The M Street Journal

Radio's Journal of Record NEW YORK - NASHVILLE

February 3, 1999 Vol. 16 No. 5

(LOW) POWER TO THE PEOPLE. . . Should your next-door neighbor or your church be licensed to operate a 1,000-watt FM radio station? 4 to 1, the FCC votes to proceed with a Notice of Proposed Rulemaking to create a new radio service called "Low Power FM." This isn't the final step, as one radio head reminds M Street. Here's the Cliff Notes version of the NPRM: Two and possibly three classes: "LP 1000" -- Effective Radiated Power of 1,000 watts and antenna height of 60 meters, producing a service area with a radius of about 8.8 miles and bound by "most or all of the rules applicable to full-power broadcasters." Then "LP 100" -- ERP of 100 watts at 30 meters, with a service radius out to 3.5 miles. Most service rules wouldn't apply. The FCC is also asking for comments about a possible third class: "Microradio" -- 1 to 10 watts with an antenna height of 30 meters and a service radius of one to two miles. Current licensees couldn't own an LPFM or even do a Local Marketing Agreement with one. Does this open a Pandora's Box of problems? A full report inside this week's M Street Journal.

500 IS A LOT (IN ANY LANGUAGE). . . An all-time high of 500 U.S. stations are now programming in Spanish, continuing a steady trend M Street has tracked since 1989. What's impressive isn't just the number of stations -- It's also the variety in formats that have flowered. M Street's now cataloging variations of Hispanic radio ranging from romantica (love songs) to ranchera (a form of regional Mexican) to Spanish talk and tropical (based on Caribbean music). The 500-station figure is from the M Street Format Monitor, as published in Airplay Monitor. Will money follow the growing popularity? There's a big push on now to educate advertisers and agencies about the Hispanic market -- and its avid radio listeners.

WASHINGTON THIS WEEK

Some questions (and a few answers) about the FCC's Notice of Proposed Rulemaking on Low Power FM: Like, how will the FCC award Low Power licenses? The answer looks like auctions, when there are mutually exclusive (competing) apps. But the FCC's searching for alternatives to avoid auctions, which might price some potential licensees out of the market and stymie its drive to increase diversity. One group is definitely at the end of the line: Pirates who've already been shut down by FCC enforcement efforts. Another question: Can politically unpopular groups (the Klan, for example) be licensed? Yes -- and there's really no prohibition against their getting a license under current rules. Is there a limit on ownership? Yes: One to a market. And possibly a national limit of five to ten stations. How about re-broadcasting a current full-power station? Forbidden, under the NPRM.

The biggest question: Will Low Power FM endanger signals already licensed in the FM band? The Commission (and the Commissioners separately) promise they'll give that top priority when considering the new service. And the FCC proposes minimum distance separations between LPFMs as "the best practical means of preventing interference" between LPFM and full power FM stations. The FCC would protect stations from co-channel (same-channel) and first-adjacent channel interference. But not third-adjacent -- and "possibly" not second-adjacent. "First-adjacent" means a 99.1 MHz station gets protection for 98.9 and 99.3. One of the biggest unknowns concerns is the conversion to In-Band On-Channel Digital Audio Broadcasting. It will require some space in the first-adjacent frequency, and some worry that LPFM would create massive interference problems. If you have strong opinions, the FCC welcomes your input. That's what a "Notice of Proposed Rulemaking" is all about.

Will FCC Commissioner Susan Ness be re-appointed to her second five-year term? Her term expires June 30 and suddenly there's talk about other candidates for the job, including current White House staffer Vanessa Weaver. M Street won't surprised to hear plenty more names tossed around in the invisible Rumor Mill (it's right next to the Portals). Ness seems to enjoy her position (and is actually now the senior-serving Commissioner). She's been a consistent supporter of Chairman Bill Kennard and a reliable vote on issues like concentration and low power radio. But her stance may have bothered some powerful Republicans on Capitol Hill, and it might be easier for Bill Clinton to nominate a newcomer with no record than a moderate-to-liberal incumbent.

President Clinton wants money from TV broadcasters -- \$200 million to start -- and M Street's wondering if radio can be far behind. The \$200 million frequency fee he's asking in his Fiscal Year 2000 budget would be for TV stations making the transition from analog to HDTV. That's pretty much the path radio will be taking in a few years. This will be a big battle for the NAB's Capitol Hill troops over the next budget. Senate Commerce Committee Chairman John McCain's already raising questions about the White House proposal.

Clinton's proposed FY2000 budget includes a sizable \$38 million raise in the appropriation for the FCC. The Commission would go from the currently-allocated \$192 million to \$230,877,000. Why the spike? The FCC justifies it because of mandatory increases in salaries and benefits, higher costs at the Portals, and its contract services, as well as expenses related to its electronic (online) services. The Commission's "FTE" -- Full Time Equivalent staffing -- would remain at 1,975.

The Department of Justice has killed Media One's two-FM purchase in Erie, PA. Jim Embrescia's Media One won't be adding Rambaldo's CHR WRTS and rock WRKT to its local cluster. M Street first reported that deal exactly a year ago.

WASHINGTON THIS WEEK (cont'd)
We don't know who they are, but they're suing the FCC: Principals in New York City's "Steal This Radio" unlicensed operation have received a judge's permission not to identify themselves in a federal lawsuit they've filed against the Commission. U.S. District Judge Michael Mukasey says "To deny them permission to proceed by pseudonym would either expose the plaintiffs to further penalties and prosecutions or . . .discourage them from pursuing their constitutional challenge." Steal This Radio alleges that the government is abridging their First Amendment rights to broadcast.

Frequent Flyers, Frequent Shoppers -- Why not "Frequent Visitors" to Commission? If you get one of these brand-new documents you won't be required to stop at the Guard's Desk to sign in every time you pay a visit to the agency at the Portals. The new "Frequent Visitor" pass gets you access to all of the public spaces, including the Commission Meeting Room, Reference Room, Library Room and the Chairman/Commissioner Reception Area. To meet with FCC employees, you do need an appointment.

CANADA THIS WEEK

Vancouver, BC-based Okanagan Skeena Group is now the largest radio group owner in Canada, in terms of the number of licenses controlled. The C\$9.6-million purchase of Nor-Net Communications adds Nor-Net's 15 licensed stations and their associated relays to Okanagan Skeena's current 16 licensed stations. Also included in the deal is the satellite-delivered Nor-Net Radio Network that provides a 24 hour-perday country music format to most of the Nor-Net stations. Four of the Nor-Net stations are in British Columbia with the rest in Alberta. Until now, Okanagan Skeena Group's holdings were all in British Columbia.

The newly enlarged Okanagan Skeena Group dwarfs other Canadian broadcasting companies in number of licenses owned, though others reach more population with stations in Canada's major markets. Next to Okanagan Skeena, the largest Canadian radio group owner is CHUM, Ltd. with 24 stations. M Street's tally of the largest Canadian radio groups: CHUM, Ltd., 24; Telemedia 21; Maritime 18; Rogers 18; Power 17; Newcap 12; Standard 12; Western International 12.

CBC President Perrin Beatty has agreed to stay on another six months, past the end of his four-year term on March 31. That gives the Canadian Broadcasting Corporation head the opportunity to present the CBC's case to the CRTC for renewal of all its radio and TV licenses -- a very big undertaking. Perrin says he informed the government last Fall that he planned to leave at the end of this term to enter the private sector.

ELSEWHERE

Ahead of a scheduled \$4.1 billion merger with cousin Chancellor Media, Capstar executive Steve Hicks is carving up GulfStar -- one of his six operating divisions -- and redistributing the GulfStar stations among three other Capstar units. also elevates GulfStar President/CEO John Cullen to Co-COO of Capstar, reporting to COO Geoff Armstrong. The GulfStar stations are parceled out to Pacific Star, Central Star and SEAStar. The reapportionment will be handled by states, according to Steve Hicks' internal memo to employees titled "Operations - Restructuring" -- Texas and Louisiana stations now in GulfStar go to Jim Donahoe-run Pacific Star. Kansas, Oklahoma and Arkansas stations become part of the Mary Quass-run Central Star. Mississippi stations and the GulfStar cluster in Pensacola, FL will be combined with John King's SEAStar division.

The onetime group that's a group again -- Tele-Media -- is buying its sixth station in the California High Desert. It pays Hub Broadcasting \$600,000 for classic hits KXXZ, Barstow, CA (95.9 MHz). Sidenote: Ira Rosenblatt-run Tele-Media will not be picking up KXXZ's LMA with standards KIQQ, Barstow (1310 KHz). Tele-Media's other stations in the area include oldies KHDR-FM, Victorville, CA and standards KVVO M Street notes that the High Desert area around Barstow is and standards KVVQ. M Street notes that the High Desert area around Barstow not currently rated by Arbitron -- but we won't be surprised if that changes before too long. We also note that the U.S. "Tele-Media" is a completely different company from the Canadian group named "Telemedia."

A little history in this station closing: Diamond Broadcasting finally cashes out of radio ownership by selling its three Oklahoma City stations for \$53,375,000. Dan Lee and Seth Mason previously sold their Chicago stations (WXRT, WSBC and the original 820 KHz daytime home of "The Score"). Tony Renda's deal to purchase oldies combo KOMA/KOMA-FM and classic rock KRXO closed on January 29. Renda oldies combo KOMA/KOMA-FM and classic rock KRXO closed on January 29. Broadcasting has been LMAing the stations since last Spring and now adds them to its current property there (AC "Magic" KMGL). Brokers on the Oklahoma City transaction: Jack Minkow and Bob Heymann of Broadcasting Asset Management Corp.

