"The Coin Machines Merry-Go-Round"
By Bill Gersh

ONE WEEK TO GO

There's only one more week to go in this 4th War Loan Drive. The buying of War Bonds, as far as the members of this industry are concerned, is much, much more than a patriotic duty. It is the finest investment in the greatest nation in the world's history - at a profit. Certainly no better reason for the purchase of War Bonds ever could be offered. Especially during this 4th War Loan Drive.

There is also no doubt that you have read ad after ad, story after story, heard speech after speech regarding why you should buy War Bonds. Stop right here and now and think for just a moment. Realize that to secure yourself for the coming post-war era when much more expensive equipment will be presented, when greater competition will come into being, that a financial reserve in War Bonds may mean the difference between being able to continue profitable or unprofitably in this business. Therefore the purchase of War Bonds is most important to you. It is your best means for creating an outstanding financial reserve for tomorrow.

This item is not being written as an appeal in any sense of the word. It is simply a cold business suggestion which The Cash Box believes the average man in this business is sufficiently intelligent to agree is the very best thing he can do at this time with every extra penny that he has accumulated. Coinmen like to invest whatever cash they have around. This is well known to all the industry. It is the very essence of this business to always continue to invest in equipment.

But this investment in War Bonds - in the greatest bank in the history of this world - the U.S.A. - and at a profit - is much more than another business investment. It is security for tomorrow. Security for the post-war era when The Cash Box most sincerely hopes that everyone of the men now engaged in this industry, the men who have been responsible for maintaining and giving this industry the nucleus and the backbone it needed for tomorrow, will continue to lead the way. A strong financial reserve in War Bonds will assure leadership for tomorrow.

70%-30% COMMISSION BASIS

It is extremely gratifying to receive so many fine letters of commendation from all over the nation regarding The Cash Box suggestion that now is the time for this industry to establish a 70%-30% commission basis with locations. This past week we heard from one of the largest music operators in New Jersey. His firm had decided, after much argument pro and con, to get down to 30% commission with their many locations. They started the first of this year with an explanatory letter addressed to each of their locations. They had made up their minds that even if they lost 50% of their locations they would still be better off on a 30% basis because of the tremendously increased overhead they were enduring and the fact that this overhead continued to grow greater.

Much to their surprise they have, up to this writing, lost only a very few spots. In fact, they claim, they have even pulled out of some spots where the 30% was acceptable. Not because they desired to do so but simply because of manpower shortage and lack of sufficient records and supplies. They are tremendously grateful to The Cash Box. And they are grateful for more than one reason, too, they state. For not only are they now earning more profit but they find that the average location agrees with them regarding this necessity. Many locations have proven themselves real friends by completely agreeing to work with them on this 70%-30% basis until such time when they can return to their former commission basis. This firm now claims that if they can help it there will never again be a return, on a music operation anyway, to a 50% commission basis.

They believe that this 70%-30% basis was made possible by the war, as The Cash Box stated many months ago. The average retailer, they claim, realizes that if they were to pull their phone or remote music installation, he wouldn't be able to get another. The storekeeper, they state, realizes too, that the service which they are giving him at this time is nothing short of miraculous. This is one very large music operating organization which is now most completely sold on the 70%-30% commission basis.
Letters of this type have been reaching The Cash Box steadily since The Cash Box suggested the 70%-30% commission basis. This suggestion was made not only because of the tremendously increased overhead which coinmen are now laboring under, but also because of the fact that this would better assure them a profitable existence in the post-war era when equipment would surely come to market, at least in the beginning, at much higher prices than ever before in the history of the business. It meant that many firms would, during this war period, be able to get along with smaller routes, and yet earn as much if not more than they ever did before. It meant that such a commission basis would assure the opportunity to accumulate sufficient financial reserve to act as a protection for the post-war era. It meant so much to the men in this industry that The Cash Box worked like a beaver, issue after issue, to get the men in this business started on this course for their own future betterment.

This past week a phone call from Pennsylvania told of another city's music operators meeting and agreeing to go on a 70%-30% commission basis. The leading coinmen in this city are sure winners. The Cash Box, as is the case everywhere in the country. In this long distance phone conversation they reported that they had read many of The Cash Box editorials and the gathering and that these greatly helped to win complete agreement. One man did not attend. Now the others learn that this man intends to go ahead on his old course at the 50%-50% basis. His insistence on going along so foolishly, when all the others are agreeable to this necessary and sounder business change, has decided these others to buy this man's route from him. As this caller stated, 'We figured it out and decided that even if we never sold the machines from his route and never used his locations, our first week's collections on this new 30% basis would bring us enough to buy his route. We would earn many times more than what this man wants in a short period of time. This would be extra money we never before received. We have already prepared letters to all the locations in our territory. We believe that the purchase of his route will be consummated within a day or two. And believe me, everyone of the men here want to send a big letter of real thanks to The Cash Box for pointing the way to how we can better ourselves.'

