TODAY'S BIG MONEY MAKER

Don't get us wrong. The operation of automatic phonographs is no get-rich-quick business. It's a legitimate business paying a normal profit—but there IS a marked difference in the earning power of one model phonograph as against another.

If you want to lock a location's doors to competition, make yourself the fair-haired boy with the location owner—take in more money than any previous instrument ever produced for you, just move in a Modernized Wurlitzer. Patrons can't keep their eyes off it or their nickels, dimes and quarters out of it.

Mechanical selectors make Modernized Wurlitzers as easy to service as they are to look at. Want to see action? See your Wurlitzer Distributor about converting Wurlitzer Models 24, 500, 600, 700 or 800 into big-money-making Modernized Wurlitzers. The Rudolph Wurlitzer* Company, North Tonawanda, New York.

SPRING 1945
BRINGS PROMISE OF A GREATER TOMORROW!
OPTIMISM

Spring always brings with it optimism and a warm belief in the future.

This Spring of 1945, tho another war season, greets this industry with much to be optimistic about. This industry has always been, and will probably always continue to be, among the most optimistic of all the industries in this nation.

Regardless of wartime restrictions this industry continues to rapturously look forward to peacetime when this trade will see its greatest growth.

The burning crucible of war has purged this industry. What remains will gain greatness. This remainder has proven to itself, as well as to others, that it is an integral and important part of the great American entertainment and merchandising scenes.

EQUIPMENT

The machines of this industry have a unique value all their own. The nation at large realizes that the machines of this industry helped to build and maintain morale. And did so economically.

This field has won over many good business men. Among these are many conservative financiers. Coin operated machines proved to be a profitable business when correctly handled by specialists.

MUSIC

The music division of this industry has won itself a high place among the leading music fields. The country wants this coin operated music industry to continue to grow.

The average location owner has come to accept coin operated music as an integral and necessary part of his business. Those few spots which believed that coin operated music was beneath the dignity of their clientele, have changed their views in this regard.

The music machines field is sure to be among the very first to grow rapidly in the post-war period. This is one field that is eager to get its post-war plans into action.

VENDERS

The merchandise vending machines of this industry won great respect from all the nation during this war period. The service they did, and are continuing to render the public at large, during this manpower scarcity, has created a new concept of their value.

There is a boom already getting under way in this field. This will surely place merchandising equipment far above whatever high spot it ever formerly occupied. This field may bring this industry its most outstanding and amazing developments.

SERVICE

The service machines field, still led by the weighting scales, also proved itself profitable during this wartime period. Scales have developed into a highly specialized business.

Those who are engaged in the service machines division of this business eagerly seek new equipment. They all desire to expand and enlarge their present operations.

ARCADES

Th arcade business naturally opens with the Spring season. It begins its buying at this time of the year and continues on until all the vacation spots are in full action.

The arcade business, too, proved itself during this wartime period. There are many coins, today, all over the nation, who will continue to be arcade owners, regardless of what else they may tackle when peace arrives.

AMUSEMENT

There is no need to give great discussion to the amusement machines division of this industry and its unusual accomplishments during this wartime period. This is well known to all in the trade. Amusement machines, by their very numbers alone, continue to lead the field.

They have won a tremendous following. They have attracted the attention of the armed services and many of these were purchased for entertainment of the troops.

In the post-war era amusement machines will once again, by their novelty, their unique and economical entertainment, as well as the huge numbers and dominance in all locations, maintain the leading interest of the trade.

WAR

In short, every division of the coin operated machines industry begins to feel the warming influence of Spring. All loosen up with the need for replacement, for buying, and for selling of equipment.

This being a wartime Spring, the field cannot as yet fully open. No new equipment will be seen. But this is not hampering the continued growth and development of this industry. Nor is it beclouding the vision of what tomorrow will bring.

This Spring of 1945, more than any other Spring season since war began, gives promise of an end to this bloody conflict. Therefore this Spring season brings more optimism to this industry.