ELSEWHERE (cont'd)

The group known as Asterisk picks another Gainesville FM out of a busted deal. Classic rock WRKG, High Springs, FL (104.9 MHz) was supposed to be acquired by Williams Broadcasting (which owns oldies WRGO, Cedar Key, FL). That deal failed to close, and now Donald Boyd's Millstone Broadcasting is selling WRKG to Asterisk Communications for \$825,000. Asterisk owns two country FMs -- WTRS-FM and WYGC -- plus soft AC WMFQ, Ocala. Broker on the Millstone-Asterisk transaction: Orlando-based Hadden & Associates.

"Sarkes Tarzian" is the name of a longtime Midwest-based group owner, and there's a change to report there: An Atlanta-based investment company named Bull Run Corporation is buying 73% of radio/TV group Sarkes Tarzian (though not actually taking voting control). Mary Tarzian was the widow of founder Sarkes Tarzian and she died last June. Now Bull Run acquires her 73% share of the company's outstanding common stock. Sarkes Tarzian has radio stations in Ft. Wayne (AC WAJI and oldies WLDE) and Bloomington, IN (talk WGCL and adult alternative WTTS). It also owns TV outlets in Chattanooga (NBC affiliate WRCB) and Reno (CBS affiliate KTVN). Bull Run is the largest stockholder in TV/newspaper owner Gray Communications, and Gray will obtain an option to buy the investment from Bull Run. Tucson's Kalil & Company brokered the sale to Bull Run.

Wall Street still favors radio stocks: Privately-held Entercom succeeds in going public, and raises more money (\$306 million) at a higher price than it expected. Philadelphia-based Entercom has been run by Joe Field and son David Field, and now trades on the New York Stock Exchange under the symbol "ETM." The January 29 Initial Public Offering was led by Credit Suisse First Boston.

Clear Channel is ready to cross the English Channel: Lowry Mays joins Virgin Radio and Rupert Murdoch-linked Talk Radio in a consortium that will bid on all of the UK's new regional DAB licenses. Following the pattern it's using in New Zealand, Clear Channel will be a one-third owner and use the connections of local broadcasters to enter a foreign market. The UK uses the out-of-band Eureka-147 system for DAB -- not the U.S. in-band approach being pursued by USA Digital, Lucent Digital Radio and DRE. In this British foray, Clear Channel's new partners include Rupert Murdoch, at least indirectly. UK's Talk Radio was recently purchased by former Sun newspaper editor Kelvin Mackenzie, and Murdoch is one of the backers of Mackenzie's winning bid. Clear Channel's other partner in this venture is Virgin Radio, founded by Richard Branson but recently sold to air personality Chris Evans.

For religious powerhouse Salem, it's not just about radio any more: It buys a Christian publishing company (Nashville-based CCM Communications) and a Christian website developer (Greensboro, NC's OnePlace). Salem says it will look to integrate products from the new divisions into the operations of its 45 owned stations and the Salem Radio Network.

If you're simulcasting, you should know that Arbitron's proposing a major re-write of the rules, and that could really help in the sales department. For one thing, simulcast stations could choose listing as a "service" (M Street's term) instead of making users of the report do the math every time they put together a buy. Here's an overview of the policy that Arbitron is proposing: No limit to the number of stations included in a simulcast combo. (M Street notes that during the Fall survey there was a five-station simulcast in Johnson City, TN, and Jacor is simulcasting all-sports KXTA on a number of southern California AMs). Stations that simulcast 100%— including commercials — from 6 am to midnight Monday through Friday, and at least 91% of the time Saturday and Sunday, would qualify for the new "simulcast" status. That would give them the new "total-line" reporting in Arbitron. Arbitron stresses to M Street that it's merely proposing these rules, and seeks input from radio. E-mail comments to simulcast@arbitron.com. This could do something M Street's advocated for years—get advertisers focused on a "service" instead of the performance of individual transmitters.

So sue them: Another flagship radio station sues a pro sports franchise for alleged problems it's had in the sales department. Entercom's KIRO, Seattle is actually suing the Seahawks' FORMER owner, a fellow named Ken Behring. According to the Seattle Times, Entercom claims that Behring poisoned fans' attitudes so badly that KIRO had trouble selling commercials in the games. For one thing, Behring threatened to move the whole franchise to southern California. KIRO's seeking damages in excess of \$5 million -- but also hoping fans return to the stadium under the new ownership of Microsoft mogul Paul Allen. Down in Florida, WQAM owner Beasley is suing Marlins owner Wayne Huizenga, claiming he damaged the franchise by breaking up the team.

ELSEWHERE (cont'd)

That proposed merger between AFTRA and the Screen Actors Guild won't happen -only 46% of the eligible SAG voters voted to approve it. The AFTRAns campaigned hard for the merger of the two unions (and approved it by a 2 to 1 margin). M Street's wondering if we'll see any changes inside AFTRA as a result of the defeat.

Cut 'em off: Minnesota Governor Jesse Ventura proposes to end state aid to public radio and TV. The former pro wrestler aims to bodyslam Minnesota Public Radio -though M Street notes that MPR long ago created its own revenue stream through successful for-profit direct marketing efforts. And state money is only hugely successful for-profit direct marketing efforts. And state money is only about 2% of MPR's total budget. But -- is this a move other conservative and libertarian-minded governors might propose in THEIR budgets?

Muzak -- widely used as background entertainment in workplace and office situations -- turns out to be worth more than a third of a billion dollars (and don't call it "elevator music"). ABRY Partners, the Boston-based investment firm that has bankrolled numerous radio deals, is engineering the \$350 million buyout of Muzak. It must feel the time's right for a very big consolidation in the subscriber-music business. Audio Communications, currently Muzak's largest franchisee, will acquire Seattle-based Muzak LP from New York-based Centre Partners Management, LLC. Muzak has recently expanded its offerings to about 60 channels.

M STREET BAZAAR. . . PEOPLE, PRODUCTS, AND PROGRAMMING

Nice to see a radio executive get promoted to oversee a TV group: ABC Radio President Bob Callahan adds the title of "President of Broadcasting", with new responsibilities for the ABC-owned TV stations and ABC-owned National Television Sales rep. Both ABC Radio Group President Callahan and veteran TV exec Larry Pollock used to report to Steve Burke -- who left last June to take a more entrepreneurial job at Comcast. Now Pollock reports to Callahan, who has overseen ABC's radio interests -- 35 stations plus ABC Radio Networks -- since April 1996. Callahan reports to Bob Iger, who reports to Michael Eisner.

Zippo is splitting: The signature personality of ABC's syndicated "Pure Gold" format for 13 years has been Jim Zippo, and he's leaving after the two sides failed to agree on terms for a new contract. His final day is February 6. After that, current midday jock Jay Fox will join morning co-host Maria Danza (at least temporarily).

Famous "Amuricun" Earl Pitts just got sold. Pitts -- the future presidential candidate of the White Trash Party -- is part of the cast of characters of WLW, Cincinnati's Gary Burbank and for the past ten years has enjoyed his own daily syndicated commentary. Now Rick Consolo has bought the rights to the show and switched the compensation scheme in Arbitron-rated markets to barter. Consolo says Pitts is now clearing in 100 markets. Consolo: (800) EARL PITTS or www.earlpitts.com.

Another syndicated morning show comes out of the South, where Birmingham-based morning team "Rick and Bubba" get syndicated to Nashville sister station WKDF. As the Tennessean newspaper points out, once it was announced that Carl P. Mayfield would return to Nashville radio on Dick-owned WGFX and not WKDF, the 'KDF team of Ian Case and Mike (The Duke) Donegan breathed a sigh of relief -- but prematurely. They've been replaced by Rick Burgess and Bill (Bubba) Bussey, currently doing wakeups at Dick-owned WYSF, Birmingham. WYSF is soft AC "Soft Rock" and WKDF is modern rock. M Street notes that Rick and Bubba don't play any music, which makes syndication easier.

A goodbye to one of the most-heard voices of the 20th century: Newsreel announcer and radio veteran Ed Herlihy. Ed was the voice of doom behind the WW II newsreel footage in movie theatres, then spent 40 years pitching for Kraft food (doing live spots). He was also a key part of the "Golden Age" of radio during the 1930s and 1940s when he announced dozens of network radio shows. He made the transition to live TV as announcer and was even cast by Woody Allen in movies like "Radio Days" and "Zelig" because of his voice. Ed Herlihy died at his home in New York at age

Next week in the M Street Journal, a report from Atlanta on the news and the new products we see at the RAB'99 in Atlanta. Call our office (615-251-1525) if you need a telemarketing list, mailing labels or other custom database work. See you back here next week on M Street!

The M Street Journal

Radio's Journal of Record NEW YORK - NASHVILLE

February 10, 1999 Vol. 16 No. 6

RADIO R US. . . ABC expands its "Radio Disney" 24-hour kids format into a top 10 market (Houston), a top 20 market (Pittsburgh) and down into some smaller markets (like Salisbury-Ocean City, MD), as part of a continuing show of corporate confidence in the kids radio strategy. In Houston, ABC is paying \$6 million to purchase black gospel and religion KYOK (1590 KHz) from Faith Broadcasting, in a deal brokered by MVP. In the Steel City, ABC is purchasing WEAE, Pittsburgh (1250 KHz) from Jacor for \$5 million. (So goodbye "Sports Radio 1250.") And Radio Disney also snags non-owned Radio Disney affiliates in Macon, GA (with Radio Perry buying WNEX, Macon at 1400 KHz to fill out coverage of its WPGA); in Augusta with Cumulus-owned WBBQ at 1340 KHz, and the Maryland Shore on Cumulus-owned WJDY, Salisbury at 1470 KHz.

