NEWS DIRECTOR Multivan Broadcast

Multivan is a locally-owned television station launching in Spring 2003. This station will reflect Vancouver's diverse ethnic community and broadcast newscasts in four different languages.

Reporting to the President and CEO, you will initially be responsible for developing multi-lingual news programs and building a team of newsroom staff and on-air talent. You have years of experience in the news business and the ability to hire and manage staff in a culturally-diverse work environment.

entire portfolio and looking for ways to monetize." A **Scotia Capital** report suggests CanWest Global needs to execute a "full retreat to Canada" and revert to a slimmed down Canadian media platform... At that same Quebec City conference, **Shaw Communications** CEO **Jim Shaw** said he expects to announce the sale of Shaw's Florida cable assets next month. He says sale proceeds should be in the range of between US\$2,900 and US\$3,300 per sub... The **Radio-Television News Directors of Canada's** professional development day in Toronto Oct. 19 is shaping up as a winner. More than 200 "newsies" are expected to attend. Registration is more than reasonable, pegged at \$35 for newsroom staff (if the ND is a RTNDA member); \$70 for non-members; and \$45 for students. The seminar is free for RTNDA members. For information, check with **Terry Scott** at **Broadcast News** in Toronto... The gap in the rate of Internet use between lower-income and upper-income Canadian families appears to be shrinking slowly. **Statistics Canada** says "most of the improvement is occurring in middle-income and upper-middle income groups. The gap in Internet use persists between people with the lowest incomes and those with the highest." StatsCan made the statement Tuesday in its household Internet survey for 2001. More than 5.8 million households, or 49% of all 12 million households, had at least one member that regularly used the Internet from home in 2001, a 23% increase from 2000. That number, however, was down from a 42% gain from 1999 to 2000... In November of next year, **CBC's** Edmonton facilities will move to the Edmonton City Centre into what is described as "a new, modern, digital broadcast facility." In its news release, CBC says the move to new quarters "is driven by a number of strategic factors including **CBC/Radio-Canada's** emphasis on content management and content development, the move from analogue to digital technology, the improved management of real estate assets and the need to

increase the national public broadcaster's visibility and interaction with the community"... The **Canadian Women in Communications'** has issued its annual Call for Nominations. For outstanding achievement, leadership, and contribution in the communications industry, four awards are presented: *Woman of the Year*, *Mentor of the Year*, *Trailblazer of the Year* and *Employer of the Year*. The President of the **British Columbia Association of Broadcasters** – and VP/GM of **JRfm/CKBD Vancouver** – **Gerry Siemens**, extends his invitation to the **Canadian Association of Broadcasters'** 76th Annual Convention, **Broadcasting 2002** to be held in Vancouver Oct. 20-22. Siemens says more than 80 experts on subjects ranging from small market business issues to international copyright concerns will be on hand.

RADIO: Host **Andre Arthur**, **Cogeco Radio-Television** and **Metromedia CMR** will have to pay \$420,000 to former Quebec Liberal leader **Daniel Johnson** and his wife in a defamation suit after comments made by Arthur on **CJMF Quebec City** and **CKVL Montreal**. Tack on an additional \$115,000 in legal fees. Arthur alleged that Johnson, who served briefly as Quebec premier in 1994, awarded grants to a ski resort near Quebec City and was in a conflict-of-interest situation due to his personal situation. Quebec Superior Court found that Johnson made no such grants and his wife had no personal interest in the ski centre. **Justice Carole Julien** said freedom of expression isn't absolute for the media and information has to be checked: "The behaviour used by Arthur isn't new: insinuation, half-truth, populism, demagoguery. He's looking to awaken the listener's dormant cynicism. Arthur asserts facts that then become his questions. The average listener can

