HELPING HAND: For sale. Heathkit SB-310 receiver in excellent condition. Manual included. \$200.00 including shipping if U.P.S. served. Contact Andy Robins, 2724 Fleetwood, Kalamazoo, MI 49008, or call 616/343-1890 after 5:00 PM EDT. No collect calls please.

HELPING HAND: For sale. Yeasu FRG-7 with manual in original carton and in mint condition. \$250.00 U.P.S. paid. Contact Larry Brookwell, 1826 Cypress, San Diego, CA 92154 or phone 714/429-9728.

NASWA

A REPORT FROM
HEADQUARTERS

NORTH AMERICAN SHORT WAVE ASSOCIATION POST OFFICE BOX 13 LIBERTY, INDIANA 47353 U.S.A.
JUNE, 1977

IMPORTANT! ALL NOTE PLEASE: In the May issue of FRENEX, reference was made in the "Report From Headquarters" section to proposed changes to Articles A, C, and E of the Constitution approved October, 1976. Unfortunately, due to a mix-up, Article C was reprinted in its original form rather than the proposed revision intended which calls for the Executive Council to be enlarged to five members rather than the present three members. We regret this error and we now print the Article C intended for the May issue as well as repeating the revised Article E.

As you will note, Article C now calls for the two new members proposed for the Council to be elected by the membership, and the nominees for those positions would be any two of the current editors (or Chairmen) now serving on the FRENEX editorial staff, unless they indicate they decline to serve.

We are now calling for ratification of these proposed changes in the form of a vote from the membership which is to be received here at HQ no later than July 1, 1977. There is no official ballot to be used, and it would be appreciated if all who voted would use a post card on which the would indicate either "approved" or "not approved" on the proposed changes for Article C and a separate vote of either "approved" or "not approved" for Article E. All ballots must be signed to be considered. No vote is required on the change for Article A since that merely involves a change in wording to define NASWA as a SW only organization.

In the event Article C is approved, another vote will be called for in the earliest FRENEX possible to officially elect the two additional Council members.

We hope all members will take the time to review the matters at hand and send their votes indicating their preferences.

DX HOTLINE EDITOR NAMED: We are pleased to announce that Thomas B Alleman, Kansas City, Missouri will be the new DXH editor. Tom is a recent graduate from the Law school of Washington University, St. Louis, MO and is employed by the U.S. District Court in Kansas City, has been a DXer since 1967 and a NASWA member since 1970. Due to getting settled in his new location and job, DXH will not start until the mid August issue. We had previously requested that new subscriptions and renewals for DXH be held off until the future of DXH was determined. Those who did not renew or want new DXH subscriptions may feel free to renew or subscribe now.

ACKNOWLEDGEMENT: Thanks to NASWA member Diane Levesque, Carbondale, IL for last month's cover design. Diane's artistic abilities have been seen in previous issues of FRENEX, and we hope she will continue to contribute.

ANARC CONVENTION JULY, 15, 16 & 17, 1977: The Association of North American Radio Clubs will hold their annual convention in Schaumburg, Illinois with the Woodfield International DX Club serving as host. Schaumburg is 30 miles northwest of downtown Chicago and is centrally located near the Chicago International Airport (O'Hare) thus providing easy access for DXers everywhere. All DXers of any age are invited to attend, meet fellow DXers informally and hear prominent speakers during the three-day meeting of this annual "All-Wave" confederation of radio clubs in North America.

Registration fee will be \$10.00. For information or reservations for ANARC-1977, contact Woodfield International DX Club, P.O. Box 95073, Schaumburg, IL 60195. For their reply, kindly enclose a self addressed stamped envelop in U.S., or .13¢ in mint Canadian postage stamps, or three IRC's outside North America.

73's

M. R. Leonhardt
Executive Director

- Section 6: All government business will be published in FRENEX in the issue immediately following conclusion of the business. NASWA members will have until the last day of the month (for that issue of FRENEX) to vote on subjects presented in that issue.
- Section 7: In the event of vacancies in the non-elected members of the Executive Council, the remaining Council Members shall place before themselves at least three names to consider, including any which may have been suggested by NASWA membership. The final nominee approved by the Council will then be offered to the NASWA membership for ratification. If a plurality of votes received does not occur for ratification, the nominee will be removed from consideration and another shall be offered.
- Section 8: No NASWA Council Member may serve a similar office in another club at the same time. This does not preclude a Council Member from enjoying ordinary membership in other clubs. FRENEX editors (unless elected to the Council) are not thus restricted and may hold other offices as long as that status does not impair his ability to serve as NASWA/FRENEX editor.
- Section 9: Each NASWA member should consider that the North American Short Wave Association is not a club by which governing officers are appointed or elected directly by popular vote. Only those approved by the existing Council may be offered to the membership for a vote of ratification into office. This measure intends to prevent succession to office of persons who may be inadequately experienced or qualified. The Council is bound by the Warrant of Trusteeship to offer only the best experienced, qualified, and devoted nominees for consideration by the membership.

ARTICLE E

COMPENSATION FOR SERVICES

- Section 1: The editor staff is authorized to be reimbursed for any personal monies they spend on behalf of their responsibilities to NASWA. Such reimbursements may include clerical necessities such as typewriter ribbons, paper, envelopes, postage, and necessary telephone calls. Other expenses will be considered. A monthly statement of such expenses will be required for reimbursement.
- Section 2: The Executive Director and Council Members are authorized to be reimbursed for any personal monies they spend on behalf of their responsibilities to NASWA. Such reimbursements may include clerical necessities mentioned in section 1 above. In addition, the Executive Director and Council Members are authorized to be reimbursed for their additional expenses related to club officership; including telephone bills, gasoline used in line of duty, heavy-weight mail and shipments, post box fees, and authorized promotion expenses. A monthly statement of such expenses will be required for reimbursement.

ARTICLE A

- Section 3: The Objective of this Association shall be to promote unity and friendship in the hobby of radio monitoring; to disseminate informations useful to and relative to the shortwave broadcast listening hobby; and to foster and encourage the hobby of shortwave broadcast listening only.

PROPOSAL FOR AMENDMENTS TO THE CONSTITUTION OF 1976

After considerable thought, consultation with many NASWA members, editors of FRENEX, and neutral friends, the Executive Council has drafted the following proposed amendments for the Constitution, and asks for a vote of ratification to make it effective on 1 July 1977.

Because the Executive Council needs to be enlarged for administrative purposes, and to include the FRENEX editorial staff and committee chairmen in NASWA affairs, and to provide the opportunity for NASWA members to share in the execution of official club business, we propose:

Article C

Revised

GOVERNMENT AND OFFICIALS

- Section 1: This Association shall be managed by an Executive Council of five (05) members. It shall consist of an Executive Director and two other appointed Council Members and two membership elected Council Members.
- Section 2: The position of Executive Director and of the other appointed Council Members shall be nominated and approved by the Executive Director and Councilors remaining current at the time of any vacancy. Final ratification into office shall be made by popular vote of the general NASWA membership responding and effective at the cut-off date for returning votes. If a nomination is not ratified by a plurality of returned votes by the cut-off date, a new nomination shall be approved and offered for general ratification.
- (a) Existing Executive Directors and appointed Council Members shall retain their offices for two years, and shall require another ratification by popular vote if they desire to remain in office another two years.
- (b) Vacancies can occur by emergency in case of illness or death; or abandonment of duty; or by voluntary resignation; or by unanimous consent of the remaining Executive Councilors and the Executive Director.
- Section 3: The positions of the two elected Councilors shall be nominated from the FRENEX editorial staff and NASWA Committee Chairmen. A staff member shall be considered a qualified candidate for such office unless he expresses a desire to be removed from consideration. A popular vote of the general membership of NASWA will decide which of the staff members will fill a Council position.
- Section 4: Any Council Member, whether appointed or elected, or the Executive Director may also be recalled by popular consent of the NASWA membership en toto, not just by those responding. A clear majority must be evident to effect such action. Such a process may be initiated by specific letters of complaint and intent to recall. When and if 2 percent (2%) of the existing NASWA membership shall request recall action, publication of all details will be made in FRENEX and a YES or NO vote will be asked on the issue of retention of the officer in question. If the officer is recalled from office, an alternate shall be nominated and approved in accordance with Sections 2 or 3 above.
- Section 5: All club business and voting among Council Members may be conducted by mail or by telephone call.

shortwave CENTER

JERRY A. LINEBACK, EDITOR
P. O. Box 325
St. Joseph, IL 61873

JUNE 1977

We are happy to be with you again for another great issue of FRENEX. We invite you to submit articles on shortwave subjects to Shortwave Center. This will be the last call for items for the Antenna Issue scheduled for the September Shortwave Center. Please have your contributions to me by 15 July. We thank those who contributed for this month.

VoA OKINAWA

A VISIT TO THE VOICE OF AMERICA: OKINAWA Michael S. Hardester

Prior to receiving orders to Okinawa, from my travel agent—the U.S. Navy, I had tried in vain to log the VoA medium-wave outlet on 1178 kHz, and even the shortwave outlets seemed difficult at best. However, my faithful travel agent soon put me in the driver's seat, and so on a warm Spring day, my wife and I found ourselves on the road to the VoA transmitter site at Okuma, Okinawa.

Okuma is a small village located near the Northern tip of the island: on one side of the road green lush vegetation stretches seemingly for kilometers, and on the other side of the road, the emerald green waters of the East China Sea peacefully wash onto the pearl white beaches. I was so taken by the beauty of the area that I might have missed the turn-off had my wife not pointed out a six-tower array in the near distance—which we were later to learn was the array for the medium-wave transmissions. So, with our course plotted and without benefit of any road signs (in English that is), we headed towards the antennas.

On arriving at the transmitter site (the receiver site at Onna is located further south), we were greeted by Mr. Jensen, the Deputy Manager, and Mr. Schlegal, the Transmitter Supervisor who joined to give us a very thorough tour of the facilities. Construction began in 1952 and operations commenced in mid-1953 with continual expansion to the present 134 acres upon which the VoA site is situated.

The transmitter building houses the 1178 kHz transmitter which is actually two Continental transmitters of 500kw phased together to produce a megawatt of power. This transmitter is joined by two-35kw, one-15kw and one-100kw shortwave transmitters plus a 5kw auxiliary transmitter which provides for RTTY service to the IPS: International Press Service located at USIA headquarters throughout Asia.

Program material is received at the Onna receiver site from direct off air monitoring of transmissions from Delano and Dixon relay sites. This is fed via vhf circuits to the transmitter site for re-broadcast. Two of the receivers immediately noted were the Collins 51J series and Hammarlund SP-600 line; Hewlett-Packard frequency synthesizers were also noted.

The medium-wave transmitter is in operation from 1100 to 1600 GMT and provides English, Chinese and Korean programming to mainland China, Laos and Korea on beams of 17 and 315. Reception reports from mainland China indicate no jamming of the English transmissions, however the Chinese Service is jammed a great deal.

The short-wave transmissions also transmit the same languages to the same target areas or nearby areas, and these also appear to be having an effect as evidenced by reception reports.

And that tour would be complete without checking out the local telephone exchange. Yes, the VoA also has a completely automated telephone exchange system which handles the VoA transmitter site, VoA family housing, and a nearby military recreation center.

After the tour, over tea, several topics were discussed. At present, there is a great deal of speculation over the "planned replacement site" of the VoA-Ukinawa relay site. The next location is undecided. While several places offer a possible site—Saipan, Micronesia, Korea (South), Hawaii (remember the old VoA site there?)—however, no specific location has been decided upon. Mr. Jensen went on to further point out that from inception to operation takes approximately five years, thus a new site, even after being chosen, wouldn't be on the air too soon. This brought about the point that with host countries becoming fewer and fewer, international broadcasters may be forced to stay at home and beam their message across the miles with power easily exceeding a megawatt!! Can you imagine being a DXer/SWler who is situated a couple of kilometers away from a megawatt transmitter?! Among other topics discussed, it was mentioned that the VoA site at Poro, Philippines was constructed from almost identical plans as the VoA-Ukinawa. Lastly, on 14 March 1977 at 1500 GMT (12 midnight Japan ST), the VoA-Ukinawa will sign-off for the final time, and while the visit was quite pleasant, much like old friends getting together, it will soon be time to hear the final farewell: "This is the Voice of America concluding its transmission from Ukinawa."

BBC MONITOR

A CHAT WITH GORDON WESTON, RECENTLY RETIRED CHIEF MONITOR
WITH THE BBC MONITORING SERVICE

(Broadcast December 2, 1976 as an interview with Dick Speekman on Radio Nederland's DX Jukebox. Transcribed & edited by David Walcutt.)

-We are in the main monitoring room of the BBC Monitoring Service at Reading in England, and we're talking with Gordon Weston, recently retired Chief Monitor. Gordon Weston began his career as a ship's radio officer with the British Merchant Navy, and in 1946 he joined the BBC as an engineer. Gordon, what have you got in the way of receivers here?

-In the monitoring room, or the "Main Listening Room" as it's called, we have somewhere between fifty and sixty receivers. They are spaced out on benches where the monitors of the various language teams can take their bulletins. The monitors have their own places, where all the information for or relevant to that particular country is stored for them.