LOW POWER FM IN YOUR BACKYARD. . . The FCC's just-released chart of possible LPFM allocations demonstrates just how widespread the new LP-1000 and LP-100 classes of LPFM might be. There could be as many as 21 thousand-watters in Las Vegas, depending on the interference criteria. Maybe 11 in Phoenix. None in New York City but perhaps five in Houston and 13 in San Antonio. And for the proposed hundred-watt LP-100 class, Nashville could get as many as 37, Columbus, OH as many as 36 and San Antonio as many as 40. M Street senses an air of something that's not quite defeat but is certainly pessimism among some broadcasters about the looming threat of LPFM. That's despite arguments that the engineering studies haven't been done, that In-Band On-Channel DAB is threatened and plenty more. We'll follow the politically-popular saga of Low Power FM and more every week, right here in the Journal. First -- the week's format changes --

WASHINGTON THIS WEEK

Catch-22: There IS a weather emergency -- and it's actually the EAS system itself. Stations are caught between two federal agencies. One (the FCC) requires them to use approved Emergency Alert System equipment. The other (U.S. Patent Office) has granted Quad Dimension, Inc. a patent on some of the technology EAS is based on, and only now are stations getting take-it-or-leave-it letters from Quad Dimension. QDI asks that stations pay \$240 this year and \$180 in succeeding years for a "non-exclusive patent license agreement." The offer expires on February 24. It appears QDI has a patent -- but the National Weather Service says it has just found "additional information" that suggests the technology patented by QDI was "first developed by others." And the NAB just petitioned the FCC for help: "Broadcasters are being compelled by FCC regulation to act in a way that QDI believes infringes on its patent."

The Commission's on the brink of a new reorganization, and it has chosen longtime staffer Renee Licht to oversee that chore. Licht gets the new title of Deputy Managing Director, reporting to Managing Director Andy Fishel. Licht's moving over from her current homebase, the Mass Media Bureau.

Michael O'Shea and partner Ivan Braiker are the latest to be gifted with FCC red flags, related to their proposed acquisitions in the markets of Klamath Falls, OR and Yakima, WA. The extra attention is for deals the FCC finds potentially problematic in terms of local concentration and diversity. "New Northwest Broadcasters" is the name O'Shea and Braiker are using for their new regional group. Still hard to tell if the FCC's new "red flag" procedure actually slows down deals -- but it does generate more paperwork.

Crossing swords over cross-ownership: The current newspaper/broadcast cross-ownership policy dates back to the mid-1970s, and several Republican members of Congress want it eliminated. Ohio Congressman Mike Oxley has just introduced a bill to repeal the rule, with co-sponsorship by Reps. Ralph Hall (D-TX) and Cliff Stearns (R-FL).

The FCC continues to shut down unlicensed pirate operations, including one in Palm Beach Gardens, FL. In this one, U.S. Marshals and the U.S. Attorney's office actually seized equipment. (Report No. CI-99-6)

The information you want is on the truck. . . The Commission is temporarily suspending public access to the broadcast engineering files in the Reference Center while it re-locates to The Portals. The FCC thinks the move will be complete by February 22. The FCC's duplicating contractor, ITS, will be able to access the files in the meantime. Reach ITS at (202) 857-3800. Questions? The FCC's Chief, Reference Operations Division is Bill Cline, reachable at (202) 418-0267.

WASHINGTON THIS WEEK (cont'd)

Some new faces on the NAB Radio Board, and runoffs in two NAB Board districts. Five incumbents won re-election (Richard Osborne, David Kennedy, Walter May, Peter Ferrara and Louis Vito). Five more seats are taken by non-incumbents: Houston Pearce in District 9, Steve Newberry in 15, Ginny Morris in 21, Mickey Luckoff in 23 and Tim McNamara in 25. The runoffs are in District 17, between Russ Withers and Steve Samet, and in District 19, between John Borders and Doug Williams.

Chairman Bill Kennard has just been booked to speak at the traditional "Chairman's Breakfast" in Las Vegas. That's on April 20. Commissioners Ness, Furchtgott-Roth and Powell will guest on a "Regulatory Dialogue" later that same day.

CANADA THIS WEEK

A pretty shocking format change in Toronto, as CISS (92.5 MHz) drops country to go CHR. The format flip was due to an ownership change -- also a rarity in a big Canadian market. Gordon Rawlinson's Rawlco is selling CISS to Rogers, which turned the station into "Power 92" as part of a deal prior to closing. There are protests by country fans who feel abandoned, and at least one report that nearby CKDX, Newmarket, ON (88.5 MHz) is challenging Rogers' right to use the term "Power." M Street notes that Rawlco had a difficult time making a go of it with the country format at CISS. A number of staffers are gone, and CISS GM Sharon Taylor will be leaving as well.

Elsewhere

What's up in Boston? WKOX, Framingham, MA (1200 KHz) is being sold to something called "WKOX FCC Licensee Subsidiary, Inc."as part of a \$14.5 million deal thatincludes three UHF television stations. Principals of the acquirer are area operator Ed Karlik, David Ramsay, Steven Langman and Nancy Cooper. Several things about the station are interesting: It's got a CP to upgrade to 50,000 watts directional both day and night. And it's long been rumored to be for sale by Fairbanks, which has now sold off all its other radio properties. The current WKOX programming is Spanish religion/English-language religion and religious contemporary.

The constantly-expanding Cumulus Media pays \$9 million to enter the Pensacola market with classic hits WWRO and talk WCOA. Jim Duncan says the entire Pensacola market did \$9.9 million in 1997, and Cumulus gets an option to give Coast Radio \$9 million for just these two properties. M Street thinks Cumulus wouldn't have entered market #122 if it didn't expect to add more assets to its new base of "Arrow" WWRO (100.7 MHz) and WCOA (1370 KHz). George Reed of Media Services Group brokered for seller Coast Radio, L.C.

Hispanic operator -- and Eastern Seaboard specialist -- Mega Broadcasting is beefing up its Philadelphia-area properties with the \$15.5 million purchase of South Jersey FM WRDR, Egg Harbor City, NJ (104.9 MHz). Alfredo Alonso's group already has two AMs in Philly (WURD plus recently-acquired WSSJ). This purchase of WRDR should help it reach the many Spanish-speaking folks in southern New Jersey down east to Atlantic City. Seller is Cedar Knolls-based New Jersey Broadcasters. It acquired WRDR only recently, and will change the current adult standards format to Spanish tropical.

Mega was also writing checks up in the Boston area, where it's acquiring its third AM there: WLLH, Lowell, MA (1400 KHz). Seller Wireless Talking Machine is currently doing a varied menu of adult standards (6 am to 7 pm), Spanish tropical (7 pm to midnight), and jazz (overnights). Mega is paying \$936,000 to add WLLH to its Boston cluster of Spanish hits WBPS, Dedham (890 KHz) and tropical WNFT, Boston (1150 KHz). Mega will switch the station to tropical.

Don Curtis is a major player in the Raleigh-Durham-Chapel Hill market with stations like country WQDR and news/talk WPTF, and he's added two more AMs to his stable, both from Mortenson: religion WRDT, Raleigh (570 KHz) and black gospel/religion WCLY, Raleigh (1550 KHz). M Street notes that WRDT's 570 KHz frequency was for many years the home of the urban "WLLE." This arrangement cashes Mortenson out of the Raleigh market.

The newest radio station owner may be the Haitian immigrant who says he was literally tortured by police in Brooklyn. Abner Louima has filed to acquire WYGG, Asbury Park, NJ (88.1 MHz) from the Evangelical Crusade of Fishers of Men, Inc. The New York Post reports Louima, as principal of Minority Business and Housing Development Inc., is paying the current licensee \$1 for the chance to go on the air as a talkshow host.

ELSEWHERE (cont'd)

A sale in central Connecticut, where the ADD Radio Group is acquiring AC WNTY, Southington, CT (990 KHz) from a partnership led by George Stevens. Peter Arpin's ADD Radio Group owns or manages three stations doing various Spanish-language formats in eastern Massachusetts, including WJYT, Attleboro, MA (1320 KHz). In the WNTY deal, brokers were Mike Rice of New England Media and Kozacko Media Services.

So here's our weekly speculative story about the deal that HASN'T been reached or announced: Clear Channel-Chancellor. At least by the Journal's deadline, analysts continued to say Clear Channel is "the logical choice" to acquire Chancellor, Chancellor's Jeff Marcus says the combination would be "an awesome company, a magnificent company" -- and there's nothing concrete to report. M Street will keep you up to date on potentially the largest radio deal ever -- maybe more than \$18 billion.

Cumulus Media is joining the crowd of broadcasters (like Hicks Muse) who are entering the tower business, and it creates a new company called "Cumulus Wireless Services." Richard Weening says, in essence, why build a new wireless tower when you can lease from him? With 194 towers in 40 cities, Cumulus can leverage its radio station assets by selling tower space to wireless companies. M Street wonders: Does Weening plan to spin off the tower company in the future?

It's a big country, but somebody's got to measure it: Arbitron is developing a network rating service to challenge RADAR -- and to measure the emerging satellite radio services. Bruce Supovitz takes the new post of "Vice President, National Radio Services" and says he'll be leading an effort to offer "new, national radio rating services by third quarter 2000." M Street notes that RADAR, technically, measures clearance of network COMMERCIALS, not programming.