reasonably believe these are established facts"... A planned campaign by the **National Association of Broadcasters** promoting diversity on radio was sparked by satellite radio companies which, says NAB, are promoting myths about the lack of choices on commercial radio. An **XM Satellite Radio** spokesman says it's no myth. Further, says **Jonathan Schwartz**, radio for the most part is mindless, repetitive, computerized and increasingly automated. **Sean Ross**, Editor of **Billboard's Airplay Monitor**, is somewhat less strident. However, he says because there are so few new US stations, gaining one format means losing another. Listeners 35-64 are hardest hit, he says. XM's Schwartz says "That the NAB finds it necessary to attack satellite radio... reveals a growing fear among the so-called 'broadcasters' that satellite radio is miles ahead." Meantime, XM says it's ended Third Quarter 2002 with 201,500 subs, a bit ahead of the 200,000 it projected earlier this year, and that is still on track to reach its projected 350,000 year-end subscribers. .. The Czech service of **Radio Free Europe** was closed Monday after 52 years of broadcasting... The possibility in the US of a delay of Webcasters' payments of digital royalties to artists and record companies is in the works. **Rep. F. James Sensenbrenner Jr.** (R-Wisc.) introduced legislation that would delay royalty implementation for six months instead of a start date of Oct. 20. Sensenbrenner, Chairman of the US House Judiciary Committee, apparently wants payments suspended until pending court challenges to the new rates are heard... **DRRI**, in tandem with **RadioShack Canada**, will be putting on a DAB display at the CAB Convention in Vancouver. Nine new DAB receivers will be on display. Major price breakthroughs are apparently "just around the corner". One example is a receiver from **Modular Tech**, a PCI card, with a retail price of approximately \$219. It provides a seamless desktop DAB receiver delivering CD quality audio, data display, and one touch MP3 recording of on-air programming. This receiver does not rely on an Internet connection. Check www.digitalradio.ca for information... **Z1035 FM Toronto** is the radio sponsor for the **Toronto Student Crime Stoppers** program. There are 175 Toronto schools that have the program in place. Students can call Crime Stoppers anonymously to report crimes within schools, e.g. vandalism, bullying, drugs, weapons, assault, stolen property and so on. Coming up Oct. 23-24, Z 1035 will be the radio sponsor of the Student Crime Stoppers symposium at Metro Hall. Over 150 students from Ontario schools will be attending on each day... **Bayshore Broadcasting** in Owen Sound expects the numbers Friday but already the "word" is that its **Cops for Cancer Campaign** last May/June raised over \$285,000. That amount, raised in an area that supports about 150,000 people, is the best in the country.

SYNDICATION: **Cheryll Gillespie**, who hosts the radio show, *Interiors by Cheryll* (90-secs. daily) has launched *At Home with Cheryll Gillespie -The Magazine*. Five-hundred thousand copies will be delivered this weekend with **The Toronto, Ottawa, Winnipeg, Calgary and Edmonton Suns** and **The London Free Press** newspapers.

SUPPLYLINES: **CKRW Whitehorse** is in the final stages of building new studios. The **Scott Studios** system, **KLZ** news system, **Ward-Beck** on-air console -- all supplied in a turnkey project by **Pippin Technical** -- is expected to be on-air in two weeks... The application uses proprietary algorithms to analyze the music. It creates an audio file, which can be imported to any on-air automation system. With **RCS Smart Editor** built into the program, the programmer can edit, equalize, normalize, add reverb, reduce noise, and create special versions of the song for different stations. *Smart Ripper* analyzes CD audio as well as wave files.

RADIO: The US *Federal Communications Commission* (FCC) is expected to give the go-ahead of IBOC (*iBiquity's* In-Band, On-Channel) digital radio service today (Thursday). But, says *iBiquity* Chairman/CEO **Robert Struble**, it's a two-step process. A further public comment period will be required before *iBiquity* (presumably) is chosen as the standard. That process, he says, probably won't happen until some time next year... **Corus Entertainment** has launched **Deep Sky**, an operation *Corus* describes as "a new radio marketing solutions company." *Deep Sky* is intended to directly connect Canadian advertisers with their targeted consumers. **Corus Radio** President **John Hayes** says the new company will do what no other radio company has done – "create tailored and innovative national marketing strategies for radio advertisers"... **CHUM Limited** and **Milestone Radio** are hoping to land an FM Urban formatted station in Edmonton – in partnership. Application has been filed for 91.7 FM and is a joint undertaking, although *CHUM* is making the actual application. *CHUM* would operate the new Edmonton station with a 51% interest, while **Milestone Media Broadcasting** would hold 49%... Two licence applications are competing to be the next FM radio station in St. John's, Nfld. Both would target adult listeners. A theme in both applications is the need to fill a void caused by format changes at the **NewCap** stations. One application is from partners **Andy Newman** and **Andrew Bell**. The other is from **Newfoundland Broadcasting**, operator of **NTV/OZ FM/The Newfoundland Herald**. **CRTC** hearings are set for Dec. 10 in St. John's... **AVR/Magic 97 Kentville** received one of two media awards (the other went to the **Hamilton Spectator**) from

