"The Coin Machines Merry-Go-Round"
By Bill Gersh

INCOME TAXES

For sometime now The Cash Box has been debating whether or not to publish this item regarding income tax. There is no doubt anymore of the fact that this is today one of the most delicate as well as one of the most potent problems in this industry.

Investigations already under way have started a great many coinmen to thinking about the fact that the Federal government really wants a true and correct statement from them regarding their incomes. And this is only a beginning. There is no doubt that unless certain members of this industry definitely recognize the fact that Uncle Sam will continue with his present high income tax rate (perhaps even increase this rate as time goes on) and that income tax is the most outstanding source of revenue of this nation, that they will fare rather badly in the outcome, unless they reverse their present tactics.

There is no use in beasting about the bush. There is also no use in attempting to becloud or rosy-paint the situation in any fashion. The truth must come out sooner or later. And due to the fact that The Cash Box is in the position, because of its extremely confidential nature which makes it possible to "talk out loud", it is going to review a problem that is growing more serious.

Rather than see the wrath of the Federal government pounce down upon all in this industry because of a very few it is the sincere and honest belief of The Cash Box that this is the time to bring the situation, as it exists, into the open.

This is not an item written on the whim or fancy of something which might happen. This is, instead, an item that has been suggested to The Cash Box by a great many leaders in this industry who look to this publication to courageously come out with the truth.

This is the time to advise the trade that those who haven't fully complied with the Federal Income Tax Laws not only endanger themselves, but as surely as they do that, they endanger every single person in this industry. They will be giving this business a black eye that may prove entirely impossible to eradicate.

Perhaps some of these men do not understand the full import of income taxes, as far as the Federal government is concerned. Perhaps, again, some of these men have such poor accounting and bookkeeping systems that they are ignorantly overlooking the situation. If they are not taking proper care of their books, they most certainly should learn how to at this late stage.

The Cash Box is convinced that the greater majority of the men engaged in this industry conduct their businesses on a true businesslike basis and are honestly paying whatever taxes they should pay, happily and openly and thereby protecting everyone else in this industry.

But there are still a few who overlook the fact that this business, like any other, coming under the scrutiny of the income tax authorities, can create the most unwholesome type of notoriety, as well as bring about a condition that will raise hell with all progress made to date.

The other day the attention of this medium was called to the fact that one coinman who had paid for 400 phonos in two years' time reported an income tax of less than $1,800 this past year. There is no doubt that the investigation which is already being conducted in this case will incriminate this coinman. And will also cause great distress for many others. Those who realize what income it takes to pay for 400 phonos in two years' time must also realize what a wide variance there is in the declaration of only $1,800 tax for an entire year for such income at present tax rates.

Many coinmen have and are entering into the armed services. Prior to so doing they are selling their routes. In such sales, in many instances, the routes are sold to solid, substantial business men who have long made it a practice to keep careful
and honest records of their incomes. By keeping books and maintaining a very fine tax system, they suddenly declare an income tax many, many times above what the former owner of the same route declared.

Yet these new men are actually novices in this industry. Therefore it just isn't reasonable to assume that they should earn more than the people who started and built the route, and who kept it going for some years prior to its sale. The result is that when such a tremendously increased tax is reported, an investigation is instantly started to learn why the former owner reported such a small income accruing from the same route. And this, too, most naturally stirs up much heat.

Then again, similar size routes in the very same territory report widely varied incomes. This isn't logic. It just doesn't fit into the present business picture. When one firm with the very same, as well as the very same number of machines reports an income many, many times greater than another firm in the very same territory with a similar number of machines, well, it just doesn't fit.

This again creates investigations. And the result is that someone is going to be aggravated through a most thorough questioning. But even this would be all right were it just this individual case. Instead, this reflects upon all in this industry, right or wrong.

Another method of judgment reported used by the Federal authorities is that of machines in army camps. Here there are machines used exclusively by soldiers, getting only a certain limited play and reporting certain high weekly income.

Therefore, according to all logical and established business judgment, cafes and taverns in the same section, getting tremendously more hours of action as well as bigger and better play, should most certainly be able to report greater income. Yet many such reports have sometimes shown less income.

This has greatly puzzled investigators in the Income Tax Department of the Federal government. And again the result is that the entire industry is placed under keen scrutiny. A most careful and thorough and deep searching scrutiny. And one that reflects upon this business with anything but honor.

The most flagrant of all these examples is that of a route of 85 phonos wherein the report was for $247 income tax for this entire past year. And in the very same territory, a similar 85 machines route, paid better than $3,000 tax for the year.

