing into Spring with a Portable Radio" will be the theme of the first transistor-radio campaign. It will begin March 1 and run through May 30. The second campaign, "America on the Go," will run from Aug. 1 through Oct. 31. Both campaigns will be built around newly written jingles. The spring campaign will emphasize radio's all-around role and, in particular, the role of transistor sets during emergencies. Stress in the summer campaign will be on radio's portability on vacations.

The committee also heard a new PR aid, "The Many Worlds of Inner Space," a prepared speech about radio that uses sound-effect audio inserts and is designed for optimum stereo effect. This special package, designed to aid broadcasters in local speaking engagements, will be available—including scripts and tapes—after Jan. 1 for $2 each.

Another package for local on-air use shown to the committee was "A Date with Radio," an almanac of historic facts about radio for each day of the year.

Members of the committee at the meeting were: Frank Gaither, Cox Broadcasting, Atlanta, chairman; Simon Goldman, WJTN Jamestown, N. Y.; Kenneth Harwood, KUSC(AM) Los Angeles; J. R. Livesay, WLBH Malton, Ill.; Al Ross, KXKE Sterling, Colo., and Hugh E. Turner, KTLM San Rafael, Calif.

Starting gate open for FCC queries

With television stations around the country carrying film clips of old horse races and dog races in connection with supermarket promotions, the FCC has emerged as something of a tail bird.

The commission's interest stems from a number of complaints received from viewers about the promotions. Officials say some 20 stations have been asked to comment on various allegations.

In the promotions used, supermarket customers are given slips with numbers corresponding to those carried by horses (or dogs, in one case) in a card of filmed races broadcast by a local station. Persons holding the number of the winner can collect a specified amount—up to $1,000 in some cases.

The commission, in querying stations on the promotions, is concerned primarily with whether the licensee is taking care to protect viewers from being misled by the promotions.

The letters ask who controls the outcome of the contest (the sponsor or the syndicator), the amount advertised as the maximum prize and how many have won that prize.

"Lottery?" The letters also ask whether the promotions constitute a lottery. But thus far, officials say, indications are that they do not. In all cases checked so far, apparently, individuals may pick up a betting slip without purchasing anything—and one element critical to a lottery is financial consideration.

One other question the letter asks is whether the station announces that the races are prefilmed.

The reason for that query, officials say, is that some viewers who complain "think they are watching a live race, and they disagree with the results broadcast by the station."

The FCC isn't the only federal agency concerned with the promotions. The Federal Trade Commission on Oct. 29 announced it was looking into the "legality and competitive" effects of promotional techniques in the food-retailing field, particularly those involving "sweepstakes" and games of chance. However, the FTC's concern primar-
ily is with practices that are "unfair or deceptive or that unjustifiably" add to the consumer's grocery bill. FTC sources said that although investigators will take radio and TV advertising of the games into consideration, they do not expect broadcasting to play a significant role in the findings or in the FTC's decision.

President lauds UN broadcasters

President Johnson last week praised a broadcaster group—the United States Broadcasters' Committee for the United Nations—for its "fine example of public service." His message was conveyed Dec. 1 at the UN by Ambassador Arthur J. Goldberg, U. S. representative to the UN.

The President's letter of congratulations, released by Ambassador Goldberg, mentioned the committee's "weekly broadcasts" (International Zone, a series of 13 half-hour programs telecast annually since 1961 by more than 50 TV stations around the country)

President Johnson said that through the broadcasts, "world citizens in America are learning how the United Nations works to restrain international conflict and build a better life for all men." Mr. Johnson said military strength alone "cannot keep us safe: We must labor daily to build bridges of friendship and cooperation to every continent. For this reason, I consider the activities of the United Nations our own success."

He said the programs helped to present these "vital truths—in documented stories of men working together for peace."

The broadcasters' committee is led by an executive committee representing a cross-section of prominent multiple-station owners and network-owned stations. United Nations Television was commissioned to produce the half-hour documentaries and also helps distribute the shows. A total of 78 International Zone episodes have been made.

Alistair Cooke is host and narrator of the films.

Drumbeats...

