UNIVERSAL SHORTWAVE

Universal M-900

The new M-900 lets you copy the major abortwave transmission modes. Monitor Morse code from thips and hams. Baudot RTTY is included for foreign press and weather transmissions. Both Stior A and B are supported for monitoring the extensive maritime and diplomatic traffic. Receive FAX maps and pictures from around the world. Requires monitor and 12 VDC (also printer for FAX).

	M-900 List Price	\$599.00				
	Order 40936	\$549.95				
Shipping/Handling/Insurance \$8.00						

The ICF-2003 covers 153 - 29995 KHz and FM. A BPO is provided for SSB and CW. Advanced features include: LCD digital readous, keypad entry, ice memories, scan, 12-24 hour clock-timer, LED tuning meter and tone switch. With earphone, carry case, battery case, AN-6 wind-up antenna and SW guide. Requires six AA cells (not supplied).

ICF-2003 List Price	\$319.95
ICF-2003 Discount Price	
Order #2988	\$259.95
Shipping/Handling/Insurance	\$5,00

HF AERONAUTICAL COMMUNICATIONS HANDBOOK By Robert E. Evans

By Robert E. Evans Universal Radio Research

Here is an exhaustive and scholarly treatment of the entire topic of shortwave aeronaucical listening. This mammoth 266 page (8½" x11") laser quality book is extremely well organized and absolutely up to date. This authoritative volume is the standard reference book on the subject. We highly recommend it £1989

Order #3020 \$19.95

THE SOVIET MARITIME RTTY DICTIONARY

By Gary Gorka & Fred Osterman Universal Radio Research

The single largest user of Baudot RTTY on shortwave is the vast Soviet maritime fleet. Their RTTY transmissions can be monitored 24 hours a day! With this book you will be able to find, decode and understand this extensive traffic. It will open an entirely new aspect of RTTY monitoring for you. ©1988. 102 p.

Order #1635 \$11.95

SHOPTWAVE RECEIVERS PAST & PRESENT

By Fred Osterman Universal Radio Research

A concise guide to over 200 shortwave receivers manufactured in the last twenty years. Gives key information on each model including coverage, display, circuit type, performance, new value, used value, etc. Photos on most models. The Blue Book of shortwave radio values. ©1987 104 p.

Order #2948\$6,95

COMPUSERV- 72571,1046

Not a lot of mail this month; chalk it up to the usual summer doldrums. Summer never has been the most active season for our hobby. Some have said this is because of thunderstorms causing static crashes making listening unbearable. My own theory is that SWL'ing is a Winter "sport," lending itself to averting the cabin fever caused by that season.

I would like to personally thank those who have been helping out with the headquarters duties. As NASWA membership continues to grow, so do the headquarters duties. Bob Brown has been helping publisher Bill Oliver by composing some of the columns and taking on some of the other duties. Jon Cohen has been helping Bill as well. I would like to thank all three of them for volunteering their time, making sure that end of the club runs smoothly.

Kenwood U.S.A. has installed a computer bulletin board. The details are:

Phone number: (213)-761-8284

Parity: 8-N-1

Hours of operation: 0100 - 1500 GMT Weekdays

24 hours on weekends

You can leave technical and product related questions and download software. I understand they offer the software that interfaces a computer with the R-5000. It's free for the asking, all you have to do is download it.

Again, the Canadian Government is considering eliminating the CBC. NASWA supports the efforts of the CBC and urges you to write them and voice your support. The text of your letter should focus on the positive things RCI does for Canada such as encouraging travel and tourism.

I saw an interesting message on Compuserve last week from Jack Howarth. He recently tried out a Panasonic RF-B40 and although he was not overly impressed with the radio, he did take some interest in the SW frequency schedule that National/Panasonic prints and packs with the radios. He could see that a page was cut out and a blank piece of paper was carefully pasted onto the bottom of the booklet. By carefully holding the booklet up to the light, he could see that the page removed was the program schedule for KOL Israel. Turning back to the front, he was amazed to see that they had passed a small typed sheet of paper over the table of contents for the Mideast. The new one lacked a listing for Israel as a broadcaster. Although he does not agree with all of that countries politics, Jack found the whole issue disgusting. It gave him one other reason to purchase a Sony 2010 instead of the Panasonic.

Remember our logo contest announced in the April issue of FRENDX? The contest entries have been received by Editor in Chief Harold Cones who mailed them out to the judges. I have received mine and was very impressed by not only the quantity of the submissions but also their quality! Be assured that we are going to have a first class logo when all is said and done.

I am still in the market for a Hammarlund HQ-180/A or AX and an SP-600 JX. They must be in mint condition suitable to be placed in a collection. I am also looking for the matching S-200 speaker. It too must be in the same condition. Got one? Drop me a line.

On behalf of the entire NASWA membership, I would like to congratulate Kris and Elaine Field on the birth of their new son, Matthew Christian Field. Kris is so devoted to this hobby that he actually called in his loggings for the ANARC SWL Net from the hospital the Sunday morning of Matthews birth!

As I mentioned in the June FRENDX, Proceedings, 1989 will be available in the middle of this month. The number of copies of this premier 210 page is limited and NASWA members would do well to ACT NOW to order their copy. The price is \$19.50 plus \$2.00 postage inside North America.

For more details, see page 55 of the July 1989 issue of FRENDX.

-73- till next month!

DX'ers Forum

Dedicated to Furthering the Art, Science and Enjoyment of DX'ing

Conducted by Rowland Archer, 5524 Hawthorne Park, Raleigh, NC 27613

August, 1989

If following the recent tragic events in China has left you wanting to know more about this vast country and its complex political power structure, you might want to check out some of these titles, recommended by John Bryant, who authored the "DXing the Silk Road" series in DX'ers Forum last winter:

"White Boned Demon", by Ross Terrill. A book about Jiang Qing, Mao's second wife and the Gang of Four.

"Riding the Iron Rooster - By Train through China", by Paul Theroux, an Ivy Book paperback.

"Danziger's Travels - Beyond Forbidden Frontiers", by Nick Danziger, a Vintage Book from Random House.

John mentions that NASWA member Chuck Boehnke of HI recommended the Theroux book to him.

The latest Universal Shortwave catalog number 89-07 is out, and available for \$1 or 3 IRC's from the address below. In addition to the usual lineup of receivers, antennas, accessories, and publications, this issue includes the new high-end (to the tune of \$5000!) ICOM R-9000 "DC to Daylight" receiver, which received an excellent review from Larry Magne on SWL Digest. You can get your catalog from:

Universal Shortwave Radio 1280 Aida Drive Reynoldsburg, OH 43068

Corrections Dept: looks like I got a bit carried away with the "a" key when typing up the new country list entries in the July DX'ers Forum. Amazing what an auto-repeat key can do! The Gazetteer entry for Tonga should have read:

Tonga

Nuku'alofa

oc -

This month's Forum includes part one of my article on "DX'ing" Brazil from within its borders, and an article I've been wanting to write for a while on DX'ing on the road.

DXing Brazil from Brasil

by Rowland Archer

When I got an airmail letter from "Campina Grande, Brasil" last November, I assumed it was a QSL....so you can imagine my surprise when I opened the letter and found it was an invitation from a consulting firm to come to Brazil and give a six hour seminar on local area networks, on their nickel! After hesitating for about five nanoseconds, I checked the "YES" box and sent them an acceptance.

THE ITINERARY

This was our first visit to Brazil, and I was fortunate enough to be able to combine business, vacation, and LA DXing on location. My wife and I travelled first to Rio de Janeiro, where we spent 4 days. We made a one day side trip to the capital city of Brasilia, then we were off to see spectacular Iguassu Falls. The trip finished with three days in Sao Paulo, the business nerve center of Brazil.

RIO DE JANEIRO

After a 1-o-n-g flight (we left Raleigh at 5:00 in the afternoon on Sunday), we landed at Rio's thoroughly modern international airport at 8:00 in the morning on Monday, May 8. Our tour guide, Romulo, met us at the airport and proceeded to give us a fascinating overview of life

in Rio and Brazil today. He painted a picture of a city and country that was beset with economic difficulties yet maintaining an optimistic view towards the future. The major economic difficulties are runaway inflation and a huge international debt. Inflation has been running from 10% to 30% a month and more. Many of the Brazilians we met were looking hopefully towards this fall's presidential elections to provide new faces and fresh ideas to combat these crippling problems. Expect a lot of campaign coverage on Brazilian stations as we approach the November elections.

Life in Rio is a strange mix of carefree sun-worship and paranoia stemming from the high crime rate. Most of the crime is petty, usually involving theft of valuables by skilled pickpockets or packs of young children roaming the beach. The natives of Rio, known as *cariocas*, wear zippered moneybelts while jogging down the miles of black and white tiled sidewalks that line the beach.

CURRENCY

The currency situation in Brazil reflects the crazy inflation rate. There are three different "levels" of currency in circulation. Cruzeiros (Cr\$) are the oldest currency in circulation, and are devalued by a factor of 1,000,000. The Cruzado, or CZ\$, is devalued by a factor of 1,000. The New Cruzado, NCZ\$, is redeemed at face value. NCZ\$'s were introduced this past January, so many things, such as postal stamps, are still printed in terms of Cruzados. Most of the cash I handled was Cruzados. Metal coins are hardly ever seen.

I was very curious to see how freely US dollars were traded. QSLers often include US dollar bills with their reception reports for use as return postage. There is some controversy among DXers as to whether this is a good practice. Some have said that your recipient would have trouble unloading the US dollar, and might even be breaking the law by possessing a US dollar. I can say without hesitation that US dollars were freely traded wherever I went. There are two exchange rates in effect: an official one which I never saw used, and a gray market or "parallel" rate, semi-official to the point that it is published in the newspapers and honored by most hotels and stores.

POSTAGE STAMPS

I made a trip to a local post office in Rio to buy some airmail stamps for some letters to the US. The cost for an airmail letter to the US was NCZ\$ 0,90, or CZ\$ 900,00. At the 2.70 black market exchange rate, this worked out to about US\$0.33 per letter. Note: the Brazilian system uses "," where we use "." and vice-versa, so where we write \$100.00 to represent 100 dollars and 0 cents, the Brazilian equivalent would be written as \$100.00.

THE BANDS IN BIO

After getting some sleep to recover from the flight, we enjoyed our first meal in Rio and then it was time to unpack the shack. The accompanying article describes my Portable DX Shack, principally a Sony ICF2001D fed with an MFJ1020 active antenna. It was late afternoon, so I started by running through 49 meters. I used the Fine Tuning "DXer's Guide to Latin America" as my quick reference, since it lists all Brazilian SW stations by frequency.

The Sao Paulo 49 meter band stations were coming in with SIO 444 signals. R Cultura on 6170, R Aparaceda on 6135, R Globo on 6120. It was much easier to get an ID when the stations are coming in loud and clear. Most Brazilian stations play a prerecorded, formal station ID once or twice an hour. From my shack at home in NC, these are the ID's I usually logged. In Brasil, I noticed many more casual ID's mentioned in passing.

Over the course of the trip it also became obvious that the audio quality of these stations is not nearly as bad as it seems when you're hearing them as DX. In fact, by and large the audio quality was very good. It seems that the tortures of long distance propagation are responsible for many of the "muddy audio" conditions we DXers note.

A VOZ DO BRASIL

At 22001 began my A Voz do Brasil ("VDB") scan. VDB is a program produced by the Radio Nacional government station, and it's supposed to be simulcast by all stations in Brazil at 2200 each day. A number of reports in the DX press have stated that many Brazilian stations ignore this mandate and carry their own programming at 2200. I decided to check this out.

My results appear in the attached list under the heading "VDB". As you can see, the majority of stations that I was able to ID seem to carry VDB.

One surprise was the relative lack of non-Brazilian Latins heard. I did focus most of my attention on frequencies that were supposed to have Brazilians on them, but even in band scans I found mostly Brazilians and international powerhouses. One exception was R Huancavelica on 4885.2, which put in a decent signal from 2245 tune-in.

Shortly after my Huancavelica logging, Murphy struck and my tape recorder died. This was only

my first night of DX, so the rest of my loggings were recorded on paper only.

R Relogio Federal on 4905 was SIO 555. This station seems to have been reactivated lately. There are quiet clock ticks each second under the announcer, and on the hour there's a verbal time check and then 3 time pips.

At 2353 R Relogio Federal played a prerecorded, full station identification, typical of those heard on most Brazilian stations. Just as I was congratulating myself on the great collection of taped ID's I was going to have, my tape recorder utterly, totally, died. Looks like I'm going to have to come back next year!

Next month's column will carry the conclusion of this article, covering the radio scene in Brasilia, Iguassu Falls, and Sao Paulo.

Stations Logged in Brasil 5/08/89 - 5/16/89

Under VDB heading:

Y = Heard program "A Voz do Brasil",

N = Not heard but did hear some other programming

blank> = no station heard during VDB timeslot.

A Portable DX Shack

by Rowland Archer

Sometimes business travel brings me to a location where I have a chance to hear some interesting new DX catches. To take advantage of these situations, I prepared a simplified, light-weight "DX Shack in a Bag" that I take with me on the road. Note the emphasis on "portable shack" -- there's more to portable DX'ing than just lightweight receivers. Here are the requirements I placed on my Portable DX Shack, and how I met them.

1. Portability: For me, portable means that it has to fit in a small carry-on bag. I don't want to deal with lost or damaged luggage containing my expensive gear.