Quick report from RAB '99 in Atlanta: The overall themes were #1) the Internet, #2 community involvement and #3), building sales skills. RAB President Gary Fries says "The Internet WILL be part of radio's future" and says radio is well-qualified to drive people to websites. Arbitron presented the first update to last Fall's Edison Media Research study on radio and the web (you can read it online at "Arbitron.com"). And there were dozens of training seminars. We had a presidential visit at the Grand Hyatt -- though Bill Clinton was actually in a separate ballroom Friday night, the top guest at a 65th birthday charity salute to baseball great Hank Aaron.

More from Atlanta: Radio had its first \$15 billion year in 1998. The RAB says radio topped \$15.4 billion, in fact. Radio is beginning to crack some traditional newspaper accounts, and demand is pushing up rates, says Gary Fries. Many radio groups are also running higher spot loads, even if they deny that's a policy. Local revenue averaged an 11% gain for all of 1998. National continued to soar with a 15% gain.

Getting agency creative departments excited about radio through local workshops with top professionals -- That's a new strategy of the annual Radio-Mercury Awards. The traditional dinner awards show gets replaced by a reception and presentation at the NY Museum of TV and Radio. Part of the savings will be redirected into training and workshops for the creative community. This year's Lifetime Achievement award goes to CBS' Charles Osgood. And if you've got your 2000 calendar out, the dates for the RAB '2000 are February 17-20. Get ready for some skiing -- The convention's in Denver, for the first time.

Poland's Agora SA is going public through an Initial Public Offering on the Warsaw exchange. M Street notes that Cox Enterprises is a 13% shareholder in Agora, which has interests in newspaper publishing and broadcasting. The Wall Street Journal reports that Poland's advertising market is growing at a 20% annual clip.

Bricks, mortar and faith: The National Religious Broadcasters just voted to build a new \$1.5 million permanent headquarters facility in Manassas, VA. M Street wishes them well!

As for the much-anticipated spinoffs from the \$4.4 billion merger between Clear Channel and Jacor, M Street expects to have a full accounting for you next week. We're hearing that minority owners will play a big role in the picture, including both black and Hispanic groups. Details sooner (as they break) in the M Street Daily fax.

M STREET BAZAAR. . . PEOPLE, PRODUCTS, AND PROGRAMMING
Following the bouncing baseball: Two franchise moves this week, VERY close to Opening Day. In the Bay area, the Oakland A's move from KNEW to adult standards KABL, which keeps the team inside the Chancellor family. KNEW had baseball for just one year after taking it from KFRC. Last year's broadcast team of Bill King, Ken Korach and Ray Fosse stays together. Down in Astrodome territory, Chancellor's KTRH, Houston gets Astros play-by-play away from CBS-owned KILT, signing a three-year deal with a two-year option. The Houston Business Journal says the team retains all the inventory in the pre-game, post-game and the actual game. KTRH can sell spots in the "pre-pre-game" and "post-post-game" programming.

Got a daytimer? You could use your website to broadcast nighttime sports. WGHT, Pompton Lakes, NJ (1500 KHz) is already repeating its daytime oldies programming after signoff on "WGHT.com" -- but now it's putting local college basketball live on its website, as programming created exclusively for the web. Pretty creative solution -- or is it the beginning of the end of analog radio?

Jacor launches radio-web hybrid "KSDO.com" business talk format with a \$1 million stunt. They literally piled a million bucks in greenbacks in the studio for the 1 pm launch of "KSDO.COM Radio." GM Kevin McCarthy claims it's the first station in the country to fully integrate its on-air programming and identity with the Internet. The station was already heavy on the financial talk but now it's going all the way with Bloomberg updates and more.

Jesse "The Body-now-The Gov" Ventura will keynote the 24th Annual "Conclave" Minneapolis. We like the Conclave's theme: "The Great Consolidation: Short Term Gain or Long Term Disaster?" The event runs July 22-25. Information: (612) 927-4487. Or visit "www.TheConclave.com"

At Arbitron, Scott Musgrave is the new guy to complain to, as he gets promoted to be the head of U.S. radio. Pierre Bouvard is still very much in the picture --Musgrave will report to him -- but it looks to M Street as if Pierre will be spend far more time cultivating Arbitron's international business. Three other personnel appointments at Arbitron demonstrate a new focus on international: Clara Carneiro becomes VP/Latin American Marketing. Patricia Jinch is Client Service Rep for Latin America. And Brian Bedford -- who's been Arbitron's Man In Los Angeles -- is Director of Asian Marketing. Because of consolidation here, Arbitron's major growth opportunities are overseas.

At Minnesota Public Radio, 25-year veteran Dennis Hamilton resigns as Vice President of Broadcast. His goodbye memo says "I want to state clearly that this is my choice -- a personal decision."

VERY sorry to report the death of Greater Media VP/COO (group head) Tom Milewski, who lost his battle to lung cancer at the age of 49. His cancer, disclosed in private to GMs in Detroit, Philadelphia, Boston and New Brunswick, NJ last year, had seemed to be in remission until last December. Press Broadcasting President Bob McAllan says "The American public is worse for the loss, because he believed broadcasting is not just for the few -- and he stuck to his guns." Memorial contributions can be made to the American Cancer Society, 3076 Princeton Pike, Lawrenceville, NJ 08648; or the oncology department at the Medical Center of Princeton, 253 Witherspoon St., Princeton, NJ 08540.

Also sorry to report that 14-year West Palm morning personality Kevin Kitchens has died of a heart attack at age 39. WEAT-FM GM Lee Strasser tells M Street he brought in a counselor to help his people deal with the loss. Kitchens was a market leader for years at WRMF and joined soft AC "Sunny" WEAT-FM in September 1995.

That's the week in radio, as we see it from M Street. Remember that if you need a comprehensive (but portable) guide to all the radio stations in the U.S. and Canada, you can't beat the 8th Edition "M Street Directory." And if you haven't seen our "M Street Daily" fax (now one year old), we'd be happy to put it on your fax machine for a free trial. And M Street can tap into the powerful M Street Database to produce custom telemarketing lists, mailing lists, even mailing labels. And we also do coverage maps and provide other consulting services. For any or all of the above, contact us at (800) 248-4242. See you back next week here on M Street!

www.americanradiohistory.com

The M Street Journal

Radio's Journal of Record NEW YORK • NASHVILLE

February 17, 1999 Vol. 16 No. 7

PLEASING UNCLE SAM. . . You have to please both the Department of Justice and the FCC these days, so Clear Channel and Jacor have struck bargains with five other companies to create a \$340 million package of divestitures and swaps to pave the way for their September 30 merger. Potential swap-partner Chancellor Media was effectively frozen out of the bidding because of its own possible sale and/or merger, so Clear Channel/Jacor wound up doing deals with Cox, Blue Chip, Infinity, ABC and Mega. (Clear as mud so far?) The markets involved are Tampa, Cleveland, Louisville, Dayton, Jacksonville and Syracuse. And there are so many stations involved, we'll just send you inside this week's M Street Journal for the blow-by-blow.

ENDANGERED SPECIES?... Are small owners "an endangered species pursued by large corporate predators"? That was Stevie Wonder's catchy quote, and he gets to be an expert because the superstar entertainer is also a radio station owner (he has Los Angeles-market urban AC KJLH). The FCC listened to three hours of testimony about its ownership rules during a special "en banc" (meeting of the whole) session on February 12. Wonder represented the mom-and-pop set. Folks like Chancellor Media's Jeff Marcus warbled a different tune. He called some of the FCC's restrictions "glacial remnants of a regulatory ice age" and said it's time to loosen the reins of over-regulation.

WASHINGTON THIS WEEK

To blunt the impact (and the headlines) of rapid ownership concentration, you can expect mega-companies like Chancellor to lead a high-profile drive for a minority ownership fund that would promote startup companies. That was an idea floated by Chancellor's Jeff Marcus at the February 12 FCC hearing. Marcus and A.H. Belo counsel Michael McCarthy both suggested an industry-supported fund to aid startups -- and the numbers could be considerable (in the tens of millions). It's just the kind of idea FCC Chairman Bill Kennard should like.

NOT on the agenda at the February 12 en banc hearing was the prohibition on newspaper-broadcasting cross-ownership, and newspaper publishers want the decades-old ban killed. The Newspaper Association of America thinks the FCC has given up on killing the rule, but it continues to lobby for repeal. M Street suspects they're as likely to get help from Congress as the Commission. What WAS under discussion at the en banc hearing was a set of three topics: TV Local Marketing Agreements, TV ownership rules, and (of interest to the radio industry) radio-TV cross-ownership. Chairman Kennard has talked about limiting the number of radio stations a local TV owner could have to perhaps four -- which could even involve divestitures. Would that ever happen politically? Hard to tell.

Some GOP members of Congress are pushing to repeal the cross-ownership ban. H.R. 598, just introduced by House Telecommunications Subcommittee Chair member Mike Oxley, would remove the current prohibition against broadcast/newspaper cross-ownership. Oxley says the 24-year-old rule is "outdated and anti-competitive."

Speaking of ownership and big companies, Clear Channel/Jacor just earned brownie points from FCC Chairman Kennard. Without approving the specifics, he issues an unusual public statement supporting their plan to divest a total of nine stations to three minority-controlled companies (Radio One, Blue Chip and Mega). To M Street it's another clear signal from Washington that the way to keep your deals on the fast track is to include consideration for minorities. M Street does a schematic of the entire Clear Channel/Jacor spinoff plan just a bit later in this week's issue.