The monitor has two choices. He can take a signal from his own local receiver, or he can select a line where the signal is fed from the out-station as Crosley Park. The signals that we normally take at Caversham are those that are fairly well received, and the more difficult ones are left to the engineers at Crosley Park. The procedure is that a monitor appears and sits down to take his bulletin just prior to the commencement time, he checks that his recorder is properly loaded and that his receiver is tuned or that he has his signal on line. There is, in the technical control of the listening room, an operational assistant at quite a complicated console, and it is his job to make sure that the signals fed to the monitors are the best that can be obtained. The monitor then listens to his bulletin, recording it, and takes notes, and when this is finished, if there is some material to be transcribed, then he goes to his cubical and types out his bulletin, which is duplicated and sent to the various sections that want the information. These would be the news bureau, the editorial sections, and the FBIS section, which shares the information.

-Now Gordon, is all of that information useful, or do you sometimes get things you don't really know what to do with?

-There is one anomaly that stays with us over the years, and I don't know that anybody has really come up with a positive solution. Why does Radio Peking play its Russian broadcast backwards on three occasions during the course of twenty-four hours? My contention over this is that it is for the Russian monitoring service. I have always thought this.

There is another school of thought that says that it is for distant relay stations, because Peking's Russian service is so heavily jammed that the relay stations would never really be able to take it off the air live. However, I think that it is for the monitoring service. It is not very difficult. You just have to wait to the end of the program, turn the tape around and play it backwards, and there it is. Nobody has really ever come up with a clear concrete solution to this, but that is what I think it is. And this remains with us to this day. They still send, three times a day, their Russian broadcast backwards.

At Caversham for our monitoring, the monitors use plastic belts, magnetic belts, and that's an easy matter, you take the belt off the machine and insert it the other way round, and then that does play it backwards. But you've got to wait to the end of the bulletin.

-You also have receivers in other parts of the world, and they're sort of connected up by phone lines - that's quite an interesting system, too.

-Yes, we've got a telephone circuit to Vienna, and in Vienna they have eight or nine different receivers tuned in to stations which we find very difficult to receive at Caversham Park. We select by a press button at Caversham which receiver we want to put to the line in Vienna.

-Well, that's cheating as far as dxers are concerned.

-It's cheating, yes! But I think with the advent of the remotely controlled receiver that this opens up a new avenue. It may be possible at some time to have an unmanned station in a remote point and be able to rig it

up and dial which frequency we want. The modern sophisticated remote-controlled receivers are quite capable of doing this. I think this is something that will develop before very long.

-By the way, the BBC Monitoring Service as such doesn't use any material provided by dxers?

-I wouldn't say exactly that we don't use it. In the section quite a number of dx magazines are now available to us, and the monitors look through these magazines and take any item of information that may be of interest and check it out. Obviously a club that has a large number of members spread around the world is far more able to hear some of the things than we, with our very small staff, are able to do. Even though we have quite sophisticated equipment, there are many, many areas of the world that we just don't hear. So if a dxer is living in, say, India or Ceylon or South America, he can hear things that we, knowing that they are there, can get checked out. And also, if we feel that it warrants it, we can ask our American colleagues, who monitor in different parts of the world, to check it out as well. So I wouldn't say that we don't use the information. We do not publish it as such, direct from dx magazines; we use it as a tip-off.

-But you do appreciate getting the magazines?

-They've been most useful to us, and we have been able to find some of those very elusive things that we haven't been able to trace, just because somebody else, listening at a different time possibly, and different conditions, and different area, has been able to hear. And later on we have been able to confirm. But we would not publish any information directly that was subscribed by a dxer to his magazine, as truthful as it might be. One has to appreciate that, in the main, they are amateurs. This is no reflection on them, because I feel that of all the hobbyists, the dxers are probably the keenest I have ever come across, and they do really try to give correct information.

There is always the language difficulty. One does learn over a period of time what languages there are and what ones are most frequently broadcast. I did quote, at one time, a dx magazine that printed an item from

one of its contributors that a new clandestine was heard in Arabic. But in fact this was Radio Algiers, the Kabyle Service. It's really no wonder, because they do a fair amount of screaming and it sounds like a clandestine anyway!

-Now, wandering around the building here, I think a dxer coming in here would think he was in heaven, he had arrived in paradise. I can well imagine that there would be quite a few dxers around the world listening to us now who would say, "Well, look, what kind of qualifications do I have to have to qualify, as it were, for a job at the Monitoring Service?"

-This was quite a problem. We at one time insisted on people having several languages, particularly Slav languages. Over the years we found that the best people, who make a good research monitor, are those with no special language qualifications. Those with languages - who are very good at languages - tend to specialize, whereas we require people who will delve into broadcasts no matter what language it is, and therefore the language capability is not essential.

Several years ago for the very first time we threw open job applications to the public by advertising, in the British national press and in typical journals, hoping that there would be some dxers who would be suitable if they wished to take up their hobby as a profession. In the first instance we had nearly two hundred inquiries, amongst which was a good sprinkling of dxers, and eventually we did chose a dxer. He is very keen, and some of his keenness has washed off on to the other members of the team, too. It takes a good, all around chap who will stick at it and be very, very patient in his searching, because the work can be extremely boring. But, on the other hand, it can be very rewarding, although your rewards come so infrequently. It's mainly hard graft of preparing schedules, listening out, checking announcements, and seeing that all the frequencies that are announced have been checked. The main qualification is an aptitude to do the job. I'm sure that when any vacancies occur, if there are dxers applying, it's going to be awfully difficult to decide who would make the best research monitor. But we do have three dxers on the staff, those who have changed from a hobby to a profession. It can be done. With training. It takes a little time to alter it, but the main attributes are the aptitude and the will to do the job.

-You're not afraid that they are going to search for a fifteen watt outfit in Mongolia rather than listen to those scheduled broadcasts that you want them to listen to?

-I don't mind it; I wouldn't mind if they did, because a lot of the schedules of the very low-powered stations are so infrequently updated that if these were winkled out from all the noise that goes on these days, well, certainly this would be appreciated.

-Mr. Weston, thank-you very much for spending some time with us on DX Jukebox.

-Pleasure.

ANCIENT HISTORY

Radio Ramblings by "Jace" from PRACTICAL WIRELESS 25 March 1933

"I see it has been suggested by a well-known musical composer that special music will have to be written for broadcasting purposes. His theory is that under present conditions it is quite impossible for either transmitter or receiver to do justice to the range of frequencies encompassed by existing musical scores. Of course, there is much truth to this, especially since the frequency separation of the main European transmitters is only 9 kilocycles. This makes it impossible to take full use of musical frequencies exceeding 4.5 kc/s for any other than "local" reception. Nevertheless, I think that we shall find it a more acceptable problem to devise means of allowing a wider station separation rather than to narrow down our harmonic range."

The above was submitted by Charlie Wooten who notes that if the WARC 79 can't solve wider station separation, then we will continue to have the same problems as that of 44 years ago. Refinements in receivers ensure good musical reception, but with the narrow separation between stations on SW, it is kind of difficult to enjoy music at 1.5 kHz bandwidth!

PORTABLES

SHORTWAVE PORTABLES: THREE THIRD-GENERATION SETS TESTED

by LARRY MAGNE

Ever since the shortwave portion of the radio spectrum was found to be the medium of choice for international broadcasting, serious shortwave listeners and DX buffs have been stuck with portables lacking in performance generally available in fixed communications receivers.

The first generation of portables consisted of tube sets designed around WW II, such as the lumbering but rugged Andrea and Zenith units. About a half dozen manufacturers competed for this market in the 1940s, but with the popularization of television and the growing competition from other forms of entertainment, the shortwave radio market diminished.

The second generation of portables were essentially first generation sets with transistorized circuitry. From the late 1950s until fairly recently, transistor shortwave sets from pocket midgets to suitcase-sized giants have been widely available, but not notably popular -- informed estimates put the number in the U.S. at under 12 million. Although second generation sets were well suited to battery operation, they share basic circuit designs abandoned since the early 1960s by communications receiver manufacturers.

The third generation appeared in the early 1970s, when the South African Barlow-Wadley XCR-30 appeared unexpectedly. Despite production, design, and marketing shortcomings, the XCR-30 was an instant success among serious SWLs and traveling DXers. Unlike second generation sets, it reflected a fresh approach to shortwave portable receiver design, utilizing concepts originally developed at the esteemed RACAL communications firm in Britain. Frequencies, formerly guessed at, could now be read directly and accurately from the backlash-free tuning dial. Sensitivity was excellent, selectivity good, and there was a pleasant absence of image and similar internally-generated interferences.

The Japanese finally came out with their own third generation shortwave portables in 1976, and in so doing fueled a SWL buying spree in that country. Only recently, after they could satisfy domestic demand, have these sets entered the North American market.

On May 15, Panasonic/Matsushita formally introduced into the American portable radio market a \$150 third generation shortwave receiver, the RF-2200. It competes in many ways with the recently-introduced Sony ICF-5900W (reviewed in the March FRENDX) and the established Barlow-Wadley XCR-30.

The RF-2200 is a double-conversion superhet with linear readout on all bands, MW, SW, and FM. This results from its using not the usual electronic VFO, but rather a network of nylon reduction gears to drive the main tuning capacitor. This mechanical approach to fine tuning produces some sloppiness, but nonetheless drift is acceptable for AM signal reception.

The RF-2200 controls are sensibly laid out and straightforward, except the S-meter and tuning knob (singular--there is no VFO) are calibrated "backwards", that is the meter pins left instead of right, and the tuning dial increases frequency clockwise instead of counter-clockwise. The controls are thankfully well lit for use in darkness. Cabinet design is modish Army surplus ugly -- no better or worse than the competition. Audio tone is good, the best of the lot, and the bass/treble controls are adequately flexible for proper response on MW, SW, or FM. Although lacking a firm carrying handle, it comes with a rugged woven nylon strap that performs nicely and takes little weight or space. Panasonic offers an optional (\$35.45) RD-9820 antenna/ground system, which includes what appears to be a pi-filter tuning network (a la "Joymatch"); although it was not evaluated, it suggests the RF-2200 is designed to adapt to a variety of antenna designs. The RF-2200 works perfectly well with the built-in antennas, but the RD-9820 may be of interest as an antenna kit for communications receiver owners; order from Panasonic Consumer Parts Division, Box 1457, Secaucus NJ 07094.

Inside, the RF-2200 is roomy and sensible. Removal of the front and rear panels is easily accomplished, revealing a well-labeled circuit board easily detachable from the center frame section. By transistor portable standards, it is both serviceable and tempting for homebrew improvements -- in market contrast with the cramped Sony ICF-5900W.

Although the all-linear readout is not capitalized upon in the RF-2200s FM band, it is put to good use in the MW band, where readout is often to the nearest 10 kHz channel. Coupled with excellent overall MW performance, plus a variable "Gyro" ferrite MW antenna, it makes a first rate MW DX portable. FM performance is similarly excellent -- more stations can be flushed out with the RF-2200 using its built-in whip antenna than can be with a McIntosh 1700 fed by a fixed outdoor antenna!

Shortwave performance is similar to that of the Sony ICF-5900W. The detailed table of performance allows the consumer to concentrate on those aspects of performance that are most relevant. For example, the XCR-30 is most prone to overload, the ICF-5900W the least so, making the Sony a safer bet for use in Europe. Selectivity for DXing is no prize on any

of the portables tested, but NRC's Grant Manning devised a solution which claims to enhance the selectivity of the XCR-30 (see NRC Bulletin 14 June 1975).

As a rough guide, the portables are ranked in order of preference as follows:

- For Tropical Band DXers - XCR-30, ICF-5900W, RF-2200
- For traveling SWLs?DXers - ICF-5900W, RF-2200, XCR-30
- For Casual or Expatriate SWLs (non-technical) - XCR-30, ICF-5900W, RF-2200
- For globe trotting SW monitors - ICF-5900W, RF-2200, XCR-30
- For seafaring DXers/SWLs - RF-2200, ICF-5900W (ICR-30 inappropriate for reception of WWV/WWVH's marine forecasts)
- Freshman DXers - RF-2200, XCR-30, ICF-5900W
- For backyard DXers/SWLs - RF-2200, ICF-5900W, XCR-30
- For hams, UTE DXers - XCR-30, ICF-5900W, RF-2200
- MW/FM DXers - RF-2200, ICF-5900W, XCR-30.

There are shortcomings in the RF-2200. The low end coverage limit of 3.46 MHz borders on teasing; another 0.26 MHz would have allowed for 90 metre band coverage. The SW band switch has cross talk from adjacent bands. The ceramic filter has wide skirt selectivity, even in the "narrow" setting. The carrying strap sometimes interferes with the "Gyro" MW antenna. The built-in AC converter is only 115 V rather than the 115/230 V one would expect in an international receiver. The S-meter is the worst of the lot, "pinning" on Andean milliwatts. It lacks a schematic. and the "Gyro" antenna creates RF pulse noises as it is rotated, the result of a bearing locking into dimples.