Here again, of course, is an individual case. There is a remote possibility that both of these are right. But those who know this industry and understand present tax take will definitely side against such a report as $247 income tax for an entire year's take on 85 phonos.

The attitude that, "Well, I'm doing the right thing, and if the other guy wants to do the wrong thing, that's his business", is definitely out of place when the good and welfare of the entire industry is considered. It isn't just one man, but an entire industry that is involved.

It certainly is not pleasant to have to go thru an investigation that can last for months and listen to arguments all day long, each and every day, lose time from business, lose interest in what is going on, suffer worry and sleeplessness, be subject to continued and continued, more and still more questions, involve friends and yet learn, in the end, that the fine received, if not an incriminating jail sentence, is much, much greater than what could have been honestly paid in the beginning.

The few in this industry who have failed to recognize these facts will most suddenly have these thrust upon them. It will be pushed down their throats. And many, many others will have to suffer investigations. It is criminal to think of what may happen in regard to increased taxes to this business unless a certain few men in this industry are awakened to the fact that there is a Federal government that knows how to handle income tax dodgers.

There is nothing like facing the facts. There is nothing like telling the truth. There is nothing like coming out cleanly with what will make for a greater and better and more respected industry in every regard.

We, at The Cash Box, expect that some unscrupulous few persons will use this article in an attempt to castigate us. We would be very foolish not to expect this to happen. We also expect that there will be some persons nasty enough to use this item as the basis for a whispering campaign. We've been thru that more than once.
"The Coin Machines Merry-Go-Round"

But we do know that the great, great majority of the men engaged in this industry realize that this is written from the heart. And written because of our true anxiety to help cure a situation which is acute.

TELEVISION FEARS

The advance promotional publicity which has come about since the first announcements of the development of new television factors, and also that television studios are ready to be set up at strategic points throughout the nation, has brought many letters and questions in regard to what effect television may have on the future of the automatic music industry.

One large and noted eastern music man stated, "I can remember, prior to the war, when television sets were being sold to the bars and grills in our territory on a time payment plan. Streamers were given to the storekeepers and these were pasted on the outside windows to attract customers by advising them that regular television programs could be heard and seen at certain hours. Noted sports events were also announced on the windows and the passing public notified by these signs that they could come in at a certain hour and actually see and hear the games.

"The result was that during the television broadcasts our machines were idle. In fact we found an average 20 percent drop in our collections wherever these television sets were placed. Now with the greater development of television, and also with the fact that television studios expect to broadcast 24 hours during the day, catching all important political, amusement and sporting events in addition to regular programs, we fear that this is going to cut heavily into the future of the phonos."

"We are even of the belief that this may have the effect of cutting us off from a large number of locations we are now in, for it just won't pay us to continue on in these spots. We certainly don't want to go back to the old weekly take. Our overhead and the cost of supplies and parts is too high to operate in $3.00 or $5.00 locations. Certainly our agents won't work on a 20% commission basis from such spots."

"Your idea of the 70%-30% commission basis somewhat takes care of this possible drop in our profits in the future. But it is still not the complete answer. We feel that this time television is not just going to prove itself a novelty and die a natural death like it did the last time. We believe that with the great electronic developments which have come about, and of which we have been reading in all the newspapers and magazines, that television is now ready to go ahead faster than ever before. Plenty of money will be spent to put it over. Therefore we are worried about what the future holds for the music operators."

The above is similar to many other questions which have been asked of The Cash Box in past months. There is no doubt that prior to the war the first television sets placed on boxes back of the bars, allowing the majority of the patrons to see the machines in action, did have some effect on collections. But this was extremely short lived.

In the first place the location owners themselves removed the television sets for the simple reason that while the programs were under way the sale of liquor and food dropped to an alarmingly low point, whereas with the automatic phonos this did not happen. In fact, the phonos helped stimulate even greater sales.

Television may work out very well in the average home during the evening hours when the family is all together and ready to toss aside its evening papers or books or magazines and just gaze at the television screen. There is no doubt, tho', that as a commercial business stimulator, television is not yet the answer and will not hurt the automatic phonos unless many, many great changes enter into the picture as yet unannounced.

The educational job which television has before it is truly mountainous. The average engineer believes, provided television continues its progressive development pace, that it will be ten long years before it will compete in any fashion whatsoever with the present home radio and phonograph. And especially many more years before it can compete with the automatic phono in the average commercial location.
Talking Out Loud

Dear Editor:

"This is the result of my investigation about 112 concerns who were not noted among holders of phonos in the post-war era."