Latest on Low Power FM, that pet project of FCC Chairman Bill Kennard: GOP leader Billy Tauzin is openly warning Kennard to put the brakes on. He says Chairman Bill Kennard's crusade is "ill-advised" and has "potentially staggering. ..policy, political, economic and budgetary ramifications." Tauzin demands Kennard make a "full presentation before my subcommittee" -- and chill LPFM for now. Just a thought: M Street wonders if Rep. Tauzin will get public input before HE acts.

If you've got something to say about the FCC's proposed new EEO rules, you've got a little more time to file. The Commission does something rare and grants a second extension of time to file comments -- and this time it was requested by the Minority Media and Telecommunications Council, not the NAB. Comments are now due March 1 and Reply Comments March 31.

WASHINGTON THIS WEEK (cont'd)
Marshalling action against pirates: The FCC, working with the U.S. Marshals
Service and the local U.S. Attorney's office, just seized the equipment of an
unlicensed pirate radio operator in the Milwaukee market. This one was
transmitting on 88.5 MHz, and M Street notes there's now an especially compelling reason for pirates to turn off the juice: they're much less likely to get consideration for a possible new Low Power FM facility if they've actually had action taken against them.

Cumulus hits one of those "red flag" situations in the Toledo market, where it has filed to add rocker WBUZ, Delta, OH $(106.5~\mathrm{MHz})$ to its already formidable cluster that includes oldies WRQN and classic rock WXKR. The so-called red flag specifically invites public comment on the acquisition's effect on local competition and diversity.

Nope, this license is NOT cancelled: The Commission's working to clean up its database and had inadvertently cancelled the license of WUAT, Pikeville, TN (1110 KHz). It has now renewed the license and corrected the public notice dated October 1, 1998 (Report #24338).

A familiar name -- Gina Keeney -- is leaving the FCC to go work for Dell Computer. She'd been Chief of three different bureaus during her four-and-a-half year tenure at the Commission. Her most recent post was Chief of the International Bureau. Keeney will run the Washington, D.C. office of Dell.

Another woman is resigning from another D.C. outfit -- 18-year NAB staffer Rory Benson is leaving to relocate to California. NAB President Eddie Fritts says she's been "my right hand" for most of those years. M Street remembers Rory as an always-calm presence during the occasional chaos of various NAB conventions. wish her well in her new life.

CANADA THIS WEEK

Mergers are happening in Canada, too: The Newcap group is buying eight more stations, and most of them are competitors in current Newfoundland markets. Newcap is acquiring the VOCM Radio Group, also known as Colonial Broadcasting System. Both groups own stations in St. Johns, where Newcap has country CKIX and oldies CJYQ, and Colonial owns CHR "Magic 97" VOCM-FM and AC/talk VOCM. The other Colonial stations are AC/talk CKVO, Clarenville; country/AC CHVO, Carbonear; country/talk/AC CHCM, Marystown; AC CKGA, Gander; country/talk/AC CKCM, Grand Falls; and CKCM repeater CKIM, Baie Verte. They're all in They're all in Newfoundland. Buyer Newcap has radio interests stretching all the way west to Alberta. Extra-credit for radio buffs: VOCM AM/FM are among the very few stations in Canada whose calls DON'T begin with a "C." VOCM got its calls in 1936, before Newfoundland joined the Canadian federation.

ELSEWHERE

If you start with a \$4.4 billion merger these days -- you're almost certain to wind up with some government-required divestitures because the combined entity will exceed the local limit. So take a deep breath and get ready to take a \$340 million tour around the U.S., courtesy of Clear Channel, Jacor and M Street (not to mention the five companies they're selling to). Here's the picture, market by market --

In Tampa: Buyers are Cox Radio, Infinity, ABC and Mega. Cox Radio gets adult alternative WHPT, Sarasota (102.5 MHZ), rhythmic oldies WFJO, Saint Petersburg (101.5 MHz), and a third FM. That FM is actually the New Port Richey-licensed 105.5 MHz facility that's now home to classic rock WTBT. Cox is buying the 105.5 frequency PLUS the intellectual property of Jacor's EZ listening WDUV.
Radio's current cluster in Tampa: 60s oldies WSUN-FM, soft AC "Warm" WWRM, oldies WSUN [AM], and classic hits WCOF. Cox will actually have SIX FMs in the oldles WSUN [AM], and classic hits WCOF. Cox will actually have SIX FMs in the greater Tampa Bay area because of the non-overlap of WHPT and WSUN-FM. Infinity gets two FMs out of this deal: country WRBQ-FM, Tampa (104.7 MHz) and smooth jazz WSJT, Lakeland (94.1 MHz). Infinity already has country WQYK, oldies WYUU, urban "Wild" WLLD and "1010 Talks" WQYK. ABC acquires WRBQ, St. Petersburg (1380 KHz), almost certainly for its "Radio Disney" format. And Hispanic specialist Mega acquires sports WZTM, Largo (820 KHz). As for the current WDUV facility of 103.5 MHz, licensed to Bradenton: It's a good bet Jacor will flip the "Thunder" classic rock WTBT down there from 105.5 MHz.

ELSEWHERE (cont'd)

In Cleveland, here's the Clear Channel/Jacor selloff picture: Radio One gets modern rock WENZ (107.9 MHz) and news/talk WERE (1300 KHz). Infinity gets classic rocker (and Howard Stern affiliate) WNCX (98.5 MHz). That places Radio One and Infinity into Cleveland for the first time. Clear Channel/Jacor is quite content with the current Jacor cluster: country WGAR-FM; oldies WMJI; rock WMMS; news/talk/sports WTAM; and AC "Mix" WMVX. It's also got an agreement to purchase WZLE, Lorain, OH (104.9 MHz) from Vernon Baldwin.

In Louisville, Blue Chip and Cox are the winners. Cincinnati-based minority owner Blue Chip gets CHR/R&B WDJX (99.7 MHz), modern rock WLRS (102.3 MHz) and religious WFIA (900 KHz). Cox gets soft AC WVEZ-FM and classic hits WSFR, Corydon, IN (107.7 MHz). Cox Radio also gets an option to purchase a station Jacor has in an LMA: "Mix" WMHX (103.9 MHz). But that's not quite all: Cox announces it will sell two FMs it currently owns there: classic hits WRVI and R&B oldies WLSY. Cox's retained River City stations include oldies WRKA, classic hits WSFR and soft AC WVEZ-FM.

In Dayton, Blue Chip grabs all three stations being divested by Clear Channel/Jacor. Those are CHR WGTZ, Eaton, OH (92.9 MHz), news/talk WING (1410 KHz), and classic hits WING-FM, Springfield, CH (102.9 MHz).

In Jacksonville, where both Clear Channel and Jacor have holdings, they're not immediately selling anything, but will place classic rock WBGB, Ponte Vedra Beach (106.5 MHz) and news WZNZ (1460 KHz) into a trust.

And the final market of the Clear Channel/Jacor deal is Syracuse, where Cox is swapping away all five of its stations to Clear Channel/Jacor: AC WYYY (94.5 MHz), news/talk WSYR (570 KHz), CHR WWHT (107.9 MHz), country WBBS, Fulton, NY (104.7 MHz) and sports WHEN (620 KHz). M Street notes that Jacor has no stations in Syracuse -- but it's a major player in Rochester, the next market over to the west. The regional strategy should work well.

Final observation on the \$340 million worth of Clear Channel/Jacor deals: A total of nine stations are being sold to three minority companies (Blue Chip, Radio One and Mega). FCC Chairman Bill Kennard has been taking a personal interest in ownership diversity.

Another mom and pop sells out, as Capstar scores two more FMs in Harrisburg and central Pennsylvania: rock WTPA, Mechanicsburg, PA (93.5 MHz) and "Nice" EZ listening WNCE-FM, Palmyra, PA (92.1 MHz). For \$15,000,000, Capstar persuades local owner Michael Brandon to sell both of his Quaker State Broadcasting properties. This is one area where Capstar is actually playing catch-up with Clear Channel (which is acquiring all of Albert Dame's stations, including WHP), and Citadel (with a cluster that includes country WRKZ). M Street notes the original "WNCE" was at 101.3 MHz, now home to rival WROZ; this "Nice" is at 92.1. Capstar's other properties in the area are CHR WNNK-FM, Harrisburg and urban AC "Touch" WTCY, Harrisburg, (1400 KHz). Broker: Randall Jeffery, Jr. for buyer Capstar.

East of the Kansas City market, AC/talk KOKO, Warrensburg, MO (1450 KHz) gets sold. Johnson County Broadcasters deals the standalone to Hannibal, MO-based group owner Bick Broadcasting for \$310,000. Broker was Bill Lytle of Media Services Group.

Out on Long Island, Gary Starr's Suffolk Radio Partners is selling its WLVG, Center Moriches, NY (96.1 MHz) to Carl Liu's Beacon Media. Deal starts with an LMA, and the ultimate price depends on the timing of the actual acquisition. The initial LMA period is for one year, starting February 15, and will run for no more than three years. If Liu closes at the end of Year 1, the price is \$3 million. At the end of Year 2, \$3.25 million. And at the end of Year 3, \$3.5 million. WLVG is a Class A facility that's currently doing a soft AC format as "Love." Broker was William Schutz.

The Catholic Radio Network is about to hit Washington, D.C. -- M Street research discovers that CRN is apparently cutting a deal with Douglas Broadcasting to air CRN talk programming on Douglas' two AMs there. That would be WBZS, Alexandria, VA (730 KHz), which is now doing financial talk. And WZHF, Arlington, VA (1390 KHz), now doing talk.