EXPANSION

Many are already completing plans for their first moves when this war ends. Some have even gone to the extent of already starting some of their plans into action.

Some are already rebuilding their quarters. Others have taken on new leases. Some intend to, and already are, constructing their own buildings. Many have arranged for larger routes. Others have, in turn, rid themselves of routes to give their time completely to other divisions of this field.

The trade has come to realize that much must be done. And done just as soon as possible to assure itself that no obstacles will remain in its path for the post-war period.
TAX COUNCIL

There is today a great and growing demand throughout the trade for the creation of a National Tax Council. Many leading figures in this industry have come forth to encourage the creation of such a body for this industry. A National Tax Council is sure to become fact. And perhaps even before peace arrives.

CREDIT BUREAU

A National Coin Machines Credit Bureau will one of these days also come into being. At the present time, with most in this industry financially capable of handling deals without resort to credit arrangements, this plan has somewhat dimmed in importance.

It is sure to return as new equipment again begins to be manufactured. There is then no doubt that the many who formerly approved it will once again come to the fore to assure its creation.

There always was a great need for a credit bureau in this field. This need was most noticeable as the war started. Men began to deal across the nation who had formerly never dealt beyond the confines of their own territory. A credit bureau is necessary so that financial problems will never again come up to estrange men in this business.

PUBLIC RELATIONS

The need for a Public Relations Bureau is agreed to most definitely and even fervently by all in the trade. Such a bureau can withhold evil publicity which is constantly attacking this business.

It can educate the public to the fact that this business is no different from any other means men adopt to earn a livelihood. That this is not an evil industry. That it desires most earnestly to go ahead and to reach the heights which other businesses have reached.

This industry should be better explained to the public, the press and all business men, as well as to crusaders, politicians and blue-noses. A Public Relations Bureau will most definitely be needed when this industry once again reopens its arms to accept new men with new investments to make it greater than it ever has been before.

DISTRIBUTORS’ FORUM

The idea for a National Distributors’ Forum is beginning to take hold of the wholesalers in this business. The trade has come to realize that with its wholesale division a strong and unified body it is bound to have a more solid basis on which to build.

The wholesalers, meeting among themselves, creating rules and regulations for their own recognition, and at the same time instituting a code of ethics and policy, will gain this division of the industry much greater respect. This is admitted to be a great need by the present wholesalers themselves.

A National Distributors’ Forum should become a fact as soon as is possible. Such a forum can more rapidly help this entire industry to post-war greatness. Leading wholesalers, from everywhere in the nation, have written to The Cash Box that regardless of how many will attend the first meeting, a meeting should be called.

DRIFTING

Most serious, and therefore all important to the trade, is the fact that slowly but surely each division of this industry is beginning to drift apart. Unless the industry holds together it will be weakened to a point where none of its individual divisions will be able to benefit by concerted and strong effort of numbers and finance.

The coin operated music machines man is today of the belief that his business removes him from the amusement machines man. Yet a great many who are engaged with amusement equipment are also music men.

These music men are beginning to drift away from the other divisions of this trade. This breaks up the numerical and financial strength which is only possible by the coalition of all groups into a single unit.

The merchandise machines men are also drifting apart from both the music and amusement fields. It may be their belief that their division does not coincide for closer contact with these other groups. Unity, and thereby great strength, is only possible with complete collaboration of all members of this coin operated machines industry.

BOARD OF TRADE

What is therefore needed, and what The Cash Box has urged almost from its very first issue, is a National Coin Machines Board of Trade wherein all these divisions of this business would have a common meeting ground. Regardless of their individual beliefs and sentiments this industry should maintain its numerical strength.

The symbol of this industry is the coin chute. The one integral part of all this business regardless whether it is a cigarette machine, beverage vender, scale, slot machine, phonograph, or any other device — it must have that coin chute. And if it has a coin chute — then it should be a part of a National Coin Machines Board of Trade.