In summary, the Panasonic RF-2200 represents an excellent value -- probably the best in general-coverage DX radio. Both the Panasonic and Sony are available at local retail stores or, reportedly, by mail from the following discounters:

Foto Electric Supply Co. RF-2200 \$115 plus \$3 shipping
 31 Essex St. ICF-5900W \$120 plus \$3 shipping
 New York NY 10002

Portnoy's Appliances - RF-2200 \$120 plus shipping
 125 W. 45th St. ICF-5900W price not given, but probably about \$125 plus
 New York NY 10036 shipping

47th Street Discount Foto Mart - RF-2200 \$112 plus shipping
 67 W. 47th St. ICF-5900W \$120 plus shipping
 New York NY 10036

The Barlow-Wadley XCR-30 is available in the United States for \$269 from the importer, Gilfer Associates, Inc., Box 239, Park Ridge NJ 07656.

See point by point comparison on next page.

BEGINNERS PATCH

by David Haas, Woodcliff Lake NJ

Recently there has been quite a lot of publicity about split frequency DXing. Anyone can really do this, all it takes is a fat wallet or an engineering degree. For those with the fat wallet, Gilfers is soon going to market a frequency counter for use with most receivers. I am not sure what it will cost, but I think about \$200. I tried one out in November and I would have taken out a loan right then to buy one, if a bank would have let me in the door.

For those with engineering knowhow, POPULAR ELECTRONICS recently had an article describing a digital frequency readout for most shortwave receivers. You could buy a kit for about \$110. The article was in the February issue. For those who only could work as a technician or maybe just those active in electronics, the 1976 Electronic Experimenter's Handbook has a circuit for a very good crystal oscillator. This little toy works from a battery and oscillates at 100 to 1 kHz frequency spaces.

Now for all the beginners who do not know their transistor from their imbristor, and only go to banks to take money out, Radio Shack sells a crystal oscillator for under \$5. It is only a 100 kHz oscillator, but it is better than nothing. If you have a little more money, Gilfer sells an oscillator that is better, but still reasonably priced. Now for a few loggings

Albania-this east European country broadcasts to the US in English at 0000 on 7065 and 9750, at 0100 and 0200 on 6200 and 7300. All programs are 30 minutes in length.

Israel-for all those who have never heard a real home service for a country, Israel broadcasts a ½ hour home service in English. You can listen to ads or news and commentaries. Surprise, although this is meant for Israel itself, it beams the program towards North America every day at 1200. The best frequency is 15100, but 15485 and 17815 are also on the air.

POINT-BY-POINT: HOW THE PORTABLES COMPARE, by Larry Magne

Feature	Panasonic RF-2200	Sony ICF-5900W	Barlow Wadley XCR-30	Nonportable Communications Receiver (for reference) Drake R-4B
Price, New in continental U.S.	US\$ 112-150	US\$ 117-150	US\$269	Approx US\$500 in 1970

Picnic?

GOING ON A PICNIC THIS SUMMER? TAKE YOUR RECEIVER ALONG!!

by Charles A. Wootten

Most interesting results can often be obtained by taking a receiver away from its normal surroundings. If you live in a big city, you will almost certainly find that the performance of your receiver is far better when you take it away from the confines of houses and streets. Apart from these considerations, a great deal of enjoyment can be obtained from listening to rare DX under out-of-doors conditions. Take your receiver with you when you go off in the car, and you will have a pleasant companion to provide you with entertainment when more active occupations begin to flag.

When you pack up the receiver, do not forget that you must take an antenna and ground system for it as well. If you do not have batteries for your set, then a simple DC to AC converter that plugs into the cigarette lighter will provide plenty of power for your needs. But, an antenna you must have, and a last-moment makeshift with odd bits of wire is rarely satisfactory. Even the receiver with a built-in antenna will have a wider range, and will give improved signal strength with the addition of an external antenna and a ground connection.

Here then, is the equipment you will need. It will not require much preparation before you start. A 50 ft. or even 100 ft. length of antenna wire (your choice), a broomstick or stake 5 to 6 ft. long, pointed at one end, 3 or 4 yards of stout string, two wooden pegs, and a large claspknife. If you cannot lay your hands on the last-named item, a large meat skewer or similar metal spike will do. A passive antenna tuner would be a luxury item, but is not really necessary. This list provides for every emergency. In practice you will be able to dispense with one or more of the components, according to the conditions in the places where you have your picnic.

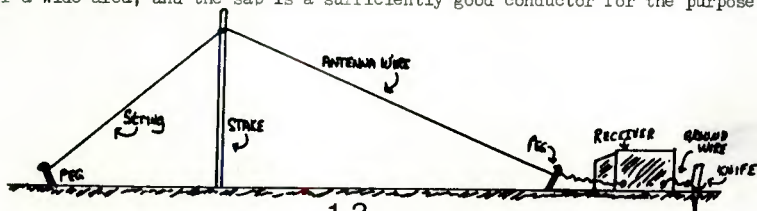

The diagram at the bottom of the page shows how you arrange your antenna and ground, using all the parts mentioned (except the tuner). In this way you can put up an excellent temporary antenna in open country, when there are no trees or posts handy. Proceed as follows to erect the antenna. Choose the spot for the receiver and put a peg in the ground close to it. Attach one end of the antenna wire to this peg, leaving a spare foot or two of antenna to reach the antenna terminal of the receiver. Run the antenna wire out to its full length, secure the free end of it to the broomstick or stake, push the pointed end into the ground, knock in the second peg in a dead straight line with the antenna, and guy the stake to it with the string. So long as the staying peg is truly in line with the antenna, it will hold up the "mast" quite safely without extra pegs at the sides, unless, of course, there is a very strong wind.

The ground lead is a yard of the same material as the antenna wire. Connect one end of this to the ground terminal of the receiver. Take the clasp knife and open the smaller blade, wind the other end of the wire around it, and close the blade on the wire. The large blade pushed well into the ground will give you a ground connection which, under most conditions, will prove quite satisfactory. In very dry weather, dampen the soil around the knife, if you have water to spare!

A long, low antenna of this kind is, to some extent, directional. To get the best results from a given station, arrange the antenna so that it points directly away from the station. You will hardly be able to find the accurate direction without a map and compass, but even an approximation will help. Similarly, if interference is bad from one station, place the antenna at right angles to an imaginary line between your position and the station. Of course, if the wanted and unwanted stations lie in the same direction or in opposite directions, you must simply do the best you can by careful tuning.

The antenna system as illustrated need only be used in its entirety in an open situation. You can do much better than this with the same equipment, if conditions are favorable. You can raise the far end of the antenna by fixing it to a convenient tree. Tie the string to the antenna wire, and one of the pegs to the end of the string, and sling the peg up over the highest limb you can reach. Again, you will usually find it better, especially on shortwave, if you put the receiver itself not on the ground, but in your car or on a box or table.

There are many variations for the ground connection. On sandy soil, where it is difficult to make a good connection with a short spike in the ground, driving the knife, with the lead attached, into the trunk of a tree will often help; the roots of the tree spread out over a wide area, and the sap is a sufficiently good conductor for the purpose.

SPECIAL *feature*

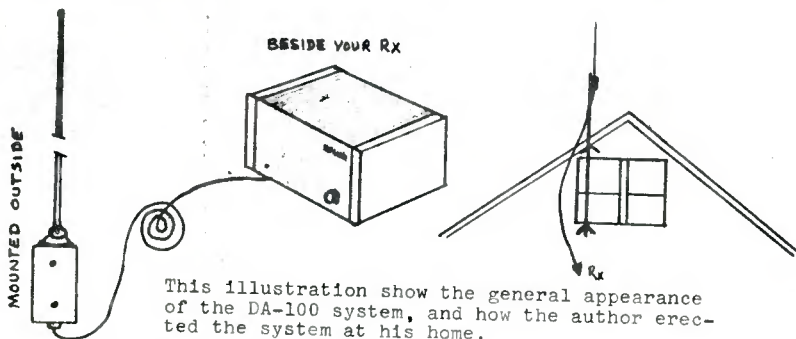

Mk McKay Dymek THE DA-100 ANTENNA REVISITED

by Edward Shaw

A few months ago, this author reviewed the McKay-Dymek DA-100 antenna system, but at the time I did not feel that the system deserved a more positive report...and I felt justified in pointing out obvious facts where the antenna would be of little use to the short wave DXer. The earlier DA-100 model claimed equity with a 100-foot long wire antenna, but the engineering data supplied showed where the equity only occurred at a frequency of 100 KHz - somewhere far below the broadcast band. Utility as a shortwave antenna system was something nearly laughable, certainly grossly inefficient. Today, the DA-100 system is SOMETHING ELSE!!

Arising out of my initial review, McKay-Dymek's engineers took another look and set about scratching heads and rubbing chins once more. Today, several months later, the author has in possession a newly-revised version of the DA-100. In a nutshell, I will say right away that my identical tests used during the first review revealed an altogether different character about the DA-100 (revised). It may be of interest to some that I have chosen to purchase and retain this second test antenna system for my own. It beats what I've been using.

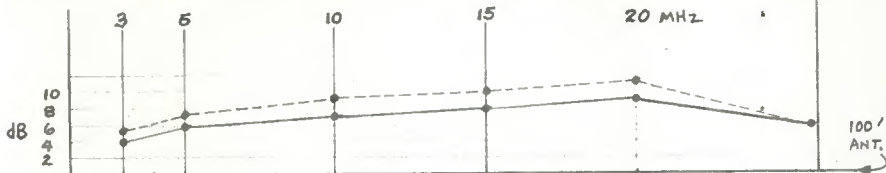

This illustration shows the general appearance of the DA-100 system, and how the author erected the system at his home.

The DA-100 system was tested against a 60-foot random length wire at 25 feet above ground level; an 18-foot vertical whip; and an amplified loop which was constructed for 3-10 MHz. Receivers used were the Collins R-390A; Allied X-190; Yaesu FRG-7; and Sony ICF-5900W. The DA-100 system was installed in three different configurations to obtain a variety of responses likely to be observed by other users. The first installation was atop the corner of a backyard patio roof away from metal structures. The base of the antenna element was 16 feet above ground level. The second installation was the element and amplifier affixed to a 10-foot metal pole and extended laterally out from the upstairs bedroom window with the window shut to prevent it falling. The third installation was the same pole erected vertically by wall mounts so that the antenna element and amplifier cleared the top of my two-storey roof by four feet. The RF meter used was a Shurite 8103 VU recalibrated for 60 dB to equal S-9. (On the R-390A). The antenna element could, theoretically, be installed in door provided the coaxial cable did not remain coiled. In other words, the element and amplifier should be located some distance away to allow full extension of the total length of coaxial cable. Otherwise, some harmonic images and cross-modulation may result.

McKAY-DYMEK DA-100 REVISITED - Continued

The antenna system installed at its highest perch above my roof was obviously the most preferred, and it did perform its best in that position. However, the signal strength (S of the SINPO measurement) was not increased. The most remarkable difference was in the greatly reduced noise ratio. If the reader will consider for a moment the importance of low noise figures, he will soon realize how that is what he should most desire. A weak signal lost in high noise is useless, but the same strength signal heard in low ambient noise becomes listenable. This is the observation I made with the DA-100. Station signal strengths did not differ appreciably, but the noise levels observed as I moved the antenna system from ground level to high above my roof did differ remarkably. Where before I could barely discern newcomer Surinam on 4779 KHz in the "mud" (noise) at ground level, it became listenable and distinguishable into several recognizably different languages when the antenna was above my roof. Therefore, it is reasonable to advocate installation of antennas as high as possible.

For technical readers, the following graphoanalysis will be of high interest. It is roughly the same as the graph provided in the specification sheet provided for the DA-100. I found it to be reasonably accurate for SWBC listening purposes. Note that the specifications claim equity with a 100 foot antenna at every point above 0, except where figures fall off sharply below 100 KHz and above 25 MHz. My illustration differs very slightly between 1 MHz and 20 KHz in that my observations show a slower rate of gain increase. McKay-Dymek's original trace is illustrated by a dotted line. We aren't quibbling, since we had only 60' of antenna up.

In the above illustration, one can see that the DA-100 system installed as the author described provides a higher gain than a 100-foot antenna installed at the same height. At 3 MHz a gain of 3 dB was realized. At 10 MHz a gain of 7 dB was realized. And, at 21 MHz a gain of 9 dB was realized.

Each receiver was tested for approximately 15 minutes each during periods of warm and cold, during clear and rainy weather, and during different parts of the day, and during the night.

The antenna system was not made to work with the Sony ICF-5900W and I gave up the attempt. A number of severe cross-modulation images were generated and could not be resolved due to antenna mismatching. The Sony input is high impedance and the DA-100 is 50 Ohms.

Use with the very sensitive FRG-7 was tricky. Be sure that the full length of coaxial cable is used. Also, the DA-100 may generate some cross-modulation problems, but I escaped much of this by using the FRG-7 broadcast antenna inputs, and there was still great performance.

The DA-100 system lends itself admirably to use with the SX-190 and the R-390 receivers, both of which have more sophisticated RF gain control systems than the FRG-7.

As mentioned earlier, this author is satisfied to retain the antenna he tested, purchasing it for his own use. Without even looking to see, I can almost guess that the design is nearly similar to the active-antenna described in Radio Nederland's antenna information.

Price for the DA-100 remains at \$125.00. Expensive? Yes! But,.....

IMPORTANT NOTICE!! McKay-Dymek recently announced that the revision to the circuit of the DA-100 antenna necessitates an increase in price. The DA-100 antenna system is reported to be \$145.00. Although the antenna performs well as I described, I cannot justify the increase in price. Signed: Ed Shaw.