Throughout many important territories The Cash Box suggestion has been followed. From almost everyone of these territories have come letters telling how coinmen are getting down to a 70%-30% commission basis with their locations. Of course, where strictly amusement devices are concerned, there may be no need for cutting down to as low as 30% commission to the location. No regular supplies are needed each week. In the case of the music operator, needles, records, tubes, etc., etc, must be constantly supplied, and operating on a 50%-60% basis is therefore economically unsound from every standpoint. Slot machines, pinballs, consoles, 1-Balls, etc., can continue to operate on a 50%-50% basis, unless the coinman himself is smart enough to realize that today he is paying more for help, tires, gas, rent, etc., etc., and should get even such equipment down to a 70%-30% basis wherever possible.

The most important factor in all considering the 70%-30% commission basis is that of taxation. Because of the fact that each and every week sees a new tax bursting forth, here and there throughout the country, in some village, city, county, state — and with the Federal government, too, seeking for more and still more revenue, the coin machines trade must most definitely protect itself in advance from whatever taxes will be imposed upon it. It is therefore practically impossible to continue any operation on a 60%-50% commission basis and pay the increased overhead which most men are laboring under (and which all agree is surely greater than the 20% differential being asked for from the location) in addition to paying for the many and varied licenses.

There is no doubt that taxation will continue and will grow greater as the possibility of inflation grows greater. As more people earn more money and decide to buy more things — inflation becomes a terrible reality. To eliminate any such possibility the Federal government will simply be forced to tax away extra revenue. Therefore, to protect himself, the operator must arrange for a lower commission basis while he can do so with greater convenience and security, then wait until the very last second and find himself in a turmoil because of the rush to get down to 30% commission to the location.

Taxation and overhead aren't all that must be considered. Remember, too, that in the post-war era machines will come to market fast and furiously and new blood will pound away at locations with all they have. This will require that the present operator, the man who has continued in this business and therefore the man who created the nucleus, the backbone, for the future post-war growth of this industry if he desires to remain in this business will have to have a powerful financial reserve. He cannot possibly create that reserve if he is working against just about all he is taking in and not allowing for taxes, supplies, materials, overhead, changes of equipment etc., now. He must therefore get his locations down to this 30% commission basis to save himself for tomorrow. The one and best answer to increased or new taxes for any operator, for the higher cost of equipment after the war, for the monies he will need to purchase new equipment, for the best financial post-war position he can attain, is for him to instantly come down to this 30% commission basis to his locations.
Get down to 70%-50% today. Do yourself a real favor for which you will long be thankful. Call together all the others in your territory and it may amaze you to learn that they, too, want to go down to 30%, but like all human beings didn't want to be the first to start.

ENEMY SEIZED PATENTS

A great many progressive American business men have taken advantage of the patents now vested in the Alien Property Custodian. These are patents of enemy occupied and enemy countries. These patents can now be used and can be very easily obtained by the average firm in this industry seeking means for the manufacture of any certain product for the post-war era.

According to the Alien Property Custodian on licenses to use vested patents, "All those now are for sale, most of the vested patents are now available for use under simple licensing terms. Enemy patents, unless already exclusively licensed to American interests prior to vesting, are being licensed to any manufacturer on a non-exclusive royalty-free basis for the life of the patent. Other patents, vested from nationals of enemy-occupied countries and not previously licensed to American interests, are to be licensed for the life of the patent on a non-exclusive royalty-free basis until 6 months beyond the war after which reasonable royalties will be charged."

Some of the patents now obtainable reed with interest for the coin machines trade. For example: "Photo Electric Musical Instrument"; "Electric Music Instrument"; "Coin Assorter"; "Device for Sorting Coins"; "Coin Assorting Apparatus"; "Apparatus for Delivering Coins and Small Articles"; "Counter Mechanism"; "Weighing Mechanism"; "Total and Subtotal Mechanism"; "Zero Setting Mechanism"; "Bell Game"; "Target Indicator"; "Machine for Delivery of Tokens"; "Die Throwing Device"; "Dice Playing Apparatus"; "Ball Catching and Throwing Device"; "Means for Playing a Game of Skill"; "Game Apparatus"; "Flinging Device for Ball Games"; "Ball and Cup Game"; "Automatic Shooting Machine"; "Automatic Indicating Target"; "Gramophone for Playing Records on Endless Film"; "Pick Up Support"; "Phonograph"; Automatically and Continuously Playing Phonograph"; and a great many others which can prove of tremendous value to this industry.

These patents have come from such countries as Albania, Algeria, Austria, Belgium, Bulgaria, China, Czechoslovakia, Denmark, Estonia, France, Germany, Great Britain, Greece, Holland, Hungary, Italy, Japan, Latvia, Lithuania, Luxembourg, Netherlands, Norway, Poland, Rumania, San Marino, Straits Settlements, Thailand and Tunisia. They offer a wealth of marvelous working material for those who feel they would like to help develop new machines by using these basic patents which have already been granted and which are internationally recognized.