All associations now existent, all manufacturers, distributors, jobbers and operators, all that are engaged in this business, or are allied to it in any fashion whatsoever, should be members of a National Coin Machines Board of Trade. Such an organization should be the common meeting ground for all the membership of this industry.

TEMPORARY RESTRICTIONS

All these organizations, so far outlined, are needed by this industry. And all this is more keenly felt as the war Spring of 1945 comes into being.

The wartime restrictions which have been endured by all in this business; the gas and tire rationing, the lack of manpower and materials, the new midnight closing curfew, the many other restrictions too numerous to mention, all are but temporary.

There has been a rapid growth of ever greater taxation all over the nation. Much territory has closed. Likewise, territory has opened. Revamping of machines has become big business. The lack of machines is keenly felt. The need for new equipment grows greater every day. The jumps in prices are accepted. There is a growing fever for expansion. There is buying and selling of routes at a wholesale pace.
All this has come into being during this hectic war period. This is gradually culminating itself into a grand finale. And this finale will be the opening of production reconversion which will finish much that now seems to be so important. But, this will then make even more important the organizations listed here.

GOING AHEAD

This Spring of 1945 brings great hope to all this trade. There is an undercurrent belief that the industry is already reaching out to recapture its former greatness. Tho it is a small and highly concentrated business today, it looks to the future when it can once again spread forth and become the giant industry it should always have been.

This is all most heartening to The Cash Box because it entered into this field with youthful zest when others ran from it. It created a strong medium for exchange of national information. It traveled about the country urging the trade to continue and not to despair. It preached that this field would grow and continue to grow even during wartime.

It has, with great pleasure, seen its predictions come true. It continues on the premise that this growth is but like a pebble on a great beach compared to what the future holds in store for this industry.

Many suggestions which The Cash Box has brought to this trade are taking strong hold. This industry at last realizes that its inner affairs are its own, and not the business of outsiders. This trade has also come to the conclusion that its growth will depend in great measure on how it educates its new blood and what intelligence it brings into its ranks.

The days of quick “sucker” money are over. The prices of present used machines, and especially the prices of the new post-war equipment, are expected to be such that only financially capable and intelligent business men can be brought into the post-war picture.

INFANCY

This business is finding itself. It is beginning to have greater faith and confidence in itself. It believes in itself. It knows now that regardless of the torment and hell of war it can go ahead. It is a trade unique in the fact that it stands on the threshold of the greatest promise any industry has ever had.

Here is a business that believed it had at last come out of its swaddling clothes, out of its infancy, and was now ready to plunge ahead. This war churred it thru a crucible of fire.

This war cleaned out the unbeliever. This war purged from it that which was slag. And now this industry stands on this mighty threshold with wide and wondering eyes. Still but an infant, and with all the future as yet ahead of it.

This trade has discovered itself. It knows its future is ahead of it. This means much to every man now engaged in this business. It means that to make sure it grows properly to the greatness all want it to reach — it must be correctly guided.

It must be carefully nurtured and fed. It must become the one complete guiding policy of this industry, to do itself good and to look forward to continue doing itself good by carefully watching itself and sweeping away from it those who would harm it.

TIME AND YEAR

The Spring of 1945 is tremendously important in the history of this industry. This can be the time and the year when this trade will arrange for its proper growth by the creation of such bodies of men, as outlined herein, that will enable it to proceed with greater and more assured confidence into the future.

This is the time for this industry, as the war in Europe draws to an end, to prepare for a great tomorrow. This trade should now arrange to carefully guide every step this infant industry will take into the future. Just as a baby is held, and watched, and guided in its first footsteps — so should this industry now be carefully guided as it enters into this new post-war world.

FUTURE

The industry has before it a great future. A future that is sure to fill its every desire. The membership of this industry today, tho small, is a strong nucleus, a good backbone for its future growth. These are the men who endured thru this strenuous wartime period.