Everything I take along fits in a portable computer carrying case. It's a cloth-covered bag, 12"W x 14"H x 5"D, padded, with a front and back compartment, pockets for cassette tapes, and a convenient carrying handle. I put the rig, tape recorder, and active antenna in one compartment, and the reference materials, cables, spare batteries, and blank tapes in the other. A stiff side bag with padding will protect your equipment much better than a soft nylon carry-all sack. If you decide to check your bag with the airline, you should look into the strong metal suitcases used for photographic gear, or use plenty of padding in a normal suitcase.

2. Light-weight DX-capable receiver: I want to go after real DX but I don't want to carry the NRD-515 around.

I use a Sony ICF2001D portable (the overseas version of the ICF2010) for my DX rig on the road. It's very sensitive, has digital readout and memories, and does a nice job with ECSSB, very handy for separating packed-in DX targets. I find this rig to be an excellent balance between size and performance. There are smaller and lighter rigs that work well for SWL on the road, but the 2001D can really DX.

3. Quick setup: I want something I can tear down or set up in 10 minutes.

If it takes an hour to put the "Portable DX Shack" together at home, or to repack it in the hotel room before a 7:30 breakfast appointment, it just won't get done. My solution to this problem is to keep the carrying bag packed with everything I need but the receiver and some reference material.

This means that the *Portable DX Shack* is always packed with the necessary cables, blank cassettes, blank log sheets, portable cassette recorder, active antenna, etc. No frantic last-minute searches through the junk box for that RCA plug to miniature phone plug adapter, or worse, no sitting in the hotel room with everything you need for DX BUT that adapter.

4. Power: I need to cope with hotel rooms which are chronically short of outlets.

I have found the simplest approach is to use battery-powered equipment exclusively. I'm not overly pleased with this, since I carry spare batteries for everything and that adds a bit of weight. But it has the advantage of quick setup -- no scrounging around the hotel room looking for empty outlets, discovering that the extension cord I brought wasn't long enough, or packing the extra weight of 3 AC adapters.

5. Limited antenna space: I need some way to maximize DX even though hotels are usually constructed from signal-choking steel and concrete, and sometimes the windows can't be opened.

This is the biggest challenge, and the easiest place to go wrong with portable DXing. Hotel rooms are very hostile to shortwave signals. Over and over I have observed dramatic differences in reception between using the built-in whip antenna and a 20' length of random wire, and an equally dramatic difference when adding a properly peaked active antenna/preamp to the 20' wire.

My current setup uses the insulated hank of wire that Sony includes with the 2010, feeding an MFJ 1020 active antenna/preamp. It's worth looking for an insulated spool of wire that resists tangling and knotting. I'm not a components expert so I can't tell you why it's so, but the wire that Sony uses seems uniquely resistant to tying itself in knots when you uncoil it. It's an 18-gauge stranded copper wire covered with plastic insulation.

Placement of the 20' random wire is critical. If you're stuck in a room without an opening window, the best thing to do is to route the wire up along the top of the curtain bar, looping around the window. Most hotel rooms include a small table near the window. Make this your DX Desk, and make sure the antenna reaches it. If you have sliding doors to a balcony, run the wire out to the balcony and loop it around the balcony railing. Try to put the wire near the top or bottom of the railing, as inconspicuously as possible. On more than one occasion I've received inquiries from curious hotel staff about "that rope out on your balcony!" They usually think someone is breaking in!

Be careful that the sliding doors don't wear through the insulation of your antenna. If your out-door antenna doesn't dramatically improve reception, try opening the door and lifting the wire free of the door frame. If the signal strength jumps up, chances are your antenna was shorting out to the door frame.

Warning: Some portables may not handle the high level output of an active antenna very well. In fact, the Sony 2001D/2010 is infamous for failures in the front-end FET (the RF amplifier transistor), due to overloads on the incoming signal. While I've never had such a problem, I can't guarantee that your 2001D/2010 will be able to tolerate the output of a preamp like the MFJ-1020. Try this at your own risk.

6. Reference material: I need current and archival DX information to take along for both target setting and tentative identification.

Here I suggest taking along what YOU normally use. I pack a copy of Passport to World Band Radio, plus the Danish Shortwave Club's Tropical Band Survey. To this I usually add the last few month's worth of Fine Tuning and DX Spread, and perhaps some target-region oriented reference material, such as the Fine Tuning Indonesian Survey for trips to California. Finally, I add my own current station target list.

7. Permanent record: I want a paper log and tape recordings of any good DX catches for later ID checks and reception report details.

A couple of pens and some blank log sheets stay in the Portable DX Shack, so that's the easy part. Not so easy is finding a cassette recorder that's both lightweight and can handle the high level output of the Sony 2010. Many cassette recorders have only a "MIC" input, which will overload if you feed it the high-level output from your receiver. Look for an "AUX" input. This is usually high level. An alternative is to use an attenuating cable which reduces the level for you. You can buy one at Radio Shack; I found it reduced the level too low for my particular setup.

I prefer a recorder with a tape counter so I can note the counter value at probable ID's for later re-checks. Auto-reverse is nice, along with a locking fast forward control.

I was using an old Panasonic portable recorder, but it died on the Brazil trip, so this part of my *Portable DX Shack* currently needs replacing.

SUMMARY

I won't claim the ultimate setup by any means, and in fact, I would love to publish tips from "fellow travelers" who can share their experiences of DX'ing on the road. On the plus side, I have managed to log a number of RRI stations including RRI Dili from a hotel in Alameda, CA, so this setup has worked for me in practice.

Easy Listening

Editor: Alex Batman, 4636 Alvin Dark, Apt. 2, Baton Rouge, LA 70820

SUNDAY

1530-1545(1600) Mailbag (Radio Sweden International). This program airs on the first and third Sundays of the month, the first Sundays' being fifteen minutes long and the third Sundays' thirty minutes long. Reads listeners letters and comments and answers questions about Sweden. It is no worse than the average mailbag program, but it is not particularly better either. (17.880/21.610). First and third Sundays of the month.

0130-0147 International Talking Point (Deutsche Welle). Each week a panel of journalists discuss some international or German issue. Past programs have featured the possible rift in the NATO Alliance, student protests in Beijing, tourism in the third world countries, and the recent coup in the Sudan. (6.040/15.105. Repeated at 0330 on 15.205 and at 0530 on 6.120/6.130).

MONDAY

2210-2225 Nature Book (Radio Vilnius). A program devoted to the Lithauanian ecology that airs every other week. My problem with this program is that it has very little discussion of the actual natural environment of Lithuanaia but seems to stress more government ecological efforts. (11.790). Every other week.

TUESDAY

2210-2215

The Emergence of Modern Turkey (Voice of Turkey). This program features the reforms in education, politics, and social life that took place under the influence of Kemal Attaturk at the beginning of the Turkish Republic to demonstrate how Turkey developed into a modern nation of western ideals and technology. This program could be interesting, but the presentation is so dry that it often loses the listener. (9.445. Repeated at 0310 on the same frequency).

Anything Goes (Radio Austraiia). Not to be confused with the BBC program of the same name although there are certain similarities in the programs. Although Radio Australia's "Anything Goes" is not like the BBC's programme, a request program, the musical styles of both shows is similar. One of the things that makes the BBC's program of the same name so popular is the number of songs they play from the 30's, 40's and 50's, and Radio australis seems to have cashed in on that idea. Although there are no official requests, each week "Anything Goes" plays music from the 20's, 30's, 40's, and 50's, usually tied loosely together by a theme such as "movie songs from the 40's and 50's." Actually the program is quite good if you like that music (which I admit I do), but I can not escape the feeling that Radio Australia has pirated a popular idea form the BBC and given it a somewhat different look. (17.795/21.740).

WEDNESDAY

At Your Request (Radio Australia). A straight-forward request program with most requests coming in from Asia and the Pacific with a few from North america and elsewhere. Most requests tend to be for hit songs of the last ten to twenty years, but there is an occasional surprise, such as the listener who requested "The William Tell Overture". Radio Australia requests that listeners send in at least three requests in order of preference so that they can be accommondated if for some reason their first or second choices are unavailable. (9.580).

2220-2240

People and Events (Radio Yugoslavia). When I first started listening to this program, it was aired on Monday. Somewhere in June, however, Radio Yugoslavia switched the timing of this program with "Spotlight on culture" which had previously aired on Wednesday. They can play this editor all the dirty tricks they want, but I intend to include it anyway. So there! Each week features a series of segments devoted to life in Yugoslavia, both political and social as well as economic. Past segments have

included analysis of economic reforms and restructuring, political debates, cheese making in a Yugoslavian village, the 100th anniversary of a bloody labor strike in Yugoslavia and a feature on the popularity of horse racing in the country. (15.105/11.735/9.620. Repeated at 0020 on 15.105/11.735/7.215). The best time I've found to hear this program is a 0020 on 11.735.

2330-2345

The Poets of Arabia (Voice of the United Arab Emirates). Part of V.O.U.A.E.'s expanded service to North America, this program is well worth listening to if you're interested in comparative literature at all. The program will only run twenty-six weeks (by the time you read this they will be about on week 10) and stresses the pre-Islamic poets of Arabia. It's quite a fascinating program not only for the sake of the literature but also for its insights into pre-Islamic life on the arabian pentinsula. (13.605/11.985).

THURSDAY

- 2215-2230 The Travels of Ibn Batuta (Voice of the United Arab Emirates). This is a series of thirty programs (by the time you read this on about program 5), devoted to the travels and observations of a 14th century Moroccan Arab, Ibn Batuta. The program is presented in the form of a dialogue with the traveler himself and parts of the stories he tells are sometimes dramatized by actors. Quite good from the little bit of it I've heard. (13.605/11.985).
- O215-0230

 Cultural Encounter (Voice of Free China). This program is a dialogue between Theresa, a Taiwanese Chinese, and Dennis, her American friend who is visiting the island as they discuss the things that strike Dennis about Chinese Culture and life on Taiwan. Past programs have featured discussions of Grave Cleaning Day, MTV Centers, typical Chinese meals, etc. This particular format was used for about two weeks, earlier in the year, as a new approach to the Tuesday program Journey into Chinese Culture, "but after two or three weeks was developed into a program of its own. (5.950/9.080/11.740).

FRIDAY

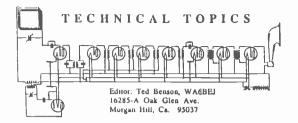

- 2215-2230 The Nights of Scherherezade: The New Arabian Nights (Voice of the United Arab Emirates). This program is actually are telling of the tales of the 1,001 nights but technologically updated so that such things as radios, rifles, and telephones are self-conscious anachronisms in the program. The attempt is to show that the 1,001 nights are timeless and have as much application today as they did when they were first told. Actually all the wizzardry, sorcery, etc. of the original tales is still in tact, and the stories are performed by actors who usually do a pretty creditable job. (13.605/11.985).
- 0125-0130 The Week in Czechoslovakia (Radio Prague). A run down of the major events—political, economic, social and cultural—in Czechoslovakia. (5.930/7.345/11.990).

SATURDAY

- O115-0135

 Checkpoint (Deutsche Welle). This program, which only airs on the second Saturday of every month, features an analysis of the West German political scene. Past programs have featured the recent successes of right-wing, neo-Nazi parties in local elections in west Germany, a retrospective at the first 40 years of the Bundesrepublik, and how the recent bloxd-bath in China is likely to affect West Germany's relations with that country. (6.040/15.105. Repeated at 0315 on 15.205 and at 0515 on 6.120/6.130). 2nd Saturday of the month.
- 10245-0250

 The World of Stamps (Radio Havana Cuba). A program to philately, and divided ito a number of segments. The first is usually a "philatelic exchange" in which listeners interested in exchanging stamps with other listeners can write in; the second usually features a recent Cuban or other S. American postal issue and some simple information about that issue; the third is the "Question of the Week", usually quite simple if you've listened to the program. Prizes for answering the "Question of the Week" correctly are recent Cuban postal issues or first-day covers. Previously the program also included a feature on Southwest American Indian rituals and ceremonies, a topic which I found fascinating but could hardly explain what it was doing in a philately program. This particular feature seems to have been dropped recently, however, but maybe it, or something similar, will reappear again in subsequent weeks. (11.820. Earlier at 00.45 and later at 0445 on the same frequency).

Bells and Whistles

I'm shopping for a new shortwave receiver. Not that I really expect to buy one, you understand. It's just that whenever the noise level gets bad I curse my Heathkit SW-7800 and vow to buy a replacement. For several weeks I collect literature and dream. This usually lasts until my wife spots the childlike smile I get when I am thinking wicked thoughts, and I go back to cursing the lousy dynamic range of my Heathkit as I my to pick out some more "rate ones."

During my latest round of receiver fever I encountered several salesman who didn't appear to know what some of the bells and whistles on these expensive wonders were. With receivers now topping five thousand dollars at the upper end, it will be costly if you aren't able to sort out the apples from the oranges.

Here, then, is a brief summary of some of the more common enhancements found on modern short-wave receivers

BFO

In the old days, AM was the rule for shortwave broadcasts. CW, or continuous wave (Morse Code) was used by amateur radio operators, ships, and aircraft. If you wanted to receive this second class of broadcasts, you used the BFO, or beat frequency oscillator. The BFO injected a tone into the receiver's mixer, causing the dots and dashes to become audible tones instead of just a barely discernable hum. The BFO could be adjusted to give a pleasing tone. In the 1950's SSB, or single sideband, became more and more popular in both ham radio and commercial applications. You could fit more SSB than AM stations in the same frequency range. Fortunately, the same BFO could be used to receive the SSB signals. You simply adjusted the BFO until stations stopped sounding like Donald Duck® and started sounding like a human being. It was a bit clumsy, and tended to drift a lot, but it worked.