This Saturday night on **AM740 Toronto's Tom Rivers Reunion-Live**, his co-host will be **Scott Carpenter**, another of the legendary **CHUM Toronto** DJs of the 70s. **AM740** says **Rivers'** show is so different that he's actually "live" and takes requests. The

live show – 6 pm to midnight – may have something to do with lifting AM740's Saturday night ratings from #9 to #2 among 12+ listeners... In her **Toronto Star** column, **Antonia Zerbisias** calls **Tom Petty's The Last DJ** "probably the most ironic song on the commercialized, corporatized music dial in years." Why ironic? Because, as Petty told **The Los Angeles Times**, it's not so much an indictment of the pasteurized and homogenized radio business, but of "listeners who continue to put up with the same-old, same-old crap that comes out of the speakers"... **CHML Hamilton** celebrated 75 years of service to the community yesterday (Wednesday). The station held an open house for the public... **Silk-FM Kelowna** pulled an unusual stunt for this year's *Run for the Cure*, which

Silk FM's Bras across the Bridge

raises awareness and donations for the **Canadian Breast Cancer Foundation**. Silk-FM collected brassieres – hundreds of them – for its *Bras across the Bridge* campaign. The idea was to collect enough bras to cover the distance of Kelowna's one-kilometre-long floating bridge. As it turned out, the station did that and almost made it all the way back along the opposite side... The **KUPD Phoenix** DJ who made an on-air prank call to the widow of St. Louis pitcher **Darryl Kile** has been fired. **Beau Duran** called **Flynn Kile** and asked if she had a date to last Thursday's playoff game. Kile, a starting pitcher for the Cardinals, died from blocked coronary arteries in June while in Chicago for a game... TV/FILM: **Craig Broadcast Systems** has backed-up the launch of **toronto/one** until next September. The station was to have hit the air in the spring but Craig says the delay occurred because of the lengthy appeals

The **CRTC** has dismissed a complaint by **Quebecor Media** that **BCE** has been using profits from **Bell Canada** to cross-subsidize its direct-to-home satellite TV provider, **Bell ExpressVu**. According to the decision, the CRTC says it's satisfied that adequate regulatory mechanisms are in place to prevent cross-subsidization of ExpressVu's operations by Bell; that Bell can't be deemed to be anti-competitive because the prices and rates it charges are regulated... **Torstar Media Group Television** (TMG TV) has been nominated for two 2002 **Electronic Retailing Association** awards in the category of *Best Infomercial Produced Outside the United States*. The awards gala is set for Oct. 15 at the Paris Hotel in Las Vegas. ERA's purpose is "to foster the growth, development and acceptance of the rapidly growing electronic retailing industry worldwide"... **APTN**, the **Aboriginal People's Television Network**, wants a more favourable spot on cable systems and is asking its supporters to write the **CRTC**. GENERAL: The **CRTC** wants more community access and more local programming and, hence, has issued a new policy on community-based media. The Commission's new policy, it says, will work toward greater diversity while offering new alternatives to conventional TV. This new framework replaces existing policies for community channels, LPTV stations in remote areas and low-power radio stations. It also sets out a new licensing framework for community TV. The CRTC, in apparent recognition of converged ownership amongst the Canadian mainline broadcast media, said: "This has led to fewer players in conventional television and radio broadcasting. In some instances, this has resulted in a reduction in local programming and reduced representation of local voices." The process leading up to this new framework began two years ago when the CRTC asked for comments on LPTV. It evolved to include community cable channels and low-power radio... **Jim Pattison** will receive the 2002 Gold Ribbon for Broadcast Excellence at the **CAB's** annual convention in Vancouver (Oct. 20-22). example, **BCE**, **CanWest Global Communications** and **Quebecor**). Indeed, Astral and Torstar were criticized a couple of years back for not making convergence moves. High-cost debt, the fallout from costly acquisitions, is the most common concern among financial analysts... For the first time since 1970, the US **Federal Communications Commission** – by a vote of 4-0 – has scuttled a major media merger. The FCC rejected the proposed merger between **Echostar Communications** and **Hughes Electronics**. The \$26-billion deal would have created the largest US pay-TV service... Third-quarter losses