ELSEWHERE (cont'd)
More consolidation in the Christian broadcasting world, as Salem, through its new Nashville-based CCM Communications unit, buys Brad Burkhart's weekly Christian Research Report. Atlanta-based Burkhart was one of the first publishers to pay attention to the growing Christian music scene on a weekly basis, using chart input from stations. He founded the weekly "Christian Research Report" in 1987 Tamra Brown. Under the new ownership, Burkhart becomes "Editorial with Consultant" and Brown will leave for family reasons. CCM has big things in mind for the quarterly "CRR New Music Guide" -- It will offer the title on the retail market in Christian stores. CCM will continue to publish its own "CCM Update", but will now use chart information from CRR.

Host Communications, the college sports marketing giant that creates radio networks and even the NCAA/CBS Radio Network, has been sold to investor Bull Run. Atlanta-based Bull Run is actually buying the piece of Host that it didn't already own, along with the related Universal Sports America, for \$93 million in cash and stock. Bull Run had first planned to roll its interest in Host and Universal into a new Tom Hicks company that would have included Hicks' various sports interests (like the Texas Rangers). That didn't happen. By coincidence, the Hicks Muse firm (not Hicks personally) just announced a new partnership to invest in sports-related businesses -- a first for Hicks Muse. (M Street notes a couple of weeks ago, Bull Run bought 73% of the Sarkes Tarzian radio/TV group.)

What's the latest on Chancellor and its supposed selloff/merger/you-name-it? Nothing on the surface to report, other than the news that it has just hired more Wall Street advisers. Tom Hicks has engaged Morgan Stanley Dean Witter as a lead adviser along with the previously-announced BT Alex. Brown. He's also bringing in Goldman Sachs, Chase Securities, Greenhill & Co. and -- surprise -- Hicks, Muse, So is a deal near, maybe with Clear Channel? In a recent conference call with analysts (which M Street audited), executive Jeff Marcus wouldn't say. Other Chancellor news: It does plan to close on Capstar in June. Marcus also says he's squeezed significant expenses out of the Chancellor-owned Katz rep firm (costs were down 9% for the fourth quarter). While Chancellor radio head Jimmy de Castro was touting the cost-saving wonders of Star System centralized programming and Galaxy order-entry/yield management. As for the FCC's Low Power FM proposal: Marcus says "We will fight this very, very hard."

New technology makes running today's big new mega-groups at least possible (and maybe economical) -- Cumulus just signed a group deal with DG Systems to distribute spots to its 212 stations. Cumulus is centralizing much of its commercial production load in Chattanooga. Now those ads, promos and other audio elements will be distributed from the Chattanooga hub out to stations using DG Systems -- similar to the group deal DGS cut with Larry Wilson's Citadel last year. Cumulus has its own corporate intranet for exchanging business and management information. This deal is on top of that infrastructure, to handle the much heavier bandwidth jobs of distributing audio.

Goodbye to Chicago's fabled City News Bureau -- but hello to a new non-profit regional news agency that does pretty much the same thing: supply breaking news to the Windy City's media outlets. This one will be sponsored by the Chicago Tribune and nine radio and TV stations. The electronic media took some of the blame for the City News Bureau shutdown announced last year, because they reportedly weren't willing to accept a fee increase.

Music licensing powerhouse BMI is experimenting with "watermarking" its songs. That's important because electronic monitoring promises to let BMI track usage of its licensed material on radio, TV, cable and online. Several watermarking firms are participating in the trial.

Funding for public radio is about to hit the headlines, as #1) Public stations in Minnesota mobilize to fight Governor Jesse Ventura's pledge to eliminate state funding for public radio and TV. And #2, the Corporation for Public Radio votes to direct more of its budgetary support to stations in rural areas. Those will be two key issues to watch this year in public radio.

How do you make money with those Scarborough reports on qualitative research? Scarborough is hosting its first-ever Radio Marketing Conference to work on the educational process. The meeting is May 18-19 in Marina del Rey, CA, with an opening reception May 17. Info at "www.Scarborough.com"

ELSEWHERE (cont'd)

Pittsburgh is arguably the birthplace of commercial radio in the U.S., and now historic preservationists are talking about buying the house that once belonged to engineering pioneer Frank Conrad. He was a Westinghouse engineer who began regularly-scheduled radio broadcasts from his garage in 1919. That amateur station was known as "8XK", and in 1920 it was moved to a rooftop location on a building at Westinghouse Electric's East Pittsburgh facility. That station became -- you guessed it -- KDKA. For the past 53 years the Conrad house has been owned by a local Elks lodge, and now they're ready to put it up for sale. Both Pittsburgh papers are reporting efforts by the Pittsburgh History and Landmarks Foundation to loan money to the National Museum of Broadcasting to buy the house. More as we hear it -- and that's it for today's history lesson.

M STREET BAZAAR. . . PEOPLE, PRODUCTS, AND PROGRAMMING

Everybody talks about the weather -- and now in Spanish -- but they still can't do anything about it. The Weather Channel just began Spanish-language service to stations in Puerto Rico and says it's negotiating with Hispanic stations on the mainland. Michael Castello is Director of Hispanic Radio services for MediaAmerica, which reps The Weather Channel.

Whether you know Isaac Hayes from "Shaft" or "South Park", you'll recognize his amazing voice when he emcees the June 10 Radio-Mercury Awards at New York City's Museum of TV and Radio. Hayes is the featured morning personality on urban AC WRKS, New York.

How do you like this advertising campaign theme: "Wine. What are you saving it for?" The Wine Marketing Council is going to include radio in a new two-market test to see if it can persuade more Americans to have a glass of wine with dinner -- just an ordinary dinner. Target is younger adults, who tend to hoist a beer before they think about wine. Test markets are Albany, NY and Austin, TX. The agency is believed to be Bozell Worldwide.

Shadow Steele is the latest voice tracker for hire. Veteran major-market personality offers "daily, custom voice tracks via DGS/DCI, overnight DAT and ISDN service." Steele's tracks could include local current events, station promos, etc. Adam Goodman of Goods Entertainment (212-873-1100) says he's finalizing deals with other nationally-known air talent for similar availability.

With consolidation removing many properties from the "deal flow", few people are entering the field of media brokerage. One of them is veteran GM and station owner Eddie Esserman, who joins Media Services Group. He managed for Shamrock Broadcasting in San Francisco and Atlanta, then owned stations in Macon (WAYS and WMAC, sold to U.S. Broadcasting) and Savannah (WEAS-FM and WJLG, now sold to Cumulus). Esserman: (912) 634-6575.

Top-level promotions at ABC, as John Hare takes over for Bob Callahan as President of ABC Radio, with responsibility for both the ABC-owned stations and ABC Radio Networks. The respected executive now supervises half of the ABC owned-and-operated stations as one of two Group Presidents. He's got New York, Los Angeles, Dallas, Detroit and Washington, D.C. Hare will add oversight of the other station group -- San Francisco, Chicago, Minneapolis, Atlanta, Seattle, Oakland, Cleveland, St. Louis, Phoenix and Denver. Plus -- he's the new boss of ABC Radio Networks President Lyn Andrews. That empire includes the familiar news networks and Paul Harvey plus ESPN Radio, Tom Joyner, Doug Banks, ABC's 24-hour formats and American Country Countdown with Bob Kingsley. Hare's promotion comes after ABC ups Bob Callahan to President of Broadcasting, overseeing radio and TV.

Also moving up the corporate ladder at ABC -- Bart Catalane, who gets a boost from Executive VP/Chief Financial Officer at ABC Radio to CFO at ABC, Inc., which adds the TV division to his bookkeeping chores. Catalane joined predecessor CapCities in 1984 as a financial analyst at the corporate office.

Quincy-based giant Broadcast Electronics gets a new CEO: He's John Pedlow, who joins from Alpha Technologies and takes the reins of Quincy, IL-based Broadcast Electronics from Interim President Doug Davis. M Street notes that aside from selling a whole boatload of radio station equipment, BE is also the parent of Seattle-based Broadcast Programming.

www.americanradiohistory.com

The M Street Journal

Radio's Journal of Record NEW YORK - NASHVILLE

February 24, 1999 Vol. 16 No. 8

WHAT'S OLD IS NEW AGAIN. . . Can you sing along to "See The USA In Your Chevrolet"? GM is reviving the peppy ad jingle heard on millions of car radios in the 1950s, hoping to turn around sagging car sales. Another "old thing" that's coming back (to the New York market) is adult standards music. The Big Apple lost adult standards WQEW, New York (1560 KHz) two days after Christmas (though some suburban stations do feature the format). Now the hero is Arthur Liu, who's giving up guaranteed checks from his brokered ethnic programming and committing to phase in standards over the next year on his WNJR, Newark, NJ (1430 KHz). We have to think Liu is taking a gamble to Make Something Old New Again. The point here is that adult standards isn't just nostalgia -- it's also big business, when it's properly understood and marketed. A new Interep study reports that 42% of standards listeners are under 50 years of age, and the format has the longest weekly Time Spent Listening of any English language format. The M Street Database finds 561 stations doing standards. The complaint we always hear is "we can't sell it." Maybe it's time to work on it a little harder.

EMBRACE DIVERSITY. . . Before the government MAKES you. Two of the USA's most prominent broadcasters (Clear Channel's Lowry Mays and CBS/Infinity's Mel Karmazin) are attempting to seize the initiative on minority ownership and EEO -- and keep Uncle Sam out of it. On letterhead of both Clear Channel and CBS, the two mega-group heads mailed an invitation to other group heads to join them at a high-level summit about ways broadcasters can increase minority ownership and employment -- without the FCC meddling in the process. Private sector champion NAB quickly chimed in with a pledge of \$10 million toward a new minority ownership fund. This wouldn't be giveaway money, but a revolving-loan fund available to minority and (perhaps) first-time owners. Minority ownership, minority hiring and diversity are all presumably on the agenda of this meeting fronted by Mays and Karmazin. That news comes as the push continues this week to get a larger revenue share for African-American and Hispanic stations. More on that, and the rest of the week's radio news, inside this week's M Street Journal.

