CASH FLASH BRINGS TAX SMASH  

Twice in the past year, The Cash Box has repeated its editorial entitled "Quiet." This editorial proved one of the most popular to have yet appeared in this industry. Its popularity is based on the fact that this is the time for this trade to contain within itself its business transactions, its earning capacity and all other matters which might be seen or fall into, the hands of blue-noses, publicity seeking politicians, tax seeking legislators, or the any others who can harm this trade with this sort of knowledge.

Surely, with the tax situation so seriously desperate, and continuing to grow more and more alarming each day throughout the nation, this is the time for - quiet. This is not the time for anyone to openly advise the world the amount of money his equipment is earning. Many will recall what this meant in one state legislature some months ago when a ranting, raving tax bug got up on the assembly floor and wildly waved a page from a publication wherein tremendous cash figures were openly printed regarding the earning power of music machines and other equipment of this industry.

The result, in that specific case, was to bring about a demand from the majority of the assembled members of this state's legislature for a monstrous share of the gross receipts from music machines and other equipment. To this was eventually defeated, much effort and energy, not to speak of the sleepless nights of worry that many of these men underwent in the efforts they pursued to offset this most confiscatory and severest sort of taxation against this industry. (And a demand for a share of the gross receipts is becoming the national vogue among the tax bugs.)

Everywhere in the nation, gradually and surely, tax bugs are standing up on the floors of their assemblies and senates and yowling their heads off that their state obtain a big share of the gross receipts from coin operated equipment. Some such taxes are already in effect. Others have been defeated. But as even these columnists who have been successful in defeating such legislation admit, tax bills of this type will continue to reappear at each session of their state legislatures and they fear that eventually such taxes will become fact.

It is therefore most treacherous, and an actual crime against all in this business, for anyone in this industry to flash cash proceeds in the faces of such men who are so intent on severely taxing this trade. It is certainly even more dangerous to openly advertise that certain equipment will earn such tremendous amounts of money that trucks will prove necessary to bring the cash to the bank. All this but irritates and incites the tax bugs. All this is what brings about demands by these tax bugs that their states, counties, cities, villages and hamlets share in the gross income from the machines of this industry.

The twice before The Cash Box has urged quiet on this trade, and has made it its own policy to keep this medium strictly confidential and confined to the members of this business only, it feels now that such warning should once again be published. Many seem to have again become tax these past few months and have brought harm upon themselves unknowingly by too much open discussion of their business affairs and ostentatious display of their earnings. Not only have they brought harm upon themselves, but upon all in this industry.

Thro'out the nation there is a great urgency forced upon the average legislator to obtain funds so as to be able to take care of the millions of service men who will soon return to this country. These politicians realize that only by quick action will they be able to set up a taxation program necessary to assure their communities and states, and the nation as well, the tax monies for public works projects and other works programs, so that the returned veterans will not again have to stand cold and windy street corners peddling apples.

This is something that everyone in this industry, too, wishes to avoid. That is why the average coinman is willing, and even happy, to pay higher license fees on his equipment, as long as he feels that this license tax money will be used for the best
benefits of these service men as well as for the good and welfare of his own community.

But no one wants to pay confiscatory nor inequitable taxes. No one wants to suddenly find himself out of business because of such high taxation that he cannot continue to profitably operate his business. This very thing, this inequitable and confiscatory taxation, is being brought about by the men in this industry who, tho they openly oppose it, unconsciously flash cash in the eyes of their neighbors.

When this sort of thing reaches a publication which can be obtained by any politician in the country by simply purchasing it from a newsstand, then trouble starts to brewing. The case histories of resultant political actions are national knowledge. One after another reports have been received from common all over the nation, as the 1945 state legislative sessions came into being, that tax bugs were appending reports from certain media to their bills, showing where this industry was earning so much money that it could stand up under the severest kind of taxation - a share of the gross receipts.

Again The Cash Box urges the members of this industry to quiet concerning their businesses and their earnings. This is not the time to openly advertise anything about big money. This is not the time to even discuss earnings, especially where strangers to this trade might hear them. And certainly, all will admit, that this sort of information is something which should never appear in print - unless the members of this trade are anxious to commit business suicide.

It must be firmly impressed on the men in this business that the present license fees may not seem too difficult to pay, the post-war period will bring about much re- vision and adjustment to this belief. And unless some of the license fees now being obtained by states, cities, counties, villages and hamlets are cut down, many machines simply won't be able to continue to operate. Everyone knows what this will mean to the future of this industry.