deepened at **Rogers Communications** as special charges, high interest expenses and foreign exchange losses offset a 13% increase in revenue. Rogers said yesterday (Wednesday) that revenue in the three months ended Sept. 30 was \$1.1 billion, up from \$980.7 million a year ago. Operating profit rose more than 20% to \$310.8 million, but the net loss widened to \$99.8 million, 68 cents per share. This compared with a year-earlier loss of \$90.4 million, 52 cents a share... Toronto-based **Genesis Media** now has the media planning and buying assignment for **CBC**, responsible for CBC-TV and radio's ad presence in English Canada. Genesis replaces **Harrison Young Pesonen Newell** which held the account for the last three and one-half years.

TV/FILM: Twin-stick operations (**CBC and CTV programming aired on separate transmitters by a single operator**) in Saskatchewan and Ontario have come to an end. The **CRTC** has approved **CBC's** buy of transmitters associated with six CBC affiliate stations owned and operated by **CTV**. The agreement covers **CKBI-TV Prince Albert, CKOS-TV Yorkton, CFCL-TV Timmins, CHNB-TV North Bay, CKNC-TV Sudbury** and **CJIC-TV Sault Ste. Marie**. The two Saskatchewan stations will see **CBKT Regina** transmitted to Yorkton and its repeaters and **CBKST Saskatoon** to Prince Albert and its repeaters. In Ontario, **CBLT Toronto** programming will go to the four stations and their repeaters. Because of the twin-stick status, CTV programming to all these communities won't be affected... **Corus Entertainment** and **Shaw Communications** have introduced Canada's first subscription-based Video-on-Demand (SVOD) service. It's called, **Movie Central EXPRESS**. Subscribers will pay a monthly fee rather than

per transaction. The service is to be launched next month in Calgary... **CJOH-TV Ottawa** VP, News & Public Affairs **Max Keeping** is celebrating his 30th anniversary at the station. Keeping also retains his News Anchor position, possibly the longest-serving anchor at the same station... In London, **Granada Media PLC** and **Carlton Communications PLC** say they are in advanced merger talks to combine Britain's two largest independent TV production companies. The two companies produce programs for **ITV**, and are ITV's biggest shareholders. The merger would be a major step in the consolidation of the broadcasting industry in Britain... Toronto-based **iLoveTV Entertainment Inc.** and Delray Beach, FL-based **Five Star Productions** have formed a strategic partnership to assist iLoveTV's penetration of the US interactive media market. Five Star will provide a home for iLoveTV's US production facilities which, says iLoveTV, will allow for rapid deployment of its TV technology for sports and entertainment events. The two companies are also evaluating the technology to provide interactivity and convergence for Five Star's syndicated TV programming... That October 6 interview with **Jerry Falwell** on **CBS' 60 Minutes** – simulcast on a number of Canadian stations – in which the right-wing Baptist pastor characterized **Muhammad** as a terrorist isn't sitting well with the **Canadian Islamic Congress**. It is filing a complaint with the **CRTC** contending that Falwell's remarks about the prophet of Islam were hate-speech against a religious minority. Falwell has since apologized – and the congress has welcomed it – but says it will still file the complaint.