These are the men who were able to stick it out and profited because they did. These are the men who had faith in this industry. Their faith is now being rewarded. Their faith will be even more rewarded if they will now engage themselves in creating the necessary organizations to make sure that this industry grows to greatness — correctly.

PARALLEL

A good parallel to this is the movie industry. Not so many years ago this was an industry in ferment. An industry losing respect each day. Until, at last, the few who remained fought hard to obtain a unifying influence, and placed at the head of that industry a nationally known figure who has helped it to rise from a “Nickelodeon” to such greatness that its power is now universal.

UNITY

This business, too, is in ferment. It is trying to get together to make sure of its future. It must once and for all dispel suspicions and greed from its mind. It must believe.

It must believe that all others engaged in this trade want to rise too. It must feel that by complete understanding, by a better knowledge of itself from among its own membership, will it rise to such level that its prestige and future greatness will be assured.

Only by unification can it today, and in the future, purge from itself any element that wishes to harm it. Only by close cooperation among its own membership can it assure itself the same success that was gained by the close cooperation of this nation with its allies in this war.

Now is the time — this Spring of 1945 — to start the wheels into motion to help make this industry greater than it has ever been. And by such greatness make each individual member of this business great, too.

CURFEW LOWERS TAKE ABOUT 10% OVER NATION
Phonos Are Hardest Hit. Big Cities Suffer Most. Coinmen Believe Loss Will Level Off

NEW YORK — The effect of James F. Byrnes’ midnight curfew began to pour into The Cash Box this past week as first collections were made from machines everywhere. The loss averaged about 10% over the nation.

It was learned that phones were the most affected by the curfew. The big cities suffered the worst. It was believed by leading coinmen that the loss would level itself off within a few weeks and that return to normal collections could then begin.

Cabarets in this city cried that they had lost over 30% take for the week. Theatres were mad. Competition between whether the general public will now patronize the theatre or a nite club is what irks both circles here.

Coinmen in the heart of Manhattan, especially the music machines men, felt the loss of take severely. Many claiming that averages were down as much as 35 per cent.

Atlantic City coinmen claimed that the take dropped over 20% in most spots. The belief is, too, that this will come back with the rush of summer resort business.

Throughout the rest of the country, with the exception of the metropolitan centers, take held up as well as could be expected with many claiming that play was actually increasing in the early evening hours.

ERAS OF PROSPERITY AHEAD FOR TRADE

C. F. (Cliff) Baille

SYRACUSE, N. Y.—C. F. (Cliff) Baille, Vice-President of Rex Manufacturing and Sales Corp., this city, issued the following to the trade this week.

“Like all good Americans the first thought in the mind of every coin machines man is, ‘Are we doing everything possible to hasten V-Day and to bring the boys back home again?’

“His next thought is, ‘What does the post-war future of the coin machines industry hold for me and how will my personal business be affected?’

“The answer is that every member of this business is going to enjoy an era of prosperity that was never heretofore dreamed of. Our millions of service men have become coin machine minded and they have long enjoyed playing machines, but war time changes. Upon their return play will greatly increase in every location.

“The manufacturers in this great industry can be depended upon to supply the trade in the post-war era with machines that have stilled and new ideas. Players’ interest will be kept at a high peak for years to come.

“The operator is not going to suffer a large loss on old equipment. He will gradually replace his old machines with new ones over a period of time.”

ARIZONA TAX BILLS

LITTLE ROCK, ARK.—Flash report just received to the effect that the tax bills here asking for 33 1/3% percent of the gross take from phonos and amusement games have been killed in committee.

INDUSTRY CAN BE PROUD OF WAR RECORD

VINCE SHAY IS PRES. OF MILLS

CHICAGO — An old-timer in the coin machine field (23 years) Vincent C. “Vince” Shay has been elected President of the newly formed Mills Novelty Company.

His name and fame spread from small towns to big cities early in his career, and if an operator had a problem he took it for granted that a letter to Vince would bring the answer to his problem.