WASHINGTON THIS WEEK

Yes, that was FCC Chairman Kennard on the radio -- legal, licensed, Low Power FM, and he was there to evangelize about the potential of a new Low Power FM service. His appearance on 10-watt WMUC-FM, College Park, MD (88.1 MHz) shows he's REALLY committed to the idea. WMUC is one of the low power stations grandfathered in when the FCC quit issuing those licenses in the late 1970s. If you want to do an aircheck critique of Chairman Kennard, check out his talkshow performance at WMUC's website: http://www.wmuc.umd.edu. There continues to be lots of general-media chatter about LPFM, including a January 22 New York Times feature on a Navajo reservation's hopes for a station.

More on what's happening in the advertising-fairness arena: At a high-profile American Advertising Federation meeting Monday (2/22), FCC Chairman Bill Kennard laid out three "Principles of Fairness" in minority advertising: #1, Use accurate information about consumer purchasing practices. #2, Promote fair competition. #3, Expand opportunity for all Americans. Kennard is 100% serious about getting advertisers and agencies to pay proper attention to African-American and Hispanic media outlets. There was also a video presentation from Al Gore and a heavy-duty front table of FTC Commissioner Mozelle Thompson, a couple of congressional reps and the Rev. Al Sharpton. You can view all this as the outgrowth of last Summer's flap over the leaked rep-firm memo that appeared to recommend against buying minority stations. There's plenty of responsibility to go around: In an RAB session in Atlanta, M Street heard WSKQ-FM/WPAT-FM, New York GM Carey Davis admit that minority broadcasters themselves need to do a better job of selling their audiences, despite the "no urban" and "no Hispanic" dictates, and the so-called "minority discount" some stations accept because of their audience profile.

More pirates shut down, as the Commission just seized the equipment of an unlicensed operator in Howell, MI, a small town north of Ann Arbor and Ypsilanti, and closes down another unlicensed station in the New York City borough of the Bronx.

WASHINGTON THIS WEEK (cont'd)

Jacor gets an okay for its San Diego settlement agreement with Jesse Jackson's Rainbow-PUSH Coalition. In a complicated series of rulings, the Commission Rainbow-PUSH Coalition. In a complicated series of rulings, the Commission dismissed the Coalition's Petition to Deny Renewal of KKBH (now KLQV) and KKLQ (now KLNV), granted the Joint Request for approval of a settlement agreement between Rainbow and HBC San Diego License Corp. (that's Heftel, which bought those stations), and granted license renewal for all of Jacor's stations there, including KSDO, KJQY, KOGO, KHTS, KGB-FM and KIOZ.

The FCC goes a little bilingual. They're starting to issue some press releases in Spanish, as in the recent case of Spanish-language pirates in Cleveland ("estaciones de radio ilegale en Cleveland"). The FCC tells M Street it plans to do only selected releases in Spanish, as appropriate.

More cleaning up in the FCC files: The Commission rescinded its January 22 license cancelation for KALU, Langston, OK (89.3 MHz), licensed to Langston University. It does the same thing in the case of a new station's license to cover: Barracuda Broadcasting's KKAN-FM, Phillipsburg, KS (95.3 MHz) is granted a license to cover and has its license cancelation rescinded. Both actions came on the FCC's own motion.

Elizabeth Beaty, a staff attorney in the Office of Legislative and Intergovernmental Affairs, moves up to become Deputy Director. Her previous work at the Commission included a post in the Mass Media Bureau. Beaty will now work with the Director on the FCC's legislative program.

In the world of the FCC, a confidential assistant is an essential part of a Commissioner's support team. Commissioner Gloria Tristani has just filled the vacancy left by Helen Hillegass (now in the FCC's Office of Communications Business Opportunities). Her new Confidential Assistant is Yvonne Hughes, who leaves the corporate world after four years as a legal secretary at O'Melveny & Myers LLP.

The big get bigger in Canada, too: Shaw says it becomes Canada's top revenue group as it buys three more stations in Ontario. That's according to radio head Terry Swain, who's counting the three in London, ON plus the 12 stations Shaw is buying as part of the breakup of the WIC group. The London-market properties are AC/talk CFPL (980 KHz), rock CFPL-FM (95.9 MHz), and classic hits "Hawk" CFHK, CFTL THE CFTL (102.1 MT). Saint Thomas (103.1 MHz). Blackburn Radio currently owns CFPL and CFPL-FM and has a deal to buy CFHK. M Street notes that CFPL went on the air 76 years ago. Looks like family-owned media company Blackburn is looking to exit radio completely, over time.

Big get bigger, part II: Okanagan Skeena is buying two stations in Alberta from Yellowhead Broadcasting. Those are AC/country/oldies CJYR, Edson (970 KHz) and CIYR, Hinton (1230 KHz), which rebroadcasts the Edson station. The purchase also includes three repeaters, in Jasper, Whitecourt and Grande Cache. Okanagan Skeena calls itself "the largest regional communications company in western Canada", with 33 radio stations, two TV properties and 12 cable stations.

Now the CRTC turns to new rules for the "campus radio" service. It's issued a call for comments, leading to a new formal policy to be enunciated in June. Campus radio licenses are for non-for-profit organizations associated with "postsecondary education institutions." The government expects them to provide "an alternative, in both style and substance", to the programming on other stations. The CRTC says there are now 43 campus radio stations. Comments on the Draft Policy are due by April 12. Check the CRTC website (http://www.crtc.gc.ca) for details about Public Notice CRTC 1999-30. M Street notes this is part of an ongoing reevaluation of the CRTC's rules.

Powering up for a court appearance: M Street told you about a surprise format change in Toronto, as country CISS became a CHR called "Power 92." Now comes word that another "Power" station, CKDX, Newmarket, ON, also known as Power 88.5, will take legal action to protect its name.

ELSEWHERE

Big deal in the Windy City between two groups who are both station owners and network/syndicators: For \$16,750,000, Miami-based Spanish talk specialist Radio Unica buys WIDB (950 KHz) from One-On-One Sports. Chicago is an important Hispanic market, and Radio Unica currently clears its lineup on a daytimer: WYPA

ELSEWHERE (cont'd)

(820 KHz), as part of an LMA-with-option-to-buy that ends on February 22. Radio Unica's programming will remain on air until June 8th. Adding WIDB takes care of that problem, because it's a full-time facility (1,000 watts day, 5,000 watts directional nights). Radio Unica especially wanted night coverage of its Copa America 1999 sports coverage. Radio Unica's Nickie Jurado tells M Street the plan is to LMA WIDB starting around May 15 and simulcast the network's programming on both WYPA and WIDB, to transition listeners over to 950 KHz. From the One-On-One perspective, Chris Brennan made money and still has at least partial coverage in Chicago, through his new leased-time deal with north-suburban WJKL, Elgin, IL (94.3 MHz). That arrangement was negotiated by Chicago's Air Time Media, by the way. And Brennan notes he's nearly doubled his money on WIDB in 14 months: He bought it for \$9,500,000 and now dishes it off to Joaquin Blaya's Radio Unica for \$16,750,000.

In upstate Pennsylvania, group owner Forever buys Williamsport-market WZRZ, Mill Hall, PA (98.7 MHz). Forever is already doing business in Altoona, Johnstown and State College. With the deal, we get an immediate format change at WZRZ, from classic rock to oldies. One other twist: WZRZ is immediately LMA'd back to its former sisters (hot AC WVRT and oldies WWPA). Forever also owns stations in Utica/Rome, Watertown, NY and Lima, OH.

In Louisville, Gore-Overgaard sells WNAI, Newburg, KY (680 KHz) to local TV owner Word Broadcasting. That gives Word an AM to go with the local WB affiliate, WBNA-TV (Channel 21). Price is \$820,000 cash, in a deal brokered by Force Communications' John L. Pierce.

Up in northeastern Indiana (between Ft. Wayne and South Bend), Brian Walsh sells his WLNB, Ligonier, IN (102.7 MHz) to James Bustraan, Sr.'s GBC Media, LLC. M Street has the station doing country (as "Cow Country") with a block of southern gospel at night. Price for WLNB is \$195,000 and Ray Rosenblum was the broker. Rosenblum notes that buyer GBC Media has filed to acquire two nearby stations in a separate transaction: soft AC WRSW, Warsaw, IN (1480 KHz) and AC WRSW-FM, Warsaw (107.3 MHz).

Radio and TV owner Saga just bought its third TV station: WXVT, Greenville, MS. That purchase also gets Ed Christian his second CBS affiliate (Saga owns KOAM-TV in the Joplin, MO market). Like Joplin, Greenville, MS is a market where Saga will have TV, but no radio. However, there's little TV competition there, so Channel 15 could be a good revenue producer.

Family feud at the Sarkes Tarzian radio/TV group. One member of the family -- son Tom Tarzian -- alleges the estate of his late mother has a binding agreement to sell her 301,119 shares to the company. The estate didn't do that. What it did was sell the shares to Atlanta-based Bull Run Communications. Now Sarkes Tarzian President Tom Tarzian says he's asking a federal district court in Indianapolis to "validate" the January 25 deal he says he made with the estate. He also charges that Bull Run has misstated the size of the Mary Tarzian holdings. According to him that stock is 33.5% of the outstanding shares, not 73%. (It is entitled to 73% of the dividends, if and when those are paid.) Tom Tarzian says he's the owner of 568,918 shares of stock, or 63.3%. Bull Run did make a point of noting that it was not obtaining voting control. Bull Run's Bob Prather gave M Street a "no comment" on the story.

