McDonald, Wilson Disagree

Commdr. McDonald quoted Mr. Wilson as saying "investigations have not reached the stage that will permit the establishment of commercial standards" and that "it has already been demonstrated that a suitable converter can readily be applied to sets now in use" to make them tune both VHF and UHF channels.

The Zenith head observed:

"I would like to know why Mr. Wilson leads the public to believe that converters will make present receivers work on the new frequencies, if he does not know what the standards are to be. He should know that if the present 6 me standards are changed no converter will work on the new frequencies and of the present receivers can be made to function properly on the ultra-hig..."