This newly organized Mills Novelty Company will formulate, build and sell all types of amusement, Bell and Vender machines, Assisting Vince in his new enterprise are Arthur V. Cooley, Vice President; John P. Ryan, Treasurer; Elmer E. Jacobson, Secretary; P. A. Tennis, Assistant Treasurer. All of these men are well acquainted with the coin machine field.

“MAKE A FRIEND”

Ray T. Moloney

CHICAGO — Ray T. Moloney, President of Bally Manufacturing Co., this city, issued the following statement.

“As far as post-war production is concerned, our biggest job at the ‘Bally’ plant is to speed up the arrival of the post-war period—by pushing war production harder than ever. If by keeping faster than anyone would think, we here at ‘Bally’ can shorten the war by just one minute and thereby bring just one more American fighter home before the war—something we want to do and will do until final victory.

“However, I can assure you that ‘Bally’ will not be asleep at the switch when the okay comes through for coin-machine production. The tremendously efficient methods we have developed in the production of war material will enable us to convert back to peace-time production in double quick time. During the war, high precision production has become an everyday matter for our engineers and production men, which means ‘Bally’ quality— ruggedness and trouble-free operation — will be at higher standard than ever.

“Our engineers have also salted away some really knock-out ideas for games—ideas which have developed out of our experience in war production. Those ideas will blossom out quickly as ‘Bally’ hits of tomorrow, after victory is won.

“I am not going to stick my neck out as to how soon after victory ‘Bally’ games will be rolling off the assembly line. After all, companies may depend a lot on situation in respect to governmental regulations. But I’ll guarantee that new ‘Bally’ games will be on location on a lot faster than anything I thought was possible. And another thing the trade can count on. Just as the ‘Bally’ plant now boasts the A. F. of Excellence, ‘Bally’ games will carry a great big “E” for Earnings Power.”

Foreword

Many times, wide differences appear in the high and low prices of certain equipment. Like any true reporter The Confidential Price Lists can only feature the market prices as they are quoted. The Confidential Price Lists act exactly the same as the market quotation board at the Stock Exchange—posting the prices exactly as they are quoted for the past week, regardless of how much they may seem to be out of line. Some machine prices do not change for months. The Confidential Price Lists, rather than show no price, retain the last known quotations for such equipment so that the subscriber at least has the last known quoted prices as a basis to work with. Prices continue to be very widely divergent these days. Someone on the West Coast may feel a certain machine worth $150.00 whereas someone on the East Coast may think it worth but $75.00. Of course, condition, serial, appearance, demand, territory, quantity, etc., must all be taken into consideration. The Confidential Price Lists report each quotation exactly as it is made and depend on the subscriber to make average price adjustment to fit the peculiarities of his own territory.

Method

The Confidential Price Lists are to be read as follows: First price listed is lowest price for the week; Second price listed is highest price for the past week. Where only one price appears this should be considered lowest price.

Code

Check this code carefully. Become acquainted with each one of the code numbers and what they signify. These code numbers appear in front of the name of each machine.

1. Means price went up.
3. Means machine just added to list.
4. Means prices went up and down during the past week.
5. Means prices remained same as in last price lists.
6. Means no prices quoted for past two weeks.
7. Means no prices quoted for past three weeks.
8. Means no prices quoted for past four weeks or longer.

Important

Machines underlined mean these were most active in trading the past week.

A NEW HIGH IN PRECISION

Operators and distributors know that the Jennings trade-mark has stood for uncompromising quality for more than 38 years. Proof that Jennings CHIEFS are the finest jackpot machines ever built is revealed by the severest test of all—the relentless pounding which Chiefs have successfully withstood, day in and day out on location, since before the war.

After the war larger and better equipped production facilities, along with increased technical skill and knowledge, all resulting from three years of honored war production, will be reflected in still finer Jennings products. The Army-Navy "E" symbolizes a new high in precision at Jennings, enabling us to pledge a new high in opportunity for coin machine operators and distributors.