Topped • The NBC-TV mailroom has a problem. For several weeks Dean Martin has featured on his show Frank Sinatra's "mystery" voice with a tongue-in-cheek invitation to viewers to enter a nonexistent contest by sending in the top of their TV set. At last report, the mailroom was crammed by more than 200 TV-set tops addressed to Mr. Martin, and more were arriving daily. His reaction to the viewer response was, "How about that? I've always needed a bunch of television tops."

That's the spirit • Using only its 1 kw as promotion, wbox New Orleans received 3.9 million votes from students in 21 area schools who took part in the station's School Spirit contest. There was no limitation on the number of votes an individual could submit, but they all had to be on a post card or a 3 by 5 piece of paper. The winning school received a check for $123 and 10 cents for each of wbox's 1230 kilocycles—plus a trophy and a record hop at each of the top three schools. Since the contest was so successful, from the station's point of view, the record hops were shelved in favor of live bands and dances, these in turn being broadcast live over wbox. Two other stations of the OK group of Negro-oriented stations have recently concluded similar contests. In Baton Rouge, 26 schools came up with 57 million votes for the wokx contest, and the listeners to KYOK Houston turned up 5.2 million votes from 12 schools.

Aid to education • Richard O. Linke, executive producer of the Andy Griffith and Jim Nabor CBS-TV specials, has set up a $25,000 endowed scholarship at his alma mater, Ohio University, to encourage undergraduates in the fields of theater, communications, electronic journalism, journalism and music.

Distinguished • Brigadier General David Sarnoff, chairman of RCA, received a 1966 Gold Medal award of the National Institute of Social Sciences for "distinguished service to humanity" at a New York dinner Dec. 1. General Sarnoff joined other prominent recipients of the award including Francis Cardinal Spellman; Keith Funston, president of the New York Stock Exchange; Danny Kaye, ambassador-at-large for UNICEF, and Mrs. Lyndon B. Johnson.

Teen-ager pageant • Miss American

Teen-Ager Inc., Palisades Park, N. J., has begun awarding franchises to business firms, including radio or TV stations, to conduct local promotion contests for its eighth annual Miss American Teen-Ager pageant finals to be held at the Palisades amusement park next September.

Art for station's sake • A televised auction of paintings and sculpture held last week for the benefit of noncommercial wmdt(TV) Newark, N. J.-New York raised $76,775, most of which will go to the station. Parke-Bernet Galleries, New York, donated its premises and personnel to the station.

Try a Model T • Wdrc Hartford, Conn. is conducting a search for a 1922 automobile to commemorate the station's 45th anniversary. The car will be used for VIP shuttles and as an emergency news-wagon for "slow-breaking" stories. Automobiles of the correct vintage looking for a new home should contact Dean C. Amadon, public relations director, wdrc.

ABC group to preview ad plans for 2d season

ABC-TV's plans for advertising and publicizing the "second season" that begins January will be previewed and discussed at a meeting that starts today (Dec. 5) in New York of advertising and publicity directors of ABC-owned TV stations.

The group tomorrow meets with ABC Executive Vice President Simon B. Siegel, Group Vice President Theodore F. Shaker and James Conley, president of ABC-owned TV stations. ABC Vice Presidents Edward Bleier, public relations and planning; Donald Foley, advertising, and Ellis O. Moore, press relations, also will participate. Stations that will be represented are wabc-TV New York, wxzy-TV Detroit, wbbk-TV Chicago, kgo-TV San Francisco and kabc-TV Los Angeles.

Y., northeast; Jimmy Lee, WMAZ-AM-FM-TV Macon, Ga., southeast; Pat Keliher, WEAQ Eau Claire, Wis., west.
Campbell Arnoux, 71, former president of WTAR-AM-TV, dies

Campbell Arnoux, 71, retired president of WTAR-AM-TV Norfolk, Va., and former chairman of the television board of the National Association of Broadcasters, died Nov. 28 in Sarasota, Fla. Mr. Arnoux had been president of WTAR Radio-TV Corp. from 1946 until his retirement in 1960. He was on the NAB board from 1944 to 1950. He was a member of the NAB's television board from 1951 to 1957 and again from 1960 to 1962, serving as vice chairman of the TV board from 1954-56 and as chairman from 1956-57.