Jamming believed to be from Chile is on 7240/7280/9490/9775 (UHN 5/77) MORE on LN-12

MISCELÁNEA RADIAL

ALGERIA RTVA May-Oct freq sked is poorly aligned, and exact times can't be read from the graph. So here are the freqs used for each service at various times 0600-2400: Arabic to Algeria, 7195; Arabic to ME 6145/9685/9705/11835/15370/17745; Arabic to EAF 11810/15160/17790/21560; French to WAF 7125/9610/11910/15420/17825; Kabyle to Eu 6160; French to Eu 7245/9510 (via Tuhscherer, WI)

ANTIGUA is proving to be a rich source of harmonics. Not only is BBC WS a regular on normal days on 24780 (4 x 6195), but on a good day with MUFs ascending, shows near the upper (h) end of most SW rx ranges at 30975 (5 x 6195), 2000-2330. A fine test both of propagation conditions and receiver sensitivity; then there's DW Portuguese at 2210 2 x 11865 on 23730

ARGENTINA (Cf May LN-9) Now R. El Mundo found on 23670, ID at 2230 16/5; 2245 3-plp TS; at this time, 23-24 MHz Ascension, Cuba, Antigua harmonics also in (gh) And RAE heard on 19379.9 at 0100, SIO 454; better than hetted fund 9690, 16/5 (gh)

BHUTAN(?) unID on 7042 1300-1400* pop mx, no anmts, good level, poor mod (Willis, Vic. 5/5)

BRAZIL 49m stns can appear on 24 MHz during good openings; check around 2200 for all carrying "A Voz do Brasil" on 24140/24259/23960/24000 et al. (gh) BULGARIA LN-11

BURMA unID stn is on 4980 around 1110-1200, then covered by PLA China. In Burmese or dialect, non communist, very weak, first heard 20/4; difficult to ID; one like this was also often reported Apr-Dec 1975 on 4980, sked 1200-1330* (Isao Ugusa, FEDXR 25/4) BYELORUS LN-11

CANADA CFVP engineer confirms it operates 24h on 6030 in tandem with CFCN-1060; no interruptions past couple months. 100 watts input and a quarter-wave vertical. No luck here, but it could be I'm in a poor skip zone, 400km from Calgary (Phil Schnabel, Warman, Sask, TDXN)

CHINA Beiha! PBS on 8745v does not broadcast local pgm recently, but second pgm of CPBS; Shandong PBS disused its SW outlet on 2350, checked 20/4; Qinghai PBS uses 6255 at 0950-1230 and then changes to 6260; but 3950/4940 are not changed (Hiroyuki Nagase, FEDXR 25/4) Peking hrd with Taiwan pgm on 3360 at 1300; on new 6890 1400 Chinese FS; 2460 Chinese at 1300 not sure of pgm; Fujien on 2200 at 1300 (Mike Willis Victoria, Australia, 5/5) v. LN-11

COLOMBIA R. Nacional has jumped to the other side of AFRTS, measured around 15328.6, still RC SSB. Someone probably bumped their tuner and they haven't even noticed (gh) R. Tres Fronteras is tentatively the new station on 4782 heard around 0000, from Puerto Asis (Tuner, RN) A pretty tough one, Ondas del Orizaba 4975 hrd 6/5 0310-0324* with live sports event, ments of Florencia, ID, NA and off (Neal A. Perdue, AL)

COSTA RICA It had to happen! R. Reloj, a regular on 12012 (2 x 6006) and on 24024 (but not on 18018 somehow), now shows up on 30030 kHz, peaking SIO 243 at 1920 7/5. The 30-31 MHz band is likely to provide lots more exotic 2nd, 5th and 6th harmonics as F2 propagation improves with sunspots, and temporarily this summer via sporadic E--for those who seek (gh. RLB)

CYPRUS CBC began experimental broadcasts in Greek to Cypriots living in Britain, 1/5. 15-minute xmas at 2215 was heard on 9750; 11715 had also been announced, but was changed at last moment to 7265, unconfirmed. Is Fri/Sat/Sun only, to continue to yearend. Is announced as "Cyprus comes to you" (I Kipros konda sas). In 1969-70 they broadcast 21h per week to Britain (BGCMS 5/5) I'll bet it's via BBC facilities (gh) These are transmitted through BBC East Mediterranean Relay facilities at Zyyi, Cyprus (BGCMS 12/5)

CHILE R. Agricultura is experimenting with a new xmtr on 9630, on the occasion of its 40th anniversary (BGCMS 21/4) ECUADOR LN-11 FRANCE LN-11

ETHIOPIA R. Ethiopia HS on 9610v/6185 closes 1200-1500 as Som/Afar now on RVORE (BGCMS 12/5)

GERMANY WEST/MALTA DW noted QRMing itself on 9565. Conflicting ISes and local IDs for xmtrs in Germany (in German) and on Malta (in English) prior to opening Eng to NAM 0130 (Richard Wood, NY, 22/4) VOA sked no longer shows 8 kW VOA xmtr Munich on 75m (gh)

HONDURAS R. San Ysidro hrd Easter eve 4845 mss, etc. 0243-0306* 10/4 (Perdue, AL, TDXN)

INDONESIA RRI is to be divided into five insular broadcast areas, instead of the present three based in Ujungpandang, Yogyakarta, Medan. I: Medan for Sumatera; II: Yogyakarta for Java/Bali/Lombok; III: Banjarmasin for Kalimantan; IV: Ujungpandang for Sulawesi, East Nusa-tenggara, East Timor; V: Jayapura for Maluku/Irian Jaya (BGCMS 28/4) Tentative RRI Fak2 to 1350* on 7287; unID Indo to 1400* on 4626 (Mike Willis, Victoria, 5/5) (BGCMS 12/5)

IRAQ The "Voice of the Masses" DS is on 17770 ex-7225 (BGCMS 28/4) JORDAN HS 9740 x-11810/

LAOS Houa Phan National Radio, 4668, 1100* ex-1430*; ex-Sam Neua, one of 13 provinces, since 1975 Oct reformation of administration system (Ugusa, FEDXR 25/4) Houa Phan radio operates on 4665/7167; Luang Prabang on 8395/4737; Xieng Khouang on 6615/5425/4597. They broadcast local programs and relay Vientiane (BGCMS 5/5)

LIBERIA The J77 VOA freq sked no longer lists the 8 kW xmtr on the 75m band (gh)

MALTA R. Vox Fidel, 6188, s/on 0600, singing IS. French anmts (Jim Young, CA, NNRC 5/77) Typo for 6185? Cf May LR, looks like same report (gh)

MAURITIUS) Don't know how long R. Australia has been on 9710 in the 1200-1300 period but I guess we can forget about checking for Mauritius 1300* while they are there (Perdue, AL)

MEXICO Re "Su Pantera", Mérida-6105 slogan: A Mexican friend explains that there is a big Pink Panther fad in Mexico and that 'pantera' has come to mean a sexy macho man the women can't resist, in slang (Jaime Cabezasblanca, SPEEDX 5/77) Answering a question I posed also re Dom. Rep. 3020 on R. Nederland. Interesting example of grammatical gender being disregarded, as 'pantera' is feminine (gh)

MONTERRAT (Cf LN-2) DW on 9590 at 0130 in English does not parallel Antigua 6040 during IS and s/off annts, and the program it relays is considerably more QRM-ridden than 6040, suggesting separate receiving facilities (John Wegener, IL) This doesn't make sense, as I recall the Caribbean Relay Station was to have a single BBC/DW receiving site on Montserrat, operated for both by DW; whilst BEC would operate all the Antigua xmtrs; it later emerged that DW would have some additional lower-powered xmtrs of its own, supposedly on Montserrat, but why wouldn't they use the same feed source as the others? (gh) continued on LN-11

PARAGUAY R. Primero de Marzo (780 MW) hrd 2/5 0100-0413* on RC SSB 11472 kHz; mentioned PARAGOL at 0332, so maybe feed to Colombia; full ID 0359, then Panorama Total de Noticias, sponsored by Jim Piper Whisky, including such esoterica as domestic fútbol scores from Spain and 'this day in (Paraguayan) history'; off abruptly at 0413 conclusion. I'm including a tape of this in my June reports on R. Nederland, on the 11th in Spanish DX pgm, and on the 16th in English, plus following GMT days (gh)

PERU R. Nacional, Lima observed on 9860 instead of 9562 (BBCMS 5/5) Wonder if anything to do with Laves' 9860 catch, thought to be Chile? (gh) Rdif. La Convención, Quillabamba, heard at 0230 on 3544 (Jan Tuner, R. Nederland 12/5)

PORTUGAL HF harmonics are mostly from LAm, but under summertime conditions, some favorably situated Europeans make it thru, such as R. Portugal, 0120 16/5, 18075, 3 x 6025 (gh)

SPAIN RTVE will have some special transmissions outside its regular schedule, 25 May to 14 June for pre-election background, 15/6 for coverage of the legislative elections, and 16/6 with the election returns (Roger Stubbe, HGJB Hello DXers 21/5 via gh; no freqs or sked) RTVE noted intensely interfering with itself on 9530, at 2145-2155 as the General Service to Am in Spanish ends, overlapping with IS prior to s/on of another service in Spanish to Am at 2200 (Richard Wood, NY, 22/4) Probably one from Noblejas site, other from Arganda (gh)

SWAZILAND TWR has an incredibly complex sked in local time, showing meter bands only, for broadcasts in languages you may never have heard of anywhere else, like Pedi and Lowwe Macuo so forgive me for not attempting to render it here; however, the .J77 freq selection is: 3200/3240/3275/3365/4760/4790/5055/5950/6040/6070/6080/7240/7255/7270/7280/9520/9590/11715/11750/11760/11805/11830/11955/15165, subject to change (via John Tuchscherer, WI)

SWEDEN Other listeners in NAm have reported harmful QRM from the European broadcasts of HGJB on 15310 to ours on 15305 to NAm. We have sent a telegram to HGJB three weeks ago, but have not received any answer. We told them we would like to stay on 15305, since this is the best one for NAm and it is becoming established for us. We are wondering if HGJB has left 15310 as we cannot hear them, perhaps due to unstable conditions (Gunnar Malmgren, STA, 6/5 letter to gh) They were still there when checked 15/5, but by 21/5 HGJB did move to 15210, thanks! However, for J77 Cuba is on 15300, causing a similar splash (gh) MORE LN-12

TAIWAN (Cf May LN-6) VOFB listened to my tape and identified the 1700 kHz station as the Kaohsiung Fishing News Station, in the Taiwanese dialect, with weather reports and news of concern to fishing boats. Fades in around 0800 and closes about 1600, occasionally with a silent period varying from 0855 to 0945; mostly talk by a woman, rarely by a man; music varies from SEA to contemporary western rock, Tom Jones, etc. (Mike Hardester, Okinawa, 25/4) I'm also including Mike's tape of this one on my June R. Nederland reports, see Paraguay (gh)

TANZANIA R. Tanzania new freq 9685, 0400 Eng to Af, good at start, but bad shape by 0430; appears inaudible GMT Mons due RHC covering freq (Perdue, AL, 16/4, TDYN) I thought RHC was on 9685 every night, mixing with Moscow(!) earlier; maybe just variable conditions? (gh)

THAILAND Thai govt closed one TV stn, and put Tor Tor Tor radio under Public Relations Dept control. A cabinet order said the stations would be closed temporarily April 9, as authorities investigated possible links between the PRD and an abortive coup attempt. (Asahi Evening News 2/4 via Kiyoshi Nishimura, JADX. via FEDXR) Tor Tor Tor Radio, owned by the Thai TV Co. would not be affected by the transfer of assets of Thai TV to the Mass Communications Organization of Thailand (Bangkok Post, 1/4, via BBCMS via FEDXR)

USSR R. Moscow's coverage of the May Day Parade in Red Square was as usual, with a commentary in Russian only for domestic and overseas, 0650-0915, carried on a total of 80 audible HF channels between 5.9 and 21.8 MHz, on DS and 5th pgm outlets, not affecting the external service in foreign languages (BBCMS 5/5)

USA I picked up an AM VOA spur(?) on 6873e on 7/5 0520-0537, carrying 5995 Greenville, but the 6020 s/on at 0527 came on too, strong; garbled and weaker at 0539 on 7768a. Any ideas? (Overcamp, SC) Yes! Not spurs but VOA feeders on independent sideband, certainly (gh)

USA WRDW, Augusta GA, tent. 2/5 2325 on 2960, 2 x 1480, black programming, ABC-Contemporary news; WHOQ, Orlando FL, on 2970, 3 x 990 10/5 at 2105 with G&W mx, the only 15km from here was poor in QRN. Personnel expressed no concern when I called, so be it! (Terry L. Krüger, Casselberry FL) WHOQ probably within specs; I haven't heard it, while WRDW is always in there at night. My local on 1470 is strong on 2940, but I doubt it'd get out as DX (gh) WQDE, Albany GA, on 2500, 2 x 1250, American Top 40, Mutual nx 2330-2335; 2400* (Neal Perdue, AL, 24/4, 30/4, TDXN) It so happens that the licensee of WNJ is a NASWA member. J.B. Berry called me about my hearing Huayacocotla on it; WNJ has six receiving sites from Daytona on up the coast; the operator would have had to put thru a 'bypass call' in order for the 2390 pick up to be retransmitted; also, WNJ's carrier is supposed to be 16db down. # Well, there was certainly more carrier than that; I took it for AM; possibly it wasn't WNJ relaying XEJN, but it had to be some coastal station paired with 2390 (gh)