"As you know, the following concerns were manufacturing phonos prior to the war: The Phonograph Company; J. P. Seeburg Corp.; Rock-Ola Manufacturing Corp.; Mill Industries, Inc.; Gable Mfg. Corp.; A.M.I. Corp.

"Therefore, I sent my operatives out to locate the six remaining concerns reported contemplating the manufacture of phonos. After a great deal of sharp detecting, the following report is weekly submitted:

"Shickleybar Phonograph Co. (Plans are uncertain at this stage. But the president of this company claims that he will have a phone in their experimental department that will outdraw any phone ever made. This is due primarily to the fact that this phone will dispense with every player. A dead Nazi will be vended. And Shickley thinks there will be enough of them to keep the players appliance going for many years.)"

"Twin Music Manufacturing Co. (This was a difficult assignment, as the operative had to travel a great many miles to get this interview. And we are advised by him that he has a machine. It will be strictly a cellar job for outhouses, as he thinks he will be plenty deep down in the outhouse when the war is over.)"

"Gearing Mechanical Music Co. (They have a model, and what a model, size 62. It will go on the production line when the war is over. It will be made to eliminate the difficulties operators have had in transporting equipment and it will also eliminate the stroller for the player. This machine will be made in the shape of a ball. It will be completely illuminated. In fact, it will be the only phone with 100% illumination. It will be rolled over to the customers from table to table, or pushed along the bar.)"

"Masolini Manufacturing Corp. (This company contemplated the manufacture of a new phone. But Masou's experiences are not favorable, and they now think the machine will not be salable, due to the fact that it has been used with gain.)"

"At this point my operatives claimed they couldn't find any more tangible leads. All the rest they claim is simply rumors and hearsay. If there are two more, wasn't that the authentic information actually put into print? I'm taking the heat off this search and am going after these two myself.

"From the dateline on this letter you will note that I'm now somewhere on the high seas. Just where the hell I am I don't yet know. But don't fret that story you, I'm going to find these two things yet, I hope."

Respectfully submitted,

HERCULES NICK PIESKERSHOMES

Remember Army Coinmen

Roger B. Housoup, (Hougen Novelty Co., Idaho Falls, Idaho) who is now in the Army and located at Sheppard Field, Texas, writes us as follows, "When you're in the Army it's sure great to remember someone at home. I want to thank you for the copy of The Cash Box you sent me.

"The coin machines industry plays a big part in Army entertainment. Here we have at least one gun and one pin table in every P.X."

(By "P.X." Roger means, "Post Exchange"). All veteran should remember to write to everyone in the industry that is now in the Army or Navy.

The Customers Always Write

Dear Bill:

"I have been watching something and just thought I should compliment you on it."

"Now, as short as equipment is, that free ad idea about the best thing that ever came out of this business. It brings out a lot of machines and hidden parts that never be advertised only thru your small bros."

"We have had a Super Rockola with mottled green left corner plastic broken for three months. I look in The Cash Box and there is a fellow advertising this very same plastic.

"Also the smaller coinmen advertise gnomes that would otherwise be stored and forgotten."

L. F. Trippe, Ideal Novelty Co., St. Louis, Mo.

Dear Bill:

"I'm leaving on my vacation today, but I have discussed with Jack the necessity of all of our branches subscribing to The Cash Box and sending data in their hands at the same time. Therefore will you please send to the following three branch offices, the weekly copy?

"Send the bill to Portland and we will see that the check is sent promptly on receipt of same."

L. Helen Cusson, Jack R. Moore Company, Portland, Ore.

The 30% Tax Brings Phonos to Front

The 36% cabaret tax, which is stirring up the ire of so many in the entertainment industry, and which has flooded the House Ways and Means Committee in Washington with a tremendous number of protests from night club owners, theatrical associations, the hotel owners association, etc., is, stimulating some tavern owners to ingeniously publicizing their coin operated phonos.

Letters received from subscribers advise of various ingenious signs suddenly appearing through out their locations. One Chicago subscriber reported that a number of his phonos spots have put the following sticker in their windows:

"No Ammunition Tax Here—Still Gets You A Popular Song."

One of these type of signs is reported to have elicited big with the trade in one New York spot. This subscriber reports this sign to read, "We'll play the Juke Box — You Buy The Drinks — No 30% Tax Here — Hell, No.