Previously chairman of the board of the WTAR Radio-TV Corp., Mr. Arnoux had remained until his death a member of the board of directors of Norfolk-Portsmouth Newspapers Inc., the station's parent corporation. Born in New York City in 1895, he moved with his family to St. Louis and later to Fort Worth. He attended University of Texas. It was in Texas that he obtained his first newspaper job on the old Fort Worth Record at $10 a week. After serving with the Fifth Texas Cavalry in World War I, Mr. Arnoux went for a trip around the world and came back to the United States where he became assistant to the director of publicity of the old southwestern division of the American Red Cross. He returned to newspaper work in 1922 as a staff writer for the Fort Worth Star-Telegram. In a short time the paper decided to install a radio station, WBAP. As told by Mr. Arnoux, everybody in the newsroom declined the job of looking after the station. When it came to him, newest member of the staff and the only one not yet asked, he was not asked, but told to run the station.

He remained with WBAP until December 1924, when he built and became general manager of KTHS (then in Hot Springs, Ark.). In 1934 he became manager of WTAR. During his tenure at WTAR, he built two stations: WRNL Richmond, Va., and WPID (then Petersburg, Va.). He served as the vice president of WRNL.

In addition to his NAB work, Mr. Arnoux was involved in various other activities. He assisted in the organization of the Television Bureau of Advertising and was a member of its board of directors for four years. He served as a delegate to the first congress of the Inter-American Association of Broadcasters in Mexico City, and as a charter member of both the Radio Pioneers and the TV Pioneers.

Surviving are his wife, Natalie, daughter and son.

Vincent T. Wasilewski, NAB president, noted that: "The entire broadcasting industry has been greatly saddened by the passing of one of its pioneers. Campbell Arnoux contributed significantly to the development of our profession, both in his individual business career and in his participation in industry affairs. He was a good citizen, a good broadcaster, a good friend."

Claire, Wis., east north central; Jim Hill, wcco Minneapolis, west north central; George Logan, WIBW-AM-FM-TV Topeka, Kan., west south central; Jack Crowner, WAVE-AM-TV Louisville, Ky., mid south; Lynn Adair, KSL Salt Lake City, Pacific southwest; Greg Click, KOMO Seattle, Pacific northwest, and George Atkins, Canadian Broadcasting Corp., Toronto, for Canada.

Y. Frank Freeman, VP of Paramount Pictures and for last 18 years chairman of board of Association of Motion Picture and Television Producers, resigned his studio post, effective Jan. 1, 1967. Mr. Freeman, 76, had been with Paramount for 33 years.

Wynn Nathan of Wolper Productions Inc. elected chairman and Alvin Unger of Independent Television Corp. elected co-chairman of Television Film Exhibit organization. New executive committee consists of Mr. Nathan, Mr. Unger, Elliott Abrams of Walter Reade Organization Inc., and John Ettlinger of Medallion Television Enterprises Inc.

Mary Kathleen Strickland appointed program supervisor for WRVA-FM Richmond, Va.

John Small named operations director at WBAX(FM) Detroit.

E L L I S Elwood Erdman is a 40-year-old self-made man. Admittedly, right now he is somewhat at loose ends. He has only a radio station (WTKO, Ithaca, N.Y.), two football radio networks—Syracuse University and the New York Giants (he does the colorcasting for the Giants games), and real estate and apparel manufacturing interests to keep him occupied. But that situation could change anytime.

Recently he arrived in New York on the night flight from Los Angeles. Usually, he flies his own Bonanza, but he had just wound up several days of meetings and four hours' sleep a night.

He sat back in a leather armchair in the lobby of the New York Athletic Club and rapidly, thoughtfully sketched out a biography. None of the dozen-or-so corporations he has owned or had an interest in has a biography on file. As he ran down a quick history of his corporate moves, it became apparent he has never stood still long enough for anyone to amass all the facts on paper.

Elli (Woody) Erdman founded three radio stations, seven more, and built three football networks. All it took was the investment of $1,600 and 11 years of four hours sleep a night.