Sky wars: There are two companies that hold national licenses to distribute satellite radio, and one of them (CD Radio) is now suing the other (XM Satellite Radio) for patent infringement. CD Radio alleges that XM is infringing on three of its eight patents, and it's asking a New York federal court to prohibit XM Satellite Radio from constructing its system. Both operators propose fairly similar offerings: 100 channels of satellite-delivered digital audio, picked up by a small receiver and available on a monthly subscription basis. Rebuttal: XM wonders if CD Radio may be trying to slow it down with a patent-infringement lawsuit. It says that CD Radio's suit has no merit, that it's not infringing on its rival's patents, and with recent deals announced with Sharp, Alpine and Pioneer, it's got "tremendous momentum" toward building its system.

And out of court, XM hires LCC International to work on the terrestrial repeaters in 30 cities. Yes, XM IS a satellite-based system, but it will use ground-based repeaters to fill in areas where the satellite signal may have difficulty. Engineering firm LCC International will do the RF design, site acquisition, zoning and construction analysis and "determine deployment and leasing requirements" for the XM terrestrial network. It's also likely that LCC will build the telecommunications towers for XM.

ELSEWHERE (cont'd)

They're handing out money at CPB, and for some interesting projects: the new "Classical Public Radio Network", a partnership between Colorado Public Radio and USC Radio in Los Angeles (it got the largest single grant, for \$850,000 over three years). And if you like public radio's "Fresh Air", how about "Thin Air"? It gets a \$70,000 grant to develop a regional half-hour newsmagazine for stations in the Rocky Mountains, High Plains and Four Corners regions (that's given to KOTO, Telluride, CO). Four new shows got grants, including a word game called "Says You" (from WGBH, Boston) and "Reinventing America" (to Alix Spiegel in Chicago). The grants total \$4.3 million, and they're from the Radio Program Fund, which got 110 proposals for a combined \$19.7 million. M Street notes that in television, \$4.3 million wouldn't even get you a couple of minutes with Jerry Springer -- Radio's a pretty efficient medium to create in.

Radio, cable and newspaper owner Greater Media is selling its cable systems --worth \$860 million -- to focus on radio and newspaper. Cable has been re-shaped by consolidation even more than radio, and Greater Media owner Peter Bordes thinks it's time for the smaller players to sell out. Greater Media exits by selling its 79,000-subscriber Philadelphia system to Comcast for \$264 million, and its 173,000-subscriber Massachusetts operation to Paul Allen's Charter Communications for \$600 million. Bordes bought out original partner Joe Rosenmiller some years back and handled radio consolidation by concentrating in three big markets: Philadelphia, Boston and Detroit. Greater Media retains its homebase radio market of New Brunswick, NJ, plus a chain of papers in New Jersey.

Fewer stations to buy, but more equity capital out there to buy them: Veronis Suhler, which backs the Lee Simonson-run Broadcasting Partners entity, has just opened its \$1 billion Fund III for business. And medium-market radio is very much on the radar screen, along with new-media and information businesses. M Street notes that the Fund II-backed Broadcasting Partners is the parent of five radio groups: Mercury Communications, Spring Broadcasting, Pilot Communications, Gleiser Communications and Sound Broadcasting.

Sometimes you DON'T want the publicity: WPLJ, New York was an innocent bystander in a recent "60 Minutes" piece on a \$350 million bank scam. A laid-off Philip Morris exec and a pal passed themselves off as WPLJ staffers to pull off their get-rich-quick scheme -- and they wound up bilking some of the country's largest banks in a scheme exposed on "60 Minutes." To get their first bank loan for a supposed super-secret Philip Morris project, the two called a Philip Morris executive and told her she'd won a small prize from ABC-owned WPLJ. They just needed her to fax them some info for a supposed prize release. She did and they used her signature to fabricate some loan documentation. They went on to kite more loans from other banks after scoring the first deal. Moral of the story: If you're a well-known station, people will be tempted to take advantage of your name.

Maybe it was the Victoria's Secret webcast that did it: "Broadcast.com" gets a new competitor, as CMGI -- which owns Internet broadcaster Magnitude Networks -- commits up to \$100 million and hires former NBC Television Network President Neil Braun to crank up a new online "aggregator" of audio and video. No name yet for the venture. Many stations already use Magnitude Networks to host their webpages.

We should mention that Viacom and its MTV subsidiary are finally jumping whole-hog into online radio. Among other things, Viacom is buying privately-held Imagine Radio. It's just a bit more competition for listeners' ears...

M STREET BAZAAR. . . PEOPLE, PRODUCTS, AND PROGRAMMING

Followup on our page 1 story about Arthur Liu picking up standards on his WNJR, Newark, NJ: Liu will be phasing in standards over the next year, beginning with a 6 am to 7 pm launch in late March. The switchover will occur roughly three months after the New York Times abandoned standards on WQEW and leased the station out to ABC's Radio Disney format. So Arthur Liu, who has a strong stable of brokered AMs in the NY market, becomes the latest savior of adult standards there -- just as the Times was six years ago after the demise of WNEW. One problem for Liu is the facility: WNJR (5,000 watts at 1430 KHz, directional nighttime) has less of a signal over the metro than WQEW (50,000 watts at 1560 KHz, with different directional patterns day and night). New GM George Kalman says the plan is to eventually move the WNJR transmitter up to the co-owned WPAT site.

M STREET BAZAAR (cont'd)

Another NFL team moves to an FM music station, this time in Pittsburgh. Chancellor rocker WDVE, Pittsburgh out-bids Infinity's KDKA to sign the Steelers to a three-year deal. Infinity news/talker KDKA had a big disadvantage in the bidding because it also carries Pirates baseball. WDVE will keep the current broadcast team of Myron Cope, Bill Hillgrove and Tunch Ilkin. For the past 29 years the NFL Steelers aired on WEAE (the former WTAE) -- but Jacor's selling it to ABC and the 1250 KHz facility will drop sports. Will Chancellor also clear the Steelers on WWSW [AM], and transform that into a sports station? That's what some locals are hoping.

Web holdout Rush Limbaugh finally puts his show on the web. He made that pronouncement in person at the R&R talk convention in Washington, D.C., and it's dramatic because Limbaugh's been such a conspicuous holdout in the audio streaming business. Premiere stablemate Dr. Laura Schlessinger is right there on "Broadcast.com" every day. Limbaugh's presence on "Broadcast.com" could actually boost its stock price. Just a prediction -- so many fans will be seeking him out on the web, it could increase the perceived value of the stock. And who's one of the investors in Broadcast.com? Premiere parent Jacor.

Gary Burbank's weekend "Rear View Mirror" show gets picked up by Jacor-owned Premiere Radio Networks. It had been handled directly by Jacor, which owns Burbank's homebase of WLW, Cincinnati (700 KHz). Rear View Mirror is a three-hour best-of show that airs Saturdays.

Radio Disney moves part of its day to Disneyland, as the 1 to 6 pm Pacific Time "Just Plain Mark and Zippy" show originates from new studio space in Tomorrowland. Not surprising that Disney would want to further integrate the marketing of its syndicated Radio Disney format and a theme park. More of that coming?

There's a new training/critiquing service for DJs who want to polish their act: "RadioTalentCoach.com" is a project of consultants Randy Lane, Adam Goodman, Shadow Steele and Bob Davis. They'll do career counseling, job search help and critiquing. Phone (212) 873-1100 or go to "RadioTalentCoach.com"

Hard to over-estimate the impact of American musical genius Duke Ellington, and CBS Radio News is offering short-form reports called "Duke Ellington: Beyond Category", airing for the weeks around the 100th anniversary of his birth -- April 29. Among the audio clips: an early 1970s interview Mike Wallace did with Ellington.

Westwood's "MTV Concert Series" continues with a one-hour special featuring Alanis Morissette, airing the weekend of March 27-28. The series is a co-production with the MTV Radio Network.

New consultant at the Exton, PA-based DeMers consultancy: former Emmis PD Peter Smith, who's programmed classic hits WNAP-FM, Indianapolis for the past three years, and programmed various rock and AC formats in Louisville and Columbia, SC before that.

"Renowned Chief Creative Officer" Marty Cooke is the Chief Judge of the 1999 Radio-Mercury Awards for best commercials. Marty's at the ad firm of Merkley Newman Harty and he's been involved with campaigns for Fruitopia, Reebok and American Express. Late entry deadline for the awards is March 5. Details about the \$210,000 in cash prizes from (212) 681-7222.

We're sorry we mangled his name (and we know better): The long-time Los Angeles-based Arbitron exec we mentioned in the Journal two weeks ago is "Brad Bedford", not "Brian Bedford." He's the new Director of Asian Marketing for Arbitron -- but we have no idea how to print his name in Japanese, Chinese or Korean.

Remember CBS, ABC and CNN news personality Kathleen Sullivan? She's the newest morning anchor at all-news KFWB, Los Angeles (980 KHz). M Street notes that another TV personality, former "American Journal" host Nancy Glass, is now the morning star at Chancellor hot AC WYXR, Philadelphia (104.5 MHz).

That's it for the news this week at M Street. Please phone your comments and suggestions to us at (615) 251-1525. And if you need database work like custom telemarketing lists, mailing lists, etc., do the same thing -- Just pick up the phone.