VENEZUELA Thru a quasi-confidential source, SWNS has finally been able to pin down the GANTV (Telco) site listed as Peraza. It's a small town south of the Caribbean port of Hifuzote, 90 km east of Caracas. More importantly, Peraza is tied to Caracas via 140 MHz VHF link. In the past, some R. Nacional SWBC xmsns have come from Perazu but this does not necessarily mean that all R. Nacional HF xmters are there. As noted in Mar/Apr Elementary Electronics, R. Nacional is notorious in dx circles for issuing ambiguous information on both its frequencies and location. The original voice xmters at Peraza, built in 1955, are 3 kW; R. Nacional's current SWBC power is supposedly somewhat higher (SWNS) Wonder what they'll do with the ex-Euzkadi xmters? Cf CRANNY (gh)

VIETNAM New stn on 4778 relaying 1st pgm to 1130, then own pgm possibly in dialect, f/out by 1200; not Liberation Radio, on 4780, which has own pgm at 1200-1230 (Naoyuki Tsukamoto, Tokyo, 25/4, FEDXR) Observed 25-27/4 at 1105-1130 with Hanoi pgm-I relay, 1130-1215 own pgm in Rhade or another mountain language strongly resembling Cambodian, so may be in Central Vietnam. (Ugusa, FEDXR) R. Quang Ninh has changed sked from 1200-1225, to: 1132-1157, 1300-1325, on 4693v (Takaharu Kiyomiya, Saitama, JADX, via FEDXR 25/4)

ZAIRE (as this country is more in the news, I notice a tendency, even on RFI English to pronounce it ZAIR, instead of zah-EER -gh) List of regional freqs where contradicting WRTVH 77: Bandundu, 7255, 10 kW; Kisangani 7865, 100 kW; Lubumbashi 11865 100 kW, 7205 and 5058, 10 kW (BECMS 21/4) They've listed that 7865 before, but surely 7265; never reported on 7865 (gh)

ZIMBABWE Rhodesia on 2425 and 2336 were good at 0410 25/4 during a 'plasma disturbance' which was not forecast previously, as are the recurring minor geomagnetic storms (Bob Foxworth, NY) Measured on 2336.1/3307.3 and 2424.9/3395.9 (Foxworth, TDXN)

CLANDESTINE CRANNY Radio Euzkadi, the Voice of Basque Resistance, ceased broadcasting on 30/4. During the final broadcast at 2130, the station said it was closing down for the third time in the past 40 years. It was first on the air in Bilbao in 1937, but closed that year when the Basque region was attacked by Franco's forces. It return after WWII, but was forced to cease due to political pressures. This time, R. Euzkadi was closing so as "to prepare for our appearance on the soil of our own land in freedom". It closed at 2208 saying "since the Basque national flag is once again flying proudly from all mast heads in the Basque country, R. Euzkadi can withdraw from the air with honour". (BECMS 5/5) It had been operating for 14 years in Basque, English, Spanish on 13250v, 12105 from xmters believed to be in Venezuela; from Dec 1946 to Aug 1954 the site was near Bordeaux, France (BECMS 28/4) Dolores Harruri, 81, a well known Loyalist leader of the Spanish Civil War and daughter of a Basque coal miner, returns to Spain from Moscow after a 38-year exile. She plans to run in June's general elections Mrs. Harruri is considered to be Franco's worst political enemy (Star-Ledger, 14/5, via Insinger, NJ)

Voice of Arab Syria has reverted to 6170 from 6060; 60-mins daily in Arabic at 0400, 0700, 1600--an hour earlier due to DST (BECMS 5/5 & 12/5)

Voice of the People of Burma 1330-1430 in Burmese on Tue/Thu/Fri/Sun on 6304 was retimed to 1030-1130 on 3/4; this and the 1200-1300 on 5110 are repeats of the 0030-0130 pgm on 5110 (BECMS 21/4)

MORE CLANDESTINE on LN-11

USA The only US government entities to acknowledge international broadcast activities are VOA RFE/RL and AFRTS. However, the Continental Electronics customers list includes two 10 kW SWBC xmters designated simply "US Government" (SWNS) Well, VOA might use them for feeders or standby/backup; or any agency could use them for non-SWBC purposes; so why jump to the conclusion that they are for clandestine broadcasting? (gh) 1619.7 kHz, pirate still heard at times with pop mx, fairly good Sun nite 25/4, hrd 0230; NRG reporter IDE then as "WCBX" on 1620, address Box 197, Bronx NY 10465; mixes with beacon on 1618.6 (Foxworth, Mineola, TDXN)

Hoarse Voice

Although Kenneth R. Giddens, owner of WKRG-AM-FM-TV Mobile, Ala., resigned as director of Voice of America March 12 at request of Carter administration, he's still in Washington on his own time protesting U.S. shortcoming in international broadcasting compared to Russia and espousing independent Voice, severed from U.S. Information Agency But Advisory Commission on Information, which sits over USIA--and which met last week in Washington--is prepared to recommend not only that Voice be retained under USIA, but that USIA's deputy director be placed in charge to improve its clout and efficiency.

Mr. Giddens told House Subcommittee on International Operations three weeks ago and last Friday iterated to Senate Foreign Relations Subcommittee that competitive U.S. position is "scandalous and disgraceful." Voice is outgunned almost everywhere in world by Soviet, and even in Latin America by little Cuba, he said.

(Broadcasting 2/5, via Sidel, TN)

EUROPE R. Maniac, heard by me in Ireland on 6210, has been noted on 6212 & 6230 lately; "V.F.R.I." noted on 6310 with 10 watts, C&W mx; no time or QTH.

FUTURE PLANS R. Solent City International, now on 6280, will begin TV transmissions this year with 15 watts on ch. B5. R. Jacky the Killer, a Dutch pirate of some renown, will be moving from MW to 40m SW; no freq. Premier Atlantis Radio, currently on 88.0 MHz FM, will begin MW and SW cps shortly on 1111 and 6218; is in Naas, near Dublin (Free Radio Campaign--Ireland, via Andy Robins, MI)

ANGOLA Luanda is probably intending to reinstate its DS "B" pgm, for this anmt was monitored on 4820 after the 1700 news: "This is the "B" programme of R. Nacional de Angola, broadcasting experimentally until the 22nd April" (BBCMS 21/4)

BAHRAIN The Info Minister said R. Bahrain will be heard in large parts of the Arab Homeland including Egypt, Lebanon, Jordan and Syria, before yearend. Studies have been completed but approval of ITU and the Arab Radios Union on frequencies has still to be obtained. Kuwait has donated 250,000 Kuwaiti dinars for purchasing a new radio xmtx for Bahrain before yearend (BBCMS 28/4) Could be MW or SW, or both (gh)

BOLIVIA The R. Cruz del Sur net reports that the govt has decided to forbid new commercial radio stations, except for official radio stations and those private commercial radio stations wanting to operate in border areas (BBCMS 21/4)

COMORO IS. We are planning on broadcasting in Malgache and Arabic soon (Roger Saint-Victor, Le Directeur, R. Comores, via H. Paul Routenburg, Ont, letter dated 9/11/76. via GLDXA 4/77)

(ETHIOPIA) Lutheran communication executives have abandoned any hope of recovering or replacing RVOG, recently seized by the Ethiopian govt. The Lutheran World Federation's committee on communication, which met earlier this month in Geneva, concluded that the political situation in Ethiopia and all of Africa was 'too unstable' to consider replacing the station, the Rev. Dr. William D. Kniffel of St. Louis said this week. Kniffel, director of international operations for the Lutheran Hour, attended the meeting. He said there was general agreement that the work of the station would go on through other media but that all 'brick and mortar' proposals to rebuild were discouraged as soon as they were made. (James E. Adams, St. Louis Post-Dispatch, 29/4, p. 7D, via Lou Buehler, MO) **SWAZI LN-12 GER WLN-11**

GILBERT IS. (Cf May LN-7) The GIBS CE says it is 'possible' they will be back on SW before yearend, but frequency has not been chosen yet. Target audience includes Gilbertese copra cutters in the Phoenix Islands, where reception of 844 kHz MW may not be as good as desired. (John Campbell, Down Under DX Survey 25/4) I'll bet DXers could suggest clear freqs! (gh)

HAITI French Chargé d'Affaires says a new stn is about to go on the air. 4WRD, R. Nationale on 5975/9545 kHz, MW and FM, but didn't say when (R. Chear, France, SGDX 3/5)

IRAN The "Twenty-Fifth Shahrvir" station has a 350-kW, a 250-kW and 2 x 100-kW HF xmtxs, while the site at Savah has 2 x 200-kW; there will be a further 20 xmtxs by 3/78. In an interview 24/4 on the 30th anniversary of R. Iran, the NIRT Head of Radio Transmitters added that the results of the tender for xmtxs would be announced soon and it was hoped that the 15 x 500-kW xmtxs would be installed in the next two to three years. NIRT should be able to broadcast in 26 languages by the end of the Sixth Development Plan, 3/83 (BBCMS 28/4)

ITALY Continental Electronics 3/77 customers list includes a 5-kW SWBC xmtx for Torino with the customer listed as Galileo Ferraris (SWNS) France Inter reports that an American company is setting up a commercial radio station in Ventimiglia to broadcast solely in French from 15/5, to cover all of the Côte d'Azur, 0400-2200 (BBCMS 5/5) Items may not be related.

NETHERLANDS RN is to reduce its 80 min xmtxs to 50 starting in November 1977; those to the Pacific will be 0630-0720 Dutch 9630/9715; 0730-0820 Eng 9715/9770; 0830-0920 Dutch 9770; 0830-0920 English 9715 (Arthur Cushen, DX Party Line 9/5) I had heard about this too, but it wasn't ready to be released. This will save in program production costs (gh) **(ANTILLES)**

NIGERIA Referring to public criticism of NBC on quality and program content, the Commissioner or Information remarked that deficiencies had in the past been attributed to lack of facilities, equipment and personnel. But after 20 years of operation, the nation naturally expected a drastic improvement in NBC pgms. NBC is expected to make a conscious effort to justify the heavy government investment in its projects (BBCMS 28/4)

QATAR Per ASBR, QBS plans to have a 250 kW SWBC xmtx on the air shortly; they are also considering purchase of a new 250 kW and a new 100 kW MW xmtx (SWNS 5/77)

SOUTH AFRICA R. RSA reports that 3 x 500-kW Telefunken xmtxs will be activated 'very soon'; The present 4 x 250 kW Brown-Boveri xmtxs, used the past 11 years, will then be overhauled or rebuilt and put back into service early in 1978, for a total of 7 high power xmtxs. A commentator stated that R. RSA might then be able to expand (BBCMS 28/4) Radio Five is to take to SW in August using omnidirectional log-periodics (J-gh) and 100-kW Telefunken xmtxs, probably using 31 or 41m daytimes, and 75m at night (Gerry Wood) **SWAZILAND LN-12**

TUNISIA Per ASBR, RTT plans a new 100-kW SWBC xmtx at Sidi Mansour (a Sajaïsis suburb) for broadcasts to Europe; was supposed to be on by 1976, but per WRTH77 is not (SWNS 5/77)

USSR As part of the 10th Five-Year Plan, equipment for external broadcasting is to be modernized (BBCMS 5/5)

YUGOSLAVIA Tanjug reports a proposal in the Yugoslav Assembly 28/4 to allot 213,000,000 dinars to develop and equip R. Yugoslavia, which was recently founded, to broadcast abroad exclusively starting in a few months' time. Present plans are for RY to broadcast in another 11 languages in addition to the nine on R. Belgrade's external service. RY will transmit 'to all continents' and provide special pgms in 9 langs spoken in Yugo for workers temporarily employed abroad (BBCMS 5/5)

IRAN LN-11

PROGRAM NEWS KOREA SOUTH Ever-vigilant for word of humour on SW, I spotted this: KES has "Comic Chats" on 6135 daily at 0945-0950, 1455-1500, 2340-2345 and Mon 1855-1900; and on 3918-3930 daily at 1555-1600. Then there's "Pgm for the fellow in Saharin" on 6135, Mon-Sat 1050-1100, Sun-Fri 1950-2000. Presumably one can get more out of these shows if one is fluent in Korean (JDXC 2/77 via FEDXR)

MOROCCO Starting 21/3, Rabat radio announced that regional studios would contribute pgms to the national net 0000-0300: Mon from Wajdah; Tue, Pes; Wed, Casablanca; Thu/Sun, Marrakech; Fri, Agadir; Sat, Tangier (BBCMS 24/3) WRTH shows 6100/7225/9615 for this (gh) MOZAMBIQ LN-11

NIGERIA Among the NBC National Pgms are: News in English 0500/0700/0900/1000/1100/1300/1400/1600/1900/2000 Sun/2200. Pgm Preview 0432-0440. From the Nigerian Editorials 0505-0510 exc. Sun. Solidarity 0540-0557 Sun. Nigeria in the Eighties 0610-0615, 1715-1720 both Mon-Fri. Lagos State Calling 0830-0900 Sun. Across the Nation 1230-1300 Sun. Africa This Week 1330-1345 Sat. Behind the Headlines 1403-1430 Sun. What the People Say 1715-1730 Sun. and 2000-2015 Sat. Nigerian Newsreel 2000-2010 Mon-Fri. Lagos State Calling 2130-2200 Mon. Calling Nigeria 2203-2233 daily. On 7255 at 0700-1630; 4990 0430-1000, 1500-2305 (BBCMS 4/77)