This is the very reason why there is a tax commission at work in Washington at this time studying how best to lower taxation all over the nation. That is also why there has been a demand by the President to Congress that all taxes be cut immediately after the war, so that free and private enterprise can once again come into being. And that is also why The Cash Box is urging this industry to create a National Tax Council to protect itself from rampaging tax bugs and bring them into line logically, by common sense reasoning, to prove to them that high taxation simply knocks out business colder than a dead fish and does not bring increased revenue.

Uncle Sam learned the lesson of diminishing economic returns by overtaxing the jewelry and fur industries. He is also learning more lessons each day in many other fields. He realizes that while this war is on and war workers pockets are lined with unusually high wages that he will continue to receive a goodly share while no merchandise is being offered for sale. But he is also shrewd enough to realize that once there is enough manpower available to again create competitive wage scales he will then have to revise his present high taxation program downward to take care of the lower wages the average worker will be earning.

This strikes right to the heart of this coin operated machines industry. With less money in his pocket the average man is not a better customer for coin machines. Therefore, if taxes are high on the equipment of this industry, and earning power is less, the simple and logical answer is - a most complete halt to all profit for this business. And that cannot be disputed.

But, if the men in this business continue to flash large rolls of bills, openly advertise the fact that the equipment of this industry is bringing in truck loads of money, no political in the nation can be convinced that this industry should not be taxed higher than it already is. And it is common knowledge that the majority of communities through the nation are severely overtaxing this industry - with demand for even greater share of coin machine income popping up in city councils, state legislatures and village boards every day.

There's an old horse-sense expression which runs, "An ounce of prevention is worth a pound of cure". And that is just what the members of this industry must adopt now - and rapidly. Unless the men in this business learn about the necessity for quiet, as well as for confidential interchange of their business conditions and relationships, they will be walking into more and heavier taxation every day.

This is not the time to flash cash. This is not the time to openly advertise "big money" earnings. This is not the time to have the inner workings and earnings of this business discussed. This is not the time to bring down the wrath and vengeance of tax bugs upon
"The Coin Machines Merry-Go-Round"

the head of this industry to such an extent that it will become the national vague to take 30% or 50% of the gross income from the machines of this business. This is instead the time for quiet.

ARE THERE MORE NEW RECORD DEALERS?

Possibly the strangest, and certainly the most puzzling part of the entire inequitable record distribution situation for the members of this coin operated music machine industry, is the fact that the record distributors continue to most vociferously state that they are NOT appointing any more record dealers.

This has been told to one music operator after another. And one operator after another has been cut off from "dealer" prices. Today, 75% to 90% of the music operators in the nation must buy their records from retail stores and pay consumer's prices, even tho the prior to the war these men were on a privileged dealer basis with the record firms and their distributors.

"The proof of the pudding is in the eating", is an old, old, worn out expression, but typical of what has been going on in record distribution. The record distributors who have been cutting operators off dealer classifications and thereby forcing these men to buy at retail, are the very same people who have appointed over 50% of retail store dealers since the war in almost every city in the nation and over 100% more dealers since 1940. These figures can be verified in the Classified Red Books.

In New York City's Manhattan borough, where only 37 retail record stores were listed in the Red Book in 1940, there are now 79 retail record dealers listed. This is an increase of over 100%. Since December, 1941, when the war started, there is an increase of over 50% in retail record stores listed in the Manhattan Red Book.

As far as wholesalers in the record business are concerned, there were only 7 of these listed in 1940. Today there are 58 listed. In 1941 there were only 29 listed. This should give this trade some idea of the tremendous upsurge there has been in retail and wholesale dealer set-ups.

Therefore, the record distributors' statement that he is not creating any more dealers must be taken with a very, very gigantic and even mountaneous grain of salt. This statement, which he has been continually making to the coin operated music machines man, simply means that he is desirous of cutting the coinman off the dealer listing and forcing him to buy at consumers prices from now on in.

It is interesting to note that these Manhattan figures are typical of Chicago, Detroit, Cleveland, St. Louis, Dallas, Los Angeles, Wichita, Omaha and dozens of other cities throughout the country. They definitely prove that the record distributor, who was built up to his present position by the music machines operator, is no longer interested in the automatic phonograph field and now looks to the "possible" future home market to get him the sales he wants.