What YOU can do right now! If you have not received the new Jennings Chief Service Manual, your name may not be on our mailing list. Act right now to make sure you receive ALL Jennings mailings. Send your name, address and tell us what you now operate or sell.

SUPREME ENTERPRISES
557 ROGERS AVENUE  BROOKLYN 25, N. Y.
MR. MANUFACTURER
...in your Post-War plans consider the following facts—

We are located in the geographical center of the State of Georgia.

We are located in a City that is liberal minded in its thinking regarding this industry. This is mainly due to its high type operators. Men who through the years have won enviable reputations for square dealing. Men who belong to all the leading civic organizations, and who always cooperate in all drives for the betterment of this city.

No — this town is not "open". But, its operators are respected as worthy citizens. We state these above facts because they are the main reasons why we located in Macon.

We can stock any type of equipment on our floor at all times. Coin machine distributors are licensed by the city.

At present we are doing a very nice business. We are employing nine people who are engaged full time in our work. We are buying, trading and selling coin machines only. No operating from this office. We have 12,000 square feet of floor space in our two story brick building which is located in the downtown area.

We have been in the operating end of this industry for over ten years. For the past two years we have been engaged in selling coin machines.

We like the coin machines business and believe in its future. The average age of the officers of this firm is around the thirty year mark. We are ambitious and not afraid of hard work. We have acquired a reputation for good business dealing because we guarantee complete satisfaction with every transaction we make.

Our customers are numerous. We have made lots of personal contacts and continue to travel as much as we possibly can over the entire state.

Therefore, Mr. Manufacturer, we invite you or your representative to pay us a visit. Look over our set-up. Talk to some of our customers concerning our business methods. We feel certain that you will convince yourself that we are the firm you need.

Remember, you are always welcome to visit with us in Macon. We'll serve you some of our famous Southern cooking: "Gawger" country ham; collard greens; candied yams, and maybe we'll even be able to introduce you to some of our Georgia peaches.

Give us a ring — and come on down South — to visit:

WE HAVE NO CURFEW!

Most every amusement business in the country has been affected by the recent curfew order from Washington. That is, most everyone except ours!

No, we are not breaking the law; we certainly are doing, and will continue to do, everything in our power to aid the war effort.

However, there is no curfew on our efforts in behalf of our customers. To give them the best equipment available — to dig it up for them — to recondition it perfectly — is a 24-hour per day job.

You can always bank on the equipment we deliver because there is no curfew on our service or quality!

GOTTLIEB
THERE'S NO SUBSTITUTE FOR QUALITY

D. GOTTLIEB & COMPANY, CHICAGO
Mr. Manufacturer:

We offer you the finest facilities for the most complete and efficient distribution of your products in all the history of Eastern Pennsylvania.

Enumerated here are some of the features of our new building which is being acclaimed by all coin machines men who have already seen it, "The most beautiful distribution quarters in the coin machines industry".

We have two large and outstanding and modernistically lighted showrooms in which to feature your merchandise. Big warehouse space right in our own building. Inside loading of merchandise and automatic electric elevators to transport machines to any of our three floors. Two really huge repair departments and an additional emergency repair station on our main floor. A complete and beautiful taproom for the entertainment of our customers as well as for play of the new machines we will feature.

We fully believe that in the post-war period these are the sort of quarters you will want for your products. We only ask that you arrange to see them at your leisure or contact us for further information.

IN WAR

Thrice honored for excellence in war production, the Bally organization is working unceasingly to increase the flow of vital war matériel to our fighting forces. And Bally will continue to "deliver the goods" until victory is won.

IN PEACE

Bally's pre-war history and present war production record are an indication of what you can expect from Bally when peace comes. In the future, as in the past, you can "bank on Bally" for the newest in money-making games and vendors.

FOR VICTORY • • • BUY U. S. WAR BONDS • • •