Fortunately, most modern receivers have seperate settings for USB, LSB, and CW. These settings inject a tone, like the old BFO, but the variables are preset. The only way to vary the tone or sound is to adjust the frequency you are tuned to. Some receivers only have a single setting marked SSB/CW. This is nothing more than a fixed BFO, and you must adjust the sound by varying the frequency you are tuned to. You must be careful! Some modern receivers, primarily portables, have no provision for receiving SSB or CW signals. If you are only interested in traditional shortwave broadcasters, and not hams, UTE's, or the "unknowns," this is O.K..

I mentioned BFO drift earlier. When evaluating a receiver, tune to a strong, consistent station, like WWV. Although WWV is an AM station, the CW position will cause a "zero-beat" or tone to occur. Listen to the tone for at least 15 minutes. If the tone changes pitch a great deal, this is not a very stable receiver. If you can afford better, pass this one by.

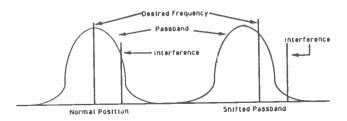

Figure 1. Passband Tuning

NOISE BLANKER

The noise blanker can be a lifesaver when it comes to so-called impulse noise. This is the type of noise that sounds like rapid popping or "hash." The noise blanker will establish an average signal level, and noise, which is typically a sudden level change, will be rejected. The noise blanker will not help on all types of noise, and can be undesireable when listening to weak signals.

SQUELCH

The squelch has long been a feature on VHF-UHF scanners, ham rigs, and CB radios, and it is graudally appearing on shortwave receivers as well. With a squelch, you select how strong a signal must be before it can be heard through the loudspeaker. This means that simple noise, or signals too weak to be intelligable, will result in a silent speaker. The problem is that shortwave signals, unlike those of the VHF and UHF bands, are riot as varied as those on the shortwaves. On VHF and above, signals are usually FM, so noise and signal strength variations are rejected within the receiver. On AM, the noise and signal variations behave the same as the signal itself, and are passed on through the radio. If you set a squelch high enough to eliminate some noise, you may also prevent yourself from hearing weak or fluctuating signals. If you only listen to VOA, RSA, and Radio Moscow, a squelch is for you.

PRESELECTOR

Although a preselector can always be added as an outboard accessory, it is often more convienient to have this feature built-in to the receiver. Note that a preselector is not the same as an antenna tuner or matching control, though such controls are frequently labelled "preselector." The preselector allows you to tune a narrow range of frequencies. This can be quite useful when faced with strong interference. People who live in the midst of a strong AM broadcast station, ham, or CB'er know the value of being able to peak the desired signal while the rest all but disappear. The antenna tuner, or matching control, allows you to match an antenna's impedance to that of the receiver's input. When using a single antenna for many bands this can result in an improvement of several S units.

PASSBAND TUNING

It is becoming increasingly difficult to separate stations in the crowded shortwave bands of today. There are physical (and economical) limitations on the selectivity of shortwave receivers. Very sharp filters can help, but they are expensive, and their parameters cannot be adjusted once manufactured. An excellent compromise is passband tuning. In passband tuning, the actual center frequency you are receiving is that indicated (hopefully) by the receiver's readout. But you can shift the bandwidth around the center frequency to escape a nearby signal (see Figure 1). This valuable feature may be increasingly harder to find, because the alleged patent holder is threatening lawsuits against companies using the feature. Recently from Corporation began shipping their overlated R-71A without the passband tuning found on earlier units without changing the model number!

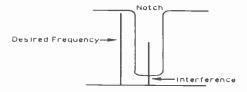

Figure 2. Notch

NOTCH

Sometimes a station sits uncomfortably close to another. The only way you can separate the two is to "surgically extract" the undesired station. The notch allows you to render the receiver numb to a sharply defined range of frequencies in the midst of other frequencies (see Figure 2). This notch can be adjusted to fall on top of the offending station. In some notches, you can also vary the width of the notch. The notch will not remove more than one interfering signal, unless several are very close together. Nor will the notch do any good if the interfering signal is too close to your target signal.

O-MULTIPLIER

In the old days, some manufacturers devised a dual notch filter, and called it a "Q-multiplier." The Q-Multiplier allowed you to artificailly narrow the receiver passband. The Q-multiplier isn't seen much today, at least not in consumer receivers.

MEMORIES

I used to think that memories were a very frivolous option on a shortwave receiver. As long as you only listen to scheduled shortwave broadcasts this is probably true. If, however, you enjoy searchingfor unusual frequencies, or "guarding" multiple, infrequently used frequencies, the memory is an essential function. Most memories operate by allowing you to enter a frequency and then pressing a "store" button. The simplest memory arrangement allows you to store the frequency - but nothing else. The more elaborate memory schemes, however, allow you to also store the operating mode, a selected antenna, and even brief notes about the frequency. Clearly, this can be a powerful aid to the committed (or soon to be committed) listener. The number of memory channels varies, too, from just a few to literally hundreds.

SCANNING

Scanning is a feature which often accompanies memories. Scanning allows the user to preselect memory channels, then scan them repeatedly, stopping when an active channel is found. Scanning has long been used when monitoring public service broadcasts on VHF and UHF, and it is making a strong showing on modern shortwave receivers.

SEARCHING

For those who enjoy looking for new frequencies, searching is the answer to a prayer. Most search schemes allow the entry of a lower and upper frequency limit. On activation, the receiver will start at one limit and tune continuously to the other limit, stopping (and in some cases recording) any active frequencies. If you were a utility lister (a "UTE") you would most likely program a band designated for such stations, and search. It's a lot less tedious than spinning the knob by hand for long periods.

SUMMARY

The features I have described are like those of a new automobile: not all of them are suited for every buyer. Shop carefully, and compare what is available until you find the right combination for you.

AN APPEAL

There are many physically handicapped people out there who love to listen to shortwave. For them, the physical boundries of their handicap are crossed by the limitless expanse of shortwave radio. Like many SWL's, these listeners would like to work for a ham radio license. But because of their situations, they are further limited in what is an already difficult (but fun) endeavor.

Enter the Courage Handi-Ham Center. This organization coordinates volunteer ham operators to help prospective hams study for their licenses, loans basic equipment to handicapped students, and promotes an understanding of physical handicaps and the cooperation of ham radio. The Courage Center is always looking for volunteer licensed amateurs, as well as donations to further their activities. I urge anyone interested to contact the Center at:

Courage Handi-Ham Center 3915 Golden Valley Rd. Golden Valley, MN 55422

FRENDX PORTRAITS

a look at the members of NASWA

edited by Tom McElvy - P.O. Box 9645 - Norfolk, VA 23505-0645
E-Mail on ANARC BBS - ODDX BBS - CompuServe 73677,2351 - PC-LINK (TomM77)

Hello again, and welcome to another FRENDX PORTRAITS. I hope that you all enjoyed ANARCON '89, and hats off to Jeff White and his staff for a job well done. I had the pleasure of meeting Log Report C Editor Jerry Ervine, and we had a long discussion about NASWA and the hobby. Great meeting some of the other folks out there, including Kaz Matsuda from NHK, Jonathan Marks of Radio Nederland, Tom Sundstrom, Kirk Baxter of the ANARC BBS, Glen Hauser, and many more. A great show, and great people (and the food was GREAT, but that Danish beer at 2AM...!!)

This month we hear from another FRENDX editor, Wallace Treibel from Seattle, Washington

Wally writes: "Depending on my educational a family time requirements, I have been involved with shortwave listening since the late 1940's. I started out with a little Hallicrafters S-38, then to a SX-42, a Hammarlund HQ-180, a Yaesu FRG-7000 and now the "creme de la creme," a NRD-525. At present, my only antenna is an Eavesdropper trapped dipole mounted between two trees about 50 feet in the air. Needless to say, I had a professional treeman help me! I do not collect QSLs anymore, but I maintain a loose-leaf log register of stations heard (in frequency order) and have done so since 1962. However, I do not re-record any station more than once a year.

I have been editing the Log Report D column of FRENDX for the past 5 years and have been a member of NASWA since 1972 or so. I own a satellite dish and am an ardent sports fan so as one might guess, my DXing has suffered somewhat over the past few years.

I will be 69 years old this summer and have been retired from the University of Washington since 1983. I was an administrative officer for over 32 years after graduating from there in 1950 under the good old GI Bill.

The May issue of FRENDX included a bio of Dr. Richard Wood in Hawaii. I found his resume particularly interesting since I had the chance to visit him briefly in 1985 and see his setup. I envied the fantastic beverage antennas he had created and marveled at how he was able to pull in medium wave stations of relatively low power in the USA. And he did this without the luxury of public power which we all take for granted!

Each month, I prepare the Log Report D section on my trusty Radio Shack TRS-80 and what a Godsend this instrument is. No more erasing my typing goofs of which there were many! In May, I took over two weeks off to go to Yosemite, Disneyland and visit my youngest daughter in San Francisco. When I got home, I had one day to organize all the logging stips and type up the material. Thank God for Express Mail and Bill Oliver's patience!

I have certainly enjoyed this new column, since it makes it possible to "meet" other members even though you can't see them in person.

And I have certainly enjoyed it too, Wallace! Time is rather short this month, as I spent 10 days in Florida. Just as a reminder, the 1989 EAST COAST SWL CONFERENCE is coming up in September, on the 16th & 17th. Guests include KAZ MATSUDA from Radio Japan, TREVOR MORGAN of the International Listeners Association in Great Britain, Bob Brown of the ANARC SWL Net, Bob Horvitz, Executive Director of ANARC, and many more. There will be a huge flea market, dealers and manufacturers galore. Hope to see you folks there soon!

for

Until next month, 73 and good DX!

Reminder Time!

Be sure to send in YOUR biography soon. This column (as well as the rest of the journal) is dependant on YOU, the reader. Let's get the feeling of family back into this wonderful hobby!

NASWA Awards Program

Awards Chairman: John M. Kapinos, 86 S. Quinsigamond Ave., Shrewsbury, MA 01545

Greetings and welcome to the NASWA Awards Page. The following folks have earned NASWA Awards recently:

Richard K. BKABLEY, Jr., Largo, FL: World Wide DXer; European Continental BXer

Steven R. LAKE, Holland, MI: All Continent "GRP" Dier (10 kw endorsement); Antarctic Dier

Rev. John C. ECKERT, Collegeville, PA: South American Continental DXer

Cris HAZARD, New Hope, PA: World Wide DXer

Brent ALLRED, Radio HCJB, Quito, Ecuador: DX Centurian, DXer de Pacifica, All Voice of America DXer

Harold BUTCHER, Hyde Park, MA: World Wide DXer; European Continental DXer

Tom OVERCAMP, Seneca, SC: South American Continental DXer, European Continental DXPert

Dr. Delbert FYE, Miami, FL: Master China DXer

Sheryl PASZKIEWICZ, Manitowoc, WI: Senior Indonesian DXer

John WILKINS, Wheat Ridge, CO: All Germany DXer

John DOHERTY, Philadelphia, PA: World Wide DXer, European Continental DXer

Richard LANE, Dawson, IL: World Wide Dier, European Continental Dier

****kap's komments***

Nice to sew several new participants this time around and the return of a few "old timers". As we enter our Sixth year of serving as NASWA Awards Chairman we find that we enjoy the job as much as we ever did.

We had the pleasure of visiting with old friend Harold Woering, 48 Campbell Drive, Easthampton, MA 01027 recently. Harold has assumed the Awards Chairman position for SPEEDX replacing Jack Jones who did such a magnificent jub for many years. Harold has a new Awards List available and one does not have to be a SPEEDX member to participate. \$1.50 or equivalent to Harold will get you a copy. The SPEEDX Program complements, rather than competes with the NASWA Program.

Since we havn't mentioned it for some time, the cost of NASWA Awards remains the same as it's been for 5 years, notwithstanding several USPS increases. \$1.00 each in North America, \$2.00 each elsewhere. All Awards are mailed flat with a chipboard stiffener to prevent damage in transit. If for some reason the Postal Service chews one up, return it for a Free replacement.

We are out of the 1986 NASWA Country List and Awards Program booklets, but NASWA Publisher Bill Oliver still has a supply. The cost is \$2.00 in North America, \$3.00 elsewhere. Orders should be placed directly with Bill at the Levittown address.

We have not yet seen a copy of Fine Tuning's 1989 Proceedings book, but based on the 1988 Edition it will be a most valuable addition to any serious DXers Library. See the July issue of FRENDX for details.

We have quite a few World Radio TV Handbooks ranging from 1971 to 1988 available. These are part of the estate of the late Tom Farmerie and all proceeds will go to his family. An SASE will bring a current list. We also have a large box of various radio publications (FRENDX, SPEEDX, RIB, etc) available. First check for \$10, gets the whole box postpaid (U.S. mailing addresses only on this please). There are approximately 200 bulletins in the box.

Till next time 3557, Top 120/29

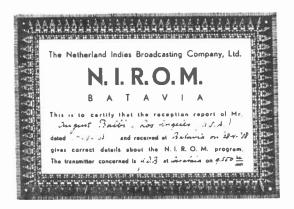

the

page

COMMITTEE TO PRESERVE RADIO VERIFICATIONS

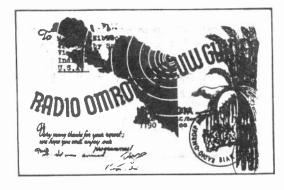

JERRY BERG, Chairperson • 38 Eastern Ave. • Lexington, MA 02173 • (617) 861-8481

BANDOENG, Sept. 16th, 1935.

Dear Mr. Selbi,
Your report on station P L P 11000 kc/sec,
dated June 21st, 1935, checks correctly with the station
log.
Thank you.