The average, big time record distributor doesn't even like to talk about the "juko box" man. He becomes embarrassed when business dealings with these men are brought up to him in front of his family and friends. He actually dodges meeting coinmen. He likes everyone to believe that his business is solely confined to the upper sphere music stores and that he, himself, is the purest of lily-white illies.

This is not the time for the music machines operator to back water. This is the time to punch harder than ever before at these people who were brought out of the worst slump of despair in their history by the automatic music machines industry. This is the time to make these sort of people remember that when the war is all over and peace again sets in that they will once again want to do "big" business with the men in this field, for then they will have the strong competition which their present actions and tactics have brought upon them.

There is no doubt that they will, at that time, come out with statements to this trade explaining, "Now, my Friendly Friends, that the war is over, we can again supply you with all the records you want." But will they then mean records that have to be purchased from Jones Furniture Store, Jimmy's Cigar Counter, Bass's Ten Cent Emporium, Smith's Dry Goods House and Eddie's Appliance Establishment, or direct from them at dealer's prices on the old basis of sending a few samples a first for test with the privilege of returning those not wanted?

There is no need to go much deeper into this matter for the members of this coin operated music machines industry. It is completely and openly apparent as to just what these record distributors are doing during this war period, whether their manufacturers wish to believe the true facts or not.

But what is most interesting is what the music machines operator will do when the war is over? Will he crawl back and take the same, smooth, silly line he got before? Or will he, for once, stand up on his hind legs and bend it right back to the guy that pushed him around when he most needed him?

What do you think?
NEW YORK—First radio reports which came on the air this past Saturday advising the public that War Mobilization and Reconversion Director James F. Warburton was virtually writing off the war with Germany in his new report, stirred coinmen through the nation.

The fact that the horse racing ban, the curb and the brownies are to be lifted, was immediately followed by the knowledge that the need of the armed services would immediately fall 15%, as well as the fact that controls on all coin are to be eased, brought jubilation to many quarters in the trade.

At the same time the nation was informed that rationing, prices and wage ceilings would still be in effect with high taxes still to be cumbered and that high taxes would still remain in effect through the second phase of the first wave of optimism. The fact that more gasoline would be available helped to ease many minds in this trade.

The Coinmen immediately planned for a poll of dealers throughout the country to ascertain their beliefs. Whether they believed this report meant that new coin operated machines might be necessary immediately or that controls would be eased on V-E day over materials.

It must be remembered that it was 30% controls on the V-E day that the need drop is announced by some, he explained that in three periods he designates there will be 30% of the V-E drop.

This drop is bound to bring many materials to coin machines manufacturing companies. The Cash Box wanted to learn whether machines of one kind or another are being brought on the market after V-E day.

The average leader in the field does not think there would be any new coin operated equipment would be made available beyond the conversion period gets under way.

"Must believe that first coinmen's necessary goods are to be taken care of and that, after this period, there may be some materials to construct the simplest types of coin operated equipment."

Leaders also point to Byrnes' statement wherein he specifies that there will still be continued control on the vital materials.

The price of bronze and other materials are: copper, aluminum and the zinc allow. Without these, these manufacturers could produce no new coin operated machines.

They believe that the trade will still be limited to the six months or so and get the sort of metals which they have now and that the manufacturers produce anything but the sort of equipment are fearful.

One leader stated. "This is not the time for too much optimism. They are not sure if the coin men are in the position to believe the war is yet far off. He will better continue his present business and await instruction of the latest equipment when manufacturers again get started in this field."

LAGODA, IND.—An important decision affecting all coin operated music men in the nation was obtained this past week by Charles W. Hughes of this city, wherein War Manpower Commission Chairman Paul V. McNutt writes that automatic phonos can be operated after midnight in places where neither wine nor liquor is sold and where dancing is not allowed.

A letter from Senator Capehart, also addressed to Hughes, covers this same fact. Both letters have great meaning for all in the coin operated music machines business for they grant those extra hours of play found so profitable by coinmen.

LETTER FROM SENATOR HOMER E. CAPEHART

"We called the War Manpower Commission a few minutes ago and they informed us that there was no national ruling in regard to automatic phonographs being turned off at twelve o'clock midnight, because of the curfew regulations.
"However, it may be wise for you to drop a line to John Jennings, the War Manpower Director in Indiana, to ask if there is any special area regulation in this matter.