RADIO: There has been a growing call, primarily by US radio execs, for more research before the Portable Person Meter (PPM) is deployed any further by **Arbitron**. Arbitron VP of Research and Standards, **Bob Patchen**, says the US measurement service has to determine why morning drive numbers are lower in PPM ratings than in diaries. Interestingly, the 12-17 and 18-34 demos – as measured by both diary and PPM – are exactly the same. Where the problems surface are with the 35-54 and 55+ demos... In conjunction with the **City of Toronto**, a **Johnny**

On Dec. 4, there will be a Johnny Lombardi Memorial Tribute Dinner fund-raising event which will be a celebration of the life and times of the late **CHIN Toronto** founder... Still with **CHIN**, the operation's new Ottawa station will be located in the heart of the Bytown market at 31 Murray Street. The ethnic station is set to launch early in the new year although the **CRTC** has approved an extension for its going to air to April 4 ... **Barry Stewart, CHUM-FM Toronto's** APD/MD, suffered a mild heart attack late last week. He has been released from hospital and is recuperating at home... Former **The Team** jocks **Jim Van Horne** and **Paul Romanuk** have filed separate lawsuits against **CHUM Radio**. Romanuk says CHUM still owes him \$400-thousand for the final two years of a guaranteed three-year contract which, he says, is not being honoured. Van Horne is said to have signed a five-year contract, also guaranteed, for \$250-thousand last year... In Detroit, Oldies outshone the competition and carried **WOMC-FM** – by 0.1% – to the top of the pack in the **Arbitron** July-August-September ratings. The **Infinity**-owned station moved into first place among all Detroit area listeners, nudging News/Talk **WJR-AM Detroit** into second... The latest stupid DJ stunt took place in Kansas where attorneys for a man accused of killing women and stuffing them into barrels asked for a change of venue after the jock handed out T-shirts on the courthouse lawn that read “roll out the barrels”... Last Friday night, **The Q! Victoria** GM, **Dan McAllister**, drew the names of five people who each got a key – and a chance – to win a house. Alas, the cost of housing was beyond The Q!'s modest budget of \$5,000 so staffers had to move farther and farther out of town to find just the right property. In the end, they said, they found “the perfect house” – in Govan, Saskatchewan (pop. 276). Govan, says the PR note, is “a short 19-hour drive from Victoria, and the whooping crane capitol of the world.” Tomorrow (Friday), the finalists – flown to Regina, then driven to Govan – will each try their keys during the station's morning show.

TV/FILM: The **CRTC** has rejected the **Black Market Coalition's** complaint against an alleged grey- and black-market satellite-TV distributor. The Commission said there's insufficient evidence to conclude that CTY Telecom of Toronto illegally distributes broadcasting signals. CTY Telecom said it sells equipment but is in no way connected to a broadcasting provider. The Coalition includes the **Canadian Cable Television Association** (CCTA)... Meantime, **Bell ExpressVu**, **CTV**, **Astral Media** and **Alliance Atlantis Communications** have launched a \$100 million lawsuit over satellite TV piracy. GENERAL: **CHUM Limited** has reported a \$4-million loss for the fourth quarter which it blames on higher operating costs and interest expenses from the acquisition of new stations. CHUM says it lost 35 cents a share for the three months ended Aug. 31. That compared with profits of \$1.6 million or 14 cents a share last year. Quarterly revenues rose to \$116.7 million from \$103.8 million. CHUM paid \$125 million for **Citytv (CKVU-TV) Vancouver** last year. CHUM's operating expenses were higher -- \$111.3 million compared with \$95 million last year. The company also booked \$7.8 million in depreciation costs in the quarter, compared with \$4.7 million last year, and paid \$2.6 million in interest costs, up from \$2.1 million. For the year, CHUM reported profits of \$14.1 million, down from \$17.5 million in 2001. Yearly revenues rose to \$479.9 million from \$413.1 million... Of 139 countries surveyed, four North European democracies -- Finland, Iceland, Norway and the Netherlands -- are first when it comes to press freedom. China and North Korea have the least. **Reporters Without Borders** says the first non-European country on the list is Canada, rated 5th. The press watchdog group says the US 17th ranking reflects the number of journalists detained or jailed, with arrests often motivated by journalists' refusal to reveal their sources. Another aspect in the American ranking -- particularly since Sept. 11 -- is the number of journalists who have been detained for violating security perimeters of official buildings... **RTNDA Canada's** professional development seminar will be in Calgary next month (Nov. 16), continuing on the success experienced in Toronto two weekends back. TV/FILM: **Craig Broadcast Systems** has received a **CRTC** seven-year renewal for **A-Channel** in Manitoba and Alberta despite