Halfway through the biography, he spotted a passing friend, an ex-partner in the Coaches' All-America Game (he helped found that as well). In a moment he was up from the chair in action: catching up since their last meeting, then, responding to a request for advice, talking fast, weaving, moving around like a fighter.

Busy Schedule = Back to the biography, he talked even faster. He wanted to wrap up the interview before Giants' quarterback Earl Morrall and defensive half Dick Lynch arrived, and he would have to break for lunch with a bank chairman.

Woody Erdman was born in Ashland, Pa. His Pennsylvania "Dutch" parents taught him "dedication to work, and caution: build a reserve, build, build..." He grew up with farm and dairy work and "painting fenceposts, working at the A&P after school." He was elected president of his junior and senior classes and to the student council. When he graduated from Butler Township high school in 1943, it was into the air cadet program of the Army Air Corps.

In 1946 he went back to school, law at Penn State. He worked his way through college in a strange way for a law student—nights on the university radio station, weekends on WCNR Bloomsburg and summers on WPAM Pottsville, both Pennsy.

"Lou Murray, the owner [of WPAM], did a lot for me. He gave me my first real show in broadcasting."

He also introduced Mr. Erdman to Phebe Mae Weeks, the station traffic manager, who became his wife. When he graduated, they went to work on "a friend's construction permit... plowing the furrows and stringing the wire. I mean I had to go out and get the horse and plow."

Back at WCNR as program director "and a little of everything else," Mr. Erdman got his first break. Les Qualey was short two announcers for the Penn State-Georgetown game that weekend. He called Mr. Erdman and a friend. "They jumped at the chance."

WEEK'S PROFILE

But Woody Erdman didn't know very much about football. He looked up the local high-school coach and pumped him for two days straight. It worked, and Mr. Erdman got his first taste of network sports broadcasting.

For three years after that, he managed sales for WENY Elmira, N.Y. The job occasioned his move to the upstate New York area, where he is still based, and gave him the necessary experience for his "big move: I began looking for a frequency."

It was through the intercession of a local Coke distributor that Mr. Erdman entered into partnership with Tom Cassel, who owned the local TV station. The distributor booked time on both the TV and radio stations, liked both men and "didn't want to see us competing."

The new partners founded three stations: WTDO Ithaca in 1955, WACK Newark 1956 and WBOE Owego 1957 (all New York). Also in 1957 Mr. Erdman bought WDKX Montpelier, Vt., which he sold the next year.

In 1959 Mr. Erdman moved into the "big time." He sold his interests in the Newark and Owego stations, took full ownership in WTDO, and bought WOLF Syracuse. He put together the now 40-station Syracuse football network.

Network of FM's = Mr. Erdman next bought five FM stations, known as the Northeast Radio Network, from the Grange League Federation. They had been used to relay weather and crop reports to farmers and were strategically situated on mountaintops to cover a wide area. He programmed them as commercial stations and used them to relay popular programming, including the Syracuse games, to AM stations for off-the-air pick-up.

In 1961 he organized a radio network for Joe Foss' New Buffalo Bills. In 1962 he became president of C&U Broadcasting Co., into which he merged all his radio stations.

In 1963 he sold his rights to the Bills and bought the rights to the New York Giants. The Giants network currently comprises 90 stations, including San Juan, P.R., and St. Thomas, the Virgin Islands.

Last year, Mr. Erdman sold all his broadcasting interests with the exception of WTDO and the Syracuse and Giants networks. Now he says he is "semiretired."

At 40 he is "beginning to realize I've been sleeping four hours a night for several years now."

But he is not really tired. "Business is fun. It takes stamina and you gotta use your noggin. But it's a lot of fun."

Then, thoughtfully: "You can drop dead on a golf course too, you know, only there you can't make any money."

And he laughs.
EDITORIALS

How about a fresh start?

NEXT week the National Association of Broadcasters' television code board will spend two days deciding whether to modify the commercial time standards in its code. At the meeting, it would be logical to assume, there will be at least passing reference to the recent adoption of those standards by the FCC as guidelines for government control.

Or perhaps the members of the code board will prefer to omit that topic from their agenda. It must have come as some embarrassment to the architects and custodians of the NAB code to have their baby suddenly embraced by the government. Baby wasn't intended to fall into that fate.