"Please don't fail to drop me a line anytime you can be of service to us."

LETTER FROM JENNINGS IND. DIRECTOR, WMC

"Replying to your letter of March 21 with reference to curfews and the like, we are now in receipt of the interpretations which you mention in your letter.
"I wish to thank you very much for sending this information to me."

The interpretations are in the letter of WMC Chairman McNutt as above.

Music coinmen are already working on the basis of the letter and McNutt has given them an interpretation of the 12 M in place of the 30% as in the old.

HERE'S THE NEW KINGCOBRA 'PIN BALL'

Publication of the item regarding the first "Pin Ball" plane stirred wide interest in this past week's issue. Above is reproduced the plans that The Airplane magazine has given the manufacturers producing anything but the sort of equipment are fearful.

One leader stated, "This is not the time for too much optimism. They are not sure if the coin men are in the position to believe the war is yet far off. He will better continue his present business and await instruction of the latest equipment when manufacturers again get started in this field."

HERE'S THE NEW KINGCOBRA 'PIN BALL'
Dear Hughes:

I have your letter of March 6 concerning the operation of automatic phonographs in all-night drugstores, restaurants, and other places where liquor, beer, or wine is not sold.

The War Manpower Commission has made no rule against the operation of music machines in such establishments as long as there is no dancing allowed after midnight.

With kindest regards, and every good wish,

Sincerely,

Chairman

Mr. C. W. Hughes
336 East Main Street
Ladoga, Indiana

1,000,000 NOW...

Soon 12,000,000 More...

Approximately 1,000,000 men and women have already been honorably discharged from the armed forces and are wearing the gold eagle emblem which they so richly deserve. We at ABT are doing our utmost to bring back the other 12,000,000 or more who are still serving our country. When this has been accomplished, the superior products we have planned for postwar will be available.

THE CONFIDENTIAL PRICE LISTS
AN EXCLUSIVE MERCHANDISING SERVICE FOR THE COIN MACHINES INDUSTRY ISSUED EVERY WEEK BY: THE CASH BOX, 381 FOURTH AVENUE, NEW YORK 16, N. Y.

FOREWORD

Many times, wide differences appear in the high and low prices of certain equipment. Like any true reporter The Confidential Price Lists can only feature the market prices as they are quoted. The Confidential Price Lists act exactly the same as the market quotation board at the Stock Exchange—posting the prices exactly as they are quoted for the past week, regardless of how much they may seem to be out of line. Some machine prices do not change for months. The Confidential Price Lists, rather than show no price, retain the last known quotations for such equipment so that the subscriber at least has the last known quoted prices as a basis to work with. Prices continue to be very widely divergent these days. Someone on the West Coast may feel a certain machine worth $150.00 whereas someone on the East Coast may think it worth but $75.00. Of course, condition, serial, appearance, demand, territory, quantity, etc., must all be taken into consideration. The Confidential Price Lists report each quotation exactly as it is made and depend on the subscriber to make average price adjustment to fit the peculiarities of his own territory.

METHOD

The Confidential Price Lists are to be read as follows: First price listed is lowest price for the week; Second price listed is highest price for the past week. Where only one price appears this should be considered lowest price.

CODE

CHECK THIS CODE CAREFULLY, BECOME ACQUAINTED WITH EACH ONE OF THE CODE NUMBERS AND WHAT THEY SIGNIFY. THESE CODE NUMBERS APPEAR IN FRONT OF THE NAME OF EACH MACHINE.

1. MEANS PRICE WENT UP.
2. MEANS PRICE WENT DOWN.
3. MEANS MACHINE JUST ADDED TO LIST.
4. MEANS PRICES WENT UP AND DOWN DURING THE PAST WEEK
5. MEANS PRICES REMAINED SAME AS IN LAST PRICE LISTS.
6. MEANS NO PRICES QUOTED FOR PAST TWO WEEKS
7. MEANS NO PRICES QUOTED FOR PAST THREE WEEKS
8. MEANS NO PRICES QUOTED FOR PAST FOUR WEEKS OR LONGER

IMPORTANT

Machines underlined mean these were most active in trading the past week.

NOTICE! March, 1942. Market Prices for Wholesalers as per GMPR of OPA appeared in September 7, 1943 issue. Reprints are available.