SOUTH AFRICA R. RSA has moved more toward the magazine format, with "Perspective Africa"--people and places, news background, music, a live presentation, weekdays at 1403-1443, 1611-1650, the former on 21535/15220/11900; the latter on 21535/11900/4875. Also, "Good Morning Africa" 0311-0400, 0411-0420 daily on 7270/5980/4875; 0611-0645 17780/15220/11900. Now preceding "DX Corner" on Wednesdays in the 2100 and 2230 xmsns is "New Nations" (RSA Calling)

THAILAND R. Thailand's 0415-0515 NAm broadcast on 11905/9655 (but never heard here), has these pgms: Sunday Magazine, 0440-0500, summarizing Thailand's current affairs, special events and new developments. Last Monday of the month at same time, Mailbox. Saturdays at 0440-0505, Music Scene--that loved by Thais; everyday 0505-0510, Topical Talk, Press and Public Views. And for music lovers, besides their own Thai classics, folk tunes and modern popular songs, they have Chinese, Vietnamese, Cambodian and Malay songs [undated sked via Andy Robins, MI] Perhaps some of the same pgms appear in the 1040-1140 xmsn, to Asia, Europe and Oceania, which is better heard in NAm than the 0415; its times vary (gh)

UKOGBANI Tuesday June 7 is the Queen's Jubilee Day. BBCWS will broadcast her speech to the Commonwealth, live during 24 Hours at 1309; a 30-min roundup of the day's events will be at 1709, and the 8th at 0230, 1030; coverage also in Outlook at 1900. Covered on Outlook (also at 0115) on 9th and 10th is Royal Progress and River Pageant; Beating Retreat at Horseguards Parade; Fireworks and balcony appearance at Buckingham Palace. On Sat Jun 11, the Queen's Official Birthday, GSTQ at 0900; Trooping the Colour at 1215, repeated 12th at 0130. Outlook on the 13th covers Service of the Order of the Garter, St. George's Chapel, Windsor, and on the 28th, Naval Review at Spithead. The event also inspires less pageantic items: Monarchy and the Media, 8th 1430, 9th 0030, 10th 1830. A Jubilee edition of My Music. 5th 0130, 1230, 7th 1830. How films have changed in the past 25 years, on Take One--Jubilee Review, 6th 0145 on 11955/9410/7140/6195 only, 0815, 2145. Top Twenty of 25 Years, 8th 1830, 9th 1215, 2330. Orb & Sceptre--an anthology of words and music, every week Mons 1830, Thurs 0630, Frys 1430. Plus all the other usual good stuff (London Calling, summarized by gh)

USSR Mayak is a 24-h info and mx pgm, constantly informing listeners on life within the USSR and abroad, on all wavebands, with the "Midnight in Moscow" IS every half hour. These details are from the journal "Govorit i Pokazyvaet Moskva": Five-minute news bulletins on the hour and half-hour, and at 0300-0405, 0430-0530 exc. Sun., nx bulletins every 10-15 min. At 0330, review of Pravda; 0500, review of Sovetskaya Rossiya; 1600, brief review of Izvestiya. At present, Wed 1430, pgms devoted to the 60th anniversary of the Great October Socialist Revolution. Daily at 2230-2330, a pgm for builders and engineers on the Baykal-Amur railway. Mayak broadcasts about 20h of all types of music per day (BBCMS 21/4) In Russian.

ZAIRE VOZ, 24h on 15350/15245/7115 has these French pgms: 0000-0100 Mon & Sat, R. Tribune; 0230-0300 Mon & Sat, Knowledge of Mobutism; 0500-0530 exc. Sat, Zaire Matin; 0645-0650 Mon, Economic Chronicle; 0700-0705 daily, Press review; 1200-1300, Zaire Actualities; 1335-1400 Mon, The Zaire of Tomorrow; 1400-1430 Mon, Knowledge of Mobutism; Sat, Front Page Africa. 1435-1500 daily, Echo from Kinshasa; 1700-1800 Armed Forces Pgm; 1800-1830 Zaire Soir; 2100-2115 Zaire Dernieres; 2245-2330 M/T/W Talks or Feature; 2230-2300 Knowledge of Mobutism; 2330-2400, Zaire Mondial. News: 0100-0115, 0730-0735; 0830-0835 & 0930-0935 exc Sun; 1330-1345 Mon-Fri; 1430-1435 Mon-Fri; 1530-1535 Mon-Fri. At times there are also programs in Ki-kongo, Swahili, Tsiluba, Lingala and others (BBCMS 4/77)

DX PROGRAMS

BELGIUM BRT's DX pgm in English now appears on the 4th Sunday during the 1615-1700 pgm on 11940/9745, and following GMT Monday on 9730 at 0015-0045. Du. DX Boomerang 4th Tue 2115-2130 to Af on 11940/9745; Spanish, 4th Sun 2245-2300 on 9730. RTB's French DX pgm is on Fri at 1730 on 11735/9730 (BEGMS 4/77)

CANADA Altho as of 4/6, RCI's weekend pgms are different to Eur; Af; NAM, such as the mailbags on Sundays, there will be a DX Corner, identical in all transmissions on Sundays (Ian McFarland, RCI 15/5) With at least 3 other stations using "DX Corner" as a title, how about something more original for RCI? But glad to see RCI changing its policy! (gh)

CUBA On 23/12/76, RHC answered a question about starting a DX pgm, saying "we may have one in the future" Letters encouraging this might help. Certainly any type of DX program would be better than the usual rhetoric (Jeff White, IL, RIB 7/5)

ECUADOR On Sats HCJB as of J77 no longer beams rapidly-spoken DX Party Line to Japan at 1200 on 9715/11835, latter wiping out 4VEH, but instead Roger Stubbe resumes and expands his slow English and non-preachy "Hello, DXers", timed to fit the 1200-1225 cutoff which deprives listeners to this release on Mon/Thu of the final minutes of DX Party Line (gh)

GERMANY WEST DW now apparently has a monthly DX pgm in some of its English transmissions, on the 3rd Saturday, as opposed to the bilingual German/English starting 110 mins into each German xmsn on the 2nd Sat. The 3rd-Sat one is reported at 0940 on 21540 by (Oliver T. Gooewardena, Sri Lanka, SCDX 12/4)

HUNGARY Besides the Wed/Sat English DX pgm at 0400-0415 to NAM, R Budapest has a Spanish version at the same time Tu/Fri. Also in German, Sat 1400-1415 17785/15160/11910/9585/7155/6040. At 1515-1530 for Europe 17780/15160/11910/9585/7155/6110; English Tue/Fri, German Wed, Italian Mon/Thu (BEGMS 28/4) Maybe also briefer ones w/in xmsns, like in English (gh)

NETHERLANDS ANTILLES The first TWR DX Special of the month, via Monaco, Bonaire and Swaziland, is in German (Gunther Langweige, RN DXJB 12/5) I doubt this applies to Bonaire (gh)

SOUTH AFRICA DX Corner on Wed retimed from 1440 to around 1130 to Af 21535/15220/11900 (RSA Calling) More convenient time for ENAM, but 25/5 it wasn't on (gh) Other airings on Wed and Sat remain the same. French "Coin DX" is next-to-last item before 0550, 0750 on Suns, 17780/15220/11900; Thu before 1300 on 21535/15220/11900; Sun before 1850 on 4875; 2050 on 9585/5980/4875. German "Kurzwellenreiter" next-to-last before 1850 Tue/Thu/Sat 15155/11900. Likewise Dutch "De Puntjes on DX" before 1750 15155/11900 (RSA Calling May-Oct) USSR LN-12

OOB REPORT

British DXers are trying to get SWBC reforms at WARC-79 and are presenting a position paper to the govt. Kuwait out-of-band 12085 1700-2000, and UK DXer Noel Green thinks the unID Arab on 11990 is also Kuwait's HS. Voi-Monrovia noted on 15090 *1630-1730* in aero mobile band, supposedly here for a couple months, but quickly left when brought to Washington's attention. Use of 12010 Monrovia and 7325 via BBC acknowledged in sked, but 15090 was listed as 15320. unID S. Asian (Bangladesh?) 7-8/5 c 1350 with haunting ax in Asian lang on 15535v. BEGMS reports Euzkadi gone from 12105/13250. A new channel for USSR, formerly used by Peking is 15500, 1300-1500 for J77 FS from Asian site. Israel adjusted Hebrew HS to 15547.5, measures 15546.8, ex-15545, varies daily, 0400-1030, 1400-2305. Pakistan afternoon Eng on new 16440/9790, both fair. Mornings in langs on usual 15520, poor, and 17665, variable. Would a NAM beam around 1330-1630 be of interest, Urdu with English news? (all from Larry Magne, PA)

THE PULSER

Presently the best source of unclassified info on the US and Russian OTH radar programs can be found in the 1977 James Weapons Systems. Look in the index under OTH. Among the most interesting/important items: Continental Electronics is under contract to GE to produce a 6-megawatt xmtx; in 1976 the director of Defense R&D, Dr. Currie, testified to a closed session of the Armed Services Committee that the USSR is working on at least two OTH radars. The radar presently being built in Maine is a technology verification prototype. If it meets design objectives, a full-scale model will be built on the same site in Maine and one will be built in the northwest US. The program name is CONUS OTH-B. So far, about \$22 million has been spent (David Mackes, MD)

The Air Force has found an unexpected hostile blip-on the screen of its fledgling OTH radar program in Sen. Edmund Muskie, Dem., Maine. If he has his way, none of the military construction funds appropriated for the OTH pgm in the fiscal 1975 budget could be spent until 31/5/75. Muskie's ire was aroused when the AF announced 25/6 that it had preferred sites in Maine for the xmtx and rx installations. The Maine receiver site would take 1000 acres that now produce 6% of the state's blueberry crop. Muskie argues that Maine citizens need more time to convince the AF of the 'importance of the land to our economy'. The full senate concurred with a delaying amendment tacked onto the military construction appropriation bill. It's not that he doesn't want the site in Maine, the Senator says, but he wants unresolved problems solved. He'd like the AF to choose another rx site to save the blueberries (Electronic Design, Oct. 11 1974, p. 57-58, via Robert H. French, MD) Presumably this is long since resolved, but is an interesting commentary on the relative unimportance accorded to the interests of SWLs and DXers and others who would not have our spectrum polluted with the garbage of over-the-horizon backscatter radar pulses (gh)

PUBLICATIONS

Global News is a new weekly tabloid newspaper, to start publication 15/6 in Toronto, "aiming to be the world's first multi-national, multi-perspective newspaper." It will 'derive most of its news from monitoring the English language programming of 36 state-operated SW radio stations around the world'. Editor Brian Nolan told the *Globe & Mail* (no relation) that "the major news stories will be drawn from the accounts of three or four different national radio stations." It will sell for 50¢ on newsstands, but will be principally marketed to airlines, which will distribute it free to passengers. So far only Air Canada and UTA of France have agreed to distribute it. (Toronto G&M 11/5 via Ball, Ont.)

Africa News, a weekly digest of African Affairs, in which NASWA member Reed Kramer is involved, also bases some of its reports on monitoring, tho this is not obvious from the copy sent me. They also produce audio feeds for radio stations and NPR, twice weekly. Box 3851, Durham NC 27702. (gh)

1979 World Radio Conference: How It Will Affect You, in *May Radio-Electronics*, by Stanley Leinwall. Promises at least 50% increase in spectrum-space for international broadcasting, while hams will have to fight even to hold onto what they have in view of third-world pressure and belief that ham radio is primarily an American activity of little interest to developing nations. (Dave Walcutt, IL) Good news for us!

The Case of the Missing Sunspots, by John A. Eddy, *May Scientific American* (Walcutt)

Undercurrents, an English counterculture technology magazine, has in back issue #7, a 'people's radio primer': Technical advice for clandestine broadcasting, construction plans for low power MW, FM, carrier current, and modulated-light xmters, pictures of the Welsh Plaid Cymru station. Surprisingly, not a mention of HF, where the Euro action really is. 275 Finchley Rd., London NW3 (Hugh Miller, WA)

Down Under DX Survey No. 8 is out, new address 7 Donald Road, Burwood, Victoria, Australia 3125, for 6 IRCs intl air, 3 IRCs or 50¢ in mint (Toronto *Globe & Mail*, Australian stamps in ANZ. 12 pages, including 3p of survey of 5900-6200 kHz Asia/Pac/USSR stns. 3p on Chinese HS survey, and more (gh) 22/4 via Seltzer Ont)

Far Eastern DX Review No. 8, 16p, features a monitoring report by Hiroyuki Nagase, of Chinese Stations on SW other than R. Peking FS, 2200-17605 kHz, 4 p. Contact Isao Ugusa, 1-3=10 Mikage-Yamate, Higashinada, Kobe 658, Japan (gh)

Listade Emissoras Brasileiras de Onda Tropical is offered for one IRC abroad from DX Clube do Brasil, C.P. 30, BR-50000 Recife, Brazil (SCDX 10/5)

XV Anniversary of Radio Havana Cuba (sic) (cf May LN-11) The containing clumsy misspellings and some dogmatic verbiage, this booklet available from RHC contains some quotations from surprising sources and some interesting statistics, and is in general worth reading (Richard E. Wood, NY) It was ironic to note this on the last page: 'Printed in the "Friedrich Engels Unit" of the Enterprise of Propaganda Media, Jan, 77, 'Year of Institutionalization!' Think that one over a while! (Ed Insinger, NJ)

Itinerario Temático y Estilístico del Teatro Contemporáneo Español, por Carlos Miguel Suárez Radillo is a 279-p softcover book of plays presented on RTVE, sent to (Dan Ferguson, WV)

TIME JUMPS

Albania went on GMT+2 on 8 May; **Algeria** jumped 2 hrs to GMT+2 on 6 May; on 20/10, will go back only 1 hr, to 5/5/78; contradicting May LN-5; **Cuba** went to GMT -4 on 29/4, to 25/9. **Tunisia** on GMT+2, 1/5 until 25/9 (BBCMS var.)