H. VAN DER-VEEN.
Engineer-in-charge,
Jore Wireless Stations,
Bandoeng, Javo.

To the Dutch East Indies this month. +++ NIROM was broadcasting the Dutch network on Java, the precursor long-ago today's RRI. Batavia was for name the Dutch Djakarta. present-day This NIROM card was a generic verl, used in the 30's to verify different NIROM locations. This one is for a report on YDB-Soerabala (as It was spelled then), 9550 kHz. It was reported as using In The CPRV kw. collection we have NIROM card Identical reception of verlfylng PLP, Bandoeng, 11000 kHz. That card belonged to Glenn Atkins, father of DXer Gary Atkins. +++ You could also verify PLP direct, as August Balbi He received the dld. shown here, from card Wireless Stn PLP. Java reported as which Was often relaying YDB. Ιt used 1.5 kw. The +++ card from Radio Omroep is an Guinea Nieuw undated veri from Al Niblack's collection, and probably dates from the "Hollandla" is mid 50's. out and the crossed town's "new" name of Blak typed in. This 19 station started life as YDZ, operating out of a shack left behind by the US armed forces after WW II. Two Netherlands Army sergeant majors broadcasting musical programs using a 350-watt The station xmtr. eventually developed into a 5 kw operation on 7190 kHz. +++ For more info on CPRV, send a business size SASE to JB at the address shown above. for now --

Editor: Bruce MacGibbon, 2295 NE Juniper Ave., Gresham, Ore. 97030

PLAYNG THE NAME GAME - How Burma became Myanma. When a country's name disappears from the map, it is often the result of conquest or collapse. But there is a less violent explanation that proves the pen is at least as mighty as the sword. Perhaps the country has merely changed its name.

The most recent case is Burma, which has just renamed itself Myanma (pronounced Mee-ahn-ma), the name the Burmese, oops, the Myanmans, have always preferred. In April Cambodia, which since 1976 had been known as Kampuchea, became Cambodia again. That was the fifth time in the past 20 years that the country has changed its name. Prince Norodom Sihanouk, the Cambodian resistance leader who is notorious for his own shifting stance on his country, has at least found a way to keep up with its changing names. When he speaks English, he calls the country Cambodia. When he speaks Khmer, he calls it Kampuchea. When he speaks French, he refers to it as Cambodge.

No international laws govern the christening of countries: that label that sticks is determined by the tastes or even the sanity of its rulers. Anti-colonialism, however, is the most common rationale for national renaming. During the 1950s and '60s, anti-colonialism swept through the newly independent nations of Africa. The Gold Coast dubbed itself Ghana, in honor of an ancient African empire that was located hundreds of miles from the modern nation. When the Belgian Congo became independent in 1960, it renamed itself the Republic of the Congo. Eleven years later, President Joseph Mobutu rechristened it the Republic of Zaire. A year later, he took his policy of "authenticity" personally, renaming himself Mobutu Sese Seko Kuku Nbsgendu Wa Za Banga, which means, more or less, "the all-powerful warrior who will go from conquest to conquest trailing fire in his wake."

Sometimes rulers decide it is best to leave well enough alone. Filipinos have long bristled at the colonialistic implications of calling their country the Philippines, in honor of Philip II of Spain. During the regime of Ferdinand Marcos, there was a campaign to rename the country Maharlika, a native word meaning noble and aristocractic. Plans for the rechristening proceeded apace until an academic pointed out the word was probably derived from Sanskrit. Fine, its proponents said, Sanskrit is a non-imperialistic language. Yes, replied the scholar, but Maharlika was most likely derived from the words maha lingam, meaning "great phallus." That was the end of the campaign. (via "Time Magazine" dated June 19, 1989) (See Myanma)

AUSTRALIA - Via Radio Australia's "ELP Extra": Try to Remember - Wed 0130, Thu 1930, Sun 1030, Tue 1530. 1970: Aussie "cover" his flourish after British recordings are banned by Australian commercial stations. (Starts 9/8). 1971: A good and memorable year for Australian artists as the local industry prospers. (Starts 16/8). 1972: Pipes and Drums of the Royal Scots Dragoon Guards, Smacka Fitzgibbon and 50s rocker Johnny O'Keefe: definitely a year of contrasts! (Starts 23/8). 1973: First past the post for a champion racer, country stars shine and an Aussie rock'n'roll classic is launched. (Starts 30/8).

Taim Bilong Masta - The concluding chapters of Tim Bowden's account of Australia's colonial role in Papua New Guinea. - Thur 0730, Fri 1530, Sun 0930, Tue 0230, Wed 2030. War: Japan's World War Two invasions caused massive disruptions and let Papua New Guineans see

their rulers in a different light. (Part One starts 3/8, Part Two on 10/8). A Reason for Being There: Bringing rudimentary medical and health services to widely scattered villages was a challenging and daunting task. (Part Two on 24/8). Going Finish: The lead-up to independence in 1975 of Australia's colonial rule. (Part One starts 31/8, Part Two on 7/9). Frequency File: A new service to the Indian subcontient and Indonesia, Malaysia and Singapore started on 5 July. It's 21525 opeating from 01-09 and 13-1430 daily, in place of the transmission on 17715. The first transmission is from Canarvon and the second from Darwin. Broadcasts to China on 17715 have been extended and can now be heard 01-0930 daily via Darwin.

BHUTAN - Via a clipping from "Kuensel", Thimphu dated June 24, 1989:

Fifty Kilowatt radio station: A fifty kilowatt radio station under assistance from the Government of India and executed by the All India Radio is nearing completion. The turnkey project involves the transmission component and the building complex.

Under a joint project with the UNESCO/DANIDA, a four member project team led by Mr. Carlos Arnaldo of UNESCO and Mr. Knud Ebesen of DANIDA was in Thimphu this week to launch a project with the Bhutan Broadcasting Service which focuses on in-country training for programming with emphasis on programmes of an educational and cultural nature. The work on the UNESCO/DANIDA project was initiated some time ago.

The project team while in the country called the Minister for Communications and Tourism, Lyompo T. Tobgyel. Mr. Knud Ebesen presented a set of sound effects to the Minister as a gift from the Danish Radio.

The sound effects recorded on compact discs will be used by the national radio, BBS.

For Programmes in the English Service: .The news in English at 8.15pm Mon-Sat, and at 3pm on Sunday. Sat: "About Town" - BBS producer Kunzang Thinley chats about wildlife with Dr. Bruce Bunting, the Asian Director of WWF. Sun: "Listener Choice" - the weekend music request show with your favourite songs for your favourite people. Mon: A selection of country & western songs in "Music for you in the country style". Tues: Experts from the international Labour Organisation talk about woman entrepreneurs. The first of a two-part programme. Wed: Take a mid-week music break with "Music Moves". Thu: "UN Calling Asia" looks at UN disaster relief and the work of UNIDO, and there's more about ESCAP too. Fri: "Music for your listening pleasure" to soothe you at the end of the working week. The Bhutan Broadcasting Service in the 49 metre band 6035 KHz and FM 96 for listeners in Thimphu. (via Eric Bop, CA.)

BOTSWANA - Since 19th June, Radio Botswana's 60 metre band outlet has been observed on 4830 instead of 4820. This freq is in use from 0350-21. (via WBI 30/6) Radio Botswana, formerly on 4820, has moved to 4830. Has EE news 1610. (Richard E. Wood, Ph.D., Hilo, Hawaii)

CAMBODIA - Formerly known as 'The People's Republic of Kampuchea', it will now be referred to as the State of Cambodia. The Vietnamese installed Prime Minister Mr. Hun Sen has also told reporters that the Parliament in Phnom Penh agreed on this change partly to help settle the country's 10 year conflict, further remarked that the Parliament had also agreed on a new flag and national anthem along with changes to the socialist constitution. In the meantime, checking on its external radio service, formerly known as the Voice of The People of Kampuchea, is now identifying itself as 'This is the Voice of the People of Cambodia' and currently broadcasting in the EG language at 0000-0015 and at 12-1215 on 11938. Also listed in many publications to be coming on 9695 but this freq. does not provide any reception of the station here in Penang--this as of many, many months back (perhaps receivable elsewhere?) The Home Service in Cambodian is heard quite well during the mornings here at 23-01 on 4909v, 6090 (the best) and 6143v. Other times of transmissions, on the same freqs. are 0430-0630 and 11-1445. (via "SE Asia DX News" No. 3 compiled by Lim Kong Jin, Penang, Malaysia)

CANADA - 13660NF, 2045, RCI, FF into Czech at 21 on 2/7 (Bob Padula, Surrey Hills, Australia)

CHINA - World of Radio 7/13: Glenn Hauser: At last we have a report

from inside Radio Beijing on the events in May and June. Thanks to Joe M. Rubin, San Francisco for forwarding this clipping from the "San Francisco Examiner" on June 30th. Many thanks to Glenn Hauser for reading it over his World of Radio program. I received a copy of

that a few days later via a newspaper distributing company. (bmm)

Eyewitness -Radio Beijing: Risking lives for truth. Journalist tells of colleagues' courage in testing limits by Steven Crandell,

Special to the Examiner:

My Chinese co-workers at Radio Beijing risked their lives to tell the world the truth. No subtlety. No need to read between any lines. They simply reported that the Tiananmen Square massacre was wrong. They may never get the chance to report that way again.

I have worked 14 months in Radio Beijing's English Department, where I am one of five advisers. We correct grammatical mistakes and promote basic journalism guidelines of objectivity and thoroughness for the Chinese reporters.

There are times when living up to those guidelines is politically impossible. But in recent months, the reporters pushed the limits further than they ever had before, going so far as to voice their own Now their exhilaration has been dissent from the government line. replaced by silence.

Some simultaneously tested the limits while trying not to antagonize the government. One of those was news director Li Dan. He has pushed hard for Chinese Media freedom. He's also a Communist Party member and a veteran of many Chinese upheavals, including Cultural Revolution. He knows what the government requires.

Another decision maker is Wu Xiayong. Besides being one of the best English-language reporters in China, he's also the son of Vice Premier Wu Xuequian. (Note: My Chinese Friends tell me it should be

Xuegian.) (bmm)

Wu Xioyong was my journalism classmate in the United States eight years ago. We still talk about our first joint television production, a short story about an imaginary navy. We built our fleet out of paper and ceremoniously sank the flagship in a journalism school toilet. Most of the English Department reporters are not so far removed from their school project days. They are young, they like Western ideas and they question authority. They had They had to be convinced of how sharply the government could strike.

Speaking out - Radio Beijing's English Department was no government mouth-piece while the democracy movement flourished. Radio Beijing

broadcasts in 38 other languages, but the English-language service did the most to speak its own mind. We reported the presence at one demonstration of banners supporting

the Shanghai Economic Herald, whose editor had been fired by the government for printing stories considered too sympathetic to the protesters. We also used the phrase "student movement" something the government would not do. The government refused to recognize that the students were calling for change.

Radio Beijing's Xie Qiao reported the government's embarrassing inability to roll out a proper red carpet for Soviet President Mikhail Gorbachev at his arrival at the Beijing airport May 15. No one had been able to get the carpet out of downtown, which was jammed

with demonstrators.

The Chinese Foreign Ministry had tried to cover this up, but Xie Qiao saw no reason to go along. "Of course that's what happened," he

said. And that's what we aired.

Facts were no guarantee - We all knew, however, that facts didn't guarantee safety. The government gave few clear censorship signals, but Li assumed the role of self-censor, regularly crossing out dozens of paragraphs from newscasts.

One story that didn't make it past Li was an interview with a student protester who said senior leader Deng Xiaoping, at 84, was too old to govern and should step down. The reporters and advisers wanted the interview on the air. But, one sentence from Li, "We can't

use that," ended the debate.

We did use interviews with parents who begged the government meet student demands and commuters who told us they would rather cheer the democracy movement than fight the traffic jams. For the firt time, we were putting on the air voices that complained government wasn't really listening.

These were the most exciting days of the reporters' lives. 17, they tore down office curtains to use as banners, painted slogans across their T-shirts and marched to Tiananmen Square to join a million other pro-democracy demonstrators.

One reporter had been sick at home for the past 10 days. But she

made certain she was carrying one of the banners.

We even conducted mock interviews with each other. "It may take two months for the government to react." "When the peasants join, then the country will change." "Li Peng (the hard-line premier) can't save himself."

We marched again the next day. The same huge crowds. The same wild cheers. And the same euphoria. What could the government do to

punish 1 million people?

We had our answer in a matter of hours. At 7p.m., the government televised Premier Li's first attack against both students and journalists. The head of Radio Beijing's ministry ordered the English Department not to air any more controversial stories.

Shock and fear - One Chinese reporter was too upset to go home that night. "China has the worst government in the world," she said. Others decided that Li Peng had gone mad. One of the older reporters

warned that the Cultural Revolution was returning.

Our story on the demonstrations the next day urged the students in Tiananmen Square to give up their hunger strike. My favorite Chinese cynic at Radio Beijing announced that "Maybe we have been too biased against the government." Some people were afraid to talk at all.

Li Peng authorized martial law May. 20. Fifty soldiers with the

People's Liberation Army moved into Radio Beijing the same day.

But even though the troops were in the huge building, they had no effect on our work. I never even saw any in the English Department.

We asserted our independence one more time after the army's June 3-4 assault on Tiananmen Square. Li Dan went on the air June 4 to condemn the unnamed Chinese officials who had authorized the murder of innocent people, including colleagues at Radio Beijing. He described the night as the worst in China's history.

The journalists who decided they must broadcast the truth about the massacre knew they were risking their lives. No other government

department took that risk.

There was no sign of Li in subsequent broadcasts, and no more news

about the demonstrations. The rumors spread quickly.