The code was originally adopted and since then has been periodically refined as an instrument of resistance to government regulation. Like other sections specifying what and what not to do, the provision that prescribes precise time limitations for commercial content was intended to head off the threat of government imposition of commercial restraints. Now the government has, for all practical purposes, done exactly what the code was designed to circumvent. To make matters more uncomfortable, it has let the NAB define the restraints for enforcement by the government.

This publication has for some time argued that the broadcasters ought to remove explicit time standards from their code. There is no research to support the belief that the standards now in the code are more or less acceptable to the public than some other standards would be. There is no reason to believe that any centralized set of standards is as applicable to one station as to another or to one time period as to another.

The meeting next week will afford an opportunity for the code board to give some serious thought to starting a whole new approach to the problem.

Name of the game: headlines

ONLY in the unlikely event that they might stumble upon something rotten in Denmark, Belgium or elsewhere can there be justification for the fishing expedition being conducted by Commissioners Nicholas Johnson and Kenneth Cox into the ITT-ABC merger now pending before the FCC. The one exception is publicity, and both gentlemen seem to dote on it.

Messrs. Johnson and Cox know that they are outvoted. They should know that the administration wouldn't relish action that would frustrate more aggressive competition among the three major TV networks.

ABC is on record as in need of ITT's resources to underwrite its transition to full color, thus to compete more effectively with the older networks. ITT has testified that it's prepared to advance the funds for color facilities as well as for programming, and that ABC would continue to operate autonomously.

Mr. Cox should know, even if his 32-year-old disciple, Mr. Johnson, does not, that the FCC has ample authority to move in case public-interest questions arise after the merger is approved. First, there is the opportunity to review performance at license renewal time, which occurs every three years for ABC's broadcast licenses and every five years for ITT's common-carrier licenses. Since both ABC and ITT are and have been qualified licensees there are no questions of character or financial responsibility involved.

And if there should be an extreme case, such as that "hypothetical" news-documentary fantasy authored by Messrs. Johnson and Cox, the FCC could institute revocation proceedings and bring them to the bar almost instantly.

RCA, which created NBC as the first network 40 years ago, has succeeded in building what it calls the world's largest news organization without ever encountering anything approaching the Johnson-Cox "hypothetical." It has won world prestige and renown for its journalistic excellence and enterprise.

Messrs. Johnson and Cox should quit looking under rocks and get on with their sworn assignments of providing a more effective and competitive communications service in the interests of all the people.

Vindication

THE consent decree to which the government and Broadcast Music Inc. agreed last week assures a continuation of the condition that BMI was founded to create: competition in the business of music licensing. The final issuance of the decree will be greeted with approval by everyone except the tiny band of aging ASCAP members who would be enriched by a restoration of the pre-BMI monopoly.

The stipulation reached by the Department of Justice and BMI is a confirmation of the legal soundness of BMI's methods of operation. Users of music may not unanimously approve all of BMI's works and practices, but they ought unanimously to be grateful that there is more than one source of music and therefore a freer market that has stimulated an increase in total music supply.

The vanishing pioneers

ARNOUX, Voynow, Raymer, Mason. They are among the recent additions to the rapidly growing roster of first-generation leaders in broadcasting who have died.

These men died too young, but they had worked hard in their prime when the going was rugged and the rewards lean. Each in his way had made his mark in helping broadcasting grow as a profession, art form and medium. Messrs. Arnoux and Mason were leaders in management and active in association affairs at the national level. Messrs. Voynow and Raymer helped bring commercial balance and self-respect to what has become spot broadcasting.

The new generation, bright, eager and well-taught, owes more than reverence to the pioneers who fashioned the art that is broadcasting.

"He's writing editorials for a 'Let's keep our city clean' campaign."
Grand Old Man of Television

Robert Gould shucked boots, saddle and swaddling clothes in Cut Bank, Montana, to go East and grow up with television. Bob, now a video veteran of twenty-seven years, brought boots, saddle, and know-how to WBAP-TV in 1948 to join Texas pioneers in television, color and communications by design.