Commission criticism over slotting Canadian programs elsewhere but prime time. **Elizabeth McDonald**, President of the **Canadian Film and Television Production Association**, says it's the first time the CRTC has noted concerns about the scheduling of Canadian programs and that it sends a message to other Canadian television operators. The Commission also said Craig has spent only \$3 million of its \$14-million production fund over the last five years and has not fulfilled all of its regional programming commitments. *(Ed's Note: See the November edition of **Broadcast Dialogue** magazine for an extensive feature – **Canadian TV Production: The system's not working** – by Senior Writer **Daphne Lavers**.)*... **CBC** and **Alliance Atlantis Communications** will jointly commission Canadian TV projects. Under the three-year deal, projects commissioned will be broadcast first on CBC, then on Alliance Atlantis specialty channels. CBC Exec. Dir. of network programming, **Slawko Klymkiw**, says the deal gives CBC added money at a time when dollars are scarce for producing Canadian drama and comedy. Alliance Atlantis Chairman **Michael McMillan** says collaborating with the CBC in producing and broadcasting Canadian television is a critical mandate for the company... Television is exposing the music and creating sales; not radio. That's the premise of **Associated Press** writer **David Bauder**. Television, asserts Bauder, has supplanted radio as the chief means of exposing new music, particularly for veteran artists. He writes that fans of Springsteen and **Tom Petty** and **James Taylor** (*October Road*) aren't likely to be reading music magazines or visiting music stores to see what's new. They're watching TV, though... **Pelmorex Inc.**, which operates **The Weather Network** (Mississauga) and **MétéoMédia** (Montreal) and employs close to 300 people, is one of Canada's top 100 employers, according to **Mediacorp Canada Inc.** That status is published in its book entitled *Canada's Top 100 Employers - 2003 edition*... The **National Association of Broadcasters** reports that there are now almost 520 US TV stations broadcasting in digital. DTV signals are now being transmitted in 153 markets that include just short of 92% of US TV households. Forty-six per-cent of US TV households are in markets where broadcasters are delivering four or more DTV signals... The **BCTV Vancouver** crew that shot video of former BC premier **Glen Clark** in his kitchen

during a controversial police raid gave a retirement gift to the chief investigator in the Clark corruption case. BCTV Cameraman **Gary Hanney** made the presentation at a Tuesday luncheon for Staff Sergeant **Peter Montague**, who is retiring after 31 years in the **RCMP**. Senior BCTV Reporter **John Daly**, who was at Clark's house during the raid, was also at the luncheon. Both men refused to explain why they presented the token gift. Astral Media has agreed to sell to **TVA Group** and to **Radio-Nord**, subject to **CRTC** approval, all of its AM assets in Québec as a network and **CFOM-FM Quebec City**. That leaves Astral with **CIKX Grand Falls**, **CJCJ Woodstock**, **CFXY/CIBX/CKHJ Fredericton**, **CKTO/CKTY Truro**, and **CKBC Bathurst** in the two Atlantic provinces, plus the **Energie FM** and the **Radio RockDetente** FM networks in Quebec... **Mojo (CFYI) Toronto** is off the hook for what's described as a "mild but tasteless ethnic joke." The **Canadian Broadcast Standards Council** had received a complaint from the **Chinese Canadian National Council** about a segment that included "sarcastically stereotypical content" and which was derogatory and disrespectful towards Chinese Canadians. CBSC ruled that the joke wasn't in breach of broadcast standards... In another **CBSC** decision, comments made on **CKRS-AM Chicoutimi** promoted violence against women. CBSC concludes that host **Louis Champagne's** remarks that "some women need a slap in the face" were in breach of the **Canadian Association of Broadcasters** Code provisions concerning human rights, sex-role stereotyping and violence against women. The complete decisions on both Mojo and CKRS-AM may be found at www.cbsc.ca...

Kevin Zahara, the 19-year-old Morning Host at **CKBA Athabaska**, is off the air until the end of November because he's a candidate in a town byelections for Councillor. If elected, he'd be the youngest councillor in Athabaska history.
