The million selling singles listed below covering sales made thru August, 1960, were reported to The Billboard by the manufacturers. They are not certified by The Billboard. We believe, however, that most are accurate, but it is very possible that a few manufacturers were carried away by their own enthusiasm in reporting certain listings to us. In the interest of programming, it is felt that the inaccuracies contained in this list do not outweigh the value of reporting these in this issue. Listings are arranged in alphabetical order by artists. Flip sides are listed when it is felt they contributed heavily to the eligibility of being listed as a million seller.

## HOW TO USE THIS FEATURE

**JUKE BOX OPERATORS**, in view of the increasing number of stereophonic juke boxes, will be especially interested in listings of available stereo singles and EP's in the record data column. Also, operators may profit handsomely when an artist is particularly hot by programming, not only his current big record, but also the same artist's earlier hit or standards. This info, too, is in the record data column.

**DISK JOCKEYS** will find that the information in this complete easy-to-use directory can be integrated with nearly every spin. The wealth of chatter in the brief biographical summaries is presented here alphabetically by artist for easy reference. And many fine programming ideas can be developed from the record info data.

**BUYERS AND BOOKERS OF TALENT** will need no diagrams to tell them how valuable this compilation is, or how to use it. They have continuously requested biographical data as well as for the personal managers and booking offices or leading talent. This feature should answer these requests.
A practical programming guide for disk jockeys and juke box operators, featuring biogs and basic record data on all recording artists whose records appeared on The Hot 100 or Top LP Charts from June, 1960, thru August, 1960, plus any million-seller artist who had a singles release during the same period.