"The Secret Police executed Li Dan." The people who told me this cited sources from almost everywhere - other Chinese journalists, overseas, even the Canadian Embassy.

The Army was still firing shots near Radio Beijing in the week after the massacre; it took me four days to find out Li was safe and

another day to get to the office to see him.

By then his immediate fear had passed. He had been careful not to stay in one place very long. Some people already had organized memorials for him. But he was able to tell me, in person, that he was still alive and planned to stay that way.

Li also knew the party disciplinarians would come. "I don't know who they will punish, or what the punishment will be," he said. "But

they will come."

I wasn't willing to stay for that. There was almost no work for me in the office, and life in Beijing was too tense to enjoy. I saw the friends that I could, then boarded a plane for Hong Kong.

Li was right. The sweep did come. The party already had replaced the editor of People's Daily, though I have no idea what has happened

at Radio Beijing. I hope someone I trust answers my letters.

I have one month to decide whether to return to China. Work will never be the same again. But if my friends are there, I want to be there. The are the most courageous people I have ever met, and they know exactly what good journalism is all about. (There was also a picture of Author Steven Crandell, English adviser, carrying a Radio Beijing banner in the solidarity march through the city May 18.) Note: "Asia Watch" on July 18 still had not decided the announcer was Li Dan. I telephoned a Ms. Guthrie at "Asia Watch" and informed her of this article. She requested a copy and "The Northwest Regional China Council FAXed a copy to her. I am a news gatherer for the "Northwest China Regional Council". On one of the Wednesday night briefings, one of the Chinese students, I am making Domestic Chinese Radio tapes for, used some information he picked up off the tapes. I am currently making at least 6 hours of tapes a week. If anyone sees any more articles about Radio Beijing, could they please send them to me. It would be really appreciated. (bmm) Eric Swedberg, Oregon just received a QSL Card from Radio Beijing for frequency 11855. Site was listed as Jinhua, Zhejiang province. So Radio Beijing is

listing sites now! Via my informant the sites for these freqs are: Mali: 15130, 17715, 11715, 15130; Spain: 9690; French Guiana:11685; Canada:11840; Shijiachuang, Hobei Province: 17855; Jinhua, Zhejiang Province: 11855; and Beijing: 15195. (bmm) Ref Page 24 in LN Jul 89 under China or Non China - I (bmm) was informed by Tetsuya Kondo, Yokohama, Japan, that the station on 8375 is "Beijing Calling". (He says) I forgot its first reception now, may be around 1977. (Gave me the characters in CH). You should treat it Beijing Calling, adding "for help" is certainly wrong. It often broadcasts \$s. Someone informs me that it is aero-service station from Beijing. "Guangdong Calling Station exists also. Will sending further details! my Chinese Friend. It was CPBS program on farming. At 12 there were the 4 + 1 time pips then W "Beijing Xialing(Summer) shi(time) er(two)-shi(ten)-yi(one)-dian(o'clock)-zheng(exact) then ID "Guangxi Ren min Guangbo Diantai. This was followed by brief music then Ting zhong, Nin hao (How do you do listeners!) Then announcer gave her name as XiaoHe. This was followed by Sports News with lead item being about the "Tour de France" on 10/7. (bmm) 6100, 2315-2355, Urumqi, unusual morning opening, CH Network, selections of local songs, vocals, all over DW co-channel//7385 where also heard at great level on 15/7. (Bob Padula, Surrey Hills, Australia) 7195, 2320-0000, Rare frequency during unusual morning opening, Uighur service, vocals and announcements on 15/7. (Bob Padula, Surrey Hills, Australia) 7385, 2340-0000+, Urumqi, Excellent level during strange "Urumqi Mode" opening, CH service//6100 on 15/7 (Bob Padula, Surrey Hills, Australia) 11975NF, 2040-2130*, Radio Beijing, FF t/Eur on 5/7 (Bob Padula, Surrey Hills, Australia) 11975NF, 2040-2130*, Radio Beijing, FF t/Eur on 5/7 (Bob Padula, Surrey Hills, Australia) 15390NF, 1450, CPBS-1, CC Opera//7516, 7504, 17890(jammer), 15410 (jammer) on 1/7. At time didn't know it was new freq but confirmed

by WBI above. (bmm) 15443, 1443, CPBS-1, CC Opera//15410 (jammer) on 15/7. This the frequency I use to tape for my Chinese friend. It is

real strong. (bmm)

COLOMBIA - Cadena Sutatenza was closed down definitely on February 17, 1989. Financial trouble forced Accion Cultural Popular to sell out their broadcasting facilities to Caracol. Former Sutatenza HQ, at Cra. 39A \$15-81 in Bogota, is now being rebuilt, and Caracol is to move in there by the end of 1989. As a gesture to Sutatenza listenership, MW tx's formerly run by Sutatenza will offer programs partly different from those of Caracol cadena basica, and stations have been renamed as follows: 590 Caracol Antioquia, 700 Caracol Pacifico, 810 Caracol Colombia, 960 Caracol *Caribe. The 1010 tx, at Barranquilla, will probably move to Santa Marta, where present cadena basica outlet is thought to be inadquate. Former Sutatenza SW outlets have been reactivated (HJGC 5075 25, HJGE 5095 50, and HJIA/sic/6075 10), but sked is irr. HJEU 4755 10 is 24h. Other Caracol changes: (just involving SW (bmm): 37) 880, 4845 Caracol Bucaramanga (ex R. Bucaramanga), 15 kW on MW, 1 on SW. (Henrik Klemetz via WRTH LA-NL in 89/7 "DX'ers Calling", the monthly magazine of DX Australia")

Caracol Noticias (news) is noted 05-0530 on 5075, a frequency used by Radio Sutatenza some years ago. 810, also a Sutatenza frequency, is in parallel. Commercials are included, whereas Sutatenza is, or was, noncommercial and educational. The exact identity of this station remains unclear. (Richard E. Wood, Ph.D, Hilo, Hawaii) 6075, 2331, Caracol, Mixing in with Deutsche Welle. Carocol ID and traditional music heard. This is listed in the 89 WRTH as an irregular Sutatenza frequency. Remember that Sutatenza was sold to Caracol recently//5075 on 23/6 (Hans Johnson, GA)

EGYPT - 9670, 2145, Radio Cairo, Found on this unsked outlet with General Arabic program//9850 and not on usuaal 9475 on 7/7 (Bob Padula, Surrey Hills, Australia)

FEDERAL REPUBLIC OF GERMANY - 11845, *2200-2228*, DW, New morning service in CC but bad QRM from co-channel Helsinki, latter intended for Australia on 8/7 (Bob Padula, Surrey Hills, Australia) 13780NF, *2100-2150*, DW, Julich, EE to Australia/9670 (Trincomale, 11785 (Trincomale), 9765 Wertachtal on 19/7. Apparently introduced mid-July. (Bob Padula, Surrey Hills, Australia)

GERMAN DEMOCRATIC REPUBLIC - 9640, *2100-2145*, R. Berlin Int'l, Italian Service to Europe now QRMing the Brazilian on 9645, but leaving Vatican generally clear on 9640, but still QRM from/to Ecos del Torbes on 8/7 (Bob Padula, Surrey Hills, Australia)

INDIA - AIR Shillong's new 50 KW HF transmitter is heard testing daily since 4th April 89 on 3255 at 0125-0220 & 1225-1720. There is continuous music (Hindi films, instrumentals, etc.) in the mornings, while in the evenings it relays new AIR Shillong MF outlet on 864. There's a news relay from Delhi at 1230 EG, 1235 Hindi, 1330 Hindi, 1340 Khel Samachar(=Sports news) from North Zone hookup, 1515 Hindi, 1530 EG. In between there's plenty of EG, Hindi & regional music with 1/2 hourly IDs in EG or Hindi: "You're listening to a test transmission from All India Radio Shillong" or "Yeh Akashwani

Shillong ke parikshan sews hai". (Manosij Guha). In a personal letter from Mr. Lutfur Rehman (Installation Engineer?) of AIR Shillong who invites reports to test transmissions SW on 7190 between 0755-1746 IST (0225-1216 UTC) and on 3255 from 11755-2250 IST (1225-1720). Listeners may report to Mr. Rehman at P.O. Box 14, Shillong 793 001, Meghalaya. (Scott Edwards, Los Alamitos, USA) Thanks alot Scott for that pointer. The schedule for 3255 is okay, give or take away a minute for the sign on/off. But 7190 is currently only heard at 1105-1213 co-channel with Radio Moscow in Indonesian from 1125. 0225-1216 may represent the final op sked for 7190 when testing is done with. On 7190 there is news relay for Delhi at 1130 Hindi, 1135 EG, switching to 3255 at 1225. They used 3225(1) on 20th April for the whole day but were back on 3255 the next. I may add that Mr. Rehman has a penchant for QSLing westerners (such complexes are not unheard of in AIRI) as he hasn't bothered to verify any of my rjleports. It reached him alright for I sent it registered and the acknowlegement card came back bearing an "official" looking signature. Perhaps others will fare better! (Manosij Guha)

AIR Port Blair with 10 kW Hf is a difficult catch here with 1300 km seperating us, besides there is PBS Kunming droning in thru the static till 1600 on co-channel. It was last heard on 5th April on 4760 at 12-1730 with relays of Port Blair MF outlet on 684. There was plenty of Malayalam film songs with clear IDs in Hindi inserted ever 1/4 hour or so: "Yeh Akashwani Port Blair say 4760 kilohertz par test jaari hai" (=This is AIR Port Blair testing on 4760 kHz). News relay from Delhi at 1230 EG, 1235 Hindi, 1330 Hindi, 1340 Khel Samachar, 1515 Hindi, 1530 EG. At 1350-1355 "Pradeshik Samachar" (=Regional News) on the UT of Andaman & Nicobar Islands. Reports could be sent to: Test Transmissions, Shortwave Transmitter, Installation Engineer All India Radio, Port Blair-744 102, Andaman & Nicobar Islands. It is strange that there has been no specific reports from S. India where it should be receivable due to closer proximity. Reports on current status will be appreciated. (Manosij Guha)

current status will be appreciated. (Manosij Guha)
AIR Home Service M+J89 changes: Some upward shifts, due to high solar activity, by some regional HF outlets: 7125 (x6140) Ranchi 07-0940; 7180 (x5990) Bhopal 07-0945; 7210 (x6010) Calcutta 0630-10; The following 7230(x6100) Kureseong 0630-10. (Alok Das Gupta). additional channels are noticed carrying HS National hookup Central News Bulletins & Programs via transmitters in Delhi: 4775 0430-0435 Hindi & 1130-1135 Hindi; 6045 1429-1435 EG & 1444-1740 nat1 hookup pgm Hindi, EG; 9665 0229-0251 Hindi, EG & 0259-04 Dogri, Sindhi, Urdu, Hindi, EG, natl hookup pgms; 9770 1329-1415 Hindi, Assamese, Oriya, Nepali, Bengali; 10330 1329-1355 Hindi, Assamese, Oriya. The following changes for HS news relays via transmitters in Aligarh: 7160 (reappeared) 1329-1415 Hindi, Telegu, Tamil, Malayalam, Kannada & 1419-1445 Gujarati, EG, Marathi & 1450-16 natl hook pyms Hindi, EG; 9565 (x9525) 1514-16 Hindi, EG, Urdu; 15275 (x11730 + 15120) 1214-1245 weather, EG, Hindi, Sanskrit. Irregular tests have been heard from Delhi. Could be the 250 kW HF transmitters at Kingsway testing: 15105 07-0940 with news hookup; 7140 12-1341 with relays of Delhi Yuvavani channel. AIR HS further new channels: Regionals: 4950 Jammu A 0125-0220; 7150 (x6130) Guwahati B 0630v-1015. Additions to News Hookup from Delhi transmitters: 17850 0729-0810 & 0829-0940; 15415 1219-1245 with usual languages. 15305 is temporarily off-air for the 0129-0251 stretch. Additional sports channels from Delhi transmitters are: 4860, 9950, 6045 for EG and 6140, 7140 for Hindi commentaries subject to availability from News Hookup. HS News Hookup from Delhi on 10330, 15305 are beamed for pickup by the Port Blair station, as a standby HF feed during link failure. Some broadcasts from Aligarh may be shifted temporarily to Delhi or viceversa, or from Kingsway to Khampur or viceversa due to shutdown for some of the transmitters for maintenance work. So you may notice sudden increase or reduction in signal strength for some of the HS & ES broadcasts. Also the 250kW HF transmitters installed in Khampur may start testing on the usual or extra channels. AIR has 6 transponders of the InsatlB made available to them by the P&T, which designated Radio Networking (RN) Channels 1 to 6). Priority is given while feeding, to National Hookup (News, Current Affairs, Sports, National Programs, etc.) from Delhi to Regional AIR stations. All AIR HS stations (HF & MF) have been provided with Up & Down-link facilities. External Service transmitter sites are fed by satellite only when the RN channels are not in use for internal feeding. All of them have been provided with up & down-link facilities, except Aligarh which has

only a downlink as no programs originate there. Additionally all the ESD transmitter sites (Aligarh, Bombay, Jalandhar, Calcutta, Madras & Rajkot) are fed by speech-grade landlines which are rented from the P&T. The 10 kW HF transmitter at Leh (J&K) has also been installed and the antenna mast has been erected inspite of the sub-zero climes. Due to lack of clear channels, there is an increasing trend by AIR to accomodate two transmitters, which are distant from each other, on the same frequency. Thus 4760 and 6085 has been allocated as morning/evening and daytime freqs respectively for both Leh and Port Blair stations, for test purposes only. 4760 was unworkable due to co-channel interference from Afghanistan & China. 7125, 7180 , 9575 & 9690 allocated to them earlier has been withdrawn. 7125 has already allocated to Ranchi, and 7180 to Bhopal. No further freqs have been assigned to these two stations. Further allocations will take time as clearance has to be sought for new channels from the Ministry of Communications, which has the final say in frequency selection. KOREA - S. Korean Government announced on Apr. 20 that S. Korea would not adopt the DST from this year. (Toru Tamashita, Satoru Suga via Asian Broadcasting Institute 17/5 compiled and translated by Tetsuya Kondo, Japan.