NEXT DEADLINE AUGUST 15. SPOTLIGHT IS EUROPE

A word of thanks to all who said kind words about my comments last time. Keep those cards and letters coming.

Roger Legge asks why Azores are counted as Africa even though they are off the coast of Europe? Does anyone know?

I have had a few suggestions to include receiver model in the column. If you send me your primary receiver, I will find room for it. I think it is an important statistic.

Well, that takes care of all updates received here through May 17. Some of you really squeeze that deadline, and you may have noticed that sometimes your report is included when it is late, and sometimes it is not. That is because I have to borrow a typewriter and I do the column whenever I can arrange to borrow it, and include all reports received at that point.

73s till next time

QSL REPORT

BILL OLIVER, EDITOR
45 Wildflower Road
Levittown, PA 19057

JUNE 1977

According to information forwarded by Ed Insinger-NJ and Tom Stanziale-CT, the CBC Northern Service has temporarily discontinued issuing QSL cards. Exactly how long "temporarily" is, we don't know. Ed wrote that his notice was stapled to an "Eskimo" card with no data, and Tom received a sked and a postcard thanking him for his report!

A nice, quiet month this time around. We have a verie from Ivory Coast, the first one reported since April, 1976, from Ralph Alm-BC, and Jim Young-CA has VIC #204 with three QSL's from Cook Island! Here we go....

AFARS & ISSAS: FR3, 478C, white FR3 card w/date only in 20 days for 1 IRC. (Bishop-PA); four cards in 9 months, 3 months after 2nd f/up for EE rpt on FF xmsn, mint stamps, used Canadian stamps, and finally, a Canadian dollar on the 3rd try. (Kusalik-ONT). Money talks!!

ALBANIA: R. Tirana, 7065, f/d "Revolutionary" card and sked in 46 days. No rp. (Ware-VA): 9780, red/white card and sked in 75 days. No rp. (Schatten-MI)
R. Feking Relay, 7120, "Yao Mts." card w/o time and sked in 16 days for 2 IRC's. (Zajda-PA).

ANTIGUA: BBC Relay, 6175, card with "Antigua" typed on it in 21 days.

(Sparks-CA): 9560, no-data card in 84 days. No rp. (Alintuck-MA).

DW Relay, 6040, no-data card in 136 days for 2 IRC's. (Ward-NB); same in 70 days for 1 IRC. (Zajda-MA): 5960, same in 4 months. (Sparks-CA).

ARMENIAN SSR: R. Moscow via Yerevan, 7130, f/d card in 30 days. (Legre-VA).

ASCENSION IS: BBC Relay, 9765, no-data card and sked in 20 days. No rp.

(Alintuck-MA).

ASIATIC RSFSR: R. Moscow via Yuzhno-Sakhalinsk, 11860; via Nikolayevsk-on-Amur, 9785, f/d card in 23 days. No rp. (Meyer-IL).

AUSTRALIA: R. Australia, 9580, f/d "Parakeet" card and calendar in 77 days for aerogramme rpt. No rp. (Desrosiers-MA).

VLIe-Sydney, 6090, map card in 1 month. (Kusalik-ONT).

AUSTRIA: ORF, 6155, f/d "Phantasmagorical Landscape" card, sked and rpt form in 2 1/2 months. No rp. This is another "interesting" card, featuring one more "nude cutie"! (Bishop-PA); f/d "Adam" card in 45 days. No rp. Bumper sticker sent several weeks before. (Meehan-CT): 9770, f/d card in 84 days. No rp. (Valko-PA): 15335, f/d "Lovers" card, bumper sticker, sked and rpt forms in 2 months for 2 IRC's. (Jakubowski-CN).

AZERBAIJAN SSR: R. Moscow via Baku, 21498, card in 1 month. (Barto-CT).

BELGIUM: BRTV, 6080, f/d card, brochure, travel booklet, sked, 4 postcards, pennant and a map of Belgium in 1 month for 1 IRC. (Goldstein-NY); f/d card, sked, pennant and "Mailbag" transcript in 27 days for a drawing of the BRTV Building by my 7-year old brother. (Gaffin-NY). It won't replace IRC's, Adam.

BELIZE: R. Belize, 3285, f/d yellow map card w/wrong freq (3300 KHz) in 13 days. No rp. (Ware-VA); same card w/o time, wrong freq, in 22 days for 1 IRC. (House-AZ); same in 31 days for 1 IRC. (Alintuck-MA).

BENIN: La Voix de la Revolution, 4870, card in 2 months. (Barto-CT).

BRAZIL: R. Nacional, 11780, f/d card and sked in 45 days. No rp. (Alintuck-MA); same in 56 days for 2 IRC's. (Alm-BC).

R. Pioneira de Teresina, 5015, letter in 2 months for PP rpt. V/s Pedro Mendes Ribeiro, Director Artistico. (Barto-CT).

BULGARIA: R. Sofia, 9700, f/d "Ohrid Clement" card w/no freq or time and rpt forms in 62 days. No rp. (Quraishi-SASK); f/d "Sofia U" card in 58 days. No rp. (Valko-PA); same card, sked and rpt forms in 32 days for mint stamps. (Ware-VA).

BURUNDI: R. Cordac, 4900, f/d card in 13 months, 4 months after f/up for Canadian \$1.00, used stamps, postcard and Christmas card. (Kusalik-ONT).

CANADA: CFRX-Toronto, 6005, card w/o time in 15 days for 1 IRC. (Dubrick-IL)
CHNX-Halifax, 6130, plain white cards and station fact sheets in 8 days. No rp. (Troster-ONT); in 8 days for 20¢ in Canadian coin. (Alintuck-MA) in 2 weeks for 1 IRC. (Caruso-IL); in 9 days. No rp. (Brooker-ONT).

CHU, 3330, "Sir Sanford Fleming" card in 21 days. No rp. (House-AZ).
CHINA: R. Peking, 11945, f/d "Workers" card, sked and promise of mags in 25 days for 1 IRC. (Clark-IN); f/d "Yao Mts." card, sked and color brochure in 20 days. No rp. (Goldstein-NY).
COOK IS: R. Cook is, 3265/5045, 3 different "Barotonga Scenes" cards, all typed f/d postcards with handwritten statements apologizing for the long delay. This was in direct response to RNZ Overseas Liaison Officer Mr. J.S. McLeod who contacted R. Cook Is, asking for a prompt reply to my rpts. My QSL'S were for my original, perhaps the only, reception world-wide of 3265 kHz, March 22, 1976 and of 5045 kHz, December 4 and 6, 1976. Country #204 after 5 rpts to them, many IRC's, stamps, etc! It paid off! (Young-CA).
COSTA RICA: R. Casino, 5954, f/d card and pennant in 4 weeks for 2 IRC's. (Jakubowski-OH); same in 56 days for 1 IRC. (House-AZ).
COLOMBIA: R. Meridiano 70, 4925, letter in 1 month for SS rpt and mint stamps. V/s Luis Casteneda Perez, Director. (Sparks-CA).
 Ecos del Combeima, 4875, form letter, personal letter and band notes in 3 months for SS rpt and mint stamps. V/s Alfonso Tovar. (Sparks-CA).
 R. Cinco, 5040, letter and Christmas card in 12 weeks for SS rpt and mint stamps. V/s Jairo A. Agudelo G. (Sparks-CA).
 R. Super, 6065, f/d "Bogata Info" card and 2 large window stickers in 17 days for mint stamps. (Caruso-IL).
CUBA: RHC, 11725, f/d card in 8 months. No rp. (Miller-PA): 17885, QSL card, letter and 15th Anniversary booklet in 73 days for 2 IRC's. (Colacarro-MA).
CZECHOSLOVAKIA: R. Prague, 5930, f/d "Trotsky Castle" card, sked and Club info in 71 days for 1 IRC. "Czechoslovak Life" mags came 3 weeks later. (Zajda-MA): 9540, f/d "30th Anniversary of Liberation" card, booklet on RP, contest details and slides of the Prague Zoo in 47 days for SS rpt on LAM Svc. No rp. (Gaffin-NY): 5930/7345, f/d cards and First Day Cover stamps in 76 days for 1 IRC. (Rockwood-OH).

JUNE 1977

.....
.DEADLINE 12th of month . to Greg Ravenhorst!
.....

A sharp drop in the number of reporters this month indicates that the summer season is upon us - everyone will be fleeing to the higher frequencies. There have, however, been past summers when many excellent African stations have appeared in the IR-A range, so don't forsake the lower frequencies altogether. . .

- 2200 CHINA Fujien; Hear well at 1400, the lowest freq SWBC stn I've hrd (Willis-AUS)
2425 RHODESIA RBC; 0350-0400 M w/tlk and into EE rx after 0400 ID, much QSB - // 3306
hrd but 2336 not hrd (Mayer 5/3)
- 2430 CHINA PLA-Fouzhou; 1300 in CC lang tk, good sigs (Willis-AUS)
2460 CHINA HS program hrd fairly at 1225 (Willis-AUS)
2475 CHINA Zhejiang; 1243 in CC tk by M (Bryan 4/24)
2490 CHINA Fuzhou; PLA-1 in CC tk at 1249 by M (Bryan 4/24)
2510 S. KOREA Taegu; 1254 M&W in KK tk, and mx (Bryan 4/24)
2600 CHINA PLA-1; Good level at 1300 (Willis/Cosier-AUS) 1311 M&W in CC tk (Bryan)
2695 N. KOREA Chongjin; 1318 in KK conversation between M&W (Bryan 4/21)
2745 N. KOREA Sinuju; 1324 KK, semi-classical mx, M in tk (Bryan 4/21)
2765 N. KOREA Pyongyang; 1329 KK, M w/tlks and KK mx (Bryan 4/21)
2850 N. KOREA Pyongyang; 1340 M in KK tlks (Bryan 4/21)
3000 CHINA PLA-1; Fouzhou hrd 1302 in CC tk by M&W, mx (Bryan 4/24)
3015 N. KOREA Pyongyang; 1311 tk by M in KK (Bryan 4/24)
3032 N. KOREA Wonsan; 1314 KK tk by M (Bryan 4/24)
3200 CHINA Fuzhou; PLA-2 1318 in CC, tk by W, mx (Bryan 4/24)
3204 NIGERIA NBC-Ibadan; 0545 in EE, W w/pop mx program (Bishop 5/3)
3210 MOZAMBIQUE RM; 0350 in PP tlks, local and pop mx, ID and mx at 0400 (Bishop 4/10)
3215 CELEBES RRI-Ujung Pandang; 1325 Indo, Strauss waltz (Bryan 4/24)
3227 LIBERIA ELWA; 0615-0625 in lang (possibly Hausa), mx in local lang, M in fast tk, EE ID 0618 (Dubrick 4/25)
- 3230 TAIWAN VOFC; 1329 in CC tk by W (Bryan 4/24)
3260 CHINA Guizhou; 1332 in CC tk by M (Bryan 4/24)
3280 ECUADOR LV del Napo; Hrd for first time at 1037 with ID, good level (Willis-AUS)
3285 BRAZIL R. Olinda; 0102-0110 in PP; no sign of Belize except HET; typical tk and Brazilian mx--orchestral and some ballads, E. (Earhart 4/9)
3290 CHINA RP; 1330 in CC tk by M and W (Bryan 4/24)
3295 VENEZUELA R. Trujillo; 1100 at good level (Willis/Cosier-AUS)
3300 GUATEMALA IGNA; 0259 EE rel. tlks and hymns (Alintuck 4/8) 0340 EE rel. px (Bolitto 4/8)
- 3306 RHODESIA RBC; 0417-0420 in vern w/mixed native music (Schipelliti 4/25)
3310 CHINA Jilin; well heard prior to 1000 (Willis/Cosier-AUS)
3316 SIERRA LEONE SILS; 0010-0030* in EE rel. sermon (Mayer 3/27) 2352-0015* with rel program, short musical piece before s/off; CC until 0022 (Earhart 4/9)
2110 w/tlk by M in African lang, fist time noted this DX season (Padula 4/18) Good DX to you Bob.
- 3325 GUATEMALA R Maya de Barillas; 0335* in SS with "east listening" mx, W ancw with ID and freqs (Jones 4/11)
- 3325 UNID; Latin station here at 0600, guess Ecuador; things look good for our Latin season for level on this one was good (Willis-AUS) If the Ecuadorian, Mike, certainly a good catch--they have been known to vary from WRH sked 0300*--IR
- 3330 UNID; FF stn here, barely audible fm 0350-0430*; no ID heard but believe them to be Rwanda w/mostly just tk (Bishop 4/17-4/24)
- 3345 BRAZIL R Ed Uberlandia; 0110-0120 in PP, ID 0115, Brazilian mx (Mayer 3/27)
3350t PERU R. Independencia; 0337 in SS, station here surfaced under UTE5 w/LA and Andean style mx, no ID hrd (Bishop 4/13)
- 3360 CHINA RP; Taiwan service here at 1030, always a good signal (Willis-AUS)
3366 GHANA GBC; 2247-2300* EE, mx, ID w/meter bands (Alintuck 4/7) 0600-0610 EE ID and mx w/UTE QRM (Dubrick 4/25, Grenier 5/1)

- 3380 MALAYI MBC; 0310 in Chichewa with chorals, possible EE TC's (Mayer 4/4) 0337-0346 in EE/Chichewa native mx w/drums, M in tlk (Hobbs 4/9)
- 3380 ECUADOR R Iris; 1120 and also at 0600 (Willis/Cosier-AUS) Algunos detalles??
- 3390 ECUADOR R Zaracay; 0330 in SS, LA mx and amts, ID (Alexander 4/8)
- 3396 INDONESIA RBC; 0420-0425 in EE, TC's, mx, "Tetley Tea Bag Commercial" (Schipalliti 4/25)
- 3400 CHINA PLA-2 Fuzhou; 1342 in CC with classical mx (Bryan 4/24)
- 3535 CHINA PLA-1 Fuzhou; 1347 with W in CC tlk, mx (Bryan 4/24)
- 3560 N. KOREA Pyongyang; 1350 in EE with KK mx (Bryan 4/24) Listed for SSB on 3560-DR
- 3640 CHINA PLA-1 Fuzhou; 1354 in CC tlk by M and W, mx (Bryan 4/24)
- 3910 JAPAN FEN; 1150 in EE with pop mx (Grenier 5/8)
- 3925 PAPUA NEW GUINEA NBC; 1030-1105 EE, lively mx //4890 (Sherman 4/11)
- 3925 JAPAN NSB; 1405 in JJ w/two W in tlk (Bryan 4/24)
- 3930 CHINA Chifeng; 1100 with excellent signals (Willis/Cosier-AUS)
- 3970 OF BRITAIN BBC; Via longpath, unusual for April; WS for Europe 0625-0630 (Padula)
- 3980 SOUTH AFRICA SABC; 0145 in Afrikaans with nice MOR mx, a few amts (Hoffman)
- 3995 GERMANY (W) DW; 0125-0140 in GG, mx, mx, ARO GRM (Potisk 4/16)
- 4040 ASIATIC SSR Vladivostok; 0652 in RR, semi-classical mx, W ancr (Bryan 4/24)
- 4068 CHINA Huhehaote; fine level at 1600* (Willis-AUS)
- 4103 VIETNAM Viet Bac; 1346 in VV w/classical mx, W ancr (Bryan 4/21)
- 4106v VIETNAM Viet Bac; Hrd here 1400*- don't mix up with stn just lately appearing on 4109; don't think latter is Viet Bac; regarding 6906, Viet Bac not there now, but could be 6934.6 (Willis-AUS)
- 4115 KOREA (N) V of Rev Reunification; 1351 in KK tlkby W (Bryan 4/21)
- 4120 KOREA (N) V of Rev Reunification; 1400-1430 w/ID "This is the Voice of the Rev. Party for Reunification" w/unusual short chime at s/on (Poppin 4/11)
- 4250 CHINA RP; 1400 in CC tlk by M and W, classical mx (Bryan 4/21)
- 4330 CHINA PLA-1 Fuzhou; 1405 in CC, tlk by MW (Bryan 4/21)
- 4420 USSR Kokchetav; listed 5 kW so dm pleased to hear this as never hrd before; seemed like CC stn on top, more of a UTE (Willis-AUS) Time and program details:
- 4460 CHINA RP; 1253 in CC w/semi-classical and pop mx (Bryan 4/26)
- 4485 ASIATIC SSR Petropavlovsk; 1412 in RR with classical mx, M ancr (Bryan 4/24)
- 4610 ASIATIC SSR Dnabarovsk; 1257 in RR, classical mx, M ancr (Bryan 4/26)
- 4620 CHINA RP; 1306 W in tlk (Bryan 4/26) Lang is UNID-DR
- 4626 UNID; Indo stn hrd here to 1400* (same sign off time as 4605); good level and seemed RRI stn (Willis-AUS)
- 4680 ECUADOR R Mac Espeje; 0035 SS, ads, ID 0035 and into mx (Hoffman 5/11) 0105 w/ID and tlk in SS (Jones 5/4) 0413 SS, Ecuadorian mx, M ancr (Bryan 4/24) 0545-0555 w/ID's, M intro to mx selections, LA mx, TC's, sudden s/off 0555---possible Lmtr trouble? (Trautschold 4/15)
- 4696 BOLIVIA R Riberalta; 0342-0355 SS, classical mx, ID 0045 (Mayer 5/3)
- 4719 SOLIMESI RRI-Ujung Pandang; 1315 in Indo, W in tlks (Bryan 4/26)
- 4725 BURMA BBS; 1317 in Burmese, M w/mx (Bryan 4/26)
- 4760 SWAZILAND TWR; 0455 in Afrikaans and rel. program (Bryan 4/24) 0440-0502 in psm-EG; M in tlk, hum, fair signal with fading (Bogal 4/9)
- 4760 CHINA Kunming; 1325 W in CC tlk (Bryan 4/26)
- 4755 COLOMBIA Em Nuevo Mundo; 0000 SS, mx, amts, mx and ID's for Radio CARACOL (Tannerwald 4/30) 0315 SS, M w/ID and mx (Bryan 4/25) 0605-0705 CARACOL net pgn of LA pop and classical mx, M in tlk, many ID's but none for Em Nuevo Mundo (Trautschold 3/31, Dubrick 4/25, Earhart 4/17) SCRRY FOR THE OUT OF ORDER --DR
- 4764 SUMATRA RRI-Medan; 1331 in Indo w/mx and ads (Bryan 4/26)
- 4765 BRAZIL R Em Rural Santarem; 0900 at excellent level (Willis/Cosier-AUS)
- 4765 ECUADOR CRE; 0100 SS, usual M DJ w/MOR mx (Hoffman 5/11)
- 4765 CONGO RTVG; 2139-2144 w/drum rhythms (Bunn 4/22) 0000* w/African mx, ID at s/off with "The Internationale;" (Schwartz 4/25)

Thank you to all of the reporters to the June Log Report CIII! Some good items were reported this month! Until next month, 73, *Com*

PUBLISHERS CORNER:

- QSO/NASWA did not arrive in time for publication this month, it should return next month.
- Next month we will announce the details of 5 new awards courtesy of awards chairman Dan Henderson.
- This issue begins my 3rd year as publisher and I wish to acknowledge our printer for the past two years, Graphic Impressions Ltd. of South Holland, IL. They have got FRENEX printed on time on all issues, even though on occasion I had received the bulletin from them at 9:30PM the night before the mailing.
- phone numbers of interest; for up to date propagation conditions call the Space Environmental Service Center, Boulder CO. 303-449-8129. They have reactivated giving 3 hr K values, A-index and solar flux. Also for FCC press info you can call the FCC at 202-632-0002 and receive a twice a day update on FCC actions. Also Bial-A-Pro 516-883-6223 gives a weekly propagation forecast, mainly focusing on the ham bands.

FRENDX CREDITS

Distr. Editor: Greg Ravenhorst
Rural Route, Hollandale, MN. 56045

Thank you to the 58 reporters who did report. How about you who didn't send in material? I've noted that a number of the more well-known DXers in NASWA report seldomly at best, or never at all. Get with it, Guys! CONTRIBUTE!!!! Is your name included in this list?.....

Brian ALEXANDER, Mechanicsburg, PA (DX-160)...Martin ALINTUCK, Natick, MA (DX-160)...Gerry BISHOP, Christiana, PA (DX-160)...Bill BOGEL, Santa Barbara, CA (FRG7)...Michael BOLITHO, Toronto, Ont, Canada (AGS-38)...Mike BROOKER, Toronto, Ont, Canada (TFM 8000W)...Jim BRYAN, Tracy, CA (SPR4)...Peter BUNN, Highett, Vic, Australia (HA-600A)...Gerald CLARK, Lafayette, IN (S-108)...Jon COHEN, Willingboro, NJ (FRG7)...Robert CRAIG, Danvers, MA...Hadley CRESS, Harrisonburg, VA (R4C)...Tony DUBRICK, Urbana, IL (HQ-180A)...Kenneth EARTHART, Allentown, PA (FRG7)...Marlin FIELD, Hillsdale, MI (SPR4)...Barry FRAJER, New York, NY (DX-160)...Robert FRASER, Cohasset, MA (XCR-30)...Editor Tom GAVARAS, Wayzata, MN (HQ-180)...(Tom managed to report before going off to his girlwatching classes at college) Emery GEARHART, Springfield, OH (SPR4)... Charles GEORGE, Dallas, TX (Staroamer II)...Joe GREBOWSKY, Kensington, MD (SPR4)...Pete GRENIER, Azusa, CA (FRG7)...Editor Glenn HAUSER, Knoxville, TN (HQ-160)...Bob HAYES, Hillsdale, MI (SW4A)...Frank HERMANN, Kitchener, Ont, Canada (DX-160)...Daniel HERSH, Hollsopple, PA (SPR4)...Bobby HOBBS, Rocky Mount, NC (FRG7)...Emmett HOFFMANN, 51S-1)...Jack JONES, Jackson, MS (DX-160) Paul KELLY, Dunnville, Ont, Canada...Creede LAMBARD, Billings, MT (FRG7)... J. McCONNELL, Hopedale, MA...Pitt McNEIL, Washington, DC (SX-190)...Don MACKAY, Newark, DE (SPR4)...Publisher Alan MAYER, Park Forest, IL (SPR4)... Albert MILLER, Jr, Youngstown, OH (HRO-500)...Robert MILLER, Center Valley, PA (SX-99)...Timothy NOONAN, Milwaukee, WI (SW4A)...John ONKEN, Metamora, IL Bob PADULA, Surry Hills, Vic, Australia (CR100)...Alan PLOTNICK, Hamden, CT (SPR4)...George POPPIN, San Francisco, CA (FRG7)...Thomas POTISK, Milwaukee, WI (DX-160)...Jim ROBERTS, Winnipeg, Man, Canada (Eddystone 940)...Garry SAPOZNIKOW, Winnipeg, Man, Canada (FRG7)...Peter SCHIPELLITI, Burlington, MA (FRG7)...Richard SCHWARTZ, Dover, DE (SX-190)...Clayton SHERMAN, Hoosick Falls, NY (SPR4)...Todd SMITH, Wilton, CT (GR-64)...Patrick SULLIVAN, Concord MA...Richard SWANSON, Wellman, IA (DX-160)...Leon TANNENWALD, New York, NY (SPR4)...Michael TONKEWICH, Winnipeg, Man, Canada (DX-160)...John TRAUTSCHOLD Menomonee Falls, WI (SP-600)...Dave VALKO, Dunlo, PA (DX-160)...Mike WILLIS, Hampton, Vic, Australia (Trio 9R59DE)...Steve WISEBLOOD, Santa Maria, CA (M660A)...Robert ZILMER, Milwaukee, WI (R390A).....

* IF YOU have any "Helping Hand" or "Wanted" items that you would like published, that pertain to our hobby, send them to me, and I'll publish as space A REFRESHER COURSE ON REPORTING PROCEDURES: I'm repeating this Z permits from last Novembers edition, and hope that you'll follow them, as it makes things alot easier and more understandable for the Editors.

- ① If possible, use NASWA report forms, which can be gotten from me for 28¢ in stamps, plus a large envelope. This will get you 20 report forms (which will give you room for 200 reports) via 3rd class mail.
- ② If you can't afford the forms, or just plain want to be stubborn about it, then double-space between each line, and triple space between each report.
- ③ Write or type up your reports from the lowest frequency to the highest.
- ④ Cut apart the reports from each other, & put in order from lowest to high.
- ⑤ If you don't use the report forms, then use a heavy paper, not onion skin!
- ⑥ Write or type on only one side of the paper or forms.
- ⑦ Send the reports to me, not the Editor of the individual Log Report column.
- ⑧ Lastly, be a little neat. I have thrown reports that were unreadable, written on both sides of the paper, singlespaced, name not given anywhere, etc.
- ⑨ The only other reason that your report may not make it to print, is because the editors had a valid reason, or my 1-year-old daughter ate, tore, or mushed them up. This actually happened once, but hopefully not again!

ANARC '77: I will be going to the 1977 ANARC convention at Schaumburg, IL, and would urge as many members as possible to attend. I would think it well worth your while to enjoy July 15, 16, & 17 there. I hope to meet alot of you there. You'll find me working on Bishop's collection! HI/HI! 73's, Greg Ravenhorst