To obtain copies of these patents write to Commissioner of Patents, United States Patent Office, Washington 25, D.C. for printed copies of individual patents and drawings and specifications of vested patents applications. These are available at a cost of 10¢ each. Orders must specify the patent or serial number of each copy desired. To obtain the classified lists of patents and patent applications write to: Office of Alien Property Custodian, Chicago 3, Ill. It is best to first obtain the "Catalog of Vested Patents", which gives some idea of the patents held at the Alien Property Custodians Office and which also gives the patent numbers and serials. Do this prior to obtaining the drawings and patents themselves.

There is no doubt that some of these enemy seized patents will prove of great value to this industry. Many of them are concerned with amusement devices, Class No. 272 and Class No. 273. Automatic weighers come under Class No. 249. Coin Handling comes under Class No. 133. There are about 215 patents now registered under Class No. 272 and about 101 patents under Class No. 273. This gives some small idea of the number of patents seized by the Alien Property Custodian since the outbreak of the war. The Alien Property Custodian is continuing his search and each and every day he catches us up on some patents of enemy origin which is instantly seized and turned over for the very small sum of 10¢ to any American business man. The license fee, as noted above, to use this patent, is $15.00.

SIGN OF THE FUTURE

Patent No. 2,339,768 was granted this past week to Lewis C. Barnes, Rutland, Vt., assignor to The Howe Scale Co., Rutland, Vt., for a recording weighing scale with a printing mechanism. (Seals have proven themselves over a period of more than 45 years in this industry. Perhaps the scales after the war, of which this patent is indicative, will surpass anything as yet developed in this industry.)

Patent No. 2,339,823 was granted this past week to Frank H. Vogel, Columbus, O., assignor to The Columbus Vending Co., Columbus, O., for a coin detector to eliminate all spurious coins and slugs. (Columbus Vending Co. have long been known for their merchandisers. After the war this patent may appear on some of the new type merchandisers this industry is eagerly looking forward to seeing.)

Interesting is Patent No. 2,340,150 granted to Harry R. Van Derator, assignor to Telephone Answering & Recording Co., New York, for a private branch telephone system employing phonographs. (The development of telephone music after the war is expected to reach its highest peak. This patent may help bring about some new ideas.)

THE CONFIDENTIAL PRICE LISTS
AN EXCLUSIVE MERCHANDISING SERVICE FOR THE COIN MACHINES INDUSTRY
ISSUED EVERY WEEK BY: THE CASH BOX, 381 FOURTH AVE., NEW YORK 16, N.Y.

FOREWORD

Many times, wide differences appear in the high and low prices of certain equipment. Like any true reporter, The Confidential Price Lists can only feature the market prices as they are quoted. The Confidential Price Lists act exactly the same as the market quotation board at the stock exchange—posting the prices exactly as they are quoted for each week, regardless of how much they may seem to be out of line. Some machine prices do not change for months. The Confidential Price Lists, rather than show no price for the week, retain the last known quotations for such equipment so that the subscriber at least has the last known quoted prices as a basis to work with. Prices continue to be very widely divergent these days. Someone on the West Coast may feel a certain machine worth $150.00 whereas someone on the East Coast may think it worth but $75.00. Of course, condition, serial, appearance, demand, territory, quantity, etc., must all be taken into consideration. The Confidential Price Lists report each quotation exactly as it is made and depend on the subscriber to make average price adjustment to fit the peculiarities of his own territory.

METHOD

The Confidential Price Lists are to be read as follows: First price listed is lowest price for the week; Second price listed is highest price for the week; Where only one price appears this should be considered lowest price.

CODE

CHECK THIS CODE CAREFULLY. BECOME ACQUAINTED WITH EACH ONE OF THE CODE NUMBERS AND WHAT THEY SIGNIFY. THESE CODE NUMBERS APPEAR IN FRONT OF THE NAME OF EACH MACHINE.

1. MEANS PRICE WENT UP.
2. MEANS PRICE WENT DOWN.
3. MEANS MACHINE JUST ADDED TO LIST.
4. MEANS PRICES WENT UP AND DOWN SAME WEEK.
5. MEANS PRICES REMAINED SAME AS IN PAST WEEK'S ISSUE.
6. MEANS NO PRICES QUOTED FOR PAST TWO WEEKS.
7. MEANS NO PRICES QUOTED FOR PAST THREE WEEKS.
8. MEANS NO PRICES QUOTED FOR PAST FOUR WEEKS OR LONGER.

IMPORTANT

Machines underlined mean these were most active in trading this past week.

NOTICE! March, 1942. Market Prices for Wholesalers as per GMPR of OPA appeared in September 7, 1943 issue. Reprints are available.