R. Korea has published a summer broadcast schedule effective 1/5. The EG xmsns are on the air as follows: 06-07 NAm(E)/NAm(W)/ND 11830, 9570, 7275; 08-09 Eu 13670, 7550; 11-12 Af 15575; 14-15 NAm(E)/SEAs 15575, 9750, 9570; 16-17 ME-Af/ND 9870, 5975; 18-19 Eu 15575; 1945-20 ND 6135, 1170; 2030-2130 Eu/ME-Af/Eu 15575, 7550, 6480; 2330-0030 NAm(E) 15575.

World News Service, KR & EG each 15 min. pgm is also broadcast as follows: 0030-01 NAm(E)/ND 15575, 7275; 0230-03 NAm(E)/SAm/ME-Af 15575, 9640, 6165; 09-0930 Eu/SAm 13670, 9570; 11-1130 ND 11740, 7275; 1315-1345 ND 11740, 7275; 1530-16 ME-Af/ND 9870, 7275; 17-1730 ME-Af 9870, 2030-21 ME-Af/ND 9870, 5975.

ME-Af 9870; 2030-21 ME-Af/ND 9870, 5975.

On the new sked a xmsn time for V. of Free Asia pgm, which is produced in CH by CBS in Taiwan, is altered to 15-16. The freq is 5975. At the same time 6015, one of the KBS Social Education Radio Channel 1 freqs is also altered the xmsn time to 0000-2100. And a xmsn time for 6135 (KBS Social Education Radio Channel 2) is changed to 14-24) (Toru Yamashita via "Asian Broadcasting Institute" 17/5 compiled and translated by Tetsuya Kondo, Japan)

- LIBYA Observations on HF frequency usage. Monitoring research 22 Jun2 Jul 89. Since 22nd June, Libyan radio has been observed operating
 on 15235 and 7245 kHz and on an unstable frequency around 6110 kHz
 (varying between 6104 and 6121 kHz approximately). All three channels
 are heard in parallel with Voice of the Greater Arab Homeland from
 1015-1215 and 1645-0330 gmt approximately and Libyan Radio's domestic
 service from 1215-1645 gmt. Both services are entirely in Arabic.

 Padula, Surrey Hills, Australia)
- MACAO Radio Macao to start HF broadcasts in 1992. RDP International, Lisbon, in Portuguese 0935 gmt 29 Jun 89. Text of report. Radio Macao is to start shortwave broadcasts in 1992 for all Portuguese communities scattered in Asia. Teledifusao de Macau, TDM, which operates the territory's radio station broadcasting on two FM channels in Portuguese and Chinese (Cantonese) for domestic listeners, plans to operate a Portugese radio station in the territory that would continue broadcasting on shortwave for the whole East beyond 1999 (when Macao reverts to Chinese sovereignty) (WBI 7/7)
- MALAYSIA Updated Radio Malaysia Domestic Service info: The EG Service (Blue Network) on 7295 kHz) has news in EG at 2300, 0000, 0530, 1830, 12, 1330 and 15 with the news in Bahasa Malaysia at 2230, 09. The CH service (Green Network on 6025 kHz) has news in CH at 2300, 0000, 04, 05, 12, 1330, and 15 with news in Bahasa Malaysia at 2230 and 09. The Tamil Service (Red Network) on 4845 kHz) has news in Tamil at 0000, 0530, 1115, 1330 and 1430 with the news in Bahasa Malaysia at 2230 and 09. Note: The news as heard on all the above networks stated as in the Bahasa Malaysia language are broadcast simulataneously and are the same heard on all the above networks as well as the main source being the National Network broadcasts in Bahasa Malaysia 24 hours on With due corrections to the World Radio TV Handbook 1989 5965 kHz. (cf pp 216), the CH domestic service broadcasts at the following times: 22-01, 03-0515, 08-16 (all Mons-Fris) while on Sats/Suns, it is extended for a full 22-16 transmission non-stop. On Mons-Thurs, Educational programs for school are aired and comes on at 01-02, 06-07. (These are in CH as well!) The Tamil domestic service broadcasts at the following times: 21-01, 0515-06, 08-15 (all Mons-Fris) while on Sats it has 21-03, 0515-15 and Suns on at 21-15. Their Educational programs in Tamil are heard Mons-Thurs at 02-03, 07-08. (via "SE Asia DX News, No. 2 compiled by Lim Kong Jin, Penang, Malaysia 89/5)
- MONGOLIA R. Ulan Bator has changed its schedule. Each language xmsn is about 1 hour earlier than previous one. First noted on 9/5. The EG xmsns are monitored as follows: 0810-0840 12015, 9615; 11-1130 (not Tue and Fri) 12015, 9615; 1345-1415 15305, 9575; 1840-1910 12050, 9985. On 10/5 1345-1415 xmsn was observed on 15505 and 9615. (Tetsuya Kondo, Japan, Asian Broadcasting Institute 17/5)
- MYANMA Via Marc Schlossman, CA, a clipping from the NY Times dated 20/6: (Exceprts from) Burma is Officially Changing Country's Name to Myanmar: Rangoon, Burma, June 19(AP) Burma officially changes its

name in English today to the Union of Myanmar, and it renamed the capital Yangon, the state-run Working People's Daily said. Via Hans Johnson, GA. a clipping from the NY Times of Jun 25, 1989 says: Burma Out, Myanmar In. Burma has a new official name: Myanmar. The change was adopted by the United Nations on Thursday. The Burmese radio said the Government had changed the country's name to Myanmar (pronounced mee-ahn-MAH) and the name of the capital from Rangoon to Yangon (pronounced yahn-KOH). The new versions reflect contemporary usage in the Burmese language. Many place names in the native language were adapted into English during British colonial rule between 1862 and 1948.

Via Lim Kong Jin, Penang, Malaysia in his SE Asia DX News No. 3: According to a state radio announcement on June 20 (Tuesday) and quoted by many news sources, Burma's military rulers have passed a law to officially change the country's name to Myanma while the capital Rangoon to Yangon. On June 18, the state radio announced that 'that the expression 'Union of Burma' and the expressions 'Burma' 'Burman' or 'Burmese' contained in existing laws enacted in the English language shall be substituted by the expression 'Union of Myanma' and 'Myanma'. My check on the radio service formerly known as the Burma Broadcasting Service which Government owned further establish this. It is now identifying itself as "This is the Voice of Myanma, Yangon' still coming on 3 times daily in EG at 02-0230 on 7185; 07-0730 on 9730 and 1430-16 on 5985. The nightime broadcast at 1430 is best heard here with mainly music taking priority of the air time for that broadcast with a news bulletin in EG at 1445 (announcing at the start of the news the Myanma national time of 9.15pm).

The Department of Commerce in Washington, DC told me on 14/7 that the correct spelling for Burma's new name is MYANMA contrary to some news reports that say MYANMAR. Note: I checked with many people on this one including Universities, Travel Agencies, World Affairs Council in Portland, Oregon and only "The Department of Commerce in Washington, DC could confirm that it was MYANMA. They checked their records for MYANMAR but found no record of it spelled that way. On 17/7, a University called me and said it was spelled MYANMA. (bmm)

- NEPAL Radio Nepal, Kathmandu Sked. At cetain times the Radio Nepal frequencies listed below carry a commercial service: Freqs are 7165, 5005 and broadcasts in Nepali except where noted(bmm). Alternative frequency is 3230. 0015-0445 w/news in EG at 0215-0225; 0445-0715 (Sat); 0715-1015; 1015-1115(Sat); 1115-1145 EG (External Service); 1145-1715 w/news in EG 1415-1425. (via WBI 16/6)
- NETHERLANDS 11950NF, 2155, Dutch to Caribbean on 8/7. Appears to be a mid-season adjustment, possibly to avoid RA and/or RM both on 11730 at this time. (Bob Padula, Surrey Hills, Australia)
- NEW ZEALAND 15485NF, 0550, Radio New Zealand, Check Point Program ex $15\overline{150}/\overline{17705}$ and at 0720, M w/closing announcement said reopening at 09 on 9850, 6100 on 3/7 (bmm)
- NIGER Niger Radio and Television (ORTN) Sked: 0530-0655 5020, 3260; 07-15 9705, 7155, 6060. Identifies itself as Voice of the Sahel. At various times of the day the frequencies split into two services Channel 1 and Channel 2 to carrry separate news bulletins in local languages. (via WBI 23/6)
- PHILIPPINES 11650, *2300, FEBC, Malay Dialect on 15/7. Not to be confused with KSDA also on 11650 from 2130-23 in Indonesian. (Bob Padula, Surrey Hills, Australia)
- SIERRA LEONE SLBS reactivates transmitter on 3316 kHz. Monitoring research 18 June 89: The Sierra Leone Broadcasting Service was observed with programmes in EG on 3316 kHz at 1930 gmt on 18th June. This frequency was last heard ten years ago. The radio carried news bulletins at 2000, 2100, 2200 and 2300 gmt, a current affairs programme called "African Notebook" at 2115-2310 gmt, and "Focus on Development" from 2315-2330 gmt. The radio station identified itself as "the SLBS in Freetown" and announced that it was operating on 1206 mediumwave as well as on 5980 and 3316 kHz shortwave. Transmissions ended at 2336 gmt and the radio station announced that broadcasts would resume at 0600 gmt the following morning. (via WBI 23/6)

- SINGAPORE 9600, *0010-0030*, BBC via Kranji, Burmese. This is the only time that Kranji uses this freq during J89. Good level on 15/7 (Bob Padula, Surrey Hills, Australia)
- SRI LANKA -: The SW Service from Trans World Radio came to an end in June this year while TWR & Sri Lanka started renegoiating their contract. Sri Lanka started using those transmitters for additional coverage to India. 6050 10kW 1330-1730 and 11895 35kW 1330-15 and at 15 a freq change 11930 15-1730. (Victor Goonetilleke, Sri Lanka on via RN's Media Network 7/7)
- SURINAM Radio Surinam International service was inaugurated on 2nd September 1984. It is broadcast from the transmitting facilities provided by Radiobras in Brasilia (Brazil). Sked is: 17-1750. 1700-Mon-Fri Multilingual (in Dutch, EG, and Sranan Tongo), 1705-1715 News in Dutch, 1735-1745 News in EG on 17755. (via WBI 30/6)
- TAIWAN New Star Broadcasting: First noted in April 1977. This station is presumed from Taiwan with high possibility. ID in CH: "Zhelishi Xingxing guangbo diantai." (romanized in Pinyin method). "Xingxing" has many interpretations to translate. All has same pronunciation, so be careful. However it is natural interpretation (New Star) compared to others. Everybody can't decide it. This station broadcast #s in CH on its 4 different services. lst Service - 11430. 2nd Service - 15380. 3rd Service - 9725. 4th Service - 8300. Almost not in parallel with each other. You may hear its ID on 8300 as "Zhelishi Xingxing guangbo diantai di si tai". (via Tetsuya Kondo, Yokohama, Japan).

 New broadcasts to mainland China observed: Monitoring research 15-22 Jun 89: At 0011 gmt on 15th June a broadcast in Standard Chinese was observed in progress on 9610 kHz identifying itself simply as China Broadcasting Corporation. Other than occasional brief musical interludes, the broadcast appeared to consist of news, commentaries and interviews/discussions. The transmission ended at 0100 gmt. Subsequent checks indicate that the broadcast is now regularly carried at 0200-1500 gmt on 9610 and 11725 kHz and at 2200-2400 gmt on 9610 kHz only. The opening announcement states that it is intended for mainland listeners. (via WBI 30/6)9610, *2100, Taipei, CC Service, rearranged sked, possibly parallel with other freqs, untraced on 11/7 (Bob Padula, Surrey Hills, Australia) 9765, 2000-2100*, VOFC, Apparent new service replacing FF service normally on this freq at this time//9675NF. At 2100 program continues on 9610, believed to be the special CC service for the Mainland from "China Broadcasting Corporation" on 11/7 (Bob Padula, Surrey Hills, Broadcasting Corporation" Australia)
- UNITED KINGDOM 6030NF, 2100, RCI via Daventry, end FF on 2/7 (Bob Padula, Surrey Hills, Australia) 7175NF, *2230-2300*, BBC, Rampisham, Strong level with PP to Europe on 8/7 (Bob Padula, Surrey Hills, Australia)
- UNITED STATES 7520, 0353, World Wide Christian Radio, SS Program. At 0401, W w/ID & address & same in SS then brief music & M w/ID at 0402 and closing announcement. 0403* on 18/7. Thanks to tip from Mike Hardester, PA who called me about 0235 saying he heard them on 15040. A few days later he followded that up with this: WWCR at 0255 on 15040 w/spurs 15010, 15020(good level), 15030, 15050, 15060 & mixing with UNID on 15070 on 18/7. (That UNID is the BBC, Mike).
- U.S.S.R. In March this year Gosteleradio of the USSR started relaying local programs of the Union republics to Moscow on short waves (on April 11 a program from the Autonomous Republic of Tateria was added). The relays consist of a combination of the 1st and/or 2nd republican programs in local languages and Russian and of portions of the all-Union broadcasting. The hardware for these broadcasts -which made them possible at all is nothing but the former jamming transmitters covering the area of the capital. And though the target area is Moscow, the times and frequencies are chosen so as to avoid long-distance propagation, and the operating power of the transmitters is estimated 50 kW it is worth trying to tune in since this is the only possibility for the DX reception of some of the home services (like those of Tallinn and Riga) or the very stations (like Kishinev and Kazan which have no transmissions on SW). It should be

noted however, that the transmitter sites are not on the territories of the corresponding republics (cf. their 'own frequencies given in WRTH and other sources). Here is the current J89, schedule of SW relays from Soviet Republics (represented here by their capitals): Daytime portion: 5900 0230#-1900 Tallinn; 5920 0300-1755 Riga; 5945 0100-1625 Tashkent; 6010 0300-1600 Vilnius; 6030 0000-1415 Kiev; 6075 0215-1800 Kishinev; 6150 0215-1700 Minsk; 7215 0058-1655 Tbilisi; 7145 0415-1555 Ashkhabad; 7175 0453-1630 Yerevan; 7300 0200-1730 Baku; 9690 0000-1700 Alma-Ata; 9735 2259-1554 Frunze; 9785 2315-1705 Dushanbe; 11945 0230-1455 Kazan. # = every 1st & 3rd Monday 0900-. Evening Portion: 9560 1905-2100 Tallinn; 9675 1610-2200 Vilnius; 9695 1800-2100 Riga; 15110 1635-1900 Yerevan; 15180 1735-2000 Baku; 15240 1700-1900 Tbilisi; 15270 1705-1900 Minsk; 15360 1805-1950 Kishinev; 15385 1420-2315 Kiev; 17635 1600-1800 Ashkhabad; 17785 1550-1750 Frunze; 17810 1500-1800 Kazan; 17840 1630-1900 Tashkent. C H I N A (PEOPLE'S REPUBLIC)