Others of like character are also reported by other subscribers thrashing the country. The general idea seems to be to advise patrons that the 30% tax does not apply in their places.

"Dance floors are covered", one coinman reports, "and the patrons simply forgo the pleasure of getting out on the floor and shaking their toses about as they used to. But, they just don't want that additional 30% booked onto their drinks. They would much rather listen to a juke box and get mellowed without kicking in more than they have to nowadays for a good drink."

Call for Cooperation of Trade on Compiling Second Anniversary Issue of The Cash Box

We're calling on all the trade to cooperate in the compiling of the material for the Second Anniversary Issue of The Cash Box. If we can get short, speedy weeks from now this big issue will be off the presses and in the hands of all coinmen everywhere in the nation. (The Cash Box, Second Anniversary Issue, goes to press on June 8, 1944.)

There is still plenty of time for every member of this industry to get into this issue by presenting whatever he has on his chest for all to read. This issue will not only review the two past turbulent years, but also hopes to present the outlook for the coming year, and especially for the post-war era.

This is one time wherein everyone engaged in this industry is urged to send in whatever they think is most beneficial to the trade at this time. Whatever you believe the future holds for this industry should be written and sent in right now.

The coming year will probably present a great many new problems which this business had best prepare itself for right now. At the same time there are at present a great many questions rapping in the minds of many now engaged in this industry. These should and can be well presented in this very outstanding issue.

We would tremendously appreciate receiving all editorial material as far in advance as possible. We should like very much to see the Second Anniversary Issue of The Cash Box actually written by and for the members of this industry. Such an issue is bound to prove not only unique, but of great historical value.

COIN MACHINE COWGIRL IN RODEO CONTEST

Jimmie Jones, coin machine cowgirl of Jones Coin Machines, Stephenville, Texas, enclosed this snapshot with the following interesting statement: "I am enclosing some snapshots of my trained cow pony which I use in rodeo contests. These pictures were taken during a recent World Championship Rodeo in Dublin, Texas." That hand tailed Mexican Silver Stallion, with which Jimmie is using is reported to be worth plenty of green. She also writes that she'll be sending us a picture of her prize Palomino soon, too. By the way you're buying or selling Shelton pones—get in touch with Jimmie, she raises hundreds of 'em.

MITCHELL NOVELTY COMPANY
1629 W. MITCHELL ST. (TEL: MITCHELL 3254) MILWAUKEE, 4, WIS.
NOW FLYING OVER HOME
OF FAMOUS Bally
GAMES AND VENDERS

Production at the "Bally" plant is one hundred per cent for Uncle Sam. Night and day, seven days a week, the "Bally" organization is building battle equipment for the Army and the Navy, proving that the skill developed in peace-time design and construction of coin-operated games and venders is a valuable asset to America in time of war.

Plans of the "Bally" organization call for quick production of new games and venders immediately after victory ... and for exploitation of the marvelous new electronic principles developed by war-time technology. In the post-war era, as in the past, "you can bank on Bally" for the newest in money-making equipment.

Lion Manufacturing Corporation, manufacturers of "Bally" games and venders, distributed by Bally Manufacturing Company, 2640 Belmont Avenue, Chicago, 18, Illinois.

"AMASKO"
THE NEW LIQUID RUBBER THAT ELIMINATES "SHORTS"
DID YOU EVER HAVE A "SHORT" ON YOUR FOUR BELLS OR THREE BELLS OR ANY OTHER
CONSOLE OR PIN GAME?
DID A NICKEL EVER FALL OUT AND LAND ON TWO WIRES AND CAUSE A TUBE TO GO
EMPTY, OR GIVE FREE PLAYS, OR BLOW A FUSE?
IF THIS HAS NEVER HAPPENED TO YOU --- BOY, YOU'RE REALLY LUCKY!!! IF IT
DID, AND YOU KNOW WHAT A HEADACHE THIS WAS - GET A CAN OF "AMASKO" TODAY!!!

AMASKO is a liquid that you apply with a brush to all soldered connections
...it hardens in a few minutes...and GOOD BYE "SHORT"s...if you want to remove it at
any time...just pull it off with your fingers...it pulls off like thin rubber...IT
IS RUBBER....PRE-WAR, TOO...it's transparent and you can use it for a hundred other things...
a single can of "AMASKO" will short-proof 50 to 100 consoles, or what have you.
SEND $5.00 FOR A COMPLETE CAN TODAY...money back if dissatisfied in any way
whatev...SAVE TIME...SAVE SERVICE CALLS...SAVE MONEY...