Radio Beijing has put into operation of a summer schedule since May The new EG schedule is monitored as follows: 0000-0057 NAm(E) 17855 17715(M) 15130(M), 0300-0357 NAm(W) 17855 15130(M) 11715(M) 9690(S), 0400-0457 NAm(W) 15195 11840(C) 11685(F), 0830-0927 SPfc 0930-1027 SPfc on 17710 15440 11755, 1100-1157 NAm(E) 17855 1100-1157 NAm(E) 17855, 1200-1257 NAm(E) 17855 SPfc 15450 11600 11290(feeder) SEAs 15400 11660 1341, 1300-1357 NAm(W) 11855 SPfc 11600 SEAs 15400 11660 1341, 1400-1457 SAs 15165 11795 NAm(W) 11855 4200(feeder), 11660 1341, 1400-1457 SAs 15165 11795 NAm(W) 11855 4200(feeder), 1500-1557 SAs 15165 11795 4200(feeder), 1600-1657 E/SAf 15110(M) 1600-1657 E/SAf 151 E/SAf 15165 11575 9570 4130(feeder), 1700-1757 E/SAf 15165 11575 9570 er), 1900-1957 W/NAf 11515 9440, 2000-2057 W/NAf 15110(M) 11715(M) 4130(feeder). 11715(M) 11515 9440, 2000-2057 Eu 2100-2157 Eu on 11500 9820 4130(feeder). The Swiss-relay pgm is not confirmed. [Via (C): Canada (F): French Guiana, (M): Mali, (S): Spain.] (Tetsuva Kondo)

R. Beijing Jp pgm has been on the air at 0930-1527 on 15420, 11515, 1323kHz. With effect since May 8 also(Tetsuya Kondo, Kunihiro Nishida)

Voice of the Strait B. S. has revised its shortwave xmsn schedule. First noted on Apr. 16. The schedule includes a new frq of 4900kHz. On the other hand 3 frqs have been discontinued: 11590, 4940, 3900kHz.

The monitored schedule in April is as follows:

The monitored 30.55-1751 overall;

1st Program: 2055-0031 & 0955-1751 overall;

7280 2231-0031 0955-1751, 6170 2055-0031 0955-1751, 6115 2055-0031 0955-1751, 5050 2055-2230, 4840 2055-0031 0955-1751, 1269 2055-0031 0955-1751.

2nd Program: 0355-1626 overall;

9505 0355-1300, 6000 0355-1626, 4900 1301-1626. 846 and 666 are

9505 0355-1300, 6000 0355-1626, 4900 1301-1626. 846 and 666 are also transmitted. [VOS do not adopt the DST because of bc to Taiwan, (Satoru Suga) not in the DST clock.]

Recently Nei Menggu PBS has be two services on the following frqs. Chinese service: 0150-0550 11705 9520vkHz

0950-1525 7108v 5982v 4000 3970kHz

Mongolian service: 0130-0530 11865 9751vkHz 0940-1508 6197v 4525 3930kHz.

Frqs aired during local morning time are under investigation. [This schedule was monitored before Apr. 16. Treat it one hour earlier now] (Hiroshi Fujita)

Beijing PBS' new frq of 14340kHz has been not heard recently. Bcs on this frq might be test xmsns by a utility stn in China. (Hiroshi Fujita) [BAF47,a stn in Beijing, is listed for Meteo-RTTY. Ed.]

After chesting with the Breadcasting Authorities, we confirm your reception report on the frequency 7190 file at the times and dates mentioned in your lotter.

We are equipping with this latter our QUL ours and hope it acate cour requirements.

NOTES: Jacob Kacir sent along a very nice note informing us that as of June Radio Denmark is no longer sending out QSL cards. Jacob says that eventually their transmitters will be shut down and their programs will be relayed via Radio Norway. Kirk Allen in OK sends his best regards to everyone and hopes that this summer is kind to us all. Lots of rain out his way. All we had here in CT was tornados about 4 or 5 of them. I missed them by about two miles...Sam. Old time friend Meil Dickerson writes that he is getting back into DXing. He presently is using a FRG-7700 with an outside 60' Alpha Delta Sloper antenna. Nice to hear from you Neil...Sam. Neil can be reached at P.O. Box 457, Sharptown, MD 21861.

Well, there we have it for another month. Thanks to everyone submitting loggings and other items for distribution to the editors! As usual, I greatly appreciate the fact that most of you take the time to cut your loggings into strips and sort them in frequency order for me.

Notes to contributors: Bob Rydzewski, I'm sorry to hear about your ailing NRD; hope it gets well soon. D. Sheedy reports he may be forced to do some DX'ing from the beach in Trinidad this summer. Well, Dan, we all have to take the good with the bad! Mike Hardester is doing his DX'ing with a 20 foot wire antenna from inside his barracks!

IT'S A BOY!!

My wife, Elaine and I are proud to announce the birth of our son Matthew Christian Field!! Matt joins us and his older brother, Alex, (two and one half years of age) three weeks ahead of schedule but welcome just the same. He logged in on 16 July 1989 at 1649 UTC weighing 6 lbs. 2 oz. Mom was great and Matt is fine also. I guess I'll be sure to be awake for those 0900 band openings this fall. Whether I get anywhere near the radio is another story!

Until next month,

73 Knis

Don't forget the ANARC Net on Sunday mornings.

Yours truly reports SIERRA LEONE this month! Also reported by Roland Schulze who indicates that they are looking for reception reports. The announced address is: Reception Report, SLBS, New England, Freedown, Sierra Leone. The loggings above from (B/C) where submitted by John Bryant and David Clark and are from their Lopez Island, WA. DXpedition on July 3-5. Receiver used was an NRD525 w/ KIWA MAP and their antenna was a 1200 ft. NNW terminated beverage. One interesting note from John was that R. Enga (PNG) was not to be heard throughout June and he believes it to be off the air. All other 90/75m PNG's were good between 10-1200+. Sounds like John and Dave had a great time.

A valuable reference in my shack when DX'ing the tropical bands is the Tropical Bands Survey published by the Danish Shortwave Club International. Now is the time to order the new 17th edition for the upcoming DX season. TBS covers all broadcasting stations with location and country in the frequency range 2000-5900 Khz. Also listed are power, how often reported, transmission times and other info. It is available for 9 IRC's airmail from the DSWCI, Tavicager 31, DK-2670 Greve Strand, Denmark.

Once the static clears out, there will be quite a few loggings to report here. To help me out, please write LEGIBLY! Also, when reporting, you should be including: Country (from the NASWA list if possible), station, freq, times, date, and unique info such as actual ID etc. To save space, I will not be printing 'M/W talking' or song titles. 'Tlk' is sufficient as well as 'NAm pops'.

One final note: If you have any comic books consuming space in your attic I'd be glad to take them off your hands.

Till next month, 73 - Bob KW3F. Compuserve 74756,1557

NO COLLECT CALLS ON THESE ADS, PLEASE

FOR SALE: Collins 1.2 kHz Mechanical Filter from 51J-4 receiver. Part number stamped on the side reads SID-42102 G1 S17 X 53244. \$35.00. Lin Robertson, 1038 Turquoise #9, San Diego, CA 92109. (619) 488-3226.

Due to complaints, forget what I said last month about limiting loggings to 10 per contributor. However, I hope members will send in only their most worthwhile loggings rather than a sheaf of bandscan material. As in the past, loggings reported in last month's FRENDX will not be repeated in the current issue. Unless there are new frequencies or other significant info, it is not feasible to publish such loggings as R. Moscow or USA stateside stations. The most valuable contributions to these columns are frequency changes, new stations, and hard-to-catch loggings. Finally, I am still receiving some loggings on one sheet of paper. Those few who continue to do this can help speed things up if they will cut their loggings into individual slips.

A NASWA EXCLUSIVE

Thomas R. Sundstrom | Telex: 6502446376MCI UW PO Box 2275 | MCI Mail: 244-6376

Vincentown Prodigy: DRVB19A NJ 08088-2275 CompuServe: (send via MCI Mail)

Congratulations to Anki and George Wood on the birth of Daniel MacClaren Wood, born July 5. Mother and child are doing fine.

Noted a few days after returning from ANARCON, KUSW seems to have fallen silent or its schedule has changed. In the limited time I have listened, I cannot find it. I asked George Jacobs about this but at press deadline I haven't received an answer. Whatever the reason, Radio Korea can now be heard once again at 2330 on 15575 kHz to NA. And I wonder if Radio New Zealand is using their new high powered transmitters? RNZ after 0330 UT on 17705 kHz can be heard on the Sony ICF-2010 with its whip antenna.

Thanks to Kris Fields for schedules from Jordan, Poland, France and AWK-Asia; to Nick Terrence for Bulgaria. And a special "hello" and "thanks" to Gordon Darling, Spectrum Management Dept., Post & Telecommunication Communication, Papua New Guinea. Gordon sent a package of schedules that will take me a couple of days to go through.

The SW echo is having difficulties once again. The Neverboard, Pittsburgh, had been acting as the hub to distribute messages. The board crashed for a second time just before the ANARC convention and this time, unlike the Phoenix, it will not arise from the ashes. The sysop has decided to cease operations rather than replace the crashed hard disks. Kirk Baxter has made other arrangements were made to get the echo moving once again. If the echo mail seems slow or erratic,, you may want to call the ANARC BBS (913-345-1978) and Pinelands RBBS directly to post your loggings, send info to Jonathan Marks and Andy Sennitt, and get the latest in SW news. Loggings posted on my system are also used on the ANARC SWL Net (10 a.m. Eastern, 7240 kHz). (Loggings for the ANARC net may also be submitted via the fax machine.)

The Source has ceased operations and its assets were sold to CompuServe. In the meanwhile I have picked up an account on Prodigy, the new service of IBM and Sears. The ID is DRVB19A.

ANARC will, I'm sure, have its own press release on the July convention with more information but these are some notes I assembled as the convention proceeded. This set of notes was posted on the SW echo July 16th. My thanks again go to Andy Sennitt and Jonathan Marks for one of the WRTH's 1988 Industry Awards.

"ANARC will, I'm sure, have its own press release on the July convention with more information but these are some notes I assembled over these past few days.

"It was fun! Jeff White and George Neff and friends pulled off a very pleasant three days in a warm and sometimes muggy Florida, and they are to be congratulated. If you didn't attend you missed a very good time had by all.

"The convention was held July 14-16 at the Dolphin Beach Resort Hotel in Saint Petersburg Beach.

"This year there were more broadcast representatives than in any previous ANARC convention. These included, but were not limited to (in no particular order):

VOA: Kim Andrew Elliot

HCJB: Brent Allred and Mr. and Mrs. Kent McHarg.

R RSA: Fanus Venter.

R Korea: Ms. Han, Hee-Joo.

TWR Bonaire: Chuck Roswell and Dan Harvey.

Red Cross: Ms. Monica Piliewicz. Deutsche Welle: Deiter Wernig.

R Nederland: Tom Meyer, Alphonso Montealegra, and Jonathan Marks.

R Japan: Kaz Matsuda. BBC: Ms. Melissa Baker.

C-SPAN: Ms. Beth Glatt.

R Impacto, Costa Rica: Raoul Saavedra and Mrs. Mayin Correa.

R France Int'l: Daniel Bochent. R Canada Int'l: Ian Mc Farland. R Marti: Ernesto Betancourt.

R for Peace Int'l: Blake Wright.

"Other attendees included Andy Sennitt and Bart Kuperus of the World Radio TV Handbook, Director General Michael Murray of the EDXC, Orlando Navarro (Press Office, Office of the President of Venezuela), Bob Horvitz, Glenn Hauser.

"Listeners in attendance included quite a number from Europe (England, Sweden, Holland, perhaps more) and Central America, but the award for the furthest distance travelled must go to three attendees from Japan.

"Highlights included a very enjoyable seafood dinner Thursday evening with Sennitt, Kuperus, Mc Farland, Matsuda, Meyer, Montealegra, Piliewicz and Wernig; long and interesting discussions on programming and signal qualities with Han, Bouchent, and Venter. Ms. Han, a very charming lady, and I had a interesting discussion on about the use of relays to solve the problem of an evening ENA service (KUSW on 15580 wreaks havoc on R Korea on 15575 at 2330). The proposed Cape Verde relay site came in discussions with Fanus and Daniel; the timeline may be as long as two years into the future. The object of the excercise in all cases is to get a relay site within one or two hops of the primary target to improve signal quality. On Thursday, in the broadcasters' meeting, one of the findings in audience research seemed to suggest that the delivered signal quality is ranked first in a list of decision criteria of what stations to listen to. The economics of establishing relay sites and selecting frequencies is a difficult matter in these times of limited broadcast budgetary resources.

"The WRTH hosted a poolside reception Friday evening. Among the welcoming announcements was a birthday cake for Glenn Hauser. The 500th edition of World of Radio aired during the weekend of ANARCON '89, and Glenn received a deserved round of applause from everyone in attendance. Congratulations, Glenn.

"In the display room at the various broadcaster tables, typical questions from the broadcasting representatives included "How do we identify our audience?" "Who are our audience?" "What are the best times for you to listen?" "What do you think of our programs?" "What suggestions do you have for our programming?" As you write letters and send reception reports to broadcasters, these are questions that you might additionally comment upon.

"In additional to the broadcaster displays, Universal SW was in attendance with one of everything, and no less than three variations of computer control of receivers were evident.

"The Saturday presentations were all excellent and well attended. From what I could see, NASA's Alan Parrish may have attracted the most attention of all with an interesting look at two-way radio's role in launch support at the Kennedy Space Center.

"The Saturday night festivities started around 6 and ran to almost Midnight. Following the pool-side banquet, the group moved back to the air-conditioned meeting room for the awards presentations, keynote address and ANARC raffle.

"Among the several ANARC awards, the Broadcaster of the Year was declared a three way tie between Fred Vobbe of NRC's DX Audio Service, Jonathan Marks of Radio Nederland and Glenn Hauser of World of Radio. Other awards included Specialty Band DXer to Greg Monti of the Worldwide TV FM DX Association; International SWBC DXer of the Year to Arthur Ward, the publisher of Contact bulletin of the World DX Club, NA SWBC DXer of the Year to Mitch Sams; and Article of the Year to Ray Cole of NRC for a summary report on earthquake prediction and medium wave carrier frequency deviation. Andy Sennitt and Jonathan Marks presented The First Annual World Radio TV Handbook Industry Awards to Sony Corporation, Jim Frimmel, and me.

"The keynote speech by the Director of Radio Marti, Ernesto Betancourt, included some interesting insights to the Radio Marti operations these past years.

"The ever-popular ANARC raffle followed, handled by the dynamic duo of Mc Farland and Horvitz. NASWA's Bill Cole won the top ANARC raffle prize, a Grundig Satellite 500.

"The Sunday morning festivities included an interesting presentation on Border Radio, discussing the high powered Mexicans. Bill Crawford's book of the same name includes a small diskette with some absolutely marvelous material from the days of XEG and XERF (remember Wolfman Jack on the latter?). The ANARC Forum and the WRTH Quiz focusing on LA concluded the weekend's activities. Tom McElvy has expressed an interest in hosting the 1990 ANARC convention in Virginia Beach, in conjunction in September's Tidewater Radio Amateur ARRL Division Level Hamfest.

"Some other notes in no particular order:

"Throughout the weekend several broadcasters (I saw ones being done by Ms. Han, Matsuda, Ms. Baker, and Marks.) were conducting interviews and no doubt you will being hearing these in the coming weeks.

"I think all the broadcasters really enjoyed meeting their listeners and thought the trip was worthwhile.

"The convention's surroundings were distracting to many attendees. A wide white sandy beach with sun and surf beckoned, and others congregated around the pool and its adjacent bar.

"After the scheduled activities ended each evening, quite a number of broadcasters and listeners could be found around the pool bar area or walking on the beach until 2 or 3 in the morning. The ocean water temperature was extremely comfortable.

"There were some downsides to the convention concerning attendance and the quality of facilities.

"While an official count was not immediately available, unfortunately I and others sensed there were not as many attendees as we expected. It seemed as if not all the pre-registrants showed, and a very rough estimate was something over 100 or 125 persons. Throughout the convention there were several conversations about what do about the declining attendance, such as experienced at ANARCON last year, International Radio Days, EDXC, and this gathering.

"The hotel unfortunately had air conditioning problems. A number of us had to change rooms or have air conditioners fixed; on the evening of arrival, at 1 in the morning I finally gave up living in a sauna and changed rooms. I found the next day that I was not alone in doing so. The Floridians did not find this surprising, but some of us found the heat and humidity oppressive. Fortunately the weather improved into the weekend and the humidity levels declined a bit.

"This was the first time I attended an ANARC convention. Would I go again? You bet." $\label{eq:convention}$

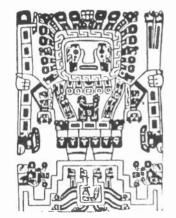

PC Software for PC/XT/AT/PS2 and compatibles: English Language SWBC Schedules, with a new feature of loading frequencies into the memories of the JRC NRD-525 and the Kenwood R-5000 from the computer. ASCII text file subscriptions for those without a PC compatible. Receiver computer control programs for the NRD-525 and R-5000. Utility Logbook for logging utility stations. For more information send a business-sized SASE to TRS Consultants (address above) or download information from the Pinelands RBBS.

Changes entered between US/23/89 and 07/27/89.

LATIN AMERICAN RADIO WORLD

Casilla 4616

1000 - Buenos Aires

* A R G E N T I N A *

Buenos Aires, July 1989.-

Dear OMs.

we are writing to you so as to let you know about a new DX-publication, named 'latin American Radio World'.

It has been produced by Julian Anderson and Gabriel Iván Barrera, and intends to be a guide for those interested in Latin American DXing.

It has been prepared with the most updated info. (July 1989), and it is written in a handy-style, condensing the practicity and utility of several DX-publications of this type.

Reviewing lots of DX-bulletins, we've included frequency listings, in the first part you will find station names, transmitting places, broadcasting times, broadcasting powers, usual slogans and additional remarks; in the second part, we've included station addresses, chairmen's names, and, when known, v/s names, and special remarks such as if the station has verified in the last 2 year-period, if it sends pennants, souvenirs, etc, etc.

We've tried to include in one single publication all the info you usually have to look for in several different sources...

It has been prepared in a large size (21 x 32 cm); all is explained in English, and will be updated bi-monthly with newsletters.

Price is 5 U\$S or 10 IRCs, this includes Airmail worldwide; newsletters are not included in this price.

We would like you to please mention this work in your publication/ programme if possible, as a way to help DXers in obtaining a (we think) useful source of LAm information.

Thanking you in advance for your co-operation, we remain, yours sincerely,

JULIAN ANDERSON (JA)

GABRIEL IVAN BARRERA (GIB)

DSWCI TROPICAL BANDS SURVEY

The 17th edition of the wellknown DSWCI Tropical Bands Survey is now available.

In this 36 pages offset-printed booklet in A-4 size you will find all active broadcasting stations in the 2.000 - 5.900 kHz frequency range, listed by frequency with their power and transmission times.

It is completely updated and based upon monitoring information from DX-ers all over the World, including "special envoys" to rarely visited countries in Latin America, Africa and Asia. Each station is classified by a code, which tells you how often the station has been reported since May 1988 worldwide and in Europe.

The survey is doubled spaced for updating ease.

It is compiled by DSWCI member Bernhard Gründl.

The TBS is available for 7 IRC's or 30,00 Danish Crowns - or 9 IRC's or 35,00 Danish Crowns by airmail. Reduced rates for bulk orders to DX-Clubs: 15% for orders of more than 20 copies.

Send your order together with payment now to: DSWCI

AERONAUTICAL COMMUNICATIONS HANDBOOK - HF EDITION

The exciting past-time of monitoring aeronautical radio communications awaits you. Tune in to conversations between high-flying commercial airliners and ground facilities on all five continents, follow the Concorde as it flys twice the speed of sound to and from Europe, monitor the progress of Russian Aeroflot flights working Cuba in Morse Code, and decipher the RTTYmessages of the Aeronautical Fixed Telecommunication Network.

All this and more is covered in the new 270 page publication for the aeronautical utility monitor. Written by Bob Evans, a veteran DXer/utility monitor and aviation enthusiast, the HF Edition of the Aeronautical Communications Handbook covers all facets of aeronautical communications.

Organized by topic with individual frequency lists, contents include:

- · Comprehensive introduction to shortwave, propagation and aeronautical utility monitoring
- · Explanation of key aeronautical terms and concepts
- · Understanding commercial aircraft/ground communications and messages
- · Monitoring the progress of transoceanic flights
- · Detailed explanation and frequencies for Major World Air Route Areas
- · CW communications AEROFLOT and aeronautical radio beacons
- The RTTY Aeronautical Fixed Telecommunication Network, decoding examples of AFTN messages and a list of active AFTN stations
- · Shortwave FAX stations aeronautical weather maps and satellite photos
- Civil aviation, Civil Air Patrol, flight testing, NOAA Hurricane Hunters, Coast Guard Search & Rescue, U.S. Drug Enforcement Agency
- · NASA communications monitoring the space shuttle and Cape Radio
- · Air force/military flights: USAF, Canadian Forces, RAF, other world air forces
- Detailed examination of message content of USAF Strategic Air Command (SAC) broadcasts, SAM (Mystic Star) and GCCS, MAC, TAC, NORAD and ARRS traffic.
- · Directions on how to submit reception reports and QSL aircraft and ground stations
- Master frequency lists of over 500 active monitored frequencies listing frequencies, services and stations confirmed
- · Appendices including a Glossary and comprehensive Bibliography with a list of sources

June 27 1989

Dear Sir/Madam

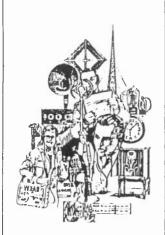

I am writing to you on behalf of the Association of Manitoba Dx'ers,AMANDX. We are a local DX club of about 24 members. We have meetings on a monthly basis and try to help out each other in what ever way we can. We do not publish any newsletter and have no intentionof doing so because there are many good pulications out there at the present time.

However we would like to be able to contact more local Dx'ers. If you could be so kind as to either publish a small notice in your publication so that local Dx'ers that belong to your group would know of us it would be much appreciated. If you could it would also be very nice to receive a list of your members that live in Manitoba. That way we could contact them ourselves. Should your groups regulations not permit the giving out of members' names and addresses we will understand and not mind in the least.

I thank you for your time in this matter and hope to hear from you soon.

73 Slaun

Shawn Axelrod, President

PRESS RELEASE

ITS BACK!! YES!! BLANDH, the summer OH builetin perody is back with an all-new fourth edition! It's the DH tradition that cures the summer DH doldrums. As readers of past editions put it: "Realiy enjoyed it." "Loved the whole thing!" "Won't miss it for anything!" "Oeliciously low standards". "A lot of fun." "BLANDH is the only publication of any kind which I am moving in its entirety when we move..." "Outright ridiculous lies and false statements." "Quite funny!" "Look forward to the current issue." Available for \$2.00 postpaid in North America, \$3.00 or 8 IRCs elsewhere from: Don Moore; c/o I.E.P. Bishop 3000; Ferris State University; Big Rapids, Michigan, 49307, USR. Checks payable to Don Moore.

Discover the World OF INFORMATION In Proceedings 1989

Fine Tuning's *Proceedings 1989* is this year's must have collection of in-depth reviews, articles, and features for the SWBC DXer.

This second edition follows in the footsteps of last year's successful publication.
Because of the volume of information, *Proceedings 1989* is presented in a photo-reduced format (equivalent to 300 typewritten pages).

Proceedings 1989 is a true heavy-weight in SWBC journalism.

Although written clearly, it is NOT a primer for the uninitiated.

Every article thoroughly examined by a review panel of top-notch, respected DXers.

Each article edited for clarity by Senior Editor Fritz Mellberg, a leading DXer with extensive journalism experience.

Proceedings 1989 is an essential reference for anyone wishing to increase their enjoyment and expertise as a SWBC DXer.

Highlights in this volume include:

A hard-nosed look at the NRD-525, warts and all.

An in-depth review of the fabled Collins 51J4 receiver.

Four reviews of add-on synchronous detection units.

A detailed study of propagation through the auroral zone.

Articles on directional antennas for shortwave, as well as a "field guide" to practical beverage antennas.

Three superb DX features on Brazil, the Arab world, and Java.

An extensive— and useful— collection of hints, tips and resources for the DXer. This section is packed with helpful data.

These DXers are preparing major articles for *Proceedings* 1989:

David Clark, Rich Arland, Chuck Bolland, Joe Farley, Mitch Sams, Mark Connelly, John Bryant, Dallas Lankford, Gerry Bishop, Kevin Atkins, Jon Williams, Chuck Mitchell, Guy Atkins, Gene Pearson, Tom McElvey, Bill Sparks, Hans Johnson, John Fisher, Don Moore, Jerry Berg, Don Jensen, Fritz Mellberg, Jerry Strawman, and Nick Hall-Patch.

Proceedings 1989 will be mailing in mid-August. Don't delay your order... last year's copies disappeared fast. Proceedings 1989 costs \$19.50 plus \$2.00 postage. Outside of North America, postal costs are \$3.00 surface book rate or \$15.00 airmail. (US funds on a US bank, please). Make checks or money orders payable to Fine Tuning Special Publications and mail to:
